Willard Damm, President-elect

Robert Wilson, Secretary-Treasurer

A free and non-profit bulletin issued by Indiana University School of Dentistry, Indianapolis, Indiana, for the purpose of keeping its alumni informed of the activities and progress of the School.

The Department of Oral Diagnosis: Progress Report

David F. Mitchell, Professor and Chairman

It has been ten years since a report on this department has been made to the alumni. There have been changes in staff, procedure, and physical facilities of the area. It seems pertinent to review these changes, invite visits to the department, and urge all dentists to use the department as a consultation center for problems in diagnosis.

The purpose of this department are three-fold: (1) To teach students the technic of establishment of a diagnosis. Special efforts are made to correlate the basic health sciences with the clinical sciences in endeavoring to teach the student to appreciate his role as a dentist in the preservation of general health as well as oral health. (2) To admit patients for general and special clinics throughout the school. More than 10,000 patients visit the clinic each year and are routed to the special areas of the school for treatment by students under supervision. It is recognized that not all of these people can have all of their dental care performed here and yet there is a continuing need for large numbers of patients to be used in the teaching of clinical oral diagnosis, radiographic examination, oral surgery, and other special clinics. (3) To serve as a consultation clinic for the dental practitioners of the state. Special, unusual cases which can be used for teaching purposes are welcome and we request that the practitioner refer them direct to the department with some written details of the problem, and his wishes as to how far we should go in diagnosis and treatment. If recent radiographs or study models or other auxiliary aids to diagnosis also are furnished it may save the patient some time.

Four cubicles have been established through the use of partitions, and in each

cubicle a dental unit, chair, and cabinet are present. (Figure 1). Pulp testers, air and water are available and viewboxes and enlarged bracket tables to hold the written records have been installed. In addition to these four units another cubicle has been established for the care of the emergency patient. (Figure 2.) Minor emergency treatment procedures are employed here if they can be used as a learning exercise for the student, and at the same time, tide the patient over until further care can be received in the special clinics. In addition, the area has been painted, and air conditioned, and a tile floor has been placed in an effort to make the first visits of the patient to the school pleasant experiences.

Thirty lectures devoted to oral diagnosis are given to the junior students. Stress is placed on the complete clinical examination including abnormalities to be detected in general body characteristics, the face, neck and hands, lips and cheeks, tongue, floor of mouth, palate and pharynx, gingivae, the teeth themselves, their occlusion, the temporo-mandibular joints, salivary glands and regional lymph nodes.

For clinical experiences, each junior and senior student is assigned to the clinic at various intervals for a total of one weeks time during each year. Additional time is spent on a volunteer basis, especially during the summer months. The diagnosis of the individual patient is usually accomplished during the course of two visits. On the first visit a general examination is made for gross abnormality and a complete interrogation regarding the general health status is performed, and radiographs are ordered. The patient then is sent for radiographs, and dismissed

(Continued on page 6)

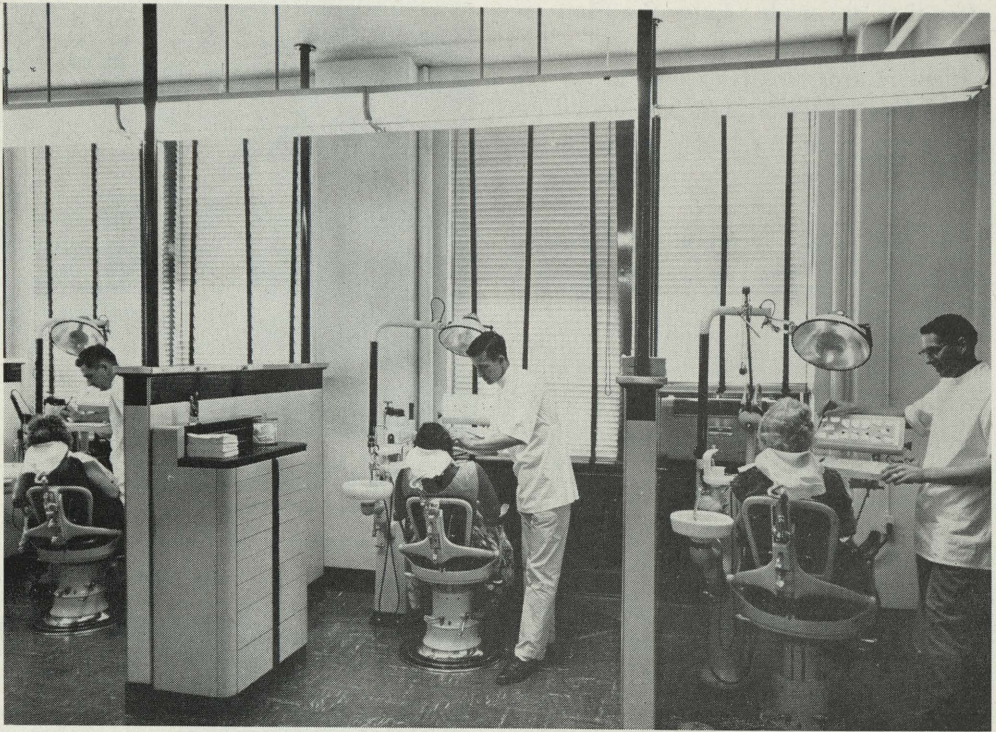

Figure 1. Shows three of the new cubicles in use. Besides the partitions which provide a greater degree of privacy during the examination and interrogation, other innovations such as the enlarged bracket tables and X-ray viewboxes may be seen.

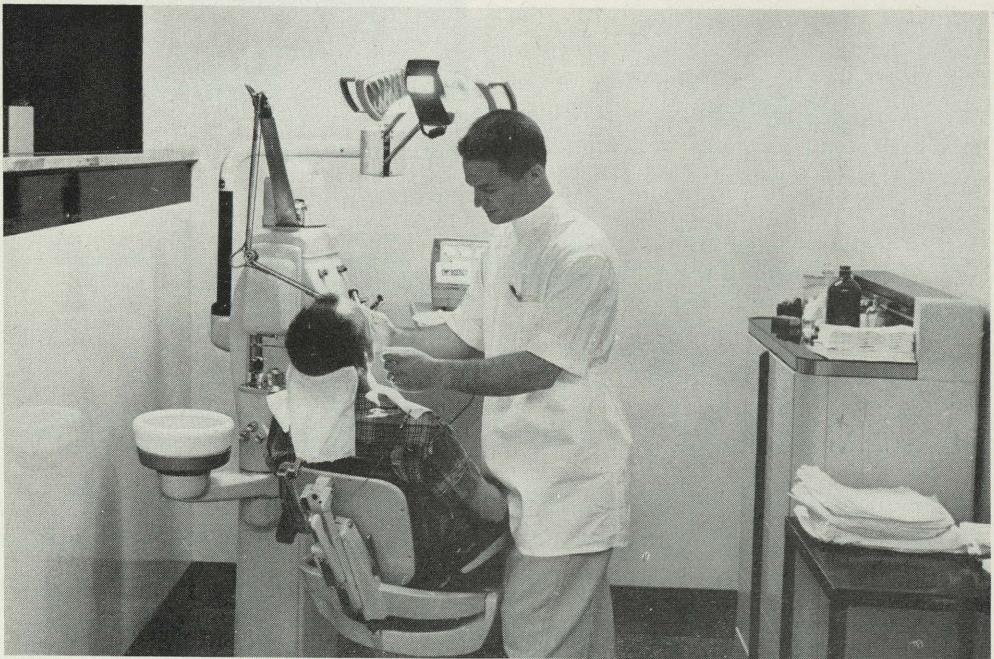

Figure 2. The emergency cubicle is furnished with a new chair and complete dental unit including a new unipolar pulp tester. The cabinet is equipped for the emergency needs of patients as well as for special diagnostic procedures involving the use of such techniques as study models, salivary duct probes and others.

after they are made. Later the films are developed, dried and mounted. The patient returns at a later date to be seen for a detailed dental and periodontal examination with the aid of the radiographs on the viewbox at the chairside.

In the clinic, attempts are made to stress the actual technics for diagnosis including pulp tests, excavation and exploration, palpation, percussion, thermal tests, and referral for biopsy, cephalometrics, blood and urine chemistry, and other diagnostic measures available in the school or hospitals. In addition, a three-hour discussion is held with small groups of junior students each week, during which the techniques of establishing bleeding time, clotting time, and blood pressure are practiced by the students on one another. Transillumination and the (rather limited) use of the Woods light or other special instruments for diagnostic purposes are demonstrated, and problems of radiographic interpretation are illustrated and discussed.

Clinical research on several problems is being conducted or anticipated. Co-ordinated research activities at the Muscatatuck State School are in progress. Consultation with other institutions of the state is in effect. Laboratory facilities have been made available in conjunction with the Department of Oral Histopathology wherein research in periodontal disease, caries, and tissue reaction to dental materials is in progress.

The following case history illustrates the role of the clinic in cases referred for consultation and/or treatment. A 14 year old girl was referred by a dentist in a neighboring community for diagnosis and treatment of a painless, fungating growth springing from a radiolucent area in her right mandibular molar region. (See Figures 3, 4 and 5). The patient had been aware of the presence of pathology in the area for one year and the growth had increased in size over several months. About one year ago an acute swelling

(Continued on page 27)

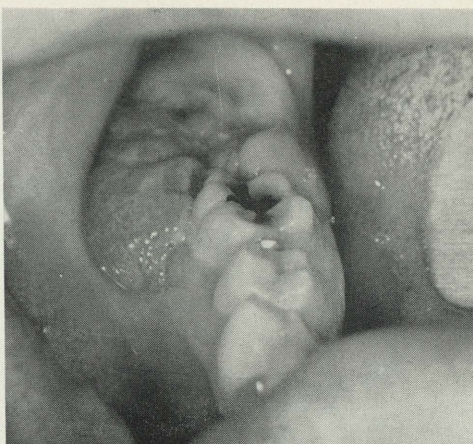

Figure 3. A large, firm, red, granular, fungating growth is present in the lower right second and third molar areas.

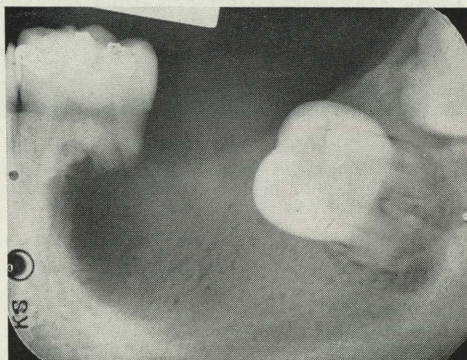

Figure 4. This large radiolucent area of bone destruction involving the distal periapical portion of the lower first molar and the unerupted second and third molars also shows the presence of superimposed, altered trabecular bone pattern which sometimes is present in areas of active bone repair superimposed on an area of previous bone destruction.

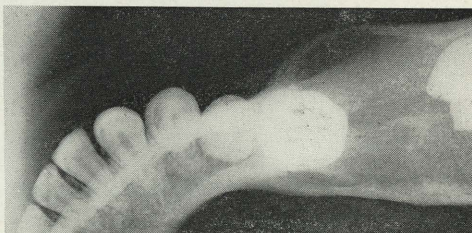

Figure 5. The occlusal view of the area illustrates the bucco-lingual degree of expansion of the alveolar plates of bone around the radiolucent area of bone destruction.

President's Message

H. J. Healey, President, I.U.S.D. Alumni Association

To the members of the I.U.S.D. Alumni Association:

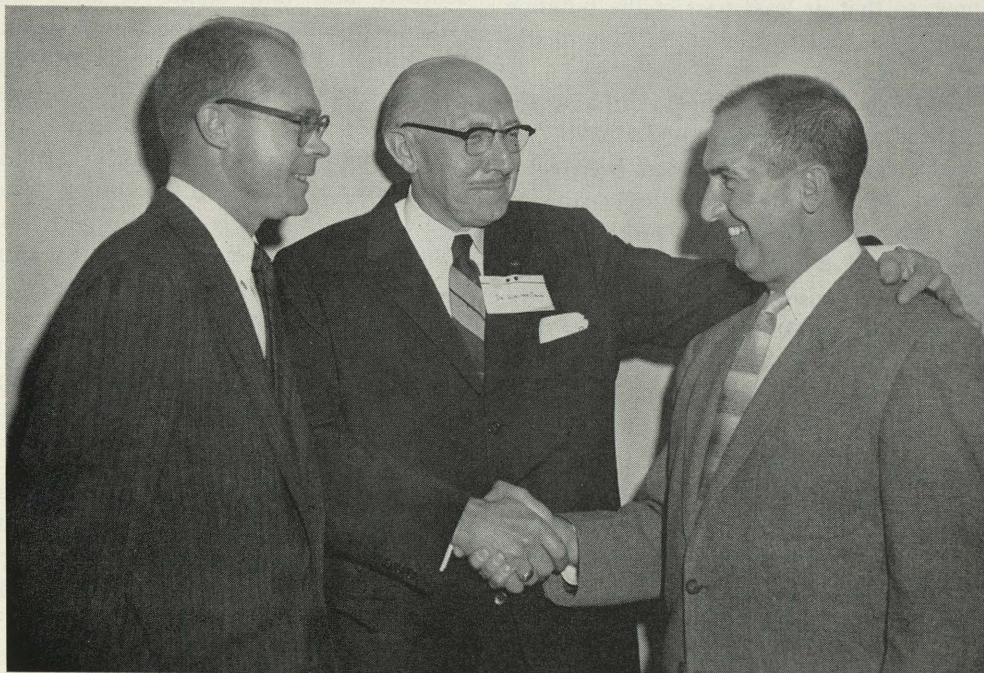

As President of the School of Dentistry Alumni Association, I appreciate this opportunity to discuss with you this important organization of the University and the School of Dentistry. Now in its thirteenth year following its post-war reorganization in 1945, the Association has enjoyed progressive success and popularity. I am happy to express the gratitude of the other officers and members of the Board of Directors for the past cooperation and assistance which we have received from the members of the Association.

Your attention is directed to certain alumni activities which took place as usual during the mid-winter meeting of the Chicago Dental Society in early February. The traditional alumni room was open once again on the fifth floor of the

Conrad Hilton. Many members and friends visited and used the room and enjoyed get-togethers with classmates and others. At Tuesday noon during the Chicago meeting the annual Alumni Association luncheon was held in the Conrad Hilton. A capacity number was in attendance and honored guests included Federal Judge John S. Hastings, President of the I.U. Board of Trustees, Dean G. D. Timmons and John E. Buhler, each an alumnus of I.U.S.D. and Phil Dickens, head coach of the I.U. football team. The latter presented an address in his own inimitable manner. Dean Maynard K. Hine extended the official greetings for the School of Dentistry.

For the other officers and the Board of Directors, I extend a cordial invitation to each of you, your wife, family and friends to attend the 1958 annual meeting

(Continued on page 29)

Retiring president, Dr. Walter A. Crum, Richmond, congratulates the new president, Dr. Harry J. Healey, Indianapolis, as President-elect Willard Damm, Evansville, observes.

Dean Hine reports that...

Plans for the addition to our dental school are now completed, and actual construction should start in a few weeks. If all goes as well as it could, it will be possible to move into the new building by the time the dental school starts in the fall of 1959. While this is somewhat later than we had originally hoped, we count ourselves lucky to have this addition made available to us. The delay has also given us more time to spend on study of the freshman curriculum and will make it possible to get organized in the new extensive Basic Health Science building before moving into the new dental school addition. Incidentally, equipping the new basic science building with its complex variety of teaching laboratories for biochemistry, physiology, gross anatomy pathology, microbiology etc., has proved to be most difficult and time-consuming. Rapid progress is being made now, so that at least part of the building should be available for use in May of this year.

The new 105-apartment building for married students, about two blocks west of the dental school, has now been completed and will be ready for occupancy by March 1. We are also promised that the new wing for our Union Building which will house 250 single students will be completed by mid-September of this year. Many of our undergraduate and graduate students are planning to live in these University-operated facilities.

All the emphasis which has necessarily been placed on buildings recently has not hampered our teaching program appreciably. It is pleasant to report that our freshman class is making excellent progress, as evidenced by the fact that the freshman year (first semester) grades were higher than they have been for many

years. Only .2% of the grades earned were below "C". Academic and clinical progress of the upper classman has also been commendable.

Alumni will be interested to know that the dental section of the American Association for the Advancement of Science met in Indianapolis this last December and that the program was under the general direction of Dr. Joseph C. Muhler and myself. The program was in the form of a symposium on fluorides and all the papers are being considered for publication as a monograph by the A.A.A.S.

Many members of the faculty are working on details of the Centennial meeting of the Indiana State Dental Association, which will be held in Indianapolis May 18, 19, 20 and 21 of this year. It is our firm conviction that dental education will benefit by cooperation with organized dentistry and that dental organizations can benefit from their contacts with dental educators. Oftentimes dental faculty members have been accused of dwelling in isolated ivory towers and dental organizations are accused of disregarding the source of future members of their organizations, namely, dental schools. Complete cooperation between the two groups seems highly desirable; for this reason our faculty members are encouraged to cooperate with all ethical dental organizations, and practicing dentists are urged to keep in touch with the school.

Many classes are planning reunions this year. We urge particularly the "five and ten year classes" to meet, especially the 1933 and 1908 classes. Of course, all classes may have reunions if they desire! If we can do anything to help organize class reunions, please write us.

Biopsy Service

William G. Shafer, Associate Professor and Chairman, Department of Oral Pathology

The Department of Oral Pathology expanded its facilities in 1950 to promote the biopsy service then in operation supported by the School of Dentistry and available to all dentists in the state of Indiana. This service was established primarily to offer greater opportunity for the early diagnosis of lesions of the oral cavity. It also afforded material for use in the various teaching programs of the dental school.

No charge was placed on this service and all mailing cartons were supplied free as well as the tissue reports. Eventually, the size of this service and the number of specimens processed annually reached a point at which it became necessary to impose a small fee. In October 1954, a charge of \$2.00 was made for

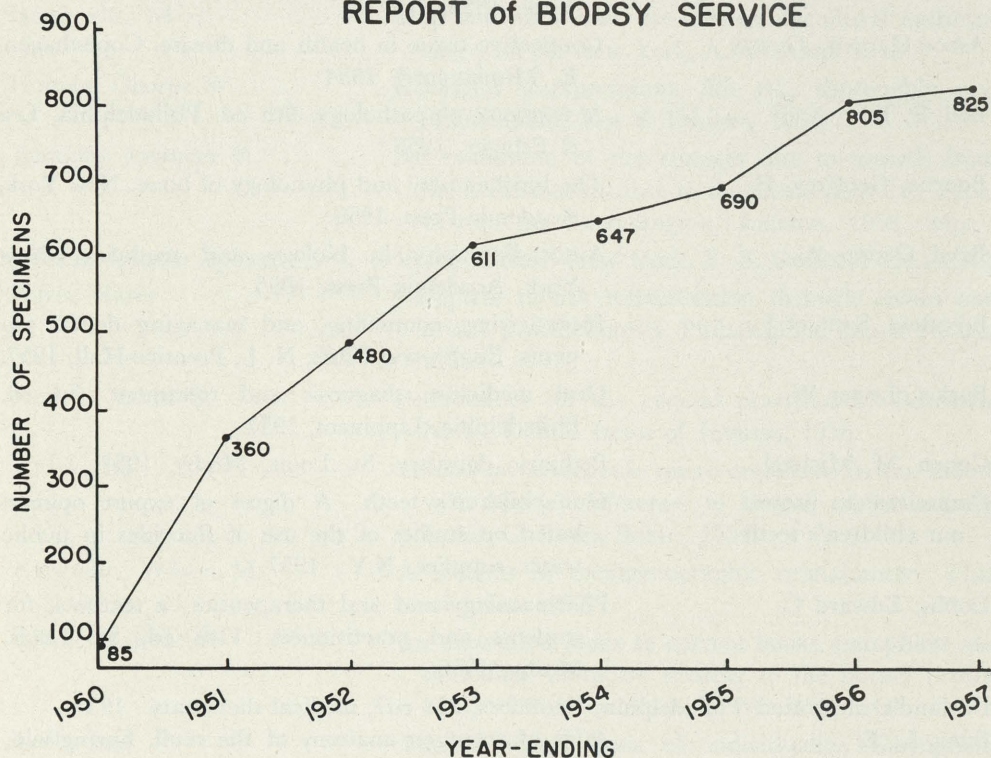

each tissue report. This small fee does not cover the cost of preparation of each specimen but the School of Dentistry defrays the remainder of the expense as part of its teaching program.

The growth of the biopsy service, year by year, is graphically shown in the accompanying figure. The great increase in the number of specimens processed has emphasized the importance of this procedure as a diagnostic aid for the general practitioner of dentistry. There has been a direct increase in the number of malignant oral tumors diagnosed each year concomitant with the increased number of specimens processed.

Dentists of Indiana are urged to continue assuming the responsibility of in-

Dental Hygiene

A. Rebekah Fisk, Director

Class of 1954

The latest news from the Dental Hygiene Department is the success of our first Post Graduate Seminar. All of those who attended have expressed their appreciation of the program and want to return for another one sometime soon.

We were glad to hear from so many of you during the holidays and shall pass along the news we gleaned from the cards we received.

Class of 1952

Both Mary Lou and Al Dreher, also Charlotte (Havens) and Ernie Verberg write that they are now the proud owners of their homes. Nina (Jarrell) and Raleigh Phillips now have one Raleigh Phillips III for the extra bedroom in the new home they built last year.

Class of 1953

Mary Lou (Shideler) and Ray Halle write that they have a new son, Patrick, age 5 months, and that they will be back in civilian dental practice in northern Indiana in June.

Nannette (Noirot) Hatton and family are now living in Hamilton, Ohio, where Nan is happy to be back in part-time practice. Ruth (Cleveland) Wirtz says that her only connection with dentistry lately has been the observance of the eruption of James Woodrow's deciduous teeth. Betty (Gilchrist) and Jack Keck and son, David, are now living in Carmel. After five years of practice in Fort Wayne, Anne Keenan is leaving the Hoosier state for California this summer. We shall miss her around here where she has contributed much time and effort to our state organization. Beatrice (Davis) Pierson and family are now living in Hammond, Indiana. This is the year you should all come back for your first class reunion in May.

Geraldine Bailey writes that Bob will be discharged from the service in January but they plan to stay in Texas until he finishes law school. Marcella Mitchell was married in June to John J. Keefe. Since they were to live in Iowa, Marcella dashed over before the wedding and took the Board but we haven't heard whether she is practicing or not. Marilyn Poel and family are now living in Chicago. Marilyn has retired from practice but took the Illinois Board just in case. One very warm day last summer Ted and Lenore Clark stopped in to see us. They enjoy the service and are living in Washington. They will extend their tour of duty and hope to get an overseas assignment. Joan Kline is President of the Indiana State Dental Hygienists' Association and is very busy planning the details of the state meeting. Patricia and Dan'l Boone are very happy in their new home and Pat is particularly happy to be practicing part time in Macon, Georgia. Carol (Ottinger) Rosenbrock has reported a second daughter, Nancy Sue. Carol is not practicing but is called on frequently to substitute whenever the "Flu" bug takes somebody out of the office. Barbara (Rambo) and Jon Herrold are in the service and stationed at the Aberdeen Proving Grounds in Maryland. Dorothy (Eastlund) Robinson and family have been living in Bloomington while Don finishes school. They now have a son and twin daughters. Guess the Landreth's (Kay Boese) are ahead in the production department; they now have a third son. Elizabeth (Finley) and John Oldham also have a daughter. Betty (Kiefer) and Bob Halsey have purchased a house around the corner from the Christmas' in Evansville. Marty Chris-

tmas, Joan Kline, Adrienne McKinney and Donna Dodd were back for seminar.

Class of 1955

The Christmas card of Mary Ann (Penn) and Chuck Rolando was a picture of their son, Marc—judging from the picture he must be quite a boy. Doris (Rock) and Ray Klitzke and two sons are now living in New York. Beverly Buroker has announced her engagement to Oscar Hopkins who is attending Purdue. Mary (Logston) Reno has a son, David. Mary Cora (Walker) Jackson says that Bill will graduate and they will leave Purdue in June. Mary Ann Huneck was married to Dr. George Batcho in January and is living in East Chicago. Janet Tarnow has a new house. If we had given prizes to the class which had the most attending seminar it would have gone to this one. Carla Totten, Mary Lou Reed, Marjorie McLarnon and Beverly Buroker were here for seminar.

Class of 1956

The first Christmas card we received came from Japan and was from Janice (Clinton) and Gene Fryar, D'56. They are really having fun. Delores (Ent) and Dick Abbett are now back in Indianapolis with son Dick. Dede is working for Dr. Irwin and Dr. Esmond and Dick is attending Butler University. There have been several weddings in this class. Phyllis Wolf to Herbert Rhodes in August. Phyllis is now a clinical instructor at school. Gwen Greenlee to Charles Robert Russ in November in Denver. Barbara Jones to Bruce Meyer in August and Janice Mallory to Richard Witzen in December. The Gibsons' are now living in their own home which Virginia says they love mud and all.

Class of 1957

Several members of this class have been back to school recently. Mary Ann

(Healy) Hogan came all the way from California to take her practical State Board which she was too ill to take in June. Jackie Hite and Loretta Massa were here for seminar. Peggy Fixel came along for the ride one day when Dr. Weinraub came down to attend a meeting. Sylvia Baldwin and Marilyn Hall were here last week to pick up some material for a T.V. show they will do on WXLW during Children's Dental Health week. There have been several weddings in this class, too. Betty Barr to Dr. Carl McKee. They are now living in New-foundland where Dr. McKee is on duty with the air force. Jackie Muehlbauer to Dr. Gerald Edgar French, D'57. Corrine Ann Nowinski to George Patton. Jeanne Ann Wright to Dr. John Collins, D'57. The Collins' are on duty at Camp Campbell, Kentucky. Nancy and Basil Remley now have two sons, Kent and Reed.

Be sure to pay your state and national dues and come to the meeting in May.

Post Graduate Courses

The Faculty Postgraduate Committee wishes to call your attention to the advanced course in endodontics, March 10-12, and the course in advanced operative techniques, April 8-11, which will include attendance on April 9th at the symposium on amalgam, when Dr. Miles Markley, of Denver, Professor Ralph Phillips and Dr. Drexell Boyd will speak.

On April 14 through 18, a course will be offered in crown and bridge construction. Dr. Frank Vedder, chairman of the Crown and Bridge Department at the University of Michigan School of Dentistry, will be guest instructor, discussing the construction of both anterior and posterior upper bridges.

In June, 16-20, Dr. Rush Bailey will conduct a course in complete denture construction. He will be assisted by Drs.

(Continued on page 28)

Alumni Notes

Mrs. Cleona Harvey, Recorder

Since the January Bulletin is coming out in February, it gives me a chance to wish you all a happy Valentine's Day!

One of the things I enjoy about this column of mine is the fun of reviewing the letters you all write. Just wish more of you would remember how eager we are to have news of you to pass on to your classmates!

And now for news of the

Class of 1892

Dr. A. Archie Powell, 1984 Lundy Avenue, Pasadena, California, writes as follows,

"Arthur T. White (89) and A. Archie Powell (near 90); both of New Castle. We two graduated from Indiana Dental College March 1, 1892. Both are residents of Pasadena. Dr. White continues with good practice; Dr. Powell retired in Illinois in 1932, came here in 1938. Had several heart attacks in June, 1956. He continues an easy time at his home.

"Of course I hope that this 'famous headliner' arrives in time for your January Alumni News." We are glad it did, too!

Dr. Arthur T. White, 345 Parkway Building, 117 E. Colorado Street, Pasadena, California, writes,

"The class of 1892 is still on the map, functioning about as last reported. Dr. Powell is confined to his home very closely but talks cheerfully as of old. I am still at the office every day doing my bit, am now looking forward to March 1 when I expect to start my 67th year at the chair; feel fine, eat and sleep well. God bless you all."

Class of 1902

We have received a letter from Mrs. C. M. Shawver, 204 W. Latimer, Ab-

ingdon, Illinois, telling us of the death of Dr. Shawver:

"My husband was a graduate of Indiana University School of Dentistry in 1902. He practiced in Elmwood, Illinois, for 25 years and here in Abingdon, Illinois, for 30 years. He always talked and planned to return to Indianapolis to see how his school had grown but somehow the opportunity never came. He corresponded some with some of his classmates, but he and Dr. Roland Low kept writing and seemed to have stayed in practice the longest. Doctor was still a very active man and practicing dentist up until December, 1956. On August 16, 1957, he passed away of a coronary occlusion.

"It was one of Dr. Shawver's requests that his school be notified of his passing. He was 78 years old. He was preceded in death by one daughter at age 21; he is survived by his wife, one other daughter and one son.

"Indiana Dental School meant very much to Dr. Shawver; in heart and spirit he was a loyal alumnus. Thank you for making a note of his passing."

Class of 1914

We received a card from Dr. Harry V. Talbert, 1307 North Roan Street, Johnson City, Tennessee, telling us that he retired from the Veterans Administration Center at Mountain Home, Tennessee, on February 28, 1957, after 30 years as Chief, Dental Service.

Class of 1929

Dr. and Mrs. J. M. Sakurai, 1087 Aala Street, Honolulu, Hawaii, remembered us at Christmas with a greeting.

Class of 1932

We also received a Christmas greeting from Dr. and Mrs. S. Nakamori, 908 North King Street, Honolulu.

Class of 1937

Lt. Col. S. Kingdon Avery, Dental Detachment, Camp Zama, APO 343, San Francisco, California, writes as follows:

"On graduation took an internship at the Marine Hospital at Baltimore, Maryland, for a year. Following was appointed house dental surgeon. After six months was sent to Marine Hospital in Key West, Florida, for two years, where married my wife, Barbara. While at Key West took the army examination and decided to make it a career; was sent to Walter Reed Army Hospital, Washington, D.C., for a year, when the second war came. Spent a time at Fort Vandorn, Mississippi, then Fort Sam Houston, Texas, then to New York and on to England for a time. Was attached to headquarters of General Patton's third army until the end of the war. Then spent another year and a half in occupation of Germany. After returning to the U.S. took short courses at Ann Arbor, Michigan, and Washington, D.C., while attached to Walter Reed Army Hospital, then received Master of Science degree from Washington University, St. Louis. While here our first child, John, was born. After spending three years in San Antonio, we are now located in Japan."

Class of 1944

We received a change of address from Dr. Dudley S. Moore as follows: 1173 Montgomery Drive, Santa Rosa, California.

Dr. Carl Stoner sends us the following news:

"I am a student again; I spend three days a week at Tufts in Boston furthering my studies in periodontology. Making an 8 o'clock lecture when I live a hundred

miles from school is becoming quite an ordeal, but I hope to continue for at least two years . . . My practice (alas, only three days a week) is now limited to periodontics and endodontics."

Class of 1948

We were pleased to receive a Christmas greeting from Lt. Col. and Mrs. Robert H. Marlette. Their address is 4069 29th Street, Lawton, Oklahoma.

Class of 1949

We were also grateful for Christmas greetings received from Dr. Wigand Kenter, 218 East Kirkwood Street, Bloomington, Indiana.

Dr. and Mrs. Sam Laudeman, 1641 Main Street, Elwood, Indiana; and Dr. and Mrs. Ernst Rosenthal, 1266 Oliver Street, Indianapolis, Indiana.

Class of 1950

Dr. Howard M. Stein announced the association of Dr. Richard F. Walling (Class of 1955) and Dr. Jack Weinsoff (Class of 1954) with him at 6631 Laurel Canyon Blvd., North Hollywood, California.

Class of 1951

Dr. Charles H. Redish, 3763 Broadway, Indianapolis, sent us Seasons Greetings.

Class of 1952

Dr. and Mrs. Rafael Aponte sent Christmas greetings from Ponce, Puerto Rico.

Dr. and Mrs. R. E. Applegate, 2852 McConnell Drive, Los Angeles 64, California, sent a Christmas greeting with the following note: "We got back to Indiana this summer but ran out of time and energy for side trips so didn't check on Indianapolis." (Hope you will do better next time you visit Indiana!)

Dr. Ernest H. Besch, 1008 Medical Arts Building, San Antonio 5, Texas, writes,
(Continued on next page)

"I enrolled at St. Mary's University September 17 and the young lady remembered seeing my transcript during the previous week; another advantage of having a name that's hard to spell and even harder to pronounce."

A letter from Dr. Harvey Chong, 76 Ponahawaii Street, Hilo, Hawaii, brings back nostalgic memories of a pleasant time I spent in Hawaii . . .

"Every time I get an issue of the Alumni Bulletin I vow to sit down and write to you . . . When you were in Honolulu three years ago, I did try to see you, without success. Those were very hectic days for me, as I was on the verge of getting married and getting out of the army . . . To bring you up to date, I joined the army and served in Korea in the *Fighting Army Dental Corps*, and was later transferred to Japan. (Dr. Kelley Carr makes me envious.) Saw Elmer Duncan once in Japan.

"For the past three years Phyllis and I have been busy raising a family, and we now boast a girl (Mayette) and a boy (Harvey Jr.).

"The practice has been good, and leaves little for me to desire. The only thing I miss is seeing more Indiana people. The only ones I have seen here have been Drs. Charles Eller (1907) and John S. Eilar. We wish more would come. I presume that some of my more talented classmates must have a fortune accumulated by now, so please tell them to spend it on a trip here."

We were also pleased to receive greetings from Dr. Dave Frye, Mrs. Frye, and their three girls, from Hickory, North Carolina.

Holiday greetings also came from Dr. and Mrs. Simon Kleeger, 93 East Market Street, Rhinebeck, New York.

Class of 1953

Dr. Tom Garman, Box 14, Navy 214, FPO, New York, New York, sent us Christmas greetings from Africa.

Dr. Henry Plaschkes, 2336 North Delaware Street, Indianapolis, also sent us Christmas greetings.

We have received the following address for Dr. Harry Shaver: Bowling Green, Kentucky.

Dr. David G. Lehman, Box 98, Aibonito, Puerto Rico, writes this interesting information:

"You may be interested in my work here in Puerto Rico. I am the only dentist in Aibonito a town of 20,000 people, and the surrounding area of 10,000 people who come to Aibonito for dental and medical treatment. This is far too many people to adequately treat. Many come only for emergency extractions, although I am doing more restorative and periodontal treatment all the time.

"I observe much malnutrition among the people here. There is much decay and periodontal disease. Teeth are softer it seems, and many patients have trouble with blood clotting.

"The average Puerto Rican diet is probably lacking in vitamins, minerals and coarse foods. Most people eat rice and beans twice a day and bread and coffee for breakfast. Green and yellow vegetables and dairy products are scarce and expensive . . .

"My office facilities are quite adequate and I do have X rays and increased speeds for cavity preparation. I could not obtain stannous fluoride here in Puerto Rico so sent to Indianapolis for it. Also I have used camphorated-p-mono-chloro-phenol with penicillin powder to treat badly decayed teeth. It has proved to be quite effective in treating children's teeth.

"I am working with a public health supervisor in this area and we want to have a pamphlet printed in Spanish concerning the prevention of dental disease and better dental health. It will be no problem to have this article translated into Spanish. . .

"I am doing some orthodontia so as to retain what I learned. Also I am receiv-

ing numerous publications to keep up with the dental literature."

"May you all have a successful and prosperous New Year."

Class of 1954

Dr. and Mrs. Robert Blu sent holiday greetings from 870 Manor Road, Staten Island 14, New York. Dr. Blu reports that he was transferred to the USPHS Hospital, Staten Island, where he is responsible for the intern training program. His "other item of news is the arrival of Robert II on October 25, 1957."

Dr. and Mrs. Theodore Clarke are in Tacoma, Washington, at 8506 84th Street, N. W. Dr. Clarke has extended his tour of duty with the Army and expects to spend some time in Germany.

We received the following address for Dr. Donald B. Fread: Room 8, Oliver Building, Winchester, Indiana.

And for Dr. Allen E. English, 1615 Indianapolis Avenue, Long Beach, Michigan City, Indiana.

Dr. J. Oscar Leiva sent holiday greetings from 3a. Ave. #1376 Z. 1, Guatemala, Central America.

In November we had a most interesting letter from Dr. Robert Johns, 7280th USAF Hospital, Box #6, c/o Postmaster, APO 30, New York, New York:

"We received the August edition of the Alumni Bulletin today and sat right down and read it from cover to cover. It really brings back fond memories and friendships which were formed during the wonderful four years at I.U. School of Dentistry. Since graduating in 1954, my wife and I have had many wonderful things happen to us and have seen a good share of the world. I first had a one year internship at Madigan General Hospital in Tacoma, Washington. This was an Air Force internship and it was an excellent rotating type internship. I applied for overseas duty after completing the internship and our duty assignment turned out to be Nouasseur Air Depot,

Morocco. We have been here for 27 months and will be returning to the States just about the time that the January issue of the Bulletin is due out. We've had a wonderful tour here. The weather is wonderful and the base is just 20 miles from Casablanca, which is located right on the Atlantic Ocean. Tangier (the international city) and Gibraltar are only about 200 miles away and they are very interesting to visit. The country of Morocco has undergone quite a political change in the last year as I am sure you've read about and how they have their independence. We lived in Fedela, Morocco, our first fifteen months here. It is a beautiful little seaside resort town where many Europeans come for vacations and rest. The people of Morocco (Arabs and Berbers) are very interesting people and their ways of life, bartering, trading, working, and thinking have been very fascinating for Ruth and me to observe. Of course, I've taken enough 35 mm. color pictures to fill a library and I'll be boring people to death with all the pictures when we return to the states.

"Ruth and I also had a pleasant visit from the stork on January 29, 1957, with a seven pound baby boy named Mark Robert, and we are expecting another stork visit some time in May of next year.

"We just returned from a thirty day tour of Europe and it was a wonderful trip. The vacation took in such capitals as Brussels, Amsterdam and Copenhagen along with the beautiful countryside and small villages of France, Belgium, Netherlands, Germany, Denmark, Sweden and Austria. We thought Copenhagen, Denmark, was the most wonderful city we've seen in the world; although Munich and Garmisch, Germany, run a close second.

"I've had 27 months of wonderful dentistry here and have been able to perfect my oral surgery a great deal. We have been handling our maxillary and mandibular fractures whenever possible and have one morning each week set up
(Continued on next page)

in the general operating room for full mouth extractions under general anesthesia using nitrous oxide—oxygen and pentothal (sodium) anesthetics. We also have been able to do quite a few bridges, jacket crowns, inlays, etc., along with our main concentration of amalgam work. I'm finding out that the dentistry in the service, for the most part, is of the highest quality and for this I am grateful. I can say this for sure without error, that the dentistry which we learned at good old I.U. ranks with the best in the world, if not just a little beter. I think the dental students graduating from I.U. have a better all-round training in the different phases of dentistry than most other students from various schools."

Then, in December we received a Christmas greeting from Dr. Johns in Morocco.

Dr. Jack Weinsoff's address is 6631 Laurel Canyon Boulevard, North Hollywood, California.

Class of 1955

We received Christmas greetings from the Drs. Ursula and Werner Bleifuss, 18786 San Quentin Avenue, Lathrop Village, Birmingham, Michigan.

Dr. and Mrs. Norman Glassman, 133 Rumson Road, Little Silver, New Jersey, announced the birth of a son, Paul Jay, on August 25, 1957.

Dr. Leonard Hollingsworth's address is now Box 245, Russiaville, Indiana.

Dr. and Mrs. Stuart Everard, 450 Valley Lane, Falls Church, Virginia, write as follows, "Back to the rigors of private practice after two years of easy living as an Assistant Professor. We feel very much at home here in suburban Washington, D.S., where every fourth person is either an immigrant Englishman or woman or is a service person who has lived in England."

Dr. Thomas E. Quill Jr. after two years of Army service is associated with his father, Dr. Thomas E. Quill, in the

general practice of dentistry at 2346 Shelby Street, Indianapolis.

Dr. and Mrs. Ellis Rue, 1538 Mesa, Colorado Springs, Colorado, have a son, born December 24, 1957.

Dr. Kenneth Scales announces the opening of his office for the general practice of dentistry at Room 222, Nassrallah Building, 2720 Park Street, Jacksonville, Florida.

Dr. Bernard K. Stuart is now at 47 Park Place, Morristown, New Jersey.

Dr. Jack Weinsoff is associated with Drs. Howard M. Stein and Richard F. Walling at 6631 Laurel Canyon Boulevard, North Hollywood, California.

Class of 1956

Dr. Robert Callis, AO 3044934, 7520th USAF Hospital, USAFE, APO 125, New York, New York, writes "I'm located about 10 miles west of downtown London—at the Eastcote Dental Clinic, which is the only clinic that takes care of families of the service men—anywhere in the world. The work is entirely on wives and children—and it is largely children. So, as you might imagine, my experience with children has been greatly increased, and I seem to have acquired a decent 'knack' in handling them—and have learned to enjoy this work."

A Christmas message from Dr. and Mrs. Louis D'Angelo, Fort Yates, North Dakota, brings the following:

Another busy year has slipped by. Lou is still the United States Public Health Service dentist at Fort Yates. This past year his office was moved from the basement of the hospital to the main floor, and another chair was added to his equipment. He has been having a lot of good experience working in a two chair office.

"This past summer Lou passed the New Jersey State Dental Board Examination. . .

"We do not know just yet whether we are going into private practice this year or not. We do hope to at least get a transfer out of Fort Yates. We plan to

go East this Christmas to look around for a business site."

Dr. Wilbur Dremstedt, 1144 South 11th Street, Apartment 1-A, Lincoln 2, Nebraska, writes, "I am enjoying an interesting tour of duty in the dental corps of the Air Force at Lincoln Air Force Base, Nebraska. We are privileged to work in a new, fully equipped dental clinic. There is no 'amalgam line' here, for we can do every phase of dentistry from surgery to crown and bridge. I am looking forward to one more year here before returning to Indiana."

Dr. David Ferguson, 3603 Flaherty Circle, Honolulu 18, T. H., writes, "I thought I would write a short note and tell you how much I enjoy the Alumni Bulletin. When you are so far away from home as we are, it is surely nice to get news of my many friends and the old school, which I miss very much.

"The Navy has treated us fine. We spent an enjoyable year in San Diego. I was already to make a try for the California Board, when the Navy suddenly transferred us over here to Hawaii. I was disappointed that I didn't get to take the Board, but we didn't object to coming here to Hawaii. We had a wonderful trip over on the S. S. Leilani and have been enjoying the islands ever since. It is the most beautiful and exotic spot I have ever seen; and would advise anyone who has the chance to come over here, not to miss it.

"I'll be leaving the Navy in the summer of 1959 and am looking forward to visiting the school then (I probably won't recognize the place by then, what with the ambitious building program being planned) and seeing all my old friends."

Dr. John H. Koby announces the opening of his new office for the general practice of dentistry at 5317 East 16th Street, Indianapolis, Indiana.

Dr. Dwain R. Love, General Delivery, Gardnerville, Nevada, wrote "my wife had a 7 pound baby boy January 4, 1958. We didn't name him Francis, but did

name him Jeffrey Kraig. I surely am proud of the new addition to the family."

Dr. Carl R. McKee, AO 3045829, 4737th USAF Hospital, ADC Pepperell Air Force Base, St. Johns, Newfoundland, sent us a note with his address saying that he and Mrs. McKee (Betty Barr, Dental Hygiene Class of 1957) are living in St. Johns.

We received a Christmas greeting from Dr. and Mrs. Rafael Nadal, 422 Berkley Road, Indianapolis, Indiana.

We have received a change of address for Dr. James M. Sterrett to Medical Arts Building, Mooresville, Indiana

Dr. Donald E. Stroud, 53rd USAF Dispensary (Class A) United States Air Force, Sioux City Air Base, Iowa, writes us,

"Some things about myself since graduation and entering the service. I had the privilege of attending a very fine two week postgraduate course last May sponsored by the Air Force. It was presented by Dr. Wilton Cogswell of Colorado Springs; and it covered the surgical removal of impacted mandibular third molars. The course was excellent from the standpoint that we operated about half of the time, which was an invaluable aid in learning the technique. This along with many other things, has convinced me that I want to do oral surgery.

"I am also working toward completing requirements for my B.S. At the end of the present semester, I will only lack six hours. The local college and correspondence courses are doing the job.

"My little girl, Cheryl Ann, will be one year old in November. We have an apartment on the base that is roomy, but nothing very fancy. Housing here is limited."

Class of 1957

We received Christmas greetings from Dr. Pedro G. Colon, Box 36, Naguabo, Puerto Rico.

Dr. and Mrs. Lloyd Delman wrote us from USAF U.S. Military Academy, West Point, New York, the following,

(Continued on next page)

"I read in the August edition of the Alumni Bulletin your desire to have the class of 1957 inform you of their whereabouts. Jane and I have been very fortunate for we are now in the Army stationed at the United States Army Hospital, United States Military Academy, West Point, New York.

"I hope this short note finds you in good health."

Dr. Calvin M. Fair, 05500348, U.S. Army Dispensary, Port of Whittier, Alaska, APO 987, Seattle, Washington, writes,

"We are enjoying a mild winter here at this time. Only about 1-½ feet of snow fallen. The temperature has not fallen below 25 and usually stays between 30 and 40. The rain averages 150 inches per year and 40 to 60 feet of snow per winter is not uncommon. We are located about 60 miles south of Anchorage, just at the neck of the Kenai Peninsula. This is centered in one of the best hunting and fishing areas in North America—a true sportsman's paradise.

"Am enjoying a very busy dental practice along with one other dentist. There are close to 1000 persons located here to keep us both busy."

Dr. and Mrs. Paul Gilmore, 2 Daniel Street, Byrnes Downs, Charleston 47, South Carolina, informed us of the birth of a daughter, on November 22, 1957; earlier in August he wrote us as follows:

"The results of the S. C. State Board were published the 15th of July so we immediately got to work looking for a place to live in Charleston. The office space was located and rented . . . the building had to be renovated . . . it will be a two chair office with reception room, business office, lab and rest room . . . all partitions are up, utilities installed and work progressing rapidly. I plan to be in practice by the 1st of September. Of the practicing dentists I have met, they have been most encouraging and have fine prospects for me and my location.

"I am in a section of Charleston that

is rapidly increasing in population and growth of industry. You remember that old statement, "the South will rise again", it looks from here it is doing so in Charleston. The area has about 40,000 people with three practicing dentists. Two of them are old timers here and the third one opened his office a month ago. We have rented half of a ranch style duplex with two bedrooms, bath, living room, kitchen and utility room. It is a brick building, new attractive, and modern.

"I hope always to be informed of the activities of the dental school and hope anyone passing through Charleston will stop and visit with us."

Dr. Richard L. Falender announces the opening of his office for the practice of general dentistry at 6430 East Washington Street, Indianapolis, Indiana.

Dr. George Fries' address is Linvill Memorial Clinic, 215 East Van Buren Street, Columbia City, Indiana.

Dr. Richard Myers' address is 43rd Tact. Hospital Davis - Monthan AFB Tucson, Arizona.

Dr. Robert H. Owens, Louisville General Hospital, Louisville, Kentucky, writes,

"I'm so sorry I haven't written sooner, but my work has kept me quite busy. At present, I am on general anesthesia. Working from 7 to 5, plus being on call every third night, seems to keep me well occupied. There are seven of us, 4 anesthesia residents, 2 staff and myself, who give all the anesthesia at Children's Hospital and General. At the end of November I go back to the oral surgery clinic. My plans for next year are not too definite yet. I'm certainly going ahead in oral surgery. . .

"Paul Gilmore has opened practice in South Carolina—the only out-of-state to pass the Board."

We were pleased to receive Christmas greetings from Dr. and Mrs. Herbert Tietzer, P.O. Box 3687, Carmel, California. Dr. Tietzer had written us in August as follows,

"My wife, son, and I had a wonderful trip from Indiana. We saw a lot of beautiful country on the way, and visited with some old friends. . . .

"We three Tietzers all extend our best wishes and regards to you."

Dr. Harold W. Bohnke, 2439 Cincinnati, San Antonio, Texas, tells us,

"Well, the year 1958 is here and '57 gone but for Joan and me it is not forgotten. To give you a brief rundown of events here we go."

"We finally got settled at our apartment in San Antonio, Texas, around the end of November. After spending the first 22 days of December preparing for Christmas we were blessed with a 7 lb. baby boy. He was born a Texan at the Baptist Memorial Hospital here in San Antonio. Both mother and baby are doing fine and father is just a little worse from the wear. Joan's mother arrived a few days later and has been a Godsend helping us out.

"Our apartment is about 15 minute drive from the base and is just two blocks from St. Mary's University. The surrounding community is very nice and the people are very friendly.

"As you know, Dr. Paul Cleeter has been stationed here at Kelly Air Force Base for about one and one half years and helped us obtain our apartment.

"We each have our own private office at the base complete to an assistant. One pleasure I have is that our dental education at Indiana University is as good and in most cases better than those from other schools. Thanks for that."

And now for the addresses of the Class of 1931! As usual we sent out questionnaires to the members of the class and these data are the results of their replies. An asterisk before the name indicates we did not receive an answer to our letter. If you know of the address of those for whom we have no address, we shall appreciate hearing from you; we shall also welcome corrections, and so forth!

Class and Fraternity Notes

FRESHMAN CLASS

September 13, 1957, saw the enrollment of 72 students in the freshman class, I.U. School of Dentistry. Organization was accomplished soon after school started with the following class officers elected: William Watts was elected president; Bert Cleveland, vice-president; Bernie Neubauer, secretary-treasurer; Dr. R. C. Webster, class sponsor.

One of the highlights during our first few weeks was the opportunity to attend the afternoon session and banquet during the annual meeting of the Indiana University Dental Alumni Association. Difficulty in finding a

seat for the banquet was understandable and was probably due in part to our 100% attendance.

As far as our social activities, we are happy to announce that the first social function was naturally a stag party, held at the local Policeman's Lodge at mid-semester. Needless to say, we had 100% attendance here, too.

Another social function was a dance at the Sarkes-Tarzian Cafeteria at Thanksgiving time. A good time was had by all except for the early morning clean-up detail on the following day.

Also, as of the end of Christmas vacation, our Freshman Dental Intramural Basketball team was undefeated. Our second game is scheduled soon after finals.

Speaking of finals, our socializing ended on January 20, 1958, in lieu of final exams, or what we call, "Court of Last Resort".

Then there will be next semester and anytime you are down Bloomington way drop in and see us; we will attempt to show you some of that fine dental hospitality.

As to future plans, a dinner-dance is planned for next semester. This should be really big.

Happy 1961 to everyone.

SOPHOMORE CLASS

On the last day of finals in our freshman year, the class elected William Gordon, president; Joseph Minnis, vice-president; Stuart Ewbank, treasurer; and Dilia Rieser, secretary for the sophomore year. Then when school started in September, we elected Warren Davis and Richard Henry as Student Council members and Harvey Levinson as the alternate member.

Our activities have been limited mostly to learning how to use the handpiece, remembering the name, place and use of all our new instruments, learning all the new and different techniques and finding out what it means to be "on call" for autopsy for our General Pathology course.

Thru the efforts of Dr. Hohlt and Pete Reibel, we now have a basketball team in which all the dental students may participate. Out of the 5 games which the Indiana University Dental School Basketball Team has played, three games were won. They are in the Thursday night Em-Roe League and Pete is the player coach. Their uniforms are scarlet T-shirts with white numbers and white trunks.

This summer wedding bells rang for 9 members of the class making an approximate total of 42 married sophomores out of a class of 63.

With all our nicks, burns, and bruises, we are all trying to finish up our technique work and prepare for the finals with the hope to survive for the next hurdle, which rumor has it will be the hardest.

Dilia Rieser

JUNIOR CLASS

September was a very happy time for our class—we started our junior year. We found our patients were already assigned and in the waiting room. We also found that upper third molars were upside down and backwards in our

mirrors, just as they were on the mannequins last year. Rubber dams presented a challenge the first few weeks, but we had had the previous experience of applying them on fellow students.

Soon after the year started we had a party at the Psi Omega fraternity house. Sandwiches, pizza, and drinks were furnished by The Ransom and Randolph Co. We plan to have another get-together next semester and a school-wide dance is planned for early spring.

As the first semester ends we are concerned with our eleven finals and finding crown and bridge patients. There is also a rush to get that last prosthetic patient finished and those last amalgams polished.

We wish to thank the faculty for their understanding and assistance as we start clinical dentistry.

Ed Lyon

SENIOR CLASS

Once again, and for most of us the last time, we are well into a new school year. This time we are seniors, a feat which only three years ago we would have deemed impossible. But here we are, sixty-five strong, heading into the home stretch.

I think, although everyone is working hard to get requirements completed, the class senses that this year may be the last time many friends will be together in the close contact that has prevailed for almost four years, and each individual is trying to make this last year an enjoyable one.

But enough sentimentality, and now for some specific news. Most seniors spend the summer in the clinic, and the new semester was merely a continuation of a summer's hard work. We were all happy to see Jim Walker back with us after an illness which kept him away from school several weeks in the spring and the greater part of the summer.

Class officers were elected last year and the following were chosen: John Turchi, President; James Moran, Vice-President; Ken Miller, Secretary; Jerry Leer, Treasurer. Probably the most important class officers are the council members, Ralph Beatty and Don Traicoff. These men are the ones who carry our gripes and pleas to the "powers that be."

Merritt's Park in Brownsburg was the scene of the Senior picnic one bright Sunday afternoon in the early fall. The football and baseball were just too much for some of the "athletes", and there were many groaning seniors the following Monday. Max Lecklitner
(Continued on next page)

and Don Traicoff were up bright and early to make the picnic a success, and the thanks of the class went to them.

As usual we are learning a great deal about dentistry. Besides the everyday bits of wisdom that we attain, we have acquired much by attending a symposium on periodontia, one on dental medicine, and the Indianapolis Dental Society Winter Meeting. We have also heard interesting lectures by Dr. Hardy of Tufts and Dr. Griffiths of Howard.

The class has had its first taste of state boards, as on the first day after Christmas vacation we were faced with a prosthetic technic session. Everyone got along fine, with the classic phrase being, "I did swell with the set-up, but after the wax-up the teeth didn't occlude anymore," or some similar statement of remorse. And who else could come in thirty minutes late with base plates, occlusal rims, and casts loose in his green box and ask, "Anyone for coffee?" That's right—Gene Kuzmic.

There is a great deal of talk now about where to begin practice, the armed services, and requirements. In a short while these matters will be cleared up, and other problems will be facing us, problems for which we have been preparing the last several years. We hope we can solve them.

John Turchi

ALPHA OMEGA

1957-58 has been a very exciting year for the undergraduates of Alpha Omega fraternity at Indiana University.

This year our Indianapolis Alumni chapter has invited the undergraduates to all of their meetings so we can enjoy the guest speakers they have engaged. These lectures have done much to further our education.

Last month Howard Berkowitz attended our national convention in Baltimore. He got a chance to meet with dentists and students from all over the United States, and he has brought back many interesting stories.

Our chapter this year has been very ably led by our President, Jerry Goldsmith. Our Secretary and Treasurer are Stanley Herman and Howard Berkowitz respectively.

Stanley Herman

DELTA SIGMA DELTA

The Xi chapter of Delta Sigma Delta elected its officers for this academic year last March. The officers are as follows: William Gilmore, president; James Grimes, vice-president; Robert Moon, secretary; Gene Hedrick, treasurer; Jerry

Lentz, senior page; Donald Christy, junior page; Donald Arens, tyler; and Charles Vieck, historian.

Last December, 15 men were initiated into our fraternity. We enjoyed the customary week-end with a stag and dance preceding the initiation ceremony. Much fun was had by all; this is always a highlight of the year and anxiously awaited for by all our members.

Russell Boyd and Jerry Leer have added a great deal to the enjoyable meetings of this year as co-chairman of the program committee. They have engaged guest lecturers from the field of dentistry to speak at alternating meetings throughout the entire year. Much interest has been seen among the undergraduates since we started his type of program and often times we see familiar faces of members from the graduate chapter. Guest lecturers and topics we have had so far this year are as follows: Dr. Richard Misselhorn, Hobbies; Dr. Maynard K. Hine, Dentistry in Europe; Dr. David Mitchell, Graduate School; Dr. Harry Healy, Endodontia; and Dr. Drexell Boyd, Economics in Dentistry. The program planned for the remainder of the year is as follows: Drs. Ronald Ping and Thaddeus Gregory, Oral Surgery; Dr. John F. Johnston, Crown and Bridge; and Professor Ralph W. Phillips, Dental Materials. Thanks is given once again from the members of Xi chapter to these men for spending an evening with us.

The 16 senior members of the chapter were entertained by the graduate chapter on January 14 at the Indianapolis Athletic Club. This traditional affair gave us a chance to see some of our old friends and trade stories over a very healthy piece of roast beef. We give you thanks from the seniors and anxiety awaits with the underclassmen.

We are extending a warm welcome for each of you to attend our rush week-end April 18 and 19.

H. William Gilmore

PSI OMEGA

A New Years "Hi" and a "busy day" greeting to all Alumni from Psi Omega. Final week is upon us like a sneaky fox. Why, it was only a few weeks ago that we were checking in our lists after lists of innumerable, unnamable instruments. But really, we have all grown a little wiser and a little older by now, even though the instructors are quick to add that it has been very little. To prove a point, the sophomores have learned that a Wall's carver is not a double ended screwdriver; the juniors have learned that the periodontal pocket probe which they used to add hot wax to in-

lays was expensive to replace; and the seniors have sworn never to pound another gold foil after State Boards. By the way, you'd be surprised to notice the number of seniors that are developing that "Have handpiece, Will travel" look in their eyes.

Fraternal wise, Psi Omega's officers for this year are as follows: David Bixler, Grand Master; Robert Frazier, Junior Grand Master; Raymond Dennany, Secretary; and Thomas Childes, Treasurer. Our Deputy Council this year is Dr. Henry Swenson, who, by the way, is also Chairman of the Periodontia Department at the school. Dr. Walker Kemper, of our Crown and Bridge Department, will assume this duty in March of this year.

To recall a bit, the past activities of Psi Omega, we will flash back to last summer when the interior of the main house was painted and new drapes hung. Also, more partitions were installed in the annex to accommodate more students for the school year. In October, the members all pitched in to paint the outside of main house.

Our social life has been enhanced by monthly dances at the fraternity house. We had a fine Christmas dinner dance this year at the Warren Hotel which saw many alums in attendance. In February, we plan to initiate 16 pledges into the active chapter with a stag night on February 14 and a dinner dance the following night. The dance, by the way, is being put on by our wife's organization, and is their annual "Sweetheart Dance". All Psi Omega Alums are cordially invited.

Well, this old scribe had better lay his quill aside and start to study for that oral surgery final. Let's see, what were those indications for pulling (pardon) extracting teeth?

See you in the next issue.

Ronald Scheele

XI PSI PHI

The past year in Xi Psi Phi has been a very busy one. Of prime importance was the election of officers for 1957. They were Walter Burns, President, John Turchi, Vice-President, William Cromwell, Secretary and Jim Puccio, Treasurer. These officers served well and the chapter benefited a great deal from their term in office.

We have had an increase in alumni interest this past year and we greatly appreciate this. Of course, we know it is difficult for many of you to attend our functions due to your distance from Indianapolis, but always remember you are welcome to the house any time you are in town. We saw many of you at the rush party but we wish there could have been more.

Friday evening, February 24, there was a dinner at the Hawthorne Room followed by a stag at the house. Saturday evening there was a buffet dinner and dance at the house.

The second week in January, we initiated a number of new members into the fraternity. Many of you alums will be happy to know that Dr. John Koby was formally initiated into the chapter. We believe that these new members will greatly aid our chapter in its continued growth. At the same meeting, we had some of the alumni members present. They were Dr. Robert Tarplee, Dr. Pete Oldham and Dr. John Stone. This interest was appreciated by both the new initiates and the members of the chapter.

Also, in the month of January, we elected our officers for the year 1958. Those elected were Bob Gordon, President, Leroy Kochert, Vice-President, Bruce Meyers, Secretary, and Tom Winans, Treasurer. Larry Beachy was appointed as rush chairman and did a top notch job in this capacity. We had one of the best rushes we have had for quite awhile.

In closing, we of Xi Psi Phi wish to extend a welcome to all our alumni to visit the chapter any time they are in Indianapolis. Remember, the Sunday before the May meeting, we have an open house from 2:00-5:00 p.m. Let's put this date down on our calendar now so we don't forget it. You would be surprised at the number of old acquaintances you will see there. Again, we of the chapter say "thanks" for the great support you gave us this past year and we'll see you at the May meeting.

William Hart

DEPARTMENT OF ORAL DIAGNOSIS

(Continued from page 6)

in the area had been lanced and drained by another dentist. Either the patient failed to return for further treatment or else the first dentist felt that none was necessary.

The intraoral tissue mass, the radiolucency, and apparent resorption of the distal root of the first molar suggested neoplasia, or true tumorous growth such as an ameloblastoma or a primary or metastatic malignancy. However, the long, painless history and the statement regarding early incision of an acute swelling and the presence of two unerupted

(Continued on next page)

teeth in the region suggested the possibility that a dentigerous cyst existed a year or more ago around the crown of the second molar. Perhaps it was suddenly noticed by the patient, due to secondary infection, and was lanced and drained. Presumably then, without further treatment, the inflamed, infected tissue simply grew, through inflammatory hyperplasia, to fill the former cyst cavity and finally extended out onto the alveolar ridge.

The patient was hospitalized and the oral surgery staff of Long Hospital excised the mass of tissue and removed the three molars of that quadrant. Microscopic study by the oral pathologists revealed that the tissue consisted of chronic inflamed, vascular connective tissue, with many proliferating sheets of epithelium (presumably from the original cyst lining) present. Uneventful healing followed.

This case emphasizes the need for careful clinical and radiographic examinations before any surgical treatment is attempted; and also indicates the need for careful follow-up of patients after treatment. Again, let it be said that the School of Dentistry is grateful for the opportunity to receive such diagnostic problems from practitioners, for it is clear that a number of students and teachers gained from the experience of handling this case.

BIOPSY SERVICE

(Continued from page 9)

investigating all lesions of the oral cavity when there is any question as to their nature. Such investigation may necessitate a biopsy of the lesion and its microscopic examination by a qualified pathologist. To facilitate this procedure, Indiana University School of Dentistry is continuing to offer the facilities of the laboratory of the Department of Oral Pathology and, to further aid in the delivery of

tissue, offers free mailing cartons for specimens upon request.

A report on the tissue specimen can usually be returned to the dentist within 72 hours of its receipt by the laboratory unless the specimen contains calcified material. In such case, the report will be delayed because of the time involved in decalcifying the material preparatory to sectioning.

Only by continued vigilance on the part of every dentist can the mounting death rate from oral cancer in the state of Indiana be effectively controlled.

POST GRADUATE COURSES

(Continued from page 15)

Frank Hughes and Joe White. On July 28 through August 1, a course will be held for technicians in the laboratory phase of fixed bridge construction. This will include approximately ten hours of lectures and at least thirty hours at the bench. Two bridges and some single crowns will be constructed.

During the 1958-1959 school year, three one-day symposia are planned, each with a guest speaker. Tentative dates, depending on the school calendar, are:

October 15—Partial Denture Design and Construction

December 3—New Concepts in Materials and Equipment

March 4—Integrated Clinical and Preventive Dentistry

In 1959, postgraduate courses will be scheduled as follows:

June 15-19—The Construction of Complete Dentures

June 22-26—Partial Denture Design and Construction

July 27-31—Laboratory Phases of Crown and Bridge Construction for Technicians

Others will be announced later.

*John F. Johnston, Chairman
Postgraduate Instruction
Committee*

PRESIDENT'S MESSAGE

(Continued from page 7)

of the Alumni Association, which will be held on the Bloomington campus of Indiana University on Friday and Saturday, October 3 and 4. This annual dental meeting is a very unique and pleasant one as was once again demonstrated last October by a registration of over 400. The scientific sessions attempt each year to have the most recent developments in dentistry presented by outstanding authorities in the areas concerned. Combined semi-social programs for the members and their families give them the opportunity to enjoy a session of mutual interest. A well designed program for the ladies held concurrently with the men's scientific session has proved to be very popular with the ladies. The annual dinner on Friday evening is always well patronized and enjoyed by those attending the meeting. Each year an attractive after dinner program is arranged. Last year the feature of this activity was a most interesting presentation by Herb Philbrick—the *real* Herbert T. Philbrick, columnist for the NEW YORK HERALD-TRIBUNE and the world famous counter agent for the F. B. I. in its anti-communist procedures.

Perhaps it can be said that another outstanding feature of our annual alumni meeting is the beautiful fall atmosphere and weather which is typical of southern Indiana at that time. Thus, your attendance at the two-day meeting will also enable you to enjoy the beautiful autumn panorama and color display of the area. Additional details of the 1958 October meeting will be announced in the early summer.

I would like to stress that graduation from Indiana University is not mandatory for membership in the School of Dentistry Alumni Association. Those dentists in the state who are geographically separated from their schools of dentistry and would like to participate in our activities are indeed welcome and encouraged to become associate members. This can be

done by contacting Mr. Frank Jones, Alumni Office, Indiana University, Bloomington, Indiana.

The officers elected to administer the affairs of the Alumni Association for this year are:

Harry J. Healey, President

Willard Damm, President-elect

Frederick A. Hohlt, Vice-President

Robert Wilson, Secretary-Treasurer

In concluding, it pleases me greatly to recognize publicly the highly efficient manner in which the affairs of the Alumni Association were administered last year by its immediate past-president, Dr. Walter A. Crum. His very outstanding year provided a very healthy situation for the organization. His year as president was, in my opinion, the best the organization has ever enjoyed, and since in the words of a famous military leader, "We always go forward, we never retreat!", I look forward to the present year with the greatest confidence for our continued accomplishment and success.

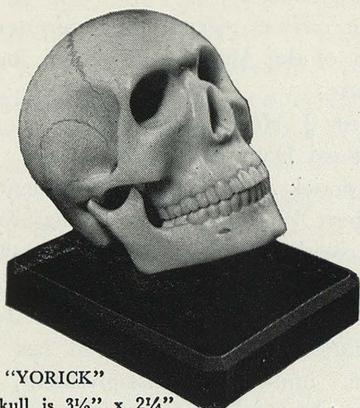

A.D.A. Booklet Available

Young men and women who have been thinking of dentistry as a possible career will be interested in an attractive new booklet published by the Council on Dental Education of the American Dental Association.

The booklet, "Careers in Dentistry," contains general information on career opportunities in the profession, the A.D.A. dental aptitude testing program and the admission and curriculum requirements of dental school programs.

Young people will find answers to many of their questions about the dental profession in "Careers in Dentistry."

Single copies of the booklet may be obtained free of charge upon request to Dr. Shailer A. Peterson, secretary of the Council on Dental Education, American Dental Association, 222 E. Superior St., Chicago, Ill.

"YORICK"
Skull is 3½" x 2¼"

**With This Miniature Skull
You Can SHOW Patients
What You're Talking About**

TRYING to explain to patients why "permanent" dentures should be remade periodically to preserve normal occlusion and condylar relation takes *some* talking. With "Yorick" you can *show* them. You can also show—

- How tissue changes cause loose dentures.
- How abnormal condylar relations cause auditory troubles and facial neuralgia.
- How bite raising can relieve such conditions; restore normal appearance.
- How cusp interference causes unbalanced occlusion.

Whereas patients recoil at such demonstrations on a human skull, they're intrigued with "Yorick." Yet this little half-sized skull in "Ivory" is a replica of a human skull, with cranial sutures, nerve foramina, full dentition and a movable mandible.

**"Yorick" Is Invaluable in Educating
Patients to Accept the Advanced
Concepts of Dental Service**
