The Thelander award deadline nears

Entries are now being accepted for consideration for the history department's Thelander Memorial Award to be announced at the Honors Day convocation in late April. The deadline for submitting entries is Wednesday, March 31, 1982.

The $200.00 award is in memory of Professor Theodore Thelander, Jr., who taught history in Indianapolis for Purdue and IUPUI from 1947 to 1971.

The contest is open to all students in any undergraduate program or major. The essay's subject, however, must be of historical interest and should display qualities of good historical analysis and narrative.

According to Donald L. Kinser, chairman of the Thelander Memorial Prize Committee, committees in previous years have not received many entries from students in schools other than Liberal Arts or Science and encourages students majoring in business, technology and others to consider entering their work. Last year's winner was Mrs. Jan Rubin writing on "Ultranasalism in Japan."

Essays may be written especially for the contest but they may also be papers written in response to class assignments but which have since benefited from instructor comments before submission to this contest. If any student has questions as to a topic's suitability Kinser says that student should talk to a faculty member in the history department for counsel.

A set of written instructions as to judging criteria and proper form to be used has been prepared. Copies are available in the history office on the fifth floor of Cavanaugh Hall.

Education and Social Work move to new ES Building

by Paula L. Reynolds

"Spectacular!" Dr. Hugh Wolf, associate dean of the School of Education exclaimed as he packed his things into a box.

Spectacular is how he describes the new Education and Social Work Building (ES) that the department will begin moving into this week.

The building, which for all practical purposes is complete, already houses the School of Social Work and some education courses.

"The contractors must make a final inspection although all major items necessary for usage are complete," explained Willard Henshaw, assistant to the director of administrative affairs. "There is a small amount of finishing work such as trim here and there, that must be concluded." He added that the only way to avoid loose ends is to wait and that would take a very long time.

The School of Education's move to the main campus is significant in two ways. Not only will it be the first time in the school's history that it will be a part of the central campus, but the move will also decrease the number of off-campus sites.

"Obviously the move will bring faculty, staff and students into the main stream of buildings and campus life," said Dr. Wolf.

"After the School of Physical Education moves to the Natatorium facilities and the School of Education is established in the ES building, the campus will be located three sites in the city as opposed to five," Henshaw commented. "We are really thankful for the new unity.

"Unity is an important aspect of the recent construction on campus. With the completion of the Natatorium it will be possible to walk from the parking garage on the north side of Michigan to the Natatorium on the south side of New York Street.

The design of the new buildings is ultra-modern and efficient. The building features many unique and innovative concepts which will aid and enhance the capabilities of the teaching facilities of the School of Education.

There are four special purpose laboratories that are especially equipped for teaching how a subject is taught.

The math education lab includes a row of electrical outlets for mini-computers or calculators. In the science education lab there will be moveable lab tables.

The music education lab is equipped with specially constructed acoustics and blackboards. A new and exciting addition to the school is a special education lab. The lab is flanked by small adjoining rooms for private conferences and a children's restroom on one side and a classroom separated by a large two-way mirror. "This will enable our students to observe handicapped students while they learn and play," Dr. Wolf commented.

In addition to the special purpose laboratories there will be a Curriculum Resource Center.

"The resource center is five times as large as our previous library in the Marott building," Dr. Wolf continued. "The resource center will be different from the main library. It will include sample textbooks, kits, educational games and other literature and resources unique to education.

Nine micro computers have been purchased to equip a lab within the resource center and a Plato terminal will also be available.

Because the art of lecturing is essential for prospective teachers, the ES Building has several micro teaching labs. Micro teaching labs enable students to individually practice lecturing while instructors critique the students' lecture style. All sessions can be video taped. There is a small television.

Further information is available by calling 264-2907 or in the Student Assembly office, CA 001C.
Food Service adds Cavanaugh Hall

by Roger Rudolf

In an effort to meet the needs of the student population on the Michigan Street campus, the Student Union Building Food Service has expanded its food service operations.

Along with its other satellite operations at the Dental School and in the basement of the Business/SPEA Building, the Student Union Building Food Service opened a new snack bar in the basement of Cavanaugh Hall. The snack bar features homemade soup or chili, sandwiches, fresh spinach or lettuce salads, fried chicken and cookies.

There will also be a new food bar opening next week in the Hide-Away under the University Library called “For the Health of It.” Serving only natural foods, the big item at this snack bar will be the Stuffed Potato. This treat is a whole baked potato filled with chicken a la king or another specialty.

Other items at this bar include granola bars, dried fruit and vegetables, and natural fruit juices.

The Hide-Away will also receive a major facelift this year. Smaller tables will be brought in to increase the seating capacity in the cafeteria.

“The original tables were oversized,” explained Paul Davis, director of Student Union Building Food Service. “The new tables will still allow a roomy 10 to 12 square feet per person.”

Besides the new tables, the cafeteria will reclaim the west side of the Hide-Away. To be completed by April, this space will allow for an additional 100 people. The total seating capacity will increase from 325 to 500.

“These changes are being made so that we can better meet the needs of the growing student population here on campus,” said Davis. “With the newly constructed classrooms and the Physical Education department moving in this fall, there is an increased demand, especially during the peak periods.”

Well, that’s the ‘hole’ idea

As was stated in the Sagamore, Jan. 13 issue within the article, “What is that hole?” The Sagamore will publish any ‘suggestions’ in the Jan. 27 issue. So, if this paper holds to its word, then here is a publishable ‘suggestion’. Please read all directions, then proceed step by step.

First Step: Install a one-piece glass on the exterior of the hole (that is, the outermost part facing north).

Second Step: a) Install an inner glass with a two inch hole that has been previously cut into the glass (Note: this hole was cut 3" from the circumference). b) Be sure, when installing the glass, that the two-inch hole is centered at the uppermost point.

Third Step: Seal the glass all the way around both circumferences (that is, the outermost part facing north) and wait for a waiting period of one to two-inch diameter. Then locate the nearest water supply. Connect the correct end to it. Then drop the other end down the two-inch hole very carefully, making sure not to scratch the glass.

Fourth Step: Find a large garden hose, say one-to-two-inch in diameter, then locate the nearest water supply. Turn on the supply full force. Connect the correct end to it. Then return to the supply end, careful, watch those steps on the ladder and turn on the supply full force.

Fifth Step: There are now a couple of hours to kill and what better way to spend it than visiting a pet shop. While at the pet shop buy two guppies (one of each sex) and an ample supply of food.

Sixth Step: Return to construction site and turn off proper water level. Turn off supply when water is pouring from the two-inch hole.

Seventh Step: Place the two guppies into the reservoir through the 2" hole. Add a little food and seal with a cork.

Eighth Step: After about a week, open the cork, then place some more food inside. This waiting period is bound to cause a little curiosity and a few controversies within the city. (Discontinue step number eight at this time.)

Ninth Step: After the 14 to 15 weeks, feeding will no longer be necessary for the experiment to complete its cycle.

Tenth Step: Somewhere between 16 to 18 weeks, the guppies will have blown loose due to the extreme pressures from within. Now all that has to be done is the counting of the guppies. After one has a total send it, along with a stamped self-addressed envelope to:

Governmental Experiments, c/o Count the Guppies
1122 Fish Avenue
Washington, D.C.

Within two or three years, a check will be sent, in your name, for the amount of $17,462.87. Be sure to include your zip code.

Thank you for participating.

Karl Randall

Note: This experiment is not recommended in areas of high earthquake occurrences.

Use estimated drying time for comparison only. Drying time may differ depending on speed of installation, type of silicones, size of glass, and weather conditions. Actual drying time will be slower. Some silicones are manufactured with resins produced by other divisions, subsidiaries, or affiliated companies worldwide. See your dealer for details.

World class leader

The hole in the Natatorium Building represents many things to the world and the city as a growing part of an ever-changing world. It represents this city as a World Class Leader that is facing a lot of fresh challenges that include a Super Dome, a possible NFL franchise, and a Sports Center, not to mention the White River Park Project or the AFNB Building that will soar dozens of stories higher than the AUL Building.

The so-called hole has been strategically located, for it may be seen from many vantage points across campus, such as standing near Michigan Street gazing through the leafless trees that are just east of the lecture hall, where one can see its circular form.

It truly represents the world as being round with no beginning and no end, until a nuclear war in which both circles as a whole will have an end.

RWF

Crack!

The hole will become a stained glass window that will have “IUPUI” written in it, so when winter comes the humidity from the inside and the cold from the outside will make it crack so that it must be replaced regularly.

B. C. O. C.

It's Not Nice to Fool With Mother Nature.
Coach Kathy Tucker resigned Saturday for personal reasons after the Metros won their first tournament championship in Anderson. Assistant coach Tom Drew acted as head coach for the last three games but Jeff Vessely was announced as the new coach.

The Metros won their three games coached by Drew 77-57 against Taylor, 59-42 against Oakland City and 59-48 against Taylor. Drew had hoped to win all three games played Thursday at Pike High School, but he was played Saturday at Anderson in the Raven Classic.

Judy Cummings hit for her season high against Taylor with 27 points. She also pulled down 18 rebounds, passed out six assists and stole the ball nine times. Cummings led the team with nine rebounds.

In the first half of the Metros' championship game Cummings hit 11 points in the first half on her way to taking game scoring honors with 19 points. Smith, who missed most of the first half after receiving an elbow to the mouth going for a rebound, was the only other Metro to reach double figures with 10 points.

Coach Vessely inherits a team with a 6-6 record through 12 games the Metros are hitting 40 percent from the floor and 64 percent from the line. IUPUI is averaging 61.5 points per game led by Cummings with a 17.1 average. Baas is averaging 13.5 points per game and Spears is also averaging in double figures at 11.6. Cummings is the Metros leading rebounder averaging 12 per game. Smith is averaging six points and six rebounds.

IUPUI visits Defense Information Center

IUPUI was represented by Garlan Elmore and William Shimer, telecommunications; Gary Kepa, organizational communications; Pamela Wright, chairman, organizational communicators association; and several students from the communication department. The tour included an orientation by the Commandant and an actual look at their broadcast facilities.

DINFOS was moved to Fort Harrison in 1965 and is located in Gates Lord Hall. The school, accredited by the North Central Association of Colleges and Schools, offers an intensive 10-week course to qualified students from all branches of the Armed Forces.

Commandant Billy Spangler claimed, "Our students are bright, rapid learners. Many of them already have their bachelor's and master's degrees."

DINFOS offers courses in applied journalism, public affairs-internal and external communications, and broadcasting-performance and production.

How many points have you scored this week??

February 1-7 is IUPUI’s Hit-A-Pedestrian Week; valid only on Michigan Street. Points may be scored as follows:

- 10 — Cribbits
- 9 — Purdue Students
- 8 — Law Students
- 7 — Business Students
- 6 — Dentists
- 5 — Doctors
- 4 — Nurses
- 3 — Professors
- 2 — Phys. Ed. Students
- 1 — Liberal Arts Students
- 0 — Herron Students (sport)

Winners will be notified by the Indianapolis Police Department.
IUPUI Philosophy club

The IUPUI Philosophy Club will meet in the Faculty Lounge, 507 Cavanaugh Hall, at 8:30 p.m. Thursday, Jan. 28. A representative of The Women's International League for Peace and Freedom will speak on the current world situation, the consequences for society of military spending, and the League's view of what should be done. Discussion and refreshments will follow.

Film series

"Memories of Underdevelopment," a masterpiece of Cuban cinema released in 1968, will be presented in the IUPUI Film Series this Thursday and Friday, Jan. 28 and 29.

Thursday night's showing will be at 8:15 p.m. in the Union Building cafeteria. The film may be seen Friday evening at 8:15 p.m. in Lecture Hall 101. Admission is free. The series is sponsored by the Student Activity Fee Fund.

Accolade

Accolade, IUPUI's Senior honor society, is heading into the 1982 semester with new officers and standing committees actively contributing to the school and community. The officers, chosen at the Dec. 13, 1981 meeting, include: Sara Wenning, president; Yolanda Drier, vice president; Brad Jackson, secretary; and Greg Kuhn, treasurer.

All members are reminded of the next meeting, scheduled for Feb. 7, 4:30 p.m., in the faculty lounge, located on the fifth floor of Cavanaugh Hall.

Computer center schedule

The IBM 4341 and the terminal keypunch clusters at the Engineering and Technology Computer Center will be unavailable between noon, Feb. 10, and Feb. 11, to accommodate the Sixth Annual ACM National Scholastic Programming Contest. The National Contest runs in conjunction with the National ACM Computer Science Conference.

ACM, the Association of Computing Machinery, is a scholastic organization of computer scientists with chapters in cities throughout the United States, including Indianapolis.

**Scholarship winner announced**

Murth L. Ramsey Jr., Indianapolis, has been awarded a $500 scholarship by the Central Indiana Chapter of the American Foundrymen’s Society at its December meeting.

Ramsey is a junior in the Industrial Engineering Technology Department, majoring in foundry quality control. The chapter, which presented $1,000 in scholarships in December, was organized in 1938 to promote research and education in the arts and sciences as they relate to foundry technology. The Central Indiana and Eastern Illinois region has 450 members and provides $2,000 annually to qualified students.

SPRING BREAK IN DAYTONA BEACH

MARCH 19 - 28, 1982
Arrangements by
ECO TRAVEL, INC.
MCF1327

$199
FOUR PER ROOM
(2 DOUBLE BEDS)
Guaranteed kitchenette
or oceanfront available at
small additional charge.

TRIP INCLUDES

• Round trip motor coach transportation via modern highway coaches to Daytona Beach, Florida leaving Friday, March 19, arriving the following day. The return trip departs the following Saturday arriving home Sunday.

• Seven nights accommodations at the beautiful and exciting Whitehall Inn of Daytona Beach. Located at 660 North Atlantic Ave., it is one of the most demanded hotels on the strip at that time.

• A truly great schedule of activities including our famous pool deck parties and belly flop contest.

• Optional excursions available to Disney World and several other attractions.

• Seven nights accommodations at the beautiful and exciting Whitehall Inn of Daytona Beach. Located at 660 North Atlantic Ave., it is one of the most demanded hotels on the strip at that time.

• Numerous bar and restaurant discounts arranged in Daytona Beach for you.

• The services of full time travel representatives to insure a trouble-free trip.

• All taxes and gratuities.

OUR TRIPS ARE ALWAYS THE BEST DEAL
AND THE BEST TIME
The Whitehall Inn, located right in the middle of the strip, is definitely the place to be during spring break. Ask anyone who has been to Daytona. The hotel has a pool, big party deck, restaurant, lounge, color TV, air conditioned rooms and plenty of activities. Pictures are available where you sign up. Our motor coaches are nothing but the highest quality highway coaches. We also give you more extras with our trip than anyone else. Don't blow it and go on a lower quality trip.

LAST YEAR OVER 90 PEOPLE HAD THE TIME OF THEIR LIFE ON THIS TRIP.
