SUCCESS STORY

Thanks to Goodwill Industries, United Way, and IUPUI, Rebecca Wardwell feels that she has caught hold of the promise of life.

Born with cataracts, she is visually impaired. Her grade and high school education was acquired at the Indiana School for the Blind. Since the completion of her schooling she has desired to attain victory over her disability, to secure employment and make her own way.

"I was determined and constantly looked for opportunities to improve myself," she said. "I worked at a number of jobs from babysitting and housework to word processing, but my goal remained elusive until I went to Goodwill."

That was last October when Mrs. Wardwell began receiving instruction at Goodwill in micrographics technology, the transfer of business records from paper to film. After six months training, she was referred to Karen Duncan in Goodwill's personnel placement department and they teamed to find a job for her.

"We called many companies that had micrographics departments, but the answers were the same: 'Sorry, no applications accepted;' 'Maybe in six months;' or 'We have no openings.' I became discouraged, but Mrs. Duncan kept plugging for me and kept me trying, and soon I had two opportunities to go to work," she said.

Mrs. Wardwell now is employed at IUPUI. "I love my job and wish to make a career for myself in micrographics technology, she said, "and I'll always be grateful to Goodwill Industries and United Way for their help."

IUPUI, YOU'RE GREAT!

The campus United Way campaign has exceeded last year's record amount raised with more than \$110,000 reported to date. There still are many pledge cards that have not been turned in by individual employees, so please get your card to your United Way coordinator this week.

We will have a report next week on the status of each unit's contributions.

EMERGENCY STARTING AVAILABLE

During the past year the Emergency Starting service made over 3400 runs on the IUPUI campus to start cars stalled because of dead batteries. The service is available to students, staff and faculty members, and visitors from 7:30 a.m. to 10:00 p.m., Monday through Friday, by phoning Ext. 8688. There is no charge for the service.

Because of the demand for starting assistance the Parking and Transportation Services plans to install a radio-telephone communication system in the starting vehicle to improve service and reduce waiting time.

DISTINGUISHED LECTURERS SOUGHT

Names of prominent individuals, pioneers, or outstanding practitioners in their fields are being solicited as possible candidates for the first IUPUI Distinguished Lecture Series.

The lecture series is being designed to appeal to a broad spectrum of the university community. Suggestions should be made with this in mind.

Send the names to Kim Webb, co-chairman of the Distinguished Lecture Series Committee, in care of the Honors Program Office, CA 331, by Nov. 15 for the Spring Program. Names for the 1982-83 series will be accepted until Feb. 15, 1982.

* * *

WHO, WHAT, WHEN, WHERE, & SOMETIMES WHY

Physiological--"Anterior Pituitary Dopamine Receptors," Department of Physiology Seminar by Dr. Mark Heiman, research associate in the department; Room 205, Medical Science Building, 4 p.m. Monday.

Hospital Planning for Critical Care--A symposium presenting a multidisciplinary approach to planning and operation of critical care facilities sponsored by the Division of Continuing Medical Education of the I.U. School of Medicine, the Krannert Institute of Cardiology, and Wishard Memorial Hospital; Hyatt Regency Hotel, all day Monday through Wednesday.
