RE: Quantitative Epidemiology Designation

I am writing to request that the IU Fairbanks School of Public Health be allowed to activate the designation of "Quantitative Epidemiology", which we've issued in previous years. This designation was used for our MPH students with a concentration in epidemiology who fulfilled their elective credits with graduate-level biostatistics courses.

When we transitioned from a department to a school in 2012, this designation became inactive, and we'd like to activate it again because we have several students who are interested in pursuing it. Kim Lewis in the IUPUI Registrar's Office indicated that we will need GAC approval to reactivate this designation. She indicated that the academic plan is EPIDMMPH1 and the academic sub-plan is EPQUACON1. Would you please add this to the next GAC agenda as an item for discussion/approval?

Thank you.
