Notes:

1. Units reported as "in process" are denoted with an "***". Data for these units may have been incomplete at the time of the report containing the 2011 source data.
2. Units that did not affirm their debt data by March 2013 are denoted with an "****" (2012 data only).
3. NR = Not Reported.

Notes:

1. Some cities and towns are able to establish sanitary and water districts that collect property taxes. In some cases, these districts have boundaries that are bigger or smaller than the territory of the city or town. In these cases, the assessed value of the district is reported here.
2. The summary statistics in this table are calculated based on the assessed values of the city or town. The assessed values associated with any sanitary and water districts are not included in the summary statistics
3. Indianapolis is reported as six special districts. The geographies of these districts are not coterminous. As such, the assessed value for each special district is reported separately and is not included in the summary statistics.
4. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Notes:

1. Some cities and towns are able to establish sanitary and water districts that collect property taxes. In some cases, these districts have boundaries that are bigger or smaller than the territory of the city or town. In these cases, the homestead deductions for the district are reported here.
2. The summary statistics in this table are calculated based on the homestead deductions of the city or town. The homestead deductions associated with the sanitary and water districts are not included in the summary statistics.
3. Indianapolis is reported as six special districts. The geographies of these districts are not coterminous. As such, the homestead deductions for each special district is reported separately and is not included in the summary statistics.
4. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Notes:

1. Some cities and towns are able to establish sanitary and water districts that collect property taxes. In some cases, these districts have boundaries that are bigger or smaller than the territory of the city or town. In these cases, the supplemental homestead deductions for the district are reported here.
2. The summary statistics in this table are calculated based on the supplemental homestead deductions of the city or town. The supplemental homestead deductions associated with the sanitary and water districts are not included in the summary statistics.
3. Indianapolis is reported as six special districts. The geographies of these districts are not coterminous. As such, the supplemental homestead deductions for each special district is reported separately and is not included in the summary statistics.
4. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Notse:

1. Some cities and towns are able to establish sanitary and water districts that collect property taxes. In some cases, these districts have boundaries that are bigger or smaller than the territory of the city or town. In these cases, the non-homestead deductions for the district are reported here.
2. The summary statistics in this table are calculated based on the non-homestead deductions of the city or town. The non-homestead deductions associated with the sanitary and water districts are not included in the summary statistics.
3. Indianapolis is reported as six special districts. The geographies of these districts are not coterminous. As such, the non-homestead deductions for each special district is reported separately and is not included in the summary statistics.
4. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Notes:

1. Some cities and towns are able to establish sanitary and water districts that collect property taxes. In some cases, these districts have boundaries that are bigger or smaller than the territory of the city or town. In these cases, the assessed value of the district is reported here.
2. The summary statistics in this table are calculated based on the assessed values of the city or town. The assessed values associated with any sanitary and water districts are not included in the summary statistics.
3. Indianapolis is reported as six special districts. The geographies of these districts are not coterminous. As such, the assessed value for each special district is reported separately and is not included in the summary statistics.
4. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Notes:

1. Except for Indianapolis and Winfield, the tax rates reported here reflect the sum of all rates for each unit, including rates identified as special districts.
2. Indianapolis is treated as six special districts. The geographies of these districts are not coterminous. As such, the rates for Indianapolis are reported separately and are not included in the summary statistics.
3. The Winfield Waterworks serves only part of the town. As such, the tax rate for the Waterworks is reported separately, and is not included in the summary statistics.

Notes:

1. The data reported here reflect the sum of LOIT revenue used to replace property taxes for homesteads for each unit, including revenues for related special districts.
2. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Source: Indiana Office of the State Auditor, County Property Tax Abstracts, 2011, 2012.

Notes:

1. The data reported here reflect the sum of LOIT revenue used to replace property taxes for non-homestead residential property for each unit, including revenues for related special districts.
2. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Source: Indiana Office of the State Auditor, County Property Tax Abstracts, 2011, 2012.

Notes:

1. The data reported here reflect the sum of LOIT revenue used to replace property taxes for other property for each unit, including revenues for related special districts.

2. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.

Source: Indiana Office of the State Auditor, County Property Tax Abstracts, 2011, 2012.

Notes:

1. The data reported here reflect the sums of levies and LOIT revenues used to replace homestead property taxes for each unit, including related special districts.
2. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.
3. NA = Not Applicable.

Notes:

1. The data reported here reflect the sums of levies and LOIT revenues used to replace residential property taxes for each unit, including related special districts.
2. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.
3. NA = Not Applicable.

Notes:

1. The data reported here reflect the sums of levies and LOIT revenues used to replace other property taxes for each unit, including related special districts.
2. Due to rounding, change may be slightly more or less than the difference between the data displayed for 2011 and 2012.
3. NA = Not Applicable.

Notes:

1. Units reported as "in process" are denoted with an "***". Data for these units may have been incomplete at the time of the report containing the 2011 source data.
2. Units that did not affirm their debt data by March 2013 are denoted with an "****" (2012 data only).
3. NR = Not Reported.
4. Austin (2012 only), DeMotte, Elkhart, Evansville, Fort Wayne (2012 only), Highland, Hobart, Jeffersonville, Loogootee (2011 only), South Bend, Speedway, and Winchester (2012 only) reported using federal tax credits in 2011 and 2012. These credits typically are used to reduce debt payments. The debt obligations reported here do not reflect these credits.

Notes:

1. Tax-supported debt-related obligations are not available for 2011.
2. Units reported as "in process" are denoted with an "***". Data for these units may have been incomplete at the time of the report containing the 2011 source data.
3. Units that did not affirm their debt data by March 2013 are denoted with an "***" (2012 data only).
4. NR = Not Reported.
5. DeMotte, Elkhart, Fort Wayne, Highland, Hobart, South Bend, Speedway and Winchester reported using federal tax credits for their 2012 tax-supported debt. These credits typically are used to reduce debt payments. The debt obligations reported here do not reflect these credits.

Notes:

1. Units reported as "in process" are denoted with an "***". Data for these units may have been incomplete at the time of the report containing the 2011 source data.
2. Units that did not affirm their debt data by March 2013 are denoted with an "****" (2012 data only).
3. NR = Not Reported.
4. Austin (2012 only), DeMotte, Elkhart, Evansville, Fort Wayne (2012 only), Highland, Hobart, Jeffersonville, Loogootee (2011 only), South Bend, Speedway, and Winchester (2012 only) reported using federal tax credits in 2011 and 2012. These credits typically are used to reduce debt payments. The debt obligations reported here do not reflect these credits.

Notes:

1. Tax-supported debt-related obligations is not available for 2011.
2. Units that did not affirm their debt data by March 2013 are denoted with an "***" (2012 data only).
3. NR = Not Reported.
4. DeMotte, Elkhart, Fort Wayne, Highland, Hobart, South Bend, Speedway and Winchester reported using federal tax credits for their 2012 tax-supported debt. These credits typically are used to reduce debt payments. The debt obligations reported here do not reflect these credits.

Notes:

1. Units reported as "in process" are denoted with an "***". Data for these units may have been incomplete at the time of the report containing the 2011 source data.
2. Units that did not affirm their debt data by March 2013 are denoted with an "****" (2012 data only).
3. NR = Not Reported.
4. Austin (2012 only), DeMotte, Elkhart, Evansville, Fort Wayne (2012 only), Highland, Hobart, Jeffersonville, Loogootee (2011 only), South Bend, Speedway, and Winchester (2012 only) reported using federal tax credits in 2011 and 2012. These credits typically are used to reduce debt payments. The debt obligations reported here do not reflect these credits.

Notes:

1. Tax-supported debt-related obligations is not available for 2011.
2. Units that did not affirm their debt data by March 2013 are denoted with an "****" (2012 data only).
3. NR = Not Reported.
4. DeMotte, Elkhart, Fort Wayne, Highland, Hobart, South Bend, Speedway and Winchester reported using federal tax credits for their 2012 tax-supported debt. These credits typically are used to reduce debt payments. The debt obligations reported here do not reflect these credits.

FISCAL BENCHMARKING

Technical Documentation

The *Fiscal Benchmarking for Indiana's Local Governments* project team used the following process to select fiscal indicators and compile data for counties, townships, and cities and towns. The project team identified 46 potential fiscal indicators by surveying relevant literature, evaluating the fiscal indicators used in fiscal benchmarking efforts in other states, and on the advice of members of the advisory committee. The project team surveyed public data on the Indiana Gateway for Governmental Units (Gateway, gateway.ifionline.org) and from other sources for suitability in producing an exhaustive list of potential indicators for CY 2011 and 2012. Generally, the team selected indicators that could be produced using public data that are reported by all units and available in a digital database or spreadsheet format. If no data were available within these parameters to produce the indicator, it was eliminated. The eliminated indicators included: measures of capital assets, financial position (net assets), budgeted (or projected) revenue and spending, and liquidity (cash on hand).

Using the selected data sources and associated technical documentation, the project team developed the general and specific methodology for calculating each indicator. This process also included assessing and selecting the database fields and coding needed to calculate the indicator. For instance, in a general sense, spending per capita is calculated by dividing total disbursements by population. More specifically, total spending was defined as total disbursements minus spending reported in selected codes to account for double counting and monies that are not controlled by the local government. In some cases, the project team adjusted the definition and calculation of the indicator based on limitations of the data. For example, total debt was adjusted to total outstanding debt obligations. Debt instruments include bonds, loans, and lease rentals. While DLGF asks units to report the principal and interest associated with lease rental payments, these data are incomplete. As a result, the indicator was changed to capture the outstanding debt payments as of the last day of each year rather than the outstanding principal.

After data sources were identified and data series were selected and compiled, all data were prepared prior to calculation of the fiscal indicators. This process entailed visual inspection of the raw data, including the names of each governmental unit. All unit names were reconciled when necessary, and any missing data were logged. As described below, additional manipulation was necessary for some datasets; for instance, all county abstract data were converted from taxing districts to taxing units prior to calculation of indicators.

Once the preparation and editing process was complete, all indicator calculations were produced using statistical software packages SAS, R, Access, SPSS and/or Excel. Calculation varied by indicator. After completion of the indicator calculations, all indicators were verified against the original data for accuracy.

Each data source is described below including the legal basis for reporting/collecting the data, reporting details, the indicators produced using the data source, the specific data used and any manipulation necessary, and limitations associated with the data source generally. This information is summarized in Table 150. Table 151

Indiana Gateway for Government Units

The Indiana Gateway for Government Units is a resource maintained by Indiana University's Indiana Business Research Center. Established in 1925, the Indiana Business Research Center (IBRC) is an integral unit in the Kelley School of Business at Indiana University. The IBRC provides and interprets the economic information needed by the state's business, government, and nonprofit organizations, as well as users of such information throughout the nation. The Indiana Gateway for Government Units was created by the IBRC in 2006 with the aim to streamline the collection of Indiana local government financial data on behalf of the Indiana Department of Local Government Finance (DLGF) and the Indiana State Board of Accounts (SBOA), while making the data available digitally to the public free of charge.

provides further detail about the sources and data used for the calculation of each indicator, and any specific limitations. Tables of Annual Financial Report (AFR) receipt and disbursement codes (Tables 152 and 153) also are provided for reference.

Sources of Data

Annual Financial Reports

Indiana law requires that counties, townships, cities and towns, and other local governments submit Annual Financial Reports (AFRs) to the Indiana State Board of Accounts (SBOA) through the Gateway (gateway.ifionline.org/) no later than 60 days after the fiscal year ends (IC 5-11-1-4). The SBOA uses the AFRs when auditing these units. These reports, as submitted by the units, are made available via Gateway to the public soon after the deadline for submission. The financial data submitted in each Annual Financial Report are self-reported and not audited.

Fund accounting is used for reporting to the SBOA. Counties, townships, and cities and towns are required to report financial information on a financial statement that complies with the financial reporting provisions established by the SBOA each year. According to the SBOA *Accounting and Financial Reporting Regulation Manual*, “[T]he operations of each fund are accounted for with a separate set of self-balancing accounts comprised of receipts, disbursements, and its investment and cash balance. Resources are allocated to and accounted for in individual funds based upon the purpose for which they are to be spent and the means by which spending activities are controlled.” For more information, see www.in.gov/sboa/files/RegulatoryManual_2012.pdf.

Financial data are reported by local government units using a combination of receipt and disbursement codes. Some codes apply only to specific types of units. The 2013 list of receipts and disbursement codes are shown in Tables 152 and 153.

Periodically, adjustments are made to the coding in response to legislation and for clarity. The State Board of Accounts introduced a new county chart of accounts (funds) prior to the AFR reporting window for CY 2012. Counties were given the option to use the old chart of accounts or to adopt the new chart of accounts for CY 2012. All counties will use the new chart of accounts in reporting CY 2013.

The project team used AFR data to produce many of the spending and revenue indicators, and the debt service ratio indicator. The 2011 and 2012 AFR *Detailed Receipts* and AFR *Detailed Disbursements by Fund* data were downloaded from Gateway for all counties, townships, and cities and towns on June 12, 2013. This date is well after the reporting deadline for both years. A small subset of units failed to submit an annual financial report for 2011, 2012, or both years by June 12, 2013. Some units submitted an updated annual financial report sometime after that date. Any changes made after the data were downloaded are not reflected in the fiscal benchmarks documented in this report.

The project team sought to build the fiscal indicators using only monies for which each local government has the ability to make decisions. Ideally, the dataset would exclude:

1. monies legally required to be distributed to other local governments,
2. monies withheld from employee earnings and distributed to federal and state governments and insurance companies,
3. monies that are double counted through tax anticipation warrants and transfers and loans within the local government, and
4. monies held in trust (e.g., counties hold monies for prisoners and residents of county homes).

In this effort, the project team was able to identify a number of specific receipts and disbursements codes that were removed from the AFR datasets for all units (see Table 149). The project team has confidence that these code exclusions address substantially (2) and (3) above for all units. This treatment, however, does not fully address (1) and (4) for county governments.

To fully accomplish the desired exclusions, the project team sought to exclude a number of fund codes as well. The project team was unable to find a consistent method for excluding particular activities using fund codes. This may be, in part, a result of changes to county chart of accounts and inconsistencies in implementation in 2012. This failure principally affects the data used to report indicators for counties. The AFR data used to calculate county fiscal indicators likely include monies that were collected for and distributed to other local governments. The project team will revisit the issue in the production of the next annual report as data for 2013 were submitted using a single chart of accounts (funds).

Based on feedback from the project advisory committee, the project team also excluded proceeds from *Borrowing other than tax anticipation warrants* because including these proceeds distort the day-to-day revenue available to local governments (Table 149). This code includes proceeds from bonds and loans that are not short-term tax anticipation warrants. Data for this exclusion is provided for counties, townships, and cities and towns in Appendix B.

Table 149. Receipt and disbursement exclusions for all units from Annual Financial Reports

Disbursement Code	Disbursement Type	Disbursement
D401	Debt Service	Payments on Tax Anticipation Warrants Principal
D701	Other Disbursements	Payments To or On Behalf of Beneficiaries
D702	Other Disbursements	Payment of Taxes and Other Payroll Withholdings
D703	Other Disbursements	Distributions to Other Governmental Entities
D704	Other Disbursements	Transfer Out - Transferred To Another Fund
D705	Other Disbursements	Interfund Loan - Loaned To Another Fund
D706	Other Disbursements	Interfund Loan - Repaid To Another Fund
D900	Other Disbursements	Purchase of Investments
Receipt Code	Receipt Type	Receipt
R901	Other Receipts	Sale of Investments
R903	Other Receipts	Proceeds from Tax Anticipation Warrants
R904	Other Receipts	Proceeds from Borrowing Other than Tax Anticipation Warrants
R907	Other Receipts	Benefit Plan Contributions
R909	Other Receipts	Payroll Fund and Clearing Account Receipts
R910	Other Receipts	Transfers In - Transferred from Another Fund
R911	Other Receipts	Interfund Loans - Borrowed from Another Fund
R912	Other Receipts	Interfund Loans - Repayment from Another Fund

FISCAL BENCHMARKING

Data reported from Indianapolis Consolidated City are the aggregate of six special districts: *Indianapolis Consolidated City*, *Indianapolis Consolidated County*, *Indianapolis Police Special Service*, *Indianapolis Fire Special Service*, *Indianapolis Sanitary (Liquid)*, and *Indianapolis Sanitary (Solid)*. All city and town utilities and redevelopment commissions coded as special districts are reported with the base local government for this dataset.

In addition to the data issues described above, the exclusion of selected receipt and disbursement codes is imperfect for a few government activities. For example, *Payment of taxes and other withholdings* generally covers taxes, insurance premiums, and retirement contributions that local government employees make and are forwarded to entities outside the local government. However, when local governments are self-insured, these monies are paid to the local government and retained. In such a case, the exclusions described above eliminate the benefit plan contribution receipts, but does not eliminate the corresponding disbursement.

The project team compiled a list of “enterprises” that local governments report on their annual financial reports. Many of these services would be considered utilities (drinking water, wastewater, stormwater, electric, gas, and internet). Some of the services listed as other include: airport, port/marina, town/community center, industrial park, parking garage/parking, golf course, park, town hall, or transit. A detailed list of local government enterprises is provided in Appendix A. These data provide some information about the differentiation of services, particularly utilities, across local governments. Readers should take care in interpreting “other” enterprises. In some cases, these activities may be reported as regular government activities by other units.

Bond, Loan, and Lease Rental Reporting

State law requires local governments to report debt with repayment periods equal to or greater than 12 months, within one month of issuance, to the Indiana Department of Local Government Finance (DLGF) through the Gateway (IC 5-1-18). The Debt Management section of the Gateway became operational in 2011. Units report data for individual debt instruments, including the following:

- Bond issuances
- Loans (excluding temporary loans payable from current revenues)
- Lease rentals of buildings and other permanent structures
- Equipment under a lease-to-own arrangement (excluding short-term leases of copiers and vehicles)

For each instrument, units report a title, the status of each instrument (active/retired), whether the debt is subject to property tax caps, whether the debt is subject to debt limits, the sale and closing dates for bonds, and the primary and secondary sources of repayment. Units also report the amortization schedule for each instrument with information by payment date on the principal, interest, federal tax credits (which subsidize projects that qualify for federal aid), bond/loan payments, lease payments, and balances for each period. These data are made available to the public via Gateway on a rolling basis. Units are required to verify the accuracy and completeness of the debt information they have submitted in Gateway on March 1 of each year beginning in 2013. If a unit has no debt, they must certify that they have no outstanding debt each year. Starting with local government FY 2013, DLGF cannot approve a budget or a levy for the repayment of a debt obligation that has not been reported in the Gateway Debt Management tool.

Because of inconsistencies in the reporting of principal for lease rentals, the project team used total debt-related obligations remaining rather than total debt (principal) remaining when creating the debt indicators. Because DLGF does not require local governments to report the retirement date for debt instruments, the project team was unable to use debt data retrieved directly from Gateway to create indicators for outstanding debt obligations.

For the 2011 outstanding debt-related indicators, the project team used data reported by DLGF in *Local Government Debt (as of December 31, 2011)*. The dataset used for the report includes only data submitted officially to the DLGF as of

FISCAL BENCHMARKING

4:00 pm on September 12, 2012. The report separates debt into principal, interest, lease payments, and expected credits from the federal government. This information was drawn from the amortization schedules reported for each instrument by local governments. For bonds and other loans, the outstanding debt obligation is reported as the sum of principal, interest, and federal credits. For leases, the DLGF asked units to report lease payments and the principal and interest for any bonds backing those leases if available. However, only the lease payments and federal credits were used in the calculation of outstanding debt obligations. DLGF aggregated all remaining debt payments outstanding as of December 31, 2011. Units that did not submit data or were believed to have submitted incomplete data were noted.

In contrast with the DLGF report, the project team did not include data on federal tax credits in calculating debt-related obligations. For bonds and other loans, the outstanding debt-related obligations are reported as the sum of principal and interest only. For leases, the outstanding debt-related obligations are reported as only the sum of outstanding lease payments. The project team also used annual population estimates for 2011 instead of the 2010 decennial Census population counts used originally in the DLGF report for producing per capita debt indicators. The debt-related obligations for Indianapolis Consolidated City data are the aggregate of three special districts: *Indianapolis Consolidated City*, *Indianapolis Consolidated County*, and *Indianapolis Sanitation (Liquid)*. No debt data were reported for *Indianapolis Fire Special Service*, *Indianapolis Police Special Service*, or *Indianapolis Sanitation (Solid)*. In cases when other municipal utilities and redevelopment commissions were reported as separate “special districts,” these data were added to the debt obligations for the base unit. The DLGF report does not allow for the identification of tax-supported debt for 2011.

For the 2012 total and tax-supported outstanding debt-related obligations indicators, the project team used a special extract of data provided by DLGF that included the debt reported by units to Gateway at the time that they certified their debt data as correct on or before March 1, 2013, deadline. The data collected by DLGF is the same described above for 2011. For bonds and other loans, the project team calculated outstanding debt obligations by summing outstanding principal and interest. For leases, the project team calculated outstanding debt-related obligations by summing outstanding lease payments. In a few cases, when only a period total was provided rather than principal, interest, or least payments, the project team used the period total. The project team aggregated all remaining debt-related payments outstanding (status = outstanding or null) for bond, loan, and lease instruments by local government as of December 31, 2012. The Indianapolis Consolidated City data are the aggregate of three special districts: *Indianapolis Consolidated City*, *Indianapolis Consolidated County*, and *Indianapolis Sanitation (Liquid)*. In cases when other municipal utilities and redevelopment commissions were reported as separate “special districts,” these data were added to the debt total for the base unit. Tax-supported debt-related includes instruments listed as having property taxes, local option income taxes, tax increment financing (TIF), or Motor Vehicle Highway / Local Roads and Streets distributions (MVH/LRS) as the primary or secondary source of repayment.

Short-term debt that will be paid off in less than 12 months does not have to be submitted to this particular database on Gateway. Total outstanding debt-related obligations and outstanding tax-backed debt obligations do not include this short-term debt. The debt service indicator, however, uses Annual Financial Report data that includes annual payments made on these short-term debts.

Readers should consider the reporting rates when interpreting debt-related obligations from 2011 and any changes reported from 2011 to 2012. As mentioned above, the online reporting requirements went into effect in 2011. DLGF indicates the following response rates in the first year:

- County, 95.7%
- Township, 26.5%
- City / Town, 56.5%

FISCAL BENCHMARKING

The response from units reporting their 2012 debt-related obligations by the March 1, 2013, deadline was much improved from 2011. Gateway shows the following response rates:

- County, 100.0%
- Township, 97.7%
- City / Town, 97.9%

County Property Tax Abstracts

Under state law, county auditors must prepare a county property tax abstract annually that summarizes information about the property tax base and property taxes levied by local governments within the county. It is a compilation of property tax information for individual properties. County property tax abstracts include data on the assessed value of real estate and railroad, utility, and business personal property, assessed value deductions, tax rates, levies, and credits as presented on tax statements. Both DLGF and the Auditor of State review the abstracts. The Auditor of State approves the abstracts and must maintain county property tax abstracts as public record (IC 6-1.1-22-5). For more information about property taxes in Indiana, see www.in.gov/dlgf/2516.htm.

The project team used county property tax abstracts maintained by the Indiana Auditor of State to produce the property tax base indicators, including assessed value and property tax levy data for all units. All county property tax abstract data are organized by taxing district. For assessed value and deduction indicators, data for taxing districts were converted by project staff to taxing units using a crosswalk furnished by the DLGF. For property tax levy, property tax replacement credits, and circuit breakers, data for taxing districts were converted to taxing units using the proportion of the unit tax rate to the district tax rate.

Because there currently is no reliable crosswalk identifying the sponsoring unit for each tax increment financing (TIF) district, incremental property tax revenue and assessed value captured by the TIF district is excluded from property tax base and projected revenue for the sponsoring unit. The base assessed value and property tax paid in the TIF districts are included in the property tax base and projected revenue of all units. The project team hopes to be able to assign the TIF increment to specific units in future reports.

The Indianapolis Consolidated City levy data are the aggregate of six special districts: *Indianapolis Consolidated City*, *Indianapolis Consolidated County*, *Indianapolis Police Special Service*, and *Indianapolis Special Fire Special Service*, *Indianapolis Sanitation (Solid)*, and *Indianapolis Sanitation (Liquid)*. Special district property tax data for other city and town utilities and redevelopment commissions were aggregated with the base local government for all levy indicators. Assessed value indicators are reported separately only when the special district boundaries are not coterminous with the base unit boundaries.

All data contained in the county property tax abstracts are prospective and do not represent actual property tax receipts. A local government's actual revenue realized from the property tax may differ from that reported in the property tax abstract as the result of the unpaid current property taxes, property taxes collected from previous years, Auditor's correction of errors, and refunds from appeals. Readers should consult annual financial reports for actual property tax receipts.

Property Tax Rates

Property tax rates are determined using adopted local government levies and assessed values. State law places limits on annual increases in local government levies, and in some cases on particular property tax rates. Levies and property tax rates are reviewed and approved by DLGF.

Certified property tax rates by county, township, and city and town for 2011 and 2012 were obtained from the DLGF (www.in.gov/dlgf/8379.htm). Total property tax rate by unit is the sum of the approved property tax rates by fund for each unit.

FISCAL BENCHMARKING

Indianapolis data are reported separately for each of six special districts: *Indianapolis Consolidated City*, *Indianapolis Consolidated County*, *Indianapolis Police Special Service*, *Indianapolis Fire Special Service*, *Indianapolis Sanitation (Solid)*, and *Indianapolis Sanitation (Liquid)*. Special district tax rates for other city and town utilities and redevelopment commissions are aggregated with the base local government in cases when the boundaries of both are coterminous. The rate for the special districts are reported separately when they are not.

Local Option Income Tax Rates

There are three types of local option income taxes: County Adjusted Gross Income Tax (CAGIT), County Option Income Tax (COIT), and County Economic Development Income Tax (CEDIT). Local option income taxes are set only at the county level. County councils adopt and amend CAGIT. County income tax councils adopt COIT. CEDIT is adopted by either the county council or county income tax council depending on whether the county has adopted CAGIT or COIT.

Certified local income tax rates by county were obtained from the State Budget Agency (www.in.gov/sba/2587.htm). For 2011 and 2012, the project team used the tax rates that were effective just prior to the beginning of the local government fiscal year. For 2011, the rates reported are those that became effective by November 2010. Similarly, the rates reported for 2012 are those that became effective by November 2011. County rates are certified for the purpose of budgeting at the end of July, but counties can adopt or amend rates after that.

Population Estimates

For the population indicator and for all per capita indicators, the project team used vintage 2012 population estimates for 2011 and 2012.⁴ The U.S. Census Bureau produces population estimates via the Population Estimates Program (www.census.gov/popest/). Each year, the U.S. Census Bureau produces a July estimate of the total resident population for counties, incorporated places (cities and towns), and minor civil divisions (townships). The July estimate is produced with a model that uses the base population identified in the most recent decennial census, plus births and net migration, less total deaths. With each new annual release of the population estimates, the entire time series of estimates beginning on April 1, 2010, is revised and updated. For additional information about the population estimation methodology of the U.S. Census Bureau, see www.census.gov/popest/methodology/index.html.

Population estimates are an approximation of the actual population of a local government, and may over- or underestimate the true population of the local government. Per capita measures provide useful comparisons, but may not reflect the population being serviced by a particular unit. In some cases, units are allowed to provide services outside their boundaries by statute. Other services may extend beyond a unit's boundaries because of inter-local agreements.

⁴Vintage population estimates are those that were current at the writing of the report. The U.S. Census Bureau revises estimates periodically based on new information. For example, the population estimates that were produced in the summer of 2011 and 2012 may have been revised in 2013.

Glossary⁵

Charges for Services	Receipts from direct charges for the use of a product or service provided by the local government. A user charge may apply per use of the good or service or for the use of the good or service. The first is a charge for each time while the second is a charge for bulk or time-limited use.
Circuit Breaker Class	The three classes of property eligible for circuit breaker credits are homestead; non-homestead residential and farmland; and commercial, industrial, and other.
Debt Service	Principal of the bond, loan, or lease rental plus interest charges.
Deduction	A situation where a taxpayer is permitted to subtract an amount from the assessed value of the taxpayer's property. The amount may be fixed or based on a percentage calculation.
Exemption	A situation where a certain type of property, or the property of a certain kind of taxpayer, is not taxable.
Elastic Receipts	Receipts from sources of revenue that are sensitive to changes in the incomes of taxpayers, such as local option income taxes and local excise taxes.
Fines, Forfeitures, and Fees	Receipts derived from penalties for legal offenses, court costs, and other miscellaneous fees levied by the local government.
Gross Assessed Value	The total dollar value assigned to all real property and improvements plus personal property in the jurisdiction of the local government subject to taxation. Includes the assessed value of real estate and railroad, utility, and business personal property before assessed value deductions.
Gross Tax Levy	Planned property tax revenue to be collected by the local government before losses to property tax circuit breakers. Includes local option income tax property tax replacement credits to the local government.
Homestead Standard Deduction	The total value of the assessed value deduction for homesteads. The homestead deduction is the most commonly used property tax deduction in Indiana. It allows homeowners who use a property as a primary residence to qualify for a reduction of up to 60 percent of the assessed value or \$45,000, whichever is less, thereby lowering the property owner's property tax obligation.
Homestead Supplemental Deduction	The total value of the supplemental assessed value deduction for homesteads. An individual or entity receiving a Homestead Standard Deduction also is entitled to receive a Supplemental Homestead Deduction. The amount of the Supplemental Homestead Deduction is 35 percent of the assessed value (remaining after application of the Homestead Standard Deduction) that is less than \$600,000 and 25 percent of the assessed value (remaining after application of the Homestead Standard Deduction) that is more than \$600,000.
Intergovernmental Receipts	Receipts associated with transfers from the Indiana state government and the U.S. Government.

⁵Many of the definitions here come from the DLGF's Property Tax Terms web page (www.in.gov/dlgf/8081.htm).

FISCAL BENCHMARKING

Licenses and Permits	Receipts associated with payments for the receipt of licenses and permits from the local government. Some examples include electrical and plumbing licenses, gun permits, watercraft licenses, and planning, zoning, and building permits.
Local Excise Taxes	Receipts from local excise taxes. These taxes include the Food and Beverage Tax, Innkeepers Tax, and the Vehicle / Aircraft Excise Tax Distribution.
Local Option Income Taxes	Counties may adopt either the County Adjusted Gross Income Tax (CAGIT) or County Option Income Tax (COIT). Counties may also adopt the County Economic Development Income Tax (CEDIT) and Local Option Income Taxes (LOIT) for Property Tax Freeze (FPTL), Property Tax Relief (PTR), Homestead Credit (HC), or Public Safety (PS). Selected counties also are allowed to adopt LOIT for Corrections (COR).
Local Option Income Tax (LOIT) Rate	Total local income tax rate levied on residents of a county. Computed by summing the rates of the County Adjusted Gross Income Tax (CAGIT) or County Option Income Tax (COIT), the County Economic Development Income Tax (CEDIT), and the Local Option Income Tax (LOIT) for Property Tax Freeze (FPTF), Property Tax Relief (PTR), Public Safety (PS), Homestead Credit (HC), and Corrections (COR).
Net Tax Levy	Planned property tax revenue to be collected by the local government after accounting for losses to property tax circuit breakers. Includes LOIT property tax replacement credits to the local government.
Other Receipts	Receipts from <i>Earnings on Investments, Proceeds from Borrowings, Sale of Capital Assets, Refunds and Reimbursements, Donations, Gifts, and Bequests, Grants and Distributions from Non-Governmental Entities, and Other Receipts.</i>
Outstanding Debt Obligations	The principal, interest, and federal credits of the bond, loan, or lease rental remaining to be repaid.
Outstanding Tax- supported Debt	Outstanding debt that uses tax revenue property taxes, local option income taxes, tax increment financing, or Motor Vehicle Highway Fund/Local Roads and Streets Fund distributions as a source of repayment.
Own-Source General Revenue	Receipts from taxes levied directly by the local government, for example, from general property taxes, local option income taxes, and local excise taxes.
Program Distributions	Receipts from state or federal government programs. Includes the <i>Major Moves Distribution, Motor Vehicle Highway Distribution, AFDC/Food Stamps Grants and Distribution, Child Support and Child Welfare Grants and Distribution, State and County Funds for Soil/Water Operations, Federal and State Grants and Distributions, and Other Grants and Distributions.</i>
Property Tax Replacement Credits	Property tax replacement credits (PTRC) are used to provide tax relief and provided through local option income taxes.
Tax Cap Losses	The amount of potential property tax revenue not received by the local government due to the property tax cap credits. The property tax cap limits local property tax liability to 1 percent of gross assessed value for residential homesteads, 2 percent of gross assessed value for non-homestead and farmland properties, and 3 percent of gross assessed value for commercial, industrial, and other types of properties.

FISCAL BENCHMARKING

Taxable Assessed Value	The total assessed value of real estate and railroad, utility, and business personal property after assessed value deductions and exemptions.
Taxing District	This is the term for the geographic area within which all taxpayers pay property taxes to the same units and funds.
Taxing Unit	An organization or government body having the statutory right to fund itself through the property tax system. Examples include counties, townships, and cities and towns.
Total Assessed Value Deductions	Deductions reduce the amount of assessed value a taxpayer pays on a given parcel of property. There are a number of property tax deductions available to Indiana property owners; however the homestead deduction is the most common and most widely used of these. The total value of assessed value deductions includes the homestead standard, homestead supplemental, and total miscellaneous assessed value deductions.
Total Disbursements	All disbursements made by a local government in the fiscal year except for those listed in the Sources of Data-Annual Financial Reports section of this report.
Total Non-homestead Assessed Value Deductions	Deductions reduce the amount of assessed value a taxpayer pays on a given parcel of property. Miscellaneous assessed value deductions include assessed value deductions other than the Homestead Standard Deduction and the Homestead Supplemental Deduction, which includes the mortgage, veteran, age 65 and over, blind and/or disabled, energy systems, and urban development/rehabilitation assessed value deductions.
Total Population	Total number of residents residing within a local government's borders as reported by the U.S. Census Bureau.
Total Property Tax Rate	Total property tax rate levied by a local government.
Total Receipts	All receipts recorded by a local government in the fiscal year except for those listed in the Sources of Data-Annual Financial Reports section of this report.
User Charge Receipts	Receipts from non-tax sources of revenue, includes Licenses and Permits, Charges for Services, and Fines, Forfeitures, and Fees.

Appendix A. Enterprises by Local Government

Table 154. Enterprises by county

County	Drinking water	Wastewater (sewage)	Stormwater	Electric	Gas	Trash/Landfill/Solid Waste	Internet/Broadband	Other
Allen County								X
Delaware County			X					
Elkhart County			X			X		
Floyd County			X					X

Notes:

1. Municipalities that do not report any enterprises in their Annual Financial Reports are not included in the table.
2. Readers should use care in interpreting "other" enterprises. In some cases, these activities may be reported as regular governmental activities by other units.
