I would like to wish everybody a happy and healthy upcoming holiday. I hope that everybody is well. We have had significant changes within the Department of Oral Surgery and Hospital Dentistry.

I am pleased to say that the Division of Oral Surgery / Department of Oral Surgery and Hospital Dentistry is doing well. This past year we have experienced some exciting changes. Most exciting is the addition of several faculty which you will read about later.

These individuals have already had an impact on this residency and I am sure will continue to do so.

On behalf of the faculty and the residents I want to thank you for your past support and hope that we can have your ongoing support of the department and residency. The IU OMFS program is the only OMFS residency in the State of Indiana and provides the full scope of oral surgery practice, including trauma, pathology (both benign and malignant),

orthognathic and craniofacial, esthetic, reconstruction, TMJ, denotoalveolar and implant. We want you to know that we are here to work with you and greatly appreciate every referral that is sent to the health center. Each referral compliments the resident training and strengthens the residency program. The Department is now a preferred Anthem provider and is accepting Anthem patients.

SAVE THE DATE

APRIL 21, 2012—HUTTON CIRCLE SEMINAR TO HONOR DR. CHUCK TOMICH

HUTTON CIRCLE

The Hutton Circle was established several years ago to support the educational and clinical mission of the department. Over the years the "Circle" has supported such things as attendance at national meetings, books, cadaver lab, and the "Hutton Seminar". As you review the list of past speakers remember that your yearly contribution to the IUSD Foundation at the level of a Hutton Circle provides complimentary attend-

DR. CHARLES E. TOMICH RETIRES AFTER DECADES OF SERVICE TO OMFS

The Department of Oral Surgery and Hospital Dentistry will recognize Dr. Charles E. Tomich on April 21, 2012. This will be a difficult task to accomplish, as how do you recognize an individual who has contributed so much to us individually and departmentally for the past 40 years. However, he deserves our gratitude and I hope that you will join us.

Dr. Charles E. Tomich is Professor Emeritus of Oral and Maxillofacial Pathology at the Indiana University School of Dentistry. He retired from Indiana University on December 31, 2001 after 32 years of teaching oral pathology, oral histology, and general pathology. Currently, he maintains a private practice of diagnostic oral and maxillofacial pathology at the Dermatopathology Laboratory in Indianapolis.

Dr. Tomich received his dental degree from Loyola University in New Orleans in 1961. He was then commissioned in the U.S. Public Health Service and served a dental internship in San Francisco. He served 5 years as a dental officer in the Divisions of Hospitals and Indian Health with assignments in Virginia, New Mexico, and Montana.

In 1966, Dr. Tomich (Chuck or "Dr. T" to almost everyone) and his wife Jackie and

their three children came to Indianapolis where he began his specialty training. Upon completing his training in oral pathology in 1969, he was offered a position on the IU School of Dentistry faculty by the late Dr. William G. Shafer. During his 32+ years on the faculty he received 25 teaching awards including an Amoco Foundation Outstanding Teaching Award in 1977 and the Distinguished Teacher Award from the IUSD Alumni Association in 1989. In 2001 he was honored with the IDA IUSD Pursuit of Excellence Outstanding Teacher of the Year Award. Also in 2001, he was honored by the IUSD Alumni Association as a Distinguished Alumnus. In 2004, he received an honorary doctorate from the University of Montreal for his contributions to the specialty of oral and maxillofacial pathology.

Dr. Tomich has been very active in the American Dental Association and in both the American Academy and the Board of Oral and Maxillofacial Pathology. In the ADA, he served on the Advisory Committee for Advanced Training in Oral and Maxillofacial Pathology for 12 years and chaired it for nine of those years. He was on the ADA National Board Testing Committee for 8 years. Chuck served on the ADA Commission on Dental Accreditation for 6 years, during which time

he was almost solely responsible for achieving representation of each dental specialty on the Commission. He considers that to be one of his more important achievements.

Dr. Tomich has been the President of both the American Academy and the American Board of Oral and Maxillofacial Pathology. He was the secretary/treasurer of the Board for 6 years, the Editor of the Academy for 6 years, chaired the Fellowship committee for two years, and as the Academy's parliamentarian for 5 years.

DON-JOHN SUMMERLIN, DMD, MS TO DIRECT OSHD ORAL PATHOLOGY SEMINAR

Dr. Summerlin, currently an Adjunct Professor at Indiana University School of Medicine, received his dental training at the University of Alabama School of Dentistry. From there, he completed a residency in Oral Pathology at Indiana University School of Dentistry, culminating in a Masters Degree in 1989. He gained Diplomate status bestowed by the American Board of Oral & Maxillofacial Pathology in 1990. Dr. Summerlin has served as an Oral & Maxillofacial Pathology consultant to the Commission on Dental Accreditation as well as the Pathology representative to their Appeal Board. Additionally, he has served on the

Nomination, Parameters of Care and Fellowship committees of the American Academy of Oral & Maxillofacial Pathology and as a peer review consultant for the National Institutes of Health. Dr. Summerlin is actively involved in diagnostic oral & maxillofacial pathology endeavors, both as a private practitioner in association with the Dermatopathology Laboratory, as director for Head and Neck Pathology for the Indiana University Health Pathology Laboratory and as a consultant to the Center for Ear, Nose, Throat and Allergy. Dr.

Summerlin has been an active participant with the clinical and didactic instruction of the oral and maxillofacial surgery and general practice residents for the past several years. Dr. Summerlin regularly attends the OMFS grand round conference and the residents rotate with him to head and neck conference as well as the pathology laboratory. He is a tremendous asset to the department. While there is no replacement for Dr. Tomich, we are honored that Dr. Summerlin will take over the oral pathology seminar.

HUTTON CIRCLE SEMINAR IN HONOR OF DR. TOMICH

The day will consist of a scientific presentation by **Eric Carlson, DMD, MD, FACS**. Dr. Carlson is Professor and Chairman of the Department of Oral and Maxillofacial Surgery at the University of Tennessee, Knoxville. He received his Dental degree from the University of Pennsylvania and his Medical degree from the University of Miami. Dr. Carlson completed his oral and maxillofacial surgery residency at Allegheny General Hospital, his general surgery internship at the University of Tennessee, and his fellowship in oral/head and neck tumor

surgery at the University of Miami/Jackson Memorial Hospital. Dr. Carlson's presentation is entitled: "Controversies in the surgical management of oral/head and neck pathology" and will discuss the management of the neck in oral/head and neck cancer and the management of bisphosphonate related osteonecrosis of the jaws. As a Hutton Circle member attendance at this scientific seminar is complimentary **The presentation will be followed by a dinner reception to honor Dr. Tomich.** We are hoping that you and your spouse will be able to join us to show our appreciation for all that Chuck has con-

tributed to our lives. Tickets for this dinner will be \$50 per person or \$100 per couple. Further information will be sent in January regarding this dinner.

THREE NEW ORAL AND MAXILLOFACIAL SURGERY FACULTY

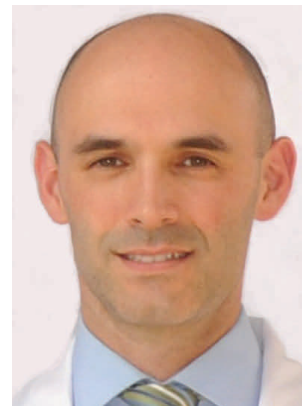

We have been fortunate to hire three excellent oral and maxillofacial surgery colleagues who started this summer. Each of these young colleagues will bring a diverse level of training to the program that will benefit patient care and resident education.

Dr. Robert Alderman has joined the Indiana University School of Dentistry Faculty as an Assistant Clinical Professor in the Department of Oral Surgery and Hospital Dentistry.

Dr. Alderman completed his undergraduate training at Bellarmine College in

Louisville, Kentucky in 1998, where he received a Bachelor of Arts in Biology. He then earned his D.M.D degree in 2003 from the University of Louisville with honors. He started a residency in Oral and Maxillofacial surgery at the University of Louisville in 2003. His training

was later put on hold when he was called up to active duty with the US Army Dental Corps. He then continued his training in Oral and Maxillofacial surgery at Indiana University where he was awarded his certificate in 2011.

Dr. Desmon Brown has joined the Indiana University School of Dentistry Faculty as an Assistant Clinical Professor in the Department of Oral Surgery and Hospital Dentistry.

Dr. Desmon Brown completed his Bachelor of

Science in Biochemistry and Zoology with honors at the University of the West Indies, Kingston Jamaica in 2003, and went on to Howard University where he gained his D.D.S degree with honors in 2007. He was inducted into Omicron Kappa Upsilon in 2007.

Dr. Brown completed a residency in Oral & Maxillofacial Surgery Department at the University of Florida, College of Medicine in Jacksonville Florida.

Dr. Carrie Klene has joined the Indiana University School of Dentistry Faculty as an Assistant Clinical Professor in the Department of Oral Surgery and Hospital Dentistry.

Dr. Carrie Klene was born and raised in Indianapolis, Indiana. She

completed both her undergraduate and dental degree at Indiana University. Following her doctorate, she completed a two year general practice residency at Carolinas Medical Center in Charlotte, North Carolina. She completed a one year internship followed by a four year residency

in oral and maxillofacial surgery at the University of Maryland/ R. Adams Cowley Shock Trauma Center.

ADDITIONAL NEW OSHD FACULTY AND MORE COMING

Dr. Kyle J. Kramer joined the Indiana University School of Dentistry faculty as an Assistant Clinic Professor of Dental Anesthesiology in the Department of Oral Surgery and Hospital Dentistry last October.

Dr. Kramer graduated from Indiana University in Bloomington, Indiana in 2002 with a Bachelor of Arts in psychology. He began his dental career shortly thereafter at IUSD, graduating in 2006. After finishing a one year general practice residency at Indiana University, he accepted a one year fellowship position in dental anesthesia at Indiana University, working exclusively with the anesthesia department at Wishard Memorial Hospital. In January of 2009, he accepted a position at The Ohio State University as a dental anesthesia resident, which culminated in September, 2010, with a certificate of completion and Master's degree in dental anesthesiology. Dr. Kramer is a diplomat of the American Dental Board of Anesthesiology.

Dr. Melanie Peterson is the new Director of Hospital Dentistry and of the General Practice Residency program for the department of Oral Surgery and Hospital Dentistry. Dr. Peterson completed her D.M.D. degree at the University of Louisville School of Dentistry in 1980, a General Practice Residency at the Veterans Administration Hospital in Louisville, KY (1981), an MBA at the University of Louisville (1990) and a Certificate in Health Professions Education (2005). Prior to entering academic dentistry at the University of Louisville School of Dentistry Dr. Peterson worked in public health for over fourteen years and served as the dental director

at Central State Hospital where she worked primarily with special needs patients. She served as the AEGD Program Director at the University of Louisville School of Dentistry from 1995 – 1998 during which time she also piloted a DMD comprehensive care model with eleven D4 students that served as the precursor for the current clinical system. She was appointed as the Associate Dean for Clinics and Post-doctoral Education in January, 1999 and served in this capacity until June, 2010. Dr. Peterson completed the ADEA Leadership Institute in 2004, was the recipient of the Williams J. Gies Award in 2006 and completed the *Executive Leadership in Academic Medicine Program* (ELAM) for Women in 2008-2009. Dr. Peterson's primary area of interest is the sustainability of dental education in view of recent changes in accreditation standards and continuing access to care issues. Please join me in welcoming

Dr. Peterson to the IUSD family!

Her vision for the GPR program is to grow and enhance the program to provide residents the opportunity to improve clinical skills and efficiency, interact with other healthcare providers to provide interdisciplinary patient care, and to provide care for patients with more complex medical (including oral) and reconstructive needs. Your stewardship in supporting this vision when higher education is facing tremendous financial challenges will help further the educational, research and service mission of Indiana University and will facilitate the development of more experienced oral healthcare providers at a time when we so desperately need them. I hope that you will join me in supporting the GPR program as we embark on a new chapter for the program!

PLEASE SUPPORT THE HUTTON CIRCLE AND UNIVERSITY CAPITAL CAMPAIGN

The University is currently in the midst of a Capital Campaign. The Dental School has established a goal of \$35 million. I would like to ask for your support to this campaign. Each gift that is made to the Hutton Circle provides direct sup-

port to the department. Each gift demonstrates to the school, to Dean Williams and to the University the power and commitment of the oral surgery community. Your gift is even more powerful if you make a 5 year pledge as the total amount of

the pledge will be credited towards the IUSD's goal. Please make your voice heard. It would be ideal to have 100% commitment from the OMFS alumni and state membership. The support that you provide to the department is very much appreciated.

GREETINGS FROM THE OFFICE OF DEVELOPMENT AT IUSD

I wanted to write to update you on development activities at IUSD.

As you may know, the IUPUI campus is in the closing stages of a large capital campaign for the entire IUPUI campus. The campaign was initiated July 1, 2006, and is scheduled for completion June 30, 2013. The IMPACT IUPUI campaign has the largest dollar goal of any campaign ever initiated by any Indiana University campus, with a total dollar goal of \$1.25 billion dollars. As of September 1, 2011, the campaign has raised \$1,000,047,000, or 84% of the total goal.

Each academic unit on the IUPUI campus was asked to determine a campaign goal as part of the overall comprehensive goal for the campaign. IUSD committed to an overall goal of \$35 million, with \$22.5 million to be garnered through non-governmental grants from our research department and the remaining \$12.5 million to be raised through private philanthropy from our alumni and friends. This goal represents the third largest of any unit on campus. More importantly, completion of this goal sends a strong message to leadership at Indiana University that our alumni and friends are committed to the educational mission of IUSD. Thus far, we have achieved 72% of our goal.

So how can you help with IUSD's campaign goal? I'm glad you asked!

So many of you have shown your appreciation, thoughtfulness and loyalty to the Graduate Oral Surgery program by committing a gift or pledge to the Hutton Circle. As you may know, gifts given to the Hutton Circle are utilized to enhance the learning environment for the current residents of the program. Membership also entitles you to attend lectures and seminars from world class speakers and presenters. Most importantly, your ongoing support has created a

culture of giving back to the Graduate Oral Surgery program and produced a model for all other graduate programs at IUSD to emulate. You should be proud of your accomplishment.

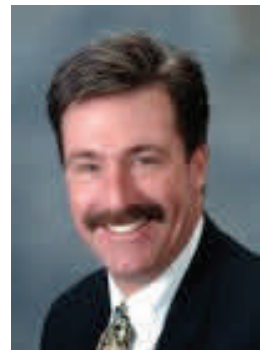

And here's some more good news. Not only does your commitment to the Hutton Circle enhance the future of the Graduate Oral Surgery program, but gifts and pledges also are counted in IUSD's portion to the IMPACT IUPUI campaign. For example, if an individual makes a \$10,000 gift or multi-year pledge (\$2,000 a year for 5 years) to the Hutton Circle, the entire amount of the gift or pledge is counted in the IMPACT IUPUI campaign. Talk about more bang for your buck!

Please feel free to call or contact me via email at johoff-ma@iupui.edu if you have questions about how you can make a gift and pledge.

Finally, allow me to sincerely express my gratitude and appreciation for your ongoing support of the Graduate Oral Surgery program and IUSD. Please know that your thoughtfulness and generosity is truly valued and NEVER taken for granted.

Hutton circle gift levels

Fellow	\$1500.00
Associate	\$2500.00
Partner	\$5000.00

GREETING FROM DEAN WILLIAMS

Our vision at Indiana is to be one of the best dental institutions of the 21st century. Building on this same vision for Indiana University overall, we are committed to the highest achievements to keep our profession strong. It is an honour to serve as dean of this fine dental education program. Since 1879, Indiana has a tremendous history and legacy within the dental profession and our efforts are

focused on enhancing and growing IU dentistry to keep us at the forefront of academic dentistry. Over this past year, Dr. Bennett has made great progress in repositioning the department of oral surgery and hospital dentistry through the recruitment of three highly talented surgeons, gaining approval of initial accreditation for the dental anaesthesiology program and successfully recruiting a national leader in dental education to provide strong guidance for the hospital dentistry programs. In turn, our alumni and friends have stepped up to support the department through membership in the Hutton Circle and be-

yond. I know you will enjoy this edition of the newsletter as it amplifies the many good things happening within the oral surgery department at IUSD. Thank you for your support and investment to help us achieve our vision!

DR. SAM CAMPBELL, Jr. RETIRES AFTER 35 YEARS OF SERVICE TO IUSD

Dr. Campbell, Jr. retired August 31, 2011 after 35 years of service to the IUSD.

After earning a BS in pharmacy and his DDS from Howard University in Washington, DC., Dr.

Campbell completed

his training in oral and maxillofacial surgery in 1975 from the VAMC and NJ College of Medicine and Dentistry. During his distinguished professional career he has served as Chief of the Oral Surgery service at the VAMC in Washington DC and Indianapolis, and as a part time and full time faculty in oral surgery

at the IUSD since 1976. Dr. Campbell retired from the Army Reserves in 2000 at the rank of Colonel. During his military career he served overseas deployment during Desert Storm and the Bosnian conflict.

His awards include recognition for the best dental unit during his military command, the Sagamore of the Wabash award presented by the Governor in 1996 for his military service, the outstanding volunteer award from the Little Red Door Cancer Agency and the United Way in 2005 and 2007, outstanding oral surgery faculty award by the class of 2002, and the Dale and Phyd Lentz award for recogni-

tion of excellence presented by the Department of Oral Surgery and Hospital Dentistry in 2007. Dr. Campbell has also participated in numerous medical/dental missionary trips to Haiti and Ecuador.

We wish Dr. Campbell a happy and healthy retirement.

A SPECIAL THANK YOU

We are very fortunate to have several colleagues join our department as full time faculty. However, the ability to function over these past few years requires a thank you to those part time and volunteer faculty. Approximately 18 months ago when the department faced a critical faculty issue Dr. Chris Kirkup stepped up. For those 18 months prior to our new colleagues joining the faculty, Dr. Kirkup provided clinical coverage 2

days per week and participated in hospital call. Without his commitment the ability for the department to satisfy its mission would have been compromised. There are a number of other individuals who also contributed much needed support. Drs. Tancredi and Hostalet were there every Thursday since they have finished their residency training. Other individuals who provide clinical coverage include Drs.

Bennett, Bojrab, Buttrum, Devitt, Dreiman, Falendar, Flannigan, Garrison, Howell, Lo, Pruitt, Tate, and Troyer.

While it has been very beneficial to have additional full time faculty, the department still needs your support. Please consider volunteering one day per month to cover a departmental clinic.

OMFS TRANSITIONS

We are already several months into the new academic year. We graduated three excellent OMFS residents in Drs. Alderman, Hopkin, and O'Neill. Dr. Alderman has joined the IUSD OMFS faculty. Dr. Hopkin has returned to Utah and established his own practice. Dr. O'Neill has moved to Fort Wayne and joined Oral and Maxillofacial Surgery Associates, P.C. Four new residents have been

with us since July 1, 2011: three first year residents and one 1 year fellow. Dr. Ross Freeman and Dr. Scott Peifer are both graduates from IUSD. Dr. R. Cole Lambert is a graduate of University of Louisville. Dr. Phil Ruckman III graduated from IUSD in 2010 and will be applying to OMFS programs this year. As these residents become acclimated to IU we have just

completed interviews for the next academic year. The program continues to receive a number of qualified candidates. This year's application pool consisted of approximately 130 candidates.

IUSD ORAL SURGERY CLUB

The IUSD Oral Surgery Club was started in the fall of 2009 by Dr. Trevor Treasure. The original membership consisted of 4 predoctoral IUSD students. Under Dr. Treasure's guidance the club has grown and membership approaches 20 students. One result of the OMFS club is an increasing interest in OMS as a career

amongst the current IUSD classes. The IUSD class of 2014 has nearly 10 students considering a career in OMS. This interest relates to the efforts of the OMFS faculty, but specifically to Dr. Treasure and the personal relationships he has developed with the students.

SIMULATION TRAINING FOR THE OMFS RESIDENTS

The Fairbanks simulation center is a 30,000 square foot, high fidelity simulation center that is jointly operated by Clarian Health and the Indiana University of Medicine and School of Nursing. The center provides several unique opportunities for resident education. The residents currently participate in both computer and mannequin/simulation exercises that allow all aspect of anesthetic and medical emergency drills. If one wants to get an idea of what mannequin / simulation training is AAOMS and

the ADSA offer such courses several times a year. Simulation training is dependent on the equipment and the facility and how you can administer the simulation and modify the environment dependent on the interaction with the participants. Clarian has one of the best, if not the best center in the country. Other opportunities that exist are mannequins that enhance cardiac auscultation and Objective Structured Clinical Exams (OSCEs) that enhance and assess skills and clinical knowledge in per-

forming history and physical examinations.

Ashley Ramey, Assistant to the Chair

Ashley Ramey is the Assistant to the Chair for the department of Oral Surgery and Hospital Dentistry. She is from Southern Indiana and graduated from Indiana University in 2008. Before attending IU she served in the United States Navy as a Hospital Corpsman for 8 years. During her 8 years of service she was stationed in

Guam, Great Lakes and Sicily. Ms. Ramey has formerly been Residency Coordinator for the department and we are grateful for everything that she has done for our department. Joining Ms. Ramey in the office is Jennifer Faires (Administrative Assistant) and Kasey Myers (Residency Coordinator). If there is anything that you would like to share in future newsletters please let me know.

The department phone numbers are:

317-274-5315 (Jennifer Faires)
317-278-3662 (Kasey Myers)
317-278-3699 (Ashley Ramey)

IUSD IMPLANT CENTER

In August 2011, IUSD established an implant center. Dr. Fidel Barbosa, a graduate of IU's prosthodontic and maxillofacial prosthetic program has been appointed its director. Dr. Dario Valencia-David has been appointed as the first implant fellow. Dr. Valencia-Davis completed his specialty certificate in prosthodontics at IU in 2001. The formation of

the implant center is critical to further increasing the surgical implant opportunities and implant education for the oral surgery residents. In keeping with the IU Dental School's fee schedule for all patient services, the cost of implants is lower than fees typically encountered in private practice. Any referrals that you make to the depart-

ment will benefit the resident's education.

ESKENAZI HEALTH

The department of Oral Surgery and Hospital Dentistry maintains two clinics on the main IUPUI campus. A six chair clinic is located on the 3rd floor of the University Hospital outpatient building and a twenty chair oral

surgery / emergency / dental clinic at Regenstrief Health Center, which is the outpatient building attached to Wishard Hospital. The new Wishard or Eskenazi Health is scheduled to open at the end of 2013. Within the new outpatient facility associated with Eskenazi Health, the department will maintain a facility, which will self contain its own JCAHO approved surgical suite. The incorporation of its own surgical suite will compliment

all three components of the department. Oral Surgery will be able to provide full scope ambulatory surgery within its clinic including bone grafts, osteotomies, and esthetic surgery. Hospital Dentistry will be able to provide care to the physically and mentally impaired patient as well as the phobic patient. The expanded anesthetic abilities being provided by our faculty dentist anesthesiologist will allow increased and expanded training for our residents.

A SPECIAL THANK YOU TO WILL HINE, DDS FOR HIS YEARS OF LEADERSHIP

Dr. Will Hine graduated from Indiana University School of Dentistry in 1996. He completed a residency in general dentistry at the IU Medical Center in 1997 before joining the faculty of the dental school where he served as Director of Hospital Dentistry for over 14 years and Program Director for the General Practice Residency until 2011. He currently has a private

practice in Brownsburg and is an Assistant Professor of Hospital Dentistry. Dr. Hine's main teaching focus within the GPR involved the management of the medically complex patient. He holds hospital privileges at Wishard Hospital, IU Health North as well as University and IU Methodist Hospitals. Dr. Hine is also a

member of the American Dental Association, Indiana Dental Association and Special Care Dentistry Association and is on the Board of the Indianapolis District Dental Society and Indiana Donated Dental Services Foundation. He is married to Michelle, a second grade teacher in Wayne Township and has two young daughters. We wish him well.

ACHIEVEMENTS

Since 2004 our successes

Congratulations to the following individuals:
