Documents Reviewed: Proposal & Letters of Support

Summary of Proposal:

1. Are the goals clear and achievable?

Yes. It appears to be a program with promise to meet demands in the job market.

2. Is the program academically sound?

Yes. The credits required and the courses listed appear to be rigorous.

3. Are faculty resources available to offer this certificate without undercutting other key missions of the unit?

Yes. There is a strong faculty in this area, and it should be possible to add them to this program without diminishing other programs within Informatics.

4. Is there overlap, either real or potential, with any other unit that could harm the program or be exploited to help the program?

This certificate program does not appear to overlap with any other program at IUPUI; however, there is potential overlap with Instructional Systems Technology in the School of Education and the Master of Information Science/Specialist programs in the School of Library and Information Science, both on the Bloomington campus.

5. My recommendation, comments/concerns regarding this proposal…

Because there appears to be no significant reason to deny support for this program, I recommend that it be approved.
