## NAMED TO TOP 100

Dr. Suzanne Knoebel, Herman C. and Ellnora D. Krannert Professor of Medicine, associate director of the Krannert Institute of Cardiology, assistant dean for research at the I.U. School of Medicine, outstanding cardiologist, clinician and teacher, highly respected investigator in heart disease, who served as the first woman president of the American College of Cardiology last year, has added a new honor to the list. The final 100 were pulled from a master list of 250 women who have had great influence on the nation and its citizens. The final roster all are achievers, and their outstanding successes help to define the new and expanding role of women today.
