

INDIANA UNIVERSITY-PURDUE UNIVERSITY AT INDIANAPOLIS
SCHOOL OF DENTISTRY

NEWSLETTER

MARCH-APRIL 1971

DAVID P. WALTERS (JUNIOR DENTAL STUDENT) has been named President of the Student Union Board.

Jeanne L. McDonald (Sophomore Dental Student) is the representative for the freshman and sophomore classes.

PRESIDENT JOHN W. RYAN has named Dr. Paul E. Starkey as a member of the All-University Committee to advise the President's Office on general matters related to the education of teachers.

FACULTY AND ASSISTING STAFF are reminded that registration for the fall term will be held on August 23-24, with clinics beginning on August 25. Faculty and assisting staff should consult their chairmen concerning arranging their vacation at another time in the academic year than August.

WE WERE SADDENED TO LEARN about the death on March 19th of Dr. Carl W. Beck, Professor of Mineralogy, who was closely associated with the research program in Preventive Dentistry. The family has requested that no flowers be sent but rather that any donations be sent to the American Urological Association Scholarship Research Fund, checks to be submitted through Dr. John B. Patton, Chairman of the Department of Geology, Bloomington Campus.

Memorial Service: Sunday, March 28th, in the Solarium of the Union Building at 2:00 p.m.

THE ANNUAL SENIORITY RECOGNITION CEREMONY held March 22, 1971 in the Union Building honored the following School of Dentistry staff members for their service to the School and the University. Those who received pins for their respective years of service are:

Twenty Years

Calvin C. Linton
Nellie M. Ward
Roweena L. Wooten

Ten Years

Donald O. Booth
Martha Lee Fisher
Kenneth K. Nelson
John H. Owens
Isabell V. Poor
Jean M. Richmond
G. Delores Riczo
Lorenza H. Stewart

Five Years

Kathryn E. Bruce
Carl H. Butler
Juanita H. Chisler
Isabelle C. Ezzell
Ruth E. Flint
Sherry A. Howard
Lorraine Smith

MRS. BERNIE PERRY, PRESIDENT OF DENTAL DAMES, reports as follows on the recent basketball game between the Dental School faculty and the seniors.

The senior-faculty basketball game was a resounding success. Mike Baumgartner, coach of the seniors, led his charges to a 33-31 victory over the graying pros. Up and down the floor, the youthful spirit of the seniors proved to be just too much, even in the face of the fantastic coaching of Dr. Fred Hohlt.

The serious side of the encounter was realized when \$330.00 was collected to provide dental care at the Dental School and Riley Hospital for children who otherwise could not afford it.

RICHARD B. FISCHER, A SOPHOMORE, recently represented the student body at the American Dental Association's Student Conference on Dental Research in Chicago. The purpose of the annual meeting is to familiarize students with the opportunities and requirements in dental research.

Here are some of his observations from the meeting.....

"Research is going on in every area related to dentistry: clinical specialties, basic science related to dentistry, dentistry and social sciences, dentistry and the educational processes, etc.

"Scholarships, grants, fellowships, and traineeships are available from government and private agencies. Also advanced training is available in universities, military service, and public health service. In universities alone there are 170 full-time faculty positions unfilled now with at least four new dental schools opening in the next 18 months. Statistics show that one out of every ten physicians is a Ph.D., whereas there is a great need in dentistry in this area (one out of every 53 dentists is a Ph.D.)

"Research facilities are located in universities, private industries, the ADA, regional dental research institutes, federal institutes, etc. Scientists participating in dental research (part-time or full-time) may be basic scientists, faculty, students, practitioners, or others, but almost all have advanced degrees.

"Probably the greatest reason for going into academic dentistry is the feeling of "staleness" of the highly trained mind and the educationally sterile environment of the practitioner a few years after graduation. Many feel this and then realize that it is too late to go back."

Mr. Fischer invites anyone with a possible interest in academic dentistry to talk to him as he has more information and some pamphlets on the subject.

FROM THE LIBRARIAN'S DESK:

The following new audio-visual materials are now available for use any time when the Library is open, or the cassettes may be borrowed for use in your auto or home tape recorder.

1. Film cartridges for the Fairchild Mark IV projector.
(All running times are less than 15 minutes)
Requests for individual cartridges must include catalogue number, if any.

8D-18-FP Pinlays using the Loma Linda Parallelometer
by Loma Linda School of Dentistry.

8D-19-CP Preliminary impressions for complete dentures,
alginate method by Edmund A. Travaglini,
D.D.S.

8D-41-FP Pontic preparation, labial contour gingival
adaptation by Samuel Guyer, D.D.S.

8D-42-FP Preparation of pontics for pin reception
and lingual contour by Samuel Guyer, D.D.S.

8D-43-FP Assembly of bridge and delivery to patient.

8D-55 Surgical reduction of the maxillary tuberosity
by Louis Loscalzo, D.D.S.

8D-56 Extraction of maxillary teeth - surgical
preparation.

8D-57 Extraction of mandibular teeth - surgical
preparation.

8D-58-FP Preparation of the dye and waxing procedures.

8D-98 Bleaching the endodontically treated discolored
tooth, by Duane Compton, D.D.S.

8D-106 Endodontic therapy -- asymptomatic periapical
pathosis non-surgical approach, by Harry J.
Healey, D.D.S.

Instrument exchange in four-handed dentistry.

2. Tape cassettes for use in our tape recorder or yours.
