## My Dear Friends and Colleagues,

It is once again my pleasure to invite you to read in this issue of our *Alumni Bulletin* about just a few of the many exciting activities of our School of Dentistry, activities in which I hope you will share my pride. In addition, I want to draw your attention to a particular theme that winds through many of the stories or reports in this issue — and that is the theme of appreciation and generosity of our alumni and friends.

First, the establishment of four new scholarships is highlighted — those made possible by the dentists of Columbus, Ind.; by the Southeastern District Dental Society; by Dr. James Hall of Indianapolis and his wife, the late Alice Hall; and by Citizens Gas & Coke Utility in honor of Dr. Lehman Adams of Indianapolis.

Each of these scholarships brings students closer to successful careers in dentistry or the allied dental professions, helping them not only to minimize graduating debt but also to follow through on the professional imperative to give back (or rather give forward) in gratitude for all that they have been given.

Second, please share with us the farewell to Chancellor Gerald Bepko. No words can adequately express our debt of gratitude to this giant of a man who served for 17 years as IUPUI's third chancellor. His understanding, encouragement, and unflagging support have had a profound effect on our

school and have been a major factor in allowing us to grow to the place we are today. Jerry will be sorely missed, but we join his many other friends and colleagues in wishing him well in the next stage of his career.

Third, in this issue of the bulletin is the first article by John

**No words can adequately express our debt of gratitude to this giant of a man who served for 17 years as IUPUI's third chancellor. His understanding, encouragement, and unflagging support have had a profound effect on our school and have been a major factor in allowing us to grow to the place we are today.**

Hoffman, IUSD's new Major Gifts Development Officer and Director of Campaigns. In it he stresses the professional imperative to give back. I have had the pleasure of traveling with John to many of the components and study clubs in Indiana, sharing with you the story of our school and encouraging you to consider supporting our school in a bigger way than ever.

As I have mentioned many times before in this column, the support of our alumni and friends is more important now than it has ever been. We know that you appreciate your education because we hear it so often. Now is the time to step up and show your generosity by "giving forward" so that the next generation of dental professionals in Indiana will have the same cherished opportunity to care for their patients as did we.

On a final note, we are looking forward to sharing with you in a future issue of the bulletin the inauguration of our IUSD SEAL INDIANA program. This unique program, to be conducted by the IU dental school in collaboration with the Indiana Dental

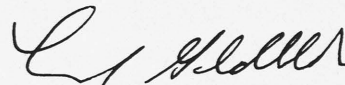

Association and its component societies, will take faculty and students to Title I schools (those with the poorest of the poor children) throughout Indiana to provide education, examinations, and sealants when appropriate. The finishing touches to a customized mobile dental

unit — to be called the IUSD Seal Mobile — are being applied as of this writing, and the Seal Mobile is expected to begin rolling into Hoosier communities within the next few weeks.

This important service-learning program will provide a much-needed service and will improve access to oral healthcare in areas of the state most in need; it is also designed to move patients as soon as possible to a dental "home" in the private practice community.

Thank you again for the privilege of being your dean. I'll write again soon. You do too.

Lawrence I. Goldblatt, DDS, MSD  
Dean

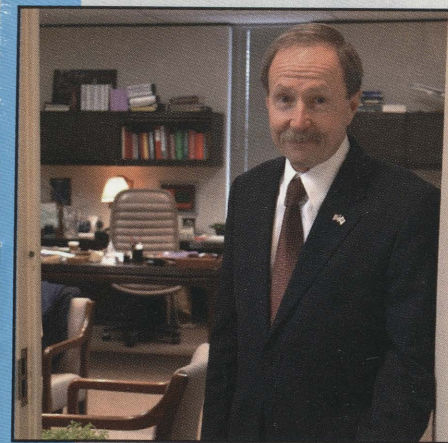

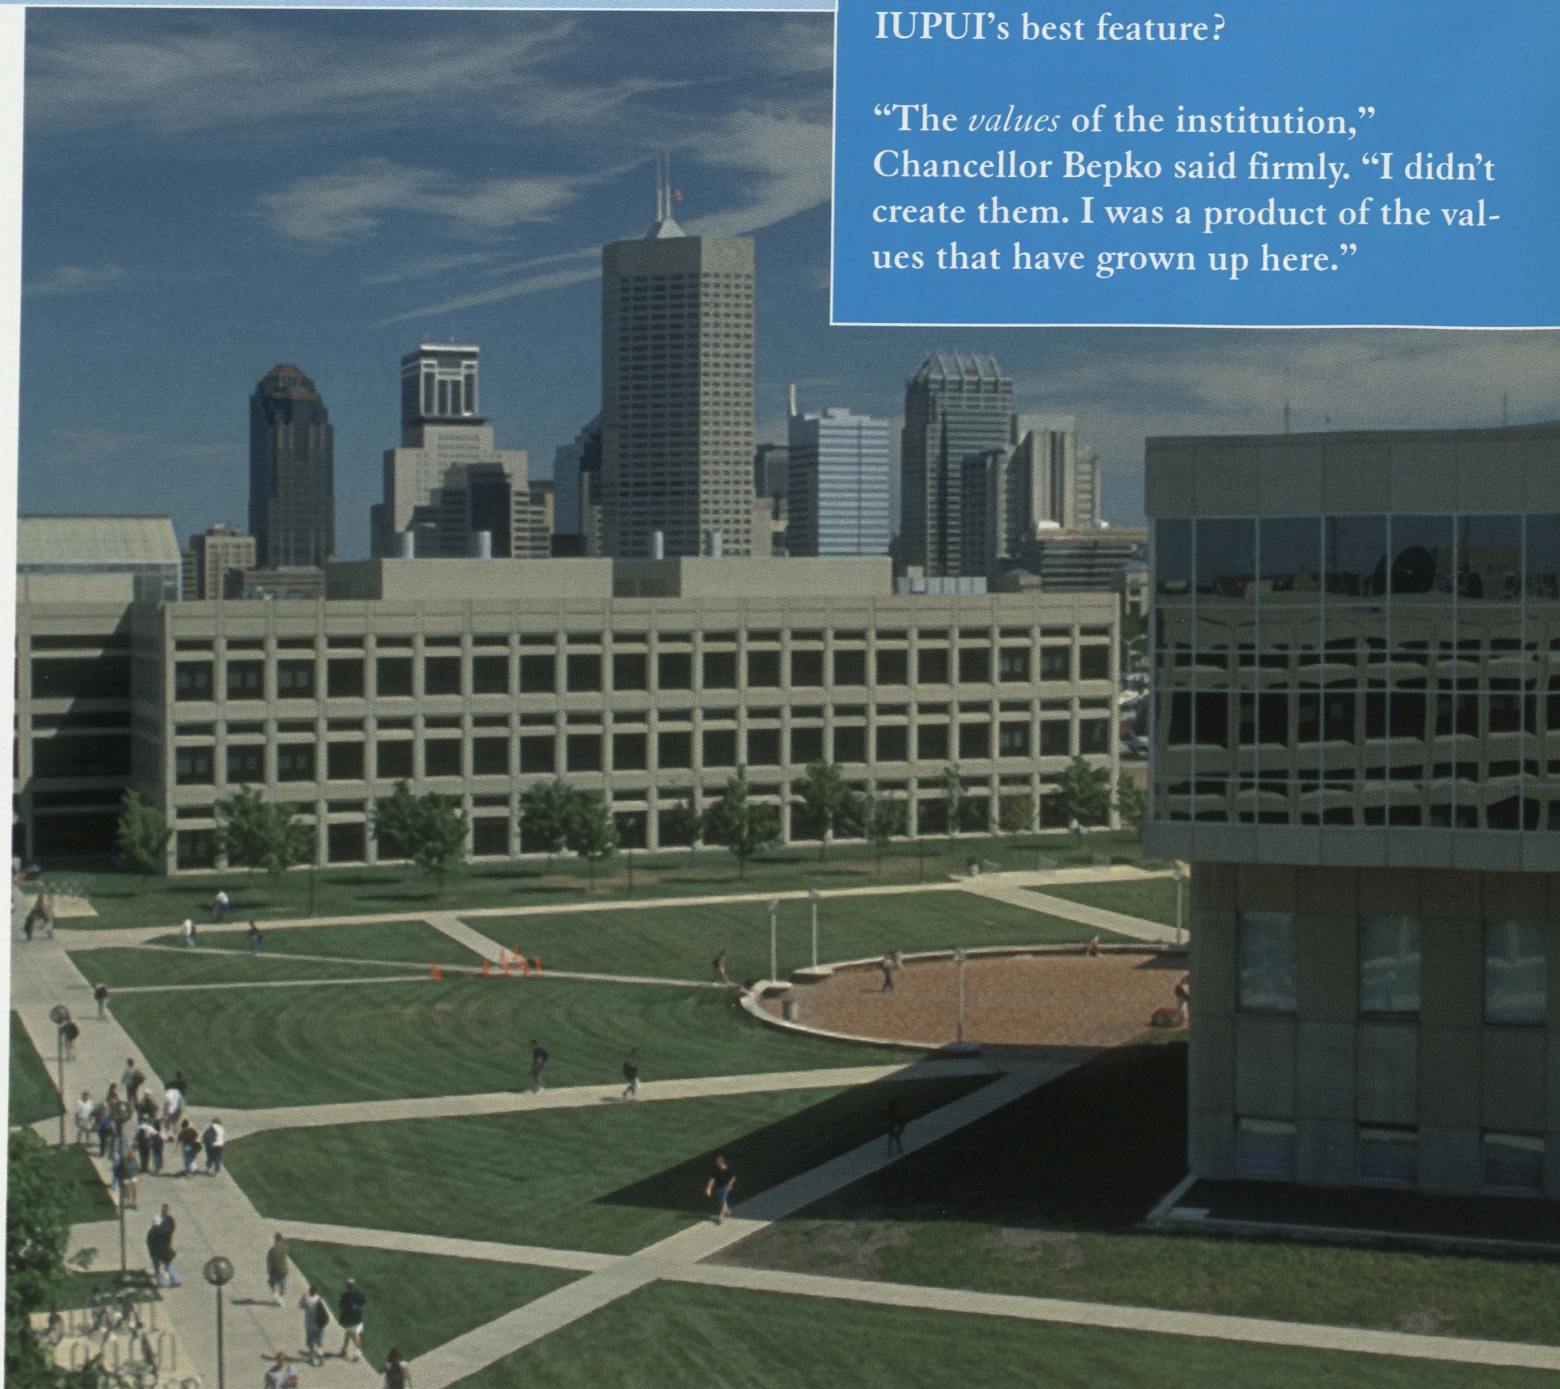

# A Product of His (Spectacular) Environment

Asked to point out the most important feature of the IUPUI campus, Gerald L. Bepko looks beyond the wealth of academic buildings, patient care facilities, and research centers that became part of the IUPUI landscape during his long tenure as chancellor to focus instead on the merits of all the individuals who shaped the IUPUI culture through their integrity, creativity, and spirit of collaboration.

IUPUI's best feature?

"The *values* of the institution," Chancellor Bepko said firmly. "I didn't create them. I was a product of the values that have grown up here."

Gerald Bepko

Gerald Bepko's continued service as chancellor was a key factor in Dr. Lawrence Goldblatt's decision to return to IU to accept the deanship in 1997 after having served as dental dean at Case Western Reserve University for three years. "My expectations of Jerry's leadership and friendship have, if anything, been far exceeded," Dr. Goldblatt says.

It's the type of statement that surprises no one who's even slightly acquainted with this modest gentleman. During his sixteen-and-one-half years on the job as chancellor, he quietly led IUPUI to a position of prominence as one of the outstanding urban campuses in the country.

"We live in a world in which the greatest asset is people," Mr. Bepko told me during an interview on Dec. 10, 2002, a few days before he would be stepping down from the chancellorship. "Organizations are only as good as their people — the people who come together to advance their common interests."

From Mr. Bepko's perspective, which includes 14 years of previous service as a teacher and an administrator at the School of Law (Indianapolis), IUPUI's success is based in large part on all the employees who have worked in harmony, turning their competitive spirit outward instead of on one another. Through a mutual support system, the faculty, staff, and administration have been able to create projects and programs that are greater than the sum of their parts.

"While our students are in the culture here, I hope they absorb some of that lesson in life," he said. "I hope they can also bring that energy and that potential to groups they will associate with as alumni."

He didn't spend a moment of his administration taking the IUPUI staff for granted. "To admire, and to be around, such wonderful, talented, and accomplished people as we have in the university is a thrill every day," he said.

## The Neighbor Next Door

Gerald Bepko spent his years as chancellor in close quarters to the dental school, working out of a small, unadorned, temporary-looking building even more unpretentious than the man himself. The IUPUI Administrative Office is a twin to dentistry's Oral Health Research Institute, by the way — the two buildings sit together, facing onto a plain-Jane street called Beauty Avenue and the parking lots west of the dental school.

Although Mr. Bepko had announced as early as March 2002 that he would be stepping down in June 2003 as IUPUI chancellor and IU vice president of long-range planning, what he didn't know then was that IU President Myles Brand would be leaving the university at the end of 2002 to become head of the National Collegiate Athletic Association.

When that news broke, the university trustees turned to Mr. Bepko and asked him to accept a position as interim president of IU, effective Jan. 1, 2003, for the duration of the search for Dr. Brand's successor. Dr. William M. Plater, IUPUI executive vice chancellor and dean of the faculties, was named acting chancellor of IUPUI.

"I couldn't say no to the invitation," Mr. Bepko said of the unexpected turn of events. "It's an honor to be asked, and I'm happy to do it."

"Jean and I have devoted our lives to the university," he added, referring to his wife, whose participation in IUPUI events is nearly as

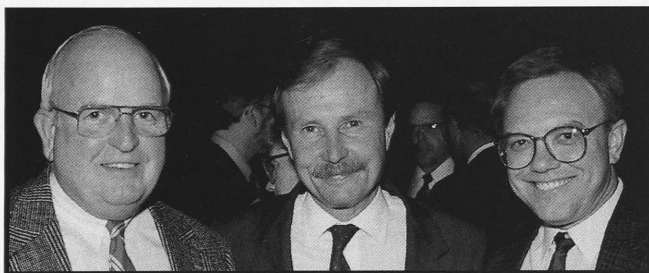

Jerry and Jean Bepko (2002)

Posing in 1987 with graduates inducted into Sigma Phi Alpha and Omicron Kappa Upsilon honor societies. In 1991, Chancellor Bepko gave the keynote address at the national session of OKU in New Orleans, the year Dean Goldblatt was serving as president of the supreme (national) chapter.

The chancellor with Phil Hardwick of the IU Foundation (left) and Douglas Spaulding (DDS '83) at the dental school's annual reception for donors (1993)

common as his. "I'd do anything within my boundaries of reason to serve IU."

During our talk, Mr. Bepko spoke with great warmth and vision about a campus that's consumed his professional life for more than 30 years.

"I think the fact that I spent a lot of years in this office helped people by providing them with a constant, something they could play off of and build on," he said. "That constant provided encouragement for people to take risks — and to do all the wonderful things that people did while I was privileged to be here."

When I introduced IUPUI's new chancellor to the dental alumni through the *Alumni Bulletin* in 1987, I titled the article "A Campus on the Move with Gerald L. Bepko" — a bit of an understatement, as it turned out, considering the extraordinary changes to the campus that lay on the horizon.

Under Chancellor Bepko's guidance, the IUPUI campus didn't simply move — it exuberantly danced, somersaulted, and catapulted its way into a new millennium, acquiring along the way a state of confidence in its achievements and in its future that is grounded in the inspiration, the dedication, and the imagination of the people who work and study here.

Indianapolis is the site for the IU dental school's 61<sup>st</sup> Fall Dental Alumni Conference, and grads who haven't had a chance to spend any time at IUPUI in the past few years are in for an eye-popping visit.

References to IUPUI as a "campus extension" or a "commuter school" are a thing of the distant past. And we can't even remember the last time we heard anyone call IUPUI "Ooey-Pooey."

No, your alma mater is located on a thriving, increasingly sophisticated campus that has brought a deep sense of pride to thousands of its employees and students — and especially to Gerald Bepko.

I asked the chancellor how he feels as he observes IUPUI's abundant changes during walks across campus these days.

"Uplifted," he said. He's not alone.

I thought I had a fairly good idea of what's happening on Indiana University's second-largest campus, but as I listened to the chancellor talk at length about a cascade of programs and facilities that have been put in place recently or soon will be, I

resisted putting my head down on the conference table to keep it from reeling.

It had slipped my notice, for example, that faculty and students at IUPUI's Center for Earth and Environmental Science are working with Eli Lilly and Company and the Rotary Club of Indianapolis to build an urban forest! Mr. Bepko captivated me with his description of this five-year ecological program during which 1,300 native trees, recently planted by the group along a strip of White River near campus, will be monitored in an effort to discover the best way to restore river-margin forests. It's called the Lilly ARBOR Project, and it's only one example of the countless programs that are helping IUPUI flourish as a leader in higher education.

A good neighbor, and a man who regards the campus's relationship to the community at large as essential to its success, Mr. Bepko told me with equal enthusiasm about all of the city's developments surrounding the campus — he seems as proud of Downtown's renovations as he is of IUPUI's.

## IUPUI Facts and Figures

About 29,000 students — from 48 states and 125 countries — are currently studying in more than 180 programs offered by IUPUI.

Since 1986, the year Mr. Bepko left his position as dean of the law school to become chancellor, campus has seen a 24 percent increase in its overall enrollment, an amazing 85 percent increase in the number of full-time undergrads, a 64 percent increase in minority students, and a 253 percent increase in international students.

The campus has added 52 new degree programs, including 24 graduate programs in fields such as biomedical engineering, philanthropic studies, bioinformatics, media arts and science, music technology, and public health. The number of degrees awarded each year has jumped by 34 percent, to 4,684.

The Intercollegiate Athletic Program at IUPUI rose to Division I status in the NCAA in 1998, and in 2003 the IUPUI Jaguars earned a berth for the first time in the NCAA tournament.

On the medical center, IU Hospitals was successfully consolidated in the 1990s with Methodist Hospitals of Indiana to form Clarian Health Partners, Inc., which is working to address the challenges of 21<sup>st</sup> century academic medicine and to serve as an anchor for Indiana's health industry.

Research income at IUPUI has skyrocketed, from \$38 million to \$202 million, and IUPUI has become an increasingly important link in a research corridor that also includes IU Bloomington and Purdue University West Lafayette.

*The U.S. News & World Report* ranks IUPUI #8 in the nation in terms of schools offering their students outstanding service-learning programs. We're confident that the dental school's community service efforts, including an Alternative Spring Break during which volunteer students and faculty treat patients in poverty-stricken parts of Haiti and Mexico, helped the campus achieve this top-10 distinction.

Of course, there's also concrete evidence (and brick and glass and limestone) of IUPUI's enormous growth since 1986 — 760 million dollars' worth, to be precise.

During the Bepko years, beau-

tiful new facilities sprouted up around campus and on the IU Medical Center almost faster than we could count them, and many of the previously built facilities underwent major remodeling and/or expansions.

Most folks on campus today probably take the fine services of the University Place Hotel and Conference Center, built in 1987, for granted; but we long-timers can well remember when it was difficult to extend a proper Hoosier welcome to our out-of-town guests because there was virtually no where on campus to hold an elegant reception, to present a state-of-the-art conference, to provide overnight accommodations, or to treat visitors to a nice lunch or dinner.

A Sports Complex comprising the Natatorium, Track & Soccer Stadium, and Tennis Center has helped IUPUI earn a solid reputation in the world of athletics. Athletes and non-athletes alike have a superb opportunity to stay (or get) fit, by working out at the exceptionally well-equipped National Institute for Fitness and Sport.

Other buildings constructed early on brought the Purdue University School of Science and School of Engineering and Technology to campus. Inlow Hall, housing a new \$32 million School of Law, debuted in 2001, and the former law building then underwent a \$19 million transformation to become Eskenazi Hall, new home to the Herron School of Art.

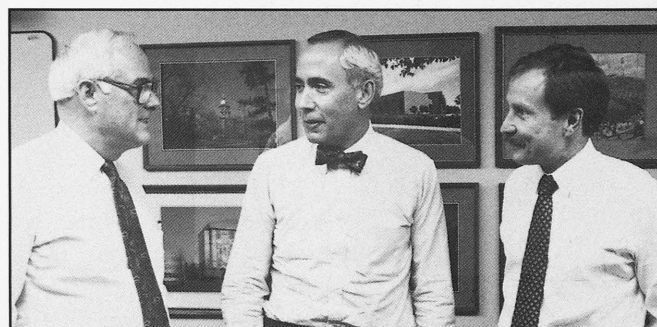

The IUPUI campus and the IU Medical Center both gained spacious, handsomely appointed libraries during Gerald Bepko's tenure, and vast expansions to the medical center include the Cancer Research Center, the Indiana Cancer Pavilion, and the Riley Hospital for Children

Outpatient Center. The medical school's \$27 million Paul and Carole Stark Neurosciences Research Institute (Research Institute II) will be dedicated in the spring of 2003.

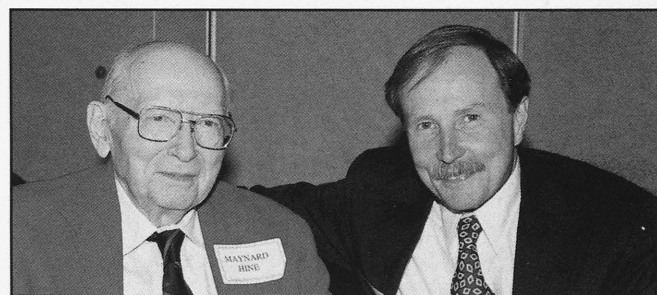

Employees at the new Center for Young Children have been watching over the youngsters of many IUPUI employees and students since 2000; this roomy, welcoming center has the capacity to provide daycare needs for five times as many children as the campus's former daycare center.

*Enjoying a moment at the annual IUSD donor reception with IUPUI's first chancellor, Dr. Maynard K. Hine, who also served as IU's longtime dean of dentistry (1995)*

*The chancellor helps IUSD welcome Dean Narong Suksu-art and his delegation from Prince of Songkla University, Thailand, when they traveled to Indianapolis to sign an agreement of friendship and cooperation with IUSD, the fifth such agreement IU's dental school had entered into with Thai schools at that point (1993).*

## More to Come

The campus routinely has a wide variety of projects either under way or in the pipeline, and the year 2003 is no exception.

The Biotechnology Research and Training Center is scheduled to open this year, and the Informatics and Communications Technology Complex in early 2004.

Several acres of land on IUPUI's west end are now in the midst of a construction project that will culminate in desperately needed campus housing. A total of 800 apartments are scheduled for completion in the 2003-2004 academic year. And IUPUI's students are looking forward later this year to groundbreaking, at the heart of campus, for a four-story Campus Center that will feature a variety of entertainment outlets for students — including a movie theater — as well as space for food vendors and a series of meeting rooms, both large and small, to accommodate the campus's growing number of student organizations and events.

Plans were announced in December for a new medical school informa-

tion sciences building to be constructed on property donated by the city and located on the Downtown Canal Walk. The facility will play a key role in the Central Indiana Life Sciences Initiative (CILSI), a partnership created by community leaders including President Brand and Purdue President Martin Jischke. A non-profit enterprise, the CILSI is a collaboration of businesses, universities, and local governments striving to attract and create jobs, companies, and entrepreneurial opportunities in the life sciences industry. One of the major components of CILSI is the Indiana Genomics Initiative, supported by a \$105 million gift to IU from Lilly Endowment, Inc.

We'll be looking above our heads — and cocking our ears — for one of the next changes, due to roll into the med center soon: the Clarian People Mover, a 1.5-mile elevated transit system that will transport healthcare providers, other hospital personnel, ambulatory patients, and members of the public back and forth for free from Methodist, Riley, and University hospitals. Funded by Clarian Health Partners, the automated rail cars are expected to accommodate about a half-million travelers each year. The Clarian People Mover represents a unique collaboration with Indianapolis; according to the city's Metropolitan Planning Organization, it is America's first privately owned transit system to operate over city streets.

The campus drawing board is never empty. At his final State of the Campus Address in December, Chancellor Bepko showed drawings of still more facilities to come, including a Research Institute III, an Emerging Technology Center, and a Medical Education and Administration Building.

Even more remarkable than the growth of IUPUI between 1986 and 2002 is the fact that state appropriations accounted for only about a third of all IUPUI construction costs during that period. The majority of the funds came from gifts and grants, revenues from operations, and private investments.

Indeed, the currently-in-progress IUPUI Comprehensive Campaign — the first campus-wide fund-raising campaign in IUPUI's history — has been a phenomenal success and is surely the envy of development officers throughout the country.

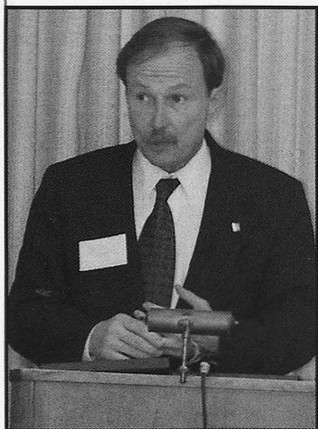

With an ambitious goal of raising \$700 million by June 2004, IUPUI met, and then surpassed, that goal at the close of 2002. By Dec. 31, \$788,124,577 had been raised — 112.59 percent of the goal.

## A Job Well-Done

As he prepared to depart from the chancellorship, Mr. Bepko was praised highly by the IUPUI and Indianapolis communities, not only for his stellar record of service but also for his personal qualities.

Persons interviewed by the *Indianapolis Star* described him as well-respected, trusted, caring, compassionate, tremendously knowledgeable, and a man of unshakable integrity. Andrew Abdul, former president of the IUPUI Black Student Union, spoke of an administrator who "has always made time for students."

Although Mr. Bepko is pleased, as anyone would be, that people feel he did a good job as chancellor, he also is clearly embarrassed by accolades directed his way, especially those that showered down on him in December. He briskly cut me off when I tried to bring up

*At a reception honoring Dr. Maynard Hine for 52 years of service to IU, Chancellor Bepko referred to the campus's first chancellor as an administrator who got the campus off "to a good, solid start with planning, vision, and a can-do spirit." A turn for the worse in his declining health prevented Dr. Hine from attending the reception. He died two days later, on Nov. 23, 1996.*

the topic. "I'm not comfortable with all that," he said.

It's simply not within his character to bask in a spotlight that isn't wide enough to simultaneously illuminate his colleagues.

"Whatever has been accomplished here is some combination of the genius and the ambition of the people in the schools — like dentistry — and some good fortune on the part of the administration," he said.

At the risk of putting IU's interim president in further discomfort, I feel it's my duty to share with you some of what the dental school's top administrator has had to say about Mr. Bepko.

"Jerry Bepko has had a profound effect on the IUPUI campus and has been a true friend to our school of dentistry," Dean Lawrence Goldblatt told an audience gathered for the 2002 Hine Legacy Society banquet last fall. "Our school of dentistry has benefited greatly from being part of the IUPUI family through the opportunities it has offered our faculty, staff, and students as we all carry forward our mission.

"But Jerry has done more than that for us," Dean Goldblatt continued. "He has steadfastly supported all we have done for the past 17 years and has been a true friend in both good times and bad. And he has shown incredible generosity of spirit and person, sharing our values and placing resources at our disposal. Several years ago, for example, he made available campus seed monies to support two full-tuition scholarships for underrepresented minority dental students for each year of school — a very strong challenge to our dental community to do the same. He has recognized, respected, and spoken up for dental education at every turn, and I look to the future for his continued friendship and support."

Mr. Bepko has always been attracted to the people in

dentistry, he told me, in part because he perceives a similarity in the dental and legal education systems. "There's a natural affinity, but the School of Dentistry here and the profession of dentistry have a wonderful culture onto themselves," he said. "The people are very congenial. They are people who represent some basic American values."

Having become acquainted with many members of the dental community as a frequent participant in the dental school's events, Mr. Bepko has been impressed by what he sees.

"You have an excellent dean, an excellent faculty, and a great tradition of achievement," he said. "I think there's a really good chemistry in the school, right now in particular. The school has an extraordinary alumni, all across the country and around the world, in the practice of dentistry and in the universities.

"It's a great foundation to build upon," Mr. Bepko continued, "and the school has shown that it's willing to innovate. The curriculum is something that sets it apart from other dental schools."

Mr. Bepko also acknowledged the innovations of the school's research program, which complement IUSD's longstanding research traditions.

"Research is essential for professional training in dentistry because the practice of dentistry has changed and will continue to change," he said. "As a dental student, you're much better off being in a school where people are working to invent and reinvent treatment modes, to find new ways of helping people achieve a lifetime of good oral health, and to acquire a more global sense of understanding the relationship between good oral health, good digestion, and all the other kinds of health."

*Jean Bepko chats with Joanna (Mrs. Glenn) Bollinger (left) and Eleanor (Mrs. John) Campbell at the Fall Dental Alumni Conference (1991).*

*The chancellor with Richard (DDS'73) and Shirley Ellsworth at the fall conference (1991). Mr. Bepko holds honorary membership in the IUSD Alumni Association.*

Others in the photo, from left: IUPUI Faculty Council secretary Dr. Susan Zunt, IUPUI Staff Council President Shirley Newhouse, IU President John Ryan, and IUPUI Chancellor Emeritus Irwin (1987)

When Governor Evan Bayh proclaimed Oct. 25, 1996 "Pursuit of Excellence Day in the State of Indiana" in recognition of the Indiana Dental Association's collaborative efforts with IUSD to ensure excellence in dental education, the chancellor came to the fall alumni conference in Bloomington to convey a message of thanks. The IDA/IUSD Pursuit of Excellence fund made it possible for IUSD to establish the school's first endowed chair, the Indiana Dental Association Chair in Restorative Dentistry.

## Beyond the Interim Presidency

Interim President Bepko expects to be able to step down from his newest post on June 30, the same day he had planned to leave the chancellorship. IU's robust search for a new president is well under way at this point, and the search for a new IUPUI chancellor is over.

One of Mr. Bepko's first duties as interim president was to recommend to the IU Board of Trustees that Charles R. Bantz be appointed chancellor of IUPUI. Originally from South Dakota and a graduate of the University of Minnesota and Ohio State University, Dr. Bantz has been serving as provost and senior vice president for academic affairs at Wayne State University. He will join the campus on June 1.

Gerald Bepko is planning a retirement that sounds, well, not very retiring. Don't expect to spot him out on the town pricing chaise longues anytime soon.

He's looking forward to being busy — but on his own terms for the first time in decades.

"I like to be busy," he said. "I don't think I'll ever want to sit around and stare at the waves. I've been in administration a long time, and my schedule has not been my own. I've had to be in a situation where there's considerable intensity day in, day out for 24 years."

I had to suppress a smile during this discussion of retirement when Mr. Bepko added, without the slightest hint of irony: "I've got about 10 years of work lined up." (I guess it takes awhile for an administrator to wean himself from the habits of long-range planning.)

If they go as he plans, the Bepko retirement years will be

filled with teaching, writing, and staying abreast, as he always has, in the field of law. He has remained active over the years in the National Conference of Commissioners on Uniform State Law and the Permanent Editorial Board for the Uniform Commercial Code, and he looks forward to having more time to contribute to these national groups. He would like to research some fields unrelated to law and try his hand at writing for popular audiences as well.

During the chancellorship, Mr. Bepko managed to squeeze a surprising amount of recreational reading into his schedule, about 12 to 15 books annually. Last year's choices included three books on the rogue FBI agent Robert Hanssen and a reminiscence titled *Lazy-B: Growing Up on a Cattle Ranch in the American Southwest*, co-written by U.S. Supreme Court Justice Sandra Day O'Connor, who visited IUPUI last year, and her brother, H. Alan Day. Pleasure reading will be infinitely more pleasurable for Mr. Bepko, however, when he doesn't have to do so much of it parked in an airplane seat, taking advantage of spare moments during business trips.

If his retirement is half as successful as his career, he's in for some wonderful adventures.

Wherever life takes Mr. Bepko, his many friends and colleagues are certain that his fascination with and dedication to IUPUI will not wane.

And wherever life takes IUPUI, its rich tapestry as a center of learning, exploration, and scholarship in higher education will forever bear the stamp of excellence in leadership and service that was uniquely Gerald Bepko's.

by Susan Crum

*Excerpts from Chancellor Bepko's  
17<sup>th</sup> — and Final —  
State of the Campus Address  
to the IUPUI Community*

---

*Dec. 5, 2002*

*(Using the game of baseball as a metaphor for his recollections of IUPUI, the chancellor provided a summary of IUPUI's many achievements and then directed his remarks to the achievers.—ed.)*

...These are all the wonderful accomplishments that all you batters from this truly extraordinary campus community have scored here at the heart of our great city. But all the superb achievements of all those to whom I've been privileged to pitch — these amazing achievements are not the most important part of this story. The most important point is not just how talented all of you are, although that is very impressive; it is not that we have had some natural advantages based on our location at the center of our state; it's not just that health, our defining component, has become so much more important in our society with, for example, NIH funding doubling over the past half dozen years.

What is most important is a range of intangible assets that I think of as the culture and personality of this campus. It is the complex of beliefs and understandings among large groups of people who have come together in a common cause. It governs how people relate to each other, what they think is important, how they join together to achieve goals, and the nobility and value of their work and service to humankind...

...At the core of our accomplishments are cultural assets and values such as integrity, cooperation and mutual support, a good shared vision, openness, healthy incentives and an abundant flow of information, and dedication to good and laudable purposes. These are among the most important ingredients in long-term success of organizations. Here at IUPUI, we have developed good common values; we've developed a compelling vision of ourselves as an academic community devoted to our various constituencies; and we've created a positive mutually supportive culture that has permitted us to achieve at high levels, allowed us to enjoy our success, and, most of all, encouraged us to enjoy each other's company in the spirit of teamwork...

...I feel privileged to have been in this culture. My life has been shaped by these values which, in turn, are created by all of you. I could not be more grateful to all of you for providing this culture, and exposing me to these institutional values as I became a faculty member, dean, and chancellor. After more than 30 years here, it is obvious to me that, from this campus culture, I have derived much more than I was ever able to give. The accounts are very much out of balance in my favor. So, I am going to keep on pitching, and serving, as interim president, and then as a member of this glorious faculty, to try to bring those accounts someday into balance. Thank you.

## **GERALD L. BEPKO**

**Education:** B.S., Northern Illinois University, 1962; J.D. (high honors), Chicago-Kent College of Law, Illinois Institute of Technology, 1965; LL.M., Yale University, 1972

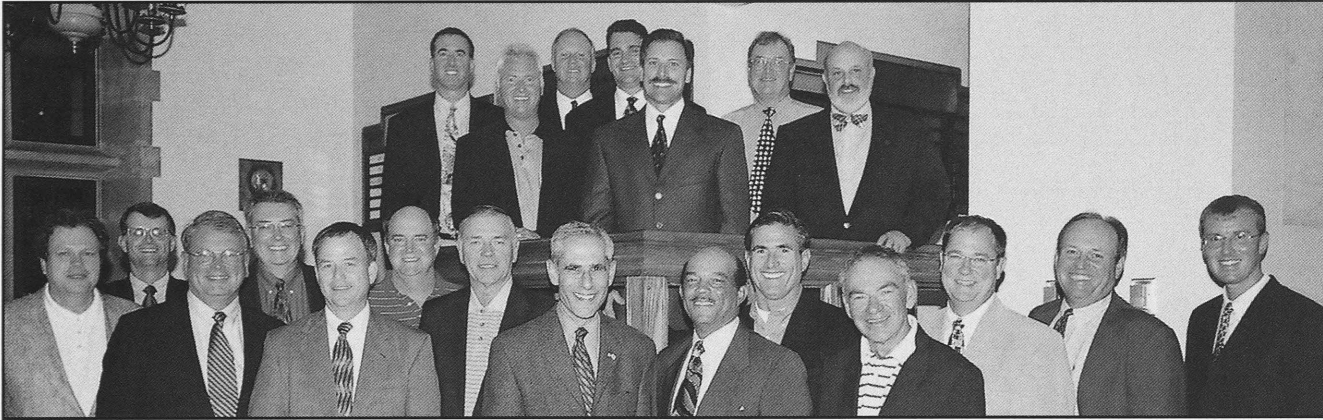

**Former Positions:** Practiced law in Chicago; served as a special agent for the Federal Bureau of Investigation; taught on the Chicago-Kent College of Law faculty

**Positions at IU:** Faculty member, School of Law Indianapolis, 1972-present; dean, School of Law Indianapolis, 1981-1986; IUPUI chancellor and vice president of long-range planning, 1986-2002; interim president, Indiana University, 2003

**Family:** Wife, the former Jean B. Cougnenc of New York; son, Gerald L. Jr. (J.J.), Indianapolis; and daughter, Arminda, New York

# Fall Conference 2002

**IUSD Alumni Association Board of Directors.** Back row, from left: Jim Humphrey, Steve Stradley, Ron Ditto, Brad Laconi, Geffry French, Phil Pate, and Fred Sputh. Front: Phil Conn, Ken Braun, Dan Fridh, George Zundo, David Howell, Jim Cahillane, Ron Hunt, Larry Goldblatt, Phil Drake, Dan White, Norm Novak, Phil Gardner, Gary Pfleeger, and Matt Pate.

**O**n the second day of IU's 60<sup>th</sup> Fall Dental Alumni Conference, held in Bloomington, we rose at dawn to darkness, a fierce deluge of rain — and a disheartening feeling that the thunderstorm would likely cancel out the Huckelberry Golf Scramble, a popular and much-looked-forward-to conference tradition.

We didn't know it then, of course, but a rained-out golf competition would be the least of everyone's concerns on Friday, Sept. 20, 2002, when later in the day the state of Indiana played host to a frightening series of tornados. The twisters did not come through Bloomington and, thankfully, claimed no lives, but the storms brought destruction and hardship to several Hoosier communities on a path stretching from the southwest of the state to the northeast, including nearby Ellettsville as well as Martinsville, Greenwood, Southport, and Beech Grove.

Most conference participants were already safely in town before the tornados touched down, but some who waited to drive to Bloomington later

on for the evening receptions and banquet encountered lengthy delays on highways and streets that were either littered with debris or clogged with rerouted traffic.

The severity of the weather — including the continuation of heavy rains in Bloomington — led to some out-of-the-ordinary conference "activities" on Friday afternoon, when riding bikes and strolling on the IU campus gave way to following storm updates on hotel room televisions and calling family and friends for reports of weather conditions back home.

When he assumed the presidency of the IU School of Dentistry Alumni Association a year earlier, Dr. Fred Sputh of Lafayette could not have imagined that he would be guiding the alumni through one of the most unusual conferences in the event's history, and on one of Indiana's worst weather days in memory.

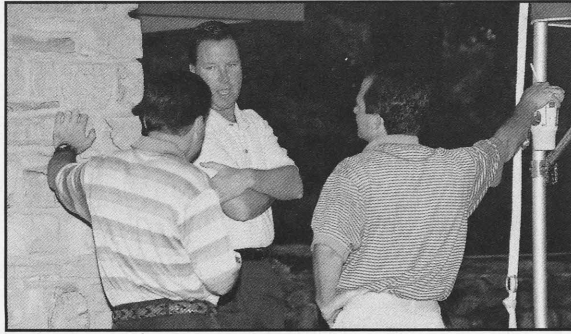

But, with help from the IUPUI Office of Alumni Relations and the IUSDAA board of directors, Dr. Sputh rose to the challenge, introducing IU's new football coach, Gerry DiNardo, at the

Celebration Luncheon; overseeing a cocktail party for the 50-Year Class and a reception and banquet for the alumni-at-large; and joining all conference participants in honoring 2002's Distinguished Alumnus, Dr. Russell Powers of Lyons, and the year's Honorary Alumna, Jan Miller of Bloomington.

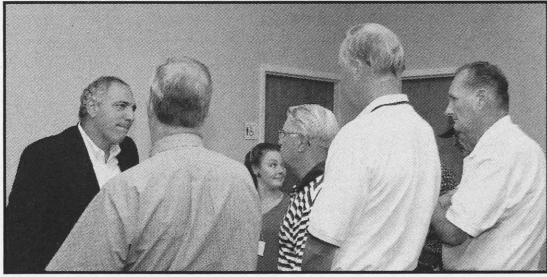

## Thanks to the Golfers and Scramble Sponsors

A relentless downpour eliminated the Huckelberry Scramble, but not the great generosity of the would-be participants. Sponsors of the annual golf outing and three-fourths of the golfers who were signed up to compete donated their fees — a total of \$3,600 — to the IU dental school to be used to help cover expenses of students who have volunteered to provide treatment to people in need in Haiti and Mexico during the school's 2003 Alternative Spring Break.

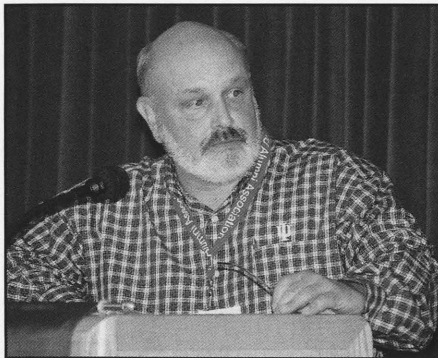

*Huckelberry Scramble golfers (photos left and above) waiting in the early morning hours for a break in the rain that never came*

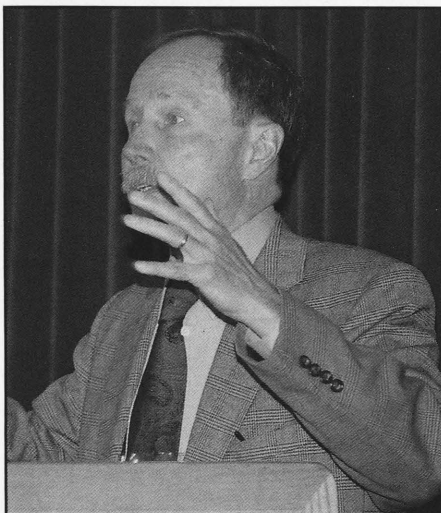

*Featured speaker at the Celebration Luncheon was IU's new football coach, Gerry DiNardo (left), shown here fielding questions after the program.*

*IUSDAA President Fred Sputh*

*All aboard for Friday's excursion to the Indiana Memorial Stadium*

*IUPUI Chancellor Gerald Bepko (left) and IU Alumni Association Director Ken Beckley welcoming alums and their families to the Celebration Luncheon*

*Dr. Ditto (right) chats with CE speaker Richard Shelly (DDS'69), who has served as the dentist for IU's athletes for more than three decades. Dr. Shelly presented a course on sports dentistry with Dr. James Nevins, sports medical director for the IU Athletic Department, and IU athletic trainer Kip Smith.*

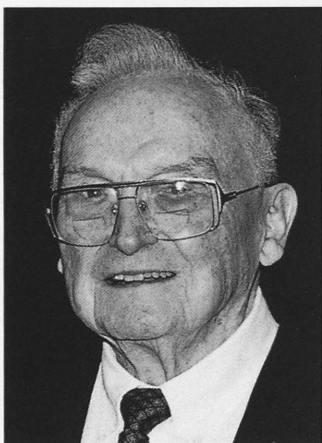

## AWARDS & HONORS

### DISTINGUISHED ALUMNUS

**Russell W. Powers (DDS'28)**  
*Lyons, Indiana*

**D**r. Russell Powers, long-since retired from a career in dentistry that spanned 50 years, continues to work on behalf of his community.

*Russell Powers*

Dr. Powers has been a member of the Greene County Dental Society since 1928, the same year that he earned his dental degree. He and his classmates were in the fourth class to receive degrees from Indiana University.

Dr. Powers established his practice in the small town of Lyons after a dental supplies salesman asked him to visit the office. He reported for duty the following Monday morning and stayed until his retirement in 1978.

During the Depression, Dr. Powers provided essential services for little or no pay, or traded dental care for eggs, pigs, chickens, or pies. Dr. Powers was responsible for obtaining Lyons' water fluoridation system in 1948, making the town of 800 residents the smallest community in the United States with a fluoridated water system.

Dr. Powers has been active in the Lions Club, and he and his wife, Eva, are generous supporters of the Greene County Foundation. The town used Foundation funds to build a multipurpose community building named in Dr. Powers' honor.

They are the parents of two children, the grandparents of five, and the great-grandparents of two.

In the spring of 1998 — 70 years after earning his own dental degree — Dr. Powers attended ceremonies in Indianapolis to watch one of his grandsons, Scott Powers, graduate from the IU School of Dentistry.

Dr. Scott Powers practices in Lyons, and his sister, E're Powers, is a fourth-year dental student at IU. All five grandchildren have earned, or are in the process of earning, doctorates (two PhDs, two dental degrees, and one medical degree).

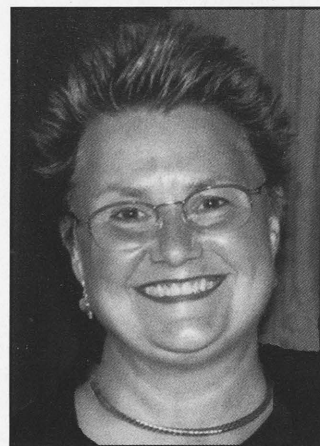

Dr. Scott Powers practices in Lyons, and his sister, E're Powers, is a fourth-year dental student at IU. All five grandchildren have earned, or are in the process of earning, doctorates (two PhDs, two dental degrees, and one medical degree).

### HONORARY ALUMNA

**Jan Miller**  
*Bloomington, Indiana*

**J**an Miller has dedicated much of her career to promoting public understanding of the dental industry and the professional development of Indiana's dentists.

Ms. Miller is the newly named director of development for the Indiana Dental Association Foundation for Dental Health. She works with the IDA Foundation board to raise capital funds for expanding educational opportunities, recruiting students into the profession, and assisting IDA members in attracting and retaining quality employees.

*Jan Miller*

Her new job is a natural progression from 15 years of working on behalf of the dental profession as executive director of the Isaac Knapp District Dental Society. She worked tirelessly to enhance the public's image of dentistry through media contact, Peer Review, new patient and emergency care referral services, consumer information, and public relations. She promoted the benefits of dental care by consulting with employers, speaking to groups, and participating in trade shows.

Ms. Miller helped to develop the Isaac Knapp Dental Education Foundation and directed its \$100,000 endowment campaign. The Foundation, with assets now exceeding \$300,000, funds scholarships, oral healthcare, and professional and community education.

Jan Miller is the wife of Robert C. Miller, a retired teacher and coach, and the mother of five daughters and seven grandchildren.

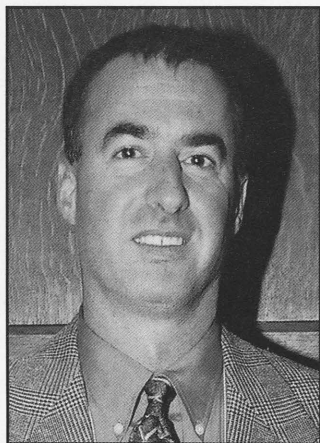

*A word of congratulations for IUSD's newest distinguished alumnus from Dr. James Humphrey*

*Jan is congratulated by two of her longtime Fort Wayne pals: Dr. Jim Frey (left), Fort Wayne, and Dr. Jim Shupe, now of Bradenton, Fla.*

## Presidential Reins Handed to Dr. James Humphrey

*Dr. Jim Humphrey will  
preside over the 2003 Fall  
Dental Alumni Conference.*

**A**t the close of the 60<sup>th</sup> Fall Dental Alumni Conference, Dr. James Humphrey, a periodontist in Terre Haute, accepted the presidency of the Indiana University School of Dentistry Alumni Association for the 2002-2003 term.

Jim entered dental school at IU after earning his bachelor's degree on the IU Bloomington campus in 1984.

He was following a career path familiar to the Humphrey family. Jim's dad, James Humphrey (DDS'52), was a long-time Terre Haute general practitioner. He died in 1991.

Jim's sister, Patricia Humphrey Clark (ASDH'74, DDS'80, MSD'86), is a Terre Haute endodontist.

Both Jim's dad and sister took turns serving on the IUSDAA board of directors, and Dr. Clark was the board's president for the 1989-1990 term.

Jim earned his dental degree in 1988 and practiced for a year before heading once again to IUSD for specialty training in periodontics. He completed the master's degree in January 1992.

Dr. Humphrey's memberships include the American Dental Association, American Academy of Periodontology, Indiana Dental Association, and Western Indiana Dental Society, the latter for which he is currently serving as president.

Dr. Humphrey and his wife, Heather (Van Ness) Humphrey (ASDH'92), are the parents of four children: Brooke, 9, Garrett, 7, Hannah, 5, and Elizabeth, 2.

# Grad Student Profiles

Dr. Bailey

## SPENCER BAILEY

**Hometown:** Bountiful, Utah. **Dental Education:** DDS, Indiana University, 2000. **IU Graduate Program:** orthodontics (major), life sciences (minor). **Thesis:** *Comparison of root resorption in patients treated with .018 slot brackets versus those treated with .022 slot brackets.* **Degree:** MSD, July 2002. **Plans:** To conduct a private orthodontic practice in Clearfield and Salt Lake City, Utah.

## NANCY KHACHI

**Hometown:** Tehran, Iran. **Dental Education:** DDS, Indiana University, 1998. **IU Graduate Program:** preventive dentistry (major), prosthodontics (minor). **Thesis:** *Measuring dentin microbial permeability after the use of desensitizing agent.* **Degree:** MSD, July 2002. **Plans:** To practice general dentistry in Indianapolis. Would eventually like to teach part time.

Dr. Khachi

## JENNIFER R. KUGAR

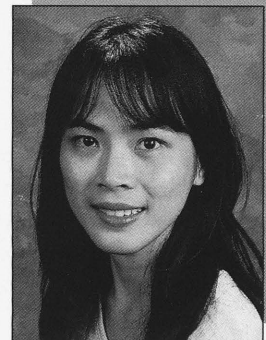

**Hometown:** Cincinnati, Ohio. **Dental Education:** DDS, Indiana University, 1988. **IU Graduate Program:** pediatric dentistry (major), preventive dentistry (minor). **Thesis:** *Correlation between caries prevalence, socioeconomic status, and cultural findings in Hispanic children ages 6 months to 8 years.* **Degree:** MSD, December 2002. **Plans:** To enter private practice in Indianapolis, practicing with Carol McKown (DDS'84) on the northside and Brett Mann (DDS'89) on the southside. Also teaching part-time as a clinical assistant professor of pediatric dentistry at Riley Hospital for Children, where she will serve in the Craniofacial Team Clinic.

Dr. Kugar

## YEN P. LE

**Hometown:** San Diego, Calif. **Dental Education:** DDS, University of California at Los Angeles, 2000. **IU Graduate Program:** orthodontics (major), life sciences (minor). **Thesis:** *The effects of first- and second-order gable bend angles on forces and moments generated by triangular loops.* **Degree:** MSD, July 2002. **Plans:** To conduct a private practice in San Diego.

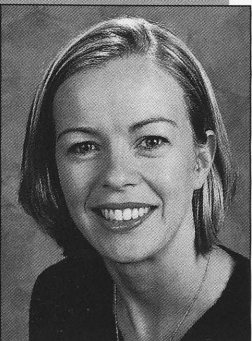

Dr. Le

## JENNIFER A. RUSSELL

**Hometown:** Indianapolis, Ind. **Dental Education:** DDS, Indiana University, 1998. **IU Graduate Program:** orthodontics (major), life sciences (minor). **Thesis:** *A study of craniofacial asymmetry in monozygotic and dizygotic twins using posteroanterior radiographs.* **Degree:** MSD, July 2002. **Plans:** To enter private practice in Indianapolis.

Dr. Russell

# BUILDING A FIRE WITHIN THE CAMP

*What you can do to help Hoosier teenagers ignite their curiosity about the profession of dentistry*

The next time one of your teenage patients asks you a question about dentistry, listen — and answer — with care.

You just might be on the verge of inspiring one of the thousands of dentists who will be needed to keep the profession of dentistry flourishing in the next generation.

And, should that single question lead to others, you might consider making an investment in the future of dentistry by packing your patient off to summer camp.

Not the cabin-by-the-lake kind, where participants write postcards, swat mosquitoes, and commune with nature. The camp we have in mind is strictly for explorers — young people looking to map out the field of dentistry, and perhaps discover a profession for themselves along the way.

Thanks to efforts led by Richard Shelly (DDS'69) of Bloomington, such a camp is now available in the state of Indiana.

From July 27 to Aug. 1, 2003, the University of Indianapolis will offer "Introduction to Dentistry," a one-credit intensive college course that will expose high school sophomores, juniors, and seniors to information about the practice and business of dentistry and about life in both undergraduate and dental school.

The goal of the program, which is backed by the Indiana Dental Association and the Indiana University School of Dentistry, is to help raise dentistry's profile among the state's teenagers and to recruit Indiana's future dentists at a

time when conventional recruitment methods could use a boost.

"The high school counselors are noting a lack of student interest in dentistry as a career," Dr. Shelly says. "In fact, the two high schools in my area have had no inquiries in the last five years."

That disturbing piece of news — in concert with dental school applications from Indiana residents having decreased in recent years and the fact that Indiana is following a national trend in which more dentists are leaving practice (primarily through retirement) than are entering it — compelled Dr. Shelly to approach the U of I with his idea for a summer camp.

The plan was met by a receptive audience within the school's administration, faculty, and alumni. "I am very pleased that the U of I immediately understood the call," says Dr. Shelly. "The U of I took the camp concept to a higher level by constructing a course in the introduction of dentistry."

The University of Indianapolis is an ideal site for the course, Dr. Shelly says, and, as an alumnus of the school himself, he's in a good position to know. The U of I is a small institution, and one that Dr. Shelly says gives its "utmost in individual attention to students."

Students will room on campus during the course, which will be presented on a pass/fail basis. Class size will be limited to ensure each student receives ample guidance. Although the teenagers will be closely supervised and given personal counseling to minimize chance of failure, Dr. Shelly says the course won't be "sugar coated."

"We are going to present a realistic view of dental education and dentistry as it is today, and what it will be in the future," he says.

Classes will be taught by U of I chemistry professors, U of I dental alumni, and dental specialists in the community. Field trips will take the high schoolers to the IU School of Dentistry and to a dental lab, a dental supply house, and a Marion County water treatment plant to observe how fluoride is added to the water supply. Participants will also have some hands-on opportunities in the high-tech, manikin-equipped laboratory at the dental school's Center for Advanced Professional Studies at Walker Plaza.

IU's dental students will serve as counselors during the campers' evening hours.

The cost of the camp, including room and board, is \$380. Dentists who are teaching part of the course have volunteered their services in order to keep the fee as low as possible. The U of I will offer some scholarship opportunities to underprivileged high school students with an interest in learning about dentistry.

Dr. Shelly has put out a statewide call to the dental community, asking for help in promoting the program through dental offices and local high schools — and in identifying and financially assisting good candidates. He is hopeful that many of the state's component dental societies will choose to sponsor a student. Contributions from

## Summer Dental Camp July 27-Aug. 1, 2003

individuals are welcome too. Donations are tax-deductible.

"Any amount will be most appreciated," he says.

The ultimate goal is to create an endowment fund that would make it possible for all interested, worthy high school students to enroll in future courses at no cost.

David Dewitt of the Institutional Advancement Office at the University of Indianapolis is working with Dr. Shelly on arrangements for the premier course. If you know of high school students who might be interested in the camp, they can obtain an application form by contacting Mr. Dewitt.

Monetary contributions in any amount also go to Mr. Dewitt. Make checks payable to the University of Indianapolis, noting in the corner that the donation is for the "Summer Dental Camp."

You can reach Mr. Dewitt by phone (317) 788-3493, e-mail (ddewitt@uindy.edu), and U.S. mail (David Dewitt, Institutional Advancement Office, University of Indianapolis, 1400 East Hanna Ave., Indianapolis IN 46227-3697).

For more information about the program, Dr. Shelly welcomes your calls at (812) 332-6131.

Please do whatever you can to help Indiana's high schoolers open their eyes to the field of dentistry. And, if possible, send a teen to camp. By doing so, you may well be making one of your finest contributions to the profession: a dentist for the generation ahead.

## On Course

## New Full-Time Faculty Appointed

**D**r. Mythily Srinivasan, formerly a research associate in pathology at The Ohio State University, has accepted a full-time appointment at the IU School of Dentistry as an assistant professor of oral pathology in the Department of Oral Pathology, Medicine, and Radiology. She joined the school in November 2002.

Dr. Srinivasan

After earning dental and master's degrees from the University of Nagpur, India, Dr. Srinivasan served on the oral pathology and microbiology faculty at Ragas Dental College and Hospital in Madras, India, from 1993 to 1996. From 1994 to 1996, she was also a research fellow at Dr. M.G.R. Medical University in Madras, where her work involved an evaluation of multiple biomarkers in oral premalignant lesions.

In 2001, Dr. Srinivasan undertook a postdoctoral fellowship in peptide and protein engineering at Ohio State after completing the university's PhD program in microbiology and immunology. She received first prize for outstanding research in Ohio State's Edward Hayes Research Forum in 2001, as well as an award for outstanding scholarship from the scientific research society, Sigma Xi.

Dr. Srinivasan's research focuses on two broad areas: identification of potential biomarkers as intermediate end-points in oral cancer-pre-cancer and development of novel therapeutic agents for chronic

inflammatory diseases. Her research has been published in such journals as *Oral Oncology*, *Oncology*, and the *Journal of Immunology*. She is a recipient of the 2002-2003 young investigator award from the Arthritis National Research Foundation.

In her primary role at IU, she will contribute to the oral cancer research being conducted in the Department of Oral Pathology, Medicine and Radiology. In addition, as an independent researcher she will develop core research projects in the fields of oral/mucosal immunology and chronic inflammation.

**D**r. Joan E. Kowolik, a former instructor at the University of Leeds in the United Kingdom, has been appointed by Indiana University as an assistant professor of pediatric dentistry, effective October 2002.

Students at the IU dental school are already familiar with Dr. Kowolik through her work on the part-time faculty here

## JOAN KOWOLIK ACCEPTS ADEA FELLOWSHIP

The IU School of Dentistry is proud to report that Dr. Joan Kowolik recently learned she has been awarded a prestigious fellowship by the American Dental Education Association.

She is one of 21 dental faculty members in the nation to be accepted as a fellow in the ADEA Leadership Institute for 2003-2004.

The ADEA describes the Institute, now in its fourth year, as "a year-long program designed to develop the nation's most promising dental faculty to become future leaders in dental and higher

education." Presented in four phases, the Institute will include self-assessment, peer-assessment, in-depth leadership development, team building, administrative competencies, and analysis of issues critical to dental and higher education.

Following an orientation program in San Antonio, Texas, in March 2003, fellows of the Leadership Institute will convene quarterly at sites around the country, including Washington, D.C., where the group will participate in a legislative workshop.

*Dr. Kowolik*

dental officer in the Leeds Community and Mental Health Services Trust.

Following relocation to Cincinnati with her family in 1994, Dr. Kowolik initially took a different path and became a job coach facilitator for young people with physical and mental disabilities she met through the Great Oaks Institute of Technology. She also lectured part time on behavioral modification in dentistry at Children's Hospital Medical Center.

Since 1998, she has been serving as an independent clinical trials examiner for several international research organizations.

Dr. Kowolik chairs the school's PBL case writing panel and has been called upon to play an increasingly larger role in IUSD's student assessment process, a critically important component of the Indiana Model of Dental Education. She has participated in several assessment conferences for higher education here and abroad.

*Dr. Gonzalez*

from 1998 to 2001 and as a full-time visiting assistant professor since then. She has served as an instructor in the pediatric dentistry clinic and as a tutor in the school's Problem-Based Learning (PBL) program. Many of our faculty also know Dr. Kowolik through her role as Tutor Trainer for PBL through the Office of Dental Education.

Dr. Kowolik is a dental graduate of the University of Edinburgh, Scotland. She was also trained as an education and training specialist in pediatric dentistry at Edinburgh and Leeds. In 1991, she earned a diploma in clinical hypnosis during postdoctoral studies in the Department of Psychiatry at the University of Sheffield in England.

Dr. Kowolik served as a community dental officer on the Lothian Health Board in Edinburgh for 10 years before accepting a position at the University of Leeds as an instructor in pediatric dentistry, where she taught in both the predoctoral and graduate clinics. While maintaining her faculty position, she also served as a

**D**r. Theresa A. Gonzalez, a dental graduate of IU who had been teaching as a visiting faculty member here, has accepted an appointment as a clinical assistant professor of operative dentistry and a director in the Comprehensive Care Clinics, effective January 2003.

Prior to her enrollment in dental school, Dr. Gonzalez served for five years in the U.S. Navy as an Ocean Systems Technician Analyst. Her undergraduate studies during this period at New Hampshire College, the University of Maryland, and City Colleges of Chicago were applied to the B.S. degree in biology she earned in 1991 from Indiana University-Purdue University Fort Wayne.

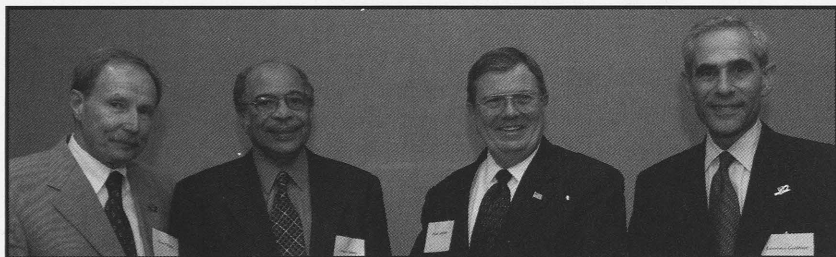

After graduating from dental school in 1994, Dr. Gonzalez practiced in Pendleton, Ind., and she also served as a volunteer dentist at St. John's Children's Clinic in Anderson. She joined IUSD's part-time restorative faculty in 2000, and then took a full-time visiting faculty position the following year, including the directorship of one of the school's seven Comprehensive Care Clinics.

Dr. Gonzalez is a member of the BBB and Omicron Kappa Upsilon national honor societies in graduate biology and dentistry, respectively.

She is a member of the IUSD Admissions Committee and the school's mentor program for first-year dental students. Since September of 2002, Dr. Gonzalez has also been working as a part-time dentist at the Marion County Health Department.

## New Scholarship Will Honor Dr. Lehman Adams Jr.

On behalf of IUSD, Dr. Lehman Adams (second from left) accepts the scholarship from Mr. David Griffiths (second from right), president and CEO of Citizens Gas & Coke Utility, as Gerald Bepko, then chancellor of IUPUI (left), and IUSD Dean Lawrence Goldblatt join in the ceremony.

One of IUSD's longest serving part-time faculty members now has a scholarship named in his honor, thanks to a recent gift from Citizens Gas & Coke Utility that will fund this new dental school scholarship and also contribute to an important administrative fund at Indiana University-Purdue University Indianapolis. The Citizens Gas/Dr. Lehman D. Adams Jr. Scholarship salutes Dr. Adams, an assistant professor of oral and maxillofacial surgery and a member of the faculty since the 1950s. Dr. Adams served on the Citizens Gas board of trustees for more than 20 years.

The Adams scholarship, which is in the amount of \$20,000, is the first-ever corporate scholarship endowment made to the IU School of Dentistry.

It will be awarded each year beginning in fall 2003 to a minority dental school student from Marion County.

The gift is part of Citizens Gas' continuing commitment to education and economic development in Indianapolis. President and CEO David Griffiths presented the gift to IUPUI and the dental school during ceremonies

held on campus in October 2002. At \$100,000, it is the largest gift ever awarded by the utility.

Citizens Gas will contribute the remainder of the gift over the next three years to the Chancellor's Circle, an unrestricted fund that allows the chancellor to act quickly and more effectively when special opportunities arise. Chancellor's Circle funds are used to attract and retain faculty members,

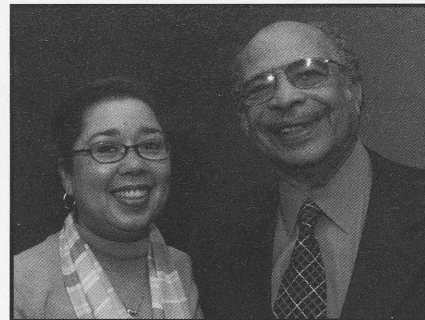

to invite special visitors and scholars to the campus, and to bring community leaders to IUPUI for briefings on campus planning activities.

"Citizens Gas has a long tradition of supporting educational opportunities in Indianapolis," Mr. Griffiths said. "We are proud to donate these funds to help IUPUI continue to grow and prosper as one of the premier urban campuses in the country."

Citizens Gas has also contributed to IUPUI's library building project and has been a corporate sponsor of Explore IUPUI, a campus-wide open house for the community and prospective students.

## Dr. J. Barnes Awarded NDA Scholarship

Dr. Jennifer Barnes, a second-year graduate student in operative dentistry, has been awarded the Dr. Bessie Elizabeth Delaney Award from the foundation of the National Dental Association (NDA), the largest and oldest organization for minority oral health professionals in the U.S.

Traci Adams, Dr. Adams' daughter and the IU dental school's director of Student Diversity Support, helps her father celebrate the new IUSD scholarship named in his honor.

Dr. Barnes

The \$10,000 scholarship, supported by the NDA and Colgate-Palmolive, was presented to Dr. Barnes during the NDA's national conference in Dallas, Texas, in July 2002. The Delaney award, which specifically recognizes a female graduate degree candidate, was one of three \$10,000 scholarships the NDA presented at the meeting.

Before arriving at IU for graduate studies, Dr. Barnes earned her dental degree from Meharry Medical College in Nashville, Tenn.

The woman for whom the scholarship is named was a dentist who lived to be 104 years old. A 1923 graduate of the Columbia University School of Dental and Oral Surgery, Dr. Delaney became the second African American woman to be licensed to practice dentistry in New York City.

## IDA's Outstanding Teacher Awards Go to Drs. Moore, Legan

The Indiana Dental Association's annual faculty awards were presented during the IU School of Dentistry Faculty Conference, held in September 2002 at McCormick's Creek State Park.

Dr. B. Keith Moore, professor of dental materials, received the IDA's Outstanding Teacher of the Year Award for excellence in teaching during the 2001-2002 academic year.

Dr. Moore began his career on the IU faculty in 1977, joining the school's famous team of researchers in materials science led by Dr. Ralph Phillips. After earning a PhD in metallurgical engineering from the University of Illinois, Urbana, he taught biological materials for several years at Northwestern University before coming to IU.

Dr. Moore currently lectures or presents seminars for 13 courses and directs four courses as well as a module. He also is involved with all aspects of the school's problem-based learning program.

His job as graduate program director in dental materials demands much of his time as well — in the past year, he served on 28 graduate student research committees and chaired two of them.

Dr. Moore has written or co-written hundreds of research articles and abstracts, and he carried on as coeditor of the 5<sup>th</sup> edition of Dr. Ralph Phillips' text, *Elements of Dental Materials: For Dental Hygienists and Dental Assistants*, after Dr. Phillips' death in 1991.

IUSD isn't the only institution that has benefited from Dr. Moore's talents as a teacher. He is an adjunct professor at Loma Linda University in California and a former visiting professor and an ongoing consultant at Nihon University in Tokyo, Japan.

The IDA's Outstanding Faculty of the Year Award went to Dr. Joseph Legan, clinical associate professor of endodontics, for his continuous record of quality teaching, scholarly activity, and service.

Dr. Legan joined the IU faculty in 1990 after retiring from the U.S. Air Force. He is a dental graduate of Western (now Case Western) Reserve University, and he received his master's degree in endodontics from the University of Texas Health Science Center at Houston.

Dr. Legan is a diplomate of the American Association of Endodontists and a past president of the Indiana Association of Endodontists.

He manages a heavy academic load at IU, teaching in 19 courses and directing 10 courses in the predoctoral, graduate, dental hygiene, and dental assisting

programs. He also serves as a student adviser and as a member of graduate student research committees.

Dr. Legan's teaching skills have not escaped the notice of IU's dental students —

he's been recognized as the favorite full-time faculty member by the DDS classes of 1999, 2000, and 2001. He also holds two teaching awards sponsored by IUPUI, and he was the 2001 recipient of the IUSD Alumni Association's Distinguished Faculty Award for Teaching.

## Dr. Summerlin Cited for Community Service

Dr. Don-John Summerlin, associate professor of oral pathology, has received the school's second annual Faculty Community Service Award.

A faculty member here since 1988, Dr. Summerlin has an extensive record of community service. He has used his expertise in the field of oral and maxillo-facial pathology to educate and inform the citizens of central Indiana about oral cancer and cancer prevention. As the long-time director of the oral cancer

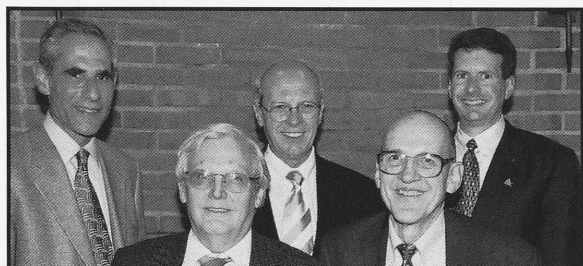

screening clinic at the Little Red Door Cancer Agency, he also plays an invaluable role in cancer detection. The agency is a non-profit organization serving those in need within central Indiana. In 1999, the Mayor of Indianapolis presented Dr. Summerlin, who is a past president of the agency's board of directors, with the Mayor's Volunteer Partnership Award.

Dr. Summerlin's efforts received high praise in a recent letter to the school from Angela Holliday, who oversees all of the agency's screening and detection programs. She said in part:

Dr. Summerlin accepting his award at the 2002 faculty conference

Tom Meador

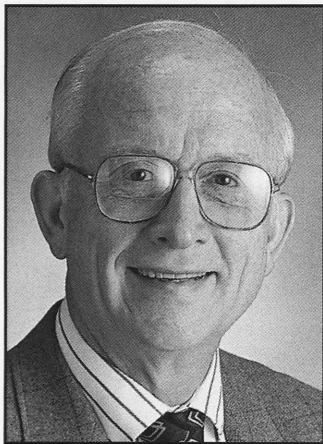

Tom Meador

The award recipients, seated from left: Dr. B. Keith Moore and Dr. Joseph Legan. Posing with them at IUSD's 2002 faculty conference are, from left: Dean Lawrence Goldblatt, IDA President John Schymik (DDS'65) of Evansville, and IDA Executive Director Douglas Bush of Indianapolis.

"To name just a few of the 'extra' things he does to care for his community: Dr. Summerlin has been known to make special arrangements with our clients for further evaluation and care, make house calls, give up his much-valued Saturdays, provide education and instruction, make phone calls to be sure clients follow up with care, and provide additional resources or 'places for people to turn to' when all avenues have been exhausted. Without Dr. Summerlin's devotion to this agency, his community, and the clients he serves, the program would not be the success it is today."

### Periodontist David Vandersall Retires from IUSD

Dr. Vandersall

**D**r. David Vandersall, clinical associate professor of periodontics in the Department of Periodontics and Allied Dental Programs, retired in June 2002, after providing dedicated service to the school for more than two decades.

Throughout a teaching career spanning 35 years, Dr. Vandersall also taught at Temple University, the University of

Kentucky, the University of Illinois, and Washington University, the latter for which he served as chair of the periodontic department. He joined the IU faculty in 1980.

After earning his dental degree from Case Western Reserve University in 1961, he completed periodontic training at the Eastman Dental Center and the University of Rochester. He was certified as a diplomate of the American Board of Periodontology in 1972.

Dr. Vandersall complemented his career in academics with one in private practice. He has conducted periodontic practices in Pennsylvania, Missouri, Ohio, and Indiana.

He developed a solid reputation within the American Academy of Periodontology, serving in many different capacities over the years. In 1994, he was appointed to a six-year stint as a director of the American Board of Periodontology, and from 1999 to 2000 he was also a co-chair of the board.

Dr. Vandersall is a past president of the Indiana Society of Periodontology and the Midwest Society of Periodontology, and a former chair of the periodontic section of the American Dental Education Association.

He is a fellow of the American and International colleges of dentists and a member of Omicron Kappa Upsilon honor dental society.

His many contributions to the dental literature include two 1998 volumes of the *Dental Clinics of North America*, for which he served as guest editor on a series of articles collectively titled "Advances in Periodontics."

## Staff Anniversaries

**T**en IU School of Dentistry staff members were among the IUPUI employees acknowledged at the IUPUI Chancellor's Employee Recognition Convocation in October 2002. Each celebrated an employment milestone in 2002 and has worked for IU for at least 15 years.

In addition to the IUPUI reception, Dean Lawrence Goldblatt and the IUSD Staff Council hosted a brunch for these employees as well as all staff members celebrating a 5- or 10-year anniversary in 2002.

# Raising Awareness

Since my appointment as Major Gifts Officer and Director of Campaigns in August of 2002, I have had the pleasure to individually visit

John Hoffman

numerous graduates of IUSD to gain insight, wisdom, and advice as to how to best perform my role of enhancing development and philanthropy at IUSD. Thank you for your receptiveness and willingness to meet and provide candid comments and advice. The experience has been both refreshing and enjoyable. I look forward to many more such visits in the months ahead.

More importantly, I want you to know that your thoughts and ideas have provided our development efforts the input and insights necessary to shape the future of philanthropy at IUSD.

There is no question that a strong case for support can be made as to why more private giving is necessary in the future to enhance IUSD's ability to provide quality educational opportunities for our students. One needs to look no further than to the rising cost of obtaining a dental education combined with the reduction in annual state allocations to see the challenges that lie ahead. And yet, I believe the future of philanthropy at IUSD is brighter than ever.

It is brighter than ever because of *your* ideas and suggestions that reflect a sincere desire to see IUSD continue to prosper and produce top-notch dental professionals. It is brighter than ever because of *your* strong respect

and admiration for former and current faculty. It is brighter than ever because of *your* appreciation for what an IUSD education has provided for you and your family. It is brighter than ever because of *your* continued generosity and commitment to IUSD.

I learned a long time ago that one needs to ask in order to receive. One also receives at the level of expectation at which he or she asks. In fact, in my role as Major Gifts Officer and Director of Campaigns, I would be remiss in my duties if I did not ask you to generously support IUSD and its mission. But more importantly, what I have deemed, based on my time spent visiting with you, is that alumni and friends view being asked to support IUSD not as an obligation, but rather as a valued privilege. I have observed that asking individuals to support IUSD is not a painstaking process, but instead a pleasant exchange that leads to mutual respect and a desirable strong relationship between IUSD and its graduates and friends. The key lies in the asking. In fact, many of you have reiterated how much you have appreciated being asked to support IUSD, and in response, have generously committed to supporting IUSD at new and increased levels. For this, we sincerely thank you.

In a letter distributed in December, Dean Goldblatt reinforced the need, now more than ever, for continued support to IUSD by alumni and friends. Dean Goldblatt also alluded to the school's desire to implement a higher expectation of giving on the part of alumni and friends in order to allow IUSD to continue to offer a first class dental educa-

tion. Specifically, the letter mentioned the *Dean's Society*, a level achieved when one gives \$1,000 or more to IUSD on an annual basis. I hope you will seriously consider giving a gift in order to become a member of the *Dean's Society*, or to renew your gift if you are already a member. I also would encourage you to consider unique ways you could continue to support the needs of IUSD on a larger scale, such as endowed scholarships, funds to purchase equipment, program support, and planned gifts.

It is my sincere hope that as a development team, we are able to assist you in your desire to give to programs and disciplines that are important and meaningful to you as well as to increase your awareness and involvement in activities at IUSD.

Once again, thank you for your friendship and your generosity and commitment to IUSD. My best to all.

Sincerely,

John Hoffman

1121 W. Michigan St.  
Indianapolis IN 46202-5186

## Maynard Hine's Son Inducted into Society Honoring His Father

**D**r. Maynard K. Hine was an internationally known leader, scholar, and educator in the field of dentistry.

And he was also a beaming father.

In his 1986 biography, Dr. Hine spoke with joy about his three children.

Of his oldest son and namesake, IU's dean emeritus of dentistry boasted of a talent he says the youngster acquired from his mother: spelling. After winning a championship in Indianapolis when he was about 12, Maynard Kiplinger Hine Jr. — Kip for short — placed very high in the national finals in Washington, D.C.

"He has a photographic mind," the elder Hine said with pride.

Kip grew up to be a man who also has a generous spirit.

Those in attendance of the fifth annual Hine Legacy Society banquet, held at the Montage in Indianapolis on Sept. 24, 2002, were pleased to have an opportunity to meet M. Kiplinger Hine, who traveled from his home in Lusby, Md., to be inducted as the 30<sup>th</sup> member of the Society.

Membership in the Hine Legacy Society is bestowed on individuals who invest in the future of the IU School of Dentistry by making planned or deferred gift arrangements.

The Society honors the memory of Dean Emeritus Hine, who led the IU dental school for 23

years before finishing out his administrative career as first chancellor of IUPUI. Dr. Hine died in 1996.

It also strives to uphold the ideals held by Dean Hine and to perpetuate the standards of excellence he insisted upon in educating future dental professionals.

Finally, it salutes the membership for sharing Dr. Hine's vision to keep Indiana University School of Dentistry among the top dental schools in the world.

After graduating from Oberlin College, M. Kiplinger Hine moved to Washington, D.C.

"His interests were applied physics and engineering," Dean Lawrence Goldblatt said while introducing Mr. Hine to the banquet participants. "He worked extensively on military fusing systems and miniature radar systems, and he then moved into program management, eventually becoming chief of the plans office at Harry Diamond Laboratories."

He became involved in technical intelligence work, serving on both U.S. national working groups and NATO groups in the management of a number of classified programs. He was named associate director of the laboratories and served in that capacity for several years.

Before retiring from federal service, he took on a special assignment as director of U.S. Army intelligence materiel activity at Fort Meade, Md.

Today, Mr. Hine is active in the United States Power Squadrons, an organization that teaches safe boating practices. He is also a trustee of the Calvert County, Md., public library system.

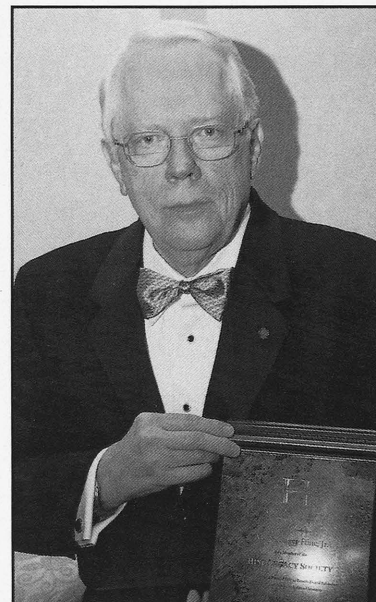

Mr. Hine's wife, Rosalie Hine, died in 2000. She was a mathematician and a scientific computer programmer.

"It is with the greatest of pride and deepest gratitude that I acknowledge Maynard Kiplinger Hine Jr. for his gift," Dean Goldblatt said.

In accepting membership in the Society, Mr.

Hine joins another branch of the Hine family led by his brother, Dr. William Hine Sr., who is dean of the School of Adult and Continuing Education at Eastern Illinois University. William was inducted into the Society in 1999, and has been participating in the banquet with his family since its inception in 1998. He and his wife, Betsy, have two sons: William Jr., who is acting chair of IU's Department of Oral Surgery and Hospital Dentistry; and Charles, who is currently enrolled in IU's endodontic graduate program. Both earned their dental degrees here.

"Dr. Hine was one of the true giants of dentistry, dental education, and Indiana University, and we are honored to look to his memory as the cornerstone and exemplar of this Society," Dean Goldblatt said. "We have been most gratified in this effort by the enthusiastic support of Dr. Hine's family."

*M. Kiplinger Hine Jr.*

## FACTS FROM THE FIELD

**1971 •** Orthodontist and pediatric dentist **David Kennedy** (MSD/Pediatric Dentistry), Vancouver, British Columbia, was elected to a two-year term as president of the Royal College of Dentists of Canada in August 2002. The Royal College is charged with the responsibility of running fellowship examinations, which are used by all Provincial Licensing Authorities for incoming dental specialists. Additionally, the College liaises directly with the Dental Regulatory Authorities, the Canadian Commission on Dental Accreditation, and other interested groups relative to specialty licensure such as the Canadian Dental Faculties Association, the Dental School Deans, and the National Dental Specialty Organizations. Dr. Kennedy is a full-time practitioner in Vancouver.

**1990 •** Colonel **Charles Pemble** (MSD/Oral and Maxillofacial Pathology), Washington, D.C., has been named director of the newly created Field Operations and Force Health Protection for the Armed Forces Institute of Pathology. He will continue to

serve simultaneously as deputy director, Air Force, and commander of the AFIP Air Force element. He formerly chaired the AFIP's Department of Oral and Maxillofacial Pathology.

The new directorate includes the Armed Forces Medical Examiner System. In a profile written by Michele Hammonds for the publication *AFIP Letter*, Colonel Pemble was described as a "seasoned veteran of forensic dentistry." In his new post, he oversees four divisions that contribute to forensic sciences and the "go-to-war mission," as AFIP's primary war-fighting support-capability group. Those divisions are Medicological Death Investigation, the Armed Forces DNA Identification Laboratory, Forensic Toxicology, and the Mortality Surveillance Division, and they are closely associated with four other AFIP directorates.

"They are all codependent and interrelated, and it's one of my jobs and duties to find the components of those other directorates that support and serve the forensic directorate and the medical examiner system," Colonel Pemble reported in the *AFIP Letter* (which was published several months before the war with Iraq began). "Making sure they are ready to respond to

## A JARABAK CONNECTION

In a previous issue of the *Alumni Bulletin*, we introduced Dr. Gene Roberts of IU's Department of Oral Facial Development as the first Joseph R. and Louise Ada Jarabak Professor of Orthodontics.

At that time, it was believed that Joseph Jarabak, a nationally respected teacher, author, and scholar in the orthodontic field, was no relation to John Paul Jarabak, an IUSD graduate from the Class of 1939.

As we recently learned, through correspondence with Joseph's son, Joseph W. Jarabak, MD, of Hinsdale, Ill., the two men were indeed related. They were brothers.

"John and my father were very close throughout their lives," Dr. Jarabak wrote.

We contacted Dr. Jarabak after inadvertently spotting a small class note in a 1942 issue of the *Alumni Bulletin*, which indicated the two Jarabaks were family.

John Paul died in 1977, and Joseph in 1989.

a forensic mission. If and when it occurs again — the so-called 'next 9-11' — the next big terrorist attack — we will be ready."

**2001 • Capt. George Corson** (DDS), Fort Hood, Texas, received a "Special Act Award" during the Fort Hood Commanding General's Quarterly Hood Heroes award program in January 2003 for helping to remove two children trapped after the school bus they were riding in turned over on its side.

According to an article in the *Fort Hood Sentinel*, Capt. Corson came upon the accident shortly after it happened as he was heading to work at the Perkins Dental Clinic, 1st Calvary Division, U.S. Army Dental Corps. He instructed a group of children and two adults who had made it out of the bus on their own to move 100 yards from the accident to wait for help, and he tended to a third adult who suffered a back injury when she was thrown from the bus.

"I wasn't sure if the bus would explode," Capt. Corson told the newspaper's reporter, Sgt. Debora Colligan.

Capt. Corson decided to board the bus, and in doing so he discovered two persons who were still trapped in their seats — a teenager with Down syndrome hanging from chest straps and another child in an electric wheelchair secured to the floor (which was then serving as the side of the vehicle). Capt. Corson struggled to free the children. Eventually a soldier who was also a physician arrived, and together the two men were able to safely remove the children from the accident scene.

We thank another IUSD graduate stationed at Fort Hood, Lt. Col. **Samuel Passo** (DDS'76), for passing along this story.

**2002 •** He's been gone from IU for less than a year, but periodontic graduate Dr. **Robert De Poi** (MSD) has already captured the admiration of the national leadership in his specialty.

At the September 2002 meeting of the American Academy of Periodontology (AAP) in New Orleans, Dr. De Poi received the AAP Foundation's Gerald Kramer Award, which honors the nation's most outstanding third-year graduate student in periodontics. Dr. De Poi and two other finalists were flown to the meeting, where they were interviewed by the academy's awards committee.

A resident of Melbourne, Australia, Dr. De Poi took home the \$10,000 award — and an extremely proud group of periodontic faculty headed back to IU to share the terrific news.

Dr. De Poi earned his MSD degree in May 2002 after defending a thesis titled "In Vitro Oxidative Response of Human Monocytes to Surface Modified Commercially Pure Titanium."

## IN MEMORIUM

### FACULTY

## Glen Sagraves Was Former Assistant Dean, Curriculum Director

**G**len O. Sagraves (DDS'58), Terre Haute, formerly a director of curriculum development and assistant dean for clinical affairs at the IU School of Dentistry, died in California on Sept. 26, 2002, at the age of 75. He retired from IU in 1991, after serving the school with distinction for more than three decades.

A native of Seelyville, Ind., Dr. Sagraves joined the full-time faculty as a teacher of oral diagno-

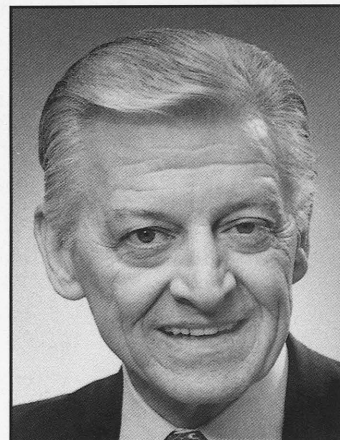

sis and director of clinics in 1960. After a stint on the part-time pediatric dentistry faculty in the mid-1960s, he returned to full-time teaching in oral diagnosis and clinical administration. In 1972, he was appointed director of curriculum development, and in 1984 he was drawn back once again to the clinics, this time as the school's first assistant dean for clinical affairs.

"Glen contributed to the IU dental school in so many different ways," said his good friend and former colleague Dr. Donald Tharp, a longtime IUSD administrator and teacher, now retired.

Dr. Sagraves is fondly remembered by many of his colleagues at the dental school for his extraordinary efforts at scheduling courses for each academic school year — back before most of this arduous task could be done by computer.

Sometimes spreading his notes and visual aids over large conference tables — and more often over the whole floor of his office — Dr. Sagraves would use pieces of cardboard to match up dozens and dozens of dental classes offered by the school each semester with time slots and the very limited number of rooms and lecture halls where those classes could be held. It was the kind of minute-detail job that would send most people over the brink, but Dr. Sagraves loved the challenge. He thoroughly understood the mechanics of the curriculum, and knew how to make the myriad pieces work together. "He *always* got it right," Dr. Tharp said.

Dr. Sagraves continually helped the school coordinate its efforts to keep abreast of changes in the profession by designing a curriculum that would be flexible enough to adapt to those changes. During

Dr. Sagraves

his tenure, the school introduced new concepts in dental education such as the multi-track system, the family practice program, and intramural/extramural requirements.

He also took on the Herculean task of coordinating the American Dental Association's accreditation site visits to IUSD in 1976 and again in 1983.

When the school started up a student counseling and mentoring program in 1988, Dr. Sagraves was asked to be one of the 12 faculty members to assume these responsibilities. As with all other assignments handed to Dr. Sagraves, he didn't take his role lightly.

"I think the Facilitator Program is a tremendous asset to the school," he said in an interview for the *Alumni Bulletin* in 1989. "My role is to see that students assigned to me know where they stand at all times. They are encouraged in every way possible to complete their work within the amount of time they have available.

"...I have 57 pages of notes to students stored in my computer!" Dr. Sagraves continued with a laugh, demonstrating a thoroughness that was a Sagraves hallmark. "I send them my analyses of what I think they need to do. Most of the time they don't even come in to see me, which is frustrating. However, by the next month, I notice a change in their achievement on the printout. So it seems to be working, and I have recently learned that all of my new fourth-year students are now above the class average (*in productivity - ed.*). I feel good about that."

Dr. Sagraves' record of achievement at IU includes numerous contributions to a variety of campus and dental school committees. The DDS Class of 1961 honored him for

his work as director of clinics, and the DDS Class of 1966 presented him with its Teacher of the Year award.

He also logged experience as a private practitioner and a dentist for the Indiana Girls School and the Indiana Women's Prison.

Dr. Sagraves was a fellow of the American and International colleges of dentists and a president of Psi Omega dental fraternity. He also held officer positions in the Indianapolis District Dental Society, Theta Theta Chapter of Omicron Kappa Upsilon honor dental society, and the Indiana component of the American Society of Dentistry for Children.

Dr. Sagraves was a Navy veteran. He was preceded in death by his wife, Sara, and is survived by his mother, Tishie Sagraves.

#### STAFF

### Vivian Haggard Managed Graduate Records

**V**ivian Haggard, Waverly, Ind., died Jan. 16, 2003. She was employed for 12 years as assistant director of records and admissions for the Graduate Dental Program, a position that afforded her an opportunity to work with students from all over the globe. One of those students nicknamed Vivian "Den Mother" — it was a title she loved.

In reporting her 1981 retirement for the *Alumni Bulletin*, Dr. Ralph McDonald, then dean of dentistry, commended Vivian for her expertise in counseling students regarding their academic program and especially for the invaluable assistance she provided to students studying far from home.

Vivian returned to the school only a few months after her departure, first helping out part-time in the dean's office and then, in 1983, accepting an offer from Dr. Timothy O'Leary, chair of periodontics, to serve as his full-time secretary for several more years.

She is survived by her son, Herbert Haggard; daughters, Donna Austin and Patricia Allen; nine grandchildren; and 19 great-grandchildren.

#### ALUMNI

**1929 • Edward Schafer** (DDS), Bloomington, died June 20, 2002.

**1934 • John Rudolph** (DDS), Crestwood, Ky., formerly of South Bend, died Aug. 13, 2002.

**1938 • John Steele** (DDS), Sullivan, died July 11, 2002.

**1941 • George Smith** (DDS), Orange Park, Fla., died Aug. 23, 2002.

**1946 • Eugene Kipple** (DDS), Terre Haute, died Oct. 16, 2002.

**1949 • Daniel Strapon** (DDS), Griffith, died July 28, 2002.

**1953 • Paul Braden** (DDS), Indianapolis, died Sept. 5, 2002.

**1954 • Emery Alling Jr.** (DDS), Rossville, died Jan. 5, 2003.

**1954 • Robert Shirey** (DDS), Greenwood, died Oct. 24, 2002. In addition to conducting a dental practice from 1954 to 1990, Dr. Shirey devoted much of his career to consulting. He was the longtime chief dental consultant for Indiana Blue Cross/Blue Shield private dental insurance programs, and in the early years he was chief dental consultant for Electronic Data System and

the State Department of Public Welfare Dental Medicaid Program. He also taught briefly on the IU dental school's part-time faculty, and served on the Indiana State Board of Dental Examiners from 1963 to 1970.

Dr. Shirey was a fellow of the International College of Dentists and a Sagamore of the Wabash. He served in the Navy during World War II.

He is survived by his wife, A. Jean Shirey; children, Patty Ontiveros, Beth Freeman, and Jim, Steve, and Tom Shirey; and eight grandchildren.

**1957 • Waldo Scales** (DDS), St. Augustine, Fla., died Dec. 30, 2002. Dr. Scales, who also completed an oral surgery internship at IU's Robert Long Hospital, was in practice in St. Augustine for more than 40 years.

Dr. Scales and his wife, Cora, spent most of their weekends traveling around Florida on behalf of the state, riding in a mobile dental office designed to serve patients who are physically and mentally challenged. In 1999, they traveled more than 30,000 miles, seeing as many as 40 patients a day in group homes and facilities.

Those efforts, and his decades of work with charitable organizations such as St. Johns Welfare Federation, earned him the 1999 Humanitarian Award from the Florida Dental Health Foundation, the foundation's highest honor.

Dr. Scales' survivors, in addition to his wife, include children, James, Jane, and William. William is currently in his first year of dental school at IU.

**1958 • Russell Boyd II** (DDS), Miami, Fla., died March 29, 2002.

**1958 • Cardinal Casey** (DDS), Indianapolis, died Jan. 13, 2003.

**1964 • Rodney Springer** (DDS), Coldwater, Mich., died Aug. 28, 2002.

**1981 • Donald Dolezal** (DDS), Charlotte, N.C., died Sept. 1, 2002. A native of Michigan City, Dr. Dolezal moved to Charleston, N.C., to practice after graduating from dental school. At the time of his death he was profiled by Gerry Hostetler of the *Charlotte Observer*. She described a man who was much loved and now greatly missed by his many patients. One patient told the reporter: "I remember Dr. Dolezal's gentleness, kindness, sense of humor, and caring for your mental health as well as your teeth. I talked to him about everything in my life, and each time I saw him, he asked how my children were doing."

According to the *Charlotte Observer*, Dr. Dolezal had a near-legendary reputation for the well-catered Super Bowl parties he held each year. The parties became so successful — and grew so large — that he finally had to invite his guests by lottery. He had two rules for the parties: guests had to bring canned goods for charity, and they had to remove their shoes.

"I understood the food donation, but questioned the shoe rule," one guest told the newspaper. "He gave me a big smile, and responded: 'I like to keep teeth clean, and my wife, Jeannie, likes to keep her carpet clean.'"

Dr. Dolezal's survivors include his wife, Jean Warnke.

## DR. FUSAYAMA STUDIED HERE AS FULBRIGHT SCHOLAR IN '50S

Dr. **Takao Fusayama**, who studied at the IU dental school as a Fulbright Scholar in the 1950s, died in Tokyo, Japan, on Jan. 17, 2003. He was 86.

Together with Dr. George Mumford of the University of Sydney, Australia, Dr. Fusayama spent the 1956-1957 school year studying under and conducting research with Dr. Ralph Phillips in the school's former Department of Dental Materials. At that time, Dr. Fusayama was head of the Department of Operative Dentistry at Tokyo Medical and Dental School.

Dr. Fusayama went on to earn an international reputation — and many honors — during his distinguished career. He won the American Dental Association's prestigious Gold Medal Award for Excellence in Dental Research in 1997. According to the *ADA News*, Dr. Fusayama created a technique to etch dentin with phosphoric acid before applying a dentin adhesive that bonds the composite restorative to the tooth and allows for conserving tooth surface. His discovery, the *ADA News* reports, "changed how dental schools teach bonding procedures and is now a widely practiced technique of modern dentistry."

"He is one of the fathers of adhesive dentistry," Dr. Van Thompson, a former chair of the ADA Council on Scientific Affairs, told the *ADA News*. "He combined the concept of cariology to the restorative process, he was a champion of etched dentin and bonding to a substrate, and his total-etch technique has almost universal acceptance in the United States."

A prolific writer, he was the author of 25 textbooks and more than 300 scientific papers.

Dr. Fusayama held both dental and medical degrees from Tokyo University.

Throughout his life, he remained a faithful and generous friend to IUSD. He was president of the IU Alumni Club of Japan in 1984-85, and he was a lifetime member of the IU Alumni Association.

He was a member of the honorary committee that worked in tandem with a steering committee to set the groundwork and raise funds for an endowed faculty position at IU honoring the memory of Dr. Phillips — the Ralph W. Phillips Scholar in Dental Materials, awarded in 2001 to Dr. Jeffrey Platt, current director of IUSD's Division of Dental Materials. Dr. Fusayama led the Phillips campaign in Japan.

He held honorary membership in the ADA, International Association for Dental Research (IADR), and the FDI World Congress. He was the only dentist to have held honorary membership in the Japan Academy in its 130-year history.

Among the honors he received in addition to the ADA Gold Medal are an award from the Pierre Fauchard Academy, the Wilmer Souder Award from the IADR, and the Hollenback Award from the Academy of Operative Dentistry. In 1983, he was decorated by the Japanese emperor.

Dr. Fusayama's survivors include his wife, Setsuko.

# HELPING HANDS

## 1<sup>st</sup> recipients of 3 new scholarships named in 2002-2003

*Every time another table has to be added to the IU School of Dentistry's annual scholarship luncheon, held in the fall for scholarship sponsors and recipients, we see further evidence of the growing commitment of dental professionals and other friends of the school to extend a much-needed helping hand to students.*

During the 2002-2003 school year scholarship opportunities expanded significantly at IUSD, thanks to the generosity of dental professionals from Indianapolis, Columbus, and southeastern Indiana, who among them have created three new scholarships benefiting IUSD students.

*With help from his daughter, Kathleen Bernard of Indianapolis (right), Dr. James Hall congratulates Jamie Marvel, recipient of the first James and Alice Hall Scholarship in Dental Hygiene.*

James Hall (DDS'56), Indianapolis, and his late wife, Alice Hall (ASDH'64, BS'82), gave a tremendous boost to the scholarship program for dental hygiene students with the establishment of the **James and Alice Hall Scholarship in Dental Hygiene**.

Until the Halls arranged their scholarship, the only ones in existence for IU's dental hygiene students were the school's A. Rebekah Fisk Memorial awards and scholarships given by Theta Chapter of Sigma Phi Alpha national honor dental hygiene society.

"I believe in spreading things around," said Dr. Hall, who first noticed the paucity of dental hygiene scholarships while perusing a scholarship list in the *Alumni Bulletin*.

The Halls decided that their scholarship would also give preference to students juggling an extra challenge the couple could readily identify with: parenthood.

The criteria mirror Alice's circumstances when she was a dental hygiene student. As a busy mother of two with previous training and employment as a nurse, she was older than most of her classmates when she enrolled in the dental hygiene program — a rarity in those days.

Alice practiced dental hygiene in her husband's office for 29 years, retiring with him in 1995. She had previously worked as a nurse for Larue D. Carter Memorial Hospital in Indianapolis and St. Elizabeth Hospital in Lafayette.

Mrs. Hall died April 21, 2002.

The first recipient of the Hall scholarship is second-year dental hygiene student Jamie Marvel of Greenwood.

"I truly appreciate Dr. and Mrs. Hall for recognizing parents who have decided to further their education in the field of dentistry," Ms. Marvel said. "Alice Hall was an exceptional woman, and I am honored to be recognized in her name."

"Scholarships have a *permanency* to them; they go on forever," Dr. Hall added, underscoring an aspect of scholarship creation that donors often find among the most rewarding.

The presentation of the scholarship at the November 2002 luncheon was bittersweet for Dr. Hall, since his wife did not live

to see Jamie Marvel become the first recipient. But he knows Alice would be very pleased that the Hall scholarship is now active, and that many more dental hygiene students will find a helping hand from the Halls in the years to come.

Friends and members of the dental community in Columbus have established the **Dr. Glenn E. Callaway Dental Scholarship**, which will provide valuable assistance to dental students while preserving the memory of a longtime Columbus practitioner.

A 1951 dental graduate of IU, Dr. Callaway died Sept. 24, 1999.

The scholarship was established through the Heritage Fund of Bartholomew County, Inc., the community foundation in Columbus.

"Glenn was on the leading edge in dentistry, and he mentored new dentists who came to town," said Peter Leonard (DDS'63), one of the seven men composing a scholarship committee led by Columbus businessman Marion Dietrich, who Dr. Callaway counted among his closest friends.

"They served on battlefields together in Germany and Italy during World War II," said Dr. Leonard.

Other committee members are IUSD graduates Kent Fischvogt (DDS'76), J.R. Hudson (DDS'65), Richard Newton (DDS'56), John Sawin (DDS'65), and Gene Stevens (DDS'55), all of Columbus.

"We felt that a dental student scholarship is what Glenn would have chosen as a way to be remembered," said Dr. Leonard. "We decided that Glenn would have wanted us to honor him by finding a way to help others."

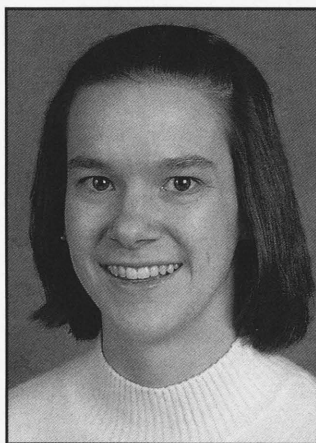

Given in part for academic achievement, the Callaway scholarship is intended for past or current residents of Bartholomew County who have been accepted by or are currently attending the IU School of Dentistry.

Second-year dental student Beth Ann Carter of Columbus said she was excited and thankful to be chosen as the Callaway scholarship's first recipient.

"It isn't just a student who gets a degree," she said. "It's the student's whole family and everyone else in the student's life who was supportive along the way."

She's grateful to have a new group of supporters from her hometown who made the scholarship possible.

"I've always been conscientious about my grades," she said. "Having received this scholarship, I feel adamant about continuing to keep up my grades. Every bit of money helps."

Beth Ann Carter, first recipient of the Dr. Glenn E. Callaway Dental Scholarship

The School of Dentistry is equally delighted by a recent decision of the Southeastern District Dental Society to create a scholarship to benefit the school's dental students.

Concerned about the ever-increasing costs of a dental education, members of the Society have established the **Southeastern Society Dental Education Scholarship**, which will be given annually to a student who is a U.S. citizen and a current or former resident of any of the following Indiana counties: Clark, Dearborn, Decatur, Jefferson, Jennings, Ohio, Ripley, Scott, or Switzerland.

According to Dr. Edmund Laskowski, Greensburg, a member of the Society and a 1961 dental graduate of IU, candidates for Southeastern's scholarship must be enrolled in year two, three, or four of IU's Doctor of Dental Surgery degree program.

"Candidates must also demonstrate academic excellence, maturity, and seriousness of purpose," Dr. Laskowski added.

First recipient, Elizabeth Hagerty of Greensburg, fits that description nicely. Currently in her final year of studies, she is listed in the 2001 edition of *Who's Who Among Students in American Universities and Colleges*.

"I'm honored to be the first recipient of the Southeastern Society Dental Education Scholarship," Ms. Hagerty said. "This is a wonderful financial contribution to allow me to pursue my dental education. This scholarship will be an excellent opportunity for qualified individuals from southeastern Indiana who wish to pursue their academic endeavors at IU."

With a scholarship program that stretches back for decades and that has been of assistance to a countless number of students, the IU School of Dentistry warmly welcomes the addition of the James and Alice Hall Scholarship in Dental Hygiene, which was coordinated through the IU Foundation, and enthusiastically salutes the efforts of the dentists in Columbus and the Southeastern District Dental Society, who have worked within their own communities to establish scholarships on our students' behalf.

The school considers it a privilege to accept the generosity of these newest scholarship supporters, and it remains continually grateful to the donors of longstanding who have built the program into the success it is today.

"In establishing these scholarships, the Halls, the dentists of Columbus, and the Southeastern District Dental Society have made a significant contribution to the solution of one of the most serious and challenging problems of our profession: the looming debt burden of our graduating students," said Dr. Lawrence Goldblatt, dean of the IU School of Dentistry. "This debt burden, perhaps more than any other single factor, is responsible for restricting the freedom of our young graduates to pursue the vision of their professional future they have worked so hard to acquire. All of us in the IUSD family deeply appreciate and applaud the establishment of these scholarships."

Elizabeth Hagerty, first recipient of the Southeastern Society Dental Education Scholarship

# Scholarships Presented at the Annual Luncheon, University Place Hotel, Nov. 5, 2002

## A. Rebekah Fisk Memorial Scholarships for Dental Hygiene Students

Named for IU's first director of dental hygiene, the award was created by the friends of Prof. Fisk. She established IU's program in 1950 and served as director until her retirement in 1970. Prof. Fisk died in 1982.

*Nancy Young, IU associate professor and director of dental hygiene (center), presented scholarships to, from left: Jennifer Hilton, Jaime Swango, Sheri Schroeder, and Stacie Muegge. Amanda Cooper also received a scholarship.*

## Walter Ching Memorial Scholarship

This dental student scholarship perpetuates the memory of Walter Wah Yai Ching (DDS'63), a prominent pediatric dentist in Honolulu, Hawaii. He died in 1996.

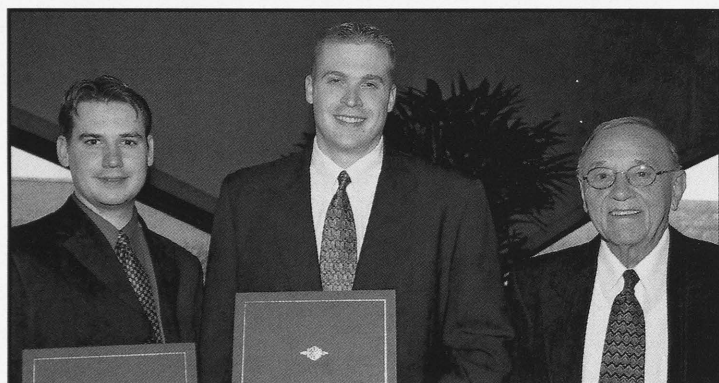

*Recipient Angela Hazlewood*

Established by Dr. Ching's wife, Dr. Gwyneth Yim Ching, and the Chings' four children: Brad (DDS'97), Cherene, Kwan, and Brent (DDS'98).

## James W. Huckelberry Scholarships

In memory of a prominent Indianapolis dentist and leader in the IUSD Alumni Association who graduated from the Indiana Dental College in 1924. Dr. Huckelberry died in 1991. The scholarship, which is for dental students, was established by Dr. Huckelberry's wife, Ama Huckelberry, who died in 2000.

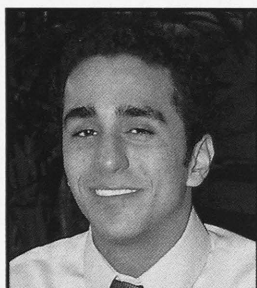

*From left: recipients Jeremy Felt and Casey Noble with presenter, Don Nesler (DDS'60), Indianapolis. Jeremy Sorhus and David Swiderski also received scholarships.*

## Garner Minority Student Scholarship

Established by LaForrest Garner (DDS'57), IU professor emeritus of orthodontics, and his wife, Alfreida Garner, Indianapolis. Dr. Garner served the school as a faculty member and administrator for nearly four decades. He retired from his role as associate dean for minority student services in 1998.

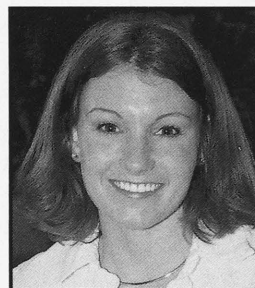

*Dental student recipient Stephanie White (center) with Dr. LaForrest and Alfreida Garner*

*Recipient Afaq Kheiri*

## Elkhart County Dental Society Memorial Award

Created by the dental society for dental students to honor the memory of deceased members.

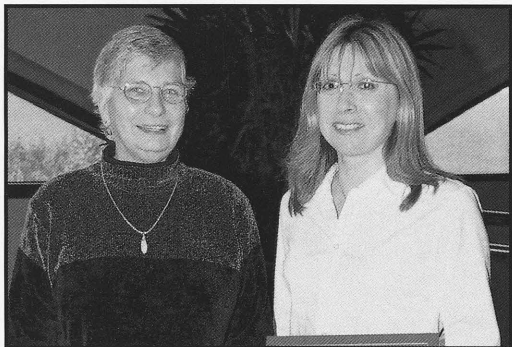

*Recipient Elizabeth Stewart-Alyea*

## Milo V. Smith Memorial Scholarship

Named for an 1896 graduate of the Indiana Dental College and established for dental students by Dr. Smith's estate. He was a practitioner in Winchester. Dr. Smith died in 1943.

### Howard K. and Shizuko Maesaka Award

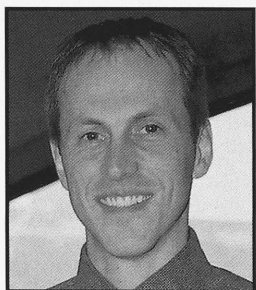

Award honors a 1926 graduate of the IU dental school and his wife. Dr. Maesaka died in 1975 and Mrs. Maesaka resides in Oahu, Hawaii. Established for dental students by the Maesaka family, including IUSD graduates Ray Maesaka (DDS'60), the couple's son and a longtime IUSD faculty member, now deceased; another son, Clifford Maesaka (DDS'61), Venice, Fla.; and grandson Clifford Maesaka Jr. (DDS'86), Louisville, Ky.

*Recipient Svetlana Berman (right) with Marjorie Maesaka, Indianapolis. Mrs. Maesaka presented the award on behalf of the Maesaka family, including her late husband, Dr. Ray Maesaka.*

### Harvey G. Levinson Memorial Scholarship

Named in memory of a 1960 graduate of the IU dental school and dental practitioner in Sherman Oaks, Calif., this dental student scholarship was established

*Recipient Michael French*

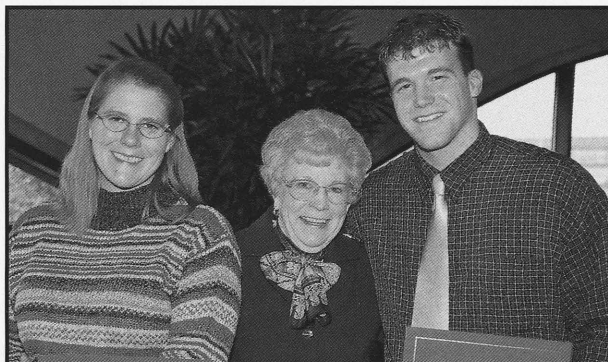

by Dr. Levinson's uncle, Irving Newmark (DDS'45), Woodland Hills, Calif.; and Dr. Levinson's brother, Steven Levinson, Studio City, Calif. Dr. Levinson died in 1986.

### Michael T. Wilson Memorial Scholarship

Scholarship established for dental students by family and friends of Mr. Wilson, who was a resident of Columbia City and a third-year IU dental student at the time of his death in 1983.

### Robert J. Alber Memorial Scholarships

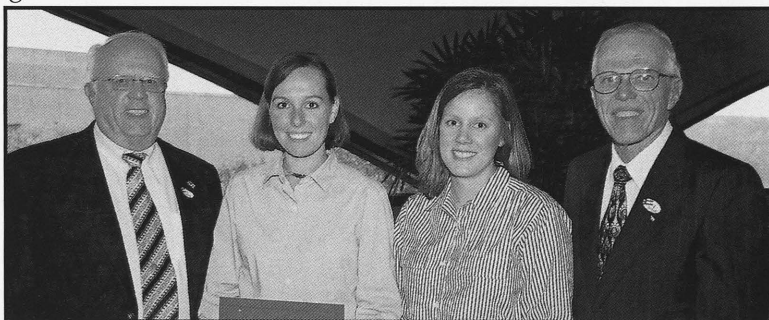

Named for a graduate of the IU School of Dentistry Class of 1947, the Alber scholarship was established for dental students by his wife, Doris (Alber) Ferrari, San Antonio, Texas. Dr. Alber was a dentist in Ligonier. He died in 1970.

*Doris Ferrari (center) presented the scholarships in her late husband's memory to Mary Baker and Mathew Kavanaugh.*

### Guthrie Pullman Carr Academic Achievement Scholarships

Honors the memory of a 1915 graduate of the Indiana Dental College. Dr. Carr practiced in Lafayette, and he died in 1960. This award for dental students was established by his sons, W. Kelley Carr (DDS'55) and Guthrie Carr (DDS'54), West Lafayette. Guthrie Carr (DDS'87), also of West Lafayette, is a grandson.

*Dr. Kelley Carr, left, and his brother, Dr. Guthrie Carr, presented scholarships in their father's memory to Jennifer Fontaine (center left) and Julie Veerman.*

*Recipient Richard Parker and the presenters, from left: Mr. Wilson's sisters, Cathy Hunter, Columbia City, and Kimberly Egolf, Ligonier; and his mother, Carolyn Wilson, Columbia City*

### IUPUI Chancellor's Scholarships for Dental Students

Awarded by the IUPUI administration to underrepresented minority dental students.

*On behalf of the IUPUI administration, the Garners (center) presented the scholarships to, from left: Nassim Olabi, Carl Jackson Jr., Melanie Thibodeaux, and Suzan Harris.*

### Delta Dental Foundation Scholarships for Dental Students

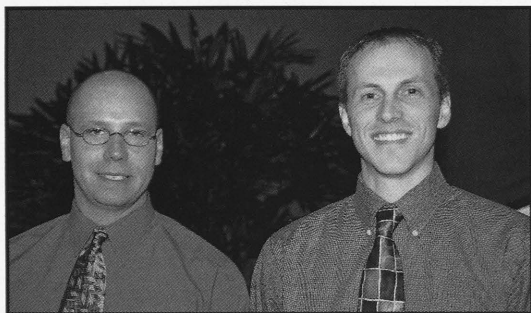

Sponsored by Delta Dental, a group dental benefits provider.

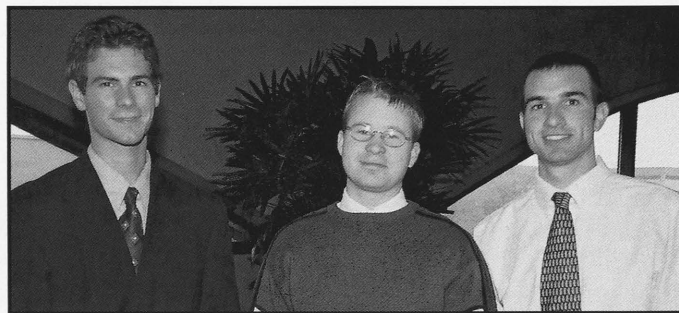

*Recipients from left: Geoffrey Banga, Lisa Waters, Stephen Scott, Terence Ziehmer, Luis Cuellar, Rambod Saeedifard, Jeremy Bruner, and Miredy Benet*

### Omicron Kappa Upsilon Scholarships

Sponsored by the national honor dental society's Theta Theta Chapter.

*Eric Smith (left) and Michael French, along with Alan Gibb (not pictured), tied for the OKU scholarship given for maintaining the highest grade point average during the first three years of dental school.*

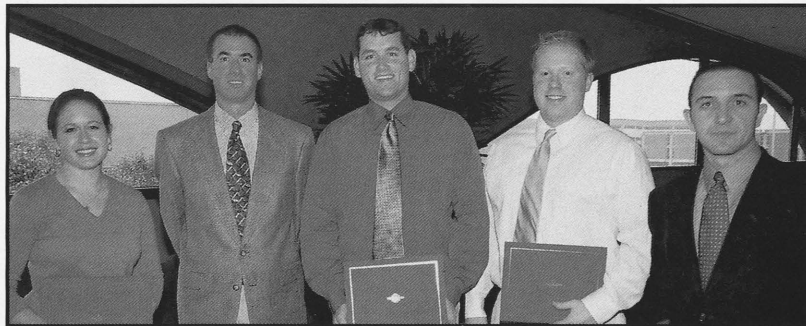

*Four second-year dental students tied for the scholarship given for maintaining the highest grade point average during the first year of the dental program: Aric Murphy (left), Trenton Thalman, and Gavin Rothrock, along with Jessica Bolander (not pictured).*

*Photos by Tom Meador*

### Indiana University School of Dentistry Alumni Association Scholarships

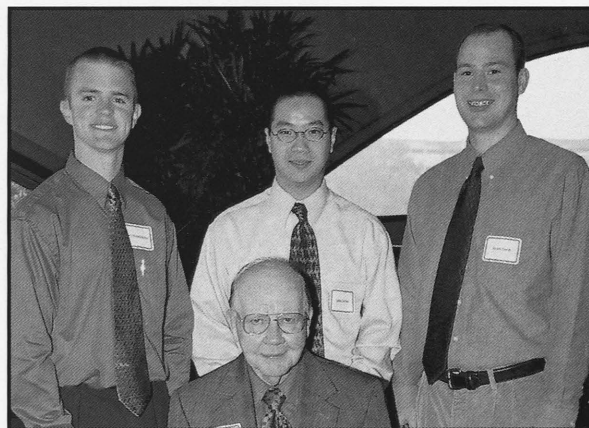

Established for dental students by the IUSD Alumni Association's board of directors on behalf of the alumni at large.

*James Humphrey (DDS'88), Terre Haute, president of the IUSD Alumni Association (second from left), presented scholarships to, from left: Sarah Laux, Joel Crane, Ben Reese, and Armen Karimyan. Alan Gibb also received a scholarship.*

### Johnson Public Health Scholarships

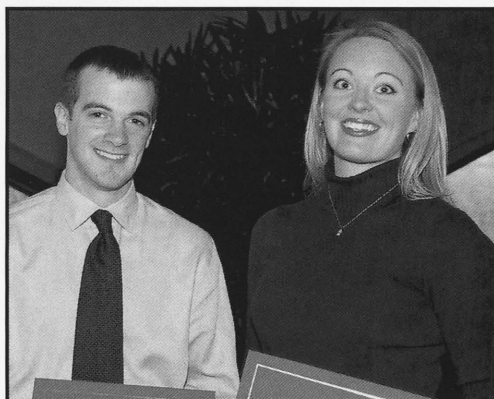

Created for dental students by Donald Johnson (DDS'56), Carmel, in memory of his parents, Frank R. and Jessie B. Johnson. Dr. Johnson is a retired public health dentist.

*Recipients Kyle Amspaugh (standing left), Doug Huynh, and Sean Cook with presenter, Dr. Donald Johnson*

### George A. Welch Memorial Scholarship

In memory of a member of the IUSD Class of 1951, a Rockville dentist, and a recipient of the school's Distinguished Alumnus award. Dr. Welch died in 1992. Established for dental students by Dr. Welch's family and friends, including his wife, Frances Welch, Rockville, and the couple's children: Dr. David Welch, Edmond, Okla.; Christine Lindsey (ASDH'75), Washburn, Wis.; and Nancy Witty and Mary Ruth Staadt (DDS'85), Rockville.

*Recipients Lathe Miller and Emily Giltner*

## Other Scholarships Recently Presented to IUSD Students

### Sigma Phi Alpha Scholarships

Established by Theta Chapter of the national honor dental hygiene society. Recipients are dental hygiene students:

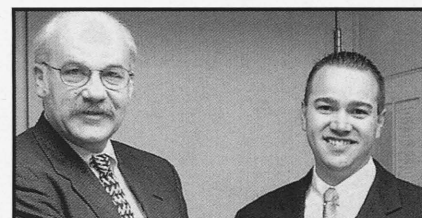

*Summer 2002*  
Abby Selby

*Winter 2003*  
Abby Selby  
Sarah Metzger  
Angela Weiskittel

### Isaac Knapp Dental Education Foundation Scholarships

Established by the Isaac Knapp District Dental Society, the scholarships' 2002-2003 recipients are dental students Eric Smith and Geoffrey Glogas.

### Pierre Fauchard Academy Dental Student Scholarship Award

*On behalf of the academy, David Matthews (DDS'79), Fort Wayne (left), presented the award to David Swiderski.*

# IN THE AUTUMN, FALL BACK IN TIME

Your Alma Mater Beckons You to the 61<sup>st</sup> Fall Dental Alumni Conference

Sept. 18-20, 2003

For the first time in a dozen years, the IU School of Dentistry's annual reunion celebration for its graduates will take place in Indianapolis instead of Bloomington. The hub of activity for the 2003 conference — the Hyatt Regency in downtown Indy — is a quick jog from the dental school, where everyone's waiting to welcome you back.

The IUPUI Office of Alumni Relations and the IUSD Alumni Association are creating a special three-day event with all the trimmings, Indy-style. They've even reserved rooms at the Hyatt for all the individual class reunion parties on Saturday night.

If it's been a few years since you've been back to the city, to the campus, and to the school, you'll marvel at all the changes — and at the seemingly unending list of new places to visit and sites to see.

For example, step onto the Whiteriver Promenade (with an entrance conveniently located behind the dental school) and stroll down to the Canal Walk, where you will discover NCAA Headquarters, the Indiana State Museum and Indiana Historical Society, war memorials for the USS Indianapolis and our nation's Medal of Honor recipients, and much, much more.

Conference registration packets will be heading your way in June, but rooms at the Hyatt will be limited so it's not too early to reserve yours today. You can book a room online (<http://indianapolis.hyatt.com/groupbooking/IU>) or by calling (800) 233-1234 — be sure to identify yourself as a participant of the IU School of Dentistry's Fall Dental Conference.

See you in September!
