IUPUI HOME OF NATION'S BIGGEST MUSIC LAB

If you remember the thrill of "8-track" recording, you will be amazed at the 256-track recording capacity of IUPUI's new computer music lab facility. The campus community has the opportunity to hear the original music produced via keyboard and computer during unveiling ceremonies Mar. 21 at 7:30 p.m. in LE 101. After the ceremonies everyone is welcome to see the lab in the Mary Cable Building. During the grand opening ceremony, you will hear a demonstration of

musical compositions that were produced by IUPUI students who "invented" music on one of the 21 workstations that are equipped with an IBM PS/2 Model 30 computer and a 61-note Roland U-20 keyboard synthesizer. It is a joint venture between music and Computing services on campus. "Our goal in creating this lab was to enable students to learn everything from basic keyboard playing skills and ear training to harmony, composing, arranging, music printing, acoustics and the latest music instrument digital interface (MIDI) technology that's currently revolutionizing the music performing and recording fields," said Darrell L. Bailey, director of the School of Music at IUPUI who designed the lab. He is pictured here, far left, with Doug Smith, director of instrumental music, center, and IUPUI student, Homer Gaines. One of the software packages used by students and instructors is Cakewalk 4.0, a sequencer program that lets students layer music together, which until now was only possible in a traditional recording studio. "They can create original music compositions on the spot or combine existing music with an instrument combination," said Smith. "Student interest in the lab already is extraordinary. They are completely absorbed; they don't want to take breaks or even leave when class ends," said Bailey. He also notes that the state-of-the-art lab at IUPUI is the largest and most technologically advanced in the nation and gives students the best possible career tools. --L. McCullough (IUPUI Photo)

ANNUAL IUPUI RETIREMENT PROGRAM CAN HELP EASE YOU INTO THE FUTURE A free one-day financial planning event for IUPUI employees and their spouses is Mar. 21 at the University Place Conference Center. Human Resources Administration has planned information sessions for PERF and TIAA-CREF employees, as well as disability, the 18/20 retirement plan and social security. Several organizations will answer your questions, and give prizes and handouts in the resource center open from 8:30 a.m. -3 p.m. For details of the day's events call 4-8931.

LEARNING TECHNOLOGIES PRESENTS VIDEO COMPRESSION AND MORE

Video compression, a development that compresses ordinary TV signals so that more programs can be placed onto a network, is the subject of a free teleconference Mar. 22 from 1-2 p.m. in IE 105. Examples of video compression, its application in higher education, and new developments from manufacturers will be presented by Richard Stowe and John Oetting of Ball State.

The Office of Learning Technologies also is sponsoring an Apple Education TV presentation, "Math and Data Analysis," Mar. 21, 4-5 p.m. in ES 2127. For more on these presentations, call Joetta Smith Burrows, 4-4532.

NEWS 'N' NOTES FROM HERE 'N' THERE

Royalties--There are 6,500 princes in Saudi Arabia. Last year 43 percent of the oil the U.S. bought from there was used by the Pentagon. (Harper's Index, Mar.)

Saving Women's History--March is Women's History Month, and to make sure that history is not lost, there is a women's history meeting Mar. 23, 1:30 p.m., in the Indiana State Library and Historical Building auditorium.
