FISCAL BENCHMARKING

Fiscal Benchmarking for Indiana's Local Governments

ADVISORY COMMITTEE

Craig Johnson

(Committee Chairman)
Associate Professor of Public Finance;
School of Public and Environmental Affairs;
Indiana University Bloomington

Seth Payton

Assistant Professor of Public Finance; School of Public
and Environmental Affairs; Indiana
University-Purdue University Indianapolis

Justin Ross

Associate Professor of Public Finance;
School of Public and Environmental Affairs;
Indiana University Bloomington

Deborah Driskell

Township Trustee; Delaware Township,
Hamilton County, Indiana

Michael Fowler

Director of Finance, Business Affairs and Human
Resources; School of Public and Environmental Affairs;
Indiana University Bloomington

Michael Griffin

Clerk-Treasurer; Town of Highland, Indiana

Barbara Hackman

County Auditor; Bartholomew County, Indiana

Carol Rogers

Deputy Director, Indiana Business Research Center;
Adjunct Faculty; Indiana University-Purdue
University Indianapolis

James (Jim) Steele

Former Controller for the Cities of Anderson and
Indianapolis; CFO for City-County Council and
financial advisor for local units of government

PROJECT STAFF

Jamie Palmer

(Project coordinator and lead research staff)
Senior Policy Analyst;
Indiana University Public Policy Institute
(317) 261-3046; jlpalmer@iupui.edu

Caitlin Cheek

MPA Candidate;
School of Public and Environmental Affairs;
Indiana University Bloomington

Sarah Larson

Visiting Assistant Professor;
School of Public and Environmental Affairs;
Indiana University-Purdue University Indianapolis

Thomas Luke Spreen

Doctoral Student; School of Public and Environmental
Affairs; Indiana University Bloomington

Kayli Schafer

MPA Candidate; School of Public and Environmental
Affairs; Indiana University-Purdue
University Indianapolis

Indiana University Public Policy Institute

The IU Public Policy Institute, established in 1993 within the Indiana University School of Public and Environmental Affairs (SPEA), delivers unbiased research and data-driven, objective, expert analysis to help public, private, and nonprofit sectors make important decisions that directly impact quality of life in Indiana and throughout the nation. Using the knowledge and expertise of a multi-disciplinary staff and faculty, PPI provides data and analysis that addresses a wide range of issues. PPI helps leaders, citizens, businesses, and organizations solve problems, seize opportunities, and create positive change. PPI also supports the Indiana Advisory Commission on Intergovernmental Relations (IACIR).

Indiana University School of Public and Environmental Affairs

SPEA was created in 1972 to address complex issues in public policy, public finance, and environmental science. SPEA's faculty is diverse and committed to high quality research. Research is funded from multiple sources, such as the World Bank, the Environmental Protection Agency, the National Institutes of Health, the National Science Foundation, and the National Endowment for the Arts. SPEA faculty members frequently work in more than one research area, and often collaborate across disciplines. The School hosts four major journals under the editorial direction of faculty, including the Journal of Policy Analysis and Management, Public Administration Review, Public Budgeting & Finance, and Small Business Economics.

Acknowledgments

Producing Fiscal Benchmarking for Indiana's Local Governments: Comprehensive Report for 2011-2012 Counties, Townships, and Cities and Towns required a joint effort involving many people throughout Indiana. In this project, we have called upon the time and resources of several individuals, agencies and institutions and they have generously responded. We are deeply grateful to all who made valuable contributions to the report.

We especially appreciate the wise counsel and generous financial support provided by John Graham, Dean, IU-SPEA, and John L. Krauss, (former) Director, IU Public Policy Institute. We are thankful also for the support from Mark Lawrance in his brief tenure as the new Director of the IU Public Policy Institute, and to Matt Nagle, former staff member, for his efforts at the start of the project. In addition, we acknowledge several other individuals who gave generously of their time and professional expertise, including:

External Advisory Board Members

- Deborah Driskell, Township Trustee, Delaware Township (Hamilton County) and Executive Director, Indiana Township Association
- Michael Fowler, Director of Finance, Business Affairs, and Human Resources, SPEA, IU
- Michael Griffin, Clerk-Treasurer, Town of Highland
- Barbara Hackman, County Auditor, Bartholomew County
- Carol Rogers, Deputy Director, Indiana Business Research Center, IUPUI
- James Steele, Financial Advisor and former Controller for the cities of Indianapolis and Anderson

Agency Staff who Provided Data and Counsel

- Brenda Alyea, Settlement Specialist, Indiana Auditor of State's Office
- Eric Bussis, Assistant Director, State Budget Agency
- Jane Cope, formerly with the Indiana Auditor of State's Office
- Jim Landers, Director, Office of Fiscal and Management Analysis, Indiana Legislative Services Agency
- Charles W. Pride, Cities and Towns Audit Supervisor, Indiana State Board of Accounts
- Karen Firestone Rossen, Senior Fiscal Analyst, Indiana Legislative Services Agency
- Courtney Schaafsma, Commissioner, Department of Local Government Finance
- Tammy White, County Audit Supervisor, Indiana State Board of Accounts

Professional Experts Involved in the Review Process

- Sandy Beatty, Chief Deputy, Bartholomew County Auditor's Office
- Andrew Berger, Director of Government Affairs, Association of Indiana Counties
- David Bottorff, Executive Director, Association of Indiana Counties
- Matt Greller, Executive Director, Indiana Association of Cities and Towns
- Nancy Marsh, Treasurer, Hendricks County
- Robert A. Plantenga, Treasurer, Tippecanoe County
- Mike Reuter, Chief Financial Officer, Hamilton Southeastern Schools
- Pat Roller, Controller, City of Fort Wayne
- Chris West, Tax Billing and Real Estate Administrator, Bartholomew County Auditor's Office and Trustee, German Township (Bartholomew County)

Again, our deepest gratitude.

Introduction

The laws governing local government finance have changed significantly over the last decade. Indiana has changed its method of property valuation, placed limits on property tax rates in the state constitution, and eliminated the inventory tax. Local governments have responded in a variety of ways.

Currently, there is little formal analysis of the fiscal health of Indiana local governments in a comparative context. *The Fiscal Benchmarking for Indiana's Local Governments* project, sponsored by the Indiana University Public Policy Institute and the Indiana University School of Public and Environmental Affairs, aims to remedy this deficiency by providing timely data and analysis on the financial situation of Indiana's local governments. This document is the first comprehensive report of the project. It covers data for 2011 and 2012 for Indiana's 92 counties, 1,006 townships, and 568 cities and towns. The document contains:

- a brief description of the project and the selected fiscal indicators;
- a data summary and analysis highlighting important changes between 2011 and 2012 for the median county, township, and city or town government;
- a series of data tables documenting 36 indicators of fiscal health organized by type of unit;
- technical documentation with additional detail on the sources of data and indicator calculations;
- a glossary of terms;
- enterprises by local government (Appendix A); and
- proceeds from borrowing other than tax anticipation warrants (Appendix B).

Approach to Benchmarking

Fiscal benchmarking is the assessment of the financial conditions of a local government within the context of the socioeconomic and demographic attributes of the jurisdiction. It is useful for understanding the financial situation of local governments, particularly relative to one another, and for identifying local government fiscal distress. Given the variety of environmental and fiscal circumstances unique to each local government, there is no one-size-fits-all indicator of fiscal health. Measurement across a variety of standardized fiscal and environmental indicators, however, can provide a useful approximation of the fiscal health of a local government by comparing to similar units over time. This benchmarking approach provides readers with the flexibility to observe historical trends for local governments across each indicator as well as local governments' performance compared to their peers. These indicators serve as an annual "snapshot" of a local government's fiscal health.

Typically, local governments make base budgeting decisions for the upcoming fiscal year on the basis of revenue and spending in the prior fiscal year and they often lack the resources to monitor the medium-and-long-term fiscal outlook of their operation relative to similar units. However, the benefits of fiscal benchmarking extend beyond local government policymakers and financial managers. Voters should be able to assess a local government's performance. Effective fiscal benchmarking can provide an accessible resource for all stakeholders to understand the fiscal situation of their state's local governments.

Fiscal Benchmarking for Indiana's Local Governments borrows from elements of state fiscal benchmarking projects in Georgia, Michigan, New York, and North Carolina by combining aspects of trend analysis and group comparison. However, there are some notable differences between Indiana's fiscal benchmarking project and these states' efforts. Like Georgia, Indiana highlights the performance of local governments in the aggregate, but

FISCAL BENCHMARKING

also includes indicator data for all local governments, allowing comparison of the individual units relative to one another. Unlike Michigan and New York, Indiana's project does not explicitly score or grade the fiscal health of individual local governments. Also, since Indiana local governments are not required to follow GAAP standards, *Fiscal Benchmarking for Indiana's Local Governments* is not able to produce indicators that capture government-wide accrual-based assets and liabilities like North Carolina. Nevertheless, the Indiana project provides information and analysis that voters and policymakers can use to reach valid conclusions about the fiscal health of their governments. A complete discussion of benchmarking and detailed information about other states can be found in *Fiscal Benchmarking for Indiana's Local Governments: Indiana's Approach to Fiscal Benchmarking*.¹

The *Fiscal Benchmarking for Indiana's Local Governments* project team used the following process to select fiscal indicators and compile data for counties, townships, and cities and towns. The project team developed an exhaustive list of fiscal indicators by searching relevant literature and soliciting suggestions from members of the advisory committee (see inside report cover). The project team surveyed public data for suitability in producing the exhaustive list of indicators for calendar years (CY) 2011 and 2012. Generally, the team selected indicators that could be populated using data that are reported by all units and available in a digital database or spreadsheet format. If no data were available within these parameters to produce the indicator, it was eliminated. The eliminated indicators included: measures of capital assets, financial position (net assets), budgeted (or projected) revenue and spending, and liquidity (cash on hand). The list of selected indicators and brief description of each appear below in the Fiscal Benchmarks section of the report. Additional information about the methodology used to calculate each indicator and any data limitations appear in the Technical Documentation section at the end of this report.

The *Fiscal Benchmarking for Indiana's Local Governments* project used financial and economic data obtained from the Indiana Department of Local Government Finance (DLGF), the Indiana State Board of Accounts (SBOA), the Indiana Auditor of State, the Indiana State Budget Agency, and the federal government. In many cases, these data are stored on the Indiana Gateway for Government Units hosted by the Indiana Business Research Center.

Using the selected data sources and associated technical documentation, the project team developed the general and specific methodology for calculating each indicator. This process also included assessing and selecting the database fields and coding needed to calculate the indicator. For instance, in a general sense, spending per capita is total disbursements divided by population. More specifically, total spending was defined as total disbursements minus spending reported in selected disbursement codes to account for double counting and monies that are not controlled by the local government.

In some cases, the project team adjusted the definition and calculation of the indicator based on limitations of the data. For example, total debt was adjusted to total outstanding debt obligations. Debt instruments include bonds, loans, and lease rentals. While DLGF asks units to report the principal and interest associated with lease rental payments, these data are incomplete. As a result, the indicator was changed to capture the outstanding debt payments as of the last day of each year rather than the outstanding principal. A complete discussion of methodology can be found in the Technical Documentation section of this report.

Once the methodology was set, the project team prepared the data to allow for calculation of the indicators. The project team produced each of the fiscal indicators for counties, townships, and cities and towns. The data were compiled with information about the project and technical documentation into the draft annual report. The draft report was reviewed by the project team, the advisory committee, and additional local government officials. Comments on the draft also were solicited from representatives of DLGF, SBOA, Indiana Auditor of State, Indiana State Budget Agency, and the Legislative Services Agency.

Fiscal Benchmarks

Under the guidance of the advisory committee, the Fiscal Benchmarking for Indiana's Local Governments project team selected 36 financial indicators that provide basic information about finances and capture the fiscal health of Indiana's local governments. The list of benchmarks is shown in Table 1 followed by brief narrative descriptions of each benchmark.

Table 1. Fiscal benchmarks

Indicator	Calculation	Notes
SPENDING		
Total Spending	Total Disbursements	
Spending per Capita	Total Disbursements ÷ Population	Local government spending per resident.
Program Sustainability	Program Receipts ÷ Total Disbursements	The share of services financed through user charges and state and federal grants.
Operating Position	Total Receipts ÷ Total Disbursements	A value closer to one indicates the local government is matching revenues with spending.
Operating Balance	Total Receipts - Total Disbursements	A positive value indicates the local government's total revenue exceeds spending.
REVENUE		
Total Revenue	Total Receipts	
Revenue per Capita	Total Receipts ÷ Population	Local government revenue per resident.
Revenue by Source	Revenue by source (percentage of total revenue)	Sources: General Property Taxes; Local Income Taxes; Local Excise Taxes; Other Tax Distribution Program Distributions; Licenses and Permits; Charges for Services; Fines, Forfeitures, and Fees; Other Receipts.
General Revenue Ratio	General Tax Receipts ÷ Total Receipts	The share of total revenue raised through taxes.
Intergovernmental Revenue Ratio	Intergovernmental Receipts ÷ Total Receipts	The share of total revenue raised through the state and federal government.
Own-source General Revenue per Capita	Own-Source General Receipts ÷ Population	The share of total revenue raised through taxes levied directly by the local government.
Elastic Revenues	Elastic Receipts ÷ Total Receipts	The share of total revenue raised through sales and income taxes.
Program Autonomy	User Charge Receipts ÷ Program Receipts	The share of total program revenue raised through charges for services, licenses, fines, forfeitures, and fees.
PROPERTY TAX BASE AND LEVY		
Gross Assessed Value	Total Gross Assessed Value	Total value of property before assessed value deductions.
Homestead Standard Deduction	Total Homestead Standard Deduction	Total standard assessed value deduction for homesteads.
Homestead Supplemental Deduction	Total Supplemental Homestead Deduction	Total supplemental assessed value deduction for homesteads.
Total Non-homestead Assessed Value Deductions	Total Miscellaneous Assessed Value Deductions	Total value of non-homestead assessed value deductions.
Taxable Assessed Value	Total Gross Assessed Value - Total Assessed Value Deductions	Total value of property after assessed value deductions.
Total Property Tax Rate	Total Property Tax Rate	Total property tax rate to property owners.
Gross Tax Levy	Gross Tax Levy	Property tax levy before losses to property tax circuit breakers. Includes local option income tax property tax replacement credits to the local government.
Property Tax Replacement Credits by Source	Property Tax Replacement Credits by Source (percentage)	Sources: Homesteads, residential, and other.
Property Tax Replacement Credits as a Share of Gross Tax Levy	Total Property Tax Replacement Credits ÷ Gross Tax Levy	The share of the Gross Tax Levy raised through LOIT Property Tax Replacement Credits.

(continued)

FISCAL BENCHMARKING

Table 1. Fiscal benchmarks *(continued)*

Indicator	Calculation	Notes
PROPERTY TAX BASE AND LEVY <i>(continued)</i>		
Tax Cap Losses by Circuit Breaker Class	Property Tax Circuit Breaker Losses by Circuit Breaker Class (percentage)	Circuit breaker classes are: Homesteads (1%), Residential / commercial (2%), Other Property (3%), and 65+ years.
Tax Cap Losses	Total Property Tax Circuit Breaker Losses	Total circuit breaker losses.
Net Tax Levy	Abstract Levy	Property tax levy after losses to property tax circuit breakers. Includes LOIT property tax replacement credits to the local government.
LOCAL OPTION INCOME TAX RATES		
Adopted LOITs		Sources: COIT, CEDIT, CAGIT, and rates for corrections, property tax freeze, public safety and property tax replacement.
Total LOIT Rate	LOIT Rate	Total local option income tax rates.
LOIT Rate Utilization	Maximum LOIT Rate - Current LOIT Rate	Difference between the current total local option income tax rate and the maximum allowable by state law.
DEBT		
Total Debt-related Obligations	Total Outstanding Debt-related Obligations	Debt-related obligations include the outstanding principal and interest on bonds and loans, and lease payments remaining to be paid. It does not include debt with terms less than one year or tax-anticipation debt.
Tax-supported Debt-related Obligations	Total Outstanding Tax-supported Debt-related Obligations	Debt-related tax-supported obligations include the outstanding principal and interest on bonds and loans, and lease payments remaining to be paid and supported by tax revenues. It does not include debt with terms less than one year or tax-anticipation debt.
Total Debt-related Obligations Per Capita	Outstanding Debt-related Obligations ÷ Population	Debt-related burden per resident
Tax-supported Debt-related Obligations Per Capita	Total Outstanding Tax-supported Debt-related Obligations ÷ Population	Tax-supported debt-related burden per resident
Total Debt-related Obligations Per \$100 Assessed Value	Outstanding Debt-related Obligations ÷ (Gross Assessed Value ÷ \$100)	Debt-related burden per increment of the property tax base
Total Tax-supported Debt-related Obligations Per \$100 Assessed Value	Outstanding Tax-supported Debt-related Obligations ÷ (Gross Assessed Value ÷ \$100)	Tax-supported debt-related burden per increment of the property tax base
Debt Service Ratio	Total Debt Service + Total Disbursements	Total debt service (principal plus interest) to total spending.
POPULATION		
Population	Total Population	The total population residing within the local government's boundaries. A positive change from one year to the next indicates the community is growing.

Spending

Total spending. This indicator identifies the total spending of a local government by summing the total annual disbursements of a local government for the fiscal year, with the exception of disbursements related to short-term debt, interfund transfers, and transfers to other local governments. A local government with a larger population will likely engage in greater total spending to provide adequate services to its residents. Disbursements data used to calculate this indicator are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Spending per capita. This measure captures the cost of services provided by the local government to each resident of that government by dividing the total spending of the local government by the total population of

residents residing within its borders. Disbursements data used to calculate this indicator are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units. Population data are obtained from the Population Estimates Program of the U.S. Census Bureau.

Program sustainability. This indicator captures the ratio of program revenues to total spending, which serves as a measure of overall program sustainability. A local government that is able to recoup a large share of total spending through fees, user charges, and other non-tax receipts is less dependent on property and income tax revenue to finance operations. This indicator is calculated by dividing total program revenues by total spending. Program revenues include fees for licenses and permits, charges for services, fines and forfeitures, and state and federal program distributions. A value of one for this indicator indicates the local government is fully financed through user charges and state and federal program distributions. Receipts and disbursements data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Operating position. This indicator is the ratio of total revenue to total spending. It is computed by dividing total revenue of a local government by its total spending for the fiscal year. A value of less than one for this measure indicates that the local government is collecting less revenue than it is spending; while a value greater than one indicates the local government is collecting more revenue than it spends. Receipts and disbursements data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Operating balance. This measure captures whether the spending of a local government matches the revenue collected by that government by subtracting total spending from total revenue. A negative value for this measure indicates that the local government is running an annual shortfall; conversely, a positive value for this indicator shows that the local government is running an annual surplus. Receipts and disbursements data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units. Readers should not confuse the definition used here with the definition of "operating balance" for the purposes of Budget Form 4B.

Revenue

Total revenue. This indicator identifies the total revenue of a local government by summing the total receipts of a local government for the fiscal year, with the exclusion of receipts related to short-term debt, interfund transfers, and receipts that are otherwise not spendable. Sources of local government revenue include user charges, state and federal grants and program distributions, general property taxes, local option income taxes, local excise taxes, and other tax distributions. Larger local governments will typically collect more revenue to finance operations than smaller local governments. Receipts data used to calculate this indicator are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Revenues per capita. This indicator captures the amount of revenue obtained annually by a local government relative to the population residing within its borders by dividing its total revenue by its total population. Receipts data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units. Population data are obtained from the Population Estimates Program of the U.S. Census Bureau.

Revenues by source. This indicator identifies the percentage that each source of revenue contributes toward the total receipts of a local government by dividing the receipts obtained from that source by the total revenue of the

FISCAL BENCHMARKING

local government. There are nine sources of revenue for Indiana's local governments, which include general property taxes, local option income taxes, local excise taxes, state and federal program distributions, other tax distributions, licenses and permits, charges for services, fines and fees, and other receipts. Receipts data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

General revenue ratio. This indicator measures the ratio of a local government's general tax revenue to total revenue by dividing total general tax revenue by total revenue. General tax revenue includes property taxes, local option income taxes, local excise taxes, and other state tax distributions. Receipts data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Intergovernmental revenue ratio. This benchmark captures the share of intergovernmental revenues that make up the total annual receipts of a local government. Intergovernmental revenue is revenue received by local governments in the form of distributions from other tax distributions and state and federal program distributions and grants. Other tax distributions include alcohol, cigarette, casino/riverboat taxes, and other miscellaneous tax distributions. State and federal program distributions and grants are monies provided by the state and federal governments for special projects, such as for highway and street improvement or soil and water operations. Receipts data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Own-source general revenue per capita. This indicator measures the tax burden of residents of a local government. It is computed for each local government by dividing total own-source general revenue by total population. Own-source general revenue includes general property tax revenue, local option income tax revenue, and local excise taxes. Local excise taxes include food and beverage taxes, innkeeper's tax, and vehicle/aircraft excise taxes. Receipts data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units. Population data are obtained from the Population Estimates Program of the U.S. Census Bureau.

Elastic revenues. This indicator captures the dependence of a local government on elastic sources of revenue. Elastic sources of revenue are those that increase or decrease significantly in response to changes in environmental or economic conditions, such as income or excise taxes. A local government that is highly dependent on elastic sources of revenue may experience more fiscal distress relative to its peers during a national recession. This measure is computed by dividing the share of local option income tax and excise tax revenue by the total receipts of a local government. A value closer to one indicates that the local government is more dependent on elastic sources of revenue. Receipts data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Program autonomy. This indicator identifies the share of total program revenues that are obtained from user charges by dividing total user charges by program revenues. User charges include payments made to local government through licenses and permits; charges for services; and fines, forfeitures, and fees. In addition to user charges, program revenues include state and federal grants and program distributions. A value closer to one for this benchmark indicates that a local government receives a large share of total program revenue through user charges. Receipts data used to compute this measure are reported using the cash basis of accounting and are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

FISCAL BENCHMARKING

Property Tax Base and Levy

Gross assessed value. Gross assessed value is the total assessed value of all properties within the borders of a local government prior to the application of the homestead standard deduction and other property tax deductions and exemptions. This benchmark measures the size of the potential property tax base of a local government. Assessed value data for each local government are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Homestead standard deduction. This indicator is the total amount of a local government's gross assessed value exempted from property taxes by the homestead standard deduction. This measure captures the amount of local government's property tax base lost to this deduction. Assessed value data for each local government are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Homestead supplemental deduction. This measure is the amount of a local government's gross assessed value exempted from property taxes by the supplemental homestead deduction. This indicator identifies the amount of the property tax base lost to this deduction. Assessed value data for each local government are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Total non-homestead assessed value deductions. This measure is the total amount of a local government's gross assessed value exempted from property taxes by deductions other than the homestead standard and supplemental deductions. These deductions include mortgage, veteran, age 65 and over, blind and/or disabled, energy systems, and urban development/rehabilitation deductions. This indicator identifies the amount of the property tax base lost to miscellaneous deductions. Assessed value data for each local government are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Taxable assessed value. Taxable assessed value captures the actual size of a local government's property tax base. Taxable assessed value is computed by subtracting the total assessed value deductions (homestead standard and supplemental deduction, mortgage deduction, total non-homestead deductions, and exemptions) from the total gross assessed value of a local government. This value represents the actual property tax base of a local government. Assessed value data for each local government are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Total property tax rate. A local government's property tax rate is the rate levied for each \$100 of taxable assessed value prior to property tax credits and circuit breakers. These rates are certified annually by the DLGF. Certified property tax rates for each local government are obtained from the DLGF.

Gross tax levy. The gross tax levy is the amount of revenue a local government could potentially raise through property taxes prior to consideration of property tax credits. The gross tax levy is computed by multiplying the taxable assessed value of a local government by its property tax rate and adding total local option income property tax replacement credits. Data for this measure are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Property tax replacement credits. This indicator captures the amount of a local government's property tax revenue that is replaced by local option income tax property tax replacement credits. This indicator provides the total value of property tax replacement credits for the three classes of property tax replacement credits: homestead, residential, and other. Data for this measure are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Property tax replacement credits as a share of gross tax levy. This indicator measures the share of the gross tax levy obtained from local option property tax replacement credits. There are three classes of property tax replacement credits: homestead, residential, and other. It is computed by dividing local option property tax replacement credits for each of the three classes by the gross tax levy. Data for this measure are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

FISCAL BENCHMARKING

Tax cap losses by circuit breaker class. This indicator identifies the amount of potential property tax revenue lost to the property tax cap credits instituted in 2010 by property class. The property tax cap limits local property tax rates to 1 percent of value for residential homesteads, 2 percent of value for commercial, rental, and farmland properties, and 3 percent of value for other types of properties. There also is a 65+ circuit breaker class. Data for this measure are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Tax cap losses. This indicator captures the total amount of potential property tax revenue lost to the property tax cap credits instituted in 2010 across all property classes. Data for this measure are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Net tax levy. The net tax levy is the gross tax levy minus total tax cap credits. This indicator is sometimes referred to as the abstract levy and captures the property tax revenue available to a local government after accounting for property tax cap losses. Data for this measure are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Local Option Income Tax Rates

Adopted LOITs. This indicator identifies the mix of local option income tax revenue adopted by each county government in Indiana. Counties may adopt either the County Adjusted Gross Income Tax (CAGIT) or County Option Income Tax (COIT). Counties may also adopt the County Economic Development Income Tax (CEDIT) and rates for Corrections (COR), Property Tax Freeze (PTF), Property Tax Relief (PTR), or Public Safety (PS). Data on local government local option income tax adoption are obtained from the State Budget Agency.

Total LOIT rate. This indicator identifies the total local option income tax rate paid by residents of each county in the calendar year. As each county may use one or more local option income taxes to finance services, total local option income tax rates vary across counties. This measure is computed by summing all local option income tax rates to compute a total rate for residents of that county. Data on local option income tax rates by county are obtained from the State Budget Agency.

LOIT rate utilization. This measure captures the aggregate local option income tax rate of a local government relative to the maximum rate allowable by state law. Counties may adopt either CAGIT or COIT, but not both. Counties may also adopt EDIT in addition to the COIT or CAGIT. The combined EDIT and CAGIT statutory rate cannot exceed 1.25%. The maximum COIT and CEDIT basic rate is 1%. CAGIT counties have a maximum rate of 3.75% (which includes the CAGIT, CEDIT, and all supplemental local-option income taxes); COIT counties have a maximum of 3.5%; CEDIT-only counties have a maximum of 0.75%. This indicator is computed by subtracting the total county local option income tax rate from the maximum rate allowable by state law for each of the types of LOITs adopted by the county. The value of this measure indicates how much the local government could increase total local option income rates before reaching the maximum allowable rate. Data on local option income tax rates by local government are obtained from the State Budget Agency.

Debt

Total debt related obligations. This indicator captures the total outstanding debt-related obligations of a local government. Outstanding debt includes only the remaining obligation; that is, the principal and interest of the bonds, loans, or lease rentals remaining to be paid. Outstanding debt-related obligations does not include tax-anticipation debt. Data on local government outstanding debt-related obligations used to produce this measure are computed from individual bond, loan and lease rental records submitted to DLGF via the Indiana Gateway for Government Units.

Tax-supported debt-related obligations. This indicator captures the total outstanding debt-related obligations of a local government supported by property taxes, local option income taxes, tax increment financing (TIF), or Motor Vehicle Highway Fund/Local Roads and Streets Fund distributions (MVH/LRS). Outstanding debt-related obligations includes only the remaining obligation; that is, the principal, and interest of the bonds, loans,

FISCAL BENCHMARKING

or lease rentals remaining to be paid. Outstanding tax-supported debt-related obligations does not include tax-anticipation debt. Data on local government outstanding debt-related obligations used to produce this measure are computed from individual bond, loan, and lease rental records submitted to DLGF via the Indiana Gateway for Government Units.

Total debt-related obligations per capita. This indicator captures the burden of debt upon each resident of a local government by dividing the total outstanding debt-related obligations of a local government by the total population residing within its borders. Outstanding debt-related obligations includes only the remaining obligation; that is, the principal and interest of the bonds, loans, or lease rentals remaining to be repaid. Outstanding debt-related obligations does not include tax-anticipation debt. Data on local government outstanding debt-related obligations used to produce this measure are computed from individual bond, loan, and lease rental records submitted to DLGF via the Indiana Gateway for Government Units. Population data are obtained from the Population Estimates Program of the U.S. Census Bureau.

Tax-supported debt-related obligations per capita. This indicator is calculated by dividing total outstanding tax-supported debt-related obligations (principal and interest) of a local government by its total population. Tax-supported debt is that which uses tax revenue as a source of repayment, including property taxes, local option income taxes, tax increment financing (TIF), or MVH/LRS distributions. Data on local government outstanding debt-related obligations used to produce this measure are computed from individual bond, loan, and lease rental records submitted to DLGF via the Indiana Gateway for Government Units. Population data are obtained from the Population Estimates Program of the U.S. Census Bureau.

Total debt-related obligations per \$100 assessed value. This indicator captures the ability of a local government to leverage their property tax base to pay for outstanding debt. This indicator is calculated by dividing the total outstanding debt-related obligations of a local government by the assessed value of all property within its borders (divided by \$100). Data on local government outstanding debt-related obligations used to produce this measure are computed from individual bond, loan, and lease rental records submitted to DLGF via the Indiana Gateway for Government Units. Assessed value data for each local government are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Tax-supported debt-related obligations per \$100 assessed value. This indicator is computed by dividing total outstanding tax-supported debt by the assessed value of all property within its borders (divided by \$100). Tax-supported debt-related obligations are which use tax revenue as a source of repayment, including property taxes, local option income taxes, tax increment financing (TIF), or MVH/LRS distributions. Data on local government outstanding debt-related obligations used to produce this measure are computed from individual bond, loan, and lease rental records submitted to DLGF via the Indiana Gateway for Government Units. Assessed value data for each local government are obtained from the county property tax abstracts which are collected and managed by the Indiana Auditor of State.

Debt service ratio. This indicator identifies the amount of debt service relative to the total spending of a local government by dividing debt service (which includes repayment of the principal of the bond, loan, or lease rental plus interest charges) by the total disbursements of a local government. This measure includes interest associated with tax anticipation debt. Debt service and disbursements data used to calculate this indicator are obtained from the local government's Annual Financial Report submitted annually to the SBOA via the Indiana Gateway for Government Units.

Population

Total population. This measure identifies the total population residing within a local government's borders. Population growth is indicative of healthy economic conditions and an expanding tax base for local governments. Population data for Indiana's local governments are obtained from the Population Estimates Program of the U.S. Census Bureau.

Interpreting the Data

A complete description of the data and methodology used to calculate each indicator appears in the Technical Documentation section of this report. Readers must take care in considering the data and the methodology when interpreting the fiscal benchmarks. A few specific cautions are presented below.

Local government financial management is complicated, with many stakeholders involved. It is important to note that no single indicator provides a complete picture of the financial health of a local government. Rather, a number of indicators taken in combination are useful for identifying fiscal health or distress of individual units. Fiscal Benchmarking for Indiana's Local Governments encourages readers to consider all financial dimensions of a local government when evaluating the fiscal health of a local government.

Ideally, benchmarks will be evaluated over several years. This report shows only two years, CY 2011 and 2012. Some administrative processes have the potential to create unevenness in spending and revenue from year to year. For example, in April 2012, the state distributed excess local option income tax dollars for 2011 and 2012. The monies originally slated for distribution in 2011 were reported in the annual financial reports for 2012, potentially giving the appearance of considerable growth in LOIT revenue in 2012. This process also potentially affected the amount of property taxes collected by local governments in 2013. In addition, local government officials indicated that a December property tax distribution that is received late can result in those property tax receipts to be reported in a later year.

Currently, fiscal data is collected for specific purposes other than benchmarking. The project team has created a set of benchmarks using the data generally as it is reported and made available publicly, or as could be calculated from those data. In effect, the project team has used and reported the data "as is" and as of the date described in the technical documentation. The project team has parsed the data using current coding. No attempt has been made to correct any original data.

In a few cases, ambiguities in reporting requirements and coding made it difficult to produce indicators consistently across units. Readers should consider outliers or extreme data points carefully. In some cases, they are artifacts of these reporting ambiguities. As benchmarking efforts mature, the project team expects that these issues can be resolved.

One example of data that is not consistent across units is county total spending and revenue. The annual financial report coding system is ambiguous about the treatment of funds that pass through counties to other units. Using only data reported in county annual financial reports, there is no consistent way to ensure that pass-through funds are excluded. This issue affects all indicators calculated with total spending and revenue data.

It also is important to note that the services provided by local governments vary. Currently no resource exists that identifies the exact services and level of service provided by each local government in Indiana. To show some of this variation, the project team compiled a list of "enterprises" that local governments report on their annual financial reports. Many of these services would be considered utilities (drinking water, wastewater, stormwater, electric, gas, and Internet). Some of the services listed as other include: airport, port/marina, town/community center, industrial park, parking garage/parking, golf course, park, town hall, transit. While admittedly imperfect, this information provides context for the reader. One might expect to see, for example, higher per capita spending for similar towns if one has an electric or gas utility and the other does not. The lists of enterprises by local government are provided in Appendix A. Readers should take care in interpreting "other" enterprises. In some cases, these activities may be reported as regular governmental activities by other units.

Data Summary and Analysis

This section summarizes the median spending, revenue, and debt indicators for each level of government: county, township, and city and town governments. The summary data reported below are the median² figures for each indicator by type of local government and year. Minimum, maximum, mean, and standard deviation are reported in the data tables later in the report. For selected indicators, a statewide total also is reported.

These data show there was an increase in the median levy of county governments to \$6.6 million and an increase in median debt per county resident to \$146. Township governments saw an over-the-year decrease in median spending per resident to \$32, and an increase in median revenue per resident to \$35, both small changes from the previous year. Township governments also experienced a small over-the-year decrease in the median levy to \$47,600 in 2012. The median township government held no debt in 2011 or 2012.

The median spending of Indiana cities and towns increased by 5.2 percent over the year to \$1,327 per resident. The median revenue of cities and towns was down about 1.1 percent over-the-year to \$1,238 per resident. The median net tax levy of Indiana cities and towns also grew over the year from about \$206,000 to about \$214,000. The median debt per residents of Indiana cities and towns declined about 7.9 percent over-the-year to \$962 per resident in 2012.

County Governments

Spending and Revenue

In 2012, spending by Indiana counties totaled \$8.85 billion. The median spending of Indiana county governments was \$50.7 million in 2012 and \$55.3 million in 2011 (Table 2). The median spending per resident of Indiana county governments was \$1,705 in 2012 compared to \$1,870 in 2011 (Table 3).

Indiana counties collected a total of \$12.41 billion in revenue in 2012. The median total revenue received by Indiana county government was \$75.7 in 2012 compared to \$85.3 million in 2011 (Table 7). The median revenue per capita of Indiana counties was \$2,113 in 2012 and \$2,655 in 2011 (Table 8).

The primary source of revenue for Indiana county governments in 2012 was the property tax. Indiana county governments collected a median of 41.7 percent of total revenue from property taxes in 2012, compared to 37.8 percent in 2011. Other sources of revenue for Indiana county governments in 2012 included local option income taxes (12.6 percent of total revenue); other tax distributions (4.1 percent of total revenue); program distributions (3.3 percent of total revenue); local excise taxes (2.8 percent of total revenue); charges for services (2.8 percent of total revenue). Other receipts made up 20.1 percent of total revenue in 2012 (Tables 9 - 17). All the other revenue types accounted for less than 1 percent each.

In 2012, Indiana county governments collected a median of \$1,182 in own-source general revenue per resident and \$1,222 per resident in 2011 (Table 20). Indiana county governments received 70.7 percent of total revenue in the form of general tax revenue in 2012 and 63.9 percent in 2011 (Table 18). County governments also received about 8.6 percent of their total revenue from intergovernmental transfers in 2012 and 8.0 percent in 2011 (Table 19).

Elastic revenues, that is, revenue from more volatile sources such as local option income taxes, local excise taxes, and other tax distributions, made up 23.8 percent of total revenue for Indiana counties in 2012 and 17.7 percent of total revenue in 2011 (Table 21). In 2012, Indiana county governments received about 58 percent of total program revenues from user charges compared to about 65.9 percent in 2011 (Table 22).

²The median is an average measure that summarizes a set of unequal values. The median is the single value in an order set of values below and above which there is an equal number of values, or which is the arithmetic mean of two middle values if there is no one middle number. See Merriam-Webster Dictionary.

FISCAL BENCHMARKING

Indiana county governments carried a median operating balance, which is the difference between total revenue and total spending, of \$11.2 million in 2012 and \$9.9 million in 2011 (Table 6). The median operating position of Indiana county government, or ratio of total revenue to total spending, was 1.35 in 2012 and 1.26 in 2011 (Table 5). The median program sustainability of Indiana county government was 0.12 in 2012 and 0.13 in 2011 (Table 4). Program sustainability captures the ratio of program revenue to total spending.

Property Tax Base and Levies

The median property tax base of Indiana county governments, as measured by gross assessed value, was estimated at \$2.4 billion in 2012, an increase of 5.9 percent from \$2.27 billion in 2011 (Table 23).³ The median loss to the homestead standard deduction in 2012 was \$389.0 million in assessed value, a 0.6 percent increase from \$386.7 million in 2011 (Table 24). The median supplemental homestead standard deduction cost Indiana county governments \$227.3 million in lost assessed value in 2012, a 1.5 percent decrease from \$230.7 million in 2011 (Table 25). Miscellaneous assessed value deductions were also anticipated to decrease the property tax base of Indiana county governments by a median of an additional \$243.9 million in 2012, an increase of 0.5 percent from \$242.6 million in 2011 (Table 26).

After accounting for the homestead standard deduction, the supplemental homestead standard deduction, and other miscellaneous assessed value deductions, the median taxable assessed value available to Indiana county governments was \$1.37 billion in 2012, an increase of 2.5 percent from \$1.34 billion in 2011 (Table 27). In 2012, Indiana county governments imposed a median property tax rate of \$0.4456 per \$100 of assessed value, little changed over the year from \$0.4459 per \$100 of assessed value in 2011 (Table 28).

In 2012, Indiana county governments had a median gross property tax levy of \$6.7 million, up 2.2 percent from \$6.6 million in 2011 (Table 29). Indiana county governments had about \$167,000 in property tax cap losses in 2012, a decrease of 4.9 percent from about \$175,900 in 2011 (Table 40). After accounting for property tax cap losses and replacement credits, the median net tax levy for Indiana county governments was \$6.6 million in 2012, up 3.3 percent from \$6.4 million in 2011 (Table 41).

LOIT Rates

All counties, except for Lake, levied some type of local option income tax (LOIT) in 2011 or 2012 (Table 42). In 2012, 56 counties levied the County Gross Adjusted Income Tax (CAGIT), 28 levied the County Option Income Tax (COIT), and 72 counties levied the County Economic Development Income Tax (CEDIT). In addition, 13 counties levied the LOIT for corrections, 11 levied the LOIT to freeze property tax levy, 30 levied the LOIT for property tax relief, and 24 levied the LOIT for public safety. Indiana county government imposed a median total local option income tax rate of 1.355 percent in 2012, an increase from 1.3 percent in 2011 (Table 43).

Debt

In 2012, total debt-related obligations held by Indiana county governments totaled \$1.76 billion, little changed from 2011. Indiana county governments held a median \$4.0 million in debt-related obligations in 2012, down 5.8 percent from \$4.2 million in 2011 (Table 45). The median debt-related obligations per resident of Indiana counties was \$146 in 2012, an increase of 26.2 percent from \$115 per resident in 2011 (Table 47). The median debt-related obligations per \$100 of gross assessed value for Indiana counties was \$0.19 and \$0.24 in 2011 and 2012, respectively (Table 49). The median debt service ratio, that is, the ratio of debt service to total spending, of Indiana county governments was about 0.1 percent in 2012 (Table 51).

The majority of debt-related obligations held by Indiana county governments were tax-supported. Indiana county government held a median of \$3.6 million in tax-backed debt-related obligations in 2012, about \$104 in tax-supported debt-related obligations per resident in 2012 (Tables 46 and 48). Indiana county governments held a median of \$0.15 in tax-backed debt-related obligations per \$100 of gross assessed value (Table 50).

³All data contained in the county property tax abstracts are prospective and do not represent final property tax receipts. A local government's actual revenue realized from property tax may differ from that reported in the property tax abstract as a result of unpaid current year property taxes, the payment of delinquent property taxes from previous years, Auditor's correction of errors, or refunds from appeals.

FISCAL BENCHMARKING

Population

In the aggregate, Indiana counties experienced modest population growth between 2011 and 2012. In 2012, the median population in Indiana counties was 33,791 residents, little changed from 33,786 in 2011 (Table 52).

Township Governments

Spending and Revenue

Spending by Indiana townships totaled \$319.7 million in 2012, a decrease of 5.4 percent from \$338.0 million in 2011. The median spending of Indiana townships decreased from \$63,346 to \$60,205 over the year, a 5 percent decrease (Table 53). The median spending per resident of Indiana townships was about \$32 in 2012. Little changed from 2011 (Table 54).

Indiana townships collected a total of \$310.6 million in revenue in 2012, down 4.7 percent from \$325.9 million in 2011. Indiana townships collected a median of \$70,794 in revenue in 2012 compared to \$67,382 in 2011, an increase of 5.1 percent (Table 58). The median revenue per capita of Indiana townships increased 0.3 percent to about \$35 in 2012 (Table 59).

The primary source of revenue for Indiana townships in 2012 was the property tax. In 2012, Indiana townships collected a median of 67.2 percent of total revenue from the property tax, down from 69.7 percent in 2011. Other sources of revenue for Indiana townships in 2012 include local option income taxes (21.2 percent of total revenue), and local excise taxes (4.7 percent of total revenue). All other revenue types accounted for less than 1 percent each. (Tables 60 - 68).

In 2012, Indiana townships collected a median of about \$32 in own-source general revenue per resident, up 1.3 percent from 2011 (Table 71). Indiana township governments received 98.9 percent of total revenue in the form of general tax revenue in 2012, little changed from 98.8 percent of total revenue in 2011 (Table 69). Indiana townships received about 0.7 percent of their total revenue from intergovernmental transfers in 2012, a small increase from 0.1 percent in 2011 (Table 70).

Elastic revenues made up 27.6 percent of the median Indiana township's total revenue in 2012, an increase from 24.9 percent of total revenue in 2011 (Table 72). Among Indiana townships that received program revenues in 2012, nearly 100.0 percent of those revenues were collected in the form of user charges, unchanged from 2011 (Table 73).

Indiana township governments carried a median operating balance of \$5,168 in 2012, up 75.2 percent from \$2,949 in 2011 (Table 57). The median operating position of Indiana townships was 1.10 in 2012, up from 1.06 in 2011 (Table 56). The majority of Indiana townships did not receive program revenue in 2012, but among those that did (296), the median program sustainability was 0.03. Little changed from 2011 (Table 55).

Property Tax Base and Levies

The median gross assessed value of Indiana township governments was \$130.2 million in 2012, up 2.2 percent from \$127.4 million in 2011 (Table 74). In 2012, the median loss in the assessed value for Indiana township governments from the homestead standard deduction was \$22.8 million, a 0.3 percent increase from \$22.7 million in 2011 (Table 75). The median loss to the supplemental homestead standard deduction in 2012 was \$12.6 million, down 0.4 percent from \$12.7 million in 2011 (Table 76). Miscellaneous assessed value deductions were also expected to reduce the assessed value of Indiana townships by a median of \$5.7 million in 2012, up 1.9 percent from \$5.6 million in 2011 (Table 77).

After accounting for the homestead standard and supplemental deductions as well as other miscellaneous assessed value deductions, the median taxable assessed value available to Indiana township governments was

FISCAL BENCHMARKING

\$83.9 million in 2012, an increase of 5.3 percent from \$79.7 million in 2011 (Table 78). Indiana township governments imposed a median property tax rate of \$0.0584 per \$100 of assessed value in 2012, down 5.5 percent over the year from \$0.0618 per \$100 of assessed value in 2011 (Table 79).

In 2012, Indiana townships had a median gross property tax levy of about \$48,000, down 3.5 percent from about \$49,700 in 2011 (Table 80). The median estimated property tax cap losses estimated by Indiana townships was \$80 in 2012, a decrease of 31.4 percent from \$116 in 2011 (Table 91). After accounting for property tax cap losses and replacement credits, the median net tax levy for Indiana township governments was \$47,600 in 2012, down 3.3 percent from about \$49,200 in 2011 (Table 92).

Debt

The total debt held by Indiana townships totaled \$138.7 million in 2012, down 6.2 percent from \$147.9 million in 2011. The majority of Indiana township held no debt in 2011 or 2012, but among townships that held debt, the median was \$133,077 in 2012, down 10.4 percent from \$148,493 in 2011 (Table 93). Among Indiana townships that held debt, the median debt per resident of Indiana townships was \$35 in 2012. Little changed from 2011 (Table 95). The median debt per \$100 of gross assessed value among Indiana townships that held debt was \$0.05 in 2012, down 12.5 percent from 2011 (Table 97). The median debt service ratio of Indiana townships that held debt was 17.3 percent in 2012, up from 14.1 percent from 2011 (Table 99).

The majority of debt held by Indiana townships consisted of tax-supported debt. Indiana township governments that held tax-backed debt held a median of about \$135,645 in tax-backed debt in 2012, or about \$36 in tax-supported debt per resident in 2012 (Tables 94 and 96). Among Indiana townships that held tax-supported debt, those townships held a median of \$0.05 in tax-supported debt per \$100 of gross assessed value (Table 98).

Population

In the aggregate, Indiana townships experienced little population growth between 2011 and 2012. Median population change for township shows a different picture. In 2012, Indiana townships had a median of 1,852 residents, down 0.5 percent over-the-year from 1,860 residents in 2011 (Table 100).

City and Town Governments

Spending and Revenue

Spending by Indiana city and town governments totaled \$8.39 billion in 2012, a decrease of 3.3 percent from \$8.68 billion in 2011. The median spending of Indiana cities and towns increased by 5.2 percent to \$1.8 million in 2012 from \$1.7 million in 2011 (Table 101). The median spending per resident of Indiana cities and towns was about \$1,327 in 2012, down 4.9 percent from \$1,396 per resident in 2011 (Table 102).

Indiana cities and towns received a total of \$7.66 billion in revenue in 2012, down 6.4 percent from \$8.18 billion in 2011. The median revenue received by city and town governments was \$1.6 million in 2012, an increase of 6.0 percent from \$1.5 million in 2011 (Table 106). The median revenue per capita of Indiana cities and towns decreased from \$1,252 per resident in 2011 to \$1,238 per resident in 2012, a decrease of about 1.1 percent (Table 107).

The primary source of revenue for Indiana cities and towns in 2012 was charges for services. In 2012, Indiana city and town governments collected a median 38.6 percent of total revenue from charges for services, up from 37.2 percent of total revenue in 2011. Other sources of revenue for cities and towns in 2012 include general property taxes (17.0 percent of total revenue), local option income taxes (6.7 percent of total revenue), other tax

FISCAL BENCHMARKING

distributions (3.9 percent of total revenue), program distributions (3.3 percent of total revenue), local excise taxes (1.0 percent of total revenue), licenses and permits (0.2 of total revenue). Other receipts made up 6.6 percent of total Indiana city and town revenue in 2012 (Tables 108 - 116).

The median own-source general revenue per resident received by Indiana city and town governments was \$293 in 2012, up 12.7 percent from \$260 in 2011 (Table 119). Indiana cities and towns received a median of 34.1 percent of total revenue from general taxes in 2012, up from 32.8 percent in 2011 (Table 117). Indiana city and town governments also received a median of 8.9 percent of total revenue from intergovernmental transfers in 2012, down from 9.4 percent in 2011 (Table 118).

Elastic revenues made up a median of 13.9 percent of Indiana city and town governments total revenue in 2012, up from 12.5 percent in 2011 (Table 120). Indiana cities and towns also collected 92 percent of total program revenues from user charges in 2012, little changed from 2011 (Table 121).

Indiana city or town governments carried a median operating balance of -\$25,379 in 2012, an over-the-year change of 21.7 percent from -\$32,431 in 2011 (Table 105). The median operating position of Indiana city or town governments was 0.97 in 2012, little changed from 0.96 in 2011 (Table 104). The median program sustainability of Indiana city or town governments was 0.45 in 2012, up from 0.43 in 2011 (Table 103).

Property Tax Rate and Levy

The median gross assessed value of Indiana city or town governments was \$59.6 million in 2012, an increase of 1.8 percent from \$58.5 million in 2011 (Table 122). Indiana city and town governments expected a median loss to the homestead deduction of \$13.1 million in assessed value in 2012, down 0.5 percent from 2011 (Table 123). The homestead supplemental deduction was also expected to reduce taxable assessed value available to Indiana cities and towns by an additional \$5.3 million in 2012, down 1.2 percent from 2011 (Table 124). The median loss to non-homestead assessed value deductions was \$4.3 million for the Indiana city and town governments in 2012, a 1.2 percent decrease over the year (Table 125).

After accounting for the homestead standard and supplemental deductions as well as other miscellaneous assessed value deductions, the median estimated taxable assessed value available to Indiana city and town governments was \$31.3 million in 2012, down by 0.7 percent from \$31.5 million in 2011 (Table 126). The median property tax rate of Indiana cities and towns was \$0.7661 per \$100 of assessed value in 2012, an increase of 2.5 percent over the year from \$0.7472 per \$100 of assessed value in 2011 (Table 127).

The median gross property tax levy for Indiana cities and towns was about \$222,000 in 2012, up 3.1 percent from about \$216,000 in 2011 (Table 128). The median property tax cap losses for Indiana city and town governments was about \$5,400 in 2012, down 3.7 percent from about \$5,600 in 2011 (Table 139). After accounting for property tax cap losses and replacement credits, the median net tax levy for Indiana city and town governments was about \$214,000 in 2012, up 3.9 percent from about \$206,000 (Table 140).

Debt

The total debt-related obligations held by Indiana cities and towns was \$11.3 billion in 2012, down 9.4 percent from \$12.5 billion in 2011. Indiana city and town governments held a median \$1.2 million in debt-related obligations in 2012 compared to \$1.5 million in 2011, a difference of 18.4 percent (Table 141). The median debt-related obligations per resident of Indiana cities and towns was \$962 in 2012, down 7.9 percent from \$1,044 per resident in 2011 (Table 143). Indiana city and town governments held a median of \$1.69 in debt-related obligations per \$100 of gross assessed value in 2012, down 11.3 percent from \$1.91 in debt-related obligations per \$100 of gross assessed value in 2011 (Table 145). The median debt service ratio of Indiana cities and towns was 6.4 percent in 2012, up from 5.7 percent in 2011 (Table 147).

FISCAL BENCHMARKING

The majority of Indiana city and town governments held no tax-supported debt-related obligations in 2012. Among Indiana cities and towns that held some amount of tax-supported debt-related obligations (226), the median was about \$1,522,985 or \$353 in tax-supported debt-related obligations per resident in 2012 (Tables 142 and 144). Indiana city and town governments that held tax-supported debt-related obligations in 2012 held a median of \$0.58 in tax-supported debt-related obligations per \$100 of gross assessed value (Table 146).

Population

In the aggregate, Indiana cities and towns experienced negligible population growth over the year. In 2012, Indiana municipalities had a median population of 1,148 residents, unchanged from the 2011 population (Table 148).

Notes:

1. Hendricks and Tipton counties adopted new CAGIT Property Tax Relief (IC 6-3.5-1.1-26) rates that applied to the 2012 distributions. They did not have rates for the 2011 distributions.
2. Martin County adopted new COIT Property Tax Relief (IC 6-3.5-6-32) and COIT Public Safety Funding (IC 6-3.5-6-31) rates that applied to 2012 LOIT distributions. They didn't have rates for the 2011 distributions.
3. Hendricks County had a CREDIT Homestead Credit (IC 6-3.5-7-25) rate that applied to 2011 distributions, but did not have a rate for 2012 distributions.
4. COR = Corrections; FPTL = Property Tax Freeze; PTR = Property Tax Relief; PS = Public Safety; HC = Homestead Credit

Warrick County	0.2500%	0.2500%	0.00%	0.0%
Washington County	0.2500%	0.2500%	0.00%	0.0%
Wayne County	0.2500%	0.2500%	0.00%	0.0%
Wells County	1.9000%	1.9000%	0.00%	0.0%
White County	0.4300%	0.4300%	0.00%	0.0%
Whitley County	0.5171%	0.5171%	0.00%	0.0%

Note: This table reports the difference between the county's total LOIT rate and maximum total rate allowed by state law. Zero indicates the county is levying the statutory maximum total rate; a number greater than zero indicates the county may increase their total LOIT rate by that percentage to reach the statutory maximum total rate.
