### Mental health support available for students, residents, fellows

Promoting good mental health among learners is an important priority for IU School of Medicine. The school offers a variety of mental health services, free of charge, to students, residents and fellows. This support is crucial, as physicians have higher rates of burnout, depressive symptoms and suicide risk than the general population. Other facts:

An estimated 300-400 physicians die by suicide each year in the U.S.

The suicide rate among male physicians is 1.41 times higher than the general male population.

The suicide rate among female physicians is 2.27 times higher than the general female population.

In recognition of Suicide Prevention Week, learn more about IU School of Medicine's [mental health services](#).

## Flu shots now available; deadline is Nov. 9

Faculty, staff, house staff and students are encouraged to get their free flu vaccination for the 2017-18 flu season now to avoid longer lines leading up to the Thursday, Nov. 9, deadline. Flu shots are now available at IUPUI Campus Health (Coleman Hall, Suite 100; no appointment required) or during the following flu vaccination outreach clinics:

- Tuesday, Oct. 3, 8 am-1 pm:** Medical Sciences Atrium (south end)
- Wednesday, Oct. 4, 9-10:30 am:** Emerson Hall, Room 122
- Wednesday, Oct. 11, 8:30-9 am:** Glick Eye Center, Main Conference Room
- Wednesday, Oct. 18, 1-3 pm:** Neurosciences Center, Room 1353A
- Wednesday, Nov. 1, noon-3 pm:** HITS Lobby

Students (only) also may obtain a flu shot at Campus Center Student Health. As a reminder, all IU School of Medicine faculty, staff, house staff and students who provide clinical care to IU Health or Eskenazi Health patients, perform clinical research at IU Health or Eskenazi Hospital or whose primary office is in an IU Health or Eskenazi hospital are required to receive a flu vaccination this flu season.

Individuals requesting a waiver due to an evidence-based medical contraindication must submit a flu vaccine [medical exemption](#) by Tuesday, Oct. 31. House staff and students who receive flu vaccination from IU Health, a personal physician or other location must submit their flu shot consent form to IUPUI Campus Health at [healthsv@iupui.edu](mailto:healthsv@iupui.edu).

## IU School of Medicine researchers identify promising treatment for people suffering from post-TBI aggression

A drug originally developed in the 1960s as an antiviral medication is showing promise as a treatment option for people who suffer from increased feelings of aggression following traumatic brain injury (TBI), IU School of Medicine researchers have reported.

Aggression and anger are among the most common emotional and behavioral symptoms experienced by traumatic brain injury patients--often resulting in poorer rehabilitation outcomes and negatively affecting patients' relationships with family and friends and their ability to live at home and maintain steady employment.

The team of researchers, led by Flora Hammond, MD, chair of the IU School of Medicine **Department of Physical Medicine and Rehabilitation**, and Covalt Professor of Physical Medicine & Rehabilitation, found that in multiple studies of patients with chronic traumatic brain injury and moderate-severe aggression, taking 100 milligrams of the drug Amantadine twice daily appeared to be beneficial in decreasing aggression, from the perspective of the patients.

Their findings were published in the newest issue of the [Journal of Head Trauma Rehabilitation](#), for which IU School of Medicine Associate Professor Dawn M. Neumann, PhD, served as topical issue editor focusing on treatment for emotional issues after traumatic brain injury.

For more on this new treatment option, read the full news release in the [IU School of Medicine Newsroom](#).

## Many ICU survivors depressed: Study finds young people and African Americans at highest risk

Intensive care unit (ICU) survivors, growing in number as clinicians and medical technology save more lives, are psychologically as well as medically fragile. The first study to examine antidepressant use and depressive symptoms after an ICU stay has found that even if prescribed antidepressants, a significant percentage--about a third--had symptoms of depression at the time of their initial visit to a clinic specially designed for ICU survivors. Young ICU survivors and African American ICU survivors were at the highest risk for depression.

The new study of [depression risk profiles of ICU survivors](#), conducted by Indiana University Center for Aging Research and IU Center for Health Innovation and Implementation Science clinician-researchers, is published in the *Journal of Hospital Medicine*.

"Now that we have determined that in addition to being young, being African American imparts higher risk of depression for ICU survivors, the next step will be to determine the underlying reasons for this elevated risk," said study first author [Sophia Wang, MD](#), a Center for Health Innovation and Implementation Science researcher and IU School of Medicine assistant professor of clinical psychiatry. "Why are younger ICU survivors more vulnerable to depression? What genetic and environmental factors are causing a lower likelihood of response to antidepressants in African Americans? Once we know the answers to these questions, we can begin to counter the problems and more effectively treat the depression in these ICU survivors."

For more, visit the [IU School of Medicine Newsroom](#).

## Faculty and Staff News

### Dual career consultation services can help with faculty recruitment

Dual career consultation services are available to assist partners of IU School of

Medicine faculty candidates who have received tentative job offers. One-on-one consultation is provided and can begin when candidates are interviewing with IU School of Medicine.

Other services include:

Informational interviews with prospective employers

Networking with potential employers and references to promote due consideration

Career counseling

Resume/CV and cover letter review and consultation

Access to job openings at IU School of Medicine

Mock interviews and strategies for salary negotiations

A number of department chairs have found these dual career services to be of great value in recruiting qualified faculty to IU School of Medicine. Relocation assistance, including realtor referrals and information on costs, livability, schools and neighborhoods, is also available. For more details, contact Sacha Sharp, interim dual career consultant, at [sachshar@iu.edu](mailto:sachshar@iu.edu).

## Lu named Vera Bradley Foundation Chair in Breast Cancer Innovation

**Xiongbin Lu, PhD**, has been named the first holder of the Vera Bradley Foundation Chair in Breast Cancer Innovation. In addition to his title as Vera Bradley Foundation Professor of Breast Cancer Innovation, Dr. Lu retains his current title of professor of medical and molecular genetics, received when he was appointed to the faculty in June.

The Vera Bradley Foundation Chair in Breast Cancer Innovation was established in 2015 by the Vera Bradley Foundation for Breast Cancer, Inc. The Foundation, located in Fort Wayne, Indiana, was created by Barbara Baekgaard and Patricia Miller, owners of handbag/luggage manufacturer Vera Bradley Designs, to endow a breast cancer researcher.

## Neal receives ACP Laureate Award

J. Matthew Neal, MD, assistant dean for educational affairs and faculty development, and professor of clinical medicine, [IU School of Medicine-Muncie](#), has been named the 2017 recipient of the American College of Physicians (ACP) Indiana Chapter Laureate Award. The Laureate Award is the most prestigious award bestowed at the state level and is presented to long-standing fellows and masters of the American College of Physicians who have rendered distinguished service to their chapters and community and have upheld the high ideals and professional standards of ACP.

Dr. Neal will receive the award at the Indiana Scientific Meeting in Indianapolis on Nov. 3. The ACP is the largest medical specialty organization and the second-largest physician group in the United States, and represents internal medicine and its subspecialties.

### Apply for career mentoring assistant dean position by Sept. 28

Applications are now being accepted for the position of assistant dean of career

mentoring and professional development in the IU School of Medicine Office of Medical Student Education. The assistant dean will focus on assisting students with choosing a career path that aligns with their skills and interests, and ultimately matching into a residency position to meet their goals. Cultivating relationships statewide and nationally through networking with center directors, residency directors, teaching faculty and students, the assistant dean will focus on developing processes and programs to enhance the opportunities and standardize the approaches to career mentoring across all campuses and all specialties. This person will also help provide a professional development blueprint to contribute toward the leadership, service and career development portfolio of each student.

The person selected for this position must be an enthusiastic, organized and student-focused leader. The assistant dean should have previously demonstrated excellence in medical education, with leadership experience in MSE and/or GME settings preferable. Attributes would include the ability to implement effective statewide programs, lead change and work with multiple stakeholders. This position will be part time and require a 0.4 FTE commitment.

Interested applicants should send a letter of interest and CV to Bradley Allen, MD, PhD, senior associate dean for medical school education. Application deadline is Thursday, Sept. 28.

[BACK TO TOP ▲](#)

---

## Deadline to apply for Transitions II positions is Sept. 22

Applicants are being sought for nine key positions in Medical Student Education (MSE) that are dedicated to establishing high-quality clinical and scientific education at IU School of Medicine.

The positions, one statewide course director and eight course site leaders, will collaborate in assisting students in the two-week Transitions II Course which will advance students' knowledge and clinical skills, but will also emphasize the professionalism, communication and systems-based practice that is needed to provide comprehensive patient care. This introduction will serve to build upon the previous foundational knowledge allowing students to effectively integrate as a member of the healthcare team as they begin their mandatory clerkship rotations.

### **Statewide Course Director for Transitions II**

Working with campus directors and department chairs, the statewide course director is responsible for final determination of all IU School of Medicine student learning activities. By implementing competency assessments of students, assisting in LCME accreditation document preparation and recruiting faculty that are dedicated to the education of medical students, the statewide course director will provide leadership to course site leaders and students.

### **Course Site Leader**

These eight new roles provide administrative and educational leadership of campus

delivery of a statewide course, provide assistance for students with academic difficulty in need for remediation and serve on the course management team.

Interested applicants should send a letter of interest and CV to [Dr. Jennifer Schwartz](#), assistant dean for Medical Student Education, Phase 2. Application deadline is Friday, Sept. 22.

## Research Support Funds Grant program deadline is Oct. 1

All full-time, tenure-track faculty having appointments of assistant professor and above are eligible to apply for Research Support Funds Grants (RSFG). The RSFG program enhances the research mission of IUPUI by providing seed funding for research projects and scholarly activities that are sustainable through external funding.

Note that the deadline to apply for the RSFG program this fall has changed to Oct. 1. For eligibility, proposal requirements and application details, visit [research.iupui.edu](http://research.iupui.edu).

## NAS Sackler colloquia is Nov. 16-17

The National Academy of Sciences is hosting the Arthur M. Sackler Colloquia on Nov. 16-17, in Washington, DC. The third Sackler colloquia, The Science of Science Communication III: Inspiring Novel Collaborations and Building Capacity, will focus on the consensus study as a framework for advancing both research and practice in science communication. It will explore ways to build capacity for and foster the use of evidence-based strategies for engaging the public with science and its appropriate use.

For full event details, including information about a webcast, visit [cvent.com](http://cvent.com).
