NEWM-N 210 Introduction to Digital Sound (3 cr.) P: N101. An introduction to digital sound creation and editing. Topics will focus on analog sound techniques and equipment, analog-to-digital conversion, basic editing, formats and conversions, digital-to-analog conversion, and basic sound effect techniques for new media.

NEWM-N 215 Online Document Development (3 cr.) Study of the creation, publication, and management of documents, images, and other media types on the Web. Topics include Web publishing, asset preparation, document types, contemporary content management systems and their use in the organization. Hands-on experience with contemporary systems for content management.

NEWM-N 221 Media Applications I (3 cr.) Introduces concepts and skills related to the design of interactive multimedia applications for the Web, the desktop, and mobile devices. Within the context of industry-standard application design tools, students use markup tags and scripting to create applications that emphasize graphics, animation, sounds, and interactivity.

NEWM-N 222 Media Applications II (3 cr.) Introduces intermediate concepts and skills related to the design of interactive multimedia applications for the Web, the desktop, and mobile devices. Within the context of industry-standard application design tools, students use information modeling, markup tags, and scripting to create applications that emphasize graphics, animation, sounds, and interactivity.

NEWM-N 230 Introduction to Game Design and Development (3 cr.) P: N221. Introduction to designing and developing games, examining the role that games play in daily life, and analyzing the impact of games in popular culture. Additional topics include world creation, game space design, programming 2D games, character and creature design, animation, and playability testing.

NEWM-N 238 2D Animation (3 cr.) P: N101. Introduction to traditional techniques for 2D animation, and their application in digital media. An exploration of the 12 principles of animation and how to use them to create effective animations.

NEWM-N 241 Stop Motion Animation (3 cr.) Through lecture and hands-on practice, this class studies the production techniques of stop action animation. Topics include the study of pioneers in the field, evolution from analog to digital techniques, and the building of sets and characters. Students will produce a series of short frame-by-frame digital animations.

NEWM-N 243 Introduction to 3D (3 cr.) An introduction to the concepts and production process of 3D graphics and animation. Students learn basic techniques and theories related to modeling, texturing, lighting, animation, and rendering. Students produce animated graphics and text within the context of various projects.

NEWM-N 250 Team Building in Technology (3 cr.) P: N202. Practical introduction to working in groups of three or more people. Topics include the interpersonal process, decision-making styles, the creative effort, problem-solving, conflict resolution, leadership, and assessment techniques.

NEWM-N 253 Introduction to Digital Video (3 cr.) P: N202. Introduction to video production techniques for digital media. Hardware, software, and technique are explored through lecture and projects. All phases of video production are addressed, from pre-production through production to post-production with a focus on the digital media aspects.

NEWM-N 255 Introduction to Digital Sound (3 cr.) Introduction to role and function of sound in interactive media. Concepts, theory, and practice related to audio, including voice, music, and sound effects. Effective listening skills, and understanding how people listen and comprehend sound. Experience with tools and techniques for recording, editing, and reproduction.

NEWM-N 256 Digital Composition (3 cr.) P: N102. An introduction to digital cameras and the principles of photographic composition for multimedia. Topics include shot selection, framing, camera movements, and time-based effects, as well as the use of photographs in storytelling.

NEWM-N 260 Scriptwriting (3 cr.) P: N202. An introduction to writing for new media. Concentrating on developing ideas, concepts, plans and stories, students will generate scripts and analysis for numerous new media projects. Other topics covered include writing for scripts, grants, storyboards, and advertising and marketing plans.

NEWM-N 261 Storyboarding for Multimedia (3 cr.) P: N101, N102. Introduction to story and production planning through traditional and digital techniques. Topics include the development of roughs, storyboards, and animatics as planning devices for digital storytelling and other new media products.

NEWM-N 265 Sound Composition (3 cr.) An introduction to digital sound creation and editing. Concentrating on sound effects, voiceover, and composition, students will generate sound for various new media projects. Other topics covered include recording, formatting, effects, editing, and conversion.

NEWM-N 270 Visual Composition (3 cr.) An introduction to the composition of visual information in regards to new media. Students will develop a visual style through digital and traditional methods to tell stories. Other topics covered include digital photography, framing, shot selection, camera movements, and time-based programs.

NEWM-N 284 Building Physical Prototypes (3 cr.) An examination of concept formation for multimedia technology, including current, emerging, and future devices and displays. Learn to build physical and digital prototypes to facilitate idea development and presentation.

Students research ideas, develop prototypes, evaluate, and present results.

NEWM-N 285 Interactive Design (3 cr.) P: N101. Examination of issues related to interactivity, including the frameworks, models, and theories related to user interaction with new media products. Topics include user modeling, types of user interfaces, and interaction paradigms.

NEWM-N 288 New Media Marketplace Innovation (3 cr.) Through discussion, reading and writing, this course introduces students to the strategies needed to think outside the box and generate innovation in digital products and services, with an emphasis on existing or potential businesses and markets.

NEWM-N 290 Creative Concept Development (3 cr.) Exploration of creativity, ideation, and concept development. Students learn the processes of creative thinking, idea generation and development, and creative problem solving through specific theories, methodologies, and application in multimedia projects.

NEWM-N 295 Career Enrichment Cooperative (3 cr.) P: N175 and N180; sophomore standing and approval of the dean. A semester of external career experiences designed to enrich the student's preparedness for entering the workforce. Periodic meetings with faculty advisors and a comprehensive written report on the experience detailing the intern's activities and reactions are required.

NEWM-N 299 Directed Study II (1 cr.) P: N199. This course gives a hands-on experience as students interact with employers through guest speakers, networking, mock interviews, and job shadowing.

NEWM-N 300 Digital Media Production (3 cr.) P: N202. Hands-on experience in taking a project through the typical product life-cycle, from initial contact to final acceptance. Topics include communicating with a client, cost estimation, product design, implementation, handling change requests, product documentation, acceptance testing, and post-process review.

NEWM-N 311 The Digital Paradigm Shift: Effects in International Cultures and Society (3 cr.) Examination of the digital paradigm shift and its global impact on cultures and societies. A study of major paradigm shifts in reference to culture and society as well as the implications for the future. Readings, lectures, class discussions.

NEWM-N 315 Online Document Development II (3 cr.) P: N215. Advanced creation, publication, and management of interactive publications for online distribution with the inclusion of emerging technologies for a media-rich experience. Topics include interactive Web site development, animations for the Web, online interactive design, document conversion, file exchanges, and digital media development for online usage.

NEWM-N 321 ActionScript in 3D (3 cr.) P: N222. Introduces skills for the design and development of interactive 3D applications for the Web and the desktop. Topics include 3D concepts, 3D code libraries, interactivity, system performance issues, and potential applications.

NEWM-N 322 Dynamic Data Applications (3 cr.) P: N222, CSCI-N342. Examines the techniques used in multimedia applications to communicate with back-end data and information services, and to create applications with run-time access to data, information, and media assets.

NEWM-N 328 Visualizing Information (3 cr.) P: N222. Exploration of techniques for using graphics and sound to present data and information. Topics include data types (including data that is geographical and/or time-varying), presentation techniques, effective use of design elements, and effective use of interactive media.

NEWM-N 330 Intermediate Game Design and Development (3 cr.) P: N230. Design and development of 3D games in the context of a 3D game engine. Topics include world creation, game space design, programming, design and modeling of characters and creatures, environmental animation, and playability testing.

NEWM-N 332 Sequential Narrative (3 cr.) P: N202. An introduction to the use of panel-to-panel and frame-to-frame sequential storytelling as foundational elements of animation and storytelling. Other topics covered include pre-visualization, storyboards, and character design.

NEWM-N 335 Character Modeling and Animation (3 cr.) P: N230. Intermediate course in designing characters, for a variety of applications. Topics include character modeling, locomotion, facial animation, and lip movement.

NEWM-N 340 Digital Video Production (3 cr.) P: N 253. Video production techniques for digital media. Preproduction, production, and postproduction of digital video will be addressed and utilized for the completion of a short video project. Other topics covered include directing, editing, media optimization, and assembling assets.

NEWM-N 342 3D Animation (3 cr.) P: N243. Introduction to 3D computer graphic animation for students interested in producing animations for product design, gaming, entertainment, marketing, training, and simulation. Topics include environment design, modeling, motion studies, camera movement, and composition.

NEWM-N 343 3D Modeling (3 cr.) P: N243. Intermediate modeling course, aimed at achieving high-detail, professional quality 3D models for games, film, architecture, science, and other application areas. In-depth use of professional software packages. Possible topics include modeling high-resolution organic characters, modeling foliage and ornate structures, displacement mapping techniques.

NEWM-N 344 3D Production (3 cr.) P: N342 or N343. Team-based course focusing on the creation of high-end, broadcast-quality animations. Team members demonstrate mastery of narrative, modeling, lighting, effects, rendering, and animation skills culminating in a final team project. Other topics include planning, preproduction, production, and postproduction.

NEWM-N 353 Intermediate Video (3 cr.) P: N253. Video production techniques for digital media. Preproduction, production, and postproduction of digital video will be addressed and utilized for the completion of a short video project. Other topics covered include directing, editing, media optimization, and assembling assets.

NEWM-N 355 Intermediate Sound (3 cr.) P: N255. Intermediate course in designing soundtracks and sound effects for various media applications. Topics include digital signal processing, digital sound techniques, sound recording using a variety of synthesizers and samplers, editing techniques, file formats and conversion techniques.

NEWM-N 356 LIghting and Field Production (3 cr.) P: N253. Theoretical and practical application of lighting, filming, and audio recording. Students will work in a variety of locations to encompass as many different environments as possible. Other topics covered include daytime shooting, nighttime shooting, studio shooting, and storytelling.

NEWM-N 357 Digital Effects (3 cr.) P: N253. Integration of computer-generated imagery and digital effects technique for video production. Students learn techniques for creating digital effects, shooting video for effects, and the use of effects to aid in storytelling. Other topics covered include programming/scripting, shooting raw footage, effects, and media integration.

NEWM-N 385 Seeing Sideways: Experimental Approaches to New Media (3 cr.) In this non-traditional open format course students will explore a variety of methods for fostering creative exploration in new media. Discussion, readings, blogging, and directed exercises lead the student to find individual ways of exploring different areas of new media through a variety of output options.

NEWM-N 399 Directed Study III (1 cr.) P: Junior standing. This course applies design and visualization information towards the development of a comprehensive portfolio. The development of the portfolio will provide students with a framework for display of personal growth and achievement. Students will develop a portfolio to be used for future career opportunities.

NEWM-N 400 Imaging and Digital Media Seminar (3 cr.) Variable titled course designed to bring guest speakers from the industry and other disciplines on campus to expose students to the wide realm of new media and how it can be utilized in each discipline. Class discussions, assigned readings, and research papers.

NEWM-N 410 History and Theory of Digital Media (3 cr.) Examines the history of computer-based media, technologies, and the digital information age. Topics include studying the historical components and developments, as well as present digital media and research speculation towards the future of digital media and technologies.

NEWM-N 413 Advanced Web (3 cr.) P: 313. A survey of advanced issues in Web site design, maintenance, and enhancement. Possible topics include Web analytics, clickstream analysis, ads and other revenue opportunities, payment systems, attracting visitors, and search engine optimization.

NEWM-N 420 Multimedia Project Development (3 cr.) P: Senior standing. Project design in new media. Topics include product planning and design, hardware and software selection, cost estimation, timelines, project management tools, feasibility studies, prototyping, and product presentation. Students work individually or in small groups to develop a project plan suitable for a capstone experience.

NEWM-N 421 Physical Object Interfaces (3 cr.) P: N222. Exploration of the possibilities for interacting with computer applications through physical objects and other tangible media. Introduces the use of several sensor technologies to support interactivity, including cameras, proximity, contact, and RFID. Students design, build, and evaluate applications that address various scenarios.

NEWM-N 422 Advanced Interactive Production (3 cr.) P: N322. A project-based course emphasizing the design, implementation, and evaluation of interactive new media applications. Working individually and in teams, students create multiple products, evaluate the products, and evaluate their own production process.

NEWM-N 431 Game On! (3 cr.) An exploration of the evolution, concepts, and impact of video games. Examines the role of games in popular culture, as well as the impact on contemporary notions of interactivity, learning, and storytelling. Includes discussion of console and online games, casual games, Alternate Reality Games, serious games, and others.

NEWM-N 432 Advanced Sequential Narrative (3 cr.) P: N332. Advanced topics in the creation of sequential narrative using 2D animation. Topics include ideas of pacing, tempo, sequence, and synchronization of graphic and audio elements.

NEWM-N 438 Advanced 2D Animcation (3 cr.) P: N238. The creation, development, and production of animation utilizing advanced methods of performance and movement. Possible topics include character and environment design, soundtrack, syncing, backgrounds and animation, and motion principles.

NEWM-N 440 DV and CGI Digital Effects (3 cr.) P: N340 and N335. An advanced course covering the integration of CGI (computer-generated imagery) and digital effect techniques for video production, as used in industry. Students learn the techniques for creating digital effects, shooting video for effects, and the use of effects to aid in the telling of a story. Topics include integration of text, graphics, sound, video, and 2D/3D animation into video productions. Advanced editing and composite techniques will be explored through projects.

NEWM-N 442 Advanced 3D Animcation Techniques (3 cr.) P: N238. Advanced techniques in computer animation, including character development and dynamics. Possible topics include story development, character facial animation and locomotion, dynamics, special effects, composites, fluid effects and particle systems.

NEWM-N 443 Advanced Lighting and Texturing (3 cr.) P: N243. Advanced course in creating 3D objects and environments with specialized texturing and lighting. Possible topics include an examination of state-of-the-art examples, reproduction of results, and production of individual portfolio-quality projects. Possible software includes use of Autodesk Maya, mental ray, Adobe Photoshop and Adobe AfterEffects.

NEWM-N 444 Stereoscopic Production and Display (3 cr.) P: N101. The production and display of stereoscopic imagery for various applications, including

games, education, science, virtual reality, and marketing. Topics include human stereoscopic perception, types of stereoscopic displays, evolution of techniques, production issues for various types of stereoscopic media.

NEWM-N 450 Usability Principles for New Media Interfaces (3 cr.) P: N285. Examination of principles of human-computer interaction (HCI) and user experience modeling. Study of user-centered design, usability, and usability testing in the context of new media (hypermedia and multimedia). Topics include aesthetics, human factors, and cognitive psychology as related to user interfaces, navigation, and interactivity.

NEWM-N 453 Advanced Video (3 cr.) P: N353. Application of technical and critical-thinking skills towards understanding the genre of documentary films. Students review, discuss, and analyze several exemplar films, as well as do the research, planning, production, editing, post-production, and evaluation of a short high-quality documentary.

NEWM-N 455 Advanced Sound Design (3 cr.) P: N355. Students design, record, and edit sound files, apply effects, and mix several audio projects using state of the art technology. Topics include acoustics, circuits, waveforms, digital signal processing (DSP), and studio design and equipment. Emphasis is on practical techniques for integrating sound with other media.

NEWM-N 475 Research in Design Methods (3 cr.) This course is designed to give students an understanding of the advanced concepts of theoretical topics, simulation modeling, and analysis concepts. Investigate applications of simulation in systems characterized by probabilistic behavior.

NEWM-N 480 Technology and the Law (3 cr.) Provides students with a solid foundation on legal matters that impact new media and informatics, including intellectual property (copyright, patents, trademark, trade secrets), contracts, licensing, privacy, publicity, global legal issues, and professional ethics.

NEWM-N 485 Seminar in New Media (3 cr.) Current trends, problems, best practices, and developments in new media. Students pursue a special interest and share information and experiences with the group. This course is an in-depth exploration of topics and issues at the forefront of new media. Seminar format with research papers and class discussion/presentations.

NEWM-N 490 Independent Study (1-6 cr.) Research and practical experience in various areas of new media as selected by the student prior to registration, outlined in consultation with the instructor and approved by the program advisor. Total credit of internship/ independent study shall not exceed 9 credit hours.

NEWM-N 495 Enrichment Internship (3 cr.) P: junior standing and program advisor approval. Industry, corporate, or similar experience in new media-oriented employment. Projects jointly arranged, coordinated, and evaluated by faculty and industrial supervisors. Apply during the semester prior to desired internship. Total credit of internship/ independent study shall not exceed nine 9 hours. Completion of 9 credit hours of new media electives at the 300-400 level is required.

NEWM-N 499 Capstone Experience (3 cr.) To be taken during the students' senior year. The capstone experience is the culmination of the student's major in both knowledge and abilities of a particular area of interest in new media. The successful execution, individually or as a team, integrates student's learning across the field.

School of Journalism

Welcome to the Indiana University School of Journalism at IUPUI!

We are situated at the very edge of downtown Indianapolis, only three blocks from the Statehouse.

Indianapolis is the media center of Indiana. One clear advantage of our program is our location. Jobs and internships covering every possible career path may be found here. Our location provides us a valuable pool of adjunct professors, some of them leading media professionals.

Are we a commuter university? Yes. Are we a residential campus? Yes.

The most important asset we bring is the quality of the faculty, both full-time and part-time, as well as our new facilities and the quality of our existing students.

As a journalism student, you will work with faculty and staff who have been successful and have achieved excellence in professional work. That is exactly what you want in a professional school like ours.

If you have read this far, you know you want to be here. Come visit us, you'll like what you see.

History

Indiana University, established in 1820 as a tiny seminary in Bloomington, eventually became one of the first state universities to teach journalism. Instruction began in 1893 with three students in the first class. Classes in writing and reporting were taught at intervals during the next few years, supplementing the students' liberal arts background in English, history and economics.

A Department of Journalism was established in the College of Arts and Sciences in 1911, although students could not major in journalism until 1932. Professor Joseph Piercy was named as the first head of the department and served until 1938. In 1911, the Department of Journalism took over administration of the Indiana Daily Student, the campus newspaper established in 1867 as a student-owned enterprise.

John E. Stempel followed Piercy as the head of the department. Under Stempel's leadership from 1938 until his retirement in 1968, the program moved to its current building, Ernie Pyle Hall. In 1946, the High School Journalism Institute began, directed by Professor Gretchen Kemp. The institute continues today, offering programs each summer for students and their high school teachers.

Journalism began offering a master's degree in the 1920's and a doctoral degree in mass communication in 1966. The first Ph.D. was granted in 1971.

Richard G. Gray became chairman of the department in 1968. He led the program through a shift in the curriculum from a mainly professional orientation to one that balances instruction in the skills of writing, visual communication, reporting, and editing with instruction in the history, economics, law, responsibilities, and ethics of journalism. That core curriculum remains, although new technologies of mass communication and converging media have changed the mode of instruction and the content of some courses.

In 1968, the Indiana Daily Student was separated from the curriculum. The IDS and the Arbutus, the campus yearbook, became independent publications administered by a publisher selected by the journalism faculty.

After a national fundraising campaign, Ernie Pyle Hall was renovated in 1976. Faculty offices and classrooms took over the upstairs of the refurbished building, and a new library and the IDS dominated what once had been the pressroom on the ground floor.

In 1974, the department became a school, but remained within the College of Arts and Sciences. The school became systemwide in 1982, responsible for the coordination of journalism education on all eight campuses. Gray became dean and helped establish the undergraduate major on the Indianapolis campus, IUPUI. Under the leadership of Associate Dean James Brown at IUPUI, the school took over the administration of The Sagamore, the campus newspaper, and appointed its first publisher in 1985.

After the death of Gray in 1984, Trevor R. Brown became interim dean and was named dean the next year. In 1989, the school separated from the College of Arts and Sciences, becoming one of seven (with the addition of Informatics in 2001) independent academic schools on the Bloomington campus. Since 1990, students on both the Bloomington and Indianapolis campuses enroll in the Bachelor of Arts in Journalism (B.A.J.) program. Following Trevor Brown's retirement in 2005, Bradley Hamm was appointed dean.

Overview

The mission of the School of Journalism is to explore and to help students explore the institutions, procedures, professional skills, and audiences of journalism and mass communication. Our subject is how the media mediate, and what this process of mediation means for public life in America and around the world.

This mission is both an academic and a professional one; it is about learning, teaching, and doing. To this end, we are committed to scholarly research in journalism and mass communication, to liberal education in the arts and sciences, and to professional training in media work.

The Mission of the Baccalaureate Program

The mission of the baccalaureate program of the School of Journalism is to help students learn to read, think, and communicate clearly, critically, and creatively. The school is committed to liberal education in the arts and sciences, as well as to professional training in the skills of journalism and mass communication. The school believes that both breadth and depth of learning must characterize the undergraduate experience. To this end, the Bachelor of Arts in Journalism degree emphasizes:

- development of basic skills in writing, critical thinking, independent learning, mathematics, foreign language, computers, and new information technologies
- exposure to a broad range of course work in the disciplines of the liberal arts and sciences

- study of human cultures outside the United States, and of selected minority cultures within the United States
- training in statistical analysis, and quantitative and qualitative research methods; training in the professional skills of journalism and mass communication, including reporting, writing, editing, visual communication, new communications technology, and collaborative group work
- study of the institutions, processes, and effects of mass media in society
- study in depth of a field or discipline in the arts and sciences, other than journalism and mass communications
- preparation for a lifetime of learning

Facilities

The Journalism Library

Books, journals, trade publications, and newspapers used by faculty and students in journalism are housed in the University Library. The IUPUI University Library is a beautifully designed building. It features computer databases that help students, faculty, and staff in their academic and professional work.

University Library

Campus Life at Indianapolis

The journalism curriculum helps students prepare to be effective communicators regardless of their chosen profession. Careers in newspapers, magazines, broadcast and electronic journalism, sports journalism, public relations, and advertising are as vital as ever. The Bachelor of Arts in Journalism degree also prepares students for related careers and for graduate studies. For example, strong communication skills are essential for careers in law, business, and public affairs.

The urban setting of the Indianapolis campus enables students and faculty to work closely with public and private agencies, government, business and industry. Its urban orientation enables the university to be directly involved in metropolitan concerns and aspirations. The State Capitol is only a short walk from the school's offices. Internships available from Indianapolis media organizations allow students to enhance their classroom skills with work experiences in a major media market. Classroom experiences are also enriched by part-time instructors who are media professionals.

The curriculum integrates words and pictures in storytelling for both traditional and new media.

Journalism Library

Books, journals, trade publications, and newspapers used by faculty and students in journalism are housed in the University Library. The IUPUI University Library is a beautifully designed building. It features computer databases that help students, faculty, and staff in their academic and professional work.

Admission to the School of Journalism

Students wishing to major in journalism may declare themselves journalism majors in the University College at Indianapolis during their first year at IUPUI and may take J110 Foundations of Journalism and Mass Communication. Before seeking admission as a major in the School of Journalism, students must complete a minimum of 15 credit hours of undergraduate course work, including the following:

- W131 English Composition (grade "C" or higher)
- J110 Foundations of Journalism and Mass Communication (grade "C" or higher)

Students wishing to become journalism majors are expected to have computer literacy, but there is no course or competency exam required for admission. Those who cannot demonstrate competency with word processing may be required to take a jump-start course before advancing in JOUR J200 or J210.

Students meeting these requirements with a cumulative grade point average of 2.0 will be considered for admission to the School of Journalism. Each year the school will admit students, based on their grade point average, as the school's physical space, instructional equipment, and faculty/staff resources permit.

Application Deadlines

The School of Journalism will consider applications three times a year: May 15, August 20, and December 15. Application forms are available in the Information Technology Building.
All summer transfer course work must be entered on the student's transcript prior to the first day of classes in fall semester. For admission to the Indianapolis campus, transcripts from other colleges and universities should be sent to the address below.

Office of Admissions
Campus Center Rm. 255
Indianapolis, IN 46202-5143

Transfer Students

Transfers from Other Colleges and Universities

Students who wish to transfer to IUPUI should contact the Office of Admissions, Campus Center Rm. 255, Indianapolis, IN 46202-5143, (317) 274-4591.

Students who wish to transfer to Bloomington should contact the Office of Admissions, 300 N. Jordan Avenue, Bloomington, IN 47405, (812) 855-0661.

Transfer students are first admitted to the University Division at Bloomington. They may then apply to the School of Journalism when they have completed the

application requirements. Transfer courses are not calculated in the cumulative grade point average for Indiana University students; therefore, transfer students must complete a minimum of one semester at Indiana University before they can be considered for admission to the school.

Acceptance of credit from other institutions will be determined by the Office of Admissions, and the applicability of credit toward degree requirements in the School of Journalism will be determined by the dean. No more than 12 transfer credit hours of mass communications courses may be counted in the journalism major. Only credits earned at Indiana University will count toward a student's grade point average. Courses from other colleges and universities transfer as credit only.

Transfers within the School of Journalism on the Bloomington and Indianapolis Campuses

Students admitted to the school on the Bloomington campus who are transferring to the school on the Indianapolis campus should complete an intercampus transfer form available on the Web at www.iupui.edu/%7emoveiu. Students admitted to the school on the Indianapolis campus who are transferring to the school on the Bloomington campus must have completed all admission requirements as defined by the Bloomington campus and complete the same Web form. See "Admission to the School of Journalism" in this bulletin. Students who have not met all admission requirements may transfer to the University Division. Intercampus transfer applications will be accepted throughout the year. However, students may take advantage of Continuing Student Registration by filing for an intercampus transfer by March 1 for summer and fall semesters, and October 1 for spring semester.

Transfers from Other Indiana University Campuses

Students who have completed the admission requirements should submit an application to the School of Journalism by the published deadlines. Students who have not completed the admission requirements should complete the intercampus transfer form at the website, www.iupui.edu/%7emoveiu for admission to the University Division at Bloomington or the University College at Indianapolis.

Transfers from the School of Journalism to Other Indiana University Campuses

Students enrolled in the School of Journalism who wish to attend another Indiana University campus should complete the intercampus transfer form on the web at www.iupui.edu/moveiu.

Approved Distribution Courses by Department

Economics (one course) (3 cr.)
Students may select from approved distribution courses in the School of Liberal Arts economics department.

Literature or Fine Arts History or Appreciation (one course) (3 cr.)
Literature courses must be devoted entirely to print literature. Fine arts (Herron) courses must be selected from courses with an "H" preceding the course number. Courses must be approved distribution courses in the School of Liberal Arts.

Arts and Humanities (two courses) (6 cr.)
This area presents insights into aesthetics ideas, and systems of values. Two courses (6 cr.) must come from the following list. Courses in ones major cannot be used to fulfill this requirement; however, one course taken as part of a minor may be used. Creative writing, drawing, performance or studio courses will not satisfy the arts and humanities requirement.

- Africana Studies: A150*
- American Studies: A103
- Classics: C205*
- English Literature: L105, L115
- Fine Arts: Communication Studies (theater) T130 **or** M150; English (film) C292; Herron H100, H101, H102; Music M174
- Folklore: F101*
- History: H105, H106, H108*, H109*, H113*, H114*, H217
- Philanthropic Studies: P105
- Philosophy: P110, P120
- Religious Studies: R111, R120, R133*, R173, R180, R212*
- Women's Studies: W105*
- World Languages and Cultures: F200, German G265, Japanese E231

Social Sciences (two courses) (6 cr.)
This area uses procedures and information developed in the social sciences to examine the complexities of societies and human interaction. The 6 credit hours must come from two of the following areas. Courses in one's major cannot be used to fulfill this requirement; however, courses taken as part of a structured minor may be used to fulfill this requirement.

- Africana Studies: A150*
- Anthropology: A104
- Communication Studies: C180, M150
- Economics: E101, E201, E202
- English: Z104
- Folklore: F101*
- Geography: G110*, G130
- History: H117
- International Studies: I100
- Medical Humanities and Health Studies: M201
- Political Science: Y101, Y103, Y213, Y219
- Psychology: B104, B310
- Public and Environmental Affairs: V170
- Sociology: R100, R121
- Women's Studies: W105*

Natural and Mathematical Sciences (two courses) (6 cr.)

- Astronomy: A100, A105, A205
- Biology: K101, K103, N100, N107, N200, N212, N213 (lab), N214, N215 (lab), N217, N251, N261, N322
- Chemistry: C100, C101, C110, C105, C125 (lab), C106, C126 (lab), C341, C342

- Computer Science: N201, N207, N211, 23000, 24000
- Geography: G107, G117 (lab), G115, G109, G119 (lab), G110, G120 (lab), G206 (lab), G130, G132, G180
- Mathematics: M118, M119, 15200, 15300, 15400, 15900, 16500, 16600, 22100, 22200, 23100, 23200, STAT 30100
- Physics: 10000, 15200, 20000, 21800, 21900, 25100, P201, P202
- Psychology:& B105, B305, B307, B320, B334, B344

Comparative World Cultures (one course) (3 cr.)**

This area presents culture in a comparative and conceptual manner and includes material from several cultures. Students must take one course from one of the areas below:

- Anthropology: A104
- Classics: C205
- Geography: G110
- History: H108
- International Studies: I100
- Political Science: Y217
- Religious Studies: R133, R212
- World Languages and Cultures: F200

* This course appears on more than one list or in more than one section. However, this course may be used to satisfy only one requirement unless specifically stated.

**These courses may be used for Comparative World Cultures and one other requirement if it appears on the Arts and Humanities or Social Science list.

Credit Hour & Grade Point Requirements

1. 123 credit hours required for graduation, including the following minimums:

- At least 39 credit hours of mass communications courses (journalism, telecommunications, and selected communication and culture).
- At least 65 credit hours from the College of Arts and Sciences or School of Liberal Arts and School of Science at Indianapolis, excluding Linguistics L100, all telecommunications courses, and selected communication and culture courses.
- Minimum 15 credit hours in approved academic minor in a second concentration selected from one academic discipline outside of journalism, telecommunications, and selected communication and culture courses.
- At least 36 credit hours at the 300 and 400 level.

2. Credit hour limits

- No more than 12 transfer credit hours of mass communications (journalism, telecommunications, and selected communication and culture).
- No more than 3 credit hours total of internship credit, either from JOUR J492 or any other academic unit.
- No more than 60 transfer credit hours from a community college.
- Optional electives - 10 or fewer credit hours outside the School of Journalism and the College of Arts and Sciences or School of Liberal Arts and School of Science at Indianapolis.
- Optional electives - 15 or fewer credit hours of approved courses outside the School of Journalism and the College of Arts and Sciences or the School of Liberal Arts and the School of Science at Indianapolis.
- For students satisfying the requirements for a secondary teaching certificate, no more than 29 credit hours of approved education courses.

3. Grade Point Average

- A minimum 2.0 cumulative grade point average in all course work.
- A minimum 2.0 grade point average in all major course work (journalism, telecommunications, and selected communication and culture), "C-" or higher in each course.
- A minimum 2.0 grade point average in all course work for the second concentration, "C" or higher in each course.
- The school will honor the university FX policy up to 15 credit hours.

Fundamental Skills

Students may test out of all but 3 credit hours of the fundamental skills requirement. Requirements completed in one area may, under certain conditions, also fulfill requirements in other areas.

Cross-listing policy: Courses used for English composition and 100-level fundamental skills foreign language may not be used to fulfill any other requirement. Only math courses listed as both fundamental skills and natural and mathematical science may cross-list. Foreign language courses at the 100 level, from departments that allow 100-level courses to fulfill major requirements, may be applied to other appropriate requirements.

English Composition (one course)

Students may fulfill this requirement in any one of the following ways:

- Completion of English W131 or English W140 with a grade of "C" or higher.
- Students who receive a score of 4 or 5 on the AP exam in English Language and Composition will receive credit for W131 when the score is received by the IUPUI admissions office. These students do not need to take W131.
- Transfer students who do not have transfer credit for W131 but took what they think is a comparable course at their previous university can seek comparable credit.
- While IUPUI does not give credit for W131 on the basis of the Dantes, CLEP exams, or SAT/ACT scores, we do have a special credit portfolio option for only those students who transfer with 30 credits or more who fulfilled the composition requirement at their previous university through SAT or ACT scores or a placement test. (The special credit portfolio option is not available for W132 or W231.) See Special Credit Portfolio.

Speech (one course)

- R110 or equivalent.

Mathematics (one course)

Students may satisfy this requirement in one of three ways:

- Complete one course from mathematics M118*, M119, 151 or 153 with a grade of "C-" or higher. Credit for these courses may count toward the 123 credit hours required for the degree.
- Students with a mathematics SAT score of 650 or higher or a mathematics ACT score of 29 or higher are exempt from this requirement.

NOTE: Students who plan to transfer to Bloomington should take M118, M119, 163, or 221.

Foreign Language (two courses)

Students must complete the study of a single foreign language through the second semester of the first year of college-level course work. All or part of this requirement may be fulfilled by performance on placement examinations. Students may fulfill the entire foreign language requirement by placing into the second-year level.

Students who have studied foreign language in high school should take the foreign language placement examination. Contact the Foreign Language Department for more information.

International Students: Students whose native language is not English may demonstrate required proficiency in their native language. They may not, however, earn credit for any course at the first or second year level in their native language.

Statistics (one course)

Select from: ECON 270, PSY B305, SOC R359, STAT 301, SPEA K300.

*Math M118 is recommended for students who want to prepare for the required statistics course.

B.A.J. Requirements

The School of Journalism offers the B.A.J. degree on the Bloomington and Indianapolis campuses. Students on the Indianapolis campus must complete the following for the B.A.J. degree:

Journalism Major (minimum 39 credit hours)

Core (16 Credits)

These courses are required of all Journalism students:

- C190 Perspectives on Communication (1 cr.)
- J110 Foundations of Journalism and Mass communication (3 cr.)
- J200 Reporting, Writing, and Editing I (3 cr.)
- J210 Visual Communication (3 cr.)
- J300 Communications Law (3 cr.)
- J410 Media as Social Institutions (Capstone) (3 cr.)

Area Core (12 credits)

Each student must complete all four courses on one of the Area Cores:

- Journalism
  - J341 Newspaper Reporting (3 cr.)
  - J351 Newspaper Editing (3 cr.)
  - One of the following: J343 Broadcast News (3 cr.), **OR** J344 Photojournalism Reporting (3 cr.), **OR** J463 Computerized Publication Design (3 cr.).
  - J409 Media Management (3 cr.)
- Sports Journalism
  - J150 Introduction to Sports Journalism (3 cr.)
  - J345 Sports Journalism Writing (3 cr.)
  - J361 Issues in Sports Journalism (3 cr.)
  - J409 Media Management (3 cr.)
- Public Relations
  - J219 Introduction to Public Relations (3 cr.)
  - J390 Public Relations Writing (3 cr.)
  - J340 Public Relations Tactics and Techniques (3 cr.)
  - J428 Public Relations Planning and Research (3 cr.)

Journalism Electives (9 credits)

A Journalism Research Elective from the following list:

- J407 Newsgathering and the Law (3 cr.)
- J414 International Newsgathering Systems (3 cr.)
- J423 Public Opinion (3 cr.)
- J429 Public Relations Campaigns (3 cr.)
- J438 Advertising Issues & Research (3 cr.)
- J450 History of Journalism (3 cr.)
- J470 Broadcast Media Analysis (3 cr.)
- (Also approved topics of JOUR J360 and J46)

Two journalism electives (6 cr.) from any area: journalism, sports journalism, or public relations as long as you meet the prerequisites for that course.

J492 Media Internship (1 cr.)

J400 Careers in Public Relations or J402 Careers in Journalism (1 cr.)

Academic Minor or Outside Concentration (minimum 15 credit hours)

Fundamental Skills

- English Composition: ENG W131 (3 cr.)
- Speech: COMM R110 (3 cr.)
- Mathematics: M118, M119, 151 or 153 (3 cr.)

Math M118 is recommended for students who want to prepare for the required statistics course.

- Foreign Language (10 cr.)
- Statistics: ECON 270, PSY B305, SOC R359, STAT 301, SPEA K300 (3 cr.)

Distribution

- Economics (3 cr.)
- Literature or Fine Arts History or Appreciation (3 cr.)
- Arts and Humanities (6 cr.)
- Social Sciences (6 cr.)
- Natural and Mathematical Sciences (6 cr.)
- Comparative World Cultures (3 cr.)

123 credit hours total

Certificates for Non-Majors

Certificate in Journalism

The School of Journalism offers a Certificate in Journalism for undergraduate students interested in journalism, but who want to complete a degree from another school at IUPUI.

The certificate is very similar to our major requirements. Admission requirements to the certificate are the same as those for admission to our degree.

Core (16 Credits)

- C190 Perspectives on Communication (1 credit)
- J110 Foundations of Journalism and Mass Communication
- J200 Reporting, Writing, and editing I
- J210 Visual Communication
- J300 Communications Law
- J410 Media as Social Institutions (Capstone)

Area Core (12 credits)

- J341 Newspaper Reporting
- J351 Newspaper Editing
- One of the following: J343 Broadcast News, J344 Photo journalism Reporting, or J463 Computerized Publication Design.

Total: 25 credits

Certificate in Public Relations

The School of Journalism offers a Certificate in Public Relations for undergraduate students interested in public relations, but who want to complete a degree from another school at IUPUI.

The certificate is very similar to our major requirements. Admission requirements to the certificate are the same as those for admission to our degree.

Core (16 Credits)

- C190 Perspectives on Communication (1 credit)
- J110 Foundations of Journalism and Mass Communication
- J200 Reporting, Writing, and Editing I
- J210 Visual Communication
- J300 Communications Law
- J410 Media as Social Institutions

Area Core (9 Credits)

- J219 Introduction to Public Relations
- J390 Public Relations Writing
- J340 Public Relations Tactics and Techniques

Total 25 Credits

Degree Programs

- Bachelor of Arts in Journalism
- Academic Minor and Second Concentration
- Certificate in Journalism

Academic Minor or Outside Concentration

Journalism students must complete an academic minor or outside concentration of at least 15 hours in an academic discipline outside of journalism.

Requirements for outside minors are set by other departments and schools. You must declare a minor with that school or department and take their list of required courses. These minors will be listed on your transcripts.

With the approval of the advisor of the School of Journalism, students have the option to complete an outside concentration. Students must propose selected courses in consultation with their faculty counselor and complete a written explanation of the educational value or goal of their choice. The selection of courses should show evidence of a coherent body of knowledge. The outside concentration is not listed on your transcript, but it fulfills the School of Journalism requirement.

Students must earn a "C-" or higher in each course and a grade point average of at least 2.0 in all courses taken for the second concentration.

Students may complete any of the certificates offered by the School of Liberal Arts for the second concentration requirement. Students completing certificates in other schools must obtain approval from an advisor for that school. Students must complete a minimum of 24 credit hours of courses approved for the certificate. The School of Journalism requires that students pursuing this option meet with an advisor of the department offering the certificate, obtain the advisor's signature on a planned program, and submit a copy of the program to the School of Journalism advisors.

Advertising Minor

The School of Journalism offers two advertising minors: one for marketing majors in the Kelley School of Business and the other for majors in other areas. The minor requires seven courses and 19 credit hours to complete.

Journalism students may have a focus on advertising, but they must contact the Executive Associate Dean of the School of Journalism for information about the minor.

Kelley School of Business - Marketing Majors

- *J320: Principles of Creative Advertising (3 cr.)

Required pre-requisite for all other courses in the sequence
M415, Advertising and Promotion Management, may be substituted

- *J300: Communication Law (3 cr.) P: J320

L203 or L204, Commercial Law, may be substituted

- J335: Retail and Direct Advertising (3 cr.) P: J320/ M415
- J463: Computerized Publication Design I (3 cr.) P: J320/M415
- J420: Advertising Research and Management (3 cr.) P: J320/M415 and J335
- J438 Advertising Issues & Research (3 cr.) P: J320/ M415, J300, J335, J420, J463 or permission
- *J400: Careers in Public Relations and Advertising (1 cr.) P: J320 and Junior standing

BUS-X320 may be substituted

Note: Items identified with * have required marketing courses that may be taken as substitute for a journalism class and also counted toward the minor in Advertising. These rules apply ONLY to marketing majors.

Note: J420 and J463 may be taken concurrently; J335 and J438 may be taken concurrently.

Other Areas

- J320: Principles of Creative Advertising (3 cr.)

Required pre-requisite for all other courses in the sequence

- J300: Communication Law (3 cr.) P: J320
- J335: Retail and Direct Advertising (3 cr.) P: J320/M415
- J463: Computerized Publication Design I (3 cr.) P: J320/M415
- J420: Advertising Research and Management (3 cr.) P: J320/M415 and J335
- J438: Advertising Issues & Research (3 cr.) P: J320/M415, J300, J335, J420, J463 or permission
- J400: Careers in Public Relations and Advertising (1 cr.) P: J320 and Junior standing

Student Learning Outcomes

The School of Journalism offers a bachelor's degree in journalism with three concentrations: Journalism, Sports Journalism, and Public Relations. In addition, it offers certificates in Journalism and Public Relations, and a minor in Advertising. These are the learning outcomes for each program.

Bachelor of Arts

- Journalism Concentration
- Public Relations Concentration
- Sports Journalism Concentration

Certificates and Minors

- Certificate in Journalism
- Certificate in Public Relations
- Minor in Advertising

Bachelor of Arts in Journalism (B.A.)

Journalism Concentration

- Apply the basic principles of journalism such as accuracy, fairness, and public service.
- Discuss the legal and ethical underpinnings of mass media in the U.S.
- Interpret and use the principles of digital, on-line, and print design.
- Discuss and practice the principles of communicating clearly through print, digital, and visual media.
- Explain the function and impact of journalism and mass communication.
- Classify and separate different audiences for mass communication.
- Design and execute an effective job search in journalism.
- Conduct research for news stories using a variety of sources and evaluate the accuracy of information sources.

Public Relations Concentration

- Apply the basic principles of public relations such as media relations, employee communication, and community relations.
- Discuss the legal and ethical underpinnings of public communication in the U.S.
- Interpret and use principles of digital and print design.
- Discuss and practice the principles of ethical and effective informative and persuasive writing.
- Explain the roles and functions of public relations.
- Discuss and execute persuasive communication strategies in public relations.
- Design and execute an effective job search in public relations.
- Design research to support and evaluate public relations campaigns.

Sports Journalism Concentration

- Apply the basic principles of journalism such as accuracy, fairness, and public service.
- Discuss the legal and ethical underpinnings of traditional and digital sports journalism.
- Interpret and use the principles of digital, on-line, and print design.
- Discuss and practice the principles of communicating clearly through print, broadcast, and digital media.
- Explain the role of sports media and their symbiotic relationship with the sports industry.
- Examine the treatment of social, economic, political, and legal issues in sports journalism.
- Explain factors that influence sports journalism content and their significance.

Undergraduate Certificates and Minors

Certificate in Journalism

- Apply the basic principles of journalism such as accuracy, fairness, and public service.
- Discuss the legal and ethical underpinnings of mass media in the U.S.
- Interpret and use the principles of digital, on-line, and print design.
- Discuss and practice the principles of communicating clearly through print, digital, and visual media.
- Explain the function and impact of journalism and mass communication.
- Classify and separate different audiences for mass communication.
- Design and execute an effective job search in journalism.
- Conduct research for news stories using a variety of sources and evaluate the accuracy of information sources.

Certificate in Public Relations

- Apply the basic principles of public relations such as media relations, employee communication, and community relations.

- Discuss the legal and ethical underpinnings of public communication in the U.S.
- Interpret and use principles of digital and print design.
- Discuss and practice the principles of ethical and effective informative and persuasive writing.
- Explain the roles and functions of public relations.
- Discuss and execute persuasive communication strategies in public relations.
- Design and execute an effective job search in public relations.
- Design research to support and evaluate public relations campaigns.

Minor in Advertising

- Apply the basic principles of advertising theory.
- Discuss the legal underpinnings of advertising in the U.S.
- Interpret and use the principles of digital, on-line, and print design.
- Discuss and practice the principles of ethical and effective informative and persuasive writing in advertising.
- Explain the roles and functions of advertising.
- Discuss and execute persuasive communication strategies in advertising.
- Design and execute an effective job search in advertising.
- Formulate research to support and evaluate advertising campaigns.

Transfer Credit in Journalism

In order to comply with national standards in the journalism field, no more than 12 credit hours of communications courses from any other journalism program will be accepted for credit toward the 123 credit hours required for graduation.

All transfer communications courses must be evaluated by the executive associate dean in order to be accepted in fulfillment of requirements for the journalism major.

Undergraduate Programs

Academic counseling for each student in the School of Journalism is provided by a faculty member or an academic advisor prior to each semester's enrollment. Although academic counseling is intended to provide effective guidance, students are responsible for planning their own programs and for meeting the following degree requirements for graduation. Students are advised to read IU bulletin descriptions of all courses selected, paying careful attention to conditions concerning awarding of credit.

M.A. in Public Relations

Regardless of your undergraduate degree, you may apply at any time for admission to the School of Journalism at IUPUI master's program.

Application Deadlines

- Fall admission: July 15
- Spring admission: October 15
- Summer admission: April 1

Prerequisites

Within the first year of the program, if not previously taken or accounted for by professional experience, the student must have completed:

- Introduction to Public Relations
- Public Relations Writing
- Communication Law courses

Application Materials

1. IUPUI Online Graduate Application
2. Statement of Purpose (approximately 750 words)
3. Three (3) letters of recommendation from qualified professionals and/or professors
4. Official undergraduate transcripts and verification of a bachelor's degree from an accredited institution
5. Graduate Record Examination score (within the last 5 years)*
6. Resume (with work experience relevant to the degree)

*Those who have achieved Accredited in Public Relations from the Public Relations Society of America or Accredited in Business Communication from the International Association of Business Communicators are not required to submit a GRE score.

Admissions

- Master of Arts in Public Relations
- Master of Arts in Sports Journalism

M.A. in Sports Journalism

Regardless of your undergraduate degree, you may apply at any time for admission to the School of Journalism at IUPUI master's program.

Application Deadlines

- Fall admission: July 15
- Spring admission: October 15
- Summer admission: April 1

Application Materials

1. IUPUI Online Graduate Application
2. Statement of Purpose (approximately 500 words)
3. Three (3) letters of recommendation
4. Superior record in the undergraduate major from a recognized university as demonstrated by university transcript
5. Graduate Record Examination score (within the last 5 years)

Contact Information

The School of Journalism welcomes visitors and prospective students who wish to check out the facilities and meet faculty and students. Or, you may call or e-mail for more information.

For campus visits to the School of Journalism or for other information, call the school at (317) 278-5320 or e-mail jour@iupui.edu.

The School of Journalism at IUPUI is in the Informatics and Communications Technology building at 535 W. Michigan St., Indianapolis, IN 46202.

Get directions or see a map of campus, which shows parking options.

You may wish to contact these faculty members to inquire about specific programs:

- Jonas Bjork, graduate studies advisor
- Pamela Laucella, academic director, to learn about its programming

All other faculty contact info is in this directory.

Graduate Programs

Academic counseling for each student in the School of Journalism is provided by a faculty member or an academic advisor prior to each semester's enrollment. Although academic counseling is intended to provide effective guidance, students are responsible for planning their own programs and for meeting the following degree requirements for graduation. Students are advised to read IU bulletin descriptions of all courses selected, paying careful attention to conditions concerning awarding of credit.

Degree Programs

The IU School of Journalism offers Master of Arts (M.A.) degrees in the following disciplines:

- **Public Relations**
- **Sports Journalism**

Student Learning Outcomes

At the graduate level, the school offers M.A. degrees in Sports Journalism and Public Relations. The public relations degree has three tracks: Public Relations, Public Relations in Health Care and Life Sciences, and Public Relations in Sports. These are the learning outcomes for each program.

M.A. in Public Relations

Upon completion of this program, graduates will be able to:

- Apply formative and evaluative research in public attitudes and behaviors.
- Design and develop strategic goals and objectives for public relations.
- Apply the underlying theories of communication to public relations programs and campaigns.
- Apply basic business accounting and finance principles to the management of public relations programs and campaigns.
- Apply basic marketing techniques practiced by businesses.
- Explain and describe business marketing activities, economics, business law, and global business practices.
- Effectively evaluate public relations campaigns and programs.
- Summarize management theory and practice in public relations.

M.A. in Public Relations - Track on Health Care and Life Sciences

In addition to the learning outcomes for the M.A. in Public Relations, graduates will be able to:

- Describe and explain the operation of health care systems and communication as it relates to those systems.
- Demonstrate and plan public relations in the regulated communications environment of life sciences companies and organizations.

M.A. in Public Relations - Track on Sports

In addition to the learning outcomes for the M.A. in Public Relations, graduates will be able to:

- Describe and explain the operation of amateur and professional athletic organizations and communication as it relates to those systems.
- Describe and explain the regulated communications environment of both amateur and professional sports.

M.A. in Sports Journalism

Upon completion of this program, graduates will be able to:

- Demonstrate excellent oral and written communication skills using print, broadcast, digital, and social media.
- Appraise and apply journalistic values and ethical standards and their use in both traditional news media and the evolving field of digital sports media.
- Analyze and write about sports in a larger social context involving economic, legal, social, and political issues.
- Evaluate the symbiotic relationship between sports and the media from historical and contemporary perspectives.
- Assess the strategic differences used in communicating with news audiences on print, broadcast, and digital platforms.
- Manage and implement new forms of sports journalism online, including blogging, tweeting, and streaming audio and video.

Academic Policies & Procedures

Absences from Final Examinations

Students are required to adhere to the policies regarding final examinations as published in the *Schedule of Classes*.

Absences from Scheduled Classes

Illness is usually the only acceptable excuse for absence from class. Other absences must be explained to the satisfaction of the instructor, who will decide whether omitted work may be made up.

Addition of Courses

No course may be added by an undergraduate student after the first week of a semester or a summer session unless the instructor of the course approves and the request is approved by both the chairperson of the department in which the course is offered and the dean.

Change of Grade

Requests for a change of grade must be made no later than the last day of classes of the next regular semester.

Confidentiality of Records

Indiana University, in compliance with the General Education Provisions Act, Section 438, titled Family Educational Rights and Privacy Act, and the university's Policy on Access to Institutional Data, provides that

all student records are confidential and available only to eligible employees of the university for use in the conduct of university business (as determined by data stewards), the student, and the parents, if the student is under 21 and dependent as defined by IRS standards. Students may review their records upon request and may ask for deletions or corrections of the record in a hearing process described in detail in the *Code of Student Rights, Responsibilities, and Conduct*, distributed at fall registration or available in Bloomington at the Office of Student Ethics, Assistant Dean of Students Annex, or the School of Journalism office, IT 557, Indianapolis.

References, recommendations, and other similar documents may carry a voluntary waiver relinquishing the student's right to review this specific material. The student may also release the record to others by signing a written release available in the offices that maintain records. Further details regarding the provisions of the Privacy Act and a list of offices where student records are kept may be found in the *Code of Student Rights, Responsibilities, and Conduct*.

Correspondence Courses

With the approval of an academic advisor, students may take a limit of two Independent Study university courses offered through the School of Continuing Studies for the B.A.J. degree.

Credit by Examination

The school will apply credit earned by departmental examination, College Board Achievement Placement Tests, College Board Advanced Placement Tests, and language placement tests offered by the Bureau of Evaluative Standards and Testing toward appropriate degree requirements. Such credit must be entered on the student's transcript. At Indianapolis, students wishing special language credits through the credentialing process must file an application for special credit and pay a fee or charge per credit for additional credits. Indianapolis students should contact the Foreign Language Office, (317) 274-2817, for complete information.

Degree Applications

Candidates for the B.A.J. must file an intent to graduate form in the school's main office in the Information Technology Building 557 at Indianapolis.

- **Deadlines to file**:
  - May or August graduation - February 1
  - December graduation - October 1

Candidates must have all credits on record at least six weeks prior to the conferring of degrees, except for credits of the current semester.

Dual Bachelor's Degree

In certain cases the dean may permit undergraduate students who have not yet completed a first bachelor's degree to complete a second bachelor's degree. Such students must complete all requirements for the B.A.J. and the second degree. Students with a bachelor's degree should consider applying for admission to a graduate program.

Exceptions to Degree Requirements

Requests for deviation from school requirements may be granted only by written approval from the dean of the school (or the dean's administrative representative).

Incomplete Courses

A grade of Incomplete (I) may be given only when the work of the course is three quarters completed and when the student's work is of passing quality. All Incomplete (I) grades must be removed within the time specified by the instructor of the course or they will automatically change to an "F" one calendar year after the end of the semester/session the grade of I was given. It is the student's responsibility to obtain from the instructor the requirements and deadline for the removal of the incomplete. Students who receive a grade of "I" should not register for the course a second time.

Language Placement for International Students

Students whose native language is not English may demonstrate required proficiency in their language. Students are required to take a proficiency exam from the department of their native language. Students must place at or above the fifth semester. They cannot earn credit for courses at the first- or second-year level in their native language.

Pass/Fail Option

Students in good academic standing may take up to eight elective courses, maximum two courses per academic year, for a grade of "P" (pass) or "F" (fail). No courses used to fulfill major requirements, second concentration, fundamental skills, distribution, or culture studies requirements may be taken under the Pass/Fail option.

During the freshman year, students may take two physical education "E" classes under the Pass/Fail option in addition to the two other courses permitted.

Students must meet the deadlines to enroll in courses under the Pass/Fail option as listed each semester in the *Schedule of Classes*. A grade of "P" is not calculated in the grade point average; a grade of "F" is calculated in the grade point average. A grade of "P" cannot be changed subsequently to any other letter grade.

Public Information

Upon request, certain information is made available to the public by the Office of the Registrar: Bloomington, Franklin 100, (812) 855-0121; Indianapolis, Campus Center, (317) 274-1501.

Release of Information in Student Records

An implicit and justifiable assumption of trust is placed in the School of Journalism as custodian of personal data submitted by students entering the school or generated during their enrollment. This mutual relationship of trust between the school and the individual student requires that such data be held in confidence. More information on the confidentiality and access to student records appears in the front portion of the bulletin.

Statute of Limitations

Permission must be obtained from the Office of the Executive Associate Dean to use any course that was completed 10 or more years previously as credit toward the B.A.J. degree.

Withdrawal from Courses

The school permits withdrawal from courses with the automatic grade of Withdrawn (W) within the deadlines of the current campus as published in the *Schedule of Classes*.

Petitions for withdrawal after the periods specified in the *Schedule of Classes* will be considered by the dean only for urgent reasons related to extended illness or equivalent distress. Documentation of extended illness or equivalent distress will be required.

If students withdraw with the dean's consent, their mark in the course shall be "W" if they are passing at the time of withdrawal and "F" if they are not passing. The grade will be recorded on the date of withdrawal. Failure to complete a course without authorized withdrawal will result in the grade "F".

Academic Standing of Candidates for the Bachelor of Arts in Journalism Degree

Degrees Awarded with Distinction

The school recognizes outstanding performance in course work by awarding the Bachelor of Arts in Journalism degree with three levels of distinction: Distinction, High Distinction, and Highest Distinction, depending upon the student's cumulative grade point average. Students must have a minimum of 60 graded credit hours at Indiana University to be considered for distinction degrees. No more than 10 percent of the graduating class may receive distinction.

FX Policy

The School of Journalism will honor the university FX policy up to 15 credit hours.
A student may use the FX option for purposes of the university transcript. An undergraduate student who has repeated a course previously failed may request to have the best grade in that course counted in the student's grade point average as entered on the student's transcript.

Good Standing

Students are considered to be candidates in good standing for an Indiana University bachelor's degree when they have been regularly admitted by the Office of Admissions, when their academic grade point average is not less than a 2.0 (C) for the last semester's work, and when their cumulative grade point average is at least 2.0 (C).

Students' eligibility to continue as journalism majors is subject to a periodic review of their progress toward a degree.

Academic Probation

Students are on academic probation when any one or more of the following conditions occur: 1. Students are on academic probation when their cumulative grade point average is below 2.0 (C).
2. Students are on academic probation for the duration of the regular semester following one in which they failed to attain a 2.0 (C) grade point average.
3. Students are on academic probation when they receive a "D+" or less in any one journalism, telecommunications, or selected communication and culture course.

Students on academic probation must comply with such restrictions as the Office of the Dean of Students or the Dean of the School of Journalism may deem necessary.

Dismissal

Students are dismissed from the school when, in the judgment of the dean, they have ceased to make progress toward their degree. When students have failed to attain a 2.0 (C) grade point average in any two semesters and when their cumulative grade point average is below 2.0 (C); or they have received a "D+" or less in two or more journalism, telecommunications, or selected communication and culture courses, they are automatically considered to be making insufficient progress toward their degree.

Students whose record reveals failing or near-failing performance or lack of clear progress in any semester, regardless of their previous cumulative grade point average, or whose cumulative grade point average falls below 2.0 (C) are always carefully evaluated with a possibility of dismissal.

Academic Forgiveness

We follow university policy on academic forgiveness.

Academic Dishonesty

Indiana University and the School of Journalism expect that students will follow the fundamental principles of academic and professional integrity in the pursuit of learning and of professional practice. Academic and professional integrity requires that students take credit for their own work and ideas only. Violation of these principles is considered an act of academic dishonesty.

Academic dishonesty is defined in *Code of Student Rights, Responsibilities, and Conduct*, the student handbook given to all Indiana University students. The School of Journalism strictly follows the handbook's guidelines and the policy on Academic Dishonesty printed each semester in the Bloomington *Schedule of Classes*.

Program Planning & Counseling Guidelines

The Students' Responsibility

Students are responsible for planning their programs and meeting all graduation requirements. Students should be thoroughly familiar with all sections in this bulletin regarding admission, degree requirements, major requirements, course requirements, academic regulations, and academic standing.

Students are also responsible for policy information and meeting all deadlines as published in the *Schedule of Classes* and for keeping their local and permanent addresses up to date with the Office of the Registrar. Faculty advisors, academic counselors, and the recorder can assist students in planning their programs and explain requirements and policies. Students also have access to the computerized degree-audit system in the advising section of OneStart.

Advising

Journalism majors are expected to meet with their advisor prior to each registration. For this purpose, the school administers an advising process each semester. Advising for registration in fall courses usually occurs in March and for registration in spring courses in October. In these advising conferences students should, as a

minimum objective, make certain that they understand the requirements for successful completion of the area requirements and that they have made an appropriate plan for the coming semester.

For questions at any time during the semester, students may schedule an appointment with the Director of Career Services & Outreach.

Access to Journalism Courses at Indianapolis

All journalism courses are open to nonmajors. Nonmajors should have completed appropriate prerequisites for advanced courses or have obtained permission from the instructor.

Student Organizations & Services

Society of Professional Journalists

Open to students interested in careers in news.

Public Relations Student Society of America

Open to students interested in careers in public relations.

National Association of Black Journalists

The School of Journalism has a chapter of the National Association of Black Journalists, which is an organization comprised of journalists, students, and media-related professionals that provides quality programs and services to and advocates on behalf of black journalists worldwide.

Courses

Graduate Courses

JOUR-J 500 Introduction to Mass Media Research (3 cr.) Seminar on content analysis, experiments, survey methods, qualitative research, historical and legal methodology. Development of media research proposals.

JOUR-J 501 Public Affairs Reporting (3 cr.) Reporting and publishing in a hyper-local news environment, on government and other areas of public interest.

JOUR-J 502 Quantitative Research Methods for Journalists (3 cr.) Open to graduate students only. The purpose of this course is to teach students about research/methodology and scientific evaluation as it is applied to all mass communication professions, from investigative journalism to public relations and advertising. This is a hands-on course. The primary objective is to teach students how to collect, manage, evaluate, interpret and understand data. The course will focus entirely on quantitative methodologies that journalists and communication practitioners commonly encounter in their daily professional lives, and it will help students engage in data analysis, and work toward a better understanding of scientific and social-scientific methodology.

JOUR-J 505 Intensive Reporting, Writing, and Editing Workshop (3 cr.) P: By permission only. This course introduces graduate students to the fundamental practices and principles of writing, reporting, editing and design for the print media. Students will develop skills in news judgment, document-based information gathering, interviewing, observation and description, news and feature writing, ethics, page layout, headline writing, copy editing, content editing, and photo editing.

JOUR-J 510 Media and Society Seminar (3 cr.) Examination of structure, functions, ethics, and performance of communication and mass media, stressing a review of pertinent research literature. Analysis of media policies and performance in light of communication theory and current economic, political, and social thought.

JOUR-J 514 International Communication (3 cr.) Comparative analysis of international media systems. Course topics and geographical regions studied vary from semester to semester.

JOUR-J 516 Digital Journalism Practicum (6 cr.)

JOUR-J 517 Advanced Digital Journalism Practicum (6 cr.) This course is a continuation of J516: Digital Journalism Practicum and is open to Digital Journalism track students only.

JOUR-J 520 Seminar in Visual Communication (3 cr.) Integration of advanced visual communication skills, including photography, writing, and editing. Individual projects in packaging news and public affairs information. Emphasis on experimentation with message forms outside constraints of the traditional news media.

JOUR-J 528 Public Relations Management (3 cr.) Designed to enable students to manage a public relations department. Theories and principles relevant to public relations practiced in agency, corporate, and not-for-profit organizations will be covered. This will include developing goals and objectives, working with clients, developing budgets, and research methods.

JOUR-J 540 Business of Sports Media (3 cr.) This course will provide of how sports media have evolved from radio, network television and magazines into the multi-dimensional world of regional and national cable, the internet, the networks and other entities. Students will also explore how decisions get made and the financial implications of those decisions.

JOUR-J 541 Digital Sports Journalism (3 cr.) Students will learn how to adapt their skills in traditional journalistic platforms to the new multimedia environment, including

websites and mobile devices. The course will teach students the fundamentals of writing, editing, shooting video and recording audio content for a sports website.

JOUR-J 560 Topics Colloquium (1-4 cr.) Topical seminar dealing with changing subjects and material from semester to semester. May be repeated twice for credit with a different topic.

JOUR-J 563 Computerized Publication Design I (3 cr.) This publishing design course incorporates typesetting, electronic photo editing, graphics, and page design. Students are instructed in design theory, computer publishing skills, and creative problem solving.

JOUR-J 660 Topics Colloquium (3 cr.) Topical seminar dealing with changing subjects and material from semester to semester. May be repeated twice for credit.

JOUR-J 804 Read and Research in Journalism (1-9 cr.)

Sports Journalism

JOUR-J 219 Introduction to Public Relations (3 cr.) Provides an overview of public relations and introduces theory and practice of the field. Topics include the relationship between public relations and marketing, the history and development of public relations, media relations, measurement and assessment methods, ethics, and law.

JOUR-J 321 Principles of Public Relations (3 cr.) Students are introduced to the creative integration of advertising and public relations as a mass media campaign tool. Topics include the role of integrated communications in marketing and media, an examination of current practice, and the creative process of a campaign, including planning strategies and media characteristics.

JOUR-J 340 Public Relations Tactics and Techniques (3 cr.) P: J219 Covers a wide variety of knowledge and skills needed by entry-level public relations practitioners. Topics include media relations, community relations and internal communications.

JOUR-J 390 Public Relations Writing (3 cr.) A comprehensive survey of corporate publications from newsletters to corporate magazines, tabloids and annual reports with an emphasis on layout and design. Includes refreshing writing skills with review on interviewing and editing.

JOUR-J 427 Public Relations in a Democratic Society (3 cr.) Lectures and discussion on dissemination of public information by industry and institutions. Examination of procedures and policies and evaluation of public relations efforts. Contrasts public relations practices in America with those in other nations and cultures.

JOUR-J 428 Public Relations Planning & Research (3 cr.) P: J340 and J427. Theories and principles relevant to public relations practices in agency, corporate and nonprofit organizations, including development of goals and objectives, client relationships, budgets and research methods.

JOUR-J 429 Public Relations Campaigns (3 cr.) P: J340 and J427. Development and execution of a public relations campaign for a nonprofit organization. Public relations theory and in-depth case study analysis.

JOUR-J 431 Public Relations for Nonprofits (3 cr.) This seminar focuses on how a nonprofit organization creates images and how it shapes its programs and goals to gain public support. Assignments and readings are designed to foster a practical understanding of promotional techniques and campaigns using journalistic and other media.

Sports Journalism

JOUR-J 150 An Introduction to Sports Journalism: Controversy, Conflict & Characters (3 cr.) This course will explore the state and practice of sports journalism, through case studies of some of this decade's most controversial sports stories. We will explore these issues through evaluating coverage, reading related texts and talking directly to prominent sports journalists, executives and athletes.

JOUR-J 152 Introduction to Sports in Society (3 cr.) This course will introduce students to sports and will take a macroscopic approach in discussing sports' societal influence. It will study sport from a socio-cultural-historical perspective as well as from a contemporary position. It will focus on the converging worlds of print journalism, electronic media, public relations, advertising, documentary and emerging technologies as expressed in the new commercial reality of sport.

JOUR-J 345 Sports Journalism Writing (3 cr.) This class will offer an overview of sports writing from its origins to its current status in the twenty-first century. The course will teach students fundamentals of the sports-writing process from information gathering and interviewing to writing and editing copy. Students will gain requisite skills for working in today's sports departments and will write and publish stories on IUPUI athletics and area professional teams and events.

JOUR-J 361 Issues in Sports Journalism (3 cr.) This upper-level course will study sports journalism's key policies, trends and issues. It will examine sociological, political, legal, ethical and technological issues in college and professional sports. It will focus on current events and controversies in the world of sports journalism. This course will discuss the symbiotic relationship between sport media and race, gender, doping, steroids, sexuality and homophobia, politics and nationalism, sports fans, loyalty and violence, disability in sport, and other provocative issues.

Undergraduate Courses

JOUR-C 190 Perspectives on Communication (1 cr.) Students are introduced to college learning within a journalism and mass communications environment. Classroom instruction, library activities, and projects are designed to introduce technology and information resources, develop teamwork, and sharpen analytical and evaluative skills. Topics include career planning, study techniques, time management, data collection, and presentations.

JOUR-C 201 Topics in Journalism (3 cr.) Topical course dealing with changing subjects and material from semester to semester. May be repeated once for credit with a different topic. Will not count toward journalism major requirements.

JOUR-C 300 The Citizen and the News (3 cr.) A study of the institutions that produce news and information about public affairs for the citizens of American mass

society. The problems about the selection of what is communicated. Case studies. International comparisons. Will not count toward journalism major requirements.

JOUR-C 327 Writing for Mass Media (3 cr.) A workshop for nonmajors to improve writing skills and learn basic requirements of writing for publication. Instruction in market analysis and interpreting specific editorial requirements, in gathering and researching background materials, and in preparing manuscripts. Examination of various types and styles of published writing. Will not count toward journalism major requirements.

JOUR-J 100 Computer Methods for Journalism (3 cr.) An introduction to computing uses in journalism. Hands-on experience with computer software packages commonly used in journalistic research and expression. Experience with using the Internet, Lexis/Nexis, and other library resources for research. This course is for students on the Indianapolis campus only. Bloomington students take JOUR J155 Research Techniques for Journalists.

JOUR-J 110 Foundations of Journalism and Mass Communication (3 cr.) Survey of the institutions of journalism and mass communication, their philosophical foundations, history, processes, economic realities and effects.

JOUR-J 200 Reporting, Writing and Editing I (3 cr.) P: W131 or its equivalent and fundamental computer skills. P or C: JOUR J155 in Bloomington, J100 in Indianapolis. Working seminar stressing the creation of journalistic stories for diverse audiences. Students will learn to develop story ideas, gather information, combine visual and verbal messages, and to write and edit news.

JOUR-J 201 Reporting, Writing and Editing II (3 cr.) P: J200. Working seminar focused on the strengthening of basic journalism skills, including in-depth reporting, editing, and multimedia presentations. Creativity, cooperation, and critical thinking are used to shape effective messages for diverse audiences.

JOUR-J 210 Visual Communication (3 cr.) Theories of visual communications including human perception, psychology of color and principles of design. Application of those theories to photography, video and graphic design in news communication.

JOUR-J 300 Communications Law (3 cr.) P: sophomore standing. History and philosophy of laws pertaining to free press and free speech. Censorship, libel, contempt, obscenity, right of privacy, copyright, government regulations, and business law affecting media operations. Stresses responsibilities and freedoms in a democratic communications system.

JOUR-J 315 Feature Writing (3 cr.) P: J200, J210. Emphasis on developing story ideas, identifying sources, organizing materials, planning, and outlining the story. Techniques for capturing the reader's interest.

JOUR-J 320 Principles of Creative Advertising (3 cr.) Analysis of strategy employed in developing creative advertising, with emphasis on role of the copywriter. Research, media, legal aspects, ethical standards as they apply to the copywriting functions. Place of the creative function within the advertising agency and the retail business.

JOUR-J 335 Retail and Direct Advertising (3 cr.) P: J200, J210, J320. Role of advertising in retail and service establishments. Forms of retail and direct media advertising, including production and distribution. Procedures, requirements, and techniques of newspaper advertising departments and broadcast stations; in-store promotions; budgeting; evaluation.

JOUR-J 337 Media Economics (3 cr.) This course explores how economic forces influence production of media content, particularly at U.S. organizations. It examines basic economic concepts, such as market and competition, as they relate to commercial media organizations. Special attention is paid to the effect of advertising and market considerations on news decision making.

JOUR-J 341 Newspaper Reporting (3 cr.) P: J200, J210. Techniques of gathering, analyzing, and writing news and features for newspapers. Practice in interviewing, observation, and use of documentary references that include computer information retrieval and analysis skills.

JOUR-J 342 Magazine Reporting (3 cr.) P: J200, J210. Techniques of gathering, analyzing, and writing material for specialized and general circulation magazines. Practice in interviewing, observation, and use of documentary references that include computer information retrieval and analysis skills.

JOUR-J 343 Broadcast News (3 cr.) P: J200, J210. Techniques of gathering, analyzing and writing news and features for broadcast. Practice in interviewing, observation and use of documentary references that include computer information retrieval and analysis skills.

JOUR-J 344 Photojournalism Reporting (3 cr.) P: J200, J210. This is an introductory photojournalism course focusing on the basics of light, camera operation, and the use of chemical and digital darkrooms. It includes instruction in spot news and feature photography as well as instruction in ethics, privacy and law.

JOUR-J 351 Newspaper Editing (3 cr.) P: J200, J210. Workshop in fundamentals of editing newspapers, including both individual and team projects. Emphasis on news judgment, fairness, accuracy, editorial balance, and language usage. Practice in writing news summaries, editing copy, writing headlines, laying out pages, and using computer editing technology.

JOUR-J 352 Magazine Editing (3 cr.) P: J200, J210. Workshop in fundamentals of editing specialized and general interest publications. Individual and team functions are stressed. Attention is given to editorial voice and judgment, fairness, accuracy, and language usage. Practice in writing headlines and titles, layout, design, and use of computer editing technology.

JOUR-J 353 Advanced Broadcast News (3 cr.) P: J200, J343. Continuing workshop in reporting, writing and editing for broadcast. Individual and team functions are stressed. Emphasis on news judgment, fairness, accuracy, editorial balance and language usage. Practice in editing copy, audio and video tape.

JOUR-J 354 Photojournalism Editing (3 cr.) P: J344 or permission of the instructor. Workshop on the role and function of the print media picture editor. Theory and practice of picture editing skills including assigning,

selecting, cropping, writing captions and blurbs, producing informational graphics, designing photo pages, editing by computer, and managing.

JOUR-J 360 Journalism Specialites (1 - 3 cr.) P: Must have taken J360 Newscast Skills or J360 Topical course dealing with changing subjects and material from semester to semester. Course may be repeated once for credit.

JOUR-J 385 Television News (3 cr.) P: J343 and J353, or consent of instructor. Preparation and presentation of news for television. Practice in writing, reporting, filming, and editing news for TV. TV writing problems; use of photographs, film, and videotape; problems of sound in TV news; ethical problems of the TV film reporter and editor.

JOUR-J 401 In-Depth Reporting and Editing (3 cr.) P: One 300-level reporting course and one 300-level editing course. Study and practice in using techniques of social science and traditional methods of investigative reporting. Class will plan, write, and edit news stories in depth.

JOUR-J 407 News Gathering and the Law (3 cr.) Students study the law relating to the content of news media and the processes by which that content is created. Discussion includes the legal issues triggered by story framing, selection of sources, interviewing, photography, and access to information. The course involves reading and research using primary legal materials.

JOUR-J 409 Media Management (3 cr.) Research seminar that examines techniques and processes used in managing media organizations. Through discussions, case analysis, and group projects, the course explores organizational missions and social responsibilities, market analysis techniques, personnel management issues, and budgeting.

JOUR-J 410 The Media as Social Institutions (3 cr.) P: J300, senior standing. Examination of the functions and impact of the mass media in society with primary focus on the United States. Discussion of the values of media organizations and the professional and ethical values of journalists. Critical analysis of the relationship of the media and society and the effect of political, economic and cultural factors on the operation of the media.

JOUR-J 413 Magazine Article Writing (3 cr.) P: J342. In-depth explanation of the nonofiction magazine article field. Examination of trends and problems in nonfiction writing for both general and specialized magazines. Criticism of student articles written for publication. Seminar sessions with editors and freelance writers.

JOUR-J 414 International News-Gathering Systems (3 cr.) Structure and function of international communication systems and barrier to flow of information among nations. Emphasis on gathering and disseminating information around the world. Study of the major newspapers of the world, international news agencies, and international broadcasting and satellite networks.

JOUR-J 415 Literary Journalism (3 cr.) A study of literary forms and techniques used in journalism. Topics to be considered include formal considerations such as voice and structure, reporting methods, and ethical issues. Students will supplement reading with writing experimental pieces of their own.

JOUR-J 420 Advertising Research & Management (3 cr.) P: J200, J210, J320. Lectures and practice in copywriting, graphics, layout and production. Incorporates psychological, social, legal and marketing aspects of creativity for mass media.

JOUR-J 423 Public Opinion (3 cr.) Behavioral study of nature, operation, molding, and influence of public opinion, with practice in its measurement and evaluation. Discussion of major political, social, economic, and cultural problems.

JOUR-J 425 Supervision of School Publications (3 cr.) P: 12 credit hours of journalism. Lectures and discussion on designing, producing and financing school newspapers, magazines and yearbooks. Management of school news bureau.

JOUR-J 438 Advertising Issues & Research (3 cr.) P: J320 and permission of the instructor. Seminar on current developments and problems concerning advertising as an economic and social force. Stresses independent investigation on topics such as politics and advertising and advertising and public taste.

JOUR-J 444 Advanced Photojournalism (3 cr.) P: J344. Advanced techniques of reporting and interpreting news with photography. Practice in news, sports, features, photographic essays, color photography, electronic imaging, and studio illustration.

JOUR-J 450 History of Journalism (3 cr.) American social-intellectual history integrated with the story of news media development, emphasizing the historical relationship of the mass media to American social, economic, and cultural patterns and developments. Origin, growth, shortcomings, and achievements of media. Impact of society on the media and vice versa.

JOUR-J 455 News Analysis and Opinion Writing (3 cr.) P: J200, J210. Techniques for understanding, analyzing and reporting on complex events and issues. Development and refinement of skills and techniques for writing news analysis, editorials and opinion articles.

JOUR-J 460 Topics Colloquium (1-3 cr.) P: Junior or senior standing. Topical seminar dealing with changing subjects and material from semester to semester. May be repeated once for credit with a different topic.

JOUR-J 463 Computerized Publication Design I (3 cr.) P: J200, J210. This publishing design course incorporates typesetting, electronic photo editing, graphics and page design. Students are instructed in design theory, computer publishing skills and creative problem solving.

JOUR-J 465 Computerized Publication Design II (3 cr.) P: J463. This publishing design course incorporates typesetting, electronic photo editing, graphics, and page design. Students are instructed in design theory, computer publishing skills, and creative problem solving.

JOUR-J 470 Broadcast Media Analysis (3 cr.) Seminar on problems of communicating news through aural and visual channels. Application of communications theory to broadcast news and public affairs presentations. Study of effects of format, verbal content, nonverbal content, and presenter on communications process.

JOUR-J 475 Race, Gender, and the Media (3 cr.) Survey and analysis of how news and entertainment media

represent issues of race and gender. History of women and people of color as media professionals and media consumers. Discussion of contemporary problems and potential solutions.

JOUR-J 492 Media Internship (1 - 3 cr.) (S/F grading) P: Prior approval of faculty member; journalism majors only. Supervised professional experience in communications media. May be repeated, but a student may take no more than 3 credit hours total of internship credit for the B.A.J. degree.

JOUR-J 493 Journalism: Off-Campus Registration (0 cr.) This noncredit course is for journalism students studying off campus temporarily as part of the Bachelor of Arts in Journalism degree program.

JOUR-J 496 Foreign Study in Journalism (3-8 cr.) P: Consent of the dean of the School of Journalism. Planning of research project during year preceding summer abroad. Time spent in research abroad must amount to at least one week for each credit hour granted. Research paper must be presented by end of semester following foreign study. I Sem., II Sem., SS.

JOUR-J 499 Honors Research in Journalism (1-3 cr.) Opportunity for independent reading, research, and experimentation on relevant issues in mass communications. Work with faculty member on individual basis. I Sem., II Sem., SS.

School of Law

Welcome to the IU School of Law - Indianapolis!

Situated at the intersection of education and experience, the IU School of Law-Indianapolis offers students the sought-after combination of academic excellence and professional opportunity that only a metropolitan location can provide. Inlow Hall, the home of the law school, is just steps away from everything a major urban environment affords: business, government, life sciences, medicine, sports, and the arts. You will make connections that will prepare you for a wide array of careers.

We're the largest law school in Indiana, one of two at Indiana University, offering the greatest opportunity for hands-on experience in our urban setting. But while we have an enrollment of nearly 1,000, each student gets the kind of hands-on attention you might expect from a small school. Our culture is a blend of Midwestern friendliness and metropolitan energy, characterized by personal attention from faculty and staff.

Overview

Opportunity

The IU School of Law-Indianapolis prepares students for a wide range of diverse and exciting careers. From practicing law to managing corporations, the school's nearly 10,000 graduates excel not only in Indiana, but across the country and around the world. Law school alumni have served in the highest offices in government, including the U.S. vice presidency, the Senate, and the House of Representatives.

The Indianapolis legal and business communities offer opportunities for connections that no other law school in the state can provide. Many of the school's adjunct professors come from some of the most prestigious law firms in the state. Additionally, an attorney-student mentor program allows students to meet a variety of area attorneys, judges, and business and government leaders in an informal setting.

Externships are available in a vast array of institutions, including banks, corporations, and government offices. Many externships also are available with local, state, and federal courts. The school also offers clinical programs designed to complement traditional legal education with experience beyond the classroom. With faculty supervision, students represent real clients in actual cases before Indiana courts through clinics in Criminal Defense, Civil Practice, Disability Law, Immigration Law and Appellate Practice.

Faculty and Curriculum

Faculty members hold Doctor of Jurisprudence, master's, and doctoral degrees from more than 50 different schools, offering students extensive and diverse views on the law and its career possibilities. Assembled from across the country, the faculty has distinguished itself with a wide variety of scholarly publications related to state, national, and international legal matters.

Refined analytical acumen, well-honed communications skills, highly developed ethical sensibilities: these are the hallmarks of an IU Law-Indianapolis graduate.

Required courses are complemented by a vast array of in-depth, innovative seminars and specialized classes, designed to prepare students to be exceptional problem solvers, effective mediators, and persuasive advocates. Our legal writing program was ranked 8th in the nation in 2009. This unique program is a comprehensive series of courses that lays the foundation for all of our students' legal studies and professional work.

A student may pursue a J.D. degree on a full-time basis in the school's day division or on a part-time basis through the evening program. Typically, a full-time student will complete the 90 required hours within three years, while a part-time student will do so within four years.

Facilities

Campus Visits and Additional Information

We encourage you to visit us and meet with our staff and students. To arrange for a visit or request an application, please write or call our Admissions Office, IU School of Law-Indianapolis, 530 W. New York Street, Indianapolis, IN, 46202-3225; telephone (317) 274-2459; or e-mail lawadmit@iupui.edu. Web site: indylaw.indiana.edu. We look forward to hearing from you.

Admission

Pre-Law Program

While law schools do not require a specific undergraduate major or a specific set of undergraduate courses as prerequisites for admission, they do urge students to take additional writing and public speaking courses, as well as courses involving research and analysis. The Department of Political Science in the School of Liberal Arts and SPEA provide pre-law advising and a series of courses related to the law and government that are attractive to students interested in the study of the law. Other schools also offer courses of relevance to students considering the study of the law.

For more Admission information please see: http://indylaw.indiana.edu/admissions/

Graduate Programs

To obtain more in-depth information regarding the IU School of Law - Indianapolis programs of study, please refer to the following website: http://indylaw.indiana.edu/courses/.

- Doctor of Jurisprudence (J.D.)
- Master of Laws (LL.M.)
- Doctor of Juridicial Science (S.J.D.)

J.D. Program

We begin accepting applications on **September 1**. Applications should be complete with the CAS law school report by **March 1** to be assured of consideration for regular admission. (**February 1** if applying for the special summer program). Because admissions decisions are made as early as January, applications received close to or after March 1 may be at a disadvantage, as a substantial number of seats in the entering class will have been filled before the applicant's report is received. Applicants who wish to apply through the Early Decision Program must have their applications complete by **November 15**.

Prerequisites

To be eligible for admission to our Doctor of Jurisprudence (J.D.) program, applicants must have a bachelor's degree from an accredited college or university. Applicants must also take the Law School Admissions Test (LSAT) and register with the Credential Assembly Service (CAS) through the Law School Admissions Council (www.lsac.org).

Students Without Degrees

Under exceptional circumstances, applicants who do not have an undergraduate degree may be admitted as candidates for the Bachelor of Law (LL.B.) degree. Applicants may be considered for admission to the LL.B. program if they meet **ALL** of the following criteria:

- The applicant is at least 30 years old.
- The applicant has completed at least three-fourths of the credit hours required for a bachelor's degree with a GPA of 3.3 or higher.
- The applicant has not been enrolled in an academic program for at least five years.
- The applicant scored in the 75th percentile or higher on the LSAT.

LSAT

The LSAT is given four times each year. Specific dates and locations are available on the Law School Admission Council's Website: www.lsac.org. We strongly advise applicants to take the LSAT in the summer of the year preceding the year in which they plan to apply for admission, and not later than December. If you wish to apply through our Early Decision Program, you must take the LSAT no later than October.

Applicants may register for the LSAT and the CAS as well as obtain forms online at the Law School Admission Council's Website: www.lsac.org. LSAT and CAS registration information may also be picked up at the reception desk:

Indiana University School of Law - Indianapolis

530 West New York Street
Indianapolis, Indiana 46202-3225

An LSAT score is valid for three years for purposes of applying to Indiana University School of Law-Indianapolis.

Transfer Students

An applicant who would have been eligible for admission as a beginning student and who has compiled a superior record at an ABA approved law school may be admitted with advanced standing. The amount of transfer credit accepted (up to 31 credit hours) depends upon the quality of the applicant's record and similarity of the course work completed at the other school to the program at the School of Law - Indianapolis. For more information, see the instructions for Admission with Advanced Standing.

International Applicants

International applicants should use the online application through LSAC at www.lsac.org. Foreign transcripts are required to be submitted through the LSAC JD Credential Assembly Service. This service is included in the CAS subscription fee. If you completed postsecondary work outside the US (including its territories) or Canada, you must use this service for the evaluation of your foreign transcripts. Questions about this service can be directed to LSAC at 215-968-1001,LSACINFO@LSAC.org or visit the website at www.lsac.org for additional information. International applicants are also required to complete the Indiana University International Application which can be found at www.iupui.edu/~oia. TOEFL scores must be sent to IU School of Law -Indianapolis (Code 1325). The international application should be sent directly to:

Office of International Affairs

902 W. New York Street, ES 2126
Indianapolis, IN 46202

The international application fee is $60.00. Unfortunately, we are no longer able to accept checks or money orders drawn from financial institutions outside of the U.S. Foreign students are encouraged to pay the application fee with a credit card when submitting the application electronically through the CAS.

LL.M. Program

Admission Requirements

To be eligible for admission, an applicant must hold either a J.D. from an ABA-accredited law school in the U.S. or an academic degree in law or comparable from an educational institution in a country other than the U.S. which makes the applicant eligible to become licensed to practice in that country. Documentation of all academic degrees and, where applicable, a license, is required.

Ordinarily, the academic degree of an international applicant must be comparable to a U.S. Bachelor's degree (for example, B.A., A.B., B.S.). A Master of Laws (LL.M.) degree will also qualify.

Applicants for whom English is a second language must have a paper-based TOEFL score of at least 560, a computer-based TOEFL of at least 213, an internet-based iBT TOEFL of at least 81+, or an IELTS score of at least 6. We will also accept a score of "First Grade" on the national Japanese English Proficiency STEP Exam. Qualifying language scores must be less than two years old.
Indiana University School of Law - Indianapolis will also accept successful completion of Intensive English Masters Level 112 at the ELS Language Center - Indianapolis as satisfaction of the English Language qualification.

Applicants interested in applying for the LL.M. Degree should download and submit application forms with all required, supporting documents to the Graduate Studies Admission as directed on the Application page of this web site. We are unable to accept on-line application submission at this time.

Application Deadlines

Application deadline for **Spring Admission** (classes begin January 9, 2012):
International Applicants - November 15
U.S. Citizens or Permanent Residents - December 1

Please contact directly Mr. Mel Yildiz, Assistant Director of Graduate Admissions for more information regarding applications at cmyildiz@iupui.edu or at (317)278-4701 or Skype: iulawindyllm.

Enrollments and tuition awards are limited and applicants will be evaluated when their completed applications and supporting documents are received. Early application is advised.

FEE WAIVER* ~ Indiana University School of Law – Indianapolis is currently offering an application fee waiver to all international LL.M. applicants due to increased visa expenses. To apply for this waiver, please contact Mr. Mel Yildiz.

S.J.D. Program

Admission to study toward the S.J.D. Degree at Indiana University School of Law – Indianapolis is determined by the law school's S.J.D. Admissions Committee. Please be aware that the requirements for admission are strictly applied and the number of candidates selected for study is very small.

Only applicants with exceptionally dissertation advisors, strong credentials, dissertation proposals, and English language proficiency are admitted.

To be eligible for admission as an S.J.D. candidate, an applicant must further satisfy the following criteria:

- hold the first degree in law (J.D. or LL.B);
- hold the Master of Laws (LL.M.) degree from I.U. Law-Indianapolis or another ABA accredited law school;
- demonstrate exceptional promise as a legal scholar, through submission of academic transcripts that reveal outstanding performance in prior academic programs, prior written work (such as an LL.M. thesis or published work) of high quality, and letters of recommendation attesting to the applicant's academic/professional achievements and strengths and weaknesses in ability to conduct sustained and in-depth research and legal analysis;
- submit a dissertation proposal that is sufficiently detailed and comprehensive to demonstrate that the dissertation will constitute an original and substantial contribution, of publishable quality, to legal scholarship, and that the applicant will be able to successfully complete the proposed dissertation; and
- obtain the written agreement of a tenured member of the law faculty who has agreed to serve and will be qualified to serve as Dissertation Supervisor.

All S.J.D. Applications must have a dissertation advisor as described above. Applications without a dissertation advisor will not be processed. **S.J.D Applicants are personally responsible for obtaining the written agreement of a tenured member of the law faculty**.

Non-Native English Speakers

Applicants for whom English is a second language must demonstrate English language proficiency sufficient to successfully undertake the research and writing required for the S.J.D. dissertation. Evidence of English language proficiency will include performance in prior academic degree programs for which English was the language of instruction and prior writings produced in English. The S.J.D. Degree at I.U. – Indianapolis is not a course-based program of study and ordinarily, coursework in law will have been completed as part of the first law degree and the Master of Laws degree. However, in the discretion of the S.J.D. Admissions Committee, admission may be conditioned on the applicant's completion of one or more courses in research methodologies or scholarly writing.

Application for Admission

Graduate Programs

To obtain more in-depth information regarding the IU School of Law - Indianapolis programs of study, please refer to the following website: http://indylaw.indiana.edu/courses/

Joint Degree and LL.M. Programs

Joint degree programs are offered in cooperation with Indiana University's Kelley School of Business, School of Public and Environmental Affairs, School of Liberal Arts, School of Library and Information Science, School of Social Work and School of Medicine. These include:

- J.D. and Master of Business Administration
- J.D. and Master of Public Affairs
- J.D. and Master of Public Health
- J.D. and Master of Science in Health Administration
- J.D. and Master of Library Science
- J.D. and Master of Social Work
- J.D. and Master of Philosophy (with a concentration in health law and bioethics)

The school also offers a Master of Laws (LL.M.) degree program with five possible tracks of study:

- American Law for Foreign Lawyers
- Health Law, Policy, and Bioethics
- Intellectual Property Law
- International and Comparative Law
- International Human Rights Law

Contact Information

School of Law—Indianapolis
Inlow Hall (IH)
530 W. New York Street
Indianapolis, IN 46202
(317) 274-8523
indylaw.indiana.edu

Degrees Programs

In addition to joint degree programs, Indiana University School of Law offers the following degree programs:

- Doctor of Juridical Science (S.J.D.)
- Doctor of Jurisprudence (J.D.)
- Master of Laws (LL.M.)

For more information on the programs of study visit us at our website.

Student Learning Outcomes

Doctor of Juridical Science (S.J.D.)
Students who graduate with an S.J.D. degree will:

- Compose and successfully defend a dissertation of publishable quality that constitutes an original and substantial scholarly contribution to the areas of law in which it is written.

Doctor of Jurisprudence (J.D.)
Students who graduate with a J.D. degree will:

- Identify and apply fundamental principles of Civil Procedure, Contracts, Criminal Law, Property, Torts and Constitutional Law.
- Communicate effectively with clients, decision-makers, and a range of other stakeholders in the legal system.
- Apply strategies for identifying, analyzing, researching and solving legal problems.
- Analyze a self-selected topic of interest in the law and write a substantial research paper on said topic.
- Recognize and resolve ethical issues in light of the history, traditions and responsibilities of the American legal profession and its members.
- Demonstrate mastery of at least one (1) professional skill generally regarded as necessary for effective and responsible participation in the legal profession.

Master of Laws (LL.M.)
Students who graduate with an LL.M. degree will:

- Identify and apply fundamental principles of their selected specialty track of study.
- Apply strategies for identifying, analyzing, researching and solving legal problems.
- Analyze a topic in the law related to their selected specialty track of study and write a substantial research paper of publishable quality on said topic (if required by the track of study).

Departments & Centers

Research Centers and Programs

From technology to teaching, innovation infuses all aspects of the law school. Its centers and programs are among the most respected in the country, enhancing a diverse and demanding curriculum with hands-on opportunities for research and experience.

The need for lawyers with special expertise in health law is acute, and the school's William S. and Christine S. Hall Center for Law and Health is at the forefront of providing students with an outstanding education in health law. The center is repeatedly ranked as offering one of the top health law programs in the country, offering interdisciplinary opportunities for students and serving as an information resource on health care issues for the legal and medical communities.

The Center for International and Comparative Law provides administrative guidance for the school's foreign study programs as well as other international activities, including the Master of Laws track in International and Comparative Law. Each year the center sponsors a variety of programs, including hosting speakers of international renown, and sponsoring students in international moot court competitions. Foreign study programs include:

- The Program in International Human Rights Law, which is designed to promote legal study and scholarship in international human rights and to facilitate the placement of students as legal interns at international human rights organizations in this country and overseas. Since 1997, the program has coordinated 90 student placements in 46 countries.
- The Chinese Law Summer Program at Renmin (People's) University of China School of Law in Beijing includes comparative aspects of Chinese and American law and features trips to local courts and nearby points of interest.
- The Central and Eastern European Law Summer Program is based in Dubrovnik, Croatia, a beautiful seaside resort on the Mediterranean. The program addresses the transition of legal systems in Central and Eastern Europe.

The Center for Intellectual Property Law and Innovation was established in 2004 as a resource for education and research in intellectual property law-particularly as it applies to the life sciences. The center is designed to produce graduates in law with a strong knowledge of intellectual property law, a solid foundation in business development, and sound transactional skills in all matters relating to intellectual property law.

The Program on Law and State Government enhances the ties between the academic community and state government offices, providing a means of exchange of ideas on issues facing state governments, as well as creating opportunities for internships for students within Indiana state government.

For more information, visit our Web site: http://www.indylaw.indiana.edu.

Student Organizations & Services

Student Programs

The school's three law reviews, the Indiana Law Review, Indiana International and Comparative Law Review, and the Indiana Health Law Review, provide invaluable opportunities for training in the analysis of legal problems and presentation of legal issues.

The Moot Court Program encourages the development of skills in oral advocacy. The Order of Barristers is composed of the best students in the program, and its members serve on regional and national teams, where they have achieved prominence in competitions.

Established in 1993, our school's Pro Bono Program provides opportunities for students to assist low-income Indianapolis residents and community groups in need of assistance. Since the program's inception, students have contributed more than 70,000 volunteer hours for the good of the community.

The school also sponsors a variety of student organizations that focus on a number of discrete legal areas of interest to students. Additionally, the school invites a number of distinguished and well-known

speakers to the school. Students hear lectures by legal scholars, historians, distinguished practicing attorneys, and jurists from around the country. Five Justices of the United States Supreme Court have delivered lectures at the law school, including Chief Justice John G. Roberts.

Academic Policies & Procedures

School of Liberal Arts

Welcome to the IU School of Liberal Arts!

A liberal arts education begins with the premise that one's world and one's self are at the core of the pursuit of knowledge. It leads to viewing the world from more than one perspective and learning something about its social, cultural, intellectual, and spiritual dimensions. Those different perspectives within the liberal arts encompass two major groups of academic disciplines: the humanities, which explore the history and experience of human culture, and the social sciences, which examine the social and material foundations of human life. Regardless of the perspective, the focus in the liberal arts is on knowledge itself, on both its substance and the tools for pursuing it, on what is known and what is worth knowing. Skills for acquiring and generating knowledge, as well as the preservation of knowledge, are enfolded within the School of Liberal Arts curriculum.

Liberal arts graduates are expected to read and listen effectively and to speak and write clearly and persuasively. They learn how to think critically and creatively. As perceptive analysts of what they read, see, and hear, liberal arts students are expected to be able to reason carefully and correctly and to recognize the legitimacy of intuition when reason and evidence prove insufficient. They learn to use various analytical tools, such as mathematics and statistics, to enable them to undertake quantitative analysis when such a strategy is appropriate.

Furthermore, students in the liberal arts, by developing communication skills in both English and at least one foreign language, equip themselves to communicate with others within their own culture and different cultures. This ability to communicate requires insights into diverse patterns of thought and modes of expression. Such insights allow students to identify universal, as well as unique, aspects of their culture, their community, and themselves.

Students in the liberal arts spend a substantial amount of time studying local and international human communities. Students cultivate an informed sensitivity to global and environmental issues by exploring the range of social, geographic, economic, political, religious, and cultural realities influencing world events.

Liberal arts students do not limit their studies to the here and now. A liberal arts education requires the development of a historical consciousness, so that students can view the present within the context of the past, can appreciate tradition and what the preservation of knowledge implies, and can understand the critical forces that influence the way we think, feel, act, and speak.

In the midst of discussions of theoretical frameworks and appropriate methods of gathering and verifying data, liberal arts students consider social problems such as poverty, pollution, crime, racism, and sexism. Such consideration leads to an even greater appreciation of the dynamics of change and of what different perspectives have to offer.

A quality liberal arts education also includes an appreciation of literature and the arts and the cultivation of the aesthetic judgment that makes possible the enjoyment and comprehension of works of the creative imagination.

The liberal arts curriculum helps students examine ethical perspectives, so that they can formulate and understand their own values, become aware of others' values, and discern the ethical dimensions underlying many of the decisions that they must make. The issues discussed and the individuals and points of view studied help define the citizen as an informed and responsible individual.

This course of study implies that to be educated is to be tolerant, open to others and their ideas, and willing to admit the validity of alternative approaches. Interdisciplinary courses in which students are asked to consider the same subject from varied perspectives enhance that aspect of the liberal arts education.

General knowledge of the liberal arts provides a firm foundation for productive and responsible citizenship. When professional and personal decisions and actions are informed by knowledge, rationality, and compassion, they make the greatest contribution to a better world.

The broad knowledge and course of study described above as characteristic of a good liberal arts education are coupled with an in-depth exploration of at least one particular academic discipline, a major. Liberal arts students acquire a coherent, sophisticated understanding of a major body of knowledge with all its complexities, unique methodologies, power, and limitations. The major provides a foundation for additional academic study or for advancement within a chosen career. But because of the demanding general requirements, a liberal arts course of study protects students from the pitfalls of overspecialization too early in their postsecondary education.

A liberal arts education is an ideal preparation for life and profession, encouraging students to pursue subsequent specialization within a framework of intellectual breadth and creativity. More than just training for today's occupations, however, the humanities and social sciences offer students the skills and flexibility they will need as they move on to careers and occupations not yet known or imagined.

All in all, no individual, whether just out of high school or returning to college after being away for decades, can find a better course of study for the present and the future, for the personal and the professional, than one in the IU School of Liberal Arts.

Who Should Use This Bulletin

The 2010-2012 Bulletin of the School of Liberal Arts presents the degree requirements for all students admitted for fall semester 2010 through summer term 2012. Students admitted to the School of Liberal Arts must satisfy degree requirements as described herein. Students accepted to the School of Liberal Arts prior to fall semester 2008 and continuously enrolled since then (excluding summer sessions) either may meet the school's requirements at the time they were initially accepted as a liberal arts major or they may elect the requirements as described below. Students who are not continuously enrolled or who take more than eight years of enrollment to complete their degrees should confer with the associate dean for student affairs in the school to determine the requirements applicable to their degrees.

Overview

Our Mission

Creating and exchanging knowledge that promotes understanding of the human experience.

Our Vision

As one of the premier sites of liberal arts education, scholarship, professional service, and civic engagement in the state of Indiana, the School of Liberal Arts will contribute to the social, cultural and economic development of the state, and will foster life-long learning that engenders commitment to civil society through an engaged and educated citizenry.

Our Core Values

A liberal arts education is rooted in reflection, teaching and learning, scholarship, and service to people across cultures and over time. To promote a better understanding of a complex world, the School of Liberal Arts builds on this tradition and reflects it in our core values:

- **Student learning:** We provide an intellectual climate and curriculum that challenges students to think critically, communicate clearly and achieve in their chosen fields.
- **Diversity:** Diversity encompasses the complexities of human beings and includes, but is not limited to, race, ethnicity, gender, gender identity, sexual preference, age, physical and mental differences, religious identification, and social class. We believe the educational environment is enhanced when diverse groups of people with diverse ideas come together to learn.
- **Excellence:** We seek excellence - quality rather than quantity - in the areas of teaching and learning, research and creative activity, and civic engagement and professional service.
- **Collaboration with the community:** We value civic involvement as a way of enriching the academic environment, engaging citizens and enhancing our constituent communities.
- **Interdisciplinary, international and multicultural approaches:** We take a broad perspective on intellectual questions, civic engagement, and the education of students in order to provide a well-rounded education.
- **Stewardship:** We steward the resources of the School of Liberal Arts - and measure their impact - in the most effective, efficient, ethical, and timely manner possible.
- **Collegiality:** Students, staff, and faculty are joined in a collaborative partnership characterized by mutual respect to promote the vision and mission of the School of Liberal Arts.
- **Accessibility:** As a public institution, we are dedicated to making a high quality education as accessible as possible for all students through flexible scheduling, loans, scholarships and other means.

Admission

All students entering the IU School of Liberal Arts must be admitted officially to IUPUI as a degree-seeking student.

After students have been admitted by IUPUI, they must also be admitted by the specific school in which they intend to pursue a degree. The IU School of Liberal Arts welcomes nontraditional students and recent high school graduates if they wish to pursue a liberal arts degree and meet the school's requirements for admission. Students can be admitted before they have selected a major if their general interests lie in the humanities or social sciences.

Students not eligible for direct admission to the School of Liberal Arts can indicate their interest in a major in the school by dual admission to University College and to a IU School of Liberal Arts department or program.

Many liberal arts students are transfer students coming from another college or university, another Indiana University campus, or another division of IUPUI. Procedures for transferring into the IU School of Liberal Arts and special arrangements for transfer students are described herein.

Probationary Admission

Individuals interested in transferring to IU School of Liberal Arts whose college grade point average is lower than 2.0 (C) may petition the School of Liberal Arts for probationary admission. Special consideration is given to adult learners and students returning after five or more years.

Petitions are available from the IU School of Liberal Arts Miriam Z. Langsam Office of Student Affairs, Cavanaugh Hall 401, (317) 274-3976. Transfer students from other colleges or universities should attach a copy of their college transcript. Petitions are reviewed by the School of Liberal Arts Associate Dean and should be submitted by the following deadlines:

- To enroll for the fall semester: July 15
- To enroll for the spring semester: November 15
- To enroll for summer session: April 15

At the discretion of the Associate Dean, the school will ordinarily admit transfer students whose past performance, experience, or current situation show reasonable potential for successfully completing a degree. Such students are counseled through the Miriam Z. Langsam Office of Student Affairs or their major department and remain on probation until their cumulative grade point average is raised to at least 2.0 (C).

Transfer Students

The IU School of Liberal Arts welcomes transfer students and is committed to making their transition and transfer of credit as smooth as possible. At admission or at any time after being admitted to IUPUI, a student with a minimum grade point average of 2.0 (C) may transfer to the IU School of Liberal Arts by filing a Change of Record form available

in the Miriam Z Langsam Office of Student Affairs, CA401. Transfer students who have questions about how their previous course work will apply to their degree, or who encounter difficulties in the process of transferring credit or records, should contact the Miriam Z. Langsam Office of Student Affairs, Cavanaugh Hall 401, (317) 274-3976.

Bachelor of Arts

- Africana Studies
- American Sign Language/English Interpreting
- Anthropology
- Chinese Studies
- Classical Studies
- Communication Studies
- Economics
- English
- French
- Geography
- German
- History
- International Studies
- Individualized Major
- Japanese Studies
- Medical Humanities and Health Sciences
- Philanthropic Studies
- Philosophy
- Political Science
- Religious Studies
- Sociology
- Spanish
- Women's Studies

American Sign Language/English Interpreting

The Bachelor of Science degree in ASL/English Interpreting is for students who wish to acheive fluency in American Sign Language and English and who wish to focus on theoretical and applied issues in interpreting.

Students can begin their course of study in ASL/English Interpreting at IUPUI as freshman. We offer six 5-credit classes in American Sign Language totally 30 credits in ASL studies. In addition, courses in Linguistics of ASL, Advanced Fingerspelling and Number Systems and Deaf History and Culture are offered. Students interested in ASL/English interpreting can continue with courses in interpreting, graduating with the B.S. degree in ASL/English interpreting.

In addition, the program is a continuation of the Associate of Arts degree in American Sign Language Studies offered by Vincennes University at its regional campus in Indianapolis at the Indiana School for the Deaf. IUPUI's program is also open to students who demonstrate equivalent competence in ASL, Deaf culture, and linguistics. Interested students who have not completed the Vincennes University degree but have completed coursework at another college or university, should contact the program director at IUPUI.

Requirements

The major consists of 35 credit hours at IUPUI. ASL A219, ASL A321, ASL I301, I303, I361, I363, I365, I405, ASL I407, L340, and L342. An additional course in General Linguistics is also required. See the Director for more information on this. *Enrollment in interpreting classes is limited to students who have been admitted to the program or have received permission from the director.*

Anthropology

The B.A. program in anthropology is designed to foster student learning in three areas:

1. a broad conceptual understanding of the human experience across space and time,
2. the ability to conduct and evaluate anthropological research, and
3. the ability to apply anthropological concepts and methods beyond the university.

Requirements

The degree requires completion of 34 credit hours in anthropology, with a minimum grade of C in each course. A student's particular program is selected in consultation with an anthropology faculty advisor from the following:

1. Core Courses (12 credit hours): A103/A303, A104/A304, A201, A360

2 Advanced Courses (18 credit hours and 300 level or above) including:

- one research or applied methods course: B401, B426, E404, P402, P405, B301, MSTD A405;
- one archaeology course: A401, E316, E335, P340, P396, P402, P405, P330;
- one bioanthropology course: B301, B370, B371, B401, B426, B466, B480;
- one cultural anthropology course: A361, E300, E310, E320, E326, E336, E356, E380, E384, E391, E402, E403, E404, E411, E421, E455, E457, E470;
- and two additional 300-400 level courses A454, E354, E445, L300, L401, A395, A460, A485, A494, A495, MSTD A403, MSTD A405, CLAS A301, CLAS C412, CLAS C413, CLAS C414, ENG G310;

3 Capstone Courses (4 credit hours): A412 and A413, or MSTD A408.

In fulfilling these requirements, a particular course may be counted in only one category. For example, E356 Cultures of the Pacific may be used to fulfill the requirement for an upper-level course in cultural anthropology or as one of the two required electives, but not both requirements simultaneously.

Communication Studies

B.A. Requirements

Every major must complete a minimum of 33 credit hours in the major. The following is a list of requirements:

- Each student must successfully complete the following three courses: G100 Introduction to Communication Studies, G201 Introduction to Communication Theory, and G310 Communication Research.
- Each student must take 3 credit hours of Research/Capstone Experience.

- At least 15 credit hours in the major must be in courses at the 300 level or above.
- The student must take at least 3 credit hours each in three of the four designated prefixes of C, M, R, and T: Communication, including Organizational Communication ("C" courses), Media Studies ("M" courses), Rhetoric and Public Address ("R" courses), and Theatre ("T" courses).
- No more than 12 credit hours may transfer in the major.
- The student must earn a C or higher in all major course work.
- At least 21 credit hours of the major coursework must be in courses offered solely or cooperatively by the Communication Studies Department.

No student may count more than a total of 9 credits of G300 Independent Study and G491 Internship toward the major.

The faculty highly recommends that G100, G201, and G310 be taken early in the student's academic career.

Core Courses (These classes are required for all Communication Studies majors; they are the first classes in the department that a student must take.)

- G100 Introduction to Communication Studies
- G201 Introduction to Communication Theory
- G310 Communication Research

Research/Capstone Experience By the completion of their major, students must complete a capstone project. Each of these courses is designed to provide students with a capstone experience. Students must take 3 credit hours from the courses listed below or as approved by the department:

- C322 Advanced Interpersonal Communication, 3 credit hours
- C328 Advanced Topics in Small Group Communication, 3 credit hours
- C392 Health Communication, 3 credit hours
- C395 Gender and Communication, 3 credit hours
- C482 Intercultural Communication, 3 credit hours
- G499 Research Seminar, 3 credit hours
- M462 Television Aesthetics and Criticism, 3 credit hours (P: M150 or permission of instructor)
- R330 Communication Criticism, 3 credit hours
- R390 Political Communication, 3 credit hours

Other Capstone courses might include:

- G300 Independent Study
- G391 Seminar (Permission must be granted by advisor.)

Electives The remaining 21 hours may be selected from any of the courses offered in Communication Studies, as long as departmental degree requirements are met. Students are strongly encouraged to develop their plan of study in consultation with their academic advisor early to ensure a coherent program which meets their goals.

Communication Studies Undergraduate Honors Degree Requirements

A list of Communication Studies courses approved for H-Options is available in the Honors Program office or in the department's office. Other courses may be arranged by departmental approval. Students graduating with departmental honors will receive a certificate and a letter of acknowledgment.

Economics

The economics major has the option of pursuing a general track or a quantitative track. The general track provides a firm grounding in economic theory and exposure to problems and techniques the student is likely to encounter in a business, nonprofit, or government agency environment. The quantitative track supplements the general track with extensive training in mathematical and statistical techniques required for graduate course work.

This track is also recommended for those students who prefer a more quantitative approach to problem solving. Completion of this track fully prepares the student for entrance into the department's Master of Arts in Economics program at IUPUI as well as graduate programs at other universities.

All majors must complete 18 credit hours in economics to include E201, E202, E270, E321, E322, and E406. Except for E406, the senior seminar, these courses should be completed by the end of the junior year. Note that E201 is a prerequisite for E202 and E321 and that E202 is a prerequisite for E322. E321 and E322 are prerequisites for E406.

General Track

The general track requires an additional six courses, consisting of the following:

- two courses (6 credit hours) in mathematics, including finite mathematics and calculus (typically M118 and M119). Additional work in mathematics, computer science, and accounting is recommended.
- three 300- or 400-level electives from economics.

The total number of credit hours is 33.

Quantitative Track

The quantitative track requires an additional six courses consisting of the following:

- MATH 16500 and MATH 16600 (8 credit hours);
- E470;
- one 300- or 400-level elective (excluding E470).

The total number of credit hours is 32.

To satisfy the department's residency requirement, at least 12 credit hours of economics must be taken at IUPUI. A grade of C (2.0) or higher must be received in each course required for the major (a C– does not count).

Residency Requirement: 12 credits in Economics (E406 required to be taken at IUPUI)

Women's Studies

It is possible to major in women's studies through the Individualized Major Program (listed under the School of

Liberal Arts). Interested students should consult with both the director of the Individualized Major Program and the director of the Women's Studies Program.

English

The English major requires completion of one of the following six concentrations: Creative Writing, Film Studies, Language and Linguistics, Literature, Writing and Literacy, or English Studies. Each concentration requires 33 credit hours in English with a minimum grade of C in each course. All English majors must complete at least 15 hours in English at the 300-400 level. Any course, unless specified as repeatable for credit, may be used only once to fill requirements within a concentration.

CONCENTRATION IN CREATIVE WRITING

Gateway Course (6 cr.) Choose two:

- ENG W206 Introduction to Creative Writing
- ENG W207 Introduction to Fiction Writing
- ENG W208 Introduction to Poetry Writing

(12 cr.)
Four courses in at least two genres, including at least one at the 400 level. One course may be repeated for credit. Students should take courses in sequence: first the 200-level gateway courses, then 300-level courses followed by 400-level courses. Choose from the following:

- ENG W301 Writing Fiction
- ENG W302 Screenwriting
- ENG W303 Writing Poetry
- ENG W305 Writing Creative Nonfiction
- ENG W401 Advanced Fiction Writing
- ENG W403 Advanced Poetry Writing
- ENG W407 Advanced Creative Nonfiction Writing
- ENG W411 Directed Writing (only with permission)

(12 cr.)
Literature (9 cr.): Three courses at the 200-level or above; one at the 300-level or above

Language, Pedagogy, and Editing (3 cr.) Choose from:

- ENG W280 Literary Editing and Publishing
- ENG W310 Language and the Study of Writing
- ENG W365 Theory and Practice of Editing
- ENG W426 Writing Nonfiction: Popular and Professional Publication
- ENG W408 Creative Writing for Teachers
- ENG Z206 Introduction to Language Use
- ENG Z301 History of the English Language
- ENG Z302 Understanding Language Structure: Syntax
- ENG Z310 Language in Context: Sociolinguistics

Other courses may also satisfy this requirement Please see your advisor to have your program of study approved.

(3 cr.): ENG E450, ENG W411 Directed Writing, or Designated Senior Seminar

(3 cr.): FILM C292 Introduction to Film Studies

Concentration Core (18 cr.)

(3 cr.): FILM C391 Film Theory and Aesthetics

Culture and Film History Courses (6 cr.) Choose two of the following:

- FILM C380 French Cinema
- FILM C390 Topics in Film (may be repeated once with different topic)
- American Film Decades (Others are taught as variable C390 titles)
- FILM C361 Hollywood Studio Era 1930-1949
- FILM C362 Hollywood in the 1950's
- FILM C393 World Film History I
- FILM C394 World Film History II

Genres and Authorship Courses (6 cr.) Choose from the following:

- FILM C350 Film Noir
- FILM C351 Musicals
- FILM C352 Biopics
- FILM C392 Genres: Variable Titles (may be repeated once with different topic)
- FILM C491 Authorship: Variable Titles (may be repeated once with different topic)

Film, Writing, and Literature Courses (3 cr) Choose from the following:

- ENG W260 Film Criticism
- ENG W302 Screenwriting
- FILM C493 Film Adaptations of Literature

English Experience (9 cr.)
One 3-credit course each, at the 200 level or above, in linguistics (including ENG W310 Language and Study of Writing), literature, and writing or creative writing (excluding ENG W260 Film Criticism, ENG W302 Screenwriting, ENG W396 Writing Fellows Training Seminar, and ENG E398 Internship in English).

Capstone Seminar (3 cr.): ENG E450

Gateway Courses (6 cr.)

- ENG Z205 Introduction to the English Language
- ENG Z206 Introduction to Language Use

Core (12 cr.) Choose from these courses:

- ENG Z301 History of the English Language
- ENG Z302 Understanding Language Structure: Syntax
- ENG Z303 Understanding Language Meaning: Semantics
- ENG Z310 Language in Context: Sociolinguistics
- ENG Z432 Second Language Acquisition
- ENG W310 Language and the Study of Writing
- ASL L340 Discourse Analysis: English
- ANTH L401 Language, Power & Gender
- ANTH L300 Language and Culture

(12 cr.)
In consultation with your advisor, choose four English courses at the 200-level or above, with at least two at the 300- or 400-level. At least three courses must be outside of the language and linguistics concentration and at least one course must be a literature course.

Other courses may also satisfy this requirement Please see your advisor to have your program of study approved.

(3 cr.): ENG E450 or ENG Z405 Topics in the Study of Language

Gateway Course (3 cr.): ENG L202 Literary Interpretation

(18 cr.)

Critical and Historical Foundations—Britain (6 cr.)

ENG L301 English Literature I

and either:

ENG L302 English Literature II, or ENG L348 Nineteenth-Century British Fiction

Critical and Historical Foundations—US (6 cr.) Choose two:

- ENG L351 American Literature I
- ENG L352 American Literature II
- ENG L354 American Literature III

(ENG L357 Twentieth Century American Poetry or ENG L358 Twentieth-Century American Fiction may be substituted for ENG L354)

Shakespeare (3 cr.) Choose one:

- ENG L220 Introduction to Shakespeare
- ENG L315 Major Plays of Shakespeare

Diversity (3 cr.) Choose one:

- ENG L207 Women and Literature
- ENG L364 Native American Literature
- ENG L370 Black American Writing
- ENG L378 Studies in Women and Literature
- ENG L379 American Ethnic and Minority Literature
- ENG L382 Fiction of the Non-Western World
- ENG L406 Topics in African American Literature
- ENG L411 South African Literature and Society

(9 cr.)

Language & Linguistics (3 cr.) Choose one:

- ENG Z206 Introduction to Language Use
- ENG Z301 History of the English Language
- ENG Z302 Understanding Language Structure: Syntax
- ENG Z310 Language in Context: Sociolinguistics

Editing (3 cr.) Choose one:

- ENG W280 Literary Editing and Publishing
- ENG W365 Theory and Practice of Editing

English Elective (3 cr.): In consultation with your advisor, choose one English course at the 200-level or above from classes outside of Literature.

Other courses may also satisfy this requirement Please see your advisor to have your program of study approved.

(3 cr.) Choose one:

- ENG E450 English Capstone
- ENG L440 Senior Seminar
- ENG L433 Conversations with Shakespeare

Gateway Course (3 cr.): ENG W210 Literacy and Public Life

Understanding Literacy and Language (6 cr.) Choose two: (At least one must be a W course)

- ENG W310 Language and the Study of Writing
- ENG W366 Written Englishes: Living Cultural Realities
- ENG W390 Topics in Writing
- ENG W412 Technology and Literacy
- ENG Z204 Rhetorical Issues in Grammar
- ENG Z301 History of the English Language
- ANTH L401 Language, Power, & Gender

The Practice of Writing (12 cr.; no more than 6 TCM credits)

Choose at least one course from each group:

(at least 3 cr.)

- ENG W313 The Art of Fact: Writing Nonfiction Prose
- ENG W320 Advanced Writing in the Arts and Sciences
- ENG W331 Business & Administrative Writing
- ENG W390 Writing for Social Change
- TCM 320 Written Communication in Science and Industry
- TCM 340 Correspondence in Business & Industry
- TCM 350 Visual Elements of Technical Documents
- TCM 450 Research Approaches

(at least 3 cr.)

- ENG W280 Literary Editing and Publishing
- ENG W315 Writing for the Web
- ENG W365 Theory and Practice of Editing
- ENG W390 Finding Your E-Voice
- ENG W396 Writing Fellows Training Seminar
- ENG W400 Issues in Teaching Writing
- ENG W426 Writing Nonfiction: Popular and Professional Publication
- ENG W496 Issues in Writing Center Work
- TCM 425 Managing Document Quality

English Experience (9 cr.)

Film Studies or Literature (3 cr.)
Linguistics (3 cr., or elective if linguistics taken in core)
Elective other than Writing and Literacy courses (3 cr.)
Other courses may also satisfy this requirement. Please see your advisor to have your program of study approved.
Concentration Capstone (3 cr.): ENG E450 (English Capstone) or ENG W490 (Senior Seminar)

CONCENTRATION IN ENGLISH STUDIES

Gateway Courses (6 cr.) Choose ONE course from TWO of the following areas:

(a) L202 Literary Interpretation
(b) Z205 Introduction to English Language, or Z206 Introduction to Language Use
(c) W206 Introduction to Creative Writing, or W207 Introduction to Fiction Writing, or W208 Introduction to Poetry Writing
(d) W210 Literacy and Public Life
(e) FILM C292 Introduction to Film
English Studies Core (24 cr.)

In consultation with an English advisor, choose 24 credits of English department classes at the 200-level or above, including:

- at least three credit hours in at least four of the five different areas of English: creative writing, film studies, language & linguistics, literature, writing & literacy
- at least 15 credit hours at the 300-level or above

Capstone Course (3 cr.): ENG E450 (English Capstone)

Concentration Core (18 cr.)

Geography

The Bachelor of Arts in Geography provides a general introduction to the philosophy, content, and methods of the discipline. The program also developes applied skills through courses in field and research methods, quantitative analysis, and geographic technologies.

Students must complete the School of Liberal Arts graduation requirements and a minimum of 31 credit hours in geography, as detailed below. The core courses are intended to provide a foundation for more specialized upper-division courses, and thus should be taken at the beginning of the major program. Geography GEOG G309 is normally offered every fall semester and GEOG G311 every spring. The capstone experience, normally taken during the senior year, is intended to help students integrate and reflect on their undergraduate training.

Four core courses:

- GEOG G107 Physical Systems of the Environment (3 cr.)
- GEOG G110 Introduction to Human Geography (3 cr.)
- GEOG G309 Frontiers in Geographic Thought (3 cr.)
- GEOG G311 Introduction to Research Methods in Geography (3 cr.)

Two geographic techniques courses:

- GEOG G300 The World of Maps (3 cr.)
- GEOG G337 Cartography and Graphics (3 cr.)
- GEOG G338 Introduction to Geographic Information Systems (3 cr.)
- GEOG G436 Advanced Remote Sensing(3 cr.)
- GEOG G438 Advanced Geographic Information Systems (3 cr.)
- GEOG G439 Seminar in Geographic Information Science (3 cr.)
- GEOG G488 Applied Spatial Statistics (3 cr.)

A total of three courses in environmental and human geography, to include at least one course from each area:

Environmental geography:

- GEOG G303 Weather and Climate (3 cr.)
- GEOG G305 Environmental Change: Nature and Impact
- GEOG G307 Biogeography (3 cr.)
- GEOG G310 Human Impact on Environment (3 cr.)
- GEOG G315 Environmental Conservation (3 cr.)
- GEOG G390 Topics: Environmental Focus (3 cr.)
- GEOG G404 Soils Geography (3 cr.)
- GEOG G446 Cultural Biogeography (3 cr.)
- GEOG G475 Climate Change (3 cr.)

Human geography:

- GEOG G302 Introduction to Transportation Analysis (3 cr.)
- GEOG G314 Urban Geography (3 cr.)
- GEOG G331 Economic Geography (3 cr.)
- GEOG G355 Political Geography (3 cr.)
- GEOG G360 Geography of Wine (3 cr.)
- GEOG G390 Topics: Human Geography Focus (3 cr.)
- GEOG G418 Historical Geography (3 cr.)

One of the following regional geography courses:

- GEOG G321 Geography of Europe (3 cr.)
- GEOG G323 Geography of Latin America (3 cr.)
- GEOG G324 Geography of the Caribbean (3 cr.)
- GEOG G323 Geography of Latin America (3 cr.)
- GEOG G326 Geography of North America (3 cr.)
- GEOG G327 Geography of Indiana (3 cr.)
- GEOG G328 Rural Landscapes of North America (3 cr.)
- GEOG G330 North American House Types (3 cr.)
- GEOG G334 Field Geography of North America (1-3 cr.)
- GEOG G363 Landscapes and Cultures of the Caribbean (3 cr.)
- GEOG G390 Topics: Variable Regional Focus (3 cr.)
- GEOG G421 Environments of Tropical Lands (3 cr.)
- GEOG G424 Geography of Africa (3 cr.)

Capstone Courses:

- GEOG G491 Capstone Experience in Geography (1 cr.) or
- GEOG G439 Seminar in Geographic Information Science (3 cr.)

Environmental Science Program

The Bachelor of Science in Environmental Science (BSES) is an interdisciplinary degree within the School of Science that is offered in partnership with the School of Public and Environmental Affairs and the School of Liberal Arts. The Department of Geography is engaged with the BSES program through the Environmental Remote Sensing and Spatial Analysis concentration. Spatial information technologies provide important tools for measurement, analysis, and modeling of environmental systems. The Environmental Remote Sensing and Spatial Analysis concentration within the BSES builds theoretical background and advanced knowledge in spatial analytical techniques using remote sensing (satellite and airborne sensors),

geographic information systems (GIS), and global positioning system (GPS) technologies. The concentration emphasizes integration of these technologies and their applications to problems of environmental modeling and analysis. For more information about the BSES degree, please refer to http://www.geology.iupui.edu/bses/.

History

Programs leading to the major in history should be carefully planned; department advisors are available, and each faculty member in the department can assist in answering student queries. Before submitting their requests for a senior audit (after 86 accumulated credit hours) to the recorder in the Office of the Dean of Student Affairs (CA 401), students must consult with one of the faculty advisors in the Department of History.

Requirements

Thirty-three credit hours of courses must be completed with a minimum grade of C in each course. Nine of the 33 credit hours of required courses must be taken in residence on the Indianapolis campus during two consecutive semesters (but not two consecutive summer sessions). Two semesters of History H108, H109, H113, H114, must be completed to satisfy School of Liberal Arts distribution requirements, and are consequently omitted from the following department requirements:

6 credit hours: H105 and H106, United States History I and II

24 credit hours: concentration and subconcentration courses (all courses here must be 200 level or higher). Select any one of the following:

1. United States History Concentration
   - 12 credit hours U.S. History (A-prefix courses)
   - 6 credit hours European History (B-C-D-prefix courses)
   - 6 credit hours African/Asian/Latin American History (E-F-G-prefix courses) (Note: H-prefix courses are special topics, and their application to categories must be approved by advisors.)

2. European History Concentration
   - 12 credit hours European History
   - 6 credit hours U.S. History
   - 6 credit hours African/Asian/Latin American History

3. African/Asian/Latin American History Concentration
   - 12 credit hours African/Asian/Latin American History
   - 6 credit hours U.S. History
   - 6 credit hours European History

4. Thematic concentration
   - Thematic concentrations require 12 credit hours of courses in fields such as urban, family, or science/technology/medical history and two 6 credit hour support areas as specified in the theme description. Consult history advisors and the department office for lists of thematic concentrations currently available to majors.
   - 3 credit hours: J495 Proseminar for History Majors
   - Seminar topics vary from semester to semester. Majors should plan to take the seminar during their senior year and, if possible, sign up for a section that has the same focus as their concentration area.

Secondary History Teachers

The student who seeks to teach history at the secondary level may (1) major in history and obtain the necessary certification in addition, or (2) major in social studies education through the School of Education. In either instance, the student must arrange with the School of Education for a complete program. In the first instance, history majors should consult Department of History counselors about the major and School of Education counselors concerning certification.

H108 Perspectives on the World to 1800 and H109 Perspectives on the World since 1800 are recommended for students seeking state certification in social studies.

International Studies

The international studies major is a 33 credit interdisciplinary major that draws courses from all School of Liberal Arts departments, as well as from the School of Public and Environmental Affairs, the Kelley School of Business, the Herron School of Art and Design, and others.

Requirements

- Students must take courses from at least four different departments or schools.
- Required introductory course: I100 Introduction to International Studies (3 cr.).
- “Windows on the World” requirement from one of the following four courses:
- ANTH A104/A304 Introduction to Cultural Anthropology (3 cr.)
- GEOG G110 Introduction to Human Geography (3 cr.)
- HIST H109 Perspectives on the World Since 1800 (3 cr.)
- POLS Y219 Introduction to International Relations (3 cr.)

- **Foreign language requirement:** Completion of the 200-level course cycle in a modern foreign language with at least one class taken at IUPUI. Three-four credits here count toward the international studies major.

- **Area concentration requirement** in one of the following geographical regions (9 cr.): Africa; Asia; Latin America and the Caribbean; Europe; the Middle East. The area concentration must include courses from at least two different departments or schools and at least two courses at the 300 level or higher.

- **Thematic concentration requirement** from one of the following thematic concentrations (9 cr.): Comparative Systems; Development; Global Civil Society; Global and Cross-Cultural Interactions; Global Environment; International Business and Economics; International Relations. The thematic concentration must include courses from at least two different departments or schools and at least two courses at the 300 level or higher.

- **International experience requirement:** 3 credits of academic work earned abroad or relating to an international experience or research project conducted outside of the United States.

- **Senior seminar capstone requirement:** I400 International Studies Capstone Seminar (3 cr.)

There is no double counting within the major. Courses that can potentially count in two or more areas can only fulfill one requirement within the major. Students cannot take more than 6 hours of I415 independent study credit.

Philosophy

Requirements

To assure a properly balanced program of study, courses are to be selected in consultation with a departmental advisor.

A minimum of 30 credit hours in philosophy, including:

1. A basic survey of philosophy (either P110, Intro. to Philosophy; or S110, Intro. to Philosophy - Honors).
2. A basic course in ethics (either P120, Ethics; or S120, Ethics - Honors).
3. A basic course in logic (either P162, Logic; or P265, Introduction to Symbolic Logic).
4. A minimum of 15 credit hours at the 300 level or above.
5. A minimum grade of "C" (2.0) in each philosophy course.

Double Majors

Students planning to major in a discipline other than philosophy are encouraged to consider philosophy as a second major. Students planning such a double major should consult the Department of Philosophy about philosophy courses most suitable to their academic interests and career goals.

Medical Humanities and Health Studies

The School of Liberal Arts at IUPUI offers students the special option to design programs of study that are outside the scope of existing major programs. Students have utilized this option to design interdisciplinary majors in medical humanities and health studies-oriented fields of study such as international health and culture studies.

For more information, please contact the MHHS Program or the Individualized Major Program, (317) 274-3976, impsla@iupui.edu, liberalarts.iupui.edu/student affairs/individualmajor.html.

Political Science

In addition to the basic School of Liberal Arts requirements (listed elsewhere in this bulletin), the political science major must do the following:

1. Complete 33 credit hours in political science with at least a grade of C in each course. Those 33 credit hours are part of the 122 credit hours needed for the Bachelor of Arts degree.
2. Complete the following specific requirements:

- 9 credit hours: POLS Y103, POLS Y205, and POLS Y215
- 3 credit hours chosen from POLS Y217 or POLS Y219
- 18 credit hours, of which 15 must be from the 300 level and above (no more than six of these hours from POLS Y480, POLS Y481, and POLS Y498)
- 3 credit hours: POLS Y490

Transfer students only: Transfer students from either another Indiana University campus or from another institution must take a minimum of 9 credit hours of 300- to 400-level (junior-senior) political science courses at IUPUI. These courses must be of regular classroom format (not readings or research); they may include a seminar, if needed.

Religious Studies

Requirements

Beyond the general distribution and credit hour requirements for the Bachelor of Arts degree, students who choose to major in religious studies will be asked to complete 30 credit hours of course work designated by the faculty as follows:

- 15 credit hours will be selected from the category of Religious Traditions
- 12 credit hours from Comparative and Thematic Studies
- 3 credit hours in the departmental senior seminar (R433)
- at least 18 credit hours to be taken at the 300 level or above.

For details concerning the designated courses and the junior-level courses, students should contact the departmental advisor. Any religious studies course in which a student receives a grade below C (2.0) may not be used to fulfill major or minor requirements. (A C– does not qualify.)

Double Majors

Students wishing to acquire double majors in religious studies and a second subject area will need to fulfill all of the above requirements, as well as those of the second subject area; will need an academic advisor for each major; and will need to file their plans for a double major with the recorder of the School of Liberal Arts.

Sociology

Requirements

The major requires 30 credit hours of sociology course work (12 of which must be completed at IUPUI), with a grade of C (2.0) or higher. This includes the following required courses:

- R100 Introduction to Sociology (3 cr.)
- R351 Social Science Research Methods (3 cr.)
- R359 Introduction to Sociological Statistics (3 cr.)

Theory course selected from one of the following:

- R355 Social Theory (3 cr.)
- R356 Foundations of Social Theory (3 cr.)
- R357 Contemporary Sociological Theory (3 cr.)

Capstone course selected from one of the following:

- R494 Internship Program in Sociology (3 cr.)
- R497 Individual Readings in Sociology (3 cr.)
- R498 Capstone Seminar (3 cr.)

15 additional credit hours of other sociology courses

Classical Studies

Students may design a major in classical studies through the School of Liberal Arts Individualized Major Program. Such a major, if properly designed, should allow good students to gain admission to graduate programs in classical studies or classical archaeology and to pursue careers in the field.

Students interested in planning an individualized major in classical studies should consult the director of the Classical Studies Program and the director of the Individualized Major Program as early as possible in their academic careers.

French

In addition to fulfilling the general education requirements for a B.A. degree in the School of Liberal Arts, the major in French requires the following:

30 credit hours above the 100 level (12 of which must be completed at IUPUI), including 15 hours of required courses: F203 (4 cr.), F204 (4 cr.), F328 (3 cr.), F300 (3 cr.), and F497 (1 cr.). Among the 15 hours of elective credits, at least 6 credits must be at the 400 level, and they must include:

1. One 300-level or 400-level grammar or translation course (3 cr.):
- F330 Introduction to Translating French and English (3 cr.)
- F402 Introduction to French Linguistics (3 cr.)
- F421 Fourth-Year French (3 cr.)
- F423 Craft of Translation (3 cr.)

2. One 300-level or 400-level oral skills course (3 cr.):
- F331 French Pronunciation and Diction (3 cr.)
- F380 French Conversation (3 cr.)
- F480 French Conversation (3 cr.)

3. One 300-level or 400-level course in French or Francophone culture (3 cr.):
- F307 Masterpieces of French Literature (3 cr.)
- F326 French in the Business World (3 cr.)
- F360 Introduction socio-culturelle à la France (3 cr.)
- F430 Modern Short Narratives (3 cr.)
- F450 Colloquium in French Studies (3 cr.)
- F451 Le Français des affaires (3 cr.)
- F452 La civilisation et litérature québécoises (3 cr.)
- F460 French Fiction in Film (3 cr.)
- F461 La France contemporaine (3 cr.)

4. Two elective courses, including no more than 3 credit hours of F495, Individual Readings in French (1-3 cr.), for a total of 6 credits.
5. Up to six (6) hours of F396 and/or F496, Study of French Abroad may count as electives for the French major.

Teacher Certification in French Teaching Major Requirements

The teaching major in French requires the completion of a minimum of 36 credit hours beyond the 100 level, including 30 credit hours in 300 and 400 level courses. F300, F307, F328, F331, F360, and F402 are required. A year of a second foreign language is advisable. See also the requirements of the School of Education. Students working toward certification are urged to work with the School of Education's advisor as well as their department advisor.

German

In addition to the area distribution requirements for the School of Liberal Arts, the major in German requires the following:

- 29 credit hours above the 100 level,
- including at least one 400-level language course (G423, G431, G445, G465),
- one contemporary culture course (G365),
- at least one 400-level historical culture and literature course (G407, G408, G409, G410) and
- a capstone portfolio (G498).

Other courses may also be selected on the basis of placement level by test or course work and/or focus of interest. They include ALL 200-, 300-, and 400-level courses, except courses taught in English.

Major Course Requirements

1. A minimum of one 400-level language course:
- G423 The Craft of Translation (3 cr.)
- G431 Advanced Business German (3 cr.)
- G445 Oberstufe: Grammatik (3 cr.)
- G465 Structure of German (3 cr.)

2. One contemporary culture course:
- G365 Deutsche Kultur Heute (3 cr.)

3. A minimum of one 400-level historical culture and literature course:
- G407 Knights, God, and the Devil (3 cr.)
- G408 Love and Nature in the Age of Romanticism (3 cr.)
- G409 German Myths, Fairy Tales and Social Transformation (3 cr.)
- G410 20. Jahrhundert: Kultur und Literatur (3 cr.)

4. Capstone: Portfolio
- G498 Individual Studies in German (1 cr.)

To help assess and showcase academic progress in German while at IUPUI, graduating majors will assemble and present a capstone portfolio that includes a minimum of one written project completed for each of the major courses above the 100 level taken in residence at IUPUI.

International Study or Work Internship Option

- G493 Internship in German (1-6 cr.)
- G498 Individual Studies in German (1-6 cr.)

1-6 credit hours toward the major in German may be earned through individual study or international work internship abroad or locally. There is a 3 credit limit for one individual study or work project.

Program for International Engineering

Students majoring in biomedical, mechanical, electrical, or computer engineering can also earn an applied German major. German language requirements and some School of Liberal Arts requirements are modified for this major. The dual degree program takes five years to complete and includes a one-semester internship in Germany during the

fourth year of study. Students may formally enter into the program after completion of the Freshmen Engineering program. For further information, contact the director of the Program in German and refer to the Purdue School of Engineering and Technology section of this bulletin.

Teacher Certification for Secondary School

Teaching certification can be required after completion of the B.A. degree with a major in German through successful completion of the Transition-to-Teaching Program in the School of Education. Please contact the School of Education regarding details and the application process.

Japanese Studies

This program provides an opportunity for students who wish to major in Japanese studies. They will construct individually a program to fit their academic interests. The program is overseen by a faculty director and monitored by the committee for the individualized major.

Spanish

In addition to fulfilling the general distribution requirements for a Bachelor of Arts degree established by the School of Liberal Arts, the Spanish major must complete 30 credit hours in courses at the 300 and 400 levels (12 of which must be completed on the IUPUI campus) with a grade of C (2.0) or higher.

- 300-level required courses: S313, S323, S326, S360, and S363
- One 400-level literature course: S407, S408, S431, S432, S445, S450, S455, S457, S461, S470, S471, S472, S477, or S495
- One course in culture and civilization: S411 or S412
- One course in linguistics: S425, S427, S428, S440, or S441
- One elective
- Senior Capstone: S487 or S498

Senior Capstone

Only majors with senior standing may register for S487 Capstone Internship or S498 Capstone Seminar in Spanish with authorization. Working with a project director, students will prepare a learning portfolio that integrates their undergraduate study through writing and reading projects, discussions with their capstone director, a research or internship project, and a final oral presentation.

Teacher Certification

Teacher certification is obtained through the School of Education. Students who wish to pursue certification at the secondary level must complete all professional courses required by the School of Education and should work with a School of Education advisor in consultation with a Spanish advisor.

Teaching Major Requirements

The teaching major in Spanish requires the completion of a minimum of 39-41 credit hours beyond the 100 level, including 33 credit hours in 300- and 400-level courses. The following courses are specifically required:

- S313, S323, S326, S360, S363, S428
- One course in literature: S407, S408, S431, S432, S445, S450, S455, S457, S461, S470, S471, S472, S477, S495
- One course in culture and civilization: S411 or S412
- One course in linguistics: S425, S427, S428, S440, or S441
- Senior Capstone: S487 or S498

Note for native speakers of Spanish: since S317 is not open to native speakers, another course at the 300 or 400 level must be substituted. Please consult the director of the Program in Spanish.

Chinese Studies

Students may also create an individualized major in Chinese. Students who are interested in designing their own Chinese major must first consult with the Chinese Program Director and Professor Susan Shepherd, Director of the Individualized Major Program.

Medical Humanities and Health Studies

Bachelor of Arts in Philanthropic Studies

Philanthropic Studies provides a theoretical framework and practical knowledge about the "whys" of giving and volunteering as well as the "how to" of working within nonprofit organizations and civil society to create change. The Bachelor of Arts in Philanthropic Studies degree program offers students an opportunity to understand the cultural traditions of voluntary action and to practice working with others towards the common good. The curriculum explores the economic, historical, and philosophical rationales for voluntary action. Students acquire the ability to discern and pursue ethical and value-based actions and ideas and effectively communicate ideas to others. The major prepares students for entry-level positions in philanthropy and nonprofit organizations and careers in a wide-range of organizations. Philanthropic Studies is a major designed to educate the socially conscious student in the emerging field of philanthropy and nonprofit organizations in the local, national, and international arena.

Admission

All students entering the Bachelor of Arts in Philanthropic Studies program must be admitted officially to IUPUI as a degree-seeking student by the Office of Admissions or by another Indiana University campus as a degree-seeking student. For more information, visit the Office of Undergraduate Admissions at www.enroll.iupui.edu. For program related questions, please contact the Director of Student Services, The Center on Philanthropy, 317-278-8900.

Academics

The B.A. major in Philanthropic Studies requires satisfactory completion of the following requirements:

Completion of properly distributed credit hour requirements for the Bachelor of Arts degree, as indicated in the Bulletin of the IUPUI School of Liberal Arts that was current when the student declared a major in Philanthropic Studies.

Completion of 33 credit hours, with a minimum grade of C in each course, from among the following distribution of

Philanthropic Studies and related courses (or from approved substitutions):

- 21 Credit Hours in Core Courses
- 12 Credit Hours in Advanced Courses (300 or above)

Philanthropic Studies Core Courses (21 credits): (do we need to add PHST?)

- PHST P201 - Introduction to Philanthropic Studies (3 cr.)
- OR PHST P105 – Giving and Volunteering in America (3 cr.)
- PHST P210 - Philanthropy and the Social Sciences (3 cr.)

OR

- PHST P211 - Philanthropy and the Humanities (3 cr.)

OR

- PHST P212 - Philanthropy and Civic Engagement (3 cr.)
- PHST P301 – The History of and Contemporary Approaches to Philanthropy (3 cr.)
- PHST P401 - Ethics and Values of Philanthropy (3 cr.)
- PHST P450 - Capstone Seminar in Philanthropic Studies (3 cr.)
- SPEA V458 - Fund Development for Nonprofit Organizations (3 cr.)
- PHST P490 - Internship in Philanthropic Studies (3 cr.)

Advanced Courses (12 credits):

- PHST P330 - Topics in Philanthropic Studies (3 cr.)
- PHST P375 - Philanthropy, Calling, and Community (3 cr.)
- PHST P430 - Topics in Philanthropic Studies (3 cr.)
- ANTH E411 - Wealth, Exchange, and Power in Anthropological Perspectives (3 cr.)
- ECON E414 - Economics of the Nonprofit Sector (3).
- ENG L373 - Philanthropy and Literature: Philanthropy and Literature (3 cr.)
- HIST H415 - The History of Philanthropy in the West (3 cr.)
- JOUR-J429 – Public Relations Campaigns
- PHIL P326 - Ethical Theory (3cr.)
- RELS R379 - Religion and Philanthropy (3 cr.)
- RELS R393 - Comparative Religious Ethics (3cr.)
- SPEA V362 - Nonprofit Management and Leadership (3 cr.)
- SPEA V462 - Community Development (3 cr.)

Africana Studies

Major in Africana Studies

The major in Africana Studies has four objectives. First, it grounds students in the essential theory and basic information about people of African descent. Second, it provides students with transnational perspectives on the life, history and culture of people of African descent and the global societies of which they are a part. Third, it offers IUPUI undergraduates a wide range of community research, internship and service learning opportunities with local private and public organizations. Finally, recognizing the educational and experiential value of international exposure, it offers students the opportunity for those who wish to do so to study abroad. The degree is designed to empower students to recognize their own cultural traditions both nationally and internationally, use information and concepts from multiple disciplines, examine and organize ways of knowing and apply them to specific issues and problems, and promote critical thinking as well as intellectual depth and understanding.

Requirements

The major in Africana Studies requires 33 credit hours, distributed as follows:

Courses

Required Courses (12 cr.)

- AFRO A140 Introduction to African and African American Studies (3 cr.)
- AFRO A200 Research Methods in African and African American Studies (3 cr.)
- AFRO A306 Globalization, Struggle and Empowerment in African and African American Studies (3 cr.)
- AFRO A414 Seminar in African and African American Studies (3 cr.)

Additionally, students must select a 9 credit required area concentration in either Africa, Latin America & the Caribbean or North America. The area concentration must include courses from at least 2 different SLA departments and at least 3 courses at the 300 level or higher. The chosen area concentration will appear on the student's transcript.

Program Electives

- AFRO A106 Perspectives on the African Diaspora (1-3 cr.)
- AFRO A152 Introduction to African Studies (3 cr.)
- AFRO A202 The West & the African Diaspora (3 cr.)
- AFRO A255 The Black Church in America (3cr.)
- AFRO A303 Topics in African American Studies (3 cr.)
- AFRO A440 History of the Education of Black Americans (3 cr.)
- AFRO A353 African Development and the African Diaspora (3 cr.)
- AFRO A495 Independent Readings in Afro-American Studies (3 cr.)
- AFRO A499 Community Experience Internship (3 cr.)

Department Electives

- HIST H227 African Civilizations (3 cr.)
- ENG L245 Introduction to Caribbean Literature (3 cr.)
- ANTH E310 Cultures of Africa (3 cr.)
- REL R314 Religion and Racism (3 cr.)
- REL R328 Religions of the African Diaspora (3 cr.)
- POLS Y337 Latin American Politics (3 cr.)
- POLS Y338 African Politics (3 cr.)
- HIST F341 Latin America: Conquest and Empire (3 cr.)
- HIST F342 Latin America: Evolution and Revolution since Independence (3 cr.)
- GEOG G323 Geography of Latin America (3 cr.)
- GEOG G324 Geography of the Caribbean (3 cr.)

- HER H300 Black Visual Artists (3 cr.)
- HER H351 African Art I (3 cr.)
- HER H352 African Art II (3 cr.)
- FOLK F354 African American Folklore/Folk-Life/Folk Music (3 cr.)
- HIST A355 African American History I (3 cr.)
- HIST A356 African American History II (3 cr.)
- REL R363 African American Religions (3 cr.)
- ENG L370 Black American Writing (3 cr.)
- REL R370 Islam in America (3 cr.)
- REL L382 Fiction of the Non-Western World: 20th Century African Literature (3 cr.)
- ANTH E384 The African Diaspora (3 cr.)
- MUS M393 History of Jazz (3 cr.)
- MUS M394 Black Music in America (3 cr.)
- ENG L406 Topics in African American Writing (3 cr.)
- ENG L411 Literature and Society: South African Literature and Society (3 cr.)
- HIST H421 Topics: Peoples and Cultures of Africa (3 cr.)
- HIST H421 Topics: Modern Africa (3 cr.)
- SOC R461 Race and Ethnic Relations (3 cr.)

Arabic & Islamic Studies

Major in Arabic and Islamic Studies

Students may design a major in Arabic & Aslamic tudies through the Individualized Major Program in the IU School of Liberal Arts at IUPUI. Students interested in planning an individualized major should consult the Director Arabic Studies Program and the Director of the Individualized Major Program as early as possible in their academic careers.

Bachelors Requirements

All students admitted to the IU School of Liberal Arts after June 1, 2012, must fulfill the requirements described below. Students admitted before that date may elect these requirements by informing their advisor and the Miriam Z. Langsam Office of Student Affairs or may obtain their degree under the requirements in effect at the date they were admitted to the IU School of Liberal Arts.

All students must meet three types of requirements: general-education requirements, distribution requirements, and major requirements. Questions about general-education and distribution requirements can be answered by the IU School of Liberal Arts Miriam Z. Langsam Office of Student Affairs, Cavanaugh Hall 401, (317) 274-3976. Questions having to do with major requirements should be directed to a faculty advisor or the chairperson of the major department.

General Education Requirements

- A minimum of 122 credit hours is required for either a B.A. or a B.S. degree in the IU School of Liberal Arts.
- A minimum cumulative grade point average of 2.0 (C) is required for graduation.
- A minimum of 30 credit hours must be at the 300-400 level.
- A minimum of 26 credit hours must be completed after formal admission to the IU School of Liberal Arts. This requirement may be waived by petitioning the Academic Affairs Committee. Petitions are available in Cavanaugh Hall 401.
- Students must complete a minimum of 12 credit hours of their major course work in residence in the appropriate department in the IU School of Liberal Arts. Some departments have more restrictive residency requirements. Students should check with their major advisor.
- Courses taken using the Pass/Fail option can be applied only as electives or toward the 300- to 400-level requirements (Area III of the distribution requirements for the bachelor's degree). A maximum of eight courses, with no more than two per year, may be taken as Pass/Fail.
- With permission from the departmental advisor and the Miriam Z. Langsam Office of Student Affairs, a maximum of 12 credit hours may be taken by correspondence through the IUPUI Division of Continuing Studies.
- All candidates for degrees in May and August must file an application for the degree by December 1 of that year. All candidates for December degrees must file an application for the degree by September 1 of that year. Candidates for degrees in December, May, or August may participate in the May commencement.
- Credit hours from the following courses will not count toward the 122 hours needed for graduation: English G009, G010, G011, G012, G013, G015, and W001; Mathematics M13000, M13100, M13200, M13600, and any mathematics course lower than M118 (e.g., MATH 00100, 11000; 111000).
- Once a course has been applied toward one requirement, it cannot be used to satisfy a second requirement, except where explicitly stated otherwise. In addition, except in cases of variable title courses, internships, and other special courses, no course will be counted more than once toward graduation.
- A maximum of 15 credit hours in unapproved electives can be counted toward the degree.

Distribution Requirements

The requirements for IU School of Liberal Arts baccalaureate degree programs include the common general-education core approved by the faculties of both the IU School of Liberal Arts and the Purdue School of Science at IUPUI, and are a curriculum based on the IUPUI Principles of Undergraduate Learning.

Candidates for the B.A. and B.S. degrees must complete the following requirements:

Core Course Requirements

A. First-Year Experience (1-3 cr.)
This course introduces students to IUPUI's culture and values; familiarizes them with campus resources, especially academic uses of technology; provides them with skills in dealing with life at IUPUI; and introduces them to an overview of the humanities and the social and natural sciences. Transfer students with 18 or more credit hours are not required to take this course. First year students entering or intending to enter the IU School of Liberal Arts should enroll in: SLA S100 (2 cr.)
Students transferring from another IUPUI school may use University College: UCOL U110 (1-2 cr.)

B. Junior/Senior Integrator (3 cr.)
This course shows how the humanities and social and natural sciences are interrelated and interdependent. Before taking this course, students must complete the following: one course in their major, English W131 and W132, History H114, one science course, one mathematics course (M118 or above), and one course from two of the following areas: humanities, social science, or comparative world cultures. Ideally, students should complete one course from each of the three lists before taking the integrator course. This course may be used in Area III.
Lists of approved courses will be available in the Schedule of Classes in the Miriam Z. Langsam Office of Student Affairs (Cavanaugh Hall 401) or may be accessed by using the school's Course Offerings tool.

C. Capstone Experience (1-3 cr.)
The capstone course is generally taken in a student's major as a cumulative integrating experience that addresses the Principles of Undergraduate Learning as well as values and ethics as they relate to a student's major. The capstone may be an independent research project or study, a practicum, or a seminar or field experience building on students' previous work. Special interdisciplinary capstones may also satisfy this requirement. Students should check with their advisors about which courses satisfy this requirement.

Area I. Communications Core (19 cr.)
The courses in the communications core provide work in English and foreign language to help students organize and present their thoughts in an effective manner. Students should enroll in these courses as early in their college careers as possible.

English Composition (6 cr.) Competency in English composition is required. This requirement may be satisfied in the following ways:

1. By completing W131 (or W140) and W132 (or W150) with a grade of C (2.0) or higher; W231 will also be accepted as the second English course; (students may also self-place into the W130-W131 "stretch" program to meet the W131 portion of the writing requirement).
2. By becoming eligible for the W131 exemption portfolio through the English Placement Exam and receiving special credit for W131 after submitting a portfolio, and completing W132 (or W150) with a grade of C (2.0) or higher; or
3. For transfer students, by completing course work equivalent to W131 (or W140) and W132 (or W150) with a grade of C (2.0) or higher at another campus or institution.
4. For transfer students with 80 or more transfer credits, by completing a petition for exemption from W132 available in the Miriam Z. Langsam Office of Student Affairs, CA 401.

The IU School of Liberal Arts strongly recommends that students complete English W131 (or W140) during their first semester or as soon afterward as placement test scores and course availability allow. Students should also take W132 as quickly as possible after becoming liberal arts majors.

Note: Special English for Academic Purposes(EAP) sections of W001 and W131 have been designated for students whose first language is not English.

Speech Communication R110 (3 cr.): Students with previously acquired competency in public speaking may be eligible for special credit and exemption from this requirement; contact the chairperson of the Department of Communication Studies, Cavanaugh Hall 309, (317) 274-0566.

World Languages Requirement: First-year competency is required and second-year competency is strongly recommended. Students may earn additional language credit by taking a placement test and completing an advanced course. This requirement may be satisfied in one of the following ways:

- By passing first-year (10 credit hours) courses in a single language with passing grades;
- By completing a second- or third-year course[1];
- By taking a placement test and placing into the 200 level or higher; this waives the 100-level requirement but does not carry with it credit toward graduation.

This requirement may be met with first-year proficiency in American Sign Language.

Placement Test Students with previous experience in French, German, or Spanish should take the World Language Placement Test at the Testing Center to assess their level of language proficiency.

Students who complete the course into which they were placed with a grade of C or higher are eligible for special credit at a reduced fee for the appropriate lower-division course(s) that precede the course taken. Language special credits can only be awarded for languages taught in the World Languages and Cultures department at IUPUI. Special credits count toward graduation and toward the world language requirements.

117 Course: Courses numbered 117 are reserved for students who have studied no more than one year of the language. Students who have had two or more years of formal study in the language should take either the 131 course in that language for a letter grade or they may take the 117 course for a Satisfactory/Fair (S/F) grade. Students must earn a minimum grade of C to receive an S grade.

Non-native English Speakers: Students for whom English is not a first language may be exempted from the language requirement, without credit, by completion of English W131 and W132 with the required grade of C or higher.

Students whose native language is not English may demonstrate proficiency in their native language and earn 3 to 6 hours of 298/299 special credits by successfully completing a specific 300-level course. They may not, however, receive credit for taking first- and second-year courses in their native language. Students are also considered "native speakers of another language" if they have completed secondary (high) school in that language. For additional questions, consult the Department of World Languages and Cultures (WLAC).

Area II. Basic Courses

Analytic Skills (6 cr.): These courses provide the student with insight into the process of logical reasoning. Each student must complete 3 credit hours in mathematics (Math M118 or above) plus 3 credit hours in one of the following:

- A second mathematics course (beyond M118)[2],
- A statistics course: Economics; ECON E270, Geography; GEOG G488, Psychology; PSY B305, Sociology; SOC R359, Statistics; STAT 30100
- A computer programming course: Business; BUS K201, Computer Science CSCI N201, CSCI N211
- A course in logic: Philosophy; PHIL P162 or PHIL P265, Sociology; SOC R251, Political Science; POLS Y205, or Computer Science; CSCI N207.

A logic or statistics course in a student's major can be applied toward the second requirement.

Computer science and computer technology courses that develop the student's problem-solving ability and promote the understanding and use of logical structures of thought are appropriate for the analytical skills requirement. Computer courses must focus on programming or data manipulation.

Natural Science (9-11 cr.): This area allows for a choice of courses treating the natural phenomena of the world according to models of scientific thought. The credit hours are to be selected from at least two of the following areas, and at least one of the courses must be a laboratory course:

- Anthropology (ANTH) A103
- Astronomy (AST) A100, A105, A130
- Biology (BIOL) K101, K103, N100, N107, N200, N212, N213 (lab), N214, N215 (lab), N217, N251, N261, N322
- Chemistry (CHEM) C100, C101, C110, C115 (lab), C121 (lab), C105, C125 (lab), C106, C126 (lab)
- Geography (GEOG) G107, G108 (lab), G303, G307
- Geology (GEOL) G107, G117 (lab), G109, G110, G115, G119 (lab), G120 (lab), G130, G132, G180, G206 (lab)
- Physics (PHYS)P10000, P15200, P20000, P21800, P21900, P25100, P201, P202
- Psychology (PSY)B105

Up to 5 credit hours in geography (G107, G108, G303, or G307) may be counted toward this requirement, but they cannot be counted toward the major as well. G108 may be counted as the laboratory component for this requirement.

History (6 cr.): These courses explore patterns and processes of history essential for making decisions in the present and give the background necessary for students to assume their responsibility as citizens. This requirement is fulfilled by taking HIST H114 or HIST H109, and HIST H113 or HIST H108.

Arts and Humanities (6 cr.): This area presents insights into aesthetics, ideas, and systems of values.

The 6 credit hours must come from two of the areas below. Courses in one's major cannot be used to fulfill this requirement; however, one course taken as part of a minor may be used. Creative writing, drawing, performance, or studio courses will not satisfy the arts and humanities requirement.

- Africana Studies: (AFRO) A150*
- American Studies (AMST) A103
- Classics: (CLAS) C205*
- English Literature: (ENG) L105, L115
- Fine Arts: Communication Studies (COMM) T130[theater]; English (FILM) C292; Herron (HERR) H100, H101, H102; Music (MUS) M174
- Folklore: (FOLK) F101*
- History: (HIST) H105, H106, H108*,H109*, H113*, H114*, H217
- Philanthropic Studies: (PHST) P105
- Philosophy: (PHIL) P110, P120
- Religious Studies: (REL) R111, R120, R133*, R173, R180, R212*
- Women's Studies: (WOST) W105*
- World Languages and Cultures: French (FREN) F200, German (GER) G265, Japanese (EALC) E231

Social Sciences (6 cr.): This area uses procedures and information developed in the social sciences to examine the complexities of societies and human interaction. The 6 credit hours must come from two of the following areas. Courses in one's major cannot be used to fulfill this requirement; however, courses taken as part of a structured minor may be used to fulfill this requirement.

- Africana Studies: (AFRO) A150*
- Anthropology: (ANTH) A104
- Communication Studies: (COMM) C180, M150
- Economics: (ECON)E101, E201, E202
- Englis: (ENG) Z104
- Folklore: (FOLK) F101*
- Geography: (GEOG) G110*, G130
- History: (HIST) H117
- International Studies: (INTL) I100
- Medical Humanities and Health Studies: (MHHS) M201
- Political Science: (POLS)Y101, Y103, Y213, Y219
- Psychology: (PSY) B104, B310
- Public and Environmental Affairs: (SPEA) V170
- Sociology: (SOC) R100, R121
- Women's Studies: (WOST) W105*

*Comparative World Cultures (3 cr.)**:* This area presents culture in a comparative and conceptual manner and includes material from several cultures. Students must take one course from one of the areas below:

- Anthropology: (ANTH) A104
- Classics: (CLAS) C205
- Geography: (GEOG)G110
- History: (HIST) H108
- International Studies: (INTL) I100
- Political Science: (POLS) Y217
- Religious Studies: (REL) R133, R212
- World Languages and Cultures: French (FREN) F200

Transfer Credits Students with transfer work from other universities may have some of their work counted toward the distribution requirements even if their courses, when transferred in, were not designated as matching the courses listed previously. The Associate Dean for Student Affairs and the departments, when appropriate, will determine whether transfer courses satisfy the distribution requirements.

Area III. Advanced Courses (15 cr. at 300-400 level)

Students are required to have 15 credit hours in 300-400 level courses outside their major. At least three courses must come from different departments within the IU School of Liberal Arts and/or Purdue School of Science unless the student is pursuing a minor, certificate, or second major or degree. The Junior/Senior Integrator course is generally used to satisfy one of the Area III requirements.

Two courses may come from outside liberal arts and science. If a student is pursuing a second major or degree, the student may use four courses at the 300-400 level from his or her secondary program to count for the Area III requirement. A student may use three 300–400-level courses from an approved minor to count toward the Area III requirement. For exceptions to these rules, students must petition the Academic Affairs Committee.

Major Requirements
The requirements for each major in the IU School of Liberal Arts are described, along with course descriptions, in the Liberal Arts section of the bulletin entitled ''Departments, Programs and Centers.'' A minimum of 30 credit hours must be taken in the major subject area. Any course in which the student receives a grade below C (2.0) may not be used to fulfill the major area requirement (thus a C– does not qualify). However, courses in which the student receives below C, but above an F, will count toward the 122 credit hour total provided that the student does not repeat the course.

Electives
Candidates for a degree in the IU School of Liberal Arts must complete their general-education requirements and the requirements of their major department. Usually, students will still need to complete additional hours in order to reach the graduation requirement of 122 credit hours. These remaining credit hours are known as electives; up to 15 credit hours of course work (electives) may be accepted from any degree-granting university. The remaining electives must come from courses within the IU School of Liberal Arts, the IU Herron School of Art and Design, the School of Journalism, the Purdue School of Science at IUPUI, or from a list of courses approved by the faculty of the IU School of Liberal Arts.

Second Bachelor's Degree
Normally, holders of bachelor's degrees seeking further education are encouraged to enter graduate programs; in certain cases, however, students may prefer to work toward a second bachelor's degree. If admitted by the Dean to candidacy for a second degree, students must earn at least 26 additional credit hours in residence and meet the requirements of the IU School of Liberal Arts and of the department in which they are candidates.

Minors and Certificate Programs
IU School of Liberal Arts students may complete one or more minors and/or certificate programs. Minors will not appear on the student's transcript until graduation. Students in other schools of IUPUI may complete minors in the IU School of Liberal Arts.

Only courses in which students receive a C (2.0) or higher can be applied to the minors and certificates. Specific requirements are described in the section of this bulletin entitled ''Departments, Programs and Centers.'' Courses required for minors and certificates may also be used in fulfilling other requirements, including distribution requirements.

IU School of Liberal Arts minors are presently offered in the following areas (as additional minors, such as Motorsports Studies and Latino Studies, are being developed and approved they will be added to the electronic version of the Bulletin):

- Africana Studies
- American Studies
- Ancient Greek and Latin
- Anthropology
- Arabic and Islamic Studies
- Business and Professional Writing
- Chinese Studies
- Classical Studies
- Communication Studies
- Creative Writing
- Cultural Diversity
- Economics
- European Studies
- Film Studies
- French
- Geography
- German
- History
- International Studies
- Japanese Studies
- Legal Studies
- Linguistics
- Literature
- Media Studies
- Medical Humanities and Health Studies
- Medical Sociology
- Philanthropic Studies
- Philosophy
- Political Science
- Religious Studies
- Sociology
- Spanish
- General Theatre
- Urban Studies
- Women's Studies

The following IU School of Liberal Arts undergraduate certificate programs are also available (as additional certificates, such as in Latino Studies, are developed and approved, they will be added to the bulletin):

- African Studies
- American Sign Language/English Interpreting
- Chinese Studies
- Geographic Information Science
- Human Communication in a Mediated World
- International Studies
- Motorsports Studies
- Museum Studies
- Paralegal Studies
- Theatre and Performance
- Translation Studies

Students must receive departmental or program approval for the courses to be used for minors as well as approval for courses not taken at IUPUI that they wish to count in a minor. Special credit may be applied to minor requirements with departmental approval.

Other Options
The IU School of Liberal Arts allows students to complete double majors and double degrees. Students seeking a double major must consult advisors from each of the departments in which they propose to study. Students must complete the requirements for each of the two majors as well as all other school requirements for a degree.

While most students work on a single degree at a time, a student may work on what is essentially two degrees in two different schools at IUPUI simultaneously (e.g., a B.A. from Indiana University in English and a B.S. from Purdue University in Psychology). Proposed dual degrees programs must be approved by the appropriate advisors and deans in both schools. Students must complete all requirements in the two schools for the two different degrees.

[1] Students interested in receiving credit for lower-division language courses, see the section ''Special Credit for Foreign Language Study.''

[2] Additional mathematics courses for this requirement must be above M118 and may not include 13000, 13100, 13200 or 13600.
* This course appears on more than one list or in more than one section. However, this course may be used to satisfy only one requirement unless specifically stated.
**These courses may be used for comparative World Cultures and one other requirement if it appears on the Arts and Humanities, the Social Science, or history lists.

Certificates

- American Humanics
- American Sign Language/English Interpreting
- Chinese Studies
- Geographic Information Science
- Museum Studies
- Paralegal Studies
- Technical Communication
- Theatre and Performance
- Translation Studies

American Sign Language/English Interpreting

The certificate is intended for students who already have a baccalaureate degree and would like to go beyond their original undergraduate major by completing the course work for the major in ASL/English interpreting.

The certificate program includes 24 credit hours of course work. To earn the certificate, students are required to complete the following courses with a grade of C or higher:

Required Courses
ASL A219 History and Culture of the American Deaf Community (3 cr.)
ASL A 321 Linguistics of American Sign Language (3 cr.)
ASL I301 Introduction to Interpreting (3 cr.)
ASL I303 ASL for Interpreters (3 cr.)
ASL I361 Basic Interpreting Skills (3 cr.)
ASL I363 Interpreting Community Texts: Consecutive (3 cr.)
ASL I365 Interpreting Community Texts: Simultaneous (3 cr.)
ASL I405 Practicum (3 cr.)
ASL I407 Professional Seminar (2 cr.)
ASL L340 Discourse Analysis: English (3 cr.)
ASL L342 Discourse Analysis: ASL (3 cr.)
A General Linguistics Class (3 cr.)

Theatre and Performance

The Undergraduate Program in Theatre and Performance consists of 18 credit hours of coursework, including a required Communication Studies Core of three core courses. All these courses must be passed with a grade of C or above in order to count for the Certificate.

Required core courses (9 credits):

- COMM T130 Introduction to Theatre (3 cr.)
- COMM T437 Creative Dramatics (3 cr.)
- COMM G300/G400 Independent Creative Project (3 cr.)

Select three of the following elective courses. (9 cr.):* Students will select the remaining 9 hours of electives in consultation with the department faculty advisor to narrowly tailor the program to individual student interest based upon the Independent Creative Project Proposal.

Theatre Emphasis

- COMM C 104 Voice and Diction (3 cr.)
- COMM T 133 Acting I (3 cr.)
- COMM T 205 Oral Interpretation (3 cr.)
- COMM G 300 Practicum in Debate and Forensics (3 cr.)
- COMM T 305 Advanced Oral Interpretation (3 cr.)
- COMM T 333 Acting II (3 cr.)
- COMM T 337 Theatre History I (3 cr.)
- COMM T 338 Theatre History II (3 cr.)
- COMM T 339 Directing (3 cr.)
- COMM T 431 Playwriting (3 cr.)

Drama/English Emphasis

- ENG L205 Introduction to Poetry (3 cr.)
- ENG L207 Women and Literature (3 cr.)
- ENG L245 Introduction to Caribbean Literature (3 cr.)
- ENG W302 Screenwriting (3 cr.)
- ENG L315 Major Plays of Shakespeare (3 cr.)
- ENG L365 Modern Drama: Continental (3 cr.)
- ENG L366 Modern Drama: English, Irish, and America (3 cr.)
- ENG L370 Recent Black American Writing (3 cr.)
- ENG L379 Ethnic and Minority Literature of the United States (3 cr.)
- ENG L390 Children's Literature (3 cr.)
- ENG L433 Conversations With Shakespeare (3 cr.)
- CLAS C310 Classical Drama (3 cr.)

Anthropology/Women/Cultural Diversity Emphasis

- WOST W105 Introduction to Women's Studies (3 cr.)
- WOST W300 Topics in Women's Studies (3 cr.)
- HIST A355 African-American History (3 cr.)

- ANT E404 Field Methods in Ethnography (3 cr.)
- ENG L406 Topics in African-American Lit (3 cr.)
- MSTD A460 Museum Theatre (3 cr.)

*This is a sample list of elective courses.

To enroll in the Undergraduate Certificate in Theatre and Performance program, IUPUI students should do two things 1) complete an Application form in the School of Liberal Arts Student Affairs office (Cavanaugh Hall 401) and 2) fill out and mail this application form to the Communication Studies office (Cavanaugh Hall 309). Students who have less than 55 credit hours should consult with the Coordinator of the Undergraduate Certificate in Theatre and Performance Program.

Students who are currently enrolled at IUPUI may be considered for this certificate if they meet the following criteria:

- Have earned 55 credit hours towards their degree at IUPUI
- Have at least a cumulative 2.0 GPA

Students who have not enrolled at IUPUI may be considered for this certificate if they meet the following criteria:

- Apply for Undergraduate Admission to IUPUI and specify the Theatre and Performance Certificate as their objective.
- Have 55 credit hours of transferable work.
- Have at least a cumulative 2.0 GPA

Technical Communication

The Certificate in Technical Communication is offered by the School of Engineering and Technology in cooperation with the Department of English, the Department of Communication Studies, and the Society for Technical Communication. Students who earn the Certificate in Technical Communication will have demonstrated that they have the core competencies necessary for entry-level positions as technical communicators. They will have demonstrated their ability to gather and translate technical information for a variety of audiences. They will have designed, developed, and edited effective documents using rhetorical principles and current technology.

Any student formally admitted to IUPUI may be a candidate for the certificate. To receive the certificate, students must have a technical specialty (major, minor, or 9 credit hours of course work), successfully complete 18 credit hours of required and selected courses, and present a portfolio of work that is judged professionally competent by representatives of the local chapter of the Society for Technical Communication. Courses taken at other universities may be recognized as the equivalent of the required or selected courses. The technical communication coordinator in the School of Engineering and Technology must approve candidates' selections of courses.

Geographic Information Science

Admissions Requirements

Undergraduate students who are currently enrolled at IUPUI may apply for the undergraduate certificate if they meet the following criteria:

- have earned 55 credit hours towards their degree at IUPUI
- have earned a cumulative GPA of 2.5
- have successfully passed MATH 118

Students who have not enrolled at IUPUI may be considered for this certificate if they meet the following criteria:

- apply for Undergraduate Admission to IUPUI and specify the Undergraduate Geographic Information Science Certificate as their objective (Admissions Office: (317) 274-4591 or apply@iupui.edu).
- have 55 credit hours of transferable work
- have earned a cumulative GPA of 2.5

Students who have already completed undergraduate degrees can apply for the undergraduate certificate or apply to the IU Graduate School for admission to the graduate certificate program (see below).

Course Requirements

Total requirements: 21 credit hours. The minimum grade that will be accepted in any single course is C.

Required courses (15 credits):

- GEOG G335 Introduction to Remote Sensing (3 cr.)
- GEOG G338 Introduction to Geographic Information Systems (3 cr.)
- GEOG G337 Computer Cartography and Graphics (3 cr.)
- GEOG G336 Advanced Remote Sensing (3 cr.)
- GEOG G438 Advanced Geographic Information Systems (3 cr.)

Electives in GIS or complementary field (6 credits):
In addition to the required courses listed above, students must take six credit hours of electives at the 300 level or above that will enhance their background in GIS-related issues or apply their expertise to a specific area. Such areas include, but are not limited to:

- Computer Aided Design
- Surveying
- Computer Science and Technology
- Graphics and Visualization
- Applications of GIS

Museum Studies

The Museum Studies Program offers an 18 credit hour undergraduate certificate in museum studies designed to complement a bachelor's degree and to prepare students for a career in museums or for graduate study. Many of the courses take advantage of the excellent museum community in Indianapolis with behind-the-scenes tours of museums and guest lectures by experts in the field. The Museum Studies Program is interdisciplinary and draws students from the arts, humanities, and social sciences, as well as from the hard sciences.

The undergraduate core courses provide a firm introduction to the theory, methodology, and practice of museum work. An internship in a museum provides the opportunity to apply skills, gain experience, and develop professional relationships. A range of electives is recommended to allow exploration of areas of interest or to develop deeper knowledge in a more specialized aspect of museum work.

The Undergraduate Museum Studies Certificate consists of a core of four courses (12 cr.) and a choice of two additional courses (6 cr.) from a list of museum studies courses. All of these courses must be passed with a grade of C or higher in order to count for the certificate. Electives not on the list of approved electives must be approved by the museum studies director prior to registration. Before enrolling in the Undergraduate Museum Studies Certificate Program, IUPUI students must have completed 55 credit hours of university study with a minimum GPA of 2.0 and must have declared a major field of study.

IUPUI students meeting these requirements and wishing to enroll in the undergraduate certificate should complete a change of record form in the Liberal Arts Office of Student Affairs and should complete an intake form (which may be downloaded on the museum studies Web site). Once enrolled in the undergraduate certificate program, students should meet with their museum studies advisor to develop a curriculum plan.

The following 18 credit hours of course work are designed to provide a firm introduction to the theory, methodology, and practice of museum work.

- Museum theory (6 cr.): MSTD A403, HIST H217
- Museum methods (9 cr.): MSTD A405 and two electives, at least one of which must be a museum studies course; the other may be an approved elective from another department.
- Practical museum work: (3 cr.): 3 credits required in a museum internship (MSTD A408 or a discipline-based internship such as ANTH 412 done in a museum and with a museum studies faculty advisor.

Undergraduate Certificate Requirements

Core courses (12 cr.)

- MSTD A403 Introduction to Museum Studies (3 cr.)
- MSTD A405 Museum Methods (3 cr.)
- HIST H217 Nature of History (3 cr.)
- MSTD A408 Museum Internship (3 cr.)

Electives (6 cr.)

Choice of two additional courses. One or more must be from the museum studies curriculum. One elective may be from an approved list of courses offered in other departments (see the museum studies Web site for a current listing).

Paralegal Studies

- **Director** David Weiden, Assistant Professor, Department of Political Science
- **Academic Advising** Cavanaugh Hall 504A, (317) 274-7387

Paralegals play an increasingly important part in the legal profession, undertaking critical research and support work for attorneys. The Certificate in Paralegal Studies offered by the Department of Political Science is increasingly recognized as important preparation for anyone considering a career in law, and provides students with grounding in all the critical elements of the legal profession, from litigation to property law, contract law, bankruptcy law, and family law. Adding an important real-world element to the certificate, almost all the classes are taught by practicing attorneys or paralegals. Students can combine the certificate with any other degree programs or major, or take it by itself. The credit certificate program parallels the noncredit program available through the Division of Continuing Studies, and represents a partnership between the two schools.

The 27 credit hour certificate includes 9 credit hours of required course work and 18 credit hours chosen by the student from a set of elective courses listed below. Students must receive a grade of C or higher in each course they intend to apply toward the certificate.

Because of the demands of the required courses for the certificate, there are prerequisites that students must satisfy prior to undertaking the course work for the certificate: they should have college-level writing proficiency, computing proficiency, and should have completed POLS Y211 Introduction to Law, with a grade of C or higher.

Required Courses (9 credit hours):

- POLS Y221 Legal Research and Writing for Paralegal Studies (3 cr.)
- POLS Y222 Litigation for Paralegal Studies I (3 cr.)
- POLS Y232 Professional Responsibility for Paralegals (3 cr.)

Elective Courses

(18 credit hours from the following):

- POLS Y223 Litigation for Paralegal Studies II (3 cr.)
- POLS Y224 Property Law for Paralegal Studies (3 cr.)
- POLS Y225 Contract Law for Paralegal Studies (3 cr.)
- POLS Y226 Tort Law for Paralegal Studies (3 cr.)
- POLS Y227 Criminal Law for Paralegal Studies (3 cr.)
- POLS Y228 Family Law for Paralegal Studies (3 cr.)
- POLS Y229 Estate Law for Paralegal Studies (3 cr.)
- POLS Y230 Bankruptcy Law for Paralegal Studies (3 cr.)
- POLS Y231 Advanced Legal Writing for Paralegal Studies (3 cr.)
- POLS Y233 Business Associations for Paralegals (3 cr.)
- POLS Y485 Field Experience in Paralegal Studies (1-5 cr.)

Students who have questions about the Certificate in Paralegal Studies, or who wish to declare and pursue the certificate, should contact the director of paralegal studies, Professor David Weiden, Cavanaugh Hall 504J, (317) 274-7387.

American Humanics

The American Humanics (AH) Certificate prepares undergraduate students to become skilled professionals and leaders in human service (nonprofit) organizations. Students develop a network of professional contacts, obtain on-the-job experience through an extensive internship and site visits, and acquire leadership skills through the AH student association. In addition, they have opportunities to explore careers, participate in community service projects, and engage in social activities. This certificate program is open to students pursuing a bachelor's degree in any major. For more information, contact the School of Public and Environmental Affairs at (317) 274-4656.

Translation Studies

- **Director and Advising** Professor Enrica J. Ardemagni CA539D, 274-8957, eardema@iupui.edu
- **Assistant Professor** Benjamin Van Wyke

Program Description

The Department of World Languages and Cultures offers an undergraduate Certificate in Translation Studies with an emphasis in French, German, or Spanish. The certificate requires completion of 27 credit hours focusing on grammar, professional writing skills, culture, translation history and theory, nonliterary translation from English to French/German/Spanish and French/German/Spanish to English, terminology management, and knowledge of computer applications to translation. A minimum of 15 credit hours toward the certificate must be completed at IUPUI, and no courses may be taken with the Pass/Fail option.

The Certificate program is intended for advanced undergraduates or students holding or completing a bachelor's degree who would like to enhance their language expertise. As an undergraduate certificate program, the course work prepares students for further study in translation at the graduate level or for practical work, as well as develops basic competence for further work as professional translators. However, successful completion of the program does not indicate that a student is a "certified" translator.

It is highly recommended that students who wish to be accredited as a certified translator complete advanced-level course work in translation and seek certification through the American Translators Association. The Certificate will be awarded after a student has completed the minimum of a B.A. or B.S. degree; however, students who are not enrolled in the Certificate program may take the course work. It is recommended to make an appointment with the director of the Certificate program as soon as possible to see if prior course work can be counted towards credit as well as receive information about courses taught on a rotational basis.

Admission Requirements

Certificate candidates must possess fluency in their language pair. To be admitted to the Certificate program, students must have sophomore standing and meet the following three criteria:

1. Academic Readiness: Students must have a minimum GPA of 3.0 overall and 3.3 in their major.
2. Writing Proficiency: Students must have completed W131 and W132 or their equivalents with a grade of B or higher prior to admission, as well as a 300-level composition class in French, German, or Spanish with a grade of B or higher.
3. Translation Readiness: Prior to admission into the Certificate program, students are required to demonstrate a minimum level of bilingual ability to be successful in the course work required for the certificate. Students will be admitted to the certificate after receiving a B or higher in their first translation course.

Completion Requirements

Students must complete certificate-related courses with an overall GPA of 3.0 or higher before qualifying for the internship or directed study. A grade of C in more than one course will make candidates ineligible for completion of the certificate.

Translation Competence

Upon completion of the course work for the certificate, students must demonstrate translation competence through one of two options: (1) completion of an internship in the target language, which includes a minimum of 20 pages of translated text. The student's academic language advisor will be responsible for recommending placement and mentoring in the internship program; or (2) completion of an independent translation project in the target language, which includes a minimum of 20 pages of translated text. The student's academic language advisor will be responsible for mentoring the student through this translation project. Mentors use a set of rubrics for scoring the final translation or internship project.

Course Requirements

Because sequencing of courses is important, students should consult with the director prior to admission into the program.

1. **Core Courses (9 cr.) a. Advanced Professional Writing (English) (3 cr.)**

- W331 Business and Administrative Writing
- W365 Theories and Practices of Editing

b. Advanced Grammar (3 cr.)

- F402 Introduction to Linguistics or F421 Fourth-Year French
- G445 Advanced Grammar
- S421 Advanced Spanish Grammar or S426 Introduction to Linguistics

c. Culture Course (3 cr.)

- F461 La France contemporaine
- G365 Deutsche Kultur Heute
- S411 Culture and Civilization of Spain or S412 Culture and Civilization of Latin America

2. Courses in Translation (15 cr.)

a. History and Theory of Translation (3 cr.)

- FLAC F350 Introduction to Translation Studies and Interpreting

b. Translation Practice (6 cr.)

- F330 Introduction to Translating French and English
- F423 The Craft of Translation
- G333 German Translation Practice
- G423 The Craft of Translation
- S323 Introduction to Translating Spanish and English
- S423 The Craft of Translation

c. Computers in Translation (3 cr.)

- FLAC F450 Computers in Translation

d. Terminology Studies (3 cr.)

- F326 French in the Business World
- G331 Business German I or G431 Advanced Business German

- S315 Spanish in the Business World or S319 Spanish for Health Care Personnel or S419 Spanish for Law Enforcement or S429 Medical Interpreting or
- S430 Legal Spanish

3. Internship or Directed Study (3 cr.)
a. Internship

- F493 Internship Program in French
- G493 Internship Program in German
- S493 Internship Program in Spanish

b. Directed Study

- F495 Individual Readings in French
- G498 Individual Studies in German
- S494 Individual Readings in Hispanic Studies

For complete information and application, go to liberalarts.iupui.edu/wlac/undergraduate/translation_studies.

Motorsports Studies

The Certificate in Motorsports Studies will serves student interests and community needs. The recently developed BS in Motorsports Engineering and the Motorsports Technology Certificate demonstrate high interest among IUPUI students in the motorsports industry. Indianapolis, "Racing Capital of the World," is the home of several major motorsports events, including the Indianapolis 500, the Brickyard 400, the NHRA Nationals and the MotoGP. The Indianapolis Motor Speedway has also hosted the US Grand Prix. The nearby cities of Evansville and Madison, Indiana, host important events on the American Boat Racing Association schedule, the Madison Regatta and "Thunder on the Ohio", respectively. A very large number of facilities throughout central Indiana and the mid-west in general host racing events on a regular basis. The motorsports industry has a significant influence on the social and economic fabric of central Indiana, the mid-west, the United States and, indeed, the world.

Students usually will enter the program fall semester, but may apply for spring semester under special circumstances. Admission to the program requires junior standing.

Motorsports Studies will make the decision on admission to the program.

Students currently enrolled at IUPUI may be considered for admission to the program if they meet the following criteria:

1. Have earned 55 credit hours towards their degree at IUPUI
2. Have at least a cumulative 2.5 GPA

Students who have not enrolled at IUPUI may be considered for admission to the program if they meet the following criteria:

1. Apply for Undergraduate Admission to IUPUI and specify the Motorsports Studies Certificate as their objective.
2. Have 55 credit hours of transferable work.
3. Have at least a cumulative 2.5 GPA

These four areas of emphasis will be available within the program:

- Motorsports Studies
- Communication and Public Relations
- Business, Finance, and Management
- Tourism and Event Management

The Certificate will be awarded after the student has completed 21 hours of coursework, which includes 9 hours of core courses in Motorsports Studies, 9 hours of focused electives, and a 3 credit capstone course. Each of these courses must be passed with a grade of C or above in order to count for the Certificate. Electives must be approved by the Motorsports Studies Director prior to registration.

Required Courses

MSPT Z100 Motorsports Studies (3cr)
MSTE 27200 Introduction to Motorsports (3cr)
One of the following (3cr):

- COMM C380 Organizational Communication
- ENG W231 Professional Writing Skills
- COMM G310 Introduction to Communication Research
- SOC R351 Social Science Research Methods
- a*nd* LIBA MSPT Z444Motorsports Studies Capstone **or** LIBA MSPT Z445 Motorsports Studies Internship

Note 1: Students may not "double count" required courses and courses in the different areas described below. For example, R351, Social Science Research Methods, will not be counted as both a required motorsports course and a course in the Motorsports Studies Emphasis. Note 2: The instructors of MSPT 100 and MSTE 27200 will collaborate to insure that these courses are complementary.
Electives

In order to complete one of the four areas of emphasis listed above, students will select 9 hours of electives in consultation with the Director of the Motorsports Studies.

The Motorsports Studies Capstone will be designed by the student in consultation with the Director of Motorsports Studies. The capstone will help students synthesize and demonstrate what they have learned while readying them for opportunities in the motorsports industry. The capstone may consist of either an internship with a motorsports related organization or significant research project.

The student's chosen emphasis will appear on the transcript.

*The following is a sample list of elective courses for each track **[1]***

Motorsports Studies Emphasis (3 courses/9 credits from the list below):

- HIST A421 Topics in United States History: History of Sports, Recreation, and Leisure (3cr)
- GEOG G310 Introduction to Communication Research ***or*** SOC R351 Social Science Research Methods (3cr)
- COMM C380 Organizational Communication (3cr)
- ENG W231 Professional Writing Skills (3cr)
- ECON E307 Economics of Sport (3cr)
- AFRO A303 Topics in African American and African Diaspora Studies (such as, Sport, Culture, and African Americans) (1-3cr)

- AMST A303 Topics in American Studies (1-3cr)
- WOST W300 Topics in Women's Studies (1-3cr)

Note: Although variable credits are available in some of the above listed courses, 9 total credits are required.

Communication and Public Relations Emphasis (3 courses from the list below):

- ENG W231 Professional Writing Skills (3cr)
- COMM C380 Organizational Communication (3cr)
- TCEM 231 Tourism and Hospitality Marketing (3cr)
- JOUR J219 Introduction to Public Relations (3cr)
- JOUR J340 PR Tactics and Techniques (3cr)
- JOUR J360 Understanding Sports Media (3cr)

Note: JOUR J360 is a temporary number.
[1] *Several of the courses listed have pre-requisites or require consent of the instructor. For example, W231, Professional Writing Skills, has a pre-requisite of W131, Elementary Composition 1 (and a grade of C or better), and E307, Economics of Sport, has a pre-requisite of E201 (Introduction to Microeconomics), sophomore standing, or consent of the instructor. 200 level Business courses have no pre-requisites; the 300 level Business courses have several pre-requisites. Students are encouraged to examine the IUPUI Campus Bulletin, to consult with their advisor, and to consult with the Director of Motorsports Studies prior to embarking on a course of studies that leads to a Motorsports Studies Certificate.*

Business, Finance, and Management Emphasis (3 courses from the list below):

- MSTE 31000 Business of Motorsports I (3cr)
- MSTE 31100 Business of Motorsports II (3cr)
- ENG W231 Professional Writing Skills (3cr)
- JOUR J360 Sports Marketing and Advertising (3cr)
- BUS M200 Marketing and Society: A Look at Roles and Responsibilities ***or*** BUS M300 Introduction to Marketing (3cr)
- BUS W200 Introduction to Business and Management (3cr)
- BUS F200 Foundations of Financial Management ***or*** BUS F300 Introduction to Financial Management (3cr)
- BUS P200 Foundations of Operations and Supply Chain Management ***or*** BUS P300 Introduction to Operations Management (3cr)

N*ote: JOUR J360 is a temporary number.*

Tourism and Event Management Emphasis (3 courses from the list below)

- ENG W231 Professional Writing Skills (3cr)
- TCEM 219 Management of Sport Events (3cr)
- TCEM 231 Tourism and Hospitality Marketing (3cr)
- TCEM 329 Sport Marketing (3cr)
- TCEM 362 Tourism Economics (3cr)

Chinese Studies

The certificate in Chinese Studies consists of eighteen (18) credit hours in Chinese Studies or related courses approved by the Program Director. Courses at the 100-level do not count toward the certificate. Certificate requirements include a minimum of three (3) credits in Chinese language at the 200-level or above; a minimum of three (3) credits in Chinese culture at the 300-level or above (either EALC E334 or E335); and the remaining credits in Chinese language, culture, history, and/or society, chosen from the following:

- C201-202: Second-Year Chinese I-II (3-3 cr.)
- C301-302: Third-Year Chinese I-II (3-3 cr.)
- C320: Business Chinese (3 cr.)
- C401-402: Fourth-Year Chinese (3-3 cr.)
- OVST-C 490: Study Abroad in China (3 cr.)
- E331: Traditional Chinese Literature (3 cr.)
- E333: Studies in Chinese Cinema (3 cr.)
- E334: Contemporary Chinese Cinema (3 cr.)
- E335: Studies in Chinese Martial Arts Culture (3 cr.)
- E351: Studies in East Asian Culture (3 cr.)*
- G485: Modern China (3 cr.)
- HIST-H 421: Topics in African, Asian, or Latin American History (3 cr.)*
- SOC-R 495: Sociology Study of China (3 cr.)

*Please note: E351 (Studies in East Asian Culture must focus on Chinese culture and H421 (Topics in African, Asian, or Latin American History) must focus on Chinese history in order for these two courses to be counted toward the fifteen required credits.

Theatre and Performance

The Undergraduate Program in Theatre and Performance consists of 18 credit hours of coursework, including a required Communication Studies Core of three core courses. All these courses must be passed with a grade of C or above in order to count for the Certificate.

Required core courses (9 credits):

- COMM T130 Introduction to Theatre (3 cr.)
- COMM T437 Creative Dramatics (3 cr.)
- COMM G300/G400 Independent Creative Project (3 cr.)

Select three of the following elective courses. (9 cr.):* Students will select the remaining 9 hours of electives in consultation with the department faculty advisor to narrowly tailor the program to individual student interest based upon the Independent Creative Project Proposal.

Theatre Emphasis

- COMM C 104 Voice and Diction (3 cr.)
- COMM T 133 Acting I (3 cr.)
- COMM T 205 Oral Interpretation (3 cr.)
- COMM G 300 Practicum in Debate and Forensics (3 cr.)
- COMM T 305 Advanced Oral Interpretation (3 cr.)
- COMM T 333 Acting II (3 cr.)
- COMM T 337 Theatre History I (3 cr.)
- COMM T 338 Theatre History II (3 cr.)
- COMM T 339 Directing (3 cr.)
- COMM T 431 Playwriting (3 cr.)

Drama/English Emphasis

- ENG L205 Introduction to Poetry (3 cr.)
- ENG L207 Women and Literature (3 cr.)
- ENG L245 Introduction to Caribbean Literature (3 cr.)
- ENG W302 Screenwriting (3 cr.)
- ENG L315 Major Plays of Shakespeare (3 cr.)
- ENG L365 Modern Drama: Continental (3 cr.)
- ENG L366 Modern Drama: English, Irish, and America (3 cr.)
- ENG L370 Recent Black American Writing (3 cr.)
- ENG L379 Ethnic and Minority Literature of the United States (3 cr.)
- ENG L390 Children's Literature (3 cr.)
- ENG L433 Conversations With Shakespeare (3 cr.)
- CLAS C310 Classical Drama (3 cr.)

Anthropology/Women/Cultural Diversity Emphasis

- WOST W105 Introduction to Women's Studies (3 cr.)
- WOST W300 Topics in Women's Studies (3 cr.)
- HIST A355 African-American History (3 cr.)
- ANT E404 Field Methods in Ethnography (3 cr.)
- ENG L406 Topics in African-American Lit (3 cr.)
- MSTD A460 Museum Theatre (3 cr.)

*This is a sample list of elective courses.

To enroll in the Undergraduate Certificate in Theatre and Performance program, IUPUI students should do two things 1) complete an Application form in the School of Liberal Arts Student Affairs office (Cavanaugh Hall 401) and 2) fill out and mail this application form to the Communication Studies office (Cavanaugh Hall 309). Students who have less than 55 credit hours should consult with the Coordinator of the Undergraduate Certificate in Theatre and Performance Program.

Students who are currently enrolled at IUPUI may be considered for this certificate if they meet the following criteria:

- Have earned 55 credit hours towards their degree at IUPUI
- Have at least a cumulative 2.0 GPA

Students who have not enrolled at IUPUI may be considered for this certificate if they meet the following criteria:

- Apply for Undergraduate Admission to IUPUI and specify the Theatre and Performance Certificate as their objective.
- Have 55 credit hours of transferable work.
- Have at least a cumulative 2.0 GPA

Certificate in Human Communication in a Mediated World:

This 18-hour undergraduate certificate in Communication Studies gives students an opportunity to explore the communication challenges and opportunities inherent in the process of moving back and forth between face-to-face and mediated settings (online). The certificate, consisting of 5 online electives and one online required course, enables students to learn about the advantages and disadvantages of communicating in mediated environments as they learn in that environment. The goal of the certificate is to help students become more competent in choosing and using the appropriate communication strategies for specific messages and situations.

The Human Communication in a Mediated World online certificate provides a wide range of electives and one core course designed for people who want to become more proficient in communicating or designing messages for specific audiences by using a combination of face-to-face and mediated communication strategies.

Students must consult with an academic advisor to begin the Certificate process.

Africana Studies

Undergraduate students who are enrolled at IUPUI may apply for an undergraduate certificate in African Studies if they meet the following criteria:

- have completed at least 55 credit hours toward their degree at IUPUI
- have earned a cumulative GPA of 2.5

Students who have not enrolled at IUPUI and specify the Undergraduate Certificate in African Studies may be considered for this certificate if they meet the following criteria:

- apply for Undergraduate Admission to IUPUI and specify the Undergraduate Certificate in African Studies as their objective (Admissions Office: [317] 274-4591 or apply@iupui.edu).
- have 55 credit hours of transferable work
- have earned a cumulative GPA of 2.5

Students who have already completed undergraduate degrees can apply for the undergraduate certificate.

Total requirement: 18 credit hours. The minimum grade that will be accepted in any single course is C.

- AFRO A152 Introduction to African Studies (3 cr.)
- AFRO A200 Research in African and African American Studies (3 cr.) or
- AFRO A495 Individual Readings in Afro-American Studies (1-3 cr.)
- HIST H227 African Civilizations (3 cr.)
- POLS Y338 African Politics (3 cr.)
- ANTH E310 Cultures of Africa (3 cr.)
- HIST H421 Topics: Peoples and Cultures of Africa (3 cr.)
- HIST H421 Topics: Modern Africa (3 cr.)

- ENG L411 South African Literature and Society (3 cr.)
- ENG L382 Fiction of the Non-Western World: 20th Century African Literature (3 cr.)
- HER H351 African Art I (3 cr.)
- HER H352 Aftican Art II (3cr.)
- REL R328 Afro-Diasporic Religions (3 cr.)
- SWK S300 Global Human Rights and Cultural Competency Skills (3 cr.)
-

Associate's Degree Program

The Associate of Arts (A.A.) is a 62 credit hour program that is essentially the first two years of the Bachelor of Arts program. Students are expected to meet the degree requirements in effect on the date of their admission to the IU School of Liberal Arts. However, should the requirements change after that date, students have the option of choosing the new requirements with the approval of the Miriam Z. Langsam Office of Student Affairs.

Students intending to use the A.A. degree as the first two years of a B.A. degree should work with the A.A. Advisor, in the Miriam Z. Langsam Office of Student Affairs (Cavanaugh Hall 401), to select courses that will also apply to the B.A. degree.

Requirements

Candidates for the Associate of Arts must satisfy three types of requirements: general education requirements, distribution requirements, and concentration requirements.

I. General Education Requirements (62 cr.)

- 62 credit hours of regular university courses,
- a minimum grade point average of 2.0 (C),
- completion of at least 30 credit hours in residence at any Indiana University campus with at least 15 credit hours of the concentration at IUPUI,
- courses taken under the Pass/Fail option may not be applied toward the A.A. degree,
- by special permission from the Miriam Z. Langsam Office of Student Affairs, a maximum of 6 credit hours may be taken by correspondence through the Independent Study Division.

II. Distribution Requirements (44 cr.)

All students must complete the following:

First-Year Experience (1-3 cr.)
See B.A. distribution requirements for acceptable courses. (Transfer students with 18 credit hours are not required to take this course.)

English Composition (6 cr.)
Competency in English composition is required. Each course for this requirement must be completed with a minimum grade of C (2.0). This requirement may be satisfied in the following ways:

- by completing ENG W131 (or Honors ENG W140) and ENG W132 (or Honors ENG W150 or ENG W231);
- by testing out of ENG W131 through the IUPUI English Placement Exam and completing ENG W132 or ENG W231;
- for transfer students, by completing course work equivalent to ENG W131 and ENG W132 (or ENG W231) at another campus or institution.

Speech Communication (COMM) R110 (3 cr.)
Students with previously acquired competency in public speaking may be eligible for special credit and exemption from this requirement; contact the Department of Communication Studies in Cavanaugh Hall 309 or call (317) 274-0566.

Language (10 cr.)
This requirement may be satisfied by completing first-year courses with passing grades or by completing a second- or third-year course. See B.A. distribution requirements for more detailed information.

Analytic Skills (3 cr.)
See B.A. distribution requirements for acceptable courses.

Natural Sciences (9 cr.)
See B.A. distribution requirements for acceptable courses. (One course should be a laboratory course and no more than 5 credit hours should be in geography if students plan to complete the B.A. degree.)

Arts and Humanities (6 cr.)
See B.A. distribution requirements for acceptable courses.

Social Sciences (6 cr.)
See B.A. distribution requirements for acceptable courses.

III. Concentration Requirements (18 cr.)

The purpose of the concentration is to provide students with a focus in a single discipline/area, which may or may not include course work that fulfills requirements for a particular major for the Bachelor of Arts degree. See the A.A. advisor in the Miriam Z. Langsam Office of Student Affairs if you need assistance selecting a concentration and if you plan to pursue a B.A. degree.

The student may concentrate in either Option I, the Arts and Humanities, or Option II, the Social Sciences, explained below. Courses counted toward the distribution requirements cannot be counted toward the 18 credits in the concentration area.

Option I: Arts and Humanities: Complete both A and B below.

A grade of C or higher is required in each course.

A. Students choose one discipline in the Arts and Humanities and take 12 credit hours in that discipline (see the disciplines listed under ‘‘Arts and Humanities’’ in the ‘‘B.A. Distribution Requirements’’—students cannot concentrate in fine arts for the A.A. degree).

B. Students complete 6 credit hours of course work in other disciplines listed under ‘‘Arts and Humanities.’’ These courses may be in a single discipline or in more than one discipline. However, any particular course cannot count toward both distribution requirements and the concentration requirements.

Option II: Social Sciences: Complete both A and B below.

A grade of C or higher is required in each course.

A. Students choose one discipline in the Social Sciences and take 12 credit hours in that discipline. (See the disciplines listed under ''Social Sciences'' in the ''B.A. Distribution Requirements''—students cannot concentrate in psychology or linguistics for the A.A. degree).

B. Students complete 6 credit hours of course work in other disciplines listed under ''Social Sciences.'' These courses may be in a single discipline or in more than one discipline. However, no specific course can be used to satisfy both distribution requirements and the concentration requirements.

Undergraduate Programs

The IU School of Liberal Arts offers a four-year Bachelor of Arts degree in a number of disciplines, a Bachelor of Science in American Sign Language degree, a two-year Associate of Arts degree, and a variety of structured minors and certificate programs for students pursuing Liberal Arts or other degrees. At the heart of the school's programs are the following:

Programs	BA/BS	AA	Certificate	Minor
Africana Studies	BA		Certificate	
American Sign Language	BS		Certificate	
American Studies				Minor
Ancient Greek & Latin				Minor
Anthropology	BA			Minor
Arabic, Islamic Studies				Minor
Arts & Humanities		AA		
Business & Professional Writing				Minor
Chinese Studies			Certificate	Minor
Classical Studies				Minor
Communication Studies	BA			Minor
Economics	BA			Minor
English	BA			
English, Creative Writing	BA			Minor
English, Film Studies	BA			Minor
English, Linguistics	BA			Minor
English, Literature	BA			Minor

Statement of Goals
Graduates of the IU School of Liberal Arts should exemplify the ideals of a liberal arts education and the University's "Principles of Undergraduate Learning."

Students should be broadly educated across the disciplines and well trained in a particular major. They should have: (1) proficiency in reading, writing, and speaking skills; (2) competence in quantitative, language, and analytic skills; (3) a broad-based experience in the humanities, social sciences, and natural sciences; and (4) a major area of study. Although faculty and counselors are available to help students acquire these proficiencies and attitudes, learning must be self-motivated. To be taught, one must first be interested in learning. A liberal arts education, therefore, is the responsibility of the individual student.

By graduation, a liberal arts education should have provided the opportunity for a student to attain the IUPUI "Principles of Undergraduate Learning," which are:

- Core Communication and Quantitative Skills: The ability of students to express and interpret information, perform quantitative analysis, and use information resources and technology—the foundational skills necessary for all IUPUI students to succeed.
- Critical Thinking: The ability of students to engage in a process of disciplined thinking that informs beliefs and actions. Students who demonstrate critical thinking apply the process of disciplined thinking by remaining open-minded, reconsidering previous beliefs and actions, and adjusting their thinking, beliefs, and actions based on new information.
- Integration and Application of Knowledge: The ability of students to use information and concepts from studies in multiple disciplines in their intellectual, professional, and community lives.
- Intellectual Depth, Breadth, and Adaptiveness: The ability of students to examine and organize disciplinary ways of knowing and to apply them to specific issues and problems.
- Understanding Society and Culture: The ability of students to recognize their own cultural traditions and to understand and appreciate the diversity of the human experience.
- Values and Ethics: The ability of students to make sound decisions with respect to individual conduct, citizenship, and aesthetics.

Minors

- Africana Studies
- American Studies
- Anthropology
- Arabic and Islamic Studies
- Business
- Business and Professional Writing
- Chinese Studies
- Classical Studies
- Communication Studies
- Cultural Diversity
- Economics
- English
- French
- Geography
- German
- German Culture
- Germanic Language Skills
- Global Economics
- History
- International Studies
- Japanese Studies
- Latin
- Legal Studies
- Medical Humanities and Health Studies
- Medical Sociology
- Philanthropic Studies
- Philosophy
- Political Science
- Religious Studies
- Rhetorical Studies
- Sociology
- Spanish
- Urban Studies
- Women's Studies

Africana Studies

Minor in Africana Studies

The minor requires 15 credit hours in Africana Studies. All minors must take A140 Introduction to African and African Diaspora Studies. Additionally, they must take either A200 Research methods in African and African Diaspora Studies or A306 Globalization, Struggle and Empowerment in the African Diaspora. The remaining 9 credit hours may be selected from a list of Africana Studies program or Africana Studies related elective courses offered by various Liberal Arts departments. If students wish to do so, they can concentrate their 9 credits of coursework in one of three areas: Africa; Latin America & the Caribbean; or North America.

The minor in Africana Studies has four distinct, yet interrelated, objectives. First, Africana Studies offers instruction in a wide range of empirical research and scholarship related to the life and culture of peoples who comprise the African diaspora. Second, it provides an additional academic base of students who wish to pursue graduate or professional training in the arts and humanities, behavioral and social sciences, law, medicine, education, and public administration. Third, Africana Studies presents

important information that will be useful to both students and the larger public about the necessity and tools for acquiring political and economic power for successful community development. Finally, it provides students with a crucial global perspective that will prepare them to live successfully in a multiracial, multiethnic, and multicultural world.

Requirements The minor in Africana Studies requires 15 credit hours, distributed as follows:
Required Courses (9 cr.)
Elective Courses (6 cr.)
Students may select up to 6 credit hours from the following courses offered by the Africana Studies Program or SLA departments listed.

Department Electives

- ANTH E300 African American Culture
- NELC A131-A132 Beginning Arabic I and II
- ENG L370 Black American Writing
- ENG L406 Topics in African American Literature
- FOLK F394 Afro-American Folklore
- GEOG G424 Geography of Africa
- HIST E432 History of Africa II
- MUS M393 History of Jazz
- MUS M394 Black Music in America
- SOC R461 Race and Ethnic Relations
- SPAN S117-S118 Basic Spanish
- WOST W300 Black Women Writers

American Studies

The minor in American studies offers students the opportunity to understand the American experience in a broader context than is usually possible through the study of a single discipline. More specifically, it provides students with courses that focus on matters that have been traditionally at issue in the study of American civilization and culture.

Required are two general courses (A301 and A302) that treat the broad questions of American identity and American community. These will provide underpinnings for the remaining 9 credit hours of course work. A special feature of this program is the senior tutorial, which gives students the opportunity to engage in in-depth research under the guidance of an American studies faculty member.

Students enrolled in the American studies minor program will be required to complete 15 credit hours of upper-level course work, including the senior tutorial, which attempts to synthesize the other courses and the student's particular interests in the field of American studies.

As a prerequisite, students must complete History H105 and H106 or provide evidence of knowledge of a general outline of the history of the United States; however, these courses do not count toward minor credit. A student's minor program will be developed in consultation with American studies faculty members and the student's American studies advisor. The student will be required to complete the following program:

- A301 The Question of American Identity (3 cr.)
- A302 The Question of American Community (3 cr.)
- Two additional courses at the 300 or 400 level offered under the American studies rubric or cross-listed in American Studies (6 cr.)
- A499 Senior Tutorial (3 cr.)

Anthropology

A minor in anthropology provides basic training in three areas: an overview of anthropological inquiry, understanding of ethnic and cultural behavior, and understanding of a selected conceptual area in anthropology.

Requirements for a minor include a minimum grade of C in 15 credit hours of anthropology courses, selected in consultation with an anthropology faculty advisor from the following:

- 6 credit hours in introductory anthropology: A103 (or A303) Human Origins and Prehistory A104 (or A304) Cultural Anthropology
- Three other courses in anthropology at the 300-400 level, in consultation with an advisor.

Cultural Diversity

This minor is oriented toward two groups of students. First, it provides a comparative framework for liberal arts and science majors for whom the study of culture, race, ethnicity, or gender overlaps their own disciplines. Second, it serves students in such fields as education, nursing, social work, business, medicine, public affairs, and law who wish to build a multi-cultural perspective into their professional practice.

Courses for the minor explore the genesis and transformation of racial and ethnic categories; the relationship of culture and biology; processes of acculturation and pluralism; the evolution of scholarly thought on human diversity; and ultimately, how it is that any of us comprehends others.

Requirements for the minor are a minimum grade of C in 15 credit hours of course work as follows:

- 6 credits hours of introductory anthropology: A103 and A104.
- 6 credits hours of general courses on diversity, through two of the following courses: B370, E402, and E457.
- 3 credit hours of electives chosen in consultation with the minor advisor from a list of approved courses. This list is on file in the departmental office and includes courses from both anthropology and many other disciplines that concern diversity in general, or specific gender, ethnic, cultural, or other such groups.

Communication Studies

Note: Students selecting any of the minors below must consult with a department academic advisor. Minors require 15 credit hours, at least 6 of which must be taken at IUPUI.

1) Communication Arts

A generalist minor for anyone wishing an acquaintance with liberal arts from a communication perspective.

Required: COMM G100, plus 12 elected credit hours. The 12 credit hours should be elected in consultation with, or approved by, a departmental academic advisor; the credit hours must be from at least two areas within the department curriculum (areas prefixed C, M, R, T); and, at least 6 credit hours must be from the 300 level or above. COMM R110 may not count toward the minor.

2) Media Studies

Designed to accommodate students interested in media production and/or media aesthetics. In both options students will gain an understanding and appreciation of media as conveyors of meaning, cultural artifacts, and art forms.

Students wishing to minor in media studies will choose 15 credit hours from one of the two options outlined below. Both options require COMM M150, plus 12 credit hours from one of the two groups, of which 6 credit hours must be at the 300 level or above:

Media Production

- COMM M210 Media Message Design
- COMM M220 Electronic Graphic Production
- COMM M221 Electronic Media Production
- COMM M290 Video Production Workshop
- COMM M461 Production Problems in Communication Media
- COMM M463 Advanced Graphic Technique
- COMM M464 Advanced Audio Technique
- COMM M465 Advanced Video Technique
- COMM M466 Television Direction

Media Aesthetics

- COMM M215 Media Literacy
- COMM G391 Seminar (in media)
- COMM M370 History of Television
- COMM M373 Film and Video Documentary
- COMM M462 Television Aesthetics and Criticism

Up to 6 credit hours from other courses approved by the departmental curriculum committee.

3) Organizational Communication

Provides students with the opportunity to develop knowledge and communication competencies applicable in a wide variety of profit and nonprofit organizations.
Required (15 credit hours): COMM C380 and 12 credit hours elected from COMM C180, COMM M150, COMM C228, COMM R320, COMM R321, COMM C325, COMM C328, COMM C392,COMM C394, and COMM G499. Of these 12 hours, at least 3 must be at the 300 level or above.

4) Rhetorical Studies

Students who minor in rhetorical studies will develop an understanding of symbols and symbolic form and how they influence human behavior. Students will consider the classical foundations of the study of rhetoric and have the opportunity to critically and carefully evaluate persuasive messages from a variety of perspectives. Emphasis is on becoming a more critical consumer and effective, ethical producer of communication in its oral and written forms.

Required: COMM R310 Rhetoric, Society and Culture. 12 credit hours of R classes, not including COMM R110. Students may also select COMM G391 Seminar or COMM G300 Independent Study (in rhetoric) with department approval.

5) Theatre

Provides knowledge and skills for teaching and lays the basis for further study in acting, theatre directing, youth theatre, and playwriting.

Required for General Theatre Minor (15 credit hours): 12 credit hours elected from COMM T130, COMM T133, COMM T337, COMM T338, and COMM T339. Remaining 3 elective credit hours in theatre courses must be at the 300 level or above.
Required for Youth Theatre Minor (15 credit hours): COMM T130, COMM T133, COMM T336, COMM T437, and COMM T440.

Economics

A minor in economics is a logical supplement to programs in business, engineering, technology, health services, science, and the social sciences. A knowledge of economic theory, economic institutions, and how economic policy is formed is necessary for students preparing for careers in law, science, government, or any area that uses the scarce resources of our society.

Requirements

The requirements for a minor in economics are as follows:

- 15 credit hours in economics courses to include E201 and E202 and three 300- or 400-level courses. (E270 may be substituted for one of the 300- to 400-level courses.)
- Residency requirements: 9 credit hours of the minor must be completed at IUPUI.
- Grade requirement: The grade in each course submitted for the minor must be C (2.0) or higher.

Business

Including a minor is an excellent way to enhance your undergraduate academic experience as well as your resume. Students pursuing an economics major have the econ pre-requisites that are needed for a business minor. If you are interested in pursuing the business minor please contact Indiana University Kelley School of Business Undergraduate Program, 801 West Michigan Street, Indianapolis, IN 46202-5151, phone (317)274-2147 or (317)274-2467. Detailed information about the minor can be found at http://kelley.iupui.edu/undergrad/academics/minor.cfm.

Business and Professional Writing

A business and professional writing minor equips students to function effectively as writers in occupations ranging from business and industry to applied sciences, education, environmental affairs, government, health fields, and law.

This minor represents cooperation among the School of Liberal Arts, the School of Engineering and Technology, the Kelley School of Business, and the School of Journalism.

English courses must make up at least 10 credit hours of the minor; students are encouraged to take 3-6 credit hours outside English. At least 9 credit hours of the minor must be at the 300-400 level. Students must have a 2.5 or higher average in the 15 credit hours of the minor and a minimum grade of C in each course for the minor. Students pursuing this minor should work with a faculty advisor in planning their courses and developing their writing portfolios.

Prerequisite: W131 with a grade of C or higher, and a second writing course, such as English W132, W231, Technical Communication TCM 220, or Business X204
Five elective courses: English W313, W315, W320, W331 or TCM 340, W365, W396, W411, W412, E398, Z204; TCM 320, 350, 425, 450; Journalism J319, J320, J390, J415

One-credit portfolio course: English W411 (until a new course number is approved) Each student doing the minor will work with a faculty advisor to develop a writing portfolio. Students should sign up for this course the semester they complete the minor, or the following semester; students may work with the faculty advisor informally before taking the portfolio course.

Geography

The minor requires 15 credit hours in geography. All minors must take GEOG G107 and either GEOG G110 Introduction to Human Geography or GEOG G130 World Geography. The remaining 9 credit hours may be selected from any geography course at the 300 level or above.

History

Requirements

Fifteen credit hours of courses in history above the 200 level (6 credit hours completed at IUPUI), with a minimum grade of C in each course. The course work must be distributed as follows:

- 9 credit hours in either U.S. History (A-prefix courses), European History (B-C-D-prefix courses), or African/Asian/Latin American History (E-F-G-prefix courses). H-prefix courses are special topics, and their application to the above categories must be determined individually.
- 3 credit hours in the second of the areas not selected above.
- credit hours in the third of the areas not selected above.

International Studies

The minor in international studies is a 15 credit hour interdisciplinary minor housed within the School of Liberal Arts.

The requirements are as follows:

- Core course: I100 Introduction to International Studies (3 cr.)
- “Windows on the World” requirement from one of the following four courses:
- ANTH A104/A304 Introduction to Cultural Anthropology (3 cr.)
- GEOG G110 Introduction to Human Geography (3 cr.)
- HIST H109 Perspectives on the World Since 1800 (3 cr.)
- POLS Y219 Introduction to International Relations (3 cr.)

- Foreign language competency: completion of the second year of a modern foreign language (or the equivalent).
- Electives (9 cr.): any courses selected from the approved international studies area and thematic concentrations course list as long as they come from at least two different departments. Students might wish to complete these 9 credits from one of the specific area or thematic concentrations to facilitate transferring to the major later. Completing the courses from one area or thematic concentration is not, however, required for the minor.

Legal Studies Minor

Advisor: Assistant Professor David Weiden, Department of Political Science, Academic Advising, Cavanaugh Hall 503D, (317) 278-7558
Law and the institutions associated with it are of great and growing importance in modern society. Law and legal institutions define relationships among individuals, shape and are shaped by public policies, and express cultural values and traditions as well as conflicts over those values and traditions.

The minor in legal studies provides students with an opportunity to study law and its relationship to society from a variety of perspectives. Whether students are interested in law as a potential career or are interested in law only as an important aspect of modern society, the courses they take to satisfy the minor may help them satisfy that interest. The minor also provides official recognition of students’ pursuit of this multidisciplinary field of study.

The minor consists of 15 credit hours and has to be satisfied by taking courses from more than one department or program. Students must complete 12 credit hours of upper-level course work chosen from the list of approved courses below and 3 credit hours in a required introductory-level course. Each course must be completed with a semester grade of C or higher in order to apply it toward the minor.

Required Course

POLS Y211 Introduction to Law (3 cr.)

Additional Courses (12 credit hours from the following):

- AMST A303 Topic: Law and American Culture (3 cr.)
- HIST A325 American Constitutional History I (3 cr.)
- HIST A326 American Constitutional History II (3 cr.)
- HIST A421 Topic: American Legal History (3 cr.)
- JOUR J300 - Communications Law (3 cr.)
- PHIL P383 Philosophy of Law (3 cr.)
- POLS Y304 Constitutional Law (3 cr.)
- POLS Y305 Constitutional Rights and Liberties (3 cr.)
- POLS Y320 Judicial Politics (3 cr.)
- PSY B375 Psychology and the Law (3 cr.)
- SPEA V376 Law and Public Policy (3 cr.)
- SPEA V408 - Community and the Constitution (3 cr.)
- WOST W300 Topic: Women and the Law (3 cr.)

Students who have questions about the legal studies minor, or who wish to declare and pursue the minor, should contact the advisor for legal studies, Assistant Professor David Weiden, Cavanaugh Hall 503E, (317) 278-7558.

Medical Humanities and Health Studies

The interdisciplinary minor in medical humanities and health studies seeks to promote an increased awareness of the humanistic, social, and cultural dimensions of health care and health care systems. It provides an exciting opportunity for students to work in close conjunction with faculty who have strong teaching and research interests in the area of health care.

A survey of the relevant issues to be addressed during the course of study in the minor includes

- human values and ethics in decision making;
- the idea of preventive and holistic health and health care;
- patient care as an art form and scientific endeavor;
- the relation among ecology, economy, and health care;
- the relation between cultural and social systems and health and health care;
- the connection between health care systems and good health;
- the role of the provider-client relationship, especially in the areas of communications skills and the humanistic dimensions of patient care;
- the meanings of suffering, illness, and dying;
- the role of technology in improving care but creating a legacy of dehumanization of patients; and
- the role of the consumer in the health care system.

The minor entails successful completion of a minimum of 15 credit hours, distributed as follows:

Required Core Course

MH301 Perspectives on Health, Disease, and Healing (3 cr.) The course utilizes the perspectives of the humanities and social science disciplines to provide students with a broader understanding of the many facets of health and disease, suffering and dying, as well as the art and science of healing.

Required Exit Course

MH495 Independent Project Seminar in the Medical Humanities and Health Studies (3 cr.) Each student pursuing a minor degree in the Medical Humanities and Health Studies Program who has completed at least 9 credit hours toward the degree will take a seminar or be given the opportunity to develop a research or applied project related to the interests of the Medical Humanities and Health Studies Committee. This seminar or project will allow the student to apply the knowledge gained from the course work taken in the Medical Humanities and Health Studies Program, serving to tie together the humanistic and social scientific bases of health care in a directed endeavor of interest to the student. The student should contact the chairperson to arrange the details of this independent project.

Electives (3 courses/9 credits)

At least 3 credits from each of both

- Humanistic perspectives
- Social Science perspectives

An additional 3 credits chosen from the above categories or from

- Other electives

Humanistic Perspectives on Health Care

Communication Studies
- C392 Health Communication (3 cr.)
- C410 Health Provider–Consumer Communication (3 cr.)

Philosophy
- P393 Biomedical Ethics (3 cr.)

English
- L431 Literature and Medicine (3 cr.)

History
- H364 History of Medicine and Public Health (3 cr.)
- H374 History of Science and Technology II (3 cr.)
- H425 Topics in History: Humanitarian Assistance (3 cr.)

Philosophy
- P393 Biomedical Ethics (3 cr.)

Religious Studies
1. R384 Religion, Ethics and Health (3 cr.)

Sociology
- R327 Sociology of Death and Dying (3 cr.)

Social Scientific Perspectives on Health Care

Anthropology
- A337 African American Health Care (3 cr.)
- A460 Diseases in Human Evolution (3 cr.)
- B370 Human Growth and Development (3 cr.)
- B480 Human Variation (3 cr.)
- E421 The Anthropology of Aging (3 cr.)
- E445 Medical Anthropology (3 cr.)

Economics
- E307 Current Economic Issues: Health Economic Issues (3 cr.)
- E387 Health Economics (3 cr.)

Sociology
- R285 AIDS and Society (3 cr.)
- R321 Women and Health (3 cr.)
- R381 Social Factors in Health and Illness (3 cr.)
- R382 Social Organization of Health Care (3 cr.)
- R410 Alcohol, Drugs, and Society (3 cr.)
- R415 Sociology of Disability (3 cr.)
- R485 Sociology of Mental Illness (3 cr.)

Other Electives

The remaining 3 credit hours of electives may come from the courses above or the following courses:

Medical Humanities and Health Studies
- MH492 Topics in Medical Humanities and Health Studies (3 cr.)
- MH498 Readings in Medical Humanities and Health Studies (1-3 cr.)

Nursing
- S474 Applied Health Care Ethics (3 cr.)

SPEA
- H316 Introduction to Environmental Health (3 cr.)
- H320 Introduction to Health Administration (3 cr.)
- H322 Principles of Epidemiology (3 cr.)
- H354 Health Economics (3 cr.)
- H420 Health Policy (3 cr.)

Note: Other courses may be accepted upon approval of the Medical Humanities and Health Studies Committee. See the Medical Humanities and Health Studies Committee chairperson for information.

Philanthropic Studies

Philanthropic Studies provides a theoretical framework and practical knowledge about voluntary action and organizations that support the giving of "time, talent, and treasure" in society. The undergraduate minor explores the cultural traditions of voluntary action through a variety of disciplinary perspectives and course options. This minor will complement other Bachelor's degrees and assist students seeking entry-level positions in philanthropy and nonprofit organizations, as well as roles in the business and government sector. The minor in Philanthropic Studies is well suited for students who want to integrate their commitment to working with others into their work or career.

A minor in Philanthropic Studies (PHST) requires satisfactory completion of the following requirements:

Completion of properly distributed credit hour requirements for the baccalaureate degree in effect when the student was admitted to their home school.
Completion of 15 credit hours, with a minimum grade of C in each course.
Contact the program or your advisor to complete the necessary paperwork to officially declare the minor.
Complete a minor declaration form in the School of Liberal Arts, Student Affairs Office, Cavanaugh Hall 401.
Minor Requirements:

_____ **Choose one of the following core courses** (3 cr.):

PHST-P105: Giving and Volunteering in America
PHST-P201: Introduction to Philanthropic Studies
_____ **Choose one of the following core course** (3 cr.):

PHST-P210: Philanthropy and the Social Sciences
PHST-P211: Philanthropy and the Humanities
PHST-P212: Philanthropy and Civic Engagement
_____**Choose three courses from the list of courses below** (9 cr.):

PHST-P301: The History of and Contemporary Approaches to Philanthropy
PHST-P330: Topics in Philanthropic Studies
PHST-P375: Philanthropy, Calling, and Community
PHST-P401: Ethics and Values of Philanthropy
PHST-P430: Topics in Philanthropic Studies
PHST-P490: Internship in Philanthropic Studies (by permission only)
ANTH-E411: Wealth, Exchange, and Power in Anthropological Perspectives
ENG-L373: Interdisciplinary Approaches to American Literature: Philanthropy and Literature
HIST-H415: Philanthropy in the West
REL-R379: Religion and Philanthropy
SPEA-V362: Nonprofit Management and Leadership
SPEA-V458: Fund Development for Nonprofit Organizations
SOC-R330: Community

Philosophy

Requirements

A minimum of 15 credit hours in philosophy, including:

1. One course from each of at least two of these three groups of basic courses:

- Group A: P110, Intro. to Philosophy; S110, Intro. to Philosophy - Honors.
- Group B: P120, Ethics; S120, Ethics - Honors.
- Group C: P162, Logic; P265, Introduction to Symbolic Logic.

2. A minimum of 6 credit hours at the 300 level or above.

3. A minimum grade of "C" (2.0) in each course.

Political Science

The political science minor consists of 15 credit hours with a concentration in one of five areas: American government, public policy, political theory, comparative politics, or international relations.

Only courses with a grade of C or higher are acceptable. Six of the 15 credit hours must be completed in residence. Students must file with the Department of Political Science their declaration of intent to complete a minor. Records are not kept anywhere else.

American Government
Y103, 6 credit hours from 300-level courses in American government or Y200, and 6 credit hours of political science electives in other areas

Public Policy
Y213, 6 credit hours from 300-level courses in public policy, and 6 credit hours of political science electives in other areas

Political Theory
Y215, 6 credit hours from 300-level courses in political theory, and 6 credit hours of political science electives in other areas

Comparative Politics
Y217, 6 credit hours from 300-level courses in comparative politics, and 6 credit hours of political science electives in other areas

International Relations
Y219, 6 credit hours from 300-level courses in international relations, and 6 credit hours of political science electives in other areas

Interdisciplinary Minors and Certificates
The department offers three minor and/or certificate programs: legal studies (minor), paralegal studies (certificate), and pre-law (variable program of study). Information about these can be found on their respective pages in this bulletin.

Religious Studies

A minor in religious studies, recorded on a student's transcript, will ordinarily require that the student fulfill 15 credit hours in courses in the department, divided as follows: 15 credit hours from the departmental curriculum approved by the departmental advisor; at least 3 of these credit hours must be taken at the 100/200 level and 6 at the 300/400 level. To declare a minor, students should contact the departmental advisor.

Sociology

A general minor in sociology will allow students in a variety of fields to expand their liberal arts education within an area that complements their general major or program of professional training.

Requirements

The minor requires 15 credit hours of course work (6 of which must be completed at IUPUI), with a grade of C (2.0) or higher:

- R100 Introduction to Sociology (3 cr.)
- 12 additional credit hours of sociology courses will be required, with 6 of those credit hours at the 200-400 level.

Medical Sociology

Considering the unique resources and needs of IUPUI, the Department of Sociology offers a minor in medical sociology. This program is designed to lead to a general understanding of the social context of health, health care, and the delivery of medical services and should be of special interest to all students majoring in health-related specialties.

Requirements

The minor requires 15 credit hours of course work (6 of which must be completed at IUPUI), with a grade of C (2.0) or higher:

- R100 Introduction to Sociology (3 cr.)

One course selected from the following:

- R381 Social Factors in Health and Illness (3 cr.) or R382 Social Organization of Health Care (3 cr.)
- 9 additional credit hours of sociology courses selected from the following:
- R285 AIDS and Society, R320 Sexuality and Society, R321 Women and Health, R327 Sociology of Death and Dying, R415 Sociology of Disability, R485 Sociology of Mental Illness

Urban Studies

The minor in urban studies offers students an opportunity to develop a well-rounded and basic understanding of the components of urban life and of the forces that are shaping its future. Further, it provides students with a basic knowledge and understanding of the major factors that not only have contributed to the present but will also affect the future of the physical, internal, and social structure of our cities and metropolitan areas.

To achieve this goal, the minor in urban studies must be interdisciplinary in nature. In such a program, the student approaches the complexity of urban life from the perspective of economics, geography, history, political science, sociology, anthropology, and general urban and regional planning analysis.

To complete the minor, the student must successfully complete 15 credit hours in School of Liberal Arts urban studies courses. The student may count any combination of approved urban studies courses toward the minor as long as no more than two courses are in the same department. The following courses are acceptable as urban studies courses.

- Anthropology E380 Urban Anthropology (3 cr.)
- Economics E323 Urban Economics (3 cr.)
- Geography G314 Urban Geography (3 cr.)
- History A347 American Urban History (3 cr.)
- Political Science Y308 Urban Politics (3 cr.)
- Sociology R329 Urban Sociology (3 cr.)
- Sociology R330 Community (3 cr.)

Women's Studies

Students develop a program of study in consultation with the director of the Women's Studies Program.

Requirements

Generally, the minor in women's studies requires 16 credit hours as follows:

- W105 Introduction to Women's Studies (3 cr.)
- 12 credits in Women's Studies or crosslisted classes (divided between the humanities, natural sciences, social sciences, and/or other)
- W499 Colloquium in Women's Studies (1 cr.)

Cross-listed undergraduate courses are listed under OneStart. They have included:

- AFRO A303 Deconstructing Barbie
- ANTH E391 Women in Developing Countries
- ANTH E403 Women of Color in the U.S.
- BIOL N200 Biology of Women
- COMM C395 Gender and Communication
- COMM R350 American Feminist Rhetoric
- ECON E307 Family Economic Issues
- ENG L207 Women in Literature
- ENG L378 Studies in Women and Literature
- FOLK F363 Women's Folklore/Folklife/Museums
- HER H304 Women in Art
- HIST A341 United States Women's History I
- HIST A342 United States Women's History II
- JOUR J475 Race, Gender and the Media
- LSTU L385 Class, Race, Gender, & Work
- MUS Z320 Women Musicians
- POLS Y324 Women and Politics
- POLS Y380 Women and the Law
- PSY B376 Psychology of Women
- REL R301 Women and Religion
- REL R398 Women in American Indian Religions
- SOC R321 Women and Health
- SOC R325 Gender and Society
- SOC R425 Gender and Work
- WLAC F400 Islam, Gender, and Conflicts

English

The English department offers minors in these areas:

- Literature
- Writing

- Creative Writing
- Business and Professional Writing
- Linguistics
- Film Studies

Students intending to pursue a minor should declare such an intention in a letter or e-mail to the associate chair for students and arrange for an initial conference with a departmental advisor to plan the program of study. As with the major, students need to earn at least a C in each course for certification of the minor by the English department.

Minor in Literature

The minor in literature introduces students to the skills of interpretation and critical thinking and provides some familiarity with British and American literature.

Prerequisite: ENG L115 with a grade of C or higher

Requirements: total of 15 credit hours (five courses), which include:

- One course from the following: ENG L202, ENG L203, ENG L204, or ENG L205
- One survey of British literature (ENG L301 or ENG L302) and one survey of American literature (ENG L351, ENG L352, or ENG L354)
- Two elective courses in literature, at least one of which must be at the 300 or 400 level

Minor in Writing

The minor in writing is designed to help students develop their abilities to write for a range of purposes: personal, civic, professional, and academic. Students pursuing this minor should work with a faculty advisor in planning their courses and developing their writing portfolios.

The minor requires 16 credit hours. At least 9 hours must be at the 300-400 level, and at least 10 hours must be in the English department. Students must have a 2.5 or higher grade point average in the 16 hours of the minor and a minimum grade of C in each course for the minor.

Prerequisites: ENG W131 and a second writing course that counts in the student's degree program, such as ENG W132, ENG W231, or ENG W320; TCM 220; or BUS X204 (both with a grade of C or higher)

Electives: Choose 15 credit hours from the following:

- ENG W210, ENG W260, ENG W310, ENG W313, ENG W315, ENG W320 (if not used as second writing course), ENG W331, ENG W365, ENG W366, ENG W390, ENG W396, ENG W400, ENG W411, ENG W412, ENG W426, ENG E398, ENG G204
- One creative writing course, chosen from ENG W206, ENG W207, ENG W208, ENG W301, ENG W302, ENG W303, ENG W305, ENG W401, ENG W403, and ENG W411 (when done with a creative writing focus). (A Creative Writing Minor is also available in the English department.)
- Technical Communications TCM 320, TCM 350
- Communication Studies COMM R310, COMM R350

Required: One-credit portfolio course, English W411. Each student doing the minor will work with a faculty advisor to develop a writing portfolio. Students should sign up for this course in the semester they complete the minor, or the following semester; students may work with the faculty advisor informally before taking the portfolio course.

Minor in Creative Writing

The minor in creative writing will be of particular interest to students who are contemplating careers in writing or the teaching of writing. It is designed to serve, in addition, the needs of those who believe that one good way to study literature is to learn to produce it. Students choose 15 credit hours from the courses listed under "Creative Writing" in this bulletin and/or the Schedule of Classes.

Minor in Business and Professional Writing

A business and professional writing minor equips students to function effectively as writers in occupations ranging from business and industry to applied sciences, education, environmental affairs, government, health fields, and law. This minor represents cooperation among the School of Liberal Arts, the School of Engineering and Technology, the Kelley School of Business, and the School of Journalism.

English courses must make up at least 10 credit hours of the minor; students are encouraged to take 3-6 credit hours outside English. At least 9 credit hours of the minor must be at the 300-400 level. Students must have a 2.5 or higher average in the 15 credit hours of the minor and a minimum grade of C in each course for the minor. Students pursuing this minor should work with a faculty advisor in planning their courses and developing their writing portfolios.

Prerequisite: ENG W131 with a grade of C or higher, and a second writing course, such as ENG W132, ENG W231, Technical Communication TCM 220, or Business X204

Five elective courses: ENG W313, ENG W315, ENG W320, ENG W331 or TCM 340, ENG W365, ENG W396, ENG W411, ENG W412, ENG E398, ENG Z204; TCM 320, TCM 350, TCM 425, TCM 450; JOUR J319, JOUR J320, JOUR J390, JOUR J415

One-credit portfolio course: ENG W411 (until a new course number is approved) Each student doing the minor will work with a faculty advisor to develop a writing portfolio. Students should sign up for this course the semester they complete the minor, or the following semester; students may work with the faculty advisor informally before taking the portfolio course.

Minor in Linguistics

The minor in linguistics is intended for students who wish to expand their knowledge of language structure and use. Courses provide a background in linguistic theory and practice.

Required: ENG Z205

Electives: 12 credit hours from the following courses:

- ENG Z206, ENG Z301, ENG Z302, ENG Z310, ENG Z432, ENG Z434, ENG Z441, ENG W310
- ANTH L300, ANTH L401
- ASL L340, ASL L342

In consultation with an advisor, advanced students may request permission to take a graduate course in linguistics in partial fulfillment of the requirements for the minor.

Film Studies

The minor in film studies provides the skills for understanding film in its aesthetic, popular, and ideological dimensions. Students with a minor in film studies will have a knowledge of film history, theory of film, genres and authorship, interpretive approaches to films, and film as a cultural artifact.

The minor in film studies requires 15 credit hours.

Required: FILM C292 Introduction to Film (3 cr.)

Electives: Twelve credit hours from the following courses: FILM C390, FILM C391, FILM C392, FILM C393, FILM C394, FILM C491, FILM C493; ENG W260; COMM M373; GER G370, GER G371

Classical Studies, Ancient Greek, and Latin

A minor in classical studies, ancient Greek, or Latin can be an attractive complement to many majors, particularly history, English, and other foreign languages.

The minor in classical studies consists of at least 15 credit hours in classical archaeology, classical civilization, ancient Greek, Latin, or related courses approved by the program coordinator (a minimum of 6 credit hours must be taken *on the IUPUI campus*). Students may wish to design concentrations in areas of particular interest (e.g., classical art and archaeology or Greek or Roman civilization). At least 6 credit hours must be taken at the 300 level or higher; no more than 3 credit hours of ancient Greek or Latin at the 100 level may be counted. Up to 6 credit hours may be taken in related fields, including History C386, History C388, and Philosophy P307.

Minors in ancient Greek or Latin should include at least 12 credit hours in the language at the 200 level or higher, and 3 credit hours in a related culture or history course. Students interested in graduate study in classical studies are encouraged to learn to read French and German prior to beginning graduate work.

French

14 credit hours: F203, F204, F328, and F300 or F360 (a minimum of 6 credit hours must be taken *on the IUPUI campus*).

Teaching Minor Requirements

The teaching minor in French requires the completion of a minimum of 24 credit hours beyond the 100 level, including 18 credit hours in 300- and 400-level courses. F300, F307, F328, F331, F360, and F402 are required. See also requirements of the School of Education.

German

The minor in German language skills is for students who are interested in the German language as a tool of communication. Its emphasis is on competence in the skills of reading, writing, and understanding spoken German, as well as on conversational proficiency in German.

Requirements consist of 14 credit hours, to include G225 and G230 or G299, plus a minimum of 6 credit hours from courses at the 300 or 400 level taught in German (a minimum of 6 credit hours must be taken *on the IUPUI campus*).

Japanese

The minor in Japanese studies may be of particular interest to students in business, social sciences, and other languages and interdisciplinary subjects. It includes both language and literature and other Japanese area studies courses.

The minor in Japanese studies consists of 15 credit hours in Japanese studies or related courses approved by the program director, excluding courses at the 100 level (a minimum of 6 credit hours must be taken *on the IUPUI campus*). At least 6 credit hours taken toward the minor must be at the 300 level or above. The following courses fulfill the requirements. Prerequisite: completion of first-year college Japanese or equivalent.

- E231 Japan: The Living Tradition (3 cr.)
- E351 Studies in East Asian Culture (3-6 cr.)
- E472 Modern Japanese Fiction (3 cr.)
- G467-G468 History of Japan I-II (3-3 cr.)
- J201-J202 Second-Year Japanese I-II (3-3 cr.)
- J301-J302 Third-Year Japanese I-II (3-3 cr.)
- J393-J394 Japanese Literature in Translation I-II (3-3 cr.)
- J310 Japanese Conversation (3 cr.)
- J330 Business Japanese (3 cr.)
- J401-J402 Fourth-Year Japanese I-II (3-3 cr.)
- J498 Individual Studies in Japanese (1-3 cr.)

Spanish

The minor in Spanish requires 15 credit hours of course work (a minimum of 6 credit hours must be taken *on the IUPUI campus*), with a grade of C (2.0) or higher. Required courses are S311, S313, S317, and 6 additional credit hours from the 300 and 400 levels. Note for heritage and native speakers of Spanish: S317 is not open to either heritage or native speakers. Heritage students without native fluency in Spanish must obtain instructor's consent to take the course. Spanish Minors with native fluency must take another course at the 300 or 400 level course in Spanish to replace S317.

Minor in Arabic and Islamic Studies

The minor in Arabic and Islamic Studies has a double track, one for Arabic language acquisition, and one for cultural studies. The language track focuses on linguistic acquisition. The cultural track takes a global and comparative approach to the study of Islamic history and Muslim societies, emphasizing the diversity of Muslim peoples and cultures in the past and present. Students complete basic requirements in Arabic language and Islamic studies, and choose from a list of electives to complete the 15 credits required for the minor (a minimum of 6 credit hours must be taken *on the IUPUI campus*).

1. Arabic Language Concentration - 15 credits
- NELC A200: Intermediate Arabic I
- NELC A250: Intermediate Arabic II
- NELC A300: Advanced Arabic I
- NELC A350: Advanced Arabic II
- one three-credit course in Islamic studies from the list of religious studies courses below in Category B.

2. Islamic Civilization Concentration - 15 credits
- 6 credits from Category A
- 3 credits from Category B
- 6 credits from Category C

Category A

- NELC A200: Intermediate Arabic I

- NELC A250: Intermediate Arabic II
- NELC A300: Advanced Arabic I
- NELC A350: Advanced Arabic II

Category B

- REL R257: Introduction to Islam
- REL R304: Islamic Beginnings
- REL R305: Islam and Modernity
- REL R309: Contemporary Middle East (offered as part of Jordan Study Abroad)
- REL R370: Islam in America

Category C

- WLAC F400: Islam, Gender, and Conflicts
- HIST H425 Topics: Middle East History
- WOST W300: Women and Islam
- POLS Y339: Middle Eastern Politics
- POLS Y380: Politics of Islam
- ANTH E300 VT: Cultures of the Middle East
- REL R257: Introduction to Islam
- REL R304: Islamic Beginnings
- REL R305: Islam and Modernity
- REL R370: Islam in America
- NELC N302/REL R309: Contemporary Middle East (offered as part of Jordan Study Abroad)

Please note: Students cannot double count any courses toward the fifteen required credits.

German Culture

Germanic Language Skills

Global Economics

Latin

Classical Studies, Ancient Greek and Latin

The Minor in Classical Studies consists of at least 15 credit hours in classical archaeology, classical civilization, ancient Greek, Latin, or related courses approved by the Program Coordinator (a minimum of 6 credit hours must be taken *on the IUPUI campus*). Students may wish to design concentration areas of particular interest (e. g., classical art and archaeology, or Greek or Roman civilization).

At least 6 credit hours must be taken at the 300 level or higher; no more than 3 credit hours of ancient Greek or Latin at the 100 level may be counted. Up to 6 credit hours may be taken in related fields, including History C386, C388, and Philosophy P307.

Minors in ancient Greek or Latin should include at least 12 credit hours in the language at the 200 level or higher, and 3 credit hours in a related culture or history course. Students interested in graduate study in classical studies are encouraged to learn to read French and German prior to beginning graduate work.

Rhetorical Studies

Provides students with an understanding of symbols and symbolic form and how they influence human behavior. Students will consider the classical foundations of the study of rhetoric and have the opportunity to critically and carefully evaluate persausive messages from a variety of perspectives. Emphasis is on becoming a more critical consumer and ethical producer of communication in its oral and written forms.

R310 and 12 hours selected from R227, R309, R320, R321, R330, and R350. Students may also take select G391 Seminar or G300 Independent Study (in rhetoric) with department approval.

Chinese Studies

The Minor in Chinese Studies consists of fifteen (15) credit hours in Chinese Studies or related courses approved by the Program Director (a minimum of 6 credit hours must be taken *on the IUPUI campus*). Courses at the 100-level do not count toward the minor. Minor requirements include a minimum of three (3) credits in Chinese language at the 200-level or above; a minimum of three (3) credits in Chinese culture at the 300-level or above (either EALC C334 or E335); and the remaining credits in Chinese language, culture, history, and/or society, chosen from the following:

- C201-202: Second-Year Chinese I-II (3-3 cr.)
- C301-302: Third-Year Chinese I-II (3-3 cr.)
- C320: Business Chinese (3 cr.)
- C401-402: Fourth-Year Chinese (3-3 cr.)
- OVST-C 490: Study Abroad in China (3 cr.)
- E331: Traditional Chinese Literature (3 cr.)
- E333: Studies in Chinese Cinema (3 cr.)
- E334: Contemporary Chinese Cinema (3 cr.)
- E335: Studies in Chinese Martial Arts Culture (3 cr.)
- E351: Studies in East Asian Culture (3 cr.)*
- G485: Modern China (3 cr.)
- HIST-H 421: Topics in African, Asian, or Latin American History (3 cr.)*
- SOC-R 495: Sociology Study of China (3 cr.)

*Please note: E351 (Studies in East Asian Culture must focus on Chinese culture and H421 (Topics in African, Asian, or Latin American History) must focus on Chinese history in order for these two courses to be counted toward the fifteen required credits.

Student Learning Outcomes

Bachelor of Arts Degree

- Africana Studies
- Anthropology
- Communication Studies
- Economics
- English
- French
- Geography
- German
- History
- Individualized Major
- International Studies
- Philanthropic Studies
- Philosophy
- Political Science
- Religious Studies
- Sociology

- Spanish

Bachelor of Science Degree
- American Sign Language/English Interpreting

Associate of Arts Degree
- Arts and Humanities

Undergraduate Certificates
- Geographic Information Science
- Museum Studies
- Theatre and Performance

Bachelor of Science in American Sign Language/English Interpreting (B.S.)
The Bachelor of Science degree in ASL/English Interpreting is for students who have achieved fluency in American Sign Language and English through coursework at IUPUI and who wish to focus on theoretical and applied issues in interpreting. The program is also a continuation of the Associate of Arts degree in American Sign Language Studies offered by Vincennes University at its regional campus in Indianapolis at the Indiana School for the Deaf.

The program is also open to students who demonstrate equivalent competence in ASL, Deaf culture, and linguistics. Interested students should contact the program director at IUPUI. Students completing the ASL/English Interpreting B.S. program will achieve the following:

Knowledge

- the professional code of conduct for interpreters and use acquired abilities to move toward achieving national certification.

Understanding

- define basic concepts, terminology, processes, theories, and critical perspectives in interpreting
- describe the entire communicative situation and why fluency in the languages and the ability to know how meaning is constructed is important to interpreters.

Ability to:

- use ASL and English in a range of settings and styles effectively as well as know when to use simultaneous and consecutive modes of interpreting;
- explain historical perspectives on language change, interpreting, and relations between Deaf and hearing communities;
- describe the interrelationships between language and culture in our lives;
- use linguistic and cultural knowledge to analyze and evaluate texts for the purposes of interpretation as well as assess interpreter effectiveness; and
- use interpreting as a face-to-face process that is conversational in nature; managing the cross-cultural flow of talk.

Bachelor of Arts in Anthropology (B.A.)
Students completing the Anthropology Bachelor of Arts program will achieve the following:

- **Anthropological Diversity**
- All students are expected to demonstrate an understanding of the broad Anthropological scope of the human condition with respect to cultural, biological, linguistic, and material diversity.

- **Anthropological Research Methods**
- Students will demonstrate ability to formulate an anthropological research question and design a research proposal using appropriate anthropological research methods.

- **Engaged Research Skills**
- Students will carry out research in collaboration with an agency, organization or external mentor, articulate the ethical implications of such research partnerships, and understand the goals of the scholarly project for academics and community partners alike.

- **Communication**
- Students will demonstrate cross-cultural communication skills.

- **Anthropological Writing**
- Students must write a research paper or report that frames a concrete problem in anthropological terms.

Bachelor of Arts in Communication Studies (B.A.)
Students completing the Communication Studies B.A. program will achieve the following:

- **Design**
- effective messages for different media.

- **Utilize**
- appropriate principles of interpersonal communication and public speaking skills to engage in face to face communication and
- basic social and scientific analytic tools in communication to solve problems.

- **Be able to**
- act appropriately and ethically in communicative transactions;
- dse experience gained in service learning to enhance their communities; and
- work productively in groups and teams.

Certificate In Theatre and Performance

Students completing the Theatre and Performance certificate program will achieve the following:

- **Create** a performance which demonstrates and understanding of performance art.
- **Exhibit** competence in the analysis of performance.
- **Work** effectively with other artists and practitioners.

Bachelor of Arts in Economics (B.A.)
Students completing the Economics B.A. program will achieve the following:

- **Know**

- a wide variety of economic issues, will be able to determine when an issue is or is not essentially economic, and will be able to distinguish between the positive and normative aspects of economic issues and
- the mathematical and statistical techniques that are widely used in economic analysis.

- **Understand**
- the complementary roles of the private sector and the government in the U.S. economy, and will have some familiarity with the similarities and differences in the role of the government in other world economies;
- the relationships between world economies in the areas of trade, finance, and information exchange, and will be familiar with the potential benefits and costs of these relationships; and
- how economic theory, and economic models, can be used to help study economic phenomena, and will be able to use economic theory to help interpret and address many economic and social issues.

- **Be able to**
- understand and interpret economic data, and statistics based on economic data, when presented in a variety of forms.

Bachelor of Arts in Africana Studies (B.A.)

Students completing the Africana Studies Bachelor of Arts program will achieve the following:

- **Know**
- about a) the general experiences of people of African descent in the United States, the continent of Africa, the Caribbean, South and Central America as well as other areas of the African diaspora and b) and b) the major social, cultural, and historical events, phenomena and figures of Africana life and experience and
- about the major texts, theories and schools of thought comprising Africana Studies as a discipline, as well as the contemporary issues that face peoples of African descent.

- **Understand**
- the intellectual and societal origins, purposes, and challenges of Africana Studies as an academic discipline, including its connections to the historical and present experiences of peoples of African descent.

- **Be able to**
- competently demonstrate appropriate methods of inquiry grounded in critical race theory or an African-centered analytical framework to investigate and evaluate topics, texts, artistic productions, events, or phenomena pertaining to the experiences of Africana peoples and
- effectively demonstrate an ability to research, organize, and produce a well-written paper, or audio-visual project on a selected topic or artistic production, event, or phenomena pertaining to the experiences of Africana people.

Bachelor of Arts in English (B.A.)

Students completing the English B.A. program will achieve the following:

- **Demonstrate** importance and power of reading/thinking critically and writing with clarity and purpose.
- **Define** basic concepts, terms and theories in at least two areas of English studies (creative writing, film studies, language and linguistics, literature, writing and literacy).
- **Read** analyze, synthesize, evaluate, and interpret language and texts critically.
- **Construct** and write a reasoned argument integrated public/expert and personal voices.
- **Recognize** the importance of diverse perspectives and specializations in English studies.
- **Analyze** and evaluate the impact of culture, diversity, and time on texts and ideas as well as language use and structure.
- **Describe** and discuss the interdisciplinary context of English as a field of study and tis connection to other disciplines.
- **Explain** how language influences intellectual and emotional responses.

Bachelor of Arts in Geography (B.A.)

Students completing the Geography B.A. program will achieve the following:

- **Understand**
- the relevance of geographic knowledge to the interactions among natural and cultural phenomena from local to global scales.

- **Demonstrate**
- effective communication skills, use of critical thinking, and application of spatial analysis methods and tools to comprehend and interpret geographic problems and phenomena.

Certificate in Geographic Information Science

The Undergraduate Certificate in Geographic Information Science prepares students for employment by developing knowledge and skillsused in the analysis of spatial information. The program focuses on foundational concepts, methodological processes, and analysis of spatial phenomena using geographic technologies. Students completing the Undergraduate Certificate Program in Geographic Information Science will be able to create, manage, analyze, and communicate with spatial information using geographic information technologies.

Bachelor of Arts in History (B.A.)

Students completing the History B.A. program will achieve the following:

- **Know**
- the importance and critical perspective of historical knowledge for understanding contemporary society and
- basic facts, concepts, terms, and theories germane to historical study.

- **Understand**
- how people have existed, acted, and thought in the past in various regions of the world and
- the nature of history as a discipline, including the existence of differing historiographical traditions and interpretations of the past.

- **Be able to**
- locate historical evidence and determine its quality, including both primary and secondary sources;
- read, evaluate, and interpret texts critically; and
- research, describe, and explain a complex historical event in a coherent manner, employing the conventions and standards of the discipline.

Bachelor of Arts in International Studies (B.A.)

Students completing the International Studies B.A. program will achieve the following:

- **Communicate**
- at an intermediate-advanced level competency in a modern foreign language at a level that goes beyond that required for general graduation from the School of Liberal Arts.

- **Fulfill**
- the International component of the RISE initiative by studying abroad.

- **Demonstrate**
- detailed familiarity with a specific geographical region of the world;
- detailed familiarity with a specific thematic focus within the field of International Studies; and
- effective speaking and presentation skills.;

- **Recognize**
- and distinguish among various disciplinary approaches (Anthropology, Economics, Geography, History, Political Science, etc.) within the interdisciplinary field of International Studies and
- understand and respect the complexity of socio-cultural diversity around the world.

- **Appreciate**
- and value the benefits of a multi- or inter-disciplinary approach to the acquisition of knowledge.;

- **Identify**
- the diversity of actors prevalent in the contemporary international community and understand how they relate to one another.

- **Locate**
- use and cite appropriate academic sources in their written coursework.

Bachelor of Arts in Philosophy (B.A.)

Students completing the Philosophy B.A. program will achieve the following:

- **Know**
- the important figures and movements in the history of philosophy.

- **Understand**
- the major questions, positions, distinctions, and arguments in the main branches of philosophy.

- **Be able to**
- write clear, cogent, and informed philosophical papers. Speak clearly, accurately, and in an academic manner on philosophical topics;
- comprehend, interpret, and analyze complex philosophical writings; and
- make relevant distinctions; clarify important concepts and claims; competently analyze, evaluate, and construct both deductive and inductive arguments.

Bachelor of Arts in Political Science (B.A.)

Students completing the Political Science B.A. program will achieve the following:

- **Know**
- how to distinguish among theories of politics and analyze current political situations in theoretical terms;
- how to identify the various types of actors in international relations and relate these in describing current global issues; and
- how to locate appropriate sources by searching electronic and traditional data bases.

- **Understand**
- basic structural components of state and national government (legislative, executive, and judicial) and explain their relationship to each other and to subnational units and
- the roles of significant actors, including elites, masses and institutions in the governmental processes.

- **Be able to**
- formulate hypotheses, construct research designs, and apply appropriate analytical skills (both qualitative and quantitative) to the study of political science;
- use and cite appropriate sources correctly; and
- write and speak with sufficient clarity to convey their attitudes, knowledge, and skills.

Bachelor of Arts in Religious Studies (B.A.)

Students completing the Religious Studies B.A. program will achieve the following:

- **Know**
- the basic worldviews and practices of a variety of religious traditions (e.g., tribal/indigenous traditions, Hinduism, Buddhism, Judaism, Christianity, Islam) and
- the concepts and methods of religious studies as a nonsectarian, interdisciplinary way of exploring the amazing diversity of the world's religions.

- **Understand**
- the dimensions of religion (experiential, mythical, doctrinal, ethical, ritual, social) as a tool for analyzing and comparing religious traditions and

- how religions change over time in response to both internal and external circumstances.

- **Be able to**
- read and analyze religious sources, both textual and non-textual, in social and historical context;
- speak and write about competing religious claims in a fair-minded and informed manner; and
- deal comfortably with complexity and diversity in a way applicable not only to careers in religion but also to jobs in business, communication, education, international relations, fine arts, government, law, medicine, nonprofit management, social services, and other fields.

Bachelor of Arts in Sociology (B.A.)

Students completing the Sociology B.A. program will achieve the following:

- **Know**
- how to collect data on social phenomena and
- the background in a specific concentration area of sociology (e.g., medical sociology, gender, sex, and family studies)

- **Understand**
- how to analyze data on social phenomena and
- increasing diversity of disciplinary specialties and backgrounds of those involved in program

- **Be able to**
- apply sociological knowledge and methods in community projects;
- organize and conduct independent projects; and
- present and defend their analyses of social phenomena

Bachelor of Arts in French (B.A.)

Students completing the French B.A. program will achieve the following:

- **Know**
- the structural rules underlying the French language;
- the French sound system and the phonetic rules that govern oral performance;
- how to recognize and interpret major French literary, philosophical, historical, and artistic works, genres, periods, and topics; and
- how to recognize and appreciate ethnic, social, cultural, historical, and value-based diversity from examples provided by the Francophone world.

- **Understand**
- the nature of language itself as well as one's own language as a socially and historically created system of communication;
- the importance of critical thinking when examining other cultures and comparing them to one's own;
- the value of different methods of study of languages and cultures; and
- the linguistic evolution of the French language and its regional and social variations.

- **Be able to**
- sse French for conversational, professional, and academic purposes at the Advanced Low level of proficiency as defined by the American Council on the Teaching of Foreign Languages;
- communicate in a culturally appropriate manner;
- read and understand texts written in French from a variety of genres and contexts, (e.g. newspapers, commercial materials, literature, etc);
- write in French in various contexts and for various audiences, using correct grammar;
- conduct research on the language, literature, and/or culture of France and the French-speaking world; and
- demonstrate familiarity with current events, traditional and popular culture, and structures of the society/societies in which French is spoken.

Bachelor of Arts in German (B.A.)

Students completing the German B.A. program will achieve the following:

- **Know**
- structure of German (sound system, word and sentence structure) and its differences with the English language;
- main cultural manifestations of the language in literature, film and social practices; and
- main differences between contemporary German social structures and institutions and their own.

- **Understand**
- the nature of language itself as a socially and historically created system of communication;
- the importance of critical thinking when examining other cultures and comparing them with one's own;
- the major historical and cultural events and movements that have contributed to shaping contemporary Germany and the other German-speaking countries; and
- the connections between language studies (language, literature, culture and translation) with other disciplines.

- **Be able to**
- apply German in all areas of language usage (writing, reading, listening, speaking) at the Advanced Low level of proficiency as defined by the ACTFL proficiency guidelines;
- apply the knowledge of the language system and culture to function effectively in professional, academic, and intercultural settings at home and abroad;
- apply critical thinking in analyzing language, literature and cultural products and practices; and
- interact with diverse language communities here and abroad in culturally sensitive ways.

Bachelor of Arts in Spanish (B.A.)

Students completing the Spanish B.A. program will achieve the following:

- **Know**
- structure of the language (sound system, word and sentence structure) and dialectal variations in the Spanish-speaking world;

- main cultural manifestation of the language in literature, social practices and perspectives; and
- structural and cultural differences between Spanish and English and between the communities that use these languages.

- **Understand**
- the nature of language itself as well as one's own language;
- the relativity of language use and cultural practices as systems situated in socio-cultural and historical contexts;
- the importance of critical thinking in examining other cultures and comparing them with one's own;
- their place within multilingual international communities;
- the value of different method of study of languages and cultures; and
- the connections between language studies (language, literature, culture and translation) with other disciplines.

- **Be able to**
- use Spanish for conversational, professional and academic purposes at Advanced Low level of proficiency as defined by the ACTFL proficiency guidelines;;
- apply the knowledge of the language system and culture to function effectively in professional, academic, and intercultural settings at home and abroad;
- apply methods of analyzing language, literature and cultural products and practices; and
- interact within multilingual international communities here and abroad in ethically and culturally sensitive ways.

Associate of Arts in Arts and Humanities (A.A.)

An Associate of Arts (AA) degree in the School of Liberal Arts (SLA) is designed to fulfill a set of desired learning outcomes for the general education of a university undergraduate in the 21st century. This degree reflects IUPUI's Principles of Undergraduate Learning (http://academicaffairs.iupui.edu/plans/pul/). Students completing the Arts and Humanities A.A. program will achieve the following:

- **Know**
- through an introductory level about their place and time in society and culture from a variety of perspectives (such as anthropology, economics, history, philosophy, political science, religious studies, sociology, and science), and through having an introduction to a second language.

- **Understand**
- methods and modes of inquiry specific to areas of knowledge in arts and humanities , natural sciences, and the social sciences, the interdisciplinary nature of knowledge, the components of a multicultural society, and the global society and processes of globalization.

- **Be able to**
- demonstrate good written and oral communication skills;
- demonstrate effective skills and interactions with individuals and within groups;
- begin to integrate content materials to applications in the workforce; and
- propose solutions to problems based on their content area of study, either through individual or team member work.

Museum Studies Undergraduate Certificate

Students completing the Museum Studies certificate program will achieve the following:

- **Know** the core areas of museum practice including collections, education, exhibit development, and administration.
- **Develop** their abilities as critical thinkers by questioning the role of museums in society.
- **Be able to** engage in hands-on learning in an area of the museum field through an internship experience.

Bachelor of Arts in Liberal Arts - Individualized Major (B.A.)

The specific learning outcomes of students graduating with an INDIVIDUALIZED MAJOR will vary according to the specific content of the courses of study they design, but all IMP students completing their Individualized B.A. program will achieve the following:

- **Know** a coherent body of knowledge and theory in a discrete area of study they have defined.
- **Understand** approaches to knowledge and methodologies employed in the different disciplines and sub-disciplines included in their major plans, and appreciate the value and limitations of each.
- **Be able to** communicate what they have learned and understood in writing, orally, or another medium of their choice.

Some may have begun to operate effectively in an appropriate professional setting connected to the major. With judicious selection of courses included their majors and other coursework students may be able to qualify for graduate or professional programs that might not otherwise be open to them through other majors at IUPUI.

Bachelor of Arts in Philanthropic Studies (B.A.)

Students completing the Philanthropic Studies B.A. program will achieve the following:

- **Know**
- basic facts, concepts, terms, and theories about philanthropy, nonprofit organizations, and civil society;
- the historical dimensions of philanthropic traditions in the United States and the current trends of philanthropy in contemporary society; and
- ethical frameworks and concepts that form the basis for philanthropic activity in society.

- **Understand**

- relationships among individuals, nonprofit organizations, advocacy groups, and public policy as they address social issues;
- major theories that provide insight into and shape research on voluntary action and nonprofit organizations; and
- how knowledge and skills gained through coursework and experience can be used to serve others, address social issues, and improve society.;

- **Be able to**
- read, analyze, synthesize, evaluate, discuss, and critically reflect upon texts in terms of meaning and implications for new action;
- find quality information and data, drawing on primary and secondary sources, to support positions and propose recommendations through written and oral communication;
- express ideas, listen to diverse perspectives, build consensus, and work with others across differences to achieve a common good; and
- articulate personal values and commitments to act ethically to achieve educational and professional goals.

Associate of Arts (A.A.)

An Associate of Arts (AA) degree in the School of Liberal Arts (SLA) is designed to fulfill a set of desired learning outcomes for the general education of a university undergraduate in the 21st century. This degree reflects IUPUI's Principles of Undergraduate Learning (http://academicaffairs.iupui.edu/plans/pul/). Students completing the Associate of Arts degree program will:

- **Know**
- through an introductory level about their place and time in society and culture from a variety of perspectives (such as anthropology, economics, history, philosophy, political science, religious studies, sociology, and science), and through having an introduction to a second language.

- **Understand**
- methods and modes of inquiry specific to areas of knowledge in arts and humanities , natural sciences, and the social sciences, the interdisciplinary nature of knowledge, the components of a multicultural society, and the global society and processes of globalization.

- **Be able to**
- demonstrate good written and oral communication skills;
- demonstrate effective skills and interactions with individuals and within groups;
- begin to integrate content materials to applications in the workforce; and
- propose solutions to problems based on their content area of study, either through individual or team member work.

Bachelor of Arts (B.A.)

A Bachelor of Arts (BA) degree in the School of Liberal Arts (SLA) includes at least two components: courses (required and elected) courses in (required and elected). Both components reflect IUPUI's Principles of Undergraduate Learning (http://academicaffairs.iupui.edu/plans/pul/). Detailed articulation of Student Learning Outcomes, including their assessment, for individual degrees and certificates are part of the SLA's department and program websites (http://liberalarts.iupui.edu/). Students completing the Bachelor of Arts degree program will:

- **Know**
- about their place and time in society and culture from a variety of perspectives (such as anthropology, economics, history, philosophy, political science, religious studies, sociology, and science), and through having a second language.

- **Understand**
- appreciate, and respect the variety and complexity of other societies and cultures—across time and place—as the basis for successful interaction in the global context of the 21st century.

- **Be able to**
- find, analyze, evaluate, summarize, and apply information, drawing effectively on a variety of information sources and tools;
- pose general as well as particular questions and propose creative solutions to those problems in different contexts—working independently and as members of teams;
- communicate effectively in English to peers and professionals making effective use of a variety of communication modes, methods, and technologies, and have functional competency in one other language; and
- exercise ethically sound judgment in personal and professional situations and demonstrate responsible behavior as leaders as well as being able to work effectively in group or team projects.

Undergraduate Programs

The IU School of Liberal Arts offers a four-year Bachelor of Arts degree in a number of disciplines, a Bachelor of Science in American Sign Language degree, a two-year Associate of Arts degree, and a variety of structured minors and certificate programs for students pursuing Liberal Arts or other degrees. At the heart of the school's programs are the following:

Programs	BA/BS	AA	Certificate	Minor
Africana Studies	BA		Certificate	
American Sign Lanuage	BS		Certificate	
American Studies				Minor
Ancient Greek & Latin				Minor
Anthropology	BA			Minor

Arabic, Islamic Studies				Minor
Arts & Humanities		AA		
Business & Professional Writing				Minor
Chinese Studies			Certificate	Minor
Classical Studies				Minor
Communication Studies	BA			Minor
Economics	BA			Minor
English	BA			
English, Creative Writing	BA			Minor
English, Film Studies	BA			Minor
English, Linguistics	BA			Minor
English, Literature	BA			Minor
European Studies				Minor
French	BA			Minor
French+Engineering	BA/BS			
Geographic Information Science			Certificate	
Geography	BA			Minor
German	BA			Minor
German+Engineering	BA/BS			
History	BA			Minor
History, European	BA			Minor
History, Non U.S. Non-European	BA			Minor
History, Thematic	BA			
History, U.S.	BA			Minor
Human Communication in a Mediated World			Certificate	
Individualized Major	BA			
International Studies	BA			Minor
Italian				Minor
Japanese Studies				Minor
Legal Studies				Minor
Medical Humanities and Health Studies				Minor
Motorsport Studies			Certificate	
Museum Studies			Certificate	
Paralegal Studies			Certificate	
Philanthropic Studies	BA			Minor
Philosophy	BA			Minor
Political Science	BA			
Pre-Law Political Science	BA			
Religious Studies	BA			Minor
Sociology	BA			Minor
Sociology, Medical				Minor

Admissions

- Anthropology
- Applied Communication
- Economics
- English
- Geographic Information Science
- History
- Museum Studies
- Philanthropic Studies
- Philosophy
- Political Science
- Sociology
- Spanish

Anthropology

There are no specific prerequisites, majors, or courses required. You do not have to have majored in Anthropology as an undergraduate to apply to our program but you do

need to have a BA or BS from an accredited university and to have a reasonable background in the Social Sciences. If you are not sure whether you are ready to make a commitment to an MA program in Anthropology, you are welcomed to take **up to 9 credits (3 courses)**in our department as a non-degree student. If you are subsequently accepted into our program, those credits will be retroactively counted toward completion of your MA. To find more information about enrolling as a non-degree student, see http://www.iupui.edu/~gradoff/gnd/

Application Requirements

To apply for the M.A. in Applied Anthropology, you must submit an application, personal statement, three letters of reference, GRE scores, and transcripts from all of the institutions you have attended as an undergraduate or a graduate student.

1. **An on-line application including a personal statement.** The personal statement should address the following two items. Please follow the directions below and use the question headings to label each item of your response:

- **Statement of purpose** (600 words): In your statement of purpose, specifically discuss the academic and professional experiences that helped shape your decision to pursue graduate work in Applied Anthropology. Explain your educational and career objectives and how these relate to the IUPUI program. Please examine our departmental Web site to familiarize yourself with our faculty's areas of expertise before you submit your application. One of our primary criteria for evaluating applicants is to make sure your interests are a good match with our department's strengths.
- **Personal endorsement** (150 words): Briefly explain why you think we should admit you to the program. What assets will you bring? What are you capable of? How will you make a difference in the program? You might consider describing your personal/professional work ethic, values, or other orientations that drive your work.

2. **Three (3) letters of reference**, at least one of which should be from a person who can speak to your academic record (such as a faculty member). Letters from supervisors who can address professional or internship experiences are also relevant. Make sure your referees can speak to your strengths and abilities as a future graduate student. We prefer that letters of reference be submitted electronically through the Apply Yourself system but if necessary, they can also be sent directly to the Anthropology Department mailing address below.

3. **All official transcripts.** Please request official transcripts from all previous colleges and universities you have attended. Note: We do not require a transcript from IUPUI or IU Bloomington since we can access them electronically. You must have at least one official transcript demonstrating a bachelor's degree from an accredited university. If you are in your senior year, submit your most recent transcript with your application. If admitted, you will be asked for an official transcript documenting your completed degree and it must be received before you will be allowed to register for your second semester of classes. The recommended minimum cumulative GPA is 3.0 (on a scale of 4.0) both overall and in your major field. If you feel that your GPA does not reflect fully your academic abilities because of special circumstances, please address those in your personal statement or a separate note in your application.

4. **Your Graduate Record Exam (GRE) scores.** GRE scores from the **general exam** (i.e. no specific subject is required) are required without exception, regardless of previous degrees earned or enrollment in other programs. The scores must be reported before your application will be reviewed. Scores may be reported electronically (specify school code #1325) by the testing service. If you are taking the GREs close to the application deadline, you may send or fax a copy of your report since test takers often receive their reports before the electronic report is available.

Because this question is often asked, the IU Graduate School guidelines recommend an average of at least 550 with one score above 600, but the Anthropology admissions committee considers test scores within the context of the entire application, including evidence of an applicant's abilities as assessed through undergraduate records, references, professional experience, and the personal statement.

Other Application Information

Please note that to be eligible for nomination for a University Fellowship in 2011, your application much be **postmarked**by **January 15, 2012.**. Please see the Office of Student Financial Services for further information and deadlines for filing FAFSA forms in order to request need-based financial aid. As a Department, we are able to nominate 4 candidates for consideration for University Fellowships but we do not make the final decisions.

We will review a second round of applications submitted by **March 15, 2012. T**hese applicants will not be eligible to be nominated for university fellowships, though there may be other forms of support that are available (such as Research or Teaching Assistantships).

If you are interested in also pursuing an additional degree or certificate in a related program such as Museum Studies, Public History, or Geography, you must apply separately to those departments. Please check for information on their Web sites through the IU School of Liberal Arts at IUPUI.

Please note that while the Museum Studies program is based in the Anthropology Department and many of the courses are cross-listed with Anthropology, if you wish to pursue either a joint degree or a Museum Studies Graduate Certificate, you must apply separately to that program. For further details, see the Museum Studies web site.

IMPORTANT NOTE: All candidates must complete the form online. Paper applications are no longer accepted and will be returned to you. If you have additional materials that must be submitted in hard copy, such as transcripts or letters of recommendation, please have these documents mailed to the following address:

Graduate Admission Committee

Department of Anthropology, IUPUI

425 University Blvd, CA 410
Indianapolis, IN 46202

For further information, contact the Graduate Program Director, MA in Applied Anthropology: Professor Susan Hyatt (317.278.4548)

Applied Communication

Admission Requirements

Applicants should have the following:

1. A bachelor's degree from an accredited college or university, with a minimum GPA of 3.0 (on a 4.0 scale)
2. Official transcripts from all Universities and Colleges attended (mail to

   CA 425 University Blvd, CA 309A, Indianapolis, IN 46202)
3. Three letters of recommendation (completed online or mail to

   CA 425 University Blvd, CA 309A, Indianapolis, IN 46202)
4. A 2-3 page personal statement explaining both how *prior* education and experience make the applicant a good candidate for graduate study in communication, and how the candidate plans to apply this degree to future career and academic goals. In addition, evidence of strong analytical and writing skills, a background in research methods, and experience in the analysis of communication phenomena are highly recommended. (completed online)
5. If you are applying as an international student, the Office of International Affairs (OIA) will finalize your admission and assist you with obtaining a visa, if necessary. OIA will conduct a final review of your application to determine that all institutional and USCIS (U.S. Citizenship and Immigration Service) requirements have been met. OIA may contact you for additional information. In the meantime, please visit their web site at http://www.international.iupui.edu/ to be sure that you have satisfied all admission requirements for international students. Please do not apply for your visa or make travel plans until you receive a formal confirmation of admission from OIA and your Certificate of Eligibility (I-20 or DS2019). If you have any visa-related questions, please direct your questions to the OIA office at 317-274-7000 oroiagrad@iupui.edu . Registration for international students takes place during the new student orientation sponsored by OIA just before the beginning of the term.

Graduate Record Examination: The Graduate Record Examination (GRE) General Test with satisfactory scores in the three areas is required for applicants who wish to be considered for University fellowships, but **not required** for admission to the program.

Applicants should submit the following:

1. Completed online application for Indiana University Graduate School. To apply, go tohttp://www.iupui.edu/~gradoff/admissions/
2. Application fee of $50.00 USD, $60.00 USD for international students. This fee is subject to change. Payment is made online with a credit card.
3. GRE scores are not required for admission to the program; however GRE scores may be submitted if an applicant feels the scores will enhance his/her application.
4. An applicant wishing to be considered for scholarships or fellowship support should note that strong scores on the GRE General Test **ARE REQUIRED** and may have a positive impact on his/her application.
5. International students must submit TOEFL scores. Information about TOEFL can be obtained from the

   International Affairs Office

   620 Union Drive, Room 207

   Indianapolis, IN 46202-5167
   Phone: 317- 274-7000.

Fellowships

- Incoming students with the highest qualifications will be nominated by the Graduate Director for University Fellowships. These fellowships offer full-time students one year of financial support. All the graduate programs on the IUPUI campus compete for these fellowships, and programs are allowed up to four fellows per year depending on situational constraints such as budget. In addition to this campus-wide program of financial support, the Department of Communication Studies may offer a limited number of research assistantships and teaching opportunities. Students must apply to the department in early spring by the published deadline before the assistantship year.
- Students working on the applied learning project or the thesis may apply for Grants-in-Aid of Research through IUPUI. These grants are intended to cover expenses incurred in the research required for the project or thesis, including travel to libraries and archive holding materials not otherwise available. Go tohttp://www.iupui.edu/~scentral/grads/general.html to find out more about grant opportunities.

Questions

For general questions or more information about graduate school, go to www.iupui.edu/%7egradoff

For general questions on departmental requirements, contact Dr. Rhodes at rhodesn@iupui.edu

rhodesn@iupui.edu

Economics

Master of Arts in Economics

Students with good credentials in any discipline may apply to the program, but successful applicants usually demonstrate an ability in economics or other areas with significant training in mathematics.

Applicants must submit:

1. an application form,
2. official transcripts of all relevant academic work,
3. three (3) letters of recommendation from people capable of assessing the student's potential for

graduate study (at least two are normally from former instructors),
4. scores from the Graduate Record Examination (GRE), and
5. a personal statement indicating why they wish to earn an advanced degree in economics.

Graduate study in Economics also requires knowledge of intermediate-level undergraduate economic theory, differential and integral calculus, and statistics. An applicant whose academic record does not meet the standard in a particular area may be admitted if his or her record is outstanding in other respects.

International Applicants

Foreign applicants are required to take the Test of English as a Foreign Language (TOEFL) and receive a score of 550 or above. A score of 600 and above is usually needed to be successful in the Economics program.

They will also be required to take an on-campus exam for English proficiency prior to their first semester of course work and may be required to take additional classes in English as a second language. We also accept successful completion of ELS 112 in lieu of a TOEFL score for admission.

To apply online please Click Here
Students typically enter the program in August. Applications for admission may be submitted **up through June 15**.

PhD in Economics

There are admission prerequisites for the phd program.

For a complete application you will need to submit:

- online application
- personal statement
- 3 letters of recommendation
- GRE and TOEFL (for International students) scores
- college transcripts
- supplemental questions required by the department (Application Supplemental Questions)

Submit materials to the following address:

IUPUI Department of Economics
425 University Boulevard, CA516
Indianapolis, IN 46202-5140

Apply Online Now!
International students will find useful information at the Office of International Affairs: http://iapply.iupui.edu/

IUPUI Office of International Affairs *Guide for International Students*:http://iservices.iupui.edu/visa-tutorial/

Questions? Contact the Ph.D. Program at econphd@iupui.edu

English

The graduate English program has been designed to prepare students for careers in the analysis and production of texts. The program covers issues and skills in reading and writing, in the richest sense of these words—in order to prepare students to address these issues and to teach these skills. Graduates of the program should be prepared for such careers as teaching writing and literature; teaching English as a second language; and writing for business, government, and other professions. In contrast to traditional M.A. programs, which place heavy emphasis on literary history, the IUPUI program focuses on the application of English studies to contemporary situations and problems.

Admission Requirements

- Applicants should have a bachelor's degree from an accredited college or university, with a minimum grade point average of 3.0 (on a 4.0 scale) in the student's undergraduate major, documented by an official transcript. Applicants are expected to have been English majors, but admission also is considered for those who otherwise demonstrate the competency necessary for successful graduate work in English.
- The Graduate Record Examination (GRE) General Test, normally with a minimum score of 600 in either the verbal or the quantitative section and 4.0 in analytical writing. Applicants are encouraged to take the examination by December of the year before admission.
- Three letters of recommendation.
- Two years of foreign language as an undergraduate with appropriate level of achievement.
- Follow the IUPUI application procedure.

Note: If you have already submitted an application for a graduate or certificate program in English at IUPUI, you will need to use a new pin and password. If this is the case, please contact Pat King so she can waive the application fee.

Grades

M.A. students must maintain a minimum grade point average of 3.0 (B).

Geographic Information Science

Admission Requirements

Admission to the Master of Science in Geographic Information Science requires:

- A baccalaureate degree in geography or closely related discipline from an accredited four-year institution, with a GPA of at least 3.0, documented by an official transcript.
- Scores from the Graduate Records Examination (GRE). Beginning in summer 2011, Educational Testing Services (ETS) began implementing a new scoring system for the GRE. To accommodate these changes and ensure comparability between old and new versions of the GRE, the Department of Geography will consider and evaluate the percentiles associated with applicants' reported GRE scores in making admissions decisions.
- Proficiency in the English language. International students must submit proof of language proficiency (normally a score of 550 or above on the TOEFL exam). Please refer to the IUPUI Graduate Office for English proficiency requirements for non-native speakers of English, available at http://www.iupui.edu/%7egradoff/docs/els-policy.pdf
- An application essay describing the student's background, interests in the field, and reasons for pursuing the degree.
- Three letters of recommendation.

Application Process

Applicants to the MS GIS program must submit applications online through the Indiana University Graduate School at IUPUI.

A complete application includes:

- completed application form
- three letters of recommendation - letters should be requested from individuals familiar with academic abilities and potential
- official transcripts documenting all college and university work including courses, grades, and degrees awarded
- official report of scores for the Graduate Record Exam
- an application essay (2-4 pages suggested length)
- payment of Graduate School application fee

History

Admission Requirements

- Bachelor's degree from an accredited college or university, with an overall undergraduate grade point average of at least 3.0 (B) and a minimum grade point average of a 3.0 (B) in the student's undergraduate major (an undergraduate major in History is not required, but applicants without such a background may be required to take additional course work in history at the undergraduate level as a condition for acceptance in the program).
- Appropriate level of achievement on the Graduate Record Examination General Test (GRE).
- Three letters of recommendation.

Foreign Language Requirement

There is no foreign language requirement for the degree per se. However, those students who will incorporate foreign language documents and scholarship in their graduate work (especially those concentrating in European history) will be expected to translate non-English sources. They must thus demonstrate an appropriate level of competence in the relevant language before they begin work on their thesis. The Director of Graduate Studies and the student's advisor may require the student to take additional coursework.

All students concentrating in European history should expect to demonstrate competence in a foreign language, ideally upon application to the program. (Competence is defined as two years of undergraduate course work with a grade of B or better in the final semester, or demonstration of an equivalent reading proficiency in an approved foreign language exam.) Students considering the possibility of going on for a PhD should recognize that competence in at least one and sometimes two foreign languages is often a requirement in history doctoral programs.

Application Advice

1. Allow time to schedule and study for the GRE. It takes at least two weeks for your writing scores to get to the department. We pay most attention to the verbal and analytical writing portions of the exam.
2. Get letters of recommendation from people who can speak most directly to your ability to do graduate work in history. Try to have at least two letters from history professors or professors who have taught you in upper-level liberal arts courses.
3. Ask a professor to help you revise your personal statement or statement of purpose. Use it to show us who you are and why you want to come to our program specifically. Identify your chosen area of concentration (U.S., European, or Public History). Explaining how our faculty and program support your own research interests and career goals is a good idea. Avoid phrases and ideas that could be interpreted as trite or cliché as well as broad generalizations; be concrete, specific, direct. We want to learn about your experiences doing history and to see you thinking like a historian. If you have any potential weak spots in your application, spend a sentence explaining them. Similarly, identify positive things (awards, publications, etc) that set you apart. If you are interested in being considered for financial support (fellowships, internships, assistantships), say this at the beginning of your statement. If you plan to concentrate in European history or use foreign language sources in your research, describe your foreign language training. Finally, proofread carefully. Aim for a length of about 500 words.
4. We do not need a writing sample.
5. If you think you don't have enough history background for graduate work yet, have been out of school for a long time, or have a low undergraduate GPA, think about taking some courses with us as a Graduate Non Degree student before you apply. It's a good way for us to get to know each other and for you to supplement your application. Contact the Director of Graduate Studies if you are interested in this or have any questions about the application process.

Application Instructions

APPLY ONLINE

NOTE: You must apply online via the link above. Cost to apply is $60.

Please be sure to choose "History" as your Academic Program (but be sure to indicate in the first paragraph of your personal statement your intended area of concentration i.e. Public History, U.S. History, European History).

READ ALL APPLICATION INSTRUCTIONS BEFORE YOU APPLY.

Application Deadlines

FALL: Applicants seeking full department consideration for financial support (i.e. those seeking an internship, TA position, or fellowship) must submit their COMPLETED application by **February 1** *(NOTE: all required documentation must be submitted before this deadline).* All other Fall applicants must submit COMPLETED applications before the **April 15** deadline. We will not consider incomplete applications.

SPRING: For people interested in starting in January, completed applications are due by **October 15**.

Required Documentation

1. Three (3) letters of recommendation
2. One (1) original copy of all transcripts
3. GRE scores from ETS
4. Personal Statement

1) Your three letters of recommendation should be from individuals familiar with your academic abilities and potential. Each recommender should submit their letter online (follow the directions in the online application for how to add your recommenders). If for some reason, a recommender cannot submit their letter online, they must send a hard copy letter directly to the address below.

2) Your official transcripts from all previous colleges and universities (documenting each course taken and all degrees awarded) must be mailed directly from each university to the address below.

3) The Department of History must also receive your official scores from the Graduate Record Examination General Test (GRE) (we do not require the History Specialty Exam). Results should be submitted to IUPUI (school code: 1325) and the History Department (code: 2799 or similar) in order for the department to view your results. **For more information about the GRE revised General Test, please visit the ETS website.**

4) A 300-500 word "Statement of Purpose" regarding your current goals, plans for your professional career, and reasons for selecting this field of study must be included. **YOU MUST indicate in the first paragraph of this statement your intended area of concentration** (i.e. Public History, U.S. History, European History) and if you want to be considered for a fellowship, teaching assistantship, or internship.

Graduate Non-Degree Program
Students whose applications are not complete, or who want to "test the waters" prior to submitting an application, may take a limited number of graduate courses as graduate non-degree (GND) students. With the approval of the departmental Director of Graduate Studies a maximum of eleven (11) credit hours earned as a graduate non-degree student may be recommended to the Dean of the Graduate School to be applied to history department degree requirements after the student is accepted into the M.A. program. Consult with the department's Director of Graduate Studies about appropriate courses.

Museum Studies

Application Deadlines

Fall Semester: **January 15** (to be eligible for a University Fellowship) and **March 15**

August 15 through October 15 and January 15 through April 15 rolling admission to the Museum Studies Graduate Certificate for Master's students enrolled in other IUPUI degree programs.

There are no specific prerequisites, majors, or courses required. To apply for the M.A. or the Graduate Certificate you must submit an application, personal statement, three letters of reference, GRE scores, and transcripts:

1. **The Graduate Online Admissions Application (also called "eApp") is filled out on-line.** You may save a draft and return to it until you are ready to submit it. The application fee must be paid by credit card before it can be submitted.
2. **On-line application personal statement.** In your personal statement you should address the following three items. Please use the headings with each item of your response:

- Statement of purpose (400 words): Explain your educational and career objectives and how this relates specifically to the IUPUI program; what do you intend to study here and why? Why is this the right program for you?
- Purpose of museums (250 words): Please respond to the following quotation: "Museums can no longer confine themselves simply to preservation, scholarship, and exhibition independent of the social context in which they exist" (American Association of Museums, Excellence and Equity (1992), p. 8). As a prospective museum professional, how do you see your role in promoting this idea?
- Personal endorsement (250 words): Briefly describe why you think we should admit you to the program. Why are you the right fit for IUPUI? What experiences (museum and non-museum) have shaped your perspectives? Where do you find inspiration? What unique talents or skills do you bring to the program? What words describe your greatest traits? What are your passions, your strengths, or your hidden talents? Feel free to be creative in your format and response.

3. **Three letters of reference** at least one of which should be from a person who can speak to your academic record (such as a faculty member). Letters from supervisors who can address professional or internship experience in museums are also relevant. Letters may be done electronically in the application or sent directly to the mailing address below.
4. **Transcripts** Please request official transcripts from *all* previous colleges and universities you have attended. Note: We do not require a transcript from IUPUI or IU Bloomington since we can access them electronically. You must have at least one official transcript demonstrating a bachelor's degree from an accredited university. If you are in your senior year, submit your most recent transcript with your application. If admitted, you will be asked for an official transcript documenting your completed degree and it must be received before you will be allowed to register for your second semester. The recommended minimum cumulative GPA is 3.0 (on a scale of 4.0) both overall and in your major field. If you feel that your GPA does not reflect fully your academic abilities because of special circumstances, please address those in your personal statement or a separate note in your application.
5. **Graduate Record Exam (GRE) scores** GRE scores from the general exam (i.e. no specific subject is required) are required without exception, regardless of previous degrees earned or enrollment in other programs. The scores must be reported before your

application will be reviewed. Scores may be reported electronically (specify school code #1325) by the testing service. If you are taking the GREs close to the application deadline, you may send or fax a copy of your report since test takers often receive their reports before the electronic report is available. GRE scores are valid for five years. GRE scores reported from a test taken more than five years ago may be petitioned to be accepted as valid for admission provided the applicant has successfully completed graduate coursework within the last five years.*

6. **Current CV or Resume** You may either upload your CV along with your personal statement via the eApplication or email it directly to Becky Ellis, rsmallma@iupui.edu.

***Because the question is often asked, the IU Graduate School guidelines recommend an average of at least 550 with one score above 600, but the Museum Studies admissions committee considers test scores within the context of the entire application,**(the demonstration of an applicant's abilities through undergraduate records, references, museum or related experience, and the personal statement). You may download the Graduate Admissions Rubric for further information on how your application is evaluated.

Please note that to be eligible for nomination for a university fellowship, you must apply by January 15. Please see our Funding page for further details about fellowships, scholarships, and other funding opportunities. Please see the Office of Student Financial Aid Services for further information and deadlines for filing FAFSA forms in order to request need-based financial aid.

Please send hard copy application materials, such as your transcript and letters of reference that are not being completed on-line to this address:

ATTN: Graduate Admissions Committee

IUPUI Museum Studies Program

CA419, 425 University Blvd.
Indianapolis IN 46202

International Applicants

If you are an international student, we also require the following:

A completed International Graduate Student Admission Form. Applicants who are not U.S. citizens will be reviewed for admission in the same manner as U.S. citizens. Foreign applicants, however, must possess an adequate mastery of the English language for acceptance into the program. Working in cooperation with the Office of International Affairs, an applicant's language proficiency will be assessed using both GRE and TOEFL scores, letters of exchange, and interviews. For more information on this matter, please visit: IUPUI Office of International Affairs.

Requests for international applications should be directed to:
Office of International Affairs
IUPUI
902 West New York Street, Room 2126
Indianapolis IN 46202-5167
Phone: (317) 274-7294
Email: oia@iupui.edu
Web: www.iupui.edu/~oia/

Philanthropic Studies

MA in Philanthropic Studies

The Philanthropic Studies Program is part of the School of Liberal Arts at Indiana University-Purdue University Indianapolis; 21 of the 36 credit hours required for the MA degree must be Liberal Arts courses. If you do not meet all of the requirements listed below, you may be admitted to the program on a conditional basis and will be reviewed after a fixed period of time to determine whether you may continue in the program.

- **Prior Academic Work**
  A bachelor's degree from an accredited college or university is required with a minimum of a 3.0 overall grade point average (on a scale of 4.0), and a minimum of a 3.0 average in your major field. Applicants with a grade point average below 3.0 may be considered for conditional admission.

- **Results of the Graduate Record Examination General Test**
  Applicants are expected to demonstrate an appropriate level of proficiency on the GRE or a comparable proficiency test (i.e., GMAT, LSAT). Results from the Graduate Record Examination taken within the past five years are required. The Graduate School of Indiana University has established the minimum criteria for GRE scores to be **greater than 1000 (Verbal and Math combined)**.

  Note: Applicants whose academic records fail to satisfy the GRE standards may be admitted to the program on a conditional basis, in which case their status will be reviewed after a fixed period of time to determine whether they may continue in the program.

- **Recommendations**
  Three letters of recommendation to the Admissions Committee are required. Preference will be given to those candidates who can demonstrate ability to successfully perform academic work. In selecting your recommenders, try to select those people who can best speak to indications of your ability to successfully do academic work. If a recommender is not in an academic environment, encourage him/her to assess your knowledge, skills, and abilities as they relate to your ability to do academic work.

- **Statement of Purpose**
  Preference will be given to those candidates whose goals and interests, broadly speaking, match those of the Master of Arts in Philanthropic Studies and its curriculum.

- **Resume**
  Please send updated resume to Peggy Smith, Student Services Coordinator.

Application Deadlines

Those students who are not U.S. citizens must submit their application materials no later than **January 1**. Students seeking financial aid must apply by **February 1**. The priority

deadline for all others is **April 15**, but the Center will accept applications until**July 15, if space is available.**

The deadline for Spring admission is **November 15**. International applicants must apply by **October 15.**

Please note: Spring admission is only recommended for applicants who have completed SPEA V521/PHST P521, "The Nonprofit and Voluntary Sector" course OR any equivalent graduate level introductory course in Nonprofit Management or Philanthropic studies from another university. If you have any questions about this policy, please contact Student Services, pessmith@iupui.edu

Graduate Record Examination

Applicants should demonstrate an appropriate level of proficiency on the GRE. An official report of the results is required for admission. Computer-Based Testing is conducted year-round by appointment through designated test centers. Information on the GRE is generally available at a local college or university, or by calling Educational Testing Service at (800) GRE-CALL.

For International Students and Scholars

Whether you want to pursue a degree in Philanthropic Studies or lend your expertise to the Center on Philanthropy's academic and research programs, the Center's International Community Development office can help. Read more about services for students and scholars, or email Assistant Director Nan Bohan or call her at (317) 261-3008.

Apply online now!

Apply online at the Indiana University Graduate School.

PhD in Philanthropic Studies

Applications are required by **January 15**.

Admission Requirements

1. Formal application to Ph.D. program
2. Official undergraduate and graduate transcripts
3. Grade of B or higher on all courses applied to requirements
4. GRE test scores
5. Three letters of reference
6. Current curriculum vitae
7. Three-page essay summarizing professional goals and proposed research area
8. An interview (telephone, electronic, or in person) with members of Philanthropic Studies Doctoral Committee

Philosophy

Applicants are expected to have a bachelor's degree from an accredited university, or its equivalent, with a grade point average of at least 3.0 overall (on a scale of 4) and at least 3.0 in the student's major. There is no specific major requirement, but applicants must show a record of coursework (or equivalent experience) demonstrating that they are sufficiently prepared to do graduate work in philosophy. Acceptable coursework includes an undergraduate degree in philosophy. For applicants interested in the Bioethics or International Research Ethics concentrations, professional training or experience that involved health care ethics could be accepted in lieu of coursework. Applicants must also show an appropriate level of achievement on the Graduate Record Examination (GRE) General Test.

Foreign applicants are required to take the Test of English as a Foreign Language (TOEFL). They must also take the IUPUI English (ESL) examination prior to their first semester of coursework and may be required to take additional classes in English as a second language.

Students not seeking a degree, and students not qualified for full admission, may be admitted as Graduate Non-Degree students. In some cases, degree-seeking students who do not meet all admissions requirements will be admitted on condition that specified deficiencies be remedied within a certain time.

Application Deadlines

Deadlines for receipt of **completed** applications are as follows:

- **January 15 –** For applicants who wish to be considered for a University Fellowship.
- **March 1 –** For applicants seeking admission in the summer or fall semesters.
- **October 15 –** For applicants seeking admission for the spring semester.

If you wish to apply after any of these deadlines, please contact the graduate director.

Application Materials

1. Graduate School Application form with Application Fee: http://www.iupui.edu/~gradoff/admissions
2. Three Letters of Recommendation
3. Statement of Purpose
4. GRE Scores*
5. TOEFL Scores (non-native English speakers only)
6. Official Transcripts (required from all institutions attended or currently attending)**
7. Writing Sample**

* LSAT or MCAT scores may be accepted in lieu of GRE scores for students applying for the Bioethics or International Research Ethics concentrations. No test scores are required for applicants who already hold an advanced degree.

**Please send directly to the Philosophy Department, CA 331, 425 University Blvd., Indianapolis, IN 46202

NOTE: A writing sample may not be required for applicants to either the Bioethics or International Research Ethics concentrations if they are, or have been, professionally employed in a relevant field. In such cases, a resume may be submitted in lieu of a writing sample.

Sociology

Deadlines

The following deadlines must be observed in order to receive consideration for admission:

- February 1 - priority consideration for fall semester and to be considered for financial support
- April 15 - for fall admission

Applications received after the deadline will be held and included for consideration at the next deadline. (They will be considered at an earlier date only at the discretion of the committee.) Applicants who wish to begin coursework prior to their admission to the Graduate School may do so through

the Graduate Non-Degree (GND) program. **Please note:**Taking Non-Degree credits does not ensure future admittance into the program.

Admission Requirements

Applicants must have a baccalaureate degree from an accredited U.S. institution, or a certifiable foreign equivalent with a total grade point average of 3.0 (on a scale of 4.0). Applicants should have completed five undergraduate sociology courses (or approved equivalents, with no more than two of the latter) with a GPA of at least 3.0. Applicants must also submit two samples of writing (a 750-word essay required by the IU Graduate School and a sole-authored report or term paper required by the Sociology Department, official transcripts and three letters of reference. Foreign applicants are required to take the Test of English as a Foreign Language (TOEFL).

Note: The **GRE** general test is not required, but is strongly recommended for admission to the program. In addition, some funding opportunities require strong scores on the GRE general test.

Financial Aid:

Stipends of various amounts for teaching and research assistantships are available from the School of Liberal Arts. The Graduate School also provides stipends. All are on a competitive basis, and applications must be received by February 1. For information on Work Study and Student Loans, contact the Office of Scholarships and Financial Aid, Cavanaugh Hall, Room 103, IUPUI, 425 University Boulevard, Indianapolis, IN 46202, Ph: 317-278-4723.

Application:

The Indiana University Graduate School strongly encourages the submission of on-line applications. However, if a student is unable to use the on-line application, a paper application package for the Graduate Program may be requested from the Department of Sociology at the address below or call 317-274-8981.

Link to on-line application

For your convenience, the on-line application to the Graduate Program can be started, put on hold, and completed on a different day. This will allow you to gather needed information and to compose your Personal Statement in installments.

CHECKLIST FOR A COMPLETE APPLICATION MUST INCLUDE THE FOLLOWING:

1. Completed on-line application
2. Three letters of recommendation and IU Recommendation for Admission forms (available on line or from the department). These documents should be from individuals familiar with your academic abilities and potential.
3. Copy of official transcript(s) of all previous college and university work, documenting each course taken, grades received, and all degrees awarded.
4. Personal Statement - a 750 word essay (as required by the Graduate School) on "Why I want to enter the Master's Degree program in Sociology."
5. 2nd writing sample: a sole-authored writing sample (a recent term paper or report analyzing a social science topic).
6. The application fee should be paid (online) by MasterCard, Visa or American Express.

Additional information on the MA in Sociology can be obtained at the IUPUI Sociology department, by calling the Sociology Office Coordinator at 317-274-8981, by e-mail: sociolog@iupui.edu, or by writing to the address below.

Indianapolis, IN 46202-5140

Master of Arts in the Teaching of Spanish (M.A.T.)

This graduate program is a collaboration between IUPUI and the University of Salamanca in Spain. It leads to the Master of Arts in the Teaching of Spanish awarded by Indiana University. Students also receive certificates from the University of Salamanca attesting to their completion of the summer programs in residence there. The University of Salamanca has a well-developed curriculum for foreign students who aspire to teach Spanish, and its Cursos para Profesores enjoy a high level of academic prestige around the world.

Objectives

This international course of study has been designed specifically for teachers of Spanish. It provides graduate-level course work in the Spanish language, Hispanic cultures, teaching methodology, applied linguistics, and Hispanic art and literature. It provides for the professional development of Spanish teachers through the improvement of their language and teaching skills, and it will promote their career advancement. Graduates of the program will in turn contribute to better teaching of Spanish in area schools, improving the language skills and the cultural awareness of students in the state of Indiana.

Design

The degree program consists of 36 credits and requires two five-week programs taken abroad in consecutive summers. The remainder of the course work must be completed in residence at IUPUI. The Master of Arts in the Teaching of Spanish may be completed in three to four academic semesters and two summer sessions. Students may select from two options for the course of study: Option 1 includes a master's thesis, and Option 2 requires additional coursework. For a list of required course work, see the program Web site: http://liberalarts.iupui.edu/wlac/graduate/mat_in_spanish.

Admission Requirements

1) **A bachelor's degree from an accredited college or university, with a minimum grade point average of 3.0 (on a 4.0 scale)** in the student's undergraduate major, documented by an official transcript. Applicants are expected to have an undergraduate degree in Spanish, but admission is also considered for those who otherwise demonstrate the competency necessary for successful graduate work in Spanish. Students must have knowledge of Spanish phonetics, linguistics, and literary genres and periods. *Students with deficiencies may be admitted on a conditional basis until they complete the relevant undergraduate courses in these areas.*

2) **Proficiency in the Spanish language;** There are two options:

a. Exam: Students may take the Diploma in Spanish (DELE) issued by the Spanish Ministry of Education, Culture and Sport. The official exam determining this proficiency is offered once a year at IUPUI. Students must attain a passing score at the Nivel Intermedio (B2).
OR b. A tape including applicant's oral sample of 10-15 minutes of *spontaneous* speech in Spanish **AND** an essay in Spanish on some aspect of Spanish culture, literature, linguistics, or pedagogy. The essay may be in the form of a paper written for a course.

3) **Three letters of recommendation.** At least two of these should be from professors.

4) **For international students, the university requires a minimum TOEFL score of 550 on the paper version, or 213 on the computer-based test. Send scores to Institution Code 1325, Department Code 2608.** Students who do not achieve this score may be admitted to the university conditionally and may be required to take English as a Second Language courses through the Department of English. While taking these courses they will be allowed to register for a maximum of six credit hours in the MAT in Spanish. If admitted, International students will also be required to take IUPUI's ESL Placement test before registering for the first semester.

PLEASE NOTE: While the GRE is not necessary for admission to the Master of Arts for Teachers Program in Spanish, it is required for application to certain financial aid programs. (See "Financial Assistance" below.)

5) **Online application.** Please access the online portion of the application from the following link: http://www.iupui.edu/%7egradoff/admissions/apply.html

This segment requires basic information such as your name, address, program of study, residency status, etc. Please pay careful attention to the **personal statement**, in which you explain your reasons for pursuing the M.A.T. in Spanish. The statement should be written in English. The application fee may be submitted by credit card at the end of the online application. Please check with the Graduate Office for the current amount of the application fee.

Please note: Under Educational Objectives you must choose "Master's" as your type of admission, "Spanish (IU Graduate School)" as your academic program, and "Spanish M.A.T." as your major. Please also note that if you have already submitted an online application for Graduate Non-Degree Status or for another graduate program, you must still complete a new online application for this program using a new personal identification number (PIN) and password and submit an additional application fee.

Financial Assistance

Various sources of financial assistance are available to graduate students at IUPUI. Applicants should contact:

IUPUI Office of Student Financial Services
Campus Center (CE) 250
420 University Boulevard
Indianapolis, IN 46202-5140
Phone: (317) 274-4162
http://www.iupui.edu/~finaid/office/

Political Science

Applications for admission to the program (without financial support) will be reviewed throughout the year, but it is recommended that applications for fall be submitted no later than the end of June, and for spring no later than the end of November.

Completed applications for IUPUI Fellowships must be submitted by February 1. Priority for other forms of financial aid (internships, research assistantships, teaching assistantships) will be given to those applying by May 1.

Minimum admissions are a BA from an accredited institution, a GPA of 3.0, and scores on the revised GRE General Test of 145 in each of the verbal and quantitative elements, and 4.5 in the analytical writing element. (For GREs taken before July 31, 2011, we look for an average of 500 or better with at least one score of 550 or better.) You can sign up to take the GRE at http://www.gre.org/. It is recommended that you sign up at least two weeks in advance of the date on which you want to take the exam to ensure that you obtain a reservation for that day.

For full details on the , please visit the Graduate Office web site, where you can file an online application. The application includes a personal statement and three letters of recommendation. In addition, you will need to submit your undergraduate transcript and GRE scores, and be interviewed in person by the departmental Director of Graduate Admissions.

Students whose admission package is incomplete or whose GPA and/or GRE scores do not quite meet our expectations may be conditionally admitted to the program. Also, students who apply late or before they have taken their GRE may be admitted as graduate non-degree students. Either way, courses taken before formal admittance will count toward the MA once students are formally admitted (provided the grade expectation described above is met).

Certificate Programs

- Geographic Information Science
- Museum Studies
- Philisophy
- Professional Editing
- Survey Research
- Teaching English Speakers of Other Languages (TESOL)
- Teaching Writing

Teaching Writing

The graduate Certificate in Teaching Writing is a 20-hour program of study for certified middle school or high school teachers, part-time university writing faculty and lecturers in other disciplines, and M.A. students interested in earning a certificate in writing to enhance their professional teaching careers.

Major topics include theories and methods of teaching writing; understanding linguistic diversity; uses of technology in writing; social aspects of writing development; non-fiction writing; writing assessment; and teacher research. The Certificate requires completion of five graduate courses consisting of one core course and four elective courses.

Graduate credits earned can be applied toward the M.A. in English upon acceptance into the M.A. For further information, please contact Professor Kim Brian Lovejoy (274-2120).

Professional Editing

The 15 credit hour graduate Certificate in Professional Editing, an interdisciplinary program administered for the School of Liberal Arts by the Institute for American Thought, can be taken as a standalone certificate or in conjunction with the M.A. in English or History. The program offers editing concentrations in English and History, i.e., critical editing and documentary editing.

Twelve credit hours of English courses comprise the Critical Editing core: ENG L501 Professional Scholarship in Literature (4 cr.), ENG L680 Topics: Textual Theory and Textual Criticism (4 cr.), and ENG L701 Descriptive Bibliography and Textual Problems (4 cr.).

Eleven credit hours of History courses comprise the Documentary Editing core: HIST H501 Historical Methodology (4 cr.), HIST H543 Internship: Practicum in Public History (4 cr.), HIST H547 Topics in Public History. Specific topic in Historical Editing (3 cr.)

The final 3-4 credit hours required to complete the certificate are elective, and may take the form of a ENG W609 Directed Writing Project or an ENG L590 Internship supervised by the faculty editors of the Institute's resident scholarly editions or a project course or internship approved by the student's certificate advisor.

For the core of the Technical Editing concentration, students take W531 Designing and Editing Visual Technical Communication (4 cr.), W532 Managing Document Quality (4 cr.), and W609 Directed Writing Project. For the final course, it is recommended that students take W525 Research Approaches for Technical and Professional Communication (4 cr.), but other relevant electives are available.

All of these courses will double-count for both the editing certificate and the English M.A. or History M.A. (Electives outside English and History are also available, but these will not normally double-count.) GRE scores are not required for admission to the certificate program, but foreign students are required to take TOEFL and receive a score of 550 or above. Students already admitted to the English or History graduate program can follow a more streamlined admission process.

Due to the unique nature of this program you must contact the program director for an interview before completing the Graduate Online Application. There is an application fee involved; so we do not want you to apply unless you qualify.

Geographic Information Science

Admission Requirements

Admission to the Graduate Certificate in Geographic Information Science requires a baccalaureate degree from an accredited institution with a recommended minimum GPA of 3.0. Appropriate work experience also will be taken into account. Students are required to submit a statement of interest, three letters of recommendation, and an application for admission to the School of Graduate Studies.

Students already admitted into Indiana University or Purdue University graduate programs are automatically eligible to apply to the certificate program. Such students must declare their participation in the certificate program and submit a statement of interest. Admission decisions will be made by the faculty oversight committee.

Course Requirements

Total requirements: 15 credit hours. The minimum grade that will be accepted in any single course is B.

Required courses (9 credits):

1. G535 Introduction to Remote Sensing (3 cr.)
2. G538 Introduction to Geographic Information Systems (3 cr.)
3. G639 Seminar in Geographic Information Science (3 cr.)

Electives (6 credits). Any 2 of the following courses:

- G536 Advanced Remote Sensing (3 cr.)
- G537 Computer Cartography and Graphics (3 cr.)
- G539 Advanced Geographic Information Systems (3 cr.)
- G588 Spatial Statistics (3 cr.)

Museum Studies

The Graduate Certificate in Museum Studies provides students with interdisciplinary training in museum practice and a knowledge of contemporary issues in the museum field. It trains students in specialized aspects of museum practice such as education, exhibit planning and design, collections care, and museum administration by combining museum studies course work with curriculum in other IU schools. Students are given an introduction to the history and philosophy of museums and an opportunity to focus on particular aspects of museum practice.

The graduate certificate may be taken as a freestanding credential or paired with graduate work in another related discipline (e.g., history, philanthropic studies, education, library science, nonprofit management). Because it offers an opportunity to specialize the graduate certificate is also a suitable credential for current museum professionals who wish to enhance their professional training or develop new specialties. For specific requirements and options for cross-listed courses, see the museum studies Web site or meet with an academic advisor.

The Museum Studies Graduate Certificate consists of 18 credit hours of course work, including a required museum studies introductory course (3 cr.), an internship (3 cr.), and a choice of four additional courses (12 cr.) from a list of museum studies courses and electives. All courses must be passed with a grade of B– or above in order to count for the certificate. Electives not on the approved list must be approved by the director of museum studies before registration. Internships must be approved by a faculty advisor prior to registration.

Museum Studies, an interdisciplinary program in the School of Liberal Arts, offers an 18-hour graduate certificate that can be completed as an independent credential or in conjunction with another masters degree. The Museum Studies Program offers courses, including museum

education, exhibit planning and design, visitor studies, and collections management, that are designed to complement discipline-based degrees and to prepare graduate students for professional work in museums In order to complete the certificate while simultaneously completing the M.A. in History, students must be admitted to the graduate programs in history (public history track) and museum studies and complete the requirements for both the degree and the certificate. The following courses may be used to fulfill requirements in both programs.: H543 Internship: Practicum in Public History focused on Museums (4 cr.) will count as an equivalent for MSTD A508. HIST H548 Historic Administration/Museum Administration (3 cr.) counts as an equivalent of MSTD A548. In addition, HIST H542 Public History (4 cr.) and any , HIST H547 Special Topics in Public History (3 cr.) classes are approved electives for the museum studies graduate certificate curriculum, and students may use up to two museum studies courses as electives in their History MA requirements. Students must apply to both programs in order to enroll in this joint M.A. in History/Certificate in Museum Studies program. GRE scores are required for admission to the graduate programs in history and museum studies.

Graduate Certificate Requirements (18 cr.)

•**MSTD A503** Introduction to Museum Studies (3 cr.)

•**MSTD A508** Museum Internship (3 cr.) (or an equivalent internship requirement in another program such as History or Philanthropic Studies provided the proposal and report meet MSTD standards).

•Two core courses (6 cr.) chosen from **MSTD A505, A510, A512, A516,** and **MSTD A548** or **HIST H548**

• Two elective courses (6 cr.) chosen from a list of approved electives, one of which must be a MSTD course

TESOL

The graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) is offered to students who have a baccalaureate degree from an accredited institution and who would like to be trained in teaching English to non-native speakers of English. Students will become familiar with the major theoretical foundations of teaching English as a foreign and second language and acquire experience through practice teaching in authentic ESL classrooms. The student who completes the TESOL certificate will be able to teach ESL and EFL to adult and post-secondary learners in the U.S.A. and overseas. Optional emphasis in English for Specific Purposes (ESP) students may choose to add the optional English for Specific Purposes (ESP) emphasis. ESP Focuses on the teaching of English as a second language for academic, occupational, and professional purposes.

Admission Requirements

1. Students should have a bachelor's degree from an accredited institution, with a minimum undergraduate GPA of 3.0 (on a 4.0 scale) or equivalent, documented by an official transcript. Students with an undergraduate GPA between 2.5 and 3.0 may be conditionally admitted , but must receive a grade of B or better in ENG-G 500, which should be taken as their first class, in order to continue in the program.
2. Students who are non-native speakers of English must have a TOEFL (Test of English as a Foreign Language) score of at least 600 (paper), 250 (computer), or 100 (Internet).
3. Students should provide a personal statement describing their interest and goals in the program.

Course Requirements

The TESOL certificate requires 21 credit hours, including 17 hours of "core" courses and 4 hours of electives. The core courses are:

- ENG-G 500 Introduction to the English Language
- LING-L 532 Second-Language Acquisition
- LING-L 534 Linguistic Resources for TESOL
- ENG-G 541 Materials Preparation for ESL Instruction
- LING-L 535 TESOL Practicum

Students wishing to earn the TESOL certificate with ESP emphasis must take LING-T 600 as their elective course and complete their TESOL Practicum LING-L 535 in an ESP setting.

American Philosophy and Bioethics

Welcome to the homepage for the Department of Philosophy's Graduate Certificate program. This program offers graduate certificates in either American Philosophy or Bioethics. We appreciate your interest in the program and invite you to review the information on this page. We also invite you to contact the graduate director if you have further questions about the program, its curriculum, opportunities for financial support, or application requirements.

Student Consumer Information about this Program

The certificate in American philosophy gives students the opportunity to study in a one-year program at one of the world's premier places for studying American philosophy and especially the thought of Charles Sanders Peirce. IUPUI is home of the Institute for American Thought, which contains the Peirce Edition Project, the Santayana Edition, the Josiah Royce Papers, and the Max H. Fisch Library. Because of the Peirce Edition Project, the Santayana Edition, and the Josiah Royce Papers, three large-scale scholarly ventures to publish the writings of an important American philosopher, IUPUI has extensive resources in American philosophy and a substantial contingent of faculty specializing in this area. The Max H. Fisch Library is a non-lending library specializing in American philosophy and other resources essential for a better understanding of this chapter in philosophy. It attracts a number of scholars each year, as well as graduate students from other institutions who are working on their thesis or Ph.D. dissertation. The Institute for American Thought also houses the Frederick Douglass Papers and the Center for Ray Bradbury Studies.

The certificate in bioethics offers a one-year program of study in a rapidly growing field that requires educated and trained theorists and practitioners. IUPUI is home to one of the nation's largest health-profession complexes, with the nation's second largest school of medicine and largest multi-purpose school of nursing. In addition, the Indiana University Center for Bioethics provides a forum for interdisciplinary research and public outreach.

Students who pursue the graduate certificate in bioethics will have a number of employment opportunities. Some may choose to continue on to a terminal degree (M.A. or Ph.D.) program in philosophy or bioethics, after which they can be expected to compete for research or faculty positions. Others may choose to complete the certificate in concert with a professional degree in medicine, science, nursing, health sciences, or law. Professionals already employed in health-related fields can expect that the certificate will enhance their professional credentials. A graduate certificate in bioethics will be useful to those responsible for policy analysis and development (e.g., on ethics committees), compliance (e.g., in risk management or institutional review-board positions), or teaching and education (e.g., in continuing education programs). This certificate will also be useful to professionals working in legislative or other policy positions.

The graduate certificate program is designed to accommodate a wide variety of students, including:

- International students with an interest in American philosophy or bioethics who have recently completed their M.A. in their home country and are exploring their academic options, like a Ph.D. in philosophy.
- International students who want to do a one-year abroad program at the graduate level. The certificate program can be completed concurrently with research for an M.A. thesis or dissertation.
- Graduate students from other universities who are willing to take a year off from their regular program or who have reached the A.B.D. stage. Most Ph.D. programs have only one specialist in American philosophy or bioethics, making a certificate in either specialty an attractive option for students busy writing their Ph.D. dissertation.
- Students who have completed undergraduate degree and do not yet want to commit themselves to a degree program in philosophy or who want to increase their chances of being admitted into the IUPUI philosophy M.A. or a first-tier graduate program elsewhere.
- People who seek to broaden their philosophical horizon without aiming for a full-fledged graduate degree. A certificate gives graduate non-degree students a well-defined focus of study.
- Students who are enrolled in other graduate programs or post-baccalaureate professional programs at Indiana University and have an interest in philosophy.
- Students in programs that have an (international) exchange program with the IUPUI Philosophy Department or the Institute for American Thought.

The certificate in bioethics also provides a continuing education opportunity for individuals who are already gainfully employed and may have no real need for a full M.A. For example, nurses wishing to move into administrative positions on a hospital ethics committee or institutional review board.

Students enrolled in the IUPUI Philosophy M.A. program are automatically eligible to enroll in either of the graduate certificate programs, thus combining their M.A. degree with a certificate.

Applicants are expected to have a bachelor's degree from an accredited university or its equivalent, with a grade point average of at least 3.0 overall (on a scale of 4) and at least 3.0 in the student's major. There is no specific major requirement, but applicants must show a record of coursework (or equivalent experience) demonstrating that they are sufficiently prepared to do graduate work in philosophy. Acceptable coursework includes an undergraduate degree in philosophy. For their application, students are required to submit in addition to the Graduate School application form: official transcripts, at least one letter of recommendation, and a statement of purpose. Documents not included with the online application form can be sent directly to the Philosophy Department: CA 331, 425 University Blvd., Indianapolis, IN 46202.

Foreign applicants are required to take the Test of English as a Foreign Language (TOEFL). They must also take the IUPUI English (ESL) examination prior to their first semester of coursework and may be required to take additional classes in English as a second language.

Deadlines for receipt of **completed** applications are as follows:

– For applicants seeking admission for the summer or fall semesters.

– For applicants seeking admission for the spring semester.

If you wish to apply after either deadline, please contact the graduate director.

To complete the certificate, students should take fifteen (15) credit hours in the IU system, at least nine (9) of which must be taken at the IUPUI campus and at least nine (9) of which must be offered by the IUPUI Philosophy Department. Unless otherwise stated all courses must be at the 500-level or higher and be completed with a grade B or higher. Students taking the bioethics certificate are required to take P547; students taking the American philosophy certificate are required to take P558. Both are offered each academic year. In addition, students should take nine (9) credit hours in concentration specific courses, while taking the remaining three credit hours either in concentration specific courses or in courses that fall within the M.A. core. Courses taken more than five years prior to completion of the certificate must be retaken or revaluated.

American Philosophy

Fall semester
P558 American Philosophy (3 cr.)
P560 Metaphysics (3 cr.)
P701 Peirce Seminar (3 cr.)

Spring semester
P507 American Philosophy and the Analytic Tradition (3 cr.)
P748 Josiah Royce Seminar (3 cr.)

Bioethics

Fall semester
P547 Foundations of Bioethics (3 cr.)
P540 Contemporary Ethical Theories (3 cr.)
M504 Introduction to Research Ethics (3 cr.)

Spring semester
P555 Ethical and Policy Issues in International Research (3 cr.)
P696 Topics in Biomedical Ethics: Genethics (3 cr.)

Survey Research

The Department of Political Science offers a Graduate Certificate in Survey Research. Its main purpose is to provide students with interdisciplinary training in the evaluation of survey research data, and the implementation of survey research programs.

Program Description

Survey research has expanded with acceleration in the past three decades. It is now widely used across a number of disciplines. For example it is used by medical researchers and public health specialists in epidemiological studies, evaluation of public information campaigns and to assess behavioral and attitudinal risks for disease and injury. It is used by public administrators, in field such as urban planning and criminal justice to evaluate current programs, assess the impact of public safety campaigns and assess citizen support for new developments in public facilities.

Educational leaders use surveys or diverse activities including marketing strategies for higher education institutions and scheduling of classes and transportation for elementary and secondary schools. Attorneys and legal professionals look at the impact of programs and activities on jury selection, perceptions of courtroom behavior and trust/support for new and existing statutes. Business leaders are constantly monitoring the public's attitudes and behaviors in regards to product development, customer satisfaction, marketing strategies and even location of facilities.

Not-for-profit agencies estimate the potential for enlisting volunteers, the potential for fund-raising and effectiveness of fund-raising campaigns. Of course, beyond such applied uses, academicians in many disciplines use survey data to study a broad range of phenomena including financial risk-taking, voting behavior, family satisfaction, medical treatment preferences, and a host of other areas.

Although many people use survey data, few are trained in the twin goals of the Certificate Program-evaluation of the quality of survey data and the implementation of programs of survey research from data collection through analysis. The main objective of this program is to provide a graduate student with such training through an interdisciplinary approach to all aspects of survey research.

Students considering application to the Certificate Program are welcome in the classes (with prerequisites or instructors permission). Up to 9 credit hours earned as a graduate non-degree student or graduate degree student and approved by the program's director may be applied toward the Certificate upon admission to the program.

Students applying for entry into the program should have at least an appropriate bachelor's degree from an accredited institution, and either a minimum undergraduate GPA of 3.0 or sufficient professional standing in employment to indicate their ability to handle the demands of the program. Students who complete the program successfully will receive an Indiana University certificate.

The Certificate in Survey Research Program provides an interdisciplinary approach to survey research in both theory and application. It encompasses a scholarly introduction to sophisticated techniques in survey research and the opportunity for a student to tailor the program to fit within their other graduate work.

Program Requirements

Students will need to complete 15 hours of course work with a grade of B- or better in each course, and a cumulative GPA of at least 2.7. All required and elective courses will be at the 500- or 600-level, no undergraduate courses may be used toward the certificate, and no more than three hours may be transferred from another institution.

Required Core Courses (6 credits)

- *Y567 - Public Opinion: Approaches and Issues (3 cr.)* - An introductory seminar that will discuss all the key approaches, issues and concepts in the field of survey research, allowing students to identify more specific interests that may be further explored in their elective courses.
- *Y590 - Seminar in Survey Research (3 cr.)* - A capstone seminar designed to examine current issues in the application of survey research to public policy. Students will be encouraged to take this course at the end of their program of study. They will be encouraged to share with other students their particular applications to increase the interdisciplinary nature of the seminar.

Elective Courses (9 credits)*

- *Y575 - Political Data Analysis I* - Introduces students to quantitative research methods for studying politics, focusing on topics that are statistical in content or that must be addressed for statistics to make sense. Students who complete the course will achieve a level of statistical competency that will enable them to enroll in courses concerned with multivariate statistical techniques, and will acquire the basic skills of data analysis that are indispensable to the practice of quantitative political science.
- *Y576 - Political Data Analysis II* - Builds on Y575 by familiarizing students with more advanced research methods, such as regression analysis and techniques for dealing with categorical and limited dependent variables. Models to be covered include logit, probit, multinomial logit, ordered probit, duration models and survival analysis. Attention will be directed at the application of these methods to political phenomena and the presentation of the results.

- *Y580 - Research Methods* - This course surveys the major techniques for investigating current political problems. It emphasizes the relationship between theory and practice in understanding and conducting research. It will examine issues in field research essential to a full understanding of a research problem.

*Students will be required to complete nine additional hours, chosen from a group of Primary Courses or Alternates. This list is designed to maximize the flexibility of a program that meets an interdisciplinary demand. They are offered with varying regularity, but the curriculum allows each discipline to adapt its courses to fit student needs in its area.

Alternatives to Y575*

- Public Affairs V506 - Statistical Anaylsis for Effective Decision Making
- Psychology P600 - Statistical Inference
- Public Health H157 - Introduction to Epidemiology

Alternatives to Y576*

- Sociology R559 - Intermediate Sociological Statistics
- Public Health P600 - Epidemiological Research Methods

Alternatives to Y580*

- Health Administration H518 - Statistical Methods for Health Services
- Public Health P601 - Advanced Epidemiology
- Public Affairs V562 - Public Program Evaluation

*Or any other comparable graduate course accepted by the Program Director

Internship Option (3 credits)

As an alternative to one of the electives, students may - with the approval of the Program Director - substitute an internship experience for one of the elective courses. They would have to work with an approved faculty member in completing a research project arising out of placement with an approved commercial research organization or the IU Survey Research Center at Bloomington. It involves a commitment of at least 8 hours per week for one full semester. They would enroll for credit in Y585 - Internship in Survey Research, or a comparable internship course in another department or school, subject to approval by the Program Director.

For more information, and to make enquiries about course equivalencies, contact certificate director Prof. Brian Vargus.

Graduate Programs
The communication studies, economics, English, geography, history, museum studies, philosophy, philanthropy, sociology, and Spanish programs presently offer master's degrees. In addition, virtually all School of Liberal Arts departments offer graduate courses, including certain 300- and 400-level courses that may be taken for graduate credit in programs in the Indiana University Graduate School or the Indiana University School of Education.

Students will not receive graduate credit without the written approval of a graduate advisor and the instructor of the course. Obviously, acceptable performance in the courses is also a condition for receiving graduate credit. In addition, other departments offer graduate course work. See sections on IU graduate programs. In addition, several departments and programs offer graduate certificate programs and minors.

Applied Communication

The Department of Communication Studies offers an M.A. in Applied Communication with concentrations in corporate communication, health communication, media criticism or public communication. This unique applied program provides students with theoretical understanding of communication processes as well as with the competencies and skills necessary to address specific communication issues and problems by applying discipline-specific knowledge. The program readies the advanced student for professional career paths and future academic pursuits.

Program Goals

The overarching goal of this unique program in applied communication is to provide students with the competencies and skills necessary to address specific communication issues and problems that are socially relevant and to suggest or implement change. The primary intellectual goal of the program is to increase our students' understanding of the theoretical implications of discipline-specific knowledge and to enhance their ability to understand and predict human interaction relative to realistic, applied outcomes associated with contemporary social problems. A pratical goal of the program is to train a cohort of the population who will satisfy society's increased need for professionals who grasp the complexities of communication problems and who are able to develop and execute strategies and programs to address such issues.

Requirements for Admission

Applicants should have:

- a bachelor's degree from an accredited college or university, with a minimum GPA of 3.0 (on a 4.0 scale)
- official transcripts from all Universities and Colleges attended
- three letters of recommendation
- a personal statement

In addition, evidence of strong analytical and writing skills, a background in research methods, and experience in the analysis of communication phenomena are highly recommended. The Graduate Record Examination (GRE) General Test with satisfactory scores in the three areas is required for applicants who wish to be considered for University fellowships.

Course Work

The student must maintain a B+ average (3.3) or higher in order to graduate. In addition, the student must pass the comprehensive examination and complete either a thesis or an applied learning project in order to complete the degree requirements.

Degree Requirements

Completion of 36 credit hours, including:

- 12 credit hours of core requirements. These include:
- COMM C500 Advanced Communication Theory
- COMM C501 Applied Communication Research
- One of COMM C502, COMM C530 or COMMC531
- COMM C503 Applied Learning Project, OR COMM C597 Thesis)

- 18 credits of applied communication elective courses
- Students may take as many as 6 credits of approved interdisciplinary course work at the graduate level from outside of the Communication Studies Department;
- Successful completion of comprehensive examinations.

Economics

The Master of Arts program has a twofold objective: (1) to provide students with analytical capabilities and research skills for careers in business, government, and the nonprofit sector; and (2) to prepare those who wish to pursue the Ph.D. at IUPUI, Indiana University Bloomington, or another university.

Admission Requirements

Applicants should have completed a bachelor's degree from an accredited institution. Ordinarily, applicants should have a minimum grade point average of 3.0 on a 4.0 scale in their undergraduate course work and in their previous economics courses. Before undertaking graduate study in economics, a student should have knowledge of intermediate-level undergraduate economic theory (E321 and E322), statistics (E270), multivariate differential and integral calculus (the IUPUI equivalent M 16500 offered by the mathematics department, and finite mathematics (M118). Students with deficiencies in economics and/or mathematics may be admitted on a conditional basis.

The verbal, quantitative, and analytical writing portions of the Graduate Record Examination (GRE) are required and applicants are urged to complete the examination by December of the year before admission.

Three letters of recommendation are required. For students with English as a second language, a minimum TOEFL score of at least 550 is required, higher scores are recommended.

Course Requirements

Students must complete a minimum of 30 credit hours of graduate course work. Twelve (12) credit hours are devoted to the following required core courses: E520 Mathematics of Optimization, E521 Theory of Prices and Markets, E522 Theory of Income and Employment, and E570 Fundamentals of Statistics and Econometrics. These core courses serve as prerequisites for 500-level field courses. The student must also complete six (6) credits of outside field classes in the

mathematics and statistics department, at the graduate level. Consult the department's graduate study guide for a list of acceptable outside courses.

Grades

The student must receive at least a C (2.0) in each course and must average at least a B (3.0 on a 4.0 scale) for all courses taken.

Ph.D. Program

The Ph.D. program is designed to (i) advance knowledge concerning Health Economics and Philanthropy/Nonprofit Economics; (ii) develop the skills essential for our graduates to conduct independent research in these two areas. The two fields for our Ph.D. program are Health Economics and Philanthropy/Nonprofits Economics.

Admission Requirements

Course sequence in univariate and multivariate calculus (equivalent to MATH M16500, M16600, and M26100 at IUPUI.

Linear algebra (equivalent to Math M35100 at IUPUI).

Either a calculus-based undergraduate level course in probability or statistics or any undergraduate statistics course plus a course in introductory econometrics (equivalent to E270 and E470 at IUPUI).

Recommended Coursework includes Intermediate Microeconomic Theory (equivalent to E321 at IUPUI) and the course sequence in Mathematical Analysis (equivalent to Math M44100 and Math M44200 at IUPUI). Additional courses in Economics will also be useful.

Required Testing

Graduate Record Examination (GRE) General Test (Quantitative, Verbal and Analytical Writing). Successful candidates typically have quantitative scores at the 700 level and above and scores below 650 are typically not sufficient for admission. Analytical Writing and Verbal scores can be somewhat lower.

For non-native English speakers who did not attend college in the U.S.: Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Successful candidates must achieve a minimum TOEFL score of 570 (or 230 on the computer version of the test or 88 on the internet version, iBT). Typically successful candidate have scores of 600 or better (250 or better - computer version; 100 iBT). The minimum acceptable IELTS score is 6.5; in practice, we look for an IELTS of 7 or more. It is required that applicants take the academic reading and writing modules, the general training reading and writing modules.

Undergraduate Record

Requirements include a bachelor's degree from an accredited college or university, a minimum 3.0 grade point average on a scale of 4, and a minimum 3.0 average in the major field. In unusual circumstances, if the minimum GPA requirement is not met, a conditional admittance could be considered.

Applications will be viewed in their entirety wherein a candidate's outstanding qualifications in one area can be balanced against more marginal qualifications in another dimension. However, admission is competitive and financial support even more competitive. Most of the students admitted and supported will exceed the minimal requirements.

English

The graduate English program has been designed to prepare students for careers in the analysis and production of texts. The program covers issues and skills in reading and writing, in the richest sense of these words—in order to prepare students to address these issues and to teach these skills. Graduates of the program should be prepared for such careers as teaching writing and literature; teaching English as a second language; and writing for business, government, and other professions. In contrast to traditional M.A. programs, which place heavy emphasis on literary history, the IUPUI program focuses on the application of English studies to contemporary situations and problems.

Grades

M.A. students must maintain a minimum grade point average of 3.0 (B).

Course Requirements

The M.A. in English has two options: thesis and non-thesis.

Thesis Option (36 cr.)

Core courses (8 cr.)

Choose two:

ENG G500 Introduction to the English Language
ENG W509 Introduction to Writing and Literacy Studies
ENG L506 Introduction to Metods of Criticism and Researching
Electives (24 cr.)

Choose at least six courses in consultation with a faculty advisor for a total of 24 credit hours. These 24 hours may include a third core course and up to 8 credit hours of Internship.

Thesis Credits (4 cr.)

ENG L699 Thesis Credits (4 cr.)

Non-Thesis Option (40 cr.)

Core Courses (8 cr.)

Choose two:

ENG G500 Introduction to the English Language
ENG W509 Introduction to Writing and Literacy Studies
ENG L506 Introduction to Methods of Criticism and Research
Electives (32 cr.)

Choose at least eight courses in consultation with a faculty advisor for a total of 32 credit hours. These 32 hours may include a third core course and up to 8 credit hours of Internship.

Foreign Language Requirements

There is no foreign language requirement, but M.A. students going on for the Ph.D. are encouraged to validate their reading proficiency in a foreign language according to University Graduate School standards.

Geographic Information Science

Master of Science in Geographic Information Science

Course Requirements

All students must complete a minimum of 30 credit hours as follows:

Any 3 of the following courses (9 credits):

- GEOG G535 Introduction to Remote Sensing (3 cr.)
- GEOG G537 Computer Cartography and Graphics (3 cr.)
- GEOG G538 Introduction to Geographic Information Systems (3 cr.)
- GEOG G588 Spatial Statistics (3 cr.)

Two required courses (7 credits):

- GEOG G639 Seminar in Geographic Information Science (3 cr.)
- GEOG G560 Internship in Geographic Analysis (4 cr.)

An independent research project or a thesis (3-6 credits):

- GEOG G645 Research Papers in Geography (3 cr.) or
- GEOG G850 Masters Thesis (6 cr.)

Electives in GIS or complementary field (8-11 credits)

For additional information about Geographic Information Science programs at IUPUI, please refer to the IUPUI Geography Web site (www.iupui.edu/~ geogdept) or contact:
Rudy Banerjee, Ph.D.
Graduate Director and Chair
Department of Geography
Indiana University – Purdue University Indianapolis

E-mail: rbanerje@@.

History

Admission

To be admitted to the Master of Arts degree program, students must have:

- a bachelor's degree from an accredited college or university, with a minimum overall undergraduate grade point average of 3.0 (B) and a minimum grade point average of 3.0 (B) in the student's undergraduate major (an undergraduate major in history is not required, but applicants without such a background may be required to take additional course work in history at the undergraduate level as a condition for acceptance into the program);
- an appropriate level of achievement on the Graduate Record Examination (GRE) General Test; and three letters of recommendation.

Grades

No grade below B– (2.7) in history courses will be counted toward this degree.

Course Requirements

Students pursuing any one of the three concentration areas must take H500 or H501. Those selecting United States history must take at least one graduate colloquium and one graduate seminar in United States history and at least one course in non–United States history. Students selecting European history must take a graduate colloquium and seminar in that area and at least one course outside their concentration. With the consent of their faculty advisor, students may take as many as 6 credits outside the Department of History. Six credits will be granted upon successful completion of the required master's thesis. A total of 30 credit hours is required for students concentrating in United States or European history.

Students choosing public history as their area of concentration must take H500 or H501, H542, a colloquium and seminar generally in United States history, and do an internship. Four credits will be granted upon satisfactory completion of the internship project. Public history students must also take at least one course outside United States history. With the consent of their faculty advisor, they may take as many as 6 credits outside the Department of History. A minimum of 36 credit hours is required for students concentrating in public history.

Foreign Language Requirement

There is no foreign language requirement for the degree per se. However, those students who will incorporate foreign language documents and scholarship in their graduate work (especially those concentrating in European history) will be expected to translate non-English sources. They must thus demonstrate an appropriate level of competence in the relevant language before they begin work on their thesis. The director of graduate studies and the student's advisor may require the student to take additional coursework.

All students concentrating in European history should expect to demonstrate competence in a foreign language, ideally upon application to the program. (Competence is defined as two years of undergraduate course work with a grade of B or better in the final semester, or demonstration of an equivalent reading proficiency in an approved foreign language exam.) Students considering the possibility of going on for a Ph.D. should recognize that competence in at least one and sometimes two foreign languages is often a requirement in history doctoral programs.

Combined Master of Library Science and Master of Arts in History

Study for these two degrees can be combined for a total of 53 credit hours rather than the 66 credit hours required for the two degrees taken separately. Students take 23 credit hours in history, which must include History H547 (Archives), one graduate seminar, and one graduate colloquium. No thesis is required for students earning an M.A. in history who are also earning a master's degree in library science under this dual degree program. No area of concentration is required, but students wishing to focus on public history for the M.A. in history must also include H542 among the required 23 credit hours of history course work. Such students may, if they wish, do a public history internship and count a maximum of 2 credit hours of H543 toward the degree. (Students may enroll in H543 only after having taken or while taking H542).

The remaining 30 credit hours are library science courses as detailed in the Bulletin of the School of Library and Information Science. Admission to each of the two master's programs is approved separately on the same basis as for other applicants not in the combined program.

Combined Master of Arts in History and Philanthropic Studies

The dual M.A. in history and philanthropic studies creates a unique opportunity to pursue critical inquiry into the historical, cultural, philosophical, and economic implications of voluntary action for the public good. Historians routinely study the role of nonprofit organizations, self-help groups, and philanthropic institutions. This dual-degree program offers an interdisciplinary focus on the past, present, and future. This

degree will be attractive to students wishing to pursue (1) careers that demand the skills and talents developed by cross-training in history and philanthropy, or (2) doctoral programs that encourage new and creative approaches to the historical study of philanthropy, broadly defined.

Admission requirements for the dual-degree program are identical to those for each program separately. A separate application must be made to each of the programs. Prospective students are expected to take responsibility for learning about and meeting the different admission requirements and deadlines of each department. Students must make plans early with advisors in both programs to identify common courses and a thesis topic.

Study for these two degrees can be combined for a total of 51 credit hours (U.S. or European history concentrations) or 54 credit hours (public history) rather than the 66 or 72 credit hours that would be required if the two degrees were taken separately. For all concentrations, the required 700-level seminar for the M.A. in history may be selected as an elective to meet the philanthropic studies requirement for one of two theoretical electives. The required philanthropic studies course H509 History of Philanthropy in the West or H516 History of Philanthropy in the United States may be taken to meet a history elective. Required course PHIL P542 Ethics and Values of Philanthropy or PHST P512 Human and Financial Resources for Philanthropy may be taken to meet 3 of the 6 credits of outside electives that may be taken in the history program. For public history students, HIST H543 Practicum meets the requirement for PHST P590 Internship for the philanthropic studies program. A common thesis meets the requirements of both departments. See the departmental director of graduate studies for more information about this dual degree.

Museum Studies

The Master of Arts in Museum Studies curriculum (36 credit hours) consists of a required introductory course, a set of integrated core courses which provide a broad-based interdisciplinary training in museum practice, and a choice of elective courses that allow the student to develop a particular specialty. The course work is complemented by an internship that provides an opportunity for an intensive applied learning experience in a museum. The interdisciplinary curriculum and flexible structure allow students to achieve either a generalist breadth suitable for those working in smaller museums or to focus on a particular area of museum practice appropriate for a specialist on the staff of a larger museum.

Team-based and applied projects form a core learning experience in all classes and present opportunities to work with community partners as well as peers in the program. Team projects such as exhibit development and visitor studies prepare students for the collaborative approach that is central to the museum field.

All courses must be passed with a grade of B– or above in order to count for the certificate. Electives not on the approved list must be approved by the director of museum studies before registration. Internships must be approved by a faculty advisor prior to registration. The requirements for the M.A. were revised in May 2007. Students beginning the program prior to August 2007 may complete their degree following either the old requirements or the new ones and should meet with their academic advisors to discuss their options and file a curriculum plan with the museum studies office.

M.A. Requirements (36 cr.)

- MSTD A503 Introduction to Museum Studies (3 cr.)
- Core courses (12 cr.) MSTD A510, A512, A516, and MSTD A548 or HIST H548
- MSTD A508 Museum Internship (6 cr.)
- MSTD A530 Museum Colloquium (3 cr.)

Electives (12 cr.)

Approved electives from other departments (see Web site for current schedule)

- ANTH P340/MSTD A560 Modern Material Culture (grad. section course # TBA) (3 cr.)
- ANTH E320 Indians of North America (grad. section course # TBA) (3 cr.)
- ANTH A401 Cultural Resources Management (grad. section course # TBA) (3 cr.)
- ECON E514 The Nonprofit Economy and Public Policy (3 cr.)
- EDUC H520 Education and Social Issues (3 cr.)
- EDUC H530 Philosophy of Education (3 cr.)
- EDUC P514 Lifespan Development (3 cr.)
- EDUC P640 Thinking and Learning in Social Contexts (3 cr.)
- HER R511 Visual Culture (3 cr.)
- HER Y501 Design I (3 cr.) [MSTD course numbers TBA]
- HER Y502 Design II (3 cr.) [MSTD course numbers TBA]
- HIST H542 Introduction to Public History (4 cr.)
- HIST H547 Special Topics in Public History: Archival Practices (3 cr.)
- HIST H547 Special Topics in Public History: Historic Site Interp. (3 cr.)
- HIST H547 Special Topics in Public History: Historic Preservation (3 cr.)
- PHST P512 Human and Financial Resources for Philanthropy (3 cr.)
- PHST P521 The Nonprofit and Voluntary Sector (3 cr.)
- PHST P542 Ethics and Values of Philanthropy (3 cr.)
- SLIS L505 Organization and Rep. of Knowledge and Information (3 cr.)
- SLIS L528 Collection Development and Management
- SLIS L566 Digital Libraries (3 cr.)
- SPEA V522 Human Resource Mgmt. in Nonprofit Organizations (3 cr.)
- SPEA V525 Management in the Nonprofit Sector (3 cr.)
- SPEA V526 Financial Management for Nonprofit Organizations (3 cr.)
- SPEA V557 Proposal Development and Grant Administration (3 cr.)

See the Museum Studies Web site for a current list of approved electives and new courses.

Philanthropic Studies

The Master of Arts in Philanthropic Studies focuses on the history, culture, and values of philanthropy. Its objectives are: to enable students to gain the knowledge and skills either to pursue further graduate study in relevant fields or to pursue careers in the independent sector or in related fields; to enable students to investigate the broader theoretical issues of philanthropy and of their chosen areas of specialization from a variety of disciplinary and interdisciplinary perspectives; and to utilize the interdisciplinary base to maintain a thorough critical inquiry into the historical and cultural implications of philanthropy.

Admission

Requirements include a bachelor's degree from an accredited college or university, a minimum grade point average of 3.0 on a scale of 4.0, and a minimum grade point average of 3.0 in the student's major field. In addition, students seeking admission to the program should demonstrate an appropriate level of achievement on the Graduate Record Examination (or comparable proficiency test), and must arrange for three letters of recommendation to be addressed to the M.A. Program Admissions Committee.

Applicants who do not meet all of the requirements listed above may be admitted to the program on a provisio*nal basis, in which case their status will be reviewed after a fixed period of time to determine whether they may continue in the program.*

Application Deadlines

Those students who are not U.S. citizens must submit their application materials no later than **January 1**. Students seeking financial aid must apply by **February 1**. The priority deadline for all others is **April 15**, but the Center will accept applications until**July 15, if space is available.**

The deadline for Spring admission is **November 15**. International applicants must apply by **October 15.**

Please note: Spring admission is only recommended for applicants who have completed SPEA V521/PHST P521, "The Nonprofit and Voluntary Sector" course OR any equivalent graduate level introductory course in Nonprofit Management or Philanthropic studies from another university. If you have any questions about this policy, please contact Student Services, pessmith@iupui.edu

Scholarships and financial aid

Fellowships, scholarships, and graduate assistantships are available. Please contact Student Services at the Center on Philanthropy. For a complete listing of fellowships and scholarships please visit the Web site at http://www.philanthropy.iupui.edu.

Curriculum

The M.A. in Philanthropic Studies requires a total of 36 credit hours. This includes 18 credit hours of core courses, 9 credit hours of elective courses, and 6 credit hours of thesis or additional courses. A minimum of 18 credit hours in core and elective courses combined must be in the School of Liberal Arts at IUPUI, and not more than 9 credit hours may be taken in courses numbered below 500. These 9 credit hours may come only from courses approved for Graduate School credit. In addition, the student earns 6 credit hours either for a thesis on a topic approved by the M.A. Program Advisory Committee or for graduate-level courses in a field in which future study is planned. The approval process for the thesis or its alternative normally takes place after a student has successfully completed 15 credit hours of course work.

In order to earn the M.A. in philanthropic studies, students must maintain a minimum GPA of 3.0 on a scale of 4.0. Grades in courses counting for credit toward this degree may be no lower than C (2.0 on a scale of 4.0).

The 18 credit hours of core courses normally include Philanthropic Studies P521 The Nonprofit and Voluntary Sector; Philanthropic Studies P523 Civil Society and Philanthropy; History of Philanthropy H516 History of Philanthropy in the U.S; Philosophy P542 Ethics and Values of Philanthropy ; and Philanthropic Studies P590 Internship in Philanthropic Studies. In addition, students will take one of the following: Philanthropic Studies P530 Cross-Cultural Dimensions; SPEA V524 Civil Society in Comparative Perspective; or Religion R590 Religion and Philanthropy. Also, students must take either Economics E514 The Nonprofit Economy and Public Policy or Philanthropic Studies P535 Law of Nonprofit Organizations, as well as P600 M.A. Thesis in Philanthropic Studies if completing a thesis (6 cr.).

Dual Degrees

The philanthropic studies program has developed dual-degree opportunities with several schools and departments. When approved, a dual degree provides a student with a program of study that leads to the M.A. in philanthropic studies and a master's degree in another discipline. Students must apply separately and simultaneously for a dual degree.

- Economics (M.A. in Economics)
- History (M.A. in History)
- Nursing (M.S. in Nursing Administration)
- School of Library and Information Sciences (M.L.S.)
- School of Public and Environmental Affairs (M.P.A.) in Nonprofit Management)
- Library Science (M.S. in Library Science)

For more information, contact Student Services in the Center on Philanthropy at (317) 278-8911.

Executive M.A. in Philanthropic Studies Program

Many students interested in the M.A. program are unable to attend on a traditional residential basis because of the distance from Indianapolis and their ongoing job responsibilities. To provide access to the M.A. in Philanthropic Studies at Indiana University for this growing constituency, the executive master's program was established in 1996. A participant in the executive master's program can finish the requirements for the degree usually in three years by completing an orientation before the first day of classes; six or seven intense one-week sessions of residential study at IUPUI; distance education and directed off-site course work; and elective study at a qualified institution near the student's home.

Normally, each summer course requires one week of intense on-campus study and is preceded by a preresidential period of approximately six weeks that includes preparatory reading and assignments. Each session is followed by a postresidential period that includes evaluative experiences

to be completed at home. During both the preresidential and postresidential periods, faculty work with students by telephone, e-mail, fax, and mail.
Applicants for the executive program are not required to take the GRE. Otherwise the admission criteria are the same as for those applying for the residential program with the addition of three to five years of work experience in the nonprofit sector. Deadline dates for admission are January 1 for non–U.S. citizens and February 1 for U.S. citizens.

For more information, contact the Center on Philanthropy, (317) 278-8911, or visit the Web site at http://www.philanthropy.iupui.edu.

Doctor of Philosophy in Philanthropic Studies

Doctor of Philosophy in Philanthropic Studies

Philanthropic studies is a field of inquiry built upon an interdisciplinary theoretical examination of philanthropy, while also providing an understanding of the individual side of philanthropic behavior and the structures that support voluntary activity. The interdisciplinary approach to philanthropic studies allows for the treatment of the distinct characteristics of philanthropy and the nonprofit sector. The methodologies of the social sciences, the humanities, and professional disciplines are applied to understanding the processes of giving and volunteering and of volunteer involvement and fundraising from the organizational perspective. Research in this field will build the knowledge base and inform the practice of fundraising; grant-making; volunteer involvement; and leadership in nonprofit, public, and private philanthropic organizations and other public service programs. Moreover, this program analyzes the role that philanthropy and nonprofit organizations play in influencing societal ethics and values that support “civil society.”

The primary goal of the Doctor of Philosophy in Philanthropic Studies at Indiana University is the preparation of researchers and scholars who will provide leadership in the profession of philanthropy, higher education, and nonprofit organizations.

Upon completion of the Ph.D. in philanthropic studies, graduates will be able to

Credits

A minimum of 90 credit hours is required; a maximum of 30 credit hours may be transferred from other graduate work in philanthropic studies and related areas. All courses credited toward the Ph.D. degree must have a minimum grade of B and receive written approval of the Ph.D. Program Committee or its representative.

Admission Requirements

- Formal application to Ph.D. program
- Official undergraduate and graduate transcripts
- Grade of B or higher on all courses applied to requirements
- GRE test scores
- Three letters of reference
- Current curriculum vitae
- Three-page essay summarizing professional goals and proposed research area
- An interview (telephone, electronic, or in person) with members of Philanthropic Studies Doctoral Committee

Research Opportunities

Primary areas of faculty research expertise include:

- Philanthropic history and traditions; role of philanthropy in civil society; community-based studies of philanthropy
- Management and measurement of philanthropic resources; governance issues of philanthropic institutions and nonprofit organizations
- Foundations similarities and differences; corporate philanthropy
- Forces influencing giving and volunteering in families over time
- Costs and benefits of fund raising campaigns

Course Requirements

- Four Philanthropic Studies core seminars (12 credits)
- PHST 660 Ethical, Moral, and Religious Aspects of Philanthropy
- PHST 662 Historical and Cultural Perspectives of Philanthropy
- PHST 664 Role of Philanthropy and Nonprofit Organizations in Society
- PHST 790 Research Seminar in Philanthropic Studies

- Four External Minor courses (12 credits)
- Research Methods (9 credits)
- Open electives (6 credits)
- Dissertation (21 credits)

Advisory Committee

All students in the Ph.D. program, with the approval of the program director, will select an advisory committee of three faculty members, one of whom will represent the student’s area of specialization outside the Center on Philanthropy.

Qualifying Examination

A written qualifying examination is required for admission to doctoral candidacy. The focus and scheduling are determined by the student’s advisory committee.

Dissertation Requirements

After nomination to candidacy, the student, with the approval of the program director, will select a research committee of no fewer than three faculty members, including an outside member. The committee must approve the proposed dissertation topic. The dissertation involves an original piece of research and oral defense.

Full Time or Part Time

The program is available for both full- and part-time students.

Length of Study

On average, one should expect five years to completion , depending on full- or part-time study and dissertation topic.

Financial Support Opportunities

A variety of financial resources are available for Ph.D. students, including university fellowships, philanthropy scholarships, research assistantships, teaching assistantships, and loans. Information about financial resources for Ph.D. students may be obtained from the Student Services office.

Philosophy

Master of Arts in Philosophy (M.A.)

The philosophy M.A. program includes courses in core areas of philosophy plus concentrations in either bioethics or international research ethics. For information concerning the curriculum and how to apply, visit www.iupui.edu/~philosop/ma.htm. Questions may be addressed to the graduate director: Jason Eberl, jeberl@iupui.edu, (317) 278-9239.

Admission Requirements

Applicants are expected to have a bachelor's degree from an accredited university or its equivalent, with a grade point average of at least 3.0 overall (on a 4.0 scale) and at least 3.0 in the student's major. There is no specific major requirement, but applicants must show a record of course work (or equivalent experience) demonstrating that they are sufficiently prepared to do graduate work in philosophy. For applicants interested in the bioethics or international research ethics tracks, professional training or experience involving health care ethics may be accepted in lieu of course work. Applicants must also show an appropriate level of achievement on the Graduate Record Examination (GRE) General Test.

Course Requirements

Students are required to take a minimum of 30 credit hours, at least 18 of which must be in philosophy. Students take core philosophy courses, concentration-specific courses (if enrolled in the bioethics or international research ethics tracks), and electives. Students in the general program or bioethics concentration may apply to complete a 6 credit hour thesis or research project. Students in the international research ethics concentration must complete a capstone research project. The program is designed to accommodate the needs of both full-time and part-time students.

- The general M.A. curriculum can be found at http://liberalarts.iupui.edu/philosophy/index.php/programs/ma_curriculum.
- Students must complete a minimum of thirty (30) credit hours, of which at least eighteen (18) must be in philosophy.

Grade Requirements

No course with a grade lower than a B (3.0) will count toward this degree.

Residency Requirement

Students must attend and complete the courses at IUPUI, excepting those courses accepted for transfer. At least fifteen (15) credit hours must be taken at IUPUI.

Transfer Credits

Candidates may transfer up to eight (8) hours of graduate credit for courses taken at other accredited institutions, provided the grades received were B (3.0) or higher and the courses were completed within the time limit prescribed by the Graduate School. The transfer is not automatic and must be approved in writing by the Director of Graduate Studies and the Dean of the Graduate School. For time restrictions on transfer credits, see the section on time limits below. In addition to these eight (8) hours, graduate courses taken at other Indiana University campuses may be counted toward the M.A. if pre-approved in writing by the director.

Time Limits for Completion of Degree

The normal course load each semester for full-time students is a minimum of eight (8) credit hours. Part-time students take only one or two courses per semester. The minimum full-time equivalency for students holding an assistantship or internship is six (6) credit hours per semester. International students must take at least eight (8) credit hours each fall and spring semester to meet visa requirements. Students who carry a full academic load can complete the program in two calendar years.

The requirements for the degree must be completed within five consecutive years. Transfer credits also fall within this five-year limit.

Any courses that have been completed more than five (5) years before the degree is completed must be revalidated if they are to count toward the M.A. Revalidation requires the administration of an oral exam.

Students in the combined/dual degrees programs (J.D./M.A., M.D./M.A., M.P.H./M.A.) must complete both degrees within six (6) consecutive years and both degrees must be awarded simultaneously.

Module 1 – Philosophy Core (15 cr.)

History (at least 6 cr.)

P5xx Ancient Philosophy (3 cr.) [new course] P515 Medieval Philosophy (3 cr.) P522 Topics in the History of Modern Philosophy (3 cr.) P5xx Contemporary Philosophy (3 cr.) [new course] P558 Classical American Philosophy (3 cr.)

Topics (at least 6 cr.)

P514 Pragmatism (3 cr.) P540 Ethical Theories (3 cr.) P543 Social and Political Philosophy (3 cr.) P553 Philosophy of Science (3 cr.) P560 Metaphysics (3 cr.) P562 Theory of Knowledge (3 cr.)

Module 2 – Electives (15 cr.)

P503 Semiotics of C.S. Peirce (3 cr.) P520 Philosophy of Language (3 cr.) P525 Topics in the History of Philosophy (3 cr.) E.g., Niccolò Machiavelli, Francis Bacon, Thomas Aquinas P542 Ethics and Values of Philanthropy (3 cr.) P545 Legal Philosophy (3 cr.) P552 Philosophy of Logic (3 cr.) P561 Philosophy of Mind (3 cr.) P572 Philosophy of Religion (3 cr.) P600 Topics in Philosophy (3 cr.) E.g., Philosophy of Text, Philosophy of Literature, Philosophy of Medicine, Philosophy of Biology, Feminism and Art, Persons and Personal Identity, Scientific Inference and Scientific Realism P701 Peirce Seminar (3 cr.) P730 Seminar in Contemporary Philosophy (3 cr.) P748 Seminar in American Philosophy (3 cr.) E.g., Josiah Royce, John Dewey, George Santayana, William James on Religious Experience Plus any PHIL course offered in the Bioethics concentration.

Thesis option: Students may petition to write a thesis (P803, 6 cr.) under certain circumstances. They must

secure permission from their graduate director and three faculty members who are willing to constitute a thesis committee. Students who receive permission to write a thesis need only take 9 cr. of coursework in Module 2.

- The curriculum for the bioethics concentration can be found at http://liberalarts.iupui.edu/philosophy/index.php/programs/bioethics_curriculum.

Bioethics Curriculum

Module 1: Philosophy Core (6 cr. required)

1. Required foundational course:

PHIL P540 Contemporary Ethical Theories (3 cr.)

2. Core electives:

PHIL P525 Topics in the History of Philosophy (3 cr.)
PHIL P543 Contemporary Social and Political Philosophy (3 cr.)
PHIL P553 Philosophy of Science (3 cr.)
PHIL P560 Metaphysics (3 cr.)
PHIL P562 Theory of Knowledge (3 cr.)

Module 2: Concentration specific courses (18 cr. required)

1. Required foundational course:

PHIL P547 Foundations of Bioethics (3 cr.)

2. Concentration specific electives:

2a. Areas of central importance (5 cr. required):

PHIL P548 Clinical Ethics Practicum (3 cr.)
LAW DN838 Bioethics and Law (2 cr.)
MHHS M504 Introduction to Research Ethics (3 cr.)

2b. Specialized electives:

ANTH E445 Medical Anthropology (3 cr.)
COMM C510 Health Provider-Consumer Communication (3 cr.)
HIST H546 History of Medicine (3 cr.)
*LAW DN761 Law and Public Health (2 cr.)
*LAW DN845 Financing and Regulating Health Care (3 cr.)
NURS N534 Ethical/Legal Perspectives in Advanced Nursing Practice (2cr.)
PHIL P549 Bioethics and Pragmatism (3 cr.)
PHIL P555 Ethical and Policy Issues in International Research (3 cr.)
PHIL P590 Intensive Reading (1-3 cr.) [Only with track specific content]
PHIL P600 Topics in Philosophy (3 cr.) [When content is track specific]
PHIL P696 Topics in Biomedical Ethics (3 cr.)
PHIL P730 Seminar in Contemporary Philosophy (3 cr.) [When content is track specific]
SOC R515 Sociology of Health and Illness (3 cr.)
SOC S560 Topics: Death and Dying (3 cr.)

Module 3: Thesis/Research Project or Non-Thesis Option (6 cr. required)

For students writing a thesis or research project:

PHIL P803 Master's Thesis in Philosophy

Non-thesis option: In lieu of a 6 cr. thesis or research project, students may take 6 credits of additional courses selected from any of the graduate courses offered in the IUPUI Department of Philosophy.

* Students not in the JD/MA combined-degrees program must take LAW DN838 Bioethics and Law prior to enrolling in any other LAW electives.

Sample Curriculum

First Semester PHIL P547 Foundations of Bioethics (3 cr.)
MHHS M504 Introduction to Research Ethics (3 cr.)
PHIL P540 Contemporary Ethical Theories (3 cr.)
Second Semester SOC R515 Sociology of Health and Illness (3 cr.)
PHIL P553 Philosophy of Science (3 cr.) PHIL P555 Ethical and Policy Issues in International Research (3 cr.) **Third Semester**
HIST H546 History of Medicine (3 cr.)
PHIL P548 Clinical Ethics Practicum (3 cr.) **Fourth Semester** PHIL P803 Master's Thesis in Philosophy (6 cr.)
... OR ...
PHIL P560 Metaphysics (3 cr.) & PHIL P600 Topics in Philosophy (3 cr.)

- The curriculum for the international research ethics concentration can be found at http://bioethics.iu.edu/education/irema/curriculum-structure/.
- 10 cr. Core courses
- 12 cr. Concentration-specific electives
- 8 cr. Capstone research project

- Students must complete a minimum of thirty (30) credit hours, of which at least eighteen (18) must be in philosophy.

Grade Requirements

No course with a grade lower than a B (3.0) will count toward this degree.

Residency Requirement

At least fifteen (15) credit hours must be taken at IUPUI.

Transfer Credits

Candidates may transfer up to eight (8) hours of graduate credit for courses taken at other accredited institutions, providing the grades received were B (3.0) or higher and the courses were completed within the time limit prescribed by the Graduate School. The transfer is not automatic and must be approved in writing by the Director of Graduate Studies and the Dean of the Graduate School. For time restrictions on transfer credits, see the section on time limits below. In addition to these eight (8) hours, graduate courses taken at other Indiana University campuses may be counted toward the M.A. if pre-approved in writing by the director.

Time Limits for Completion of Degree

The normal course load each semester for full-time students is a minimum of eight (8) credit hours.

Part-time students take only one or two courses per semester. The minimum full-time equivalency for students holding an assistantship or internship is six (6) credit hours per semester. International students must take at least eight (8) credit hours each fall and spring semester to meet visa requirements. Students who carry a full academic load can complete the program in two calendar years.

The requirements for the degree must be completed within five consecutive years. Transfer credits also fall within this five-year limit. Any courses that have been completed more than five (5) years before the degree is completed must be revalidated if they are to count toward the M.A.

Combined Degrees

There are combined-degree programs in law and philosophy (J.D./M.A.), medicine and philosophy (M.D./M.A.), and public health and philosophy (M.P.H./M.A.). In each case, the M.A. in philosophy would be with a concentration in either bioethics or international research ethics. For information on these programs visit http://liberalarts.iupui.edu/philosophy/index.php/programs/ma_combined.

Sociology

The Master of Arts program is specifically designed to prepare its students for conducting applied and policy-oriented research, and to equip those already in the workforce with the critical skills necessary for assessing and applying sociological knowledge in their everyday responsibilities. The program of study culminates in either an internship or thesis experience. The program is designed to accommodate the needs of both full- and part-time students. Currently, the program features three formal areas of concentration: family/gender studies, medical sociology, and work/organizations.

Admission Requirements

Applicants must have a baccalaureate degree from an accredited U.S. institution, or a certifiable foreign equivalent, with a grade point average of 3.0 (on a scale of 4.0). Applicants should have completed five undergraduate sociology courses (or approved equivalents, with no more than two of the latter), with a grade point average of at least 3.0. In addition, two samples of writing (a 750-word essay required by the IU Graduate School and a sole-authored report or term paper required by the sociology department), official transcripts, and three letters of reference must accompany the application. The GRE general test is strongly recommended and required for some funding considerations. Foreign applicants are required to score at least 550 on the Test of English as a Foreign Language (TOEFL). Students not meeting these requirements may be admitted on probation, or they may be required to enroll in courses as a graduate nondegree student to complete the prerequisites. Please see Web site for admissions amd funding deadlines.

Degree Requirements

36 credit hours, distributed as follows:

- 12 credit core
- R551 Quantitative Research Methods (3 cr.)
- R556 Advanced Sociological Theory I(3 cr.) or R557 Advanced Sociological Theory II (3 cr.)
- R559 Sociological Statistics (3 cr.)
- R659 Qualitative Methods in Sociology (3 cr.)
- 12 credits in an area of concentration (family/gender studies, medical sociology, or work/organizations)
- 6-9 credits of electives
- 3-6 credit internship or thesis

Grades

In order to earn the M.A. in sociology, students must maintain a minimum GPA of 3.0 on a 4.0 scale. Grades in courses counting for credit toward this degree may be no lower than C (2.0 on a 4.0 scale).

Course Load

The normal course load for full-time students is 3 courses (9 credit hours) each semester. For part-time students it is 1-2 courses (3-6 cr.) each semester. Course loads may vary for students with assistantships and fellowships.

Transfer Credits

The Graduate School limits transfers from other institutions to 8 credits with a grade of B or higher. Graduate work with a grade of B or higher obtained from other IU locations may be applied toward an M.A. in sociology. Requests for transfer credit from other graduate institutions will be evaluated for acceptance by the graduate committee after a student has been admitted into and completed 6 credits in the IUPUI sociology M.A. program. The department requires the last 18 credits be completed in its program.

Time Limit

Students must complete all requirements for the M.A. degree within five years.

Financial Aid

Stipends of various amounts for teaching and research assistantships are available. Please contact the Department of Sociology for more information.

Anthropology

The Master's of Arts in Applied Anthropology offers students the opportunity to use anthropological theories and methods toward the goals of solving real world problems. The program is constructed around a set of core courses together with independent research and internships. The degree takes advantage of our long-standing departmental strengths in Public Archaeology, Urban Anthropology, International Development, Globalization, Medical Anthropology and Museum Studies.

Students may choose to follow a targeted curriculum, focusing on a particular aspect of the discipline; all students will also be well-trained in a broad range of anthropological approaches. This integration of three of the four sub-fields in Anthropology (Archaeology, Biological Anthropology and Cultural Anthropology) makes this program distinctive among graduate programs in Applied Anthropology. Another notable feature of the program is its emphasis on civic engagement and community collaboration in student and faculty research.

Specifically, the program will:

1. Offer residents of central Indiana the opportunity to undertake graduate work in applied anthropology at an urban, public university;
2. Provide additional skills and expertise to those employed in such areas as social work, urban planning, community organizing, public health, community nursing and cultural resource management;

3. Provide a foundation for students who wish to pursue a PhD in Anthropology from another institution.

Program Requirements

The MA in Applied Anthropology will require 36 hours, including a core curriculum consisting of 6 credits of Required Core Courses (Fundamentals of Applied Anthropology; Anthropological Thought); 3 credits of a Methods Course in the students' sub-disciplinary area; 21 credits of Elective Courses and 6 internship or thesis credits. Course electives many be chosen both from within and outside of Anthropology including appropriate cognate courses from programs that are already well-developed at IUPUI including Museum Studies; Urban Policy (SPEA); Urban Education; Geographic Information Systems (GIS); Community Nursing and Public History.

Required Core Courses (6 cr.)

- Fundamentals of Applied Anthropology
- Anthropological Thought

Methods Courses (3 cr. *choose at least one of the following*)

- Field Methods in Ethnography
- Theory and Method in Biological Anthropology
- Archaeological Method and Theory ***or*** participation in a summer archaeological field school

Electives (21 cr. *select seven of the following*)*

Archaeology Courses

- Community Archaeology (3 credits)
- Prehistory of North America (3 credits)
- Ancient Civilizations of Mesoamerica (3 credits)
- The Rise of Civilization (3 credits)
- Historical Archaeology (3 credits)
- Modern Material Culture (3 credits)

Biological Anthropology Courses

- Human Variation (3 credits)
- The Anthropology of Human Nature (3 credits)
- Osteology (3 credits)
- Human Growth and Development (3 credits)
- Medical Anthropology (3 credits)
- Paleoanthropology (3 credits)

Cultural Anthropology Courses

- Cultural Areas and Ethnic Groups (variable title) (3 credits)
- Indians of North America (3 credits)
- Modern Greece: Images and Realities (3 credits)
- Cultures of the Pacific (3 credits)
- Urban Anthropology (3 credits)
- African Diaspora (3 credits)
- Women in Developing Countries (3 credits)
- Wealth, Exchange, and Power in Anthropological Perspective (3 credits)
- The Anthropology of Aging (3 credits)
- Ethnic Identity (3 credits)

*Two cognate classes can be also taken outside the department with the advisor's approval, as long as they are at the 500 level or above.

Thesis or Internship (6 cr.)

For completion of the MA, the student will be required to complete either an internship, which involves writing a report for the organization or agency, or completing a more traditional MA thesis (see below). A third option, consisting of writing an article eligible for publication in a peer-reviewed journal, can also be completed in partial fulfillment of the requirements for the MA degree.

Internship Option

For this option, a student will be placed with a non-governmental organization, a city or county agency, a museum or other Cultural Resource Management organization, or a community-based organization and will arrange with the sponsoring organization to complete an applied project that will be mutually agreed upon by the Graduate Committee of the Anthropology Department and by the organization.

NOTE: The internship may be taken for variable credits depending on the amount of contact hours with the equivalence of 50 hours per credit hour unless constructed as a graduate assistantship in accordance with Anthropology department policy in which case the contact hours may be greater.

Thesis Option

For this option, a student will develop and write a thesis supervised by a three-member committee of full-time faculty. This thesis will explore a research question related to some aspect of the urban setting of Indianapolis ***or*** the regional setting of Central Indiana, and will demonstrate the ability of a student to work independently on that topic, and to apply both theoretical insight and methodological skills to a substantive issue. A student would be required to successfully defend the thesis before his/her committee.

Evidence of Publishable and Professional Research

Rather than producing a traditional MA thesis, in accordance with the student's advisor, students will be allowed to write a research paper that is assessed to be publishable in a refereed journal. Alternatively, for students primarily interested in a focus on Museums or in Cultural Resource Management, the advisor might suggest that the student develop and produce a public exhibit in Indianapolis or Central Indiana; lastly, students may be permitted to produce a report that contributes significantly to a policy issue in Indianapolis or Central Indiana.

Political Science

The Department of Political Science offers three **Master of Arts degree** options: a general politics track, a state and local politics track, and a five-year BA/MA.

General Politics Track

This consists of 33 hours of coursework, made up of the following:

(12 hours) required of all students:

POLS Y570 - Introduction to the Study of Politics
POLS Y580 - Research Methods in Political Science
POLS Y657 - Comparative Politics Y669 - International Relations
POLS Y661 - American Politics

(12 hours) include the following:

POLS Y630 - State Executive Politics
POLS Y640 - State Parties and Interest Groups
POLS Y642 - Comparative Federalism
POLS Y680 - Readings in Political Science

Relevant electives (a maximum of 6 hours) may also be taken outside the department.

Students must have either reading knowledge of a foreign language (to be indicated by completion of a second-year undergraduate equivalent course, or by testing out in an approved examination) or proficiency in quantitative research skills (to be indicated by completion of an advanced research methods graduate course in political science or another approved discipline).

State and Local Politics Track

This consists of 33 hours of coursework, made up of the following:

(12 hours) required of all students:

POLS Y570 - Introduction to the Study of Politics
POLS Y580 - Research Methods in Political Science
POLS Y620 - State Politics
POLS Y622 - Urban Politics

(9-12 hours) include the following:

POLS Y630 - State Executive Politics
POLS Y640 - State Parties and Interest Groups
POLS Y642 - Comparative Federalism
POLS Y661 - American Politics
POLS Y680 - Readings in Political Science

Relevant electives (a maximum of 6 hours) may also be taken outside the department.

(3-6 hours) with a state, local, or urban government institution, or with a body having operational ties with such an institution. Students need to enroll in POLS Y881 - Internship in Political Science. This requirement may be waived for students already working in state, urban or local government.

Common Requirements

(6 hours) Students should enroll in POLS Y880 - M.A. thesis. Please be sure to read the Graduate School Guide to the Preparation of Theses and Dissertations. Students are strongly advised to allow at least one year for the preparation, completion and defense of a thesis.

Students must receive a grade of B- or better in any course for it to count toward the MA. In order to continue enrollment in the program and to receive the degree, students must maintain a grade point average of B (3.0) or better. No undergraduate courses may be applied to the MA program.

We prefer that students start the program in the fall so that they can take POLS Y570 before or alongside other courses, but it is possible to start in the spring on the understanding that POLS Y570 should be taken as soon as possible thereafter. POLS Y580 is normally scheduled every spring, and we recommend that students do not take it until they have taken POLS Y570.

Students transferring from other graduate programs - or who have taken courses in the IU system as graduate non-degree (GND) students - may count up to 9 hours of credit toward the MA, provided these were earned in 3-hour courses, that the courses are relevant to our MA program, and that a minimum grade of B was earned in each course.

Admission Procedures

Applications for admission to the program (without financial support) will be reviewed throughout the year, but it is recommended that applications for fall be submitted no later than the end of June, and for spring no later than the end of November.

Completed applications for IUPUI Fellowships must be submitted by February 1. Priority for other forms of financial aid (internships, research assistantships, teaching assistantships) will be given to those applying by May 1.

Minimum admissions requirements are a BA from an accredited institution, a GPA of 3.0, and scores on the revised GRE General Test of 145 in each of the verbal and quantitative elements, and 4.5 in the analytical writing element. (For GREs taken before July 31, 2011, we look for an average of 500 or better with at least one score of 550 or better.) You can sign up to take the GRE at http://www.gre.org/. It is recommended that you sign up at least two weeks in advance of the date on which you want to take the exam to ensure that you obtain a reservation for that day.

For full details on the admissions process, please visit the Graduate Office web site, where you can file an online application. The application includes a personal statement and three letters of recommendation. In addition, you will need to submit your undergraduate transcript and GRE scores, and be interviewed in person by the departmental Director of Graduate Admissions.

Conditional Admittance

Students whose admission package is incomplete or whose GPA and/or GRE scores do not quite meet our expectations may be conditionally admitted to the program. Also, students who apply late or before they have taken their GRE may be admitted as graduate non-degree students. Either way, courses taken before formal admittance will count toward the MA once students are formally admitted (provided the grade expectation described above is met).

Five-Year BA/MA

Available to political science majors only, this program allows students to complete a BA and MA in five years instead of six, with three years of undergraduate coursework, a fourth year of combined undergraduate and graduate coursework, and a final year devoted exclusively to graduate work. The program is open to students who have:

- Achieved junior status.
- A cumulative undergraduate GPA of 3.3 or better, and a GPA in their major of 3.5 or better.
- A minimum grade of B in *POLS Y205: Elements of Political Analysis*.
- Completed at least 60 of their undergraduate credit hours and at least 15 of their political science credit hours at IUPUI.
- Completed the 12 hours of introductory-level required undergraduate courses for political science.

Interested students may declare their interest in the program to the Director of Graduate Studies in Political Science as soon as they start at IUPUI, in which case particular efforts

will be made to advise them in their choice of courses during their first three years, and students will be encouraged to engage themselves in the research activities of faculty, and to more actively develop mentoring relationships.

Admissions

Eligible and interested students must apply for admission to the BA/MA program no later than April 1 of their junior year, submitting a personal statement of goals, abilities and reasons for pursuing the MA degree; a sample of academic writing (a term paper from a political science course is preferred); and three letters of recommendation, of which at least two must be written by full-time members of the political science faculty. Applications will be reviewed by the departmental graduate admissions committee.

During their senior year, students whose eligibility has been confirmed must:

- Take the GRE, and for final admission to the MA program must achieve scores on the revised GRE General Test of 150 or better in each of the verbal and quantitative elements, and 4.5 or better in the analytical writing element.
- Complete and pass *POLS Y490: Senior Seminar* the first time they enroll in the class with a grade of at least a B. This may then be double counted as an elective in the MA program.
- Complete and pass *POLS Y570: Introduction to the Study of Politics* and *POLS Y580: Research Methods in Political Science* with a grade of at least B-. These may then be double counted as electives in the political science undergraduate major.

Upon meeting these three requirements, and upon completing all the requirements for their BA, students on the BA/MA track must apply for formal admission to the MA through the Graduate Admissions Office; they should do this no later than April 1 of their senior year. The establishment of eligibility for, and participation in, the BA/MA program does not automatically guarantee acceptance into the graduate program. BA/MA students admitted to the MA will take their remaining four graduate courses in their fifth year, as well as completing their thesis. The double counting of nine hours of undergraduate and graduate credit means that BA/MA students will only be required to take a total of 146 semester hours of coursework for their BA and their MA, rather than 155 (122 + 33).

When taking graduate courses in their senior year, students will be charged undergraduate tuition rates. After earning the BA degree, students formally admitted to the Graduate School will be charged graduate tuition rates for their coursework.

Master of Arts in the Teaching of Spanish (M.A.T.)

This graduate program is a collaborative effort between IUPUI and the University of Salamanca in Spain. It leads to the Master of Arts in the Teaching of Spanish awarded by Indiana University. Students also receive certificates from the University of Salamanca attesting to their completion of the summer programs in residence there. The University of Salamanca has a well-developed curriculum for foreign students who aspire to teach Spanish and its *Cursos para Profesores* enjoy a high level of academic prestige around the world.

Objectives

This international course of study has been designed specifically for teachers of Spanish. It provides graduate-level course work in the Spanish language, Hispanic cultures, teaching methodology, applied linguistics, and Hispanic art and literature. It provides for the professional development of Spanish teachers through the improvement of their language and teaching skills, and it will promote their career advancement. Graduates of the program will in turn contribute to better teaching of Spanish in area schools, improving the language skills and the cultural awareness of students in the state of Indiana.

Design

The degree program consists of 36 credits and requires two five-week programs taken abroad in consecutive summers. The remainder of the course work must be completed in residence at IUPUI. The Master of Arts for Teachers may be completed in three to four academic semesters and two summer sessions. Students may select from two options for the course of study: Option 1 includes a master's thesis, and Option 2 requires additional coursework. For a list of required course work, see the program website: http://liberalarts.iupui.edu/wlac/graduate/mat_in_spanish.

Admission Requirements

1. **A bachelor's degree from an accredited college or university, with a minimum grade point average of 3.0 (on a 4.0 scale)** in the student's undergraduate major, documented by an official transcript. Applicants are expected to have an undergraduate degree in Spanish, but admission is also considered for those who otherwise demonstrate the competency necessary for successful graduate work in Spanish. Students must have knowledge of Spanish phonetics, linguistics, and literary genres and periods. St*udents with deficiencies may be admitted on a conditional basis until they complete the relevant undergraduate courses in these areas*.
2. **Proficiency in the Spanish language.** There are two options:

1. EXAM. Students may take the Diploma in Spanish (DELE) issued by the Spanish Ministry of Education, Culture and Sport. The official exam determining this proficiency is offered once a year at IUPUI. Students must attain a passing score at the Nivel Intermedio (B2).
2. a tape including applicant's oral sample of 10-15 minutes of spontaneous speech in Spanish AND an essay in Spanish on some aspect of Spanish culture,

literature, linguistics, or pedagogy. The essay may be in the form of a paper written for a course

3. **Three letters of recommendation.** At least two of these should be from professors.
4. **For international students, the university requires a minimum TOEFL score of 550 on the paper version, or 213 on the computer-based test. Send scores to Institution Code 1325, Department Code 2608.** Students who do not achieve this score may be admitted to the university conditionally and may be required to take English as a Second Language courses through the Department of English. While taking these courses they will be allowed to register for a maximum of six credit hours in the Master of Arts for Teachers of Spanish. If admitted, international students will also be required to take IUPUI's ESL Placement exam before registering for the first semester.

PLEASE NOTE: While the GRE is not necessary for admission to the Master of Arts for Teachers Program in Spanish, it is required for application to certain financial aid programs. (See "Financial Assistance" below.)

5 **Online application.** Please access the online portion of the application.

This segment requires basic information such as your name, address, program of study, residency status, etc. Please pay careful attention to the personal statement, in which you explain your reasons for pursuing the M.A.T. of Spanish. The statement should be written in English. The application fee may be submitted by credit card at the end of the online application. Please check with the Graduate Office for the current amount of the application fee.

Please note: Under Educational Objectives you must choose "Master's" as your type of admission, "Spanish (IU Graduate School)" as your academic program, and "Spanish M.A.T." as your major. Please also note that if you have already submitted an online application for Graduate Non-Degree status or for another graduate program, you must still complete a new online application for this program using a new personal identification number (PIN) and password and submit an additional application fee.

Financial Assistance

Various sources of financial assistance are available to graduate students at IUPUI. Applicants should contact:

IUPUI Office of Student Financial Services
CE 250 (Campus Center)
420 University Boulevard
Indianapolis, IN 46202-5140
Phone: (317) 274-4162

Graduate Minors

- Anthropology and Health
- Philosophy
- Sociology
- Women's Studies

Anthropology & Health

The graduate minor in anthropology and health is an integrated field of 12 credit hours of study designed to supplement the graduate training of students with an interest in careers in the health field. The program has three goals: to provide students with a holistic perspective on the anthropology of health, which integrates human biology, ecology, and culture in a systems model of health; to develop students' anthropological inquiry skills in understanding health in human groups; and to develop students' abilities to apply anthropological concepts and skills to health interventions in the areas of their career focus. The graduate minor in anthropology and health will provide students with training that will add greater depth and breadth to their qualifications in their major field. They will be able to use the cross-cultural and bio-cultural perspectives of anthropology to supplement their primary graduate training to better prepare them for a career in the health fields. This focused training will enable students to use anthropological concepts and skills to identify bio-cultural factors in the occurrence of disease, to understand ethnic behavior related to illness, and to identify where health programs across social and ethnic lines can be made more effective.

Course Requirements

Twelve credit hours approved for the minor in anthropology and health with a grade point average of at least 3.25, including E445; A594; one course selected from B521, B523, B525, E404, E606, and L605; and one elective.

Research Methods in the Anthropology of Health

Electives

Electives will be selected from approved anthropology courses offered at IUPUI and IU Bloomington in consultation with the minor advisor.

Ph.D Minor in Philosophy

Although IUPUI does not offer a doctoral major in philosophy, it offers a doctoral minor in philosophy to students pursuing doctoral degrees in other fields. The requirements for a doctoral minor in philosophy include: 12 credit hours of graduate courses in philosophy, with a grade point average of at least 3.0 (B), including 6 credit hours in courses selected from the *Philosophy Core*. The Philosophy Core consists of these six 3 cr. courses:

- P525 Topics in the History of Philosophy
- P540 Contemporary Ethical Theories
- P543 Contemporary Social and PoliticalPhilosophy
- P553 Philosophy of Science
- P560 Metaphysics
- P562 Theory of Knowledge

Sociology

Students who are candidates for the Ph.D. degree in other departments may obtain a Ph. D. minor in Sociology at IUPUI. The intent of the minor is to develop multidisciplinary skills, exposing students to theories and methods outside their major department. The Ph.D. minor in sociology has an unstructured curriculum that can provide students a foundation in basic areas in sociology and the opportunity to study advanced sociological theory, qualitative and quantitative research methods, and statistics.

Requirements

- Four sociology courses at the 500-level or above, totaling 12 credits.
- An average grade of B (3.0 on a 4.0 scale) or above in these courses.
- No more than one individual readings course.
- At least half of these courses must be taken at the IUPUI campus.

Women's Studies

A minor in women's studies is available to students pursuing a doctorate. Please consult with the director of the Women's Studies Program.

Philanthropic Studies

External Minor

All Ph.D. students complete a 12 credit hour External Minor related to their area of specialization in a department or school other than the Center on Philanthropy. This requirement, standard among Indiana University doctoral programs, enables students to link their research to the full range of academic disciplines available on both the Indianapolis and Bloomington campuses.

Student Learning Outcomes

Doctorate Programs

- Economics
- Philanthropic Studies

Master's Programs

- Anthropology
- Applied Communication
- Economics
- English
- Geographic Information Science
- History
- Museum Studies
- Philanthropic Studies
- Philosophy
- Political Science
- Sociology
- Spanish

Graduate Certificate Programs

- English-Teaching English to Speakers of Other Languages (TESOL)
- Professional Editing
- Teaching Writing
- Geographic Information Science
- Museum Studies
- American Philosophy
- Bioethics
- Translation And Interpreting Studies

Master of Arts (M.A.)

A **Master of Arts (MA) degree** in the **School of Liberal Arts** reflect **IUPUI's Principles of Graduate and Professional Learning.** Detailed articulation of Student Learning Outcomes, including their assessment, for individual graduate degrees and certificates are part of the School of Liberal Arts's department and program websites. Students completing the Masters of Arts degree program will:

- Know how to explain the specifics of having an advanced degree in the field of study.
- Be able to discuss contemporary issues in a specialized field of study.
- Be able to explain the interconnections between variants within the discipline of study;
- Be able to complete research with faculty supervision;
- Be able to give presentations at professional meetings, symposia and other fora;
- Be able to plan and conduct research in a specialized field of study; and
- Be able to be prepared to continue on to doctoral level study in the discipline and/or to enter the workforce in the specific area of study, applying theoretical and practical skills to tasks through a social base in critical thinking skills.

Master of Arts in Applied Communication (M.A.)

The Department of Communication Studies offers an M.A. in Applied Communication with concentrations in corporate communication, health communication, media criticism or public communication. This unique applied program provides students with theoretical understanding of communication processes as well as with the competencies and skills necessary to address specific communication issues and problems by applying discipline-specific knowledge. The program readies the advanced student for professional career paths and future academic pursuits. Students completing the Applied Communications M.A. curriculum will:

- Design and execute communication strategies and create programs to address contemporary communication problems.
- Apply communication theories to specific communication issues and problems in the workplace and the community and communication-specific theory to predict human interaction.
- Demonstrate an advanced theoretical knowledge in preparation for Ph.D studies.

Doctor of Philosophy in Economics (Ph.D.)

The Ph.D. program is designed to (i) advance knowledge concerning Health Economics and Philanthropy/Nonprofit Economics; (ii) develop the skills essential for our graduates to conduct independent research in these two areas. The two fields for our Ph.D. program are Health Economics and Philanthropy/Nonprofits Economics. Students completing the Economics Ph.D curriculum will:

- Demonstrate a high level of understanding of economic theory, and of statistical theory specially relevant for economics.
- Demonstrate a thorough understanding of the state of knowledge in their fields of specialization within economics, including theoretical models, research methodologies, and empirical results.
- Demonstrate the ability to critically assess economic issues, and to integrate economic theory and statistical/econometric analysis in order to evaluate these issues.
- Demonstrate the ability to assemble, organize and analyze economic data, in order to conduct advanced econometric analysis ability to conduct independent, original research in economics.

Master of Arts in Economics (M.A.)

The Master of Arts program has a twofold objective: (1) to provide students with analytical capabilities and research skills for careers in business, government, and the nonprofit sector; and (2) to prepare those who wish to pursue the Ph.D. at IUPUI, Indiana University Bloomington, or another university. Students completing the Economics M.A. curriculum will:

- Know a wide variety of economic issues.
- Understand the current state of economic thought with regard to these issues
- Be able to use mathematical and/or statistical models based on economic theory—including models that are computable—to help under understand and address important economic issues.
- Be able to understand the limitations of statistical data analysis, particularly in regard to detecting causal relationships between economic variables and be familiar with techniques for addressing these limitations.
- Be familiar with computer programs for manipulating large data sets and for conducting statistical analysis using these data sets.

Master of Arts in English (M.A.)

The graduate English program has been designed to prepare students for careers in the analysis and production of texts. The program covers issues and skills in reading and writing, in the richest sense of these words—in order to prepare students to address these issues and to teach these skills. Graduates of the program should be prepared for such careers as teaching writing and literature; teaching English as a second language; and writing for business, government, and other professions. In contrast to traditional M.A. programs, which place heavy emphasis on literary history, the IUPUI program focuses on the application of English studies to contemporary situations and problems. Students completing the English M.A. curriculum will be able to:

- **Identify and define** fundamental concepts, terms, and theories in two areas of graduate-level English studies (writing, creative writing, literature, linguistics).
- **Critically read**, **write** about and **evaluate** issues in English Studies.
- **Demonstrate** advanced skills in reading, writing, and evaluating issues in the discipline of English Studies.
- **Apply** various critical perspectives to a wide range of texts, including historical, theoretical, and literary material.
- **Demonstrate** a working knowledge of the cultural diversity of language and literatures.
- **Plan and present** coherent, persuasive, and original oral and written arguments.
- **Design and conduct** independent research.
- **Produce** through a reflective writing process manuscripts suitable for publication.

Graduate Certificate - Teaching English to Speakers of Other Languages (TESOL)

Students completing the TESOL certificate will able to:

- **Describe** the features of both second language and first language discourse.
- **Explain** the theoretical principles of second language learning from linguistic, psychological, and social perspectives.
- **Explain** the principles, strategies, and features of second language teaching in a variety of contexts.
- **Describe** how learning a second language differs from learning one's first language.
- **Exemplify** the theory-to-praxis connection in second language teaching in a variety of contexts, modes, and genres.
- **Devise and use** instruments for adequately and appropriately assessing language learners' educational needs and language development in diverse contexts.
- **Design and implement** pedagogically-sound lesson plans, teaching materials, courses, and curricula for second language learners in a variety of contexts with respect to reading, writing, listening, speaking, and culture.
- **Evaluate and refine** (one's own) teaching practices on the basis of second language learning research and specific students' learning outcomes using the tools of self-reflection and classroom observation.

Graduate Certificate - Teaching Writing

Students completing the certificate in teaching writing will able to:

- **Recognize and define** major theories and historical perspectives in the teaching of writing.
- **Analyze** the complexities of writing and its uses in personal, public, and professional contexts.
- **Create, design, and produce** effective evaluations of writing assignments and supporting activities.
- **Demonstrate** knowledge of a reflective, research-based approach to major issues in the teaching of writing.
- **Articulate** an informed, practical pedagogy for the teaching of writing.
- **Write** a clear and persuasive research-based argument that adheres to conventions of documentation.
- **Evaluate** impact of culture, gender, race, and history on texts and ideas as well as language use and structure.
- **Demonstrate** an ability to accept and offer critical feedback to and from peers.

Graduate Certificate - Professional Editing

Students completing the Professional Editing certificate will:

- **Know** the techniques and consequences of traditional editing procedures, learn how corrupted texts of the past can be recovered and disseminated for readers today, and explore how these procedures are evolving in reaction to the rapidly changing technical communications environment of the information age.
- **Understand** that editing is an historical discipline.
- **Be able to** examine how texts have been edited in the past;
- **Be able to** recognize the steps involved in editorial procedures, analyze and categorize the various types of errors that are the result of hand press and machine press printing;
- **Be able to** demonstrate their understanding of book production by writing analytical and descriptive bibliographies, reconstruct textual genealogies of the transmission of a work, evaluate current editions of the same work; and
- **Be able to** discern what paradigms of editing held sway in different historical periods, analyze and respond to arguments about the best ways to present to the modern reader both public and private documents of historical significance, and design ways to present and preserve document quality in electronic environments.

Master of Science in Geographic Information Science (M.S.)

The Master of Science in Geographic Information Science prepares students for professional careers or advanced graduate studies in the field through seminars, lectures, laboratory, internship, and faculty-supervised research. Students completing the Geographic Information Science M.S. curriculum will:

- Understand key foundational concepts, methodological processes, and analytical skills in Geographic information science.
- Be able to demonstrate an in-depth understanding of the literature in at least one subfield or application area of geographic information science.
- Be able to develop a research proposal and carry out a research project under faculty supervision.
- Be able to demonstrate the ability to professionally communicate research findings in oral, written and graphic forms.

Graduate Certificate in Geographic Information Science

The Graduate Certificate in Geographic Information Science prepares students for employment in positions where the creation, management, analysis, and presentation of spatial information are crucial. Students completing the Geographical Information Science certification will:

- Understand key foundational concepts, methodological processes, and analytical skills in geographic information science.
- Understand the principles underlying the use of spatial information technologies in theoretical and applied settings.
- Be able to demonstrate the creation, management, analysis, and presentation of spatial information.
- Be able to demonstrate the ability to design, analyze, and interpret spatial analytical problems.

Master of Arts in History (M.A.)

Students completing the History M.A. curriculum will:

- Know the importance and critical perspective of historical knowledge for understanding contemporary society.
- Demonstrate an advanced level of factual knowledge in their field of historical study (U.S., European, public).
- Demonstrate mastery of the historiography of their field of historical study.
- Demonstrate competence in the methodologies commonly employed in the discipline.
- Demonstrate a high level of clarity, accuracy, and sophistication in written and oral communication.
- Carry out a research project (M.A. thesis) that employs both primary and secondary sources, is completed in conformity with the conventions and standards of the discipline, and makes a significant contribution to knowledge.

Master of Arts in Museum Studies (M.A.)

Students completing the Museum Studies M.A. curriculum will:

- Develop their abilities as critical thinkers by questioning the role of museums in society and think critically and creatively to evaluate and improve that role.
- Develop self-reflective understanding of their own vocations and professional ethics in the museum field.
- Develop mastery of professional skills through using a variety of approaches to create original products, such as educational programs, exhibit concepts, strategic plans, of relevance to museums in the community.
- Develop necessary knowledge and skills to meet professional standards in one or more areas of museum practice including collections, education, exhibit development, administration, curatorial practices, evaluation, and interpretive planning.
- Engage in and conduct creative research problems that, over time, yield new insights into museums, their missions, their collections, and their engagements with communities and
- Engage in hands-on learning in an area of the museum field through an internship experience.
- Become skilled at effectively presenting their work through oral presentations and in written work in formats relevant to the museum profession (ex. exhibit concept documents, object labels, press releases, research papers, catalogue entries, curriculum).

Graduate Certificate in Museum Studies

Students completing the Museum Studies certificate will:

- Develop their abilities as critical thinkers by questioning the role of museums in society and think critically and creatively to evaluate and improve that role.
- Engage in hands-on learning in an area of the museum field through an internship experience.
- Become familiar with and develop basic competency in the core areas of museum practice including collections, education, exhibit development, and administration.

Doctor of Philosophy in Philanthropic Studies (Ph.D)

Doctor of Philosophy in Philanthropic Studies (Ph.D)

Students completing the Philanthropic Studies Ph.D curriculum will:

- Gain knowledge of the history and cultural traditions of philanthropy and the nonprofit sector in a global context and understand multi-disciplinary theories that explore/explain philanthropic behavior and why nonprofit organizations exist in society.
- Be able to acquire knowledge of research and resources in the field of philanthropic studies and to use that knowledge to conduct original research, generate new knowledge, and create scholarly products.
- Be able to apply ethical standards to the pursuit of professional, scholarly, and societal goals to advance the common good.
- Understand how to interpret and apply ethical frameworks and disciplinary concepts to philanthropic activity in society and to act ethically and work skillfully with others to achieve educational, scholarly, and professional goals.

Master of Arts in Philanthropic Studies (M.A.)
The Master of Arts in Philanthropic Studies focuses on the history, culture, and values of philanthropy. Its objectives are: to enable students to gain the knowledge and skills either to pursue further graduate study in relevant fields or to pursue careers in the independent sector or in related fields; to enable students to investigate the broader theoretical issues of philanthropy and of their chosen areas of specialization from a variety of disciplinary and interdisciplinary perspectives; and to utilize the interdisciplinary base to maintain a thorough critical inquiry into the historical and cultural implications of philanthropy. Students completing the Philanthropic Studies M.A. curriculum will:

- Gain knowledge of the history and cultural traditions of philanthropy and the nonprofit sector in a global context and the multi-disciplinary theories that explore/explain philanthropic behavior and why nonprofit organizations exist in society.
- Be able to acquire knowledge of research and resources in the field of philanthropic studies and to use that knowledge to create scholarly products and conduct research.
- Gain knowledge and skills needed to pursue further graduate work, and to network with others to pursue careers in the philanthropic/nonprofit sector.
- Understand how to interpret and apply ethical frameworks and concepts to philanthropic activity in society and to act ethically and work skillfully with others to achieve educational and professional goals.

Master of Arts in Philosophy (M.A.) & Philosophy Graduate Certificate

Students completing the Philosophy M.A. curriculum will:

- Know and understand important figures, theories, and arguments in core areas of classical and contemporary philosophy.
- Know and understand important figures, theories, and arguments related to a specific subject area: American philosophy, bioethics, or international research ethics.
- Comprehend interpret, analyze, and evaluate complex philosophical concepts, claims, and arguments.
- Conduct mentored philosophical research leading to competent, well-researched, in-depth argumentative essays on specific topics.
- Develop and deliver clear, accurate, informative research presentations for academic or professional audiences.

Graduate Certificate in American Philosophy or Bioethics

Students completing the Philosophy graduate certificate curriculum will:

- Know and understand important figures, theories, and arguments related to the certificate subject area: bioethics or American philosophy.
- Comprehend interpret, analyze, and evaluate complex philosophical concepts, claims, and arguments.
- Write and speak clearly and competently on philosophical topics related to the certificate subject area.

Master of Arts in Sociology (M.A.)

The Master of Arts program is specifically designed to prepare its students for conducting applied and policy-oriented research, and to equip those already in the workforce with the critical skills necessary for assessing and applying sociological knowledge in their everyday responsibilities. The program of study culminates in either an internship or thesis experience. The program is designed to accommodate the needs of both full- and part-time students. Currently, the program features three formal areas of concentration: family/gender studies, medical sociology, and work/organizations. Students completing the Sociology M.A. curriculum will:

- Collect and analyze data on social phenomena.
- Apply sociological knowledge and methods in community projects.

- Organize and conduct independent projects.
- Present and defend their analyses of social phenomena.
- Gain mastery of a specific concentration area of sociology (eg., medical sociology, gender, sex, and family studies) as well as increase diversity of disciplinary specialties and backgrounds of those involved in programs be prepared for doctoral studies.

Master of Arts in the Teaching of Spanish (M.A.T.)

This international course of study has been designed specifically for teachers of Spanish. It provides graduate-level course work in the Spanish language, Hispanic cultures, teaching methodology, applied linguistics, and Hispanic art and literature. It provides for the professional development of Spanish teachers through the improvement of their language and teaching skills, and it will promote their career advancement. Graduates of the program will in turn contribute to better teaching of Spanish in area schools, improving the language skills and the cultural awareness of students in the state of Indiana. Students completing the M.A.T. in Spanish curriculum will:

- Know a variety of theories on the process of second language acquisition.
- Know effective methods and techniques of Teaching Spanish.
- Know main cultural manifestations of the language in literature.
- Know social practices and perspectives in Spain and Latin America and among U.S Hispanics.
- Know structural and cultural differences between Spanish and English and between the communities that use these languages.
- Understand second language (Spanish) grammars.
- Understand second language production and comprehension, input processing, and the acquisition of pragmatic and sociolinguistic competence.
- Understand the formal properties of The Spanish language.
- Understandthe relationship between language and society in the Spanish-speaking world.
- Understandthe value of different methods to teach languages and cultures.
- Understand the importance of critical thinking in examining other cultures and comparing them with one's own.
- Understand their place within multilingual international communities.
- Understand the connections between language studies (language, literature, culture and translation/interpreting) with other disciplines.
- Be able to identify and implement effective pedagogical practices.
- Be able to identify appropriate teaching objectives, techniques, materials and outcomes.
- Be able to contribute to the improved teaching of Spanish in schools by fostering strong language skills and deep cultural awareness among their students.
- Be able to apply the knowledge of the language system and culture to function effectively as teaching professionals, and in intercultural settings at home and abroad.
- Be able to interact within multilingual international communities here and abroad in ethically and culturally sensitive ways.
- Be able to reflect on their teaching practice and seek professional development opportunities.

Master of Arts in Anthropology (M.A.)

Students completing the Anthropology Master's program will demonstrate the following outcomes:

- **Knowledge Base of Anthropology:** All students are required to demonstrate knowledge of the history of the discipline of Anthropology and of the key theoretical models that have informed the field.
- **Research Methods in Anthropology:** The student will be required to demonstrate their mastery of basic anthropological research methods.
- **Ability to Design a Research Proposal:** Students will identify a key question for investigation, define its anthropological dimensions, link it to anthropological scholarly trends, and design an appropriate methodology with which to execute that research.
- **Ability to Carry Out Applied Research:** Students will design and carry out approved research in collaboration with an agency or organization.
- **Diversity:** Students will have an understanding of human diversity in culture based on cross-cultural comparison.
- **Civic Engagement:** Students will be expected to work collaboratively with a number of community-based organizations in collaborative relationships; students will be expected to produce work that, in addition to its scholarly merit, serves the interests and needs of a range of communities.
- **Writing Skills:** Students are expected to write at a scholarly level appropriate for publication in a peer-reviewed journal.
- **Speaking Skills:** Students are expected to be able to present their work in a range of scholarly settings including academic conferences, symposia and other fora.
- **Technology:** Students are expected to be able to use computers for a range of purposes including: statistical calculations (when appropriate), creation of academic posters, use of software for transcription of interviews, qualitative analysis of data.
- **Human Subjects Protection:** All students working with human subjects will take and pass the human subjects CITI test for Social/Behavioral Researchers

(Stage 1) and have their individual research projects approved by the appropriate IRB body.

Graduate Certificate in Translation Studies

Students completing the Translation Studies certificate will:

- Know the basic premises of translation and work within a framework that assists them in effectively conveying a written text from one language into another.
- Know the basic theoretical concepts supporting translation studies and be able to apply those theories to the practice of translation.
- Understand the complexities of the task of translation, as well as the role it plays in the dissemination of ideas and cultures.
- Understand the differences between translation and interpretation and the different skill sets required for.
- Understand the ethical responsibilities that go along with the profession and practice of translation.
- Be able to effectively translate a variety of texts into both Spanish and English, taking into consideration the specific circumstances related to both the source and target languages and cultures.
- Be able to demonstrate the necessary skills to effectively translate a variety of discourse typologies such as commercial, legal, technical, medical and literary.
- Be able to appropriately use the fundamental tools for translation such as dictionaries (monolingual, bilingual, terminology specific, glossaries and Internet resources) and Computer Assisted Translation programs.
- Be able to demonstrate superior proofreading and editing skills for crafting and evaluating translations.
- Be able to discuss translation and interpretation in a professional and academic manner.
- Be able to continue to graduate work for those who intend to pursue research in translation studies.

Master of Arts in Political Science (M.A.)

Students completing the Political Science M.A. curriculum will:

- Demonstrate the ability produce quality scholarship.
- Gain advanced knowledge of important concepts within the discipline of Political Science.
- Gain advanced knowledge of the approaches to the study of Political Science, eg., normative v. empirical theoretical approaches, qualitative v. quantitative strategies of inquiry.
- Demonstrate advanced competency in review and synthesis of relevant Political Science literature.
- Demonstrate the ability to speak cogently and write fluently to explain research results.

Certificate in Professional Editing

Students completing the Professional Editing certificate will:

- **Know** the techniques and consequences of traditional editing procedures, learn how corrupted texts of the past can be recovered and disseminated for readers today, and explore how these procedures are evolving in reaction to the rapidly changing technical communications environment of the information age.
- **Understand** that editing is an historical discipline.
- **Be able to** examine how texts have been edited in the past;
- **Be able to** recognize the steps involved in editorial procedures, analyze and categorize the various types of errors that are the result of hand press and machine press printing;
- **Be able to** demonstrate their understanding of book production by writing analytical and descriptive bibliographies, reconstruct textual genealogies of the transmission of a work, evaluate current editions of the same work; and
- **Be able to** discern what paradigms of editing held sway in different historical periods, analyze and respond to arguments about the best ways to present to the modern reader both public and private documents of historical significance, and design ways to present and preserve document quality in electronic environments

Undergraduate Programs

The IU School of Liberal Arts offers a four-year Bachelor of Arts degree in a number of disciplines, a Bachelor of Science in American Sign Language degree, a two-year Associate of Arts degree, and a variety of structured minors and certificate programs for students pursuing Liberal Arts or other degrees. At the heart of the school's programs are the following:

Programs	BA/BS	AA	Certificate	Minor
Africana Studies	BA		Certificate	
American Sign Lanuage	BS		Certificate	
American Studies				Minor
Ancient Greek & Latin				Minor
Anthropology	BA			Minor
Arabic, Islamic Studies				Minor
Arts & Humanities		AA		
Business & Professional Writing				Minor

Chinese Studies		Certificate	Minor
Classical Studies			Minor
Communication Studies	BA		Minor
Economics	BA		Minor
English	BA		
English, Creative Writing	BA		Minor
English, Film Studies	BA		Minor
English, Linguistics	BA		Minor
English, Literature	BA		Minor
European Studies			Minor
French	BA		Minor
French+Engineering	BA/BS		
Geographic Information Science		Certificate	
Geography	BA		Minor
German	BA		Minor
German+Engineering	BA/BS		
History	BA		Minor
History, European	BA		Minor
History, Non U.S. Non-European	BA		Minor
History, Thematic	BA		
History, U.S.	BA		Minor
Human Communication in a Mediated World		Certificate	
Individualized Major	BA		
International Studies	BA		Minor
Italian			Minor
Japanese Studies			Minor
Legal Studies			Minor
Medical Humanities and Health Studies			Minor
Motorsport Studies		Certificate	
Museum Studies		Certificate	
Paralegal Studies		Certificate	
Philanthropic Studies	BA		Minor
Philosophy	BA		Minor
Political Science	BA		
Pre-Law Political Science	BA		
Religious Studies	BA		Minor
Sociology	BA		Minor
Sociology, Medical			Minor
Spanish	BA		Minor
Spanish+Engineering	BA/BS		
Theatre and Performance		Certificate	
Translation Studies		Certificate	
Women's Studies			Minor
Writing and Literacy	BA

Centers

The Center for Bioethics

The Indiana University Center for Bioethics was established on the campus of Indiana University- Purdue University Indianapolis (IUPUI) in July 2001. The Center was intially created with funding from the Indiana Genomics Initiative (INGEN), which was established by a grant from the Lilly Endowment Inc. to the IU School of Medicine. In-kind support is provided by the School of Liberal Arts and the School of Law. The Center's mission is to provide leadership to advance the academic and public understanding of bioethics; to inform the development of social and public policy in

health, research, and related fields; and to provide support for the provision of ethics services at Indiana University hospitals. The Center will fulfill its mission through research, education, and service as a universtiy-wide entity.

The Center for Economic Education

The Center's goal is to have all Indiana schools meet or exceed the Voluntary National Content Standards in Economics so that all students will leave school with a basic understanding of economics and with the problem solving skills needed to become prosperous workers, consumers, and citizens in the next century. To meet these goals, the IUPUI Center for Economic Education and the Indiana Council for Economic Education strive to increase the economic understanding and decision making skills of students by providing educators with a basic understanding of economics, teaching strategies, and curriculum materials which are objective and consistent with state and national educational guidelines

The Confucius Institute in Indianapolis

The Confucius Institute in Indianapolis is an a political, non-profit organization. It was established at IUPUI in 2007 to promote the teaching of Chinese language and culture in central Indiana and facilitate mutual understanding between the peoples of China and United States.

Being based in one of America's largest cities and one of its most important hubs for electronic communications, logistics, and life sciences, the Confucius Institute in Indianapolis is well-placed for developing effective relationships and networks between Indianapolis's major public university (IUPUI), and its governmental, commercial, and civic leaders.

In developing the Confucius Institute's public programming, many local organizations have agreed to collaborate, including local universities, Chinese community organizations, business and government agencies, museums, radio and television broadcasters, and organizations that receive international visitors.

Confucius Institute in Indianapolis is located in Cavanaugh Hall at the heart of the IUPUI campus. Its mission is to:

1. Teach Chinese using a variety of methods, including multimedia and the internet;
2. Train teachers to teach Chinese in primary schools, high schools and colleges;
3. Administer the Chinese Proficiency Test and tests to certify ability to teach Chinese as a foreign language;
4. Teach Chinese courses of various types in a variety of arenas;
5. Sponsor academic activities, cultural exchange programs, and Chinese language competitions;
6. Showcase Chinese movies and television programming;
7. Provide consulting services for individuals wishing to study in China;
8. Provide reference materials for educators and other professionals;
9. Promote business exchanges;
10. Facilitate government exchanges.

Institute for American Thought

The Institute for American Thought is a unique research facility bringing to IUPUI and to central Indiana an internationally acclaimed concentration of resources and scholarship that focuses on fundamental strongholds of American thought and culture. The institute unites the teaching faculty, editing specialists, and research holdings of the Peirce Edition Project, the Santayana Edition, the Josiah Royce Critical Edition, and the Frederick Douglass Papers with the more broadly-based historical, literary and popular culture resources of the Center for Ray Bradbury Studies. All of these research units combine to support the Institute's related academic programs in American studies and professional editing.

The institute is structured around a research center that supports the work of its academic programs and scholarly editions while providing a singular resource for students and scholars from Indiana and worldwide. In contrast to centers that restrict their focus to the study of American political and economic thought, the Institute focuses more broadly on American contributions to philosophy and to the advancement of thought at the highest intellectual level of Western culture. The Bradbury Center, along with the free-standing but closely affiliated Max Kade Center for German-American Studies, extend the Institute's mainstream resources in American cultural history. Current scholarship in the institute concentrates on the production of reliable new texts for seminal American thinkers, on the professional editing process that preserves their writings for future generations, and on the understanding and dissemination of American thought and culture through the promotion of related research, public lectures, and other scholarly activities.

The institute administers both an undergraduate minor and an overseas exchange program in American Studies, and an interdisciplinary graduate program in professional editing; it also is associated with the American Philosophy concentration of the Department of Philosophy's master's program. In addition, the institute provides an editorial home for The New Ray Bradbury Review. No other research institute in the country combines academic programs, textual scholarship, and a research agenda in such a comprehensive program with sizeable archival and library collections documenting the major contributions of seminal figures in American cultural and intellectual history.

The significance and quality of the institute's holdings has consistently attracted international interest and brings many scholars of American thought and culture to central Indiana. International partnerships with scholar groups in Canada and Germany are already in place, as are two undergraduate student exchange programs with Universities in Great Britain. A resident fellows program will attract researchers who are publishing and teaching in wide-ranging areas of American studies, textual studies, American philosophy, and the history of science. The institute is working to turn its interrelated programs into a national model for interdisciplinary research, teaching, and publication in support of America's intellectual heritage.

•Max Kade German-American Center

In cooperation with the department and several community organizations, the IU School of Liberal Arts operates a center for German-related activities in the Duetsche Haus-Athenaeum. The Max Kade Center also offers two awards annually for students to study German overseas, two graduate fellowships, and a scholarship for the dual-degree program in engineering and German.

•Scholarly Editions

The IU School of Liberal Arts is home to five scholarly edition projects: the Peirce Edition Project, a contributor to the school's research culture since 1976; and three four more recent arrivals, the Frederick Douglass Papers, the Santayana Edition, the Josiah Royce Critical Edition, and The Bradbury Edition (The Collected Stories of Ray Bradbury). This remarkable concentration of major editions establishes IUPUI as a world center for scholarly editing and provides unique opportunities for our students and faculty.

•Frederick Douglass Papers

Frederick Douglass (1818-95), one of the nineteenth century's most influential human rights activists, escaped slavery in 1838 and became a leading orator, journalist, and historian of the abolition movement, the Civil War, and Reconstruction. The mission of Frederick Douglass Papers Project is to produce scholarly editions of his many works. Yale University Press has published the project's five-volume series of Douglass's speeches, interviews, and debates; two of Douglass's three autobiographies; and one of a contemplated four-volume series of Douglass's correspondence,. Editors are working on the final autobiographical text and the second volume of the Correspondence series, and plan a fourth series consisting of Douglass's published editorials and other short writings. Originating at Yale University, the project moved to West Virginia University before relocating permanently at IUPUI. It is supported by the National Historical Publications and Records Commission and the National Endowment for the Humanities.

•Peirce Edition Project

Charles S. Peirce (1839-1914) was a scientist and philosopher. He is the founder of pragmatism and is considered one of America's greatest thinkers. The primary mission of the Peirce Edition Project is to produce a 30-volume critical edition of Peirce's writings, many never before published. The Peirce Project, supported by the National Endowment for the Humanities and by private funding, is assisted by an internationally renowned team of advisors and contributors. The resources of the project, which include an extensive photocopy and microform collection of Peirce's manuscripts and the Max H. Fisch Library (a large private collection on classical and American philosophy and on nineteenth- and early twentieth-century American culture), have been consolidated in the Institute for American Thought with the resources of the Santayana and Douglass Editions and serves a wide community of students and researchers.

•Bradbury Edition

Ray Bradbury (1920 -) is one of America's most well known authors of fantasy, science-fiction, and horror. The recipient of a special Pulitzer Prize for his contribution to these genres as well as a National Book Award, Bradbury has written over six hundred short stories, many of them widely anthologized, as well as a half dozen novels such as Dandelion Wine and Something Wicked This Way Comes. Bradbury's stories have been collected in a variety of anthologies but never according to their sequence of composition (a Bradbury story can typically be published decades after it was first written). Published by Kent State University Press, The Collected Stories of Ray Bradbury is a critical and chronological edition which will present Bradbury's stories to the reading public for the first time in the order in which they were written, with a historical introduction examining Bradbury's creative relationship to genre writing. The Bradbury Center, which edits this edition, also edits a yearly journal, The New Ray Bradbury Review, which is devoted to studying the impact of Bradbury's writings on American culture. The Center is supported by private donations.

•Santayana Edition

George Santayana (1863-1952) was a Spanish-born American philosopher, best-selling novelist, poet, and critic. After abandoning a successful academic career at Harvard University, he lived a relaxed and ascetic life devoted to contemplation, writing, and quietly generous friendship. His broadly humanistic outlook is grounded in European culture with deep appreciation of Asian philosophy and irreducibly influenced by American experience. Santayana's philosophy is a serious and cheerful alternative to irrationalism of all kinds. It is materialism without reductionism and idealism without fanaticism. The Santayana Edition will produce a 21-volume critical edition of his works published by MIT Press. Edition resources include photocopy collections of correspondence and manuscripts; a library of Santayana first editions, secondary literature, and dissertations; and an archive of reviews and critical articles. The Santayana Edition is supported by the National Endowment for the Humanities and private donors.

•Josiah Royce Critical Edition

Josiah Royce (1855-1916) was a California mining-town born philosopher who made his way to become a Professor of Philosophy at Harvard University. Among Royce's students was George Santayana. Royce is known for the broad sweep of his thought, writing about the ultimate context within which we think and live. The "Beloved Community" is one of the concepts he added to our lexicon. Besides sophisticated metaphysical and logical writings, Royce wrote on such topics as war and football. Royce addressed the topics that were central to his time and our time. While considered by many to be merely a religious thinker, Royce contributed much to philosophic, ethics, and social thought.

The National Council on Public History

For nearly 30 years, NCPH has worked to advance the field of public history. Today the organizaton promotes professionalism among history practitioners and encourages their engagement with the public. We are a membership association of consultants, museum professionals, government historians, professors and students, archivists, teachers, cultural resource managers, curators, film and media producers, historical interpreters, policy advisors, and many others. Members confer at the annual meeting each spring and share their expertise in our journal, *The Public Historian*, the newsletter, *Public History News*, and on the e-mail listserv, H-Public.

Today there are more than 100 graduate programs in public history and a surge in undergraduate courses and programs across the United States, as well as growing interest abroad. NCPH works in close cooperation with the IUPUI Department of History, which has one of the nation's preeminent Masters of Arts in Public History programs. Currently, NCPH is leading a national effort to reform tenure and promotion poicies so that they will more

effectively address the public history work of faculty, such as civic engagement projects.

The Center on Philanthropy

Philanthropy is a potent force for good, and it must be strengthened and focused so that it can be put to work in the most effective ways possible. Established in 1987, The Center on Philanthropy at Indiana University is a leading academic center dedicated to increasing the understanding of philanthropy and improving its practice worldwide through research, teaching, training, and public affairs programs in philanthropy, fundraising, and management of nonprofit organizations. The Center pioneered the field of Philanthropic Studies and its unique approach to the study of philanthropy through the liberal arts and other academic and professional disciplines. The Center offers PhD, MA and BA degrees in Philanthropic Studies. It also offers programs that enrich student's experiences, such as The Fund Raising School, the Women's Philanthropy Institute and the Lake Institute on Faith & Giving. A part of the Indiana University School of Liberal Arts at IUPUI, the Center operates programs on the IUPUI and IU Bloomington campuses and collaborates closely with the Indiana University School of Public and Environmental Affairs.

The Polis Center

The Polis Center works with communities in Indiana and beyond to develop and apply knowledge, to build collaborations, and to find innovative solutions to common problems. We excel in community-based research and advanced information technologies, especially geographic information systems (GIS). Working in partnership with other organizations, we address issues of mutual concern, and with our network of relationships, we bring together disparate groups and interests to find common ground.

The Polis Center is an academic research center with a practical and applied orientation. The Greek word "polis" means city, and accordingly we concentrate on issues related to metropolitan Indianapolis and other mid-sized American cities. We are multidisciplinary, community-oriented, entrepreneurial, and creative in our approach to problem-solving. We have forged working relationships with community-based organizations; religious bodies; educational, arts, and media organizations; businesses; governments; social service providers; cultural agencies; charitable endowments, and numerous others. We are funded solely by grants and project income. Since 1989, we have managed over 500 projects with more than $40 million in external funding.

The Institute for Research on Social Issues

The IU School of Liberal Arts **Institute for Research on Social Issues (IRSI)** provides an infrastructure to advance research on social issues through interdisciplinary, collaborative inquiries.

IRSI was established to provide the intellectual stimulation and support intrinsic to groupings of like-minded social science scholars. IRSI Researchers investigate such topics as health, human ecology, economics, race and ethnic studies, family and gender studies, marketing and communications, and religion, to name a few. IRSI's mission is supported by the GIS Research Center, the Global Health Communications Center, the Survey Research Center, the Center for Health Geographics, the Health Research Group, the Violence Against Women and Human Rights Study Group, and international partnerships which include the IUPUI-Moi Workgroup and China Studies Workgroup.

IRSI Collaborating Centers include the Center for the Study of Religion and American Culture, the Family Violence Institute, the Center for Health Research, and The Polis Center.

The Spanish Resource Center

The Spanish Resource Center (SRC) in the IU School of Liberal Arts at IUPUI(located in Cavanaugh Hall 205) is the result of cooperative efforts between the Department of World Languages and Cultures and the Spanish Embassy's Ministry of Education. Its mission is to improve the teaching of the Spanish language and culture in Indiana, Kentucky, Ohio, and Illinois, providing a meeting place for those involved in the teaching and study of Hispanic language and culture, including teachers, students, and administrators of all levels. Established in 1998, it is the only Spanish Resource Center in Indiana, and one of only 12 across the country. It provides a large collection of Spanish learning resources (books, videos, DVDs and CDs) and other services to students and teachers of Spanish such as conversation hours, film series, professional development workshops, and immersion days. The Center also promotes various programs and scholarships run by the Spanish Ministry of Education in conjunction with the Departments of Education of the four states mentioned above and several school districts and universities in the Midwest.

The Survey Research Center

The Survey Research Center is a resource for students, faculty, and administration within the IU system, as well as local non-profits and government agencies. The Center can assist academic and applied researchers to develop and implement their projects by providing the following services in their entirety or individually: study design, sampling, instrument development, data collection, data processing, and data analysis. The SRC has the capacity to complete telephone (using a 16-station computer assisted telephone interviewing—CATI—facility), mail, on-line, or face-to-face surveys, and can also help researchers to navigate external, existing survey research data sources. The SRC can be reached at (317) 278-5204.

The Center for the Study of Religion and Amercan Culture

The Center for the Study of Religion and American Culture is a research and public outreach institute devoted to the promotion of the understanding of the relation between religion and other features of American culture. Established in 1989, the Center is based in the IU School of Liberal Arts at Indiana University-Purdue University Indianapolis. Now with almost 50 research fellows, the Center for the Study of Religion and American Culture is considered the premier research institute in the nation working in American religious studies.

Center activities include national conferences and symposia, books, essays, bibliographies and research projects, fellowships for young scholars, data-based communication about developments in the field of American religion, a newsletter devoted to the promotion of Center activities, and the semiannual scholarly periodical Religion and American

Culture: A Journal of Interpretation, which is among the highest-ranked academic journals in the nation.

The Sussman-Steinmetz Research Library

The Sussman - Steinmetz Research Library was established through a contribution of the books, journals, and papers of Marvin B. Sussman, an internationally known family sociologist, through the initiative of Professor Suzanne K. Steinmetz of the IUPUI Sociology Department. Located in Cavanaugh Hall 316, the library contains an extensive collection of family science and sociology books and journals with emphasis on population/demography, aging, family violence, sexuality, medical/health, law, history, race/ethnicity, and deviance. The library is available to students, staff, and faculty for research use. Materials do not circulate.

The Indiana Center for Intercultural Communication

The Indiana Center for Intercultural Communication (ICIC) is a university-based research and service organizaton created in 1998 to enhance links between the city of Indianapolis, the state of Indiana, and cultures/nations throughout the world. ICIC strives for excellence in language and intercultural training in academic, professional, and other occupational contexts. The Center is part of the Indiana University School of Liberal Arts in the Department of English at Indiana University-Purdue University Indianapolis (IUPUI).

The Writing Center

The English Department Writing Program coordinates all first and second semester writing courses at IUPUI, the guided self-placement program, and the University Writing Center. Our mission is to enable all IUPUI students to become better writers for academic, professional, personal, and civic purposes.

The Indiana Teachers of Writing (ITW) Writing Project offers professional development programs for teachers of writing at all levels, kindergarten through university, through summer institutes on campus and year-round programs in schools. ITWWP is part of the National Writing Project, a network with headquarters in Berkeley, California.

Africana Studies

- **Director** Professor Bessie House-Soremekun, *Political Science and Africana Studies*
- **Professors** Edward E. Curtis IV, *Religious Studies*; Ch. Didier Gondola, *History*; Bessie House-Soremekun, *Political Science and Africana Studies;* Missy Kubitschek, *English;* John McKivigan, *History;* Obioma Nnaemeka, *World Languages and Cultures/Women's Studies*
- **Associate Professors** Ramla Bandele, *Political Science*; Kelly Hayes, *Religious Studies;* Gina Sanchez Gibau, *Anthropology;* Ronda Henry, *English;* Monroe Little, *History;* Najja Modibo, *Sociology;* Una Osili, *Economics;* Jennifer Thorington-Springer, *English;*
- **Assistant Professors** Joseph L. Tucker Edmonds, *Religious Studies and Africana Studies*; Modupe Labode, *Museum Studies;*

Africana Studies encompasses the scholarly exploration of African and African American life and culture from an interdisciplinary perspective. Courses in Africana Studies are offered within the program and in many departments of the School of Liberal Arts.

American Sign Language/English Interpreting

- **Director** Janet Acevedo
- **Academic Advising** Cavanaugh Hall, Room 422, 317-274-4025, jacevedo@.

Contact by videophone: Call Video Relay Services, (317) 493-0364

Increasing numbers of Deaf people seek the communicative access that interpreters provide, and this access is mandated by legislators, yet there is a shortage of qualified interpreters nationally and locally. IUPUI's American Sign Language (ASL)/English Interpreting Program is one of very few baccalaureate degree programs available in the country. It prepares students to become capable and flexible participants in the rewarding profession of interpreting.

The ASL/English Interpreting Program introduces students to the theory and practice of interpreting. It provides a strong foundation in language, culture, interpreting, and linguistics. Students develop their abilities in ASL and English, analyze features of ASL and English, discuss ethical issues, and perform guided practice with both simultaneous and consecutive interpreting. The combination of this background with a broad liberal arts education prepares students to enter the profession of interpreting, which serves diverse populations and encompasses a wide range of subjects and settings.

American Studies

- **Director** Martin A Coleman, Philosophy
- **Professors** David Bodenhamer, History; Jonathan Eller, English; Carol Brooks Gardner, Sociology; Philip Goff, Religious Studies; Sara A. Hook, School of Informatics; Nathan Houser, Philosophy; Missy Dehn Kubitschek, English; John R. McKivigan, History; Jane Schultz, English; Peter J. Thuesen, Religious Studies; William Touponce, English; Marianne S. Wokeck, History
- **Associate Professors** Annie G. Coleman, History; Owen Dwyer, Geography; Karen R. Johnson, English; Thomas Marvin, English; Nancy Marie Robertson, History; Susan C. Shepherd, English; Rachel Wheeler, Religious Studies
- **Assistant Professors** Martin A Coleman, Philosophy; Jason Kelly, History;
- **Lecturers** Robert L. Beck, Geography and John Gosney, UITS
- **Executive Director, Institute for American Thought** David E. Pheifer

The field of American studies extends across a broad spectrum of disciplines to offer integrating perspectives on American experience, thought, and expression. In this respect, American studies is decidedly interdisciplinary in its approaches, but at the same time it is very much a field unto itself, generating its own lines of inquiry concerning the American cultural mosaic.

The American Studies Program includes overseas exchanges with the University of Derby, U.K., and Newcastle University, U.K.,which are both open to IUPUI students.

Women's Studies

- **Director** Associate Professor Nancy Marie Robertson
- **Professors** Gabrielle S. Bersier, German; Dennid Bingham, English; Paul Carlin, Economics; Ulla M. Connor, English; Carol Brooks Gardner, Sociology; Linda L. Haas, Sociology; Bessie House-Soremekun, Political Science and Africana Studies; Karen M. Kovacik, English; Missy Dehn Kubitschek, English; Obioma G. Nnaemeka, French and Africana Studies; Jean Robertson, Herron; Jane E. Schultz, English; Patricia Wittberg, Sociology; Marianne Wokeck, History
- **Associate Professors** Ronda C. Herny Anthony, English and Aricana Studies; Lorraine Blackman, Social Work; Terri A. Bourus, English; Peg Brand, Philosophy; Herbert Brant, Spanish; Jeanette Dickerson-Putman, Anthropology; Catherine A. Dobris, Communication Studies; Lynn Duggin, Labor Studies; Margaret Robertson Ferguson, Political Science; Gina Sánchez Gibau, Anthropology; Elizabeth M. Goering, Communication Studies; Kelly E. Hayes, Religious Studies; Susan Brin Hyatt, Anthropology; Karen Ramsay Johnson, English; Elizabeth A. Jones, Physical Education; Daniella Kostroun, History; Nancy Marie Robertson, History; Kristina Horn Sheeler, Communication Studies; Susan C. Shepherd, English; Jennifer Thorington-Springer, English; Rosa Tezanos-Pinto, Spanish; Kim White-Mills, Communication Studies; Reiko Yonogi, Japanese Studies
- **Assistant Professors** Jennifer Bute, Communication Studies; Modupe Labode, History; Roberta Lindsey, Music; Megan L. Musgrave, English
- **Senior Lecturers** Anita J. Morgan, History; Teresa Molinder Hogue, English
- **Lecturers** Patricia Clark, Biology; Martina L. Dalinghaus, Classical Studies; Sumana Jogi, Communication Studies; Shenan Kroupa, Psychology
- **Affiliates** Kathleen S. Grove, Director of the Office for Women; Krista Hoffmann-Longtin, School of Medicine; Kristi L. Palmer, Associate Librarian

The Women's Studies Program at IUPUI provides undergraduate students the opportunity to pursue a sequence of courses in a growing academic discipline—the study of women and their changing role in society. The program is interdisciplinary because women's experiences encompass the full range of human activity, and separate disciplines offer unique starting points in interpreting these experiences.

The importance of women's studies lies both in its interdisciplinary approach and in the timely opportunity it offers for the study of issues long neglected by scholarship.

Completion of the Women's Studies Program may provide an additional basis for pursuing future training in law, psychology, history, literature, or public or business administration in areas related to women. For students who do not continue professional or graduate training in an academic discipline, specializing in women's studies may provide a useful background in careers that focus on concerns of women, such as paralegal and probation work, secondary and elementary school counseling, journalism, and community agency service.

Individualized Major Program

- **Director** Professor Robert F. Sutton, World Languages and Cultures, Classical Studies

Committee for the Individualized Major

- **Professors** Richard Bein, Geography; Thomas Davis, Religious Studies; John Parrish-Sprowl, Communication Studies; William Schneider, History/Medical Humanities; Richard E. Ward, Anthropology
- **Associate Professors** Enrica Ardemagni, World Languages and Cultures, Spanish; Dennis Bingham, English/Film Studies; Timothy S. Brothers, Geography; David Craig, Religious Studies; Kristine Karnick, Communication Studies; Karen Kovacik, English; Thomas Marvin, English; Nancy Robertson, History/Women's Studies/American Studies; Susan Shepherd, English/Linguistics; Reiko Yonogi, World Languages and Cultures, Japanese.
- **Assistant Professors** Jing Wang, World Languages and Cultures, Chinese; David Weiden, Political Science
- **Lecturers** Erin Engels, Political Science; Sharokh Towfighi, Economics
- **Faculty** All members of the IUPUI faculty are eligible to teach courses and serve as Faculty Advisors for an Individualized Major.
- **Academic Advising** Cavanaugh Hall 540B, 317-274-7611
- **Web site** liberalarts.iupui.edu/imp/

While the needs of most students are well served by existing majors offered on campus, some students have academic interests that do not fit well into existing programs or traditional disciplinary boundaries. The Individualized Major Program (IMP) in the School of Liberal Arts meets the needs of such students. It serves disciplined and self-motivated students who may wish to major in traditional disciplines or interdisciplinary areas for which majors are not available at IUPUI, as well as those who wish to fashion unique and original interdisciplinary majors that reflect their individual experience, interests, and needs. These include students whose work and life experiences suggest the need for fresh ways of organizing existing courses into meaningful new majors, as well as innovative students who wish to bring together course work in several disciplines to focus on a thematic area or make unusual yet valid connections between areas that are rarely studied together. The IMP can also serve transfer students who wish to continue work started elsewhere in areas in which IUPUI has faculty expertise but no organized majors.

Unlike other majors, which prescribe a fixed area of study, the individualized major provides a structure that allows such students, in consultation with faculty members, to design their own majors on various topics and fields of study. Each major course of study varies in accordance with the needs and interests of individual students. Students work closely with faculty advisors, and all individualized majors are overseen and approved by a faculty committee that ensures each student-designed major has intellectual integrity and rigor.

Admission and Academic Progress

For information and initial counseling,students should should contact the Program Office in CA 540B, 317-274-7611. All students seeking admission to the IMP must be admitted to the School of Liberal Arts and normally have a minimum cumulative GPA of 2.5 and declare their major as prospective (Pre-Individualized Major) in CA 401. All liberal arts students, except those on academic probation, are eligible to apply for an Individualized Major Program. Before making formal application for admission to the Individualized Major Program, students should normally have completed at least 30 hours of general education requirements including English W132, Communication R110, and Mathematics M118 (or its equivalent).

Students desiring to pursue an individualized major should confer with the director of the program who will provide assistance in identifying and securing the agreement of a faculty member to serve as advisor. Under the supervision of this advisor the student will take I360, a 1-credit hour tutorial course in which he or she prepares a proposal for an individualized major. A student is admitted into the Individualized Major Program when this major proposal is approved by a small committee appointed by the director. These committees are individualized for each student; they include the advisor, members of the faculty Committee for the Individualized Major, and other faculty members with appropriate expertise who may be recommended by the student and advisor. Once the major proposal is approved, students declare their major as Individualized Major in CA 401. The major plan may subsequently be amended only in consultation with the advisor and with approval of the student's committee.

After gaining admission to the program, students must meet each semester with their advisors to register for courses and consider academic progress. A key component of the senior year is the variable credit capstone course I460, an independent study project in which students synthesize their work in the major. The project is approved and graded by the IMP Committee or a panel of experts appointed by the committee. The advisor and the IMP director certify students for graduation with the individualized major.

Requirements

The individualized major requires a minimum of 34 credit hours:

1. Two courses are required of all students (4-7 cr.):
   - I360 Individualized Major Plan (1 credit hour), a tutorial in which a student develops his or her plan for a major, including a list of courses, schedule, and rationale. This proposal must be more than a simple list of courses. Students proposing majors in traditional fields should discuss the history and nature of the discipline, describe its subfields and the methodologies it employs, and show how the proposed major fits within this framework. Those designing unique majors need to establish the intellectual unity of the proposed major and show appreciation of the different disciplinary traditions and methodologies on which it will draw. Upon approval of this plan by an advisor and the faculty Individualized Major Program Committee, the student is accepted into the Individualized Major Program.
   - I460 Individualized Major Senior Project, a variable credit tutorial (3-6 cr.) preferably taken over two semesters as a 6-credit hour course devoted to a capstone project that culminates and integrates the individualized major. Normally this is a major research paper with an oral presentation. Other options, such as a performance, multimedia product, work of literature, film, or work of art, may be approved if appropriate for a particular plan of study. Normally the project is defended through a seminar or colloquium. Ideally the grade for this course is recommended by the advisor and approved by the faculty Committee for the Individualized Major. In practice, the committee grants authority to the director to appoint individual faculty committees to assist advisors in assigning grades.

2. The remaining courses are selected from existing courses.
   - No lower- or upper-division courses applied to general education requirements may be included in the individualized major.
   - At least 15 credit hours in the major must be at the 300 or 400 level (in addition to I360 and I460).
   - No more than 6 credit hours of independent study may be counted in the major.
   - All courses counted in the major must be taken for letter grade; no course receiving a grade below C may be counted toward the major.

International Studies

Director Associate Professor Michael Snodgrass, History

Professors Frederick Bein, Geography; David Bell, Sociology; Linda Bell, Communication Studies; Gabrielle Bersier, World Languages and Cultures; Ulla Connor, English; Edward Curtic IV, Religious Studies; Jon Eller, English; Linda Haas, Sociology; Didier Gondola, History; Bessie House-Soremekun, Political Science; John McCormick, Political Science; Obioma Nnaemeka, World Languages and Cultures; John Parrish-Sprowl, Communication Studies; Peter Rangazas, Economics; William Schneider, History; Robert White, Sociology;

Associate Professors Marta Anton, World Languages and Cultures; Robert Aponte, Sociology; Enrica Ardemagni, World Languages and Cultures; Wan-Ning Bao, Sociology; Didier Bertrand, World Languages and Cultures; Herbert Brant, World Languages and Cultures; Tim Brothers, Geography; Kevin Cramer, History; Jeanette Dickerson-Putman, Anthropology; Thomas Fedor, Geography; Carrie Foote, Sociology;Gina Sánchez Gibau, Anthropology; Elizabeth Goering, Communication Studies; Ain Haas, Sociology; Kelly Hayes, Religious Studies; David Hoegberg, English; Sue Hyatt, Anthropology; Jason Kelly, History; Daniella Kostroun, History; Una Osili, Economics; Scott Pegg, Political Science; Kevin Robbins, History; Eric Saak, History; Rosa Tezanos-Pinto, World Languages and Cultures; Jennifer Thorington Springer, English; Gail Gráinne Whitchurch, Communication Studies; Gregory Witkowski, Philanthropic Studies; Reiko Yonogi, World Languages and Cultures; Xin Zhang, History

Assistant Professors Joseph Tucker Edmonds, Religious Studies, Africana Studies; Andrea Jain, Religious Studies; A Kate Miller, World Languages and Cultures; Ben Van Wyke, World Languages and Cultures; Jing Wang, World Languages and Cultures; Ye Zhang, Economics; Iker Zulaika, World Languages and Cultures

Senior Lecturers Claudia Grossman, World Languages and Cultures; Erik Lindseth, History

Lecturers Fadia Antalbi, World Languages and Cultures; Amy Bomke-Keating, World Languages and Cultures; Amira Mashhour, World Languages and Cultures; Tijen Demeril-Pegg, Political Science; Jasper Sumner, Political Science; Dawn Whitehead, Office of International Affairs; Peg Williams, Anthropology; Rafia Zakaria, Political Science

The world is becoming a smaller place in which to live, and the interdependence of our political, cultural and economic systems is growing by the day. Locally, Indiana's economic health is increasingly tied to foreign direct investment (FDI) and exports of agricultural, life science, or automotive products. The state ranks in the top 15 nationally in FDI and exports, while the 'Crossroads of America' is now a major international freight hub. Record numbers of immigrants from places like Mexico, South Asia, and West Africa are transforming the cultural and political landscape of central Indiana. Meanwhile, Hoosiers are serving abroad in the military, in the Peace Corps, as missionaries, or as members of the international business community. To prepare students for life and careers in an increasingly globalized world, the School of Liberal Arts offers the B.A. and a minor in International Studies.

The interdisciplinary character of International Studies distinguishes it from International Relations, the Political Science subfield with which it is often confused. In the IS program students learn another language, specialize in one of five world regions, enrich their academic experience through study abroad, and study the cultural, historical, political, and economic forces at work in our 21st century world. They take advantage of the international opportunities offered at IUPUI, one of five 2011 recipients of the Paul Simon Award for Comprehensive Internationalization

The most innovative feature of the major is that students tailor a combination of area and thematic concentrations to meet their own academic interests and career goals. A student pursuing a career in the burgeoning non-governmental organization sector could combine a thematic concentration on development or global civil society with an area concentration on Africa or Latin America and the Caribbean. Another student interested in a Foreign Service career might combine a thematic concentration on international relations with an area concentration on the Middle East and study Arabic as their foreign language. In short, students customize their area and thematic coursework to meet any variety of different interests and needs.

Medical Humanities and Health Studies

Director Professor William H. Schneider, *History, Medical Genetics, Center for Bioethics*
Professors Kimberly Quaid, *Medical Genetics*; Carol Gardner, *Sociology*; Richard Gunderman, *Philosophy and Radiology*; Eleanor Kinney, *Law*; Eric Meslin, *Philosophy and Medicine*; David Orentlicher, *Law and Medicine*; Sandra Petronio, *Communication Studies*; Lynn Pike, *Sociology*; William Schneider, *History and Medical Genetics*; *Jane Schultz,* English; Richard Ward, *Anthropology and Dentistry*; Eric Wright, *SPEA and*

Associate Professors David Craig, *Religious Studies*; Jeanette Dickerson-Putman, *Anthropology*; Jason Eberl, *Philosophy*; Carrie E. Foote, *Sociology*; Margaret Gaffney, *Medicine*; Gregory Gramelspacher, *Medicine*; William Gronfein, *Sociology*; Peter Marcus, *Ob/Gyn*; Wendy Morrison, *Economics*; *Rebecca Sloan, Nursing; Kathleen Zoppi*, Family Medicine

Assistant Professors Susan Hickman, *Nursing*; Lois Lane, *Nursing and Regenstrief Institute*; Tamara G. J. Leech, *Sociology*; Jeremy J. Wilson, *Anthropology*

Senior Lecturer Archana Dube, *Economics and Public Health*

Assistant Scholar Emily Beckman, *Medical Humanities-Health Studies*

The Medical Humanities and Health Studies Program provides a unique opportunity for students in liberal arts, pre-medicine, allied health sciences, pre-dentistry, and nursing, and for all those interested in the state of health care in America, to explore the concepts of health and illness from an interdisciplinary and multidisciplinary perspective.

Minor in Medical Humanities and Health Studies

The interdisciplinary minor in medical humanities and health studies seeks to promote an increased awareness of the humanistic, social, and cultural dimensions of health care and health care systems. It provides an exciting opportunity for students to work in close conjunction with faculty who have strong teaching and research interests in the area of health care. A survey of the relevant issues to be addressed during the course of study in the minor includes human values and ethics in decision making; the idea of preventive and holistic health and health care; patient care as an art form and scientific endeavor; the relation among ecology, economy, and health care; the relation between cultural and social systems and health and health care; the connection between health care systems and good health; the role of the provider-client relationship, especially in the areas of communications skills and the humanistic dimensions of patient care; the meanings of suffering, illness, and dying; the role of technology in improving care but creating a legacy of dehumanization of patients; and the role of the consumer in the health care system.

The minor entails successful completion of a minimum of 15 credit hours, distributed as follows:

Required Core Course

MH301 Perspectives on Health, Disease, and Healing (3 cr.) The course utilizes the perspectives of the humanities and social science disciplines to provide students with a broader understanding of the many facets of health and disease, suffering and dying, as well as the art and science of healing.

Required Exit Course

MH495 Independent Project Seminar in the Medical Humanities and Health Studies (3 cr.) Each student pursuing a minor degree in the Medical Humanities and Health Studies Program who has completed at least 9 credit hours toward the degree will take a seminar or be given the opportunity to develop a research or applied project related to the interests of the Medical Humanities and Health Studies Committee. This seminar or project will allow the student to apply the knowledge gained from the course work taken in the Medical Humanities and Health Studies Program, serving to tie together the humanistic and social scientific bases of

health care in a directed endeavor of interest to the student. The student should contact the chairperson to arrange the details of this independent project.

Electives (3 courses/9 credits)
At least 3 credits from each of both

- Humanistic perspectives
- Social Science perspectives

An additional 3 credits chosen from the above categories or from

Other electives

NOTE: No more than two courses from any one discipline can count toward this interdisciplinary minor.

Communication Studies

- C392 Health Communication (3 cr.)
- C410 Health Provider–Consumer Communication (3 cr.)

English

L431 Literature and Medicine (3 cr.)

History

- H364 History of Medicine and Public Health (3 cr.)
- H374 History of Science and Technology II (3 cr.)
- H425 Topics in History: Humanitarian Assistance (3 cr.)

Medical Humanities & Health Studies

- M492 Topics in MHHS: Perspectives on Medicine in Film (3 cr.)
- M492 Topics in MHHS: Culture of Mental Illness - Literary Representations of Mental Illness (3 cr.)

Philosophy

- P393 Biomedical Ethics (3 cr.)

Religious Studies

- R384 Religion, Ethics and Health (3 cr.)
- R327 Sociology of Death and Dying (3 cr.)

Anthropology

- A337 African American Health Care (3 cr.)
- A460 Diseases in Human Evolution (3 cr.)
- B370 Human Growth and Development (3 cr.)
- B480 Human Variation (3 cr.)
- E421 The Anthropology of Aging (3 cr.)
- E445 Medical Anthropology (3 cr.)

Economics

- E307 Current Economic Issues: Health Economic Issues (3 cr.)
- E387 Health Economics (3 cr.)

Geography

- G410 Medical Geography (3 cr.)

Sociology

- R285 AIDS and Society (3 cr.)
- R321 Women and Health (3 cr.)
- R381 Social Factors in Health and Illness (3 cr.)
- R382 Social Organization of Health Care (3 cr.)
- R410 Alcohol, Drugs, and Society (3 cr.)
- R415 Sociology of Disability (3 cr.)
- R485 Sociology of Mental Illness (3 cr.)

The remaining 3 credit hours of electives may come from the courses above or the following courses:

Medical Humanities and Health Studies

- MH492 Topics in Medical Humanities and Health Studies (3 cr.)
- MH498 Readings in Medical Humanities and Health Studies (1-3 cr.)

Nursing

- S474 Applied Health Care Ethics (3 cr.)

SPEA

- H316 Introduction to Environmental Health (3 cr.)
- H320 Introduction to Health Administration (3 cr.)
- H322 Principles of Epidemiology (3 cr.)
- H354 Health Economics (3 cr.)
- H420 Health Policy (3 cr.)

Note: Other courses may be accepted upon approval of the Medical Humanities and Health Studies Committee. See the Medical Humanities and Health Studies Committee Chairperson or Lead Advisor for information.

The School of Liberal Arts at IUPUI offers students the special option to design programs of study that are outside the scope of existing major programs. Students have utilized this option to design interdisciplinary majors in medical humanities and health studies-oriented fields of study such as international health and culture studies. For more information, please contact the MHHS Program or the Individualized Major Program, (317) 274-7611, Cavanaugh Hall 540B.

Museum Studies

- **Director** Associate Professor Elizabeth Kryder-Reid, Museum Studies, Anthropology
- **Professors** Debra Mesch, SPEA; Paul Mullins, Anthropology; Jean Robertson, Art History; Philip Scarpino, History;; Larry Zimmerman (Public Scholar of Native American Representation) Museum Studies, Anthropology
- **Associate Professors** Jeanette Dickerson-Putman, Anthropology; Owen Dwyer, Geography; Matt Groshek (Public Scholar of Exhibit Planning and Design), Museum Studies, Visual Communication; Youngbok Hong, Visual Communication; Jennifer Lee, Fine Arts; Elizabeth Brand Monroe, History;; Kevin Robbins, History; Elizabeth Wood (Public Scholar of Museums, Families, and Learning), Museum Studies, Education

- **Assistant Professors** Modupe Labode (Public Scholar of African American History and Museums), Museum Studies, History; Rebecca Shrum, History;
- **Academic Advising** Cavanaugh Hall 419, (317) 274-1406
- **Department E-mail** museum@iupui.edu
- **Department Web site** http://liberalarts.iupui.edu/mstd/

The Museum Studies Program provides an integration of museum history and theory with hands-on instruction in museum techniques and practices. It encompasses the scholarly exploration of museums, including their history, operations, ethics, and role in society, from interdisciplinary perspectives while also training students in the technical aspects of museum work such as collections care and management, administration, education, exhibit planning and design, curatorial practices, visitor studies, and technology.

As an urban university, IUPUI is part of a community with a rich heritage of museums and cultural arts. Faculty appointed as Public Scholars of Civic Engagement craft relationships and sustainable partnerships with area museums and cultural institutions and involve undergraduate and graduate students in meaningful ways in those collaborations. The program also offers extensive opportunities for student learning through the resources of the museum community, with experiences such as internships, involvement in exhibit development and design, exhibition, and collections focused courses, access to collections, collaboration with faculty on museum research projects, and participation in museum-sponsored seminars, lectures, and professional meetings. The integral role of Indianapolis museums in the museum studies curriculum fosters a critical, reflective, and scholarly discourse on museums that is applied to current practices and issues in the field.

The program offers a master's degree and both an undergraduate and a graduate certificate. Undergraduate students considering application to the certificate are welcome in the classes. Up to nine credits earned as a graduate non-degree student may be applied toward the graduate certificate or degree upon admission to the program. Please see the Web site for admissions deadlines and current course offerings.

Philanthropic Studies

Executive Director, Center on Philanthropy at Indiana University Patrick M. Rooney

Director of Academic Programs Dwight F. Burlingame

Chair of Faculty Debra J. Mesch

Academic Advising *Sigma Theta Tau (TG) 301, 317-278-8911*

Philanthropic Studies at Indiana University is interdisciplinary, inter-professional, and system-wide. The field addresses voluntary contributions of service and funds, voluntary associations, and what has been called ''the social history of the moral imagination.'' Areas of inquiry range from the history of philanthropy and philanthropy in literature (in the School of Liberal Arts at IUPUI) to fundraising management and legal issues (in other schools at IUPUI and IU Bloomington). Undergraduate and graduate degrees, minors, and certificates in various areas of philanthropic studies are currently available in the School of Liberal Arts and in other schools at IUPUI and IU Bloomington. For more information, visit the Center on Philanthropy at www.philanthropy.iupui.edu.

Film Studies

For information on film studies, see the description of the film studies minor included in the “English” section of this bulletin. For course descriptions, consult the “Courses” sections in this bulletin. For English majors, film studies courses are considered part of the major.

Film Studies

- FILM C292 An Introduction to Film (3 cr.)
- FILM C350 Film Noir
- FILM C351 Musicals
- FILM C352 Biopics
- FILM C361 Hollywood Studio Era 1930-1949
- FILM C362 Hollywood in the 1950s
- FILM C380 French Cinema (3 cr.)
- FILM C390 The Film and Society: Topics (3 cr.)
- FILM C391 The Film: Theory and Aesthetics (3 cr.)
- FILM C392 Genre Study in Film (3 cr.)
- FILM C393-C394 History of European and American Films (3-3 cr.)
- FILM C491 Authorship in Cinema (3 cr.)

- International Studies
- Medical Humanities and Health Studies
- Motorsports Studies
- Museum Studies
- Philanthropic Studies
- Urban Studies
- Women's Studies

Motorsports Studies

The Certificate in Motorsports Studies will serve student interests and community needs. The motorsports industry has a significant influence on the social and economic fabric of central Indiana, the mid-west, the United States and, indeed, the world. For those interested in increasing their understanding of motorsports, the certificate will provide that background. At the same time, various sectors of the industry need employees with a general understanding of motorsports, but who also bring training and skills in communications, business, management, and tourism, among other areas. Three tracks of the certificate will provide that focus.

By drawing on the expertise available through the curriculum offered by the IUPUI School of Engineering and Technology and their BS in Motorsports Engineering, in addition to courses offered through the School of Business, the School of Journalism and the School of Physical Education and Tourism Management, this Motorsports Studies Certificate will offer a unique opportunity to study many different facets of the motorsports industry. Special emphases (“tracks”) are available for students interested in communication and public relations, business, finance, management, and tourism management, as related to the motorsports industry. The required capstone course, which may include internships, will help place students in jobs in the motorsports industry, if they so desire.

These four areas of emphasis will be available within the program:

- **Motorsports Studies**
- **Communication and Public Relations**
- **Business, Finance, and Management**
- **Tourism and Event Management**

The Certificate is designed to supplement an undergraduate student's major field of study or stand alone. The Certificate will be awarded after the student has completed 21 hours of coursework, which includes 9 hours of core courses in Motorsports Studies, 9 hours of focused electives, and a 3 credit capstone course. Each of these courses must be passed with a grade of C or above in order to count for the Certificate. Electives must be approved by the Motorsports Studies Director prior to registration.

Required Courses:

- **MSPT Z100** Motorsports Studies (3cr)
- **MSTE 27200** Introduction to Motorsports (3cr)

One of the following (3cr):

- **COMM C380** Organizational Communication
- **ENG W231** Professional Writing Skills
- **COMM G310** Introduction to Communication Research
- **SOC R351** Social Science Research Methods *and*
- **MSPT Z444** Motorsports Studies Capstone (3cr) *or* **MSPT Z445** Motorsports Studies Internship

Note 1: Students may not "double count" required courses and courses in the different areas described below. For example, R351, Social Science Research Methods, will not be counted as both a required motorsports course and a course in the Motorsports Studies Emphasis. Note 2: The instructors of MSPT 100 and MSTE 272 will collaborate to insure that these courses are complementary.

Electives

In order to complete one of the four areas of emphasis listed above, students will select 9 hours of electives in consultation

with the Director of the Motorsports Studies. The Motorsports Studies Capstone will be designed by the student in consultation with the Director of Motorsports Studies. The capstone will help students synthesize and demonstrate what they have learned while readying them for opportunities in the motorsports industry. The capstone may consist of either an internship with a motorsports related organization or significant research project. The student's chosen emphasis will appear on the transcript.

The following is a sample list of elective courses for each track:

Motorsports Studies Emphasis (3 courses/9 credits from the list below):

- **HIST A421** Topics in United States History: History of Sports, Recreation, and Leisure (3cr)
- **GEOG G310** Introduction to Communication Research *or* **SOC R351** Social Science Research Methods (3cr)
- **COMM C380** Organizational Communication (3cr)
- **ENG W231** Professional Writing Skills (3cr)
- **ECON E307** Economics of Sport (3cr)
- **AFRO A303** Topics in African American and African Diaspora Studies (such as, Sport, Culture, and African Americans) (1-3cr)
- **AMST A303** Topics in American Studies (1-3cr)
- **WOST W300** Topics in Women's Studies (1-3cr)

Note: Although variable credits are available in some of the above listed courses, 9 total credits are required.

Communication and Public Relations Emphasis (3 courses from the list below):

- **ENG W231** Professional Writing Skills (3cr)
- **COMM C380** Organizational Communication (3cr)
- **TCEM 231** Tourism and Hospitality Marketing (3cr)
- **JOUR J219** Introduction to Public Relations (3cr)
- **JOUR J340** PR Tactics and Techniques (3cr)
- **JOUR J360** Understanding Sports Media (3cr)

Note: JOUR J360 is a temporary number.

Several of the courses listed have pre-requisites or require consent of the instructor. For example, W231, Professional Writing Skills, has a pre-requisite of W131, Elementary Composition 1 (and a grade of C or better), and E307, Economics of Sport, has a pre-requisite of E201 (Introduction to Microeconomics), sophomore standing, or consent of the instructor. 200 level Business courses have no pre-requisites; the 300 level Business courses have several prerequisites.

Students are encouraged to examine the IUPUI Campus Bulletin, to consult with their advisor, and to consult with the Director of Motorsports Studies prior to embarking on a course of studies that leads to a Motorsports Studies Certificate.

Business, Finance, and Management Emphasis (3 courses from the list below):

- **MSTE 31000** Business of Motorsports I (3cr)
- **MSTE 31100** Business of Motorsports II (3cr)
- **ENG W231** Professional Writing Skills (3cr)
- **JOUR J360** Sports Marketing and Advertising (3cr)
- **BUS M200** Marketing and Society: A Look at Roles and Responsibilities *or* **BUS M300** Introduction to Marketing (3cr)
- **BUS W200** Introduction to Business and Management (3cr)
- **BUS F200** Foundations of Financial Management *or* **BUS F300** Introduction to Financial Management (3cr)
- **BUS P200** Foundations of Operations and Supply Chain Management *or* **BUS P300** Introduction to Operations Management (3cr)

Note: JOUR J360 is a temporary number.

Tourism and Event Management Emphasis (3 courses from the list below)

- **ENG W231** Professional Writing Skills (3cr)
- **TCEM 219** Management of Sport Events (3cr)
- **TCEM 231** Tourism and Hospitality Marketing (3cr)
- **TCEM 329** Sport Marketing (3cr)
- **TCEM 362** Tourism Economics (3cr)

III. What are the Admission Requirements?

Students usually will enter the program fall semester, but may apply for spring semester under special circumstances. Admission to the program requires junior standing. Motorsports Studies will make the decision on admission to the program. Students currently enrolled at IUPUI may be considered for admission to the program if they meet the following criteria:

1. Have earned 55 credit hours towards their degree at IUPUI
2. Have at least a cumulative 2.5 GPA

Students who have not enrolled at IUPUI may be considered for admission to the program if they meet the following criteria:

1. Apply for Undergraduate Admission to IUPUI and specify the Motorsports Studies Certificate as their objective.
2. Have 55 credit hours of transferable work.
3. Have at least a cumulative 2.5 GPA

Anthropology

Anthropology is the study of human culture, biology, and social interaction across time and place. It includes the archaeological investigation of past and present human material culture; ethnographic study of contemporary cultures around the world and in the United States; research into human evolution and the origins of human physical diversity; and analysis concerning the origins, structure, and social use of language.

The anthropology curriculum at IUPUI emphasizes the practical application of anthropological concepts, theory, and methods. It contributes to student growth in three ways: Anthropology is the study of human culture, biology, and social interaction across time and place. It includes the archaeological investigation of past and present human material cult by broadening their understanding of the human experience across cultures and time; by providing a comparative perspective from which to develop an appreciation of human diversity and an understanding of different values and ethical beliefs in a complex, international world; and by providing practical learning experiences in a variety of settings, including community agencies, museums, governmental institutions, health agencies, and neighborhood associations. The anthropology program also has laboratories to assist the faculty and students with guided research in archaeology, ethnography, biological anthropology, and forensics. Frequent summer field courses, both local and international, give students additional opportunities for experiential learning.

Thus, a degree in anthropology from IUPUI prepares a student for lifelong success by improving their ability to think critically, and to integrate and apply knowledge, and by fostering a broad understanding of culture and society. Our graduates have found work in a variety of social service agencies, educational institutions, museums, and governmental organizations. In addition, approximately half of our graduates go on to seek advanced degrees in anthropology or related fields.

In addition to the Bachelor of Arts degree, we offer minors in anthropology and cultural diversity. These programs provide a base to complement careers in fields such as nursing, social work, education, psychology, or urban planning. We also offer a graduate minor in the anthropology of health and support both a graduate and an undergraduate certificate in the Museum Studies Program. Finally, the Anthropology Club serves as a forum for students to exchange ideas, organize field trips, and serve their community.

Communication Studies

- **Chair:** Associate Professor Kristina Horn Sheeler
- **Professors:** Linda Bell, Richard K. Curtis (Emeritus), Robert C. Dick (Emeritus), John Parrish-Sprowl, Sandra Petronio, Dorothy L. Webb (Emerita), J. Edgar Webb (Emeritus)
- **Associate Professors:** David G. Burns (Emeritus), Catherine A. Dobris, Elizabeth M. Goering, Kristine B. Karnick, Nancy Rhodes, Kristina Horn Sheeler, Gail G. Whitchurch, Kim White-Mills
- **Assistant Professors:** Jennifer Bute, Jonathan Rossing
- **Senior Lecturers:** Jennifer Cochrane, Jan DeWester, Kate Thedwall, Ronald M. Sandwina
- **Lecturers:** Jaime Hamilton, Sumana Jogi, Stephen LeBeau, Michael Polites, Trevor Potts, Charles Reyes, Ian Sheeler
- **Professional Staff:** Robin Waldron, Assistant to the Chair

Communication Studies is an integral part of Liberal Arts. The Department of Communication Studies at IUPUI offers an undergraduate major, five minors, two certificate programs, and a Master of Arts degree in Applied Communication. The curriculum focuses on the application of communication theories, methods, and competencies toward solving practical problems and creating civically engaged citizens.

Communication Studies coursework assists students in enhancing such competencies as critical inquiry, problem solving, media and message design, campaign development, oral performance, relational interaction, and cross cultural communication. The Communication Studies curriculum provides a foundation for students interested in pursuing careers that apply communication principles in variaous contexts and fields, such as public relations, sales, marketing, media, corporate, political, health, training and development, human resources, public affairs, consulting, and special events planning. In addition, it prepares students for graduate work in various areas, including communication, informatics, humanities, or social sciences, or in professional programs such as law, business, health, and social work.

The department offers a competitive intercollegiate forensics program, undergraduate and graduate student organizations, and scholarship, research and study abroad opportunities.

For more information, contact the department office at (317) 274-0566, or by e-mail at commdept@iupui.edu, or visit the Communication Studies Web site: iupui.edu/~comstudy.

Economics

Economics is the study of how people and societies determine how much to work both in the marketplace and at home, how much to spend, save, and invest. A major in economics supports the liberal arts tradition of promoting students' growth in critical thinking and developing an understanding of the world around them. Economics provides insight into how markets can function in coordinating the activities of many diverse buyers and sellers. It also indicates

conditions which make it difficult for markets to function well without either governmental or nonprofit sector intervention.

Economics also analyzes trends and forces affecting the economy as a whole such as a sound monetary system, price level changes, employment and income growth. A degree in economics provides problem-solving and analytical skills, which are applicable in many professions and careers. It is excellent preparation for graduate and professional school, including law school, and for rewarding careers in consulting, finance, and other private and public sector employment.

- **Chair:** Professor Paul Carlin
- **Professors:** David Bivin, Subir Chakrabarti, Robert Harris, E. Jane Luzar, Peter Rangazas, Patrick Rooney, Steven Russell, Robert Sandy, Martin Spechler (Emeritus), Richard Steinberg, Mark Wilhelm

- Graduate advisors:
- Masters program: Professor Peter Rangazas, Cavanaugh Hall 518, (317) 274-4756
- Ph.D. program associate: Professor Anne Royalty, Cavanaugh Hall 509D, (317) 278-0449

The Center for Economic Education

The Center's goal is to have all Indiana schools meet or exceed the Voluntary National Content Standards in Economics so that all students will leave school with a basic understanding of economics and with the problem solving skills needed to become prosperous workers, consumers, and citizens in the next century. To meet these goals, the IUPUI Center for Economic Education and the Indiana Council for Economic Education strive to increase the economic understanding and decision making skills of students by providing educators with a basic understanding of economics, teaching strategies, and curriculum materials which are objective and consistent with state and national educational guidelines.

English

- **Chair:** Professor Thomas A. Upton
- **Professors:** Dennis Bingham, Ulla M. Connor, Jonathan R. Eller, Karen Kovacik, Missy Dehn Kubitschek, Jane E. Schultz, William F. Touponce, Thomas A. Upton

- **Academic Advising:**
- Cavanaugh Hall 423, (317) 274-3824
- English department faculty advise majors under the coordination of Jim Powell, associate chair for students, Cavanaugh Hall 429, (317) 278-2985, jepowell@iupui.edu

Through its courses and other activities in writing, creative writing, literature, linguistics, language instruction, and film, the Department of English seeks to foster students' abilities to read closely, think deeply and critically, research effectively, and write with clarity and purpose, preparing students for meaningful lives and a variety of careers.

The Department of English offers introductory and advanced instruction in the methods and traditions of literary analysis, writing, and language study. Its offers concentrations in five areas: creative writing, film studies, language and linguistics, literature, and writing and literacy.

The department also administers the English for Academic Purposes Program, the Writing Program, and the University Writing Center as well as the program in American Sign Language/English Interpreting.

Contact the department office at (317) 274-3824 or english@iupui.edu with messages, questions, and announcements, or to subscribe to the department's e-mail list for announcements and news.

Geography

- **Chair:** Professor Jeffrey Wilson
- **Professors:** Frederick Bein, Jeffrey Wilson
- **Associate Professors:** Timothy Brothers, Owen Dwyer, Thomas Fedor, Pamela Martin

- **Adjuncts:** Associate Librarian James Baldwin; Professor Greg Lindsey; Gilbert Liu, MD; Instructor Kevin Mickey; Professor Gilbert Nduru; Professor John Ottensmann; Professor Catherine Souch; Sarah Wiehe, MD
- **Lecturers:** Andrew Baker; Professor Robert Beck;
- **Academic Advising:**

- Owen Dwyer, Undergraduate Advisor
- Rudy Banerjee, Graduate Advisor

Cavanaugh Hall 213, phone: (317) 274-8877; fax: (317) 278-5220; e-mail: @.; Department Web site: www.iupui.edu/~geogdept. Please refer to this Web site for updates of all degree and certificate requirements.

Geography, like history, is a way of looking at the world. Whereas historians study variation through time, geographers study variation through space: how and why the earth's natural and human features vary from place to place. Underlying this spatial approach are such recurring themes as spatial diffusion of people, goods, and ideas; the significance of location in human interaction; the power of place in human conscience; and the interaction of physical and human processes to create landscapes. Geographers work at the intersection of social and natural sciences, using the concepts and methods of both to examine human-environmental relationships in their full complexity. This integrative approach is a hallmark of geography and one of its main attractions. Geographers can be found in a great variety of positions often not specifically identified as geographic: environmental management, urban planning, conservation, recreation and tourism, transportation planning, international affairs, and many others.

Programs in Geographic Information Science

During the last two decades, rapid growth has occurred in the field of geographic information. Stimulated by advances in technology and the collection, storage and analysis of data, a new sub-discipline has emerged: geographic information science. Geographic information science involves research on the development and application of spatial technologies, including geographic information systems, remote sensing, and the global positioning system. At the core of geographic information science is the integration of these technologies and their application to problems of spatial analysis. The fundamental theories and principles of geographic information science are based in geography. However, virtually all fields (engineering, medicine, science, management, business, social sciences, and humanities) are now embracing geographic information science in theoretical and applied research.

The IUPUI Department of Geography offers an Undergraduate Certificate, Graduate Certificate, and Master of Science in Geographic Information Science.

History

- **Chair:** Professor Robert G. Barrows
- **Professors:** Robert G. Barrows,David J. Bodenhamer, Bernard Friedman (Emeritus), Didier Gondola, Ralph Gray (Emeritus), John R. Kaufman-McKivigan, Miriam Z. Langsam (Emerita), Philip V. Scarpino, William H. Schneider, Peter J. Sehlinger (Emeritus), Mary Seldon (Emerita), Jan Shipps (Emerita), Marianne S. Wokeck
- **Associate Professors:** Kevin Cramer, Kenneth E. Cutler (Emeritus), Sabine Jessner (Emerita), Jason Kelly, Daniella Kostroun, Justin Libby (Emeritus), Monroe Little Jr., Elizabeth Brand Monroe, Berthold Riesterer (Emeritus), Kevin C. Robbins, Nancy Marie Robertson, Eric Saak, Michael Snodgrass, Xin Zhang
- **Assistant Professors:** Sheila M. Cooper (Emerita), Modupe Labode, Rebecca Schrum
- **Senior Lecturers:** Erik Lindseth, Anita Morgan
- **Adjunct Professors:** John Dichtl, National Council on Public History; P.M.G. Harris; Elizabeth Kryder-Reid, Anthropology (Museum Studies); David Vanderstel
- **Academic Advising:** Cavanaugh Hall 504M, (317) 274-3811

The Department of History offers students the opportunity to better understand the human social condition through the systematic study of the human past. A variety of courses is offered, dealing with the history of the United States, Europe, Latin America, and some non-Western areas. The history major not only provides opportunities to serve the avocational interest of the liberal arts student, but also provides a foundation for continued work at the graduate level. Courses in history serve the student admirably in fulfilling the tradition of a liberal education. They also provide a solid basis for professional training in fields such as law, business, environmental affairs, historic preservation, public administration, and government.

Philosophy

- **Chair:** Professor John J. Tilley
- **Professors:** Michael Burke (Emeritus), Edmund Byrne (Emeritus), André De Tienne, Anne Donchin (Emerita), Richard Gunderman, Nathan Houser (Emeritus), Laurence Lampert (Emeritus), Michael McRobbie, Eric Meslin, Paul Nagy (Emeritus), John Tilley
- **Associate Professors:** Peg Brand, Martin Coleman, Cornelis de Waal, Jason Eberl, Robert Frye (Emeritus), Timothy Lyons, Ursula Niklas Peterson (Emerita)
- **Assistant Professors:** Chad Carmichael, Peter Schwartz
- **Senior Lecturers:** J. Gregory Keller, Christian Kraatz, Luise Morton, David Pfeifer, Victoria Rogers
- **Adjunct Professors:** Carl Hausman, John L. Hill
- **Assistant Secretary:** Michelle Ruben
- **Academic Advising**
- Cavanaugh Hall 340A or 344, (317) 274-3842 or (317) 274-5338 or (317) 274-4690

Philosophic inquiry aims, ultimately, at a general understanding of the whole of reality. It draws on the insights of the great historical philosophers, on what has been learned in all other major fields of study, and on the rich perspectives embodied within ordinary ways of thinking. Philosophers address a diverse array of deep, challenging, and profoundly important questions. Examples include the nature of the self and of personal identity; the existence or nonexistence of God; the nature of time, mind, language, and science; the sources and limits of human knowledge; the nature of the good life; the foundations of state authority; the requirements of social justice; and the nature of art, beauty, and aesthetic experience. Philosophical questions are addressed not by reference to empirical information alone, but by means of analysis, synthesis, argument, and the construction and evaluation of philosophical theories.

What attracts students to philosophy is the intrinsic interest of its subject matter. But the study of philosophy has practical benefits as well. Philosophy majors are practiced in the close reading of complex texts, in the careful analysis and evaluation of arguments, in original and creative thinking, and in the clear, precise, and persuasive communication of ideas. The skills thus acquired are not only a source of deep

personal satisfaction, but a strong asset in any profession. That the study of philosophy is highly effective in enhancing academic skills is evidenced by the fact that philosophy majors receive exceptionally high scores on the Law School Admissions Test (LSAT), the Graduate Record Exam (GRE), and other standardized admissions tests.

Since philosophy examines the presuppositions and the basic concepts and methods of all other disciplines, a minor in philosophy can be an ideal complement to a major in any other field of study. In addition to the perspective it offers on other fields, a minor in philosophy sharpens intellectual skills, opens a broad intellectual vista, and affords an opportunity to consider fundamental questions of human concern.

Departmental Honors Program

To provide superior students the option of advanced work in philosophy, the department offers H-Options in all 200- to 500-level courses other than P265. To graduate with honors in philosophy, a student must complete at least 24 credit hours of honors work, including at least 12 credit hours in philosophy and at least 6 credit hours outside philosophy, and must satisfy the requirements for a major in philosophy. The student must maintain a minimum overall grade point average of 3.3, with a 3.5 in philosophy and a 3.5 in honors courses. For further information, contact the department chair.

Political Science

- **Chair:** Associate Professor Margaret Ferguson
- **Professors:** William A. Blomquist, Bessie House-Soremekun, John McCormick, Brian Vargus
- **Associate Professors:** Margaret Ferguson, Scott Pegg
- **Assistant Professors:** Ramla Bandele, Aaron Dusso, David Weiden
- **Lecturers**: Erin Englels, Jasper Sumner, Scott Wallace
- **Academic Advising:** Cavanaugh Hall 504J, (317) 274-7387

Politics is all about power: who has it, how it is used, and what effect it has. The goal of the Department of Political Science is to provide students with a superior program of study of the many different and intriguing ways in which power is given, taken, distributed, limited, manipulated, and used, and to help them better appreciate and understand the many different forms taken by systems of government around the world.

The department offers introductory courses in all the major subfields of the discipline: American politics, public policy, public law, political theory, comparative politics, and international relations. We also offer a wide variety of advanced courses in which students can learn more about topics as varied as Indiana state government; national politics in Washington, D.C.; the political systems of Africa, Asia, and Europe; the mechanics of voting and public opinion; and critical policy issues of our time, such as welfare, crime, war, globalization, the environment, and women in politics. Our students also gain hands-on experience through internships and multicollege political simulations.

Our majors have gone on to careers in fields as diverse as politics, business, teaching, human services, the media, and working for interest groups, and many have gone on to graduate school in politics and law. Courses in political science help majors and nonmajors alike become critical observers of—and informed participants in—politics and government at the local, national, and international levels.

Pre-Law Program

While law schools do not require a specific undergraduate major or a specific set of undergraduate courses as prerequisites for admission, they do urge students to take additional writing and public speaking courses, as well as courses involving research and analysis. The Department of Political Science in the IU School of Liberal Arts and SPEA provide pre-law advising and a series of courses related to the law and government that are attractive to students interested in the study of the law. Other schools also offer courses of relevance to students considering the study of the law.

Religious Studies

- **Chair:** Professor Peter J. Thuesen
- **Professors:** Edward E. Curtis IV, Thomas J. Davis, Philip K. Goff, Peter J. Thuesen
- **Associate Professors:** David M. Craig, Kelly E. Hayes, Rachel M. Wheeler
- **Assistant Professors:** Johnny P. Flynn, Andrea R. Jain, Joseph L. Tucker Edmonds
- **Lecturers:** Matthew G. Condon
- **Academic Advising**
- Cavanaugh Hall 335, (317) 274-1465

Religious studies offers students opportunities to explore the patterns and dimensions of the many different religious traditions of the world from the perspectives of the academic study of religion. The courses are designed to help students develop basic understandings of the many ways in which religions shape personal views of the world, create and sustain the communities in which we live, and interact with politics, economics, literature and the arts, and other structures of society. Through this curriculum, students are provided the skills that will allow them to understand religions as a part of the study of human history and traditional and nontraditional values. The department offers both a major and a minor, allowing students to investigate religious phenomena in depth and encouraging connections with other areas of the humanities and social sciences.

Program Planning

In the degree programs, the Department of Religious Studies pays special attention to the student's expressed hopes and plans, and the faculty counsels its majors carefully toward that end. Thus, students can construct undergraduate programs of study that meet both personal goals and the faculty's sense of what constitutes a coherent and focused concentration in religious studies. With these possibilities in mind, students are encouraged to declare their intentions to major in religious studies as early as possible in their college careers.

Those students who choose to major in the department are invited first to explore courses, designated by the faculty, to introduce the wide breadth of concerns that belong to the field. On the basis of these studies, students are then able to pursue more specialized courses of inquiry, depending on their personal interests and concerns. The faculty stands prepared to help in this regard by presenting more selective

and rigorous options within the department, by helping to locate ties with cognate areas in other departments and schools, and by working with upper-level students in courses of independent study.

Religious studies majors have gone into careers in a variety of fields that require critical thinking, subtle analysis, and skilled articulation. Some graduates have obtained positions in education, business, medicine, social work, journalism, the arts, politics, and the administration of nonprofit organizations. Others find employment in a variety of areas, including religious ministries, social service organizations, health and welfare agencies, and not-for-profit communities. Many students continue their education in graduate or professional school.

Sociology

- **Chair:** Neale Chumbler, PhD
- **Professors:** David C. Bell, Neale Chumbler, Carol B. Gardner, Linda Haas, Jay Howard, Lynn Pike, Robert J. White, Colin Williams, Patricia Wittberg
- **Associate Professors:** Robert Aponte, Wan-Ning Bao, Carrie Foote, William Gronfein, Ain Haas, Najja Modibo, Peter Seybold
- **Assistant Professors:** Tamara Leech, Marci Littlefield
- **Clinical Associate Professor:** James Wolf
- **Adjunct Professors:** Betsy Fife and Eric Wright
- **Adjunct Associate Professors:** Gail Whitchurch
- **Adjunct:** Assistant Professor Devon Hensel
- **Lecturers:** David Strong, Aimee Zoeller
- **Academic Advising:** Cavanaugh Hall 303, (317) 274-8981; www.liberalarts.iupui.edu/sociology

The Department of Sociology has a twofold mission: (1) to provide courses in sociology to all segments of the university, thereby acquainting the general student with the unique perspective and uses of sociology; and (2) to prepare sociology majors for advanced study or careers in sociology or related fields.

Sociology courses are designed to take advantage of the unique resources of an urban campus. The curriculum emphasizes the applied aspects of sociology as well as those segments of sociology necessary for advanced study. Courses in sociology serve to broaden the understanding of all students and should be of particular interest to students preparing for careers in professional social science, education, government, law, criminal justice, urban affairs, social service, medical service fields, and business. In an ever-changing environment, the Department of Sociology strives to provide students with diverse educational experiences, including traditional education and fieldwork and/or survey research experience. Both undergraduate majors and graduate students are encouraged to participate in internships and research projects as part of their educational experience.

World Languages and Cultures

(Arabic, Chinese, Classical Studies, French, German, Italian, Japanese Studies, Spanish)

- **Chair:** Professor Gabrielle Bersier
- **Academic Advising:** Cavanaugh Hall 545, (317) 274-0062, (317) 278-3658, http://liberalarts.iupui.edu/wlac

The IUPUI Department of World Languages and Cultures offers a Master of Arts Degree in Teaching Spanish, seven undergraduate programs of language and culture study leading to the Bachelor of Arts degree, and an undergraduate Certificate in Translation Studies. Our department also teaches the content courses for the Bachelor of Science degree and teacher certification with the IU School of Education, as well as a dual degree option with the Purdue School of Engineering and Technology at IUPUI. Languages taught for credit at IUPUI include the courses offered by the three degree-granting programs in French, German, and Spanish; courses offered by Japanese Studies and Classical Studies, which offer minors and an Individualized Major; and all other courses for languages presently under development into programs, including Arabic, Chinese, and Italian. The language-specific programs are listed alphabetically, followed by the Undergraduate Certificate in Translation Studies and Interpreting and other World Languages and Cultures courses.

Credit in World Languages by Placement and Course Credential

All students admitted to IUPUI with previous knowledge of a world language taught at IUPUI are urged to take the appropriate placement test as the best means to assess their level of proficiency. The electronic test in French, German, or Spanish is free of charge and helps students place into a more advanced class depending upon their results. (Placement assessment for Arabic, Chinese, Italian, Japanese, and Latin is conducted by appropriate faculty.) Students may test out of the first and/or second year of course work and qualify for special credits at a reduced fee after successfully completing the course into which they are placed. Special credits in world languages meet distribution requirements and count toward graduation. Up to a maximum of 16 special credits at the first- and second-year levels may be earned after IUPUI course validation, provided that the student is not a native speaker of the language. The Testing Center can be reached at (317) 274-2620 in the Business building, BS3003.

Native Speaker

A native speaker of the language is defined as a student who has attended a high school in the language for which credit is sought. Native speakers cannot obtain special credits at the first-year level in their native language as defined above, but may apply for second or third year special credit after IUPUI course validation.

The Multimedia Language Resource Center (MLRC)

The MLRC, located in CA 319, provides a variety of cutting-edge technological resources to enhance language learning: the Macintosh Computer Lab with Internet access, the Sony Listening Lab with video and audio playback, streaming audio, and recording consoles.

Study Abroad

Many study abroad programs are available to IUPUI students. Study or internship experience abroad dramatically improves language students' listening and conversational skills and ability to interact with people of different backgrounds while enhancing their employment opportunities

in all fields. The Study Abroad Office website has details about approved programs offered: abroad.iupui.edu.

Arabic

- **Director:** Lecturer Amira Mashhour (Ph.D.)
- **Academic Advising:** Cavnaugh Hall 501A, (317) 274-0064

The study of Arabic opens the door to the cultures of the Middle East and the vast Islamic world. It is an important language for the fields of political science, religion, art history, business, and the foreign service. The Program in Arabic offers courses in beginning, intermediate and advanced Arabic.

Arabic & Islamic Studies

The Program in Arabic has collaborated with the Religious Studies department to offer a Minor in Arabic and Islamic Studies, and has also partnered with the Individualized Major Program to be able to offer an Individualized Major in Arabic and Islamic Studies. Please contact the Director of the Program in Arabic for more information.

Chinese

Director: Assistant Professor Jing Wang

Chinese is spoken by more than one billion people. The importance of learning Chinese is increasing every day as China rapidly emerges as a major player in business and world affairs. The Program in Chinese offers an individualized major in Chinese Studies, a minor in Chinese Studies, and an a certificate in Chinese Studies.

Individualized Major in Chinese

Students may also create an individualized major in Chinese. Students who are interested in designing their own Chinese major must first consult with Assistant Professor Jing Wang, Chinese Program Director and Professor Susan Shepherd, Director of the Individualized Major Program.

Chinese Studies Minor

The Minor in Chinese Studies consists of fifteen (15) credit hours in Chinese Studies or related courses approved by the Program Director (a minimum of 6 credit hours must be completed on the IUPUI campus). Courses at the 100-level do not count toward the minor.

Study Abroad

Study abroad in China is offered through the Confucius Institute. Students should contact the Confucius Institute for details.

French

- **Director:** Associate Professor Didier Bertrand
- **Chancellor's Professor:** Obioma Nnaemeka
- **Associate Professor:** Didier Bertrand
- **Assistant Professor:** Kate Miller
- **Professors Emeriti:** Larbi Oukada, Rosalie A. Vermette
- **Assistant Professor Emeritus:** James G. Beaudry
- **Academic Advising:** Cavanaugh Hall 539A, (317) 274-3902
- **Website:** liberalarts.iupui.edu/wlac/undergraduate/french

The Major in French

In addition to fulfilling the general education requirements for a B.A. degree in the School of Liberal Arts, the major in French requires the following:

30 credit hours above the 100 level (12 of which must be completed at IUPUI), including 15 hours of required courses: F203 (4 cr.), F204 (4 cr.), F328 (3 cr.), F300 (3 cr.), and F497 (1 cr.).

The Minor in French

14 credit hours: F203, F204, F328, and F300 or F360 (a minimum of 6 credit hours must be completed on the IUPUI campus).

Teacher Certification in French Teaching Major Requirements

The teaching major in French requires the completion of a minimum of 36 credit hours beyond the 100 level, including 30 credit hours in 300 and 400 level courses. F300, F307, F328, F331, F360, and F402 are required. A year of a second foreign language is advisable. See also the requirements of the School of Education. Students working toward certification are urged to work with the School of Education's advisor as well as their department advisor.

Teaching Minor Requirements

The teaching minor in French requires the completion of a minimum of 24 credit hours beyond the 100 level, including 18 credit hours in 300- and 400-level courses. F300, F307, F328, F331, F360, and F402 are required. See also requirements of the School of Education.

Departmental Honors Program

To provide recognition to outstanding students in French, the department offers an Honors Program as well as H-Option courses. The program is open to all majors in the department who carry a minimum GPA of 3.3 overall and 3.5 in the major. Courses above F204 that are approved by the department may be taken for honors credit or for the H-Option. For further information, contact the department.

Foreign Study

Programs abroad are open to students majoring in all academic disciplines and are not restricted to language majors. For students with one or two years of French, there is a three-week program in Strasbourg, France, in July, offered through the IUPUI Program in French. The Program for International Engineering at IUPUI offers students of engineering a study abroad internship in France as part of the dual degree program leading to a Bachelor of Science in Engineering and a Bachelor of Arts in French.

Students may also participate in Indiana University study abroad programs that include yearlong programs at the Université d'Aix-en-Provence and the Université de Nantes that are open to juniors and seniors who have had three years of college French and one-semester programs at the Université de Rennes and the Université d'Aix. For students with two years of college French, there is a summer program in Paris, France.

Students with at least one year, or two semesters, of college-level French may participate in a summer program in Québec, Canada, or Dakar, Senegal. Indiana University credit is granted for work that is satisfactorily completed in these IU programs. Students interested in studying abroad

should discuss their options with the director of the Program in French or with the Office of International Affairs as soon as possible.

Classical Studies

- **Director:** Martina Dalinghaus.
- **Professor Emeritus:** Robert F. Sutton Jr.
- **Academic Advising:** Cavanaugh Hall 545, (317) 278-3654 or (317) 274-0062
- **Website:** liberalarts.iupui.edu/wlac/undergraduate/classical_studies
-

Classical studies is an interdisciplinary field, examining the vanished civilizations of ancient Greece and Rome and their languages. Although the study of the Greek and Latin languages no longer holds a central place in a university curriculum, the art, literature, and intellectual traditions of the classical world remain basic to Western civilization. Today's student may encounter the classical world through the many fine translations available, the physical evidence of art and archaeology, and the study of the Greek and Latin languages themselves. Courses are offered in four areas: classical archaeology, classical civilization, and each of the classical languages, ancient Greek and Latin.

Classical Archaeology

These courses focus on the art and archaeology of Greece and Italy, as well as the nearby lands affected by their civilization from earliest times through the end of the Roman world. Advanced work in the field leads to careers in archaeological research, museums, and teaching. These interdisciplinary courses may be of special interest to students in anthropology, history, and the history of art. Courses in classical archaeology require no knowledge of the Greek and Latin languages.

Classical Civilization

These general courses in the literature, history, culture, and intellectual traditions of ancient Greece and Rome require no knowledge of Greek or Latin. Such courses provide valuable background to students in a number of fields and may be especially attractive to those planning to teach English, history, or related areas. In addition to the courses listed below, other relevant courses include History C386 and C388 and Philosophy P307.

The Classical Languages

The study of ancient Greek or Latin, like that of any foreign language, provides the most direct means for understanding and appreciating the thought of another culture. The traditional emphasis on formal grammar and vocabulary in teaching the classical languages has long proven valuable for students wishing to improve their English language skills.

Ancient Greek

Study of ancient Greek allows students direct access to masterpieces of Greek literature, historical sources, and the New Testament, while opening up a limited number of careers in teaching, mostly at the university level. For ancient Greek literature in translation, see the listings under "Classical Civilization."

IUPUI students may take courses in Ancient Greek at Butler University and in New Testament (Koine) Greek at the University of Indianapolis through the Consortium of Urban Education (CUE). There is a narrow window for registration each semester.

Latin

Studying Latin allows students direct access to masterpieces of Latin literature and ancient historical sources, as well as ecclesiastical and other materials of the postclassical age. Knowledge of Latin is useful for students of English, modern languages, and history, and can lead to careers in teaching at various levels. A shortage of Latin teachers at the secondary level may make this an attractive second area for students in education. For Latin literature in translation, see the listings under "Classical Civilization."

IUPUI students may take advanced courses in Latin at Butler University through the Consortium of Urban Education (CUE). There is a narrow window for registration each semester.

Study Abroad

Students have the opportunity to study in Greece through an arrangement between Indiana University Overseas Study and College Year at Athens (CYA). Students may receive IU credit for study in Greece at CYA for a semester, an entire academic year, or the summer. Program faculty regularly offer a short summer course in Athens; students may stay on to take an anthropology service learning course on modern Greece taught on the island of Paros. For information, contact the IUPUI Office of Overseas Study or consult its Web site at http://abroad.iupui.edu/. Scholarships and grants are available to help students participate in these programs.

Majors

Students may design a major in classical studies through the School of Liberal Arts Individualized Major Program. Such a major, if properly designed, should allow good students to gain admission to graduate programs in classical studies or classical archaeology and to pursue careers in the field. Students interested in planning an individualized major in classical studies should consult the director of the Classical Studies Program and the director of the Individualized Major Program as early as possible in their academic careers.

Minors in Classical Studies, Ancient Greek, and Latin

A minor in classical studies, ancient Greek, or Latin can be an attractive complement to many majors, particularly history, English, and other foreign languages.

The minor in classical studies consists of at least 15 credit hours in classical archaeology, classical civilization, ancient Greek, Latin, or related courses approved by the Program Director (a minimum of 6 credit hours must be completed on the IUPUI campus). Students may wish to design concentrations in areas of particular interest (e.g., classical art and archaeology or Greek or Roman civilization). At least 6 credit hours must be taken at the 300 level or higher; no more than 3 credit hours of ancient Greek or Latin at the 100 level may be counted. Up to 6 credit hours may be taken in related fields, including History C386, History C388, and Philosophy P307.

Minors in ancient Greek or Latin should include at least 12 credit hours in the language at the 200 level or higher, and 3 credit hours in a related culture or history course. Students interested in graduate study in classical studies are

encouraged to learn to read French and German prior to beginning graduate work.

German

- **Director:** Claudia Grossman
- **Professors:** Gabrielle Bersier
- **Associate Professor:** Daniel Nützel
- **Senior Lecturer:** Claudia Grossmann
- **Professors Emeriti:** John Barlow, Giles Hoyt
- **Adjunct Assistant Professor:** Ruth Reichmann
- **Adjunct Associate Professor:** Julie A. Belz
- **Academic Advising:** Cavanaugh Hall 539D, (317) 274-3943
- **Website:** liberalarts.iupui.edu/wlac/undergraduate/german

The IUPUI German program trains students to achieve linguistic proficiency and cross-cultural competency in German. Linguistic proficiency is the ability to communicate orally and in writing about subjects of common knowledge in the target language. A step-by-step systematic progression of language courses aids students to achieve fluency in German and allows them later to concentrate on chosen areas of linguistic specialization.

To gain cross-cultural competency, students acquire a solid knowledge of contemporary life in the German-speaking countries and learn to compare their institutions, customs, and mentalities with contemporary U.S. culture. Students also gain intercultural competency through critical knowledge of the historical and cultural movements and personalities that have had the most impact on contemporary culture in the German-speaking countries, especially Germany.

In addition, all students in the program have the option of studying in Germany or Austria for a limited or extended period of time, or to gain practical career experience in business or technology by working as an intern overseas or in a local international corporation.

Courses in German not only broaden students' cultural horizons by giving them immediate access to a key region of central Europe, but also prepare students for a variety of careers in international business communication, translation, travel, education, and technology exchange. By combining the study of another discipline with specialization in German, students can also prepare more thoroughly and adequately for graduate studies.

Major in German

In addition to the area distribution requirements for the School of Liberal Arts, the major in German requires the following:

- 29 credit hours above the 100 level,
- including at least one 400-level language course (G423, G431, G445, G465),
- one contemporary culture course (G365),
- at least one 400-level historical culture and literature course (G407, G408, G409, G410) and
- a capstone portfolio (G498).

Other courses may also be selected on the basis of placement level by test or course work and/or focus of interest. They include all 200-, 300-, and 400-level courses, except courses taught in English.

Minor in German

The minor in German language skills is for students who are interested in the German language as a tool of communication. Its emphasis is on competence in the skills of reading, writing, and understanding spoken German, as well as on conversational proficiency in German.

Requirements consist of 14 credit hours, to include G225 and G230 or G299, plus a minimum of 6 credit hours from courses at the 300 or 400 level taught in German (a minimum of 6 credit hours must be completed on the IUPUI campus).

Program for International Engineering

Students majoring in biomedical, mechanical, electrical, or computer engineering can also earn an applied German major. German language requirements and some School of Liberal Arts requirements are modified for this major. The dual degree program takes five years to complete and includes a one-semester internship in Germany during the fourth year of study. Students may formally enter into the program after completion of the Freshmen Engineering program. For further information, contact the director of the Program in German and refer to the Purdue School of Engineering and Technology section of this bulletin.

Teacher Certification for Secondary School

Teaching certification can be required after completion of the B.A. degree with a major in German through successful completion of the Transition-to-Teaching Program in the School of Education. Please contact the School of Education regarding details and the application process.

Honors in German

Honors in German can be achieved either through an honors degree or through the H-Option in individual courses. For the Honor's Degree, a cumulative GPA of 3.3 and a GPA of 3.5 in German courses must be achieved. 24 credit hours of coursework must be earned with honors, with a minimum of 18 credits in German courses above the 100-level. Honors credits through the H-option are available in upper-division language courses, as well as upper division literature, film, culture, and topics courses taught in German.

Study Abroad

Any form of foreign study is highly recommended, and the department gives credit for such study wherever possible. IUPUI offers a two-week summer study abroad program in Heilbronn in southwestern Germany for students who have completed at least first-year German. The program includes intensive language training, educational field trips, and a service learning component. Outstanding students with a substantial command of German, a minimum GPA of 3.0 and a B average in German courses may apply for the Overseas Study academic year program in Freiburg, Germany, during their junior year. Up to 30 IU credit hours may be earned through the program. Semester programs are also available in Freiburg. A summer program is offered in Graz, Austria, for students who have completed course work through G230. Contact the German Program or International Affairs for more information.

Internship in Baden-Württemberg

Students in the Schools of Liberal Arts; Science, Engineering, and Technology; and Business may apply for a two-month summer internship with a German firm in southwestern Germany. Advanced standing, a minimum overall GPA of 3.0, and German language skills are required. Each area of

the exchange has a specific language requirement. Three credits may be earned.

Other Activities

German Club The department sponsors a German Club, open to all interested students. Various topics are discussed and events of cultural interest are presented during the academic year.

Max Kade German-American Center The Center is established to facilitate research and teaching in German-American Studies and also offers two awards annually for students to study German overseas, two graduate fellowships, and a scholarship for the Dual-Degree Program in Engineering and German.

Italian

Italian is important to those who need a linguistic entry into Italian art, cinema, opera, and cuisine, or who simply want to prepare to travel to Florence, Venice, Rome or Sicily. The Program in Italian offers courses in beginning and intermediate Italian.

Japanese Studies

- **Director:** Associate Professor Reiko Yonogi
- **Academic Advising:** Cavanaugh Hall 501C, (317) 274-8291
- **Website:** liberalarts.iupui.edu/wlac/undergraduate/japanese

Japanese studies is an interdisciplinary field that includes the study of the language, culture, and literature of Japan. Courses are offered in language, literature, and culture. The major objectives of the program are (1) to provide students with adequate ability to understand, speak, read, and write Japanese; and (2) to give students a general introduction to Japanese culture, literature, and society. Courses offered in English provide students who have little or no knowledge of Japanese with an introduction to various facets of Japanese studies.

Minor in Japanese

The minor in Japanese studies may be of particular interest to students in business, social sciences, and other languages and interdisciplinary subjects. It includes both language and literature and other Japanese area studies courses.

The minor in Japanese studies consists of 15 credit hours in Japanese studies or related courses approved by the program director, excluding courses at the 100 level. At least 6 credit hours taken toward the minor must be at the 300 level or above IUPUI offers a two-week summer study abroad program in Heilbronn in southwestern Germany for students who have completed at least first-year German. The program includes intensive language training, educational field trips, and a service learning component. The following courses fulfill the requirements. Prerequisite: completion of first-year college Japanese or equivalent.

Individualized Major in Japanese

This program provides an opportunity for students who wish to major in Japanese studies. They will construct individually a program to fit their academic interests. The program is overseen by a faculty director and monitored by the committee for the individualized major.

Study Abroad

IUPUI Hakuoh Program: Semester/academic year at Hakuoh University in Tochigi, Japan. Students will be enrolled full time, take courses in Japanese language and culture designed for international students, and receive IU credit. This program is open to students of all majors who have completed three years of Japanese before they start their study at Hakuoh University and have a cumulative GPA of 3.0 and a 3.0 average in Japanese. Indiana University also offers mature and motivated undergraduates direct IU credit for study for an academic year at the Center for Japanese Studies at Nanzan University in Nagoya, Japan.

This program emphasizes intensive study of Japanese in combination with courses in English on various aspects of Japanese culture and society and the applied arts. This program is open to students of all majors who have completed at least fourth-semester Japanese and have attained a 3.0 GPA. In addition, students with first-year proficiency may apply to the semester program at Kanda University of International Studies in Tokyo.

Spanish

- **Director:** Associate Professor Marta Antón
- **Professors:** Enrica Ardemagni

- **Lecturers:** Audrey Gertz, Daniela Schuvaks Katz
- **Coordinator of First-Year Program:** Daniela Schuvaks Katz
- **Academic Advising:** Cavanaugh Hall 545,(317) 274-0062
- **Website:** liberalarts.iupui.edu/wlac/undergraduate/spanish

Mission

The mission of the program in Spanish at IUPUI is to assist students in achieving proficiency in the Spanish language and to lead them to an understanding of and appreciation for the wide range of Hispanic cultural, literary, and linguistic manifestations. To meet this goal, the program in Spanish offers introductory and advanced instruction in language, linguistics, culture and civilization, literature, and applied language studies.

The introductory and intermediate sequences of courses are designed to provide non-majors with an exploration into Spanish language and Hispanic culture as an essential component of a liberal arts education. The sequences aim to develop an interest in the language and the people who speak it, as well as to prepare students for a variety of careers with international dimensions.

The advanced curriculum prepares students to communicate orally and in writing on the different content areas that comprise the study of Spanish, providing them with the knowledge and skills necessary to achieve success in their future careers, to meet their academic and personal goals, and to prepare them for graduate work. The study of Spanish at IUPUI incorporates the Standards for Foreign Language Learning and gives students the ability to:

1. communicate with Spanish speakers in the United States and abroad;
2. understand better the cultural manifestationa of other peoples;
3. gain greater insight into the nature of language itself as well as their own native language;
4. reinforce knowledge gained from other disciplines and connect it with the study of a second language; and
5. develop a sense of a multilingual international community of which they form an integral part.

The curriculum in Spanish also incorporates most of the Principles of Undergraduate Learning and culminates in a capstone experience.

Considering the rapidly growing Spanish-speaking population in the United States, a major in Spanish is becoming increasingly desirable in the workplace. The major in Spanish can prepare students for a wide variety of careers in such fields as education, social services, international business and finance, government service, international communications and information services, and the travel and hospitality industry.

For more detailed information about the program in Spanish, visit the Department of World Languages and Cultures on the Web: liberalarts.iupui.edu/wlac/undergraduate/spanish.

Major in Spanish

In addition to fulfilling the general distribution requirements for a Bachelor of Arts degree established by the School of Liberal Arts, the Spanish major must complete 30 credit hours i ncourses at the 300 and 400 levels (12 of which must be completed *on the IUPUI Campus*) with a grade of C (2.0) or higher. Required courses at the 300 level are S313, S323, S326, S360, and S363. Required courses at the 400 level are one course in literature (S407, S408, S431, S432, S445, S450, S455, S457, S461, S470, S471, S472, S477, or S495), one course in culture and civilization (S411 or S412), one course in linguistics (S425, S427, S428, S440, or S441), one elective, and the senior capstone (S487 or S498).

Senior Capstone

Only majors with senior standing may register for S487 Capstone Internship of S498 Capstone Seminar in Spanish with authorization. Working with a project director, students will prepare a learning portfolio that integrates their undergraduate study through writing and reading projects, discussions with their capstone director, a research or internship project, and a final oral presentation.

Minor in Spanish

The minor in Spanish requires 15 credit hours of course work (a minimum of 6 credit hours must be completed *on the IUPUI campus*), with a grade of C (2.0) or higher. Required courses are S311, S313, S317, and 6 additional credit hours from the 300 and 400 levels. **Note for heritate and native speakers of Spanish**: S317 is not open to either heritage or native speakers. Heritage students without native fluency in Spanish must obtain instructor's consent to take the course. Spanish Minors with native fluency must take another course at the 300 or 400 level in Spanish to replace S317.

Teacher Certification

Teacher certification is obtained through the School of Education. Students who wish to pursue certification at the secondary level must complete all professional courses required by the School of Education and should work with a School of Education advisor in consultation with a Spanish advisor.

Teaching Major Requirements

The teaching major in Spanish requires the completion of a minimum of 39-41 credit hours beyond the 100 level, including 33 credit hours in 300- and 400-level courses. The following courses are *specifically* required: S313, S326, S360, S363, to additional foundation courses (S311, S317, S323), one course in literature (S407, S408, S431, S432, S445, S450, S455, S457, S461, S470, S471, S472, S477, or S495), one course in culture and civilization (S411 or S412), one course in linguistics (S425, S427, S428, S440, or S441), and S487 or S498. **Note for heritate and native speakers of Spanish**: since S317 is not open to either heritage or native speakers, another course at the 300 or 400 level must be substituted. Please consult the Director of the Program in Spanish.

Study Abroad Programs

Indiana University administers or co-sponsors a variety of programs that permit students to live and study in a Spanish-speaking country as part of their normal degree programs. Students receive IU credit and grades for program participation and can apply most financial aid to program costs. These include an academic-year program in Madrid, Spain, and semester programs in the Spanish cities of Alicante, Madrid, and Seville, and in Santiago, Chile, and a spring semester program for business majors in Monterrey, Mexico. Six-week summer programs are offered in Cuernavaca, Mexico, for intermediate students; in Salamanca, Spain, for students who have completed two or more years of Spanish; and in Guanajuato, Mexico, for advanced students.

A two-week program in the Dominican Republic is offered in conjunction with S363. A three-week summer program is offered in Pachuca, Mexico, for students who have completed at least first-year Spanish. Graduate credit is available through the Salamanca program. Students majoring in any discipline are encouraged to study abroad. All programs require applicants to have an overall B average. Some programs require as little as one semester's previous study of Spanish, while others are appropriate for students in advanced Spanish courses.

Students interested in study opportunities in Spanish-speaking countries should visit the Office of International Affairs, ES 2129B, IUPUI, (317) 274-2081 or the Department of World Languages and Cultures office in CA545.

The Spanish Resource Center at IUPUI

The Spanish Resource Center (SRC) in the IU School of Liberal Arts at IUPUI is the result of cooperative efforts between the Department of World Languages and Cultures and the Spanish Embassy's Ministry of Education. Its mission is to improve the teaching of the Spanish language and culture in Indiana, Kentucky, Ohio, and Illinois, providing a meeting place for those involved in the teaching and study of Hispanic language and culture, including teachers, students, and administrators of all levels.

Established in 1998, it is the only Spanish Resource Center in Indiana, and one of only 12 across the country. I provides a large collection of Spanish learning resources (books,

videos, DVDs and CDs) and other services to students and teachers of Spanish such as conversation hours, film series', professional development workshops, and immersion days. The Center also promotes various programs and scholarships run by the Spanish Ministry of Education in conjunction with the Department of Education of the four states mentioned above, as well as several school districts and universities in the Midwest.

The center is located at Cavanaugh Hall 205 on the IUPUI campus, (317) 278-1210.

DELE Exams

IUPUI is an official testing site for the DELEs, Diplomas of Spanish as a Foreign Language, issued by Spain's Ministry of Education. They offer official accreditation of mastery of the Spanish language for citizens of countries in which Spanish is not the official language. The examinations are offered at the six levels established by the Common European Framework of Reference for Languages (A1, A2, B1, B2, C1, C2), and consist of five sections: reading comprehension, written expression, listening comprehension, grammar and vocabulary, and oral expression. The diplomas are recognized by official institutions of Spanish-speaking countries, by corporations, chambers of commerce, and educational institutions in the United States.

Applicants must provide proof of citizenship in a country in which Spanish is not the official language (anyone with a United States passport is eligible). Applicants for the advanced level must be sixteen years of age or older; there is no minimum age for the intermediate or the high intermediate levels. For more information, contact the Spanish Resource Center (317) 278-1210 or manton@iupui.edu. General information on the exams and sample test formats and prices may be found at diplomas.cervantes.es or cvc.cervantes.es/aula/dele.

Other Activities

Sigma Delta Pi A chapter of the national Spanish honorary society, Sigma Delta Pi, was established in 1990. Undergraduate and graduate students meeting the qualification requirements may be eligible for induction into the IUPUI chapter, Sigma Epsilon.

Spanish Club The Program in Spanish sponsors a Spanish Club, open to all interested students. Various events of cultural and academic interest are presented during the academic year.

Translation Studies

Director: Professor Enrica Ardemagni

Globalization and the changing US demographics have increased demand for translation skills in many fields, educational, medical, legal and technical.

According to a recent article in the Las Vegas Review-Journal, Translators and Interpreters will be the top profession in 2012! Read the full article here.

The Program in Translation Studies offers:

* introductory coursework leading to an Undergraduate Certificate in Translation Studies

Departments

- Anthropology
- Communication Studies
- Economics
- English
- Geography
- History
- Philosophy
- Political Science
- Religious Studies
- Sociology
- World Languages and Cultures

Opportunities

The IU School of Liberal Arts recognizes its students' accomplishments at a special Honors Convocation and Celebration of Scholarship held each year. More detailed information about the following awards and scholarships may be found on the Liberal Arts home page (http://www.liberalarts.iupui.edu under "Scholarships"), by contacting the Miriam Z. Langsam Office of Student Affairs (CA401), or by contacting the individual department or program. To be eligible for awards and scholarships, recipients must be enrolled at IUPUI.

- Departmental and Program Scholarships and Awards
- School-Level Awards and Scholarships

Additionally, School of Liberal Arts students are encouraged to apply for IUPUI scholarships administered through the IUPUI Office of Student Scholarships. For information on IUPUI scholarships, visit http://www.iupui.edu/~scentral or call (317) 274-5516. Applications are due each February for scholarships to be announced in late spring and awarded during the following academic year.

Activities

The department sponsors this club, which oprovides members with activities and meeting created to enhance the study of English.

The club meets weekly and presents film screenings that feature changing monthly themes.

Forensics/Debate

Francophone Student Alliance

genesis: This semiannual literary journal has been edited and produced solely by IUPUI undergraduate students since 1972. It publishes the work of student authors and artists.

Geography Club

German Club

Historical Society

Japanese Club

Lambda Pi Eta

Liberal Arts Student Council

Museum Studies Club

Paralegal Student Association

Philosophy Club

POLSA (Political Science Student Association)

RSSA (Religious Studies Student Association)

The Rufus Reiberg Creative Reading Series: Named for a former chair of the English department, the Reiberg Series brings to campus each year an array of well-known and emerging fiction writers and poets for readings.

Sociology Club

Spanish Club

Student Ambassadors

Student Readings: As part of the developing literary scene in Indianapolis, the IUPUI Student Readings are home to an ever-expanding family of aspiring writers, performance poets, and musicians. Events take place monthly at a local coffeehouse.

Women United

World Relations Group: The department sponsors this club, which provides members with activities and meetings created to enhance the study of English.

School-Level Awards and Scholarships

Margaret A. Cook Foreign Study Award Each year an award will be made to one or more undergraduate students majoring or minoring in the liberal arts at IUPUI to assist in participating in a language based study-abroad program approved by Indiana University. Priority will be given to junior or senior students majoring or minoring in a modern foreign language. Selection will be based on cumulative grade point average, language ability, and the applicants' plans for continued study of foreign languages. The award has been established in honor of Professor Margaret A. Cook, who helped establish the first foreign language programs at IUPUI and who devoted her life to improving our understanding of foreign cultures.

Mary F. Crisler Scholarship These $3,000 scholarships encourage collaboration between IU School of Liberal Arts faculty and students on academic research or scholarship. The purpose is to provide opportunities for students to gain research experience while an undergraduate and thereby strengthen the community of scholarship. Eligible students must have at least a 3.5 GPA in their major. Up to five Crisler Scholarships are awarded annually.

The James R. East Scholarship This scholarship will be awarded annually to an alumnus or alumna of the Boys and Girls Clubs of Indianapolis.

Faculty Medal for Academic Distinction This award is presented to a graduating senior who, in the judgment of the Faculty Affairs Committee of the IU School of Liberal Arts faculty, is clearly outstanding in scholastic achievement, interdisciplinary interests, and extracurricular activities.

Thomas E. Grossman, Jr. Scholarship Funded by the family of Thomas E. Grossman, Jr. to recognize the efforts of adult returning students enrolled in a degree program in the IU School of Liberal Arts who demonstrates financial need and academic achievement. Full- or part-time students may be considered.

Audrey Harshbarger Study Abroad Scholarship Created to honor the memory of Audrey Harshbarger, Jean Oswalt's grandmother, whose belief and faith in young people and commitment to their learning through experience has inspired many, to further Indiana University's mission, and to encourage others to give to Indiana University. This award seeks to support students who study abroad for a semester or academic year because that experience develops a person's understanding of our place in a global society, and the donors believe that this experience is integral to a person's education.

Sidney W. Houston Memorial Scholarship An annual scholarship is awarded in honor of Professor Sidney W. Houston, who served from 1963 to 1975 in the Departments of English in the Indianapolis regional campuses of both Purdue University and Indiana University. The recipient shall be an outstanding student in the language and literature departments of the IU School of Liberal Arts. The recipient must have completed at least 56 credit hours, but no more than 90, with a minimum cumulative grade point average of 3.5 and must be considered a person of moral responsibility and high professional potential.

Christian J. W. Kloesel Educational Travel Fund This scholarship honors the memory of English Professor Emeritus Christian J. W. Kloesel. Created by Mrs. Kelly Kloesel together with colleagues, family and friends, it provides educational travel support to undergraduates and graduate students majoring in the IU School of Liberal Arts who have records of academic excellence.

Liberal Arts Dean's Scholarship These scholarships are made possible through private contributions that are matched by the dean. Recipients must be juniors and seniors with outstanding academic achievement, an expressed understanding of the value of a liberal arts education, an intention to continue their studies, and an ability to represent the IU School of Liberal Arts in the community.

Liberal Arts Dean's Fellows Study Abroad Scholarship This scholarship promotes and encourages international experiences for IU School of Liberal Arts majors. It is inspired by the generosity of the Liberal Arts Dean's Council Fellows.

Liberal Arts Staff Scholarship Faculty and staff contributions support the educational goals of Liberal Arts staff through this scholarship. Recipients must be full-time staff members of the School of Liberal Arts for at least one full year and must be pursuing courses at IUPUI toward an undergraduate degree, certificate, or a graduate degree.

Loretta Lunsford Scholarship Scholarships of $3,000 will be awarded to students who have declared majors in the IU School of Liberal Arts with a minimum GPA of 3.4. Preference will be given to candidates with an interest in educating others and with a willingness to volunteer five hours a week in any kind of educational organization or institution on a project mentored by a liberal arts faculty. Ten or more scholarships may be awarded annually.

Sam Masarachia Scholars Program Award
These full-tuition and fees scholarships are presented to full-time IU School of Liberal Arts undergraduate students interested in working in the fields of labor, senior citizens, or community organizations. This program is made possible through the generosity of Sam Masarachia, a representative for the Steelworkers Union in Indiana and an effective advocate for the fields studied in this program.

IU School of Liberal Arts McNair Scholarship This scholarship supports Liberal Arts majors who are participants in the IUPUI McNair Scholars Program - a federally funded undergraduate research program for students from underrepresented groups who intend to pursue graduate and doctoral degrees.

Olaniyan Scholars Program The Olaniyan Scholars Program promotes the development of undergraduate research and professional experience through Africana Studies. Scholars enter into a highly structured course of study focusing on the lives, history, traditions, interests, and communities of people of African descent. Scholars will conduct research, enroll in specially designed academic courses, and participate in community internship learning opportunities, expanding their studies beyond the boundaries of the classroom. The program provides an award equivalent to instate tuition and a stipend. It is renewable for up to four years.

Rebecca E. Pitts Scholarship This scholarship is awarded annually to one or more students majoring in the liberal arts at IUPUI who have completed at least 90 credit hours and who plan to seek a graduate degree in a liberal arts discipline. The scholarship is intended to assist an outstanding student in attaining an extraordinary educational experience that will enhance her or his opportunity for advanced study. Applicants must propose uses for the scholarship and describe how the opportunity would make a difference in their education. The scholarship has been established in honor of Professor Rebecca E. Pitts, whose lifelong study of literature instilled in many students a desire for learning at the highest levels of excellence.

Gail M. and William M. Plater International Scholarship for Civic Engagement Established by Chancellor Emeritus Gerald Bepko and his wife, Jean, this scholarship supports the connection of academic work and learning with community engagement. Recipients work with faculty on projects that have a community partnership component.

Frances Dodson Rhome Scholarship This scholarship goes to support a student excelling in Women's Studies or English. It was established through gifts honoring Professor Frances Dodson Rhome, who taught English and classical studies for many years.

Barbara White Thoreson Scholarship This scholarship supports Liberal Arts students who are pursuing futures in teaching. It is given in honor of the memory of Barbara White Thoreson, whose devotion to teaching and to the students she taught inspired a love of learning in those who knew her.

Zora Neale Hurston-Mari Evans Scholarship Created in honor of Zora Neale Hurston and Mari Evans, this scholarship encourages the study of subjects that transcend gender, race, age, culture, and economic status. It is designed to support students whose creativity, academic achievements, and goals reflect the issues articulated in the works of these two prominent American literary figures.

IU School of Liberal Arts Dean's List - Liberal Arts undergraduate students with high academic achievement are recognized each semester through the Dean's List. Full-time undergradate students enrolled in and completing 12 or more credit hours for the semester must earn a semester GPA of at least 3.3. Part-time undergraduate students enrolled in and completing 6-11.5 credit hours must earn a semester GPA of at least 3.4. Students must be officially registered as Liberal Arts majors to be eligible.

Graduation with Distinction - Liberal Arts undergraduate students with outstanding academic achievement are recognized by IUPUI at graduation by the designations of Distinction, High Distinction and Highest Distinction. These recognitions are bestowed on the top 10% of each graduating class. For eligibility requirements, refer to the "Graduation with Distinction" section under "General Information" in the IUPUI Bulletin and to additional guidelines on the IUPUI and IU School of Liberal Arts websites.

Departmental and Program Scholarships and Awards

Africana Studies

- **Africana Studies Academic Achievement Award** - This award is presented by the Africana Studies Program to the outstanding graduating senior in the program and to students who have demonstrated academic excellence in Africana studies.
- **Preston Eagleson Award** - The Preston Eagleson Award is presented to an IUPUI student for outstanding achievement in a paper written on the Afro-American experience. The prize honors Preston Eagleson, the first black American to receive an advanced degree from Indiana University.
- **Marie Turner-Wright Scholarship in Africana Studies** - In commemoration of the important people in her life, Marie Turner-Wright created this scholarship for undergraduates in the Africana Studies Program.

American Studies

- **American Studies Award** - The American Studies program presents an annual award, on the basis of nominations from the faculty, to an upper-division minor in the academic program who has demonstrated excellent abilities in the interdisciplinary study of American culture.

Anthropology

- **Anthropology Academic Achievement Award** - The Department of Anthropology honors an outstanding departmental major whose academic record reflects both scholastic excellence and intellectual breadth.
- **Friends of Anthropology Scholarship** - This scholarship is awarded to a promising anthropology major who demonstrates academic excellence, intends to pursue a career in anthropology, has financial need, and contributes to the department through his or her interactions with other students as well as faculty.

- **Manuela Reynolds Award** - This award supports advanced Anthropology student research. The award is meant to enable an Anthropology student to attend a symposium in their area of anthropological research, to present their research findings, to attend field school, or to engage in related travel and/or publication.

Classical Studies

- **Arete Award** - Presented as the occasion demands to a senior student with a record of excellence in the field of classical studies.
- **P. Ovidius Naso Living Myth Prize** - Awarded annually for the best creative retelling, in any medium, of a classical Greek or Roman myth by a student in an IUPUI classical mythology course.

Communication Studies

- **Academic Achievement Award** - Presented to the communication studies graduating senior who has demonstrated excellence in the field of communication studies, made outstanding contributions to the department, achieved a superior grade point average, and earned the recommendations of the faculty.
- **Outstanding Research or Creative Project** - This award is made in recognition of a superior research paper or creative project upon the recommendation of faculty in the Department of Communication Studies. Up to four awards may be given.
- **The Service Award** - This award is given to a student, upon recommendation of the faculty in the Department of Communication Studies, in recognition of outstanding service to the department, school, and/or university.
- **The Burns/Wagener Scholarship** - This scholarship honors emeriti faculty Professor David Burns and Professor B. Bruce Wagener as two of the founding faculty of the department. The scholarship is granted to a student majoring in communication studies for outstanding accomplishments and contributions to the department.

Economics

- **Economics Award** - This award is presented to the senior economics major with the highest cumulative grade point average above 3.4.
- **Robert Kirk Outstanding New Economics Major Award** - The Kirk award is presented to an outstanding student in his or her first year as an economics major. The award recognizes Professor Kirk's dedication to students during his 28 years with the department.
- **The Department of Economics** gives a one-year subscription to the Wall Street Journal to the outstanding junior economics major.

English

- **Academic Achievement Awards** - Presented to students who have demonstrated consistent excellence in their work with language and literature. The Department of English bases its selection on superior scholastic achievement, faculty recommendations, and special contributions to the English program.
- **Creative Writing Award** - Presented to the student who has submitted the best work of literary art-fiction or poetry-in a creative writing class during the academic year.
- **Film Studies Award** - This award is presented to a student who has done exceptional work in film criticism and research in upper-level film studies courses during the past year.
- **Hal Tobin Outstanding First-Year Writing Award** - This award is presented to the student who has submitted the best essay in English W131 or W140 in the preceding calendar year.
- **Upper-Division Literature Outstanding Student Award** - Recognizes an outstanding achievement by a student in advanced literature courses during the past year.
- **Linguistics Award** - This award goes to the student considered by the linguistics faculty of the Department of English to be the most outstanding student of linguistics. Candidates must be students who have taken at least three linguistics courses. Students may nominate themselves for the award.
- **Nonfiction Writing Award** - Presented to a declared English major for the best portfolio of nonfiction pieces submitted for anonymous judging by a faculty committee. Papers are judged on effectiveness of expression in a variety of writing genres.
- **Peter Bassett Barlow Prize** - This award is for the best paper submitted by a student enrolled in the Department of English master's degree program. The award honors the memory of a man who served the community as a physician; his passionate humanism and great intellect bore witness to the lifelong value of a liberal education.
- **Marianne Hedges Award for Excellence in Poetry** - This award is for an outstanding poem. The award is given in memory of Marianne Hedges, a former IUPUI student and a fine poet.
- **Sarah Jamison Keller Scholarship** - A scholarship for tuition is annually open to a senior majoring in English language or literature at IUPUI who is a resident of the state of Indiana and who has achieved a minimum cumulative grade point average of 3.3 for all undergraduate courses and not less than a 3.5 cumulative average for all courses in English language and literature. The winning candidate will have submitted as part of his or her candidacy a scholarly or critical essay in English on any aspect of English language or literature. The scholarship pays the tuition for up to 15 credit hours in the fall semester of the student's senior year and is renewable for the following spring semester for up to 15 credit hours provided the student achieves a minimum cumulative grade point average of 3.7 for all courses in English language and literature taken in the preceding fall semester.
- **Rebecca E. Pitts Fiction and Poetry Awards** - Two annual competitions, one in fiction writing and the other in poetry, are held in honor of Professor Rebecca E. Pitts, who served from 1966 to 1976 in the Department of English. Applicants must be currently enrolled at IUPUI or have been enrolled during the last 18 months before each spring's competition.
- **Mary Louise Rea Short Story Award** - An annual award is presented in recognition of Professor Mary

Louise Rea, who served from 1946 to 1985 in the departments of English in the former Indianapolis regional campus of Purdue University and the Indiana University School of Liberal Arts. The recipient shall be the winner of the annual competition in short story writing. Applicants must be currently enrolled in the following IUPUI creative writing courses or have been enrolled during the preceding 18 months before each spring's competition: W103, W203, W301, W401, and W411.

- **Marie Turner-Wright Scholarship in English** - In commemoration of the important people in her life, Marie Turner-Wright created this scholarship for English majors with demonstrated interest in African American literature.

French (World Languages and Cultures)

- **Margaret A. Cook Award** - The Margaret A. Cook Award is presented to a student who has demonstrated outstanding achievement in the study of French language and literature. This award is named in honor of Professor Margaret A. Cook, who for 26 years provided leadership in promoting foreign language study at Indiana University's operations in Indianapolis.
- **Beaudry Summer Scholarship for French and Francophone Studies** - This scholarship is awarded to an IUPUI student participating in a summer French language and culture study program in a French-speaking country. This scholarship is made possible through the generosity of James G. Beaudry, Professor Emeritus of French.
- **Marius J. Fauré Family Scholarship** - The Marius J. Fauré Family Scholarship is awarded each year by the faculty in French to an outstanding student with junior status who has a declared major in French language and literature. The Fauré scholarship honors Mr. and Mrs. Marius J. Fauré, and was established by their daughter Louise Fauré, who was a devoted student of French at IUPUI. Marius Fauré was an immigrant from Sète, France, and was for many years a landscape architect in the Indianapolis area.

Geography

- **Geography Award** - This award is presented to graduating seniors for demonstrated excellence in geographic studies and a high grade point average.
- **Geography Alumni New Major Scholarship** - Established by alumni of the department, this scholarship recognizes the most promising new geography major.

German (World Languages and Cultures)

- **World Languages and Cultures Academic Achievement Award in German** - This award is presented to students who have attained a high grade point average and demonstrated academic excellence in the field of German language and literature.
- **IUPUI Max Kade German-American Study Abroad Scholarship** - The Max Kade German American Center at IUPUI awards two scholarships for studying German in approved overseas study programs. German majors, minors, and other IUPUI majors who will earn credits toward their degree are eligible.

History

- **Seregny Award for the Best History Student** - This award is presented to the senior judged to exhibit greatest overall competence and accomplishment in history. It honors the memory of Professor Scott Seregny by recognizing the graduating senior who best embodies the qualities that he brought to his field and the department: intellectual accomplishment, originality, and curiosity.
- **Thelander Memorial Prize** - The Thelander Memorial Prize is awarded to an IUPUI student for superior achievement in a paper on a historical subject. The prize is presented by the Department of History faculty in memory of a former member of that department, Theodore Thelander Jr.

Indiana Center for Intercultural Communication

- **Larry and Joan Cimino Thesis Award in Intercultural Communication** - This award is for the best paper or thesis on intercultural communication submitted by a graduate student in the IU School of Liberal Arts. It is made possible through the generosity of Larry and Joan Cimino.

Individualized Major Program

- **Individualized Major Award** - Recognizes students who embody the ideals of the program and complete an Individualized Major with academic distinction.

International Studies Program

- **International Studies Award** - This award honors the graduating senior who has demonstrated outstanding academic achievement and strong potential for intellectual growth.

Medical Humanities

- **Medical Humanities Student Essay Award** - This award is presented to IUPUI students whose writing is judged to be the best on a topic in medical humanities. The award is sponsored by the Center for Law and Health, the John Shaw Billings History of Medicine Society, and the Medical Ethics Program of the IU School of Medicine.

Museum Studies

- **Museum Studies Award** - The Museum Studies Graduate Program and Undergraduate Certificate program recognizes with its award outstanding students in these two programs whose record reflects both academic excellence and a commitment to the museum field.

Philosophy

- **Philosophy Academic Achievement Award** - An award is presented to the outstanding philosophy major in the graduating class by the faculty of the department.

- **Jean Martin Maxwell Prize** - The Jean Maxwell prize is awarded annually through the Institute for American Thought in conjunction with the Philosophy Department for the best master's thesis containing a genuine contribution to American philosophy. The prize is named in remembrance of Jean Maxwell (1924-2005), who completed her own thesis on William James and phenomenology at Northern Illinois University in 1968. The prize is made possible through the generous contributions of family and friends.
- **Laurence Lampert Scholarship in Philosophy** - Recognizes an extraordinary philosophy major, this scholarship honors the extraordinary career of distinguished scholar and professor of philosophy Dr. Laurence Lampert, upon the occasion of his retirement.
- **John M. Riteris Award** - This scholarship is awarded annually to a philosophy student who demonstrates a commitment to the study of philosophy and the potential for high-quality work in the discipline. The recipient is selected by the faculty of the Department of Philosophy.

Political Science

- **Academic Achievement Awards** - Honor the graduating seniors who have achieved an outstanding grade point average and demonstrated the greatest potential for intellectual growth.
- **Clara Margaret Powell Award** - This award is presented to an undergraduate student with exceptional research skills. The scholarship is intended to support the recipient's research project or to support attendance at a conference.
- **Political Science Intern Award** - Recognizes the participant in the Applied Politics Internship Program who has demonstrated superior academic accomplishment, diligent service to the intern agency, and promise in career plans.
- **Robert V. Kirch Scholarship** - An annual scholarship is awarded to an outstanding political science student in honor of Robert V. Kirch, the first chairperson of the IUPUI Department of Political Science and a lifelong student of state and local politics.
- **Survey Research Award** - This award recognizes the student who has made the largest contribution to survey research during the academic year.

Religious Studies

- **Religious Studies Outstanding Student Award** - This award is granted to the religious studies student who has displayed consistent excellence in scholarship.
- **Rowland A. Sherrill Prize in Religious Studies** - Established in memory of longtime Chair and Professor of Religious Studies Rowland A. Sherrill, this award recognizes the best papers and essay on topics in religious studies on topics in religious studies.

Sociology

- **Sociology Award** - Presented to the outstanding student in the department for distinguished achievement in sociology.
- **Service Award** - The Department of Sociology presents an award to the student whose outstanding service to faculty, students, and department has been invaluable.

Spanish (World Languages and Cultures)

- **Nancy Newton Study Abroad Scholarship** - Provides support to undergraduate IUPUI Spanish majors and graduate students in the IUPUI Spanish M.A.T. for IUPUI and IU sponsored Spanish language study abroad programs. The award honors Professor Nancy Newton who helped establish the Spanish M.A.T. program at IUPUI.
- **World Languages and Cultures Academic Achievement Award in Spanish** - This award is presented to the outstanding student in the Spanish program.

Women's Studies

- **Arminda B. and Jean C. Bepko Scholarship in Women's Studies** - This award provides a scholarship for an outstanding student obtaining a minor in women's studies at IUPUI.
- **Senior Award** - Presented to the senior with a minor in women's studies who has made an outstanding contribution to women's studies.
- **Anne Donchin Graduate Essay Award** - This award is presented to the graduate student who submits the most outstanding essay on a topic in women's studies.
- **Dolores Donchin Memorial Service Award** - Honor an IUPUI student who has made a substantial contribution to women's studies related service. This award is made possible through gifts in memory of Dolores Donchin.
- **Indianapolis Women's Rotary Club Scholarship Fund Award** - Awarded to assist adult returning women students at IUPUI.
- **Friends of Women's Studies Scholarship Fund** - Awarded to outstanding students in the Women's Studies Program. Students must have taken a minimum of 6 credit hours in the Women's Studies Program.
- **Outstanding Essay Award** - This award is presented to the student who submits the most outstanding essay on a topic in women's studies.

Student Council Awards

- **Outstanding Advisor Award** - The IU School of Liberal Arts Student Council, in recognition of the role of advisors in enhancing students' growth, has created an award to be given to an outstanding Liberal Arts academic advisor. Any liberal arts student may nominate an advisor; the final decision will be made by the council.
- **Outstanding Club Advisor** - The IU School of Liberal Arts Student Council, in recognition of the importance of extracurricular activities related to the majors and minors, presents an award to the faculty member who has gone out of their way to assist in strengthening a liberal arts student club or organization.
- **Outstanding Departmental/Program Staff Award** - The IU School of Liberal Arts Student Council, in

recognition of the critical role of departmental staff in providing information, advice, and sympathy-lifelines for students majoring in liberal arts-has created a special award to recognize their outstanding contributions.

- **Outstanding Mentor/Motivator Award** - The IU Liberal Arts Student Council created this award to recognize an individual (faculty, staff, or a fellow student) who has provided support and encouragement as a mentor or motivator, often outside of the official description of their role on campus.

Internship in English

An internship is an on-the-job learning opportunity designed to supplement students' course work with practical, hands-on experience. IUPUI's Department of English offers internship credit as E398.

Interested students must have junior or senior standing, maintain a grade point average of at least 2.5, and furnish writing samples or have successfully completed advanced writing courses. They must register with the Professional Practices Program (PPP) in Business/SPEA Building 2010, (317) 274-3211, and meet with Department of English internship coordinator, Jim Powell, (317) 278-2985, @.jepowell@iupui.edu.

The Department of English also offers W396, an undergraduate tutoring internship in the University Writing Center. For more information, contact Writing Center Coordinator Tere Molinder-Hogue, Cavanaugh Hall 504K, (317) 274-5650, tmhogue@iupui.edu. @.

Self-Acquired Competency

Credit may sometimes be granted for learning experiences acquired through means other than normal college course work. Credit is available for course-specific learning or for non–course-specific learning in (1) arts and humanities, and (2) social sciences.

Faculty will evaluate the experience and determine whether credit should be awarded and the amount of credit to be granted. Students may be asked to prepare a portfolio, take examinations, or document their learning in other suitable ways so that the faculty can make such judgments. Only 12 credit hours of self-acquired competency can be applied toward a degree. A brochure providing additional information is available in the Miriam Z. Langsam Office of Student Affairs, CA401.

Academic Standing

Academic Probation

Only IUPUI grades will be considered in determining probation and dismissal. Students are placed on academic probation when their cumulative grade point average falls below 2.0 (C), and they remain on probation until the cumulative grade point average is 2.0 (C) or higher. Students on probation are encouraged to talk with their faculty advisor or with an advisor in the Miriam Z. Langsam Office of Student Affairs (Cavanaugh Hall 401), (317) 274-8495, or a counselor in the IUPUI Counseling and Psychological Services, (317) 274-2548, to determine how they may become more successful in their studies. Students on probation must schedule an appointment with their faculty advisors before registering. Students without a faculty advisor should go to the Miriam Z. Langsam Office of Student Affairs.

Students who have two consecutive semesters (excluding summer sessions) with semester grade point averages below 2.0 (C) may be placed on probation at the discretion of the Associate Dean for Student Affairs regardless of their cumulative grade point average, since they are failing to make progress toward a degree.

Dismissal

Students will be dismissed from the IU School of Liberal Arts when they have a cumulative grade point average lower than 2.0 (C) and a semester grade point average of lower than 2.0 (C) for two semesters (18 credit hours or fewer totaled over several semesters, excluding summer sessions, for part time students). Students eligible for dismissal will be notified in writing that they have been dismissed and that they must remain out of school at least one semester. The letter will also inform such students that they will be withdrawn from classes for which they have registered. Once dismissed, students must petition for readmission. (See "Readmission.")

Students who have been dismissed a second time must remain out of school for at least two semesters and petition for readmission. (See "Readmission.")

A third dismissal is final.

Readmission

Any student who has been dismissed from the IU School of Liberal Arts (or its equivalent on another IU campus) must petition for readmission. A Petition for Readmission form may be obtained from the Miriam Z. Langsam Office of Student Affairs (Cavanaugh Hall 401). Petitions for readmission must be filed by the following deadlines:

To enroll for the fall semester: July 15

To enroll for the spring semester: November 15

To enroll for summer session: April 15

Academic Policies

Program Planning, Advising, and Career Counceling Services

The IU School of Liberal Arts provides advising services to assist students in planning their program of study. Students pursuing an Associate of Arts and those who have not yet chosen a major area of study are counseled through the IU School of Liberal Arts Miriam Z. Langsam Office of Student Affairs, in Cavanaugh Hall 401, (317) 274-3976. Students who have chosen a major are assigned a departmental faculty advisor and should make an appointment with that advisor before each registration period in order to discuss long-term goals as well as specific course work for the upcoming semester. Consulting with their advisor is a semester-by-semester obligation of students to ensure ongoing progress toward a degree.

Students, however, not their advisors, are responsible for their programs. Whenever possible students should avail themselves of the online "advisement report" available through the "Onestart" webpage. They should familiarize themselves with the general requirements for a Liberal Arts

degree as well as with those of the department in which they plan to major. Students are urged to complete most, if not all, of their general education requirements during the freshman and sophomore years.

In planning a program, students should refer to both the Schedule of Classes and this bulletin. Special attention should be paid to course descriptions and prerequisites. This bulletin identifies prerequisites with a ‘‘P,'' corequisites with a ‘‘C,'' and recommended courses with an ‘‘R.'' Students should not enroll in courses for which they do not have the prerequisites. Instructors may require a student to drop a class if the student has not fulfilled the prerequisites.

Career Services

The Miriam Z. Langsam Office of Student Affairs also offers career services for students and recent graduates through the Career Development Office in CA243. These services include workshops, courses and individual consultations to help you connect your academic interests and accomplishments along with your work experiences, volunteer activities and on-campus involvement with potential career opportunities. Our career services staff can help you explore and plan your academic journey including on-campus leadership and job opportunities, community engagement through volunteering and internships, and preparation for professional job searching and graduate school applications. We help students learn to identify and articulate their unique skills and strengths, particularly through creating effective resumes, cover letters, graduate school essays and when preparing for interviewing and networking.

Pass/Fail (P/F) Option
Any IU School of Liberal Arts undergraduate in good standing (not on probation) may enroll in a maximum of eight elective courses to be taken with a grade of P (pass) or F (fail). The Pass/Fail option can be used for a maximum of two courses per year, including summer sessions. The course selected for Pass/Fail must be an elective. It may not be used to satisfy any of the major or school distribution requirements, with the exception of the 300- to 400-level course requirement (Area III).

Final Examinations
Final examinations or other activities in lieu of a final are to be scheduled during finals week at the time indicated in the Schedule of Classes.
Students scheduled for three or more finals in a 24-hour period may have their examination schedule adjusted. They should notify the instructors involved by mid-semester and determine if any of them are willing to schedule an alternate examination. Students having problems with an instructor may consult the chair of the department or the Miriam Z. Langsam Office of Student Affairs, in CA401, (317) 274-3976.

Forgiveness Policy
The IU School of Liberal Arts has adopted a modified version of the IUPUI forgiveness policy (http://registrar.iupui.edu/forgive.html) for students who have been out of school for three or more years. For more information about the policy, call (317) 274-3976 or visit CA401.

Petition for Grade Change
Either students or faculty members may petition for a change in course grade.

A student desiring a change of grade should first discuss the situation with the instructor. If the instructor agrees, and no more than one full semester has elapsed since the course was finished, the faculty member must file a Grade Change Authorization Form with the Associate Dean of the Miriam Z. Langsam Office of Student Affairs. If more than one full semester has elapsed, the faculty member still files the Grade Change Authorization Form, but the form may be sent to the IU School of Liberal Arts Academic Affairs Committee, depending on the reason given for the change of grade. Campus policy limits petitions for change of grades to five years after the course.

If the instructor and student do not agree on a change of grade, or if the instructor cannot be located, the student should discuss the matter with the chairperson, director, or coordinator of the department or program in which the course was offered. Following that, the student may petition the Academic Affairs Committee directly, using the Change of Grade Petition Form; these forms should be completed online at http://registrar.iupui.edu/grdfrm.html. The petition must include (1) a statement of an attempted but unsuccessful interview with the faculty member and chair, and (2) supporting evidence for the petition. The decision of the Academic Affairs Committee is final and there are no additional avenues of appeal.

Faculty Awards

This award is presented to faculty in recognition of excellence in teaching, research, and service. Recipients are selected annually by a committee of the Faculty Assembly of the School of Liberal Arts.

Resident Faculty Award

- 2010-2011 Jason Eberl
- 2009-2010 Anne Royalty
- 2008-09 Larry Zimmerman
- 2007-08 Mary Sauer
- 2006-07 Ulla Connor
- 2005-06 William J. Jackson
- 2004-05 Christian Kloesel
- 2003-04 Rosalie A. Vermette
- 2002-03 David A. Ford
- 2001-02 Susan B. Sutton
- 2000-01 Richard E. Ward
- 1999-00 David W. Moller
- 1998-99 John J. Tilley
- 1997-98 Robert F. Sutton
- 1996-97 Michael B. Burke
- 1995-96 Catherine J. Souch
- 1994-95 William A. Blomquist
- 1993-94 Richard S. Steinberg
- 1992-93 Scott Seregny
- 1991-92 Larbi Oukada
- 1990-91 Rowland A. Sherrill
- 1989-90 Linda Haas
- 1988-89 Michael Balmert
- 1987-88 Edmund Byrne
- 1986-87 David G. Burns
- 1985-86 No award
- 1984-85 Jan Shipps
- 1983-84 Rufus Reiberg
- 1982-83 Warren G. French
- 1981-82 Frederick L. Bein
- 1980-81 Richard C. Turner
- 1979-80 Patrick J. McGeever
- 1978-79 John D. Barlow and Miriam Z. Langsam
- 1977-78 Ralph D. Gray
- 1976-77 Laurence Lampert
- 1975-76 Joseph R. Keller
- 1974-75 Bernard Friedman

Associate Faculty Award

- 2010-2011 Moffett Craig

Courses

Africana Studies (AFRO)

AFRO-A 106 Perspectives from the African American Diaspora (1-3 cr.) This course is a study of selected topics or issues in Afro-American/African Diaspora Studies usually coordinated with symposia and/or conferences sponsored by the AADS Program. This course will expose students to current trends in research techniques, new research, allow them to interact with nationally and internationally known scholars and leaders in the area of AAADS. PUL=1A

AFRO-A 140 Introduction to African American and African Diaspora Studies (3 cr.) Introduction to the theory, method, and content of African American and African Diaspora Studies. Examines the social, political, cultural, and economic experiences of people comprising the African Diaspora. Utilizes an interdisciplinary approach and conceptual, theoretical, and analytical frameworks to illustrate the interconnectedness of black peoples experiences and the importance of studying AAADS as a field of scholarly inquiry. PUL=1A

AFRO-A 150 Survey of the Culture of Black Americans (3 cr.) An introduction to the traditions, life, and experiences of Africans in the United States. The course utilizes learning resources from a variety of disciplines, including history, literature, and the social sciences. PUL=1A

AFRO-A 152 Introduction to African Studies (3 cr.) This course provides students with an interdisciplinary, introductory perspective on African continuities and changes. The course will focus on contemporary African societies while considering the lessons learned through the vestiges of slavery, colonization, aparteid and liberation struggles on the continent. PUL=1A

AFRO-A 200 Research in African American and African Diaspora Studies (3 cr.) Introduce students to basic tools, techniques and processes of scholarly research in African American and African Diaspora Studies. Students learn and apply technology as it pertains to research, address ethical issues, gain an understanding of basic statistical techniques in research and gain proficiency in reading, writing, understanding, and critiquing research articles, abstracts, and proposals. PUL=1C

AFRO-A 202 The West and the African Diaspora (3 cr.) An introduction to Western Europe's and America's perception of Africa and Africans. Emphasis is on the image of Africans and their New World descendants, as constructed by European and American intellectuals. PUL=1A

AFRO-A 249 Afro-American Autobiography (3 cr.) A survey of autobiographies written by black Americans in the last two centuries. The course emphasizes how the autobiographers combine the grace of art and the power of argument to urge the creation of genuine freedom in America. PUL=1A

AFRO-A 255 The Black Church in America (3 cr.) History of the black church from slavery to the present emphasis on the church's role as a black social institution, its religious attitudes as expressed in songs and sermons, and its political activities as exemplified in the minister-politician. PUL=5

AFRO-A 303 Topics in African American and African Diaspora Studies (1-3 cr.) Study of selected topics or issues in Afro-American studies occasionally, but not always, coordinated with symposia and/or conferences sponsored by the AAADS Program. PUL=1A

AFRO-A 306 Globalization, Struggle, and Empowerment in the African Diaspora (3 cr.) Examines the shared cultural, political, social, and intellectual responses to the transoceanic experiences of African diasporic populations. Utilizes interdisciplinary tools and perspectives to understand the impact of colonialism, imperialism, and globalization on African populations of the United States, Canada, Great

Britain, and selected Western European nations during the modern era. PUL=5

AFRO-A 352 Afro-American Art II: Afro-American Artists (3 cr.) A survey of the artistic traditions of the Africans in the New World, from the period of slavery in North and South America through contemporary and expatriate African American artists. PUL=1A

AFRO-A 355 African American History I (3 cr.) A study of the history of African Americans in the United States. Includes the role African-American culture has played in the development of the American nation, Slavery, Abolitionism, Reconstruction and the post-Reconstruction to 1900. PUL=2

AFRO-A 356 African American History II (3 cr.) This course will explore each of the major historical events and Black leaders of those times and their influence on the social and political advancement of African Americans from 1900 to the present. PUL=2

AFRO-A 369 The African American Experience (3 cr.) This integrator course introduces students to the methodological and analytical tools needed to understand the historical background, contemporary challenges, and current policy debates about issues confronting the African American community, such as credit market discrimination, affirmative action, and reparations. A chief goal of the course is to expose students to broad themes in African American history, while also providing them with the necessary interdisciplinary tools—both qualitative and quantitative—to analyze contemporary economic problems and prospects. PUL=1A

AFRO-A 402 Seminar in African American and African Diaspora Studies (3 cr.) Senior capstone course in African American and African Diaspora Studies. Involves intensive discussion of selected themes/topics related to AAADS. Students are expected to engage in in-depth library and/or field research to apply diasporic theory concepts and analysis to real life, peoples, events, and/or issues impacting people of African descent. PUL=4

AFRO-A 440 History of the Education of Black Americans (3 cr.) This course focuses on the education of Black Americans and its relationship to the Afro-American experience. Trends and patterns in the education of Black Americans as such relate to the notions of education for whom and for what. PUL=4

AFRO-A 495 Individual Readings in African American and African Diaspora Studies (1-3 cr.) By arrangement with instructor. Investigation of topics of special interest to students that are not covered in the regular program curriculum or that students wish to pursue in greater detail. May be repeated once for credit. PUL=3

AFRO-A 569 The African American Experience (3 cr.) This course introduces graduate students to the methodological and analytical tools needed to understand the historical background, contemporary challenges, and current policy debates about issues confronting the African American community, such as credit market discrimination, affirmative action, and reparations. A chief goal of the course is to expose students to broad themes in African American history, while also providing them with the necessary interdisciplinary tools—both qualitative and quantitative—to analyze contemporary economic problems and prospects.

AFRO-E 310 Culture of Africa (3 cr.) A basic ethnographic survey of African cultures, with attention to social groupings, tribalism, religion, language social change, and the ecological relationship between humans and nature. PUL=1A

American Sign Language (ASL)

ASL-A 131 Intensive Beginning American Sign Language (5 cr.) First course in the introductory sequence of language courses. Emphasis on developing basic conversational skills as well as awareness of Deaf culture. PUL=1A

ASL-A 132 Intensive Beginning American Sign Language II (5 cr.) Second course in the introductory sequence of language courses. Emphasis on developing basic conversational skills as well as awareness of Deaf culture. PUL=1A

ASL-A 211 Second Year American Sign Language I (5 cr.) First course in the second year sequence of language courses designed for students who have completed A131 and A132. Emphasis is on expansion of grammar, syntax, sentence structure, and vocabulary development, as well as continuation of Deaf Culture studies. PUL=1

ASL-A 212 Second Year American Sign Language II (5 cr.) Second course in the second year sequence of language courses designed for students who have completed A211. Emphasis is on the narrative, receptive, and expressive skill development and continuation of Deaf Culture studies. PUL=1A

ASL-A 215 Advanced Fingerspell & Numbers in ASL (3 cr.) An advanced class in expressive and receptive fingerspelling and in the numbering systems of American Sign Language. Emphasis is on clarity and accuracy through intensive practice in comprehension and production.

ASL-A 219 Deaf Community History & Culture (3 cr.) Students are introduced to American Deaf culture and components of the American Deaf community including history, norms, rules of social interactions, values, traditions, and dynamics. Educational, social and political factors unique to the Deaf community will be explored, as well as community organizations, the impact of technology, and emerging issues/trends.

ASL-A 311 Third Year American Sign Language I (5 cr.) First course in the third year sequence of language courses designed for students who have completed A211 and A212. Emphasis is on expansion of grammar, syntax, sentence structure, and vocabulary development. PUL=1

ASL-A 312 Third Year American Sign Language II (5 cr.) Second course in the third year sequence of language courses designed for students who have completed A311. Emphasis is on the narrative, receptive, and expressive skill development. PUL=1A

ASL-A 321 Linguistics of American Sign Language (3 cr.) Students will learn to analyze ASL linguistically, exploring the building blocks of ASL: phonemic analysis, phonology, morphology, syntax, and semantics. The application of these concepts to a visual language will be the focus of the course.

ASL-I 301 Introduction to Interpreting (3 cr.) Provides an overview of the field of ASL/English interpreting. Emphasis is on exploring a progression of philosophical frames in the development of the profession; exploring models of the

interpreting process and identifying requisite responsibilities, skills, and aptitudes for interpreters. PUL=5

ASL-I 303 American Sign Language for Interpreters (3 cr.) This course is designed for student interpreters to continue improving their fluency in American Sign Language (ASL). Emphasis is on the ability to compose and produce a variety of discourse genres in ASL, such as narratives, explanations, descriptions, expository talks, procedural talk, and others. There is an equal emphasis on comprehension of, and response to, the same discourse types. Students will begin to focus on features of language such as prosody, discourse markers, rhythm, accents, variations, cohesive devices, involvement strategies, and others. PUL=5

ASL-I 361 Basic Interpreting Skills (3 cr.) P: Director's permission. This is the first course in the professional skills preparation for interpreting. Students begin by analyzing texts for purpose, audience, linguistic features, and discourse structure. Students are taught discourse mapping and retelling texts in the same language. As students learn to analyze, they also learn how to evaluate adequate renditions. PUL=5

ASL-I 363 Interpreting Community Texts: Consecutive (3 cr.) P: Director's permission. This is the second interpreting course that prepares students for the analytical skills needed to interpret. In this course, students continue their practice with inter-lingual mapping exercises. The greatest change is from an unlimited to a limited time for preparation and production of texts. PUL=4; RISE=S

ASL-I 365 Interpreting Community Texts: Simultaneous (3 cr.) P: Director's permission. This is the third and final course to prepare student to do simultaneous interpreting. In this course, students continue with mapping exercises, working towards interpreting unfamiliar texts, and evaluating interpretations. The greatest challenge is eliminating pausing. PUL=4;

ASL-I 405 Practicum (3 cr.) An extensive practicum experience. Students will be placed at sites to experience several interpreting settings during the 15-week course. Students will be required to maintain a journal of their experiences and to meet with onsite practicum mentors and program faculty regularly throughout the course. PUL=3; RISE=S

ASL-I 407 Professional Seminar (3 cr.) This course provides for advanced level interpreting students to safely discuss practical work experiences, ethical decision making and professional communication. Students will engage in self-reflection activities and discussions that will lead them to a better understanding of the complex world of ASL/English interpreting.

ASL-L 340 Discourse Analysis: English (3 cr.) This course focuses on the analysis of language use in different genres of spoken English so that interpreting students become explicitly aware of everyday language. Students collect, transcribe, and analyze features of conversations, lectures, explanations, interviews, descriptions, and other types of speech genres while reading and discussing theoretical notions underlying language use in English. PUL=2

ASL-L 342 Disclosure Analysis: ASL (3 cr.) This course continues the introduction to discourse analysis, focusing on discourse in American Sign Language (ASL). Topics will include general discourse issues such as approaches to analysis, natural data analysis, technology for research in signed languages, and topics specific to ASL, including transcription in ASL, use of space and spatial mapping, involvement strategies, discourse structures and genres, cohesion and coherence, framing, and interaction strategies. One ongoing issue throughout the course will be the relevance to interpreting. PUL=2

American Studies

AMST-A 103 Topics in American Studies (1-3 cr.) Interdisciplinary consideration of various American studies topics sometimes coordinated with symposia and/or conferences sponsored by the IUPUI Center for American Studies. A103 cannot be counted as credit toward an American studies minor. PUL=1A

AMST-A 301 The Question of American Identity (3 cr.) Is American culture unified or does it consist of a potpourri of more or less distinct cultures? Beginning with the 1600s but emphasizing the nineteenth and twentieth centuries, this course explores classic texts in American culture, seeking to locate the terms of American unity in the midst of obvious diversity. PUL=5

AMST-A 302 The Question of American Community (3 cr.) What are the varieties and forms of American social life? This course will explore the manner in which Americans, from Puritan times through the later decades of the twentieth century, have structured and experienced social life in rural, urban, and suburban settings. PUL=5; RISE=E

AMST-A 303 Topics in American Studies (1-3 cr.) Interdisciplinary consideration of various American studies topics. PUL=5; RISE=E

AMST-A 304 The Transformation of America 1960–1980 (3 cr.) America in the years from John F. Kennedy to Ronald Reagan. An examination of such topics as the myth of Camelot, the civil rights movement and the subsequent black uprising, Vietnam and its aftermath, the rise of counterculture, campus unrest and the student movement, the road to Watergate and the retreat into narcissism, the pervasive influence of television, and the rise of neo-conservatism. Also, consideration of the literature: modernism and fabulism in fiction, social and cultural criticism, and the new journalism in nonfiction. PUL=5

AMST-A 497 Overseas Study, Derby, UK (1-4 cr.) Students participating in the exchange program with the University of Derby, UK, must register for sections of this course to receive credit for their work at the partner institution. The title of the course taken at Derby will appear on the student's transcript under this course number. Consent of instructor required. PUL=5; RISE=I

AMST-A 499 Senior Tutorial in American Studies (3 cr.) This course provides students with the opportunity to pursue particular interests in American studies on topics of their choices and to work in a tutorial relationship with an American studies faculty member. In this course of directed study, students will be required to produce research projects for filing in the library. PUL=5

AMST-B 497 Overseas Study, Newcastle, UK (1-5 cr.) Students participating in the exchange program with the Newcastle University, UK, must register for sections of this course to receive credit for their work at the partner

institution. The title of the course taken at Newcastle will appear on the student's transcript under this course number. Consent of instructor required. PUL=5; RISE=I

AMST-G 753 Independent Study (3 cr.) Authorization required.

Anthropology (ANTH, FOLK, MSTD)

Advanced Courses

ANTH-A 337 African American Health Care (3 cr.) An anthropological perspective on the study of African American health beliefs and practices. This course examines the major theories for African American health as well as the relevant issues for understanding these health care practices in delivering health services. Local and national health care issues will be examined. PUL=2

ANTH-A 360 The Development of Anthropological Thought (3 cr.) An overview of the major theoretical developments within anthropology, as the discipline has attempted to produce a universal and unified view of human life based on knowledge of evolution and prehistoric and contemporary cultures. PUL=4

ANTH-A 361 Applied Cultural Change (3 cr.) A survey of major concepts of cultural and social change, and an evaluation of different models of applied change. The course emphasizes both a sound understanding of change and its practical application in developmental change. PUL=3

ANTH-A 395 Field Experiences in Anthropology (1-3 cr.) P: permission of instructor. A supervised field experience in a selected area of anthropology. May not be repeated for more than 6 credit hours. PUL=3; RISE=E

ANTH-A 401 Cultural Resource Management (3 cr.) The concept of cultural resource management as a theoretical and functional tool to effect the conservation and protection of archaeological resources. Law, project review, site registration, and preservation strategies will be addressed. PUL=2,3,6

ANTH-A 412 Senior Project (3 cr.) An independent study course, taken toward the end of undergraduate studies in which students apply their anthropological expertise to projects that range from original research to applied work in the community. Students work on individual projects of their own design in consultation with faculty supervisors. Registration is by instructor authorization. PUL=3; RISE=R,E

ANTH-A 413 Senior Seminar (1 cr.) This course examines the present state of anthropology, strategies for career development, and issues involved in using and applying anthropology. Designed to be taken toward the end of undergraduate studies, usually in conjunction with the A412 Senior Project, this course is generally restricted to anthropology majors. Registration is by instructor authorization. PUL=3

ANTH-A 454 Human Ecology (3 cr.) A survey of the biological and cultural means by which humans adapt to their environment. This course emphasizes the unique nature of human adaptation, focusing on specific human groups and on the general processes of adaptation. PUL=5

ANTH-A 460 Topics in Anthropology: (variable title) (1-3 cr.) A conceptual examination of selected topics in the field of anthropology. May not be repeated for more than 6 credit hours. PUL varies with topic.

ANTH-A 462 Truth & Reconciliation (3 cr.) This course provides students with the opportunity to review and analyze novel truth and reconciliatory trends from around the world, in particular: apologies and other symbolic gestures; reparations and compensation; memorials and museums; truth commisions; treaties and peach accords; musical, sporting, and artistic performances. PUL=2,5,6

ANTH-A 485 Topics in Applied Anthropology: (variable title) (1-3 cr.) An examination of a selected topic where the concepts, principles, and methods in anthropology are utilized to address a particular community or social issue. May not be repeated for more than 6 credit hours.

ANTH-B 301 Laboratory in Bioanthropology (3 cr.) Laboratory investigations of human skeletal biology, including age and sex determinations, bone pathologies, and forensic identification, human paleontological and primate observations. Variability in living populations, including anthropometry, blood grouping, and dermatogyphics. Emphasis on a biocultural perspective in applying methods and techniques of bioanthropology. PUL=1B,2

ANTH-B 370 Human Variation (3 cr.) Variation within and between human populations in morphology, gene frequencies, and behavior. Biological concepts of race, race classification, along with other taxonomic considerations, and evolutionary processes acting on humans in the past, present, and future. PUL=2

ANTH-B 371 The Anthropology of Human Nature (3 cr.) An examination of the foundations of human behavior as viewed from the biocultural and evolutionary perspective of anthropology. This course strives to provide the student with a rational middle ground in the nature/nurture debate by demonstrating that human behavior is innately plastic. PUL=2

ANTH-B 426 Human Osteology (3 cr.) This course provides an intensive introduction to the human skeleton emphasizing the identification of fragmentary skeletal remains. This knowledge forms the under-pinning for advanced study in forensic anthropology, paleo-anthropology, bio-anthropology and human osteology. Pathological conditions as well as bone growth and development will be studies. This course will consist of three hours of class per week, with both lecture and laboratory time given. You should anticipate at least 20 hours per week of independent laboratory time. There will be a series of practical quizzes, completion of exercises from a lab manual, compilation of an individual osteology notebook that contains class notes and drawings, and a final burial report. PUL=2,3

ANTH-B 466 The Primates (3 cr.) The study of our closest living relatives, the prosimians, monkeys, and apes, from the perspective of evolutionary and environmental influences on morphology and complex social behavior. PUL=2,4

ANTH-B 480 Human Growth and Development (3 cr.) The study of human growth and development from a biocultural perspective including the physical mechanisms, and social, cultural, and environmental factors that lead to normal growth and development throughout the human life cycle. Causal factors, patterns of expression, and methods of assessment are stressed. Also available for graduate credit. PUL=3

ANTH-E 300 Culture Areas and Ethnic Groups: (variable title) (1-3 cr.) An ethnographic survey of a selected culture area or ethnic group. May not be repeated for more than 6 credit hours. PUL=5

ANTH-E 310 Cultures of Africa (3 cr.) An ethnographic survey of culture areas and societies of sub-Saharan Africa. PUL=5

ANTH-E 316 Prehistory of North America (3 cr.) This course will introduce students to the cultural variety and complexity of prehistoric native North Americans. The course focuses on the various environmental adaptations, lifeways, social systems, and material culture that have been revealed through archaeological research. PUL=5,6

ANTH-E 320 Indians of North America (3 cr.) An ethnographic survey of native North American culture areas and ethnic groups. PUL=5

ANTH-E 326 Modern Greek Society (3 cr.) This course examines modern Greek life from an anthropological perspective. Recent Greek history, and the changing circumstances of both village and urban dwellers are explored. The complexity of cross-cultural understanding emerges as the various images that outsiders hold of modern Greece are compared to the realities of contemporary life there. PUL=5

ANTH-E 335 Ancient Civilizations of Mesoamerica (3 cr.) Historical ethnography of the major pre-Columbian civilizations, especially the Aztec, the Maya, and the Zapotec and Mixtec. Emphasis on the social life, cultural achievements, religion, world view, and political systems to illustrate the diversity and richness of Amerindian life before the Spanish conquest. PUL=5

ANTH-E 336 African American Culture (3 cr.) This course provides an anthropological and comprehensive approach to the study of African American culture. It will focus on the ethnohistory, culture, politics, gender, language, health care, and values of African Americans. A secondary aim of this course is to examine the contemporary issues which affect the African American family. PUL=5

ANTH-E 354 Popular Culture (3 cr.) This course studies how traditional anthropological insight can analyze social and political complexities of contemporary popular cultural phenomena. Focuses on how anthropological subjects such as class, racism, and regionalism lurk within popular cultural phenomena including post-1950 music subcultures, civil religion, and consumer culture. PUL=2,3,5

ANTH-E 356 Cultures of the Pacific (3 cr.) This course examines the varied peoples and adaptations of the three main culture areas in the Pacific region (Micronesia, Polynesia, Melanesia) and explores such topics as male/female relations, sorcery, exchange, colonialism, and economic development. PUL=2,4,5

ANTH-E 380 Urban Anthropology (3 cr.) Anthropological perspectives on contemporary American cities. Topics to be covered include (among others): changes in the nature of cities from maufacturing sites to spaces for consumption and tourism; gentrification; racial and ethnic diversity in cities; urban social movements and new models for social services. PUL=5

ANTH-E 384 The African Diaspora (3 cr.) This course examines the cultural formation of the African Diaspora in the Americas. The course focuses specifically on the development of the African diasporic populations in the Caribbean, Central America and South America in comparative perspective. Students will develop a critical understanding of the African Diaspora as a geographical displacement, as an assemblage of cultural groups, and as a process of political identification. PUL=2,5

ANTH-E 391 Women in Developing Countries (3 cr.) This course explores the nature of women's roles in developing countries. Particular emphasis is placed on examining how development and cultural change have affected the lives of women. PUL=1C

ANTH-E 402 Gender in Cross-Cultural Perspective (3 cr.) This course considers the meaning and social implications of gender in human society. Cultural definitions of ''male'' and ''female'' gender categories as well as associated behavioral and structural differentiation of gender roles will be analyzed using current anthropological concepts and theories. PUL=2,5

ANTH-E 403 Women of Color in the US (3 cr.) This course examines the concepts of race, and gender as inextricably tied analytical categories, and how they have structured the lives of African American, Latina, Native American and Asian American women, both US born and immigrant. Themes of oppression, identities and activism figure prominently throughout the course. PUL=2,5

ANTH-E 404 Field Methods in Ethnography (3 cr.) Introduction to the methods and techniques anthropologists use to study other peoples. Preparation of a research proposal, interviewing, and the use of life histories and case studies. PUL=3; RISE=S

ANTH-E 411 Wealth, Exchange, and Power in Anthropological Perspective (3 cr.) This course examines cultural patterns of production, exchange, and consumption, with an emphasis on non-Western societies and how these factors influence economic development in the Third World. PUL=1C

ANTH-E 421 The Anthropology of Aging (3 cr.) This course explores age and the aging process cross-culturally by looking at the specific cultural context in which individuals age and by analyzing similarities and differences across cultures. PUL=1C

ANTH-E 445 Medical Anthropology (3 cr.) A cross-cultural examination of human biocultural adaptation in health and disease, including biocultural epidemiology; ethnomedical systems in the prevention, diagnosis, and treatment of disease; and sociocultural change and health. Also available for graduate credit. PUL=3,4,5

ANTH-E 455 Anthropology of Religion (3 cr.) Critical evaluation of current approaches to the analysis of religious myth, ritual, and symbolism. Problems in understanding religious beliefs of other cultures. Modern development of anthropology of religion. PUL=2,3,5

ANTH-E 457 Ethnic Identity (3 cr.) A cross-cultural analysis of the nature of ethnic groups and identity, including the effects of colonialism and nationalism on ethnic groups,

stereotyping groups, ethnic symbols and styles, and persistence and change in ethnicity. PUL=2,5

ANTH-E 470 Psychological Anthropology (3 cr.) A cross-cultural examination of human behavior in its ethnic context, including selected topics such as socialization, sex roles, altered states of consciousness, and personality and sociocultural change. PUL=3

ANTH-L 300 Language and Culture (3 cr.) This course explores the relationships between language and culture, focusing on research methodology and surveying various theoretical frameworks. Topics to be discussed include linguistic relativity (the Sapir-Whorf Hypothesis), ethnographies of communication, interview techniques, and methods of data collection and analysis. PUL=3,4,5

ANTH-L 401 Language, Power, and Gender (3 cr.) This course investigates sociocultural aspects of language use, focusing on the interaction of power and gender with language. Topics include differences in men's and women's language use, discourse patterns and power relationships, and identity and language use. To what extent does the language we speak sustain the dominance of certain groups in our society? PUL=2,3,5

ANTH-P 330 Historical Archaeology (3 cr.) We will examine the ways in which historical archaeologists investigate Colonial and American cultures and lifeways in various regions of North America throughout time. Special attention will be given to understanding the long and complex history of Native American/European interactions. North American social systems, interaction with and exploitation of the environment, technologies, and material culture. The theory and methods used by historical archaeologists will also be emphasized. PUL=3,4,5

ANTH-P 340 Modern Material Culture (3 cr.) This course examines how contemporary social experience is impacted by material culture ranging from toys to theme parks. Focuses on how consumers perceive themselves and others in modern consumer culture through the medium of commodities and examines systems of inequality that are reproduced and subverted through consumption. PUL=2,4,5

ANTH-P 396 The Rise of Civilization (3 cr.) Covers the development of complex societies in several regions of the world. The material is approached from an anthropological perspective, with emphasis on archaeological methods of data collection and analysis. Early civilizations in Iraq, India, Egypt, Rome, China, Peru, and Central America will be discussed. PUL=2,5

ANTH-P 402 Archaeological Method and Theory (3 cr.) This class is concerned with how archaeologists know what they know about the past. Methods of data collection are reviewed and theoretical interpretations are discussed. The focus of the course is on evaluation of archaeological research and explanation, with special emphasis on critical thinking. PUL=2,4

ANTH-P 405 Fieldwork in Archaeology (3-6 cr.) Archaeological work directed toward field techniques: excavation and preservation of materials, surveying, photography, cataloging. One credit hour per full week of fieldwork. PUL=3; RISE=R,E

Folklore (FOLK)

FOLK-F 101 Introduction to Folklore (3 cr.) A view of the main forms and varieties of folklore and folk expression in tales, ballads, gestures, beliefs, games, proverbs, riddles, and traditional arts and crafts. The role of folklore in the life of human beings. PUL=5

FOLK-F 111 World Folk Music and Culture (3 cr.) The course explores the role of music in human life. It introduces students to ethnomusicology and the cross-cultural study of music, performance, and culture. PUL=5

FOLK-F 131 Introduction to American Folklore (3 cr.) Folklore and traditional expressive behavior within the context of American culture. Art and traditional philosophies of folk groups in America, including ethnic groups, occupational groups, regional groups, religious groups, etc. The function of folklore within the lives of American people. PUL=5

FOLK-F 312 European Folklore/Folklife/Music (3 cr.) A comparative survey of the genres of the folklore of Europe, emphasizing especially the study of worldview and folk religion. The interrelationships of the folk cultures of Europe that allow us to speak of "European folklore" will also be examined. PUL=5

FOLK-F 354 African American Folklore/Folklife/Folk Music (3 cr.) African American culture in the United States viewed in terms of history and social change. Folklore, folk music, and oral history as means of illuminating black culture and history. May be repeated once when topics vary. PUL=5

FOLK-F 356 Chicano Folklore/Folklife/Folk Music (3 cr.) The folk traditions of Mexican Americans as a reflection of the historical experience and cultural identity of this people within the United States. Mexican heritage, Anglo and black influences, and the blending of these elements into a unique cultural entity. May be repeated once when topics vary. PUL=5

FOLK-F 360 Indiana Folklore/Folklife/Folk Music (3 cr.) Survey of folklore, folklife, or folk music of Indiana with particular attention to the persistence into the present of preindustrial culture. Students are encouraged to do fieldwork in the state. May be repeated once when topics vary.

FOLK-F 363 Women's Folklore, Folklife, and Music (3 cr.) This course identifies key issues in women's folklore and examines the ways in which women have been represented in myths, legends, and folktales, past and present. The various ways in which visions of womanhood inform, reflect, and challenge gender roles will also be analyzed. PUL=3

Graduate Minor in Anthropology and Health

ANTH-A 594 Independent Learning in Applied Anthropology (3 cr.) P: permission of instructor. Independent research/training using anthropological perspectives/methods in addressing social issues. The project must be a discrete activity with a concrete product, conducted in conjunction with the student's anthropology advisor and a member of the organization where she or he will be located. May not be repeated for more than 6 credit hours.

ANTH-E 445 Medical Anthropology (3 cr.) A cross-cultural examination of human biocultural adaptation in health and disease, including biocultural epidemiology, ethnomedical

systems in the presentation, diagnosis, and treatment of disease, and sociocultural change and health. PUL=2,3,5

Research Methods in the Anthropology of Health

ANTH-B 521 Bioanthropology Research Methods (3 cr.)

ANTH-B 523 Anthropometry (3 cr.)

ANTH-B 525 Genetic Methods in Anthropology (3 cr.)

ANTH-E 404 Field Methods in Ethnography (3 cr.)

ANTH-E 606 Research Methods in Cultural Anthropology (3 cr.) Research Methods in Cultural Anthropology.

ANTH-L 605 Field Methods in Anthropological Linquistics (3 cr.)

Independent Study

ANTH-A 494 Practicum in Applied Anthropology (1-4 cr.) P: permission of instructor. An arranged experience in applied anthropology, appropriate to individual career goals. The student will work with an approved community group or organization in a specific project that facilitates the integration of previous course work and experience in a practical application. May not be repeated for more than 6 credit hours.

ANTH-A 495 Independent Studies in Anthropology (2-4 cr.) P: permission of instructor. A supervised, in-depth examination through individual research on a particular topic selected and conducted by the student in consultation with an anthropology faculty member. PUL=3; RISE=R

ANTH-A 560 Variable Topics - Anthropology (3 cr.)

ANTH-A 594 Independent Learning in Applied Anthropology (3 cr.) P: permission of instructor. Independent research/training using the anthropological perspective/methods in addressing social issues. The project must be a discrete activity with a concrete product, conducted in conjunction with the student's anthropology advisor and the member of the organization where she or he will be located. May not be repeated for more than 6 credit hours.

ANTH-A 600 Seminar in Anthropology (2-4 cr.)

ANTH-E 501 Fundamentals of Applied Anthropology (3 cr.)

Introductory Courses

ANTH-A 103 Human Origins and Prehistory (3 cr.) A survey of human biological and cultural evolution from early pre-Pleistocene hominids through the development of urbanized state societies, with the goal of better understanding our human heritage. (Not open to students who have taken A303.) PUL=2

ANTH-A 104 Introduction to Cultural Anthropology (3 cr.) A survey of cultural and social processes that influence human behavior, using comparative examples from different ethnic groups around the world, with the goal of better understanding the broad range of human behavioral potentials and those influences that shape the different expressions of these potentials. (Not open to students who have taken A304.) PUL=5

ANTH-A 201 Survey of Applied Anthropology (3 cr.) P: A104 or A304, and A103 or A303, or permission of instructor. A survey of such issues in applied anthro-pology as cultural resource management, community development, cross-cultural communication, Third World development, museum studies, archaeological ethics, and the impact of human diversity on health care, education, and social programs. PUL=3,6

ANTH-A 303 Evolution and Prehistory (3 cr.) P: junior standing. An advanced survey of human biological and cultural evolution from pre-Pleistocene hominids through the development of urbanized state societies. (Not open to students who have taken A103.) PUL=2

ANTH-A 304 Social and Cultural Behavior (3 cr.) P: junior standing. An advanced survey of cultural and social processes that influence human behavior, with comparative examples from different ethnic groups around the world. (Not open to students who have taken A104.) PUL=5

Communication Studies (COMM)

Communication Studies (COMM)

COMM-G 100 Introduction to Communication Studies (3 cr.) P: reading placement of at least 80, and placement in W131. Survey course of history, theory, and practice in each of six major areas: rhetoric and public address, theatre arts, interpersonal/ organizational communication, small group dynamics, public communication, and mass media studies. For each of the areas examined, students will apply theory to practice, thereby learning to become more effective communicators. PUL=1A

COMM-G 125 Topics in Communication Studies (1-3 cr.) Select introductory theory and practice in specialized and/or consolidated areas of communication and theatre not directly covered by current curricular offerings. Topics will vary from one semester to another. A student may register for a total of no more than 6 credit hours under this course number. PUL=1A

COMM-G 201 Introduction to Communication Theory (3 cr.) A survey of theories in the field of human communication. Consideration is given to theories that explain communication behavior between pairs of people, within groups, in organizations, and in societies. PUL=2

COMM-G 300 Independent Study (1-8 cr.) Research or practical experience in various departmental areas as selected by the student prior to registration, outlined in consultation with the instructor, and approved by the department. If a practicum experience, it must represent a minimum of 45 clock hours of practical application per credit hour. A student shall take no more than a total of 9 credit hours of G300 and G491. PUL=4

COMM-G 310 Introduction to Communication Research (3 cr.) Methodologies and types of data analyses for investigating communication phenomena. Students will acquire knowledge and competencies that will allow them to understand and address the process of communication research and relevant communication research issues. PUL=1B

COMM-G 375 Nonverbal Communication (1-3 cr.) Course examines the influences of nonverbal communication cues: interpersonal dynamics, media, environmental dimensions, and rhetorical strategies. Cross-cultural and gender differences in nonverbal codes will also be explored. PUL=2

COMM-G 390 Honors (1-5 cr.) P: junior standing and departmental approval. Individualized readings and/or project work devised by the student; regular meetings with faculty supervisor. PUL=2

COMM-G 391 Seminar (1-3 cr.) P: permission of instructor. Topic announced in prior semester; oriented to current topics in communication and theatre; readings, projects, and papers as indicated by the topic and instructor. May be repeated for a total of 8 credit hours. PUL=3

COMM-G 391 Advanced Topics in Communication Studies (1-6 cr.)

COMM-G 400 Health Provider-Consumer Communication (3 cr.) This course is designed to teach communication skills and practices related to health care discourse, by examining transactional communication within health care contexts. Topics covered in this course focus directly upon interpersonal dialogue between health care providers and patients. PUL=4

COMM-G 491 Internship (3-6 cr.) P: permission of instructor; for seniors and majors only. Internship in rhetoric and public address, theatre arts, interpersonal/organizational communication, media studies permitted under the auspices of a qualified cooperating organization. Periodic meetings with faculty advisors and term paper detailing intern's professional activities and reactions. Apply during semester prior to desired internship. Total credit applicable to graduation shall not exceed 9 credit hours of G300 and G491. PUL=3

COMM-G 499 Research Seminar (3 cr.) P: upper-division standing or permission of instructor. A survey of the methods used by communication researchers for gathering and interpreting information emphasizing the relationship between theory and research, the seminar will explore important issues such as ethics and naturalistic vs. laboratory approaches. PUL=1B

Master of Arts in Applied Communication

COMM-C 104 Voice and Diction (3 cr.) Directed primarily toward the improvement of normal speech patterns, with emphasis on normal production, resonation, and articulation. PUL=1A

COMM-C 108 Listening (1 cr.) P: reading placement score of at least 80, and placement in W131. Designed to increase listening efficiency by improving comprehension and listening skills. PUL=1A

COMM-C 180 Introduction to Interpersonal Communication (3 cr.) P: reading placement score of at least 80. The study of human dyadic interaction, including topics such as perception processes, verbal/nonverbal communication, theoretical models of communication, conflict, and interpersonal communication in various relationships. Course covers applications of interpersonal communication theory/research, including communication competence. PUL=5

COMM-C 223 Business and Professional Communication (3 cr.) P: R110 or equivalent. Preparation and presentation of interviews, speeches, and oral reports appropriate to business and professional organizations; group discussion and parliamentary procedure. This is an intermediate skills course with survey characteristics. PUL=1A

COMM-C 228 Discussion and Group Methods (3 cr.) Theory of and practice in effective participation in and leadership of group, committee, conference, and public discussion; application to information-sharing and problem-solving situations. PUL=1C

COMM-C 316 Human Communication and the Internet (3 cr.) P: R110, C180 or equivalent. Required for online certificate in Communication Studies - Human Communication in a Mediated World. Students learn how interpersonal, group, mass, public, and organizational communication modes are mediated in Internet environments. Students practice message preparation in different modes and contexts. PUL=1A, 1E, 2

COMM-C 322 Advanced Interpersonal Communication (3 cr.) P: C180 or permission of instructor. Covers core components of the study of interpersonal communication: perception, systems, exchange theoretical approaches; methods of research in interpersonal communication; content (topic) areas such as intimate relationships and friendships. Includes applications of interpersonal communication theory/research. PUL=5

COMM-C 325 Interviewing Principles and Practices (3 cr.) P: R110 or equivalent. Emphasizes verbal and nonverbal communication in pre-interview back-ground research preparation, interview schedule design, question construction, and post-interview self-analysis in several interviewing contexts. Course includes significant assignments designed to help the student enhance oral performance competencies. PUL=1A

COMM-C 328 Advanced Topics in Small Group Communication (3 cr.) P: C228 or permission of instructor. Theories of small group communication processes. Explores group communication across cultures, groups in organizations, group decision making, conflict management in groups, and assessing competence in group communication. PUL=1A

COMM-C 345 Restorative Communication (3 cr.) P: COMM C180 The course focuses on healing communication -- healing individuals and relationships. Specific topics include healing communication basics, family, couple, group (e.g. support groups) and community healing (restorative justice; peace building). There is a strong focus on research theory and practice. Some assignments involve community participation. PUL=1A (major), 2 (moderate), and 6 (minor)

COMM-C 380 Organizational Communication (3 cr.) The application of communication theory and research to the study of communication in various types of organizations. Explores reciprocal influence between communication and organizational structures and between communication and managerial styles. Discusses communication designs, superior/ subordinate communication, conflict, information management, networks; communication vis-a-vis employee motivation, satisfaction, and productivity; and communication effectiveness in organizations. PUL=1A

COMM-C 392 Health Communication (3 cr.) P: 3 credit hours of communication or consent of instructor. Exploration of the communication competencies needed by health care professionals. Emphasizes interviewing; verbal and nonverbal skills; group interaction; and intercultural,

interprofessional, therapeutic, and organizational communication. Analyzes communication problems encountered in health care and the development of coping strategies. PUL=2; RISE=R

COMM-C 393 Family Communication (3 cr.) P: C180 or permission of instructor. Theory/research on the role of communication in creating and maintaining marriages and families. Topics include communication and family life cycles, different family forms, family race/ethnicity, power, and conflict. Covers applications of family communication theory/research. PUL=2; RISE=R

COMM-C 394 Communication and Conflict (3 cr.) Analyzes conflict as a form of interaction. Examines approaches/perspectives to the study of conflict, the nature of power, face saving, and contentious behaviors. Specific contexts include relational, marital, group, and organizational. Special attention to bargaining and mediation. PUL=1A

COMM-C 395 Gender and Communication (3 cr.) Examines the meaning of gender in contemporary American culture and its interaction with and relationship to communication. Explores topics such as gender and verbal and nonverbal communication; gender differences in public and private settings; gender and communication in families, schools, organizations, and the media. PUL=5

COMM-C 400 Health Provider-Consumer Communication (3 cr.)

COMM-C 401 Speech Communication of Technical Information (3 cr.) P: R110 or equivalent. Organization and presentation of information of a practical, technical nature. Emphasis is placed on the study, preparation, and use of audiovisual materials. For nonmajors only. PUL=1C

COMM-C 402 Interview and Discussion for Business and Professions (3 cr.) Principles of communication as related to the information-gathering interview, the employment interview, and problem-solving discussion; practice in using these principles. For nonmajors only. PUL=1A

COMM-C 481 Current Issues in Organizational Communication (3 cr.) P: C380 or permission of instructor. In-depth exploration of topics and issues at the forefront of research and theory in organizational communication. Topics may include gender issues in organizational communication, sexual harassment, crisis management, organizational culture. Seminar format with research papers and class discussion /presentations. PUL=2; RISE=R

COMM-C 482 Intercultural Communication (3 cr.) P: C180 or permission of instructor. Cognitive, affective, and behavioral learning about intercultural and intracultural communication to increase under-standing of the centrality of communication in the social, psychological, and environmental aspects of culture. PUL=5

Master of Arts in Applied Communication

COMM-C 500 Advanced Communication Theory (3 cr.) Students explore how scholars from various traditions have described and explained the universal human experience of communication. Students develop an understanding of a variety of communication theories to more completely interpret events in more flexible, useful, and discriminating ways.

COMM-C 501 Applied Quantitative Research Methods in Communication (3 cr.) The course is designed to offer students an opportunity to examine, assess, and utilize communication research methods as a means to test theory in applied settings and/or as a means to applied ends (i.e., problem-solving, policy, analysis).

COMM-C 502 Applied Qualitative Research Methods in Communication (3 cr.) P: 6 credits (at any level) of coursework in Communication Studies. Inductive (data-to-theory)approach to knowledge, and associated sequential and non-sequential methods, for studying communication in applied everyday situations; e.g., friendships and other close personal dyads, families, small groups, organizations, and public, media, historical, computer mediated, or health-related contexts.

COMM-C 502 Applied Qualitative Research Methods in Communication Studies (3 cr.) P: 6 credits (at any level) of coursework in Communication Studies. Inductive (data-to-theory)approach to knowledge, and associated sequential and non-sequential methods, for studying communication in applied everyday situations; e.g., friendships and other close personal dyads, families, small groups, organizations, and public, media, historical, computer mediated, or health-related contexts.

COMM-C 503 Applied Learning Project (3 cr.) An applied learning project that provides students with a culminating educational experience. The project gives students the opportunity to apply their knowledge of communicative processes to real-life organizational problems, and provides the opportunity to produce a body of work reflecting their abilities.

COMM-C 510 Health Provider-Consumer Communication (3 cr.) Designed to teach communication skills and practices related to health care talk by examining transactional communication within health care contexts. Topics covered in this course focus directly upon interpersonal dialogue between health care providers and patients.

COMM-C 520 Advanced Public Communication (3 cr.) Critical analysis and employment of rhetorical strategies in forms and types of professional discourses incorporating current technologies.

COMM-C 521 Advanced Public Communication (3 cr.) This interdisciplinary seminar focuses on communication involving families in health care settings, addressing significant issues for graduate/professional students who will work with families, including students in Comm. Studies, Nursing, Psychology, Social Work, Public Health, and Medicine. Topics include communication with families about health care concerns and family-patient-health provider systems.

COMM-C 521 Restorative Communication (3 cr.) This interdisciplinary seminar focuses on communication involving families in health care settings, addressing significant issues for graduate and professional students who will work with families, including students in Comm. Studies, Nursing, Psychology, Social Work, Public Health, and Medicine. Topics include communication with families about health care concerns and family-patient-health provider systems.

COMM-C 526 Effective Media Strategies (3 cr.) Contemporary communicators in need of mediums of communication in addition to face-to-face interaction require an expanded knowledge of rhetorical strategies. This course will have a special focus on the effective use of media as a means of persuasion.

COMM-C 528 Group Communication and Organizations (3 cr.) This seminar-format course examines the ways in which informal groups and communication networks facilitate a variety of organizational processes (i.e., socialization, diffusion of innovation). Emphasis is placed on developing theoretical understanding of informal groups in organizations as well as on methodological issues involved in studying communication networks in organizations.

COMM-C 530 Communication Criticism (3 cr.) This course will introduce students to criticism as a method of studying persuasive messages in speeches, fiction, mass media, musical lyrics, political campaign literature, art, and other modes of communication in contemporary culture.

COMM-C 531 Media Theory and Criticism (3 cr.) A course organized primarily around theories and critical strategies commonly considered within the broad category of contemporary criticism. The course utilizes primary theoretical texts to introduce students to a variety of methodologies employed in analyzing media messages, and emphasizes the application of theoretical frameworks on the analysis of specific media texts.

COMM-C 544 Advanced Relational Communication (3 cr.) Applications of communication theory/ research in such areas as relational culture and relationship development. Includes a scholarly project on a real relationship, and applications of research to areas such as pedagogy and couple/family therapy.

COMM-C 580 Advanced Organizational Communication (3 cr.) The course provides a solid foundation of concepts for understanding and discussing human organizations. Students will analyze, evaluate, and apply the theories and practices related to organizational issues. Through case studies, readings, and practical applications, this course combines a theory-based understanding of communication in organizations with real-world applications.

COMM-C 582 Advanced Intercultural Communication (3 cr.) An in-depth analysis of how variables such as values, beliefs, traditions, language, background, and experiences are manifested in the verbal and nonverbal meaning of messages communicated by cultures and subcultures throughout our global society.

COMM-C 591 Topics/Seminar in Applied Communication (3 cr.) This is a revolving topics course. The changing nature of the topic allows graduate students to explore, synthesize, and integrate knowledge of the field of communication and the particular discipline of applied communication while focusing on a single topic not otherwise addressed in the course of study.

COMM-C 592 Advanced Health Communication (3 cr.) A course designed to teach communication skills and practices related to health care by examining health care communication theory. Topics range across communication levels (interpersonal, intrapersonal, group, organization, mass media, and mediated communication) within a variety of health care contexts.

COMM-C 593 Advanced Family Communication (3 cr.) Applications of theory and research on the role of communication in creating and maintaining marriages/committed couples and families. Includes a scholarly term paper on a real couple or family's communication.

COMM-C 594 Communication and Conflict Management in Organizations (3 cr.) This seminar-format course examines the communication exchanges that facilitate conflict management within organizational contexts. Specific attention is focused on negotiation and mediation; however, the communication of alternative means of conflict and dispute resolution are also discussed. In addition, students will be introduced to methods for assessing conflict interaction in organizations.

COMM-C 597 Thesis (3 cr.) Applied communication students who choose the thesis option will identify a research topic and develop it under the guidance of the student's thesis director (IUPUI professor). The thesis topic will be related to the field of applied communication in its foci and method.

COMM-C 598 Internship (1-3 cr.) This course integrates applied communication theory and practice in a practice setting. Students will apply theoretical concepts and research tools, conduct projects, and interact with communication professionals in the designated setting. In concert with the student's chosen area of concentration, he or she will address issues of importance to that particular organization.

COMM-C 599 Independent Study (1-6 cr.) This course provides students with the opportunity to synthesize and apply knowledge acquired through course work and professional experience into a completed research project in applied communication. Students will work independently on a topic/issue of choice under the guidance of graduate faculty.

COMM-C 620 Computer-Mediated Communication (3 cr.) An overview of practical and scholarly approaches to computer mediated communication. The readings address mass communication, discourse, community, gender, intercultural understanding, ethics, interpersonal relationships, identity, organizational communication, and education.

Master of Arts in Applied Communication

COMM-M 150 Mass Media and Contemporary Society (3 cr.) P: reading placement score of at least 80. A critical overview of the role of electronic mass media in contemporary society. Provides an introduction to such issues as industry structure, organization, and economics; regulation, public interest, and media ethics; impact of programming on individuals; media construction of social institutions; media issues in the global village. PUL=2

COMM-M 210 Media Message Design (3 cr.) P: W132. Examines the process of message design in the context of institutional media use. Analyses of media messages and communication theory; analyses of the message receiver employ quantitative and qualitative audience research methods. Semester project involves planning and writing of script for use in organizational/institutional media context. PUL=1A

COMM-M 215 Media Literacy (3 cr.) Fundamentals and a general understanding of communication technologies are surveyed and discussed in a nontechnical and nonengineering manner. This course will introduce students to basic terminology and to various types of communication technology systems. It will also help students understand new and traditional communication systems and their theories of operation and application (including advantages and limitations). PUL=2

COMM-M 220 Electronic Graphic Production (3 cr.) Principles of visual aesthetics and critical visual literacy applied to the production of mediated messages. Basic typographic, graphic, and photographic skills are examined and practical techniques in different media are discussed. Several hands-on projects are used to develop individual competencies. PUL=1C

COMM-M 221 Electronic Media Production (3 cr.) Principles of visual and aural aesthetics and critical visual literacy applied to the production of mediated messages. Basic animation, video, and audio skills are examined and practical techniques in different media are discussed. Several hands-on projects are used to develop individual competencies. PUL=1C

COMM-M 290 Video Production Workshop (1 cr.) P or C: M221. The practical application of video production techniques. In a production center atmosphere, students are instructed in and practice equipment operation and crew responsibilities creating video productions for outside clients. Students may register for more than one section in one semester. May be repeated to a maximum of 3 credit hours. PUL=1C

COMM-M 370 History of Television (3 cr.) The development of television as an industry, technology, and cultural commodity from its roots in other forms of popular culture to the present, paying particular attention to the social and aesthetic contexts within which programs have been viewed. PUL=4

COMM-M 373 Film and Video Documentary (3 cr.) P: M150, C190, or permission of instructor. An historical survey of documentary film and video and a consideration of specific problems in documentary theory and practice. PUL=4; RISE=E

COMM-M 450 Video Production (3 cr.) For nonmajors only. Television production principles and practices for students in other disciplines. Emphasis on practical studio experiences with special attention to the roles of the writer, producer, and director. No prior knowledge of media required. May not be counted for credit in the media major emphasis. Lab arranged. PUL=1C

COMM-M 461 Production Problems in Communication Media (1-3 cr.) P: permission of instructor. Topic announced during preceding semester. Specialized study and application of advanced production techniques in audio, video, photography, or graphics. Readings, research, papers, and project as indicated by the topic and instructor. May be repeated for different topics. PUL=1C

COMM-M 462 Television Aesthetics and Criticism (3 cr.) P: M150 or permission of instructor. Aesthetic and critical approaches to modes of television expression. Aesthetics of picture composition, audiovisual relationships, visual narrative, and program content. Analysis of selected television criticism. PUL=4

COMM-M 463 Advanced Graphic Technique (3 cr.) P: M220 or permission of instructor.. Analysis of problems, methods, and technology in graphics. Consideration of advanced techniques in digital image and illustration manipulation including compositing, lighting effects, and different compression formats for video, multimedia, and the World Wide Web. PUL=1C

COMM-M 464 Advanced Audio Technique (3 cr.) P: M221 or permission of instructor. Analysis of field and studio recording technique with an emphasis on multitrack production. Electronic editing, mixing, and signal processing are considered. Group and individual projects. PUL=1C

COMM-M 465 Advanced Video Technique (3 cr.) P: M221 or permission of instructor. Analysis of electronic field production and editing with an emphasis in advanced video editing techniques. Both linear and nonlinear editing systems are considered. Individual and/or group projects. PUL=1C

COMM-M 466 Television Direction (3 cr.) P: M221, M290, or permission of instructor. Creative management of production elements to translate a program idea into medium requirements. Advanced course in which the experienced student produced substantive programs combining several formats. Emphasis on design and production from first request by client through program distribution. PUL=1C

Master of Arts in Applied Communication

COMM-R 110 Fundamentals of Speech Communication (3 cr.) P: reading placement score of at least 80. Theory and practice of public speaking; training in thought processes necessary to organize speech content for informative and persuasive situations; application of language and delivery skills to specific audiences. A minimum of six speaking situations. PUL=1A

COMM-R 224 Parliamentary Procedure (1 cr.) P: reading placement of at least 80, and placement in W131. Modern concepts of parliamentary forms in legislative assemblies and business meetings; practice in the use of parliamentary procedures PUL=2

COMM-R 227 Argumentation and Debate (3 cr.) Analysis, evidence, and argument in logical discourse; study of debate forms; practice in argumentative speaking in class, campus, and intercollegiate debate. PUL=2

COMM-R 309 Great Speakers: American Public Address (3 cr.) Course introduces students to historical and contemporary public address. Students will study the speechmaking of notable American speakers. The study will include speeches from a wide range of established genres and will include campaign rhetoric, debates, historical celebrations, lectures, legislative speaking, presidential speaking, public meetings, movement, rhetoric, and sermons. PUL=1A

COMM-R 310 Rhetoric and Public Address (3 cr.) P: R110 or equivalent. Development of theory of oral discourse; the influence of public address; historical and current problems in rhetoric of conflict, in freedom of speech, and in propaganda and persuasion. PUL=5

COMM-R 320 Advanced Public Communication (3 cr.) P: R110 or equivalent. Development of a marked degree of skill in preparation and delivery of various types of speeches, with emphasis on depth of research, clarity of organization, application of proof, and felicitous style. PUL=5

COMM-R 321 Persuasion (3 cr.) P: R110 or equivalent. Motivational appeals in influencing behavior; psychological factors in speaker-audience relation-ship; principles and practice of persuasive speaking. PUL=5

COMM-R 330 Communication Criticism (3 cr.) P: G100 or R110 and reading placement of at least 80. Course will introduce students to criticism as a method of studying persuasive messages in speeches, fiction, mass media, music, political campaigns, art, and other modes of communication in contemporary culture. PUL=5

COMM-R 350 Women Speak: American Feminist Rhetoric (3 cr.) To understand the ideological development of American feminist rhetoric, we examine: 1) speeches by well known, "Great Women" from the 1600's to the present; 2) non-traditional rhetorical forms of "ordinary women," including diaries, fiction, photography, reading groups; 3) intersections among race, class, ethnicity, sexual preference and gender in public discourse. PUL=1C

COMM-R 390 Political Communication (3 cr.) Provides an opportunity to study, understand, and participate in political communication. Topics covered include the rhetoric of politics, campaign discourse, political advertising, the role of the media and public opinion, the impact of new technology, and the place of interpersonal communication. PUL=5

Master of Arts in Applied Communication

COMM-T 100 Rehearsal and Performance (3-6 cr.) Emphasizes learning through the preparation and performance of plays and nondramatic literature adapted for performance. Various approaches may include but are not limited to performance studies, the study and preparation of a short play, and an original play for young audiences. The various steps and processes involved in the preparation and rehearsal will be based on appropriate theoretical concepts. A student may enroll in no more than 6 credits under this course number. PUL=1A

COMM-T 130 Introduction to Theatre (3 cr.) P: reading placement score of at least 80. An introduction to the study of theatre; the wide range of critical, historical, aesthetic, and practical interests necessary to a well-rounded view; emphasis on theatre as an art form and elements of dramatic construction. PUL=1B

COMM-T 133 Introduction to Acting (3 cr.) Acting I, a study of the theories and methods of acting, basic techniques, character analysis, interpretation, and projection. Class scenes. PUL=1A

COMM-T 205 Introduction to Oral Interpretation (3 cr.) P: reading placement score of at least 80. Basic principles and practice in analysis and reading of selections from prose, poetry, and drama. Public presentation of programs. PUL=1A

COMM-T 305 Advanced Oral Interpretation (3 cr.) P: T205 C: C104 An advanced approach to analysis and oral presentation of literature. Emphasis on group work. Analysis, development, and presentation of readers' theatre or chamber theatre materials. PUL=1A

COMM-T 333 Acting II (3 cr.) P or C: T133 or consent of instructor. Advanced scene study. Laboratory in body movement and vocal techniques; participation in laboratory theatre. PUL=1B

COMM-T 336 Children's Theatre (3 cr.) P: junior standing or consent of instructor. Historical development of children's theatre, with emphasis on scripts appropriate to young audiences: designed to assist future teachers, parents, librarians, and others in understanding theatre as an art form for children ages 6-12, and in selecting appropriate theatre experiences for various periods of the child's life. PUL=1C

COMM-T 337 History of the Theatre I (3 cr.) Significant factors in primary periods of theatre history through the Renaissance and the effect on contemporary theatre; emphasis on trends and developments; review of representative plays of each period to illustrate the theatrical use of dramatic literature. PUL=5

COMM-T 338 History of the Theatre II (3 cr.) Continuation of C337. May be taken separately. PUL=5

COMM-T 339 Play Directing (3 cr.) P: T130; T133 or permission of the instructor Introduction to theatre, methodology, and techniques: strong emphasis upon play analysis, actor-director communication, stage compositions. Students will direct scenes. PUL=3; RISE=E

COMM-T 430 Theatre Management (3 cr.) P: C130 or C141 or permission of instructor. This course is based on the concept that theatre is a business and must be operated on sound business principles. Students study the business aspects of operating various types of theatres. The study of the theoretical basis of management is augmented by practical projects. PUL=1B

COMM-T 431 Playwriting (3 cr.) P: permission of instructor. Introduction to playwriting theories, methodology, and skills; principles of dramatic structure; practice in writing, culminating in a one-act play manuscript; class evaluation and conferences. Credit not given for both T431 and IUB T453. PUL=3

COMM-T 437 Creative Dramatics (3 cr.) Laboratory course in informal dramatics, emphasizing the child rather than the production; includes methods of stimulating the child to imaginative creation of drama with the materials of poetry, stories, choral readings, and music. Available for graduate credit in summer sessions. PUL=3, RISE=E

COMM-T 440 The Art and Craft of Puppetry (3 cr.) Theory and practice of puppetry as an art form and as an educational tool. Students will create a wide variety of hand puppets, scripts, and stages as well as master basic techniques of puppet performance. PUL=3; RISE=E

Economics (ECON)

Graduate Courses

ECON 519 Mathematics for Economists (3 cr.)

ECON-E 504 Mathematics for Economists (3 cr.) Topics in mathematics that are particularly useful in the application of microeconomic theory, macroeconomic theory, and econometrics. Topics covered include: matrix algebra,

comparative-static analysis, constrained optimization, difference equations in discrete time, game theory, and set theory as applied to general equilibrium analysis.

ECON-E 513 Special Topics in Economic History (3 cr.) Explicit methodology and economic analysis applied to major issues in American and European economic history.

ECON-E 514 The Nonprofit Economy and Public Policy (3 cr.) P: E201. The role of nonprofit organizations (universities, churches, hospitals, orchestras, charities, day care, research, nursing homes) in mixed economies. Public policy controversies such as regulation of fundraising, antitrust against universities, ''unfair'' competition with for-profit firms, and the tax treatment of donations. (This course may not be taken for credit by anyone who has received credit for E414.)

ECON-E 515 Institutional Setting for Health Economics in the U.S. (3 cr.) P: completed or concurrent with E521 and E571. Overview of the structure fo the U.S. health care system including health care financing, health care delivery, and government programs. Private and public financing mechanisms as well as government regulation. Comparison of the U.S. system to the health care systems of other countries.

ECON-E 515 Institutional Setting for Nonprofit/Philanthropic Economics (3 cr.) P: completed or concurrent with E521 and E571. This course provides a broad overview of nonprofit institutions and philanthropic practices, along with a discussion of available data sources on each. We discuss the size and scope of nonprofit organizations, revenues, goverance, regulation and taxation, intersectoral relations, patterns of philanthorpy, and public policies that affect giving behaviors.

ECON-E 519 Regional Economics (3 cr.) Regional economics is the study of economic behavior in space. The course examines the internal and interregional determinants of growth and decline of a region from supply and demand perspectives. Public policies to influence these determinants are considered.

ECON-E 520 Optimization Theory in Economic Analysis (3 cr.) P: Calculus and linear algebra. Introduction to concepts and techniques of optimization theory applied in modern micro and macroeconomics. Theory and application of Lagrange multipliers, comparative statics analysis, valve functions and envelope theorems. Elements of dynamic programming and other methods of economics dynamics.

ECON-E 521 Theory of Prices and Markets (3 cr.) P: E504 or consent of instructor. Pure theory of consumer behavior, competitive exchange, theory of production; resource allocation, Pareto optimum, monopoly and monopsony, imperfect competition, moral hazard, adverse selection, and market signaling.

ECON-E 522 Macroeconomic Theory 1 (3 cr.) P: C520 Introductory course on macroeconomic dynamics; covers growth models and asset pricing theories, endogenous growth theories, optiomal growth problems, and competitive dynamic equilibrium models. Dynamic programming tools introduced as needed. All models are cast in discrete time setup; presents deterministic and stochastic theories.

ECON-E 528 Economic Analysis of Health Care (3 cr.) A graduate introduction to health economics. Applications of economic theory to problems in various areas in health care. Applications of econometric techniques to the same. Topics include how physicians, institutions, and consumers respond to economic incentives and what policies contribute maximally to efficiency and welfare.

ECON-E 541 Labor Market Analysis (3 cr.) P: consent of instructor. An analytical approach to the labor market. Theoretical underpinning and statistical testing of issues on demand and supply of labor, household decision making, human capital, contract theories, unionism, minimum wages, and discrimination.

ECON-E 545 Applied Labor Economics (3 cr.) P: E321 or E470 or equivalents. Discussion of wage rates and working conditions, searches by workers or firms, investment in training, quits and layoffs, shirking, discrimination, the division of household labor, retirement, and implicit contracts. The course also examines the impact of institutions such as unions and the government on the efficiency of the labor market

ECON-E 551 Monetary Economics II (3 cr.) Introduces alternative models of monetary economies; covers topics in monetary economics such as money and growth and optimal money growth. This course takes a unified approach to macroeconomic policy, treating moneytary and fiscal policy as jointly determining macroeconomic equilibria. May include discussion of empirical work on money.

ECON-E 568 Public Finance I (3 cr.) P: E308 and E470. Partial equilibrium, microeconomic analysis of how tax and subsidy policies affect various types of individual and firm behavior. Theoretical models are introduced to assess and develop quantitative studies of fiscal policy. Summaries of the empirical impact of policy will be formed for the purpose of becoming an ''input'' in the complete general equilibrium analysis conducted in Public Finance II.

ECON-E 569 Public Finance II (3 cr.) P: E568. Empirical examination of the general equilibrium effects of major tax and subsidy programs, such as personal income taxation, corporate profit taxation, income maintenance, social security, and government provision of education. In addition, proposed reforms to these programs will be analyzed using empirically based simulation models.

ECON-E 570 Fundamentals of Statistics and Econometrics (3 cr.) Mathematical overview of statistics and econometrics at graduate level. Topics covered include probability and probability distributions, sampling distributions, tests of hypotheses, estimation, simple regression, multiple regression, generalized linear model and its applications, simultaneous equation system.

ECON-E 571 Econometrics I-Statistical Foundations (3 cr.) P: Calculus and linear algebra. Introduction to concepts and techniques of optimization theory applied in modern micro and macroeconomics. Theory and application of Lagrange multipliers, comparative statics analysis, valve functions and envelope theorems. Elements of dynamic programming and other methods of economics dynamics.

ECON-E 573 Econometrics II (3 cr.) P: E571. Estimation and inference in linear regression model, basic asymoptotic theory, heteroskedasticity, measurement error, generalized

least squares, instrumental variable model, maximum likelihood estimation, generalized method of moments, qualitative response models.

ECON-E 574 Applied Econometrics and Forecasting (3 cr.) P: E570. An overview of techniques employed in economic model building, estimation, and usage. Topics covered include single and multi-equation system estimation, limited dependent variable regression techniques, hypothesis testing, policy analysis, and forecasting. Various forecasting techniques are discussed, including smoothing and decomposition methods and time series analysis. A number of projects are assigned throughout the semester in order to give the student hands-on experience with the different techniques.

ECON-E 577 Computer Methods and Data Analysis (3 cr.) P:E570 or E573. Introduction to applied economic research using statistical software and econometric programming. Applications from key micro datasets.

ECON-E 578 Advanced Computer Methods and Complex Datasets (3 cr.) P:E577. Conducting empirical research with advanced computer methods and complex datasets.

ECON-E 581 Topics in Applied Microeconomics I (3 cr.) P: E521. This course is a graduate-level introduction to theoretical and empirical applications in one or more areas of microeconomics. We will demonstrate how economic concepts can be usefully applied to understanding problems in the subdiscipline under study and discuss and apply estimation techniques appropriate for problems in the area.

ECON-E 582 Topics in Applied Microeconomics II (3 cr.) P: E521 and E570 or consent of instructor. This course is a second graduate-level introduction to theoretical and empirical applications in two areas of microeconomics. We will demonstrate how economic concepts can be usefully applied to understanding problems in the subdiscipline under study, and discuss and apply estimation techniques appropriate for problems in the area.

ECON-E 583 Introduction to Applied Macroeconomics (3 cr.) P: E522 and E570 or equivalents, or consent of instructor. This course is a graduate-level introduction to theoretical and empirical applications in two areas of macroeconomics. We will demonstrate how economic theories can be usefully applied to understanding problems in the subdiscipline under study and discuss and apply estimation and calibration techniques appropriate for problems in the area.

ECON-E 585 Industrial Organization and Control (3 cr.) P: consent of instructor. Analysis of interrelated structure, behavior, and performance in industrial markets and multimarket corporations; multidimensional nature of competitive processes. Public controls. Topics include patterns of oligopoly, vertical integration, entry barriers, ‘‘cartelized’’ coalescence, limit pricing, price discrimination, long-term contracts, capacity expansion and utilization, resource reallocation, and innovation.

ECON-E 600 Research in Economics (arr. cr.) Research in Economics.

ECON-E 611 Information Economics and Theories of Incentives and Contracts (3 cr.) P: E521 The course covers topics in the theories of incentives and contracts that study situations in which there are explicit or implicit contractual obligations. It explores the role and influence of asymmetric information in determining outcomes with special emphases on moral hazard and adverse selection.

ECON-E 621 Theories of Prices and Market (3 cr.) P: E520. Analysis of equilibrium, first- and second-orderconditions; statistical derivation of demand and cost curves; activity analysis; general equilibrium; welfare economics; microeconomics of capital theory; pure oligopoly and gave theory.

ECON-E 643 Health Economics I (3 cr.) P: E515, E573, and E611. Production of health, demand for health, determinants of health, health disparities, international comparisons, cost-effectiveness and valuation.

ECON-E 644 Health Economics II (3 cr.) P: E515, E573, and E611. Health insurance, moral hazard, adverse selection, demand for health care with health insurance, geographic variations in care, health care disparities, employersponsored insurance and labor markets, provision of health care (physicians, hospitals, managed care), government programs (Medicare and Medicaid), R&D and pharmaceuticals, technological change, costs and cost containment.

ECON-E 667 Nonprofit/Philanthropic Economics I (3 cr.) P: E516, E521, and E573. The economic analysis of Altruism, Voluntary Action & Public Goods. Consideration of individual decisions to give, volunteer, or help others including alternative formulations of utility, game structures, determinants of behavior, and consequences for social welfare.

ECON-E 668 Nonprofit/Philanthropic Economics II (3 cr.) P: E516, E573, and E611. The economic analysis of Nonprofit Organizations. Consideration of organizational behavior and the role of formal philanthropic institutions and organizations in the broader economy. Role of nonprofits, modeling nonprofit behavior, empirical testing of theories [public goods, contract theory, subsidy theories, entrepreneurial sorting, et al], public policy toward nonprofit organizations.

ECON-E 670 Econometrics 3-System and Panel Econometric Models (3 cr.) P:E573 or equivalent. Simultaneous equation models (2SLS, 3SLS), time series concepts for panel data analysis and serial correlation, pooled cross-section methods, linear panel data models [First Differences, Fixed Effects (FE) and Random Effects (RE)], nonlinear panel data models (ML and GMM).]

ECON-E 673 Econometrics 4-Microeconometrics (3 cr.) P: E573 or equivalent. Microeconometrics with applications to labor, health, and public economics. Extensive coverage of limited dependent variable and panel data models. Empirical implementation is an essential component of the course.

ECON-E 744 Seminar/Workshop in Health Economics (3 cr.) P: E644 Current topics in advanced health economics. Preparation of a research paper and oral presentation to a seminar.

ECON-E 765 Seminar/Workshop in Nonprofits/Philanthropic Economics (3 cr.) P:E668 Current topics in advanced nonprofit/philanthropic

economics. Preparation of a research paper and oral presentation to a seminar.

ECON-E 800 Research in Economics (arr cr.) Research in Economics

ECON-E 808 Thesis (M.A.) (arr. cr.) Thesis (M.A.).

Honors Courses

ECON-S 201 Introduction to Microeconomics: Honors (3 cr.) Designed for students of superior ability. Covers the same core materials as E201. PUL=5

ECON-S 202 Introduction to Macroeconomics: Honors (3 cr.) Designed for students of superior ability. Covers the same core materials as E202. PUL=5

ECON-S 270 Introduction to Statistical Theory in Economics and Business: Honors (3 cr.) P: MATH M118. P or C: MATH M119 or 163. Covers the same core materials as E270 but with more involved applications in economics. PUL=1

Non-Honors Courses

ECON-E 101 Survey of Current Economic Issues and Problems (3 cr.) For nonmajors only. Basic economic principles applied to current social issues and problems. Topics covered will typically include inflation, unemployment, wage and price controls, welfare, social security, national debt, health programs, food prices, pollution, crime, mass transit, revenue sharing, multinationals, population, and energy. Not open to those with previous college-level economics courses. PUL=5

ECON-E 102 Economics of Personal Finance (3 cr.) P: No prerequisite. Shows how the state of the economy, prices, and interest rates should guide personal decisions about spending, saving, credit, investments, and insurance. Intended for non-business students. PUL=5

ECON-E 111 Topics in the Economic History of Western Civilization I (3 cr.) Selected topics in the economic history of Western civilization, including the growth of the market organization, industrialization, institutional growth and change, imperialism, and labor. PUL=5

ECON-E 112 Topics in the Economic History of Western Civilization II (3 cr.) Selected topics in the economic history of Western civilization, including the growth of the market organization, industrialization, institutional growth and change, imperialism, and labor. PUL=5

ECON-E 201 Introduction to Microeconomics (3 cr.) P: sophomore standing. E201 is a general introduction to microeconomic analysis. Discussed are the method of economics, scarcity of resources, the interaction of consumers and businesses in the market place in order to determine price, and how the market system places a value on factors of production. PUL=5

ECON-E 202 Introduction to Macroeconomics (3 cr.) P: E201. An introduction to macroeconomics that studies the economy as a whole; the levels of output, prices, and employment; how they are measured and how they can be changed; money and banking; international trade; and economic growth. PUL=5

ECON-E 270 Introduction to Statistical Theory in Economics (3 cr.) P: MATH M118. Analysis and interpretation of statistical data in business and economics. Discussion of frequency distribution, measures of central tendency and variability, statistical inference, hypothesis testing, correlation, regression, and time series. PUL=1

ECON-E 303 Survey of International Economics (3 cr.) P: E201-E202. Survey of international economics. Basis for and effects of international trade, commercial policy and effects of trade restrictions, balance of payments and exchange rate adjustment, international monetary systems, and fixed vs. flexible exchange rates. Students who have taken E430 many not enroll in E303 for credit. PUL=5

ECON-E 304 Survey of Labor Economics (3 cr.) P: E201. Economics problems of the wage earner in modern society; structure, policies, and problems of labor organizations; employer and governmental labor relationships. PUL=5

ECON-E 305 Money and Banking (3 cr.) P: E201-E202. Money and banking system of the United States, including problems of money and the price level, proper organization and functioning of commercial banking and Federal Reserve System, monetary standards, and credit control. Recent monetary and banking trends. PUL=5

ECON-E 307 Current Economic Issues (3 cr.) P: E201 or permission of instructor. Current economic issues, problems, and research methods. Designed to explore in depth an economic issue currently before the public or to examine a particular aspect of the methodology of economics. Examples would be a study of the economic aspects of discrimination, a study of urban economic policy, or a study of simplified models in economics. PUL=5

ECON-E 308 Survey of Public Finance (3 cr.) P: E201-E202. Analysis of government expenditures and revenue sources, taxation and capital formation, public debt and inflation, growth in government spending, and intergovernmental fiscal relations. PUL=5

ECON-E 321 Intermediate Microeconomic Theory (3 cr.) P: E201-E202, MATH M119. Theory of demand; theory of production; pricing under different market conditions; allocation and pricing of resources; partial and general equilibrium theory; and welfare economics. Analysis of current economic problems and technology changes in firms and industries. PUL=5

ECON-E 322 Intermediate Macroeconomic Theory (3 cr.) P: E201-E202. Theory of income, employment, and price level. Study of countercyclical and other public policy measures. National income accounting. PUL=5

ECON-E 323 Urban Economics (3 cr.) P: E201-E202. Introduction to basic concepts and techniques of urban economic analysis to facilitate understanding of urban problems; urban growth and structure, poverty, housing, transportation, and public provision of urban services. PUL=5

ECON-E 325 Comparative Economic Systems (3 cr.) P: E201-E202. Essential economic theories and features of economic systems, including private enterprise, authoritarian socialism, and liberal socialism. PUL=5

ECON-E 326 Applied Research in Urban Economics (3 cr.) P: E201-E202 or permission of instructor. Field research in urban economics. Topics to be selected by students, covering such areas as human resource problems,

transportation and housing surveys, demographic shifts, and income distribution issues. PUL=5

ECON-E 335 Introduction to Mathematical Methods in Economics (4 cr.) P: E201-E202, MATH M118-M119. Introduction to quantitative techniques used in economics, and instruction in the application of these techniques to the analysis of economics problems. PUL=1

ECON-E 337 Economic Development (3 cr.) P: E201, E202, and junior standing or consent of instructor. Characteristics of economically underdeveloped countries. Obstacles to sustained growth; planning and other policies for stimulating growth; examination of development problems and experience in particular countries. PUL=5

ECON-E 355 Monetary Economics (3 cr.) P: E305 or E322 or equivalents. Supply and demand functions for money in the context of models of the U.S. economy. Formulation of Federal Reserve policy decisions and effects on interest rates, prices, output, and employment. Current problems in monetary policy and theory. PUL=5

ECON-E 363 Environmental and Natural Resource Economics (3 cr.) P: E201-E202. Basic theory and policy of such topics as pollution, resource depletion, environmental risk, and resource conservation. Issues covered include limits to growth, quality of life, and the appropriate roles for the private market and federal control. Credit not given for both E363 and E463. PUL=5

ECON-E 375 Introduction to Mathematical Economics (3 cr.)

ECON-E 380 Law and Economics (3 cr.) P: E201 or permission of instructor. The application of economic method to legal institutions and legal issues. Examples would be the optimum use of resources to prevent crime, the economic value of a human life, the economic consequences of regulating the business firm, the economics of property rights, torts, and contracts. PUL=5

ECON-E 385 Economics of Industry (3 cr.) P: E201 or permission of instructor. A theoretical and empirical analysis of the structure, conduct, and performance of major American industries. Emphasized is the degree of competition in various markets, how markets operate under conditions of competition or monopoly, and competition as a dynamic process over time. PUL=5

ECON-E 387 Health Economics (3 cr.) P: E201. This course applies economic theory to the study of policy issues in health economics. Specific issues included are: determinants of demand for medical services and insurance; training and pricing behavior of physicians; pricing behavior and costs of hospitals; market and regulative approaches. PUL=5

ECON-E 406 Senior Seminar (3 cr.) P: E321 and E322 or permission of instructor. Assessment of the current state of economic knowledge and discussion of how economics is applied to study the problems facing modern society. PUL=5

ECON-E 408 Undergraduate Readings in Economics (3 cr. maximum cr.) P: permission of instructor. Individual readings and research. PUL=5,1

ECON-E 410 Selected Topics in U.S. Economic History (3 cr.) P: E201-E202. Analysis of selected topics, including transportation developments, government intervention, systems of property rights, slavery, economic growth, income distribution, economic stability, technical change, and others. PUL=5

ECON-E 414 Economics of the Nonprofit Sector (3 cr.) P: E201. The role of nonprofit organizations (universities, churches, hospitals, orchestras, charities, day care, research, nursing homes) in mixed economics. Public policy controversies such as regulation of fundraising, antitrust against universities, ''unfair'' competition with for-profit firms, and the tax treatment of donations. PUL=5

ECON-E 420 History of Economic Thought (3 cr.) P: E201-E202. Examination of main theoretical developments since the beginning of the systematic study of economics. Theoretical propositions and structures of the earlier writers will be interpreted and evaluated in terms of modern economic analysis. PUL=5

ECON-E 430 Introduction to International Economics (3 cr.) P: E201-E202. Forces determining international trade, finance, and commercial policy under changing world conditions; theory of international trade; structure of world trade; tariff and trade control policies; the balance of payments problem; evolution of international economic institutions; and monetary relations. PUL=5

ECON-E 441 Economics of Labor Markets (3 cr.) P: E201, E321, and E270 or equivalent. Analysis of the functioning of labor markets with theoretical, empirical, and policy applications in determination of employment and wages in the U.S. economy. PUL=5

ECON-E 447 Economics of the Labor Market (3 cr.) P: E201. Analysis of the functioning of the U.S. labor market. Labor force concepts, unemployment, mobility, wages, and current manpower problems and policies. Analysis of wage determination, wage policy, and their interaction with institutional factors. PUL=5

ECON-E 450 Business Conditions Analysis and Forecasting (3 cr.) P: E201-E202. This course examines sources of instability in industrialized economies. Various theories of the business cycle are examined and critiqued. In addition, the empirical determinant of aggregate demand, prices, and interest rates are discussed. Alternative forecasting techniques are considered and the use of these techniques is demonstrated. PUL=1

ECON-E 470 Introduction to Econometrics (3 cr.) P: E270, MATH M119. Application of regression analysis to economic and business data. Estimation and hypothesis testing of classical regression model. Heteroscedasticity, collinearity, errors in observation, functional forms, and autoregressive models. Estimation of simultaneous equation models. Credit will not be given for both E470 and E472. PUL=1

ECON-E 485 Economic and Social Control of Industry (Antitrust) (3 cr.) P: E201 or permission of instructor. This course is a study of the economic reasoning behind and consequences of the application of antitrust laws aimed at altering the structure, conduct, and performance of the American economy. Specific legal cases that have been brought under the Sherman Act, the Clayton Act, as amended, and the Federal Trade Commission Act are analyzed. PUL=5

English (ENG, EAP, FILM, LING)

The 100-level courses meet general degree requirements, but do not satisfy those of the major. The 200-level courses introduce basic areas of study and provide cultural and intellectual development for the nonmajor; these courses also provide a firm foundation for students who wish to continue advanced studies in English. The more advanced and specialized 300-level courses are open to juniors and seniors (or others with consent of the instructor). Usually conducted as seminars, the 400-level courses are intensive studies of special subjects. Although the English department does not have prerequisites indicated for most courses, it is highly recommended that students complete W131 before taking any other English courses.

Concentrations

Capstone

ENG-E 450 Capstone Seminar (3 cr.) This senior capstone integrates students' undergraduate study through writing and reading projects, faculty and student presentations, and creation of capstone portfolios. Students apply linguistic, literary, and rhetorical knowledge in culminating projects and learning portfolios. The course looks back at accomplishments and forward to postgraduation planning. PUL=3; RISE=Research

Creative Writing

ENG-W 206 Introduction to Creative Writing (3 cr.) An introduction to the techniques and principles of creative writing. Written assignments, independent work, and workshop discussions of the fundamentals of fiction, poetry, and drama. This course may be used as a prerequisite for all 300-level courses in creative writing. PUL=1A

ENG-W 207 Introduction to Fiction Writing (3 cr.) An introduction to the techniques and principles of fiction writing. Written assignments, workshop discussions of student work in progress, seminar study of classic and contemporary examples of the genre. This course may be used as a prerequisite for ENG W301, ENG W302,or ENG W305. This course is recommended for English majors pursuing a concentration in creative writing. PUL=1A

ENG-W 208 Introduction to Poetry Writing (3 cr.) W208 offers students an introduction to the craft and practice of poetry writing: how to find subjects for writing; how to create images, similes, and metaphors; how to make rhyme sound natural; how to produce both metered and free-verse poetry. Part of the class will be a workshop in which students will learn to revise their poems and those of fellow students. This course can serve as a prerequisite for ENG W303 or ENG W305. This course is recommended for English majors pursuing a concentration in creative writing. PUL=1A

ENG-W 280 Literary Editing and Publishing (3 cr.) P: Any literature course; ENG W206, ENG W207, or ENG W208. Offers theory and practice in the development of literary publications. Individual and group exercises and formal assignments will encourage the analysis and evaluation of poetry, fiction, and essays to develop students' personal and professional aesthetics. An issue of IUPUI's student literary magazine, genesis, will be edited during the semester. PUL=2

ENG-W 301 Writing Fiction (3 cr.) P: ENG W206, ENG W207 or permission of the instructor An intermediate course in the theory and practice of fiction writing with seminar study of relevant materials and criticism of student work in class and conference. May be repeated once for credit. PUL=1A; RISE-Experiential Learning

ENG-W 302 Screenwriting (3 cr.) P: W206 or W207, or permission of instructor. A practical course in basic techniques of writing for film and television. Covers the essentials of dramatic structure, story development, characterization and theme, scene construction, dialogue, and, briefly, the practicalities of working as a screenwriter today. PUL=1A; Rise-Experiential Learning

ENG-W 303 Writing Poetry (3 cr.) P: W206 or W208 or submission of acceptable manuscripts to instructor in advance of registration. An intermediate course in the theory and practice of poetry writing with seminar study of relevant materials and criticism of student work in class and conference. PUL=1A; RISE-Experiential Learning

ENG-W 305 Writing Creative Nonfiction (3 cr.) P: ENG W206, ENG W207, ENG W208, or permission of the instructor An intermediate course in the theory and practice of creative nonfiction prose, with seminar study of relevant materials and workshop discussion of student work in progress. PUL=1A; RISE-Experiential Learning

ENG-W 401 Writing Fiction (3 cr.) P: ENG W301 Study and practice in the writing of fiction. Analysis of examples from contemporary literature accompanies class criticism and discussion. May be repeated once for credit. PUL=1A; RISE-Experiential Learning

ENG-W 403 Advanced Poetry Writing (3 cr.) P: ENG W303 Study and practice in the writing of poetry. Analysis of examples from contemporary poets accompanies class criticism and discussion. PUL=1A; RISE-Experiential Learning

ENG-W 408 Creative Writing for Teachers (3 cr.) Offers current and future teachers insights into the creative writing process, teaches them to think as writers do, suggests strategies for critiquing creative work, and provides guidance in developing creative writing curriculum. PUL=1A

ENG-W 411 Directed Writing (1-3 cr.) P: Consent of instructor. Individual projects determined in consultation with instructor. Credit varies with scope of project. May be repeated once for credit. PUL=1A

ENG-W 423 Genre Fiction: Science Fiction and Fantasy (3 cr.) P: ENG W301 This course in speculative fiction is designed for advanced creative writers. It examines world building, plot development, and focuses on character development. At course end, students will have a publishable story with a query letter. PUL=1A

Film Studies (FILM)

FILM-C 292 An Introduction to Film (3 cr.) Nature of film technique and film language; analysis of specific films; major historical, theoretical, and critical developments in film and film study from the beginnings of cinema to the present. PUL=3

FILM-C 350 Film Noir (3 cr.) Private detectives, femmes fatales, dark, shadowy criminal underworlds. But wht, really, is Film Noir? A genre? A historical cycle? Film scholars don't agree. Ironic noirs of th e1940's and

1950's lurk here alongside international examples, precursors, and contemporary neo-noirs. PUL=3

FILM-C 351 Musicals (3 cr.) A study of the genre from the dawn of "talkies" to the Glee era; the film musical in its folk, fairy tale, and show business variants; the "organic" musical; Busby Berkeley; Astaire and Rogers; the Freed Unit at M-G-M; Broadway adaptations; revisionist musicals; revival in the 2000s: All will be covered. PUL=3

FILM-C 352 Biopics (3 cr.) A highly respectable genre of very low repute; the "Great Man" biopic, the Female Biopic and the historical stages of both; the minority appropriation; the "biopic of somebody who doesn't deserve one," and more. Come have the time of someone else's life. PUL=4

FILM-C 361 Hollywood Studio Era 1930-1949 (3 cr.) Hollywood's "Golden Age"; "pre-Code" era; genres, auteurs, and stars; "House style"; "mass audience" when that meant something; the House Un-American Activities Committee and the Hollywood Ten; the U.S. vs. Paramount decision and other factors that ended the era. PUL=4

FILM-C 362 Hollywood in the 1950s (3 cr.) A period of transition and reinvention. Television, the blacklist, widescreen, Method acting, psychological realism, the decline of the Production Code, the influence of art cinema; iconic films from Sunset Blvd. to Some Like It Hot, Singin' in the Rain to The Searchers, Rebel Without a Cause to On the Waterfront. PUL=4

FILM-C 380 French Cinema (3 cr.) Arguably the world's most fervid and versatile film culture; the first public film showings; the first fantasy/science fiction films; the wide-screen lens; the idea of film noir, the Auteur Theory, the New Wave; philosophy and aesthetics, culture and politics; the cross-pollenation between French and U.S. cinemas. PUL=2.

FILM-C 390 The Film and Society: Topics (3 cr.) Film and politics; race and gender; social influences of the cinema; rise of the film industry. May be repeated once with different topic. PUL=4

FILM-C 391 The Film: Theory and Aesthetics (3 cr.) Film form and techniques; aesthetic and critical theories of the cinema; relationships between film movements and literary and artistic movements; relationships of word and image; analysis of significant motion pictures. PUL=4

FILM-C 392 Genre Study in Film (3 cr.) Problems of definition; the evolution of film genres such as criminal or social drama, comedy, the western, science fiction, horror, or documentary film; themes, subject matter, conventions, and iconography peculiar to given genres; relationship of film genres to literary genres. Focus on one specific genre each time the course is offered. May be repeated once with different topic. PUL=3

FILM-C 393 History of European and American Films I (3 cr.) C393 is a survey of the development of cinema during the period 1895-1926 (the silent film era). PUL=3

FILM-C 394 History of European and American Films II (3 cr.) C394 is a survey of European and American cinema since 1927. Particular attention paid to representative work of leading filmmakers, emergence of film movements and development of national trends, growth of film industry, and impact of television. PUL=1C

FILM-C 491 Authorship and Cinema (3 cr.) Study of the work of one or more film artists. Attention paid to the style, themes, and methods that make the filmmaker's work unique. Filmmakers studied in the contexts of film traditions, ideologies, and industries that informed their work. May be repeated once with a different topic. PUL=4

FILM-C 493 Film Adaptations of Literature (3 cr.) Analysis of the processes and problems involved in turning a literary work (novel, play, or poem) into a screenplay and then into a film. Close study of literary and film techniques and short exercises in adaptation. PUL=2

ENG-W 260 Film Criticism (3 cr.) Viewing and critiquing current films, with emphasis on the quality of production and direction. Contemporary films are viewed; papers serve as a basis for discussion during class. Students will be expected to pay for their movie admissions. PUL=2

Internship

ENG-E 398 Internship in English (3-6 cr.) P: consent of instructor. A supervised internship in the use of English in a workplace. Apply during semester before desired internship. PUL=3; RISE=Experiential

Language and Linguistics

ENG-Z 104 Language in our World (3 cr.) This course explores the power and importance of language in our everyday lives and looks at how language unites and separates us culturally, politically, socially, and psychologically. PUL=5

ENG-Z 204 Rhetorical Issues in Grammar and Usage (3 cr.) An introduction to English grammar and usage that studies the rhetorical impact of grammatical structures (such as noun phrases, prepositional phrases, and different sentence patterns). This course considers language trends and issues, the role of correctness in discourse communities, and the relations between writing in context and descriptive and prescriptive grammars and usage guides. PUL=3

ENG-Z 205 Introduction to the English Language (3 cr.) This course is an introduction to how language, and English in particular, is structured, including soundS (phonetics and phonology), words (morphology), sentences (syntax) and meaning (semantics). Discussions focus on examples from everyday language and the application of these basic concepts to real world contexts, including language teaching and learning. PUL=2

ENG-Z 206 Introduction to Language Use (3 cr.) An introduction to how we use language in our lives. This course explores how and why language varies between different groups and places, as well as the role of context on language meaning and interpretation. Insights are applied to understanding the impact of literature, film, writing, and other disciplines. PUL=4

ENG-Z 301 History of the English Language (3 cr.) P: ENG Z205 is recommended. A study of the origins of the English language, focusing on how and why English has changed over time. Topics include: the process of language standardization and its impact on education and literacy, relationships between language and literature, and the changing role of English around the world. PUL=3

ENG-Z 302 Understanding Language Structure: Syntax (3 cr.) P: ENG Z205 is recommended. An introduction to how language is organized at the sentence level, focusing on what it means to know how to produce and understand grammatical sentences. The acquition of syntax by children learning their first language and non-native speakers learning a second language will be studied. PUL=2

ENG-Z 303 Understanding Language Meaning: Semantics (3 cr.) Examines the question of meaning, with a focus on the English language. After introducing various approaches to the study of meaning, the course examines how linguistic semantics analyzes such concepts as entities, events, time, space, possibility, and negation, and how these relate to human culture and cognition. PUL- 2

ENG-Z 310 Language in Context: Sociolinguistics (3 cr.) P: ENG Z206 is recommended. This course explores the relationships among language, society, and culture. The interplay between social factors such as age, sex, status, class, and education and language use are discussed within the framework of various theoretical and methodological approaches. Perceptions of several varieties of English are investigated. PUL=4; RISE=Research

ENG-Z 405 Topics in the Study of Language (3 cr.) This is a variable topics course in the study of the English Language. PUL=2

ENG-Z 432 Second Language Acquisition (3 cr.) P: ENG Z205 An introduction to a broad range of issues in the field of second language acquisition, providing the student with an overview of the most important approaches to the fundamental questions of how people learn a second language. Provides students with basic knowledge of theories of second language acquisition and an understanding of how theoretical perspectives inform practical application. PUL=2; RISE=Research

ENG-Z 434 Introduction to Teaching English as a Second Language (3 cr.) P: ENG Z432 or consent of instructor. The course examines recent theories of teaching English as a second or foreign language. Students will get a chance to examine theories and methods and develop knowledge of linguistic resources available to new and/or practicing teachers. PUL=3; RISE=Experiential Learning

ENG-Z 441 Materials Preparation for ESL Instruction (3 cr.) P: ENG Z205 Students learn about materials preparation, syllabus design, and test preparation by applying a variety of theories to books and other ESL (English as a Second Language) teaching devices (e.g., ESL tapes, videotapes, and software programs) in order to evaluate their usefulness. Students will learn to evaluate ESL materials for adequacy. PUL=4; RISE=Experiential Learning

Literary Study

ENG-L 105 Appreciation of Literature (3 cr.) Stresses the enjoyment and humane values of literature. It will provide workshop experiences and programmed exercises as well as experience in listening to and studying visual adaptations of poems, novels, and dramas. PUL=2

ENG-L 115 Literature for Today (3 cr.) P: W131. Poems, dramas, and narratives pertinent to concerns of our times: e.g., works concerning values of the individual and society, problems of humanism in the modern world, and conflicts of freedom and order. PUL=2

ENG-L 202 Literary Interpretation (3 cr.) Close analysis of representative texts (poetry, drama, fiction) designed to develop the art of lively, responsible reading through class discussion and writing of papers. Attention to literary design and critical method. PUL=2

ENG-L 203 Introduction to Drama (3 cr.) Representative significant plays to acquaint students with characteristics of drama as a type of literature. Readings may include plays from several ages and countries. PUL=2

ENG-L 204 Introduction to Fiction (3 cr.) Representative works of fiction; structural technique in the novel, theories and kinds of fiction, and thematic scope of the novel. Readings may include novels and short stories from several ages and countries. PUL=2

ENG-L 205 Introduction to Poetry (3 cr.) Kinds, conventions, and elements of poetry in a selection of poems from several historical periods. PUL=2

ENG-L 207 Women and Literature (3 cr.) Issues and approaches to critical study of women writers in British and American literature. PUL=5

ENG-L 208 Topics in English and American Literature and Culture (3 cr.) Selected works of English and/or American literature in relation to a single cultural problem or theme. Topics vary from semester to semester. May be repeated once for credit. PUL=5

ENG-L 213 Literary Masterpieces I (3 cr.) Literary masterpieces from Homer to the present. Aims at thoughtful, intensive analysis; appreciation of aesthetic values; and enjoyment of reading. PUL=2

ENG-L 214 Literary Masterpieces II (3 cr.) Literary masterpieces from Homer to the present. Aims at thoughtful, intensive analysis; appreciation of aesthetic values; and enjoyment of reading. PUL=2

ENG-L 220 Introduction to Shakespeare (3 cr.) Rapid reading of at least a dozen major plays and poems. May not be taken concurrently with L315. PUL=2

ENG-L 245 Introduction to Caribbean Literature (3 cr.) Introduces students who have a limited knowledge of the Caribbean region to the basic themes of Caribbean literature. Examines the ways in which Caribbean writers present a colonial past and its effect on Caribbean culture in their attempts to “write back” to imperialist thought. PUL=5

ENG-L 301 Critical and Historical Survey of English Literature I (3 cr.) Representative selections with emphasis on major writers from the beginnings to Swift and Pope. PUL=2

ENG-L 302 Critical and Historical Survey of English Literature II (3 cr.) Representative selections with emphasis on major writers from the rise of romanticism to the present. PUL=2

ENG-L 305 Chaucer (3 cr.) Chaucer’s works with special emphasis on The Canterbury Tales. PUL=4

ENG-L 315 Major Plays of Shakespeare (3 cr.) A close reading of a representative selection of Shakespeare’s major plays. PUL=4

ENG-L 348 Nineteenth-Century British Fiction (3 cr.) Forms, techniques, and theories of fiction as exemplified by such writers as Scott, Dickens, Eliot, and Hardy. PUL=2

ENG-L 351 Critical and Historical Study of American Literature I (3 cr.) American writers to 1865: Emerson, Hawthorne, Melville, Whitman, and two or three additional major writers. PUL=2

ENG-L 352 Critical and Historical Study of American Literature II (3 cr.) American writers, 1865-1914: Twain, Dickinson, James, and two or three additional major writers.

ENG-L 354 Critical and Historical Study of American Literature III (3 cr.) Study of modernist and contemporary American writers in various genres, 1914 to the present, including Frost, Stein, Faulkner, O'Connor, Baldwin, Morrison, and others. PUL=2

ENG-L 355 American Novel: Cooper to Dreiser (3 cr.) Representative nineteenth-century American novels. PUL=2

ENG-L 357 Twentieth-Century American Poetry (3 cr.) Survey of modern and postmodern movements in historical context, including Imagism, Objectivism, and Formalism. PUL=4

ENG-L 358 Twentieth-Century American Fiction (3 cr.) Study of major trends in American fiction since 1900, including such topics as experimentalism and the development of minority literatures. PUL=2

ENG-L 363 American Drama (3 cr.) Main currents in American drama to the present. PUL=4

ENG-L 364 Native American Literature (3 cr.) Interdisciplinary study of fiction, poetry, and film by Native American writers. PUL=5

ENG-L 365 Modern Drama: Continental (3 cr.) Special attention to Ibsen, Strindberg, Chekhov, Hauptmann, Pirandello, Brecht, and Sartre and to the theatre of the absurd. PUL=5

ENG-L 366 Modern Drama: English, Irish, and American (3 cr.) Twentieth-century drama, from Bernard Shaw and Eugene O'Neill to Samuel Beckett, Harold Pinter, David Mamet, Marsha Norman, and August Wilson. PUL=4

ENG-L 370 Black American Writing (3 cr.) A study of the major black American writers, with special emphasis on recent writing. PUL=5

ENG-L 372 Contemporary American Fiction (3 cr.) Examination of representative American fiction since 1955 in its social, cultural, and historical contexts. Topics include such issues as the representation of truth in fiction, intertextuality, and the transgressions of genre boundaries. PUL=2

ENG-L 373 Interdisciplinary Approaches to English and American Literature I (3 cr.) Social, political, and psychological studies in English and American literature. Topics may vary and include, for example, Freud and literature, responses to revolution, the literature of technology, and literature and colonialism. PUL=5

ENG-L 374 Interdisciplinary Approaches to English and American Literature II (3 cr.) Social, political, and psychological studies in English and American literature. Topics may vary and include, for example, Freud and literature, responses to revolution, the literature of technology, and literature and colonialism. PUL=4

ENG-L 376 Literature for Adolescents (3 cr.) An examination of the nature and scope of adolescent literature. Wide reading of contemporary literature, with emphasis on the value of selections for secondary school students and appropriate modes of study. PUL=2

ENG-L 378 Studies in Women and Literature (3 cr.) British and American authors such as George Eliot or Gertrude Stein; groups of authors such as the Brontë sisters or recent women poets; or genres and modes such as autobiography, film, or criticism. Topics will vary by semester. PUL=5

ENG-L 379 American Ethnic and Minority Literature (3 cr.) Analysis of literature by and about immigrants from diverse cultures as well as ethnic literature about groups such as African Americans, Appalachians, Hispanics, and Native Americans, from a historical and thematic perspective. PUL=5

ENG-L 381 Recent Writing (3 cr.) Selected writers of contemporary significance. May include groups and movements (such as black writers, poets of projective verse, new regionalists, parajournalists and other experimenters in pop literature, folk writers, and distinctly ethnic writers); several recent novelists, poets, or critics; or any combination of groups. May be repeated once for credit by special arrangement with the Department of English. PUL=4

ENG-L 382 Fiction of the Non-Western World (3 cr.) An in-depth study of selected narratives from the fiction of the non-Western world. Focus and selections vary from year to year. May be repeated once for credit. PUL=5

ENG-L 384 Studies in American Culture (3 cr.) Surveys the American cultural landscape, from topics in popular culture, like comics, to specific eras of literary production, like the Harlem Renaissance. May be repeated once for credit. PUL=5

ENG-L 385 Science Fiction (3 cr.) A survey of British and American science fiction from the nineteenth to the twentieth century with an emphasis on the latter. PUL=1C

ENG-L 390 Children's Literature (3 cr.) Historical and modern children's books and selections from books. Designed to assist future teachers, parents, librarians, or others in selecting the best in children's literature for each period of the child's life. PUL=2

ENG-L 406 Topics in African American Literature (3 cr.) Focuses on a particular genre, time period, or theme in African American literature. Topics may include twentieth-century African American women's novels, black male identity in African American literature, or African American autobiography. May be repeated once for credit with different focus. PUL=5

ENG-L 431 Topics in Literary Study (3 cr.) Study of characteristics and development of literary forms or modes (e.g., studies in narrative, studies in romanticism). Topics vary from year to year. May be repeated once for credit. PUL=5; RISE=R

ENG-L 433 Conversations with Shakespeare (3 cr.) An interdisciplinary and intertextual study of Shakespeare's work and its influence to the present day. Students will compare Shakespeare texts with latter-day novels, plays, poems, and films that allude to or incorporate some aspect of Shakespeare's art. PUL=4

ENG-L 440 Senior Seminar in English and American Literature (3 cr.) P: One 200-level and two 300-400-level literature courses. Detailed study of one or more major British and American writers or of one significant theme or form. Subject varies each semester. May be repeated once for credit. PUL=4

ENG-L 478 Literature and Medicine (3 cr.) This course explores the medical world in literature and the arts, in popular culture, and through the institution of the hospital. (A junior/senior integrator course.) PUL=5

ENG-L 495 Individual Readings in English (1-3 cr.) P: Consent of instructor and departmental chair. May be repeated once for credit. PUL=5

Writing & Literacy

The School of Liberal Arts requires English W131 or W140, and W132, W150, or W231 for graduation for both the A.A. and the B.A. degrees. Contact the Writing Program at (317) 274-3824 or see the Web site (writing.iupui.edu) for questions about placement.

ENG-W 210 Literacy and Public Life (3 cr.) An introduction to the uses of literacy in public and civic discourse, with connections made to theories of writing and professional prospects for writers; serves as the required gateway course for the Concentration in Writing and Literacy and as an exploration of this concentration for other English majors and students considering the possibility of an English major. PUL=4

ENG-W 260 Film Criticism (3 cr.) Viewing and critiquing current films, with emphasis on the quality of production and direction. Contemporary films viewed; papers serve as a basis for discussion during class. Students will be expected to pay for their movie admissions. PUL=1A

ENG-W 262 Style and voice for Writers (3 cr.) Voice pulls readers into a writer's world, the "sound" of that writer's voice "speaking" to readers. This course focuses on recognizing, developing, and sharpening your written voice. But how do you recognize that voice? What are its characteristics? How do you challenge yourself to experiment with language? How do you adapt to the plethora of writing you do as a student, in the workplace, or on your own, while maintaining the unique stamp that is your own? This course examines a variety of published authors' works, identifying the stylistic choices that shaped those works, thereby building awareness of the variety of stylistic choices available to you as a writer. You will apply that awareness to your own writing, and examine the decision making processes that equip you to "voice" your ideas in vivid and concise language, "speaking" on the page in your unique voice. PUL=4; RISE=R

ENG-W 310 Language and the Study of Writing (3 cr.) A course about writing using linguistic perspectives. Some of the topics discussed are writing systems and their history, a comparison of speaking and writing, the analysis of texts and their structure, the writing process and its development, and orality and literacy. PUL=4; RISE=R

ENG-W 313 The Art of Fact: Writing Nonfiction Prose (3 cr.) P: At least one 200-level writing course or excellent performance in W131 and/or W132 (contact the instructor if you are unsure of your readiness for this course). Students will read and analyze professional and student work as they prepare to practice the art of fact by combining the tools of a researcher with the craft of a novelist. The final portfolio includes a stylistic analysis of the student's and others' nonfiction works as well as two illustrated nonfiction texts based on the student's primary and secondary research. PUL=4; RISE=R

ENG-W 315 Writing for the Web (3 cr.) Introduces students to new forms of writing (beyond word processing and desktop publishing) made possible by computers—hypertext, electronic mail, and computer conferencing—and explores what impact these new forms have on literacy skills for writers and readers of such computer-delivered texts. PUL=1A; RISE=S

ENG-W 318 Finding your E-Voice (3 cr.) This course helps students understand and negotiate the creation of a successful e-voice with academic, personal, and professional applications. Reading, exploration, discussions,activities and practice help students transition from an academic to an "e-voice." Designing and producing a multimedia project meets RISE criteria and further refines developing e-voices.

ENG-W 320 Advanced Writing in the Arts and Sciences (3 cr.) Features scholarly readings on various interdisciplinary topics and examines how writers in the humanities, social sciences, and natural sciences define problems, investigate these problems, and report their findings. Focuses on the study and practice of knowledge-making in different discourse communities with particular attention to the student's major discipline. PUL=3

ENG-W 331 Business and Administrative Writing (3 cr.) Instruction and practice in writing for business, government, the professions, and the nonprofit sector. The course emphasizes principles that can be applied in a wide variety of documents. PUL=1A

ENG-W 365 Theories and Practices of Editing (3 cr.) Instruction and practice in the mechanical, stylistic, and substantive editing of English nonfiction prose, from a wide variety of genres and on a wide variety of subjects. PUL=3

ENG-W 366 Written Englishes: Living Cultural Realities (3 cr.) Is standard written English fixed and immutable or a living language variety? This course explores the definition, history, and politics of standard written English, the influence of home and community languages, and the uses and representation of linguistic diversity in both fiction and nonfiction texts. PUL=5

ENG-W 390 Topics in Writing (3 cr.) Topics will vary each time this course is offered, and the department will specify which area of the concentration in Writing and Literacy each offering will count toward. May be repeated once for credit. PUL=3; RISE=E

ENG-W 398 Internship in Writing (1-3 cr.)

ENG-W 400 Issues in Teaching Writing (3 cr.) Focuses on the content of rhetoric and composition and considers fundamental theoretical and practical issues in the teaching of writing. Reviews rhetorical and compositional principles

that influence writing instruction, textbook selection, and curriculum development. PUL=3

ENG-W 407 Creative Writing for Teachers (3 cr.) Offers current and future teachers insights into the creative writing process, teaches them to think as writers do, suggests strategies for critiquing creative work, and provides guidance in developing creative writing curriculum PUL=1A

ENG-W 411 Directed Writing (1-3 cr.) P: Consent of instructor and department chair. Individual projects determined in consultation with instructor. Credit varies with scope of project. PUL=1A

ENG-W 412 Literacy and Technology (3 cr.) Literacy and technology have multifaceted relationships with each other. This course explores the effects of technologies (ranging from clay tablets to the printing press to computers) on literate practices and the teaching of reading and writing. It prepares students to think critically about the possibilities and limitations associated with different technologies and their impact on literacy over time, and to analyze educational uses of technology connected with literacy. PUL=4

ENG-W 426 Writing for Popular and Professional Publication (3 cr.) Offers experienced writers near the end of their academic careers the opportunity to apply their skills to the public writing of the workplace. Students work within a set of tasks common to organizational writing, gaining experience with press releases, the basics of grant writing, letters soliciting contributions, and stories appropriate for newsletters and public relations purposes. Application of this "real-life" writing comes when W426 students receive assignments from university units such as the University College and the School of Liberal Arts and fulfill them for inclusion in university publications. PUL=3

ENG-W 490 Writing Seminar (3 cr.) Emphasizes a single aspect or a selected topic of composition and the writing of nonfiction prose. PUL varies with topic.

ENG-W 496 Writing Fellows Training Seminar (3 cr.) P: ENG-W 131 and permission of instructor. Internship in University Writing Center. Focuses on the writing of IUPUI students. Emphasis on questioning, strategies, problem solving, and self-analysis. Apply in spring for fall enrollment. PUL=3; RISE=E

Graduate

Masters Degree & Certificate Courses

ENG-G 500 Introduction to the English Language (4 cr.) An introduction to English linguistics, the course covers the principal areas of linguistic inquiry into the English language: sounds (phonetics and phonology), words, (morphology), sentences (syntax), and meaning (semantics). G500 is the core linguistics course in the M.A. program.

LING-G 541 Materials Preparation for ESL Instruction (4 cr.) Students will learn about materials preparation, syllabus design, and test preparation by applying a variety of theories to books and other teaching devices (e.g., tapes, videotapes, computer and software programs) in order to evaluate their usefulness and will learn to evaluate ESL materials for adequacy.

LING-G 625 Introduction to Text Linguistics/Discourse Analysis (4 cr.) This course introduces students to current approaches to text and discourse coherence, including recent theories of cognitive and interactional text modeling.

LING-G 652 English Language Sociolinguistics (4 cr.) This course investigates sociocultural aspects of language use and explores the relationships between language and society. The course provides background in various theoretical and methodological approaches to sociolinguistics. Other topics to be covered include gender and language, ethnicity and language, social factors in language acquisition, and bilingualism. Familiarity with basic issues and concepts in linguistics would be useful.

ENG-L 501 Professional Scholarship in Literature (4 cr.) Materials, tools, and methods of research. Includes work with standard bibliographical sources (both traditional and electronic), bibliographical search strategies, scholarly documentation, accessing special collections, and preparing bibliographical descriptions of subject texts. Historical case studies reinforce coverage of professional standards of conduct, verification of sources, and thoroughness of research methodology.

ENG-L 506 Introduction to Methods of Criticism and Research (4 cr.) An examination of the importance of the notion of the text for contemporary literary theory. L506 is the core literature course

LING-L 532 Second-Language Acquisition (3 cr.) An introduction to a broad range of issues in the field of second-language acquisition, providing the student with an overview of the most important approaches to the fundamental question of how people learn a second language. Provides students with basic knowledge of theories of second-language acquisition and an understanding of how theoretical perspectives inform practical application.

LING-L 534 Linguistic Resources for TESOL (3 cr.) The course examines recent theories of teaching English as a second or foreign language. Students will get a chance to examine theories and methods and develop knowledge of linguistic resources available to new and/or practicing teachers.

LING-L 535 TESOL Practicum (3 cr.) Students will be able to put into practice methods and principles of linguistics, second-language acquisition, and language teaching. Under supervision, they will teach ESL classes either at IUPUI or in a local school system.

ENG-L 553 Studies in Literature (4 cr.) Emphasis on thematic, analytic, and generic study. With consent of instructor, may be repeated once for credit.

ENG-L 560 Literary Studies in England and Scotland (4 cr.) Provides on-site opportunities in England and Scotland to explore the literary landscapes of British authors in relation to the English and Scottish school systems. Designed primarily for education majors and continuing certification credits.

ENG-L 573 Interdisciplinary Approaches to English and American Literature (3 cr.) Social, political, and psychological studies in English and American literature. Topics may vary and include, for example, literature and colonialism, literature and psychoanalysis, or literature and gender. May also include other world literatures.

ENG-L 590 Internship in English (4-8 cr.) A supervised internship in the uses of language in the workplace. (For prospective teachers, the workplace may be a class.) Each intern will be assigned a problem or new task and will develop the methods for solving the problem or completing the task. Interns will complete a portfolio of workplace writing and self-evaluation; they will also be visited by a faculty coordinator and evaluated in writing by their on-site supervisors.

ENG-L 606 Topics in African American Literature (4 cr.) Focuses on a particular genre, time period, or theme of African American literature. Examples: twentieth-century African American women's novels, black male identity in literature, kinship in African American literature, and African American autobiography. May be repeated twice for credit with different focuses.

ENG-L 625 Shakespeare (4 cr.) Critical analysis of selected tragedies, comedies, history plays, and poetry.

ENG-L 645 English Fiction, 1800-1900 (4 cr.) Intensive historical and critical study of nineteenth-century prose fiction, especially the novel.

ENG-L 655 American Literature since 1900 (4 cr.) Intensive historical and critical study of all genres from the time of Theodore Dreiser to the present.

ENG-L 678 Literature and Medicine (3 cr.) This course explores the medical world in literature and the arts, in popular culture, and through the institution of the hospital.

ENG-L 680 Special Topics in Literary Study and Theory (4 cr.) Reading in sociological, political, psychological, and other approaches to literature.

ENG-L 681 Genre Studies (4 cr.) A variable-title course, Genre Studies examines the specific characteristics of individual genres. May be repeated once for credit.

ENG-L 695 Individual Readings in English (1-4 cr.) Enables students to work on a reading project that they initiate, plan, and complete under the direction of an English department faculty member. Credit hours depend on scope of project.

ENG-L 699 M.A. Thesis (4 cr.) M.A. Thesis.

LING-T 600 Topics in TESOL and Applied Linguistics (3 cr.) Topics in this course vary, but they include the theory and teaching of English for Specific Purposes in academic, professional, or vocational fields.

LING-T 660 Contrastive Discourse: Readings in Linguistics (3 cr.) This course examines contrastive discourse/intercultural rhetoric and considers the cross-cultural aspects of discourse organization from both the reader's and the writer's viewpoints. Comparisons of text organization in different genres and for different audiences will be made, studying the roles of cultural forms and schemata in the interaction between writer and reader.

LING-T 690 Advanced Readings in TESOL and Applied Linguistics (1-4 cr.) Topics in this course vary, but they include the theory and teaching of English for Specific Purposes in academic, professional, or vocational fields; the teaching of second-language writing, reading, listening/speaking, and grammar; and second-language testing and assessment.

ENG-W 509 Introduction to Writing and Literacy Studies (4 cr.) This is the core course in the writing and literacy track of the English master's program. Students will read, analuze, discuss, and write about key issues in writing and literacy, laying a foundation for further study. Special emphasis will be placed on research methods in this field.

ENG-W 511 Writing Fiction (4 cr.) A graduate-level fiction writing workshop. Seminar study of advanced techniques in the writing of fiction, both short stories and the novel. Workshop discussion of advanced student work in progress.

ENG-W 513 Writing Poetry (4 cr.) W513 offers graduate students an intensive experience in reading and writing poetry. Part workshop and part seminar in poetic practice and technique, W513 provides an opportunity for graduate students to expand their poetic range and hone their craft.

ENG-W 532 Managing Document Quality (4 cr.) This course will examine and apply principles of planning, researching audience and content, designing publications, drafting, obtaining reviews, conducting user testing, and negotiating within organizational cultures in order to produce effective technical and professional documents.

ENG-W 600 Topics in Rhetoric and Composition (1-4 cr.) Topics will vary each time this course is offered. A four credit course would meet 3.5 hours per week and involve significant reading over the course fo the semester (4 books and 10 articles). Students would ordinarily be expected to produce a significant researched project (20-25 pages) at the end of the semester in addition to some shorter informal writing during the semester. A one credit course would meet for 2 hours every other week. Students would be expected to complete significant reading (perhaps 2 books and 7-10 articles over the course of the semester). Writing requirements for a one credit course would be less than a four credit offering; students might keep a regular reading response journal (up to 10 pages/month, informal writing)and produce a shorter researched project at the end of the course (10 pages).

ENG-W 609 Directed Writing Projects (1-4 cr.) Individual creative or critical writing projects negociated with the professor who agrees to offer tutorial assistance. Credit hours will vary according to the scope of the project.

ENG-W 697 Independent Study in Writing 1 (3 cr.)

Programs

English for Academic Purposes (EAP)

International students are placed into appropriate EAP courses according to their scores on the EAP placement test. The EAP Program offers classes for both undergraduate and graduate students. Except for W130 and W131, credits from these courses will not count toward a degree; however, grades awarded will be included in the student's grade point average. The English for Academic Purposes sequence—G009, G010, G011, and G012—focuses on fundamental language skills. It is designed to improve pronunciation, listening comprehension, and the students' ability to participate actively and effectively in a range of communication situations, from simple conversation to seminar discussion. Although emphasis is on speaking proficiency in English, basic reading, writing, and study skills

are essential components of these courses. Students must complete all other required EAP courses before enrolling in G013 or EAP W131, with the exception of G012, which may be taken simultaneously with those two courses.

ENG-G 009 Intermediate Aural/Oral Skills for ESL Students (2-4 cr.) C: G010 Intensive practice of basic speaking and pronunciation skills, as well as listening comprehension skills, to develop language proficiency required for study at the university level. Students will make extensive use of multimedia language resources. PUL=1C

ENG-G 010 ESL for Academic Purposes I (4 cr.) C: G009 This course introduces and reviews basic English grammatical structures; presents basic reading strategies and vocabulary development; provides practice in pronunciation of English consonant and vowel sounds, stress, rhythm, and intonation; and focuses on functional language use and study skills. PUL=1C

ENG-G 011 ESL for Academic Purposes II (4 cr.) This course provides practice in and clarification of higher-level grammatical structures and development of academic reading skills. The objective is to help non-native speakers of English develop their academic communication skills, primarily in the comprehension, interpretation, and analysis of texts, and their critical thinking skills, including the ability to analyze and synthesize readings. Students will be provided opportunities to use and practice their grammar and reading skills in written assignments, which include responses to and analyses of readings and journals used as models for academic writing. PUL=1B

ENG-G 012 Listening and Speaking for Academic Purposes II (3 cr.) This course focuses on developing speaking and listening skills that are essential to academic life, encouraging participation in group discussion, improvement in presentation strategies, and development of questioning and answering skills. It provides community involvement to help students better understand American culture and language use. Reading skills, vocabulary development, oral communication and presentation skills for the academic context are emphasized. PUL=1B

ENG-G 013 Reading and Writing for Academic Purposes (3 cr.) This course is designed for graduate ESL students. Its purpose is to develop reading comprehension skills through the use of academic subject area materials and to teach the writing skills necessary to complete academic work. Assignments are completed using materials from the students academic disciplines. PUL=1A

ENG-G 015 Pronunciation Skills (1 cr.) This course focuses on American English pronunciation and stresses active learner involvement in small groups and self-tutorials. Practice in a contextualized format includes drills and multimedia listening and speaking activities. Classwork emphasizes stress and intonation patterns and vowel and consonant production. Individualized instruction focusing on specific needs is a component of the course. PUL=1C

ENG-G 020 Communication Skills for Graduate Students and International Teaching Assistants (3 cr.) This course for graduate International Teaching Assistants provides instruction on basic teaching strategies and helps students develop the oral language skills necessary to present academic materials in English to a student audience. Pronunciation, listening comprehension, and classroom interaction skills are practiced. Regular conferences focus on individual pronunciation needs. PUL=1C

ENG-G 410 Introduction to Legal English (1 cr.) An intensive, integrated academic language skills course addressing the linguistic demands of legal study in the U.S. Focuses on reading, writing, listening, and speaking skills. PUL=1A

ENG-G 411 Legal English I (3 cr.) An integrated language skills course focusing on (1) grammatical structures, reading strategies, and writing structures required to understand legal texts and material; and (2) listening and speaking skills needed for the law school classroom. PUL=1A

ENG-G 412 Legal English II (3 cr.) An integrated language skills course that focuses primarily on the advanced study of academic legal writing, including editing skills. PUL=1A

ENG-W 130 Principles of Composition (3 cr.) Designated for EAP students, the course offers practice in writing papers for a variety of purposes and audiences, with attention to reading/writing connections. PUL=1A

ENG-W 131 Elementary Composition I (3 cr.) P: EAP-W 130 (with a grade of C or higher) Designated for EAP students, this course is designed to help students improve their English writing skills. It fulfills part of the communications core requirement for all undergraduate students and provides instruction in exposition (the communication of ideas and information with clarity and brevity). The course emphasizes audience and purpose, revision, organization, development, advanced sentence structure, diction, and development within a collaborative classroom. Evaluation is based on portfolios of the students' work. PUL=1A

Writing Program

The School of Liberal Arts requires English W131 or W140, and W132, W150, or W231 for graduation for both the A.A. and the B.A. degrees. Contact the Writing Program at (317) 274-3824 or see the Web site (writing.iupui.edu) for questions about placement.

ENG-W 130 Principles of Composition (3 cr.) Practice in writing papers for a variety of purposes and audiences, with attention to reading/writing connections. PUL=1A

ENG-W 131 Elementary Composition I (3 cr.) P: W001 (with a grade of C or higher) or placement. Fulfills part of the communications core requirement for all undergraduate students and provides instruction in exposition (the communication of ideas and information with clarity and brevity). The course emphasizes audience and purpose, revision, organization, development, advanced sentence structure, diction, and development within a collaborative classroom. Evaluation is based on portfolios of the students' work. PUL=1A

ENG-W 132 Elementary Composition II (3 cr.) P: W131 (with a grade of C or higher). Stresses argumentation and research concurrently, with a secondary emphasis on critical evaluation in both reading and writing. Evaluation is based on portfolios of the student's work. PUL=2

ENG-W 140 Elementary Composition/Honors (3 cr.) Offers an introductory writing course for advanced freshman writers. Requirements, including number and type of assignments,

are parallel to W131. W140 offers greater intensity of discussion and response to writing. Evaluation is based on portfolios of the students' work. PUL=1A

ENG-W 150 Elementary Composition II/Honors (3 cr.) P: W140 (with a grade of C or higher) or W131 and permission of the instructor. Allows an honors student to explore the investigative methods used within a chosen discipline as an introduction to academic writing. Individual projects using these various methods combine primary and secondary skills. Evaluation is based on portfolios of the student's work. Replacing W132 or W231 for honors students, this course follows W140. PUL=1A

ENG-W 231 Professional Writing Skills (3 cr.) P: W131 (with a grade of C or higher). Focuses on expository writing for the student whose career requires preparation of reports, proposals, and analytical papers. Emphasis on clear and direct objective writing and on investigation of an original topic written in report form, including a primary research project. Evaluation is based on student projects. PUL=1A; RISE=E

ENG-W 407 Creative Writing for Teachers (3 cr.) Offers current and future teachers insights into the creative writing process, teaches them to think as writers do, suggests strategies for critiquing creative work, and provides guidance in developing creative writing curriculum PUL=1A

Geography (GEOG)

Graduate Courses

GEOG-G 502 Introduction to Transportation Analysis (3 cr.) An examination of movement of people, goods, and information over space using spatial analysis and planning techniques.

GEOG G535 Introduction to Remote Sensing (3 cr.) Nature and interpretation of remotely sensed data collected from field, airborne, and space-borne sensors. Data from the visible, infrared, and microwave portions of the electromagnetic spectrum are discussed and analyzed from a geographic applications perspective. Visual, photogrammetric, digital image processing, and GIS interpretation approaches are presented. Lecture and laboratory.

GEOG-G 536 Advanced Remote Sensing (3 cr.) P: G535 or consent of instructor. Advanced remote sensing theory and digital image processing techniques with an emphasis on environmental applications. Hands-on computer exercises provide significant experience in introductory digital image processing for extraction of qualitative and quantitative information about the Earth's terrestrial environments. Lecture and laboratory.

GEOG-G 537 Cartography and Graphics (3 cr.) Compilation, design, production, and evaluation of maps and related graphic materials. Includes cartometric procedures, symbolization, color use guidelines, map typography, photographic manipulations, computer animation, and geographic visualization techniques. Hardcopy and Internet-based outputs. Lecture and laboratory.

GEOG-G 538 Introduction to Geographic Information Systems (3 cr.) Overview of the principles and practices of Geographic Information Systems (GIS). The course will deal with issues of spatial data models, database design, introductory and intermediate GIS operations, and case studies of real-world GIS. Laboratory exercises will provide significant hands-on experience. Lecture and laboratory.

GEOG-G 539 Advanced Geographic Information Systems (3 cr.) P: G538 or consent of instructor. Intermediate and advanced topics in geographic information science and spatial analysis techniques using GIS software. This advanced course is for upper-division undergraduates and graduates who seek a greater understanding of this rapidly developing field and to learn how to construct, manage, and analyze their own GIS data and models. Lecture and laboratory.

GEOG-G 560 Internship in Geographic Analysis (1-4 cr.) P: Admission to MS GIS program and permission of major advisor. Faculty-directed study of geographical problems based on internship experience. Area of placement must be related to field of Geographic Information Science. Student may complete more than one internship, but total credit hours cannot exceed four.

GEOG-G 588 Applied Spatial Statistics (3 cr.) P: 6 credits in geography or consent of instructor. Extension of traditional statistical analysis to spatial data. Spatial means and spatial variances, the examination of differences in samples over space, spatial autocorrelation, nearest neighbor analysis, map comparison techniques, emphasis on practical applications.

GEOG-G 602 Graduate Seminar in Physical Geography (3 cr.) P: Consent of instructor. Distribution, morphology, and human significance of selected phenomena of the physical environment.

GEOG-G 639 Seminar in Geographic Information Science (3 cr.) P: G535, G538, and G536 or G539. Applications of geographic information science principles in the collection and analysis of spatial data. Integration of GIS, remote sensing, and/or GPS technologies. Review of current literature on techniques, theory, technology, and applications with an emphasis on environmental issues. Discussions, laboratory, and research project.

GEOG-G 704 Soils Geography (3 cr.) P: G538. Examines the spatial aspects of soils from a global and local perspective, including soil genesis, morphology, and classification; physical, chemical, mechanical and biological properties of soil; and land use mapping, analysis, planning, and management.

GEOG-G 830 Readings in Geography (12 cr. max. cr.) P: Advanced course in geography or closely related field. Supervised readings on selected topics.

GEOG-G 845 Research Papers in Geography (3 cr.) P: Admission to MS GIS Program and permission of major advisor. Research papers under the supervision of a faculty committee. Graduate students in the MS in Geographic Information Science program who choose the research papers option (as opposed to the thesis) will develop two research papers under supervision of their major advisor and two additional faculty members.

GEOG-G 850 Masters Thesis (3-6 cr.) Directed research and writing under the supervision of a faculty committee.

Lower-Division Courses

GEOG-G 107 Physical Systems of the Environment (3 cr.) Physical environment as the home of humans, emphasizing the distribution and interaction of environmental variables (landforms, vegetation, soils, weather, and climate). PUL=3

GEOG-G 108 Physical Systems of the Environment: Laboratory (2 cr.) P: G107. Laboratory session to complement G107 Physical Systems of the Environment. C: G107 Practical and applied aspects of meteorology, climatology, vegetation, soils, and landforms. This laboratory session is optional for students enrolling in G107. PUL=3

GEOG-G 110 Introduction to Human Geography (3 cr.) An introduction to the principles, concepts, and methods of analysis used in the study of human geographic systems. Examines geographic perspectives on contemporary world problems such as population growth, globalization of the economy, and human-environmental relations. PUL=5

GEOG-G 111 Hurricanes (1 cr.) Introduction to processes involved in the initiation and development of hurricanes, forecasting and modeling tools used to predict their effects, and impacts on the natural environment and humans. PUL=3

GEOG-G 112 Thunderstorms and Tornadoes (1 cr.) Introduction to the processes involved in the initiation and development of thunderstorms and tornadoes, forecasting and modeling tools to predict their spatial pattern and effects, and impacts on the natural environment and humans. PUL=3

GEOG-G 113 The Ozone "Hole" (1 cr.) Introduction to the role and significance of the stratospheric ozone layer and the nature and extent of its depletion. Attention will focus on the development of our understanding, human intervention, and major points of controversy. PUL=3

GEOG-G 114 The Greenhouse Effect and Global Warming (1 cr.) Introduction to the greenhouse effect and global carbon cycle. Attention will be directed to how, when, and where humans have altered this cycle and the implications for future climates. Methods for monitoring climate change will be studied and areas of greatest uncertainty identified. Particular attention will be directed to the spatial pattern of projected effects produced by global climate models. PUL=3

GEOG-G 123 Soil Survey (1 cr.) An introduction to soil geography. Soil development processes, USDA soil survey map interpretation, physical and mechanical soil properties, and land use analysis. PUL=3

GEOG-G 130 World Geography (1 cr.) An analysis of the existing and emerging geographic patterns in the world and of the processes and trends producing such patterns. An examination of the global scale of human activities and interaction with the environment and the linkages tying the various regions of the world into a single, global system. PUL=5

Upper-Division Courses

Upper-division courses generally presuppose that students have at least introductory course preparation in human and environmental geography (e.g., G107 and G110).

GEOG-G 302 Introduction to Transportation Analysis (3 cr.) Examination of movement of people, goods, and information over space using spatial analysis and planning techniques. PUL=3

GEOG-G 303 Weather and Climate (3 cr.) Systematic study of atmospheric processes and interrelationships, with a focus on understanding the physical basis of weather and climate. Emphasis on components of radiation and energy balances, atmospheric circulation, global weather systems, human effects on climate, and climate change. PUL=3

GEOG-G 305 Environmental Change: Nature and Impact (3 cr.) P: G107 or consent of instructor. An integrated study of the causes and effects of environmental change. Areas covered include: climate variability (short and long term), environmental chemistry (ozone layer, greenhouse gases, and pollution), and anthropogenic impact that leads to environmental change. PUL=3

GEOG-G 307 Biogeography: The Distribution of Life (3 cr.) A survey of the present and past distributions of the world's plants and animals, emphasizing ecological explanation of species distributions. Topics include evolution and distribution of major plant and animal groups, world vegetation, plant and animal domestication, introduction of plant and animal pests, destruction of natural communities, and extinction. PUL=3

GEOG-G 309 Frontiers in Geographic Thought (3 cr.) Provides a survey of the development of philosophical frameworks and theories used in physical and human geography. PUL=1

GEOG-G 310 Human Impact on Environment (3 cr.) A systematic examination of how people have altered patterns of climate, hydrology, land forms, soils, and biota. Course emphasizes that understanding human impacts requires knowledge of both the sociocultural forces that drive human activity and the natural processes that determine environmental patterns. PUL=3

GEOG-G 311 Introduction to Research Methods in Geography (3 cr.) Introduction to geographic research questions and methodologies. Focus on special characteristics of geographic problems in the realms of both physical and human geography. Study of scientific versus nonscientific methods, the nature of geographic data, methods of data analysis, interpretation, and presentation. PUL=3

GEOG-G 314 Urban Geography (3 cr.) Study and interpretation of urban spatial structures, design, policies, and problems with an emphasis on the geographic perspective. Topics include urban housing markets, racial segregation, homelessness, and urban crime. PUL=5

GEOG-G 315 Environmental Conservation (3 cr.) Conservation of natural resources including soil, water, wildlife, and forests as interrelated components of environmental quality. PUL=3

GEOG-G 321 Geography of Europe (3 cr.) Geographical analysis of the physical features of the European environment and the spatial patterns and inter-relationships of the cultural, economic, and political landscapes. Emphasis placed on human impact on the environment through long-term occupancy. PUL=5

GEOG-G 323 Geography of Latin America (3 cr.) National and regional variations in terrain, climate, natural resources, and economic and social life in Mexico, Central America, the West Indies, and South America. PUL=5

GEOG-G 324 Geography of the Caribbean (3 cr.) Geographic introduction to the Caribbean, stressing global and regional political and economic relation-ships, physical, and natural environments, human activities and human-environmental relationships which give coherence and identity to the diversity of Caribbean landscapes, peoples, and cultures. PUL=5

GEOG-G 326 Geography of North America (3 cr.) Continental and regional variations in terrain, climate, and economic and social life of the United States and Canada, with emphasis on geographical principles, sources of data, and techniques of investigation. PUL=5

GEOG-G 327 Geography of Indiana (3 cr.) A geographical analysis of the state of Indiana. Emphasis placed on the interrelationship of the state's physical and human geography. PUL=5

GEOG-G 328 Rural Landscapes of North America (3 cr.) Rural geography of the United States and Canada, focusing on rural settlements, culture, economic activities, and land subdivision. The spatial impacts of economic and technological changes on land use are considered through an examination of relict structures and urban expansion into rural areas. PUL=5

GEOG-G 330 North American House Types (3 cr.) Houses are a visible semipermanent record of human values, political ideas, historical settlement, and community development. This record is reflected in the types of houses built during a particular time period, by certain groups of people, or in a certain area of the country. This course examines house types for the purpose of identifying and analyzing geographic patterns that occur in North America. PUL=5

GEOG-G 331 Economic Geography (3 cr.) An examination of the spatial dynamics and location patterns of economic activities, behavior, and systems. The study of the spatial organization of resource utilization, agricultural production, manufacturing, business, transportation, and trade. PUL=5

GEOG-G 334 Field Geography of North America (3 cr.) A field course examining some geographic theme or region in North America. Includes preliminary classroom lecture and a field excursion of 1-2 weeks. Normally taught in summer. PUL=5

GEOG-G 336 Introduction to Remote Sensing and Air Photo Interpretation (3 cr.) Nature and interpretation of remotely sensed data collected from field, airborne, and space-borne sensors. Data from the visible, infrared, and microwave portions of the electromagnetic spectrum are discussed and analyzed from a geographic applications perspective. Visual, photogrammetric, digital image processing, and GIS interpretation approaches are presented. Lecture and laboratory. PUL=1C

GEOG-G 337 Computer Cartography and Graphics (3 cr.) Compilation, design, production, and evaluation of maps and related graphic materials. Includes cartometric procedures, symbolization, color use guidelines, map typography, photographic manipulations, computer animation, and geographic visualization techniques. Hardcopy and internet-based outputs. Lecture and laboratory. PUL=1C

GEOG-G 338 Introduction to Geographic Information Systems (3 cr.) Overview of the principles and practices of Geographic Information Systems (GIS). The course will deal with issues of spatial data models, database design, introductory and intermediate GIS operations, and case studies of real-world GIS applications. Laboratory exercises will provide significant hands-on experience. Lecture and laboratory. PUL=1C

GEOG-G 345 Field Study in Geography (3 cr.) P: 12 credit hours in geography and consent of instructor. Faculty-supervised fieldwork in selected areas of geography. May be repeated up to a maximum of 6 credit hours. PUL=5

GEOG-G 355 Political Geography (3 cr.) An examination of the spatial organization of political systems and the interaction of geographical area and political processes. Emphasis on the geographical characteristics of states and the geographical dimensions of international relations. PUL=5

GEOG-G 360 Geography of Wine (3 cr.) An introduction to the spatial distribution and patterns of viniculture in the world. Emphasis is placed on understanding the complex and often subtle relationships that exists between environmental variables, such as climate, soils, and landforms, and human factors, such as viticultural practices and vinification techniques, in producing different types of wines and variations in their qualities. The geographic origins and diffusion of viniculture are examined along with an analysis of the locations, development, and characteristics of the main wine regions or landscapes of the world. PUL=3

GEOG-G 363 Landscapes and Cultures of the Caribbean (3 cr.) Field courses are taught during summer. Includes two weeks of preliminary lectures at IUPUI followed by approximately two weeks of intensive field study in the Caribbean. Destinations vary from year to year; consult class schedule for more information. PUL=3

GEOG-G 390 Topics in Geography (1-3 cr.) An examination of selected problems and issues in geography or from a geographic perspective. Topics vary from semester to semester. Recent offerings include the Caribbean, Wine, and Italy. PUL=3

GEOG-G 404 Soils Geography (3 cr.) Soil genesis, morphology, and classification; soil's physical, chemical, mechanical, and biological properties. Soil maps and related data in land use analysis and the planning process. PUL=4

GEOG-G 418 Historical Geography (3 cr.) Migration and diffusion, rural and urban settlement, industrialization, and transport development as spatial processes shaping the landscapes and geopolitical relationships of past places and peoples. PUL=3

GEOG G421 Environments of Tropical Lands (3 cr.) A geographical analysis concerned with developing countries and focusing on issues related to development and the environmental consequences. Concern for the natural environment is expressed with regard to how it is affected by population pressures, economic advancement, and urbanization. An understanding of Third World people and their cultures is presented. PUL=3

GEOG-G 424 Geography of Africa (3 cr.) Geographical analysis of the physical features of the African environment

and the spatial patterns and interrelationships of the cultural, economic, and political landscapes. PUL=5

GEOG-G 436 Advanced Remote Sensing: Digital Image Processing (3 cr.) P: G336 or consent of instructor. Advanced remote sensing theory and digital image processing techniques with an emphasis on environmental applications. Hands-on computer exercises provide significant experience in introductory digital image processing for extraction of qualitative and quantitative information about Earth's terrestrial environments. Lecture and laboratory. PUL=1C

GEOG-G 438 Advanced Geographic Information Systems (3 cr.) P: G338 or consent of instructor. Intermediate and advanced topics in geographic information science and spatial analysis techniques using GIS software. This advanced course is for upper-division undergraduates and graduates who seek a greater understanding of this rapidly developing field and to learn how to construct, manage, and analyze their own GIS data and models. Lecture and laboratory. PUL=1C

GEOG-G 439 Seminar in Geographic Information Science (3 cr.) P: G336, G338, and G436 or G438. Applications of geographic information science principles in the collection and analysis of spatial data. Integration of GIS, remote sensing, and/or GPS technologies. Review of current literature on techniques, theory, technology, and applications with an emphasis on environmental issues. Discussions, laboratory, and research project. May substitute for the G491 capstone course. PUL=3

GEOG-G 446 Cultural Biogeography (3 cr.) P: G307 Examines human alteration of natural plant and animal distributions. Topics include deforestation, extinction, plant and animal domestication, and introduction of alien organisms. Seminar format. PUL=3

GEOG-G 450 Undergraduate Readings and Research in Geography (1-3 cr.) Research in selected problems: papers are ordinarily required. PUL=3

GEOG-G 460 Geography Internship (1-6 cr.) P: 12 credit hours of geography and departmental approval. Supervised field experience in geography, normally in conjunction with approved work at a government agency or private firm. Requires 40 hours of work per 1 hour of credit. PUL=3

GEOG-G 475 Climate Change (3 cr.) P: G303. Advanced course on the evidence for and theories of climate change over a range of time scales, focusing on the period before the instrumental record. PUL=5

GEOG-G 488 Applied Spatial Statistics (3 cr.) P: 6 credits in geography or consent of instructor. Extension of traditional statistical analysis to spatial data. Spatial means and spatial variances, the examination of differences in samples over space, spatial autocorrelation, nearest neighbor analysis, map comparison techniques, emphasis on practical applications. PUL=1C

GEOG-G 491 Capstone Experience in Geography (1 cr.) An independent project for senior-level students, applying geographic theory and techniques to a topic of geographic interest beyond the limits of the regular curriculum. Open to majors or non-majors with appropriate preparation, including G309 and G311. May be taken alone or concurrently with another course. PUL=3

History (HIST)

Graduate Courses

Colloquia

These colloquia are of seminar size and involve oral and written study of the problems, bibliographies, interpretations, and research trends in the fields with which they respectively deal. They are the chief means by which a student becomes knowledgeable in history at a professional level. Any of them may be taken more than once upon approval of the student's faculty advisor.

HIST-H 615 Colloquium: Early Modern Western European History (4 cr.)

HIST-H 620 Colloquium: Modern Western European History (4 cr.)

HIST-H 630 Colloquium: British and British Imperial History (4 cr.)

HIST-H 640 Colloquium: Russian History (4 cr.)

HIST-H 650 Colloquium: United States History (4 cr.)

HIST-H 665 Colloquium: Latin American History (4 cr.)

HIST-H 669 Colloquium: Comparative History (4 cr.)

General and Professional Skills

HIST-G 585 Modern China (3 cr.) China from the Ch'ing period to the present. Social, political, and economic change in a largely agrarian society. International and intercultural relations as well as rebellion, war, and revolution during the unstable nineteenth and twentieth centuries.

HIST-H 500 History of Historical Thought (4 cr.) Approaches to the historian's craft and reflections on history as a type of scholarly thinking.

HIST-H 501 Historical Methodology (4 cr.) Discussion and application of the various methods and strategies used in historical research.

HIST-H 509 Special Topics in European History (3 cr.) Study of topics in European history. May be repeated once for credit.

HIST-H 511 Special Topics in American History (3 cr.) Study of topics in American history. May be repeated once for credit.

HIST-H 516 History of Philanthropy in the United States (3 cr.) Approaches philanthropy as a social relation between various groups and looks at issues ranging from the relationship between government and the economy to African-American activism to women's roles. Explores past and current debates about such issues in order to analyze the past, understand the present, and shape the future.

HIST-H 521 Special Topics in African, Asian, or Latin American History (3 cr.) Intensive study and analysis of selected topics in African, Asian, or Latin American history. Topics will vary from semester to semester, e.g., traditional Asia, modern Asia.

HIST-H 542 Public History (4 cr.) The application of history to public needs and public programs. Historic preservation,

archival management, oral history, editing, public humanities programming, historical societies, etc.

HIST-H 543 Practicum in Public History (1-4 cr.) Internships in public history programs, fieldwork, or research in the historical antecedents of contemporary problems.

HIST-H 546 Special Topics in History of Science, Medicine, and Technology (3 cr.) Study of topics in the history of science, medicine, and technology. May be repeated for credit with permission of the director of graduate studies.

HIST-H 547 Special Topics in Public History (3 cr.) Intensive study and analysis of selected topics in public history. Topics will vary from semester to semester, e.g., historic preservation, archival practice, and historical editing. May be repeated once for credit.

HIST-H 548 Historical Administration (3 cr.) This course presents an overview of issues faced by administrators and mid-level managers who work in museums, historical societies, archives, special collection libraries, and other cultural resource agencies. Topics, speakers, and readings focus on issues that are unique to agencies that collect, preserve, and interpret historical resources.

HIST-H 575 Graduate Readings in History (arr. cr.)

Seminars

These courses involve research at a mature level with primary sources in specialized topics and problems in the field with which they respectively deal. They train the student in historical scholarship. Any of them may be taken more than once upon approval of the student's faculty advisor.

HIST-H 715 Seminar: Early Modern European History (4 cr.)

HIST-H 720 Seminar: Modern Western European History (4 cr.)

HIST-H 730 Seminar in British and British Imperial History (4 cr.)

HIST-H 750 Seminar in United States History (4 cr.)

Thesis

HIST-H 898 M.A. Thesis (1-6 cr.)

Special Purpose Courses

The following courses serve special purposes. Enrollment in them is not limited to history majors or minors, but others should check with the departmental chairperson or the instructor prior to registration.

HIST-J 495 Proseminar for History Majors (3 cr.) Selected topics in history. Closed to freshmen and sophomores. PUL=5

HIST-K 493 Reading for Honors (1-3 cr.) P: Approval of department honors committee prior to registration. Individual readings on selected topics. PUL=5

HIST-K 495 Readings in History (1-3 cr.) By arrangement with instructor. Permission of departmental chairperson required. PUL=5

Undergraduate Courses

History courses numbered 200 or above are usually taken by students with a background such as that provided in the 100-level courses; however, students who are mature and who have a good background in history may enroll in 200- to 400-level courses as their first courses in history. Note: There are several 300-level classes offered at IU Bloomington that have the same content as 400-level classes offered at IUPUI. In such cases, both classes may not be taken for credit. See individual course descriptions for further information.

HIST-A 301 Colonial and Revolutionary America I (3 cr.) European background of American history; discovery and exploration of New World by Spain, France, and England. Colonization: motives, causes, types. Social and intellectual developments in English colonies in the seventeenth and eighteenth centuries. Birth of Republic, 1763–89. PUL=5

HIST-A 302 Colonial and Revolutionary America II (3 cr.) European background of American history; discovery and exploration of New World by Spain, France, and England. Colonization: motives, causes, types. Social and intellectual developments in English colonies in the seventeenth and eighteenth centuries. Birth of Republic, 1763–89. PUL=5

HIST-A 303 United States, 1789–1865 I (3 cr.) Political, economic, and social development of United States from Washington's presidency through the Civil War. Growth of political, religious, educational, and other social institutions, and contributions of Hamilton, Jefferson, Jackson, Webster, Marshall, Lincoln. Agriculture, manufacturing, commerce, labor. PUL=5

HIST-A 304 United States, 1789–1865 II (3 cr.) Political, economic, and social development of United States from Washington's presidency through the Civil War. Growth of political, religious, educational, and other social institutions, and contributions of Hamilton, Jefferson, Jackson, Webster, Marshall, Lincoln. Agriculture, manufacturing, commerce, labor. PUL=5

HIST-A 312 The North and South at Peace and War (3 cr.) Examines the social, economic, and political landscapes of two communities—one in the North and one in the South—before, during, and after the American Civil War. PUL=5

HIST-A 313 Origins of Modern America, 1865–1917 (3 cr.) Social, economic, cultural, and political ways in which Americans accommodated and resisted changes introduced by large-scale industrialization. Populism and progressivism receive special attention. PUL=5

HIST-A 314 United States History, 1917–1945 (3 cr.) Political, demographic, economic, and intellectual transformations of 1917–1945; World War I, the twenties, the Great Depression, New Deal, World War II. PUL=5

HIST-A 315 United States History since World War II (3 cr.) Political, demographic, economic, and intellectual transformations of 1945–present: Cold War, problems of contemporary America. PUL=5

HIST-A 317 American Social History, 1865 to Present (3 cr.) Development of modern American intellectual and social patterns since the Civil War. Social thought, literature, science, the arts, religion, morals, education. PUL=5

HIST-A 321 History of American Thought I (3 cr.) Ideas that have influenced American history. I. Image of New World to challenge of Jacksonian democracy. II. Transcendentalism to New Conservatism. Term papers and reports. PUL=5

HIST-A 322 History of American Thought II (3 cr.) Ideas that have influenced American history. I. Image of New World to challenge of Jacksonian democracy. II. Transcendentalism to New Conservatism. Term papers and reports. PUL=5

HIST-A 325 American Constitutional History I (3 cr.) I: 1607–1865. II: 1865–present. Changing constitutional system from seventeenth-century colonies to contemporary nations. Structure of government: federalism, division of powers, political institutions. Relationship of government to society and economy. Civil liberties and democracy. Constitutional law and politics. PUL=5

HIST-A 326 American Constitutional History II (3 cr.) I: 1607–1865. II: 1865–present. Changing constitutional system from seventeenth-century colonies to contemporary nations. Structure of government: federalism, division of powers, political institutions. Relationship of government to society and economy. Civil liberties and democracy. Constitutional law and politics. PUL=5

HIST-A 327 American Legal History I (3 cr.) Examines the development of United States law from English antecedents through the American Civil War. Course imparts substantial knowledge of American legal history and understanding of methods of historical and legal inquiry. PUL=5

HIST-A 328 History of Work in America (3 cr.) Examines the major transformations in the lives of American working people from the colonial era to modern times. The course explores shifting patterns of work, working class life and community, organized labor movements, and the relationship of workers and unions to the state. PUL=5

HIST-A 329 American Dissent (3 cr.) This course will examine popular movements for social, economic, and political change in U.S. history. Emphasis will be on: evaluating different approaches to the study of collective action; understanding the social, political, and cultural contexts from which protest developed; and uncovering what protest movements reveal about the nature of American society and politics.

HIST-A 332 The American Ethnic Experience (3 cr.) This course is designed to introduce students to the central issues and methods of inquiry in the historical study of ethnic communities in the United States. The focus of the course's lectures, discussions, readings, and assignments will be on the similarities and contrasts in the experiences of America's various "ethnic" groups.

HIST-A 337 American Frontier I (3 cr.) I. Spanish penetration into Greater Southwest; developments in Louisiana Territory and Oregon Country prior to 1850. II. Economic, political, and social developments in trans-Mississippi West, 1850 to present. PUL=5

HIST-A 338 American Frontier II (3 cr.) I. Spanish penetration into Greater Southwest; developments in Louisiana Territory and Oregon Country prior to 1850. II. Economic, political, and social developments in trans-Mississippi West, 1850 to present. PUL=5

HIST-A 341 United States Women's History I (3 cr.) The social, economic, cultural, intellectual, political, and demographic history of women in the United States from the period before European settlement to the present. Topics include the variety in women's experiences; the worlds in which women lived; the relationship between the private and public realms; and changes and continuities over time. PUL=5

HIST-A 342 United States Women's History II (3 cr.) The social, economic, cultural, intellectual, political, and demographic history of women in the United States from the period before European settlement to the present. Topics include the variety in women's experiences; the worlds in which women lived; the relationship between the private and public realms; and changes and continuities over time. PUL=5

HIST-A 345 American Diplomatic History I (3 cr.) I. American diplomacy from 1775 to 1823; diplomacy of American continental expansion to 1898. II. America as a world power. Involvement in Far Eastern affairs after 1898, diplomacy of World Wars I and II, developments to present. PUL=5

HIST-A 346 American Diplomatic History II (3 cr.) I. American diplomacy from 1775 to 1823; diplomacy of American continental expansion to 1898. II. America as a world power. Involvement in Far Eastern affairs after 1898, diplomacy of World Wars I and II, developments to present. PUL=5

HIST-A 347 American Urban History (3 cr.) Evolution of cities and urban life in the United States from colonial times to the present. Rise of cities (New York, Chicago, Indianapolis, Los Angeles, Miami, and others). Creation of modern urban districts (ghettos, suburbia), city planning, political and economic power structures, ethnic and race relations, law and order (crime, police, prisons). PUL=5

HIST-A 348 Civil War and Reconstruction (3 cr.) The era of the Civil War and its aftermath. Military, political, economic, and social aspects of the coming of the war, the war years, and the ''reconstruction'' era following the conflict. PUL=5

HIST-A 352 History of Latinos in the United States (3 cr.) Examines twentieth century history of immigration to the United States from Mexico, Puerto Rico, Cuba, and Central America. Compares causes of immigration and contrasts experiences of Latino immigrants in the United States. PUL=5

HIST-A 355 African-American History I (3 cr.) I. History of Africans in the United States from the colonial era to the Emancipation Proclamation. II. History of African Americans from the era of the Civil War to the present. PUL=5

HIST-A 356 African-American History II (3 cr.) I. History of Africans in the United States from the colonial era to the Emancipation Proclamation. II. History of African Americans from the era of the Civil War to the present. PUL=5

HIST-A 363 Survey of Indiana History (3 cr.) Examination of Indiana history that focuses on significant persons, topics, and events from the earliest exploration and settlement of the state to the present day. PUL=5

HIST-A 364 History of Black Americans (3 cr.) A survey of black life in America: the Atlantic slave trade, slavery, Afro-American culture, racism, Civil War and Reconstruction, peonage, segregation, northern migration, urban ghettos, discrimination, Harlem Renaissance, black nationalism, civil rights, black revolt, contemporary setting. PUL=5

HIST-A 371 History of Indiana I (3 cr.) I: The course deals with the development of a midwestern state, with emphasis on the French and British periods, the West in the American Revolution, the transition from territory to state, political, economic, and cultural patterns, and the sectional crisis. II: The period since 1865, tracing the development of a modern industrial commonwealth—agriculture, industry, politics, society, education, and the arts. PUL=5

HIST-A 372 History of Indiana II (3 cr.) I: The course deals with the development of a midwestern state, with emphasis on the French and British periods, the West in the American Revolution, the transition from territory to state, political, economic, and cultural patterns, and the sectional crisis. II: The period since 1865, tracing the development of a modern industrial commonwealth—agriculture, industry, politics, society, education, and the arts. PUL=5

HIST-A 390 Representative Americans (3 cr.) Explorations of the lives and works of selected American men and women for the purpose of better understanding the ideological and social forces at work in American history. The course will serve as both an introduction to the biographical literature of American history and as an exercise in the relevance of biography to history. PUL=5

HIST-A 402 Readings in American Environmental History (3 cr.) The roots of modern attitudes and actions toward the environment, focusing on major works in American environmental history and its European antecedents. PUL=5

HIST-A 410 American Environmental History (3 cr.) An examination of the environmental context for American history by analyzing the diverse and changing interaction between Americans and the environment in which they have lived. PUL=5

HIST-A 421 Topics in United States History (3 cr.) Intensive study and analysis of selected historical issues and/or problems in United States history. Topics will vary by semester. PUL=5

HIST-B 309 Britain I (3 cr.) I: Britain before 1688. Development of Britain and its institutions from Roman times to the Glorious Revolution, with special emphasis on political and constitutional change. II: Britain since 1688. Examines important modern political, economic, social, and cultural developments, including industrialization and imperialism and the emergence of ideologies like liberalism and socialism. PUL=5

HIST-B 310 Britain II (3 cr.) I: Britain before 1688. Development of Britain and its institutions from Roman times to the Glorious Revolution, with special emphasis on political and constitutional change. II: Britain since 1688. Examines important modern political, economic, social, and cultural developments, including industrialization and imperialism and the emergence of ideologies like liberalism and socialism. PUL=5

HIST-B 323 History of the Holocuast (3 cr.)

HIST-B 341 History of Spain and Portugal (3 cr.) The Iberian, Roman, and Moorish backgrounds, with emphasis on the medieval Christian thought and institutions of the peninsula during the Reconquest; the political and cultural unity of Spain and of Portugal from the Renaissance through the Enlightenment; the nineteenth- and twentieth-century attempts to achieve political stability and economic progress. PUL=5

HIST-B 351 Barbarian Europe 200-1000 (3 cr.) The collapse of Roman authority in the West; the Germanic monarchies; the growth of the Western church and the development of German, Greek, and Moslem empires; the Viking invasions; feudalism and manorialism. PUL=5

HIST-B 352 The Age of Chivalry 1000-1500 (3 cr.) The revival of urban life in the West; the Crusading movement and the development of feudal states; the struggle between church and state; and the decay of feudal institutions. PUL=5

HIST-B 353 The Renaissance (3 cr.) Italian Renaissance as a political and cultural phase in the history of Western civilization. Its roots in antiquity and the Middle Ages; its characteristic expression in literature, art, learning, social transformation, manners, and customs. Expansion of Renaissance into France, Germany, and England. PUL=5

HIST-B 354 The Reformation (3 cr.) Economic, political, social, and religious background of Protestant Reformation; Lutheran, Reformed, Anglican, and Anabaptist movements, with reference to their political and theological trends; Catholic Reformation. PUL=5

HIST-B 355 Europe: Louis XIV to French Revolution (3 cr.) Absolutism to enlightened despotism; the European state and its authority in fiscal, judicial, and military affairs; sources, content, diffusion of the Enlightenment; agriculture, commerce, and industry in preindustrial economies; Old Regime France. PUL=5

HIST-B 356 French Revolution and Napoleon (3 cr.) P: H114 or consent of instructor Crisis of Old Regime; middle-class and popular revolt; from constitutional monarchy to Jacobin commonwealth; the terror and revolutionary government; expansion of revolution in Europe; rise and fall of Napoleonic Empire. PUL=5

HIST-B 357 Modern France (3 cr.) A social, political, and cultural survey of France in the nineteenth and twentieth centuries. PUL=5

HIST-B 359 Europe—Napoleon to First World War I (3 cr.) I: Post-Napoleonic reaction; revitalized revolutionary forces, 1848; reform in England and Russia; bourgeois monarchy and Second Empire in France; unification movements in Italy and Germany; middle-class nationalism, romanticism, and realism. II: Bismarckian and Wilhelmian Germany; Gladstone, Disraeli, and modern Britain; the French Third Republic and the last days of Tsarist Russia; disintegration of the Ottoman Empire; the Austro-Hungarian Empire in decline; European society and culture on the eve of World War I. PUL=5

HIST-B 360 Europe—Napoleon to First World War II (3 cr.) I: Post-Napoleonic reaction; revitalized revolutionary forces, 1848; reform in England and Russia; bourgeois monarchy and Second Empire in France; unification movements in Italy and Germany; middle-class nationalism, romanticism, and realism. II: Bismarckian and Wilhelmian

Germany; Gladstone, Disraeli, and modern Britain; the French Third Republic and the last days of Tsarist Russia; disintegration of the Ottoman Empire; the Austro-Hungarian Empire in decline; European society and culture on the eve of World War I. PUL=5

HIST-B 361 Europe in the Twentieth Century I (3 cr.) Diplomatic, economic, intellectual, military, political, and social developments within Europe from World War I to present; changing relationships between Europe and other parts of the world. PUL=5

HIST-B 362 Europe in the Twentieth Century II (3 cr.) Diplomatic, economic, intellectual, military, political, and social developments within Europe from World War I to present; changing relationships between Europe and other parts of the world. PUL=5

HIST-B 383 European Intellectual History I (3 cr.) Critical examination and analysis of the historical, psychological, social, and scientific roots of the thought of leading European thinkers from the sixteenth to the twentieth centuries. Thematic developments, as well as individual thinkers and particular problems, are emphasized. I. Sixteenth through eighteenth centuries. II. Nineteenth through twentieth centuries. PUL=5

HIST-B 384 European Intellectual History II (3 cr.) Critical examination and analysis of the historical, psychological, social, and scientific roots of the thought of leading European thinkers from the sixteenth to the twentieth centuries. Thematic developments, as well as individual thinkers and particular problems, are emphasized. I. Sixteenth through eighteenth centuries. II. Nineteenth through twentieth centuries. PUL=5

HIST-B 393 German History: From Bismarck to Hitler (3 cr.) This course seeks to acquaint the student with the social, political, and cultural developments in Germany from the middle nineteenth through the middle twentieth century. Its basic theme is the tragic efforts made by liberalism and democracy to assert themselves against the opposing forces of militarism and nationalism. Not open to students who have had B377-B378. PUL=5

HIST-B 421 Topics in European History (3 cr.) Intensive study and analysis of selected historical themes and/or problems in European history. Topics will vary from semester to semester. PUL=5

HIST-B 425 The Second World War (3 cr.) Beginning with its origins in the peace settlement of 1919, this course examines the social, cultural, and economic impact of the Second World War, as well as the war aims and strategies of the major combatants. PUL=5

HIST-B 426 Genocide and Its Origins (3 cr.) Beginning with the sixteenth-century discovery of the “New World” and ending with “ethnic cleansing” in the twenty-first century, this course will examine the intellectual, political, economic, social, and ideological dynamics driving the rise of mass murder as an instrument of state policy. PUL=5

HIST-C 386 Greek History (3 cr.) Political, social, and economic developments in the Greek world from the age of Mycenae and Troy until the Roman conquest (167 B.C.). Greek colonial world, Athens and Sparta, career and legend of Alexander the Great, the Hellenistic age. Archaeology as a source of political and social history. PUL=5

HIST-C 388 Roman History (3 cr.) The creation, organization, and government of the Roman Republic and Empire; literature and manners; the careers of Hannibal, Cato the Censor, Augustus, Seneca, Nero, and others; the growth of Christianity to the reign of Constantine. PUL=5

HIST-D 313 Russian Social and Cultural History, 1801–1917 (3 cr.) A topical examination of different social groups within Russia and their alteration over time as a result of industrialization, emancipation, and the urbanization of Russia. Among the groups covered will be the peasantry, the bureaucracy, the intelligentsia, the nobility, and the military. Changes in culture will also be reviewed. PUL=5

HIST-D 314 Soviet Social and Cultural History (3 cr.) Study of the history and dynamics of Soviet society and culture, their interaction, and their influence on Soviet politics. Among the specific topics covered will be the Party, women, dissidents, the Jews and other minorities, literature, and art. PUL=5

HIST-D 428 Eastern Europe: 1914 to Present (3 cr.) World War I; the peace settlements in Poland, Czechoslovakia, Austria, Hungary, Yugoslavia, Bulgaria, Albania, Greece, Romania, and Turkey. Parliamentary democracy vs. military dictatorship; irredentism; economic transformation; Nazi domination; Munich; Soviet seizure of power. National communism of Tito, Gromulka, Kadar, Ceausescu, Dubcek, and Hoxha. Soviet and Western rivalry in Eastern Europe. PUL=5

HIST-E 340 African Popular Culture (3 cr.) African popular culture (music, sports, fashion) is the lens used to explore how Africans responded to and shaped life under colonial rule and after independence. We consider questions like: What is the relationship between popular culture and politics? How does popular culture change how we think about colonialism and independence?

HIST-E 432 History of Africa II (3 cr.) 1750 to present. Slave trade, European imperialism, impact of Islam and Christianity, new state formation, reassertion of African culture and identity. Credit awarded for only one of E432 and E332. PUL=5

HIST-F 341 Latin America: Conquest and Empire (3 cr.) The colonial period: Spanish, Portuguese, Indian, and African backgrounds; discovery, conquest, and settlement; economic, social, political, religious, and cultural life; the movement toward independence. PUL=5

HIST-F 342 Latin America: Evolution and Revolution since Independence (3 cr.) National period: the struggle for independence; the nineteenth-century attempts to achieve political stability and economic progress; the efforts to attain social justice in the twentieth century, with emphasis on common problems. PUL=5

HIST-F 346 Modern Mexico (3 cr.) Survey of Mexican history from the late 1800s to the present. Focuses on causes for and long-term consequences of Mexico’s 1910 revolution. PUL=5

HIST-F 347 History of United States–Latin American Relations (3 cr.) This course examines the history of

diplomatic, economic, and cultural relations between the United States and Latin America from the late 1700s to the present. PUL=5

HIST-G 451 Traditional Asia (3 cr.) This course offers a brief survey of the early civilization of Asia, which includes China, Japan, Vietnam, Korea, and India, in the traditional period. PUL=5

HIST-G 452 Modern Asia (3 cr.) This course offers a brief survey of the civilization of Asia that includes selected topics related to China, Japan, Vietnam, Korea, and/or India in modern times. PUL=5

HIST-G 461 Imperial China (3 cr.) This course offers a brief survey of the civilization of traditional China. The emphasis of the lectures is on the development of the social structure, the political system, and Confucian culture.

HIST-G 467 History of Japan I (3 cr.) From prehistoric times to present. Land and people, principal classes; Shintoism and divine emperor; feudalism; Tokugawa Shogunate; modern state and military expansion; population, agrarian, and industrialization problems; occupation and treaty. Students may not receive credit for G467 and G357 or for G468 and G358. PUL=5

HIST-G 468 History of Japan II (3 cr.) From prehistoric times to present. Land and people, principal classes; Shintoism and divine emperor; feudalism; Tokugawa Shogunate; modern state and military expansion; population, agrarian, and industrialization problems; occupation and treaty. Students may not receive credit for G467 and G357 or for G468 and G358. PUL=5

HIST-G 485 Modern China (3 cr.) China from the Ch'ing period to the present. Social, political, and economic change in a largely agrarian society. International and intercultural relations as well as rebellion, war, and revolution during the unstable nineteenth and twentieth centuries. Students may receive credit for only one of G485 and G385. PUL=5

HIST-H 105 American History I (3 cr.) I. Colonial period, Revolution, Confederation and Constitution, national period to 1865. II. 1865 to present. Political history forms framework, with economic, social, cultural, and intellectual history interwoven. Introduction to historical literature, source material, and criticism. PUL=5

HIST-H 106 American History II (3 cr.) I. Colonial period, Revolution, Confederation and Constitution, national period to 1865. II. 1865 to present. Political history forms framework, with economic, social, cultural, and intellectual history interwoven. Introduction to historical literature, source material, and criticism. PUL=5

HIST-H 108 Perspectives on the World to 1800 (3 cr.) Emergence of civilizations in the Near East, sub-Saharan Africa, pre-Columbian America. Role of revolutions, i.e., geographic, scientific, industrial, social, and political (American and French) in establishment of European hegemony in Asia and the Western Hemisphere. PUL=5

HIST-H 109 Perspectives on the World since 1800 (3 cr.) Rise and fall of European imperial rule in Asia, the Middle East, and Africa. Special focus on impact of World War I, Chinese, Mexican, Russian revolutions. Independence movement in India, World War II, Cold War, new nations in Asia and Africa, struggle for solidarity in Latin America. PUL=5

HIST-H 113 History of Western Civilization I (3 cr.) I. Rise and fall of ancient civilizations; barbarian invasions; rise, flowering, and disruption of medieval church; feudalism, national monarchies. II. Rise of middle class; parliamentary institutions, liberalism, political democracy; industrial revolution, capitalism, and socialist movements; nationalism, imperialism, international rivalries, world wars. PUL=5

HIST-H 114 History of Western Civilization II (3 cr.) I. Rise and fall of ancient civilizations; barbarian invasions; rise, flowering, and disruption of medieval church; feudalism, national monarchies. II. Rise of middle class; parliamentary institutions, liberalism, political democracy; industrial revolution, capitalism, and socialist movements; nationalism, imperialism, international rivalries, world wars. PUL=5

HIST-H 207 Modern East Asian Civilization (3 cr.)

HIST-H 217 The Nature of History (3 cr.) An introductory examination of what history is, types of historical interpretation, common problems in history, and the uses of history. PUL=5

HIST-H 220 American Military History (3 cr.) From settlement of colonies to present. European background, colonial militia. Principal foreign wars and their strategic objectives. Technological changes and effect of military on American society. Army is emphasized with some attention to other armed forces. PUL=5

HIST-H 221 Studies in African, Asian, or Latin American History (3 cr.) Study and analysis of selected themes, topics, or problems in the history of Africa, Asia, or Latin America. The course will emphasize general and/or broad themes or topics; the themes or topics will vary from one semester to another. A student may register for only two courses with this number. PUL=5

HIST-H 227 African Civilization (3 cr.) Survey of African history from the beginning of civilization in Egypt to the emergence of modern Africa. Using both broad themes (e.g., Islam, colonial changes) and specific cases studies (e.g., empire of Mali), the course focuses on the continuities and changes that shaped African society. PUL=5

HIST-H 306 Sex Roles and Society in American History (3 cr.) What has it meant to be female or male in America? Examination of sex/gender roles, stereotypes, housewifery, family life, sexual mores, work patterns, popular culture, demographic change, politics, and violence. Special emphasis on utopias, frontiers, and wars. Readings in original sources and scholarly interpretations. PUL=5

HIST-H 364 History of Medicine and Public Health (3 cr.) History of medicine and public health in Europe and America, including ancient and medieval background, with focus on the development of modern health sciences since 1800. PUL=5

HIST-H 373 History of Science and Technology I (3 cr.) I. Study of the development of pure and applied science from prehistoric times to the Scientific Revolution, with emphasis on principles, technical aspects, relationships between the sciences; the evolution of major scientific disciplines and the effects on other institutions and world views. II. An in-depth

study of scientific and technological developments from the Scientific Revolution to the present. Special emphasis on transportation, communication, military and medical technology, physics, biology, and astronomy and on the figures involved in key breakthroughs. Consideration of governmental involvement in science. PUL=5

HIST-H 374 History of Science and Technology II (3 cr.) I. Study of the development of pure and applied science from prehistoric times to the Scientific Revolution, with emphasis on principles, technical aspects, relationships between the sciences; the evolution of major scientific disciplines and the effects on other institutions and world views. II. An in-depth study of scientific and technological developments from the Scientific Revolution to the present. Special emphasis on transportation, communication, military and medical technology, physics, biology, and astronomy and on the figures involved in key breakthroughs. Consideration of governmental involvement in science. PUL=5

HIST-H 375 Machines and the Age of Invention (3 cr.) The history of invention and the industrialization of Britain during the eighteenth and nineteenth centuries, with the economic, social, demographic, and intellectual changes that resulted. PUL=5

HIST-H 409 Women in History (3 cr.) P: junior or senior standing Women in their historical and contemporary situation in Western culture; survey of prehistoric and historic myths about women; status of women during the major eras of Western civilization; exceptional women and their influence; demands for the achievement of women's rights in modern times. PUL=5

HIST-H 410 Introduction to Archival Practice (3 cr.) Introduction to the history, theory, and practice of archival work, with intensive study and analysis of the principal issues in the preservation and use of historical records. Particular focus is on the issues relating to the historical records of organizations and individuals engaged in philanthropic work. PUL=5

HIST-H 411 Historical Editing (3 cr.) Introduction to the history, theory, and practice of historical editing, with emphasis on the processes of editing historical documents and the publications of history-related organizations. Attention given to technical skills (copyediting, proofreading) as well as broader professional issues (ethics, the editor-author relationship, evolution of editorial standards). PUL=5

HIST-H 412 Historic Preservation (3 cr.) Introduction to the history, theory, and legal and ethical bases for preservation of the built environment. Attention will be given to architectural history, methodology (site-specific research, contextual research) as well as professional issues such as who preserves, what should be preserved, and the role of the historian in making choices. PUL=5

HIST-H 415 Philanthropy in the West (3 cr.) The history of the social act of philanthropy from the beginnings of the Christian era to modern times. ''Philanthropy'' is construed broadly to include ethical injunctions to benevolence, charitable acts of individuals and corporate bodies, high art patronage, urban planning, and state action to improve living conditions through schooling, health care, prisons, and police. PUL=5

HIST-H 421 Topics in African, Asian, or Latin American History (3 cr.) Intensive study and analysis of selected historical issues and/or problems in African, Asian, or Latin American history. Topics will vary from semester to semester. PUL=5

HIST-H 425 Topics in History (3 cr.) Intensive study and analysis of selected historical issues and problems of limited scope. Topics will vary but will ordinarily cut across fields, regions, and periods. May be repeated once for credit. PUL=5

HIST-H 432 Popular Cultures and African Cities (3 cr.) Focuses on the interdependence between the development of the colonial and postcolonial city and the emergence of popular cultures in Africa. Cultures such as music, fashion, and sports will be studied in their recreational aspects as well as for their social and political implications. PUL=5

HIST-H 477 British Imperialism, 1485–Present (3 cr.) Comparative course focusing on the various geographical regions absorbed into the British empire between 1485 and the present. It explores the experience of empire in the Americas, the Pacific, India, Africa, and the Middle East through a variety of primary and secondary materials. PUL=5

Individualized Major Program (IMP)

SLA-I 360 Individualized Major Program (1 cr.) P: approval by advisor A tutorial in which a student develops a plan for an individualized major. Upon approval of this plan, the student is admitted to the Individualized Major Program. PUL=3,4

SLA-I 460 Individualized Major Senior Project (3-6 cr.) P: P: I360 (i.e. admission to the Individualized Major Program) and approval by advisor. A variable-credit tutorial devoted to a capstone project that culminates and integrates the individualized major. Preferably taken in the senior year as a two-semester, 6-credit course. PUL=3,4

SLA-S 100 First Year Success Seminar (2 cr.)

Integrated Studies

INTG-I 300 Junior/Senior Integrator (3 cr.) This course fulfills the general education requirement for junior/senior integrator for majors in the School of Liberal Arts and in the School of Science.

International Studies (INTL)

A list of courses that fulfill the various area and thematic concentration requirements for the international studies major and provide elective course options for the minor is available on the international studies Web page.

INTL-I 100 Introduction to International Studies (3 cr.) This is the required introductory course for the international studies major and minor. In contrast to international relations (a subfield of political science), with which it is often confused, international studies is an interdisciplinary field. This course provides you with an interdisciplinary sample of international studies scholarship from a variety of academic disciplines. PUL=5

INTL-I 400 International Studies Capstone Seminar (3 cr.) This is the required senior seminar capstone course for the international studies major. It provides an integrative capstone experience which reinforces the interdisciplinary nature of international studies. PUL=2,4

INTL-I 415 Individual Readings in International Studies (3 cr.) This course allows students to pursue independent study projects or to take advantage of opportunities to collaborate with faculty on research projects in international studies. PUL=3

MHHS-M 301 Perspectives on Health, Disease, and Healing (3 cr.) The course utilizes the perspectives of the humanities and social science disciplines to provide students with a broader understanding of the many facets of health and disease, suffering and dying, as well as art and science of healing. PUL=3

MHHS-M 492 Topics in Medical Humanities and Health Studies (1-3 cr.) Intensive study and analysis of selected issues and problems in Medical Humanities and Health Studies. Topics will ordinarily cut across fields and disciplines. May be repeated once for credit on a different topic. PUL=4

MHHS-M 495 Independent Project/Seminar in Medical Humanities and Health Studies (3 cr.) A seminar or research project on a subject in Medical Humanities and Health Studies. Requires a minimum of 9 credit hours in the minor. PUL=4

MHHS-M 498 Readings in Medical Humanities and Health Studies (1-3 cr.) Individual readings and research. May be repeated once for credit on a different subject.

MHHS-M 504 Introduction to Research Ethics (1-3 cr.) Introduction to the basic concepts of research ethics. The course covers the historical development of concern with ethics in science as well as practical information needed by students working in science today. Format is lecture and discussion.

MHHS-M 592 Graduate Topics in Medical Humanities (3 cr.) Study of topics in Medical Humanities. May be repeated once for credit on a different topic.

MHHS-M 598 Graduate Readings in Medical Humanities (1-3 cr.) Focused readings on selected topics in medical humanities by arrangement with the instructor. Permission of the Program Director required.

MSPT-Z 100 Motorsports Studies (3 cr.)

Museum Studies (MSTD)

Graduate Courses

MSTD-A 560 Current Topics: Museum Theatre and Interpretation Methods (3 cr.) The purpose of this course is to provide an in-depth look at the use of museum theatre and live interpretation in museum settings to advance the educational mission and nature of museums. The class examines theatrical techniques, program development and management, and interpretation approaches for a wide variety of museum exhibits and audiences. Students will observe, develop, and implement original museum theatre and interpretation projects as a synthesis and practical application of the knowledge gained. The course will include field visits and observations of various techniques in museum theatre and live interpretation.

MSTD-A 503 Introduction to Museum Studies (3 cr.) This survey of museology introduces students to the history of museums and to debates on the philosophical nature of museums and their roles in society. The course covers the types and definitions of museums, traces the history of museums, discusses contemporary museum practice, and examines current issues in the museum profession.

MSTD-A 505 Museum Methods (3 cr.) This survey of museum practice introduces students to methods, skills, and resources in three areas of museum work: artifacts, interpretation, and organizational administration, as well as to the ethical ramifications of these methods.

MSTD-A 508 Museum Internship (1-6 cr.) P: A503 and two other museum studies graduate courses or consent of the instructor. Authorization of the instructor required. An arranged learning experience in museum work appropriate to individual career goals focusing on an aspect of museum practice and working with a museum mentor. May be repeated for a total of 9 credit hours.

MSTD-A 510 Museum Education (3 cr.) This survey of museum education introduces students to a variety of professional skills through exercises, projects, museum visitor observation, and in-museum classes. It covers education theory most central to museum practice, the duties of museum educators, and current issues in museum education.

MSTD-A 512 Exhibit Planning and Design (3 cr.) This course offers a survey of museum exhibit planning and design through an integration of theory and practice. The class introduces students to exhibit development, including exhibit administration, design, and evaluation, and to a variety of professional skills through hands-on exercises, exhibit critiques, museum observations, and in-museum classes.

MSTD-A 514 Museums and Technology (3 cr.) This course surveys the growing use of technology in museums. It examines applications for information management in collections, conservation science, and archives. It examines critically the use of technology in the service of education both in exhibit contexts and in the variety of educational programs and Web-based dissemination of knowledge.

MSTD-A 516 Collections Care and Managements (3 cr.) A survey of techniques for the management and care of collections in museums. It covers documentation, management of collections, processes, administrative functions, risk management, and ethical and legal issues. The course also covers the physical care and conservation of collections.

MSTD-A 518 Museums and Audiences (3 cr.) This course examines the ways museums seek to better understand their audiences, serve them more effectively, and strive to reach new audiences. The course looks at a broad range of visitor studies and the ways in which museums and audiences interact.

MSTD-A 530 Museum Colloquium (3 cr.) This course provides graduate students with the tools and knowledge necessary to assess, understand, and utilize the links among their education, goals, and career opportunities. It supports graduate students approaching the end of their degree program in 1) exploring the connections between the museum knowledge they have mastered and the skills they have developed, 2) framing and articulating their knowledge and skills as well as their vocational goals to others, including prospective employers, 3) developing critical competencies

for community-focused museum work, and 4) creating professional plans as they transition into or advance in the work force or pursue further education.

MSTD-A 548 Museum Colloquium (3 cr.) This course presents a broad overview of issues that administrators who work in museums, historical societies, archives, special collection libraries, and other cultural resource agencies experience in their careers. Note: this course is offered in alternate years by museum studies as MSTD A548 and by history as HIST H548. Museum studies students may take either number to fulfill their core requirement.

MSTD-A 560 Current Topics in Museum Studies (3 cr.) Intensive graduate-level study and analysis of selected topics in museum studies. Topics will vary from semester to semester. May be repeated for credit.

MSTD-A 560 Current Topics: Museum Theatre and Interpretation Methods (3 cr.) The purpose of this course is to provide an in-depth look at the use of museum theatre and live interpretation in museum settings to advance the educational mission and nature of museums. The class examines theatrical techniques, program development and management, and interpretation approaches for a wide variety of museum exhibits and audiences. Students will observe, develop, and implement original museum theatre and interpretation projects as a synthesis and practical application of the knowledge gained. The course will include field visits and observations of various techniques in museum theatre and live interpretation.

MSTD-A 560 Current Topics: : Interpreting Sustainable Landscapes and Live Collections (3 cr.) The course will examine the construction of nature as a cultural expression, ideas of sustainability, environment and landscape and their value as cultural spaces. We will examine how they are selected, cared for, interpreted and engaged by the public. Local live collections of plants, animals and landscapes will be visited and examined; including visits to public and community gardens, zoos and agricultural sites and park lands. An opportunity for interpretive planning exists at several locations within Indianapolis.

MSTD-A 560 Current Topics: : Collections Research and Survey (3 cr.) Privileging the collection and facilities of The Madame Walker Theatre Center, students will survey the contents of the building and create accurate records of historic and artistic objects with full descriptions, condition assessments, and high-resolution photographs. This material will be assembled into a newly-created electronic database. At the same time, students will conduct in-depth research about individual items and share this information with the Walker's blog, and other online venues.

MSTD-A 560 Current Topics: : Display: Theories, Issues, Practices (3 cr.) Through the examination of both onsite and virtual exhibitions this course will explore different display methodologies and their respective benefits and issues. Students will learn to identify organizational missions and determine if exhibitions successfully meet established criteria. Exhibitions will be discussed in the context of meeting educational, marketing and fiscal goals for organizations among other standards.

MSTD-A 560 Current Topics: Cultural Heritage (3 cr.) This course explores a variety of issues related the stewardship of cultural property on a local and global scale. Through readings, case studies, discussion, and a semester-long project, students will explore ethical, economic, legal, political, and pragmatic issues related to tangible and intangible heritage and will increase their understanding of the practices and processes of cultural heritage management.

MSTD-A 560 Current Topics: Exhibit Design and Planning Studio: (Applied learning with community client/partners) (3 cr.) This class is an applied learning course based on a professional design studio model. Work completed in this course is experiential, client-based work with specific outcomes and deliverables. The course builds on the basic skills and applications learned in Exhibit Design and Planning 1, with an emphasis on refining and developing the storytelling and interpretive capacity of exhibition design and its relationship to visual and three-dimensional form, light, and materials. Students will engage an exploration of three- dimensional structure and form in relation to constructing meaning, as well as developing an understanding of a vocabulary of materials to add to the existing methods of exhibition design and planning engaged in the first-level course.

MSTD-A 560 Current Topics: Museum Ethics (3 cr.) This course introduces current ethical concerns relevant to museums and the various audiences they serve. It focuses on the philosophical and practical dilemmas faced by exhibiting institutions in their efforts to formulate and fulfill their missions. It pays particular attention to the relationships between the governing bodies of these institutions and their staff, their intended audiences, and the source communities which they represent. The course also provides an historical framework tracing the development of these issues in order to contextualize the present situation.

MSTD-A 560 Current Topics: Issues in Native American Representation (3 cr.) From sports mascots, tourist "junk," and New Age paraphernalia to superb films and museum exhibits, the images of Indians presented to the public and Indians themselves become confusing and often are stereotypical. Through readings, videos, online materials, and hands-on projects using exhibits in the Eiteljorg Museum, the course will consider a wide range of issues including economics, ethics, authenticity, stereotyping, and sovereignty. Because the subject matter cross-cuts the realm of indigenous issues, the class and readings will necessarily touch upon similar issues in non–Native American indigenous cultures.

MSTD-A 560 Current Topics: American Indians in Film (3 cr.) No medium has done more to create and confound images of American Indians than film. Ranging from simplistic, warlike savages to ennobled, ecological mystics, these images tend to mirror the complexities of the dominant society and are mostly created by them. What are the impacts of these images on both Indian people and the dominant society? How are the images created? What are the cultural contexts of the medium itself? These and a range of other subjects will be examined in the course.

MSTD-A 560 Current Topics: Curatorial Practices (3 cr.) This course explores the possibilities for, and consequences of, curating in the museum. By critically examining the creative process of producing exhibitions that convey critical narratives and by applying the practices and methodologies

of curators. It explores briefly the history of curating, but will emphasize the contemporary concerns within the field. While inclusive in its disciplinary perspectives, the course in any particular semester may focus on art, anthropological, or historical topics and projects.

MSTD-A 560 Current Topics: Critical Approaches to Museum Education (3 cr.) As informal learning environments, museums are community resources that present content through a variety of formats. As museums grapple with their changing role within communities, the format and orientation of education programs and exhibitions is changing. This course examines the potential of applying critical pedagogy methods to museum education and exhibition development as a way to create meaningful audience involvement and stronger civic engagement of museums.

MSTD-A 560 Current Topics: Indigenous Peoples of North America (3 cr.) Examines the ways in which academic disciplines have examined American Indian and Native cultures, traditions and histories. The viewpoints primarily will emphasize ideas that affect the representation of Indigenous people in museums, but perspectives also will come from anthropology literature, history, law, political science, and a range of other disciplines.

MSTD-A 560 Current Topics: Museum Research Methods in Education and Visitor Experience (3 cr.) This course is an overview on the theoretical foundations of educational research and practical application of those methods in a museum setting. It incorporates an overview of techniques in museum education and visitor studies research, and emphasizes the utility of research in museum education practices. Students will participate in project-based activities with museum professionals and researchers, as well as become active consumers, reviewers, and advocates of research in the museum field.

MSTD-A 595 Independent Learning in Museum Studies (1-6 cr.) A supervised, in-depth examination through individual reading and research on a particular museum studies topic selected and conducted by the student in consultation with a faculty member. May be repeated for no more than 6 credit hours total.

Undergraduate Courses

See the museum studies Web site for a current list of approved electives and new courses.

MSTD-A 403 Introduction to Museum Studies (3 cr.) This survey of museology introduces students to the history of museums and to debates on the philosophical nature of museums and their roles in society. The course covers the types and definitions of museums, traces the history of museums, discusses contemporary museum practice, and examines current issues in the museum profession. PUL=5

MSTD-A 405 Museum Methods (3 cr.) This survey of museum practice introduces students to methods, skills, and resources in three areas of museum work: artifacts, interpretation, and organizational administration, as well as to the ethical ramifications of these methods. PUL=3

MSTD-A 408 Museum Internship (1-6 cr.) P: A403 and A405, or consent of instructor; anthropology majors may register for A412 in lieu of this requirement. Authorization of the instructor required. An arranged learning experience in museum work appropriate to individual career goals focusing on an aspect of museum practice and working with a museum mentor. May be repeated. PUL=3

MSTD-A 410 Museum Education (3 cr.) This survey of museum education introduces students to a variety of professional skills through exercises, projects, museum visitor observation, and in-museum classes. It covers education theory most central to museum practice, the duties of museum educators, and current issues in museum education. PUL=4

MSTD-A 412 Exhibit Planning and Design (3 cr.) This course offers a survey of museum exhibit planning and design through an integration of theory and practice. The class introduces students to exhibit development, including exhibit administration, design, and evaluation, and to a variety of professional skills through hands-on exercises, exhibit critiques, museum observations, and in-museum classes. PUL=3

MSTD-A 414 Museums and Technology (3 cr.) This course surveys the growing use of technology in museums. It examines applications for information management in collections, conservation science, and archives. It examines critically the use of technology in the service of education both in exhibit contexts and in the variety of educational programs and Web-based dissemination of knowledge. PUL=3

MSTD-A 416 Collections Care and Management (3 cr.) A survey of techniques for the management and care of collections in museums. It covers documentation, management of collections, processes, administrative functions, risk management, and ethical and legal issues. The course also covers the physical care and conservation of objects. PUL=3

MSTD-A 418 Museums and Audiences (3 cr.) This course examines the ways museums seek to better understand their audiences, serve them more effectively, and strive to reach new audiences. The course looks at a broad range of visitor studies and the ways in which museums and audiences interact. PUL =

MSTD-A 460 Current Topics in Museum Studies (3 cr.) Study and analysis of selected topics in museum studies. Topics will vary from semester to semester. May be repeated for credit. PUL=4

MSTD-A 460 Current Topics: Museum Theatre and Interpretation Methods (3 cr.) The purpose of this course is to provide an in-depth look at the use of museum theatre and live interpretation in museum settings to advance the educational mission and nature of museums. The class examines theatrical techniques, program development and management, and interpretation approaches for a wide variety of museum exhibits and audiences. Students will observe, develop, and implement original museum theatre and interpretation projects as a synthesis and practical application of the knowledge gained. The course will include field visits and observations of various techniques in museum theatre and live interpretation.

MSTD-A 460 Current Topics: : Interpreting Sustainable Landscapes and Live Collections (3 cr.) The course will examine the construction of nature as a cultural expression, ideas of sustainability, environment and landscape and their

value as cultural spaces. We will examine how they are selected, cared for, interpreted and engaged by the public. Local live collections of plants, animals and landscapes will be visited and examined; including visits to public and community gardens, zoos and agricultural sites and park lands. An opportunity for interpretive planning exists at several locations within Indianapolis.

MSTD-A 460 Current Topics: : Collections Research and Survey (3 cr.) Privileging the collection and facilities of The Madame Walker Theatre Center, students will survey the contents of the building and create accurate records of historic and artistic objects with full descriptions, condition assessments, and high-resolution photographs. This material will be assembled into a newly-created electronic database. At the same time, students will conduct in-depth research about individual items and share this information with the Walker's blog, and other online venues.

MSTD-A 460 Current Topics: : Display: Theories, Issues, Practices (3 cr.) Through the examination of both onsite and virtual exhibitions this course will explore different display methodologies and their respective benefits and issues. Students will learn to identify organizational missions and determine if exhibitions successfully meet established criteria. Exhibitions will be discussed in the context of meeting educational, marketing and fiscal goals for organizations among other standards.

MSTD-A 460 Current Topics: Cultural Heritage (3 cr.) This course explores a variety of issues related the stewardship of cultural property on a local and global scale. Through readings, case studies, discussion, and a semester-long project, students will explore ethical, economic, legal, political, and pragmatic issues related to tangible and intangible heritage and will increase their understanding of the practices and processes of cultural heritage management.

MSTD-A 460 Current Topics: Exhibit Design and Planning Studio: (Applied learning with community client/partners) (3 cr.) This class is an applied learning course based on a professional design studio model. Work completed in this course is experiential, client-based work with specific outcomes and deliverables. The course builds on the basic skills and applications learned in Exhibit Design and Planning 1, with an emphasis on refining and developing the storytelling and interpretive capacity of exhibition design and its relationship to visual and three-dimensional form, light, and materials. Students will engage an exploration of three- dimensional structure and form in relation to constructing meaning, as well as developing an understanding of a vocabulary of materials to add to the existing methods of exhibition design and planning engaged in the first-level course.

MSTD-A 460 Current Topics: Museum Ethics (3 cr.) This course introduces current ethical concerns relevant to museums and the various audiences they serve. It focuses on the philosophical and practical dilemmas faced by exhibiting institutions in their efforts to formulate and fulfill their missions. It pays particular attention to the relationships between the governing bodies of these institutions and their staff, their intended audiences, and the source communities which they represent. The course also provides an historical framework tracing the development of these issues in order to contextualize the present situation.

MSTD-A 460 Current Topics: Issues in Native American Representation (3 cr.) From sports mascots, tourist "junk," and New Age paraphernalia to superb films and museum exhibits, the images of Indians presented to the public and Indians themselves become confusing and often are stereotypical. Through readings, videos, online materials, and hands-on projects using exhibits in the Eiteljorg Museum, the course will consider a wide range of issues including economics, ethics, authenticity, stereotyping, and sovereignty. Because the subject matter cross-cuts the realm of indigenous issues, the class and readings will necessarily touch upon similar issues in non–Native American indigenous cultures.

MSTD-A 460 Current Topics: American Indians in Film (3 cr.) No medium has done more to create and confound images of American Indians than film. Ranging from simplistic, warlike savages to ennobled, ecological mystics, these images tend to mirror the complexities of the dominant society and are mostly created by them. What are the impacts of these images on both Indian people and the dominant society? How are the images created? What are the cultural contexts of the medium itself? These and a range of other subjects will be examined in the course.

MSTD-A 460 Current Topics: Curatorial Practices (3 cr.) This course explores the possibilities for, and consequences of, curating in the museum. By critically examining the creative process of producing exhibitions that convey critical narratives and by applying the practices and methodologies of curators. It explores briefly the history of curating, but will emphasize the contemporary concerns within the field. While inclusive in its disciplinary perspectives, the course in any particular semester may focus on art, anthropological, or historical topics and projects.

MSTD-A 460 Current Topics: Critical Approaches to Museum Education (3 cr.) As informal learning environments, museums are community resources that present content through a variety of formats. As museums grapple with their changing role within communities, the format and orientation of education programs and exhibitions is changing. This course examines the potential of applying critical pedagogy methods to museum education and exhibition development as a way to create meaningful audience involvement and stronger civic engagement of museums.

MSTD-A 494 Independent Learning in Museum Studies (1-6 cr.) A supervised, in-depth examination through individual reading and research on a particular museum studies topic selected and conducted by the student in consultation with a faculty member. May be repeated for no more than 6 credit hours total. PUL=2

HIST-H 217 The Nature of History (3 cr.) An introductory examination of (1) what history is, (2) types of historical interpretation, (3) common problems in history, and (4) the uses of history. PUL=5

OVST-Y 498 Overseas Study/Non-IU Program II (0 cr.)

Paralegal Studies

POLS-Y 211 Introduction to Law (3 cr.) An introduction to law as an aspect of government and politics, and as a means for dealing with major social problems. Students will study legal reasoning, procedures, and materials, and may compare other nations' legal systems. The course usually includes a moot court or other forms of simulation. PUL=2

POLS-Y 221 Legal Research and Writing for Paralegal Studies (3 cr.) P: Y211. Development of research and communication skills special to the area of law. Includes methods of organizing and conducting legal research, resources available for legal research, presentation of findings in memoranda and briefs, other forms of legal writing. PUL=1C

POLS-Y 222 Litigation for Paralegal Studies I (3 cr.) P: Y211 and Y221. This course examines the processing of a case from initial client interviews to final disposition. It includes drafting of complaints, answers, counterclaims, interrogatories and other discovery tools, gathering of evidence, and motions and judgments. Both Indiana and federal rules of evidence are emphasized. PUL=4

POLS-Y 223 Litigation for Paralegal Studies II (3 cr.) P: Y211, Y221, and Y222. This elective course in advanced litigation focuses primarily on aspects of trial preparation not covered in depth in Y222. Topics may include jury selection, witness preparation and examination, preparation of evidence for use at trial, jury instructions, post-judgment relief. PUL=4

POLS-Y 224 Property Law for Paralegal Studies (3 cr.) P: Y211 and Y221. This course examines the legal rules governing various types of property and the ways in which human beings relate to property. Types of property include real and personal; relationships to property include both ownership and interest. Emphasis is placed on forms and procedures used in Indiana. PUL=4

POLS-Y 225 Contract Law for Paralegal Studies (3 cr.) P: Y211 and Y221. This course includes the basic elements and principles involved in the drafting, interpretation, and enforcement of contracts, including current trends in contract law in Indiana. Includes Uniform Commercial Code. PUL=4

POLS-Y 226 Tort Law for Paralegal Studies (3 cr.) P: Y211 and Y221. This course reviews current law and recent trends in negligence and liability. Different dimensions of liability are covered. Emphasis on conduct of a tort case from initiation through relief, and on the responsibilities of legal assistants therein. PUL=4

POLS-Y 227 Criminal Law for Paralegal Studies (3 cr.) P: Y211 and Y221. This in-depth review of criminal law in Indiana covers the Indiana Criminal Code—infractions, misdemeanors, and felonies. The course emphasizes real situations that legal professionals encounter throughout the process. PUL=4

POLS-Y 228 Family Law for Paralegal Studies (3 cr.) P: Y211 and Y221. This course examines legal rules and procedures concerning domestic relations. Topics covered include separation and divorce, adoption, child custody and support, and other areas of domestic relations in Indiana. PUL=4

POLS-Y 229 Estate Law for Paralegal Studies (3 cr.) P: Y211 and Y221. This course reviews legal rules and procedures concerning the transfer of property upon the owner's demise. Provides a practical approach to the language, procedures, forms, interpretation, and administration of wills and trusts. Emphasis on current trends in Indiana and federal law. PUL=4

POLS-Y 230 Bankruptcy Law for Paralegal Studies (3 cr.) P: Y211 and Y221. Examines the legal rules relating to bankruptcy. PUL=4

POLS-Y 231 Advanced Legal Writing for Paralegal Studies (3 cr.) P: Y211 and Y221. Builds on Y221 by giving students the opportunity for advanced study of research and communication skills needed for paralegals. PUL=1A

POLS-Y 232 Professional Responsibility for Paralegals (3 cr.) P: Y211 and Y221. This course is a concentrated study of legal ethics from the perspective of the paralegal. It covers the study of ethical situations, rules and model codes of the paralegal profession, conflict of interest, client confidentiality, and other ethical dilemmas. The course presents a concrete, practical approach to the ethical challenges for paralegals. PUL=4

POLS-Y 233 Business Associations for Paralegals (3 cr.) P: Y211 and Y221.Introduction to various business entities, including sole proprietorships, partnerships, corporations, and other entities. Drafting partnership agreements and incorporation documents. Introduction to tax considerations and the Securities and Exchange Commission. PUL=4

POLS-Y 485 Field Experience in Paralegal Studies (1-5 cr.) A course that allows paralegal stduents to ernoll in a legal intesnhip for credit. Students will work with various employers and agencies. PUL=3

Philanthropic Studies (PHST)

PHST-P 901 Advanced Research (6 cr.)

PHST-P 105 Giving and Volunteering in America (3 cr.) This introductory course, designed as a general education course in the humanities, for non-majors encourages students to reflect on their past and current experiences with giving and volunteering. Students will be introduced to the historical, philosophical, and literary traditions of America philanthropy and will be encouraged to apply these traditions to their own lives, service experiences, educational and professional goals, and visions for a better world. One component of the course involves a service-learning experience and reflective essay. PUL=6; RISE=S

PHST-P 201 Introduction to Philanthropic Studies (3 cr.) This course explores the issues and values surrounding philanthropy and nonprofit organizations as they have developed in history, as they shape contemporary formal study of philanthropy, and as an important part of students'

personal, intellectual, and professional lives. One component of the course involves a service-learning experience and reflective essay. PUL=5; RISE=S

PHST-P 210 Philanthropy and the Social Sciences (3 cr.) This course draws from the social sciences and offers an introduction to the analytical approaches and perspectives that these disciplines bring to bear upon the study of philanthropy. The course surveys the issues and diverse roles played by voluntary action and philanthropic organizations in society, as well as the problems and questions that shape social science research on understanding and improving the practice of philanthropy. PUL=5

PHST-P 211 Philanthropy and the Humanities (3 cr.) This course draws from the humanities (including the arts, history, literature, philosophy, and religion) to address the question of responsible action in philanthropy. To whom or to what should a philanthropist be responsible? How should philanthropic action be done? Readings and discussions will involve and analysis of values, goals, purposes, moral claims, and aspirations that sometimes compete, conflict, or coexist uneasily in philantrhopic action and organizations. PUL=6

PHST-P 212 Philanthropy and Civic Engagement (3 cr.) Using insights from history, economics, political science, and public policy analysis, this course examines the nature and scope of philanthropic giving, volunteering, and advocacy in the United States, the ideas and forces that have shaped its character and growth, and the issues it presents within democratic society. What contributions do philanthropy, voluntary and collective action,, and nonprofit organizations, make to American society? How does American society influence the size and scope of philanthropy and the voluntary sector? PUL=1; RISE=E

PHST-P 301 The History of and Contemporary Approaches to Philanthropy (3 cr.) This course provides an historical context to explore contemporary approaches to philanthropy and civil society in the United States. Topics will include the social, political, and cultural conditions, as well as the patterns and current expressions of philanthropy. Key historical documents and events will be examined to understand why philanthropy exist in American society, how philanthropy has remained constant or changed over time, contemporary approaches, and similarities or differences with other cultural contexts. PUL=2

PHST-P 330 Topics in Philanthropic Studies (3 cr.) This variable topics course introduces students to the philanthropic tradition in American culture and involves students through active participation in philanthropy. Students explore values, traditions, and social frameworks surrounding philanthropy in American history, discuss current issues related to giving, volunteerism, and the nonprofit sector, and reflect upon their personal service experiences and commitment to working with others to advance the common good. Students are actively engaged through service-learning or experiential learning. PUL=2; RISE=S

PHST-P 375 Philanthropy, Calling, and Community (3 cr.) This course explores the intersections and overlaps among the concepts of calling, community, and the public responsibility of citizens and professionals in a democracy to work together towards the common good. The readings from philosophical and cultural traditions, as well as historical and contemporary biographies, provide the groundwork for students to develop their ideas and have informed deliberations about their personal values, vocation, and commitment to making a difference in the world through their career, profession, or personal lives. PUL=6

PHST-P 401 Ethics and Values in Philanthropy (3 cr.) This course provides an exploration of the ethical dilemmas and values that arise from philanthropy in contemporary society. The course readings will generate questions and inform discussion on issues such as: What is philanthropy and does it always seek the common good? When is philanthropic activity appropriate or inappropriate? What would it mean for individuals and communities to live philanthropically? Can the perspective of great writers enhance our appreciation and understanding of the value and complexity of philanthropic traditions in modern society? PUL=6

PHST-P 430 Topics in Philanthropic Studies (3 cr.) This variable topics course focuses in depth on a particular topic related to the historical or contemporary context(s) for philanthropy. Students explore and critically examine various contextual and cultural approaches for philanthropic action. Through independent research, students further their inquiry into the topic and generate new ideas related to improving philanthropy and its practice. PUL=4; RISE=R

PHST-P 450 Capstone Seminar in Philanthropic Studies (3 cr.) This course will assist graduating seniors to synthesize and demonstrate substaintial knowledge and understanding in their major. Students will integrate what they have learned in Philanthropic Studies and prepare for their future careers, as they interact with professionals in the field and other students who are completing majors in Philanthropic Studies. PUL=4

PHST-P 490 Internship in Philanthropic Studies (3 cr.) This course gives students the opportunity to apply theory to practice within a nonprofit organization. Students work with a host organization and a faculty advisor to develop a meaningful experience in their areas of interest, such as fundraising, marketing, communications, program development, board development, or volunteer coordination.. Students complete a portfolio that includes a learning contract, structured reflections on their experiences, and products developed through the internship. PUL=3; RISE=E

PHST-P 501 The Philanthropic Tradition (3 cr.) This interdisciplinary course examines the core values of philanthropy and the principal patterns of philanthropic behavior and organization with particular emphasis on the Western tradition and its American adaptation.

PHST-P 521 The Nonprofit and Voluntary Sector (3 cr.) Students examine issues of why people organize, give, and donate time; theories of the sector; policy formulation in the sector, etc., with the objective of becoming “philanthropically literate.” The preferred first course in the MA program.

PHST-P 523 Civil Society and Philanthropy (3 cr.) The course explores the relationship of civil society to the state, how the nonprofit sector affects the state, and how the state regulates the sector. A continuing theme is how and whether the state and philanthropic institutions make civil investments in strengthening civil society.

PHST-P 530 Topics in Philanthropic Studies (3 cr.) In-depth study of selected topics and issues in philanthropic studies. Specific topics vary by semester. Course may be repeated once for credit with a different course topic.

PHST-P 535 Law of Nonprofit Organizations (3 cr.) This seminar examines aspects of the legal regulation of nonprofit organizations. Topics include the formation, operation, and governance of nonprofit organizations, duties and liability of officers and directors, charitable solicitation, tax-exempt status for public benefit and mutual benefit organizations, charitable contributions, political activities, foundations, membership organizations, and religious organizations.

PHST-P 555 Readings in Philanthropic Studies (1-4 cr.) P: Permission of the Director A tutorial course involving in-depth study and analysis of a specific topic in philanthropic studies, by arrangement with the instructor.

PHST-P 558 Principles and Practices of Fundraising (3 cr.) The course covers the salient aspects of the fundraising process as organized carried out by nonprofit organizations – its base of core values, preparing a case for philanthropic support, relevant techniques and strategies, assessing potential sources of support, effective engagement of human resources, and process management. The course includes relevant theory to undergird practice, examination and analysis of current practice, proposal of practice standards, and discussion and examination of ethical problems in fundraising.

PHST-P 590 Internship in Philanthropic Studies (3 cr.) A course for the advanced student of philanthropy. Students work 10 hours per week for a voluntary association, applying knowledge gained in earlier courses to practical situations. Requirements generally include a journal and a substantial paper.

PHST-P 600 M.A. Thesis in Philanthropic Studies (3 or 6 cr.)

PHST-P 602 Qualitative Methods for Third Sector Research (3 cr.) This course examines the organization, design, and execution of multi-method, qualitative research with a special emphasis on third sector contexts. Specific tools for research, such as observation, interview, case study design, and document analysis will be examined through course readings, discussion, and the conduct of student projects.

PHST-P 660 Ethical, Moral, and Religious Aspects of Philanthropy (3 cr.) This doctoral seminar focuses on the major ethical and moral texts that explain and justify philanthropy. Emphasis is placed on the philosophy of philanthropy in comparative perspective, world traditions of social and religious conditions, and moral issues raised in philanthropic practice.

PHST-P 662 Historical and Cultural Perspectives of Philanthropy (3 cr.) This doctoral seminar focuses on the history of Philanthropy from earliest to contemporary times. Cross-cultural perspectives are considered as socially and historically conditioned. Ethnic and gender philanthropy are examined across geographic, cultural, and chronological periods.

PHST-P 664 Philanthropy and Nonprofit Organizations in Society (3 cr.) Social, psychological, political, and economic theories are used to explain philanthropy and the practice of philanthropy through organizations in society. Major theoretical concepts such as contract failure, social origins theory, voluntary failure, and serial reciprocity presented along with other.

PHST-P 690 Research in Philanthropic Studies (1-3 cr.) P: One semester of M.A. course work. Students will research specialized topics related to philanthropic studies agreed upon with the instructor from and in their chosen disciplinary perspective. In some instances, team research may be carried out. The course may be repeated once with approval by the chair of philanthropic studies.

PHST-P 790 Research Seminar in Philanthropic Studies (3 cr.) This doctoral seminar examines epistemological issues and tools, synthesizes the ways of knowing, and assesses forces that affect the conduct and use of knowledge in philanthropic studies. Multiple disciplinary perspectives and contemporary theoretical foundations of philanthropic studies are used to design and critique potential dissertation projects.

PHST-P 890 Doctoral Dissertation (1-12 cr.) Research and writing dissertation.

Philsophy (PHIL)

Graduate Courses

PHIL-P 503 The Semiotics of C. S. Peirce (3 cr.) A rigorous initiation to Peirce's logic of signs, including his theory of knowledge, his categoriology, his definitions and classifications of signs, the three branches of semiotics, with an applied research component.

PHIL-P 507 American Philosophy and the Analytic Tradition (3 cr.) An overview of the development of American philosophy during the twentieth century with a special focus on its contribution to and influence on the American analytic tradition. This course will discuss the views of people like Lewis, Morris, Carnap, Quine, Davidson, Rorty, Putnam, and Haack.

PHIL-P 514 Pragmatism (3 cr.) This course will examine what pragmatism stood for in its formative years and what it has become; then after studying some conflicting views of well-known pragmatists we will consider what pragmatism might become. Part of the course is devoted to the contributions of pragmatism to different areas within philosophy.

PHIL-P 520 Philosophy of Language (3 cr.) Advanced study of selected topics.

PHIL-P 522 Topics in the History of Modern Philosophy (3 cr.) Selected topics from the philosophies of one or more of the following: Continental rationalists (Descartes, Spinoza, Leibniz), British empiricists (Locke, Berkeley, Hume), and Kant. May be repeated twice with consent of instructor(s).

PHIL-P 525 Topics in the History of Philosophy (3 cr.) An advanced study of important themes or major figures in the history of philosophy. May be repeated for credit if topics vary.

PHIL-P 540 Contemporary Ethical Theories (3 cr.) Fundamental problems of ethics in contemporary analytic philosophy from G. E. Moore's Principia Ethica to present.

PHIL-P 542 The Ethics and Values of Philanthropy (3 cr.) An inquiry into the ethics and values of philanthropy rooted in a general understanding of philanthropy, as voluntary action for the public good, as an ethical ideal. A consideration of philanthropic activity in light of this ideal.

PHIL-P 543 Contemporary Social and Political Philosophy (3 cr.)

PHIL-P 545 Legal Philosophy (3 cr.) An introduction to major legal philosophers and fundamental legal philosophical questions.

PHIL-P 547 Foundations of Bioethics (3 cr.) A rigorous examination of bioethical theory and practice. Stress is placed on moral and conceptual issues embedded in biomedical research, clinical practice, and social policy relating to the organization and delivery of health care.

PHIL-P 548 Clinical Ethics Practicum (3 cr.) This course provides learning experiences in a clinical setting, enabling students fully to appreciate ethical issues that face health care professionals. The course is administered through the Fairbanks Center for Medical Ethics at IU Health.

PHIL-P 549 Bioethics and Pragmatism (3 cr.) This course provides a critical examination of recent contributions by American philosophers to bioethics. The course will have a strong focus on a growing group of thinkers who seek their inspiration in Dewey, James, Peirce, Royce, and Mead, while dealing with contemporary issues in medical ethics.

PHIL-P 553 Philosophy of Science (3 cr.) A study of theories with regard to the nature, purpose, and limitations of science. Attention will be given to the cognitive significance of theories, the scientific method (hypothesis formation, theory construction, and testing), research paradigms, reductionism, and social epistemology.

PHIL-P 554 Practicing International Research in Ethics (3 cr.) The Practicum in International Research Ethics involves a combination of observation and discussion with mentors while conducting an individual research project that will serve as the capstone for the student's master's degree.

PHIL-P 555 Ethical and Policy Issues in International Research (3 cr.) This course examines ethical and policy issues in the design and conduct of transnational research involving human participants. Topics discussed include: economic and political factors; study design; the role of ethics review committees; individual and group recruitment/informed consent; end-of-study responsibilities; national and international guidelines.

PHIL-P 558 American Philosophy (3 cr.) A general overview of the most significant contributions of American philosophers, such as Emerson, Thoreau, Peirce, James, Dewey, Santayana, Mead, Jane Addams, Alain Locke.

PHIL-P 560 Metaphysics (3 cr.) In-depth discussion of representative contemporary theories.

PHIL-P 562 Theory of Knowledge (3 cr.) Advanced study of selected topics.

PHIL-P 590 Intensive Reading (1-4 cr.) A tutorial course involving in-depth consideration of a specific philosophical area or problem or author. May be repeated for credit.

PHIL-P 600 Topics in Philosophy (3 cr.) A detailed examination of a specific topic in philosophy. May be repeated for credit if topics vary.

PHIL-P 650 Topics in Semiotic Philosophy (3 cr.) An examination of various historical and theoretical issues arising from the philosophical study of semiosis—the general phenomenon of representation, objectification, signification, and interpretation—through the work of mostly American philosophers from the late nineteenth century to the present, with an emphasis on the impact of Peirce's semiotic philosophy.

PHIL-P 696 Topics in Biomedical Ethics (3 cr.) Selected topics in bioethics, such as international research ethics; ethical issues in pediatrics; ethical issues in genetics. May be repeated for credit if topics vary.

PHIL-P 701 Peirce Seminar (3 cr.) This seminar is devoted to a critical examination of the general structure and development of Peirce's systematic philosophy with a special emphasis on those tensions in the development of his thought that led to modifications in his philosophy, and on the nature and significance of those changes.

PHIL-P 730 Seminar: Contemporary Philosophy (4 cr.) Selected topics on the works of twentieth-century philosophers. May be repeated for credit if topics vary.

PHIL-P 748 Seminar in American Philosophy (3 cr.) Advanced study of a principal philosopher or a set of selected topics in classical American philosophy. May be repeated for credit if topics vary.

PHIL-P 803 Master's Thesis in Philosophy (6 cr.)

Honors Courses

PHIL-S 110 Introduction to Philosophy—Honors (3 cr.) This course is an introduction to key philosophical concepts and issues as well as major thinkers and historical periods. PUL=4

PHIL-S 120 Ethics—Honors (3 cr.) A study of ethical values in relation to such problems as personal and societal decision making, selection and justification of lifestyle, goal orientation, conflict resolution, freedom and creativity, commitment and responsibility. PUL=6

PHIL-S 314 Philosophy and Modern Times—Honors (3 cr.) A study of one or more philosophical concepts, themes, or developments characteristic of the modern period. PUL=4

Regular Courses

PHIL-P 110 Introduction to Philosophy (3 cr.) An introduction to the methods and problems of philosophy and to important figures in the history of philosophy. Concerns such topics as the nature of reality, the meaning of life, and the existence of God. Readings from classical and contemporary sources, e.g., Plato, Descartes, Nietzsche, and Sartre. PUL=4

PHIL-P 120 Ethics (3 cr.) An introductory course in ethics. Typically examines virtues, vices, and character; theories of right and wrong; visions of the good life; and contemporary moral issues. PUL=6

PHIL-P 140 Introduction to Ethics (3 cr.) Philosophers' answers to ethical problems (e.g., the nature of good and

evil, the relation of duty to self-interest, the objectivity of moral judgments) and the applications of ethical theory to contemporary problems.

PHIL-P 162 Logic (3 cr.) A study of the principles of logic. The course covers a variety of traditional topics, selected for their practical value, within formal and informal logic. Among the topics typically covered are fallacies, syllogisms, causal hypotheses, logic diagrams, argument analysis, and truth-functional reasoning. PUL=1B

PHIL-P 222 Legal Ethics (3 cr.) Introduction to ethical principles and practices in the legal profession. PUL=6

PHIL-P 237 Environmental Ethics (3 cr.) Addresses moral issues concerning the relation between humans and the environment. Covers such topics as resource depletion, population growth, endangered ecosystems, deep ecology, and the land ethic. PUL=6

PHIL-P 265 Introduction to Symbolic Logic (3 cr.) A study of the most important and widely applicable parts of modern symbolic logic: propositional logic and predicate logic. PUL=1B

PHIL-P 280 Philosophical Problems: (variable title) (3 cr.) Concentrated treatment of an important philosophical problem. May be repeated for credit when topics vary. PUL varies with topic.

PHIL-P 329 Philosophy of Religion (3 cr.) Philosophical views regarding such topics as the meaning and purpose of religion, religious experience, religious knowledge, and the existence and nature of God. PUL=2

PHIL-P 282 Women in Philosophical Thought (3 cr.)

PHIL-P 307 Classical Philosophy (3 cr.) A study of the significant texts of ancient Greek and Roman philosophy, including the Presocratics, Plato, Aristotle, and the Hellenistic Thinkers. PUL=5

PHIL-P 314 Modern Philosophy (3 cr.) A study of Western philosophy from the rise of modern science through the Enlightenment. Covers such philosophers as Bacon, Descartes, Berkeley, Hume, Leibniz, and Kant. PUL=4

PHIL-P 316 Twentieth-Century Philosophy: (variable title) (3 cr.) A study of one or more twentieth-century approaches to philosophy, e.g., pragmatism, analytic philosophy, phenomenology, existentialism, postmodernism, and neo-Marxism. May be repeated for credit when topics vary. PUL=4

PHIL-P 317 Nineteenth-Century Philosophy (3 cr.) A historical survey of philosophy in the nineteenth century from Hegel to Nietzsche, including utilitarianism, positivism, and philosophies of evolution. PUL=4

PHIL-P 322 Philosophy of Human Nature (3 cr.) Theories of human nature and their philosophical implications. PUL=2

PHIL-P 323 Society and State in the Modern World (3 cr.) Topics, issues, and key figures in modern political philosophy, e.g., distributive justice, state authority, and the political thought of Hobbes, Locke, Rousseau, Mill, Marx, and Rawls. PUL=5

PHIL-P 325 Social Philosophy: (variable title) (3 cr.) Concentrated study of one or more topics in social philosophy, e.g., human rights, political violence, civil disobedience, and legal paternalism. May be repeated for credit when topics vary. PUL=5

PHIL-P 326 Ethical Theory (3 cr.) A variable title course. Advanced consideration of one or more ethical theories or theoretical issues about the nature and status of ethics. PUL=2

PHIL-P 328 Philosophies of India (3 cr.) Historical and critical-analytic survey of the major traditions of Indian philosophy. Attention to early philosophizing and the emergence of classical schools in Hindu, Buddhist, and Jain traditions. Attention also to contemporary thought in India and its influence on the West. PUL=5

PHIL-P 331 Philosophy of Science (3 cr.) An introductory study of theories with regard to the nature, purpose, and limitations of science. PUL=4

PHIL-P 334 Buddhist Philosophy (3 cr.) An examination of the basic philosophical concepts of early Buddhism and their subsequent development in India, Japan, and Tibet. Implications of the Buddhist view of reality for knowledge, the self, and ethical responsibility will be explored. PUL=4

PHIL-P 348 Philosophy and Literature (3 cr.) A study of philosophical issues raised by and in literature. Special emphasis on reading works of literature as texts of philosophical interest. PUL=5

PHIL-P 349 Philosophies of China (3 cr.) A study of Chinese philosophical traditions, typically including Confucianism, Taoism, Legalism, and Chinese Buddhism. PUL=5

PHIL-P 355 Philosophy of Film (3 cr.) Philosophic topics, themes, and issues raised by and in film. Special emphasis on viewing film as a visual text with philosophical import. PUL=5

PHIL-P 356 American Indian Philosophies (3 cr.) An examination of the philosophical views, themes, and implications of North American Indian traditions, with applications to variety of cross-cultural and philosophical issues. PUL=5

PHIL-P 365 Intermediate Symbolic Logic (3 cr.) P: P265. Topics in metalogic, set theory, and modal logic. PUL 1B

PHIL-P 367 Philosophy of Art (3 cr.) A study of fundamental concepts and theories of aesthetics and a philosophical exploration of major artistic movements and genres. PUL=6

PHIL-P 368 Philosophy of Language (3 cr.) Philosophical study of the nature and functions of language. Covers such topics as meaning and truth, theories of reference, linguistic relativity, and speech acts. PUL=4

PHIL-P 369 Epistemology (3 cr.) Knowledge and justified belief: their nature, structure, sources, and limits. PUL=4

PHIL-P 382 Philosophy of History (3 cr.) An analysis of some of the philosophical problems implicit in the study of history, such as the possibility of historical objectivity, and

a survey of influential interpretations of history from Augustine to Heidegger. PUL=5

PHIL-P 383 Topics in Philosophy: (variable title) (3 cr.) Advanced treatment of a special topic. May be repeated for credit when topics vary. PUL will vary with topic.

PHIL-P 385 Metaphysics (3 cr.) A study of several of the principal problems of metaphysics, such as identity through time, the self, the mind-body problem, freedom and determinism, fate, causation, the problem of universals, and the existence of God. PUL=4

PHIL-P 393 Biomedical Ethics (3 cr.) A philosophical consideration of ethical problems that arise in current biomedical practice, e.g., with regard to abortion, euthanasia, determination of death, consent to treatment, and professional responsibilities in connection with research, experimentation, and health care delivery. PUL=6

PHIL-P 394 Feminist Philosophy (3 cr.) A study of one or more philosophical topics in feminist thought. Examples: feminist ethics; feminist critiques of science; and feminist perspectives on motherhood, sexuality, and reproductive technology. PUL=5

PHIL-P 414 Philosophy and Culture (3 cr.) In-depth consideration of a topic involving the interrelationship between philosophy and culture. May be repeated for credit. PUL=5

PHIL-P 418 Seminar in the History of Philosophy: (variable title) (3 cr.) Intensive study of a philosopher or philosophical school of enduring importance. May be repeated for credit when topics vary. PUL=4

PHIL-P 448 Seminar in American Philosophy (3 cr.) An intensive study of a major American thinker, such as Edwards, Royce, James, Peirce, Dewey, Whitehead or Santayana, or of a leading theme, such as community, experience, or education. May be repeated for credit. PUL=4

PHIL-P 458 American Philosophy (3 cr.) A study of the philosophical tradition in the United States, emphasizing major thinkers such as Emerson, Peirce, James, Royce, Dewey, Santayana, and C. I. Lewis. PUL=4

PHIL-P 468 Seminar in the Philosophy of Mind (3 cr.) An in-depth study of some particular problem of current concern in the philosophy of mind. May be repeated for credit when topics vary. PUL=3

PHIL-P 488 Research in Philosophy I (1-4 cr.) P: 9 credit hours of philosophy and consent of instructor. Independent research in philosophical theory approved by and reported to any member of the department. May be repeated for credit, but no more than 6 credit hours may be counted toward the major. PUL=4

PHIL-P 489 Research in Philosophy II (1-4 cr.) P: 9 credit hours of philosophy and consent of instructor. Independent research in applied philosophy approved by and reported to any member of the department. May be repeated for credit, but no more than 3 credit hours may be counted toward the major. PUL=4

Political Science (POLS)

POLS-Y 101 Introduction to Political Science (3 cr.) For any student interested in better understanding the political world in which we live. The course explains some fundamental political concepts such as power, conflict, authority, and governments. It may also include an overview of the major subfields of political science: comparative politics, international relations, political theory, and public policy. PUL=3

POLS-Y 103 Introduction to American Politics (3 cr.) Introduction to the nature of government and the dynamics of American politics. Origin and nature of the American federal system and its political party base. PUL=3

POLS-Y 205 Elements of Political Analysis (3 cr.) An introduction to techniques used by people interested in the systematic study of political science. The course includes an introduction to the quantitative analysis of political data. PUL=1B

POLS-Y 211 Introduction to Law (3 cr.) An introduction to law as an aspect of government and politics, and as a means for dealing with major social problems. Students will study legal reasoning, procedures, and materials, and may compare other nations legal systems. The course usually includes a moot court or other forms of simulation. PUL=2

POLS-Y 213 Introduction to Public Policy (3 cr.) Studies the processes and institutions involved in the formation of public policy with particular reference to the United States. The course will identify key policy actors, analyze the process of policy making, and critically assess selected policy issues (such as foreign, defense, economic, welfare, and environmental policy). PUL=2

POLS-Y 215 Introduction to Political Theory (3 cr.) An introduction to major ideas and theories in Western political thought, including theories of democracy and the analysis of conflict and cooperation. The course also addresses the attempts made by prominent political philosophers—from Aristotle and Plato to Locke, Marx, and Rawls—to understand and describe the nature of politics. PUL=6

POLS-Y 217 Introduction to Comparative Politics (3 cr.) A course that introduces students to the major political systems of the world. Students will look at different system types; examine in depth particular countries as case studies such as Britain, Russia, and Mexico; and compare executives, legislatures, elections, political parties, interest groups, and key areas of public policy. PUL=5

POLS-Y 219 Introduction to International Relations (3 cr.) An introduction to the global political system and issues that shape relations among countries. The course looks at problems of conflict resolution, the role of international law and organizations, the challenges of poverty and development, and the other major policy issues over which nations cooperate, argue, or go to war. PUL=5

POLS-Y 301 Political Parties and Interest Groups (3 cr.) Theories of American party activity; behavior of political parties, interest groups, and social movements; membership in groups; organization and structure; evaluation and relationship to the process of representation. PUL=1C

POLS-Y 303 Policy-Making in the US (3 cr.) Processes and institutions involved in the formation of public policy in American society. PUL=3

POLS-Y 304 Constitutional Law, and Constitutional Rights and Liberties (3 cr.) Nature and function of law and judicial process; selected Supreme Court decisions interpreting the American constitutional system. PUL=3

POLS-Y 305 Constitutional Law, and Constitutional Rights and Liberties (3 cr.) Nature and function of law and judicial process; selected Supreme Court decisions interpreting the American constitutional system. PUL=3

POLS-Y 306 State Politics in the United States (3 cr.) Comparative study of politics in the American states. Special emphasis on the impact of political culture, party systems, legislatures, and bureaucracies on public policies. PUL=3

POLS-Y 307 Indiana State Government and Politics (3 cr.) Constitutional foundations, political development, organizational and functional process and growth, and current problems of Indiana government. Readings, case studies, problems. PUL=3; RISE=S

POLS-Y 308 Urban Politics (3 cr.) Political behavior in modern American communities; emphasizes the impact of municipal organization, city officials and bureaucracies, social and economic notables, political parties, interest groups, the general public, and protest organizations on urban policy outcomes. PUL=2

POLS-Y 309 American Politics through Film and Fiction (3 cr.) Recurrent themes of politics are explored in depth by means of novels, short stories, and films. Subject matter varies by semester—check class schedule for current semester. PUL=1C

POLS-Y 310 Political Behavior (3 cr.) A research course in which students design and execute their own investigations into political phenomena. PUL=1C

POLS-Y 313 Environmental Policy (3 cr.) Examines the causes of environmental problems and the political, economic, social, and institutional questions raised by designing and implementing effective policy responses to these problems. PUL=3

POLS-Y 317 Voting, Elections, and Public Opinion (3 cr.) Determinants of voting behavior in elections. The nature of public opinion regarding major domestic and foreign policy issues; development of political ideology; other influences on the voting choices of individuals and the outcomes of elections; relationships among public opinion, elections, and the development of public policy. PUL=1C

POLS-Y 318 The American Presidency (3 cr.) This course examines the evolution of the presidency and its impact on the rest of the American political system. Students will study presidential selection, succession, and powers, the president's relationship to the rest of the government, and the legacy of presidents from George Washington to George W. Bush. PUL=3

POLS-Y 319 The United States Congress (3 cr.) This course offers students the opportunity to study the legislative branch of American national government. It includes the structure and processes of the Senate and House of Representatives; the role of parties, interest groups, and lobbyists; the legislative process; and the relations of Congress with the other branches of government. PUL=3

POLS-Y 320 Judicial Politics (3 cr.) Examines the American judicial system in the contemporary context. Analysis of the trial and appellate courts with a focus on the United States Supreme Court. Topics include analyses of the structure of the judicial system, the participants in the system, and the policy-making processes and capabilities of the legal system. The course concludes with an assessment of the role of courts in a majoritarian democracy. PUL=3

POLS-Y 321 The Media and Politics (3 cr.) Examines the contemporary relationship between the media and politics, including politicians' use of the media, media coverage of governmental activities, and media coverage of campaigns and elections. Course focuses primarily on the United States, but includes comparative perspectives. PUL=1C

POLS-Y 324 Women and Politics (3 cr.) Analysis of women in contemporary political systems, domestic or foreign, with emphasis on political roles, participation, and public policy. Normative or empirical examination of how political systems affect women and the impact women have on the system(s). PUL=3

POLS-Y 332 Russian Politics (3 cr.) Political process and government structure in the Russian state. Political institutions inherited from tsarist empire and the Soviet state (1917–1991), history of subsequent political reform. Political problems of ethnic conflict, creating democratic institutions, and transition from socialism to market economy. PUL=3

POLS-Y 335 West European Politics (3 cr.) Development, structure, and functioning of political systems, primarily in Britain, France, Italy, and Germany. Political dynamics of European integration. PUL=5

POLS-Y 336 Southeast Asian Politics (3 cr.) Covers the governmental organization, and the political behavior and traditions, of countries in the Southeast Asian region. Addresses regional issues of political and economic development, and international issues regarding the relationship of the region to the rest of the world. PUL=3

POLS-Y 337 Latin American Politics (3 cr.) Comparative analysis of political change in major Latin American countries, emphasizing alternative explanations of national and international developments; examination of impact of political parties, the military, labor and peasant movements, Catholic church, multinational corporations, regional organizations, and United States on politics; public policy processes in democratic and authoritarian regimes. PUL=3

POLS-Y 338 African Politics (3 cr.) Politics in contemporary sub-Saharan Africa. Topics include processes of nation building, dependency and underdevelopment; role of political parties, leadership, ideology, and military rule; continuing relevance of colonial heritage and traditional culture and network of international relations. PUL=3

POLS-Y 339 Middle Eastern Politics (3 cr.) Political culture and change in selected Middle Eastern and North African countries. Topics include political elites, traditional cultures, modern political ideology, institutions of political control, conflict management, and social reform policies.

POLS-Y 351 Political Simulations (1-3 cr.) A course tied to simulations of political organizations such as the European Union, the United Nations, or the Organization of American

States. May be taken alone or in conjunction with related political science courses. May be repeated for credit. PUL=3; RISE=E

POLS-Y 360 U.S. Foreign Policy (3 cr.) Analysis of institutions and processes involved in the formation and implementation of American foreign policy. Emphasis is on post–World War II policies. PUL=3

POLS-Y 373 The Politics of Terrorism (3 cr.) Examines the definition, history, logic, and political implications of terrorism. PUL=3

POLS-Y 375 War and International Conflict (3 cr.) This course examines the causes and effects of war and international conflict, historically and comparatively. PUL=3

POLS-Y 377 Globalization (3 cr.) A course that investigates the economic, environmental, financial, political, security, and technological aspects of globalization. PUL=3

POLS-Y 380 Selected Topics in Democratic Government: (variable title) (3 cr.) An examination of basic problems and issues in the theory and practice of democratic government. Specific topics vary by semester. May be repeated once for credit. PUL=3

POLS-Y 381 Classical Political Thought (3 cr.) An exposition and critical analysis of the major political philosophers and philosophical schools from Plato to Machiavelli. PUL=6

POLS-Y 382 Modern Political Thought (3 cr.) An exposition and critical analysis of the major philosophers and philosophical schools from Machiavelli to the present. PUL=6

POLS-Y 383 Foundations of American Political Thought (3 cr.) American political ideas from the founding period to the Civil War. PUL=6

POLS-Y 384 Development of American Political Thought (3 cr.) American political ideas from the Civil War to the present. PUL=6

POLS-Y 390 Political Communication (3 cr.)

POLS-Y 392 Problems in Contemporary Political Philosophy (3 cr.)

POLS-Y 480 Undergraduate Readings in Political Science (1-6 cr.) Individual readings and research. PUL=3

POLS-Y 481 Field Experience in Political Science (3-6 cr.) Faculty-directed study of aspects of the political process based on field experience. Directed readings, field research, research papers. PUL=3; RISE=E

POLS-Y 490 Senior Seminar (3 cr.) Open only to senior majors. Research paper required. Seminar sessions arranged to present papers for evaluation and criticism by fellow students. Subject matter varies by semester. PUL=4

POLS-Y 498 Readings for Honors (1-6 cr.) Open only to senior majors in the department who have at least a 3.3 grade point average within the major; approval of department is required. Course involves an intensive individual program of reading and/or research. PUL=3

POLS-Y 570 Introduction to the Study of Politics (3 cr.) Problems of graduate study and professional scholarship; central organizing concepts and the use of theory in political science and related disciplines; specialized areas of research and scholarship in political science; conditions of scientific inquiry and methodological problems in the study of political phenomena; central importance of theory in explanation.

POLS-Y 575 Political Data Analysis I (3 cr.) Basic quantitative analysis techniques applied to political science data: principles of measurement, tables, graphs, probability distributions, nonparametric statistics, matrix algebra, Markov chains, correlations and simple regression, tests of significance. Computer processing of data and applications of bivariate statistics to problems in political science emphasized.

POLS-Y 580 Research Methods in Political Science (3 cr.) Foundations of political research; alternate research strategies; problems of measuring political variables; design of research to test hypotheses.

POLS-Y 620 State Politics (3 cr.) An examination of the institutions and processes by which state governments carry out their responsibilities. Includes the study of executives, legislatures, parties, and elections at the state level.

POLS-Y 622 Urban Politics (3 cr.) An examination of the structure of—and the problems and challenges faced by—the governments of cities and metropolitan areas. Includes study of leadership, citizen participation, intergovernmental relations, and urban policy.

POLS-Y 624 Indiana Politics (3 cr.) This seminar reviews contemporary scholarship on the development context, structure, and operation of Indiana government and politics. It places Indiana politics into both a historical and comparative perspective to see how Indiana politics have changed over time and how they compare to politics in other states.

POLS-Y 630 State Executive Politics (3 cr.) A course that examines the role of governors in state politics. Includes the study of leadership and the relationship between the executive and other elements of government at the sub-national level.

POLS-Y 640 State Parties and Interest Groups (3 cr.) An examination of political parties and interest groups, their roles in government, and their structure and organization.

POLS-Y 642 Comparative Federalism (3 cr.) A course that places federalism in its comparative context. Assessing theories and models of federalism in North America, Europe, Asia, and other parts of the world.

POLS-Y 661 American Politics (3 cr.) Illustrative topics: the presidency, legislative process, political behavior, political parties and representation, political socialization, comparative state politics, urban politics, interest group politics.

POLS-Y 680 Readings in Political Science (1-4 cr.) Individual readings and research.

POLS-Y 880 Thesis M.A. (1-4 cr.) Credit hours for thesis research and writing.

POLS-Y 881 Internship in Political Science (3 cr.) A course in which students complete an internship for credit with a government (or related) institution. RISE=E

Religious Studies (REL)

REL-R 100 Studies in Religion (3 cr.) Select introductory issues in religion. Interdisciplinary in emphasis. May be repeated for up to 9 credit hours under different titles. PUL=5

REL-R 111 The Bible (3 cr.) A critical introduction to the major periods, persons, events, and literatures that constitute the Bible; designed to provide general humanities-level instruction on this important text. PUL=5

REL-R 120 Images of Jesus (3 cr.) This course is designed to introduce students to the variety of traditions about the figure of Jesus. It will acquaint students with the wide array of images of the Jesus character through a historical analysis of these images portrayed in texts, art, music, film, and TV. PUL=5

REL-R 133 Introduction to Religion (3 cr.) Introduction to the diversity of traditions, values, and histories through which religion interacts with culture. Emphasis on understanding the ways the various dimensions of religion influence people's lives. PUL=5

REL-R 167 Introduction to Tribal Religions (3 cr.) Introduction to Tribal Religions is a Lower Division course designed to acquaint students with tribal religions of the world with a focus on the earliest religious traditions. PUL=5

REL-R 173 American Religion (3 cr.) A consideration of American religion, with particular emphasis on the development of religious diversity and religious freedom in the context of the American social, political, and economic experience. PUL=5

REL-R 180 Introduction to Christianity (3 cr.) Survey of beliefs, rituals, and practices of the Christian community with a focus on the varieties of scriptural interpretation, historical experience, doctrine, and behavior. PUL=5

REL-R 200 Studies in Religion (3 cr.) Select intermediate studies in religion. Interdisciplinary studies emphasized. May be taken for up to 9 credit hours under different titles. PUL=5

REL-R 204 Religions in Africa (3 cr.) Introduces students to the diversity of religious traditions in Africa. Focusing on the historical development of Africa's triple religious heritage, we examine African traditional religions, Christianity, and Islam. Special emphasis will be placed on African religious heritage in the modern era. PUL=5

REL-R 212 Comparative Religions (3 cr.) Approaches to the comparison of recurrent themes, religious attitudes, and practices found in selected Eastern and Western traditions. PUL=5

REL-R 223 Religion and Imagination (3 cr.) Introductory studies of the nature, function, and significance of myths, symbols, and images in religious and cultural systems, with examples drawn from various traditions and with special attention devoted to their relationships to the contemporary imagination. PUL=5

REL-R 243 Introduction to the New Testament (3 cr.) An introduction to the modern critical study of the New Testament from primarily a historical perspective. The goal is to learn to view these diverse Christian writings within the context of their historical and social settings. PUL=5

REL-R 257 Introduction to Islam (3 cr.) Introduction to the emergence and spread of Islamic religious traditions, including the Qur'an, Islamic law and ethics, and Islamic mysticism before 1500CE. Special emphasis on the creation in the middle ages of an international Islamic civilization—stretching from Mali to Indonesia—linked by trade, learning, and pilgrimage. PUL=5

REL-R 300 Studies in Religion (3 cr.) Selected topics and movements in religion, seen from an interdisciplinary viewpoint. May be taken for up to 9 credit hours under different titles. PUL=5

REL-R 301 Women and Religion (3 cr.) A critical examination of the roles of women in religion, looking at a range of periods and cultures in order to illustrate the patterns that characterize women's participation in religious communities and practices. PUL=5

REL-R 304 Islamic Beginnings (3 cr.) An in-depth examination of the classical period of Islamic history, including coverage of the Prophet Muhammad, the development of Islamic religious literature and institutions, and the creation of international Muslim networks of trade, pilgrimage, and law. PUL=5

REL-R 305 Islam and Modernity (3 cr.) This course examines the issues and events that have shaped Muslims' understanding of the place of Islam in the modern world. It focuses on the way Muslim thinkers have defined the challenge of modernity-politically, technologically, socially and religiously-and the responses that they have advocated. PUL=5

REL-R 309 Contemporary Middle East (3 cr.) An interdisciplinary introduction to the contemporary Middle East, taught in Amman, Jordan, during summer study abroad. In addition to readings and lectures, students learn from speaking with Jordanian activists, politicians, religious leaders, educators, restaurant owners, journalists, refugees, students, and cabdrivers, among others. Field trips to mosques, markets, and more. PUL=5

REL-R 310 Prophecy in Ancient Israel (3 cr.) The prophetic movement and its relationship to religious, social, and political traditions and institutions in the ancient Near East. The thought of major prophetic figures in Israel, such as Hosea, Isaiah, Jeremiah, and Ezekiel. PUL=5

REL-R 312 American Religious Lives (3 cr.) A study of selected persons who shaped the religious ideas and practices of the American people. The course correlates the lives, ideas, and social contexts of influential religious leaders in the United States. Figures such as Jonathan Edwards, Abraham Lincoln, Dorothy Day, Isaac M. Wise, and Martin Luther King Jr. will be included. PUL=5

REL-R 313 Religion and American Ideas (3 cr.) Studies of the major figures and works of the American literary and theological traditions, with a focus on the ways the literary imagination has variously expressed, explored, and challenged the religious meanings of the American experience. PUL=5

REL-R 314 Religion and Racism (3 cr.) Explores the interaction of religion and racism. Selected case studies may include the Bible and racism, racial reconciliation among

evangelical Christians, the Ku Klux Klan in Indiana, and Islamophobia. PUL=5

REL-R 315 Hebrew Bible (3 cr.) A critical examination of the literary, political, and religious history of Israel from the period of the Patriarchs to the Restoration, with emphasis on the growth and formation of the major traditions contained in the Hebrew Bible. PUL=5

REL-R 319 Origins of Israel (3 cr.) An investigation of the problems involved in the reconstruction of early Israelite history, religion, and society. Major emphasis on the ways in which modern scholarship has attempted to interpret the biblical traditions dealing with the Patriarchs, the exodus-Sinai events, and the settlement in the land. PUL=5

REL-R 325 Paul and His Influence in Early Christianity (3 cr.) Life and thought of Paul, in the context of first-century Christian and non–Christian movements. Development of radical Paulinism and anti-Paulinism in the second century; their influence on the formation of Christianity. PUL=5

REL-R 326 Studies in Biblical Religion (3 cr.) Examination of selected major topics in the religious traditions contained in the biblical materials. Topics such as the following will be treated: early Hebrew traditions and heroes, the kings of Israel, the development of apocalyptic literature, the period between the testaments, the development of Christology, the Johannine School, and others. May be taken twice for credit under different topics. PUL=5

REL-R 328 Afro-Diasporic Religions (TBD cr.) Surveys the origin, history, organizational structures, beliefs, and devotional practices of the religions that developed among African slaves and their descendants in the new world (including Brazil, Haiti, Cuba, and the United States). PUL=5

REL-R 329 Early Christianity (3 cr.) This course introduces the religious world of early Christianity by examining its formation and development. The course emphasizes intellectual history while placing religious ideas in historical, cultural, social, and economic contexts. It underscores diversity and explores how ideas shape religious faith, how religious practice guides religious thinking, and how culture and religion interact. PUL=5

REL-R 339 Varieties of American Religion (3 cr.) Approaches to the diversity and complexity of that part of American religion that has existed outside of the mainstream of U.S. church life. Emphasis on the origin, history, organizational structures, beliefs, and devotional practices of such groups as the Quakers, Shakers, Millerites and other millenarian sects, Mormons, Christian Scientists, and Pentecostals, as well as groups whose orientation is Eastern rather than Western. PUL=5

REL-R 343 Religion and Contemporary Thought (3 cr.) Contemporary religious and anti-religious thinkers, with emphasis on those whose writings have significantly influenced modern thinking about human beings, God, society, history, and ethics. PUL=5

REL-R 344 Reformations of the Sixteenth Century (3 cr.) This course introduces students to the religious reformations of sixteenth-century Europe. It examines the historical background to the Reformation and surveys a number of reformation movements. While intellectual history is emphasized, the ideas of religious thinkers are placed in broad historical, cultural, social, and economic contexts. PUL=5

REL-R 352 Religion and Literature in Asia (3 cr.) The treatment of religious issues in Asian literature (Hinduism in the Epics) or the significance of the literary forms of religious texts (the genre of recorded sayings), showing how the interplay of religious realities and literary forms reveals the dynamics of religious development in India, China, or Japan. PUL=5

REL-R 353 Judaism (3 cr.) Examination of the history of Judaism and its relationship to the Jewish special claim to chosenness. Primary emphasis placed on modern Judaism. PUL=5

REL-R 361 Hinduism and Buddhism (3 cr.) Examination of the origins and cultural developments of classical Hinduism and Buddhism through studies of selected lives and writings, religious practices, and symbolism in the arts through explorations of these two worldviews as reflected in historical, literary, and ritual forms. PUL=5

REL-R 363 African-American Religions (3 cr.) History of African American religions from the colonial era to the present. Topics may include the African influences on African American Black Methodism, Black Baptist Women's leadership, Islam, and new religious movements. PUL=5

REL-R 367 American Indian Religions (3 cr.) American Indian Religions is a course designed to explore the religious traditions of the Indian tribes of the Americas with a focus on the tribes of North America and specifically Indiana. PUL=5

REL-R 370 Islam in America (3 cr.) Explores the history and life of Islam and Muslims in the United States, including the ethnic and religious diversity of American Muslims, conflicts about gender relations and women's issues, debates about Islam's role in politics, and the spirituality of American Muslims. PUL=5

REL-R 379 Religion and Philanthropy (3 cr.) This course explores relationships between religious traditions and philanthropic ideas and activities. Selections from important traditional texts and biographical examples and similarities of a variety of religious worldviews regarding their ways of sharing goods and performing acts of service. PUL=5

REL-R 381 Religion and Violence (3 cr.) Examines the relationship between religion, violence, and society in light of recent global events, drawing on a range of classical and modern texts concerning religious justifications for non–ritualistic bloodshed. Focusing on Judaism, Christianity, and Islam, themes addressed include otherness, transgression, revenge, torture, retribution, with special attention paid to religious terrorism. PUL=5

REL-R 383 Religions, Ethics, U.S. Society (3 cr.) An examination of current ethical debates about war, medicine, discrimination, welfare, marriage, sexuality, etc. The focus will be how diverse traditions of moral reasoning have been developed and practiced within Catholicism, Protestantism, and Judaism. PUL=5

REL-R 384 Religions, Ethics, and Health (3 cr.) The positions of religious ethical traditions on issues such as the control of reproduction, experimentation with human subjects,

care of the dying, delivery of health care, physical and social environments, and heredity. May be repeated once for credit under different focus. PUL=5

REL-R 386 The Ethics of Consumption (3 cr.) What is good consumption? Do consumers have moral duties? Combining the ethical perspectives of religion and philosophy with the empirical realities of economics and public policy, this course examines the social and environmental costs of consumption while valuing individual tastes and economic incentives. Course fulfills junior-senior integrator requirement. PUL=5

REL-R 393 Comparative Religious Ethics (3 cr.) Comparisons of ethical traditions and moral lives in the world's religions. The focus will be how formative stories, exemplary figures, central virtues, ritual practices, etc., clarify different traditions' understandings of key moral issues, rights, and roles. PUL=5

REL-R 394 Militant Religion (3 cr.) Examines the various ways Jewish, Christian, and Muslim apocalyptic literature has shaped, fostered, and contributed to the current rise in global militant religion. Themes include cosmic warfare, just war traditions, jihad, ancient and modern apocalypticism, messianism, millennialism, and the new wars of religion. PUL=5

REL-R 396 Religion and Fantasy (3 cr.) This course will examine fantasy materials (texts, movies, TV shows) through the lens of the following dimensions of religion: experience, myth, ritual, doctrine, ethics, and social construction. In addition, the course will examine the construction of worldviews. Just as religions create worldviews, so, too, can literary texts, dramatic expression, and the arts. PUL=5

REL-R 397 Mormonism and American Culture (3 cr.) Introduction to the history, beliefs, and practices of the Latter-day Saints (Mormons); exploration of the Book of Mormon and other LDS scriptures; exploration of Mormonism's relationship to American culture. PUL=5

REL-R 398 Women in American Indian Religions (3 cr.) Women in American Indian Religions is a course designed to examine the roles of women in American Indian Religions and practice and the expressions of the feminine aspects in their world views. PUL=5

REL-R 400 Studies in Religion (3 cr.) P: consent of instructor. Specialized and intensive studies in religion with an interdisciplinary emphasis. May be repeated twice under different titles. PUL=5

REL-R 433 Theories of Religion (3 cr.) Theorists of religion explore the what, why, and how of religions. What is religion? Why are people religious? How do religions shape meaning in people's lives, cultures, and societies? This advanced seminar examines classical to contemporary theories. Open to all majors. Fulfills Religious Studies senior capstone. Offered fall semesters. PUL=5; Rise=R

REL-R 533 Theories of Religion (3 cr.) Graduate seminar. See R433 for course description.

REL-R 539 Religion and Philanthropy (3 cr.) This course explores relationships between religious traditions and philanthropic ideas and activities. Selections from important traditional texts and biographical examples and similarities of a variety of religious worldviews regarding their ways of sharing goods and performing acts of service.

REL-R 590 Directed Readings in Religious Studies (3 cr.)

Sociology (SOC)

Graduate Courses

SOC-R 515 Sociology of Health and Illness (3 cr.) P: graduate standing or consent of the instructor. Surveys important areas of medical sociology, focusing on social factors influencing the distribution of disease, help-seeking, and health care. Topics covered include social epidemiology, the health care professions, socialization of providers, and issues of cost and cost containment.

SOC-R 517 Sociology of Work (3 cr.) P: graduate standing or consent of the instructor. Topics include the changing meaning of work, the quest for dignity in the workplace, the plight of the working poor, and the transformation of the culture of work and its impact on occupations and professions. The prospects for a revival of the labor movement will also be examined.

SOC-R 525 Gender and Work (3 cr.) P: graduate standing and 6 credit hours of sociology, or consent of instructor. This course critically analyzes contemporary theory and research on gender and work. It examines how women's and men's roles in paid and unpaid work are socially constructed, through socialization, social interaction, and the actions of social institutions. The interaction gender, race, ethnicity, and social class will be explored.

SOC-R 530 Families and Social Policy (3 cr.) P: R100, R220 or R314, and graduate standing. This seminar will explore how the government and labor market affect family structure and the quality of family life. Students will study the implications of family research for social policy and learn to develop theoretical frameworks for evaluating social policies affecting families.

SOC-R 537 Gender and Society (3 cr.) P: graduate standing or consent of the instructor. This course examines some central emphases on gender of social interactionist theory and feminist theory/methods. In addition, we will relate these approaches to the study of contemporary gender approaches in selected social spheres, which may vary according to instructor's specializations.

SOC-R 551 Quantitative Research Methods (3 cr.) P: graduate standing or consent of instructor. This course surveys the major techniques for investigating current sociological problems. It emphasizes the relationship between theory and practice in under-standing and conducting research. Although methods intended for rigorous hypothesis testing through quantitative analysis will be of major concern, the course will also examine issues in field research essential to a full understanding of a research problem.

SOC-R 556 Advanced Sociological Theory I (3 cr.) P: graduate standing or consent of instructor. This is the first part of a two-semester graduate course in contemporary sociological theory and theory construction. The first semester will involve the student in detailed study and analysis of sociologists belonging to the positivist tradition in sociology. Students will be expected to comprehend contemporary sociology in terms of its historical roots and to demonstrate their understanding of theory construction.

SOC-R 557 Advanced Sociological Theory II (3 cr.) P: graduate standing or consent of instructor. Reading and exercises will involve the student in close analysis and criticism of sociologists belonging to the idealist tradition of sociology. In this second part of a two-semester course in theory and theory construction in sociology, students will be required to demonstrate their mastery of the theorists studied, as well as to demonstrate their own abilities in theory design and construction.

SOC-R 559 Intermediate Sociological Statistics (3 cr.) P: R359 or equivalent, graduate standing or consent of instructor. Basic techniques for summarizing distributions, measuring interrelationships, controlling extraneous influences, and testing hypotheses are reviewed, as students become familiar with the computer system. Complex analytical techniques commonly applied in professional literature are examined in detail, including analysis of variance, path diagrams, factor analysis, and log-linear models.

SOC-R 585 Social Aspects of Mental Health and Mental Illness (3 cr.) P: graduate standing or consent of instructor. This is a graduate-level course on the sociology of mental illness and mental health. Provides a thorough grounding in the research issues and traditions that have characterized scholarly inquiry into mental illness in the past. Students will become familiar with public policy as it has had an impact on the treatment of mental illness and on the mentally ill themselves.

SOC-R 593 Applied Fieldwork for Sociologists (3 cr.) P: graduate standing or consent of instructor. This course will provide students with both a theoretical and methodological background in the different types of qualitative analysis used in sociological fieldwork. Students will have the opportunity to study and to evaluate representative examples of qualitative studies and to complete by themselves a project done using qualitative methods.

SOC-R 594 Graduate Internship in Sociology (3-6 cr.) P: graduate standing, 18 hours of graduate credit in sociology, and consent of instructor. This course involves master's degree students working in organizations where they apply or gain practical insight into sociological concepts, theories, knowledge, and methodology. Students analyze their experiences through work logs, a lengthy written report and regular meetings with a faculty committee. (Students on the thesis track may also take this course as an elective.)

SOC-R 610 Sociology of Health and Illness Behavior (3 cr.) P: graduate standing or consent of instructor. This seminar explores sociological and social scientific research on health and illness behavior. Special emphasis is placed on examining how social factors and conditions shape people's responses to disease, illness, and disability.

SOC-R 697 Individual Readings in Sociology (3 cr.) P: graduate standing and consent of instructor, 6 hours of graduate credit in sociology with grades of B or better. Investigation of a topic not covered in the regular curriculum that is of special interest to the student and that the student wishes to pursue in greater detail. Available only to sociology graduate students through arrangement with a faculty member.

SOC-S 500 Proseminar in Sociology (1 cr.) P: graduate standing and/or consent of instructor. Introduction to current sociological research interests and concerns through the work of departmental members.

SOC-S 526 The Sociology of Human Sexuality (3 cr.) P: graduate standing and/or consent of instructor. This is a one-semester graduate-level course on the sociology of human sexuality. This course will provide a detailed examination of the development of sex research, a sociological perspective on and critique of this corpus, and an opportunity for students to develop research of their own.

SOC-S 530 Introduction to Social Psychology (3 cr.) P: graduate standing and/or consent of instructor. This course examines the broad range of work in social psychology. Emphasis is placed on the relation between the classic and contemporary literature in the field.

SOC-S 560 Graduate Topics (3 cr.) P: graduate standing and/or consent of instructor, variable with topic. Exploration of a topic in sociology not covered by the regular curriculum but of interest to faculty and students in a particular semester. Topics to be announced.

SOC-S 569 M.A. Thesis (3 cr.) P: graduate standing and/or consent of instructor.

SOC-S 610 Urban Sociology (3 cr.) P: graduate standing and/or consent of instructor. Historical and contemporary causes, trends, and patterns of urbanization throughout the world. Various approaches to studying the process of urbanization, including ecological, social organizational, and political perspectives. Current developments and problems in urban planning.

SOC-S 612 Political Sociology (3 cr.) P: graduate standing and/or consent of instructor. An analysis of the nature and operation of power in a political system. Topics may include classical theories of power, political behavior and campaigns, the role of mass media in sustaining power, the state as a social institution, and political movements.

SOC-S 613 Complex Organizations (3 cr.) P: graduate standing and/or consent of instructor. Theory and research in formal organizations: industry, school, church, hospital, government, military, and university. Problems of bureaucracy and decision making in large-scale organizations. For students in the social sciences and professional schools interested in the comparative approach to problems of organizations and their management.

SOC-S 616 Sociology of Family Systems (3 cr.) P: graduate standing and/or consent of instructor. Focus on the nature, structure, functions, and changes of family systems in modern and emerging societies, in comparative and historical perspective. Attention is given to relationships with other societal subsystems, and to interaction between role occupants within and among subsystems.

SOC-S 632 Socialization (3 cr.) P: graduate standing and/or consent of instructor. The processes of development of the individual as a social being and societal member, focusing on childhood or socialization into adult roles.

SOC-S 659 Qualitative Methods in Sociology (3 cr.) P: graduate standing and/or consent of instructor. Methods in obtaining, evaluating, and analyzing qualitative data in

social research. Methods covered include field research procedures, participant observation, interviewing, and audio-video recording of social behavior in natural settings.

Undergraduate Courses

SOC-R 100 Introduction to Sociology (3 cr.) P: W131 or consent of instructor. Consideration of basic sociological concepts, including some of the substantive concerns and findings of sociology, sources of data, and the nature of the sociological perspective. PUL=5

SOC-R 121 Social Problems (3 cr.) Selected current ''problems'' of American society are analyzed through the use of basic sociological data and the application of major sociological frameworks. Policy implications are discussed in light of value choices involved in various solutions. PUL=5

SOC-R 234 Social Psychology (3 cr.) P: R100 or consent of instructor. Sociological approach to human character, with emphasis on the psychology of the individual in social situations. Topics include socialization and the self, language and communication, interpersonal relations, attitude formation, conformity and social influence, and group processes. PUL=5

SOC-R 240 Deviance and Social Control (3 cr.) P: P: R100 or consent of instructor. An introduction to major sociological theories of deviance and social control. Analyzes empirical work done in such areas as drug use, unconventional sexual behavior, family violence, and mental illness. Explores both ''lay'' and official responses to deviance, as well as cultural variability in responses to deviance. PUL=5

SOC-R 295 Topics in Sociology (3 cr.) P: R100 or consent of instructor. Exploration of a topic in sociology not covered by the regular curriculum but of interest to faculty and students in a particular semester. Topics to be announced. PUL=5

SOC-R 305 Population (3 cr.) P: R100 or consent of instructor. Focus on study of people in terms of relative numbers, geographic distribution, and factors influencing change. Included are considerations of population theory, values related to population questions, an overview of basic techniques of analysis, and mortality, fertility, migration, and growth trends. PUL=5

SOC-R 312 Sociology of Religion (3 cr.) P: R100 or consent of instructor. Examination of religion from the sociological perspective. Religious institutions, the dimensions of religious behavior, the measurement of religious behavior, and the relationship of religion to other institutions in society are examined. PUL=5

SOC-R 314 Families and Society (3 cr.) P: R100 or consent of instructor. The family is a major social institution, occupying a central place in people's lives. This course explores formation and dissolution of marriages, partnerships, families; challenges family members face, including communication and childrearing; reasons for and consequences of change in American families; and how family patterns vary across and within social groups. PUL=5

SOC-R 315 Political Sociology (3 cr.) P: R100 or consent of instructor. Analysis of the nature and basis of political power on the macro level—the community, the national, and the international arenas. Study of formal and informal power structures and of the institutionalized and non-institutionalized mechanisms of access to power. PUL=5

SOC-R 316 Society and Public Opinion (3 cr.) P: R100 or consent of instructor. Analysis of the formulation and operation of public opinion. Although the course may focus on all aspects of opinion and behavior (including marketing research, advertising, etc.), most semesters the course focuses on political opinion and behavior. Special attention will be given to two aspects of opinion in our society: its measurement through public opinion polls and the role of mass communication in manipulating public opinion. The distortions in the popular press's reports of the results of survey research are considered in depth. PUL=5

SOC-R 317 Sociology of Work (3 cr.) P: R100 or consent of instructor. Analysis of the meaning of work, the dynamic social processes within work organizations, and environmental constraints on organizational behavior. PUL=5

SOC-R 320 Sexuality and Society (3 cr.) P: R100 or consent of instructor. Provides a basic conceptual scheme for dealing with human sexuality in a sociological manner. PUL=5

SOC-R 321 Women and Health (3 cr.) P: R100 or consent of instructor. A review of the relationships among cultural values, social structure, disease, and wellness, with special attention focused on the impact of gender role on symptomatology and access to health care. Selected contemporary health problem areas will be examined in depth. Alternative models of health care delivery will be identified and discussed. PUL=5

SOC-R 325 Gender and Society (3 cr.) P: R100 or consent of instructor. A sociological examination of the roles of women and men in society, analysis of the determinants and consequences of these roles, and assessment of forces likely to bring about future change in these roles. Although focus will be on contemporary American society, cross-cultural variations in gender roles will also be noted. PUL=5

SOC-R 327 Sociology of Death and Dying (3 cr.) P: R100 or consent of instructor. This course examines inevitable and salient features of the human condition. Historical evaluation of images and attitudes toward death, the medicalization of death, the human consequences of high-tech dying, the role of the family in caring for dying loved ones, the emergence and role of hospices, the social roles of funerals, grief and bereavement, euthanasia and suicide, the worlds of dying children and grieving parents, and genocide are major issues that are addressed. Two of the major themes of the course revolve around the idea that the way we die is a reflection of the way we live; and, that the study of dying and death is an important way of studying and affirming the value of life. PUL=5

SOC-R 329 Urban Sociology (3 cr.) P: R100 or consent of instructor. The social dynamics of urbanization, urban social structure, and urban ecology. Theories of urban development; the city as a form of social organization; macroprocesses of urbanization both in the United States and other countries. PUL=5

SOC-R 330 Community (3 cr.) P: R100 or consent of instructor. Social, psychological, and structural features of community life. Topics include microphenomena such as

the neighborhood, networks of friendship and oppositions, social participation, community power structure, and institutional frameworks. PUL=5

SOC-R 335 Sociological Perspectives on the Life Course (3 cr.) P: R100 or consent of instructor. Focuses on the human life course as a product of social structure, culture, and history. Attention is given to life course contexts, transitions, and trajectories from youth to old age; work, family, and school influences; self-concept development, occupational attainment, and role acquisition over the life course. PUL=5

SOC-R 338 Comparative Social Systems (3 cr.) P: R100 or consent of instructor. History and general theories of comparative sociology. Major focus on comparative analyses of social structure, kinship, policy and bureaucracy, economics and stratification, and institutionalized belief systems. Some attention is given to culture and personality and to cross-cultural methodology. PUL=5

SOC-R 344 Juvenile Delinquency and Society (3 cr.) P: R100 or consent of instructor. Legal definition of delinquency, measurement and distribution of delinquency. Causal theories considered for empirical adequacy and policy implications. Procedures for processing juvenile offenders by police, courts, and prisons are examined. PUL=5

SOC-R 345 Crime and Society (3 cr.) P: R100 or consent of instructor. Examination of the creation, selection, and disposition of persons labeled criminal. Emphasis on crime as an expression of group conflict and interest. Critique of academic and popular theories of crime and punishment. PUL=5

SOC-R 346 Control of Crime (3 cr.) P: R100 or consent of instructor. History, objectives, and operation of the crime control system in relation to its sociopolitical context. Critical examination of philosophies of punishment and programs of rehabilitation. PUL=3

SOC-R 349 Practicum in Victimology (3 cr.) P: R100 or consent of instructor. The role of the victim in the criminal justice system is examined through both course work and practical experience as a volunteer with the Marion County Prosecutor's Witness-Victim Assistance Program. Recommended for students with interest in deviance, criminology, law, criminal justice, and social service. PUL=5

SOC-R 351 Social Science Research Methods (3 cr.) P: R100 or consent of instructor and sophomore standing. A survey of methods and techniques used by sociologists and other social scientists for gathering and interpreting information about human social behavior.

SOC-R 355 Social Theory (3 cr.) P: R100 or consent of instructor. This course covers several traditions of classical, contemporary, and post-modern social thought (e.g., social Darwinism, conflict theory, functionalism, symbolic interactionism, critical theory, and feminist theory). The social context, construction, and application theories are included. PUL=5

SOC-R 356 Foundations of Social Theory (3 cr.) P: R100 or consent of instructor. This course covers several traditions of classical, contemporary, and post-modern social thought (e.g., social Darwinism, conflict theory, functionalism, symbolic interactionism, critical theory, and feminist theory). The social context, construction, and application theories are included. PUL=5

SOC-R 357 Contemporary Sociological Theory (3 cr.) P: R100 or consent of instructor. This course covers several traditions of classical, contemporary, and post-modern social thought (e.g., social Darwinism, conflict theory, functionalism, symbolic interactionism, critical theory, and feminist theory). The social context, construction, and application theories are included. PUL=5

SOC-R 359 Introduction to Sociological Statistics (3 cr.) P: R100 or consent of instructor. Measures of central tendency, dispersion, standardizing and normalizing procedures, and simple index numbers. Simple notions of probability as related to statistical inference (means, proportions, binomial distribution, chi-square, simple regression).

SOC-R 381 Social Factors in Health and Illness (3 cr.) P: R100 or consent of instructor. Examines the social aspects of health and illness, including variations in the social meanings of health and illness, the social epidemiology of disease, and the social dimensions of the illness experience. PUL=5

SOC-R 382 Social Organization of Health Care (3 cr.) P: R100 or consent of instructor. Surveys the nature of, and recent changes in, the health care delivery system in the United States. Patient and professional roles and the characteristics of different health care settings are explored. Current debates about the nature of the professions and professional work are emphasized. PUL=5

SOC-R 385 Aids and Society (3 cr.) This course examines the HIV/AIDS epidemic from a sociological perspective. Students will explore how social factors have shaped the course of the epidemic and the experience of HIV disease. The impact of the epidemic on health care, government, and other social institutions will also be discussed.

SOC-R 410 Alcohol, Drugs and Society (3 cr.) P: R100 or consent of instructor. This is a survey of the use and abuse of alcohol, including extent of use, history of use and abuse, ''biology'' of alcohol, alcoholism as a problem, legal actions, and treatment strategies. PUL=5

SOC-R 415 Sociology of Disability (3 cr.) P: R100 or consent of instructor. An examination of current models of disability and of disability at the interpersonal and societal level. Topics include recent legal, social, and educational changes; the ways in which people with disabilities interact with the nondisabled; the role played by relatives and caregivers; and the image of people with disabilities in film, television, and other media. Recommended for students in nursing, education, physical and occupational therapy, and social work, as well as for the medical sociology minor. Available for graduate credit. PUL=5

SOC-R 420 Sociology of Education (3 cr.) P: R100 or consent of instructor. A survey of sociological approaches to the study of education, covering such major topics as education as a social institution, the school in society, the school as a social system, and the sociology of learning. PUL=5

SOC-R 425 Gender and Work (3 cr.) P: R100 or consent of instructor. This course examines the changing roles that

women and men play in paid and unpaid work, and how these roles are socially constructed through socialization practices, social interaction, and actions of social institutions. The interaction of gender, race, ethnicity, and social class on individuals' involvement in work will also be explored. PUL=5

SOC-R 430 Families and Social Policy (3 cr.) P: R100 and R220 or R314 or consent of instructor. This seminar explores how the state and labor market currently affect family structure and the quality of family life in the United States and the role the state and labor market could play in the future. Family policies in other parts of the world will be considered for possible applicability to the United States. PUL=5

SOC-R 461 Race and Ethnic Relations (3 cr.) P: R100 or consent of instructor. Comparative study of racial, ethnic, and religious relations. Focus on patterns of inclusion and exclusion of minority groups by majority groups. Discussion of theories of intergroup tensions—prejudice and discrimination—and of corresponding approaches to the reduction of tensions. PUL=5

SOC-R 463 Inequality and Society (3 cr.) P: R100 or consent of instructor. Presentation of conservative and radical theories of class formation, consciousness, mobility, and class consequences. Relevance of social class to social structure and personality. Emphasis on the American class system, with some attention given to class systems in other societies. PUL=5

SOC-R 467 Social Change (3 cr.) P: R100 or consent of instructor. Basic concepts, models, and individual theories of social change; historical and contemporary analysis of the structural and psychological ramifications of major social trends. PUL=5

SOC-R 476 Social Movements (3 cr.) P: R100 or consent of instructor. Study of the origins and dynamics of contemporary social movements in American society, with some attention to cross-national movements. Coverage of progressive and regressive movements aimed at changing the social, economic, and political structure of the society. Case studies of expressive and ideological movements, including fads, cults, and revolts and revolutions. PUL=5

SOC-R 478 Formal Organizations (3 cr.) P: R100 or consent of instructor. Sociological inquiry into the nature, origin, and functions of bureaucratic organizations. Emphasis on bureaucratic organizations as the predominant mode of contemporary task performance and on their social-psychological consequences. Theoretical and empirical considerations in organizational studies from Weber to contemporary findings. PUL=5

SOC-R 480 Sociology and Social Policy (3 cr.) P: R100 or consent of instructor. This course is a broad review of the increasing use of sociology in the formulation and implementation of social policy. Specific case studies will be examined. Recommended for students with an interest in medicine, law, education, social service, urban affairs, etc. PUL=5

SOC-R 481 Evaluation Research Methods (3 cr.) P: R100, R351, R359, or consent of instructor. A comprehensive study of research techniques and practical applications in the area of the evaluation of social programs. Recommended for students with an interest in social research concerning medicine, law, education, social service, urban affairs, etc.

SOC-R 485 Sociology of Mental Illness (3 cr.) P: R100 or consent of instructor. A survey of current problems in psychiatric diagnosis, the social epidemiology of mental illness, institutional and informal caregiving, family burden, homelessness, and the development and impact of current mental health policy. Cross-cultural and historical materials, derived from the work of anthropologists and historians, are used throughout the course. PUL=5

SOC-R 490 Survey Research Methods (3 cr.) P: R100, R351, R359, or consent of instructor. In this practicum, students will design and conduct a survey, learn how to code survey results, enter data, and analyze data with the mainframe computer. A report will also be written. The advantages and disadvantages of survey methodology will be highlighted and ethical issues will be discussed.

SOC-R 493 Practicum in Sociological Fieldwork (3 cr.) P: R100 and R351, senior standing, or consent of instructor. Role of systematic observation as a sociological method. Training in fieldwork techniques and the application of sociological concepts to actual social situations. The core of this course will involve a supervised fieldwork research project in some area of social life.

SOC-R 494 Internship Program in Sociology (3-6 cr.) P: R100, 9 credits of sociology with a B (3.0) or higher, junior standing with consent of instructor. This course involves students working in organizations where they apply or gain practical insight into sociological concepts, theories, and knowledge. Students analyze their experiences through work logs, a paper, and regular meetings with the internship director. PUL=5

SOC-R 495 Topics in Sociology (3 cr.) P: Variable with topic. Exploration of a topic in sociology not covered by the regular curriculum but of interest to faculty and students in a particular semester. Topics to be announced. PUL=5

SOC-R 497 Individual Readings in Sociology (3 cr.) P: Consent of instructor and 9 credit hours of sociology courses with at least a B (3.0) or higher. Investigation of a topic not covered in the regular curriculum that is of special interest to the student and that the student wishes to pursue in greater detail. Normally available only to majors through arrangement with a faculty member. PUL=5

SOC-R 498 Sociology Capstone Seminar (3 cr.) P: R100, R351, R355 (or R356 or R357) and senior status. Designed to help graduating senior sociology majors to synthesize and demonstrate what they have learned in their major while readying themselves for a career and/or graduate study. PUL=5

Women's Studies (WOST)

Graduate Courses

WOST-W 500 Feminist Theory (3 cr.) An examination of contemporary feminist analyses of gender relations, how they are constituted and experienced and how social structures maintaining sexist hierarchies intersect with hierarchies of race, class, and ethnicity. Rival theories are applied to particular issues to demonstrate connections between theory and practice.

WOST-W 601 Survey of Contemporary Research in Women's Studies: The Social and Behavioral Sciences (3 cr.) An exploration of feminist perspectives in the social sciences. Theoretical frameworks and research styles used by feminist social scientists are examined, as are feminist critiques of traditional social scientific frameworks and research methods. Research reports by feminist researchers in social scientific disciplines are also read and analyzed.

WOST-W 602 Contemporary Research in Women's Studies: The Humanities (3 cr.) Review of literature on sex roles, psychology of women, socialization and politicization of women. Training in methodology of research on women; critique of prevailing and feminist theoretical frameworks for studying women.

WOST-W 695 Graduate Readings and Research in Women's Studies (3-6 cr.) An opportunity for graduate students in various programs at IUPUI to explore specific issues within the field of women's studies, guided by faculty with particular expertise in these areas. The course is used to do readings and research that go beyond what is covered in other women's studies graduate courses offered on this campus. It also involves faculty not normally involved in the teaching of these other courses but who have skills and knowledge relevant to the issues being investigated.

WOST-W 701 Graduate Topics in Women's Studies (3-4 cr.) Advanced investigation of selected research topics in women's studies. Topics to be announced.

Undergraduate Courses

WOST-W 105 Introduction to Women's Studies (3 cr.) This introductory course examines both the relation of women's studies to other disciplines and the multiple ways in which gender experience is understood and currently studied. Beginning with a focus on how inequalities between women and men, as well as among women, have been explained and critiqued, the course considers the impact of social structure and culture on gender. The intersections of gender, race, class, sexual orientation, and age are investigated in both national and international contexts. PUL=5

WOST-W 300 Topics in Women's Studies: (variable title) (1-3 cr.) An interdisciplinary study of selected themes, issues, and methodologies in women's studies. May be repeated for up to 6 credit hours. PUL=5

WOST-W 480 Women's Studies Practicum (3-6 cr.) P: W105 and consent of instructor and program director. Internships in the Women's Studies Program are offered to provide opportunities for students to gain work experience while serving women's needs. This experience is combined with an academic analysis of women's status and experience in organizations. PUL=3

WOST-W 495 Readings and Research in Women's Studies (1-3 cr., 6 cr. max cr.) P: W105 and consent of instructor and program director. Individual readings and research. May be repeated twice for credit with a different topic. PUL=5

WOST-W 499 Senior Colloquium in Women's Studies (1 cr.) P: Consent of instructor. This is a culminating interdisciplinary course for advanced students who are prepared to present the results of an original major research effort on a topic in women's studies. Participants will be expected to read and evaluate the presentations of other students and participating faculty. PUL=3

World Languages and Cultures (NELC, EALC, CLAS, FREN, GER, ITAL, SPAN)

Additional Courses

WLAC-F 100 Immersion Abroad Experience (1-6 cr.) This course designation applies to interdisciplinary immersion experiences outside of the United States, including language study in a formal academic setting, cultural exposition and immersion, guided tours, and international service learning. Credit hours (1 to 6) are awarded on the basis of duration of program and classroom contact hours but do not fulfill language requirements. PUL=5; RISE-I

WLAC-F 200 Cross-Cultural Encounters (3 cr.) P: ENG-W 131. This course develops intercultural awareness and understanding through comparative study of the relationship between selected texts and their specific cultural context. One theme is examined in literature and other media by a team of experts in a variety of literatures from around the world. PUL=5, 2

WLAC-F 350 Introduction to Translation Studies and Interpreting (3 cr.) P: 300-level language competence. This course offers an overview in the history and theory of translation studies and interpreting, beginning practice in translation and interpreting. This course is taught in English but is designed for students who have 300-level competence in languages offered in the department. PUL=2,5

WLAC-F 400 Islam, Gender, and Conflicts (3 cr.) This course investigates cultural and religious differences, as well as women's issues in the Muslim world. PUL=2,5

WLAC-F 450 Computers in Translation (3 cr.) P: 300-level language class. This course is designed to prepare translators in computer technology as it relates to translation: translations in electronic form, accessing electronic dictionaries, researching on the World Wide Web, terminology management, machine translation, and computer-assisted translation. Taught in English, but designed for students who have competence in languages offered in the department. PUL=3,1C

Arabic (NELC)

NELC-A 131 Basic Arabic I (5 cr.) Introductory language course in modern standard Arabic as in contemporary literature, newspapers, and radio. Focus on grammar, reading, script, conversation, elementary composition, and culture. PUL=1A,5

NELC-A 132 Basic Arabic II (5 cr.) Introductory language course in modern standard Arabic as in contemporary literature, newspapers, and radio. Focus on grammar, reading, script, conversation, elementary composition, and culture. PUL=1A,5

NELC-A 200 Intermediate Arabic I (3 cr.) P: A131-A132, or consent of instructor. Grammar, reading, composition, conversation, and translation, using materials from classical, medieval, and modern literary Arabic. PUL=1A,5

NELC-A 250 Intermediate Arabic II (3 cr.) P: A131-A132, or consent of instructor. Grammar, reading, composition, conversation, and translation, using materials from classical, medieval, and modern literary Arabic. PUL=1A,5

NELC-A 300 Advanced Arabic I (3 cr.) P: A200-A250, or consent of instructor. Modern standard/classical Arabic syntax and morphology. Development of advanced language skills in reading, writing, and aural comprehension. Active vocabulary development. Readings in a variety of genres and periods. PUL=1A,5

NELC-A 350 Advanced Arabic II (3 cr.) P: A200-A250, or consent of instructor. Modern standard/classical Arabic syntax and morphology. Development of advanced language skills in reading, writing, and aural comprehension. Active vocabulary development. Readings in a variety of genres and periods. PUL=1A,5

Chinese (EALC)

EALC-C 117 Basic Chinese I (3 cr.) Introductory language course in Chinese with emphasis on comprehension and oral expression, grammar, reading, script, elementary composition, and culture. PUL=1A,5

EALC-C 118 Basic Chinese II (3 cr.) Introductory language course in Chinese with emphasis on comprehension and oral expression, grammar, reading, script, elementary composition, and culture. PUL=1A,5

EALC-C 119 Basic Chinese III (4 cr.) Introductory language course in Chinese with emphasis on comprehension and oral expression, grammar, reading, script, elementary composition, and culture. PUL=1A,5

EALC-C 201 Second-Year Chinese I (3 cr.) Both spoken and written aspects stressed, completing major grammatical patterns. PUL=1A,5

EALC-C 202 Second-Year Chinese II (3 cr.) Both spoken and written aspects stressed, completing major grammatical patterns. PUL=1A,5

EALC-C 301 Third-Year Chinese I (3 cr.) P: C201-C202 or equivalent. A further expansion on vocabulary and grammatical patterns focusing on reading and oral communication. PUL=1A,5

EALC-C 302 Third-Year Chinese II (3 cr.) P: C201-C202 or equivalent. A further expansion on vocabulary and grammatical patterns focusing on reading and oral communication. PUL=1A,5

EALC-C 320 Business Chinese (3 cr.) P: C201-C202 or equivalent. Acquisition of language skills for business interactions with Chinese-speaking communities.

EALC-C 351 Studies in East Asian Culture (3 cr.) Selected topics on East Asian culture.

EALC-C 401 Fourth Year Chinese I (3 cr.) P: C301-C302 or equivalent. A further improvement of language proficiency. PUL=1A

EALC-C 402 Fourth Year Chinese II (3 cr.) P: C301-C302 or equivalent. A further improvement of language proficiency.

EALC-E 331 Traditional Chinese Literature (3 cr.) An introduction to Chinese historical and religious writing, narrative prose, and lyrical poetry from roughly 1300 BCE to 1300 CE. PUL=5,2

EALC-E 333 Studies in Chinese Cinema (3 cr.) Critical and historical perspectives on Chinese cinema from the 1930s to the 1990s, including Taiwan and Hong Kong. PUL=5,2

EALC-C 331 Contemporary Chinese Cinema (3 cr.) An introduction to a representative selection of Chinese cinema since the 80s. PUL=5,2

EALC-E 335 Chinese Martial Arts Culture (3 cr.) A survey of history and style of Chinese martial arts, their theoretical bases, literary tradition of martial arts fiction, and cinematic expression of martial arts skills, chivalry and love. PUL=5,2

EALC-E 351 Studies in East Asian Culture (3 cr.) Selected topics on East Asian culture. PUL=5,2

Classical Studies (CLAS)

Courses in Classical Archaeology

CLAS-A 301 Classical Archaeology (3 cr.) The material remains of the classical lands from prehistoric through Roman times and a variety of approaches by which they are understood. Archaeological theory and methods are illustrated through select sites, monuments, works of art, and other remains of cultural, artistic, and historical significance. (Equivalent to Herron H310 and IU Bloomington Classical Studies C206/Fine Arts A206; students may not receive credit for both courses.) PUL=5,3

CLAS-A 418 Myth and Reality in Greek Art (3 cr.) An introduction to Greek iconography (the study of images) that explores contemporary approaches to narration and representation. The course examines the illustration of myth, history, and everyday life in Greek art in relation to ancient society. (Equivalent to Herron H418; students may not receive credit for both courses.) PUL=5,2

CLAS-C 412 Art and Archaeology of the Aegean (3 cr.) Introduction to the preclassical art and archaeology of the Aegean Basin: Greece, Crete, and the Aegean islands during the Stone and Bronze Ages (to about 1000 B.C.). Topics covered include Troy, Minoan Crete, and Mycenaean Greece. PUL=5,2

CLAS-C 413 The Art and Archaeology of Greece (3 cr.) Art and archaeology of Greece from about 1000 B.C. through the Hellenistic period. Special attention given to the development of Greek architecture, sculpture, and vase painting. (Equivalent to Herron H413; students may not receive credit for both courses.) PUL=5,2

CLAS-C 414 The Art and Archaeology of Rome (3 cr.) Development of Roman architecture, sculpture, and painting from the beginning through the fourth century A.D. Consideration given to the major archaeological sites. Continuation of C413, but C413 is not a prerequisite. (Equivalent to Herron H414; students may not receive credit for both courses.) PUL=5,2

Courses in Classical Civilization

CLAS-C 205 Classical Mythology (3 cr.) Introduction to Greek and Roman myths, legends, and tales, especially those that have an important place in the Western cultural tradition. PUL=5,2

CLAS-C 209 Medical Terms from Greek and Latin (2 cr.) Basic knowledge of some 1,000 words, together with materials for formation of compounds, enables student to build a working vocabulary of several thousand words. Designed for those intending to specialize in medicine,

dentistry, or microbiology. Does not count toward the foreign language requirements or the distribution requirement. PUL=1A

CLAS-C 310 Classical Drama (3 cr.) Masterpieces of ancient Greek and Roman theater studied in relation to literary, archaeological, and artistic evidence for their production and interpretation. PUL=2,5

CLAS-C 311 Classical Epics (3 cr.) The development of Greek and Latin epic from the rich oral tradition of Homer to the strictly literary form exemplified by Virgil's Aeneid. Epic masterpieces are read with reference to relevant historical and archaeological background. PUL=2,5

CLAS-C 351 The Golden Age of Athens (3 cr.) Literary and artistic masterpieces of classical Greece viewed against the intellectual, cultural, and political background of democratic Athens. PUL=2,5

CLAS-C 361 The Golden Age of Rome (3 cr.) Literary and artistic masterpieces of the Augustan age viewed in connection with the foundation of the Roman Empire. PUL=2,5

CLAS-C 386 Greek History (3 cr.) Political, social, and economic developments in the Greek word from the age of Mycenae and Troy until the Roman conquest (30 BC). Greek colonial world, Athens and Sparta, career and legend of Alexander the Great, the Hellenistic age. Archaeology as a source of political and social history. (Equivalent to HIST C386; students may not receive credit for both courses.) PUL=2,5

CLAS-C 396 Classical Studies Abroad (1-9 cr.) P: acceptance into an approved Indiana University overseas study program. Credit for foreign study in classical languages, civilization, and archaeology when no specific equivalent is available among departmental offerings. Credit in C396 may be counted toward a minor in classical studies or classical civilization with approval of undergraduate advisor. May be repeated for a maximum of 9 credit hours. PUL=5, Rise-I

CLAS-C 491 Topics in Classical Studies (3 cr.) A detailed examination of a particular aspect of classical civilization using a variety of literary and archaeological evidence. PUL=5,2

CLAS-C 495 Individual Reading in Classics (1-3 cr.) P: consent of department. May be repeated to a maximum of 6 credit hours. PUL=5,2

Courses in Latin

CLAS-L 131 Beginning Latin I (5 cr.) Fundamentals of the language; develops direct reading comprehension of Latin. PUL=1A,5

CLAS-L 132 Beginning Latin II (5 cr.) P: L131 or equivalent. Fundamentals of the language; develops direct reading comprehension of Latin. PUL=1A,5

CLAS-L 200 Second-Year Latin I (3 cr.) P: L132 or placement. Reading from select authors, emphasizing the variety of Latin prose. Examination of the concept of genre. Grammar review and/or prose composition. PUL=1A,5

CLAS-L 250 Second-Year Latin II (3 cr.) P: L132 or placement. Reading from Virgil's Aeneid with examination of the epic as a whole. Prosody of dactylic hexameter and study of poetic devices. Grammar review. PUL=1A,5

CLAS-L 495 Individual Reading in Latin (1-3 cr.) P: consent of department. May be repeated once for credit. PUL=1A,5

French (FREN)

Courses for Graduate Reading Knowledge

FREN-F 491 Elementary French for Graduate Students (3 cr.) Introduction to structures of the language necessary for reading, followed by reading in graded texts of a general nature. Open with consent of instructor to undergraduates who have already completed the language requirement for the B.A. in another language. Credit not given for both F491 and any French course at the 100 level. PUL=1A,5

FREN-F 492 Readings in French for Graduate Students (3 cr.) P: F491 or consent of instructor. Credit not given for both F492 and any French course at the 100 or 200 level. PUL=1A,5

Graduate Courses

FREN-F 507 Foreign Language Institute (1-6 cr.) Intensive interdepartmental course involving work or literature in contemporary civilization (in the foreign language), language practice, and discussions and demonstrations of important developments and concepts in methodology. Intended primarily for Master of Arts for Teachers degree students and for prospective high school teachers.

FREN-F 575 Introduction to French Linguistics (3 cr.) An introduction to phonological, morphological, and syntactic structures of French, and to recent linguistic developments.

FREN-F 580 Applied French Linguistics (3 cr.) Evaluation of language teaching methods according to recent claims in learning theory.

Undergraduate Courses

FREN-F 117 Beginning French I (3 cr.) Introductory language courses designed for students with no prior training in French. Emphasis on developing basic speaking, writing, listening, and reading skills, as well as awareness of French and Francophone cultures. Three semesters are required to fulfill the foreign language requirement. Credit is not given for both F117-F118-F119 and F131-F132. PUL=1A,5

FREN-F 118 Beginning French II (3 cr.) Introductory language courses designed for students with no prior training in French. Emphasis on developing basic speaking, writing, listening, and reading skills, as well as awareness of French and Francophone cultures. Three semesters are required to fulfill the foreign language requirement. Credit is not given for both F117-F118-F119 and F131-F132. PUL=1A,5

FREN-F 119 Beginning French III (4 cr.) Introductory language courses designed for students with no prior training in French. Emphasis on developing basic speaking, writing, listening, and reading skills, as well as awareness of French and Francophone cultures. Three semesters are required to fulfill the foreign language requirement. Credit is not given for both F117-F118-F119 and F131-F132. PUL=1A,5

FREN-F 131 Intensive Beginning French I (5 cr.) Accelerated introductory language courses. Recommended for students with prior training in French or other Romance languages. Emphasis on developing basic speaking, writing,

listening, and reading skills, as well as awareness of French and Francophone cultures. Credit is not given for both F131-F132 and F117-F118-F119. PUL=1A,5

FREN-F 132 Intensive Beginning French II (5 cr.) Accelerated introductory language courses. Recommended for students with prior training in French or other Romance languages. Emphasis on developing basic speaking, writing, listening, and reading skills, as well as awareness of French and Francophone cultures. Credit is not given for both F131-F132 and F117-F118-F119. PUL=1A,5

FREN-F 203 Second-Year Composition, Conversation, and Reading I (4 cr.) P: F119 or F132, or 8-10 credit hours of college-level French or placement by testing. A continuation of practice in the listening, reading, speaking, and writing of French. PUL=1A,5

FREN-F 204 Second-Year Composition, Conversation, and Reading II (4 cr.) P: F203 or 11-14 credit hours of college-level French or placement by testing. Continuation of F203. PUL=1A,5

FREN-F 296 Study of French Abroad (1-6 cr.) P: acceptance in an overseas study program in France. Credit for foreign study in French language and/or literature done at second-year level when no specific equivalent is available among departmental offerings. Does not count towards the major. PUL=1A,5; Rise-I

FREN-F 299 Special Credit in French (3-6 cr.) Nonnative speakers of French may receive a maximum of 6 hours of special credit at the 200 level upon completion of F328 with a grade of C or higher. French or Francophone students may receive a maximum of 6 credit hours at the 200 level upon completion of F328 with a grade of C or higher and one other upper-division French course. PUL=1A,5

FREN-F 300 Lectures et analyses littéraires (3 cr.) P: F204 or equivalent. Preparation for more advanced work in French literature. Readings and discussion of one play, one novel, short stories, and poems, as well as the principles of literary criticism and “explication de texte.” PUL=2,1A

FREN-F 307 Masterpieces of French Literature (3 cr.) P: F300 or equivalent. Includes material from both classical and modern periods. PUL=2,1A

FREN-F 326 French in the Business World (3 cr.) P: F204 or equivalent. Introduction to the language and customs of the French-speaking business world. Designed to help prepare students to take the examination for the Certificat pratique de franais commercial et conomique offered by the Paris Chamber of Commerce. PUL=1A,5

FREN-F 328 Advanced French Grammar and Composition (3 cr.) P: F204 or equivalent. Study and practice of French thinking and writing patterns. PUL=1A,5

FREN-F 330 Introduction to Translating French and English (3 cr.) P: F328 or consent of department. A comparative study of the style and grammar of both languages, with focus on the difficulties involved in translating. Introduction to the various tools of the art of translation. PUL=1A,2

FREN-F 331 French Pronunciation and Diction (3 cr.) P: F204 or equivalent. Thorough study of French phonetics and intonation patterns. Corrective drill. Includes intensive class and laboratory work. Oral interpretation of texts. PUL=1A,5

FREN-F 360 Introduction socio-culturelle à la France (3 cr.) P: F328 or equivalent. A study of France and its people through an examination of France’s political and cultural development. PUL=5,1A

FREN-F 371 Topics in French (3 cr.) Topics in French literature and culture will be explored from a variety of perspectives. The course will be given in English. It may be taken twice for credit if topic differs. Does not count towards the major. PUL=2,5

FREN-F 380 French Conversation (3 cr.) P: F204 or equivalent. Designed to develop conversational skills through reports, debates, and group discussions with an emphasis on vocabulary building, mastery of syntax, and general oral expression. Both F380 and F480 may be taken for credit. PUL=1A,5

FREN-F 396 Study of French Abroad (1-6 cr.) P: acceptance in an overseas study program in France. Credit for foreign study in French language or literature when no specific equivalent is available among departmental offerings. May be repeated for a maximum of 6 credit hours. Does not count towards the major. PUL=1A,5; Rise-I

FREN-F 402 Introduction to French Linguistics (3 cr.) P: F328 or consent of instructor. Introduction to the structure of the French language: phonology, morphology, and syntax. PUL=2,1A

FREN-F 410 French Literature of the Middle Ages (3 cr.) P: F300 or consent of department. Introduction to Old French language and literature. PUL=2,1A

FREN-F 421 Fourth-Year French (3 cr.) P: F328 or consent of department. Advanced work in language with a focus on syntax. PUL=1A,5

FREN-F 423 Craft of Translation (3 cr.) P: F328 or consent of instructor. Advanced course in translation. The problems and techniques of translating French/ English and English/French using a variety of texts and concentrating on the use of various stylistic devices. PUL=1A,2

FREN-F 428 Seventeenth-Century French Literature (3 cr.) P: F300 or consent of department. Classical writers of prose, poetry, and plays such as Descartes, Pascal, Corneille, Moliere, La Fontaine, Racine, Mme de Lafayette. PUL=2,1A

FREN-F 430 Modern Short Narratives (3 cr.) P: F300 or consent of department. Structural and interdisciplinary approaches to short French narratives of the modern period, eighteenth-century fiction (short stories, tales, etc.), and nonfiction (essays, commentaries, etc.). PUL=2,1A

FREN-F 443 Nineteenth-Century Novel I (3 cr.) P: F300 or consent of department. Stendhal, Balzac, and others. PUL=2,1A

FREN-F 444 Nineteenth-Century Novel II (3 cr.) P: F300 or consent of department. Flaubert, Zola, and others. PUL=2,1A

FREN-F 450 Colloquium in French Studies (2-3 cr.) P: F300 or consent of instructor. Emphasis is on topic, author, or genre. PUL=2,1A,5

FREN-F 451 Le francais des affaires (3 cr.) P: F326 or consent of instructor. Investigates in depth some of the topics touched on in F326. Designed to help prepare students to take the examination for the Diplme suprieur de francais des affaires offered by the Paris Chamber of Commerce. PUL=1A,5

FREN-F 452 La civilisation et littérature québécoises (3 cr.) P: F300 or consent of instructor. The study of the history of French Canadian literature and civilization from its origins down to the present, leading to the "Quiet Revolution" as seen through the contemporary poetry, novels, and drama of Quebec. PUL=2,1A

FREN-F 453 Littérature contemporaine I (3 cr.) P: F300 or consent of department. Twentieth-century writers such as Gide, Proust, etc. PUL=2,1A

FREN-F 454 Littérature contemporaine II (3 cr.) P: F300 or consent of department. Twentieth-century writers such as Camus, Sartre, etc. PUL=2,1A

FREN-F 460 French Fiction in Film (3 cr.) P: F300 or consent of department. Involves reading works of French fiction and studying them as works of literature, followed by the viewing of a film version of each work and the preparation of a comparative analysis of the two versions. PUL=2,1A

FREN-F 461 La France Contemporaine (3 cr.) P: F328 or equivalent. France since 1945: political, social, economic, and cultural aspects. PUL=5,1A

FREN-F 480 French Conversation (3 cr.) P: F328 or consent of instructor. Designed to develop conversational skills through intensive controlled conversation with an emphasis on the use of linguistic devices and the mastery of oral expression. Both F380 and F480 may be taken for credit. PUL=1A,5

FREN-F 493 Internship in French (3 cr.) P: Senior standing or consent of internship director. A field experience in the applied use of French in a professional workplace environment. Previous course work and experience are integrated in a practical application locally or in a French-speaking country. Directed readings, journal, reports, final project. PUL=4,2,5

FREN-F 495 Individual Readings in French (1-3 cr.) P: consent of instructor. For majors only. PUL=5,2

FREN-F 496 Study of French Abroad (3-8 cr.) P: consent of chairperson. Course involves planning for research project during year preceding study abroad. Time spent in research abroad must amount to at least one week for each credit hour granted. Research paper must be presented by end of semester following foreign study. May be taken once only. Does not count as a 400-level course in residence for major or minor. PUL=1A, RISE-I

FREN-F 497 Capstone in French (1 cr.) A senior level summative experience for French majors that integrates students' undergraduate study in the discipline. Students showcase academic progress through a capstone portfolio, a reflective journal, discussions with a faculty capstone director, and by a final presentation to students and faculty. PUL=3,2

German (GER)

Graduate Courses

GER-G 507 Foreign Language Institute (1-6 cr.) Intensive interdepartmental course involving language laboratory and other audiovisual equipment and techniques, lecture, assignments in contemporary civilization (in the foreign language), and discussions of classroom use of applied linguistics. May be repeated for a maximum of 6 credit hours.

GER-G 563 German Culture Studies I (3 cr.) The formation of cultural traditions in the German-speaking countries prior to the twentieth century.

GER-G 564 German Culture Studies II (3 cr.) Culture of the German-speaking countries in the twentieth century.

GER-V 605 Selected Topics in German Studies (2-4; 12 max. cr.) Selected Topics in German Studies.

International Study or Work Internship Option

GER-G 493 Internship in German (1-6 cr.)

GER-G 498 Individual Studies in German (1-6 cr.) 1-6 credit hours toward the major in German may be earned through individual study or international work internship abroad or locally. There is a 3 credit limit for one individual study or work project.

Undergraduate Courses

GER-G 095 German for Reading Proficiency I (3 cr.) These courses stress mastery of passive vocabulary and recognition of grammatical forms needed for reading skills. Designed for students in science, technology, the professional schools, and for those desiring sufficient proficiency in reading and translating German to enable them to work with German materials in their fields. These courses do not fulfill the foreign language requirement of the School of Liberal Arts. PUL=1A,5

GER-G 096 German for Reading Proficiency II (3 cr.) These courses stress mastery of passive vocabulary and recognition of grammatical forms needed for reading skills. Designed for students in science, technology, the professional schools, and for those desiring sufficient proficiency in reading and translating German to enable them to work with German materials in their fields. These courses do not fulfill the foreign language requirement of the School of Liberal Arts. PUL=1A,5

GER-G 117 Beginning German I (3 cr.) Introductory courses for students who have not had prior training in German or who desire to study German at a pace slower than G131-G132. Three semesters are required to fulfill the 10-credit hour foreign language requirement. Credit is given only for the sequence G117-G118-G119 or the sequence G131-G132. PUL=1A,5

GER-G 118 Beginning German II (3 cr.) Introductory courses for students who have not had prior training in German or who desire to study German at a pace slower than G131-G132. Three semesters are required to fulfill the 10-credit hour foreign language requirement. Credit is given only for the sequence G117-G118-G119 or the sequence G131-G132. PUL=1A,5

GER-G 119 Beginning German III (4 cr.) Introductory courses for students who have not had prior training in German or who desire to study German at a pace slower than G131-G132. Three-semesters are required to fulfill the 10-credit hour foreign language requirement. Credit is given only for the sequence G117-G118-G119 or the sequence G131-G132. PUL=1A,5

GER-G 131 Intensive Beginning German I (5 cr.) Intensive introduction to present-day German and selected aspects of German life. Intensive drills for mastery of phonology, basic structural patterns, and functional vocabulary. Credit is given only for the sequence G131-G132 or the sequence G117-G118-G119. PUL=1A,5

GER-G 132 Intensive Beginning German II (5 cr.) Intensive introduction to present-day German and selected aspects of German life. Intensive drills for mastery of phonology, basic structural patterns, and functional vocabulary. Credit is given only for the sequence G131-G132 or the sequence G117-G118-G119. PUL=1A,5

GER-G 134 Introductory German for Business I (3 cr.) Introductory courses for students and professionals in business and engineering who need basic communicative skills for the workplace. In addition to the four basic language skills, intercultural communication and basic technical, business, and scientific vocabulary are introduced. PUL=1A,5

GER-G 135 Introductory German for Business II (3 cr.) Introductory courses for students and professionals in business and engineering who need basic communicative skills for the workplace. In addition to the four basic language skills, intercultural communication and basic technical, business, and scientific vocabulary are introduced. PUL=1A,5

GER-G 225 Intermediate German I (4 cr.) P: G119, G132, or equivalent or placement by testing. Intensive review of grammar. Further development of oral and written use of the language. Selections from contemporary German readings and media. PUL=1A,5

GER-G 230 Intermediate German II (4 cr.) P: G225 or equivalent or placement by testing. Review of grammar. Readings of modern German with stress on discussion in German. Writing of descriptive and expository prose. PUL=1A,5

GER-G 265 German Culture in English Translation (3 cr.) A survey of the cultural history of German-speaking countries, as well as of contemporary civilization, with an emphasis on individual aspects of culture traced through several epochs. PUL=5,2

GER-G 299 German for Advanced Credit (3 or 6 cr.) Nonnative speakers of German may receive a maximum of 6 hours of advanced credit with the grade of "S" upon completion of G300 or higher with a grade of C or higher. Native speakers of German may receive a maximum of 6 advanced credits upon completion of two German courses at the 300-400 level with the grade of C or higher. A student who skips a sequential course (e.g., G225 or G230) may receive 3 advanced credits upon successful completion of a higher-level course. PUL=1A,5

GER-G 303 Deutsch: Mittelstufe I (3 cr.) P: G230 or equivalent or placement by testing. Comprehensive review of grammatical points introduced in G117 through G230. Reading proficiency, systematic vocabulary building, composition, and discussion through the assignments of literary and nonliterary texts. Conducted in German. PUL=1A,5

GER-G 304 Deutsch: Mittelstufe II (3 cr.) P: G303 or equivalent. Advanced oral and written communication. Study of selected advanced grammatical topics. Reading of primarily nonliterary texts. Conducted in German. PUL=1A,5

GER-G 331 Business German I (3 cr.) P: third-year language proficiency or consent of instructor. Emphasis on acquisition and use of business vocabulary, idiom, and style. Translating, reading, and writing skills are developed using constructions common to business German, as well as current materials (reports, journals) in the field. PUL=1A,5

GER-G 333 German Translation Practice (3 cr.) P: third-year proficiency or consent of instructor. Introduction to the theory and practice of translation. Discussion of techniques and stylistic approaches. Emphasis on German/English translation using a variety of texts, including technical texts, business communication, and texts on current topics. PUL=1A,2

GER-G 340 German Language and Society Past and Present (3 cr.) P: G230 or equivalent. Further development of composition, conversation, and diction; review of grammar. PUL=5,1A

GER-G 355 Theater Spielen (3 cr.) P: third-year proficiency or consent of instructor. This combined reading, discussion, pronunciation, and performance course provides an applied introduction to contemporary German theater and drama, along with intensive practice of oral language skills. PUL=1A,5

GER-G 365 Deutsche Kultur Heute (3 cr.) P: third-year proficiency or consent of instructor. A critical investigation of contemporary culture in the German-speaking countries, including institutions and major personalities, customs, traditions, changing mentalities, and lifestyles as they compare with contemporary U.S. culture. Taught in German. PUL=5,1A

GER-G 370 German Cinema (3 cr.) No knowledge of German required. Survey of German cinema from the films of expressionism and the Weimar Republic through the Nazi period to the present. Emphasis on film as a form of narrative art and on the social and historical conditions of German film production. Offered in English concurrently with G371. No credit given towards German major. PUL=2,5

GER-G 371 Der deutsche Film (3 cr.) P: third-year proficiency or equivalent. Survey of German cinema from the films of expressionism and the Weimar Republic through the Nazi period to the present. Emphasis on film as a form of narrative art and on the social and historical conditions of German film production. PUL=2,1A

GER-G 381 German Literature to 1750 in English Translation (3 cr.) No knowledge of German required. Major works and writers of German literature in the medieval, Reformation, Renaissance, and Baroque periods. Offered in English. PUL=2,5

GER-G 382 Classicism and Romanticism in English Translation (3 cr.) No knowledge of German required. Major

works and writers of German literature, 1750–1830, to include the periods of the Enlightenment, Storm and Stress, Classicism, and Romanticism; representative writers such as Schiller, Goethe, Kleist, and the Grimm brothers. Offered in English. PUL=2,5

GER-G 383 Nineteenth-Century German Literature in English Translation (3 cr.) No knowledge of German required. Works and writers of German literature, 1830–1900. Analysis of such concepts as realism, naturalism, and neoromanticism, their theories and styles; exemplary writers such as Buechner, Heine, Nietzsche, Hauptmann, and others. Offered in English. PUL=2,5

GER-G 384 Twentieth-Century German Literature in English Translation (3 cr.) No knowledge of German required. Major works and writers of German literature from the turn of the twentieth century to the present, with emphasis on Rilke, Thomas Mann, Kafka, and Brecht. Offered in English. PUL=2,5

GER-G 391 German Colloquium in English Translation (3 cr.) No knowledge of German required. May be taken as an elective by other students. Emphasis on one topic, author, or genre in German literature, or other aspect of German culture. No credit given toward German major. PUL=2,5

GER-G 401 Deutsche Kultur in Amerika (3 cr.) P: third-year proficiency or consent of instructor. Advanced undergraduate course. Its purposes are to provide an overview of the cultural heritage of German-Americans and to assist students in researching German heritage with a view toward developing research skills with original materials. The course is in a seminar format with students actively participating in discussions and presentations. Taught in German. PUL=2,1A

GER-G 407 Knights, God, and the Devil (3 cr.) The purpose of this course is to provide insight into the development of early German cultural life by reading and analyzing texts of the periods covered. Lecture materials cover historical and cultural background. Period texts are placed in contexts of other cultural phenomena, including art and music. As much reference as possible is made to the European context of the emerging German literacy language. Taught in German. PUL=2,1A

GER-G 408 Love, Nature, and the Age of Romanticism (3 cr.) P: third-year proficiency or consent of instructor. Introduction to the cultural capital of courtly Germany, Weimar, and its relationship to German Romanticism, including readings and discussions of works by Goethe, Schiller, Kleist, Tieck, and the Grimm brothers. Literary examples are accompanied by pictorial, filmic, and musical illustrations. Taught in German. PUL=2,1A

GER-G 409 German Myths, Fairy Tales and Social Transformation (3 cr.) P: third-year proficiency or consent of instructor. Survey of literary representations of nineteenth-century German life at a time of change from rural to urban transformation. Text selection includes a variety of shorter forms: fairy tales, short stories, novella, satire and drama. Taught in German. PUL=2, 1A

GER-G 410 20. Jahrhundert: Kultur und Literatur (3 cr.) P: third-year proficiency or consent of instructor. Survey of cultural and intellectual life of the German-speaking countries of the twentieth century through the reading of exemplary literary works. Discussion of literary movements from the turn of the century until the present. Texts are analyzed within the context of other cultural phenomena, including film and music. Conducted in German. PUL=2,1A

GER-G 423 The Craft of Translation (3 cr.) P: G333 or consent of instructor. Advanced course in German-English translation providing intensive translation practice in many text categories: commercial and economic translations, scientific, technical, political, and legal texts. Applied work combined with study of theory and methodology of translation, comparative structural and stylistical analysis, and evaluation of sample translations. Use of computer-assisted translation management. PUL=2,1A

GER-G 431 Advanced Business German (3 cr.) P: fourth-year proficiency or consent of instructor. Focus is on the contemporary business idiom and current economic issues facing Germany. Active practice of specialized business language, both for oral and written communication. PUL=1A,5

GER-G 445 Oberstufe: Grammatik (3 cr.) P: fourth-year proficiency or consent of instructor. Survey and practice of complex grammatical structures; systematic expansion of vocabulary. Discussion and writing based on current materials, such as newspapers, films, and radio programs. PUL=1A,5

GER-G 465 Structure of German (3 cr.) P: fourth-year proficiency or consent of instructor. Systematic development of writing and speaking skills, proceeding from exercises to specific forms, such as Brief, Aufsatz, Referat, Vortrag. Focus on usage and style. PUL=2,1A

GER-G 490 Das deutsche Kolloquium (3 cr.) P: fourth-year German language proficiency or consent of instructor. Concentration on a specific topic, genre, or author in German literature, film, or other aspect of culture. PUL=2,1A

GER-G 491 Elementary German for Graduate Students I (0 cr.) These courses are taught concurrently with G095-G096 and prepare students for the German reading proficiency exam. PUL=1A,5

GER-G 492 Elementary German for Graduate Students II (0 cr.) These courses are taught concurrently with G095-G096 and prepare students for the German reading proficiency exam. PUL=1A,5

GER-G 493 Internship in German (1-6 cr.) P: consent of program director. PUL=4,2

GER-G 498 Individual Studies in German (1-6 cr.) P: Consent of program director. 1-6 credit hours toward the major in German may be earned through individual study or international work internship abroad or locally. There is a 3 credit limit for one individual study or work project. PUL=2

Italian (ITAL)

ITAL-M 117 Basic Italian I (3 cr.) Introductory language course in contemporary Italian. Focus on grammar, reading, conversation, elementary writing, and culture. PUL=1A,5

ITAL-M 118 Basic Italian II (3 cr.) Introductory language course in contemporary Italian. Focus on grammar, reading, conversation, elementary writing, and culture. PUL=1A,5

ITAL-M 119 Basic Italian III (4 cr.) Introductory language course in contemporary Italian. Focus on grammar, reading, conversation, elementary writing, and culture. PUL=1A,5

ITAL-M 132 Beginning Italian 2 (5 cr.)

ITAL-M 200 Intermediate Italian (3 cr.) Intermediate study of contemporary Italian conversation, grammar, reading, and writing. Introduction to brief literary texts.

Japanese Studies (EALC-J)

EALC-E 231 Japan: The Living Tradition (3 cr.) An introduction to the patterns of Japanese culture: society, history, visual arts, literary masterpieces, performing arts, and living religious traditions. PUL=5,2

EALC-E 351 Studies in East Asian Culture (3-6 cr.) Selected issues and problems of importance to the understanding of East Asian culture, taught within one of the humanistic disciplines. May be repeated once for credit. PUL=5,2

EALC-E 472 Modern Japanese Fiction (3 cr.) The novels, short stories, and theories of fiction of prominent Japanese writers of the modern period. PUL=2,5

EALC-J 117 Basic Japanese I (3 cr.) Introductory courses for students who have not had prior training in Japanese or who desire to study Japanese at a pace slower than J131-J132. Three semesters are required to fulfill the 10 credit hour foreign language requirement. Credit is given only for the sequence J117-J118-J119 or the sequence J131-J132. Students are introduced to present-day Japanese with drills for mastery of phonology, basic structural patterns, and functional vocabulary.

EALC-J 118 Basic Japanese II (3 cr.) Introductory courses for students who have not had prior training in Japanese or who desire to study Japanese at a pace slower than J131-J132. Three semesters are required to fulfill the 10 credit hour foreign language requirement. Credit is given only for the sequence J117-J118-J119 or the sequence J131-J132. Students are introduced to present-day Japanese with drills for mastery of phonology, basic structural patterns, and functional vocabulary.

EALC-J 119 Basic Japanese III (4 cr.) Introductory courses for students who have not had prior training in Japanese or who desire to study Japanese at a pace slower than J131-J132. Three semesters are required to fulfill the 10 credit hour foreign language requirement. Credit is given only for the sequence J117-J118-J119 or the sequence J131-J132. Students are introduced to present-day Japanese with drills for mastery of phonology, basic structural patterns, and functional vocabulary.

EALC-J 131 Beginning Japanese I (5 cr.) Introductory language courses designed for students who have not had any prior training in Japanese. Drills for basic skills in listening, speaking, reading, and writing of Japanese. PUL=1A,5

EALC-J 132 Beginning Japanese II (5 cr.) Introductory language courses designed for students who have not had any prior training in Japanese. Drills for basic skills in listening, speaking, reading, and writing of Japanese. PUL=1A,5

EALC-J 201 Second-Year Japanese I (3 cr.) P: J131-J132 or equivalent. A continuation of practice in the listening, speaking, reading, and writing of Japanese. PUL=1A,5

EALC-J 202 Second-Year Japanese II (3 cr.) P: J131-J132 or equivalent. A continuation of practice in the listening, speaking, reading, and writing of Japanese. PUL=1A,5

EALC-J 301 Third-Year Japanese I (3 cr.) P: J201-J202 or equivalent. Review of grammatical points acquired in the first and second years of Japanese. More advanced level of speaking, reading, writing, and listening proficiency. PUL=1A,5

EALC-J 302 Third-Year Japanese II (3 cr.) P: J201-J202 or equivalent. Review of grammatical points acquired in the first and second years of Japanese. More advanced level of speaking, reading, writing, and listening proficiency. PUL=1A,5

EALC-J 310 Japanese Conversation (3 cr.) P: J202 or equivalent. Designed to develop conversational skills through controlled linguistic patterns, reports, and group discussion. More advanced level of oral communication. PUL=1A,5

EALC-J 330 Business Japanese (3 cr.) P: J202 or equivalent. Emphasis on acquisition and use of business vocabulary, idiom, and style. Oral practice is emphasized. PUL=1A,5

EALC-J 393 Japanese Literature in Translation I (3 cr.) Survey of the classical genres of Japanese literature. I: Ancient period to end of Momoyama. II: Tokugawa and modern periods. PUL=2,5

EALC-J 394 Japanese Literature in Translation II (3 cr.) Survey of the classical genres of Japanese literature. I: Ancient period to end of Momoyama. II: Tokugawa and modern periods. PUL=2,5

EALC-J 401 Fourth-Year Japanese (3 cr.) P: J301-J302 or equivalent. Advanced level of communications skills in speaking and writing. Study of advanced grammar and reading of newspaper articles. PUL=1A,5

EALC-J 402 Fourth-Year Japanese (3 cr.) P: J301-J302 or equivalent. Advanced level of communications skills in speaking and writing. Study of advanced grammar and reading of newspaper articles. PUL=1A,5

EALC-J 498 Individual Studies in Japanese (1-3 cr.) P: consent of the program director. May be repeated up to a maximum of 6 credit hours. PUL=5,2

Spanish (SPAN)

Courses in Literature in Translation

Literature-in-translation courses may be offered if there is sufficient demand for more Foreign Culture Option courses.

SPAN-S 230 Cervantes' Don Quixote in Translation (3 cr.) Detailed textual analysis of Cervantes' masterpiece, with readings and class discussion on its relationship to the Renaissance and the development of the world novel. PUL=2,5

SPAN-S 231 Spanish-American Fiction in Translation (3 cr.) Representative prose fiction of Spanish America. Background lectures on the evolution of the short story and

novel. Readings and discussions will concentrate on the fiction of the twentieth century. PUL=2,5

SPAN-S 240 Modern Spanish Literature in Translation (3 cr.) Readings from authors such as Unamuno, Cela, García Lorca, Jiménez, Pérez de Ayala, and Ortega y Gasset. PUL=2,5

SPAN-S 241 Golden Age Literature in Translation (3 cr.) Masterpieces of Spanish literature of the sixteenth and seventeenth centuries. Representative authors will include: Lope de Vega, Cervantes, Garcilaso, Quevedo, Fray Luis de León, San Juan de la Cruz, and Góngora. PUL=2,5

Graduate Courses

NOTE: With the exception of S493, S494, and S498, which carry undergraduate credit only, all other 400-level courses may be used for graduate credit with the approval of the Graduate Studies Committee.

SPAN-S 507 Foreign Language Institute (3 cr.) P: Graduate standing in Spanish or consent of instructor. Intensive interdepartmental course involving language laboratory and audiovisual equipment and techniques, lecture, assignments in contemporary civilization (in the foreign language), and discussion of classroom use of applied linguistics. Taught only in the summer. Intended primarily for teachers. May be repeated for a maximum of 6 credit hours.

SPAN-S 511 Spanish Syntactic Analysis (3 cr.) P: S326 or consent of instructor Introduction to the analysis of syntactic data. Focus on developing theoretical apparatus required to account for a range of syntactic phenomena in Spanish.

SPAN-S 513 Introduction to Hispanic Sociolinguistics (3 cr.) P: S320 and S326, or consent of instructor. Examination of the relationship between language and society in the Spanish-speaking world. Survey of a wide range of topics relevant to Spanish: language as communication, the sociology of language, and linguistic variation. The course is conducted entirely in Spanish.

SPAN-S 515 The Acquisition of Spanish as a Second Language (3 cr.) P: P: S326 and S428, or consent of instructor. Introduction to the acquisition of Spanish as a second language. Survey of selected studies exploring topics that range from the development of second language (Spanish) grammars, to second language production and comprehension, input processing, and the acquisition of pragmatic and sociolinguistic competence.

SPAN-S 517 Methods of Teaching College Spanish (3 cr.) P: S428 or consent of instructor. Course on communicative language teaching. Exploration of the body of research on second language development and the base principles and parameters to guide classroom instruction. Full range of topics from grammar and input to spoken and written language.

SPAN-S 518 Studies in Latino and Spanish American Culture (3 cr.) P: S412 or consent of instructor. Advanced study of cultural phenomena produced in Latin America and among U.S. Hispanics. Focus on belief systems, artistic production, laws, customs, and other socially determined behaviors. Exploration of topics such as colonization, popular culture, communication, art, religious syncretism, and native indigenous cultures.

SPAN-S 519 Practicum in the Teaching of Spanish (3 cr.) P: S517 or consent of instructor. Practical application of the teaching methodology explored in S517. Students will undertake teaching projects supervised by a graduate faculty member in Spanish and meet with their mentors to assess their teaching objectives, techniques, materials and outcomes.

SPAN-S 521 Spanish Grammar and Linguistics for Teachers I (3 cr.) P: Graduate standing in Spanish or consent of graduate director. Themes and issues in Spanish grammar and Hispanic linguistics selected for their relevance to teaching Spanish to nonnative speakers. Pedagogical implications and teaching strategies will be discussed. Content is distinct from that of S524.

SPAN-S 523 Spanish Literature, Art, and Culture for Teachers I (3 cr.) P: Graduate standing in Spanish or consent of graduate director. Authors, artists, themes, and issues in Spanish literature, visual art, and cultural life selected to enrich the teaching of Spanish to nonnative speakers. Pedagogical implications and teaching strategies will be discussed. Content is distinct from that of S525.

SPAN-S 524 Spanish Grammar and Linguistics for Teachers II (3 cr.) P: Graduate standing in Spanish or consent of graduate director. Themes and issues in Spanish grammar and Hispanic linguistics selected for their relevance to teaching Spanish to nonnative speakers. Pedagogical implications and teaching strategies will be discussed. Content is distinct from that of S521.

SPAN-S 525 Spanish Literature, Art, and Culture for Teachers II (3 cr.) P: Graduate standing in Spanish or consent of graduate director. Authors, artists, themes, and issues in Spanish literature, visual art, and cultural life selected to enrich the teaching of Spanish to nonnative speakers. Pedagogical implications and teaching strategies will be discussed. Content is distinct from that of S523.

SPAN-S 528 Translation Practice and Evaluation (3 cr.) P: Graduate standing or consent of instructor. Graduate course in the problems and techniques of Spanish/English and English/Spanish translation. Includes the practical aspects of translation from various texts (literary, technical, scientific, commercial, social) and evaluation of professional translations. Translation theory will be studied.

SPAN-S 650 Topics in the Teaching of Spanish (3 cr.) Seminar in selected topics related to the teaching of Spanish, such as assessment, teaching materials development, the teaching of specific linguistic skills. May be repeated for credit when topic varies.

SPAN-S 680 Topics in Contemporary Spanish American Literature (3 cr.) P: Graduate standing in Spanish or consent of instructor. Topics include poetry, drama, short story, novel, and essay.

SPAN-S 686 M.A.T. Thesis (2-4 cr.) P: Authorization of graduate director. Students identify a research theme and develop it under the guidance of a director (IUPUI professor) and a co-director (University of Salamanca professor). The topic will be related to the teaching of Spanish language or

to the teaching of an aspect of Hispanic literature or culture. Repeatable for up to 6 hours.

Undergraduate Courses

SPAN-S 117 Beginning Spanish I (3 cr.) Introductory language sequence of courses designed for students with no prior training in Spanish. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic culture. Credit not given for both S117-S118-S119 and S131-S132. PUL=1A,5

SPAN-S 118 Beginning Spanish II (3 cr.) Introductory language sequence of courses designed for students with no prior training in Spanish. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic culture. Credit not given for both S117-S118-S119 and S131-S132. PUL=1A,5

SPAN-S 119 Beginning Spanish III (4 cr.) Introductory language sequence of courses designed for students with no prior training in Spanish. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic culture. Credit not given for both S117-S118-S119 and S131-S132. PUL=1A,5

SPAN-S 131 Intensive Beginning Spanish I (5 cr.) Intensive introductory language sequence of courses. Recommended for prospective majors and for students with prior training in Spanish or other Romance languages. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic cultures. Credit not given for both S117-S118-S119 and S131-S132. PUL=1A,5

SPAN-S 132 Intensive Beginning Spanish II (5 cr.) Intensive introductory language sequence of courses. Recommended for prospective majors and for students with prior training in Spanish or other Romance languages. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic cultures. Credit not given for both S117-S118-S119 and S131-S132. PUL=1A,5

SPAN-S 142 Beginning Spanish for Law Enforcement I (3 or 4 cr.) Beginning language instruction in Spanish with an emphasis on the communicative needs of law enforcement personnel. Service-learning component available. PUL=1A,5

SPAN-S 143 Beginning Spanish for Law Enforcement II (3 or 4 cr.) Beginning language instruction in Spanish with an emphasis on the communicative needs of law enforcement personnel. Service-learning component available. PUL=1A,5

SPAN-S 160 Beginning Spanish for Health Care Personnel I (3 cr.) Beginning language instruction in Spanish with an emphasis on the communicative needs of health care personnel. Service-learning component available. PUL=1A,5

SPAN-S 161 Beginning Spanish for Health Care Personnel II (3 cr.) Beginning language instruction in Spanish with an emphasis on the communicative needs of health care personnel. Service-learning component available. PUL=1A,5

SPAN-S 203 Second-Year Spanish I (4 cr.) P: S119 or S312, or 8-10 credit hours of college-level Spanish or placement by testing. A continuation of training in the four skills: listening, reading, speaking, and writing. PUL=1A,5

SPAN-S 204 Second-Year Spanish II (4 cr.) P: S203 or 10-14 credit hours of college-level Spanish or placement by testing. Continuation of S203. PUL=1A,5

SPAN-S 298 Second-Year Spanish (3 or 6 cr.) Non-native speakers may receive a maximum of 16 credits by completing a 300-level course with a C or higher (S298 plus 10 hours at the 100 level). Native speakers of Spanish are eligible for a maximum of 6 hours of “S” credit (S298) upon completion of S313 with a C or higher.

SPAN-S 311 Spanish Grammar (3 cr.) P: S204 or equivalent. This course is designed to integrate the four basic language skills into a review of the major points of Spanish grammar. Course work will combine grammar exercises with brief controlled compositions based on reading assignments and class discussion in Spanish. PUL=1A,2

SPAN-S 313 Writing Spanish (3 cr.) P: S204 or equivalent. Students are strongly encouraged to have already successfully completed English W131 before enrolling in S313. Grammar review, composition, and themes in Spanish with a focus on the development of academic writing skills. This course is specifically required for native speakers who wish to earn special credit (S298) in Spanish. PUL=1A,2

SPAN-S 315 Spanish in the Business World (3 cr.) P: S204 or equivalent. Introduction to the technical language of the business world with emphasis on problems of style, composition, and translation in the context of Hispanic mores. PUL=1A,5

SPAN-S 317 Spanish Conversation and Diction (3 cr.) P: S204 or equivalent. Not open to heritage or native speakers of Spanish. Intensive controlled conversation correlated with readings, reports, debates, and group discussions, with emphasis on vocabulary usage, word order, tense relationships, and linguistic devices. Class time is the same as for a 4 credit hour course. May be repeated once for credit. PUL=1A,5

SPAN-S 319 Spanish for Health Care Personnel (3 cr.) P: S204 or equivalent. A course designed specifically for those interested in learning Spanish in the context of material related to health care systems. Emphasis placed on vocabulary necessary for communicative competence in the medical fields. PUL=1A,5

SPAN-S 323 Introduction to Translating Spanish and English (3 cr.) P: S313 or consent of instructor. A comparative study of the style and grammar of both languages with a focus on the difficulties involved in translating. Introduction to the techniques and process of translation through intensive practice. PUL=2,1A,6

SPAN-S 326 Introduction to Spanish Linguistics (3 cr.) P: S313 or equivalent Introduces the basic concepts of Hispanic linguistics and establishes the background for the future application of linguistic principles. The course surveys linguistic properties in Spanish, including honology, morphology, and syntax. Additional introductory material on historical linguistics, second language acquisition, semantics, and sociolinguistics will be included. PUL=2,1A

SPAN-S 360 Introduction to Hispanic Literature (3 cr.) P: S313 or consent of instructor. Using fiction, drama, and poetry from both Spain and Latin America, this course introduces strategies to increase reading comprehension and presents terms and concepts useful in developing the critical skills of literary analysis. PUL=2,1A

SPAN-S 363 Introduction to Hispanic Culture (3 cr.) P: S313 or consent of instructor. Introduction to the cultural history of Spanish-speaking countries with emphasis on its literary, artistic, social, economic, and political aspects. PUL=5,1A

SPAN-S 407 Survey of Spanish Literature I (3 cr.) P: S313 and S360, or consent of instructor. A historical survey that covers major authors, genres, periods, and movements from the Spanish Middle Ages through the Baroque period of the seventeenth century. Readings include prose works, poetry, and drama. PUL=2,1A

SPAN-S 408 Survey of Spanish Literature II (3 cr.) P: S313 and S360, or consent of instructor. A historical survey of Spanish literature that covers the main current of Spain's literary history in the eighteenth, nineteenth, and twentieth centuries. Readings in prose, poetry, and drama by Larra, Perez Galdes, Unamuno, Garcia Lorca, and other representative writers. PUL=2,1A

SPAN-S 409 Hispanic Sociolinguistics (3 cr.) P: S326 or equivalent Topics include sociolinguistic and phonological and syntactic variation, field methods, discourse analysis, language and power, language ideology, language attitudes, languages in contact, language and gender, language and the law, bilingualism, linguistic politeness, and speech act theory.

SPAN-S 410 The Acquisition of Spanish (3 cr.) P: S326 or equivalent Examines current topics in the acquisition of Spanish. Provides an introduction to research on the first and/or second language acquisition of Spanish and to the pedagogical applications of these findings. Students develop a background in these fields and have opportunities to link theory and practice.

SPAN-S 411 Spanish Culture and Civilization (3 cr.) P: S313 and S363, or consent of instructor. A course to integrate historical, social, political, and cultural information about Spain. PUL=5,1A

SPAN-S 412 Latin American Culture and Civilization (3 cr.) P: S313 and S363, or consent of instructor. A course to integrate historical, social, political, and cultural information about Spanish America. PUL=5,1A

SPAN-S 419 Spanish for Law Enforcement (3 cr.) P: S313 or consent of instructor. Specialized vocabulary necessary for law enforcement professionals in the course of their daily work. Sight and written translation of legal documents, court records, and the language of the courtroom and courtroom procedures. Intensive classroom practice and language laboratory exercises focus on use of specialized vocabulary to help prepare students for communicative competence in this terminology. Information on becoming certified court interpreters and review of federal standards for interpreters. PUL=1A,2

SPAN-S 421 Advanced Grammar and Composition (3 cr.) P: S311 and S313, or consent of instructor. Selected grammar review and intensive practice in effective use of the written language. PUL=2,1A

SPAN-S 423 The Craft of Translation (3 cr.) P: S313 and S323, or consent of instructor. Basic introductory course in translation. The problems and techniques of Spanish/English and English/Spanish translation using a variety of texts and concentrating on such critical areas as stylistics, tone, rhythms, imagery, nuance, allusion, etc. PUL=2,1A,6;RISE-E

SPAN-S 425 Spanish Phonetics (3 cr.) P: S326 or equivalent Intensive patterned pronunciation drills and exercises in sound discrimination and transcription, based on detailed articulatory description of standard Spanish of Spain and Latin America. Attendance in language laboratory required. PUL=1A,2

SPAN-S 427 The Structure of Spanish (3 cr.) P: S313 and S326 or consent of instructor Introduction to Spanish Syntax. Study of the basic principles to express constituency and syntactic dependencies, as well as the mechanism to account for cross-linguistic and cross-dialectal syntactic variation. PUL=2,1A

SPAN-S 428 Applied Spanish Linguistics (3 cr.) P: S313 and S320, or consent of instructor. General aspects of Spanish phonology, morphology, syntax, and semantics as they bear on teaching. PUL=3,1A

SPAN-S 429 Medical Interpreting (3 cr.) P: 300-level Spanish and S319, or consent of instructor. Advanced course for native Spanish speakers or advanced-level students who are considering a career in medical interpreting. Focus on reading, interpreting and translation, as well as intensive practice in interpretation from and into English and Spanish in the health care field. PUL=1A,2

SPAN-S 430 Legal Spanish (3 cr.) P: 300-level Spanish or consent of instructor. Advanced course for native speakers of Spanish or advanced students in Spanish who are considering careers in the legal professions. Course begins with general knowledge of legal Spanish and focuses on reading, communicative activities, interpreting, and translation. PUL=1A,2

SPAN-S 431 Survey of Spanish Poetry I (3 cr.) P: S313 and S360, or consent of instructor. Spanish poetry from its beginnings to contemporary times. Works of medieval, Renaissance, romantic, and contemporary roots. PUL=2,1A

SPAN-S 432 Survey of Spanish Poetry II (3 cr.) P: S313 and S360, or consent of instructor. Spanish poetry from its beginnings to contemporary times. Works of medieval, Renaissance, romantic, and contemporary roots. PUL=2,1A

SPAN-S 441 The Acquisition of Spanish (3 cr.) P: S313 and S360, or consent of instructor. Examines current topics in the acquisition of Spanish. Provides an introduction to research on the first and/or second language acquisition of Spanish and to the pedagogical applications of these findings. Students develop a background in these fields and have opportunities to link theory and practice. PUL=2,1A

SPAN-S 445 Major Dramatists of the Golden Age I (3 cr.) P: S313 and S360, or consent of instructor. Lectures outlining the development of the theater during the Golden Age. Readings selected from the works of Lope de Vega, Tirso de Molina, Juan Ruiz de Alarcon, Calderan. PUL=2,1A

SPAN-S 450 Cervantes' Don Quixote I (3 cr.) P: S313 and S360, or consent of instructor. Intensive reading of Don Quixote, with account of the author's life and thought and discussions of the development of the novel to Cervantes' time. PUL=2,1A

SPAN-S 455 Modern Spanish Drama I (3 cr.) P: S313 and S360, or consent of instructor. Selected readings from the works of representative authors of the eighteenth, nineteenth, and twentieth centuries, with lectures on the development of the Spanish theater. PUL=2,1A

SPAN-S 457 Modern Spanish Novel I (3 cr.) P: S313 and S360, or consent of instructor. Reading of representative nineteenth- and twentieth-century novels and study of development of the novel. PUL=2,1A

SPAN-S 461 Contemporary Spanish Literature I (3 cr.) P: S313 and S360, or consent of instructor. Selected twentieth-century novels, plays, and essays. Historical background and literary movements. PUL=2,1A

SPAN-S 470 Women and Hispanic Literature (3 cr.) P: S313 and S360, or consent of instructor. The Hispanic woman within her cultural context through literary texts. Topics such as women authors, characters, themes, and feminist criticism. PUL=2,1A

SPAN-S 471 Spanish-American Literature I (3 cr.) P: S313 and S360, or consent of instructor. Introduction to Spanish-American literature. PUL=2,1A

SPAN-S 472 Spanish-American Literature II (3 cr.) P: S313 and S360, or consent of instructor. Introduction to Spanish-American literature. PUL=2,1A

SPAN-S 477 Twentieth-Century Spanish-American Prose Fiction (3 cr.) P: S313 and S360, or consent of instructor. Close readings of representative novelists and short story writers, including established authors (Borges, Asturias, Arreola, Carpentier) and promising young writers. PUL=2,1A

SPAN-S 487 Capstone Internship in Spanish (3 cr.) P: Senior standing in Spanish, with authorization. Senior-level option for Spanish majors who must complete a capstone course for the B.A. in Spanish. Students apply the skills gained in undergraduate course work in Spanish to an internship in a professional setting where the use of Spanish is required. Students produce a portfolio, a reflective journal, a written project on the internship, and a final oral presentation. PUL=3,1A

SPAN-S 491 Elementary Spanish for Graduate Students (3 graduate; 4 undergraduate cr.) Introduction to the structure of the language necessary for reading in graded texts of a general nature. Open with consent of instructor to undergraduates who have already completed the language requirement for the B.A. in another language. PUL=1A,5

SPAN-S 493 Internship Program in Spanish (3 cr.) P: junior standing with authorization. Students work in businesses, organizations, or institutions applying their skills in Spanish in order to gain awareness of the uses of Spanish in the workplace. They record and analyze their experiences through logs and meetings with the internship director and write a research paper. Open to IUPUI students only. PUL=4,2

SPAN-S 494 Individual Readings in Hispanic Studies (1-3 cr.) P: S313 with authorization. Topic to be selected by the student with the consent of the Director. Topic may not duplicate the content of an already existing course. May not be taken for graduate credit. Open to IUPUI majors in Spanish only or students in the Certificate in Translation Studies and Interpreting program. PUL=5,2

SPAN-S 495 Hispanic Colloquium (3 cr.) P: S313 or consent of instructor. Topic to be selected by the faculty member offering the course. May be taken twice for credit as long as the topic is different. PUL=2,1A

SPAN-S 496 Foreign Study in Spanish (3-6 cr.) P: authorization of Director. Planning of a research project during the year preceding the summer abroad. Time spent in research abroad must amount to at least one week for each credit hour granted. Research paper must be presented by the end of the semester following foreign study. PUL=1A,5;RISE-I

SPAN-S 498 Capstone Seminar in Spanish (3 cr.) P: Senior standing in Spanish with authorization. Senior-level course for Spanish majors that integrates students' undergraduate study. Students showcase academic progress through a portfolio, a reflective journal, discussions with the faculty capstone director, and a final presentation to students and faculty. PUL=3,2

School of Library and Information Science

Welcome to the IU School of Library and Information Science!

Indianapolis-A Superb Location for Advanced Library Science Education: www.slis.iupui.edu

The Indiana University School of Library and Information Science (SLIS) in Indianapolis is a growing graduate program with emphasis on management of library organizations and technologies. More than 300 graduate students attend courses in Indianapolis or at one of our distance education receiving sites.

IUPUI is a modern urban campus in a model urban setting. Cooperation among business, government, private philanthropy, and educational leaders and innovators has created a city ideal for education. SLIS is tied to this spirit of growth, service, and quality education for not only Indianapolis, but for the state and beyond.

Indiana's future librarians and information specialists, as well as business leaders, physicians, lawyers, nurses, chemists, engineers, teachers, accountants, journalists, and computer programmers will find quality academic options on this campus that combines the strengths of IU and Purdue. In addition to Indiana citizens, we welcome a growing number of students from all other states and nations.

The IUPUI campus is located just off I-70 and I-65 and is adjacent to recently constructed buildings that house government offices, museums, conventions, and entertainment and sporting events. Indianapolis's modern skyline also contains renovated architecture from the early 1800s, including the state's capitol building. The campus is adjacent to the White River and within walking distance of the NCAA Headquarters, the Indiana Historical Society, the Indiana State Library and Museum, the Eiteljorg Museum of Native American Art, the Indiana Convention Center, and the RCA Dome. Professional and amateur venues abound all year. From international jazz gatherings to Olympic swimming competition to professional tennis, football, basketball and baseball to the Indianapolis Symphony and Repertory Theatre-all are only a brief walk from the IUPUI campus.

The School of Library and Information Science has cooperative programs with the Indianapolis Marion County Public Library. These efforts support public awareness of the need for quality library and information services to all populations-young and elderly, rural and urban. Our faculty members are also associated with state and national library education organizations and associations in the promotion of educational standards and guidelines.

Most of the SLIS courses in Indianapolis are conducted in the modern and technologically advanced classrooms and labs located in the University Library and adjacent Education Building. Within the University Library are over 300 computer-equipped work stations from which 700 miles of fiber optic cable lead to library databases, reference and research tools, a video archive, live cable news, and information television.

Faculty use teaching support and delivery systems that allow for online discussion groups and assignments. A growing number of instructors deliver instruction over interactive Web sites and interactive television. The faculty include full-time professors who have both established publication records as well as records of professional service to the field. They are experienced educators and information managers. Students are encouraged to read the research and teaching profiles of the current fulltime faculty as given on the school's Indianapolis Web site.

Students are encouraged to explore a wide spectrum of library professions through their course work and field experiences. The school's curriculum is based on a combination of theory and practice. Internships in application of theory are encouraged. The Indianapolis area as well as cities such as Bloomington, South Bend, Merrillville, Fort Wayne, Evansville, Gary, and Valparaiso offer quality locations for real-world practice experiences. Programs have been ranked in the top ten nationally, including information systems, school library media, and youth services education.

Over 70% of the public librarians in Indiana hold a degree from Indiana University. A growing number have completed all requirements for the Master of Library Science (M.L.S.) from the IUPUI campus. Many librarians across the state have completed courses from the Indianapolis curriculum over distance education. Hundreds in public libraries and school libraries in Indiana have completed the full requirements for certification through a combination of distance education and summer courses at Indianapolis. Over 200 school corporations in Indiana employ a school media specialist who has completed his or her certification through the IU program. Dozens of academic and special librarians hold the IU M.L.S. as a result of courses completed through IUPUI.

All courses for the Masters in Library Science, Specialization in Library Technology Management, dual-degree programs, and certification in public or school librarianship are available through the Indianapolis program. Credits completed at IU Bloomington (maximum of 6) or in another ALA-accredited program (maximum of 6) can be accepted toward the M.L.S. at Indianapolis. Students should consult with their advisor to determine any limitations on such transfers and the best path to follow in order to have a rewarding educational experience.

The school's Web site, www.slis.iupui.edu, will provide revisions and updates to this bulletin. Students are encouraged to visit the site frequently for information on career opportunities, schedules, and frequently asked questions. Notices on job leads, professional meetings, conferences, and operations of the school can be received through the le-mail list at: slis-indy [at] iupui [dot] edu.

School of Library and Information Science-The World of Information

For decades, scholars and futurists have predicted an information revolution. Those predictions have come to life dramatically in recent years. We live in an information age, an age in which the ability to generate and access new knowledge has become a key driver of social and economic growth.

The signs of a new age are everywhere: the World Wide Web and electronic commerce, personal computers in the classroom, interactive media in the home, virtual universities, electronic publishing, and digital libraries. The statistics are irresistible: the amount of information produced in the last decade alone is greater than all the information created in past millennia. The rhetoric of the Information Age has finally become reality, and that reality translates into unprecedented career opportunities for information professionals who know how to organize, manage, and exploit knowledge assets and who combine analytic and technical skills with a sense of the strategic value of information to organizations of all kinds.

Today's information professionals do not merely store and locate information; they also analyze and synthesize raw data to produce customized, value-added services and products for a diverse clientele. The field offers a kaleidoscope of career tracks from which to choose: Web design, information systems analysis, database design and marketing, information brokering, medical informatics, systems librarianship, competitor intelligence analysis, usability testing. In a sense, the opportunities are limited only by the imagination.

Librarians are active agents of social change and early adopters of new information and communication technologies. The range of materials and media they handle has diversified enormously in the last decade. Access to full-text databases, networked resources, and multimedia information systems has become the norm in a matter of years, fueled in no small measure by the prodigious growth of the Internet and the World Wide Web. The next few years promise even greater advances-global digital libraries, intelligent interfaces, interactive books, collaboratories, intelligent agents, and virtual reality. Indiana University's School of Library and Information Science is responding to the challenge with a flexible and forward-looking curriculum, which stresses those social, behavioral, and cultural aspects of information design and use.

Overview

Mission

The Indiana University School of Library and Information Science is committed to excellence and innovation in education of information professionals, the creation of new knowledge, and service to a diverse society in a dynamically changing global information environment.

To accomplish this mission, the School has adopted as its goals:

- To educate students for fulfilling careers, professional librarianship, lifelong learning, social responsibility, and technological mastery;
- To contribute new knowledge and advance science, with a particular interest in user-centered approaches, social, behavioral, and technological perspectives, interdisciplinary collaboration, and the role of information in society;
- To serve society, our state and local constituencies, and the library and information science profession;
- To create a climate of intellectual engagement, openness, and respect within the School.

The school provides students with an understanding of the conceptual foundations of librarianship and information science and of the multifaceted nature of the wider information environment. It prepares students with a rich mix of knowledge, attitudes, and skills necessary to function as critical thinkers and effective communicators. Graduates should have a strong grounding in theory and the ability to translate theory into effective practice.

To provide a proper setting for the implementation of this mission, the school promotes the advancement of knowledge, both theoretical and applied, through active programs of research and scholarly publication. The school also provides service within the university and to the local, national, and international communities through contributions to, and leadership in, associations and organizations and by assuming consulting, advising, publishing, and other professional roles. This leadership by example is considered essential in providing a framework in which the goals of the program can be pursued effectively.

The school also provides opportunities for students to seek educational experiences involving the development of the specialized skills currently emphasized in information-providing agencies. The development of these skills often highlights current trends in information systems and information management that serve to assist the student in career planning. Such educational experiences are gained through selection of elective courses from the School of Library and Information Science, through cooperation with other graduate programs of the university, and through seminars, workshops, conferences, group projects, internships, and practicum experiences.

Accreditation & Licenses

The School of Library and Information Science (SLIS) at Indiana University ranks consistently in the top five or ten programs in North America, and its master's and doctoral enrollments are among the largest in the nation. In a recent six-year survey of scholarly productivity and impact, the school was ranked number one (Library & Information Science Research, 2006). The M.L.S. (Master of Library Science) degree has been accredited continuously since 1953.

The ALA-accredited M.L.S. is the professional entry degree for those seeking positions in academic, public, school, or corporate libraries. Graduate courses may be completed within the M.L.S. curriculum to meet state requirements for certification as a school library media specialist or public librarian. In all library and information areas the M.L.S. is the foundational degree for those who seek management and directorship positions.

Dual-degree and special certificate programs are available at IUPUI between SLIS and the Department of History, the School of Public and Environmental Affairs, the School of Law, Philanthropic Studies, and other disciplines. Future dual-degree programs between SLIS and Medical Informatics and SLIS and Museum Studies are in development.

SLIS courses can be taken in conjunction with graduate-level degrees in informatics, education, fine arts, and business as these programs often allow approved graduate credits from SLIS to count as part of their graduate degree. Interested students should contact the SLIS Director of Student Services for details.

The IU School of Library and Information Science is a member of the Association for Library and Information Science Education, the American Library Association, the American Society for Information Science, and the Special Libraries Association. It maintains affiliation with the Indiana Library Federation, the Association of Indiana Media Educators, and the Indiana Cooperative for Libraries (INCOLSA).

www.slis.iupui.edu

History

The School of Education offered the first organized library science curriculum at Indiana University, a program for the preparation of school librarians, in the summer of 1930. In 1938, this curriculum was expanded and made available in the regular school year as well as during the summer session.

In 1947, the Division of Library Science was established within the School of Education. A basic undergraduate curriculum in library science concerned with the fundamental processes common to all types of libraries was offered as a minor within the four-year program leading to the Bachelor of Arts or Bachelor of Science degree in the College of Arts and Sciences or to the Bachelor of Science in Education degree in the School of Education.

A five-year program leading to the Master of Arts with a major in library science, granted by the Graduate School, was created in 1949, and a Ph.D. program in library and information science was established in 1964. Information on the Ph.D. in library and information science can be located at www.slis.indiana.edu.

In 1966, the Trustees of Indiana University established the Graduate Library School and the professional degree Master of Library Science, replacing the Master of Arts degree granted by the Graduate School. In 1980, the name of the school was officially changed to School of Library and Information Science (SLIS). In 1985, an extensive menu of graduate courses was added to the Indianapolis campus leading to the M.L.S. degree. All graduate courses leading to the accredited M.L.S. are now offered on an annual basis, including summers, at the IUPUI campus as well as at Bloomington.

Admission

Bachelor's Degree Students holding a bachelor's degree from an accredited four-year collegiate institution are eligible to apply for admission. Applicants in the final year of their undergraduate program may apply and be granted admission conditional upon being awarded the bachelor's degree.

We welcome a wide diversity in undergraduate backgrounds and academic degrees. Most students who seek a graduate degree in library and information science come from successful undergraduate studies in English, history, general liberal arts, and education. We also encourage students from the sciences, the arts, business, and engineering to apply. Over 25% of those entering SLIS hold a master's degree, and a few hold a Ph.D. The Master of Library Science degree provides an excellent set of academic credentials to enhance another academic degree, and often increases employment possibilities.

The admissions committee reserves the right to review the content of specific transcripts. Below average academic performance in some courses may be a factor in denial of admission. A large number of credits, over 20 percent of the undergraduate degree, earned for methods or practice-based courses in business, language, music, or education may lead to a recommendation that additional liberal arts courses be completed before admission or before the M.L.S. is granted.

GPA An applicant must have a minimum grade point average (GPA) of 3.0 on a 4.0 scale or its equivalent in the total undergraduate program, or an average of 3.2 in the latest graduate degree or representative graduate hours (usually a minimum of 30 semester hours) completed.

GRE or GMAT If the applicant does not meet the SLIS cumulative grade point average requirements, he or she may submit Graduate Record Exam (GRE) scores for consideration to justify admission. Scores should be recent and based on exams completed within three years prior to the application. Minimum GRE scores which will be considered for applicants with low grade point average are 500 verbal on old scale (new scale 153), 500 quantitative on old scale (new scale 144), and 4.5 written analytical. See www.gre.org for test schedules.

A minimum GMAT score of 550 achieved on an exam completed no more than three years prior to application may serve to justify further consideration for admission for the student who holds a GPA below entry requirements. The Graduate Management Admissions Test (GMAT) may be submitted in place of the GRE. For information on the GMAT call 1-800-462-8669 or visit www.gmat.org. In the statement of goals or a separate letter of application, a student who has a GPA below that of the stated requirements is encouraged to address the reasons for this deficiency.

Letters of Recommendation Letters of recommendation should be submitted by three individuals who are familiar with the applicant's academic abilities. Letters from employers and information professionals who are familiar with the applicant's intellectual abilities and work habits are also acceptable.

A personal goals essay of at least 500 words is required. The essay must indicate a student's academic and professional goals appropriate to the desired SLIS degree program. The writing skills indicated in this statement are also considered as part of the admission decision.

We welcome applications from students of all backgrounds. Indiana University prohibits admission

decisions being made on the basis of arbitrary consideration of such characteristics as age, disability, ethnicity, gender, marital status, national origin, race, religion, sexual orientation, or veteran status.

Matriculation Applicants may enter SLIS master's degree programs at the beginning of fall semester, spring semester, or the first and second (eight-week) summer sessions.

Admission Categories

Admission A student's full admission status is valid for one year, with an additional year available upon petition. If an admitted student fails to matriculate within the allowed time, the admission status is terminated, and the student must reapply.

Probationary Admission The SLIS admissions committee may grant probationary admission to a student who fails to meet one or more of the admission requirements listed above, if, in the judgment of the committee members, there is sufficient other evidence of probable success in the degree program. Probationary admission carries a requirement that the student maintain a minimum GPA of 3.0 throughout the program.

Other conditions of the probationary admission, if any, will be stated in the admission letter. The student's progress will be monitored throughout the program to ensure that the conditions are maintained. If, at any time in the program, the student does not meet the conditions of the probation, admission will be terminated.

Applicants who are denied admission to a SLIS graduate program may not take course work in SLIS without the permission of the dean of the school.

SLIS Nondegree Student Status Students with an undergraduate degree may be permitted to take up to 6 credit hours of SLIS graduate course work prior to admission that could count towards their degree if admitted. Nondegree students must complete all necessary prerequisites before taking any course. Nondegree students may be removed from any SLIS course if their place is required for an admitted degree-seeking student. SLIS S401 is a prerequisite course to our degree programs, and does not count towards the credits for the degrees offered. Undergraduate and nondegree students may take SLIS S401.

Advising

Upon admission, each student is assigned an official faculty advisor whose name is given in the admission letter. Students should meet with their faculty advisors to discuss academic course planning and professional goals. Advisor signatures are also required for various approval forms. Students should carefully plan their course selections, noting appropriate prerequisites and required sequences.

Application Procedures for International Students

International applicants to SLIS programs in Indianapolis will need to complete an application through the Office of International Affairs. Visit this Web site to begin the application process; www.iupui.edu/~oia/AD/admission_step1.html.

Payment of an application fee is required.

All international applicants for any SLIS degree program must submit a recent official Graduate Record Examination (GRE) General Test (aptitude). The test must have been taken within three years before application. Minimum GRE scores to meet criteria for consideration of admission are: verbal (500), quantitative (500), and written analytical (4.5). Educational Testing Service provides GRE information and application forms.

Educational Testing Service
P.O. Box 6000
Princeton, NJ 08541-6000
www.gre.org

International applicants whose first language is not English must submit recent official scores from the Test of English as a Foreign Language (TOEFL). A minimum TOEFL score of 600 is required for admission to SLIS graduate programs. Educational Testing Service administers the TOEFL once each month at locations throughout the world. Information about TOEFL administration schedules may be obtained from Educational Testing Service at the address given above.

Students whose first language is not English must also take an English language placement test upon arrival at Indiana University. The results of this test are used to determine what, if any, remedial English courses must be successfully completed before graduate study begins. International students should understand that all admissions are granted conditionally, upon verification of English language proficiency, and that enrollment in graduate course work is not permitted, or is limited, until all language deficiencies have been removed.

Additional Indianapolis campus information for international applicants can be found at the IUPUI Office of International Affairs.

Application Deadlines for International Students

The SLIS admissions office will not act upon applications until all required documents have been received (including transcripts, letters of recommendation, application fee, and GRE and TOEFL test scores as required). Ordinarily, applications for degree programs are processed within one month of being completed and received at SLIS. They are then forwarded to the Office of International Affairs for review. International applicants must comply with the deadline dates indicated in Office of International Affairs Web site:

Office of International Affairs
902 W. New York Street, ES 2126
Indianapolis, IN 46202
phone: (317)274-7000
fax: (317)278-2213
e-mail: oai@iupui.edu
www.iupui.edu/~oia

Graduate Programs

General Requirements

Master of Library Science Degree Program (36 credit hours + S401)

Note: Exceptions to degree requirements must be approved in writing by the student's faculty advisor and approved by the dean. Approval forms for course

waivers or transfer credit are available in the SLIS office. Most forms are also available on the SLIS Web site. It is the student's responsibility to ensure that written approval for any program exception is submitted to the SLIS administrative office for placement in the student's academic file.

A waiver does not grant academic credit toward the degree. All 36 graduate credits for the M.L.S. must be completed from the SLIS graduate curriculum. Up to six graduate credits from another ALA-accredited master's program may be transferred toward the IU M.L.S. provided the content is current, with high student performance, and has the approval of the School's dean.

Computer-Based Information Skills

The School of Library and Information Science requires that students be computer, network, and information literate and be familiar with basic operations that will be used throughout their course work. This knowledge is prerequisite to many courses in the SLIS curriculum and will form the basis for further learning and skill development throughout students' academic and professional careers. To acquire this base, each student must complete, or apply and receive a waiver for, the SLIS course S401 Computer-Based Information Tools.

Normally, the course is completed during the first semester of enrollment. The course is to be completed or a waiver obtained before the student has completed nine graduate credits toward the M.L.S. This 3-credit, undergraduate-level course is a prerequisite for many courses in the SLIS curriculum, although it does not count toward the credit hours required for a SLIS graduate degree.

Probation Policy

In addition to the probationary admission described earlier, a SLIS student may be placed on probation at any point in the program when a failure to achieve a minimum cumulative grade point average (GPA) of 3.0 occurs. The student will be assigned a time frame in which the required 3.0 GPA must be restored. Failure to achieve a 3.0 GPA within the required time or to maintain the 3.0 GPA for the remainder of the degree program will result in dismissal from the graduate program.

In no case is a master's degree awarded for course work in which a cumulative grade point average of less than 3.0 has been achieved. Students will not be permitted to continue graduate course work beyond the number of credit hours required for the degree solely in an attempt to raise the grade point average to the required level. Students are expected to maintain a 3.0 GPA each semester.

Time Requirements

All requirements for the M.L.S. degree must be met within five consecutive calendar years from the date of completion of the first credited course. In some circumstances, a one-year extension of the five-year time frame may be given, but in no case will a longer extension be granted. Application for the SLIS master's degree must be submitted early in the fall semester for candidates planning to graduate in December, and early in the spring semester for candidates planning to graduate in May, June, or August.

Foreign Language

Although language skills are recognized as significant in, and in some cases essential to, the information professions, and although such courses may be taken through the university, credit earned for such courses may not be applied toward the M.L.S. degree.

Admissions

We welcome applications from students of all backgrounds. Indiana University prohibits admission decisions being made on the basis of arbitrary consideration of such characteristics as age, disability, ethnicity, gender, marital status, national origin, race, religion, sexual orientation, or veteran status.

Priority Application Deadlines

Summer I: **March 15**

Summer II: **May 15**

Fall: **July 15**

Spring: **November 15**

Application Process

Applicants must submit the following:

1. The Online Admissions Application and a $50 applicantion fee for U.S. citizens
2. Three (3) letters of recommendation
3. Official transcripts from all universities or colleges attended (with the exception of IU campuses)
4. A statement of personal goals
5. If GPA requirements* are not met, submit GRE (500 verbal, 500 quantitative and 4.5 written analytical) or GMAT scores (score of 550) from the past three years.

*An applicant must have a minimum grade point average (GPA) of 3.0 on a 4.0 scale or its equivalent in the total undergraduate program, or an average of 3.2 in the latest graduate degree or representative graduate hours (usually 30 semester hours) completed.

Disability Accommodation

Accommodations for students with disabilities are made in accordance with University policies and procedures through the University's Adaptive Educational Services office (http://life.iupui.edu/aes/) at 317-274-3241.

If you need additional information about SLIS or assistance with the application process, please contact the SLIS office, directly by phone (866-758-6254 / 317-278-2375) or email (slisindy@iupui.edu).

International Applicants

Given the move toward three-year bachelor's degrees throughout much of the world, including the 40-plus European nations participating in the Bologna process, many American universities are reconsidering their previous insistence on a four-year bachelor's degree (or equivalent) to be considered eligible for admission to an American graduate program. In this light, IUPUI has established the following standard for minimum eligibility for admission to its Indiana University graduate programs.

Criteria for Admission

Graduate applicants are expected to have completed the equivalent of a U.S. Bachelor's degree in order to be considered for graduate study, such as:

- Have completed at least 16 years of primary +secondary+tertiary education and have earned a university first degree, OR
- Have completed a university first degree that grants eligibility for graduate study in a recognized university in that same country

Persons without this background cannot be accepted for graduate study, regardless of the name of any first degree they may hold.

International applicants must submit both GRE or GMAT and TOEFL (Test of English as a Foreign Language) scores. To gain admission, international applicants must earn the minimum scores listed below.

TOEFL

Paper Test: minimum 600

Computer Test: minimum 250 (or minimum 100 for new test Fall 2005)

GRE*

Verbal: minimum 500

Quantitative: minimum 500

Analytic: minimum 4.5

GMAT: minimum 31 in each area

*IU Institutional Code: 1325, SLIS Library Science Code: 4701

International applicants must comply with the deadline dates indicated in Office of International Affairs Web site at www.iupui.edu/~oia. Contact the Office of International Affairs at:

IUPUI Office of International Affairs

902 W. New York St., ES 2126

Indianapolis, IN 46202 USA

Email: intlaff@iupui.edu

Certificate Programs

Public Librarianship

Students who desire certification for positions in Indiana public libraries must meet the requirements established by the State Library Certification Board. For complete information, contact:

Indiana Library Certification Board Indiana State Library
140 N. Senate
Indianapolis, IN 46204
phone: 1-800-451-6028

http://in.webjunction.org/667/-/articles/content/4079938

Teacher of Library Media (K-12)

A teaching license is required for employment as a school media specialist in any state. Individuals who hold a valid teaching license may add the certification for Teacher of Library Media with emphasis in school media information technology by successful completion of the following 27 credits. The student must meet the graduate admission requirements for the M.L.S. program at either Indianapolis or Bloomington.

Contact Dr. Marilyn Irwin, Director of Library Media Education at (317) 278-2376 or irwinm@iupui.edu.
Full course descriptions are available at www.slis.iupui.edu orwww.slis.indiana.edu. Successful completion of 27 credits for library media may also count toward the 36 credit hour Master of Library Science (M.L.S.), accredited by the American Library Association. Of the nine additional credits to complete the M.L.S., S502 (formerly L528) and S505 (formerly L651) or S506 (formerly L509) will be required.

Public Librarianship

Students who desire certification for positions in Indiana public libraries must meet the requirements established by the State Library Certification Board. For complete information, contact the:

Indiana Library Certification Board Indiana State Library
140 N. Senate
Indianapolis, IN 46204
phone: 1-800-451-6028

http://in.webjunction.org/667/-/articles/content/4079938

CLASS C/PA1—Required for Directors of Public Libraries Serving less than 10,000 Population Requirements:

1. Bachelor degree from an accredited college or university, and
2. Fifteen semester credit hours of required library courses—collection development, reference and information sources, public library administration, children's work, and cataloging/classification.

CLASS B/PL2—Required for Directors of Public Libraries Serving 10,001 to 39,999 Population Requirements:

1. Graduation from an accredited college or university, and
2. A graduate degree from an American Library Association (ALA) accredited library science school.

CLASS A/PL1—Required for Directors of Public Libraries Serving Over 40,000 Population Requirements:

1. Graduation from an accredited college or university, and
2. A graduate degree from an American Library Association (ALA) accredited library science school, and
3. Ten years of library experience, or six years of library experience that includes three years of supervising professional staff.

Teacher of Library Media (K-12)

http://slis.iupui.edu/programs/school.asp

A teaching license is required for employment as a school media specialist in any state. Individuals who hold a valid teaching license may add the certification for Teacher of Library Media with emphasis in school media information technology by successful completion of the

following 27 credits. The student must meet the graduate admission requirements for the M.L.S. program at either Indianapolis or Bloomington. Contact Dr. Marilyn Irwin, Director of Library Media Education at (317) 278-2376 or irwinm@iupui.edu. Full course descriptions are available at www.slis.iupui.edu or www.slis.indiana.edu. Successful completion of 27 credits for library media may also count toward the 36 credit hour Master of Library Science (M.L.S.), accredited by the American Library Association. Of the nine additional credits to complete the M.L.S., S502 (formerly L528) and S505 (formerly L651) or S506 (formerly L509) will be required.

Eighteen required credits (except S605, these courses are offered over the Virtual Indiana Classroom [VIC] interactive television system and are received at Indianapolis, Bloomington, Fort Wayne, Gary, New Albany, and South Bend or as web-based courses):

- S501 Reference (3 cr.; formerly L524)
- S504 Cataloging (3 cr.; formerly L520)
- S571 Materials for Youth (3 cr.; formerly L533)
- S574 Information Inquiry for School Teachers (3 cr.; formerly L551)
- S605 Internship (in school library media management; 3 cr.; formerly L596)
- S671 School Media (3 cr.; formerly L553)

Plus 9 credits in application of technology to instruction from courses listed below. Check schedule for selected courses offered via distance education over the Internet ; see descriptions at http://www.eduscapes.com/iupui/):

- S532 Information Architecture for the Web (3 cr.; formerly L571)
- S533 Online Searching (3 cr.; formerly L570)
- S554 Library Systems (3 cr.; formerly L526)
- S572 Youth Services (3 cr.; formerly L535)
- S573 Education of Information Users (3 cr.; formerly L554)
- S603 Workshops such as Electronic Materials for Children, or Technology Rich Learning, or Video Production, or Grant Writing (1-3 cr.; formerly L595)
- S621 Audio and Video Sources (3 cr.; formerly L552)
- S622 Resources and Technologies for People with Disabilities (3 cr.; new course formed from L620)
- S652 Digital Libraries (3 cr.; formerly L566)

Individuals who do not hold a valid teaching license may establish such as Teacher of Library Media by completing the above 27 credits and 15 credits from the menu of education courses below, along with passing the National Teacher Exams (including the specialization in school media), and successful completion of student teaching in school media which includes five credits in a secondary school and five credits in an elementary school. All education credits and all SLIS credits are to be completed prior to starting the student teaching experience. The student must submit passing scores for the National Teacher Exams, Praxis I and II as part of their application to the student teaching program. Placement for student teaching is through the IU School of Education in Bloomington.

Educational Psychology – One 3 credit course from the following:

- P444 Applied Cognition and Learning Strategies
- P510 Psychology in Teaching
- P514 Life Span Development
- P515 Child Development
- P516 Adolescent Development
- P525 Psychological Issues in Education
- P530 Instructional Psychology
- P540 Learning and Cognition in Education
- P545 Educational Motivation
- P575 Developing Human Potential

Philosophy of Education – One 3 credit course from the following:

- H340 Education and American Culture
- H510 Foundations of Educational Inquiry
- H520 Education and Social Issues
- H530 Philosophy of Education
- H538 Critical Thinking and Education
- H540 Sociology of Education
- H560 Education and Change in Societies

Curriculum and Technology – Two 3 credit courses from the following:

- W310 Computer-Based Teaching Methods
- E535 Elementary School Curriculum
- J500 Instruction in the Context of Curriculum
- J630 Curriculum Development and Theory
- K505 Intro to Special Education for Graduate Students
- K510 Assistive Technology in Special Education
- R503 Application of Instructional Media and Technology
- R505 Workshop in Instructional Systems Technology
- R547 Computer-Mediated Learning
- S503 Secondary School Curriculum
- W531 Computers in Education
- W540 Computers in the Curriculum

Reading and Literacy – One 3 credit course from the following (L numbered courses are from Education, not SLIS):

- L500 Instructional Issues in Language Learning
- L501 Critical Reading K-12
- L504 Learner Literacy Difficulties
- L511 Advanced Study in Teaching of Writing in Elementary Schools
- L512 Advanced Study in Teaching of Writing in Secondary Schools
- L517 Advanced Study of Teaching in Reading
- L524 Language Education Issues in Bilingual and Multicultural Education
- L545 Advanced Study of Teaching Elementary Reading
- L559 Trade Books in the Elementary Classroom
- L567 Media in the Teaching of English
- L645 Organization and Administration of a School Reading Program

Monday-Thursday: 8:00 AM to 6:00 PM
Friday: 8:00 AM to 5:00 PM
Saturday & Sunday: Closed

Degree Programs

Master of Library Science

- Specialization in Library Technology Management

Dual Degree Programs

- Master of Library Science-Master of Arts in History
- Master of Library Science-Master of Science in Health Informatics
- Master of Library Science-Master of Arts in Philanthropic Studies
- Master of Library Science-Law (J.D.)

Other Programs

- Master of Library Science-Certificate in Public Management
- Master of Library Science-Certificate in Nonprofit Management
- Executive Management in Library Science Certificate

Dual Degree Programs

Note: In addition to the dual programs described below, cooperative programs in medical informatics, health librarianship, museum management, and educational leadership are in development. Contact the director of student services or the executive associate dean for details.

Goals

- To expand the career options for IU SLIS graduate student through cooperative academic programs that can be developed specifically at Indianapolis because of the distinctive professional program on that campus.
- Establish a stronger cooperative base between SLIS at Indianapolis and the other prominent academic units on the IUPUI campus.

General Criteria for SLIS Dual Programs

- The graduate student must apply and meet admission requirements for both programs within the same academic year.
- A grade point average of 3.0 or higher must be maintained.
- The student is required to meet requirements for SLIS S401 or gain a waiver for such computer-based skills.
- The student is required to complete a minimum of 30 graduate credits from SLIS, including courses to satisfy the five core foundation areas.
- Dual-degree programs are “campus-specific,” meaning the student is expected to complete a majority of the graduate credits in SLIS from the Indianapolis campus.
- The joint degree is subject to the admission and course requirements as approved by that unit in cooperation with SLIS.
- Students will have an advisor from both units represented in the dual-degree program.
- The dual degrees or certificates are award simultaneously.
- Some dual-degree programs allow for six graduate credits of internship, unless otherwise restricted.

M.L.S. - Law (J.D.)

Designed for the student seeking directorship in an academic law library or management of a corporate law library. Credentials for this dual program are also important for advanced reference and electronic document management in a legal setting. Courses and internships will guide students to specialize in copyright law and issues related to intellectual property and intellectual freedom.

This is a 114 credit hour program.

Course Requirements:

From SLIS, 30 graduate credits including:

Foundations (15 credits):

- S501 Reference (Formerly L254)
- S502 Collection Development and Mangement (Formerly L528)
- S503 Organization and Representation of Knowledge and Iformation(Formerly L505)
- S504 Cataloging (Formerly L520)
- S551 Library Management (Formerly L527)
- S552 Academic Library Management (Formerly L550)
- S505 Evaluatino of Library Sources and Services (Formerly L651)
- S506 Introduction to Research (Formerly L509)
- S519 Evaluation of Information Systems (Formerly L643)

Library History and Literature (6 credits):

- S605 Internship (Permission of faculty advisor; Formerly L596)
- S654 Law Librarianship (Formerly L530)

Information Technologies (9 credits):

- S522 Social Science Information (P: S401 & S501)
- S523 Science and Technology Information (P: S401 & S501)
- S525 Government Information(P:S401 & S501)
- S526 Business Information (P: S401,& S501)
- S533 Online Searching (P; S401)
- S541 Information Policy
- S640 Seminar Intellectual Freedom (P: 9 SLIS hours)

Also 84 credit hours is required from Law School for more requirements.

http://indylaw.indiana.edu
SLIS Advisor: Dr. Tomas Lipinski tlipinsk @iupui.edu

M.L.S. - M.A. in History

Interest in public history, genealogy, historic preservation, and archives and museum administration creates a demand for professionals with expertise in both historical research and information management. The dual M.L.S.–M.A. in history program requires completion of a minimum of 53 credit hours of graduate course work.

Students must apply for admission to the master's programs of both the School of Library and Information Science and the Department of History and meet the admission criteria established for each. The two degrees must be awarded simultaneously.

This is a 53 credit hour program.

30 SLIS credit hours

:

Prerequisite:

- S401 Computer Based Information Tools (3 credit Pass/Fail)

Foundations (15 credits):

- S501 Reference (Formerly L524)
- S502 Collection Development and Management (Formerly L528)
- S503 Organization and Representation or S504 Cataloging (Formerly L505)
- S505 Evaluation of Library Sources and Services or S506 Introduction to Research (Formerly L651)
- S551 Library Management or S552 Academic Library Management (Formerly L527)

Library History and Literature (6 credits): SLIS in library history and literature from the following:

- S521 Humanities Information (Formerly L623)
- S522 Social Sciences Information (Formerly L625)
- S525 Government Information (Formerly L628)
- S582 Preservation (Formerly L514)
- S623 Genealogy and Local History (Formerly L620)
- S652 Digital Libraries (Formerly L566)
- S680 The Book to 1450 (Formerly L588)
- S681 The Book 1450 to Present (Formerly L589)

Information Technologies (9 credits):

- S532 Information Architecture for the Web (Formerly L571)
- S533 Online Searching (Formerly L570)
- S541 Information Policy (Formerly L563)
- S554 Library Systems (Formerly L526)
- S556 Systems Analysis and Design (Formerly L545)
- S605 Internship (Formerly L596)

A minimum of 23 credit hours is required in the Department of History for the Master of Arts degree, including H547.

SLIS Advisor: Dr. Rachel Applegate, rapplega@iupui.edu

M.L.S. - M.A. in Philanthropic Studies

Designed for the student seeking a management career with libraries and other nonprofit institutions. Content includes gaining expertise in management of special library programs, fund-raising and endowment management, capital project management, and leadership in academic, corporate or large public libraries.

This is a 51 credit hour program.

From SLIS 30 Graduate credit hours

Prerequiste:

- S401 Computer Based Information Tools (3 credits-Pass /Fail)

Course Requirements:

Foundations (15 credit hours)

- S501 Reference (P or C: S401; Formerly L524)
- S502 Collection Development and Management (Formerly L528)
- S503 Organization and Representation of Knowledge and Information (Formerly L505)
- S504 Cataloging (P or concurrent: S401; Formerly L520)
- S551 Library Management (Formerly L527)
- S506 Introduction to Research (P: S401, S501 & S502; Formerly L509)

General Electives (6 credit hours)
From Philanthropy, 21 graduate credits including:

- A509 Cross-Cultural Dimensions,
- H511 History of Philanthrophy (United States),
- P512 Human and Financial Resources in Philanthropy,
- P521 Nonprofit and Voluntary Sector,
- P523 Civil Society and Public Policy,
- P542 Ethics and Values in Philanthrophy,
- P590 Internship in Philanthropic Studies.

For more information, visit www.philanthropy.iupui.edu.

M.L.S. - M.S. in Health Informatics

Designed for the student seeking a career in the field of health information management with opportunities in health sciences libraries, academia, information technology (IT), hospital management, hospital information systems, corporate research centers, and corporate IT.

This is a 60 credit hour program.

Course Requirements:

30 Credit Hours SLIS + S401

Prerequistie (3 credits):

- S401 Computer Based Information (Pass/Fail)

SLIS Requirements (18 credits):

- S501 Reference (Formerly L524)
- S502 Collection Development and Mangement (Formerly L528)
- S503 Organization and Representationof Knowledge and Info. (Formerly L505)
- S506 Introduction to Research (Formerly L509)
- S533 Online Searching (Formerly L570)
- S653 Health Sciences Librarianship (Formerly L559)

Directed SLIS Electives (Minimum 12 credits):

- S505 Evaluation of Library Sources and Services (Formerly L651)
- S511 Database Design (Formely L546)
- S519 Evaluation of Information Systems (Formerly L643)
- S573 Education of Information Users (Formerly L554)
- S604 Consumer Health Informatics (Formerly L597)
- S622 Resources and Serivces for People with Disabilities (Formerly L620)

SLIS Program Electives (Maximum 9 credits):

- S504 Cataloging (Formerly L520)
- S516 Human Computer Interaction (Formerly L542)
- S517 Web Programming (Formerly L548)
- S523 Science and Technology Information (Formerly L624)
- S532 Information Architecture for the Web (Formerly L571)
- S541 Information Policy (Formerly L563)
- S554 Library Systems (Formerly L526)
- S556 Systems Analysis and Design (Formerly L545)
- S573 Education of Information Users (Formerly L554)
- S605 Internship in Library and Information Science (Permission of faculty advisor; Formerly L596)
- S652 Digital Libraries (Formerly L566)

Informatics Requirements

24 graduate credits plus 6 thesis credits.

See the School of Informatics Health Informatics Web site for specific requirements.

SLIS Advisor: Dr. Katherine Schilling (katschil@iupui.edu)

Master of Library Science

Note: All course selections, both foundation and elective, are to be made in consultation with the faculty advisor. The abbreviation “P” refers to course prerequisite or prerequisites; the abbreviation “C” refers to course corequisites (required courses that may be taken concurrently).

Prerequisite

- S401 Computer-Based Information Tools (3 cr.) or waiver (www.slis.iupui.edu/courses/l401_waiver.html)

Foundations (15 credit hours)

A candidate for the Master of Library Science degree must complete one course from each of the following areas. Additional courses given may be completed as electives, although the student is encouraged to discuss such electives with their academic advisor. Each course listed is for three graduate credits. “P” means prerequisite. “C” means completed concurrent with the course.

Assist and Educate Users of Libraries and Information Centers

- S501 Reference (P or C: S401; (formerly L524)

Develop and Manage Library Collections

- S502 Collection Development and Management (formerly L528)

Organize and Represent Information Resources

- S503 Organization and Representation of Knowledge and Information (formerly L505)
- S504 Cataloging (P: S401; (formerly L520)

Apply Management and Leadership Skills

- S551 Library Management (formerly L527)
- S552 Academic Library Management (new course formed from L550)
- S553 Public Library Management (new course formed from L550)
- S671 School Media (P or C: S501, S571, and S574; formerly L553)

Conduct and Analyze Research

- S505 Evaluation of Library Sources and Services (P: S502; formerly L651)
  S506 Introduction to Research (P: completion of 6 SLIS graduate credits, S501 and S502 recommended, or consent of instructor)
  S519 Evaluation of Information Systems (P: S401; formerly L643))

M.L.S. Elective Courses

In addition to the five courses (15 credit hours) taken from the foundations, students must select a minimum of 21 credit hours of elective courses to complete the 36 credit hours required for the M.L.S. degree.

These electives are to be chosen in consultation with the student’s faculty advisor in order to best satisfy the student’s academic and professional goals. Elective courses for the M.L.S. degree may be chosen from the foundations or the large pool of other SLIS courses available to all master’s degree students.

M.L.S. Degree Requirements

A candidate for the Master of Library Science degree must complete 36 semester credit hours of graduate course work, all of which must be taken from the IU School of Library and Information Science. A maximum of 6 graduate credit hours from another ALA-accredited master’s degree program may, with the permission of the dean, be applied to the M.L.S. degree.

Specialization in Library Technology Management Prerequisite

- S401 Computer-Based Information Tools (3 cr.) or waiver (www.slis.iupui.edu/courses/l401_waiver.html)

Foundations (15 credit hours)

One course from each area:

Assist and Educate Users of Libraries and Information Centers

- S501 Reference (formerly L524)

Develop and Manage Library Collections

- S502 Collection Development and Management (formerly L528)

Organize and Represent Information Resources

- S503 Organization and Representation of Knowledge and Information (formerly L505)

Apply Management and Leadership Skills

- S551 Library Management (formerly L527)

- S552 Acadmenic Library Management (new course formed from L550)
- S553 Public Library Management (new course formed from L550)
- S671 School Media (P or C: S501, S571, and S574; formerly L553)

Conduct and Analyze Research

- S505 Evaluation of Library Sources and Services (P: S502; formerly L651)
- S506 Introduction to Research (P: S401 and completion of 6 credit hours in SLIS, S501 and S502 recommended, or consent of instructor; formerly L509)

Specialization Core (9 credit hours)

- S504 Cataloging (formerly L520)
- S533 Online Searching (formerly L570)
- S554 Library Systems (P or C: S401; formerly L526)

Specialization Electives (15 credit hours)

Technology application courses selected from the following or chosen in consultation with the student's faculty advisor:

- S511 Database Design (formerly L546)
- S516 (Human-Computer Interaction (formerly L542)
- S532 Information Architecture for the Web (formerly L571)
- S556 Systems Analysis and Design (formerly L545)
- S561 User Interface Design for Information Systems (formerly L578)
- S603 (SLIS technology-based workshops, up to 6 credit hours) as approved by advisor (formerly L595)
- S621 Audio and Video Sources (formerly L552)
- S652 Digital Libraries (formerly L566)

Outside Courses: up to 6 graduate credits with advisor's approval (see Course Waiver Request- http://www.slis.iupui.edu/courses)

- **General Electives (6 credits)**
- S605 Internship options for up to 6 credit hours are avaiable and should involve application of technology skills (Formerly L596)

Other Programs

- Executive Management in Library Science Certificate
- Master of Library Science-Certificate in Nonprofit Management
- Master of Library Science-Certificate in Public Management

Executive Management in Library Science Certificate

The Executive Graduate Certificate in Library Management is designed for students who have completed a Master's degree in Library or Information Science and wish to obtain organizational management skills through the SPEA certificate.

Career employees of public and private sector agencies seeking courses in public management, and especially those changing from professional or technical roles to managerial roles, will find this certificate program beneficial.

This is a 15 credit hour program.

All SPEA Courses are offered both online as well as in residence.

Admission Eligibility

1. All applicants must have completed a Master's Degree in Library and Information Sciences.
2. Complete the online application.*
3. Admission requires only the approval of the respective graduate program director or SPEA campus director.

*Information on the application may be obtained from the SPEA website; materials are also available from the Graduate Program Office. Application deadlines are before May 15 for the fall semester, before September 15 for the spring semester, and before March 15 for summer sessions. Students must pay a nonrefundable application fee.

Public Management Track Requirements (15 credit hours)

- SPEA-V 502: Public Management (3 credit hours)
- SPEA-V 560: Public Finance and Budgeting (3 credit hours)
- SPEA-V 561: Public Human Resource Management (3 credit hours)
- SLIS-S 505: Evaluation of Library Sources and Services* (3 credit hours)
- SLIS-S 605: Internship in Library and Information Science: Community Leadership and Management** (3 credit hours)

Nonprofit Management Track Requirements (15 credits hours)

- SPEA-V 522: Human Resources Management in Nonprofit Organizations (3 credit hours)
- SPEA-V 525: Management in Nonprofit Sector (3 credit hours)
- SPEA-V 526: Financial Management for Nonprofit Organizations (3 credit hours)
- SLIS-S 505: Evaluation of Library Sources and Services* (3 credit hours)
- SLIS-S 605: Internship in Library and Information Science: Community Leadership and Management** (3 credit hours)

*Formerly SLIS-L 651 or SLIS-S 602: Directed Research (Formerly SLIS-L 594)

**Formerly SLIS-L 596

Effective: Fall 2007

M.L.S. - Certificate in Nonprofit Management

Designed for the student seeking courses that address management skills relevant to those who may direct academic, public or corporate libraries. Academic exercises will acquaint students with issues in human resource management, public finance, and dealing with governance bodies such as a board of directors. Courses from the School of Public and Environmental Administration (SPEA) are available either on campus or online. For more information, visit www.spea.iupui.edu

This is a 42 credit hour program.

Course Requirements:

From SLIS, 30 graduate credits including:

- S501 (formerly L524),
- S502 (formerly L528),
- S503 (formerly L505) or S504 (formerly L520),
- S505 (formerly L651) or S506 (formerly L509),
- S551 (formerly L527) to meet the foundation area requirements, and including
- 15 SLIS elective credits that should include
  - S526 (formerly L629) or S535 (formerly L628),
  - S533 (formerly L570),
  - S541 (formerly L563) or S640 (formerly L608),
  - S552 or S553 (new courses formed from L550), and
  - S605 internship as an administrative assistant (formerly L596).

- From SPEA, for the Nonprofit Management Certificate, 12 graduate credits that include:
  - V522 Human Resource Management in Nonprofit Organizations,
  - V525 Management in the Nonprofit Sector,
  - V526 Financial Managment for Nonprofit Organizations, and
  - one 3-credit elective from Nonprofit and Voluntary Sector, Ethics and Values of Philanthropy, Fund Development for Nonprofit Organizations, Public Relations in Nonprofits, or History of Philanthrophy.

M.L.S. - Certificate in Public Management

Designed for the student seeking courses that address management skills relevant to those who may direct academic, public or corporate libraries. Academic exercises will acquaint students with issues in human resource management, public finance, and dealing with governance bodies such as a board of directors. Courses from the School of Public and Environmental Administration (SPEA) are available either on campus or online. For more information, visit www.spea.iupui.edu

This is a 42 credit hour program.

Course Requirements:

From SLIS, 30 graduate credits including:

- S501 (formerly L524),
- S502 (formerly L528),
- S503 (formerly L505) or S504 (formerly L520),
- S505 (formerly L651) or S506 (formerly L509),
- S551 (formerly L527) to meet the foundation area requirements, and including
- 15 SLIS elective credits that should include
  - S526 (formerly L629) or S535 (formerly L628),
  - S533 (formerly L570),
  - S541 (formerly L563) or S640 (formerly L608),
  - S552 or S553 (new courses formed from L550), and
  - S605 internship as an administrative assistant (formerly L596).

From SPEA, for the Public Management Certificate, 12 graduate credits that include:

- V502 Public Management,
- V560 Public Finance and Budgeting,
- V561 Public Personnel Management, and
- V506 Statistical Analysis for Public Affairs.

Distance Education

Many courses are delivered over distance education, and the format for delivery may be two-way interactive television or web-based instruction. Certification for Teacher of School Media and entry-level certification for public librarianship can be completed through distance education; however, the entire M.L.S. degree is not available through distance education. Students will need to plan to complete 6 to 12 credits in Indianapolis to finish the M.L.S.

The following courses are delivered over interactive television or online annually:

- S551 (Summer session one; formerly L527)
- S504 (Summer session two; formerly L520)
- S502, S571, S574 (fall semester; formerly L528, L533, L551)
- S401, S501, S554, S671 (spring semester; formerly L401, L524, L526, L553)

Interactive television-the Virtual Indiana Classroom (VIC) is available on a regular basis at IU Northwest in Gary, IU South Bend, IU Southeast in New Albany, and Indiana University-Purdue University Fort Wayne.

Depending on the content of the course and the availability of qualified faculty, several courses will be delivered over the Internet each year. Students should check the course schedules on the SLIS website. A current description of these courses can be found at http://www.eduscapes.com/iupui/.

Foundation Areas and Courses of Study for the M.L.S. Program

Upon completion of the M.L.S. program, graduates will be prepared to provide the following foundational areas of service and study. Course numbers in parentheses cover pertinent aspects of the profession. To meet the requirements of the given academic areas, the graduate student will need to successfully complete with the grade of C or higher, one course from those given in each foundation area.

A total grade point average of 3.0 (B) or higher must be established for the 36 credits that count for the M.L.S. The student may complete more than one of the courses listed and count the additional course or courses from that foundational area as an elective with the approval of the student's academic advisor.

Assist and Educate Users of Libraries and Information Centers (L524) Analyze and identify information needs, which represent a variety of age, academic, economic, and social groups and apply appropriate search strategies for effective information retrieval in each situation.

Educate users and potential users of information systems to locate and evaluate information resources.

Analyze and evaluate the provision of information systems and services in a variety of library and information settings.

Develop and Manage Library Collections (L528) Prepare and apply policies and procedures that support the selection and acquisition of information resources, which will meet the information needs of an organization, institution, or community.

Manage, evaluate, and preserve collections of information resources.

Organize and Represent Information Resources (L505 or L520) Understand and effectively apply principles of representation and systems of organization to provide access to resources in a variety of library and information environments.

Apply Management and Leadership Skills (L527, L550, L553, or L587) Understand a wide range of organizational structures and management and leadership styles; demonstrate positive attitudes and constructive actions, which characterize innovative leadership.

Recognize the value of collaborative planning and project management.

Apply the interpersonal and organizational skills necessary to manage and evaluate projects and personnel successfully.

Work effectively within and across a variety of organizational structures.

Communicate an organization's values and contributions, and identify sources that will support the organization's activities.

Conduct and Analyze Research (L509, L643, or L651) Understand and apply research and evaluation methods to investigate questions related to the acquisition, representation, organization, use, and/or dissemination of information.

Analyze and interpret findings of such research and evaluation.

Demonstrate Basic Technical Expertise (S401 or equivalent) Understand the basic applications of modern technology in today's libraries and other information environments.

Approach Professional Issues with Understanding (completion of M.L.S. degree—electives) Comprehend the social, political, and legal aspects of information creation, access, and ownership.

Engage in continuing learning in professional organizations in library and information science.

Goals and Objectives of the M.L.S. Program

To meet the goal of educating students for effective and satisfying professional careers in libraries an d other information centers, the M.L.S. curriculum has been designed to prepare graduates to identify and analyze the information needs of diverse user groups distinguished by age, education, and economic and social standing; to apply appropriate search strategies for effective and efficient information retrieval in any situation; to educate users of information systems in the location and evaluation of information resources; and to evaluate the provision of information systems and services in a variety of library and information settings. Accordingly, the M.L.S. curriculum has been tailored to address specific educational objectives in seven major areas of librarianship.

Developing and managing library collections. Graduates should be able to prepare and apply policies and procedures that support the selection and acquisition of information resources according to the information needs of the organization, institution, or community with which they work. In addition, they should be able to manage, evaluate, and preserve collections of information resources in a range of formats.

Representing and organizing information resources. Graduates should understand and be able to apply the basic principles of rrepresentation and organization to provide effective access to resources in a variety of library and information environments.

Applying management and leadership skills. Graduates should understand a wide range of organizational structures and management and leadership styles and should demonstrate positive attitudes and constructive actions that characterize innovative leadership. They should also be able to recognize the value of collaborative planning and project management and to apply the interpersonal and organizational skills necessary to manage and evaluate projects and personnel successfully.

Working effectively within a range of organizations. Graduates should be able to work effectively within and across a range of organizational structures, to communicate an organization's values and contributions and to identify resources that will support the organization's activities.

Conducting and analyzing research. Graduates should be able to understand and apply research and evaluation methods in the investigation of questions related to the acquisition, representation, organization, use, and dissemination of information. They should also be able to analyze, interpret, and evaluate the findings of research conducted by others.

Demonstrating basic technical expertise. Graduates should understand basic applications of modern technology in libraries and in other information environments.

Approaching professional issues with understanding. Graduates should be able to comprehend the social, political, and legal aspects of information creation, access, and ownership. They should recognize their professional obligation to engage in continuing learning through participation in personal educational endeavors and in professional organizations in library and information science.

Student Learning Outcomes

Master of Library Science (M.L.S.)

The Master of Library Science is a 36-credit-hour program accredited by the American Library Association. The program is innovatively designed to meet the new challenges of our profession. Students in the program

are introduced to the roles and functions of libraries in contemporary society. They become familiar with key policy issues and technological trends, and with how these issues and trends affect libraries and information centers of all kinds.

Students learn to manage and evaluate collections, respond to the information needs of patrons, and to use technology to improve access to information. Students who complete the program are prepared for careers in library administration, public services, technical services, reference services, and collection development at public, school, academic, and special libraries.

Upon completion of the M.L.S. program, graduates will be prepared to:

1. **Assist and Educate Users of Libraries and Information Centers**
   - Analyze and identify information needs that represent a variety of age, academic, economic, and social groups and apply appropriate search strategies for effective and efficient information retrieval in each situation.
   - Educate users and potential users of information systems to locate and evaluate information resources.
   - Analyze and evaluate the provision of information systems and services in a variety of library and information settings.
2. **Develop and Manage Library Collections**
   - Prepare and apply policies and procedures that support the selection and acquisition of information resources which will meet the information needs of an organization, institution, or community.
   - Manage, evaluate and preserve collections of information resources.
3. **Organize and Represent Information Resources**
   - Understand and effectively apply principles of representation and systems of organization to provide access to resources in a variety of library and information environments.
4. **Apply Management and Leadership Skills**
   - Understand a wide range of organizational structures and management and leadership styles; demonstrate positive attitudes and constructive actions which characterize innovative leadership.
   - Recognize the value of collaborative planning and project management.
   - Apply the interpersonal and organizational skills necessary to manage and evaluate projects and personnel successfully.
5. **Work effectively within and across a variety of organizational structures**
   - Communicate an organization's values and contributions, and identify sources that will support the organization's activities.
6. **Conduct and Analyze Research**
   - Understand and apply research and evaluation methods to investigate questions related to the acquisition, representation, organization, use and/or dissemination of information.
   - Analyze and interpret findings of such research and evaluation.
7. **Demonstrate Basic Technical Expertise**
   - Understand the basic applications of modern technology in today's libraries and other information environments.
8. **Approach Professional Issues with Understanding**
   - Comprehend the social, political, and legal aspects of information creation, access, and ownership.
   - Engage in continuing learning in professional organizations in library and information science.

Academic Policies & Procedures

School of Library and Information Science Policies

Computer Accounts

All SLIS students are eligible for, and are required to obtain, computer accounts from University Information Technology Services. These accounts include an electronic mail component, which is utilized by SLIS for both official and nonofficial communication. Student job openings, scholarship and financial aid opportunities, deadlines for submission of official paperwork, and announcements of social functions are just a few examples of the information disseminated via electronic communication.

Students will be held responsible for receiving and responding as appropriate to all official electronic mail. It is University policy that communication sent to the student via the student's electronic mail campus address is considered official notice. Each SLIS student should use their campus electronic-mail address to join the School's Listserv at slis-indy@iupui.edu. Contact the SLIS for details.

Grading Policy

Definition of Grades

Instructors in the School of Library and Information Science use a grading system that includes plus and minus grades as well as straight letters. Numerical equivalents for these grades are as follows and typical for a grade point averge figured on a 4.0 scale.

A = 4.0, A- = 3.7

B+ = 3.3, B = 3.0, B- = 2.7

C+ = 2.3, C = 2.0, C- = 1.7

D+ = 1.3, D = 1.0, D- = 0.7

F = 0.0

Individual faculty members may apply different methods to computate and justify the letter grades awarded. A grade issued by a SLIS instructor for a course project, test, or final grade for the course carries the meaning as described below.

Letter grades have been defined as follows by student and faculty members of the Curriculum Steering Committee

and have been approved by the faculty as an aid in evaluation of academic performance. These definitions should assist students by giving them an understanding of the grading standards of the School of Library and Information Science and reflecting the expectation that successful graduate students perform at the grade level of B or higher.

A (4.0)	Outstanding achievement. Student performance demonstrates full command of the course materials and evinces a high level of originality and/or creativity that far surpasses course expectations. The grade of A+ is not granted in SLIS, except in very exceptional cases.
A- (3.7)	Excellent achievement. Student performance demonstrates thorough knowledge of the course materials and exceeds course expectations by completing all requirements in a superior manner.
B+ (3.3)	Very good work. Student performance demonstrates above-average comprehension of the course materials and exceeds course expectations on all tasks as defined in the course syllabus.
B (3.0)	Good work. Student performance meets designated course expectations, demonstrates understanding of the course materials, and performs at an acceptable level.
B- (2.7)	Marginal work. Student performance demonstrates incomplete understanding of course materials.
C+ (2.3)	Unsatisfactory work and inadequate understanding of course materials.
C (2.0)	
C- (1.7)	
D+ (1.3)	Unacceptable work; course work performed at this level will not count toward the M.L.S. or M.I.S. degree; for the course to count toward the degree, the student must repeat the course with a passing grade.
D (1.0)	
D- (O.7)	
F (0.0)	Failing. Student may continue in program only with permission of the dean.

Grades are assigned by individual instructors based on a combination of student performance measures developed for each course. Student achievement of course objectives is usually assessed through the use of multiple performance measures. For example, a combination of several of the following assessment methods is common: examinations, class participation, written assignments and exercises, research papers, or term projects. Other methods, depending on course content and objectives, may include in-class small group exercises, oral presentations, field-based projects and field experiences, role-playing, or case study presentation.

No course in which a student receives a grade lower than C (2.0) will be counted toward requirements for any SLIS degree. Any required course on which a grade lower than C is received must be repeated; an elective course on which an unacceptable grade is earned need not be repeated, but it may be repeated or another course must be taken in its place. Repeating an unacceptable course or taking another in its place does not remove the credit points for that course from a student's cumulative grade point average. All grades achieved in SLIS courses will be counted in the SLIS and IU GPA. Since a minimum GPA of 3.0 (B) is required for graduation, any grade below B must be balanced by another sufficiently above B to keep the GPA at the 3.0 level.

A "grade" of S for Satisfactory or U for Unsatisfactory is issued for such courses as S401 Computer Based Information Tools and L596 Internship.

Grade of Incomplete (I)

The grade of Incomplete (I) may be used on the final grade report at the discretion of the instructor. The grade I indicates that the student's work in a course is satisfactory thus far but has not been completed as of the end of the semester.

The grade of Incomplete may be given only when the completed portion of a student's work in a course is of passing quality, and may be awarded only upon showing hardship to the student that would make it unjust to hold the student to the original time limit for course completion. It is the responsibility of the student who has incurred a grade of Incomplete in any course to fulfill the requirements of that course within a maximum of one calendar year from the date on which the I grade is recorded. After one calendar year, a grade of Incomplete automatically changes to a grade of F on the student's record.

Summer Sessions

The School of Library and Information Science offers one of the largest selections of summer classes proportional to school enrollment. The two summer sessions are six weeks in length, from early May to mid-June and from mid-June to mid-August.

It is possible for some students to complete a SLIS master's degree by attending only summer sessions over the period of five years allowed for degree completion. Students are cautioned, however, that not all courses are or will be available during summer sessions.

Financial Aid

A student must be admitted to a graduate degree program in order to be eligible for financial aid from SLIS. Students with financial assistance must make adequate progress toward their degree each semester and meet all other requirements of the award, or financial support may be discontinued.

Stipends and salaries earned by graduate students are taxable. It is our understanding that fellowships and fee scholarships are not taxable under current regulations; however, it is the responsibility of each recipient to confirm the tax status of any award with the Internal Revenue Service.

Financial Aid on the IUPUI Campus Graduate assistantships that include tuition remission and employment in the University Library or SLIS are available to SLIS students attending classes on the Indianapolis (IUPUI) campus. For information about eligibility requirements and application procedures, please contact:

School of Library and Information Science Office

Indianapolis, IN 46202-5195
phone: (317) 278-2375

Fellowship Awards One-time cash fellowship awards to new and continuing students in the SLIS degree programs are awarded through the following organizations:

Indiana Library Federation Scholarships are awarded annually by the ILF to students who are Indiana residents, have economic need, and are studying or wish to study for a career in librarianship. Awards are made each spring, and recipients must agree to work in an Indiana library for one year following degree receipt. Details for application are publicized each spring by SLIS and the ILF. These scholarships average between $300 and $1,000.

Association for Indiana Media Educators Scholarship is offered to students planning a career in Indiana school library media centers. Application details are published by the association and SLIS when they become available. These scholarships average between $300 and $600.

A.L.A. Scholarship Program See www.ala.org/hrdr/scholarship.html for more information. IUPUI Graduate Advisory Council considers applicants from SLIS for Fellowships annually. Applicants are selected from students who have an outstanding academic record. These fellowships are normally for two years, with an annual $12,000 stipend and in-state fee remission.

Graduate Assistantships are awarded annually. The School and University Library support six to ten assistantships each year. Normally, these assistantships will include an hourly salary for assisting a faculty member or for work in the University Library, and fee remission equal to in-state tutition. The student should indicate interest in being considered for an assistantship as part of the application for admission to the School. Graduate assistants are expected to carry a full-time course load. Graduate assistants are expected to carry at least six credit hour course load per semester.

Other financial aid opportunities are publicized by the school as they become available. This information is available primarily on the SLIS-INDY e-mail list.

Student loans and other financial aid opportunities are available to graduate students at IUPUI. Contact:

Office of Student Financial Aid
CA 103, 425 N. University Boulevard
Indianapolis, IN 46202-5145
phone: (317) 274-4162
www.iupui.edu/~finaid/

International student aid from the School of Library and Information Science is very limited. Aid available from the school for matriculating students is normally restricted to U.S. citizens and permanent residents. In some cases, a continuing international student will receive financial assistance following the first semester in SLIS, but in no case does the available aid approach the entire amount needed for the support of an international student attending a graduate degree program at Indiana University.

International students are advised not to count on any financial assistance from the school, but to seek sponsorship and support from other sources. The university will not issue visa documentation until the international student submits evidence of complete financial support. Information on other financial aid for international students may be obtained from the:

IUPUI Office of International Affairs
902 W. New York St.,
ES 2126
Indianapolis, IN 46202 USA
phone: (317) 274-7200

Courses

SLIS - S 671 School Media (3 cr.)

Masters Level Courses

SLIS-S 501 Reference (3 cr.) S501 Reference (3 cr.; formerly L524) P or C: S401. This course introduces students to the basic information sources and services among different types of libraries and information centers, including academic, public, special, and school media.

SLIS-S 502 Collection Development and Management (3 cr.) 502 Collection Development and Management (3 cr.; formerly L528) Theoretical and pragmatic aspects of the selection, evaluation, and management of collections in all types of libraries. Acquisitions, publishers and publishing, policy making, and intellectual freedom and censorship are also covered.

SLIS-S 503 Organization and Representation of Knowledge and Information (3 cr.) S503 Organization and Representation of Knowledge and Information (3 cr.; formerly L505) Introduces students to various disciplines' approaches to the understanding, organization, representation (summarizing), and use of knowledge and information. This survey looks for commonality among the approaches taken in information science, cognitive psychology, semiotics, and artificial intelligence, among others. The goal is to identify criteria for evaluation and improvement of ways to organize and represent information for future retrieval. Information systems currently used in libraries and information centers will be studied as examples. Emphasis in the course is on concepts and ideas, with appropriate attention to terminology and technology.

SLIS-S 504 Cataloging (3 cr.) S504 Cataloging (3 cr.; formerly L520) P: S401. Historical development and principles essential to the understanding of the conceptual foundations of providing bibliographic access and control of materials and information. Discussion and examples in the application of AACR2r will be presented to illustrate and reflect current practice. Emphasis is on monographic publications.

SLIS-S 505 Evaluation of Library Sources and Services (3 cr.) S505 Evaluation of Library Sources and Services (3 cr.; formerly L651) P: S502. Examines the applied evaluation of library resources and services, including collections, document delivery, technical services, reference services, and overall library performance. Emphasis is placed on the available methods and methodological issues. The checklist method, availability studies, document delivery tests, use studies, applied bibliometrics, and the use of automation are covered.

SLIS-S 506 Introduction to Research (3 cr.) P: S401, completion of 6 credit hours in SLIS (S501 and S502 recommended), or consent of instructor. Introduces the research process, including concepts, design, conduct, and evaluation. Examines the principles and characteristics of approaches and methodologies relevant to research in the field. Examples of data sources and introduction to methods of statistical description and analysis; ethical issues.

SLIS-S 511 Database Design (3 cr.) P: S401 or consent of instructor. Concerned with a comprehensive view of the processes involved in developing formal access to information from a user-centered point of view. Considers various database models (such as flat file, hierarchical, and relational), and hypertext (in terms of text, sound, numeric, image, and geographic data). Students will design and implement databases using several commercial database management systems.

SLIS-S 516 Human-Computer Interaction (3 cr.) S516 Human-Computer Interaction (3 cr.; formerly L542) Examines the human factors associated with information technology and seeks to provide students with knowledge of the variables likely to influence the perceived usability, and hence the acceptability, of any information technology. In so doing, it will enable students to progress further toward specialist work in the important field of human-computer interaction.

SLIS-S 517 Web Programming (3 cr.) S517 Web Programming (3 cr.; formerly L548) P: S401 or consent of instructor. Introduces basic skills for programming and manipulation of data structures for bibliographic and full text information systems.

SLIS-S 519 Evaluation of Information Systems (3 cr.) S519 Evaluation of Information Systems (3 cr.; formerly L643) P: S401. Theoretical and practical exploration of the issues surrounding contemporary information systems. A specific focus will be on evaluating information systems from the user perspective. This evaluation approach will cut across disciplinary frameworks: behavioral, cognitive, and social sciences. The approach will also touch on multiple research methods: online surveys, sense-making, critical incident, and network analysis.

SLIS-S 521 Humanities Information (3 cr.) S521 Humanities Information (3 cr.; formerly L623) P: S501 or consent of instructor. Introduction to information sources and services in the disciplines of performing arts, music, fine arts, literature, language, philosophy, and religion. In addition, the course addresses information needs

and behavior patterns of users seeking these types of information.

SLIS-S 522 Social Sciences Information (3 cr.) S522 Social Sciences Information (3 cr.; formerly L625) P: S401 and S501, or consent of instructor. Study of the core information tools in the fields of anthropology, economics, history, political science, psychology, and sociology. Includes key bibliographic databases and electronic network tools. Evaluation of research dealing with information channels in these fields.

SLIS-S 523 Science and Technology Information (3 cr.) P: S401 and S501 or C: S401 and S501. General materials, reference books, periodicals, government documents, nonbook media in the individual literature of individual disciplines; patents and report literature. Examination of production, publication, distribution, and forms of scientific and technical literature.

SLIS-S 524 Adult Readers Advisory (3 cr.) S524 Adult Readers Advisory (3 cr.; formerly L622) P: S501 and S502. A review and discussion of trends reflected in subject content and use of book and nonbook materials for patrons in secondary school and public libraries in relation to changing young adult and adult needs and the role of libraries in meeting such needs.

SLIS-S 525 Government Information (3 cr.) S525 Government Information (3 cr.; formerly L628) P: S401 and S501. Survey of government information dissemination in all formats and at all levels of government. Consideration of government information policy. Primary emphasis given to U.S. government information but some consideration given to state and local publications in the United States, and those of international organizations.

SLIS-S 526 Business Information (3 cr.) S526 Business Information (3 cr.; formerly L629) P: S401, S501, or consent of instructor. Introduction to basic business materials. Includes resources, research methods, current developments, automated systems, and databases.

SLIS-S 532 Information Architecture for the Web (3 cr.) P: S401. Focuses on website development. Students study information architecture as an approach for site organization and design, and learn about product management for complex web development tasks. In lab sessions, students work with markup languages and scripting and develop sites, typically for real clients, as well as local libraries.

SLIS-S 533 Online Searching (3 cr.) P: S401 or consent of instructor. Principles, methods, and techniques of advanced online information retrieval (IR). Characteristics of and search strategies for the use of bibliographic, referral, citation, fact, numeric, and full text databases and search systems. Considers standards, use of communications software, front-ends and micro-based IR systems, and creation of in-house databases.

SLIS-S 541 Information Policy (3 cr.) S541 Information Policy (3 cr.; formerly L563) Data creation, publication, dissemination, and use occur in a complex social context. Legal and regulatory structures continue to evolve to control these processes. This course explores international and U.S. principles, laws, and regulations affecting the information industry. Focus varies with the topic; for example, copyright of electronic information sources or transborder data flow. May be repeated for credit when topic varies.

SLIS-S 550 Perspectives on Librarianship (3 cr.) S550 Perspectives on Librarianship (3 cr.; formerly L522) Overview of the library as a social institution-historically, currently, and for the future-within social, economic, political, and cultural contexts. Focuses on the institution, the collections and formats, and the users to create an understanding of the role and importance of libraries. S550 provides excellent opportunities to help students explore the library profession.

SLIS-S 551 Library Management (3 cr.) S551 Library Management (3 cr.; formerly L527) Management and administration of all types of libraries. Covers basics of organizational structure, planning, budget management, human resources issues and skills, and an understanding of the manager in the context of the organization.

SLIS-S 552 Academic Library Management (3 cr.) Management and administration of academic libraries, including specific material related to organization structure, planning, budget management, human resources issues and skills, and an understanding of the manager in the context of a higher education environment.

SLIS-S 553 Public Library Management (3 cr.) Management and administration of public libraries, including specific material related to organization structure, planning, budget management, human resources issues and skills, and an understanding of the manager in the context of a community environment.

SLIS-S 554 Library Systems (3 cr.) P: S401 or C: S401. Principles for the design, selection, implementation and management of automated systems of all types in libraries, including systems for technical services processing, reference and user services, and management. Focus is on present and future applications of technology in libraries, their technical features, and their implications for library services and management. When possible, some practical experience with a particular application will be provided.

SLIS-S 556 Systems Analysis and Design (3 cr.) S556 Systems Analysis and Design (3 cr.; formerly L545) P: computer literacy or consent of instructor. Using a behavioral approach to information systems, this course covers information systems designed to conform to the needs of users.

SLIS-S 571 Materials for Youth (3 cr.) S571 Materials for Youth (3 cr.; formerly L533) Evaluation and use of books, magazines, recordings, films, radio and television broadcasts, and other sources of information and recreation.

SLIS-S 572 Youth Services (3 cr.) P: S571 or consent of instructor or C: S571. This course emphasizes the history, philosophy, and description of children and young adult library services. It takes a holistic look at the role of the youth services librarian from planning and evaluation to specific services and programs, and examines the current and future outlook for this type of librarianship. Emphasis is on the public library, but cooperation with appropriate services and programs, such as school media centers, is also discussed.

SLIS-S 573 Education of Information Users (3 cr.) S573 Education of Information Users (3 cr.; formerly L554) P or C: S401, S501 or S516, or consent of instructor. This is a hands-on course in which students will have the opportunity to practice and evaluate methods in design and presentation of various approaches to bibliographic instruction, including library skills and orientation, user education, discipline-specific instruction, and information literacy. Students will be expected to research and debate information literacy theory, and to make several extensive oral presentations, which will be subject to critical review. The course reviews educational theories for application to secondary school, college and university settings that provide application of AASL and ACRL standards for information literacy.

SLIS-S 574 Information Inquiry for School Teachers (3 cr.) S574 Information Inquiry for School Teachers (3 cr.; formerly L551) This course is intended to be an opportunity for teachers and future teachers (including school library media specialists as teachers) to practice methods in critically thinking about information/media, and to use the inquiry process as a means to teach their students to be critical reviewers and communicators as well. Application of national and state standards for information literacy K - 12. Offered over the Internet.

SLIS-S 580 History of Libraries (3 cr.) S580 History of Libraries (3 cr.; formerly L517) Development of libraries and information service from earliest times to the present, with emphasis on the library in relation to social, economic, cultural, and political trends.

SLIS-S 581 Archives and Records Management (3 cr.) S581 Archives and Records Management (3 cr.; formerly L516) Introduces basic theories, methods, and significant problems in archives and records management. The course also discusses how archivists are responding to the challenge of managing and preserving electronic records.

SLIS-S 582 Preservation (3 cr.) S582 Preservation (3 cr.; formerly L514) Examines causes of library and archival materials deterioration. Develops conceptual framework and management perspective for preservation programs using technical standards, program development tools, scientific and administrative research reports, and advocacy literature. Explores the new information technologies and media as both preservation tools and challenges.

SLIS-S 601 Directed Readings (1-4 cr.) P: Consent of instructor. Readings and study in any area of library or information science having an extensive literature. A student may enroll for this course twice in the same semester under different instructors. Normally S601 is completed under the direction of a full-time faculty member. Readings done under S601 shall not duplicate the content of any course now in the curriculum of the School of Library and Information Science. Proposal Form due by March 15th.

SLIS-S 602 Directed Research (1-3 cr.) P: Proposal form and consent of instructor and 15 SLIS graduate credit hours completed including S505 or S506. Individual research in a problem in the field of library and information science.

SLIS-S 603 Workshop in Library and Information Science (1-3 cr.) P: Consent of instructor. Group study of specific problems in the library and information field. Generally includes a hands-on element. No more than 6 hours of S603 credit may be used toward the requirements for any SLIS degree.

SLIS-S 604 Topics in Library and Information Science (1-4 cr.) P: Consent of instructor. Study of specific topics in librarianship and preservation. May be repeated for credit when topic varies. Same course number used for different courses.

SLIS-S 605 Internship in Library and Information Science (2-6 cr.) P: permission of faculty advisor. Graded S/F. Supervised internship in an information management environment. Professionals in library and information management mentor each graduate student. Sixty on-site hours must be completed for each credit earned. Students should plan through their advisor the course work leading to an internship. Normally, at least 18 credits must be completed before enrollment. Note: Normally, an internship is for 3 credits and 180 total on-site hours. Students will be expected to journal their reflections on the experience, write abstracts of documents relevant to the experience, and make a final oral presentation. A list of internship options is maintained on the school's website and new internships are posted on the listserv (slis-indy@iupui.edu). Students following consultation with their advisors and the director of internships, may explore internship options, including potential internships not listed, to determine if a qualified professional will supervise the fieldwork. Normally, the supervisor holds an advanced degree at the master's level or above and has several years of successful experience in the profession. Graduate students should use the internship as a means to advance their experiences in their chosen area rather than as an exploration of the library profession in general. Internships often include special projects in web design, instruction or development of community programs, specialized reference services, library automation, or technical services. Internships are not to be used to substitute for clerical assistance or routine services. An internship is an elective, unless the student is required to complete it for school library media certification. A limit of one 3-credit internship may be completed for the MLS and a second may be completed if the student is in a dual-degree program. Applications for placement are due during the semester proceeding the internship: November 15 for spring; March 15 for summer (placements may run across both sessions); July 15 for fall. Application forms can be found at www.slis.iupui.edu/courses/index.html.

SLIS-S 621 Audio and Video Sources (3 cr.) P: S401 concurrent or consent of instructor. User-focused approach to decision making in the digital audio and video information environment. Emphasizes collection development in support of user services, including access to remote collections and evaluation of multimedia materials and delivery mechanisms, and issues related to emerging technologies. Scope includes adult and young adult audiences.

SLIS-S 622 Resources and Services for People with Disabilities (3 cr.) Access to information is essential for sustained independence of people with disabilities.

This course studies materials, services, and assistive technologies to support this access.

SLIS-S 623 Genealogy and Local History (3 cr.) P: S401, S501, & S502 This course is designed to focus on two specific collection areas: Genealogy Resources and Indiana Resources. Students will work on developing collection policies creating collections with limited funding, and evaluating existing special collections. The class will also look at the pros and cons of several issues (staffing issues, volunteers, integrated collections, circulating/non-circulating, limited resources, material types).

SLIS-S 631 Advanced Cataloging (3 cr.) C: S504. Access to information is essential for sustained independence of people with disabilities. This course studies materials, services, and assistive technologies to support this access.

SLIS-S 632 Technical Services (3 cr.) C: S553, S551, S552 or consent of instructor Content will include the theory and practice of acquisitions, vendor relations, and the effective use of technology in technical services operations.

SLIS-S 640 Seminar in Intellectual Freedom (3 cr.) P: 9 hours of SLIS graduate credit or permission of instructor. Beginning with a history of and alternative philosophical justifications for censorship, the student is introduced to constraints, obligations, and problems relating to intellectual freedom.

SLIS-S 644 Consumer Health Informatics (3 cr.) P: S401, S501 or consent of instructor (formerly S604) This is a consumer health informatics course in which students will learn about how technologies are used to deliver healthcare to the public.

SLIS-S 650 Library Philanthropy (3 cr.) Introduces the role of private giving in support of libraries. Examines personal and corporate philanthropy and their applicability in libraries and information centers.

SLIS-S 652 Digital Libraries (3 cr.) This course introduces digital libraries — networked information servers that provide access to multimedia data for local and remote users. Primary emphasis is on developing digital libraries, based on understanding tools for presentation and manipulation of multimedia as well as analysis of user needs.

SLIS-S 653 Health Science Librarianship (3 cr.) P: S401, S501or consent of instructor; Focus your learning on interacting with each other and with the information gleaned from reading, actiivities and discussions. This requires the student to analyze and organize the information gathered from reading and activities, and tie-in what students have learned from your professional experience and education. Identify what you need to know, find out, teach others, and apply the new knowledge.

SLIS-S 654 Law Librarianship (3 cr.) P: S501 or consent of instructor. An introduction to basic legal materials and law librarianship. Primary and secondary resources; indexes; digests and citators; specialized research methods; current developments in automated legal research. History of law libraries in the U.S., their organization and administration. The role of law librarians in law schools and law firms.

SLIS-S 671 School Media (3 cr.) P: S501, S571, and S574 or concurrent or consent of instructor. Establishes the professional teaching and administrative role of the certified school library media specialist in K-12 settings. Situations are examined that pertain specifically to policy development, budgeting, collection development, instructional design, support staff training, facility design, district supervision, and information networking within the modern school corporation. Students make site visits to leading school information centers, conferences, and media fairs.

SLIS-S 672 Seminar on Literature for Youth (3 cr.) P: S571 or consent of instructor. An advanced seminar, addresses such topics as: images of minority groups, societal problems (e.g., poverty and family patterns), or informational needs and materials including access and availability of print, nonprint, and computer resources. May be repeated for credit when topic varies.

SLIS-S 681 Evaluation of Library Sources and Services (3-3 cr.) This course is a broad survey the growing field of book history, with emphasis on developments in Western Europe and North America since 1450, review theoretical models and scholarly trends in the fields of book history, examine key scholarship in the field, survey the processes of print creation, production, dissemination, and reception in the larger social, economic, and political content, and consider how the history of the book as a material object and as an agent of intellectual and social change helps us understand the digital revolution.

Undergraduate Courses

SLIS-S 401 Computer-based Information Tools (3 cr.) Graded S/F. This skills-based course introduces basic applications that will be used throughout the student's course work and beyond. Students' experiences in this course should be seen as a basis for further skill development and learning throughout their careers. The course covers computing platforms, access tools, and management tools. Demonstration of skills will be by a mastery test or an assignment in each unit of the course. S401 does not count toward graduate degree requirements.

Undergraduate Courses

SLIS-S 401 Computer-based Information Tools (3 cr.) Graded S/F. This skills-based course introduces basic applications that will be used throughout the student's course work and beyond. Students' experiences in this course should be seen as a basis for further skill development and learning throughout their careers. The course covers computing platforms, access tools, and management tools. Demonstration of skills will be by a mastery test or an assignment in each unit of the course. School of Medicine

Welcome to the IU School of Medicine

Health Professions Programs Bulletin!

The Indiana University School of Medicine Health Professions Programs offer degrees and course work in the following areas:

Clinical Laboratory Science, B.S.
Cytotechnology, B.S.
Emergency Medical Services+
Histotechnology, Certificate & A.S.
Medical Imaging Technology, B.S.
Nuclear Medicine Technology, B.S.
Paramedic Science, A.S.
Radiation Therapy, B.S.
Radiography, A.S.
Respiratory Therapy, B.S.

+EMT-Basic Course Open to all IUPUI students

These programs are housed within appropriate clinical departments in the Indiana University School of Medicine but are collectively called the Health Professions Programs (HPP).

The IU School of Medicine Health Professions Programs are committed to the excellent quality preparation of health personnel who have a concern for the well-being of the people they serve. The programs integrate teaching, research, and service through the efforts of their faculty and student. This integration results in high-quality programs that have a significant positive impact on health care.

Overview

The Indiana University School of Medicine Health Professions Programs offer degrees and course work in clinical laboratory science, cytotechnology, emergency medical services, histotechnology, medical imaging technology, nuclear medicine technology, radiation therapy, radiography, and respiratory therapy. These programs are housed within appropriate clinical departments in the School of Medicine but are collectively called the Health Professions Programs (HPP). Other degrees in the health professions are offered on the IUPUI campus through the IU School of Dentistry, IU School of Nursing, and the IU School of Health and Rehabilitation Sciences.

Vision & Mission

Vision The vision of the Indiana University School of Medicine Health Professions Programs is to be a nationally recognized leader in health professions education, research, and service, while preparring an array of high-quality health care professionals in Indiana.

Mission The Indiana University School of Medicine Health Professions Programs have a long tradition of academic excellence. The major purpose of the Health Professions Programs is to provide quality degree programs in the health professions to meet the needs of the people of the state of Indiana. In fulfilling their fundamental purpose, the Health Professions Programs seek to develop and maintain a scholarly and competent faculty capable of achieving the following goals:

- To build upon sound principles of general education by preparing students to communicate effectively, exhibit quantitative skills, think critically, integrate and apply knowledge, exhibit intellectual depth and breadth, be intellectually adaptive, appreciate societal and cultural diversity, and apply ethical standards and values to professional practice.
- To provide undergraduate degree programs that offer education related to the provision and management of health services by the various health professions.
- To contribute to the advancement of knowledge through research.
- To provide continuing education for health professions practitioners wishing to further their career development.
- To foster the development of lifelong habits of scholarship and service among faculty and students.

In addition to the mission of the collective programs, each program has its own mission statement, which can be found on the web site devoted to the program or in the brochures produced by individual programs. Please see the appropriate web site or contact individual programs for further information.

Purpose & Philosophy

Purpose

The Indiana University School of Medicine Health Professions Programs are charged with providing undergraduate health professions education on the Indiana University Purdue University campus in Indianapolis (IUPUI). These programs prepare health professionals to provide diagnostic and therapeutic patient care. As part of a major university, the programs accept and fulfill four major responsibilities, by providing (1) opportunities to acquire a sound basic education in the undergraduate health programs offered through the School of Medicine and to foster the development of lifelong habits of scholarship and service; (2) advancement of knowledge through research; (3) continuing education programs aimed at maintaining and improving the competence of those health professionals engaged in patient care or supportive health services; and (4) multiple services to the people of the state of Indiana in these health professions.

Philosophy

The Indiana University School of Medicine Health Professions Programs are committed to the excellent quality preparation of health personnel who have a concern for the well-being of the people they serve. The programs integrate teaching, research, and service through the efforts of their faculty and students. This

integration results in high quality programs that have a significant positive impact on health care.

Each program offered provides the health professions student with an opportunity to develop expertise, scientific knowledge, and professional attitudes that will enable the student to contribute to the health of society and obtain career satisfaction. The programs adhere to specific professional guidelines or standards and are designed in collaboration with the appropriate accrediting bodies. All curricula are based upon a foundation in the liberal arts and sciences, which is essential for an informed and productive life.

The faculty believe that the education of health professions personnel follows a coordinated and logical interdisciplinary process based on a core body of knowledge germane to health professions practice. By sharing experiences related to a variety of activities, the student is introduced to others who have both common and unique educational interests. Appreciation of the contribution of each health discipline and interaction with peers and scholars in different health professions encourage the coordination of health planning, health services, disease prevention, and health promotion.

Education is perceived by the faculty as an evolving and continuing process toward an increased ability to think, reason, and judge that leads to a satisfying and self-disciplined life. Effective education allows for individual difference and is provided in a participative atmosphere. The faculty believe that freedom of choice and meaningful assimilation of facts nurture the development of the students, enhance their understanding of patients' problems, and promote a dedication to lifelong self-evaluation and self-education.

Faculty of the School of Medicine Health Professions Programs are fully qualified in their fields of expertise and hold appropriate degrees and certification or licensure. In implementing the objectives of their academic programs, they strive to keep their professional and teaching competencies current. The faculty are committed to preparing uniquely qualified personnel who must meet the challenges of the complex and ever-changing health care needs of society.

The graduates of Health Professions Programs should be prepared to apply the knowledge they have attained in their selected discipline. Graduates have a responsibility to maintain competency through formal and informal continuing education and to contribute to new knowledge in their discipline. Graduates have legal, moral, and ethical responsibilities to their employers, patients, and the public and are expected to participate in community and professional activities.

This statement of philosophy forms the core of values from which the Health Professions Programs vision, mission, objectives, policies, and procedures are derived.

History of Current Degree Programs

All Indiana Univerity School of Medicine Health Professions Programs were formerly part of the IU School of Allied Health Sciences. On July 1, 2002, eight programs were moved back to the IU School of Medicine as part of a restructuring of the new IU School of Health and Rehabiliation Sciences, which moved toward a graduate school model. One additional undergraduate program moved on January 1, 2004, to complete the restructuring of the undergraduate programs.

The former IU School of Allied Health Sciences was first established as a division in 1959 by action of the Trustees of Indiana University. In 1960, the trustees conferred upon the faculty of the IU School of Medicine the responsibility and authority to grant the Bachelor of Science degree to those students successfully completing the prescribed curriculum in four allied health programs that had been offered long before the establishment of the division. Since that time, additional degree programs were approved and initiated. In June 2003, the IU School of Allied Health Sciences was renamed the IU School of Health and Rehabiliation Sciences.

History of the IU School of Medicine The Indiana University School of Medicine (IUSM) was founded in 1903, and its first students were enrolled on the Bloomington campus. It was the fourth medical school in the United States, after Johns Hopkins, Harvard, and Western Reserve, to require two or more years of collegiate work for admission. The school awarded the Doctor of Medicine (M.D.) degree to its first class of 25 in 1907. Following the union in 1908 of all medical schools in the state within Indiana University, the General Assembly of the State of Indiana, mandated, in 1909, that Indiana University assume the responsibility for medical education in the state.

Initially, students had the opportunity to take the first two years of their medical school work in either Bloomington or Indianapolis. In 1912, all students entered through the Bloomington program and moved to Indianapolis for their second-, third-, and fourth-year courses. This system remained in effect until 1958, when the work of the Bloomington division was transferred to Indianapolis. Excellent facilities for the teaching of the basic medical sciences and a strong nucleus of basic science faculty members remained in Bloomington. Consequently, in 1959 an experimental program of medical education was started in Bloomington in cooperation with the College of Arts and Sciences and the Graduate School. This program, the Medical Sciences Program, included studies that could lead to the combined M.D./M.S. and M.D./Ph.D. degrees. In 1965, a School of Medicine faculty committee recommended the adoption of a comprehensive plan for medical education throughout the state of Indiana. The plan involved the use of regional facilities in addition to those of the Medical Center in Indianapolis. The plan would coordinate and utilize elective programs in community hospitals, preceptorships with practicing physicians, internship and residency programs, and continuing medical education programs throughout the state.

The plan also resulted in the formation, within existing educational institutions, of ‘‘centers for medical education’’ for teaching basic medical science courses to first-year medical students. In 1971 the General Assembly of the State of Indiana unanimously authorized legislation establishing the Indiana Statewide Medical Education System. This legislation mandated that the Indiana University School of Medicine be responsible for selection, admission, and assignment of students; for curricular development; and for evaluation and accreditation of the

system. Further development of the Indiana Statewide Medical Education System was approved in the 1979 Indiana General Assembly. Approval for planning and funding for a second year of medical study at each of the centers for medical education was passed, and second-year students were first appointed to all centers except Fort Wayne in the fall 1980 semester. Funding for second-year students at the Fort Wayne campus began in fall 1990. The School of Medicine currently has eight centers for medical education, located in Bloomington, Evansville, Fort Wayne, Gary, Muncie, South Bend, Terre Haute, and West Lafayette.

Last Updated: February 6, 2012

Accreditation

The Indiana University School of Medicine Health Professions Programs share with the other schools of the University the accreditation accorded Indiana University as a member of the North Central Association of Colleges and Schools.

In addition, the professional programs are individually accredited by appropriate governing agencies within the discipline. See program-specific sections.

Last Updated: February 6, 2012

Facilities

The Indiana University Medical Center (IUMC) campus covers some 85 acres within one mile of the center of Indianapolis. About half of the first- and second-year classes are on the IUMC campus; the other studetnts are at one of other eight centers for medical education. The School of Medicine's enrollment in 2011-2012 consisted of 1,255 M.D. students, 234 Ph.D. students, 124 M.S. students,46 joint M.D./Ph.D. students, and 259 undergraduate students. In addition to opportunities at the centers for medical education, M.D. students may participate in clinical and elective rotations in physician offices and hospitals throughout the state and nation. Students may study or serve abroad during their medical school careers.

The School of Medicine includes several facilities on the IUMC campus, including Fesler Hall, VanNuys Medical Sciences Building, Indiana Cancer Pavilion, IU Cancer Research Institute, Research Institutes II and III, the Rotary Building, and Emerson Hall. The William H. Coleman Hospital, Robert W. Long Hospital, and the Willis D. Gatch Clinical Building have been renovated to provide research and administrative offices at IUSM. Approximately one mile east of the IUMC campus, along the historic canal, sits the Medical Information Science Building, the IU Health Pathology Building, the Radiology Education and Research Institute, and Fairbanks Hall.

Hospitals that are staffed by faculty and provide residency training programs include Wishard Memorial Hospital (a city-county hospital recently listed among the top 100 U.S. public hospitals), Roudebush VA Medical Center, Riley Hospital for Children, Indiana University Hospital and Outpatient Center, and LaRue Carter Psychiatric Hospital (which is state owned and located about five minutes from campus). Riley and IU Hospital separated from the School of Medicine in 1997 to join Methodist Hospital of Indiana which are now part of IU Health. IU Health is committed to supporting the school's mission of advancing education, research, and patient care. Located approximately two miles from IUMC, Methodist Hospital provides additional significant educational opportunities to IU students and residents. The two "campuses" are linked by a people mover for the convenience of both staff and patients. Midway on the people mover is the new (2006) IU Health Pathology Building that houses the majority of hospital laboratories for Riley, IU and Methodist hospitals and also the educational programs in Clinical Laboratory Science, Cytotechnology, and Histotechnology.

IU Health's hospitals - Riley Hospital for Children, IU Hospital, and Methodist Hospital of Indiana - currently record approximately 1 million in- and out-patient visits per year. The affiliated hospitals - Wishard, Roudebush, and LaRue Carter - together handle another 1 million patient visits each year. This enormous patient base provides a broad range of superb clinical educational opportunities. The hospitals host 71 residency and fellowship programs with 992 residents and fellows and provide clinical experiences in both inpatient and outpatient facilities to second- through fourth-year students. IUSM's nearly 800 teaching faculty members staff all the hospitals. In addition, the hospitals host educational programs for nursing, dentistry, and health professions students as well as Purdue University pharmacy doctoral students.

Last Updated: February 6, 2012

Admission

Applicants seeking admission to any of the IU School of Medicine Health Professions Programs must be enrolled as a degree-seeking student on the IUPUI campus or admitted to the campus for the appropriate term of entry.
In addition, applicants mustalso submit a completed application packet to the specific program's admissions committee by the program's application deadline. Please see program specific requirements in the "Degree Programs" section of this publication. The program specific application can be found in the admissions section of the Health Professions Programs website (http://medicine.iu.edu/hpp).

Applicants should also be aware of the following additional details:

Preadmission Status

Enrollment at Indiana University does not guarantee admission to any of the health professions programs. To be eligible for admission to one of the health professions programs, students must adhere to the academic regulations of the academic unit in which they are enrolled and meet School of Medicine Health Professions Programs and individual program preadmission requirements as stipulated in the general education and program sections of this bulletin. Admission to many programs is competitive; therefore, completion of the prerequisites does not guarantee admission to the program. In some instances a student may be admitted to the School of Medicine as a preprofessional student; however, this status is for academic advising purposes only and in no way influences admission into a professional program.

Change of Educational Objective for Preprofessional Students

Changing one's educational objective to a health professions program does not guarantee admission to the program. Students considering a change in their educational objective should consult with a counselor on their respective campuses before initiating the change. Pre-health professions students in University College, the School of Medicine, or other Indiana University schools or divisions must follow that academic unit's procedures for changing the educational objective. All students must meet School and individual program admission requirements in order to be admitted to a professional program. Each Health Professions Program requires students to complete an application for admission to the specific program. Please see program-specific sections for the individual program admission deadlines.

Transfer Credit

Acceptance of credit from a regionally accredited college or university for transfer to Indiana University will be determined by the campus admissions office.

While the grades from course work completed at Indiana University and all other colleges and universities are used to calculate the admission grade point average, only grades of C (2.00) or above will be considered for transfer. The university does not accept the transfer of special credit by examination awarded by another college or university. The transfer of credit earned through a regionally accredited junior college or a community college is normally limited to the equivalent of two years of academic work toward a baccalaureate degree and one year of academic work toward an associate degree. The School retains the right to determine the acceptability of transfer credit to meet degree requirements.

Correspondence Courses

All credit to be applied to an Health Professions Programs degree earned through IU's Independent Study Program, correspondence study, or other nontraditional methods must be validated and approved by the faculty of the program to which the student is applying.

Last Updated: February 6, 2012

Admission Policies

The admission policies of individual programs within the Indiana University School of Medicine Health Professions Programs comply with the following standards:
Prerequisite Course Work Applicants must complete prerequisite courses at an accredited high school (or GED equivalent), college, or university. Individual programs determine the specific courses and the minimum grade that must be achieved in any course (see specific program information); therefore, program-specific requirements may differ. Pass/fail grades are not acceptable in prerequisite courses unless pre-approved by the specific program. Students are eligible to apply for admission to an associate or baccalaureate program when their academic progress shows reasonable probability that entry-level requirements can be completed before the beginning date of the next class entering the professional program. Applicants should read the admission policies and program descriptions in the school and program sections of this bulletin for specific entry-level requirements.

Grade Requirements Without exception, applicants to a degree program must have a cumulative grade point average of at least 2.00 on a 4.00 scale for all course work completed at Indiana University and/or any other college or university. Some programs have established a minimum grade point average higher than 2.00 on a 4.00 scale. Some programs also use a component of the overall grade point average (for example, math/science grade point average). See specific program information. Only completed course work and the resultant grade point average are evaluated. Radiography Program applicants may have the high school record evaluated. In these instances only academic course work taken during high school will be used in calculating the admission grade point average. Students applying for a degree program may not be admitted to, hold a position in, or begin a program if they would be on probation as a student in any of the Health Professions Programs. Students are placed on probation within the School when the cumulative and/or most recently completed semester grade point average falls below 2.00 on a 4.00 scale. The applicant must also maintain the minimum grade point average as established by the program. The applicant's grade point average will be the major consideration (51 percent or greater) for admission. (See specific program information.)

Repeated Courses Applicants whose cumulative grade point average is at least 2.00 on a 4.00 scale and who have repeated courses may petition to have their admission grade point average recalculated. The recalculation will use the most recent grade of the repeated course. This repeat option includes the use of the Indiana University FX option and is applied with the following restrictions: It can be used for a total of no more than 15 credits; the grade will be deleted not more than twice for a given course; each attempt will count toward the 15-credit-hour limit; and a W cannot be used to replace a grade and will not count toward the 15 credit hours. If more than 15 credit hours are repeated, the applicant will determine which of the repeated courses are to be deleted. The petition must be attached to the application. The effective date is the beginning of the 1996 fall semester. Any course being used to replace an earlier course grade must be taken in the fall of 1996 or later.

Academic Bankruptcy Applicants whose cumulative grade point average is at least 2.00 on a 4.00 scale may petition the program for up to one year (fall, spring, and summer) of academic bankruptcy based on compelling nonacademic reasons. The bankrupted semesters must be consecutive. Academic bankruptcy is for admission purposes only and in no way affects the university's official grade point average. Course work completed in a semester that has been bankrupted for admission purposes cannot be used for the fulfillment of program prerequisites or counted as credit hours toward the degree. The petition must be attached to the application.

Fresh Start Applicants whose cumulative grade point average is at least 2.00 on a 4.00 scale may petition the program for Fresh Start (forgiveness) based on compelling nonacademic reasons. This forgiveness will eliminate, for the purpose of calculating program specific admission grade point average(s), all courses and grades earned by the applicant during the requested period. The forgiveness period begins with the applicant's first academic enrollment period (at any college or university) and ends after the academic term designated by the applicant. Course work completed in a semester that has

been bankrupted for admission purposes cannot be used for the fulfillment of program prerequisites or counted as credit hours toward the degree. The petition must be attached to the application and must include the beginning and ending dates of the forgiveness period.

To invoke this policy, the student must meet the following three conditions:

1. *Including* all course work taken during the requested academic forgiveness period, applicants must have at least a 2.00 cumulative grade point average (on a 4.00 scale).
2. *After* the designated forgiveness period, applicants must complete the following minimum number of graded course hours based on the degree level of their program of interest - Bachelor's Degree - 50 credit hours of graded course work or Associate Degree* - 12 credit hours of graded course work.
3. Meet all other program-specific admission requirements.

Applicants may include in-progress course work at the time of the specific program's application deadline toward the minimum number of graded course work required after the designated forgiveness period.

*Applicants to the Radiography Program must complete at least one math/science course as part of the 12 credit hours of graded course work completed after the academic forgiveness period.

NOTE: Fresh Start will not be granted for professional Radiologic Sciences courses for those applying to the Medical Imaging Technology Program.

Credit by Examination Applicants to any of the Health Professions Programs who have received credit by examination from Indiana University in a course that meets a program prerequisite will be viewed as meeting this specified requirement. Application of this policy for math/science prerequisites will be determined at the program level. Any credit by examination hours received by the student must be transferred onto the student's university transcript before it can be considered as meeting a program's admissions prerequisite.

At IUPUI, credit by examination can be earned from the following sources: Advance Placement (AP), the College Level Examination Program (CLEP), the Defense Activity for Non-Traditional Education Support (DANTES), and Indiana University departmental examinations. See IUPUI Admissions for required documents and procedures on receiving credit. Students at Indiana University whose standardized test scores (ACT or SAT) are high enough to have course content waived by a particular academic unit may request the specific program's admissions committee to accept this waiver.

Undistributed Credit Upon admission to any of the Indiana University campuses, students with course work completed previously at accredited colleges or universities are awarded the appropriate transfer credit for this prior education. Transfer credits are either matched to the appropriate course equivalent (e.g., ENG-W 131) on that IU campus or transferred as undistributed credit (e.g., ENG-UN 100). Some campuses have policies that limit the number of credits that students may receive for their prior education.

When transfer credits are designated as 'undistributed,' this simply means that the transfer credit analyst for the specific campus did not find an equivalent course at that IU campus. These credits can still be applied for use towards any of the School's degree programs.

When a student has been given 'undistributed' credits, it is the student's responsibility to contact the School's Administrative Office to determine how these credits will be accepted by the admission committee of the student's program of interest. Such a request should be made in writing (preferably via email) to a member of the administrative staff. The request will then be forwarded to the appropriate admissions committee for consideration.

Testing Applicants may be required to complete testing as designated by the program. Testing results may be used as a component of the admissions decision unless their use would violate state or federal law.

Interview Applicants may be required to complete a personal interview. The interview may be a component of the admission decision. Some programs limit the number of interviews granted based on the number of applications received.

Technical Standards for Admission and Retention Because a degree in a health professions discipline attests to the mastery of knowledge and skills, graduates must possess the essential knowledge and skills to function in a broad variety of clinical situations and render a wide spectrum of patient care in a safe and effective manner.

The School of Medicine Health Professions Programs faculty has therefore specified nonacademic criteria, Technical Standards for Admission and Retention, that all applicants and students are expected to meet in order to participate in a health professions program. These criteria include the following five categories: (1) observation; (2) communication; (3) motor function; (4) intellectual-conceptual, integrative, and quantitative abilities; and (5) behavioral and social attributes. All accepted students will be required to sign a statement certifying that they can meet the technical standards that apply to the program to which they have been admitted.

A copy of the technical standards will be sent to each applicant with an offer of admission. Additionally, a copy may be obtained from the program of interest or the Health Professions Programs Administrative Office.

Preference to In-State Residents Preference is given to applicants who are Indiana residents and to applicants who complete the majority of applicable course work at a public college or university in Indiana. Each program's admissions committee determines how the preference policy shall be weighted in their admissions policies.

Equal Opportunity/Affirmative Action Policy Indiana University pledges to continue its commitment to the achievement of equal opportunity within the university and throughout American society. In this regard, Indiana University will recruit, hire, promote, educate, and provide services to persons based upon their individual qualifications. Indiana University prohibits discrimination based on arbitrary consideration of such characteristics as age, color, disability, ethnicity, gender, marital status, national origin, race, religion, sexual orientation, or

veteran status. Indiana University shall take affirmative action, positive and extraordinary, to overcome the discriminatory effects of traditional policies and procedures with regard to the disabled, minorities, women, and Vietnam-era veterans. An office on each campus monitors the university's policies and assists individuals who have questions or problems related to discrimination.

Policy Changes Health Professions Programs Admissions Committees are charged with setting the minimum standards for entry into their specific program. These policies build upon the School's *Undergraduate Degree Requirements* including both the minimum degree requirements and basic general education areas. The School and Program criteria for admission include, but are not limited to the minimum grade point average for admission, specific prerequisite courses required for entry, and minimum number of credit hours needed at program entry. Minimum grade point averages can include both cumulative, specific (e.g. math & sciences course), and minimum grade required in each prerequisite course.

When a change to any School or Program criterion is made, it will become effective for applicants who apply for admission during the specific program's application deadline immediately following the announced change.

Any changes in a specific program's requirements will be announced on the School's website and in advising materials made available to students. Changes will also be distributed to university counselors and constituents who work with pre-health professions students state-wide.

Last Updated: February 6, 2012

Admission Procedures

1. In addition to the general admission requirements, applicants must read the program-specific sections in the bulletin for additional admission requirements and deadlines.
2. Individuals seeking admission to a professional program must submit a complete IU School of Medicine Health Professions Programs application before the individual program's application deadline. When applying to more than one program, separate applications must be completed. Admission to the professional program is competitive; application for admission to the school does not constitute automatic admission to a program.
3. Applicants who are not Indiana University students must also file an Indiana University application and pay the application fee before the program application deadline. Applications for admission to Indiana University–Purdue University Indianapolis can be obtained from the IUPUI Office of Admissions at (317) 274-4591 or apply@iupui.edu. This application process can also be completed online at http://enroll.iupui.edu/admissions/. Students seeking a second baccalaureate degree from Indiana University must also submit an application to the IUPUI Office of Admissions. Returning students who have been inactive for more than one year may also be required to contact the IUPUI Office of Admissions to reactivate their university enrollment status. Students applying from other regional IU campuses must complete the inter-campus transfer application.
4. All complete applications are reviewed by the program's admission committee. The selection of a class is based on school and program admission criteria. All applicants receive written notification of their admission status.
5. Each program's admissions committee reserves the right to correct any mistake made in the calculation of an applicant's eligibility to be considered for an interview or for admission to the program.
6. Applicants may appeal any admission decision except the minimum GPA required by the specific program's admissions committee. Copies of the policies and procedures governing the appeals process are available on request from the Health Professions Programs Administrative Office.
7. Individuals interested in being admitted to one of the School's programs should contact the program of interest annually for an update on admission criteria. For more information visit the admissions section of the School's website at http://medicine.iu.edu/hpp.
8. The Health Professions Programs application is revised each summer. Applicants must obtain an application for the year in which they wish to apply.
9. Applicants should check the current School application for the deadlines for submission.
10. Students who have been convicted of a felony may be unable to obtain appropriate credentials to practice in some disciplines. Contact the program director for further information. Disclosure of an applicant's past criminal history is required at the time of application. Applicants must disclose all criminal offenses, i.e., felonies and misdemeanors, as well as non-criminal offenses. In addition, applicants who have been arrested for or convicted of any violation of the law or who have charges pending against them at the time of application must disclose this information to the School at the time of application. If applicable, please see the application instructions for more details.
11. A student whose name appears on the Indiana Sex and Violent Offender Registry will not be allowed to pursue admission to any program in the School. Some educational programs follow IU Health's more restrictive background check policy and additional criminal convictions will disqualify an applicant from entering those programs. Falsification of an applicant's background is also grounds for disqualification. For more information on this issue, please contact the HPP Administrative Office.
12. Grades earned in remedial courses may be used differently by different programs to calculate the competitive grade point average. See the program-specific sections.

Health Professions Programs

Degree programs and course offerings exist in the following areas. For specific information, select your program of choice from the left-hand menu.

Department of Emergency Medicine Paramedic Science, A.S.
Emergency Medical Technician - Basic

Department of Pathology and Laboratory Medicine
Clinical Laboratory Science, B.S.
Cytotechnology, B.S.
Histotechnology, Certificate and A.S.

Division of Pulmonary and Critical Care Medicine
Respiratory Therapy, B.S.

Department of Radiation Oncology Radiation Therapy, B.S.

Department of Radiology & Imaging Sciences
Radiography, A.S.
Medical Imaging Technology, B.S.
Nuclear Medicine Technology, B.S.

Last Updated: March 2, 2012

Undergraduate Degree Requirements

The Indiana University School of Medicine Health Professions Programs faculty will recommend for degrees only those students who have been admitted to Indiana University and are students in good standing in the School and the professional program. Candidates for degrees are eligible for graduation upon completion of all program requirements in effect when the student first enrolls in professional course work, provided requirements are met within five years.

The academic program's faculty reserve the right to require students whose program course of study is interrupted for any reason to meet requirements as specified by the director of the program and the Dean of the IU School of Medicine or the dean's designee. Changes in the student's original program may be necessary when, for example, a curriculum has been revised, offerings are no longer available, significant changes in curriculum content have occurred, or repetition of material is deemed essential to assure continuity of clinical competency.

Academic counseling and guidance are available for students. Students are responsible for seeking such counseling and guidance and for planning courses of study to meet degree requirements.

Program Prerequisites

Each program has additional specific course requirements. Refer to the program of interest in this bulletin for specific information.

Last Updated: March 2, 2012

General Undergraduate Requirements

Minimum Degree Requirements

- Based upon earned Indiana University credits, a minimum cumulative grade point average or 2.000 (on a 4.000 scale) must be maintained.
- A minimum of thirty (30) credit hours of program or program-related course work must be completed in residence at Indiana University. Special credit awarded by any program's credit for credential or credit by experience cannot be used towards the thirty (30) credit hour minimum.
- Additional general requirements must be completed for the bachelor's degree or associate degree as listed below:

Bachelor's Degree

- Minimum of 122 credit hours.
- School's baccalaureate degree general education requirements.
- Minimum of 30 credit hours in courses at the 300-400 (junior-senior) level.

Associate Degree

- Minimum of 60 credit hours.
- School's associate degree general education requirements.

Students must complete the prescribed course of study, meeting program academic, professional, and technical standards requirements, which may exceed the requirements stated above. Program professional standards consist of ethics and proper health care practices to which students must adhere. Program faculty will distribute these standards when appropriate.

The student is responsible for submitting an intent-to-graduate form by no later than January in the year that they intend to graduate. The Health Professions Programs Administrative Office will contact each potential graduate regarding this issue.

Work for a degree must be completed within five years from the time the student first enrolls in the professional program. Under unusual circumstances, the program director may recommend granting a waiver of this requirement.

Degrees are granted during the academic year in December, May, June, and August; however, Commencement exercises are held only in May.

Last Updated: March 2, 2012

Basic General Education Areas

A.S. Degree

- Written communication, one course
- Verbal communication, one course

At least one course from any two of the following categories:

- College-level mathematics
- Social/behavioral sciences
- Basic life/physical sciences
- Humanities (Classical studies, literature, English, film studies, folklore, foreign language, history, journalism, philosophy, religion, speech communication, minority studies, visual and performing arts)

B.S. Degree

- Written communication, three courses - Requirement can be satisfied with any combination of prerequisites or professional program courses, see program section for specific content emphasis
- Verbal communication, one course
- Humanities, one course* (Classical studies, literature, English, film studies, folklore, foreign

language, history, journalism, philosophy, religion, speech communication, minority studies, visual and performing arts)
- College-level mathematics, one course
- Social/behavioral sciences, two courses*
- Basic life/physical sciences, two courses

*Some programs may allow a student to substitute a second humanities course for one of hte two required social-behavioral science courses. Please see program specific prerequisites for additional information on programs where this substitution will be allowed.

In addition to the above general education requirements, students are strongly encouraged to learn to do word processing, use e-mail, and navigate the Internet before the beginning of the professional program. See program-specific sections for program requirements.

Last Updated: March 2, 2012

Professional Program Requirements

An outline of the professional program is in the program-specific information in this bulletin.

Clinical Rotation Requirements During an educational program in the Health Professions Programs, students complete clinical rotations in several hospitals or other clinical sites in the central Indiana and/or the Indianapolis metropolitan area. Criminal background checks for students in these programs may be required for entry in these clinical sites and/or hospital settings. Students must be advised that should a hospital request a background check your history may interfere with the ability of the program to place you in clinical activities. In the circumstance where the education program is unable to place a student in the appropriate clinical setting to meet degree requirements, there is the possibility that a student may be unable to complete the degree program. Students should also be advised that a clinical site may also require the student to pass a drug screen.

Last Updated: March 2, 2012

Clinical Laboratory Science

The educational program in clinical laboratory science through the IU School of Medicine Department of Pathology and Laboratory Medicine is located on the Indiana University–Purdue University Indianapolis campus at the IU Health Pathology Laboratory Building.

Mission Statement The mission of the Clinical Laboratory Science Program at Indiana University–Purdue University Indianapolis is to provide a quality education in the knowledge, skills, and professional attitudes required to follow good laboratory practice in providing quality testing for the diagnosis, monitoring, and treatment of disease.

Goal Statements The goals of the Clinical Laboratory Science Program are to prepare graduates who:

1. Have the knowledge and skills needed to provide health care professionals with accurate and timely diagnostic and therapeutic laboratory data and participate as effective members of the health care team.
2. Demonstrate professionalism through honesty and integrity in reporting results, respect for patient confidentiality, and a desire for life-long learning through continuing education, scholarship, service, and participation in professional organizations.
3. Successfully complete the national certification examination.

To accomplish these goals, the program faculty foster the development of critical thinking and life long learning skills and evaluate overall program effectiveness through outcomes assessment.

Description of the Profession Clinical laboratory science is a diverse, science-based profession aimed at accurate performance of clinical laboratory procedures on biologic samples from patients. Physicians use the results from these procedures in diagnosing, monitoring, and treating diseases. Some of the tasks that clinical laboratory scientists perform are listed below:

- Analysis of simple/complex chemical components of body fluids
- Evaluation of cellular components of blood
- Identification of microorganisms and their antibiotic susceptibilities
- Preparation of blood components for patient therapy
- Molecular detection of diseases
- Evaluation of new techniques, procedures, and instruments

Laboratory personnel continually evaluate the quality of the results from procedures and instruments and solve any problems that relate to inconsistencies. Excellent communication skills are required to interact with other members of the health care team, to teach, and to manage individuals under their supervision.

Clinical laboratory scientists typically work in laboratories located in hospitals, clinics, physician group practices, blood centers, medical research facilities, or medically oriented industries.

Graduates of the Program Students who successfully complete the senior/professional year of the clinical laboratory science program and have a baccalaureate degree are eligible to take national certification examinations. Nationally recognized certification is a requirement for employment in many settings.
Credentials Required to Practice MLS(ASCP), Medical Laboratory Scientist

Licensure Requirements to Practice There is no state licensure in Indiana; however, some states require licensure in addition to or instead of national certification.

Scholarships A limited number of scholarships is available for accepted students. Contact the program staff when notified of admission.

Educational Program

Bachelor of Science in Clinical Laboratory Science at IUPUI

- **Medical Director:** Professor Eble
- **Program Director:** Associate Professor Marler and Professor Leland
- **Professors:** Rodak

Length of Program Clinical laboratory science is a four-year baccalaureate degree program that is typically full-time. The program is structured in a 3 + 1 arrangement, in which three years are spent in regular college courses in order to complete prerequisite courses and the fourth year is the senior/professional year. The professional year includes both didactic and supervised clinical education experiences. Applicants with bachelor's degrees who have completed all of their prerequisites may also apply to this program. Upon completion of the professional year, the student will earn a second bachelors degree.

Additional Cost In addition to regular university tuition and fees, the student should expect to pay for program-related expenses. Contact program administrators for current cost estimate sheet.

Description of Program Facilities The Clinical Laboratory Science Program has program offices, a classroom, and a student laboratory located in the IU Health Pathology Laboratory Building.

Location of Clinical Education Sites Facilities utilized for clinical experiences include Indiana University Hospital, Methodist Hospital, Riley Hospital, Wishard Memorial Hospital, and Richard Roudebush Veterans Administration Medical Center.

Opportunity for Students to Work Students who work should limit employment hours to 8–10 hours a week, if possible.

Accreditation The Clinical Laboratory Science Program at Indiana University-Purdue University Indianapolis is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Rd, Suite 720, Rosemont, IL 60018, Phone (847) 939-3597.

Last Updated: February 20, 2012

Admission

General Information Students accepted into the program must complete all program admission requirements by July 1. Admission to the professional program is competitive; therefore, completion of the prerequisites does not guarantee admission to the program.

Criteria Used for Selection of Class Cumulative and science/math grade point average, essay, interview, and motivation factors.

Class Size Program is accredited for 24 students; however, current arrangements limit class size to 12 students.

Specific Requirements In addition to the Health Professions Programs' admission policies and procedures found at the beginning of this section of the bulletin, the following admission policies apply to the Clinical Laboratory Science Program at IUPUI:

Application Deadline December 1 of the year before desired entry into the senior/professional year.

Total Number of Prerequisite Credit Hours 90 by start of program classes.

Distribution of Credit Hours in Specific Areas Applicants must complete at least 18 credit hours in the biological sciences and 18 credit hours in chemistry. See prerequisite list.

Limitations of Course Work At least one course in chemistry (upper level), microbiology, and immunology must have been completed within the previous six years.

Minimum Cumulative Grade Point Average 2.50 on a 4.00 scale. This requirement is applied at the time of program application and must be maintained. Grades from remedial courses are not used in this calculation.

Minimum Specific Grade Point Average 2.50 on a 4.00 scale in science and mathematics courses. This requirement is applied at the time of program application and must be maintained. Grades from remedial courses are not used in this calculation.

NOTE: Applicants whose Cumulative and/or Specific GPAs are at or only slightly above 2.50 (on a 4.00 scale) are unlikely to be competitive for admission.

Minimum Grade in a Stated Prerequisite Course C (2.00 on a 4.00 scale) in all required courses.

Interview Applicants must complete the interview process. Interviews are scheduled from October to December.

Technical Standards See Health Professions Programs policy.

Indiana Residents Preference Policy See Health Professions Programs policy.

Volunteer Experience Volunteer experience is not required, but may be very helpful to the applicant in making a career choice.

Last Updated: February 20, 2012

Prerequisites

Before entering the program, students must complete the minimum prerequisites listed below. Students should consult with their academic advisors for appropriate courses and semester sequence in order to complete prerequisites. Prerequisites may be taken at any accredited college or university. The code "G" indicates a course that meets the school's general-education requirements.

Written communication (G)	2 courses
Verbal communications (G)	1 course
Humanities (G)*	1 course
Social/Behavioral science (G)*	2 courses

*Students can request to substitute a second humanities course for one of the social-behavioral science electives.

Biological Sciences Applicant must complete, by entry date, at least 18 credit hours or the equivalent of biology, to include the following courses:

Introductory Human Biology (G)	1 course
Microbiology (wet lab)	1 course
Human Genetics	1 course
Human Physiology	1 course
Immunology	1 course

Chemistry Applicant must complete, by entry date, at least 18 credit hours or the equivalent of chemistry, to include the following courses:

Introductory Chemistry (with lab) (G) (*Course must be appropriate for science majors*)	2 semesters
Organic I (with lab)*	1 course (w/lab)
Advanced Chemistry Elective*	1 course

*Effective for entry in fall 2013, admitted students must complete Organic I and Advanced Chemistry Elective by July 1.

Suggested Chemistry Electives
Biochemistry
Organic II
Analytical Chemistry

Mathematics Applicant must complete, by entry date, the following courses:

College Algebra and Trigonometry or higher content (G)*	1-2 courses
Statistics	1 course

** Two semesters are required for Algebra/Trigonometry sequence. One semester is required for Trigonometry level (or higher) courses.*

Suggested Electives While not inclusive or mandatory, the following is a list of suggested elective areas: human anatomy, molecular biology, medical terminology, and medical microbiology.

Sample Plan of Study

Freshman	
Fall	*Credits*
Elementary Composition I	3.0
College Algebra and Trigonometry I	3.0
Introductory Biology I (Plants)	5.0
Principles of Chemistry I w/ lab	5.0
Total	16.0
Spring	*Credits*
Speech Communication or Interpersonal Communication	3.0
College Algebra and Trigonometry II	3.0
Introductory Biology II (Animals)	5.0
Principles of Chemistry II w/ lab	5.0
Total	16.0
Sophomore	
Fall	*Credits*
Organic Chemistry I	3.0
Organic Chemistry I Lab	2.0
Human Anatomy (*as elective*)	5.0
Social-Behavioral Science Elective I	3.0
Electives	3.0
Total	16.0
Spring	*Credits*
Upper-Level Chemistry Elective	3.0
Microbiology w/lab	3.0-4.0
Human Physiology	5.0
Humanities Elective	3.0
Total	14.0-15.0
Junior	
Fall	*Credits*
Immunology	3.0
Genetics	3.0
Electives	7.0
Total	13.0
Spring	*Credits*
Statistics	3.0
Written Communication II	3.0
Social-Behavioral Science Elective II	3.0
Elective	5.0-6.0
Total	14.0-15.0

Last Updated: February 20, 2012

Professional Program

Courses in the professional program are sequential and must be taken in the order specified by the program faculty. Transfer credits, course substituions, or "testing out" are not permitted for any professional year course.

Senior	
Fall	*Credits*
Hematology (PATH-C 407)	3.0
Principles of Immunohematology (PATH-C 408)	1.0
Serology (PATH-C 409)	1.0
Diagnostic Medical Microbiology (PATH-C 411)	4.0

Diagnostic Microbiology Laboratory (PATH-C 421)	2.0
Hematologic Techniques and Procedures (PATH-C 427)	3.0
Techniques in Immunohematology (PATH-C 428)	1.0
Serology Laboratory (PATH-C 429)	1.0
Total	16.0
Spring	*Credits*
Hemostasis (PATH-C 404)	1.0
Clinical Chemistry (PATH-C 406)	4.0
Urine Analysis (PATH-C 410)	2.0
Mycology/Parasitology (PATH-C 420)	2.0
Clinical Chemistry Instrumentation and Methodologies (PATH-C 426)	2.0
General Externship I (PATH-C 401)	2.0
General Externship II (PATH-C 402)	2.0
Total	15.0
Summer	*Credits*
General Externship III (PATH-C 403)	2.0
General Externship IV (PATH-C 405)	2.0
Topics in Medical Technology (PATH-C 412)	3.0
Total	7.0

Awards Based on their academic performance, students will be recommended by the program faculty for degrees with distinction in accordance with the School's honors criteria.

Graduation Requirements Satisfactory completion of at least 128 credit hours, to include at least 90 credit hours of prerequisite and general-education courses and 38 credits of professional courses. All course work must be completed in compliance with the Program's and School's academic and professional policies.

Last Updated: February 20, 2012

Cytotechnology

The educational program in cytotechnology through the Indiana University School of Medicine Department of Pathology and Laboratory Medicine is located on the Indiana University–Purdue University Indianapolis campus at the IU Health Pathology Laboratory Building.

Description of the Profession Cytotechnology is a medical laboratory specialty in which microscopic studies of exfoliated, abraded, and aspirated cells from the human body are performed. The cytotechnologist studies cell samples from various body sites to detect cellular changes indicative of cancer. In providing a means of early detection, cytology makes possible the early diagnosis of cancer, thus increasing the chances of a cure. Cytology also serves as a prognostic tool during the course of cancer treatment programs. In addition, it aids in establishing the diagnosis of benign disease processes, such as endocrine disorders, and in detecting some pathogenic microorganisms.

Graduates of the Program The Cytotechnology Program is designed to provide its graduates with a comprehensive, fundamental knowledge of clinical cytology that will enable them to function as competent Cytotechnologists and will provide a basis for continuing education and professional growth. Graduates will be eligible for the certification examination administered by the Board of Certification leading to certification and registration in Cytotechnology with the American Society for Clinical Pathology. Graduates should be prepared for management, supervisory, and educational responsibilities and should seek ways to contribute to the growing body of knowledge in clinical cytology. The program is designed to prepare graduates to realize their position in the total health care structure and understand their legal, ethical, and moral responsibilities to the employers and communities they serve. Cytotechnologists normally practice in hospitals, laboratories, or research laboratories.

Credential Required to Practice B.S.; CT(ASCP), Cytotechnology certification by the Board of Certification: American Society for Clinical Pathology.

Scholarships Students interested in scholarship information for the professional year should contact the program office.

For further information, contact: William Crabtree, Ph.D., SCT(ASCP), Director
Phone: (317) 491-6221
E-mail: wcrabtre@iupui.edu

Indianapolis, IN 46202-4108

Last Updated: February 14, 2012

Educational Program

Bachelor of Science in Cytotechnology at IUPUI

- **Medical Director:** Associate Professor H. Cramer
- **Program Director:** Associate Professor W. Crabtree
- **Clinical Assistant Professor:** B. McGahey Frain

Length of the Program Four years, including three years (90 semester hours) of prerequisite course work plus 12 months (37 semester hours) of professional course work.

Structure of the Program The prerequisites may be taken on a part-time basis; the professional program is presented in a full-time, day format only.

Design of the Professional Curriculum An integral relationship between the program and the cytology service laboratory provides students with maximum exposure to a functioning cytology laboratory. The learning process follows a structured, logical sequence for the presentation of essential concepts and skills.

Individual instruction, demonstrations, lectures, and conferences are all used as methods of instruction. Student inquiry and research that will foster greater understanding and possible revision of presented material are encouraged. Opportunity is provided for the student to pursue special interests in the field of cytology.

Location of Clinicals All clinical sites for the program are located within the Indianapolis area.

Additional Cost In addition to regular university fees, the student should expect to pay for program-related expenses. Contact program for current cost sheet.

Opportunity for Students to Work Some students have part-time jobs.

Program Facilities The Cytotechnology Program is offered at the IUPUI campus, which has modern educational and medical facilities. Dedicated program space is located in the IU Health Pathology Laboratory Building. Cytology laboratories located in the IU Health Pathology Laboratory, Wishard Memorial Hospital, Methodist Hospital, and the Veterans Administration Hospital are also used.

Accreditation The curriculum of the Cytotechnology Program is fully accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org).

Last Updated: March 13, 2012

Admission

General Information As grade point average is a reflection of self-motivation, self-discipline, and the desire to achieve, favorable consideration is given to applicants with high grade point averages. In addition, applicants must demonstrate proficiency in biological and physical sciences. Candidates for this program should work well with others, have a genuine desire to improve the health of humanity, and be willing to accept the responsibilities of providing health care service. Students accepted into the program must complete the school's and the program's admission requirements listed below before the first day of classes. Admission to the professional program is competitive; therefore, completion of the prerequisites does not guarantee admission to the program.

Criteria Used for Selection of Class Cumulative grade point average, biology grade point average, interview.

Class Size Eight each fall semester.

Specific Requirements In addition to the Health Professions Programs admission policies and procedures found at the beginning of this section of the bulletin, the following admission policies apply to the Cytotechnology Program:

Application Deadline December 1 of the year before anticipated entry.

Total Number of Prerequisite Credit Hours 90

Distribution of Credits in Specific Areas 25 credit hours in biology

Limitations of Course Work Biology credits earned more than seven years before application must be updated by taking 3 additional credit hours related to cell biology within a period of time not to exceed 12 months before admission. Remedial courses will not fulfill prerequisite hours.

Minimum Cumulative Grade Point Average 2.50 on a 4.00 scale. This requirement is applied at the time of program application and must be maintained.

Minimum Specific Grade Point Average Biology grade point average of 2.50 on a 4.00 scale. This requirement is applied at the time of program application and must be maintained.

Minimum Grade Requirement in a Stated Prerequisite Course C (2.00 on a 4.00 scale).

Interview All qualified applicants must participate in an interview. Interviews start the second week of January.

Technical Standards See Health Professions Programs policy.

Medical Requirements Students accepted into the professional program must complete a health form, immunization card, chest X ray, and eye examination before classes begin.

Indiana Residents Preference Policy See Health Professions Programs policy.

Volunteer Experience While volunteer experience is not required, it is very helpful in making a career choice.

Last Updated: March 13, 2012

Prerequisites

Before entering the program, students must complete the minimum prerequisites listed below. Students should consult with their academic advisors for appropriate courses and semester sequence in order to complete prerequisites. Prerequisites may be taken at any accredited college or university. The code "G" indicates a course that meets the school's general-education requirements. Courses taken via correspondence will not be accepted as fulfilling stated prerequisites. No more than 15 semester hours of correspondence course work will be counted toward the degree.

Written Communications (G)	2 courses
Verbal Communications (G)	3 cr.
Humanities (G)*	3 cr.
College Algebra (G)	3 cr.
Social/Behavioral Science (G)*	6 cr.
Introductory Biology (G)	4-5 cr.
Chemistry I (with lab) (*for science majors*)	4-5 cr.
Chemistry-Sequential Course(s) (*for science majors beyond above*)	4 cr. Minimum; 5-8 cr. Preferred
Human Anatomy and Physiology	5-10 cr.
Advanced Biological Sciences	3 courses
In addition to introductory biology and human anatomy & physiology, students must also take **three** upper-level	

biology courses to bring the total minimum credit hours in biology to 25.
Recommended Courses microbiology with laboratory, developmental anatomy or embryology with laboratory, genetics with laboratory, molecular or cellular biology, histology, and immunology. Questions regarding alternative biology courses should be directed to the Cytotechnology Program faculty.

*Students can request to substitute a second humanities course for one of the social-behavioral science electives.

Suggested Electives It is recommended that the following courses be taken electives: microbiology, embryology, genetics, animal cell physiology, and immunology. While not inclusive or mandatory, the following is a list of suggested elective areas: medical microbiology, endocrinology, parasitology, virology, cytogenetics, computer science, management, organic chemistry, biochemistry, physics, advanced mathematics, statistics and art appreciation.

Suggested Plan of Study The following is a suggested three-year plan of the prerequisites. Students can adjust this schedule. Students should check with their advisors to make sure all requirements are met.

Freshman	
Fall	*Credits*
Elementary Composition I	3.0
College Algebra and Trigonometry	3.0
Introduction to BiologyI (*Plants*)	5.0
Elementary or Principles of Chemistry I w/lab	5.0
Total	16.0
Spring	*Credits*
Speech Communication or Interpersonal Communication	3.0
Introduction to BiologyI (*Animals*)	5.0
Elementary or Principles of Chemistry II w/lab	5.0
Elective	3.0
Total	16.0
Sophomore	
Fall	*Credits*
Humanities Elective	3.0
Social-Behavioral Science Elective I	3.0
Human Anatomy	5.0
Elective	3.0
Total	14.0
Spring	*Credits*
Elementary Composition II or Professional Writing	3.0
Human Physiology	5.0
Upper-Level Biology Elective I	3.0
Social-Behavioral Science Elective II	3.0
Total	14.0
Junior	
Fall	*Credits*
Upper-Level Biology Elective II	3.0
Electives	12.0
Total	15.0
Spring	*Credits*
Upper-Level Biology Elective III	3.0
Electives	12.0
Total	15.0

Last Updated: March 13, 2012

Professional Program

Courses in the professional program are sequential and must be taken in the order specified by the program faculty.

Senior	
Fall	*Credits*
Gynecologic Cytology, Normal (PATH-A 412)	3.0
Gynecologic Cytology, Abnormal (PATH-A 422)	3.0
Pulmonary Cytology (PATH-A 432)	3.0
Techniques in Medical Cytology (PATH-A 462)	2.0
Certification Internship I (PATH-A 465)	2.0
Seminar in Cytology I (PATH-A 470)	3.0
Total	16.0
Spring	*Credits*
Cytology of Body Fluids (PATH-A 442)	2.0
Cytology of the Gastrointestinal Tract (PATH-A 453)	2.0
Urinary Tract Cytology (PATH-A 454)	2.0
Certification Internship II (PATH-A 465)	6.0
Seminar in Cytology II (PATH-A 470)	2.0
Total	14.0
Summer	*Credits*
Cytology of Fine Needle Aspiration (PATH-A 455)	2.0
Certification Internship II (PATH-A 465)	3.0
Investigations in Cytopathology (PATH-A 490)	2.0
Total	7.0

Awards Recommendations for degrees awarded with distinction are based upon superior academic performance. The Cytotechnology Program recognizes superior academic and professional conduct with the Liang-Che Tao Outstanding Student Award, which is awarded to a graduating senior.

Graduation Requirements Satisfactory completion of 127 credit hours, to include 90 credit hours of prerequisite and general-education courses and 37 credit hours of professional courses. All course work must be completed in compliance with the program's and school's academic and professional policies.

Last Updated: March 13, 2012

Associate of Science

Associate of Science in Paramedic Science at IUPUI

- **Department Chair:** Professor R. McGrath
- **Medical Director:** Adjunct Clinical Assistant Professor E. Bartkus
- **Program Director:** Assistant Clinical Professor L. Bell
- **Adjunct Faculty:** Lecturers D. Bignell, D. Ervin, K. Gona, J. Hallam, G Hedeen, P. Hutchinson, J. Hively, M. Mangrum, A. Michaels, J. Scheiderer, D. Seketa, M. Thralls, B. Tilson

Completion of the Course Work/ Graduates of the Program The associate degree in paramedic science is open to students of the university who have completed the prerequisites for admission. A student completing the course work is prepared to work as an EMT-Paramedic to deliver emergency patient care in the out-of-hospital setting. The paramedic must be a confident leader who can accept the challenge and high degree of responsibility entailed in the position. The paramedic provides the most extensive pre-hospital care and may work for fire departments, private ambulance services, police departments, or hospitals. Response times are dependent upon nature of call.

Credential Required to PracticeEMT-Paramedic (Emergency Medical Technician- Paramedic)

Licensure Required to Practice Graduates of the paramedic program must pass a state-administered certification examination before credentialing. The certification examination in Indiana is the National Advanced Level Certification Examination for EMT-Paramedics and is administered by the National Registry of EMTs on behalf of the Indiana EMS Commission. The EMS Commission is the regulating body that certifies paramedics in Indiana.

EDUCATIONAL PROGRAM

Description of the Profession Paramedics have fulfilled prescribed requirements by a credentialing agency to practice the art and science of out-of-hospital medicine in conjunction with medical direction. Through performing of assessments and providing medical care, their goal is to prevent and reduce mortality and morbidity due to illness and injury. Paramedics primarily provide care to emergency patients in an out-of-hospital setting.

Paramedics possess the knowledge, skills, and attitudes consistent with the expectations of the public and the profession. Paramedics recognize that they are an essential component of the continuum of care and serve as linkages among health resources.

Paramedics strive to maintain high-quality, reasonably priced health care by delivering patients directly to appropriate facilities. As an advocate for patients, paramedics seek to be proactive in affecting long-term health care by working in conjunction with other provider agencies, networks, and organizations. The emerging roles and responsibilities of the paramedic include public education, health promotion, and participation in injury- and illness-prevention programs. As the scope of service continues to expand, the paramedic will function as a facilitator of access to care, as well as an initial treatment provider.

Paramedics are responsible and accountable to medical direction, the public, and their peers. Paramedics recognize the importance of research and actively participate in the design, development, evaluation, and publication of research. Paramedics seek to take part in lifelong professional development and peer evaluation and assume an active role in professional and community organizations.

Program Goals

The Associate of Science in Paramedic Science Program intends to:

- Enable the student to perform as a paramedic.
- Provide didactic instruction in the body of paramedic knowledge that will lead a student to hold competencies that will guide the student in lifelong learning as a health care professional.
- Provide clinical instruction that will provide the student with mastery of clinical competencies necessary to perform as a paramedic and will guide the student in lifelong learning as a health care professional.
- Provide a field internship that will develop a student's ability to apply mastered competencies, guided by mentors in real-time situations.
- Develop values that will prepare the student to be sensitive to the cultural needs of all patients.
- Develop knowledge, competency, and awareness of one's abilities and limitations; the ability to relate to people; and a capacity for calm and reasoned judgment while under stress.
- Develop values that will prepare the student to independently process information to make critical decisions.

Program Objectives

- The paramedic student will be able to establish and/ or maintain a patent airway and oxygenate and ventilate patients.
- The paramedic student will be able to take a proper history and perform a comprehensive physical exam on any patient and communicate the findings to others.
- The paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement the treatment plan for trauma and medical patients, including neonatal, pediatric, and geriatric

patients; patients of diverse backgrounds; chronically ill patients; and patients with common complaints.
- The paramedic student will be able to safely manage the scene of an emergency.

At the completion of the general course of study,

- The student must demonstrate the ability to safely administer medications.
- The student must demonstrate the ability to safely perform endotracheal intubation.
- The student must demonstrate the ability to safely gain venous access in patients of all age groups.
- The student must demonstrate the ability to effectively ventilate un-intubated patients of all age groups.
- The student must demonstrate the ability to perform a comprehensive assessment on pediatric, adult, geriatric, obstetric, trauma, and psychiatric patients.
- The student must demonstrate the ability to perform a comprehensive assessment and formulate and implement a treatment plan for patients with chest pain.
- The student must demonstrate the ability to perform a comprehensive assessment and formulate and implement a treatment plan for patients with dyspnea/respiratory distress.
- The student must demonstrate the ability to perform a comprehensive assessment and formulate and implement a treatment plan for patients with syncope.
- The student must demonstrate the ability to perform a comprehensive assessment and formulate and implement a treatment plan for patients with abdominal complaints.
- The student must demonstrate the ability to perform a comprehensive assessment and formulate and implement a treatment plan for patients with altered mental status.

Length of the Program Two years; one year (24-26 credit hours) of prerequisite work plus 12 months of professional course work (42 credit hours).

Structure of the Professional Program The prerequisites may be taken on a part-time basis; the professional program is a full-time program conducted primarily during the day. Students can enter in either the spring or fall semester. Clinical activities occur during the evening or on weekends.

Design of the Professional Curriculum The curriculum is a competency-based education program of clinical, didactic, and practical instruction integrated with a field internship in advanced emergency care and services.

This program will serve students seeking careers in emergency medical services. It will serve students entering the program immediately after high school as well as nontraditional students. The majority of students are nontraditional in that they have begun to pursue a career in the emergency medical services field on a part-time, full-time, or volunteer basis before deciding on a full-time role in emergency medicine as an EMT-P.

The program follows guidelines established by the Indiana Emergency Medical Services Commission, integrating general-education course work and paramedic science course work leading to an associate of science degree. The degree program will build on resources established in the largest and most comprehensive EMT-Paramedic Program in Indiana, the program at Wishard Hospital. In addition to classroom and laboratory facilities located on the Indiana University-Purdue University Indianapolis campus, area health care facilities involved in the preparation of EMT-paramedics in this program include Wishard Hospital, Wishard Ambulance Service, Avon Fire Department, and Riley Hospital for Children.

Location of Clinicals The primary locations of the clinical rotations are in Indianapolis. A few rotations may be required elsewhere in central Indiana.

Additional Costs In addition to regular university fees, students will need to purchase a personal stethoscope, EKG caliper, and uniform for the clinical rotation. Contact the program for a current cost sheet.

Opportunity for Students to Work Some students have part-time jobs while completing the professional course work.

Description of Facilities The program offices are located at 3930 Georgetown Road (northwest Indianapolis) through Wishard Memorial Hospital's Emergency Medical Services Division. The classroom and laboratory are located on that Wishard campus. The primary clinical site is at Wishard Hospital. The primary field site is the Wishard Ambulance Service. Other clinical and field sites are available in central Indiana.

Accreditation The associate degree program in paramedic science received its initial accreditation through the Committee on Accreditation of Educational Programs for the EMS Professions, 4101 W. Green Oaks Blvd., Suite 305-599, Arlington, TX 76016, (817) 330-0080, www.coaemsp.org.

Last Update: March 13, 2012

Admission

General Information Students accepted into the program must complete the school's and the program's admission requirements before the first day of classes. Admission to the professional program is competitive; therefore, completion of the prerequisites does not guarantee admission to the program.

Criteria Used for Selection of Class Grade point average, personal interview, and EMT experience.

Proposed Class Size Ten each cohort entering either spring or fall semester.

Specific Requirements In addition to the IU School of Medicine Health Professions Programs admission policies and procedures found at the beginning of this section of the bulletin, the following requirements apply to the paramedic science degree program.

Application Deadline October 1 of the year before anticipated entry for spring semester or February 1 of the year before anticipated entry for fall semester.

Total Number of Prerequisite Credit Hours 24–26.

Distribution of Credit Hours in Specific Areas See prerequisites.

Limitations of Course Work Remedial courses will not fulfill prerequisites or count as credit hours toward the degree.

Minimum Cumulative Grade Point Average 2.30 on a 4.00 scale. This requirement is applied at the time of program application and must be maintained.

Minimum Grade Requirement in a Stated Prerequisite Course C (2.00 on a 4.00 scale).

Interview All qualified applicants must participate in an interview. Interviews are generally conducted in December for the spring cohort and March for the fall cohort.

Technical Standards See School of Medicine Health Professions Programs policy.

Medical Requirements Documentation must include a current immunization record that indicates immunization in hepatitis B, rubella, rubeola, mumps, PPD, tetanus, and chicken pox.

Student Health Insurance All School of Medicine Health Professions Programs students are required to show proof of coverage under a health insurance plan. This is consistent with requirements for other health science students on the IUPUI campus. Additional information regarding health insurance coverage options and all the immunizations required before the start of the program is also enclosed. Proof of health insurance and immunizations is due on the first day of classes.

Indiana Residents Preference Policy See School of Medicine Health Professions Programs policy.

Volunteer Experience While volunteer experience is not required, it is helpful in making a career choice.

Accreditation The curriculum of the Paramedic Science Program is accredited by the Committee on Accreditation for EMS Programs.

Last Updated: March 13, 2012

Prerequisites

Students should consult with their academic advisors for appropriate courses and semester sequence in order to complete prerequisites. Prerequisites may be taken at any accredited college or university. The code “G” indicates a course that meets the school’s general-education requirements. Correspondence courses will not be accepted for any of the prerequisite course work.

English Composition (G)	3 cr.
Speech (G)	3 cr.
Intermediate Algebra	4 cr.
Psychology (G)	3 cr.
Sociology	3 cr.
Human Anatomy (G)	4-5 cr.
Human Physiology	4-5 cr.

EMT-Basic Requirement/Patient Care Activity In addition to the above prerequisites, each applicant must currently be certified in Indiana as an EMT and have a minimum of 20 hours of patient care activity as an EMT in the patient care area of an ambulance.

Suggested Plan of Study (EMT–basic certification not complete)

Freshman	
Fall	*Credits*
EMT-Basic	6.0
Human Anatomy or Human Biology (with lab)	4.0-5.0
English Composition	3.0
Total	13.0-15.0
Spring	*Credits*
Human Physiology or Human Biology (with lab)	4.0-5.0
Intermediate Algebra	3.0
Speech or Interpersonal Communication	3.0
Psychology or Sociology	3.0
Total	13.0-15.0
Summer	*Credits*
Psychology or Sociology	3.0
Total	3.0

Alternative Suggested Plan of Study (EMT–basic certification)

Freshman	
Fall	*Credits*
Human Anatomy or Human Biology (with lab)	4.0-5.0
English Composition	3.0
Intermediate Algebra	4.0
Psychology or Sociology	3.0
Total	14.0-15.0
Spring	*Credits*
Human Physiology or Human Biology (with lab)	4.0-5.0
Speech or Interpersonal Communication	3.0
Psychology or Sociology	3.0
Elective (*if needed*)	3.0
Total	10.0-15.0

Last Updated: March 13, 2012

Professional Program

Students are admitted into a fall or spring cohort. Courses in the professional program are sequential and must be taken in the order specified by the program faculty. Both cohorts are shown below.

Sophomore	
Entering in Fall	*Credits*
The Paramedic and Pulmonology (EMER-E 210)	3.0
Paramedic as Team Member (EMER-E 213)	4.0
Introduction to Paramedic Practice (EMER-E 214)	3.0
Pharmacology for the Paramedic (EMER-E 215)	6.0
Total	16.0
Spring	*Credits*

The Paramedic and Medical Matters (EMER-E 220)	5.0
The Paramedic and Trauma (EMER-E 221)	3.0
Paramedic as Team Player (EMER-E 223)	5.0
The Paramedic and Cardiology (EMER-E 226)	3.0
Total	16.0
Summer I & II	*Credits*
Paramedic as Team Leader (EMER E233)	2.0
Paramedic Professions Progress (EMER E243)	4.0
Comtemporary EMS Issues (EMER E246)	3.0
Total	9.0

Sophomore	
Entering in Spring	*Credits*
The Paramedic and Pulmonology (EMER-E 210)	3.0
Paramedic as Team Member (EMER-E 213)	4.0
Introduction to Paramedic Practice (EMER-E 214)	3.0
Pharmacology for the Paramedic (EMER-E 215)	6.0
Total	16.0
Summer	*Credits*
The Paramedic and Medical Matters (EMER-E 220)	5.0
Paramedic as Team Player (EMER-E 223)	5.0
The Paramedic and Cardiology (EMER-E 226)	3.0
Total	13.0
Fall	*Credits*
The Paramedic and Trauma (EMER-E 221)	3.0
Paramedic as Team Leader (EMER E233)	2.0
Paramedic Professions Progress (EMER E243)	4.0
Comtemporary EMS Issues (EMER E246)	3.0
Total	12.0

Awards Based on academic performance or clinical performance and excellence, the program faculty will recommend students for degrees awarded with distinction in accordance with the school's honors criteria.

Graduation Requirements Satisfactory completion of all prerequisites (24-26 credit hours) and 41 credit hours of professional course work. All course work must be completed in compliance with the program's and school's academic and professional policies. All professional courses (EMER-E courses) must be completed within 24 months after beginning the professional program.

Last Updated: March 13, 2012

Emergency Medical Services

An educational program in Emergency Medical Technician—Basic and Paramedic Science is located on the Indiana University—Purdue University Indianapolis campus and is offered through the IU School of Medicine Department of Emergency Medicine in conjunction with Wishard Memorial Hospital Division of Emergency Medical Services.

Scholarships Scholarship opportunities may be available through the Office of Scholarships and Financial Aid.

For further information, contact: Leon Bell, M.S.
Director
Emergency Medical Services
3930 Georgetown Rd.
Indianapolis, IN 46245

Phone: (317) 630-7614

Emergency Medical Technician-Basic (EMT-B)

Emergency Medical Technician-Basic at IUPUI

- **Department Chair:** Professor R. McGrath
- **Medical Director:** Adjunct Clinical Assistant Professor E. Bartkus
- **Program Director**: Assistant Clinical Professor L. Bell
- **Adjunct Faculty:** Lecturers D. Bignell, D. Ervin, K. Gona, J. Hallam, G Hedeen, P. Hutchinson, J. Hively, M. Mangrum, A. Michaels, J. Scheiderer, D. Seketa, M. Thralls, B. Tilson

Completion of the Course Work/Graduates of the Program The EMT-Basic Program is a regular university course of study open to all students. A student completing the course work is prepared to work as an EMT to deliver emergency patient care in the pre-hospital setting. Graduates of both the EMT-Basic and the Paramedic Science Program primarily provide emergency care in ambulance, fire services, or athletic training venues at their level of training. Nontraditional areas of employment are available in hospitals and industry.

Credential Required to Practice EMT-B, (Emergency Medical Technician-Basic)

Licensure Required to Practice Graduates of either the EMT-Basic or the Paramedic Science Program must pass a state-administered certification examination before credentialing. The certification examination may vary from state to state. The EMT-basic exam in Indiana is the written and skill exam from the Indiana Department of Homeland Security.

EDUCATIONAL PROGRAM

Description of the Profession and Career Requirements Emergency medical technicians respond to emergency calls to provide efficient and immediate care to the critically ill and injured, and they transport patients to medical facilities. After receiving the call from the dispatcher, the EMT-basic drives the ambulance to

the address or location given, using the most expeditious route, depending on traffic and weather conditions. The EMT-basic observes traffic ordinances and regulations concerning emergency vehicle operation, and upon arrival at the scene of crash or illness, parks the ambulance in a safe location to avoid additional injury. Before initiating patient care, the EMT-basic also sizes up the scene to determine that the scene is safe, to identify the mechanism of injury or nature of illness and total number of patients, and to request additional help if necessary. In the absence of law enforcement, the EMT-basic creates a safe traffic environment, through such means as the placement of road flares, removal of debris, and redirection of traffic for the protection of the injured and those assisting in emergency care. The EMT-basic determines the nature and extent of illness or injury and establishes priority for required emergency care. Based on assessment findings, the EMT-basic renders emergency medical care to medical and trauma patients. Duties include, but are not limited to, opening and maintaining an airway; ventilating patients; cardiopulmonary resuscitation, including use of automated external defibrillators; and providing pre-hospital emergency medical care of simple and multiple system trauma, such as controlling hemorrhage, treating shock (hypo-perfusion), bandaging wounds, and immobilizing of painful, swollen, or deformed extremities. Other duties include assisting in childbirth; management of respiratory, cardiac, diabetic, allergic, behavioral, and environmental emergencies; and dealing with suspected poisonings. The EMT-basic searches for medical identification emblems as clues in providing emergency care. Additional care, including administering medications, is provided based upon assessing patients and obtaining historical information.

When a patient must be extricated from entrapment, the EMT-basic assesses the extent of injury and gives all possible emergency care and protection to the entrapped patient and uses the prescribed techniques and appliances for safe removal, including contact dispatchers for additional help or special rescue and/or utility services. The EMT-basic provides simple rescue service if an ambulance has not been accompanied by a specialized unit. The EMT-basic complies with regulations on handling victims of fatalities. Other duties include lifting, securing, and removing stretchers. From the knowledge of the condition of patients, the extent of injuries, and the relative locations and staffing of emergency hospital facilities, the EMT-basic determines the most appropriate facility to which a patient will be transported and communicates effectively with emergency departments and communications centers. The EMT-basic also identifies assessment findings that may require communication with medical personnel.

The EMT-basic provides assistance to receiving facility staff upon request and ensures that ambulances are kept in optimal condition. Members of the profession must maintain familiarity with specialized equipment and attend continuing education and refresher training programs as required by employers, medical direction, and licensing or certifying agencies. They must also meet qualifications within the functional job analysis.

Length of Program One semester; a new course begins each fall and spring semester.

Additional Costs Students are encouraged to purchase their own stethoscopes.

ADMISSIONS

General Information No application is required. Students from the university at large are eligible to attend. Students must complete program prerequisites before the first day of classes.

Prerequisite Current credential in Health Care Provider CPR.

Approximate Class Size 38 each semester.

Technical Standards See School of Medicine Health Profession Programs technical standards.

CURRICULUM

Prerequisite Students must hold current credential in Health Care Provider-level CPR.

Required Course

Fall and/or Spring	Credits
Emergency Medical Technician - Basic (EMER-E 201)	6.0 cr

Last Updated: March 13, 2012

Histotechnology

An educational program in histotechnology through the IU School of Medicine Department of Pathology and Laboratory Medicine is located on the Indiana University–Purdue University Indianapolis campus. Courses are taught via distance education to students in qualifying histology laboratories around the United States.

Student Consumer Information About this Program - Indiana University is sharing this information about Certificate Program in compliance with Federal Regulations required by the US Department of Education.

Program Goals

The program's goals have been developed within the mission of the Health Professions Programs in the School of Medicine. In an effort to provide theoretical background and the development of a high degree of occupational competence, the program has established the following goals:

- To provide students with the educational experiences necessary to enter a career as a histologic technician, to include entry-level competence and eligibility for the ASCP Board of Registry Histotechnician examination.
- To provide the nationwide health care community with individuals competent to conduct high-quality histologic procedures.
- To provide a curriculum containing a balance between technical knowledge and clinical competence gained in the histology laboratory setting.
- To assist students in reaching their goals by providing academic and occupational advising.

- To instill in students a lifelong desire to achieve professional and academic excellence.

Program Objectives

Upon successful completion of all standard academic requirements established for this program, the graduate is entitled to receive a Certificate in Histotechnology from Indiana University. By virtue of the standards required by this program, the graduate is eligible to take the Histotechnician Certification Examination administered by the American Society for Clinical Pathology's Board of Registry. The didactic and practical experience provided by the course of instruction should enable the graduate to accomplish the following objectives:

A. Technical Skill

1. Perform procedures of basic histologic laboratory techniques, instrumentation, and problem solving at entry-level competency.
2. Demonstrate knowledge of general and specific histologic methodology.
3. Perform procedures with accuracy and precision.
4. Monitor internal and external quality assurance measures.
5. Demonstrate knowledge of operational principles of commonly used laboratory instruments, to include the ability to perform daily preventative maintenance and correct simple malfunctions.
6. Exercise independent judgment regarding choice of procedure and evaluation of results.
7. Organize tasks to cope with volume of work and unexpected demands.

B. Communication

1. Communicate effectively with the clinical education supervisor and program director regarding curriculum and training courses.
2. Effectively organize and present information both in written assignments and oral communication.
3. Communicate effectively with other laboratory and health care providers.

C. Professional Behavior

1. Display an attitude reflecting pride and professionalism in daily laboratory duties.
2. Demonstrate adaptability, integrity, initiative, neatness, maturity, stability, and a desire for excellence.

Scholarships The American Society for Clinical Pathology, the National Society for Histotechnology, and several states' histology professional organizations sponsor scholarships for students in histotechnology. Other scholarship and financial aid opportunities may be available through the IUPUI Office of Scholarships and Financial Aid.

Certificate

Certificate in Histotechnology at IUPUI

- **Medical Director:** T. Ulbright
- **Program Director:** Clinical Assistant Professor D. Wood

EDUCATIONAL PROGRAM

Length of the Program Ten months of professional course work beginning with fall semester. The course of study consists of eight courses (24 credit hours), including four didactic courses and four practicum courses.

Structure of the Program Histotechnology didactic course lectures are recorded and available online. Weekly review sessions are held once per week during the day via web and tele- conferencing; practicum course work is performed at qualified clinical sites in the student's laboratory.

Design of Professional Curriculum Students who are employed in laboratories that qualify as clinical affiliate sites are accepted into the Histotechnology Program to begin the course of study in the fall semester. The curriculum consists of didactic and practicum courses delivered by distance learning to students pursuing on-the-job training in histology laboratories. Lectures are recorded using Adobe Presenter and are available weekly. The 60-minute interactive audio/video web-conference review sessions are held once per week using Adobe Connect and are accompanied by related assignments that require approximately 3.5 hours per week for completion. The practicum course modules are designed to be accomplished in approximately 16 hours per week; however, as part of on-the-job training, it is assumed that students in the program receive full-time technical training at their place of employment.

The Histotechnology Program is designed to

- Provide educational and clinical experiences in all area of histologic technology to prepare students for beginning a career as a histologic technician.
- Provide medical communities nationwide with individuals qualified to effectively carry out the functions of the histotechnology discipline.
- Assist affiliate sites' histology trainers in meeting the student's needs in accomplishing the course work.
- Assist students in reaching their goals by providing academic, occupational, and personal guidance.

Program Facilities The Histotechnology Program office is located in the IU Health Pathology Laboratory Building at Indiana University-Purdue University Indianapolis (IUPUI). "Classrooms" for delivery of teleconferences, as well as practical training sites, are located in institutions throughout the United States that qualify as clinical affiliates where students are located. Clinical affiliate sites may vary from year to year, as training needs change.

Additional Costs of the Program In addition to tuition and course fees, students are required to purchase books. Completion of course requirements may necessitate the

purchase of laboratory supplies not ordinarily used at the student's training facility laboratory. Clinical training laboratories may cover some expenses for laboratory supplies and mailing costs for submission of assignments to the program office. Additional training costs to student and/or laboratory are estimated at $400.00 per year.

Feasibility of Work for Students Since the program is designed with the on-the-job student in mind, full-time employment in a histology laboratory is assumed.

Accreditation The Histotechnology Program (certificate level) at Indiana University-Purdue University Indianapolis is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), Chicago, Illinois; (312) 714-8880.

Last Updated: March 13, 2012

Admission

Criteria Used for Selection of Class For admission, students need a high school diploma (or equivalent), completion of prerequisite courses, employment in or appropriate access to a qualified training laboratory, and completion of all application requirements.

The Histotechnology Program is designed to reach students in all parts of the nation. However, preference for admissions is ranked as follows: (1) students in laboratories with multiple noncertified students; (2) students in laboratories with one noncertified student. Other applicants will be admitted as class capacity allows.

Class Size Enrollment in the certificate program is not limited; therefore, most qualified applicants are admitted. In the event, however, that enrollment exceeds program resources, applicants who are residents of Indiana are given preference for admission before out-of-state applicants.

Affiliate sites may accommodate more than one student, depending on the laboratory's capacity for training, or the training facility may accommodate students from additional local sites for web-conferences. Average class size is 45 students.

Specific Requirements In addition to the Health Professions Programs admission policies and procedures found at the beginning of this section of the bulletin, the admission policies below apply to the Histotechnology Program.

Application Deadline May 1 of the year of anticipated entry.

Minimum Academic Requirements High school graduation or equivalent. A minimum of 2.00 on a 4.00 scale in prerequisite courses is required for admission and must be maintained in professional courses. See prerequisites.

Technical Standards See Health Professions Programs technical standards.

Volunteer Experience Although volunteer experience is not required of applicants, it is highly recommended that students with no histology laboratory experience spend time in a histology laboratory to assure serious interest before proceeding with application to the program.

Last Updated: March 12, 2012

Curriculum

Prerequisites Students are required to have completed college courses in chemistry, biology, and mathematics with a course specific grade point average of 2.0 on a 4.00 scale (C). High school chemistry, biology and mathematics courses with a course specific grade point average of 2.00 on a 4.00 scale (C) are acceptable if completed within 10 years before admission date. All prerequisite courses must be completed before admission into the program.

Professional Program Paired didactic and practicum courses must be taken concurrently. Courses are offered and must be completed in sequence. Students are registered for classes in each term as follows:

Fall	*Credits*
Histotechnology I (PATH-H 101)	3.0
Histotechnology Practicum I (PATH-H 181)	3.0
Histotechnology II (PATH-H 102)	3.0
Histotechnology Practicum II (PATH-H 182)	3.0
Total	12.0
Spring	*Credits*
Histotechnology III (PATH-H 103)	3.0
Histotechnology Practicum III (PATH-H 183)	3.0
Histotechnology IV (PATH-H 104)	3.0
Histotechnology Practicum IV (PATH-H 184)	3.0
Total	12.0

Program Completion Requirements Satisfactory completion of 24 credit hours of professional courses. All course work must be completed in compliance with the program's and school's academic and professional policies.

Last Updated: March 13, 2012

Associate of Science

Associate of Science in Histotechnology at IUPUI

- **Medical Director:** T. Ulbright
- **Program Director:** Clinical Assistant Professor D.Wood

EDUCATIONAL PROGRAM

Length of Program One year of full-time certificate-level course work, or prior certification by the Board of Registry of the American Society for Clinical Pathology, plus additional time for completion of degree requirements. Students should aim to complete the course work in no more than five years from the time they first enroll in the program.

Structure of Program Designed for the employed histologist, the professional course work is offered by distance education. General-education courses may be completed at Indiana University or at other accredited colleges or universities.

Design of Professional Curriculum Completion of the certificate-level course work (24 credit hours) is required before pursuit of the associate degree. Alternately, the previously certified HT(ASCP) may apply for special credit in lieu of completion of the certificate course work. Required general-education courses may be transferred from any accredited college or university, in accordance with university and school policy, or completed through the Indiana University School of Continuing Studies independent study courses. A minimum of 30 credit hours must be completed at Indiana University. The histotechnology capstone course, offered by distance education via Adobe Presenter and Adobe Connect web-conferencing, will be taken as the student nears degree completion.

Program Facilities The Histotechnology program office is in the IU Health Pathology Laboratory Building at Indiana University-Purdue University Indianapolis. Students access accredited course work by attendance at IUPUI or another college or university or through distance education offerings.

Opportunity to Work The program is designed with the employed histologist in mind; full- or part-time employment is assumed.

Last Updated: March 13, 2012

Admission

General Information Students accepted into the program must complete the following program admission requirements before the first day of classes. Enrollment in the associate degree program is not limited; therefore, most qualified applicants are admitted. In the event, however, that enrollment exceeds program resources, applicants who are residents of Indiana are given preference for admission before out-of-state applicants.

Criteria Used for Selection of Class Successful completion of the certificate-level course work. Alternately, prior certification by the American Society for Clinical Pathology Board of Registry as an HT or HTL and application for the program's special credit option.

Specific Requirements In addition to the Health Professions Programs admission policies and procedures found at the beginning of this bulletin, the admission policies below apply to the Associate of Science in Histotechnology degree.

Application Deadline Applications are accepted year round. Capstone course (PATH-H 201) is typically only offered in the spring term.

Minimum Academic Requirements High school diploma or equivalent. A minimum grade point average of 2.00 on a 4.00 scale (C) is required for admission and must be maintained in all courses throughout the program.

Minimum Cumulative Grade Point Average 2.00 on a 4.00 scale (C). This requirement is applied at admission and must be maintained. Grades earned in remedial courses are not used to calculate the cumulative grade point average.

Technical Standards See Health Professions Programs policy.

Last Updated: March 13, 2012

Curriculum

Prerequisites Completion of the Certificate in Histotechnology or prior certification by the American Society for Clinical Pathology as a histotechnician (HT) or histotechnologist (HTL).

Professional Program
Indiana University offers online courses through various campuses, as well as independent study courses, please contact Histotechnology Program Director for available options. Courses may be completed elsewhere and transferrred to IUPUI. Please see below minimum number of hours that must be completed within the IU system to meet graduation requirements. General-education courses may be completed, for the most part, in any sequence. The Histotechnology Program capstone course is designed to be taken near teh completion of the associate degree; the studnet must complete the technical writing course requirement before registering for the capstone courses.

Degree Completion Courses The following courses must be satisfactorily completed for the associate degree. The code "G" indicates a course that meets the school's general-education requirements.

Elementary Composition (G)	3 cr.
Professional (Technical) Writing Skills	3 cr.
Interpersonal Communication (G)	3 cr.
College Precalculus Math (G)	3 cr.
Introductory Psychology (G)	3 cr.
Introduction to Sociology	3 cr.
Contemporary Biology	3 cr.
Human Anatomy	3 cr.
Elementary Chemistry	3 cr.
Medical Terminology	2 cr.
Histotechnology Capstone (PATH-H 201)	6 cr.

Special Credit Policy Practicing histologists certified by ASCP (HT or HTL) may apply for special credit courses PATH-H 105 (*Histotechnology Credential Theory*) and PATH-H 185 (*Histotechnology Credential*), in lieu of taking certificate-level courses, when working toward the associate degree at IUPUI. Special credit courses PATH-H 105 and PATH-H 185 are normally not transferable to other colleges or universities.

Graduation Requirements Satisfactory completion of 30credit hours, to include 30credit hours of general-education courses and 30 credit hours of professional courses. If needed, elective hours can be used to bring the student's general-education courses to 30 credit hours as long as all content areas have been completed. All course work must be completed in compliance with the program's and school's academic and professional policies. Minimum of 30 credits hours must be completed at Indiana University; special credit (PATH-H 105 and 185) courses do not qualify.

Last Updated: March 13, 2012

Medical Imaging Technology

An educational program in medical imaging technology is located on the Indiana University-Purdue University Indianapolis campus and housed in the IU School of Medicine Department of Radiology and Imaging Sciences. This program is an advanced program for the registered radiographers, nuclear medicine or radiation therapy technologists.

Description of the Profession The medical imaging technologist in radiologic sciences is a skilled radiographer imaging professional qualified to provide patient service in interventional procedures (IR), computed tomography (CT), sonography (US), and magnetic resonance imaging (MRI). Medical imaging technologists use principles of radiation protection as they determine exposure factors and position patients for a variety of examinations. Many of the patient examinations are highly specific, using computers or computerized equipment. Medical imaging technologists are also capable of assessing the technical quality of the image, and providing basic patient care. The technologist must function as a member of the health care team.

Graduates of the Program Graduates receive a Bachelor of Science degree and are eligible to take specialty examinations depending on their major area of concentration.

Credentials Required to Practice RT(R) or RT (T) or RT (N) or RDMS or MMTCB (ARRT). Advanced qualification credentials are available and may be required by employers. Currently, depending on the clinical major completed, graduates may be eligible for one or more of the following credentials in addition to the RT(R) (ARRT) required for entry into the program: from the ARRT, cardiovascular-interventional technology (CV), computed tomography (CT), mammography (M), magnetic resonance imaging (MR), and ultrasound (U); from the ARDMS, medical sonography (RDMS) and vascular technology (RVT).

Indiana Requirements to Practice A State license is required to operate an X-ray machine. The State accepts ARRT credentials to satisfy educational requirements.

If you hold one of these creditial contact Linda Cox. If you do not hold one of these credentials, contact the Health Professions Programs office.

Linda Cox, Coordinator, Medical Imaging Technology Program
IU Radiologic and Imaging Sciences
541 N. Clinical Drive, CL 120

Educational Program

Bachelor of Science in Medical Imaging Technology at IUPUI

- **Medical Director:** Professor Jackson
- **Program Director:** Associate Professor Long
- **Coordinator:** Clinical Associate Professor Cox

Clinical Tracks for Magnetic Resonance Imaging (MRI), Computed Tomography (CT), Interventional Procedures (IR) and Songraphy (US) This program is designed to prepare qualified medical imaging technologists. The principal aim of the major is to provide students with educational experiences that will permit them to develop the competencies required to function effectively as advanced imaging technologists. Theory and clinical experiences are provided in interventional procedures, computed tomography and magnetic resonance imaging, and ultrasound. Students receive theory in all areas and select one major for clinical experiences.

Non-Clinical Track Students may also select a non-clinical curriculum receiving theory in all areas of Medical Imaging. (Students would not be eligible to sit for advanced certification examinations unless they received the clinical components through their employer.) Students who seek this track may be interested in a BS degree for personal fulfillment, initial employment (such as medical sales) or job advancement (such as a management or education position).

Non-Clinical Track Requirements The non-clinical track in Medical Imaging Technology (MIT) is directed toward professionals in the field of Medical Imaging who are seeking a Bachelor degree in their field, but do not require or desire clinical experience in one of the modality tracks offered (CT/MRI/IR/US) in MIT.

- Non-clinical track professional curriculum is 32 credit hours.
- Minimum of 30 credit hours in residence at Indiana University.
- Minimum of 122 credit hours total must be done to receive a Bachelor's degree in Medical Imaging Technology.
- 12 credit hours of the non-clinical track professional curriculum may be taken outside of the Radiologic and Imaging Sciences Programs, but the credit hours must be relevant (must meet with MIT Coordinator for approval of outside credit hours) to the field of Medical Imaging. All credit hours within the non-clinical track professional curriculum must be 300 or 400 level courses.
- The non-clinical track can be done part-time or full-time.
- Most of the professional curriculum for non-clinical track is independent study with only a small commitment of time needed on campus per semester.

Special Credit for Post-Primary Certification for those seeking the Non-clinical track BS

- Students may apply for sepcial credit (12 credit hours) for holding a **post-primary** certification related to Medical Imaging (ARDM, CT, MRI, Mammography, Nuclear Medicine, etc.)
- If special credit is awarded, all remaining courses must be taken within the non-clinical track professional curriculum in the Medical Imaging Technology Program.
- Special credit hours do not apply toward the minimum of 30 credit hours in residence at Indiana University.

Length of the Program MRI, CT, and IR (10.5 months) A new class begins with summer session II each year and continues through the end of the spring semester the next year.
US(16 months) A new class begins with summer session II and continues through the end of the fall semester the next year.
Non-clinical track (10.5 months) The Non-clinical track may be started during any semester after application has been made. A new class begins with summer session II each year and continues through the end of the spring semester the next year. However, students may choose to go part-time in this track, which would lengthen the program of study.

Structure of the Program Students have classes, labs, or clinical experiences from 8 a.m. to 4 p.m., Monday through Friday. Some evening hours may be required. For the non-clinical track, students are in classes on Tuesday or Thursday during the Summer semester and on Friday during the Fall and Spring semesters. Students will be able to complete a significant portion of the curriculum without attending traditional classes.

Opportunity for Students to Work Employment as a part-time radiographer may be available at one of the area hospitals.

Additional Cost In addition to regular university tuition and fees, students should expect to pay for program-related expenses such as books, uniforms, etc. Consult the HPP website advising section for a current cost sheet.

Program Facilities The Medical Imaging Technology Program is offered in Indianapolis at the Indiana University Medical Center. The offices, classrooms, and laboratory facilities are located on the first floor of the Gatch Hall (Clinical Building). Clinical education sites are in the Indianapolis metropolitan area. Students are responsible for their transportation to these sites.

Last Updated: February 14, 2012

Admission

General Information

Admission to the professional program is competitive; therefore, completion of the prerequisites does not guarantee admission to the program.

Criteria Used for Selection of Class Previous academic record, evidence of registration in radiography by the American Registry of Radiologic Technologists (ARRT), and availability of major clinical concentration (clinical tracks only).

Class Size Varies yearly based on the availability of clinical education sites for each major area and number of students in the non-clinical track.

Specific Requirements In addition to the Health Professions Programs' admission policies and procedures found at the beginning of this section of the bulletin, the admission policies below apply to the Medical Imaging Technology Program.

Application Deadline November 15 of the year before anticipated entry. Non-clinical track applicants can apply year round.

Total Number of Prerequisite Credit Hours 73.

Minimum Cumulative Grade Point Average 2.80 on a 4.00 scale at the time of application. All college courses taken, including remedial courses and courses that do not meet prerequisite requirements, are considered when calculating the minimum cumulative grade point average.

Minimum Specific Grade Point Average* Cumulative 2.50 on a 4.00 scale for all math, biological, and physical science course work. All college math, biological, and physical sciences courses taken, including remedial courses and courses that do not meet prerequisite requirements, are considered when calculating the minimum life and physical science grade point average.

*Achievement of minimum grade point averages is a condition of application eligibility only and does not guarantee acceptance into the MIT program.

Minimum Grade Requirement in a Stated Prerequisite Course C (2.00 on a 4.00 scale).

Interview An interview is not required.

Technical Standards See the Health Professions Programs' policy.

Indiana Residents Preference Policy See the Health Professions Programs' policy.

Experience While radiography experience beyond the initial radiography program is not required, it is helpful.

Last Update: March 13, 2012

Prerequisites

Before entering the program, students must complete the following minimum prerequisites. Students should consult with their academic advisors for appropriate courses and semester sequence in order to complete prerequisites. Equivalent prerequisites may be taken at any accredited college or university. The code "G" indicates a course that meets the school's general-education requirements.

NOTE: Students entering in summer 2013 or after must complete requirements by the end of the prior spring term.

General Education Areas	
Verbal communication (G) 2-3 cr.	2-3 cr.
Written communication (G)	2-3 cr.
Introductory psychology (G)	3 cr.
College algebra, trigonometry, or calculus (G)	3-5 cr.
Biological and Physical Sciences (The following courses must be included): -General Physics -Anatomy and Physiology I or Human Biology I (with lab)* -Anatomy and Physiology II or Human Biology II (with lab)*	15 cr.
Humanities elective (G)+	3 cr.
Social/behavioral science elective (G)+	3 cr.

+Courses are required for graduation and can be completed during the professional program (*if necessary*). Students can also request to substitute a second humanities course for the social-behavioral science elective.

Radiography This area is complete for applicants who have earned 40 college credit hours in radiography.

Students who received their radiography education without transferable university credit and who have full credentials in radiography (ARRT) may be awarded credit for their credentials and experience and/or may petition to test out of professional radiography courses. A copy of the Special Credit Policy is available upon request. Each applicant will be evaluated individually.

Students must select additional courses in radiography or in areas that support, complement, or extend their radiography background if they lack 40 semester hours of earned college credit in radiography.

Suggested Elective (If necessary) A total of 73.0 credit hours are needed before entering the Bachelor of Science in Medical Imaging Technology Program. It is unlikely that a student applying to this program will need any elective credits. Courses from a university based radiography program and special credit awarded by credential/ experience will be used to meet the minimum hour's requirement. Students need a total of 122-133.0 credit hours, depending on major track, for graduation.

Last Updated: March 13, 2012

Professional Program

Courses in the professional program are sequential and therefore must be taken in the order specified by the program faculty.

Students are admitted into three different tracks, MR/CT/ IR, Ultrasound, or Non-Clinical. There are differences in the total number of credit hour required for each track in addition to other curricular differences.

Senior (MR/CT/IR)

Summer II	*Credits*
Sectional Imaging Anatomy (RADI-R 404)	3.0 cr
Introduction to Medical Imaging Technology Projects (RADI-R 455)	2.0 cr
Medical Imaging Technology Clinical Observation (RADI-R 480)	1.0 cr
Total	6.0 cr
Fall	*Credits*
Essential Radiology for the Imaging Technologist I (RADI-R 415)	2.0 cr
Medical Imaging Theory (RADI-R 451)	3.0 cr
Medical Imaging Technology Project I (RADI-R 456)	2.0 cr
Clinical Practicum (Select from RADI-R 481, 482, 483)	6.0 cr
Total	13.0 cr
Spring	*Credits*
Essential Radiology for the Imaging Technologist II (RADI-R 416)	1.0 cr
Medical Imaging Technology Physics Review (RADI-R 428) **or** Magnetic Resonance Imaging Physics (RADI-R 429)	1.0 cr
Medical Imaging Applications (RADI-R 452)	3.0 cr
Medical Imaging Technology Project II (RADI-R 457)	2.0 cr
Clinical Practicum (Select from RADI-R 481, 482, 483)	6.0 cr
Total	13.0 cr
MR/CT/IR Program Total	**32.0 cr**

Senior (Ultrasound)

Year One	
Summer Session II	*Credits*
Sectional Imaging Anatomy (RADI-R 404)	3.0 cr
Introduction to Medical Imaging Technology Projects (RADI-R 455)	2.0 cr
Medical Imaging Technology Clinical Observation (RADI-R 480)	1.0 cr
Total	6.0 cr
Fall	*Credits*
Ultrasound Physics I (RADI-R 434)	3.0 cr
Medical Imaging Theory (RADI-R 451)	3.0 cr
Medical Imaging Technology Project I (RADI-R 456)	2.0 cr
Clinical Practicum (RADI-R 484)	6.0 cr
Total	14.0 cr
Spring	*Credits*
Ultrasound Physics II (RADI-R 435)	3.0 cr
Medical Imaging Applications (RADI-R 452)	3.0 cr
Medical Imaging Technology Project II (RADI-R 457)	2.0 cr
Clinical Practicum (RADI-R 484)	6.0 cr
Total	14.0 cr

Year Two	
Summer Session II	*Credits*
Clinical Practicum (RADI-R 484)	4.0 cr
Total	4.0 cr
Fall	*Credits*
Clinical Practicum (RADI-R 484)	8.0
Total	8.0
Ultrasound Program Total	**46.0 cr**

Senior (Non-Clinical)

Summer Session II	*Credits*
Sectional Imaging Anatomy (RADI-R 404)	3.0 cr
Introduction to Medical Imaging Technology Projects (RADI-R 455)	3.0 cr
Total	6.0 cr
Fall	*Credits*
Essential Radiology for the Imaging Technologist I (RADI-R 415)	2.0 cr
Medical Imaging Theory (RADI-R 451)	3.0 cr
Medical Imaging Technology Project I (RADI-R 456)	2.0 cr
Special Credit ***or*** Upper-Level Electives	6.0 cr
Total	13.0 cr
Spring	*Credits*
Essential Radiology for the Imaging Technologist II (RADI-R 416)	1.0 cr
Medical Imaging Technology Physics Review (RADI-R 428) **or** Magnetic Resonance Imaging Physics (RADI-R 429)	1.0 cr
Medical Imaging Applications (RADI-R 452)	3.0 cr
Medical Imaging Technology Project II (RADI-R 457)	2.0 cr
Special Credit ***or*** Upper-Level Electives	6.0 cr
Total	13.0 cr
Non-Clinical Program Total*	**32.0 cr**
***Alternate schedules available, please contact program coordinator.**	

Non-Clinical Track Special Credit Contact Program Coordinator to see program's special credit policy.

Non-Clinical Track Electives Contact Program Coordinator for a list of the approved upper-level electives that can be taken to fulfill this requirement.

Awards The program faculty recommend to the university graduating students with superior academic performance for degrees awarded with distinction. Also, students with outstanding academic and clinical achievement during their professional program may be recognized by the program at the time of graduation.

Graduation Requirements Satisfactory completion of 121-133 credit hours. All course work must be completed in compliance with the program's and school's academic and professional policies.

Nuclear Medicine Technology

An educational program in nuclear medicine technology is located on the Indiana University– Purdue University Indianapolis campus and housed in the IU School of Medicine Department of Radiology and Imaging Sciences, section on nuclear medicine.

Description of the Profession The graduate nuclear medicine technologist is qualified to provide patient diagnostic and therapeutic services using ionizing radiation in the form of gamma rays, X rays, and beta rays. These radiations emanate from radioactive materials. Nuclear medicine technologists perform patient organ imaging procedures, radioactive analysis of biological specimens (blood, urine), and some therapeutic applications of radioactive materials. Effective nuclear medicine technologists use principles of radiation protection as they prepare and administer radioactive materials for a variety of examinations. They are capable of performing quality control procedures on the instrumentation and radioactive materials. Nuclear medicine technologists also assist physicians in clinical procedures, give intravenous injections, draw blood, assess the technical quality of the studies, and provide basic patient care. The nuclear medicine technologist must function as a member of the health care team.

Graduates of the Program Graduates receive a Bachelor of Science degree from Indiana University and are eligible to take the certification examination of the American Registry of Radiologic Technologists (ARRT) and the Nuclear Medicine Technology Certification Board (NMTCB) to become certified as a nuclear medicine technologist, R.T.(N) or C.N.M.T.

Credentials Required to Practice R.T.(N) (ARRT), Registered Nuclear Medicine Technologist, or C.N.M.T. (NMTCB), Certified Nuclear Medicine Technologist.

For further information, contact: Judith E. Kosegi, Program Director, Nuclear Medicine Technology Program
IU Radiologic and Imaging Sciences
541 Clinical Drive, CL 120
Indianapolis, IN 46202

Educational Program

Bachelor of Science in Nuclear Medicine Technology at IUPUI

- **Medical Advisor:** Professor Fletcher
- **Program Director:** Associate Professor Kosegi
- **Assistant Professors**: Richard
- **Lecturers:** Byrne, Clifft, Dick, Duncan-Weatherman, Giger, Hardesty, Lewis, Lomax, Spilker, Wade

Length of the Program A new class begins summer session II each year and continues for 22 months.

Structure of the Professional Program The curriculum is designed for persons with no previous experience in nuclear medicine, although experienced technologists may apply for admission. During the junior year, students have classes on Monday, Wednesday, and Friday, plus up to eight hours of clinical practicum on each Tuesday and Thursday and four hours on Friday mornings. Senior students have up to eight hours of clinical practicum on each Monday, Wednesday, and Friday, plus classes on Tuesday and Thursday.

Design of the Professional Curriculum This degree is designed to prepare qualified nuclear medicine technologists. The principal aim of the degree is to provide students with educational experiences that will permit them to develop the competencies required to function effectively as nuclear medicine technologists. The curriculum integrates theory and clinical experience.

Opportunity for Students to Work Some part-time employment may be available in the radiology departments at the Indiana University Medical Center. There are no restrictions on the number of hours a student may work during the program, as long as work does not interfere with program requirements. The student must, however, recognize that the professional curriculum requires approximately 25 to 35 hours per week of on-campus participation in classroom, laboratory, and clinical course work. Study time and completion of general education courses must also be considered. While most of the professional course activities are scheduled during daytime hours Monday through Friday, there are some clinical experiences that may require student participation during evenings or other off hours. Please contact the program for more information.

Additional Cost In addition to regular university tuition and fees, students should expect to pay program-related expenses such as books, uniforms, etc. Contact the program for a current cost sheet.

Program Facilities The nuclear medicine technology program is offered in Indianapolis at the Indiana University Medical Center. The offices, classrooms, and library are located on the first floor of the Gatch Hall (Clinical Building). Students obtain clinical experience in the nuclear medicine areas of radiology departments located in University, Riley, Wishard, and Veterans Administration hospitals, plus the PET/CT facilities on campus. Three other clinical education sites in the Indianapolis area are also used.

Accreditation The bachelor's degree in nuclear medicine technology is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

Last Updated: February 15, 2012

Admission

General Information Admission to the professional program is competitive; therefore, completion of the prerequisites does not guarantee admission to the program.

Class Size Seven students are admitted to begin the program in summer session II (late June) each year.

Specific Requirements In addition to the School of Medicine Health Professions Programs' admission policies and procedures found at the beginning of this section of the bulletin, the policies below apply to the Nuclear Medicine Technology Program.

Application Deadline November 15 of the year before anticipated entry.

Total Number of Prerequisite Credit Hours 60

Minimum Cumulative Grade Point Average 2.80 on a 4.00 scale. This requirement is applied at the time of program application and must be maintained. The grades from all college courses taken, including remedial courses and courses that do not meet prerequisite requirements, are considered when calculating the minimum cumulative grade point average.

Minimum Specific Grade Point Average 2.50 on a 4.00 scale for all life and physical science course work. This requirement is applied at the time of program application and must be maintained. The grades from all college life and physical sciences courses taken, including remedial courses and courses that do not meet prerequisite requirements, are considered when calculating the minimum specific grade point average.

Minimum Grade Requirement in a Stated Prerequisite Course C (2.00 on a 4.00 scale).

Interview Qualified applicants must participate in an interview. Interviews are conducted in early to mid February.

Technical Standards See School of Medicine Health Professions Programs' policy.

Indiana Residents Preference Policy See School of Medicine Health Professions Programs policy.

Volunteer Experience Volunteer experience is not required. Applicants are expected to observe in a nuclear medicine facility before the admission interview.

Last Updated: February 15, 2012

Prerequisites

Before entering the program, students must complete the minimum prerequisites listed below. Students should consult with their academic advisors for appropriate courses and semester sequence in order to complete prerequisites. Prerequisites may be taken at any accredited college or university. The code "G" indicates a course that meets the School's general-education requirements.

NOTE: Students entering in summer 2013 or after must complete requirements by the end of the prior spring term.

General Education	
Written Communications, two courses (G) (*Prefer the second writing course focus on writing a research paper.*)	4-6 cr.
Verbal Communications (G)	2-3 cr.
Psychology (G)	3 cr.
Biological and Physical Sciences (G)	20-25 cr.
The following courses must be included: -Elementary Chemistry I (with lab) -Elementary Chemistry II (with lab) -General Physics -Anatomy and Physiology I or Human Biology I (with lab)* -Anatomy and Physiology II or Human Biology II (with lab)*	
College Algebra, Trigonometry, or Calculus (G)	5-6 cr.**
Statistics	3 cr.
Other Graduation Requirements and Electives* **	
Humanities Elective (G)+	3 cr.
Social/Behavioral Science Elective (G)+	3 cr.
Medical Terminology	1 cr.
General Electives - As needed to meet minimum hours requirements	
Total (minimum)	60 cr.
*Individual Anatomy and Physiology courses (with labs) may be used.	
**Or 4 credits of 200 level or higher college calculus.	
***Students must enter with a minimum of 60 credit hours at program entrance may take up to 9 credit hours of the other graduation requirements during the program.	
+Students can request to substitute a second humanities course for the social-behavioral science elective.	

A Suggested Plan of Study

Freshman	
Fall	*Credits*
English Composition I	3.0
Verbal Communication	3.0
College Algebra	3.0
Chemistry I (with lab)	5.0
Total	14.0
Spring	*Credits*
English Composition II	3.0
Psychology	3.0
Trigonometry or Calculus	3.0
Chemistry II (with lab)	5.0
Total	14.0
Sophomore	
Fall	*Credits*
Anatomy and Physiology I	4.0-5.0
General Physics	4.0-5.0
Humanities Elective	3.0
Medical Terminology	1.0
General Electives	2.0-4.0
Total	16.0
Spring	*Credits*
Anatomy and Physiology II	4.0-5.0
Statistics	3.0
Social/Behavioral Science Elective	3.0
General Electives	3.0
Total	16.0

Last Updated: March 13, 2012

Professional Program

Courses in the professional program are sequential and therefore must be taken in the order specified by the program faculty.

The 65 professional credits listed below are obtained within a 22-month period and fulfill eligibility requirements for the registry examination in nuclear medicine technology. Some electives may be taken (as shown below) during the 22-month program.

Junior	
Summer Session II	*Credits*
Introduction to Radiography (RADI-R 110)	3.0
Patient Care I (RADI-R112)	3.0
Total	6.0
Fall Semester	*Credits*
Projects in Nuclear Medicine Technology I (RADI-R 410)	1.0
Physics and Instrumentation of Nuc Med I (RADI-R 412)	2.0
Applications of Radionuclides I (RADI-R 432)	3.0
Radiation Protection in Nuclear Medicine (RADI-R 437)	1.0
Clinical Nuclear Medicine Practicum I (RADI-R 445)	6.0

Elective if needed for Graduation	3.0
Total	13.0-16.0
Spring Semester	*Credits*
Projects in Nuclear Medicine Technology II (RADI-R 411)	2.0
Physics and Instrumentation of Nuc Med II (RADI-R 417)	2.0
Radionuclide Measurement (RADI-R 422)	2.0
Nuclear Medicine In-Service I (RADI-R 423)	1.0
Clinical Nuclear Medicine Practicum I (RADI-R 445)	5.0
Elective if needed for Graduation	3.0
Total	12.0-15.0

Senior

Summer Session I & II	*Credits*
Patient Care II (RADI-R 212) 12 wks/SS I & II	1.0
Sectional Imaging Anatomy (RADI-R 404) 6 wks/SS II	3.0
Clinical Nuclear Medicine Practicum II (RADI-R 446) 12 wks SS I & II	5.0
Elective if needed for Graduation	3.0
Total	9.0-12.0
Fall Semester	*Credits*
Nuclear Medicine In-Service II (RADI-R 424)	1.0
Radiopharmaceuticals (RADI-R 427)	2.0
Essential Radiology I (RADI-R 438)	1.0
Nuclear Medicine Management (RADI-R 441)	1.0
Clinical Nuclear Medicine Practicum III (RADI-R 447)	6.0
Medical Imaging Theory for NMTs (RADI-R 449)	2.0
Elective if needed for Graduation	3.0
Total	13.0-16.0
Spring Semester	*Credits*
Projects in Nuclear Medicine Technology III(RADI-R 413)	2.0
Nuclear Medicine In-Service III (RADI-R 425)	1.0
Applications of Radionuclides II (RADI-R 433)	2.0
Essential Radiology II (RADI-R 439)	2.0
Clinical Nuclear Medicine Practicum III (RADI-R 447)	5.0
Elective if needed for Graduation	3.0
Total	12.0-15.0

Awards The faculty will recommend to the university, graduating students with superior academic performance for degrees awarded with distinction according to the university's policy. Also, students with outstanding academic and clinical achievement during their professional program may be recognized by the program at the time of graduation.

Graduation Requirements Satisfactory completion of a minimum of 125 credit hours. All course work must be completed in compliance with the program's and school's academic and professional policies.

Radiation Therapy

The educational program in Radiation Therapy through the IU Department of Radiation Oncology is located on the Indiana University–Purdue University Indianapolis campus, Indiana University Medical Center.

Mission Statement The Radiation Therapy Program, sponsored by the School of Medicine on the Indiana University-Purdue University Indianapolis campus, is designed to provide academic and clinical education to prepare qualified radiation therapists. The major purpose of the program is to provide a quality baccalaureate degree program in radiation therapy dedicated to the health and welfare of the patient through treatment of disease.

Program Goals

1. Students will be clinically competent.
Student Learning Outcomes:
- Students will demonstrate the appropriate knowledge of radiation therapy procedures.
- Students will apply principles of radiation protection for patient, self, and others.
- Students will perform basic radiation therapy dose calculations and access treatment plans.
- Students will be able to perform radiation therapy treatments as prescribed by a radiation oncologist.
- Students will be able to perform radiation therapy simulation competencies.
- Students will evaluate pptients for effects, reactions, and therapeutic responses.

2. Students will communicate effectively.
Student Learning Outcomes:
- Students will demonstrate effective oral communication skills.
- Students will demonstrate effective written communication skills.

3. Students will think critically and apply problem solving skills in the healthcare environment.
Student Learning Outcomes:
- Students will develop a solution to a scenario.
- *Students will perform challenge exams.*
- Students will apply research methods to the senior research project.

4. Students will have knowledge of the value of professional development and growth.
Student Learning Outcomes:

- Students will attend professional meetings.
- Students will be knowledgeable of the importance of professional development and life-long learning.
- Students will formulate methods for pursuit of life-long learning
- Students will participate in one service learning activity.

5. Graduates/Students will graduate and will be qualified to work as entry level radiation therapists.
Program Outcomes:

- Employers will be satisfied with the graduate's performance.
- Graduates will achieve a 90% or greater first attempt credentialing pass rate over the past five years.
- Graduates job placement rate will be 90% or greater within 6 ;months of gratuation during the past five years.
- Graduates will pass the AART national exam on the first attempt.
- Students will complete the program within 20 months for radiographers and 22 months for non-radiographers.
- Students will be satisfied with their education.
- Of those pursuing employment, graduates will be employed within 6 months of graduation.

Description of the Profession Radiation therapy involves the use of different forms of ionizing radiation for the treatment of benign and malignant tumors. Radiation therapists administer the prescribed dose of ionizing radiation to specific sites of the patient's body as directed by the physician. They operate varied types of equipment, including high-energy linear accelerators, and work with radioactive materials. In addition, radiation therapists observe the clinical progress of the patient undergoing radiation therapy, observe the first signs of any complication, and determine when treatment should be withheld until a physician may be consulted.

Graduates of the Program The Radiation Therapy Program is designed to prepare graduates to meet the scope of practice standards for radiation therapy. Upon completion of the program, graduates are eligible to take the radiation therapy certification examination given by the American Registry of Radiologic Technologists (ARRT). Having passed this exam, certificate holders are classified as registered radiation therapists, R.T.(T)(ARRT).

Licensure Required to Practice Licensure of radiation therapists is required in Indiana.

Scholarships Some hospitals and employers offer financial assistance for students pursuing radiation therapy.

For further information, contact: Judith Schneider, Director
Radiation Therapy Program
Indiana Cancer Care Pavilion
535 Barnhill Drive, RT 107B

Educational Program

Bachelor of Science in Radiation Therapy at IUPUI

- **Program Director:** Assistant Professor Schneider
- **Clinical Coordinator:** Assistant Professor Schneider

Length of the Program The radiation therapy program is a four-year baccalaureate degree program and has two tracks: one for the nonradiographer and one for the radiographer. For the nonradiographer, the program is composed of 51 credit hours of prerequisite and general-education requirements and a 22-month professional core in the junior and senior years. For the radiographer, the program includes general-education requirements and a 20-month professional core.

Structure of the Program The classroom and clinical experiences are Monday through Friday from 8 a.m. to 4:30 p.m., with continuous enrollment during the professional core.

Opportunity for Students to Work Students often seek employment in part-time positions outside the program, which must be balanced with evening study.

Additional Cost In addition to regular university tuition and fees, students should expect to pay program-related expenses. Contact the program for a current cost sheet.

Program Facilities The Radiation Therapy Program offices are located on the IU Medical Center campus. Classrooms and laboratories are located in radiation oncology departments of area hospitals and in other buildings on the Indiana University-Purdue University Indianapolis campus.

Location of Clinicals The clinical practicums are provided at a variety of clinical sites located within a 75-mile radius of Indianapolis.

Accreditation The program is accredited by the Joint Review Committee on Education in Radiologic Technology, 20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-3182.

Last Updated: February 8, 2012

Admission

NONRADIOGRAPHER - [RADIOGRAPHER]

General Information
Admission into the School of Medicine Health Professions Programs radiation therapy program is based on an admission index that is composed of a cumulative grade point average, the mathematics and science grade point average, prerequisite courses grade point average, and an interview.

Specific Requirements
In addition to the School of Medicine Health Professions Programs admission policies and procedures found at the beginning of this bulletin, the following admission policies apply to the radiation therapy program.

Application Deadline December 1 of the year before desired entry into the program.

Minimum Number of Prerequisite Credit Hours 51.

Minimum Cumulative Grade Point Average 2.50 on a 4.00 scale. This requirement is applied at the time of program application. Grades from remedial courses are not calculated in the grade point average of the prerequisite courses to determine the admission index.

Minimum Specific Grade Point Average Science and math grade point average of 2.30 and a 2.50 grade point average in stated prerequisite courses (on a 4.00 scale). This requirement is applied at the time of program application and must be maintained. Grades from remedial courses are not calculated in the mathematics and science grade point average to determine the admission index.

Minimum Grade Requirement in a Prerequisite Course C (2.00 on a 4.00 scale).

Interview A personal interview is required. If, however, the number of applications to the program far exceeds the number of positions available, the program's admissions committee reserves the right to limit the number of applicants to be interviewed to twice the number of positions available in the class. Interviews are conducted in February.

Technical Standards See School of Medicine Health Professions Programs policy.

Medical Requirements All required immunizations must be completed before the start of the program. Verification of immunizations and the health form must be submitted during orientation.

Indiana Residents Preference Policy See School of Medicine Health Professions Programs policy.

Volunteer Experience The student must observe in a radiation oncology facility before applying to the program.

RADIOGRAPHER

Specific Requirements
In addition to the School of Medicine Health Professions Programs admission policies and procedures found at the beginning of this section of the bulletin, the following admission policies apply to the radiation therapy program.

Application Deadline December 1 of the year before desired entry into the program.

Minimum Number of Prerequisite Credit Hours Satisfactory completion of general-education and technical-specialty requirements.

Minimum Cumulative Grade Point Average 2.50 on a 4.00 scale; this requirement is applied at the time of program application. Grades from remedial courses are not calculated into the grade point average of the prerequisite courses to determine the admission index.

Minimum Specific Grade Point Average Science or mathematics grade point average of 2.30 and a 2.50 grade point average in stated prerequisite courses (on a 4.00 scale); this requirement is applied at the time of program application and must be maintained. Students must attain a cumulative grade point average of 2.30 for all radiography courses. Grades from remedial courses are not calculated into the mathematics and science grade point average to determine the admission index.

Minimum Grade Requirement in a Stated Prerequisite Course C (2.00 on a 4.00 scale).

Interview A personal interview is required. However, if the number of applications to the program far exceeds the number of positions available, the program's admissions committee reserves the right to limit the number of applicants to be interviewed to two times the number of positions available in the class. Interviews are conducted in February.

Technical Standards See School of Medicine Health Professions Programs policy.

Medical Requirements All required immunizations must be completed before the start of the program. Verification of immunizations and the health form must be submitted during orientation.

Indiana Residents Preference Policy See School of Medicine Health Professions Programs policy.

Volunteer Experience Students must observe in a radiation oncology facility before applying to the program.

Last Updated: February 8, 2012

Prerequisites

NON-RADIOGRAPHER - [RADIOGRAPHER]

Prerequisites
The following prerequisite course of study must be completed to be eligible for admission into the professional program. Students should consult with their academic advisors for appropriate courses and semester sequence.

Prerequisites may be taken at any accredited college or university. The code "G" indicates a course that meets the school's general-education requirements.

General Education	
Verbal Communication (G)	2-3 cr.
Written communication (two courses) (G) (*Second writing course must focus on research and professional writing skills*)	6 cr.
Humanities elective (G)	3 cr.
Social/behavioral science elective (G)	3 cr.
Introductory Psychology (G)	3 cr.
College Algebra and Trigonometry (G)	5-6 cr.
Statistics	3 cr.
General Physics (with lab) (G)	4-5 cr.
Human Anatomy (with lab)	4-5 cr.
Human Physiology	4-5 cr.
Medical Terminology	1 cr.
Introduction to Computers	2-3 cr.
Business electives	6 cr.

Suggested Electives (To bring total credits up to 51.) The number of elective courses differs among students but must bring the student's total prerequisite course work to at least 51 credit hours. Additional electives may be required, before or during the professional program, to

complete a minimum of 122 credit hours of academic course work for graduation.

Suggested Plan of Study - Based on IUPUI Course Offerings

Freshman	
Fall	*Credits*
Elementary Composition	3.0
Humanities	3.0
Algebra and Trigonometry	3.0
Human Anatomy	4.0-5.0
Total	13.0-14.0
Spring	*Credits*
Speech Communications or Interpersonal Communication	3.0
Algebra and Trigonometry	3.0
Introductory Psychology	3.0
Human Physiology	4.0-5.0
Total	13.0-14.0
Sophomore	
Fall	*Credits*
Elementary Composition II or Professional Writing Skills	3.0
General Physics (with lab)	4.0-5.0
Introduction to Computers	3.0
Statistics	3.0
Total	13.0-14.0
Spring	*Credits*
Social/Behavioral Science Elective	3.0
Business Electives	3.0
Medical Terminology	1.0-2.0
Elective (*If Necessary*)	1.0
Total	8.0-12.0

RADIOGRAPHER

Prerequisites
The following prerequisite course of study must be completed for students to be eligible for admission into the professional program. Students should consult with their academic advisors for appropriate courses and semester sequence in order to complete prerequisites. Prerequisites may be taken at any accredited college or university.
The code “G” indicates a course that meets the school’s general-education requirements.

General Education	
Verbal Communication (G)	2-3 cr.
Written communication (two courses) (G) (*Second writing course must focus on research and professional writing skills*)	6 cr.
Humanities elective (G)	3 cr.
Social/behavioral science elective (G)	3 cr.
Introductory Psychology (G)	3 cr.
College Algebra and Trigonometry (G)	5-6 cr.
Statistics	3 cr.
General Physics (with lab) (G)	4-5 cr.
Human Anatomy (with lab)	4-5 cr.
Human Physiology	4-5 cr.
Medical Terminology	1 cr.
Introduction to Computers	2-3 cr.
Business electives (*Second course can be taken during fall semester in professional program if necessary*)	6 cr.

Technology Specialty Applicants must supply evidence of registration in radiography by the ARRT or completion of a radiography program accredited by the Joint Review Committee on Education in Radiologic Technology.

The technical-specialty area is complete for applicants who have completed an associate or baccalaureate bachelor’s degree in radiography.

Students who received their technical training in non-credit-awarding programs and who have full credentials in radiography (ARRT) may be awarded credit for their credentials and experiences and/or petition to test out of technical-specialty courses.

Total	12.0

Graduation Requirements for Baccalaureate Degree To be eligible for graduation with a baccalaureate degree, students must successfully complete the general-education requirements (51 cr hrs minimum), technical specialty (radiographers), and professional core in radiation therapy (62 cr hrs minimum). They must also achieve clinical competency in each area identified in the clinical manual requirements.

Last Updated: February 8, 2012

Radiography

An educational program in radiography is located on the Indiana University- Purdue University Indianapolis campus and housed in the IU School of Medicine Department of Radiology and Imaging Sciences.

Description of the Profession Radiology is a science involving the medical use of X rays in the diagnosis of disease. A radiologist is a physician specializing in this science, and a radiographer (or radiologic technologist) produces radiographic images under the direction of the radiologist. Radiographers make up the largest group of imaging professionals. Their principal duties consist of performing diagnostic x-ray procedures of patients, with the lowest amount of radiation exposure possible. They also assist in fluoroscopic examinations and in special radiographic procedures. Other tasks performed by radiographers vary. Radiographers must be able to handle seriously ill and injured patients to obtain the maximum amount of information without injury to the patient and with the least amount of pain and discomfort from the examination. They may assist the radiologist in some complex procedures, often involving the injection of opaque media through needles or catheters. Radiographers must be well educated and experienced in aseptic techniques, requiring skills comparable to those of nurses in some specialties. Most technologists are employed in hospitals, clinics, and physicians' offices.

Graduates of the Program Graduates receive an associate of science degree from Indiana University and are eligible to take the certification examination of the American Registry of Radiologic Technologists (ARRT) to become certified as a registered technologist (radiography), R.T.(R).

Credential Required to Practice R.T.(R) Registered Technologist (Radiography).

Indiana Requirements to Practice A State license is required to operate an X-ray machine. The state accepts the ARRT registry credential to satisfy educational requirements for licensure.

Educational Program

Associate of Science in Radiography at IUPUI

- **Program Director:** Associate Professor Long
- **Medical Advisor:** Professor Jackson
- **Associate Professors:** Baker, Kosegi
- **Associate Clinical Professors:** Cox, Robinson
- **Assistant Clinical Professors:** DeVore, Cranfill
- **Adjunct Lecturer:** Mussa, Ripperger, Dempsey, Herron, Jones
- **Lecturer:** Markanday, Echeverria

Length of the Program A new class begins in summer session II each year and continues for 22 months, including all summer sessions.

Structure of the Program The 22-month curriculum for radiography is based on a combination of professional courses, general-education courses, and clinical experience. Professional classes and clinical experience are scheduled from 8 a.m. to 4 p.m., Monday through Friday. While in the program, students are also required to participate in clinical experience on two Saturdays and in four weeks of evening rotations. Indiana University holidays are observed. The schedule of classes and clinical experiences closely follows the IUPUI academic calendar. Vacations do not constitute excused absences and, if taken, must occur during the breaks between academic sessions of the university.

Design of the Professional Curriculum The general-education courses, professional lecture/laboratory course material, and clinical experiences are integrated throughout the program.

Additional Cost In addition to regular university tuition and fees, students should expect to pay for program-related expenses such as books, uniforms, and other supplies.

Opportunity for Students to Work There are no restrictions on the number of hours a student may work during the program. The radiology departments of many hospitals have part-time evening and weekend positions that are suitable for radiography students. The student must recognize, however, that the professional curriculum requires approximately 25–32 hours per week of on-campus participation in classroom, laboratory, and clinical course work. Study time and completion of general education courses must also be considered. While most of the professional course activities are scheduled during daytime hours on Monday through Friday, there are several clinical experiences that require student participation on weekends and evenings.

Program Facilities The Radiography Program is offered in Indianapolis at the Indiana University Medical Center. The program offices, classrooms, and laboratory facilities are located on the first floor of the Gatch Hall (Clinical Building). Students obtain clinical experience in the radiology departments located in IU Health (University, Riley, IU-West hospitals), Wishard, the Veterans Administration hospitals, and Franciscan St. Francis Health (Indianapolis and Mooresville). Students should expect to rotate to at least four clinical sites during the program.

Accreditation The associate degree program in radiography is fully accredited by the Joint Review Committee on Education in Radiologic Technology, 20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-3182, (312) 704-5300, www.jrcert.org.

Last Updated: February 14, 2012

Admission

General Information Students accepted into the program must complete the Health Professions Programs (HPP) and the program admission requirements before the

first day of classes. Admission to the professional program is competitive; therefore, completion of the prerequisites does not guarantee admission to the program. ***NOTE:Students entering in summer 2013 or after must complete all requirements by the end of the prior spring term.***

Criteria Used for Selection of Class For the selection of applicants for admission, the Radiologic Science Admission Committee considers academic background, including total and science/mathematics GPA, and significant volunteer or work experience in a direct patient care area, previous application for admission to the program, and the results of a personal interview.

Class Size Each year, thirty-seven (37) new students are admitted to start the professional program at the beginning of summer session II

Specific Requirements In addition to the HPP' admission policies and procedures found at the beginning of this section of the bulletin, the following apply to the Radiography Program.

Application Deadline November 15 of the year before anticipated entry in the program.

Total Number of Prerequisite Credit Hours 15, to include English composition, college algebra, medical terminology, and either a two semester human biology sequence or human anatomy and human physiology. Either sequence must include the laboratory component.

Minimum Qualifications Meeting minimum criteria listed below will qualify applicants for continuation of the admission process. It does not guarantee admission to the program. Applicants for admission to the Associate of Science in Radiography degree may qualify for admission consideration in one of two ways:

A. Applicants with fewer than 12 college credit hours by the end of the fall semester Completion of fewer than 12 credit hours of GPA-earning courses including the prerequisite courses.

Qualifying Criteria:

1. High school cumulative academic GPA of at least 3.00 on a 4.00 scale. The high school GPA is calculated using college preparatory academic courses only. Other courses, such as band, chorus, physical education, etc., are removed from the GPA when it is calculated.
2. High school mathematics/science GPA of at least 3.00 on a 4.00 scale.
3. Qualifications for regular admission to IUPUI if not already admitted.
4. College GPA of at least 2.80 on a 4.00 scale.
5. No less than a C in any of the prerequisite courses.

B. Completion of a minimum of 12 credit hours of GPA-earning courses including the prerequisite courses.

Qualifying Criteria:

1. College GPA of at least 2.80 on a 4.00 scale for all college work completed. (Course grades from all institutions attended will be used.)
2. No less than a C in any of the prerequisite courses.
3. College mathematics/science GPA of at least 2.50 on a 4.00 scale.
4. All college courses taken, including remedial courses, are considered when calculating the minimum total GPA and mathematics/science GPA.

The criteria listed above represent the minimum criteria. The required grade point averages will be applied after the fall semester of the year of application and must be maintained at the completion of each enrollment period.

High School Applicants Check with your school to see if you can earn college credit while in high school to complete the prerequisite courses.

GED Applicants Those who have completed the GED certificate must qualify under section B above.

College Applicants All applicants with more than 12 credit hours of GPA-earning courses must qualify under Section B regardless of high school background.

Interview An interview is required for admission. If, however, the number of applications to the program far exceeds the number of positions available, the program admissions committee reserves the right to limit the number of applicants interviewed to two times the number of positions available in the class. Interviews are scheduled in early February.

Technical Requirements See the Health Professions Programs' policy.

Indiana Residents Preference Policy See the Health Professions Programs' policy.

Volunteer Experience The admissions committee urges all interested applicants to spend time observing or volunteering in a radiology department. If you cannot arrange to do so at a local hospital, the radiologic and imaging sciences office can provide an observation experience in one of the hospital departments affiliated with the radiography program.

Curriculum

Prerequisites*	
English Composition (ENG-W 131)	3 cr.
College Algebra (MATH 153, MATH-M 118, or MATH-M 119)	3 cr.
Medical Terminology (RADI R108 or equivalent)**	1 cr.
Human Biology (BIOL-N 212/213) or Human Anatomy (BIOL-N 261)	4-5 cr.
Human Biology (BIOL-N 214/215) or Human Physiology (BIOL-N 217)	4-5 cr.

***Students entering in summer 2013 or after will be required to complete all prerequsite requirements by the end of the prior spring term.**

Professional Program	
First Year	
Summer Session II	*Credits*
Introduction to Radiography (RADI-R 110)	3.0
Patient Care I (RADI-R 112)	3.0
Total	**6.0**
Fall	*Credits*
Radiographic Procedures I (RADI-R 114)	4.0
Radiographic Procedures I lab (RADI-R 115)	1.0
Principles of Radiography I (RADI-R 118)	3.0
Radiography Clinical Lab I (RADI-R 150)	1.0
Basic Clinical Experience Course (RADI-R151 or 152 & 153)	3.0
Total	**12.0**
Spring	*Credits*
Radiographic Procedures II (RADI-R 124)	3.0
Principles of Radiography II (RADI-R 128)	3.0
Physical Basis for Radiography (RADI-R 140)	2.0
Radiography Clinical Lab II (RADI-R 170)	1.0
Basic Clinical Experience Course (RADI-R171 or 172 & 153)	3.0
Total	**12.0**
Second Year	
Summer	*Credits*
Patient Care II (RADI-R 212)	1.0
Processing Theory (RADI-R 218)	1.0
Clinical Experience Course (RADI-R 271 or 274 & 275)	4.0
Total	**6.0**
Fall	*Credits*
Radiographic Pathology (RADI-R 210)	2.0
Radiographic Procedures III (RADI-R 214)	2.0
Principles of Radiography III (RADI-R 228)	3.0
Radiographic/Fluoroscopic Equipment (RADI-R 241)	2.0
Clinical Experience Course (RADI-R 271 or 272 or 274 & 275)	4.0
Oral Communications (COMM-R 110 or COMM-C 180) - *If not completed*	3.0
Total	**13.0-16.0**
Spring	*Credits*
Advanced Non-Contrast Imaging (RADI-R 216)	2.0
Advanced Contrast Imaging (RADI-R 224)	1.0
Imaging a Diverse Population (RADI-R 226)	3.0
Quality Control in Radiography (RADI-R 243)	2.0
Radiation Biology and Protection in Diagnostic Radiology (RADI-R 262)	1.0
Clinical Experience Course (RADI-R 272 or 274 & 275)	4.0
Total	**13.0**

Awards The faculty will recommend to the university graduating students with superior academic performance for degrees awarded with distinction according to the Indiana University policy. Students with outstanding academic and clinical achievement during the professional program may be recognized by the program at the time of graduation.

Graduation Requirements Satisfactory completion of 80 credit hours to include 18 credit hours of prerequisites/ graduation requirements and 62 credit hours of professional courses. All course work must be completed in compliance with the program's and Health Professions Programs' academic and professional policies.

Last Updated: February 14, 2012

Respiratory Therapy

The educational program in respiratory therapy is part of a consortium that also includes Indiana University, Ball State University, the University of Indianapolis, and IUHealth. Classroom and laboratory courses are held at Methodist Hospital (Indianapolis), which is connected to the Indiana University–Purdue University Indianapolis (IUPUI) campus via a free monorail system. Students remain enrolled at IUPUI for all their respiratory therapy courses and receive their degree from the IU School of Medicine.

Scholarships Once accepted to the program, students are eligible to compete for scholarships offered by the Indiana Society for Respiratory Care and the American Association for Respiratory Care.

For further information contact: Linda Van Scoder, Program Director
Respiratory Therapy Program
Wile Hall 652
1701 N. Senate Boulevard
Indianapolis, IN 46202

Phone: (317) 962-8475

Educational Program

Bachelor of Science in Respiratory Therapy at IUPUI

- **Program Director:** Adjunct Associate Professor Van Scoder
- **Medical Director:** Adjunct Assistant Professor Naum

- **Associate Medical Director:** Associate Professor of Clinical Medicine Ober
- **Clinical Director:** Adjunct Assistant Professor Johnson
- **Instructor:** Adjunct Lecturer Hunt-Dimirsky, Adjunct Lecturer Bischoff

Description of the Profession Respiratory therapists evaluate and treat patients with cardiopulmonary disorders and are actively involved in health promotion and disease prevention. They care for all types of patients, from the premature infant to the extremely old, and practice in a variety of settings, ranging from patients' homes to the highest level of critical care units. Students in the respiratory therapy major will learn diagnostic procedures ranging from physical examination to the use of highly sophisticated computerized equipment. Patient treatment skills will include everything from the administration of inhaled medications to maintaining critically ill patients on ventilators. The Bachelor of Science in respiratory therapy will provide graduates with the critical-thinking and problem-solving skills that they will need to be successful in their careers.

Graduates of the Program The graduates of the Respiratory Therapy Program are eligible for state licensure examinations as well as examinations offered by the National Board for Respiratory Care. Completion of the program will allow a graduate to sit for the Registered Respiratory Therapist (R.R.T.) examination.

Credential Required to Practice C.R.T., Certified Respiratory Therapist; R.R.T., Registered Respiratory Therapist

Licensure Requirements to Practice Graduates of the Respiratory Therapy Program will file an application for a license as a respiratory care practitioner in the state of Indiana. 49 states require respiratory therapists to be licensed in order to practice.

Educational Program

Structure of the Program The professional phase of the program consists of a carefully planned sequence of classroom and laboratory instruction, as well as more than 1,000 hours of supervised clinical instruction. Clinical instruction is provided in a variety of hospitals and health care facilities throughout central Indiana. The prerequisites may be taken on a part-time basis; the professional program is full time and is conducted primarily during the day.

Length of the Program Four years; two years of prerequisite course work (55 credit hours) plus two years (70 credit hours) of professional course work.

Design of the Professional Curriculum The program is designed to cover all aspects of respiratory therapy, with an emphasis on general and critical care.

Program Facilities The program offices are located in Wile Hall on the Methodist Hospital campus.

Location of Clinical Sites Clinical education experiences occur in a variety of settings, including hospitals, rehabilitation centers, nursing homes, physician offices, and other health care facilities in Indiana. Most of the clinical sites are located within a 60-minute drive from downtown Indianapolis, and many are in Indianapolis. Students are expected to provide their own transportation to all clinical sites.

Additional Cost In addition to standard university fees, students are responsible for travel to clinics, laboratory fees, clinical fees, uniforms, vaccination costs, and CPR course. Students may be required to attend professional meetings or seminars, and fees for attending these events may be necessary. Membership in the professional organization is required.

Opportunity for Students to Work Most students work part time while completing the program. Students may be eligible to apply for a limited student permit as a respiratory care practitioner following successful completion of the first year of the professional course work.

Accreditation The Respiratory Therapy Program is accredited by the Commission on Accreditation for Respiratory Care, 1248 Harwood Rd., Bedford, TX 76021-4244, (817) 283-2835, www.coarc.com.

Last Updated: February 8, 2012

Admission

General Information Students accepted into the program must complete the school's and the program's admission requirements before the first day of classes. Admission to the professional program is competitive; therefore, completion of the prerequisites does not guarantee admission to the program. At the time of application, students may request any of the following options: repeated courses, academic bankruptcy, or fresh start. For more information about these options, please see an advisor.

Criteria Used for Selection of Class Grade point average.

Class Size Approximately 30 students.

Specific Requirements In addition to School of Medicine Health Professions Programs admission policies and procedures found at the beginning of this section of the bulletin, the admission policies below apply to the respiratory therapy baccalaureate degree program.

Application Deadline January 1. Late applications will be considered on a space-available basis.

Total Number of Prerequisite Hours 55. Graduates from accredited associate degree respiratory therapy programs are eligible to apply for advanced standing; however, all applicants must complete the prerequisites.

Minimum Cumulative Grade Point Average 2.50 on a 4.00 scale. This requirement is applied at the time of program application and must be maintained.

Minimum Grade Requirement in a Stated Math or Sciences Prerequisite Course C (2.00 on a 4.00 scale).

Interview All qualified applicants must be interviewed.

Technical Standards All accepted students will be required to sign a statement certifying that they can meet the program's technical standards.

Medical Requirements All students are required to document a complete vaccination program once accepted

into the Respiratory Therapy Program. Drug screening may also be required.

Indiana Resident Preference Policy See the School of Medicine Health Professions Programs policy.

Clinical Observation All applicants are required to complete and document at least three hours of clinical observation with a respiratory therapist. The documentation must be submitted with the program application.

Last Updated: February 8, 2012

Academic Requirements

Students must comply with the academic regulations and policies of Indiana University and the School of Medicine Health Professions Programs. Additionally, the following regulations and policies govern the professional portion of the Respiratory Therapy Program.

General Policies and Regulations

1. Students are required to obtain a grade of C or higher in all professional course work.
2. Students who receive a grade of C- or lower in a professional course may be dismissed from the program. Students who are dismissed may reapply for admission the following year with approval of the program faculty and the HPP Advisory Committee.
3. Students must maintain American Heart Association Healthcare Provider Basic Life Support (BLS) status throughout their term in the Respiratory Therapy Program.

Probation

1. A student will be placed on probation if the semester and/or cumulative GPA falls below 2.30.
2. A student will be placed on probation if there is a failure to progress either academically or professionally. ***Probation resulting from a failure to progress is not limited to these examples:***
   - failure to maintain BLS status;
   - poor attendance in classroom, clinical, or laboratory classes resulting in poor academic progress and performance;
   - failure to meet academic standards as set forth in the course syllabus, such as failure to turn in papers and assignments, resulting in poor academic progress and performance;
   - failure to conform to the American Association for Respiratory Care Code of Ethics and/or clinical performance characteristics as set forth in the Program Handbook and Clinical Syllabus;
   - lack of clinical progress, failure to demonstrate clinical patient safety, or failure to advance through the clinical skills progression; or
   - any critical incidence documentation for unsafe or poor clinical performance.
3. As a condition of probation, the student will be notified of conditions and requirements necessary for remediation for continuation in the program. When the student satisfactorily completes all program requirements, as well as those stipulated by the school and university, and when the reason for the administrative action has been corrected or the deficiency remediated, the student will be returned to good standing. All probationary actions are reviewed at the end of each semester.

Dismissal

Upon the recommendation of the faculty in the student's program, a student may be dismissed from the school. Dismissal is based on the failure to meet academic or professional standards. The student will be informed of the dismissal in writing by the dean.

1. A student may be dismissed from the program if a grade of C- or lower is recorded for any professional course.
2. A student will be dismissed from the program if probationary status is continued for two consecutive semesters. In addition, once placed on probation, a student will be dismissed from the program if continued poor academic performance, unsafe or poor clinical performance, or unprofessional behavior is documented (including documentation of a critical incident).
3. A student will be dismissed from the program if there is failure to complete the bachelor's degree within three years of the initial admission to the professional program.

Appeals Procedure

On occasion, students and faculty will have differing perceptions or accounts of situations or events. It is important for the parties directly involved to discuss their differences honestly in order to reach a solution. However, if no mutually satisfactory resolution can be reached in these discussions, the matter may be appealed in accordance with the school's appeals policy.

Last Updated: February 8, 2012

Prerequisites

Before entering the program, the student must complete the following minimum prerequisites. Students should consult with their academic advisors for appropriate courses and semester sequence in order to complete prerequisites. Prerequisites may be taken at any accredited college or university. The code "G" indicates a course that meets the school's general-education requirements.

General Education	
Written Communication (G) (*Second course should focus on professional and technical writing*	6 cr.
Verbal Communication (G)	3 cr.
College Algebra or Higher (G)	5-6 cr.
Social/Behavioral Sciences (G)	3 cr.
Life Span or Developmental Psychology (G)	3 cr.
Statistics	3 cr.
Human Anatomy (with lab) (G)	3-5 cr.

Human Physiology (with lab) (G)	3-5 cr.
Chemistry (with lab)	3-5 cr.
Microbiology	3-4 cr.
Physics	4-5 cr.
Ethics	3 cr.
Introduction to Computers	3 cr.

Suggested Electives
The following course subjects, while not inclusive or mandatory, are suggested: science, cellular biology, nutrition, health care administration, exercise physiology, medical terminology, epidemiology, public health, computer literacy, and psychology.

Cardiopulmonary Resuscitation In addition to the above courses, all students are required to complete instruction for adult, child, and infant CPR before entry into the program. This must be the Healthcare Provider CPR or CPR for the Professional Rescuer. These courses are offered for a fee through the American Heart Association and the American Red Cross.

A Suggested Plan of Study

Freshman	
Fall	*Credits*
Elementary Composition I	3.0
Human Anatomy (with lab)	4.0-5.0
Social/Behavioral Science	3.0
College Math I	3.0
Total	13.0-14.0
Spring	*Credits*
Speech Communication	3.0
Chemistry (with lab)	5.0
Human Physiology (with lab)	4.0-5.0
College Mathematics II	3.0
Total	15.0-16.0
Sophomore	
Fall	*Credits*
Professional Writing	3.0
Physics	4.0-5.0
Ethics	3.0
Introduction to Computers	3.0
Total	13.0-14.0
Spring	*Credits*
Statistics	3.0
Introduction to Microbiology	3.0-4.0
Lifespan or Human Development	3.0
Electives	3.0+
Total	12.0-13.0+

Last Updated: March 26, 2010

Professional Program

Courses in the professional program are sequential and must be taken in the order specified by the program faculty.

Junior	
Fall	*Credits*
Introduction to Human Disease for Respiratory Therapists (PULM-F 303)	2.0
Cardiorespiratory Physiology (PULM-F 311)	3.0
Cardiorespiratory Assessment and Patient Care (PULM-F 315)	3.0
General Respiratory Care (PULM-F 325)	4.0
Respiratory Care Techniques I (PULM-F 326)	2.0
Cardiorespiratory Pharmacology I (PULM-F 333)	2.0
Total	16.0
Spring	*Credits*
Cardiorespiratory Diseases (PULM-F 350)	3.0
Life Support (PULM-F 355)	3.0
Respiratory Care Techniques II (PULM-F 356)	2.0
Respiratory Care Practicum I (PULM-F 385)	3.0
Neonatal-Pediatric Respiratory Care (PULM-F 405)	2.0
Cardiorespiratory Pharmacology II (PULM-F 444)	2.0
Total	16.0
Summer Session I	*Credits*
Respiratory Care Practicum II (PULM-F 395)	4.0
Total	4.0
Senior	
Fall	*Credits*
Pulmonary Diagnostics (PULM-F 371)	3.0
Introduction to Research in Respiratory Care (PULM-F 420)	2.0
Cardiorespiratory Monitoring and Special Techniques (PULM-F 451)	3.0
Respiratory Care Practicum III (PULM-F 456)	6.0
Pulmonary Rehabilitation and Geriatrics (PULM-F 461	3.0
Total	17.0
Spring	*Credits*
Management and Leadership for Respiratory Care (PULM-F 430)	3.0
Advanced Cardiac Life Support (PULM-F 440)	2.0
Seminar in Cardiorespiratory Care (PULM-F 445)	3.0

Patient Education Techniques (PULM-F 480)	3.0
Respiratory Care Practicum IV (PULM-F 485)	6.0
Total	17.0

Graduation Requirements Satisfactory completion of 125 credit hours to include 55 credit hours of prerequisite course work and 70 credit hours of professional course work. All course work must be completed in compliance with the program's and school's academic and professional policies.

Last Updated: March 26, 2010

Advanced Standing

Graduates of CoARC accredited, advanced practitioner-level associate degree programs in respiratory therapy at a regionally accredited college or university are eligible to apply for advanced standing in the respiratory therapy baccalaureate degree program. These applicants must meet all program admissions requirements and standards. If admitted, they would be enrolled in the fourth year of the program's professional program curriculum. Students who wish to apply for advanced standing must contact the program director for available options.

Last Updated: April 15, 2010

Student Learning Outcomes

- Clinical Laboratory Science, B.S.
- Cytotechnology, B.S.
- Histotechnology, Certificate and A.S.
- Medical Imaging Technology, B.S.
- Nuclear Medicine Technology, B.S.
- Paramedic Science, A.S.
- Radiation Therapy, B.S.
- Radiography, A.S.
- Respiratory Therapy, B.S.

March 13, 2012

Clinical Laboratory Science, B.S.

The mission of the CLS program at Indiana University is to provide a high quality education in knowledge, skills, and professional attitudes in CLS in order to prepare graduates who have entry-level competencies to practice in the clinical laboratory.

The goal of the CLS program is to prepare graduates who:

1. Have the knowledge and skills needed to provide health care professionals with accurate and timely diagnostic and therapeutic laboratory data and participate as effective members of the health care team.
2. Demonstrate professionalism through honesty and integrity in reporting results, respect for patient confidentiality, and a desire for life-long learning through continuing education, scholarship, service, and participation in professional organizations.
3. Successfully complete the national certification examination.

Clinical Laboratory Science Program Competencies

Upon successful completion of the CLS Program, the clinical laboratory scientist should be able to demonstrate the behaviors described in the entry-level competencies:*

- Perform proficiently the full range of clinical laboratory tests in areas such as hematology, clinical chemistry, immunohematology, microbiology, serology/immunology, coagulation, and molecular and other emerging diagnostics.
- Play a role in the development and evaluation of test systems and interpretive algorithms.
- Participate effectively in clinical decision making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed, or performed.
- Communicate effectively to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education.
- Apply knowledge of financial operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services.
- Support information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information.
- Demonstrate sufficient knowledge of the research process to evaluate published studies as an informed consumer.
- Participate in safety programs.
- Have requisite knowledge and skills to educate laboratory professionals, other healthcare professionals, and the public with regards to in laboratory practice.

* The CLS Program has multiple objectives associated with each competency. These are available upon request.

March 13, 2012

Cytotechnology, B.S.

To provide education of the highest quality in accordance with the guidelines established by the Commission on Accreditation of Allied Health Education Programs, the American Society of Cytopathology and the Board of Certification of the American Society of Clinical Pathologists, the Cytotechnology Program Advisory Committee adopted the following "Program Goals and Objectives" and "Outcomes."

Program Goals

The Indiana University Cytotechnology Program adopts the following goals and minimum expectations for its graduates:

"To prepare competent entry-level Cytotechnologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains."

Outcomes Assessment

- Student Retention of at least 80%.
- Job Placement of at least 75%.
- Board of Registry Pass Rate of at least 80%.
- Graduate Survey with at least 50% return rate and 80% student satisfaction.

- Employer Survey with at least 50% return rate and 80% student satisfaction.

March 13, 2012

Histotechnology, Certificate and A.S.

The Program's goals have been developed within the mission of the Health Professions Programs in the School of Medicine. In an effort to provide theoretical background and the development of a high degree of occupational competence, the Program has established the following goals:

1. To provide students with the education experiences necessary to enter a career as a Histologic Technician, to include entry-level competence and eligibility for the ASCP Board of Registry Histotechnician exam.
2. To provide the nation-wide health care community with individuals competent to conduct high quality histologic procedures.
3. To provide a curriculum containing a balance between technical knowledge and clinical competence gained in the histology laboratory setting.
4. To assist the students in reaching their goals by providing academic and occupational advisement.
5. To instill in students a lifelong desire to achieve professional and academic excellence.

Histotechnology Program Objectives

Upon successful completion of all standard academic requirements established for this program, the graduate is entitled to receive a Certificate in Histotechnology from Indiana University. By virtue of the standards required by this program, the graduate is eligible to take the Histotechnician (HT) certification examination administered by the American Society of Clinical Pathologists' Board of Registry. The didactic and practical experience provided by the course of instruction should enable the graduate to accomplish the following objectives:

Technical Skill

1. Perform procedures of basic histologic laboratory techniques, instrumentation and problem solving at the HT entry-level competency.
2. Demonstrate knowledge of general and specific histologic methodology.
3. Perform procedures with accuracy and precision.
4. Monitor internal and external quality assurance measures.
5. Demonstrate knowledge of operational principles of commonly used laboratory instruments to include the ability to perform daily preventative maintenance and correct simple malfunctions.
6. Exercise independent judgment regarding choice of procedure and evaluation of results.
7. Organize tasks to cope with volume of work and unexpected demands.

Communication

1. Communicate effectively with Clinical Education Supervisor and Program Director regarding curriculum and training courses.
2. Effectively organize and present information both in written assignments and oral communication.
3. Communicate effectively with other laboratory and health care providers.

Professional Behavior

1. Display an attitude reflecting pride and professionalism in daily laboratory duties.
2. Demonstrate adaptability, integrity, initiative, neatness, maturity, stability and a desire for excellence.

March 13, 2012

Medical Imaging Technology, B.S.

The Medical Imaging Technology program has established the following goals:

1. Graduates will be clinically competent.
2. Graduates will communicate effectively in the healthcare environment.
3. Graduates will think critically and apply problem-solving skills in the healthcare environment.
4. Graduates will have knowledge of the value of professional development and growth.
5. Students will graduate and will be qualified to work as advance-practice radiologic technologists.

March 13, 2012

Nuclear Medicine Technology, B.S.

GOAL AND OUTCOMES OF THE NUCLEAR MEDICINE TECHNOLOGY PROGRAM

Goal I

Prepare students to function as competent Nuclear Medicine Technologists.

Outcomes

Upon completion of the Nuclear Medicine Technology Program in the Department of Radiologic and Imaging Sciences the graduate will:

1. Demonstrate the ability to acquire, comprehend, apply and evaluate patient information sufficiently well to offer appropriate patient care.
2. Demonstate technical profienciency in all skills necessary to fulfill the role as a Nuclear Medicine Technologist.
3. Demonstate appropriate administrative functions within the scope of the profession.

Goal II

Prepare students in Nuclear Medicine Technology who will continue to learn and grow professionally.

Outcomes

Upon completion of the Nuclear Medicine Technology Program in the Department of Radiologic Sciences the graduate will:

1. Demonstrate and sustain appropriate ethical and interpersonal working relationships with patients, physicians, and co-workers.
2. Demonstrate participation in continuing education and professional activities.
3. Aspire toward professional growth in areas of advanced technical postions, administration,

teaching, health care industry or higher educational degree levels.

Last Updated: February 15, 2012

Paramedic Science, A.S.

The Paramedic Science program has established the following goals:

To prepare competent entry-level Emergency Medical Technician-Paramedics in the cognitive (knowledge), pyschomotor (skills), and affective (behavior) learning domains, with or without exit points at the Emergency Medical Technician-Intermediate, and/or Emergency Medical Technician-Basic, and/or First Responder levels.

1. Upon commencement, the Paramedic Science graduate will perform as a Paramedic.
2. Upon graduation, the Paramedic student will have developed knowledge, competency, and awareness of one's abilities and limitations, the ability to relate to people, and a capacity for calm and reasoned judgement under stress.
3. Upon graduation, the Paramedic Science Student, has Developed values to independently process information to make critical decisions while being sensitive to the cultural competency of patients of all ages.

March 13, 2012

Radiation Therapy, B.S.

During the radiation therapy program, the student will be able:

1. Demonstrate the appropriate knowledge of radiation therapy procedures.
2. Apply principles of radiation protection for patient, self, and others.
3. Perform radiation therapy simulation procedure.
4. Perform basic radiation therapy dose calculations and access treatment plans.
5. Deliver radiation therapy treatments as prescribed by a radiation oncologist.
6. Evaluate patient for effects, reactions and therapeutic responses.
7. Demonstrate effective oral and written communication skills.
8. Apply basic research methods.
9. Formulate methods for the pursuit of lifelong learning.

At the completion of the radiation therapy program, the graduate will:

1. Pass the ARRT national certification exam on the first attempt.
2. Be employed within six months post-graduation, if pursuing employment.
3. Complete the professional program within 22 months.
4. Be satisfied with their education.

March 13, 2012

Radiography, A.S.

Goals for the Associate Degree in Radiography Program

1. Graduates will be clinically competent.
2. Graduates will communicate effectively in the healthcare environment.
3. Graduates will think critically and apply problem-solving skills in the healthcare environment.
4. Graduates will have knowledge of the value of professional development and growth.
5. Students will graduate and will be qualified to work as entry-level radiologic technologists.

Outcomes for the Associate Degree in Radiography Program

At appropriate points during the radiography program, the student will be able to:

1. Demonstrate appropriate knowledge of radiographic procedures [goal 1].
2. Apply radiographic positioning skills effectively [goal 1].
3. Determine appropriate technical factors [goal 1].
4. Apply principles of radiation protection for patient, self, and others [goal 1].
5. Demonstrate overall competence in performance of radiographic procedures [goal 1].
6. Use effective oral communication skills with clinical staff and patients [goal 2].
7. Demonstrate effective written communication skills. [goal 2].
8. Evaluate images and make appropriate adjustments to technical factors or procedure [goal 3].
9. Adapt positioning for trauma patients [goal 3].
10. Determine the importance of continued professional development [goal 4].
11. Attend professional meetings [goal 4].

At the completion of the radiography program, the graduate will:

1. Pass the ARRT national certification on the 1^{S} attempt [goal 5].
2. Be gainfully employed within 6 months post-graduation, if pursuing employment [goal 5].
3. Complete the program within 22 months [goal 5].
4. Be satisfied with their education [goal 5].

March 13, 2012

Respiratory Therapy, B.S.

Program Goal

Upon completion of the program, the graduate will be a competent advanced-level respiratory therapist.

Program Objectives

1. Upon completion of the program, students will demonstrate professional behavior consistent with employer expectations as advanced-level respiratory therapists.
2. Upon completion of the program, students will demonstrate the ability to comprehend, apply, and evaluate clinical information relevant to their roles as advanced-level respiratory therapists.

3. Upon completion of the program, students will demonstrate technical proficiency in all the skills necessary to fulfill their roles as advanced-level respiratory therapists.

March 13, 2012

Application Procedures

The Indiana University School of Medicine participates in the American Medical College Application Service (AMCAS). Application information is available on the Web site of the Association of American Medical Colleges (AAMC) at www.aamc.org. The deadline for AMCAS's receipt of application and transcripts is December 15 for the following year's entering class.

The School of Medicine participates in the national Early Decision Program (EDP). The deadline for EDP applicants is August 1. Additional information is available from AMCAS and from the Admissions Office.

Interviews

Beginning in September, members of the Admissions Committee will interview students by appointment only. In general, appointments for interviews are scheduled in the order in which applications are received unless the applicant has not taken the Medical College Admission Test.

Transcript

It is the applicants' responsibility to send an updated transcript to the Admissions Office at the conclusion of each grading period during the application process.

Medical College Admission Test

All applicants must take the Medical College Admission Test (MCAT) in order to be considered for admission. Registration information may be obtained from www.aamc.org. Students are urged to take this test in the spring of the year preceding the application. Ordinarily, acceptance will not be granted in the absence of an MCAT score.

Fees

Annual tuition for students in the M.D. program in the School of Medicine for 2008-2009 is $27,151.20 for residents of the state of Indiana and $42,130.00 for nonresidents. University assessed technology fees total $373.80 for the academic year. Specific assessments associated with class year and center of instruction are also levied. All students are required to carry personal health insurance. Students not covered under an insurance policy meeting certain minimal criteria as determined by the school must enroll in the school-sponsored health insurance plan at an annual cost of $2,421.00 for 2008-2009. Tuition and fees are subject to change by action of the Board of Trustees. All fees may be confirmed by contacting the school.

An application fee of $50 is required of all new applicants for admission to Indiana University.

Students taking Graduate School courses should consult the appropriate graduate office for relevant fee information.

The School of Medicine possesses a sufficient number of excellent binocular microscopes to meet the needs of all of its students. These are available on a use-charge basis. If a student wishes to provide his or her own microscope, it must meet rigid specifications and be approved by the microscope committee of the School of Medicine. Storage space for personal microscopes is not available in the teaching laboratories.

Financial Assistance

It is important to recognize that it costs considerably more to provide a quality medical education than what the student actually pays in tuition and fees. Every student attending the Indiana University School of Medicine benefits from the subsidies provided by the state of Indiana through state-legislated appropriations. These funds enable Indiana University to keep tuition and fees at the lowest reasonable amount possible. In addition, Indiana University benefits through its many generous friends and supportive organizations that assist in making a medical education affordable to all School of Medicine students.

The purpose of the School of Medicine's scholarship and financial aid programs is to assist students whose personal and family resources are not sufficient to meet the total cost of their medical education. To meet the financial needs of our students in a fair and equitable manner through the most desirable aid programs possible, most financial aid programs are made available to students with documented financial need. The school cannot assure that it will be able to fully meet each student's financial need, and therefore, some students will need to investigate other options in meeting their educational expenses.

Student eligibility for financial aid programs is determined by evaluating both the student's and the parents' ability to defray the cost of a medical education. To apply for most desirable financial aid programs, regardless of the independent status of the student, students must complete the Free Application for Federal Student Aid (FAFSA) http://www.fafsa.ed.gov. The FAFSA results will be made available electronically to IUPUI. Beginning in April, students will be notified of their eligibility for all federal aid programs for the academic year. Keep in mind that all financial information received is held in strict confidence and is used only to determine the student's eligibility for financial assistance.

The Dean's Medical Student Affairs–Student Financial Services (MSA–SFS) makes available via the MSA Web page, the IUSM Financial Aid Guide, the financial aid application materials, and other information about specific programs. Students are encouraged to investigate outside sources of aid that may be available through bank trusts, churches, and fraternal and professional organizations.

Financial Assistance Programs

The following financial assistance programs are available to medical students attending the Indiana University School of Medicine (IUSM). Any questions you may have about these programs can be answered by contacting our office:

Medical Student Affairs
Student Financial Services
Medical Sciences Building 119
635 Barnhill Drive
IU School of Medicine
Indianapolis, IN 46202-5120
Phone: (317) 274-1967
E-mail: jespada@iupui.edu
E-mail: tnfox@iupui.edu

E-mail: mtitus@iupui.edu

These programs are described in further detail in the IU Financial Aid Guide for Medical Students at http://msa.iusm.iu.edu.

- Federal Perkins Student Loan
- Federal Primary Care Loan
- Federal Subsidized Stafford Student Loan
- Federal Unsubsidized Stafford Student Loan
- Federal Graduate Plus Loan
- Federal College Work-Study Program (CWSP)
- Child-of-Disabled-Veteran Award (CVO) (available to Indiana residents only)
- Scholarships to Disadvantaged Students (SDS)
- Loans to Disadvantaged Students (LDS)
- Indiana Primary Care Scholarship

Scholarships, Fellowships, and Loans

The School of Medicine Scholarship Committee awards students more than $3 million in scholarships and fellowships from annual gifts and scholarship endowments. The scholarship awards range from $1,000 to full tuition. While some programs have donor restrictions, the School of Medicine maintains a philosophy of equal opportunity. All students who complete the school's Application for Financial Assistance will be considered for all of the IU School of Medicine scholarships and fellowships listed at msa.iusm.iu.edu in the IU School of Medicine Financial Aid Guide.

While most scholarships are awarded for a combination of financial need and academic achievement, some scholarships are based strictly on academic achievement and a small portion based strictly on financial need. To receive need-based awards, students must first apply for federal aid and submit parental information (regardless of independent status) on the Free Application for Federal Student Aid (FAFSA). Parental information is a factor in granting scholarships based on need or a combination of need and academics. Academic awards honor outstanding medical school achievement.

Medical students receiving the Armed Forces Health Professions Scholarships (AFHPSP) or the National Health Service Corps (NHSC) will not be considered for scholarships based on financial need or a combination of need and academics.

Eligibility for and renewability of scholarship assistance has been outlined by the IUSM Scholarship Committee in the following policy statement:

The receipt of any academic or combined need and academic scholarship by a student is contingent upon: (1) the student applying when required, (2) the criteria of the scholarship award, and (3) the student maintaining good academic standing. A student is in good academic standing, as seen by the Scholarship Committee, when the student is not on academic probation for any reason during the entire preceding academic year. The Indiana University School of Medicine Student Manual defines what constitutes good academic standing.

In addition, renewability will be contingent upon the student having demonstrated financial need and the availability of funds.

Admissions

The modern world is complex, and physicians care for people from a wide range of social, economic, and cultural backgrounds. The Indiana University School of Medicine requires applicants to include in their undergraduate study a minimal number of required science courses (see below). It is also expected that successful applicants will have included in their undergraduate experience a significant number of courses in the humanities and social and behavioral sciences. In this fashion, students gain a better understanding of contemporary society and human experience, and greater insight into their patients' backgrounds, problems, and illnesses. Applicants are expected to be competent in speaking and writing the English language.

Selection of the Class

Students are offered places in the class on the basis of scholarship, character, personality, references, performance on the Medical College Admission Test, and personal interview. The medical school faculty has specified nonacademic criteria (''Technical Standards for Admission and Retention in Medical School''), which all applicants are expected to meet in order to participate in the medical education program and the study of medicine.

The successful applicant will usually have a record of 1) extracurricular experience in a clinical setting and/or shadowing of physicians and 2) volunteer work/community service.

Except for Early Decision Program candidates, accepted applicants will normally be notified on October 15, November 15, December 15, January 15, February 15, March 15, and at intervals thereafter until the class is filled.

The successful applicant should keep in mind that acceptance is granted subject to the satisfactory completion of all School of Medicine requirements. If the student does not maintain the scholastic average and course load that were evident at the time of acceptance, the committee reserves the right to withdraw acceptance.

Indiana University School of Medicine does not discriminate on the basis of age, color, disability, ethnicity, gender, marital status, national origin, race, religion, sexual orientation, or veteran status.

Requirements

It is strongly recommended that the applicant complete a B.A. or B.S. degree in a school accredited by one of the regional accrediting agencies. The minimum amount of college course work required is three academic years (90 credit hours, excluding physical education and ROTC courses). Any major from the traditional arts and sciences curriculum is acceptable. Students with educational backgrounds in areas outside the usual liberal arts and sciences curriculum (education, business, engineering, pharmacy, etc.) will be evaluated based on a minimum of 90 credit hours (three academic years) of college course work of arts and sciences equivalence. Such students are invited to consult with the Admissions Office about School of Medicine policy regarding academic course work outside the arts and sciences area. The Admissions Committee encourages highly qualified students to enroll in undergraduate honors courses.

The following science course work is required for admission; each course must have a lecture and laboratory component:

- General chemistry, 8-10 credit hours (one academic year)
- Organic chemistry, 8-10 credit hours (one academic year)
- Physics, 8-10 credit hours (one academic year)
- Biological sciences, 8-10 credit hours (one academic year)

Neither grades nor credit hours from subjects offered in the medical curriculum will be accepted toward fulfilling the required 90 credit hours of undergraduate course work or the above specific science requirements.

The Admissions Committee reserves the right to determine which courses will fulfill its requirements.

Scholastic Record

Every grade becomes a part of the permanent record and is calculated in the overall scholastic average. A student who is an Indiana resident cannot usually expect to gain entrance to the class if his or her average of credit points is below 3.2 on a 4.0 scale. The applications of nonresidents will be considered on an individual basis (see below at ‘‘Residence’’).

Greater weight is given to the quality of work than to an excess of credit hours over the minimum required. A scholastic record that shows a large number of withdrawals and/or a repetition of subjects in order to remove grades of F or to raise low grades will obviously be less impressive than a record showing work of uniformly good quality.

A student who has withdrawn or been dismissed from another medical school is usually not eligible for admission to the first-year class at Indiana University.

Residence

Preference will be given to applicants who are residents of the state of Indiana. Nevertheless, a number of nonresidents are accepted each year, and well-qualified nonresidents with an interest in obtaining a medical education at Indiana University are encouraged to apply. The applications of nonresidents who have significant ties to the state of Indiana may be given greater consideration. The Admissions Committee uses the Indiana University System Residency Policy to determine the residency of applicants for IU fee purposes http:///www.iue.edu/registrar/policies/residency_rules.php.

Technical Standards

The medical school faculty has specified the following nonacademic criteria ("technical standards") that all applicants/medical students are expected to meet in order to participate in the medical education program and the practice of medicine.

Observation

The applicant/medical student must be able to participate actively in all demonstrations and laboratory exercises in the basic medical sciences and to assess and comprehend the condition of all patients assigned to him or her for examination, diagnosis, and treatment. Such observation and information acquisition usually requires the functional use of visual, auditory, and somatic sensation.

Communication

The applicant/medical student must be able to communicate effectively and sensitively with patients in order to elicit information; describe changes in mood, activity, and posture; assess nonverbal communications; and effectively and efficiently transmit information to patients, fellow students, faculty, staff, and all members of the health care team. Communication skills include speaking, reading, and writing, as well as the observation skills described above.

Motor

The applicant/medical student must have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers; be able to perform basic laboratory tests; possess all skills necessary to carry out diagnostic procedures; and be able to execute motor movements reasonably required to provide general care and emergency treatment to patients.

Intellectual-Conceptual, Integrative, and Quantitative Abilities

The applicant/medical student must be able to measure, calculate, reason, analyze, and synthesize. Problem solving, the critical skill demanded of physicians, requires all of these intellectual abilities. In addition, the applicant/medical student must be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. The applicant/medical student must have the capacity to perform these problem-solving skills in a timely fashion.

Behavorial and Social Attributes

The applicant/medical student must possess the emotional health required for full utilization of his or her intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the diagnosis and care of patients, and the development of mature, sensitive, and effective relationships with patients and others. Applicants/medical students must also be able to tolerate taxing workloads, function effectively under stress, adapt to a changing environment, display flexibility, and learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, commitment, and motivation are personal qualities that each applicant/medical student should possess.

Transfer Admissions

The Indiana University School of Medicine accepts applications for transfer from Indiana residents who are enrolled in another U.S. or foreign medical school, and from nonresidents who are enrolled in U.S. medical schools. Nonresidents enrolled in foreign medical schools and students in other professional or graduate schools cannot be considered for transfer because the School of Medicine’s facilities are usually almost totally committed.

Applications for transfer are considered for the second and third years only. If an applicant is accepted to the third year, the acceptance will be contingent on a passing score on the United States Medical Licensure Examination (USMLE) Step 1.

Transfer admission will be granted on the basis of available space and facilities, undergraduate record, MCAT scores, performance in the current medical school curriculum, and, if requested by the Admissions Committee, a personal interview. Nonresidents will be considered only if they have a compelling and legitimate need to transfer to Indiana University.

Graduate Programs

The IU School of Medicine offers graduate degrees in the following disciplines:

Doctor of Medicine (M.D.)

Dual Degrees

- Doctor of Medicine/Master of Philosophy
- Doctor of Medicine/Master of Business Administration
- Doctor of Medicine/Master of Public Health
- M.D./Ph.D. (Medical Scientist Training Program)

Doctor of Philosophy (Ph.D.)

- Anatomy and Cell Biology
- Biochemistry and Molecular Biology
- Epidemiology (Public Health)
- Health Policy and Management (Public Health)
- Medical and Molecular Genetics
- Medical Biophysics and Biomolecular Imaging
- Medical Neuroscience
- Microbiology and Immunology
- Pathology
- Pharmacology and Toxicology
- Physiology

Master of Science (M.S.)

- Anatomy and Cell Biology
- Biochemistry and Molecular Biology
- Biotechnology
- Clinical Research
- Medical and Molecular Genetics
- Medical and Molecular Genetics - Genetic Counseling
- Medical Biophysics and Biomolecular Imaging
- Medical Science
- Pathology
- Pharmacology and Toxicology
- Physiology

For more information regarding the Ph.D. and M.S. programs please review this website: http://grad.medicine.iu.edu/degree-programs/

Student Learning Outcomes

Graduates from the Indiana University School of Medicine graduate programs will be able to:

1. Demonstrate the ability to identify and conduct original research, scholarship, and creative endeavors.
2. Think critically and creatively, and to solve problems in their area of specialization.
3. Write clearly, articulate ideas to peer scientists and lay public, and constructively defend research outcomes by developing cogent arguments.
4. Understand and adhere to ethical standards relating to the conduct of scientific research, confidentiality, attribution, and ownership of data.

Visit the following pages to view degree specific Student Learning Outcomes.

Doctor of Medicine (M.D.)

Doctor of Philosophy (Ph.D.)

- Anatomy
- Biochemistry and Molecular Biology
- Medical and Molecular Genetics
- Medical Biophysics and Biomolecular Imaging
- Medical Neuroscience
- Microbiology and Immunology
- Pathology
- Pharmacology and Toxicology
- Physiology

Master of Science (M.S.)

- Anatomy
- Biochemistry and Molecular Biology
- Biotechnology
- Clinical Research
- Medical and Molecular Genetics
- Medical and Molecular Genetics - Genetic Counseling
- Medical Biophysics and Biomolecular Imaging
- Medical Science
- Pathology
- Pharmacology and Toxicology
- Physiology

For more information regarding the Ph.D. and M.S. programs please review this website: http://grad.medicine.iu.edu/degree-programs/

For more information regaring the M.D. program please review this website: http://admissions.medicine.iu.edu/applying-to-the-iu-school-of-medicine/

Doctor of Medicine (M.D.)

The competent graduate in the Doctor of Medicine (M.D.) program of the Indiana University School of Medicine will demonstrate competence in the following areas:

1. Effective Communication

- Listen attentively and communicates clearly with patients, families, and health care team members.
- Establish the rapport necessary to form and maintain a therapeutic relationship with the patient.

2. Basic Clinical Skills

- Elicit and record a complete and accurate history and performs a skillful examination appropriate to a variety of patient encounters.

- Correctly determine whether to perform a comprehensively or suitably focused history and physical examination.
- Correctly select, proficiently perform, and accurately interpret selected clinical procedures and laboratory tests.

3. Using Science to Guide Diagnosis, Management, Therapeutics and Prevention

- Know and explain the scientific underpinnings at the molecular, cellular, organ, whole body, and environmental levels for states of health and disease based upon current understandings and cutting-edge advances in contemporary basic science.
- Use this information to diagnose, manage, and prevent the common health problems of individuals, families, and communities in collaboration with them.
- Develop a problem list and differential diagnosis.
- Carry out additional investigations.
- Choose and implement interventions with consultation and referral as needed.
- Determine outcome goals.
- Recognize and utilize opportunities for prevention.
- Monitor progress.
- Share information and educate.
- Adjust therapy and diagnosis according to results.

4. Lifelong Learning

- Aware of the limits of his/her personal knowledge and experience.
- Actively set and pursue clear learning goals.
- Exploit new opportunities for intellectual growth and professional enlightenment.
- Capable of critical, reliable, and valid self-assessment, and can apply the knowledge gained to the practice of his/her profession.

5. Self-Awareness, Self-Care and Personal Growth

- Approache the practice of medicine with awareness of his/her limits, strengths, weaknesses, and personal vulnerabilities.
- Assess personal values and priorities in order to develop and maintain and appropriate balance of personal and professional commitments.
- Seek help and advice when needed for his/her own difficulties and develop personally appropriate coping strategies.
- Recognize his/her effect on others in professional contacts.
- Seek, accurately receive, and appropriately respond to performance feedback.

6. The Social and Community Context of Health Care

- Recognize the diverse factors that influence the health of the individual and the community.
- Identify the sociocultural, familial, psychological, economic, legal, political, and spiritual factors impacting health care and health care delivery.
- Respond to these factors by planning and advocating the appropriate course of action at both the individual and the community level.

7. Moral Reasoning and Ethical Judgment

- Have a comprehensive understanding of the foundations and components of medical ethics and moral reasoning and is able to use that knowledge in addressing ethical issues in his/her practice of medicine.
- Recognize the ethical issues of medical practice and health policy.
- Identify alternatives in difficult ethical choices.
- Systematically analyze the conflicting considerations supporting different alternatives.
- Formulate, defend, and effectively carry out a course of action that takes account of this ethical complexity.
- Combine a willingness to recognize the nature of the value systems of patients and others with commitment to his/her own system and the ethical choices necessary to maintain his/her own ethical integrity.

8. Problem Solving

- Recognize and thoroughly characterize a problem.
- Develop an informed plan of action, act to resolve the problem, and subsequently assess the results of his/her action.
- Display competence in basic problem solving skills as applied to medical problems.
- Know how to interpret and apply information and knowledge to understand and solve straightforward problems.

9. Professionalism and Role Recognition

- Recognize the powerful impact of his/her professional attitudes and behaviors on others.
- Consistently demonstrate the highest standards of excellence, duty, and accountability to the patient.
- Value the humanity of all patients and does not exploit the patient for personal gain.
- Recognize his/her role in working collaboratively with others to meet the health care needs of the individual and the community.

Microbiology and Immunology, Ph.D.

The goal of the Graduate Program is to prepare research scientists for productive careers at the most competitive level. The supporting facility is equipped with all requisite tools for conducting contemporary molecular science and the expertise to implement them. However, our greatest resource is the quality of the research faculty and its commitment to productivity. Thus, the Department

1. offers didactic coursework sufficient for rapid mastery of concepts central to the discipline, while emphasizing active student involvement in the laboratory as quickly as possible,
2. provides varied forums to enhance communication/ teaching skills,
3. actively encourages ongoing education beyond formal coursework throughout predoctoral training, and
4. expects training to be completed in 4-5 years with graduates poised to compete successfully for their next position.

To view the Program Goal for Microbiology and Immunology visit http://micro.medicine.iu.edu/graduate-programs/program-goal/.

Pharmacology and Toxicology

Pharmacology, Ph.D. or Toxicology, Ph.D.

The aim of the doctoral programs of the Department of Pharmacology and Toxicology is to develop independent investigators in pharmacology and toxicology. To earn a Ph.D. in Pharmacology or Toxicology, a student is required by the graduate faculty of the department to demonstrate proficiency in both conceptual and technical facets of modern biomedical research and to perform meritorious original research on a significant problem in pharmacology or toxicology.

Our goal is to educate our students to pursue successful careers in biomedical sciences as researchers and educators in professional schools, colleges and universities, in the pharmaceutical industry, and in the broader healthcare industry. [Graduate Student Handbook]

First year students should visit http://pharmtox.iusm.iu.edu/grad-program/first-year-students/.

Master of Science in Pharmacology or Toxicology

Pharmacology is the scientific discipline that, in the attempt to improve health and alleviate disease, studies the mechanisms by which drugs alter biological systems.

Toxicology is the study of mechanisms by which drugs and chemicals in the environment produce unwanted effects.

Together these disciplines encompass the molecular basis of drug action, the actions of drugs on cells, organs, and organisms, genetic variations in drug action, and drug discovery. Since new drugs are being introduced into clinical medicine at a rapid pace, and since there are increasing concerns regarding the impact of environmental pollutants on our health, research in pharmacology and toxicology is at the forefront of medical science.

Medical and Molecular Genetics

Medical and Molecular Genetics, Ph.D.

The requirements for graduation include completion of coursework, successful performance on the department qualifying examination, defend a research proposal, conduct an original research project, and defense of the thesis. Graduates from the program are knowledgeable in the spectrum of medical genetics and will receive specific courses in molecular biology, cytogenetics and population genetics. Unique to our program, students participate in medical genetics clinics to facilitate an understanding of the bench to bedside approach to medical science.

For more information about this Ph.D. program visit http://genetics.medicine.iu.edu/education/phd-program/.

Master of Science in Medical and Molecular Genetics

A full-time student will typically complete the degree in two years. Students must complete a minimum of 30 credit hours of approved course work. At least 20 credit hours must be passed in courses offered by the Department of Medical and Molecular Genetics or approved equivalents. The departmental courses must be in at least four of the following five areas: basic human genetics, clinical genetics , cytogenetics , molecular genetics or hereditary genomics and must be passed with a grade of 'B' or better. A student may chose to complete a thesis for their Master of Science degree requirements.

In addition to completing the course requirements, the student can either prepare and defend a Master's thesis or, with the approval of the department, a first authorship in a refereed publication may substitute for a formal thesis. A second option is to complete a course work Master of Science degree. In addition to completing the course requirements, the student must then complete an additional 6 credit hours of non-research course work.

Each student selects an advisor and an advisory committee to guide and supervise the student. The committee typically consists of at least three faculty members in the Department of Medical and Molecular Genetics. The student must pass a comprehensive oral or written examination as determined by the student's advisory committee. Under exceptional circumstances, the student may petition the committee to be permitted to take the final examination one additional time.

For more information about this master's program visit http://genetics.medicine.iu.edu/education/master-of-science-program/.

Master of Science in Medical and Molecular Genetics - Genetic Counseling

The Indiana University Genetic Counseling Program is fully accredited by the American Board of Genetic Counseling. This two-year program offers:

- a specially designed curriculum to develop knowledge, skills and competency in genetic counseling
- extensive clinical experience in a variety of local genetic counseling settings
- supervising personnel who are certified by either the American Board of Medical Genetics (ABMG) or the American Board of Genetic Counseling (ABGC)
- participation in local and regional genetics education activities
- preparation of students to apply for active candidate status with the American Board of Genetic Counseling

Successful completion of the Indiana University Genetic Counseling Program will lead to a Master of Science degree in medical genetics.
For more information about the Genetic Counseling Program visit http://genetics.medicine.iu.edu/education/master-of-science-genetic-counseling-program/.

Medical Neuroscience, Ph.D.

The first requirement for the Ph.D. in Medical Neuroscience is the completion of several core courses and seminars. Students must pass a Qualifying Examination covering the concepts and research skills presented in the core curriculum. After entering a specific laboratory to engage in a formal research project, a Dissertation Proposal in NIH grant format is evaluated in written form and defended orally in front of the Research Committee. Finally, the dissertation resulting from the student's original research must be presented and defended in a formal seminar. [IUSM_Med_Neuro_Student-Faculty_Handbook.2010(1).pdf]

To view the IUSM Medical Neuroscience Student/Faculty Handbook visit http://snri.iusm.iu.edu/education-and-training/current-student-resources/.

Anatomy and Cell Biology

Anatomy and Cell Biology, Ph.D. - Biomedical Research Track

Students enter the track in August through the Indiana University School of Medicine BioMedical Gateway Program (IBMG) and take the IBMG core courses and complete three lab rotations before selecting the program and lab they will ultimately join. During the second year, students take the major anatomy core courses plus foundation courses of a minor discipline (such as physiology, biochemistry, etc). Students establish an Advisory Committee, headed by the Research Advisor at the end of their first year.

This committee aids the student in preparation for the Qualifying Examination (given at the end of the second year), which typically includes the writing and presentation of a Thesis Research Proposal (extramural grant format). The Qualifying Examination has two aims:

1. to assess the student's competency in the Anatomical subdisciplines and chosen minor, and
2. to determine if the student is prepared to begin thesis research.

Upon passing the Qualifying Examination, the student is admitted to candidacy for the Ph.D. The student's Committee advises the student throughout the conduct and completion of the doctoral research project, including the writing and defense of a Dissertation.

Anatomy and Cell Biology, Ph.D. - Education Track

The goal of this track is to produce a cadre of doctoral-level anatomy educators who are capable of teaching all of the anatomical disciplines to undergraduate, graduate, or professional students, and who are capable of producing the high-quality educational research and other scholarly work necessary for promotion and tenure.

Designed as a five-year program, the Education Track requires a total of 90 credit hours, which includes 64 credits in required coursework and 26 credits in dissertation research. The coursework is divided into two "core" areas, as well as statistics courses and electives:

- **Anatomy Core** (31 hours) - will provide rigorous training in the major anatomical disciplines of Gross Anatomy, Histology, Neuroscience, and Cell Biology, as well as supervised and mentored teaching experiences with medical students and graduate students.
- **Education Core** (18 hours) - will provide fundamentals of pedagogy and assessment, including educational research and scholarship.
- **Statistics** (6 hours) - will provide the statistical tools needed to properly design and evaluate educational research projects.
- **Electives** (9 hours) - will provide the opportunity for further training in the biomedical sciences, education, or statistics.

After completing the coursework, students will be required to pass a Qualifying Examination that tests their knowledge of anatomy, grasp of relevant literature, and the ability to form educational research hypotheses and design studies to test these hypotheses. Students must successfully complete a doctoral research project, including the writing and defense of a Dissertation.

Master of Science in Anatomy and Cell Biology

The master degree in Anatomy & Cell Biology is offered as an independent degree, and is not required as a prerequisite for the doctoral degrees. Requirements are 30 credit hours, including D850 (Gross Anatomy), D851 (Histology), and D852 (Neuroscience and Clinical Neurology), along with two years of D861 (Seminar). Applications will be considered only after the potential student has reached a mentoring agreement with the faculty member in whose laboratory the research work will be done. This is a two-year, full-time program. A masters candidate will prepare a written document (paper or thesis) based on original research work, and successfully defend it before the advisory committee, which will consist of the mentor and two other faculty members.

For more information about these and other Anatomy and Cell Biology graduate programs visit http://anatomy.iupui.edu/graduate-programs/.

Pathology and Laboratory Science

Experimental Pathology, Ph.D.

The PhD Experimental Pathology program provides the basis for a career of teaching and performing pathology research in academic medicine or in science-related industries. Admission is through the Indiana University School of Medicine BioMedical Gateway (IBMG). The IBMG adviser will advise the student concerning course work and ensure that he or she is familiar with the department, the faculty, and the research opportunities available.

The student, in conjunction with the adviser and with involved faculty members, selects a major adviser, based on the premise that the student will complete the PhD research project under the guidance of that adviser. The major adviser will then assist the student in selecting additional faculty as needed to make up the PhD advisory committee. The advisory committee is responsible for preparing and administering the doctoral qualifying examination. After the doctoral qualifying examination has been completed, the research committee is selected. The research committee will guide the student to completion of the PhD.

The research project is the focus of the PhD program; research opportunities are available in many areas of pathology. The Graduate Faculty of the Department of Pathology and Laboratory Medicine works to match students with projects that are appropriate to their individual areas of interest and expertise.

Requirements for Completion:

- A minimum of 90 credits hours, of which at least 35 are course credits and at least 45 are research credits.
- A PhD minor consisting of the IBMG core curriculum or at least 12 course credits in a related discipline or life science.
- Pathology C603 or equivalent (grade of B or higher)
- Graduate Student Seminar C808 (1- 4 credits)

- Successful completion of the doctoral qualifying examination
- Completion of a research project resulting in a doctoral dissertation

Master of Science in Experimental Pathology

The Master's degree curriculum for Laboratory Science is a research-based program that allows students to focus in an area of pathology such as clinical chemistry, clinical microbiology, hematopathology, transfusion medicine, diagnostic immunoserology, molecular diagnostics, cytotechnology, and others. The program seeks to increase the candidate's background knowledge within a particular field, and to prepare the individual for conducting investigative work in applied laboratory science.

Graduates are primed for positions involving clinical teaching, laboratory supervision, and research and development. The Laboratory Science master's program is suggested for clinical laboratory scientists, cytotechnologists, and others who have a strong background and interest in laboratory sciences. Previous work experience in a hospital clinical pathology laboratory as a clinical laboratory scientist or cytotechnologist is desirable, but not required.

Master of Science in Laboratory Science

The MS in Experimental Pathology is recommended for those who have an interest in basic research and plan careers as research scientists. The program offers opportunities for specialization in various areas of pathology, similar to those available in the Laboratory Science MS track. This track is suggested for students with an interest in any of the many areas of pathology. A strong science background is important. Previous research experience is an asset, but is not required.

A curriculum of basic science courses (21 or more credits including a graduate level biochemistry course and Seminar C808) is designed and personalized for each student, depending on his/her area of interest and experience. Courses may be selected from graduate courses offered by the Department of Pathology and Laboratory Medicine or by other IUPUI and IU School of Medicine basic science departments.

Specific research projects for each student will be determined after completion of the first full semester of course work. The student's area of interest and the availability of a suitable research advisor are considered in this choice. Degree completion involves submission of a bound research thesis or publication of the research in a respected, peer-reviewed journal in the appropriate field. Recent thesis and dissertation titles from the MS Laboratory Science and the Experimental Pathology programs may be accessed in Recent Thesis and Dissertation Titles.

For more information about these graduate programs visit http://pathology.iupui.edu/education/graduate/graduate-tracks/.

Biochemistry and Molecular Biology

Biochemistry and Molecular Biology, Ph.D.

The Department offers a Graduate Program in Biochemistry and Molecular Biology leading to the Ph. D. degree awarded by the Indiana University Graduate School. Our teaching mission includes core graduate courses in molecular biology and biochemistry, as well as medical courses in biochemistry and cellular and molecular biology. In addition, we offer advanced courses in a wide range of specialty areas reflecting the research interests of our faculty.

Students regularly participate in numerous departmental and program events such as journal clubs, research seminars and departmental retreat. We strive to help students develop the biochemical and molecular skills necessary to drive the current revolution in the biomedical sciences. Milestones to the degree include the oral defense of the thesis proposal. Students will also be questioned on topics outside of their thesis work during their thesis proposal oral defense in B803. Passing of this defense (with B/3.0 grade or better) will be required for advancement to candidacy.

Students will be enrolled for credit in B890 in years 2-5 in which they will present a seminar each year as well as attend all student and faculty seminars. Student seminars will generally be of a "journal club" format, where current, published work in the field of biochemistry is presented. Students who have advanced to candidacy may present their own lab work upon approval of course director and thesis advisor.

After choosing a laboratory for thesis research, an advisory committee consisting of at least 3 Biochemistry and Molecular Biology and 1 external faculty member will be formed with the approval of the thesis advisor and departmental chairperson. Upon advancement to candidacy a thesis research committee will be similarly formed that may consist of different faculty.

For more information about these graduate programs visit http://biochemistry.iu.edu/graduate-program/.

Medical Biophysics and Biomolecular Imaging, Ph.D.

The interdisciplinary program in Biomolecular Imaging offers graduate research training that leads to the Ph.D. in Medical Biophysics and is designed to train talented students in the use of imaging techniques to study biological processes from the molecular to the cellular level. Core courses in the fundamentals of biomedical science are complemented by courses teaching specialized knowledge in the physical basis of cell and molecular imaging. The interdisciplinary nature of the program allows you to choose from faculty in a variety of departments who have a wide range of expertise in biomedical and physical science.

For more information about this program visit http://bioimage.medicine.iu.edu/.

Biotechnology, M.S.

The IU School of Medicine's M.S. in Biotechnology aims to boost the research skills of individuals interested in health sciences research.

We designed the program for people already employed in local biotech industries or academic research laboratories, for individuals seeking a career change, and for recent graduates in Biology and Chemistry.

The three-year, 30-credit program allows students to evaluate whether a research career in a biotech discipline is an appropriate choice. All of the courses are approved

for graduate credit and could be accepted as part of a Ph.D. Students must initially enroll in the Biotechnology Certificate program and maintain a 3.0 GPA.

Students will select a School of Medicine Core facility like Proteomics, Protein Expression, Microscopy, Transgenics, Flow Cytometry etc. for their research project. The Core Director will match faculty members with a research project with students. Each student will conduct research and write a paper on the goal of the project, methodologies and result.

The core curriculum is the 17 credits of the biotechnology Certificate Program, plus an additional academic course in basic science, a course in scientific writing and 9 credits of research with a faculty mentor and an IUSM core facility. Students will complete and defend an M.S. thesis based on their research. The MS can be completed part-time in 3 years.

Clinical Research, M.S.

Indiana University has been funded by the National Institute of Health through a K-30 grant to develop and implement the Clinical Investigator Training Enhancement (CITE) program. The purpose of this program is to prepare health care professionals for a career in clinical research. Following completion of the program, graduates can embark on a career in clinical research with the skills necessary to successfully compete for grant funding, conduct and analyze research findings, and publish their work in scientific journals.

By participating in the program, CITE trainees will accomplish two primary objectives:

1. Complete a two-year formal clinical research curriculum, at the end of which they will receive a Master of Science in Clinical Research degree.
2. Conduct clinical research under the mentorship of a faculty scientist whose discipline or area of clinical investigation corresponds to the research interests and career aims of the CITE enrollee. An Advisory Committee consisting of a primary mentor and other relevant faculty scientists will be established for each enrollee to monitor progress.

Substantial time for completing the CITE program is required in that there are two main components: completion of the formal curriculum and active involvement in clinical research under the mentorship of a faculty scientist. Both elements are critical to preparation of the candidate for successful research following graduation.

CITE is an integrated program where the formal classroom curriculum complements and parallels the ongoing clinical research that is relevant to each enrollee's career. This differs from a "sequential" program in which individuals might focus predominantly on formal coursework for several years, deferring their actual research until they have attained their degree.

The rationale is two-fold. First, CITE coursework is most meaningful when applied to research in which the enrollee is engaged and hopes to continue following program completion. Second, success in clinical research requires not only formal training but several primary outcomes, particularly publications and grants. In addition to the M.S. degree, CITE graduates will have completed a grant proposal for funding as well as one or several manuscripts for publication. The combination of a degree plus the products of successful research will substantially enhance the likelihood of sustained success as a clinical investigator following program completion [IndianaCTSI HUB].

Medical Science, M.S.

Problem-based learning (PBL) is an active student-directed educational method. In PBL learners progressively develop autonomous learning skills. Learners increasingly continue to learn on their own in the program and in life. A facilitator provides the educational materials and guidance that enhances learning. A real world problem is the basis of PBL. A complex PBL problem stimulates the learner to organize and integrate learned information in ways that promote its recall and application to future problems. PBL problems challenge learners to acquire problem-solving and critical thinking skills.

Learners process and solve a problem with information they may already possess permitting them to validate what they already know. They also identify and inquire into what they need to know. Learners engage in independent study researching learning issues using different resources such as books, reports, journals, online information, individuals with relevant expertise. Thus, PBL personalizes learning to individual needs and learning styles. Learners return with their research reports and apply their expanded understanding of the problem in order to resolve it. At the conclusion of a PBL case, learners assess their work, each other and the facilitator.

MCAT Problem-based Learning

MCAT Problem-based learning (PBL) is an active student-directed learning process guided by tutors. Students meet in small groups for 3 hours three times per week for 9 weeks to process MCAT-like passages and solve MCAT-like questions using PBL principles. Most of the tutors have completed at least the first of the medical curriculum at Indiana University School of Medicine and have experience in PBL techniques.

The goals of the MCAT PBL are as follows:

- Use MCAT-like passages to promote student understanding of the MCAT
- Enhance student confidence through mastery of test-taking skills
- Promote students' reasoning and problem solving skills through analysis of MCAT passages to identify significant facts, identify learning issues, make appropriate answer choices.
- Provide an learning environment in which students collaboratively direct their own learning.
- Enhance student's knowledge base and life-long learning skills through self-directed inquiry on learning issues.

Problem-based Learning in Medical Science: Year 1

This course for first year MSMS students provides an academic context in which students take responsibility for their own learning. The course uses a small team setting in which students can benefit from peer and facilitator feedback and support each other's learning. Basic science course material constitutes the basis of clinical cases used in the MSCI X503. During PBL sessions

students will analyze and explain the scientific basis of the disease process covered in a case.

The goals of the course are as follows:

- Develop life-long learning and reasoning skills
- Promote students' problem solving skills by analyzing a clinical case to identify significant facts, formulate hypotheses, identify learning issues, collect data, and make a diagnosis.
- Provide an academic context in which students collaboratively direct their own learning.
- Enhance student's knowledge base through self-directed research on learning issues.
- Use cases to emphasize the relevance of basic science to clinical medicine.

Physiology

We invite students who are interested in preparing for exciting careers in biomedical research to join one of our graduate programs. The Department of Cellular & Integrative Physiology has an extraordinary group of dedicated and creative research scientists whose studies embrace both basic cellular and physiological processes, and include ground breaking research focusing on a variety of disease processes including cancer, diabetes, bone remodeling, cardiovascular, renal, membrane, and respiratory pathophysiology. Graduates from our program have enjoyed establishing careers in academic and private research institutes, industry, and government laboratories.

Master of Science in Physiology

Master of Science (M.S.) Students will apply to enter our graduate program using the instructions provided on the weblink and tab "MS Degree ... Application". This degree pathway requires a total of 30 credits for completion. There is both a research and a non-research option for this degree. This is an intensive 1-2 year (3 semester) program designed for students who wish to pursue advanced positions in academic research institutions, industrial settings, and professional schools (e.g. medicine, dentistry). Students entering this program will enhance their knowledge of cellular and integrated physiology through coursework and research which will help prepare the student for jobs in biomedical research, industry, small colleges, and other professions. In addition, this program serves students who wish to improve their academic qualifications for entry into professional schools such a medical or dental schools.

Physiology, Ph.D.

Doctoral (Ph.D.) Students will formally enter our graduate program upon completion of the 1^{S} year of the IBMG gateway program by selecting a faculty mentor from our primary faculty or adjunct faculty to serve as thesis advisor. Student stipends are highly competitive ($24,500/year for 2009-10) and pay all of the student's tuition, as well as health plan benefits and associated registration fees. Students in the Cellular & Integrative Physiology graduate program have opportunities for supplementing their stipends by competing for and receiving external fellowships from such organizations as National Institutes of Health, American Heart Association, or the Department of Defense etc.

Degree Programs

The IU School of Medicine offers graduate degrees in the following disciplines:

Doctor of Medicine (M.D.)

Dual Degrees

- Doctor of Medicine/Master of Philosophy
- Doctor of Medicine/Master of Business Administration
- Doctor of Medicine/Master of Public Health
- M.D./Ph.D. (Medical Scientist Training Program)

Doctor of Philosophy (Ph.D.)

- Anatomy and Cell Biology
- Biochemistry and Molecular Biology
- Epidemiology (Public Health)
- Health Policy and Management (Public Health)
- Medical and Molecular Genetics
- Medical Biophysics and Biomolecular Imaging
- Medical Neuroscience
- Microbiology and Immunology
- Pathology
- Pharmacology and Toxicology
- Physiology

Master of Science (M.S.)

- Anatomy and Cell Biology
- Biochemistry and Molecular Biology
- Biotechnology
- Clinical Research
- Medical and Molecular Genetics
- Medical and Molecular Genetics - Genetic Counseling
- Medical Biophysics and Biomolecular Imaging
- Medical Science
- Pathology
- Pharmacology and Toxicology
- Physiology

For more information regarding the Ph.D. and M.S. programs please review this website: http://grad.medicine.iu.edu/degree-programs/

Doctor of Medicine (M.D.)

The competent graduate in the Doctor of Medicine (M.D.) program of the Indiana University School of Medicine will demonstrate competence in the following areas:

1. Effective Communication

- Listen attentively and communicates clearly with patients, families, and health care team members.
- Establish the rapport necessary to form and maintain a therapeutic relationship with the patient.

2. Basic Clinical Skills

- Elicit and record a complete and accurate history and performs a skillful examination appropriate to a variety of patient encounters.
- Correctly determine whether to perform a comprehensively or suitably focused history and physical examination.

- Correctly select, proficiently perform, and accurately interpret selected clinical procedures and laboratory tests.

3. Using Science to Guide Diagnosis, Management, Therapeutics and Prevention

- Know and explain the scientific underpinnings at the molecular, cellular, organ, whole body, and environmental levels for states of health and disease based upon current understandings and cutting-edge advances in contemporary basic science.
- Use this information to diagnose, manage, and prevent the common health problems of individuals, families, and communities in collaboration with them.
- Develop a problem list and differential diagnosis.
- Carry out additional investigations.
- Choose and implement interventions with consultation and referral as needed.
- Determine outcome goals.
- Recognize and utilize opportunities for prevention.
- Monitor progress.
- Share information and educate.
- Adjust therapy and diagnosis according to results.

4. Lifelong Learning

- Aware of the limits of his/her personal knowledge and experience.
- Actively set and pursue clear learning goals.
- Exploit new opportunities for intellectual growth and professional enlightenment.
- Capable of critical, reliable, and valid self-assessment, and can apply the knowledge gained to the practice of his/her profession.

5. Self-Awareness, Self-Care and Personal Growth

- Approache the practice of medicine with awareness of his/her limits, strengths, weaknesses, and personal vulnerabilities.
- Assess personal values and priorities in order to develop and maintain and appropriate balance of personal and professional commitments.
- Seek help and advice when needed for his/her own difficulties and develop personally appropriate coping strategies.
- Recognize his/her effect on others in professional contacts.
- Seek, accurately receive, and appropriately respond to performance feedback.

6. The Social and Community Context of Health Care

- Recognize the diverse factors that influence the health of the individual and the community.
- Identify the sociocultural, familial, psychological, economic, legal, political, and spiritual factors impacting health care and health care delivery.
- Respond to these factors by planning and advocating the appropriate course of action at both the individual and the community level.

7. Moral Reasoning and Ethical Judgment

- Have a comprehensive understanding of the foundations and components of medical ethics and moral reasoning and is able to use that knowledge in addressing ethical issues in his/her practice of medicine.
- Recognize the ethical issues of medical practice and health policy.
- Identify alternatives in difficult ethical choices.
- Systematically analyze the conflicting considerations supporting different alternatives.
- Formulate, defend, and effectively carry out a course of action that takes account of this ethical complexity.
- Combine a willingness to recognize the nature of the value systems of patients and others with commitment to his/her own system and the ethical choices necessary to maintain his/her own ethical integrity.

8. Problem Solving

- Recognize and thoroughly characterize a problem.
- Develop an informed plan of action, act to resolve the problem, and subsequently assess the results of his/her action.
- Display competence in basic problem solving skills as applied to medical problems.
- Know how to interpret and apply information and knowledge to understand and solve straightforward problems.

9. Professionalism and Role Recognition

- Recognize the powerful impact of his/her professional attitudes and behaviors on others.
- Consistently demonstrate the highest standards of excellence, duty, and accountability to the patient.
- Value the humanity of all patients and does not exploit the patient for personal gain.
- Recognize his/her role in working collaboratively with others to meet the health care needs of the individual and the community.

Microbiology and Immunology, Ph.D.

The goal of the Graduate Program is to prepare research scientists for productive careers at the most competitive level. The supporting facility is equipped with all requisite tools for conducting contemporary molecular science and the expertise to implement them. However, our greatest resource is the quality of the research faculty and its commitment to productivity. Thus, the Department

1. offers didactic coursework sufficient for rapid mastery of concepts central to the discipline, while emphasizing active student involvement in the laboratory as quickly as possible,
2. provides varied forums to enhance communication/ teaching skills,
3. actively encourages ongoing education beyond formal coursework throughout predoctoral training, and
4. expects training to be completed in 4-5 years with graduates poised to compete successfully for their next position.

To view the Program Goal for Microbiology and Immunology visit http://micro.medicine.iu.edu/graduate-programs/program-goal/.

Pharmacology and Toxicology

Pharmacology, Ph.D. or Toxicology, Ph.D.

The aim of the doctoral programs of the Department of Pharmacology and Toxicology is to develop independent

investigators in pharmacology and toxicology. To earn a Ph.D. in Pharmacology or Toxicology, a student is required by the graduate faculty of the department to demonstrate proficiency in both conceptual and technical facets of modern biomedical research and to perform meritorious original research on a significant problem in pharmacology or toxicology.

Our goal is to educate our students to pursue successful careers in biomedical sciences as researchers and educators in professional schools, colleges and universities, in the pharmaceutical industry, and in the broader healthcare industry. [Graduate Student Handbook]

First year students should visit http://pharmtox.iusm.iu.edu/grad-program/first-year-students/.

Master of Science in Pharmacology or Toxicology

Pharmacology is the scientific discipline that, in the attempt to improve health and alleviate disease, studies the mechanisms by which drugs alter biological systems.

Toxicology is the study of mechanisms by which drugs and chemicals in the environment produce unwanted effects.

Together these disciplines encompass the molecular basis of drug action, the actions of drugs on cells, organs, and organisms, genetic variations in drug action, and drug discovery. Since new drugs are being introduced into clinical medicine at a rapid pace, and since there are increasing concerns regarding the impact of environmental pollutants on our health, research in pharmacology and toxicology is at the forefront of medical science.

Medical and Molecular Genetics

Medical and Molecular Genetics, Ph.D.

The requirements for graduation include completion of coursework, successful performance on the department qualifying examination, defend a research proposal, conduct an original research project, and defense of the thesis. Graduates from the program are knowledgeable in the spectrum of medical genetics and will receive specific courses in molecular biology, cytogenetics and population genetics. Unique to our program, students participate in medical genetics clinics to facilitate an understanding of the bench to bedside approach to medical science.

For more information about this Ph.D. program visit http://genetics.medicine.iu.edu/education/phd-program/.

Master of Science in Medical and Molecular Genetics

A full-time student will typically complete the degree in two years. Students must complete a minimum of 30 credit hours of approved course work. At least 20 credit hours must be passed in courses offered by the Department of Medical and Molecular Genetics or approved equivalents. The departmental courses must be in at least four of the following five areas: basic human genetics, clinical genetics , cytogenetics , molecular genetics or hereditary genomics and must be passed with a grade of 'B' or better. A student may chose to complete a thesis for their Master of Science degree requirements.

In addition to completing the course requirements, the student can either prepare and defend a Master's thesis or, with the approval of the department, a first authorship in a refereed publication may substitute for a formal thesis. A second option is to complete a course work Master of Science degree. In addition to completing the course requirements, the student must then complete an additional 6 credit hours of non-research course work.

Each student selects an advisor and an advisory committee to guide and supervise the student. The committee typically consists of at least three faculty members in the Department of Medical and Molecular Genetics. The student must pass a comprehensive oral or written examination as determined by the student's advisory committee. Under exceptional circumstances, the student may petition the committee to be permitted to take the final examination one additional time.

For more information about this master's program visit http://genetics.medicine.iu.edu/education/master-of-science-program/.

Master of Science in Medical and Molecular Genetics - Genetic Counseling

The Indiana University Genetic Counseling Program is fully accredited by the American Board of Genetic Counseling. This two-year program offers:

- a specially designed curriculum to develop knowledge, skills and competency in genetic counseling
- extensive clinical experience in a variety of local genetic counseling settings
- supervising personnel who are certified by either the American Board of Medical Genetics (ABMG) or the American Board of Genetic Counseling (ABGC)
- participation in local and regional genetics education activities
- preparation of students to apply for active candidate status with the American Board of Genetic Counseling

Successful completion of the Indiana University Genetic Counseling Program will lead to a Master of Science degree in medical genetics.
For more information about the Genetic Counseling Program visit http://genetics.medicine.iu.edu/education/master-of-science-genetic-counseling-program/.

Medical Neuroscience, Ph.D.

The first requirement for the Ph.D. in Medical Neuroscience is the completion of several core courses and seminars. Students must pass a Qualifying Examination covering the concepts and research skills presented in the core curriculum. After entering a specific laboratory to engage in a formal research project, a Dissertation Proposal in NIH grant format is evaluated in written form and defended orally in front of the Research Committee. Finally, the dissertation resulting from the student's original research must be presented and defended in a formal seminar. [IUSM_Med_Neuro_Student-Faculty_Handbook.2010(1).pdf]

To view the IUSM Medical Neuroscience Student/Faculty Handbook visit http://snri.iusm.iu.edu/education-and-training/current-student-resources/.

Anatomy and Cell Biology

Anatomy and Cell Biology, Ph.D. - Biomedical Research Track

Students enter the track in August through the Indiana University School of Medicine BioMedical Gateway Program (IBMG) and take the IBMG core courses and complete three lab rotations before selecting the program and lab they will ultimately join. During the second year, students take the major anatomy core courses plus foundation courses of a minor discipline (such as physiology, biochemistry, etc). Students establish an Advisory Committee, headed by the Research Advisor at the end of their first year.

This committee aids the student in preparation for the Qualifying Examination (given at the end of the second year), which typically includes the writing and presentation of a Thesis Research Proposal (extramural grant format). The Qualifying Examination has two aims:

1. to assess the student's competency in the Anatomical subdisciplines and chosen minor, and
2. to determine if the student is prepared to begin thesis research.

Upon passing the Qualifying Examination, the student is admitted to candidacy for the Ph.D. The student's Committee advises the student throughout the conduct and completion of the doctoral research project, including the writing and defense of a Dissertation.

Anatomy and Cell Biology, Ph.D. - Education Track

The goal of this track is to produce a cadre of doctoral-level anatomy educators who are capable of teaching all of the anatomical disciplines to undergraduate, graduate, or professional students, and who are capable of producing the high-quality educational research and other scholarly work necessary for promotion and tenure.

Designed as a five-year program, the Education Track requires a total of 90 credit hours, which includes 64 credits in required coursework and 26 credits in dissertation research. The coursework is divided into two "core" areas, as well as statistics courses and electives:

- **Anatomy Core** (31 hours) - will provide rigorous training in the major anatomical disciplines of Gross Anatomy, Histology, Neuroscience, and Cell Biology, as well as supervised and mentored teaching experiences with medical students and graduate students.
- **Education Core** (18 hours) - will provide fundamentals of pedagogy and assessment, including educational research and scholarship.
- **Statistics** (6 hours) - will provide the statistical tools needed to properly design and evaluate educational research projects.
- **Electives** (9 hours) - will provide the opportunity for further training in the biomedical sciences, education, or statistics.

After completing the coursework, students will be required to pass a Qualifying Examination that tests their knowledge of anatomy, grasp of relevant literature, and the ability to form educational research hypotheses and design studies to test these hypotheses. Students must successfully complete a doctoral research project, including the writing and defense of a Dissertation.

Master of Science in Anatomy and Cell Biology

The master degree in Anatomy & Cell Biology is offered as an independent degree, and is not required as a prerequisite for the doctoral degrees. Requirements are 30 credit hours, including D850 (Gross Anatomy), D851 (Histology), and D852 (Neuroscience and Clinical Neurology), along with two years of D861 (Seminar). Applications will be considered only after the potential student has reached a mentoring agreement with the faculty member in whose laboratory the research work will be done. This is a two-year, full-time program. A masters candidate will prepare a written document (paper or thesis) based on original research work, and successfully defend it before the advisory committee, which will consist of the mentor and two other faculty members.

For more information about these and other Anatomy and Cell Biology graduate programs visit http://anatomy.iupui.edu/graduate-programs/.

Pathology and Laboratory Science

Experimental Pathology, Ph.D.

The PhD Experimental Pathology program provides the basis for a career of teaching and performing pathology research in academic medicine or in science-related industries. Admission is through the Indiana University School of Medicine BioMedical Gateway (IBMG). The IBMG adviser will advise the student concerning course work and ensure that he or she is familiar with the department, the faculty, and the research opportunities available.

The student, in conjunction with the adviser and with involved faculty members, selects a major adviser, based on the premise that the student will complete the PhD research project under the guidance of that adviser. The major adviser will then assist the student in selecting additional faculty as needed to make up the PhD advisory committee. The advisory committee is responsible for preparing and administering the doctoral qualifying examination. After the doctoral qualifying examination has been completed, the research committee is selected. The research committee will guide the student to completion of the PhD.

The research project is the focus of the PhD program; research opportunities are available in many areas of pathology. The Graduate Faculty of the Department of Pathology and Laboratory Medicine works to match students with projects that are appropriate to their individual areas of interest and expertise.

Requirements for Completion:

- A minimum of 90 credits hours, of which at least 35 are course credits and at least 45 are research credits.
- A PhD minor consisting of the IBMG core curriculum or at least 12 course credits in a related discipline or life science.
- Pathology C603 or equivalent (grade of B or higher)
- Graduate Student Seminar C808 (1- 4 credits)
- Successful completion of the doctoral qualifying examination

- Completion of a research project resulting in a doctoral dissertation

Master of Science in Experimental Pathology

The Master's degree curriculum for Laboratory Science is a research-based program that allows students to focus in an area of pathology such as clinical chemistry, clinical microbiology, hematopathology, transfusion medicine, diagnostic immunoserology, molecular diagnostics, cytotechnology, and others. The program seeks to increase the candidate's background knowledge within a particular field, and to prepare the individual for conducting investigative work in applied laboratory science.

Graduates are primed for positions involving clinical teaching, laboratory supervision, and research and development. The Laboratory Science master's program is suggested for clinical laboratory scientists, cytotechnologists, and others who have a strong background and interest in laboratory sciences. Previous work experience in a hospital clinical pathology laboratory as a clinical laboratory scientist or cytotechnologist is desirable, but not required.

Master of Science in Laboratory Science

The MS in Experimental Pathology is recommended for those who have an interest in basic research and plan careers as research scientists. The program offers opportunities for specialization in various areas of pathology, similar to those available in the Laboratory Science MS track. This track is suggested for students with an interest in any of the many areas of pathology. A strong science background is important. Previous research experience is an asset, but is not required.

A curriculum of basic science courses (21 or more credits including a graduate level biochemistry course and Seminar C808) is designed and personalized for each student, depending on his/her area of interest and experience. Courses may be selected from graduate courses offered by the Department of Pathology and Laboratory Medicine or by other IUPUI and IU School of Medicine basic science departments.

Specific research projects for each student will be determined after completion of the first full semester of course work. The student's area of interest and the availability of a suitable research advisor are considered in this choice. Degree completion involves submission of a bound research thesis or publication of the research in a respected, peer-reviewed journal in the appropriate field. Recent thesis and dissertation titles from the MS Laboratory Science and the Experimental Pathology programs may be accessed in Recent Thesis and Dissertation Titles.

For more information about these graduate programs visit http://pathology.iupui.edu/education/graduate/graduate-tracks/.

Biochemistry and Molecular Biology

Biochemistry and Molecular Biology, Ph.D.

The Department offers a Graduate Program in Biochemistry and Molecular Biology leading to the Ph. D. degree awarded by the Indiana University Graduate School. Our teaching mission includes core graduate courses in molecular biology and biochemistry, as well as medical courses in biochemistry and cellular and molecular biology. In addition, we offer advanced courses in a wide range of specialty areas reflecting the research interests of our faculty.

Students regularly participate in numerous departmental and program events such as journal clubs, research seminars and departmental retreat. We strive to help students develop the biochemical and molecular skills necessary to drive the current revolution in the biomedical sciences. Milestones to the degree include the oral defense of the thesis proposal. Students will also be questioned on topics outside of their thesis work during their thesis proposal oral defense in B803. Passing of this defense (with B/3.0 grade or better) will be required for advancement to candidacy.

Students will be enrolled for credit in B890 in years 2-5 in which they will present a seminar each year as well as attend all student and faculty seminars. Student seminars will generally be of a "journal club" format, where current, published work in the field of biochemistry is presented. Students who have advanced to candidacy may present their own lab work upon approval of course director and thesis advisor.

After choosing a laboratory for thesis research, an advisory committee consisting of at least 3 Biochemistry and Molecular Biology and 1 external faculty member will be formed with the approval of the thesis advisor and departmental chairperson. Upon advancement to candidacy a thesis research committee will be similarly formed that may consist of different faculty.

For more information about these graduate programs visit http://biochemistry.iu.edu/graduate-program/.

Medical Biophysics and Biomolecular Imaging, Ph.D.

The interdisciplinary program in Biomolecular Imaging offers graduate research training that leads to the Ph.D. in Medical Biophysics and is designed to train talented students in the use of imaging techniques to study biological processes from the molecular to the cellular level. Core courses in the fundamentals of biomedical science are complemented by courses teaching specialized knowledge in the physical basis of cell and molecular imaging. The interdisciplinary nature of the program allows you to choose from faculty in a variety of departments who have a wide range of expertise in biomedical and physical science.

For more information about this program visit http://bioimage.medicine.iu.edu/.

Biotechnology, M.S.

The IU School of Medicine's M.S. in Biotechnology aims to boost the research skills of individuals interested in health sciences research.

We designed the program for people already employed in local biotech industries or academic research laboratories, for individuals seeking a career change, and for recent graduates in Biology and Chemistry.

The three-year, 30-credit program allows students to evaluate whether a research career in a biotech discipline is an appropriate choice. All of the courses are approved for graduate credit and could be accepted as part of a

Ph.D. Students must initially enroll in the Biotechnology Certificate program and maintain a 3.0 GPA.

Students will select a School of Medicine Core facility like Proteomics, Protein Expression, Microscopy, Transgenics, Flow Cytometry etc. for their research project. The Core Director will match faculty members with a research project with students. Each student will conduct research and write a paper on the goal of the project, methodologies and result.

The core curriculum is the 17 credits of the biotechnology Certificate Program, plus an additional academic course in basic science, a course in scientific writing and 9 credits of research with a faculty mentor and an IUSM core facility. Students will complete and defend an M.S. thesis based on their research. The MS can be completed part-time in 3 years.

Clinical Research, M.S.

Indiana University has been funded by the National Institute of Health through a K-30 grant to develop and implement the Clinical Investigator Training Enhancement (CITE) program. The purpose of this program is to prepare health care professionals for a career in clinical research. Following completion of the program, graduates can embark on a career in clinical research with the skills necessary to successfully compete for grant funding, conduct and analyze research findings, and publish their work in scientific journals.

By participating in the program, CITE trainees will accomplish two primary objectives:

1. Complete a two-year formal clinical research curriculum, at the end of which they will receive a Master of Science in Clinical Research degree.
2. Conduct clinical research under the mentorship of a faculty scientist whose discipline or area of clinical investigation corresponds to the research interests and career aims of the CITE enrollee. An Advisory Committee consisting of a primary mentor and other relevant faculty scientists will be established for each enrollee to monitor progress.

Substantial time for completing the CITE program is required in that there are two main components: completion of the formal curriculum and active involvement in clinical research under the mentorship of a faculty scientist. Both elements are critical to preparation of the candidate for successful research following graduation.

CITE is an integrated program where the formal classroom curriculum complements and parallels the ongoing clinical research that is relevant to each enrollee's career. This differs from a "sequential" program in which individuals might focus predominantly on formal coursework for several years, deferring their actual research until they have attained their degree.

The rationale is two-fold. First, CITE coursework is most meaningful when applied to research in which the enrollee is engaged and hopes to continue following program completion. Second, success in clinical research requires not only formal training but several primary outcomes, particularly publications and grants. In addition to the M.S. degree, CITE graduates will have completed a grant proposal for funding as well as one or several manuscripts for publication. The combination of a degree plus the products of successful research will substantially enhance the likelihood of sustained success as a clinical investigator following program completion [IndianaCTSI HUB].

Medical Science, M.S.

Problem-based learning (PBL) is an active student-directed educational method. In PBL learners progressively develop autonomous learning skills. Learners increasingly continue to learn on their own in the program and in life. A facilitator provides the educational materials and guidance that enhances learning. A real world problem is the basis of PBL. A complex PBL problem stimulates the learner to organize and integrate learned information in ways that promote its recall and application to future problems. PBL problems challenge learners to acquire problem-solving and critical thinking skills.

Learners process and solve a problem with information they may already possess permitting them to validate what they already know. They also identify and inquire into what they need to know. Learners engage in independent study researching learning issues using different resources such as books, reports, journals, online information, individuals with relevant expertise. Thus, PBL personalizes learning to individual needs and learning styles. Learners return with their research reports and apply their expanded understanding of the problem in order to resolve it. At the conclusion of a PBL case, learners assess their work, each other and the facilitator.

MCAT Problem-based Learning

MCAT Problem-based learning (PBL) is an active student-directed learning process guided by tutors. Students meet in small groups for 3 hours three times per week for 9 weeks to process MCAT-like passages and solve MCAT-like questions using PBL principles. Most of the tutors have completed at least the first of the medical curriculum at Indiana University School of Medicine and have experience in PBL techniques.

The goals of the MCAT PBL are as follows:

- Use MCAT-like passages to promote student understanding of the MCAT
- Enhance student confidence through mastery of test-taking skills
- Promote students' reasoning and problem solving skills through analysis of MCAT passages to identify significant facts, identify learning issues, make appropriate answer choices.
- Provide an learning environment in which students collaboratively direct their own learning.
- Enhance student's knowledge base and life-long learning skills through self-directed inquiry on learning issues.

Problem-based Learning in Medical Science: Year 1

This course for first year MSMS students provides an academic context in which students take responsibility for their own learning. The course uses a small team setting in which students can benefit from peer and facilitator feedback and support each other's learning. Basic science course material constitutes the basis of clinical cases used in the MSCI X503. During PBL sessions

students will analyze and explain the scientific basis of the disease process covered in a case.

The goals of the course are as follows:

- Develop life-long learning and reasoning skills
- Promote students' problem solving skills by analyzing a clinical case to identify significant facts, formulate hypotheses, identify learning issues, collect data, and make a diagnosis.
- Provide an academic context in which students collaboratively direct their own learning.
- Enhance student's knowledge base through self-directed research on learning issues.
- Use cases to emphasize the relevance of basic science to clinical medicine.

Physiology

We invite students who are interested in preparing for exciting careers in biomedical research to join one of our graduate programs. The Department of Cellular & Integrative Physiology has an extraordinary group of dedicated and creative research scientists whose studies embrace both basic cellular and physiological processes, and include ground breaking research focusing on a variety of disease processes including cancer, diabetes, bone remodeling, cardiovascular, renal, membrane, and respiratory pathophysiology. Graduates from our program have enjoyed establishing careers in academic and private research institutes, industry, and government laboratories.

Master of Science in Physiology

Master of Science (M.S.) Students will apply to enter our graduate program using the instructions provided on the weblink and tab "MS Degree ... Application". This degree pathway requires a total of 30 credits for completion. There is both a research and a non-research option for this degree. This is an intensive 1-2 year (3 semester) program designed for students who wish to pursue advanced positions in academic research institutions, industrial settings, and professional schools (e.g. medicine, dentistry). Students entering this program will enhance their knowledge of cellular and integrated physiology through coursework and research which will help prepare the student for jobs in biomedical research, industry, small colleges, and other professions. In addition, this program serves students who wish to improve their academic qualifications for entry into professional schools such a medical or dental schools.

Physiology, Ph.D.

Doctoral (Ph.D.) Students will formally enter our graduate program upon completion of the 1^{S} year of the IBMG gateway program by selecting a faculty mentor from our primary faculty or adjunct faculty to serve as thesis advisor. Student stipends are highly competitive ($24,500/ year for 2009-10) and pay all of the student's tuition, as well as health plan benefits and associated registration fees. Students in the Cellular & Integrative Physiology graduate program have opportunities for supplementing their stipends by competing for and receiving external fellowships from such organizations as National Institutes of Health, American Heart Association, or the Department of Defense etc.

Academic Regulations

All students admitted to the IU School of Medicine Health Professions Programs are governed by the following academic regulations. In areas where content is limited (*), students should refer to campus-level policies found in the campus policies section (*see link in right-hand menu box*).

Grades* All students admitted to the School of Medicine Health Professions Programs are governed by the grade definitions and minimum grade requirements established by their professional program. Instructors are responsible for establishing and publishing the grading scale applicable to their courses.

Grade Point Average*

R Grade, Deferred*

Pass/Fail* School of Medicine Health Professions Programs students may not use the Pass/Fail option for a stated prerequisite or a professional course. No more than one Pass/Fail course may be taken in any one semester. Students are limited to a maximum of 24 Pass/Fail credit hours for the baccalaureate degree and a maximum of 12 Pass/Fail credit hours for the associate degree.

Satisfactory/Fail*

Incompletes*

Special Credit Policy* The School of Medicine Health Professions Programs may award special credit to students who are enrolled at Indiana University seeking a degree and who possess, by previous education or experience, a background in a health profession represented in the Health Professions Programs. The mechanisms by which a student may be awarded credit include credit by credentials, credit by experience, and credit by examination. Certain programs have policies that define how these mechanisms apply to a student seeking credit from that program. Students may obtain a copy of the available program specific *Special Credit Policy and Procedure* by contacting the Health Professions Programs Administrative Office in Van Nuys Medical Science.

Dropped or Added Courses* Students who alter their original class schedules, whether by personal incentive or university directive, must do so officially by filing the appropriate forms with the registrar. Students who do not assume this responsibility are jeopardizing their records with the possibility of incurring an F in a course not properly dropped and/or not receiving credit in a course improperly added.

Double Major* An undergraduate double major does not exist in the School, and second major options have not been established between the School and any other academic unit. Each health professions degree is a separate academic curriculum, and students may not pursue a double major.

Multiple Degrees* Students earning more than one degree at the same level are required to meet the academic requirements for the degree in each school and must be recommended for the degree by the faculty of each school. Students receiving an undergraduate degree from the School of Medicine are required to complete the

professional component in sequence with their class of admission.

Grade Replacement Policy*

Remedial Courses Generally, remedial and refresher courses do not satisfy any course requirement for any health professions programs degree. Contact the program for further information

Last Updated: February 6, 2012

Academic Policies

Students in Good Standing Students must maintain a minimum cumulative grade point average of 2.00 (C) and a minimum grade point average of 2.00 for the most recent academic session and meet additional program, academic, and professional standards in order to be considered in good standing. Students are informed of program, academic, and professional standards during program orientation.

Class Standing Within Indiana University, class standing is based on the total number of credit hours a student has earned. However, within the Health Professions Programs, class standing is assigned according to a student's progress in the professional curriculum.

Semester Load To be considered a full-time student by the university for each session, the student must register for a minimum of 12 credit hours each fall and spring semester and 6 credit hours each summer I and II. The maximum load is 18 credit hours. Students who want to carry more than 18 credits must obtain permission of the program director and the dean or the dean's designee. In addition, students should have a cumulative 3.00 (B) average or have earned a 3.00 (B) average in their last full semester.

Probation Upon the recommendation of the faculty in the student's program, a student is placed on probation. Probationary recommendations are made when the student does not meet standards of academic performance or professional behavior. A student will be placed on academic probation for the academic session following the one in which the student fails to attain a minimum 2.00 (C) cumulative or semester grade point average. Individual programs may have additional academic and professional standards. A student who fails to meet these program-specific standards may also be placed on probation. Students are informed of program-specific standards upon entering the program. A student will be removed from probation after satisfactorily completing the program's specified requirements. Students are notified in writing of probationary actions by the Dean of the IU School of Medicine or the dean's designee.

Dismissal Upon the recommendation of the faculty in the student's program, a student may be dismissed from the School. Dismissal is based on the failure to meet academic or professional standards. The student will be informed of the dismissal in writing by the Dean of the IU School of Medicine or the dean's designee. A student who has been dismissed from the School may not apply for readmission to the program in which the student was enrolled at the time of dismissal. Under special circumstances, a waiver may be requested by the program and forwarded to the Health Professions Programs' Advisory Committee for action.

Academic Standards A student may be dismissed from the School when, in the judgment of the faculty, the student has ceased to make satisfactory progress toward a degree. When an undergraduate student fails to attain a 2.00 (C) grade point average for two consecutive academic sessions, has a cumulative grade point average below 2.00 (C) for two consecutive semesters, or fails to earn higher than a 1.00 (D) grade point average in any one semester, the student is automatically considered to be making unsatisfactory progress toward a degree and is thereby eligible for dismissal.

In addition, a student who fails to meet program-specific academic requirements is considered to be making unsatisfactory academic progress toward a degree and may be dismissed. At the time of program orientation, each student receives a copy of the program-specific academic requirements.

Professional Standards A student failing to meet the standards of professional and personal conduct may be recommended for dismissal.

Withdrawal and Readmission A student may be readmitted to the School after withdrawal as follows:

Temporary Withdrawal Students in good standing who voluntarily and temporarily withdraw from a program assume temporary inactive status with the School. At the time of departure, it is the student's responsibility to arrange in writing a continuation agreement with the individual program director. The student is allowed to re-enroll as specified in the continuation agreement. The student must meet any specific academic/clinical requirements associated with re-enrollment under the continuation agreement. Students failing to re-enroll as specified in the continuation agreement are subject to dismissal from the School and program.

Other Withdrawal A student who withdraws without arranging in writing for a continuation agreement with the program director, or who fails to enroll in any semester, will not be allowed further enrollments in the School and will be considered as not making satisfactory progress toward a degree. Such students who want to re-enroll must file an application for admission and will be considered new applicants. New prerequisites and standards must be met. These students may be considered for advanced standing in the program provided the completed work meets the current standards of the program.

Last Updated: February 6, 2012

Honors

The following honors recognize superior student performances.

Degrees Awarded with Distinction (*IU policy*) The university recognizes a student's superior performance in course work by awarding the associate or bachelor's degree with one of three levels of distinction: distinction, high distinction, or highest distinction. A student must meet the following criteria to receive a degree awarded with distinction.

1. Baccalaureate and associate degree candidates must rank in the highest 10 percent of their graduating class. The determination of eligibility for graduation with academic distinction will be made by the School so that candidates will be ranked with classmates who received the same type of degrees (e.g., B.S. in Cytotechnology, B.S. in Nuclear Medicine Technology). Programs with students who enter with a different cohort class or within a different cohort track can award honors to each separate group.
2. If the 10 percent determination of any class results in a fractional value, the number will be rounded up (i.e., a graduating class of 11 would have two individuals eligible for distinction).
3. Calculation of the grade point average for graduation with distinction will be based on the total number of credit hours completed at Indiana University. A candidate for a baccalaureate degree must have completed a minimum of 60 credit hours at Indiana University; associate degree candidates must have completed at least half of the credit hours required for their degree at Indiana University.
4. No more than 10 percent of the Indiana University credit hours may be eliminated from the grade point average determination by utilization of the mechanisms of Pass/Fail or special credit.
5. A minimum cumulative grade point average of 3.50 must have been achieved.
6. Three levels of distinction will be recognized and determined as follows: 3.50 through 3.74-Distinction; 3.75 through 3.89-High Distinction; 3.90 through 4.00-Highest Distinction.
7. The determination of candidates who will wear honor cords at the May graduation ceremonies should include all academic credit earned at Indiana University, including the spring semester before commencement.
8. Unique cases and appeals should be forwarded to the Dean of the IU School of Medicine or the dean's designee for consideration.

Dean's List (*School Policy*) Each semester, students who excel academically have the privilege of being listed on the School of Medicine Health Professions Programs Dean's List. To be eligible, students must carry 9 or more credit hours and must earn a semester grade point average of 3.50.

Program Awards Individual professional programs in the School offer awards recognizing academic excellence, leadership, career potential, and service. Students should refer to specific programs for descriptions of these awards.

Last Updated: February 6, 2012

IUPUI Honors

Qualified students at IUPUI may work toward the General Honors Degree, which can be earned at the baccalaureate or associate degree level. Students interested in this program should contact the IUPUI Honors College to determine the requirements.

Students in the School who would like to pursue courses under the IUPUI Honors College should consult with program faculty regarding the availability of such courses within the particular program of interest.

Last Updated: February 6, 2012

Student Rights & Responsibilities

Application to and enrollment in the university constitute the student's commitment to honor and abide by the practices and policies stated in the University's official announcements, bulletins, handbooks, and other published materials and to behave in a manner that is mature and compatible with the University's function as an institution of higher learning. Students are expected to read the Indiana University Code of Student Rights, Responsibilities, and Conduct and, by their enrollment, agree to its contents and to the additional School statements that appear below.

Academic Advising A professional advisor is available to assist students who are working on the prerequisites for a professional program. Once admitted to a professional program, students are advised by faculty within the program. It is the student's responsibility to seek counseling and guidance. The student is responsible for planning a program to meet degree requirements and for filing a completed application by the specific program's application deadline.

Appeals The School abides by the appeals procedures discussed in the Indiana University Code of Student Rights, Responsibilities, and Conduct. Students may obtain a copy of the School's Appeals Policy and Appeals Procedure from the Health Professions Programs Administrative Office in Van Nuys Medical Science.

Attendance Students are responsible for complying with all attendance requirements that may be established by the School's faculty.

Cheating and Plagiarism Faculty and students have rights and responsibilities for learning, teaching, and scholarship within the entire university community. Academic functions are characterized by reasoned discourse, intellectual honesty, mutual respect, and openness to constructive change. Individuals must remain active in avoiding violation of academic ethics.
Cheating Dishonesty of any kind with respect to examinations, course assignments, alteration of records, or illegal possession of examination questions shall be considered cheating.

It is the responsibility of the student not only to abstain from cheating, but also to guard against making it possible for others to cheat. Any student who helps another student to cheat is as guilty of cheating as the student assisted. Students should also do everything possible to induce respect for the examination process and for honesty in the performance of assigned tasks in or out of class.

Plagiarism Honesty requires that any ideas or materials taken from another source for either written or oral use must be fully acknowledged. Offering the work of someone else as one's own is plagiarism. The language or ideas taken from another may range from isolated formulas, sentences, or paragraphs to entire articles copied from books, periodicals, speeches, or the writings of other students. The offering of materials assembled or collected by others in the form of projects or collections without acknowledgment also is considered plagiarism. Any

student who fails to give credit for ideas or materials that are taken from another source is guilty of plagiarism.

Clinical Affiliations Clinical affiliations are required in most programs. The program faculty is responsible for the selection, approval, and assignment of clinical experiences. Although individual student needs and desires will be recognized, the final placement decisions are made by the program faculty. Students are responsible for transportation, fees, and self-support and for following the rules and regulations of the center(s) to which they are assigned. In addition, student conduct must be consistent with the standards of the University and the profession.

Confidentiality of Records Indiana University, in compliance with the General Education Provisions Act, Section 438, titled Family Educational Rights and Privacy Act, provides that all of a student's records are confidential and available only to that student, to his or her parents if the student is under 21, and to the student's dependent as defined by IRS standards. The student may review the record upon request and may ask for deletions or corrections of the record in a hearing process described in detail in the Indiana University Code of Student Rights, Responsibilities, and Conduct. References, recommendations, and other similar documents may carry a voluntary waiver relinquishing the student's right to review this specific material. The student may also release the record to others by signing a written release available in the offices that maintain records. Further details regarding the provisions of the Privacy Act and a list of offices where student records are kept may be found in the Indiana University Code of Student Rights, Responsibilities, and Conduct.

Degree Applications Each year, students preparing to graduate during the following calendar year must file an intent-to-graduate form in the office of the program in which they are enrolled. Program faculty then certify the student's satisfactory completion of degree requirements. If there are changes in the anticipated date of degree completion, students must consult their faculty advisor and file an updated intent-to-graduate form.

Financial Aid A student may seek financial assistance through the financial aid office on the campus of interest. In addition, assistance may be available through professional associations and other external groups and agencies.

The use of the School's grade enhancement policies (Repeated Courses, Fresh Start, and Academic Bankruptcy) is for admissions purposes only and does not alter the student's official University record. The IUPUI Office of Student Financial Aid Services will continue to count these credits hours towards the evaluation of a student's progress towards completion of their degree. This process, called Satisfactory Academic Progress (SAP), is a federally mandated evaluation which includes the following three components:

1. Students are required to maintain an appropriate cumulative GPA of 2.0 for undergraduates and 3.0 for graduates.
2. Successfully complete at least 75% of their attempted coursework.
3. Complete their degree within 150% of the published timeframe (credit hours).

Costs Students are responsible for the following costs:

Fees and Tuition Fees and tuition are established annually by the Trustees of Indiana University.

Books and Supplies Books and supplies are determined by the program.

Uniforms During clinical/fieldwork experiences, students must adhere to the dress code requirements of the program and training site. Students are responsible for providing their own uniforms.

Transportation Students are responsible for travel and lodging costs associated with clinical/fieldwork experiences.

While tuition, fees, and other related expenses change each year, the estimated annual cost (resident rate) associated with matriculating in one of the undergraduate programs in the School of Medicine for the 2011-2012 academic year are available on the school's website.

Non-resident students pay a significantly higher rate. This estimate does not include living costs. Contact the program of interest for a current cost sheet.

Liability Insurance All students participating in required clinical experiences are covered by the University's medical malpractice insurance. When requested, students may be required to purchase and show proof of general liability insurance before being certified to begin the clinical experience.

Health or Immunization Requirements Before beginning the professional program, students are required to demonstrate proof of immunization for tetanus and diphtheria, rubella, rubeola (measles), mumps, varicella (chicken pox), and hepatitis. All students must have a PPD tuberculin skin test within the last three months. Students may be required to complete a physical examination (see program specific requirements). All students must show proof of health insurance before beginning the professional program.

International Students Foreign nationals enrolled in the School are subject to the same rights and responsibilities as all other students. International students should consult the IUPUI Office for International Affairs. A processing fee may be charged to entering students.

Orientation Students are required to attend program-based orientation programs before the beginning of the professional courses. Students are responsible for attending these sessions and for knowing the program-specific policies and standards distributed and discussed at the sessions. Students transferring directly into the professional program from outside the Indiana University system may also opt to attend the campus orientation program.

Professional Conduct Students are responsible for exhibiting conduct appropriate to their professional training and education. Each program distributes standards and policies of appropriate professional conduct at the time of program orientation.

Registration and Record Changes It is the student's responsibility to enroll in each required academic session

and satisfactorily complete all courses required for the degree Faculty are available to provide academic advising.

Students are responsible for communicating any necessary record changes with the Health Professions Programs Administrative Office in Van Nuys Medical Science Building as soon as possible.

Last Updated: March 2, 2012

Credentials/Licensure

Students completing any of the professional programs are qualified to sit for the appropriate licensure and/or credentialing examinations. Contact the program director for further information.

Crabtree, William N. [*C.T.(ASCP), S.C.T. (ASCP)]; Director and Associate Professor of Cytotechnology; B.S., University of Tennessee, 1977; M.S., Indiana University, 1983; Ph.D., Indiana University, 2006*

Cranfill, Kellie S. *[R.T.(R)(BD), ARRT]; Assistant Professor of Clinical Radiologic and Imaging Sciences; A.A.S., Ivy Tech State College, 1995 ; B.S., Indiana University,2000 ;M.S., Midwestern State University, 2005*

DeVore, Angela L. *(R.T.[R] [CT], ARRT); Clinical Assistant Professor of Radiologic and Imaging Sciences; A.S., Indiana University, 1995; B.S., Indiana University, 2001; M.S., Indiana University, 2006*

Echeverria, Valerie E. *[R.T. (R)(M) ARRT, RDMS]; Acting Lecturer of Radiologic and Imaging Sciences; A.S. Indiana University, 2004; B.S, Indiana University, 2005.*

Frain, Barbara McGaughey *[C.T.(ASCP), S.C.T. (ASCP)]; Clinical Assistant Professor of Cytotechnology; B.S., Indiana University, 1986; M.S., Indiana University, 1993*

Kosegi, Judith E. *[C.N.M.T.(NMTCB), R.T.(R), (N) ARRT]; Associate Professor of Radiologic and Imaging Sciences; A.S., Indiana University, 1970; B.S., Indiana University, 1972; M.S., Indiana University, 1978; M.S., Indiana University, 1987*

Leland, Diane S. [M.T.(ASCP), S.M.(ASCP)]*; Professor and Co-Director of Clinical Laboratory Science; B.S., Indiana University, 1970; M.S., University of Vermont, 1977; Ph.D., Indiana University, 1986*

Long, Bruce W. [*R.T.(R)(CV) ARRT, FASRT]; Associate Professor and Director of Radiologic and Imaging Sciences; B.S., Murray State University, 1977; M.S., Eastern Illinois University, 1983*

Markanday, Debra A. *[R.T.(R)(MR) ARRT]; Lecturer of Radiologic and Imaging Sciences; B.S., Indiana University, 2001; M.S., Indiana University, 2006.*

Marler, Linda M. [M.T.(ASCP), S.M.(ASCP)]*; Associate Professor and Co-Director of Clinical Laboratory Science; B.S., Indiana University, 1973; M.S., Indiana University, 1978*

Robinson, Susan *[R.T.(R) ARRT]*; *Associate Professor of Clinical Radiologic and Imaging Sciences; A.S., Indiana University, 1972; B.S., Indiana University, 1973; M.S., Indiana University, 1997*

Rodak, Bernadette F. [M.T.(ASCP), S.H.(ASCP), C.L.Sp.H.(NSA)]*; Associate Professor of Clinical Laboratory Science; B.S., Mount St. Agnes College, 1968; M.S., University of Kentucky, 1980*

Schneider, Judith M. *[R.T.(R) ARRT]*; *Assistant Professor and Program Clinical Coordinator of Clinical Radiation Therapy; A.S., Indiana State University, 1976; B.S., Indiana University, 1981; M.S., Indiana University, 1987*

Wood, Debra M. *[H.T.(ASCP)]; Lecturer and Program Director of Histotechnology; M.S., Indiana University, 2008.*

Adjunct Faculty

Bischoff, Peter, W. (R.R.T.); *Adjunct Lecturer; B.S., Indiana University, 2008.*

Byrne, Patrick J. *[D.A.B.R, D.A.B.S.N.M., C.H.P.]; Adjunct Lecturer of Radiologic and Imaging Sciences; B.S., Purdue University, 1999; M.S., University of Michigan, 2001.*

Dempsey, Traci *[R.T.(R) ARRT]; Adjunct Lecturer of Radiologic and Imaging Sciences; A.S., Indiana University, 1999.*

Herron, Susan *[R.T.(R) ARRT]; Adjunct Lecturer of Radiologic and Imaging Sciences; A.S., Indiana University, 1981.*

Hunt-Dimirsky, Tammy A. (R.R.T., S.D.S., R.P.F.T.); *Adjunct Lecturer; A.S., Indiana University, 1986; B.S., Indiana University, 1990.; M.S., Indiana University, 2008.*

Johnson, Janice C. *(R.R.T., N.P.S.,A.E.-C.); Adjunct Assistant Professor and Clinical Director of Respiratory Therapy; A.S., Indiana University, 1977; B.S., Indiana University, 1980; M.S., Indiana University, 1986*

Jones, Rhonda *[R.T.(R) ARRT]; Adjunct Lecturer of Radiologic and Imaging Sciences; A.S., Ball State University, ; B.S., Ball State University, .*

Mussa, Rebecca L. *[R.T.(R)(BD) ARRT]; Adjunct Lecturer of Radiologic and Imaging Sciences; A.A.S., Ivy Tech State College, 2004.*

Peterson, Dina *[R.T.(R) ARRT, RDMS, RDCS, RVT]; Adjunct Lecturer of Radiologic and Imaging Sciences; Cert., St. Francis School of Radiologic Technology, 1983.*

Price, Sheri *[R.T.(R) ARRT, RDMS, RVT]; Adjunct Lecturer of Radiologic and Imaging Sciences; A.S., Indiana University, 1981; B.S., Indiana University, 1982.*

Ripperger, Brandi *[R.T.(R) ARRT]; Adjunct Lecturer of Radiologic and Imaging Sciences; A.S., Indiana University,2007.*

Van Scoder, Linda I. *(R.R.T., F.A.A.R.C.); Adjunct Associate Professor and Program Director of Respiratory Therapy; B.S., University of Cincinnati, 1975; M.S., Indiana University, 1979; Ed.D., Indiana University, 1985*

Wade, Holly S. *[C.N.M.T(NMTCB)]; Adjunct Lecturer of Radiologic and Imaging Sciences; B.A., Indiana University, 2006; B.S., Indiana University, 2008.*

Weatherman, Kara D. *[BCNP, FAPhA]; Adjunct Lecturer of Radiologic and Imaging Sciences; Pharm.D., Purdue University, 1994*

Wilson, Leslie *[R.T.(R) ARRT]; Adjunct Lecturer of Radiologic and Imaging Sciences; A.S., Ball State University, 1995; B.S., Indiana University, 1982.*

Faculty Credential Abbreviations

- A.E.-C.-Certified Asthma Educator
- B.C.N.P.-Board Certified in Nuclear Pharmacy
- C.H.P.-Certified Health Physicist
- C.N.M.T. (NMTCB)-Certified Nuclear Medicine Technologist
- C.L.S. (NCA)-Clinical Laboratory Scientist
- C.L.Sp.H. (NCA)-Clinical Laboratory Specialist in Hematology
- C.T. (ASCP)-Cytotechnologist
- D.A.B.R-Diplomate, American Board of Radiology
- D.A.B.S.N.M-Diplomate, American Board of Science in Nuclear Medicine
- E.M.T.-P-Emergency Medical Technician–Paramedic
- F.A.A.R.C -Fellow, American Association of Respiratory Care
- F.A.Ph.A.-Fellow, American Pharmacists Association
- F.A.S.R.T.-Fellow, American Society of Radiologic Technologists
- H.T. (ASCP)-Histotechnician
- M.T. (ASCP)-Medical Technologist
- N.P.S.-Neonatal/Pediatric Specialist
- R.D.C.S.-Registered Diagnostic Cardiac Sonographer
- R.D.M.S.-Registered Diagnostic Medical Sonographer
- R.N.-Registered Nurse
- R.P.F.T.-Registered Pulmonary Function Technologist
- R.R.T.-Registered Respiratory Therapist
- R.T. (BD) ARRT-Registered Bone Densitometry
- R.T. (CT) ARRT-Registered Computed Tomography Technologist
- R.T. (CV) ARRT-Registered Cardiovascular Interventional Technologist
- R.T. (M) ARRT-Mammography
- R.T. (MR) ARRT-Registered Magnetic Resonance Imaging Technologist
- R.T. (QM) ARRT-Registered Quality Management Technologist
- R.T. (N) ARRT-Registered Nuclear Medicine Technologist
- R.T. (R) ARRT-Registered Radiographer
- R.T. (T) ARRT-Registered Radiation Therapy Technologist
- R.V.T.-Registered Vascular Technologist
- S.B.B. (ASCP)-Specialist in Blood Banking
- S.C. (ASCP)-Specialist in Chemistry

- S.C.T. (ASCP)-Specialist in Cytotechnology
- S.D.S.- Sleep Disorders Specialist
- S.H. (ASCP)-Specialist in Hematology
- S.I. (ASCP)-Specialist in Immunology
- S.M. (ASCP)-Specialist in Microbiology

Courses

Anatomy and Cell Biology

ANAT-A 550 Gross Human Anatomy 1 (4 cr.) This course examines the gross anatomy of the human. Developmental anatomy and regional anatomy of the back, thorax, abdomen, pelvis and perineum are examined. Cadaver-based dissection labs accompany lecture topics.

ANAT-A 560 Cell Biology and Histology (4 cr.)

ANAT-D 503 Gross Anatomy for Medical Students (9 cr.) Study and dissection of entire body, using regional approach. Frequent conferences and discussions with members of staff. Series of lectures on radiographic anatomy and clinical application of anatomy.

ANAT-D 504 Histology (4 cr.) Lectures and laboratory study of the microscopic structure of cells, tissues, and organs of the human body; correlation of structure and function.

ANAT-D 505 Neuroscience and Clinical Neurology (5 cr.) A multidisciplinary consideration of structural, functional, and clinical features of the human nervous system.

ANAT-D 506 Gross Anatomy (7 cr.) The study of anatomy of the adult human body by lectures and dissection, and utilization of prosections, teaching models, and skeletons. Topics of radiographic anatomy will also be presented. Clinical applications will be emphasized by clinical correlation lectures and laboratory presentations.

ANAT-D 507 Histology and Embryology (6 cr.) This course has two points of emphasis. Foremost is the discipline of histology, which is the study of cells, tissues, and their arrangement into organ systems. Examination of these structures will be at both the level of the light and electron microscope with the relationship between anatomical structure and physiologic function emphasized. In addition, embryological events causing and resulting in the formation of adult structures will be examined.

ANAT-D 523 Gross Anatomy (6 cr.) An intensive study of the human body in relation to medicine using team-based learning, dissections, clinical demonstrations, and participation in autopsies.

ANAT-D 700 Educational Research Practicum (2 cr.)

ANAT-G 901 Advanced Research (6 cr.)

Biochemistry and Molecular Biology

BIOC-B 500 Introductory Biochemistry (3 cr.) Structures of carbohydrates, proteins, lipids, and nucleic acids. Basic principles of enzyme catalysis, protein synthesis, intermediary metabolism and nutrition.

BIOC-B 509 Medical Biochemistry (6 cr.) Introduction to biochemical terminology, methods, and concepts in a framework relevant to the practice of medicine. Principal topics include structures and reactions of the major classes of biological molecules, protein structure and function, enzymology, metabolism of biological molecules, biosynthesis of macromolecules, regulation of cellular activities, and introductory hematology. Demonstrations, case studies, and clinical correlation conferences are presented during laboratory sessions.

BIOC-B 523 Medical Biochemistry (5 cr.) The chemistry and reactions of constituents of living matter, including carbohydrates, lipids, proteins, nucleic acids, vitamins, coenzymes, and minerals; the chemistry and regulations of the reactions and processes of whole organisms; endocrinology; enzymology; nutrition; intermediary metabolism; and biomedical mechanisms in selected disease states.

BIOC-B 800 Medical Biochemistry (3 cr.) Biochemistry for medical students. Structure and function of biological molecules, regulation of cellular processes by nutrients and hormones, biochemical and molecular basis of disease. Designed to develop the knowledge base for Competency III "Using Science to Guide Diagnosis, Management, Therapeutics and Prevention."

BIOC-B 800 Biochemistry (5 cr.) Macromolecules, enzymes, bioenergetics, intermediary metabolism, nutrition, metabolic control systems, and endocrinology. Lectures and problem-based learning.

MCHE-C 580 Medical Biochemistry (3 cr.) The objectives of C580 are mutli-fold: 1) to learn the structures of medically important molecules and their functions in health and disease, 2) to learn basic molecular and cell biology and how these relate to medicine, 3) to fulfill competencies for problem solving and for effective communication.

Cellular and Integrative Physiology

PHSL-F 898 Senior Elective in Physiology (0-24 cr.)

PHSL-P 531 Human Physiology I (3 cr.) Basic principles of general physiology; cardiovascular, digestion, respiration, and renal physiology relevant to humans.

PHSL-G 901 Advanced Research (6 cr.)

Clinical Labratory Science

“P” refers to a course prerequisite, and “C” to a course that must be taken concurrently. * This course is offered intermittently and is not part of the traditional curriculum.

PATH-C 401 General Externship I (2 cr.) P: PATH C406 and PATH C426. Supervised clinical experience in clinical chemistry. Student rotates through various areas of clinical chemistry.

PATH-C 402 General Externship II (2 cr.) P: PATH C404, PATH C407, PATH C410. Supervised clinical experience in clinical hematology. Student rotates through various areas of clinical hematology, coagulation, and urinalysis.

PATH-C 403 General Externship III (2 cr.) P: PATH C409, PATH C411, PATH C420, PATH C421, and C429. Supervised clinical experience in clinical microbiology. Student rotates through various areas of microbiology, serology, virology, mycology, and parasitology.

PATH-C 404 Hemostasis (1 cr.) Hemostasis is a course covering the basic principles of the hemostasis mechanism, including an overview of the laboratory techniques used to evaluate disorders of hemostasis. Emphasizes the major components of hemostasis, interaction of these components, and laboratory evaluation of the major hemostatic disorders.

PATH-C 405 General Externship IV (2 cr.) P: PATH C408 and PATH C428. Supervised clinical experience in blood banking. Student rotates through various areas of modern blood bank, including donor room, transfusion service, antibody identification, component therapy, transplantation therapy, and quality control.

PATH-C 406 Clinical Chemistry (4 cr.) C: PATH C426. Emphasis on metabolic processes that maintain chemical homeostasis in humans, the application of clinical chemistry assay values in evaluating the integrity of these processes, and the correlation of abnormal results with metabolic dysfunction and/or disease states.

PATH-C 407 Hematology (3 cr.) P: PATH C427. Study of functions, maturation, and morphology of blood cells in addition to factors regulating production, metabolism, and kinetics of blood cells. The etiologic and morphologic classifications of blood disorders and diseases; correlations with bone marrows and cytochemistries. Study of cellular contents of other body fluids.

PATH-C 408 Principles of Immunohematology (1 cr.) C: PATH C428. Emphasis on major blood group antigens and antibodies including their role in transfusion medicine. Current practices in blood donation, apheresis, and quality control are also covered.

PATH-C 409 Serology (1 cr.) C: PATH-C 429. Lectures describing and comparing all pertinent serologic procedures utilized in diagnosis of rheumatoid arthritis, rubella, streptococcal disease, syphilis, various febrile conditions, fungal infections, parasite infections, and infectious mononucleosis. Selected lectures in viral culturing methods.

PATH-C 410 Urine Analysis (2 cr.) Routine urine examination and special tests; laboratory and special lectures.

PATH-C 411 Diagnostic Medical Microbiology (4 cr.) P: PATH C421. An in-depth study of the clinically significant microorganisms with special emphasis on their clinical significance, cultural and biochemical characteristics, and susceptibility testing patterns.

PATH-C 412 Topics in Medical Technology (3 cr.) Selected topics in medical technology covered by lecture and clinical experience.

PATH-C 413 Clinical Correlation and Theory (2 cr.) Lectures in theoretical and clinical areas designed to emphasize the relationship between laboratory test results and disease states.

PATH-C 420 Mycology/Parasitology (2 cr.) Lecture and laboratory experience covering clinically significant fungi and parasites. Clinical manifestations, collection and procedures for processing of specimens, and identification techniques will be employed.

PATH-C 421 Diagnostic Microbiology Laboratory (2 cr.) C: PATH C411. Laboratory experience in the performance of skills and procedures needed for the isolation, identification, and susceptibility testing of clinically significant microorganisms.

PATH-C 426 Clinical Chemistry Instrumentation and Methodologies (2 cr.) C: PATH C406. Emphasis is on utilization of basic and intermediate methodologies and instrumentation and their application to assaying a variety of body constituents in a clinical chemistry laboratory.

PATH-C 427 Hematologic Techniques and Procedures (3 cr.) C: PATH C407. Experience in blood cell identification on stained smears; blood& cell, platelet, and reticulocyte counting procedures. Techniques of sedimentation rates, hematocrits, corpuscular indices, hemoglobin determination, and smear preparation staining. Introduction to instrumentation and quality control. Special procedures including bone marrow preparations, flow cytometry, and automated differential counters.

PATH-C 428 Techniques in Immunohematology (1 cr.) C: PATH C408. Emphasis on laboratory techniques used in blood banks, including blood typing, crossmatching, antibody identification, record keeping, and quality control.

PATH-C 429 Serology Laboratory (1 cr.) C: PATH C409. Laboratory experience in performance of various testing procedures utilized in serologic diagnosis of infectious diseases and various syndromes. Techniques include precipitation, flocculation, various hemagglutination and hemagglutination inhibition techniques, fluorescent antibody testing, and complement fixation.

PATH-C 431 Hematology I (2 cr.) Collecting, staining, and counting blood cells; supervised experience with patients. Experience with specimens of spinal fluid, special determinations (platelets, reticulocytes, etc.), and pathologic smears.

PATH-C 432 Hematology II (2 cr.) P: PATH C431. PATH C432 and PATH C434 offer more experience than PATH-C 431 allows in the same techniques and offer additional techniques such as erythrocyte sedimentation rate, hematocrit, and the calculation of indices.

PATH-C 434 Hematology III (2 cr.) P: PATH C431 and PATH C432. Continuation of practice and experience in hematologic techniques. Individual projects assigned if student is sufficiently advanced.

PATH-C 440 Bacteriology I (2 cr.) Diagnostic procedures as means to familiarize students with techniques; work on specimens received from hospital patients under supervision; practical experience with all types of human specimens for bacteriologic and mycologic study.

PATH-C 441 Bacteriology II (2 cr.) P: PATH C440. Agglutination and precipitin techniques and their special application to agglutination titers and the use of antibiotics. Special assignments to provide experience with organisms infrequently encountered.

PATH-C 442 Bacteriology III (2 cr.) P: PATH C440 and PATH C441. At the end of this course, students should be able to handle usual and somewhat unusual hospital bacteriologic and mycologic problems independently.

PATH-C 450 Serology I (2 cr.) Introduction to serologic and immunologic principles.

PATH-C 451 Serology II (2 cr.) P: PATH C450. Additional experience in adapting complement fixation, agglutination, hemagglutination, precipitin, and flocculation techniques to diagnostic procedures. * This course is offered intermittently and is not part of the traditional curriculum.

PATH-C 471 Clinical Chemistry I (2 cr.) Training and experience with more frequently used chemistry tests, e.g., determination of glucose and urea nitrogen by automated and manual methods.

PATH-C 472 Clinical Chemistry II (2 cr.) P: PATH C471. Limited experience with less frequently performed special procedures.

PATH-C 473 Clinical Chemistry III (2 cr.) P: PATH C471 and PATH C472. Special equipment utilization; preparation and maintenance of solutions.

PATH-C 476 Clinical Chemistry IV (2 cr.) P: PATH C471, PATH C472, and PATH C473. Advanced procedures, method development, special projects.

PATH-C 477 Clinical Chemistry V (2 cr.) P: PATH C472, PATH C472, PATH C473, and PATH C476. Training and experience in special technical and methodological microprocedures.

PATH-C 491 Blood Bank I (2 cr.) Review of serologic principles and technical fundamentals of transfusion practice; comprehensive consideration of blood groups and Rh factors, extensive practice with pre-transfusion techniques and safety practices. Other blood types, antigen-antibody relationships with techniques for demonstrating these. Elementary knowledge of genetics is helpful.

PATH-C 492 Blood Bank II (2 cr.) P: PATH C491. Transfusion service bloods provide problem cases in isoimmunization and sensitization, Rh titration, etc. Responsibility for blood bank operation and application to special transfusion problems placed before the student.

PATH-C 493 Blood Bank III (2 cr.) P: PATH C491 and PATH C492. Required for students working toward special certificate in blood banking. Emphasis on supervision, reference techniques, and such accessory functions as plasma production.

Cytotechnology

* This course is offered intermittently and is not part of the traditional curriculum.

PATH-A 412 Gynecologic Cytology, Normal (3 cr.) Detailed microscopic study of normal squamous, endocervical, and endometrial epithelial cells, as well as other non epithelial cells. Cellular changes seen with microbiological infections, repair, inflammation, degeneration, artifact, and vitamin deficiency status.

PATH-A 422 Gynecologic Cytology, Abnormal (3 cr.) Histopathology and cytopathology of lesions of the female genital tract. Detailed studies in the cytologic diagnosis of dysplasia, carcinoma-in-situ, and invasive cancer of this anatomic area. Differential diagnosis of these lesions includes the severity, site of origin, and grade where appropriate.

PATH-A 432 Pulmonary Cytology (3 cr.) Systematic study of normal, nonmalignant, and malignant cells in the lower respiratory system.

PATH-A 442 Cytology of Body Fluids (2 cr.) Cytology of the eye, central nervous system, synovial membranes, and serosal cavities in fluids associated with nonmalignant and malignant disease processes.

PATH-A 453 Cytology of the Gastrointestinal Tract (2 cr.) Study of cells associated with nonmalignant and malignant diseases of the gastrointestinal tract, including the oral cavity, esophagus, stomach, and small and large intestines.

PATH-A 454 Urinary Tract Cytology (2 cr.) Clinical cytologic study of cells from normal, nonmalignant, and malignant diseases of the urinary tract, to include the urethra, ureters, renal pelvis, bladder, prostate, seminal vesicles, and kidney.

PATH-A 455 Cytology of Fine Needle Aspiration (2 cr.) The study of nonmalignant and malignant cells aspirated from lung, thyroid, salivary glands, breast, liver, prostate, lymph nodes, soft tissue masses, and miscellaneous organs; and the study of fine needle aspiration techniques.

PATH-A 462 Techniques in Medical Cytology (2 cr.) Fixation and staining procedures, preparation of monolayers, smears, and cell blocks from fluids and other exfoliates; use of filter techniques and microscopy.

PATH-A 465 I Certification Internship (3 cr.) Includes the fall semester of clinical internships where students gain practical experience by working with routine cytology material.

PATH-A 465 II Certification Internship (3-6 cr.) Includes six months of clinical internships. Students gain further practical experience by working with routine cytology material. Conferences and lectures provide additional experience.

PATH-A 470 Seminar in Cytology (2 cr.) Review of current literature pertaining to diagnostic cytology. Reports and discussions by students and faculty.

PATH-A 490 Investigations in Cytopathology (1-3 cr.) To provide the student with an experience in the realm of scientific investigation related to cytopathology. The investigation may be conducted as a research project or a literature review.

Emergency Medical Services

EMER-E 201 Emergency Medical Technician Basic I (3 cr.) This course focuses on well-being of the EMT, basic patient assessment and airway management, and special considerations for the pediatric and geriatric patient.

EMER-E 202 Emergency Medical Technician Basic II (3 cr.) The content of the course covers specific medical emergencies, trauma, and basic pharmacology.

EMER-E 210 The Paramedic and Pulmonology (3 cr.) This course provides an in-depth study of the anatomical and physiological foundation of respiration and the management of respiratory diseases and disorders. Students will have the opportunity to perform adult and pediatric advanced airway management and ventilation

techniques and practice pharmacologic intervention during simulation.

EMER-E 213 Paramedic as Team Member (6 cr.) Students will have the opportunity to use interview and physical exam techniques in assessing patients across the lifespan in prehospital and hospital environments. Scheduled and supervised clinical rotations include the advanced life support ambulance, the 911 communications center, the emergency department, anesthesia, and the pediatric clinic.

EMER-E 214 Introduction to Paramedic Practice (3 cr.) This course focuses on the roles and responsibilities, health and safety, and medical, legal and ethical issues that affect the paramedic. Other content includes illness and injury prevention. The course also helps students acquire the skills to perform a patient assessment.

EMER-E 215 Essentials/Pharmacology & EKG (6 cr.) Course introduces the principles and procedures necessary for the paramedic to properly administer medication in the prehospital environment. Topics include pharmacokinetics, pharmacodynamics, identification of medication, and drug dosage calculations. Students will have the opportunity to practice medication administration and vascular access techniques. General principles of pathophysiology will also be presented.

EMER-E 220 The Paramedic and Medical Matters (3 cr.) This course provides study of the pathophysiology and prehospital management of various medical emergencies. Topics include neurology, endrocrinology, allergies and anaphylaxis, gastroenterology, urology, hematology, toxicology, environmental agents, infectious and communicable diseases, psychiatry, gynecology, and obstetrics. Students will have the opportunity to practice pharmacologic intervention during simulation.

EMER-E 221 The Paramedic and Trauma (3 cr.) This course focuses on the assessment and management of the trauma victim. Also included are rescue techniques, mass casualty and triage principles, and stress management techniques.

EMER-E 223 Paramedic as Team Player (5 cr.) Students will engage patients across the lifespan in prehospital and hospital environments to assess and manage a variety of pulmonary, cardiovascular and other medical emergencies. Scheduled and supervised clinical rotations include ALS ambulance, emergency department, anesthesia, intensive care unit, cardiac catheterization lab, pediatric clinic, labor and delivery, and special care nursery.

EMER-E 226 The Paramedic and Cardiology (3 cr.) This course introduces electrophysiology and electrocardiology and various cardiovascular emergencies. Topics include ECG interpretation, recognition of cardiac dysrhythmias, management of cardiovascular emergencies. Students will have the opportunity to practice ACLS and PALS skills, including pharmacologic intervention and electric therapy during simulations.

EMER-E 233 Paramedic as Team Leader (5 cr.) Students will have the opportunity to be in charge of various prehospital emergencies while under the supervision of a certified paramedic preceptor on an ALS ambulance. Other clinical rotations include emergency department, intensive care, and burn units. This course emphasizes assessment-based management.

EMER-E 243 Paramedic Professional Progress (5 cr.) Students will continue to have the opportunity to be in charge of various prehospital emergencies while under the supervision of a certified paramedic preceptor on an ALS ambulance. The student will have the opportunity to practice PEPP and PALS skills and prepare for the NREMT-Paramedic examination.

EMER-E 246 Contemporary EMS Issues (3 cr.) This course will introduce local response and resources for abuse and assault, mass casualty incidents, triage, weapons of mass destruction, and crime scence awareness. Other topics reviewed include ambulance operations, rescue, and hazardous materials.

EMER-E 299 Independent Study in Paramedic Science (1-4 cr.) Special topics, projects, or readings for students enrolled in paramedic science.

Graduate School

GRAD-G 505 Responsible Conduct of Research (1 cr.) The purpose of this course is to provide its students with a formal setting to learn about the basic rules and acceptable standards required for anyone conducting scientific research. It will help its students obtain knowledge and develop skills for dealing with potential ethical problems in the research laboratory on their own. This course is designed for all beginning graduate students working in the life sciences or related fields and other researchers who require basic training in the responsible conduct of research.

GRAD-G 510 MD/Ph.D. Special Options Course (0 cr.)

GRAD-G 620 Research Topics: Adolescent Health (3 cr.)

GRAD-G 651 Introduction to Biostatistics I (3 cr.) P: One year undergraduate mathematics is required. Working knowledge on linear algebra and elementary calculus is expected. Students with insufficient mathematics preparation are expected to remedy the deficiency on their own. G651 is an introductory level biostatistics course designed for healthcare professionals. It is the first in the G651 and G652 series on biostatistics methodology. The course covers topics such as data description and presentation techniques, probability and probability distributions, sampling distributions, statistical inferences from small and large samples, analysis of categorical data, analysis of variance, correlation and simple linear regression analysis. Upon completion of the course, students will achieve a basic understanding of the concepts and techniques of data description and statistical inferences. Students will also acquire a working knowledge of SPSS, a commonly used statistical computation program. Students will be able to understand and interpret the statistical analyses in research articles published in medical journals. Students that complete the course with grade B or better will have adequate preparation for G652.

GRAD-G 652 Introduction to Biostatistics II (3 cr.) P: G651 or equivalent to G651. G652 is an advanced applied biostatistics course designed for students with an interest in the health sciences. Students are expected to have completed at least one semester course of basic

biostatistics. Knowledge of probability and probability distributions, concepts of estimation and hypothesis testing are assumed. Topics covered in this course include multiple linear regression, multi-factor analysis of variance, analysis of covariance, analysis of repeated measures, logistic regression model, and survival analyses. Upon completion of the course, students are expected to understand the appropriate statistical models for various outcomes and be able to interpret results using statistical techniques covered in this course. Students are also expected to conduct simple analyses using SPSS on personal computers.

GRAD-G 660 Clinical Research Methods (3 cr.)

GRAD-G 664 Mentored Clinical Research (1-9 cr.) This is an organized research project in the form of an organized scientific contribution or comprehensive analysis conducted under the mentorship of a faculty scientist from the individual CITE enrollee's core discipline. The capstone experience is submission of an abstract to a scientific meeting, defense of one's research before an advisory committee, and completion of a first-authored paper deemed suitable for publication in a scientific journal.

GRAD-G 667 Tools and Tehniques in Translational Research (3 cr.)

GRAD-G 704 Physiological Proteomics (1 cr.) This is a fundamentals-based course on theory and practice of contemporary proteomics techniques. Graduate students will learn to select and apply appropriate proteomic technologies in their research through exposure to protein analytical, quantitative, and informatic approaches to physiologically-relevant biomedical problems.

GRAD-G 707 Physiology of Smooth Muscle (1 cr.) Advanced study of the physiology of the smooth muscle tissues with focus on the normal physiology and pathophysiology of airway smooth muscle and the airways. Biochemical and physiologic mechanisms in the regulation of contraction, growth, and phenotypic expression in smooth muscle tissues will be explored. Focus will be on contemporary molecular and cellular and whole animal approaches for the study of muscle physiology, including tissue transfection and the genetic modification of smooth muscle tissues, organ culture, and methods for the measurement of contractility and contractile protein activation in intact and permeabilized tissues including confocal imaging, and in vivo measurement of airway function.

GRAD-G 708 Cardiac & Coronary Physiology of Exercise (1 cr.) Given the current epidemic and foreseeable continuing trend of obesity and diabetes in the U.S., emphasis will be placed on responses and adaptations of the heart and coronary circulation to exercise in the setting of obesity- and diabetes-induced coronary disease. Concepts of exercise stimulus, quantification of work, and in vivo responses and adaptations will be fundamental to studies of cellular and molecular mechanisms of myocardial and coronary artery responses and adaptations to exercise. The approach taken will be the use of current textbooks, select reviews, original research papers, interactive discussion, and laboratory demonstrations and projects.

GRAD-G 714 Development of the Vascular System (1 cr.) This advanced level course is offered to graduate students who have an interest in vascular biology. Concepts of vascular development will be explored with an emphasis on the experimental techniques used to unravel organ development. The course will provide an in-depth knowledge of the physiology, cell, and molecular biology of the development of the vascular system by means of introductory lectures, assigned reviews of current literature, group discussions, and laboratory demonstrations with an emphasis on the experimental techniques used to examine developmental systems. The course will comprise a mixture of didactic lecture, student reading, and presentation of original research and review articles, group discussions, and laboratory demonstrations. The course will comprise four one-hour sessions per week over a four-week session.

GRAD-G 715 Biomedical Science I (3 cr.) One of three biomedical science courses intended for incoming doctoral graduate students in the School of Medicine or other graduate students. Covers molecular and metabolic aspects of cellular function. The course will explore topics in the biochemical basis of biological systems, including biological macromolecules, protein ligand interactions, cell-signaling, and metabolic processes.

GRAD-G 716 Biomedical Science II (3 cr.) Second of three biomedical science courses intended for incoming doctoral graduate students in the School of Medicine or other graduate students. Topics covered include DNA structure and replication, recombination and repair, genomics and processes of inheritance, gene expression, eukaryotic systems, and molecular genetics and disease.

GRAD-G 717 Biomedical Science III (3 cr.) Third of a group of three biomedical science core courses intended for incoming doctoral graduate students in the School of Medicine or other graduate students. Organization and function of cells, tissues and physiologic systems using disease examples. Topics include neurophysiology, musculoskeletal, renal, cardiovascular, gastrointestinal, endocrine and pulmonary systems, and cancer.

GRAD-G 718 Research in Biomedical Science (1-4 cr.) A laboratory research rotation course. Allows incoming basic science doctoral graduate students in the School of Medicine programs to take research rotations in laboratories affiliated with all of the school graduate programs.

GRAD-G 761 Molecular and Cellular Physiology of Ion Transport (1 cr.) Advanced ion transport topics are selected by students from current areas of research on ion channels, pumps, and exchangers. Specific topics include transporter biophysical characteristics, long-term regulation, effects on cell and organ function, electrophysiological and optical methods for study. Format: textbooks, reviews, original research papers, interactive discussion, computer simulations, and laboratory demonstrations and projects.

GRAD-G 804 Cellular and Molecular Biology (3 cr.) Cellular and molecular biology for medical students that emphasizes the structural organization, biochemistry, and molecular biology of cells. Includes cellular processes, development, and differentiation and their relationship to medicine.

GRAD-G 819 Basic Bone Biology (3 cr.) P: One semester of introductory biology. An introduction to basic bone biology, including bone morphology, composition and physiology; cell biology of bone cells; measurement techniques; adaptation to the mechanical and metabolic environments; regulatory factors and mineral homeostasis; and growth and development.

GRAD-G 825 Advanced Topics in Molecular Biology (2 cr.) The course will highlight selected topics adjusted each year to reflect the most current advancements in molecular biology and will include lectures and paper discussions on: chromatin structure and regulation; transcriptional control; RNA structure and processing; RNAi and miRNA; RNA decay; translational control and its integration in gene expression.

GRAD-G 831 Concepts & Controversies in Cardiovascular Science (2 cr.) P: Graduate level physiology course. The focus of this course is topical areas of advanced cardiovascular research, emphasizing modern approaches to study cardiovascular function. Topics will change each semester but may include: regulation of vascular tone, cardiovascular development, control of cardiac function, myopathies, atherosclerosis, and blood pressure. Format: Journal Club/Seminar and facilitated interactive student discussion.

GRAD-G 855 Experimental Design and Research Biostatistics (1 cr.) This course will provide students with a functional understanding of experimental design and statistical testing in the biological sciences. Students will learn why a thoughtful approach to the design of their experiments and a rigorous, unbiased testing of their results are both important to their work and future careers. Students will receive an introduction to basic statistical theory with a practical focus on interpreting printouts from a variety of statistical programs(rather than a focus on students carrying out their own calculations). Practical examples of experimental design and statistical testing-both good examples and bad-will be worked through for a variety of real situations in biomedical research.

Histotechnology

"P" refers to a course prerequisite, and "C" to a course that must be taken concurrently.

PATH-H 101 Histotechnology I (3 cr.) C: PATH H181. Teleconference lectures and related written supplemental assignments with focus on specimen receipt and accessioning, laboratory safety, laboratory chemistry and math, instrumentation, and fixation.

PATH-H 102 Histotechnology II (3 cr.) P: PATH H101; C: PATH H182. Teleconference lectures and related written supplemental assignments with focus on decalcification, tissue processing and embedding, microtomy, general staining theories, and nuclear and cytoplasmic staining.

PATH-H 103 Histotechnology III (3 cr.) P: PATH H102; C: PATH H183. Teleconference lectures and related written supplemental assignments with focus on special staining methodology to include connective tissue, carbohydrates, amyloid, lipids, microorganisms, pigments, and minerals.

PATH-H 104 Histotechnology IV (3 cr.) P: PATH H103; C: PATH H184. Teleconference lectures and related written supplemental assignments with focus on special staining methodology to include nerve and special cells, enzyme and immunohistochemical staining, with an overview of selected topics.

PATH-H 105 Histotechnology Credential Theory (12 cr.) Special credit awarded for ASCP registry status or for histology experience and accomplishment of partial registry exam. Contact program director for further information.

PATH-H 181 Histotechnology Practicum I (3 cr.) C: PATH H101. Clinical practicum experience in topics covered in PATH H101, performed under direct supervision of designated registered histologist.

PATH-H 182 Histotechnology Practicum II (3 cr.) P: PATH H101, PATH H181; C: PATH H102. Clinical practicum experience in topics covered in PATH H102, performed under direct supervision of designated registered histologist.

PATH-H 183 Histotechnology Practicum III (3 cr.) P: PATH H102, PATH H182; C: PATH H103. Clinical practicum experience in topics covered in PATH H103, performed under direct supervision of designated registered histologist.

PATH-H 184 Histotechnology Practicum IV (3 cr.) P: PATH H103, PATH H183; C: PATH H104. Clinical practicum experience in topics covered in PATH-H104, performed under direct supervision of designated registered histologist.

PATH-H 185 Histotechnology Credential Practicum (12 cr.) Special credit awarded for ASCP registry status or for histology experience and accomplishment of partial registry exam. Contact program director for further information.

PATH-H 201 Comprehensive Experience in Histotechnology (6 cr.) (Capstone course) P: Completion of 50 credit hours toward Associate of Science in Histotechnology, to include a technical writing course. This course emphasizes critical thinking, problem-solving skills, and literature searches associated with technical and scholarly writing. Introduces students to management issues, supervision, quality assurance principles, and other issues associated with histotechnology laboratory employment.

Medical Biophysics and Biomolecular Imaging

BIOP-A 610 Research in Biophysics (1-15 cr.)

BIOP-A 612 Special Problems in Biophysics (1-15 cr.)

Other Courses

MGEN-G 788 Next Generation Sequencing (3 cr.)

MGEN-Q 603 Medical Genetics (2 cr.) A comprehensive course in human genetics emphasizing the principles of genetics and their application to clinical medicine through the family history, clinical findings, and laboratory studies. Examples of specific problems, their evaluation, and genetic counseling will be used to supplement didactic material. Designed to develop proficiency for Competency III "Using Science to Guide Diagnosis, Management, Therapeutics, and Prevention," Competency VIII "Problem Solving," Level 1.

MGEN-Q 640 Special Topics in Human Genetics (1-3 cr.) P: Basic genetics. A continuing, nonrepeating series of lectures and/or review of publications on newer advances in human genetics; discussions in specific areas of human genetics not presently available to all students. Additional credits may be obtained by study of a specific area under individual tutelage.

MGEN-Q 682 Medical Genetics - FWCME (2 cr.) This lecture course covers probability, population genetics, inheritance, metabolic diseases, hemoglobinopathies, genetic diagnosis, and counseling.

Medical Imaging Technology

"P" refers to a course prerequisite and "C" to a course that must be taken concurrently.

RADI-R 404 Sectional Imaging Anatomy (3 cr.) An in-depth study of sectional anatomy pertinent to ultrasound, computed tomography, and magnetic resonance imaging. Standard transverse, parasaggital, and coronal planes are included, using images from all three imaging modalities. A discussion of technique, artifact, and pathology-related alterations of cross-sectional anatomic appearances is included.

RADI-R 407 Seminar (1-5 cr.) Individual and group study focusing upon advances in medical imaging.

RADI-R 408 Topics (.5-4 cr.) Study of selected topics in radiologic sciences. May be repeated for credit if topics differ.

RADI-R 451 Medical Imaging Theory (3 cr.) P: Math, Physics, RADI R404. Lectures on the physical principles of advanced imaging modalities, including computed tomography, magnetic resonance, ultrasound, and interventional imaging. Image evaluation of normal studies is stressed. Student presentations and journal reports are required.

RADI-R 452 Medical Imaging Applications (3 cr.) P: RADI R451. Lectures on and evaluations of the computed tomographic, magnetic resonance, ultrasound, and interventional images as applied to pathologic conditions of specific body areas. Student presentations and journal reports are required.

RADI-R 481 Clinical Practicum: Interventional Imaging (.5-8 cr.) P: RADI R404, RT(R). Clinical experience in the performance of interventional imaging studies.

RADI-R 482 Clinical Practicum: Computed Tomography (.5-8 cr.) P: RADI R404, RT(R). Clinical experience in the performance of computed tomographic imaging studies.

RADI-R 483 Clinical Practicum: Magnetic Resonance Imaging (.5-8 cr.) P: RADI R404. Clinical experience in the performance of magnetic resonance imaging studies.

RADI-R 484 Clinical Practicum: Ultrasound Imaging (.5-8 cr.) P: RADI R404. Clinical experience in the performance of ultrasound imaging studies.

RADI-R 485 Clinical Practicum (.5-8 cr.) P: RADI R404. Clinical experience in medical imaging studies. Specific area of experience will be determined by availability of instruction.

Medical Sciences

MSCI-X 503 Problem-Based Learning in Medical Science (2 cr.) A small group, problem-based learning course designed to emphasize active, self-directed learning and application of basic biomedical science to clinical problems - Fall and Spring class.

MSCI-X 804 Cellular and Molecular Biology (3 cr.) Cellular and molecular biology that emphasizes the structural organization, biochemistry and molecular biology of cells. Includes cellular processes, development, and differentiation and their relationship to medicine.

Medicine

MED-M 505 Human Genetics and Development (2 cr.) An introduction to the genetics of human traits and inheritable diseases; normal and abnormal development of the human from embryonic life through early childhood. Open to medical students only.

MED-M 605 Introduction to Medicine 1 (10 cr.) A multidepartmental course designed to introduce clinical medicine. Includes medical history-taking and physical examination skills learned at the bedside with direct patient contact. Clinical medicine is surveyed concurrently with the emphasis on pathophysiology and diagnosis. Problem-solving skills are stressed, including synthesis and interpretation of medical data.

MED-P 610 Molecular Basis of Medicine (6 cr.) This step deals with the basic principles of biochemistry and molecular biology as they apply to medicine. Specifically, in this step, the student will gain a working knowledge of amino acids, proteins, enzymes, thermodynamics, digestion, and metabolism of carbohydrates, lipid, protein, and amino acids (both catabolic and anabolic pathways), metabolic control, lipoprotein metabolism and lipid transport, nitrogen waste disposal, heme metabolism, purine and pyrimidine metabolism, structure of nucleic acids, replication of DNA, synthesis of RNA and protein, genetic code and genetic control in eukaryotes, recombinant DNA technology, the biochemistry of vision, muscle and nerve metabolism, integration of metabolism, vitamins and nutrition, and hormone action. Offered by the Northwest Center only.

MED-P 620 Human Structure (12 cr.) Human Structure is an intensive integrated step combining cell biology, histology, gross anatomy, embryology, and radiology that is designed to acquaint the medical student with the structures of the human body from gross to subcellular. A combination of small-group, case-based sessions, supervised laboratory periods, and selected general lectures are used to instruct the students in this step. The clinical cases are designed to stimulate student-directed learning and problem solving with materials gathered from pathology, surgery, and radiology. The laboratories will offer experience in viewing normal structures from gross dissections to electron micrographs. The emphasis of the step is on gathering a general understanding of the correlations of structure with function and on the views of the body possible with the various macroscopic and microscopic imaging techniques. Offered by the Northwest Center only.

MED-P 650 Invasion and Defense (11 cr.) This interdisciplinary course deals with the nature of infectious agents and tumors and the host response to invasion and

injury. Students learn the concepts of general pathology, immunology, microbiology, infectious diseases, and elements of pharmacology through discussion and problem solving of clinical cases and independent study. Offered by the Northwest Center only.

Medicine Registration

MEDC-M 700 Junior Year in Medicine (18 cr.)

MEDC-M 800 Senior Year in Medicine (16 cr.)

Nuclear Medicine Technology

The RADI courses with R100- or R200-level numbers are found in the radiography section of this bulletin. “P” refers to a course prerequisite, and “C” to a course that must be taken concurrently.

RADI-R 404 Sectional Imaging Anatomy (3 cr.) An in-depth study of sectional anatomy pertinent to ultrasound, computed tomography, and magnetic resonance imaging. Standard traverse, parasaggital, and coronal planes are included, using images from all three imaging modalities. A discussion of technique, artifact, and pathology-related alterations of cross-sectional anatomic appearances included.

RADI-R 407 Seminar (1-5 cr.) Selected topics.

RADI-R 408 Topics in Radiologic Sciences (.5-4 cr.) Study of selected topics in radiologic sciences. May be repeated once for credit if topics differ.

RADI-R 410 Project in Nuclear Medicine Technology I (1-5 cr.) Basic knowledge required to become a critical consumer of medical literature, data handling and interpretation, plus application of basic medical research statistics

RADI-R 411 Project in Nuclear Medicine Technology II (2 cr.) Independent readings, research, and written assignments in preparation for a research or literature search project in nuclear medicine.

RADI-R 412 Physics and Instrumentation of Nuclear Medicine I (2 cr.) An introduction to the physical disciplines of nuclear medicine. Lectures and laboratory exercises on radiation physics, computer programming, and the statistics of radiation measurements.

RADI-R 413 Project in Nuclear Medicine Technology III (2 cr.) Independent readings and research on a selected topic in nuclear medicine. A paper in published form must be written and presented at a research meeting.

RADI-R 417 Physics and Instrumentation of Nuclear Medicine II (2 cr.) A continuation of RADI-R 412. Lectures and exercises on electronic principles, the operational fundamentals of radiation counting devices and imaging systems, and quality assurance programs.

RADI-R 422 Radionuclide Measurements (2 cr.) Lectures and laboratory sessions emphasizing the clinical utilization of nuclear counting and imaging systems and principles of quantitative measurements.

RADI-R 423 Nuclear Medicine In-Service I (1 cr.) Attend and participate in presentations of selected topics in nuclear medicine and related areas.

RADI-R 424 Nuclear Medicine In-Service II (1 cr.) Attend and participate in presentations of selected topics in nuclear medicine and related areas.

RADI-R 424 Nuclear Medicine In-Service III (1 cr.) Attend and participate in presentations of selected topics in nuclear medicine and related areas.

RADI-R 427 Radiopharmaceuticals (2 cr.) Lectures and laboratories concerning properties and preparation of radiopharmaceuticals.

RADI-R 432 Application of Radionuclides I (3 cr.) Lectures covering the clinical aspects of nuclear medicine procedures, including the physiological and technical procedures for each type of study.

RADI-R 433 Application of Radionuclides II (2 cr.) P: RADI R432. Lectures covering the clinical aspects of nuclear medicine procedures. Includes pathology related to procedures and the role technologists play in helping physicians gather information for accurate interpretations.

RADI-R 437 Radiation Protection in Nuclear Medicine (1 cr.) Lectures on the principles of radiation protection in nuclear medicine.

RADI-R 438 Essential Radiology I (1 cr.) Selected topics in radiology to acquaint the nuclear emdicine technology student with a broader understanding of other areas of radiology as well as a more in-depth knowledge about nuclear medicine image/data interpretation and the interconnection of nuclear medicine with other radiology procedures.

RADI-R 439 Essential Radiology II (2 cr.) Selected topics in radiology to acquaint the nuclear emdicine technology student with a broader understanding of other areas of radiology as well as a more in-depth knowledge about nuclear medicine image/data interpretation and the interconnection of nuclear medicine with other radiology procedures.

RADI-R 445 Clinical Nuclear Medicine Practicum I (4-8 cr.) Practical clinical application of nuclear medicine theory.

RADI-R 446 Clinical Nuclear Medicine Practicum II (2-8 cr.) Continuation of RADI R445.

RADI-R 447 Clinical Nuclear Medicine Practicum III (2-8 cr.) Continuation of RADI R446.

RADI-R 449 Medical Imaging Theory for Nuclear Medicine Technologists (1-2 cr.) Lectures on the physical principles of advanced imaging modalities, especially those related to the practice of nuclear medicine.

Other Courses

MICR-G 901 Advanced Research (6 cr.)

MNEU-G 901 Advanced Research (6 cr.)

MED-I 200 Service Learning in the Medical Setting for Pre-Professional Students (0 cr.) This undergraduate course is associated with the Life-Health Sciences Internship program. This is a zero credit hour course offered once a year in the spring semester of the internship. Only LHSI students may register for MED-I200. Successful completion of the course is dependent on completion of at least 240 work hours over the course of

the internship period and the presentation of a poster at the end of year poster session.

MICR-J 210 Microbiology & Immunology (4 cr.) C: Lab

SMEP-M 500 State Medical Program - Municie (8-12 cr.)

MBIO-M 540 Medical Microbiology/Medical Immunolgy (5 cr.)

MED-S 400 Service Learning in the Medical Setting for Pre-Professional Students (3 cr.) This course introduces pre-medical students to the medical setting and engages them in serving the medically underserved communities. By incorporating students in providing underserved health care prior to medical school, we hope to stimulate a lasting appreciation for care of the underserved. The course will provide the opportunity for students to work closely with Affiliate Faculty members of the Indiana University School of Medicine. Having students in the Community Health Centers will facilitate relationships between the student, the community, and the institutions (hospitals and institutions of higher learning). In addition to the much sought after exposure to practicing physicians, students will also gain leadership and communication skills. By utilizing these skills in a real life situation, full assimilation of the skills will be possible.

SMEP-S 500 State Medical Program - South Bend (20-0 cr.)

Pathology and Laboratory Medicine

PATH-C 601 General Pathology (5 cr.)

PATH-C 603 General Pathology (6 cr.) Introduction to mechanisms of disease through demonstrations, lectures, laboratory, and conferences; emphasis on basic concepts and principles of disease processes.

PATH-C 623 General Pathology (7 cr.) An introduction to mechanisms of disease through demonstrations, lectures, laboratory, and conferences; emphasis on basic concepts and principles of disease processes.

PATH-C 643 General Pathology (4 cr.) Introduction to mechanisms of disease through demonstration, lectures, laboratory, and conferences; emphasis on basic concepts and principles of disease processes.

PATH-C 663 General Pathology (6 cr.) Introduction to mechanisms of disease through demonstrations, lectures, laboratory, and conferences; emphasis on basic concepts and principles of disease processes.

PATH-C 683 General Pathology (6 cr.) Students will be introduced to pathologic terminology and disease processes by lectures, laboratory exercises, case studies, autopsies, and medicine/pathology conferences.

PATH-C 800 Advanced Pathology (1-12 cr.) P: C603 Subject material and hours arranged to conform to needs of students.

PATH-C 859 Research in Pathology (1-12 cr.) Supervised initiation of a research project in pathology. Counseling in the completion of a thesis.

PATH-C 901 Advanced Research (6 cr.)

Other Courses

PHAR-F 605 Principles of Pharmacology I (4 cr.) P: P531-P532 or consent of instructor. Basic principles and clinical aspects of modern pharmacology presented in lectures. Physicochemical properties of drugs. Drugs that affect the autonomic nervous system. Drugs that act on cardiovascular and renal systems. Chemotherapy of cancer, infections, and parasites.

PHAR-F 624 Medical Pharmacology (6 cr.) In this course, the drugs are classified as to site and mechanism of action and representative members of each class of drugs are discussed. The emphasis is on rational clinical uses.

PHAR-F 664 Pharmacology (6 cr.) Comprehensive lectures, discussions, reviews, and laboratories with emphasis on the principles of drug action. Representative members of the most important groups of drugs are discussed in detail with regard to sites and mechanisms of action, and ‘‘dry’’ laboratories are designed to involve the student in various types of pharmacological problem-solving skills.

PHAR-F 684 Pharmacology - FWCME (6 cr.) Pathology of the organ systems will be presented by lectures, laboratory exercises, case studies, and pathology/ medicine conferences. Etiologies, morphologic, physiologic changes will be noted; course coverage will be correlated with the Introduction to Clinical Medicine course as much as possible.

PHAR-F 840 Advanced Pharmacology and Toxicology (3 cr.) Advanced studies of pharmacodynamic mechanisms in cardiovascular, central nervous system, and renal pharmacology and toxicology. Experimental design related to recent advances and current hypotheses concerning drug action and toxicity.

PHAR-G 901 Advanced Research (6 cr.)

Radiation Therapy

“P” refers to a course prerequisite and “C” to a course that must be taken concurrently.

RAON-J 300 Simulation/Treatment Procedures (6 cr.) P: RADI R110, RADI R112, and RADI R108. Lecture and laboratory sessions emphasizing the clinical utilization of simulators and treatment machines.

RAON-J 301 Orientation to Radiation Oncology (4 cr.) P: R.T.(R). An overview of radiation oncology and the role of the radiation therapist. Presentations will orient students to the physical and biological basis of radiation oncology equipment, procedures, tumor pathology, and patient interaction.

RAON-J 302 Radiation Oncology Techniques I (3 cr.) P: R.T.(R) or RADI R118, RAON J300, and RAON J350. Lecture and laboratory sessions presenting concepts of treatment-planning techniques of the head, pelvis, spine, lung, and brain. To include implant localization techniques.

RAON-J 303 Clinical Oncology I (3 cr.) P: R. T.(R) or RADI R118, and RAON J300. Examines the roles and principles of tumor pathology, surgical oncology, radiation oncology, and medical oncology. To include the characteristics, growth patterns, and treatment modalities utilized for tumors of the lung and central nervous system.

RAON-J 304 Radiation Oncology Patient Care (2 cr.) P: R.T.(R) or RADI R112. Concepts of radiation oncology patient care, including considerations of patients' physical and psychological condition. Factors influencing patients' general health during and following a course of radiation therapy treatments will be identified.

RAON-J 305 Clinical Dosimetry I (2 cr.) Review of fundamental mathematics concepts as they relate to practical dosimetry and performing routine calculations pertaining to patient set-up and treatment.

RAON-J 306 Clinical Dosimetry II (2 cr.) P: RAON J305. Development of computer treatment planning skills in radiation oncology.

RAON-J 307 Medical Imaging and Processing in Radiation Oncology (2 cr.) Fundamentals of radiologic exposure techniques, latent image formation, and processing of radiographs utilized in radiation oncology.

RAON-J 350 Clinical Experience: Basic (3 cr.) P: RADI R110 and RADI R112. Clinical observation and assistance in the clinical skills of radiation therapy technology under the direct supervision of a registered radiation therapist or equivalent.

RAON-J 351 Clinical Practicum I (3 cr.) P: R.T.(R) or RAON J350. Clinical application of patient positioning immobilization, block fabrication, patient simulation techniques, treatment delivery, dosimetry, treatment planning, patient care management, and radiation protection under the direct supervision of a registered radiation therapist or equivalent.

RAON-J 400 Physics of Radiation Oncology I (2 cr.) P: R.T.(R) or RADI R241; MATH 153 and 154 or MATH 159; PHYS P201 or PHYS 218. Fundamental principles of the physical quantities of radiation and atomic and nuclear theory. To include discussions of radiation oncology equipment.

RAON-J 401 Physics of Radiation Oncology II (2 cr.) P: RAON J400. Continuation of RAON J400 with emphasis on the interactions of ionizing radiation with matter, radiation detection and measurement devices, radiation units, equipment calibration, brachytherapy, and calculation techniques. Principles and concepts of radiation protection are discussed.

RAON-J 402 Radiation Oncology Techniques II (3 cr.) P: RAON J302. Lecture and laboratory sessions present concepts of treatment-planning techniques of breast, esophagus, mantel and inverted-Y, pituitary, total body and hemi-body, and common palliative portals.

RAON-J 403 Clinical Oncology II (3 cr.) P: R.T.(R) and RAON J303 or RADI R108, RADI R110, RADI R112, RADI R118, RAON J300, and RAON J303. Examines the characteristics, growth patterns, and treatment modalities utilized for tumors of the female genital, urological, male genital, breast, head and neck, bone and soft tissue, hematopoietic, alimentary tract, lumphorecticular, and pediatric sites. Student case presentations required.

RAON-J 404 Quality Management in Radiation Oncology (3 cr.) P: RAON J300 or RAON J301, RAON J305, and RAON J350. Identification and application of a comprehensive quality- management program in a radiation oncology facility. Includes discussion on the operations and functions of a radiation oncology facility with emphasis on quality improvement techniques.

RAON-J 406 Radiation and Cancer Biology (2 cr.) Emphasis on the modern principles of cellular and molecular biology as they relate to normal and cancer cell response both in vitro and in vivo to various radiation types, e.g., X/gamma rays, neutrons, and charged particles. Topics include dose time, fractionation, repair, tumor kinetics, hyperthermia, and radiation protection.

RAON-J 409 Senior Project in Radiation Oncology (3 cr.) Individual research in radiation oncology. Research proposal requires the approval of the program director.

RAON-J 450 Clinical Practicum II (4 cr.) P: RAON J351. Clinical application of patient positioning immobilization, block fabrication, patient simulation techniques, treatment delivery, treatment planning, patient care management, and radiation protection under the direct supervision of a registered radiation therapist.

RAON-J 451 Clinical Practicum III (6 cr.) P: RAON J450. Clinical application of patient positioning immobilization, block fabrication, patient simulation techniques, treatment delivery, dosimetry, treatment planning, patient care management, and radiation protection under the direct supervision of a registered radiation therapist.

RAON-J 452 Clinical Practicum IV (5 cr.) P: RAON J451. Clinical application of patient positioning immobilization, block fabrication, patient simulation techniques, treatment delivery, patient care management, and radiation protection under the direct supervision of a registered radiation therapist.

RAON-J 453 Clinical Practicum V (5 cr.) P: RAON J452. Clinical application of patient positioning immobilization, block fabrication, patient simulation techniques, treatment delivery, dosimetry, treatment planning, patient care management, and radiation protection under the direct supervision of a registered radiation therapist.

Radiaton Oncology

RAON-D 602 Concepts for Preparation and Planning in Medical Dosimetry II (1 cr.)

RAON-D 603 Clinical Oncology and Dosimetric Considerations (1 cr.)

RAON-D 605 Medical Physics for Radiation Oncology II (2 cr.)

RAON-D 607 Clinical Practicum II – Intermediate Planning in Medical Dosimetry (4 cr.)

RAON-D 691 Clinical Rotation in Radiation Therapy Physics I (6 cr.)

RAON-D 692 Clinical Rotation in Radiation Therapy Physics II (6 cr.)

Radiography

"P" refers to a course prerequisite and "C" to a course that is taken concurrently.

RADI-R 108 Medical Terminology (1 cr.) Introduction to origin and derivation of medical words as well as their meaning. This course uses a self-instructional format.

RADI-R 110 Introduction to Radiography (3 cr.) Introduction to the functions and basic procedures of

a diagnostic radiography department. Emphasis is placed on radiographic equipment, radiation protection, positioning terminology and procedures used on typical radiographic examinations. Includes laboratory and clinical observations.

RADI-R 112 Patient Care I (3 cr.) Introduction to health care practices in the radiology department. Provides an overview of the field of radiology, ethics, patient care, and professional standards. Includes lab.

RADI-R 114 Radiographic Procedures I (4 cr.) P: RADI R110 and RADI R112. Concepts in radiography with emphasis on the radiographic procedures used to demonstrate the skeletal system and major contrast media procedures. Includes image study.

RADI-R 115 Radiographic Procedures I Lab (1 cr.) C or P: RADI R114. Practice and instruction in methods of performing radiographic examinations presented in R114.

RADI-R 118 Principles of Radiography I (4 cr.) P: MATH 110 or 111 and RADI R110. Basic concepts of radiation, its production, and its interactions with matter. Introduction to imaging production including digital radiography.

RADI-R 124 Radiographic Procedures II (3 cr.) P: RADI R114. Concepts in radiography with emphasis on radiographic procedures used for the skull, advanced orthopedics, vascular and sectional anatomy, fluoroscopy, and contrast media.

RADI-R 128 Principles of Radiography II (4 cr.) P: RADI R118. In-depth study of the properties that effect the quality of the radiographic image and exposure conversion.

RADI-R 150 Radiography Clinical Lab I (1 cr.) C: RADI R151 or RADI R152. Supervised laboratory activities to promote understanding of physical and imaging principles needed to facilitate learning in the Basic Clinical Experience courses.

RADI-R 151 Basic Clinical Experience I (3 cr.) C: RADI R150. Clinical application of radiographic positioning, procedure, and exposure on cooperative, uncomplicated patients, while under the supervision of a registered radiologic technologist.

RADI-R 152 Basic Clinical Experience I (2 cr.) C: RADI R151 and RADI R153. Clinical application of radiographic positioning, procedure, and exposure on cooperative, uncomplicated patients, while under the supervision of a registered radiologic technologist.

RADI-R 153 Pediatric Clinical Experience I (3 cr.) C: RADI R152 or RADI R172. Clinical application of radiographic positioning, procedure, and exposure on cooperative, uncomplicated patients in a pediatric practice environment, while under the supervision of a registered radiologic technologist.

RADI-R 155 Clinical Re-entry 1 (1 cr.) Clinical application of radiographic positioning, procedure, and exposure emphasizing refamiliarization with skills and knowledge needed to continue the clinical experience courses, while under the supervision of a registered radiologic technologist.

RADI-R 170 Radiography Clinical Lab II (1 cr.) P: RADI R108 and RADI R150, C: RADI R171 or RADI R172. Supervised laboratory activities to promote understanding of physical and imaging principles needed to facilitate learning in the Basic Clinical Experience and Clinical Competency Experience courses.

RADI-R 171 Basic Clinical Experience II (3 cr.) C: RADI R170. Clinical application of radiographic positioning, procedure, and exposure on cooperative, uncomplicated patients, while under the supervision of a registered radiologic technologist.

RADI-R 172 Basic Clinical Experience II (1 cr.) C: RADI R153 and RADI R170. Clinical application of radiographic positioning, procedure, and exposure on cooperative, uncomplicated patients, while under the supervision of a registered radiologic technologist.

RADI-R 210 Radiographic Pathology (2 cr.) P: anatomy/physiology, RADI R114 and RADI R124. A survey of the changes that occur in the diseased state to include general concepts of disease, causes of disease, clinical symptoms and treatment, and diseases that affect specific body systems. Emphasis is placed on the imaging appearance of disease.

RADI-R 212 Patient Care II (1 cr.) P: RADI R112. Overview of extended patient care procedures including venipuncture, pharmacology, electrocardiography, and code-response procedures.

RADI-R 214 Radiographic Procedures III (3 cr.) P: RADI R124. An introductory course designed to familiarize the student with terminology, equipment, procedures and principles of various modalities in radiologic sciences. Included are magnetic resonance imaging (MRI), computed tomography (CT), ultrasound (US), mammography, nuclear medicine, radiation therapy, bone densitometry and interventional radiology (IR).

RADI-R 216 Advanced Non-Contrast Imaging (2 cr.) P: RADI R124. Presentations, problem solving, and discussion on methods of performing radiographic procedures on patients with trauma or disease conditions that necessitate adaptation of routine procedures. Topics will include chest, surgical procedures, bone fractures, and arthritides.

RADI-R 218 Processing Theory (1 cr.) Concepts in radiography with emphasis on the fundamentals of wet and dry processing.

RADI-R 224 Advanced Contrast Imaging (1 cr.) P: RADI R124. Selected topics in radiographic imaging using contrast media, with emphasis on knowledge needed for effective clinical practice.

RADI-R 226 Imaging a Diverse Population (2 cr.) P: RADI R124. The study of biophysical and psychosocial changes throughout the lifespan emphasizing imaging adaptations. Topics will cover age-specific considerations as well as those needed for the growing ethnically and culturally diverse groups that present themselves for imaging studies.

RADI-R 228 Principles of Radiography III (3 cr.) P: RADI R128. Topics include methods of producing radiographic technical factor charts, automatic exposure

controls, rare earth screen technology, digital imaging, and a cumulative examination over the principles courses.

RADI-R 236 Seminar in Radiography (.5-3 cr.) Individual and group study focusing on current and emerging imaging topics. May be repeated for credit if topics differ.

RADI-R 238 Topics in Radiography (.5-3 cr.) Selected topics in imaging. May be repeated for credit if topics differ. Prerequisites may be required for topic.

RADI-R 241 Radiographic/Fluoroscopic Equipment (2 cr.) P: RADI R140 or PHYS P201 or PHYS 218. A detailed study of equipment used to generate an x-ray beam.

RADI-R 243 Quality Control in Radiography (2 cr.) P: RADI R241. A laboratory course emphasizing methods of assuring the adequate function of radiographic equipment. Major topics include: anode heel effect, inverse square law, film sensitometry, radiation intensity, and quality control testing.

RADI-R 262 Radiation Biology and Protection in Diagnostic Radiology (1 cr.) P: RADI R140. Study of the biological effects of ionizing radiation and the standards and methods of protection. Emphasis is placed on x-ray interactions. Also included are discussions on radiation exposure standards and radiation monitoring.

RADI-R 271 Clinical Competency Experience 1 (2-4 cr.) P: RADI R172. Clinical application of radiographic positioning, procedure, and exposure emphasizing adaptation of practice to specific patient needs, while under the supervision of a registered radiologic technologist.

RADI-R 272 Clinical Competency Experience 2 (2-4 cr.) P: RADI R271. Clinical application of radiographic positioning, procedure, and exposure emphasizing adaptation of practice to specific patient needs, while under the supervision of a registered radiologic technologist.

RADI-R 274 Experience in Imaging Modalities (2 cr.) P: RADI R172. Exploration and basic skill development in selected imaging modalities, including sonography, MRI, and vascular-interventional radiology, while under the supervision of a registered radiologic technologist.

RADI-R 275 Pediatric Clinical Experience II (2 cr.) Clinical application of radiographic positioning, procedure, and exposure, emphasizing adaptation of practice to specific patient needs in a pediatric practice environment, while under the supervision of a registered radiologic technologist.

RADI-R 408 Topics: (3 cr.)

RADI-R 415 Essential Radiology for the Imaging Technologist I (2 cr.) This course is designed to introduce students to Medical Imaging modalities and the decision making process to determine which imaging method is appropriate for a particular disease, pathology, or injury.

RADI-R 416 Essential Radiology for the Imaging Technologist II (1 cr.)

RADI-R 424 Nuclear Medicine In-Service II (1 cr.)

RADI-R 434 Ultrasound Physics I (3 cr.)

RADI-R 438 Essential Radiology I (1 cr.)

RADI-R 441 Nuclear Medicine Management (1 cr.)

RADI-R 449 Medical Imaging Theory for Nuclear Medicine Technologists (1 cr.)

RADI-R 456 Medical Imaging Technology Project I (2-3 cr.)

Respiratory Therapy

"P" refers to a course prerequisite and "C" to a course that must be taken concurrently.

PULM-F 303 Introduction to Human Disease for Respiratory Therapists (2 cr.) This course gives respiratory therapy students a general introduction to a broad variety of human diseases. Etiology, diagnosis, and treatment will be discussed.

PULM-F 311 Cardiorespiratory Physiology (3 cr.) This course focuses on the normal anatomy and physiology of the cardiorespiratory system, including lung mechanics, ventilation, perfusion, diffusion, gas transport, and acid-base balance.

PULM-F 315 Cardiorespiratory Assessment and Patient Care (3 cr.) Basic cardiorespiratory assessment, vital signs, laboratory studies, and charting. Includes required preclinical skills and practice.

PULM-F 325 General Respiratory Care (4 cr.) This course focuses on basic respiratory therapy procedures. Physiologic applications, effects on the cardiopulmonary system, and hazards for each therapeutic procedure are discussed. Topics include physical principles, airway care, humidity and aerosol therapy, medical gas therapy, hyperinflation therapy, and chest physical therapy.

PULM-F 326 Respiratory Care Techniques I (2 cr.) C: PULM F325. This course focuses on the most important clinical laboratory procedures and on procedures used by the respiratory therapist. Specifically, this course instructs students in patient assessment, oxygen administration, humidity and aerosol therapy, chest physical therapy, hyperinflation therapy, and monitoring expired gas.

PULM-F 333 Cardiorespiratory Pharmacology I (2 cr.) This course provides an overview of the basics of pharmacology therapeutics, focusing on dosages and solutions and bronchodilator drugs. Indications, side effects, mechanism of action, and route of administration are discussed.

PULM-F 350 Cardiorespiratory Diseases (3 cr.) This course outlines general cardiorespiratory diseases of the adult, including acute and chronic disorders. Respiratory therapeutics applied to these diseases are discussed.

PULM-F 355 Life Support (3 cr.) This course includes care of the artificial airway, cardiovascular monitoring and supportive therapy, principles of ventilatory care, and maintenance as well as physiologic effects and complications of airway pressure therapy.

PULM-F 356 Respiratory Care Techniques II (2 cr.) C: PULM F355. This course focuses on the most important clinical laboratory procedures and equipment used by the respiratory therapist to support critically ill patients. Specifically, this course instructs students in mechanical

ventilators, pressure and heart rate monitors, pulmonary mechanics devices, and arterial blood gas sampling.

PULM-F 371 Pulmonary Diagnostics (3 cr.) This course outlines and discusses both normal and abnormal lung volumes and capacities, mechanics of ventilation, inspiratory and expiratory flows, and diffusion of the lung. Additional specialty.

PULM-F 385 Respiratory Care Practicum I (3 cr.) This course applies cardiopulmonary assessment techniques, information gathering, and communication skills in providing general respiratory care in the clinical setting, including medical gas, humidity and aerosol therapy delivery, and treatment modalities.

PULM-F 395 Respiratory Care Practicum II (4 cr.) This clinical practicum introduces students to variations in oxygen delivery and basic mechanical ventilation. Treatment modalities and hemodynamic monitoring on mechanically ventilated patients will be integrated.

PULM-F 405 Neonatal-Pediatric Respiratory Care (3 cr.) This course outlines fetal physiology, cardiorespiratory transition, and respiratory management of neonatal pathologies, including respiratory distress syndrome. Cardiorespiratory techniques for the pediatric patient as well as pediatric trauma and transport are reviewed.

PULM-F 410 Independent Study/Respiratory Therapy (2 cr.) An opportunity for the student of respiratory therapy to identify a relevant area of concern within the field and to develop a tangible solution to or outcome of the concern. Reports and discussion by the students and faculty.

PULM-F 420 Introduction to Research in Respiratory Care (2 cr.) This course examines research in respiratory care and applies basic statistics and concepts of research design.

PULM-F 430 Management and Leadership for Respiratory Care (3 cr.) Specific theory and practice applied to directing and managing a respiratory therapy department, including the managerial functions of budgeting, controlling, organization, planning, staffing, and coordinating. Leadership and skills pertinent to these functions as well as effective communication and professionalism are included.

PULM-F 440 Advanced Cardiac Life Support (2 cr.) This course introduces students to the didactic and technical skills needed for successful proficiency of Advanced Cardiac Life Support standards as set forth by the American Heart Association.

PULM-F 444 Cardiorespiratory Pharmacology II (2 cr.) P: PULM F333. An overview of pharmacologic agents and their effect on the various body systems. Drug effects on the respiratory, circulatory, and nervous systems are emphasized.

PULM-F 445 Seminar in Cardiorespiratory Care (1-5 cr.) Seminar is designed to meet the specialty selected by the student. Students may repeat this course with a new specialty area requested. Each student is required to take a minimum of one hour and a maximum of five hours.

PULM-F 451 Cardiorespiratory Monitoring and Special Techniques (3 cr.) This course reviews electrocardiograms, intracranial pressure monitoring, capnography, and pulmonary artery monitoring techniques. Case studies emphasizing these special procedures are presented.

PULM-F 456 Respiratory Care Practicum III (6 cr.) This course allows students to apply advanced patient assessment techniques, information gathering skills, and communication and leadership skills in the neonatal/pediatric and adult critical care clinical settings.

PULM-F 461 Pulmonary Rehabilitation and Geriatrics (3 cr.) This course gives an overview of rehabilitation therapies and techniques applicable to chronic lung disease, as well as respiratory therapy home care. Basic concepts of gerontology and geriatrics are presented.

PULM-F 480 Patient Education Techniques for Respiratory Therapists (3 cr.) Education techniques for patients and families dealing with chronic respiratory disease. Topics include asthma, chronic obstructive pulmonary disease, and smoking cessation education. Assessment of learning readiness, reading levels, and patient comprehension will be addressed.

PULM-F 485 Respiratory Care Practicum IV (6 cr.) Students will manage patients in critical care settings with emphasis on cardiopulmonary assessment and monitoring. They will participate in pulmonary rehabilitation, home care, advanced cardiac life support, pulmonary functions, polysomnography, and other special procedures.

Department of Public Health

Welcome to the IU School of Medicine Department of Public Health!

The IU School of Medicine Department of Public Health offers the following programs:

- Doctor of Philosophy (Ph.D.) in Epidemiology
- Doctor of Philosophy (Ph.D.) in Health Policy and Management
- Doctor of Philosophy (Ph.D.) in Biostatistics
- Master of Public Health (M.P.H.)
- Master of Health Administration (M.H.A.)
- Bachelor of Science in Public Health (B.S.P.H.)
- Bachelor of Science in Health Services Management (B.S.H.S.M.)

- Graduate Certificate in Public Health
- Graduate Health Policy Certificate
- Graduate Health Systems Management Certificate
- Undergraduate Public Health Area Certificate
- Undergraduate Environmental Studies Area Certificate

- Ph.D. Minor in Public Health
- Ph.D. Minor in Epidemiology
- Ph.D. Minor in Environmental Health Science
- Ph.D. Minor in Health Policy and Management
- Ph.D. Minor in Social and Behavioral Sciences
- Undergraduate Health Systems Administration Minor
- Undergraduate Environmental Science and Health Minor

Graduate Program Accreditations

The Master in Public Health Program is the only public health program in Indiana accredited by the Council on Education for Public Health.

The Master in Health Administration is the only M.H.A. Program in Indiana accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

Department Overview

We are delighted that you are interested in public health education at Indiana University School of Medicine. The Department of Public Health offers a variety of educational programs. We are committed to ensuring that your education is rigorous, intellectually challenging and rewarding.

At the undergraduate level, students can pursue 120 credit hour degrees in Environmental Health Science (B.S. Public Health) or Health Services Management (B.S. Health Services Management). The Environmental Health Science major is one of 32 national programs and the only program in Indiana accredited by the National Health Science Protection and Accreditation Council.

Undergraduate certificates include the Certificate in Environmental Studies (30 credits) and the Certificate in Public Health (18 credits), which has options in environmental science and health and health administration. Undergraduate minors, which are 15 credits, are offered in environmental science and health and health systems administration. To learn more about the undergraduate program, visit the undergraduate link in this bulletin.

At the graduate level, students can pursue advanced study in public health through doctoral and master degrees and certificates and minors.

The 90 credit Doctor of Philosophy (Ph.D.) degree in Epidemiology and the Ph.D. in Health Policy and Management can be completed on a part time or full time basis. To learn more about the Ph.D. Program in Epidemiology, visit Ph.D. Program.

The 45 credit Master of Public Health (M.P.H.) degree offers five concentration areas: Epidemiology, Social and Behavioral Sciences, Health Policy and Management, Environmental Health Science, and Biostatistics. The program is fully accredited by the Council on Education for Public Health. Joint degrees include the M.D./M.P.H., D.D.S./M.P.H., M.S.W./M.P.H., M.H.A./M.P.H., and the M.S. in Bioethics/M.P.H. To learn more about the program, visit M.P.H Program.

The 51 credit Master of Health Administration (M.H.A) degree offers advanced study in health administration. This is the only M.H.A Program in Indiana accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). The program is also a member of the Association of University Programs in Health Administration. Joint degrees include the Master of Health Administration-Doctor of Jurisprudence (M.H.A-J.D.), which is offered with the Indiana University School of Law, and the Master of Health Administration-Master of Business Administration (M.H.A-M.B.A), which is offered with the Indiana University Kelley School of Business. To learn more about the program, visit the M.H.A Program.

Graduate certificate programs include the Graduate Certificate in Public Health (15 credits), the Graduate Certificate in Health Policy (17-18 credits), and the Graduate Certificate in Health Services Management (15 credits). To learn more about the Graduate Certificate Program, visit Graduate Certificate Program.

The 12 credit minors are available to students currently enrolled in doctoral programs. To learn more about the doctoral minors available in Public Health and Epidemiology, visit Doctoral Minors.

Through the Office of Public Health Practice, the Department of Public Health offers quality non-credit educational programs for public health professionals. The Office of Public Health Practice offers a broad spectrum of educational activities using a variety of training modalities, including distance learning technologies. To learn more on the Office of Public Health Practice and to view a listing of current training opportunities, visit the center's webpage.

Mission Statement

The mission of the Department of Public Health is to improve the health of the residents of Indiana, the United States and the world through teaching/learning, research and collaborative community practice.

Values Statement

The IU Department of Public Health is dedicated to the pursuit of health for all people. Health is defined as the capacity to develop full human potential, not simply the absence of disease. In promoting the health of communities, DPH emphasizes the prevention of disease and injury and recognizes the interconnectedness of the physical environment and ecosystem to the health of the community. DPH strives to ensure that the interests of the public are represented in health policies and practices and supports activities that promote this comprehensive view.

The department is committed to the principles of equality, shared decision-making, and a focus on the social, biological and environmental determinants of health which are central tenets of healthy communities and social justice. DPH embraces collaborative and participatory activities as a means of working collectively with other institutions and organizations in the community, across the state, nationally and internationally to ensure healthy communities and populations, a prerequisite for social justice.

While the traditional regulatory, legal and legislative functions of public health remain as important as ever today, public health is dynamic and must respond in innovative ways to emerging challenges to world health.

Undergraduate Degree Accreditation

The Environmental Health Science major is one of 31 national programs and the only program in Indiana accredited by the National Health Science Protection and Accreditation Council.

Admissions

Undergraduate Admission (Prior to January 1, 2012)

- Direct and Dual Admission
- External and Intercampus Transfer Admission
- Probationary Admission

Undergraduate Admission (Effective January 1, 2012)

- Direct and Dual Admission
- External and Intercampus Transfer Admission
- Probationary Admission

Graduate Admission

The Department of Public Health offers the Ph.D. (Epidemiology, Health Policy and Management, Biostatistics); Master of Health Administration; Master of Public Health with concentrations in Epidemiology, Environmental Health Science, Health Policy and Management, Social and Behavioral Science, and Biostatistics (beginning in the Fall of 2011); and certificates & minors.

Application information about graduate study, including literature and application requirements and materials, may be obtained from the Department of Public Health's website (http://www.pbhealth.iupui.edu/).

Undergraduate Admission (Prior to January 1, 2012)

Students can be admitted to the Department of Public Health through direct admission or as transfer students within the IU systems, or from other institutions.

Students admitted to the Department of Public Health are required to attend the Undergraduate Orientation, which is scheduled during the early part of the fall and spring semesters. The orientation provides students with an opportunity to become acquainted with the undergraduate teaching faculty and staff, and orients students to the Department of Public Health's policies and procedures to ensure a successful transition to the Department.

Direct and Dual Admission

The Department of Public Health has a special program to admit freshman students simultaneously to the Department of Public Health and to the University College. To be eligible for this dual admission applicants must meet the general university and campus requirements for admission, have a minimum combined Scholastic Aptitude Test (SAT) math and critical reading test score of 1000 or ACT of 21, and have a 3.0 high school grade point average.

Students who do not qualify for dual admission at Indianapolis, or who choose not to apply for freshman-level direct entry may be admitted to the Department of Public Health after they have completed 12 credit hours with 2.0 or better cumulative and semester grade point averages, and completed ENG-W 131 with a letter grade of a "C" or higher.

Undergraduate External and Intercampus Transfer Admission

External Transfer

Students transferring from other institutions will receive direct admission to the Department of Public Health, provided students have completed 12 hours of coursework and earned cumulative and semester (last semester at previous institution) grade point averages of 2.0 or better.

Intercampus Transfer

Permanent and temporary intercampus transfer students transferring from any campus of Indiana University will receive direct admission to the Department of Public Health, provided students have completed 12 hours, have earned cumulative and semester (last semester at previous institution) grade point averages of 2.0 or better, and have earned a 2.3 in courses that apply toward the major.

Undergraduate Probationary Admission

Applicants who do not meet the undergraduate admission requirements are not eligible for admission until they have met the admission requirements. Applicants who do not meet the Department of Health's admission requirements may seek admission to University College.

Undergraduate Admission (Effective January 1, 2012)

Effective January 1, 2012, students who transfer into the undergraduate programs with college credit must have completed at least 12 credit hours and have at least

a 2.5 undergraduate GPA to be admitted. To remain in good standing, students must maintain a cumulative grade point average of 2.5.

Students can be admitted to the Department of Public Health through direct admission or as transfer students within the IU systems or from other institutions.

Students admitted to the Department of Public Health are required to attend the Undergraduate Orientation, which is scheduled during the early part of the fall and spring semesters. The orientation provides students with an opportunity to become acquainted with the undergraduate teaching faculty and staff, and orients students to the Department of Public Health's policies and procedures to ensure a successful transition to the Department.

Direct and Dual Admission

The Department of Public Health has a special program to admit freshman students simultaneously to the Department of Public Health and to the University College. To be eligible for this dual admission, applicants must meet the general university and campus requirements for admission, have a minimum combined Scholastic Aptitude Test (SAT) math and critical reading test score of 1000 or ACT of 21 and have a 3.0 high school grade point average.

Students who do not qualify for dual admission at Indianapolis, or who choose not to apply for freshman-level direct entry may be admitted to the Department of Public Health after they have completed 12 credit hours with 2.5 or better cumulative and semester grade point averages, and completed ENG-W 131 with a letter grade of a "C" or higher.

Undergraduate External and Intercampus Transfer Admission

External Transfer

Students transferring from other institutions will receive direct admission to the Department of Public Health, provided students have completed 12 hours of coursework and earned cumulative and semester (last semester at previous institution) grade point averages of 2.5 or better.

Intercampus Transfer

Permanent and temporary intercampus transfer students transferring from any campus of Indiana University will receive direct admission to the Department of Public Health, provided students have completed 12 hours, have earned cumulative and semester (last semester at previous institution) grade point averages of 2.5 or better.

Undergraduate Probationary Admission

Applicantswho do not meet the undergraduate admission requirements are not eligible for admission until they have met the admission requirements. Applicants who do not meet the Department of Health's admission requirements may seek admission to University College.

Environmental Studies Certificate

The certificate in environmental studies provides students with an inter-disciplinary program of study that is designed to introduce students to selected aspects of current thinking and research on the nature, causes, and solutions of environmental problems as they affect human health and the environment. The certificate provides students with grounding in ecology, chemistry, economics, finance and budgeting, environmental health, and physical systems of the earth and more in-depth study in courses related to environmental management, basic sciences, geographic systems, and earth sciences.

Eligibility and Application Procedure

1. Students enrolled in baccalaureate programs at Indiana University or other accredited colleges or universities who are in good academic standing may pursue the certificate in environmental studies, providing they have completed two semesters of college level chemistry and a college level course in algebra (or higher math course). The certificate in environmental studies is not a stand-alone certificate.

2. Public Health students majoring in Environmental Health Science are not eligible for the Environmental Studies certificate.

3. Students must declare their intention to earn the certificate prior to completing fifteen (15) semester hours creditable toward the certificate by completing an application, which is available online or at the Department of Public Health Student Services, 714 N. Senate Avenue, EF 200. Students may also contact the Undergraduate Academic Advisor at 317-278-0753 for the application or if they have questions.

General Requirements

1. A minimum of 32 credit hours.

2. A minimum cumulative grade point average of 2.0.

3. A maximum of six (6) hours of appropriate credit from another institution may be applied toward this certificate.

4. Credit work for this certificate may be taken at any campus of the Indiana University system.

NOTE: Some courses listed below are not offered every semester. Students should check with the Undergraduate Academic Advisor to determine the availability of specific courses at given times.

Certificate Requirements (10 courses, 32 credit hours minimum)

The following courses:

- BIOL-K341 Principles of Ecology (3 cr.)
- CHEM-C101/121 Elementary Chemistry I with Lab (5 cr.) **OR**
  CHEM-C105/125 Principles of Chemistry I with Lab (5 cr.)
- ECON-E201 Introduction to Microeconomics (3 cr.) P: Sophomore Standing
- ECON-E202 Introduction to Macroeconomics (3 cr.) P: Sophomore Standing
- SPEA-V372 Government Finance and Budgets (3 cr.)

ONE of the following courses:

- SPEA-E162 Environment and People (3 cr.)
- PBHL-A316 Environmental Science and Health (3 cr.)

ONE of the following courses:

- GEOG-G107 Physical Systems of the Environment (3 cr.)
- GEOL-G107 Environmental Geology (3 cr.)
- GEOL-G110 Geology: The Earth's Environment (3 cr.)

THREE of the following courses:

- PBHL-A316 Environmental Health (3 cr.)
- PBHL-A424 Environmental Health Science Technology: Managing Water and Wastes (3 cr.)
- PBHL-A451 Air Pollution and Control (3 cr.)
- CHEM-C207 Introduction to Biochemistry (4 cr.)
- CHEM-C310 Analytical Chemistry (3 cr.)
- CHEM-C341 Organic Chemistry Lectures I (3 cr.)
- ECON-E485 Social Control of Industry (3 cr.)
- GEOG-G303 Weather and Climate (3 cr.)
- GEOG-G304 Meteorology and Climatology (3 cr.)
- GEOG-G315 Environmental Conservation (3 cr.)
- GEOL-G300 Environmental and Urban Geology (3 cr.)
- GEOL-G303 Geologic Mapping and Field Methods (4 cr.)
- GEOL-G406 Introduction to Geochemistry (3 cr.)
- GEOL-G415 Geomorphology (3 cr.)
- GEOL-G451 Principles of Hydrogeology (3 cr.)
- PHYS-200 Physical Environment
- PHYS-218 General Physics I (4 cr.)
- SOC-R465 Population and Human Ecology (3 cr.)
- SPEA-K300 Statistical Techniques (3 cr.) **P:MATH-M118 or** other approved option

Certificate Programs

- Certificate in Environmental Studies
- Certificate in Public Health

Public Health Certificate

The certificate in Public Health includes two emphasis areas: Environmental Science and Health and Health Administration. The certificate is designed to provide students in both emphasis areas with an overview of each area followed by more focused study in areas basic to each field. An internship is encouraged for both emphasis areas.

Students in the environmental science and health option will complete survey courses in environmental health and epidemiology, a skills course, and four courses from a list including applications in environmental mathematics methods, toxicology, water and wastes, policy, food safety, worker health and safety, and techniques.

Students in the health administration option will complete survey courses in health systems administration and finance, a skills course, and four courses from a list including applications in advanced finance, human resources, economics, strategic planning, policy, marketing, and law.

Eligibility and Application Procedure

1. Students enrolled in baccalaureate programs at Indiana University or other accredited colleges or universities and who are in good academic standing may pursue the certificate in public health. The certificate in public health is not a stand-alone certificate.

2. Students pursuing the environmental health science option must have completed two semesters of college level chemistry and a college level course in algebra (or higher math course).

3. Public Health students majoring in Environmental Health Science or Community Health are not eligible for the public health certificate.

4. Students must declare their intention to earn the certificate prior to completing nine (9) semester hours creditable toward the certificate by completing an application which is available online, or at the Department of Public Health, 714 N. Senate Avenue, EF 200. Students may also contact the Undergraduate Academic Advisor at 317-278-0753 for the application, or if they have questions.

General Requirements

1. A minimum of 18 credit hours.

2. A minimum cumulative grade point average of 2.0.

3. Course work for this certificate may be taken at any campus of the Indiana University system.

4. A maximum of six (6) hours of appropriate credit from another institution may be applied toward this certificate.

NOTE: Some courses listed below for the environmental science and health are not offered every semester. Students should check with the Undergraduate Academic Advisor to determine the availability of specific courses at given times.

Certificate Requirements (6 courses, 18 credit hours minimum)

Environmental Science and Health option:
The following courses:

- PBHL-A316 Environmental Health (3 cr.)
- PBHL-A322 Principles of Epidemiology (3 cr.)

FOUR of the following courses:

- PBHL-A410 Introduction to Environmental Toxicology (3 cr.)
- PBHL-A424 Environmental Health Science Technology: Managing Water and Wastes (3 cr.)
- PBHL-A416 Environmental Health Policy (3 cr.)
- PBHL-A428 Food Science and Sanitation (3 cr.)
- PBHL-A433 Industrial Hygiene and Radiological Health (3 cr.)
- PBHL-A459 Environmental Science and Health Data Analysis (3 cr.) **P: PBHL-A316, 1 sem. each of statistics & chemistry**
- PBHL-A460 Techniques in Environmental Science and Health (4 cr.) **P: PBHL-A459**
- PBHL-A380 Environmental Health Internship (3 cr.)

Health Administration option:
The following courses:

- PBHL-H320 Health Systems Administration (3 cr.)
- PBHL-H352 Health Finance and Budgeting (3 cr.) **P: PBHL-H200, BUS-A200, or BUS-A201**

FOUR of the following courses:

- PBHL-H353 Advanced Health Finance and Budgeting (3 cr.) **P: PBHL-H352**
- PBHL-H354 Health Care Economics (3 cr.) **OR** ECON-E387 Health Economics (3 cr.)
- PBHL-H401 Strategic Planning for Health Care Organizations (3 cr.)
- PBHL-H420 Health Policy (3 cr.)
- PBHL-H432 Health Care Marketing (3 cr.)
- PBHL-H441 Legal Aspects of Health Care Administration (3 cr.) **OR** SPEA-V376 Law and Public Policy (3 cr.)
- PBHL-P400 Topics in Public Health (3 cr.)
- PBHL-H456 Managed Care (3 cr.)
- PBHL-H472 Applied Health Care Administration (3 cr.) **P: PBHL-H474**
- SPEA-V373 Human Resources Management in the Public Sector (3 cr.)
- PBHL-H380 Internship in Health Services Management (1-3 cr.)

Bachelor of Science in Public Health - Environmental Health Science

The Bachelor of Science in Public Health, Environmental Health Science major consists of a minimum of 66 credit hours of general education requirements, 40 credit hours of course work in the major, and electives to total 120 credit hours. The Environmental Health Science major is accredited by the Environmental Health Science and Protection Accreditation Council. Students enrolled in this major are eligible for special scholarship and internship opportunities. For more information, contact the academic advisor or faculty mentor for Environmental Health Science.

The curriculum provides students with knowledge, skills and abilities in the following competency areas: policy and management, foundation and methods, applications in environmental health science, and environmental health science integrative experience.

The following degree requirements are required of all students majoring in environmental health science and admitted to Indiana University beginning with the Fall Semester, 2008. Students who are returning to Public Health but have not enrolled in classes for three or more consecutive years will be required to follow these degree requirements.

Some courses in the major are not offered each semester. Students should contact the Office of Student Services in the Department of Public Health for advising information about the course rotation and to ensure that they will meet graduation requirements.

General Education (23 courses) - 66 credit hours
1. Communications (4 courses) - Minimum of 12 credit hours

Four courses for a minimum of 12 credit hours.
The following courses:

- ENG-W 131 Elementary Composition I (3 cr.)
- ENG-W 231 Professional Writing Skills (3 cr.) OR BUS-X 204 Business Communications (3 cr.) OR TCM 220 Technical Report Writing (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)
- COMM-C 223 Business and Professional Communication (3 cr.)

2. Social Sciences and Humanities (4 courses) - Minimum of 12 credit hours

Social Sciences
One approved course for a minimum of 3 credit hours from any of the following subject areas:

- Anthropology
- Economics
- Geography
- Journalism
- Linguistics
- Political Science
- Psychology
- Sociology

Humanities
One approved course for a minimum of 3 credit hours from any of the following subject areas:

- Afro-American Studies
- Classical Studies
- Communication& Theater
- Comparative Literature
- English
- Fine Arts
- Folklore
- Foreign Languages &Literatures
- History
- Music
- Philosophy
- Religious Studies

3. Science (12 courses) - Minimum of 33 credit hours

The following courses:

- BIOL-N 212 Human Biology (3 cr.)
- BIOL-N 213 Human Biology Laboratory (1 cr.)
- BIOL-N 251 Introduction to Microbiology (3 cr.)
- PHYS-P 201 General Physics I (5 cr.)**P: MATH 15900 or equivalent (MATH 15300 and Math 15400)**

The following courses:

- CHEM-C 105 Principles of Chemistry I (3 cr.)
- CHEM-C 125Experimental Chemistry I (2 cr.)
- CHEM-C 106 Principles of Chemistry II (3 cr.) **P: CHEM-C 105**
- CHEM-C 126 Experimental Chemistry II (2 cr.) **P: CHEM-C 125**
- CHEM-C 341 Organic Chemistry I (3 cr.) **P: CHEM-C 106**
- CHEM-C 343 Organic Chemistry I Laboratory (2 cr.) **P: CHEM-C 126; P: or C: CHEM-C 341**

Two Additional Science Courses from the following list (or other courses approved by the Faculty Advisor):

- BIOL-N 214 Human Biology (3 cr.) **P: BIOL-N 212AND**
- BIOL-N 215 Human Biology Laboratory (1 cr.) **P: or C: BIOL-N 214**
- BIOL-N 217 Human Physiology (5cr.)
- BIOL-N 261 Human Anatomy (5 cr.)

- BIOL-K 101 Concepts of Biology I (5 cr.)
- BIOL-K 103 Concepts of Biology II (5 cr.)
- BIOL-K 341 Principles of Ecology and Evolution **P: BIOL-K 103**
- CHEM-C 101 Elementary Chemistry (3 cr.) **AND**
- CHEM-C 121 Elementary Chemistry Laboratory (2 cr.) **P: or C: CHEM-C 101**
- CHEM-C 110 The Chemistry of Life (3 cr.) **AND**
- CHEM-C 115 Laboratory of the Chemistry of Life (2 cr.) **P: or C: CHEM-C 110**
- CHEM-C 342 Organic Chemistry II (3 cr.) **P: CHEM-C 341**
- CHEM-C344 Organic Chemistry II Laboratory (2 cr.) **P: CHEM-C 342; P: or C: CHEM-C 342**
- GEOL-G 107 Fundamentals of Geology (3 cr.)
- GEOL-G 109 Fundamentals of Earth History (3 cr.)
- GEOL-G 110 Physical Geology (3 cr.) **AND**
- GEOL-G 120 Physical Geology Laboratory (1 cr.) **P: or C: GEOL-G 110**
- GEOL-G 406 Introduction to Geochemistry (3 cr.) **P: GEOL-G 205, CHEM-C 106, or consent of instructor**
- PHYS-P 202 General Physics II (5 cr.) **P: PHYS-P 201**
- PSY-B 105 Psychology as a Biological Science(3 cr.)

4. Quantitative Methods (5 courses) - Minimum of 14 credit hours

The following computer courses:

- SPEA-V 261 Computers in Public Affairs (3 cr.) **OR** SPEA-V 369 Managing Information Technology (3 cr.)
- GEOG-G 338 Introduction to Geographic Information Systems (3 cr.)

One of the following mathematics sequences or higher -level mathematics course:

- MATH 15300 Algebra and Trigonometry I (3 cr.) **AND** MATH 15400 Algebra and Trigonometry II (3 cr.)

OR

- MATH 15900 Precalclulus

One statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.) **R: MATH-M 118 or higher course**

Environmental Health Science Major(13 courses) - Minimum of 40 credit hours

1. Policy and Management (3 courses) - Minimum of 9 credit hours

The following policy courses:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- PBHL-A 416 Environmental Health Policy (3 cr.)

One of the following management courses:

- SPEA-V 263 Public Management (3 cr.)
- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)

2. Foundation and Methods (5 courses) - Minimum of 16 credit hours

EACH of the following courses:

- PBHL-A 316 Environmental Health Science (3 cr.)
- PBHL-A 322 Epidemiology (3 cr.)
- PBHL-A 410 Introduction to Toxicology (3 cr.)
- PBHL-A 459 Environmental Science and Health Data Analysis (3 cr.) **P: PBHL-A 316, SPEA-K300, 1 semester of chemistry**
- PBHL-A 460 Techniques in Environmental Science and Health (4 cr.) **P: PBHL-A 459**

3. Applications in Environmental Health Science (4 courses) - Minimum of 12 credit hours

EACH of the following courses:

- PBHL-A 424 Environmental Health Science Technology: Managing Water and Wastes (3 cr.)
- PBHL-A 428 Food Science and Sanitation (3 cr.)
- PBHL-A 433 Industrial Hygiene (3 cr.)
- PBHL-A 451 Air Pollution and Control (3 cr.)

4. Environmental Health Science Experience (1 course) - Minimum of 3 credit hours

- PBHL-A 380 Environmental Health Science Internship (1-6 cr.) **OR**
- PBHL-A 466 Public Health Field Experience (1-3 cr.)

General Electives

A minimum of 106 credit hours of required courses are listed for this curriculum (66 credit hours in general education and 40 credit hours in the major). In addition, students must take a sufficient number of elective courses to total a minimum of 120 credit hours for the degree.

Grade Point Average Requirement

1) Students who matriculate into this program prior to January 1, 2012 must obtain at least a 2.0 cumulative grade point average (GPA), a 2.0 semester GPA, and a minimum GPA of at least 2.3 in the major courses to remain in good standing. The cumulative and major GPAs must be met for graduation.

2) Effective January 1, 2012, student who are admitted of this date must obtain at least a 2.5 cumulative GPA and a semester GPA of 2.5 to remain in good standing and graduate from the program.

Program Deviations

Course substitutions and course waivers must be approved by the faculty advisor.

Bachelor of Science in Health Services Management

The Bachelor of Science in Health Services Management degree consists of a minimum of 44 credit hours of general education requirements, a minimum of 51 credit hours of coursework in the major, and electives to total 120 credit hours. Collectively these requirements track the AUPHA certification criteria. The curriculum provides students with knowledge, skills and abilities the following competency areas: general management, health services management, health services applications, and health services integration.

The capstone is the integrative experience that brings together and builds on the competency areas.

General Education (14 courses) - Minimum of 44 credit hours

1. Communications (4 courses) - Minimum of 12 credit hours.
The following writing course:

- ENG-W 131 Elementary Composition I (3 cr.) (C or higher)

One of the following writing courses:

- ENG-W 231 Professional Writing Skills (3 cr.)**OR**
- BUS-X 204 Business Communications (3 cr.)

One of the following speech courses:

- COMM-R 110 Fundamentals of Speech Communication (3 cr.)
- COMM-C 223 Business and Professional Communication (3 cr.)**OR**
- COMM-C 180 Introduction to Personal Communicatin (3 cr.)

2. Social Sciences and Humanities(4 courses)-Minimum of 12 credit hours

Social Sciences
The following economics courses:

- ECON-E 201 Introduction to Microeconomics **P: Sophomore Standing**
- ECON-E 202 Introduction to Macroeconomics **P: Sophomore Standing**

One approved course for a minimum of 3 credit hours from any of the following subject areas:

- Anthropology
- Economics
- Geography
- Journalism
- Linguistics
- Political Science
- Psychology
- Sociology

Humanities
One approved course for a minimum of 3 credit hours from any of the following subject areas:

- Afro-American Studies
- Classical Studies
- Communications & Theater
- Comparative Literature
- English
- Fine Arts
- Folklore
- Foreign Languages and Literature
- History
- Music
- Philosophy
- Religious Studies

3. Science (2 courses with labs) - Minimum of 8 credit hours

Two approved courses from the Basic Sciences, such as Biology, Chemistry or Physics

Recommended courses:

- BIOL-N 212 Human Biology (3 cr.) and BIOL N213 Human Biology Laboratory (1 cr.)
- BIOL-N 214 Human Biology**P: BIOL-N 212**(3 cr.) and BIOL N215 Human Biology Laboratory **P: or C: BIOL-N 213**(1 cr.)

4. Quantitative Methods (3 courses) - Minimum of 9 credit hours

The following computer courses:

- SPEA-V 261 Computers in Public Affairs (3 cr.) **OR**
- BUS-K201 The Computer in Business (3.0)
- SPEA-V 369 Managing Iformation Technology (3 cr.)

One mathematics course such as M118, M119, or higher:

- MATH-M 118 Finite Mathematics (3 cr.) is recommended

One statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.) **R: MATH-M 118 or higher**

Health Services Management Major (18-19 courses) - Minimum of 51-54 credit hours

1. Introduction to Careers in Health Care (1 course) - 3 credit hours

- PBHL-H 120 Contemporary Health Care (3 cr,)

2. General Management (5 courses) - Minimum of 15 credit hours

The following courses:

- SPEA-V 263 Public Management (3 cr.) **OR** SPEA-V 362 Nonprofit Management and Leadership (3 cr.)
- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)
- SPEA-V 352 Health Finance and Budgeting: **P: BUS-A 200, BUS-A 201, or PBHL-H200**

One of the following:

- SPEA-V 348 Management Science (3 cr.) **P: SPEA-K 300, MATH-M 118**
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)

One of the following:

- SPEA-V 373 Human Resources Management in the Public Sector (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)

3. Health Services Managment (5 courses) - Minimum of 15 credit hours

The following courses:

- PBHL-H 320 Health Systems Administration (3 cr.)
- PBHL-A 322 Principles of Epidemiology (3 cr.)
- PBHL-H 353 Advanced Health Finance and Budgeting (3 cr.) **P: PBHL-H 352**
- PBHL-H 401 Strategic Planning for Health Care Organizations (3 cr.)
- PBHL-H 474 Health Administration Ethics Seminar (3 cr.)

4. Health Services Applications (5 courses) - Minimum of 15 credit hours

Five of the following courses:

- PBHL-A 316 Environmental Science and Health (3 cr.)
- PBHL-H 354 Health Economics (3 cr.)
- PBHL-H 411 Chronic and Long-term Care Administration (3 cr.)
- PBHL-H 420 Health Policy (3 cr.)**P: PBHL-H320**
- PBHL-H 432 Health Care Marketing (3 cr.)
- PBHL-H 441 Legal Aspects of Health Care Administration (3 cr.)
- PBHL-H 455 Topics in Health Care Administration (3 cr.)

5. Health Services Management Experience (2 courses) - Minimum of 3 credit hours

The following courses:

- PBHL-H 365 Health Services Practicum (3 cr.) **Requires Junior Standing in the major**
- PBHL-H 380 Health Services Management Internship(1-6 cr.)

6. Health Services Management Capstone (1 course) - Minimum 3 credit hours

- PBHL-H 472 Applied Health Administration (3 cr.) **P: PBHL-H 474**

General Electives

A minimum of 95 credit hours of required courses are listed for this curriculum (44 credit hours in general education and 51 credit hours in the major). In addition, students must take a sufficient number of elective courses to total a minimum of 120 credit hours required for the degree.

Grade Point Average Requirement

1) Students who matriculate into this program prior to January 1, 2012 must obtain at least a 2.0 cumulative grade point average (GPA), a 2.0 semester GPA, and a minimum GPA of at least 2.3 in the major courses to remain in good standing. The cumulative and major GPAs must be met for graduation.

2) Effective January 1, 2012, student who are admitted of this date must obtain at least a 2.5 cumulative GPA and a semester GPA of 2.5 to remain in good standing and graduate from the program.

Program Deviations

Course substitutions and course waivers must be approved by the faculty advisor.

Degree Programs

Bachelor of Science in Public Health degree

The Bachelor of Science in Public Health (B.S.P.H.) degree combines coursework in communications, mathematics, the basic sciences (biology, chemistry, physics) and public health with an emphasis on protecting human health and the quality of the built and natural environment from environmental hazards through pollution prevention and control. Employment areas include indoor and outdoor pollution, water supply and wastewater treatment, solid and hazardous waste, workplace health and safety, general environmental health, childhood lead poisoning and asthma control, environmental health education, environmental toxicology and microbiology, sustainability, housing safety and vector control, food safety and defense, hazardous materials, homeland security, and others.

The Environmental Health Science major is an excellent option for any student who:

- enjoys science and wants to apply what he/she learns,
- cares about human health and the environment
- likes to develop solutions to complex problems,
- wants to make a difference, and
- enjoys a job with variety.

The Environmental Health Science major is accredited by the National Environmental Health Science and Protection Accreditation Council (NEHAC). Students who are enrolled in an accredited program are eligible for special internships, grants and awards available only to accredited programs. Interested students can visit the Department of Public Health website for more information.

The curriculum requirements are available at the following link: Bachelor of Science in Public Health (B.S.P.H.).

Bachelor of Science in Health Systems Management

The Bachelor of Science in Health Systems Management (B.S.H.S.M.) combines coursework in general education (communications, liberal arts, science, and quantitative methods), health care policy, finance and management to prepare students for positions in the health care arena in nonclinical work. The health care arena includes acute care, physician practice, and long-term care, insurance companies, and government. Positions are available in government and the private and not-for-profit sectors. Available positions include office manager, billing agent, project coordinator, HR recruiting specialist, marketing manager, claims adjudicator, clinical liaison, customer service representative, admissions staff, marketing specialist, and others.

The Health Services Management major is an excellent option for any student who:

- has an interest in management and administration,
- wants to work in health care but in a nonclinical occupation,
- enjoys working and interacting with people,
- likes to work in a rapidly changing environment, and

- wants a rewarding career that involves helping others.

The curriculum requirements are available at the following link: Bachelor of Science in Health Systems Management (B.S.H.S.M.).

Bachelor of Science in Public Health - Community Health

The Bachelor of Science in Public Health, Community Health major consists of a minimum of 48 credit hours of general education requirements, 54 credit hours of course work in the major, and electives to total 120 credit hours.

The curriculum provides students with knowledge, skills and abilities in the communications, social sciences and humanties, basic sciences, quantitative methods, pubic health core and electives totaling to 120 credit hours.

The following degree requirements are required of all students majoring in community health admitted to Indiana University beginning with the Fall Semester, 2011. Students who are returning to Public Health but have not enrolled in classes for three or more consecutive years will be required to follow these degree requirements.

General Education (16 courses) - 48 credit hours

1. Communications (4 courses) - Minimum 12 credit hours

Four courses for a minimum of 12 credit hours.
The following courses:

- ENG-W 131 Elementary Composition I (3 cr.)
- ENG-W 231 Professional Writing Skills (3 cr.) OR BUS-X 204 Business Communications (3 cr.) OR TCM 220 Technical Report Writing (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)
- COMM-C 223 Business and Professional Communication (3 cr.)

2. Social Sciences and Humanities (4 courses) - Minimum of 12 credit hours

Social Sciences

Two approved courses for a minimum of 6 credit hours from any of the following subject areas:

- Anthropology
- Economics
- Geography
- Linguistics
- Political Science
- Psycology
- Sociology

Humanities

Twp approved course for a minimum of 6 credit hours from any of the following subject areas:

- Afro-American Studies
- Classical Studies
- Communications & Theater
- Comparative Literature
- English
- Fine Arts
- Folklore
- Foreign Languages & Literatures
- History
- Music
- Philosophy
- Religious Studies
- Journalism
- Speech

3. Science - Minimum 18 credit hours

- BIOL-N 212 Human Biology (3 cr.)
- BIOL-N 213 Human Biology Laboratory (1 cr.)
- BIOL-N 217 Human Physiology (5 cr.)
- BIOL-N261 Human Anatomy (5 cr.)
- BIOL-N322 Introductory Principles of Genetics (3 cr.)
- BIOL-N 251 Introduction to Microbiology (3 cr.)
- CHEM-C 101 Elementary Chemistry (3 cr.)
- CHEM-C 121 Elementary Chemistry Laboratory (2 cr.) **P: or C: Chem-C101**
- CHEM-C 110 The Chemistry of Life (3 cr.) **AND**
- CHEM-C 115 Laboratory of the Chemistry of Life (2 cr.) **P: or C: CHEM-C 110**
- CHEM-C 105 Principles of Chemistry I (3 cr.)
- CHEM-C 125 Experimental Chemistry I (2 cr.)
- CHEM-C 106 Principles of Chemistry II (3 cr.) **P: CHEM-C 105**
- CHEM-C 126 Experimental Chemistry II (2 cr.) **P: CHEM-C 125**Two Additional Science Courses from the following list (or other courses approved by the Faculty Advisor):

4. Quantitative Methods (2 courses) - Minimum 6 credit hours

Two of the following courses:

- MATH-M 118 Finite Math P: MATH 11000 or MATH 11100 (3 cr.)
- PSY-B 305 Statistics (3 cr.)
- PBHL-P3XX Survey Methods in Public Health (3 cr.)

Community Health Major (18 courses) - 54 credit hours

5. Public Health Core Courses (10 courses) - Minimum 30 credit hours

Each of the following **FIVE** courses:

- PBHL-A 322 Pinrciples of Epidemiology (3 cr.)
- PBHL-A 316 Environmental Health Science (3 cr.)
- PBHL-B 3XX Biostatistics for Public Health (3 cr.)
- PBHL-P 3XX Public Health Systems (3 cr.)
- PBHL-P 3XX Social and Behavioral Sciences in Public Health (3 cr.)

FIVE of the following courses:

- PBHL-H 320 Health Systems Administration (3 cr.)
- PBHL-P 101 Disesase, Disasters and Disparities: An Intro. to Public Health (3 cr.)
- PBHL-P 3XX Careers in Public Health (3 cr.)
- PBHL-P 3XX Public Health Ethics (3 cr.)
- PBHL-P 4XX Practicum in Public Health (3 cr.)
- PBHL-P 4XX Capstone Seminar (3 cr.)

6. Public Health Electives (8 Courses: at least 4 must be PHBL) - Minimum 24 Credit Hours

- PBHL-A 416 Environmental Health Policy (3 cr.)
- PBHL-A 428 Food Science and Sanitation (3 cr.)
- PBHL-A 4XX Topics in Epidemiology (3 cr.)
- PHBL-H 120 Contemporary Health Issues (3 cr.)
- PBHL-H 352 Health Finance and Budgeting (3 cr.) **P: BUS-A 200, BUS-A 201, OR PBHL-H 200**
- PBHL-H 353 Advanced Health Finance and Budgeting (3 cr.) **P: PBHL-H 352**
- PBHL-H 354 Health Care Economics (3 cr.)
- PBHL-H401 Strategic Planning for Health Care (3 cr.)
- PBHL-H 411 Chronic and Long-term Care Administration (3 cr.)
- PBHL-H 441 Legal Aspects of Health Care Administration (3 cr.)
- PBHL-H 455 Topics in Health Administration (3 cr.)
- PBHL-H 474 Health Administration Ethics Seminar (3 cr.) **P: PBHL-H 320 and Senior Standing**
- PBHL-P 3XX Public Health Education Intervention Methods (3 cr.)
- PBHL- P 3XX Program Planning in Public Health (3 cr.)
- PBHL-P 400 Topics in Public Health (3 cr.)
- PBHL-P466 Public Health Field Experience (3 cr.)
- ANTH-A 377 African American Health Care (3 cr.)
- ANTH-A 460 Disease and Human Evolution (3 cr.)
- ANTH-B 370 Human Variation (3 cr.)
- ANTH-E 445 Medical Anthropology (3 cr.)
- COMM-C 392 Health Communication (3 cr.)
- ECON-E 307 Current Economic Issues: Health Economic Issues (3 cr.)
- ECON-E 387 Health Economics (3 cr.)
- HIST-H 364 History of Medicine and Public Health (3 cr.)
- MHHS-M 492 Topics in Medical Humanities/Health Studies (3 cr.)
- PHIL-P 393 Biomedical Ethics (3 cr.)
- PSY-B 365 Stress & Health (3 cr.)
- PSY-B 394 Drugs and Behavior (3 cr.)
- PSY-B 396 Alcohol, Alcoholism, and Drug Abuse (3 cr.)
- REL-R 384 Religion, Ethics and Health (3 cr.)
- SHRS-N 250 Health & Rehabilitation Systems Across the World (3 cr.)
- SHRS-N 310 Aging and the Older Person (3 cr.)
- SHRS-N 340 Psychological Aspects of Disabilities (3 cr.)
- SHRS-N 350 Survey of Programs for Older Adults (3 cr.)
- SHRS-N 370 Psychosocial Aspects of Aging (3 cr.)
- SOC-R 285 AIDS and Society (3 cr.)
- SOC-R 321 Women and Health (3 cr.)
- SOC-R 382 Social Organization of Health Care (3 cr.)
- SOC-R 415 Sociology of Disability (3 cr.)

Degree Electives

A minimum of 102 credit hours of required courses are listed for this curriculum (48 credit hours in general education, 30 credit hours in the major, and 24 public health electives). In addition, students must take a sufficient number of elective courses to total a minimum of 120 credit hours.

Grade Point Average Requirement

In order to be admitted to this degree program, a student must have earned a 2.5 undergraduate cumulative and previous semester GPA. In addition, students must maintain at least a 2.5 semester and cummulative grade point average (GPA) to remain in good academic standing and graduate from this program.

Program Deviations

Course substitutions and course waivers must be approved by the faculty advisor.

Internships and Research

Internship Program

In hiring decisions, employers give preference to students who have related work experience, and internships are an excellent way to gain related work experience and an investment in the students future that will have long-term benefits. IUPUI posts many more internship opportunities than are filled each year, which means that students can choose among many various experiences to acquire job skills and contacts for future positions.

The Environmental Health Science major requires 3 credits of internship, which is equivalent to 240 contact hours. The Health Services Management major (B.S.H.S.M.) allows students to take 1-6 credit hours of internship (1 credit hour = 80 contact hours) as elective credit.

In addition to local opportunities, students are encouraged to consider internship experiences with national or international organizations. More information on the process of acquiring and registering for an internship is available at the Department of Public Health website, link to Completing the Internship.

JRCOSTEP (for Environmental Health Science majors)

Each year, the U.S. Public Health Service hires about 25-35 students for summer Junior Commissioned Officer Student Training and Extern Program (JRCOSTEP) positions. These positions are available to students in environmental health degree programs accredited by the National Environmental Health Science and Protection Council, and the B.S.P.H is one of these programs. Most JRCOSTEP positions are with the Indian Health Service (IHS) in many different areas of the United States, including Alaska. Other agencies that typically hire one or two JRCOSTEPs per summer are: ATSDR, CDC, Coast Guard, and the National Park Service.

The JRCOSTEP students are Commissioned Officers for the summer and they earn about $2000 a month as an Ensign in the Public Health Service. In addition to being paid, JRCOSTEPs have unique opportunities to apply what they have learned to environmental health issues and to gain new knowledge, skills and abilities related to real world problems.

These positions are competitive, so students are encouraged to meet with the Director of Undergraduate Education shortly after they enter the B.S.P.H degree program to discuss their interest in the JRCSTEP program, to learn more about

students experiences in the program, and to discuss strategies to strengthen their applications.

National Student Research Competition (for Environmental Health Science majors)

Students are invited to enter a national research competition sponsored by the Association of Environmental Health Academic Programs (AEHAP). This competition is available only to students enrolled in degree programs accredited by the National Environmental Health Sciences and Protection Council, and the B.S.P.H is one of these programs.

Students whose projects are selected as winners will be invited to give a 20-minute presentation at the National Environmental Health Association's Annual Educational Conference and Exhibition. Students may win a $500 award and up to $1,000 in travel expenses to the annual conference. Projects are typically submitted in April for consideration for the June conference, so it is important to get started early. The research submission guidelines are available at http://www.aehap.org/students/scholarships_srcompetion.htm. Students are encouraged to consider this opportunity and discuss their interest with their faculty mentor.

Minors

Environmental Health Science (5 courses, 15 credit hours minimum)

The minor in environmental health science is designed to introduce students to selected aspects of current thinking and research on the nature, causes, and solutions of environmental problems as they affect human health and the environment. After completing the survey course on environmental health, students may select four (4) courses from a list of courses that includes toxicology, water and wastes, air pollution, policy, food science, workplace health and safety, data analysis, and techniques in environmental health.

Eligibility and Application Procedure

1. Students enrolled in baccalaureate programs at Indiana University or other accredited colleges or universities who are in good academic standing may pursue the minor in environmental health science, providing they have completed two semesters of college level chemistry and a college level course in algebra (or higher math course).

2. Public Health students majoring in Environmental Health Science are not eligible for the Environmental Health Science minor.

3. Students must declare their intention to receive a minor by completing an application, which is available online or at the Department of Public Health Student Services, 714 N. Senate Avenue, EF 200. Students may also contact the Undergraduate Academic Advisor at 317-278-0753 for the application or if they have questions. This application should be completed at the same time the student completes an application for graduation for the baccalaureate degree.

4. Students who successfully complete the requirements for the Environmental Health Science minor with a 2.0 GPA or above for all courses credited to the minor will have the minor conferred with their degree.

NOTE: Some courses listed below are not offered every semester. Students should check with the Undergraduate Academic Advisor to determine the availability of specific courses at given times.

Minor Requirements (5 courses, 15 credit hours minimum)

The following course:

- PBHL-A316 Environmental Health (3 cr.)

FOUR of the following courses:

- PBHL-A 410 Introduction to Environmental Toxicology (3 cr.)
- PBHL-A 424 Environmental Health Science Technology: Managing Water and Wastes (3 cr.)
- PBHL-A 451 Air Pollution and Control (3 cr.)
- PBHL-A 416 Environmental Health Policy (3 cr.)
- PBHL-A 428 Food Science and Sanitation (3 cr.)
- PBHL-A 433 Industrial Hygiene and Radiological Health (3 cr.)
- PBHL-A 459 Environmental Science and Health Data Analysis (3 cr.) **P: PBHL-A 316, 1 semester each of statistics and chemistry**
- PBHL-A 460 Techniques in Environmental Science and Health (3 cr.) **P: PBHL-A459**

Program Deviations - Course substitutions and course waivers must be approved by the faculty advisor.

Health Systems Administration (5 courses, 15 credit hours)

The minor in Health Systems Administration is designed to introduce students to selected aspects of current thinking and research on the administration of health systems. After completing the survey course on health systems administration, students may select four (4) courses from a list that includes health care finance and budgeting, human resources, economics, strategic planning, policy, marketing, and law.

Eligibility and Application Procedure

1. Students enrolled in baccalaureate programs at Indiana University who are in good academic standing may pursue the minor in health systems administration.

2. Public Health students in the BSHSM are not eligible for the Health Systems Administration minor.

3. Students must declare their intention to receive a minor by completing an application, which is available online or at the Department of Public Health Student Services, 714 N. Senate Avenue, EF 200. Students may also contact the Undergraduate Academic Advisor at 317-278-0753 for the application or if they have questions. This application should be completed at the same time the student completes an application for graduation for the baccalaureate degree.

4. Students who successfully complete the requirements for the Health Systems Administration minor with a 2.0 GPA or above for all courses credited to the minor will have the minor conferred with their degree.

Minor Requirements (5 courses, 15 credit hours minimum)

The following course:

- PBHL-H 320 Health Systems Administration (3 cr.)

FOUR of the following courses (12 credit hours):

- PBHL-H 352 Health Finance and Budgeting (3 cr.) **P: BUS-A 200, BUS-A 201, OR PBHL-A200**
- PBHL-H 353 Advanced Health Finance and Budgeting (3 cr.) **P: PHBL-H 352**
- PBHL-H 354 Health Economics (3 cr.)
- PBHL-H 401 Strategic Planning for Health Care Organizations (3 cr.)
- PBHL-H 420 Health Policy (3 cr.) **P: PBHL-H 320**
- PBHL-H 432 Health Care Marketing (3 cr.)
- PBHL-H 441 Legal Aspects of Health Care Administration (3 cr.) **OR**
  SPEA-V 376 Law and Public Policy (3 cr.)
- PBHL-P 400 Topics in Public Health (3 cr.)
- PBHL-H 456 Managed Care (3 cr.)
- PBHL-H 472 Applied Health Administration (3 cr.) **P: PBHL-H 474**
- SPEA-V 373 Human Resources Management in the Public Sector (3 cr.)
- PBHL-H380 Internship in Health Services Management (1-3 cr.)

Program Deviations - Course substitutions and course waivers must be approved by the faculty advisor.

RISE

The **RISE to the IUPUI Challenge** is a campus initiative that challenges students to include at least two of the four rise experiences (research, international, service learning, and experiential learning) into their academic programs of study. The Department of Public Health fully supports this initiative and encourages students to take advantage of these additional opportunities to enhance their intellectual and professional development. Students who participate in RISE will gain valuable skills, knowledge, and experiences valued by employers. After a student successfully completes at least two RISE experiences, a notation will be placed on the students official transcript recognizing this milestone. More information about the RISE initiative is available at http://academicaffairs.iupui.edu/plans/rise.cfm.

Bachelor of Science in Public Health - Environmental Health Science Major

The Bachelor of Science in Public Health (B.S.P.H.) degree combines a liberal arts education with a professional orientation. Students receive a broad general education in communications, arts and humanities, social sciences, natural sciences, and quantitative methods. The curriculum introduces students to the complex public health issues and environmental health problems facing contemporary society at the local, regional, national, and global levels. It fosters appreciation for the interdisciplinary nature of these issues and that problem-solving occurs in politically and culturally diverse environments. The curriculum develops students' critical thinking and problem-solving abilities, oral and written communication skills, and organizational skills so they are prepared to enter a broad range of organizations in a variety of entry level positions.

A student who is awarded the Bachelor of Science in Public Health – Environmental Health Science major will demonstrate the IUPUI Principles of Undergraduate Learning (PULs), which were initially approved in 1998 and revised in 2007 by the faculty (http://academicaffairs.iupui.edu/plans/pul/) and learning outcomes specific to the major.

The PULs, which underpin an IUPUI student's general education and permeate education in the major, tell our students and other stakeholders what an IUPUI undergraduate will know and be able to do upon graduation. The PULs provide the overarching learning outcomes for each student's education at IUPUI, and these, in turn, are linked to the learning outcomes for each degree program and for courses in each degree program.

BSPH Learning Outcomes

The B.S.P.H. - Environmental Health Science major prepares students to anticipate, recognize, evaluate, and solve problems in environmental science and health using knowledge, tools, and skills appropriate to entry- and mid-level environmental health science positions. The learning outcomes for the Environmental Health Science major are given below along with the PULs addressed in each learning outcome and the general education courses and courses in the major that support each learning outcome.

A student who graduates with the B.S.P.H. - Environmental Health Science major will demonstrate the mastery of the following learning outcomes:

1. Communicate effectively with diverse stakeholders individually and in group settings using verbal, written, and electronic modes of communication. (PUL 1)

Courses in the Major: SPEA-V170, V263/V366; PBHL-A416, A316, A460, A416, A380/A466

General Education Courses: ENG-W131, ENG-W231/BUS-X204/TCM-220; COMM-R110, C223; GEOG-G338; SPEA-V261/V360

2. Apply statistical and other quantitative analysis tools and techniques to identify, characterize, and manage issues and problems in environmental science and health. (PULs 1d and e, 2, 3, 4)

Courses in the Major: PBHL-A322, A459, A460, A423, A433, A451

General Education Courses: SPEA-K300 or approved statistics course, SPEA-V261/V369; GEOG-G338, MATH-15300, 15400

3. Anticipate, recognize, evaluate, and solve environmental science and health problems by applying scientific and technical knowledge and principles. (PULs 1, 2, 3, 4)

Courses in the Major: PBHL-A316, A416, A322, A459, A460, A410, A423, A428, A433, A451

General Education Courses: SPEA-K300; GEOG-G338; BIOL-N212/213, N251; PHYS-P201; CHEM-C105/125, 106/126, C341/343; two additional science courses

4. Monitor a community's environmental health status using epidemiological tools, laboratory techniques, and field methods appropriate to individual issues. (PUL1, 2,3, 4)

Courses in the Major: PBHL-A322, A459, A460, A380/A466

General Education Courses: BIOL-N251; PHYS-P201; CHEM-C105/125, 106/126, 341/343; SPEA-K300; GEOG-G338

5. Participate in developing and implementing plans and policies to improve environmental health using scientific and technical knowledge. (PULs 1, 2, 3, 4, 5, 6)

Courses in the Major: SPEA-V170, PBHL-A316, A416, A322, A459, A460, A423, A433, A451

6. Work effectively in a team-setting by applying organizational knowledge and leadership skills. (PULs 1, 2, 3, 4, 5, 6)

Courses in the Major: SPEA- V263/V366; PBHL-A316, A416, A459, A460, A380/A466

7. Recognize and demonstrate sensitivity to diverse points of view. (PUL 5)

Courses in the Major: SPEA-V170, V263/V366; PBHL-A316, A380/A466

General Education Courses: approved courses in the social sciences and humanities

8. Seek principled solutions to environmental health problems. (PUL 6)

Courses in the Major: SPEA-V170; PBHL- A322; A316, A416, A423; A433, A451, A460

General Education Courses: approved courses in the social sciences and humanities

Bachelor of Science in Health Services Management

The Bachelor of Science in Health Services Management (B.S.H.S.M) degree combines a liberal arts education with a professional orientation. Students receive a broad general education in communications, arts and humanities, social sciences, natural sciences, and quantitative methods. The curriculum introduces students to the complex issues involved in the delivery of health care at the local, regional, national, and global levels. It fosters appreciation for the interdisciplinary nature of these issues and that problem-solving occurs in political and culturally diverse environments. The curriculum develops students' critical thinking and problem-solving abilities, oral and written communication skills, and organizational skills so they are prepared to enter a broad range of organizations in a variety of entry level positions.

A student who is awarded the Bachelor of Science in Health Services Management degree will demonstrate the IUPUI Principles of Undergraduate Learning (PULs), which were initially approved in 1998 and revised in 2007 by the faculty.

The PULs, which underpin an IUPUI students general education and permeate education in the major, tell our students and other stakeholders what an IUPUI undergraduate will know and be able to do upon graduation. The PULs provide the overarching learning outcomes for each students education at IUPUI, and these, in turn, are linked to the learning outcomes for each degree program and for courses in each degree program.

B.S.H.S.M Learning Outcomes

Graduates of the Bachelor of Science in Health Services Management learn to anticipate, recognize, evaluate, and solve problems in health services organizations using knowledge, tools, and skills appropriate to entry- and mid-level health services management positions. The learning outcomes for the Health Services Management major are given below along with the PULs addressed in each learning outcome and the courses that address each learning outcome.

At student who graduates with the Bachelor of Science in Health Services Management degree will demonstrate the mastery of the following learning outcomes:

1. Communicate effectively with diverse stakeholders, including public health and health care professionals, individually and in group settings using verbal, written, and electronic modes of communication. (PUL 1)

Courses in the Major: PBHL-H120,H320, H322, H353, H401, H474, H316, H432, H441, H465, H380, H466; SPEA-V263,V362, V366, V348, V443, V491

2. Use statistical and other quantitative analysis tools and techniques to understand issues and problems in health care organizations and systems. (PUL 1d, 2; also PUL 3, 4)

Courses in the Major: PBHL-H352, H322, H316, H432; SPEA-V362

3. Use basic financial tools, principles and practices to review and analyze financial performance of organizations and implement controls as required.(PUL 1d, 2; also PUL 3,4)

Courses in the Major: PBHL-H352, H353

4. Apply human resource best practices for management of human capital in an organization. (PULs 4, 5)

Courses in the Major: SPEA-V366, V373, V443, V435

5. Use marketing concepts and skills to analyze markets, develop marketing plans, and measure the impact of marketing activities to raise awareness and increase growth of the organizations market share. (PULs 2, 3, 4)

Courses in the Major: PBHL-H432

6. Participate in developing and implementing plans and policies to improve the delivery of health services.(PULs 2, 3, 4, 5, 6)

Courses in the Major: PBHL-H320, H401; SPEA-V263, V362, V348, V379

7. Work individually and within a team-setting by applying organizational knowledge and leadership skills.(PULs 1, 2, 3, 4, 5, 6)

Courses in the Major: PBHL-H352, H353; SPEA-V263, V362, V366

8. Recognize and demonstrate sensitivity to diverse points of view. (PUL 5)

Courses in the Major: PBHL-H352, H354, H401, H420; SPEA-V362, V366,V443

9. Seek principled solutions to health services delivery issues. (PUL 6)

Courses in the Major: PBHL-H316, H320, H354, H401, H472, H474

Student Learning Outcomes

Bachelor of Science

- Health Services Management
- Public Health (Community Health Major)
- Public Health (Environmental Health Science Major)

Certificates and Minors

- Environmental Health Science Minor
- Environmental Studies Certificate
- Public Health Certificate

Certificates and Minors

Certificate in Environmental Studies

A student who earns the Certificate in Environmental Studies will demonstrate the following learning outcomes:

- Describe the major components of the Earth's systems and the role these play in environmental problems and solutions.
- Apply basic principles of chemistry, geology, and ecology to the identification of environmental problems and solutions.
- Identify key contaminants that pollute the air, land, water or the built environment and articulate common sources of these materials.
- Recognize how economics and finance contribute to the creation and solution of environmental problems.
- Describe techniques that are used to eliminate or control hazards that can cause harm to human health and the environment.

Certificate in Public Health

A student who earns the Certificate in Public Health will demonstrate the following learning outcomes:

- Describe contemporary environmental issues in terms of sources, effects, and solutions.
- Characterize the distribution of health effects from environmental contaminants using common epidemiological principles and techniques.
- Locate and interpret environmental regulations focused on air, land, or water pollution.
- Apply the commonly used mathematical and scientific principles to the identification and solution of environmental problems.

Minor in Environmental Health Science

A student who earns the Minor in Environmental Health Science will demonstrate the following learning outcomes:

- Describe the ways humans can have a negative impact on their environment.
- Identify contaminants and common sources of these contaminants that pollute the air, land, and water, and built environment.
- Explain ways humans are exposed to environmental pollution and the adverse effects it can have on health and safety.
- Explain the approaches that are used to assess the scope and extent of risk associated with environmental/occupational hazards.
- Describe the techniques that are used to eliminate or control hazards that can cause harm to human health and the environment**.**

Bachelor of Science in Public Health - Community Health Science Major

The B.S.P.H. major in Community Health will prepare students to provide health education, promote healthy lifestyles and healthy choices, prevent diseases, and enhance quality of life in communities. Students will obtain a foundation in understanding the social determinants of health, distribution of health and illness in diverse populations, and the disease risks among human populations.

The Community Health major focuses on interdisciplinary efforts to address the physical, social, behavioral, mental, and environmental health concerns of communities and population at risk for disease and injury. Graduates will plan and evaluate health services in communities. They will coordinate the community efforts of government agencies and private organizations.

Competencies

The competencies for the B.S.P.H. in Community Health are:

1. Assess individual and community needs for health education.
2. Plan health education strategies, interventions, and programs.
3. Implement health education strategies, interventions, and programs.
4. Conduct evaluation and research related to health education.
5. Administer health education strategies, interventions, and programs.
6. Serve as a health education resource person.
7. Communicate and advocate for health and health education.

Undergraduate Programs

General Information

The Department of Public Health offers undergraduate degrees, certificates, and minors.

Bachelor of Science Degrees

- Bachelor of Science in Public Health, Environmental Health Science major (accredited by the National Environmental Health Science and Protection Accreditation Council)
- Bachelor of Science in Health Services Management (B.S.H.S.M.)

Certificates

- Environmental Studies
- Public Health

Minors

- Environmental Health Science
- Health Systems Administration

General information concerning these programs can be obtained by linking to the undergraduate degree, certificate or minor in this bulletin or by visiting our Web site at http://www.pbhealth.iupui.edu/.

Admissions

Ph.D. Programs

- Ph.D. in Epidemiology
- Ph.D. in Health Policy and Management

Master's Programs

- Master of Health Administration (M.H.A.)
- Master of Public Health (M.P.H.)

Joint Degree Programs

- Master of Health Administration-Doctor of Jurisprudence (M.H.A.-J.D.)
- Master of Health Administration-Master of Business Administration (M.H.A.-M.B.A.)

Graduate Certificates

- Health Policy
- Health Systems Management
- Public Health

Certificate Admissions

Certificate in Health Policy

The Graduate Certificate in Health Policy adheres to the same admission criteria as the M.H.A Program. To view M.H.A admission criteria and how to apply, please visit M.H.A Admissions.

Certificate in Health Systems Management

The Graduate Certificate in Health Systems Management adheres to the same admission criteria as the M.H.A. Program. To view M.H.A. admission criteria and how to apply, please visit M.H.A. Admissions.

Certificate in Public Health

The Graduate Certificate in Public Health adheres to the same admission criteria as the M.P.H. Program. To view M.P.H. admission criteria and how to apply, please visit M.P.H. Admissions.

Dual Degree Admissions

Master of Health Administration-Doctor of Jurisprudence (M.H.A.-J.D.)

Applicants must apply for admission to each school and must meet the admission criteria published in each school's bulletin. Normally, applicants should apply to both the School of Law-Indianapolis and the Indiana University School of Medicine's Department of Public Health at the same time. However, a person enrolled in the School of Law may apply for admission to the Graduate Program in Health Administration up to the end of the second year of law study (approximately 57 credit hours). A student formally enrolled in the study of health administration may seek admission to the School of Law-Indianapolis up to the end of the first year of full-time study leading to the award of the Master of Health Administration (approximately 30 hours of graduate credit).

Department of Public Health M.H.A. Admissions
School of Law-Indianapolis J.D. Admissions

Master of Health Administration-Master of Business Administration (M.H.A.-M.B.A.)

To participate in the joint program, students must apply to and be accepted into both the Indiana University School of Medicine's Department of Public Health, Master of Health Administration program and the Indianapolis Kelley School of Business Master of Business Administration program.

Department of Public Health M.H.A. Admissions
Kelly School of Business-Indianapolis M.B.A. Admissions

M.H.A. Admissions

Application, admission, and degree-granting requirements and regulations shall be applied equitably to all individuals, applicants and students regardless of age, gender, race, disability, sexual orientation, religion or national origin. All applicants must have a bachelor's degree from an accredited university or college, show evidence of satisfactory preparation in math and computer skills and have acceptable academic record.

Fall Semester Deadlines: The deadline for submission for *International* applicants is February 1. The deadline for submission for *U.S.* applicants is July 15. Applications received after these dates will not be given priority.

Mandatory Orientation Dates and Times: Check the Department of Public Health's website for specific information. Under *Academic Programs* click *Master of Health Administration (M.H.A.),* on the right-hand navigation click *Admissions*.

Spring Semester Deadlines: The Master in Health Administration (M.H.A.) Program does not accept applications for admission in the spring term; students are admitted for matriculation in the fall only. The only exception to this is if the applicant has completed the Graduate Certificate in Health Systems Management from IU, in which case the applicant may be considered for spring admission.

Transfer Credit: Students transferring from an accredited program or school may transfer up to 9 credit hours of coursework, in which a grade of B or better was awarded, into the M.H.A. Program. To be considered for transfer credit, submission of the course syllabus and Request for Evaluation of Transfer Credit Form is required. Please note that a separate form must be completed for each course requesting to be evaluated for transfer. Students will be notified by mail regarding the results of their request(s) for transfer credit.

Click here and scroll down to access the Evaluation of Transfer of Credit Form.

Criteria for Applicants

Both International and U.S. Applicants must possess a baccalaureate degree from an accredited university or college, submit their official GRE scores, send in your official transcripts*, complete undergraduate courses in accounting,

microeconomics, and statistics, and show competency in communication skills (written and oral).

*__NOTE:__ If you attended any Indiana University campus, you do not need to send transcripts for your IU credits.

Students meeting the above requirements are not guaranteed admission. Other admission factors include references, the personal statement, and personal interview (if applicable).

Application Instructions

If you are applying to a dual program, please be sure to send copies of all documents to both programs. Students who have completed the Graduate Certificate in Health Systems Management or Health Policy and are applying to the M.H.A. program must complete a new application using new log in information. Your application will be reviewed by the M.H.A. Admissions Committee once all supporting documents and requirements have been met.

When filling out the online application, you must select either *Master of Health Administration* or *Graduate Certificate in Health Policy or Health Systems Managment* as the program of your choice.

Application Fee

International Applicants: Applicants who hold non-immigrant or exchange visas are required to submit application and application fee to the Office of International Affairs (OIA). Applicants with a US citizenship, Permanent Residency, Asylee or Refugee status with a foreign bachelor degree are required to submit application and application fee to the Office of International Affairs (OIA).

U.S. Applicants: A non-refundable $50.00 fee (only payable by American Express, Discover, MasterCard, or Visa) is required in order to process application.

Graduate Record Examination (GRE)

Applicants are required to submit official scores from the GRE taken within the past 5 years. A minimum total score (Verbal and Quantitative scores combined) of 1000 is expected of applicants. When submitting your GRE scores, use IUPUI school code 1325 and departmental code 0616. Information about the GRE is available at www.gre.org. The following exams can be substituted for the GRE: LSAT, GMAT, or MCAT. A petition to waive the GRE can be submitted with the application if individuals (1) already have a graduate or professional degree or (2) completed a graduate certificate from the IU Department of Public Health with a GPA of 3.5 or higher. Mail submitted score to:

IU Department of Public Health Admission
Master of Health Administration Program 714 N. Senate Avenue Suite 250 Indianapolis, IN 46202

The GRE is in the process of revising the scoring system. Visit www.GRE.org for more information.

Revised GRE Scoring System

*GRE revised General Test (taken on or after August 1, 2011)**

Measure	Scores Reported
Verbal Reasoning	130 - 170 (1 point increments)
Quantitative Reasoning	130 - 170 (1 point increments)
Analytic Writing	0 - 6 (half point increments)

*__NOTE:__ GRE® revised General Test Scores will be reported beginning in November 2011. View the detailed score reporting schedule. If no questions are answered for a specific measure (e.g., Verbal Reasoning), then you will receive a No Score (NS) for that measure. Scores are valid for five years.

*GRE General Test (taken prior to August 1, 2011)**

Measure	Scores Reported
Verbal Reasoning	200 - 800 (10 point increments)
Quantitative Reasoning	200 - 800 (10 point increments)
Analytic Writing	0 - 6 (half point increments)

*__NOTE:__ In November, a newly designed score report will be introduced when score reporting begins for the GRE revised General Test. For individuals who took the GRE General Test prior to August 1, 2011, the score report will include your Verbal Reasoning and Quantitative Reasoning scores on the 200-800 scale as well as estimated Verbal Reasoning and Quantitative Reasoning scores on the new 130-170 score scale.
If no questions are answered for a specific measure (e.g., Verbal Reasoning), then you will receive a No Score (NS) for that measure.

Test of English as a Foreign Language (TOEFL)

Applicants who are not native English speakers or who received their bachelor's degree outside the United States must submit official TOEFL scores (taken within the past two years) or proof of English proficiency. Scores can be sent to IUPUI School Code 1325 or mailed to:

IU Department of Public Health Admission
Master of Health Administration Program
714 N. Senate Avenue Suite 250
Indianapolis, IN 46202
The following TOEFL score is expected of applicants to the MHA program:

Internet-based TOEFL	minimum score: 106
Computer-based TOEFL	minumum score: 263
Paper-based TOEFL	minimum score: 620
IELTS	minimum score: 7

For more information on IUPUI TOEFL requirements, visit the Office of International Affairs. For more information about the TOEFL exam, visit www.toefl.org.

IUPUI English Placement Test

International students who reside in the U.S. at the time of application must submit either TOEFL, ILETS or IUPUI EAP (English for Academic Purposes) exam scores. International applicants who do not reside in the U.S. at the time of application must submit their TOEFL or ILETS scores with their application and, if admitted to the MHA Program, must also complete the EAP Exam upon arrival to Indianapolis. The USMLE and ECFMG do not fulfill the required proof of English proficiency when applying to the MHA Program. Applicants who have passed the USMLE or ECFMG must also submit TOEFL, ILETS or EAP scores.

For further information on the EAP, contact thehttp://liberalarts.iupui.edu/english/index.php/academics/eap/eap_home.

Personal Statement
The personal statement should be a minimum of 500 words and a maximum of 750 words in length and can be uploaded to the online application. In your own words, describe experiences that have shaped your interest in health administration. Indicate why you are interested in the MHA Program or Graduate Certificate in Health Policy or Health Systems Management. Outline your professional goals; immediate and long term. In your personal statement, it is imperative that you cite your sources if you include any statements or quotes that are not your original thought. All personal statements are submitted to www.turnitin.com by the Department of Public Health to ensure originality and proper citation.

Resume
Applicants must submit a resume. For each position on the resume, provide the job title, employing agency, dates employed, and responsibilities held. Indicate any additional strengths or skills such as fluency in foreign languages, research experience, teaching experience, community service and demonstration of leadership skills. Include professional certifications, honors, and awards. Please email your resume to pbhealth@iupui.edu or mail it to:

IU Department of Public Health Admission
Master of Health Administration Program
714 N. Senate Avenue Suite 250
Indianapolis, IN 46202

Transcripts
You will need to submit official transcripts, marksheets and diplomas from all colleges/universities attended. The IUPUI Office of International Affairs will evaluate your transcripts to determine if eligibility requirements for graduate study have been met. Official documents should be mailed to:

IU Department of Public Health Admission
Master of Health Administration Program
714 N. Senate Avenue Suite 250
Indianapolis, IN 46202

Recommendations
The MHA Program expects that at least three letters of recommendations will be submitted from professional sources that can provide an unbiased critical assessment of your abilities, skills, and strengths and weaknesses. Examples of professional and academic sources are academic advisors, professors, preceptors or immediate supervisors. Examples of sources that are not acceptable include coworkers, colleagues, classmates and relatives.

NOTE: All recommenders are required to provide an e-mail address for online submission. If electronic submission is not possible, click here and scroll down to access the MHA Recommendation Form. This link applies to both U.S. and International applicants.

Interview
A personal interview of required of any applicant who:

- has earned a undergraduate degree within the year they are applying or
- holds a baccalaureate degree earned outside the United States or
- is invited at the discretion of the Admission Committee.

Photo
Applicants are required to email a clear and visible 2 x 3 photo taken with the last 12 months to pbhealth@iupui.edu.

M.H.A. Supplemental Questions
M.H.A. applicants are also required to provide responses to supplemental questions. Click here and scroll down to access the Admissions Supplemental Questions. Email responses to pbhealth@iupui.edu.

M.P.H. Admissions
Application, admission, and degree-granting requirements and regulations shall be applied equitably to all individuals, applicants and students regardless of age, gender, race, disability, sexual orientation, religion or national origin. All applicants must have a bachelors degree from an accredited university or college, show evidence of satisfactory preparation in math and computer skills and have acceptable academic record.

Fall and Spring Semester Deadlines: To view the semester deadlines visit the Department of Public Health's website. Under *Academic Programs* click *Master of Public Health.* In the right-hand navigation click *Admission*.

Transfer Credit

Evaluation of Transfer or Credit Form

A non-CEPH accredited M.P.H. program
The Department of Public Health will consider up to 9 credit hours of graduate work for transfer into the MPH Program. Students transferring from a non-CEPH (Council on Education for Public Health) accredited program or school may transfer no more than 9 credit hours of coursework, in which a grade of B or better was awarded, into the M.P.H. Program. To be considered for transfer credit, submission of the course syllabus and Request for Evaluation of Transfer Credit Form is required. Please note that a separate form must be completed for each course requesting to be evaluated for transfer. Students will be notified by mail regarding the results of their request(s) for transfer credit.

A CEPH accredited M.P.H. program
Students transferring from a CEPH accredited program or school may transfer up to 15 credit hours of coursework, in which a grade of B or better was awarded, into the MPH Program. To be considered for transfer credit, submission of the course syllabus and Request for Evaluation of Transfer Credit Form is required. Please note that a separate form must be completed for each course requesting to be evaluated for transfer. Students will be notified by mail regarding the results of their request(s) for transfer credit.

Application, admission, and degree-granting requirements and regulations shall be applied equitably to all individuals, applicants and students regardless of age, gender, race, disability, sexual orientation, religion or national origin.All

applicants must have a bachelor's degree from an accredited university or college, show evidence of satisfactory preparation in math and computer skills and have acceptable academic record.

Criteria for Applicants

Both International and U.S. Applicants must possess a baccalaureate degree from an accredited university or college, submit their official GRE scores*, send in your official transcripts**, complete a minimum of one year of undergraduate mathematics (e.g. algebra, statistics or finite math), and show competency in communication skills (written and oral).

***NOTE:** Submit GRE scores if cumulative undergraduate GPA is below a 3.0 or if you are an international student.

**If you attended any Indiana University campus, you do not need to send transcripts for your IU credits.

Students meeting the above requirements are not guaranteed admission. Other admission factors include references, the personal statement, and personal interview (if applicable).

Application Instructions

If you are applying to a dual program, please be sure to send copies of all documents to both programs. Students who have completed the Graduate Certificate in Public Health and are applying to the MPH Program must complete a new application using new log in information.

When filling out the online application, you must select either *Master of Public Health*or *Graduate Certificate in Public Health*as the program of your choice. Your application will be reviewed by the MPH Admission Committee once all supporting documents and requirements have been met.

Application Fee

International Applicants: Applicants who hold non-immigrant or exchange visas are required to submit application and application fee to the Office of International Affairs (OIA). Applicants with a US citizenship, Permanent Residency, Asylee or Refugee status with a foreign bachelor degree are required to submit application and application fee to the Office of International Affairs (OIA).

U.S. Applicants: A non-refundable $50.00 fee (only payable by American Express, Discover, MasterCard, or Visa) is required in order to process application.

Graduate Record Examination (GRE)

Applicants with a GPA below a 3.0 or international applicants with a bachelor's degree earned a country outside the U.S. are required to submit official scores from the GRE taken within the past 5 years. The GRE is not required of applicants who have a graduate or professional degree from a U.S. or Canadian college or university. A minimum total score (Verbal and Quantitative scores combined) of 1000 is expected of applicants. When submitting your GRE scores, use IUPUI school code 1325 and departmental code 0616. Information about the GRE is available at www.gre.org. The following exams can be substituted for the GRE: DAT, ECFMG, LSAT, OAT, GMAT, MCAT, or USMLE. A petition to waive the GRE can be submitted with the application if individuals (1) already have a graduate or professional degree or (2) completed a graduate certificate from the IU Department of Public Health with a GPA of 3.5 or higher. Mail submitted score to:

IU Department of Public Health Admission 714 N. Senate Avenue Suite 250 Indianapolis, IN 46202
The following GRE scores are expected of applicants to the MPH program:

Verbal Reasoning	minimum score: 450
Verbal & Quantitative Combined	minimum score: 1000
Analytic Writing	4.0

The GRE is in the process of revising the scoring system. Visit www.GRE.org for more information.

Revised GRE Scoring System

*GRE revised General Test (taken on or after August 1, 2011)**

Measure	Scores Reported
Verbal Reasoning	130 - 170 (1 point increments)

*GRE General Test (taken prior to August 1, 2011)**

Measure	Scores Reported
Verbal Reasoning	200 - 800 (10 point increments)
Quantitative Reasoning	200 - 800 (10 point increments)
Analytic Writing	0 - 6 (half point increments)

***NOTE:** In November, a newly designed score report will be introduced when score reporting begins for the GRE revised General Test. For individuals who took the GRE General Test prior to August 1, 2011, the score report will include your Verbal Reasoning and Quantitative Reasoning scores on the 200-800 scale as well as estimated Verbal Reasoning and Quantitative Reasoning scores on the new 130-170 score scale.
If no questions are answered for a specific measure (e.g., Verbal Reasoning), then you will receive a No Score (NS) for that measure.

Test of English as a Foreign Language (TOEFL)

Applicants who are not native English speakers or who received their bachelor's degree outside the United States must submit official TOEL scores (taken within the past two years) or proof of English proficiency. Scores can be sent to IUPUI School Code 1325 or mailed to:

IU Department of Public Health Admission 714 N. Senate Avenue Suite 250 Indianapolis, IN 46202
The following TOEL score is expected of applicants to the MHA program:

Internet-based TOEFL	minimum score: 106
Computer-based TOEFL	minumum score: 263
Paper-based TOEFL	minimum score: 620
IELTS	minimum score: 7

For more information on IUPUI TOEFL requirements, review the Office of International Affairs section on English proficiency for graduate students. For more information about the TOEFL exam, visit www.toefl.org.

IUPUI English Placement Test

International students who reside in the U.S. at the time of application must submit either TOEFL, ILETS or IUPUI EAP (English for Academic Purposes) exam scores. International applicants who do not reside in the U.S. at the time of application must submit their TOEFL or ILETS scores with their application and, if admitted to the MHA Program, must also complete the EAP Exam upon arrival to Indianapolis. The USMLE and ECFMG do not fulfill the required proof of English proficiency when applying to the MPH Program. Applicants who have passed the USMLE or ECFMG must also submit TOEFL, ILETS or EAP scores.

For further information on the EAP, contact the http://liberalarts.iupui.edu/english/index.php/academics/eap/eap_home.

Personal Statement

The personal statement should be a minimum of 500 words and a maximum of 750 words in length and can be uploaded to the online application. In your own words, describe experiences that have shaped your interest in health administration. Indicate why you are interested in the MPH Program or Graduate Certificate in Public Health. Outline your professional goals; immediate and long term. In your personal statement, it is imperative that you cite your sources if you include any statements or quotes that are not your original thought. All personal statements are submitted to www.turnitin.comby the Department of Public Health to ensure originality and proper citation.

Resume

Applicants must submit a resume. For each position on the resume, provide the job title, employing agency, dates employed, and responsibilities held. Indicate any additional strengths or skills such as fluency in foreign languages, research experience, teaching experience, community service and demonstration of leadership skills. Include professional certifications, honors, and awards. Please email your resume to pbhealth@iupui.edu or mail it to:

IU Department of Public Health Admission 714 N. Senate Avenue Suite 250 Indianapolis, IN 46202

Transcripts

You will need to submit official transcripts, marksheets and diplomas from all colleges/universities attended. Your undergraduate cumulative GPA will be calculated based on all undergraduate transcripts. The IUPUI Office of International Affairs will evaluate your transcripts to determine if eligibility requirements for graduate study have been met. Official documents should be mailed to:

IU Department of Public Health Admission 714 N. Senate Avenue Suite 250 Indianapolis, IN 46202

Recommendations

The MPH Program expects that at least three letters of recommendations will be submitted from professional sources that can provide an unbiased critical assessment of your abilities, skills, and strengths and weaknesses. Examples of professional and academic sources are academic advisors, professors, preceptors or immediate supervisors. Examples of sources that are not acceptable include coworkers, colleagues, classmates and relatives.

NOTE: All recommenders are required to provide an e-mail address for online submission. If electronic submission is not possible, click here to download a pdf version of the MPH Recommendation Form.

Interview

A personal interview of required of any applicant who:

- has earned a undergraduate degree within the year they are applying or
- holds a baccalaureate degree earned outside the United States or
- is invited at the discretion of the Admission Committee.

The MPH Admissions Committee conducts interviews using Skype video conferencing for applicants who are unable to travel to Indianapolis for the interview. Skype is a free software application that allows users to connect through the internet to communicate. Note that applicants will need access to a webcam and microphone for the interview.

Skype System Requirements (taken from Skype website)

- PC running Windows 2000, XP, Vista or 7. (Windows 2000 users require DirectX 9.0 for video calls).
- Internet connection (broadband is best, GPRS is not supported for voice calls, and results may vary on a satellite connection).
- Speakers and microphone built-in or separate.
- For voice and video calls we recommend a computer with at least a 1GHz processor, 256 MB RAM and of course a webcam.
- For High Quality Video calls you will need a high quality video webcam and software, a dual-core processor computer and a fast broadband connection (384 kbps).

Photo

Applicants are required to email a clear and visible 2 x 3 photo taken with the last 12 months to pbhealth@iupui.edu.

Ph.D. Admissions

Application, admission, and degree-granting requirements and regulations shall be applied equitably to all individuals, applicants and students regardless of age, gender, race, disability, sexual orientation, religion or national origin.

Admission into a Department of Public Health Ph.D. Program is based on completion of a baccalaureate degree, although it is anticipated that many applicants will have completed a post baccalaureate degree in public health or other health related discipline.

Fall semester application deadline: December 15

All required application documents must be submitted by the Ph.D. program deadline, with the exception of recommendation letters, which may be submitted up to two weeks past the deadline.

Online Application Process

Online Application: To access the application for Department of Public Health Ph.D. Programs, go to the*IUPUI Graduate Office* home page http://www.iupui.edu/gradoff/, click on *Graduate Degree Programs and Admissions*, then *Online Application*.

If you already have an IU account, use your user name and password to log on to the application. If you do not have an IU account, create a guest account with a user name and password. When completing the online application, under "Educational Objectives" select "GRAD SCH-PUBLIC HEALTH-MED", then choose the appropriate Ph.D. Program as the major.

Personal Statement: The candidates personal statement should be approximately 750 words and must be uploaded to the online application. Please include the following components in your personal statement:

- Describe experiences that have shaped your interest in the Ph.D. Program area to which you are applying.
- Indicate why you are seeking doctoral training in the Ph.D. Program area.
- List the factors that led you to apply to the program.
- Include any interests you have in specific aspects of the Ph.D. Program area.
- Outline your professional goals, both immediate and long term.

Three Letters of Recommendation: The Department of Public Health expects that at least three letters of recommendations will be submitted with your application to a Ph.D. Program. These letters should be from professional sources that can provide an unbiased, current and critical assessment of your abilities, skills, and strengths and weaknesses related to successfully completing a doctoral program.

Examples of professional sources are academic advisors, professors, preceptors or immediate supervisors. Examples of sources that are not acceptable include coworkers, colleagues, classmates, family acquaintances and relatives.

The Department of Public Health requests that letters of recommendation be submitted electronically through the online application. The online application asks applicants to supply e-mail addresses for their referees. When the applicant submits the application, the system automatically sends recommendation forms to the referees. After completing the form, referees return them to the IUPUI Graduate Office via e-mail.

Submission of Documents

The following documents are required to be submitted directly to the Department of Public Health:

- Official transcripts from all colleges and universities attended.
- A copy of your current resume or CV.
- Scores on the GRE*, MCAT, LSAT, GMAT, DAT or other graduate entrance exam.
- TOEFL score for applicants whose native language is not English.
- Sample of scholarly writing (Required for the Health Policy and Management Ph.D. Program only) Applicants to the Ph.D. Program in Health Policy and Management must submit an electronic copy of a course paper or published article in which the applicant is the sole author.

Applicants should request that their test scores be mailed directly to IUPUI from the testing service. The IUPUI code is 1325. If possible, all other documents should be e-mailed to Suzanne Hancock, suehanco@iupui.edu. If e-mail transmission is not possible, hard copies of the documents can be mailed to:

IU Department of Public Health

Attn: Student Services Ph.D.Programs

714 N. Senate Avenue, Suite EF250 Indianapolis, IN 46202
***NOTE:** The Graduate Record Examination (GRE) is undergoing a major revision in 2011. After July 31, the old test will no longer be available. The revised test will be offered beginning August 1. Test scores for the new test will not be available until late November. Applicants can take the GRE during the months of August and September for a 50% discount. See the ETS GRE website for further details.

The GRE is in the process of revising the scoring system. Visit the ETS GRE website for more information.

Revised GRE Scoring System

*GRE revised General Test (taken on or after August 1, 2011)**

Measure	Scores Reported
Verbal Reasoning	130 - 170 (1 point increments)
Quantitative Reasoning	130 - 170 (1 point increments)
Analytic Writing	0 - 6 (half point increments)

***NOTE:** GRE® revised General Test Scores will be reported beginning in November 2011. View the detailed score reporting schedule. If no questions are answered for a specific measure (e.g., Verbal Reasoning), then you will receive a No Score (NS) for that measure. Scores are valid for five years.

*GRE General Test (taken prior to August 1, 2011)**

Measure	Scores Reported
Verbal Reasoning	200 - 800 (10 point increments)
Quantitative Reasoning	200 - 800 (10 point increments)
Analytic Writing	0 - 6 (half point increments)

***NOTE:** In November, a newly designed score report will be introduced when score reporting begins for the GRE revised General Test. For individuals who took the GRE® General Test prior to August 1, 2011, the score report will include your Verbal Reasoning and Quantitative Reasoning scores on the 200-800 scale as well as estimated Verbal Reasoning and Quantitative Reasoning scores on the new 130-170

score scale. If no questions are answered for a specific measure (e.g., Verbal Reasoning), then you will receive a No Score (NS) for that measure.

Review of Application

Applications will be carefully reviewed by the respective Admission Committee after the program deadline, if the application file is complete.

On-site Interview

- **In-person interview:** Applicants will be invited to participate in an in-person interview with several members of the Admission Committee. Alternative arrangements may be provided for applicants unable to be interviewed in-person.
- **Completion of an on-site essay:** Applicants participating in the interview process may be asked to write a short essay on a specific topic assigned to them using Microsoft Word. The purpose of this step is to allow the Admissions Committee to assess the applicant's English writing skills.

Pre-requisite Coursework

The Admissions Committee will determine each applicants acceptance or non-acceptance into the Ph.D. program by using the following selection criteria:

- **Scientific Leadership Potential:** Assessed by the applicants resume / curriculum vita, personal statement, and personal interview.
- **Ability to Engage in Advanced Graduate Work:** Assessed by the applicants personal interview, evaluation of letters of recommendation, overall grade point average in prior graduate work, and scores from the GRE or other graduate entrance exams.
- **Learning Goals and Objectives:** Assessed by the applicants personal statement and personal interview.

Graduate Programs

At the graduate level, students can pursue advanced study in public health through doctoral and master degrees and certificates and minors.

The 90 credit Doctor of Philosophy (Ph.D.) degrees in Epidemiology, Health Policy and Management, and Biostatistics can be completed on a part-time or full-time basis. To learn more about the three Ph.D. programs, visit www.pbhealth.iupui.edu.

The 45 credit Master of Public Health (M.P.H.) degree offers five concentrations: Epidemiology, Social and Behavioral Sciences, Health Policy and Management, Biostatistics, and Environmental Health Science. The M.P.H. program is fully accredited by the Council on Education for Public Health. To learn more about the program, visit www.pbhealth.iupui.edu.

The 51 credit Master of Health Administration (M.H.A.) degree offers advanced study in health administration. This is the only M.H.A. program in Indiana accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). The M.H.A. program is also a member of the Association of University Programs in Health Administration. To learn more about the M.H.A. program, visit the www.phhealth.iupui.edu.

The following joint degrees and coordinated curricula are offered on the IUPUI campus:

- M.D./M.P.H.
- D.D.S./M.P.H.
- M.S.W./M.P.H.
- M.H.A./M.P.H.
- M.S. in Bioethics/M.P.H.
- J.D./M.P.H.
- J.D./M.H.A.
- M.B.A./M.H.A.

Graduate certificate programs include the Graduate Certificate in Public Health (15 credits), the Graduate Certificate in Health Policy (17-18 credits), and the Graduate Certificate in Health Services Management (15 credits). To learn more about the Graduate Certificate Program, visit www.phhealth.iupui.edu.

The 12 credit minors are available to students currently enrolled in doctoral programs. To learn more about the doctoral minors available in six different areas, visit www.phhealth.iupui.edu.

Certificate Programs

Three graduate certificates are offered by the Department of Public Health at IUPUI: Certificate in Public Health, Certificate in Health Policy, and Certificate in Health Systems Management. Certificate programs are flexible and adaptable to the needs of either pre-career or in-service students. Program descriptions, admission requirements and curriculum requirements are available at the Graduate Certificate Program page.

Application, admission, and certificate-granting requirements and regulations of educational programs offered by the Department of Public Health are applied equitably to all individuals, applicants and students regardless of age, gender, race, disability, sexual orientation, religion or national origin.

Certificate in Public Health

The Graduate Certificate in Public Health is a 15-credit-hour program of study. The certificate program is designed to meet the needs of public health professionals who are seeking the opportunity to continue their education while working. This program consists of evening classes and is available to US citizens and permanent residents.

In order to receive the Graduate Certificate in Public Health, students must complete 15 credit hours of the approved public health course work with a minimum cumulative GPA of 3.0 (“B” grade on a 4.0 scale). The five core courses comprise the Graduate Certificate curriculum requirements. Transfer credit or course waivers are not allowed as substitution for any courses in the certificate program.

Students who have been awarded a Graduate Certificate in Public Health have two years to apply their credits toward the MPH degree. Graduates of the certificate program who do not apply to the MPH Program within two years after completion of the certificate program are not eligible to apply their 15 credits from the certificate program toward the MPH Program on the IUPUI campus. Admission to or successful completion of a certificate program does not guarantee subsequent admission to the MPH Program.

The 15 credit Graduate Certificate in Public Health consists of coursework in the five core areas of public health.

- **P517**: Fundamentals of Epidemiology (3cr)
- **P519**: Environmental Science in Public Health (3cr)
- **P500**: Social and Behavioral Science in Public Health (3cr)
- **P504**: U.S. Health Care Systems and Health Policy (3cr)
- **P551**: Biostatistics for Public Health I(3cr)

Certificate in Health Policy

Students in this 17-18 credit hour program complete courses taught by faculty from the Indiana University Schools of Medicine, Law, Nursing, Public and Environmental Affairs, and Liberal Arts.

Certificate in Health Systems Management

This 15 credit hour program provides health care professionals with the opportunity to further their understanding of the historical, economic, financial, and strategic aspects of the health care industry.

Master of Health Administration

The graduate program in health administration is offered by Indiana University School of Medicine's Department of Public Health. Recognized for its outstanding faculty, professional integration, and strong business ethics, the Indianapolis program reflects the exciting frontiers of the contemporary health care industry.

This advanced program attracts professionals and students interested in a variety of leadership opportunities in hospitals, managed care, ambulatory care, and voluntary health agencies. Opportunities also exist in consulting firms, corporate health programs, insurance, government, and other regulatory agencies. The program is fully accredited by the Commission on Accreditation of Healthcare Management Education and is a member of the Association of University Programs in Health Administration.

Approximately one-third of the students in the program have professional backgrounds; the remaining two-thirds come directly from undergraduate programs. In the classroom, this mix creates a dynamic environment of fresh perspectives and practical experience. The versatile faculty teach a rigorous interdisciplinary curriculum interwoven with current research and events. The M.H.A. program requires 51 graduate semester credit hours.

A summer internship between the first and second year of study is an excellent opportunity to learn from a health industry leader. The internship offers students valuable experience in the health care field and is an excellent opportunity to blend academic preparation with hands-on experience. Positions are available throughout the United States.

As an option, students may choose an administrative residency, a 10-12 month paid residency that can assist in the transition from classroom to workplace through intensive exposure to a selected management career. It blends academic preparation with administrative practice. Students with little health administration experience may find the residencies beneficial. Residents are selected through competitive application processes.

A mentorship program utilizing local M.H.A. alumni and friends of the school gives students the opportunity to meet a variety of practicing health care professionals. Mentors are available in all segments of the health care field and range from recent graduates to corporate officers and senior public officials.

Our students are successfully competing for national administrative fellowships after graduation. Fellowships have been awarded to M.H.A. program graduates from institutions that include Good Samaritan Health System in Nebraska; Winston Fellowship and Washington Hospital Group in Washington, D.C.; Baylor Medical Center in Houston; Cleveland Clinics in Cleveland; and the American College of Healthcare Executives in Chicago. Most fellowships provide a two-year paid administrative experience.

Admissions

In addition to the general requirements for admission to graduate study in Indiana University School of Medicine's Department of Public Health, the following requirements generally must be met for admission to the Graduate Program in Health Administration:

1. Applicants must possess an undergraduate degree from an accredited institution and have a minimum overall undergraduate grade point average (GPA) of 3.0 (B) on a 4.0 scale. Applicants with a minimum GPA of 3.0 during the last half of their undergraduate education are shown preference, however a 3.0 GPA does not guarantee admission.
2. Applicants must complete at least 3 credit hours each of undergraduate courses in introductory accounting, microeconomics, and statistics at an accredited institution with a minimum grade of C in each course. Students who have not completed these courses but who meet all other requirements may be accepted with deficiencies. These students are not usually permitted to enroll in the classes that require these courses as prerequisites until the deficiencies are removed.
3. Applicants must take the Graduate Record Examination (GRE) and achieve a composite score of at least 1,000 total in the quantitative and verbal sections or a GMAT total score of at least a 500. Note that achieving these scores does not guarantee admission. An applicant

with a GRE score lower than 500 in any section may be required to participate in special academic counseling and evaluation prior to any admission decision. Additional course work may be required, and admission as a provisional student may be stipulated. Applicants who have been awarded an advanced degree may petition the admissions committee for waiver of the GRE requirement.

Mid-Career Credit Option

The Graduate Admissions Committee of the Indiana University School of Medicine's Department of Public Health may grant up to a maximum of 12 credit hours toward the *MHA* degree for students who have had **significant professional level work experience** in management and policy development. "Professional" level work is that requiring extensive education or specialized training (e.g., at least an undergraduate degree) and gives substantial control over the manner in which it is done to the person performing it.

Credit will be granted for work experience gained before the student completes *36* credit hours of course work in the MHA program.

The following guidelines will be used by the Admissions Committee to award these credits:

1. To receive **THREE** (3) credit hours, a student must have had one to three year's professional experience in policy development or management with a health care organization in any of the following areas:
1. Directing programs
2. Preparing budgets
3. Making decisions on organizational or staff development
4. Analyzing, developing and evaluating policies
5. Conducting public or legislative relations programs
6. Program planning

2 To receive **SIX** (6) credit hours, a student must have had three to five years of managerial experience in a healthcare organization that includes significant responsibility for at least two of the following:
1. Directing programs
2. Preparing budgets
3. Making decisions on organizational or staff development
4. Analyzing, developing and evaluating policies
5. e. Conducting public or legislative relations programs
6. Program planning

Credit hours will be given in the MHA program only for managerial experience*.*

3 To receive **NINE** (9) credit hours, a student must have had at least five years of in a health care organization for at least four of the following:
1. Directing programs
2. Preparing budgets
3. Making decisions on organizational or staff development
4. Analyzing, developing and evaluating policies
5. Conducting public or legislative relations programs
6. Program planning

This experience must include supervising a significant number of staff, including other supervisors, managers or contract employees. ***Credit hours will be given in the MHA program only for managerial experience****.*

4 **TWELVE** (12) credit hours may be awarded by the Admissions Committee *in exceptional circumstances* to students who have had at least ten years of for multiple areas *of a health care organization.*

Credit hours will be given in the MHA program only for managerial experience.

Application Process and Policies Students are eligible to apply for Mid-Career credit at the time of application for graduate study or until they have competed *36* hours of course work in the MHA program. Professional experience acquired after the completion of *36* hours of course work in the MHA program will not be considered in awarding Mid-Career credit. Students may be awarded more Mid-Career credit than they can use to fulfill their degree requirements.

Tuition Charge for MCO Credit For every three credit hours of Mid-Career credit awarded, students will be charged for **one** (1) credit hour at the tuition-rate applicable to them.

Degree Requirements (51 credit hours)

A minimum of 51 credit hours, divided between required and elective courses, is required in the Master of Health Administration degree program. The M.H.A. curriculum begins with a foundation of theory and skill-building courses and makes a transition to course work that requires practical application of those skills in a variety of health care settings.

Part-time students must complete at least 6 credit hours each semester to remain in good standing. All students must complete the program's academic requirements within five calendar years of matriculation.

Required courses (45 credit hours):

- PBHL-H 501 U.S. Health Care: Systems, Policies, and Ethical Challenges (3 cr.)
- PBHL-H 502 Developing Strategic Capability in Health Care (3 cr.)
- PBHL-H 507 Management of Individual and Group Behavior (3 cr.)
- PBHL-H 508 Managing Health Care Accounting Information for Decision Making (3 cr.)
- PBHL-H 509 Financial Management Principles of Health Care (3 cr.)
- PBHL-H 514 Health Economics (3 cr.)
- PBHL-H 516 Health Services Delivery and the Law (3 cr.)
- PBHL-H 518 Statistical Methods for Health Services (3 cr.)
- PBHL-H 521 Management Science for Health Services Administration (3 cr.)
- PBHL-H 612 Marketing Health Services Delivery (3 cr.)
- PBHL-H 623 Health Care Applications of Strategic Management (3 cr.)

- PBHL-H626 Health Services Human Resources Management (3 cr.)
- PBHL-H 628 Health Care Information Systems (3 cr.)

One of the following courses:

- PBHL-H 700 Residency (3-6 cr.) **OR**
- PBHL-H 702 Internship in Health Services Management (3 cr.) **OR**
- PBHL-H 735 Research in Health Administration (3-6 cr.)

Electives (6-9 credit hours):

Management Electives:

- PBHL-H 510 Health Services Financial Management (P: H 509) (3 cr.)
- PBHL-H 606 Health Services Quality Improvement and Risk Management (3 cr.)
- SPEA-V 566 Executive Leadership (3 cr.)
- SPEA-V 639 Managing Government Operations (3 cr.)
- SPEA-E 533 Environemental Management Systems: ISO 14001 Based (3 cr.)
- PBHL-H 640 Topics in Health Services Administration (with advisor's approval) (3 cr.)
- PBHL-H 630 Readings in Health Services Administration (3 cr.)
- BUS-X 572 Value Chain in Health Care (3 cr.) (with approval of Kelley School of Business)
- INFO-I 502 Informatics Management (3 cr.) (with approval of School of Informatics)
- INFO-I 530 Seminar in Health Information Applications (3 cr.) (with approval of School of Informatics)
- JOUR-J 528 Public Relations and Research (3 cr.) (P: J 321 or instructor's approval)

Policy Electives:

- PBHL-H 515 Seminar in Health Policy: Special Topics (3 cr.) **OR** PBHL-P 611 Policy Design Implementation and Management (3 cr.)
- PBHL-H 517 Managerial Epidemiology (3 cr.)
- PBHL-H 615 Health Care Outcomes and Decision Making (3 cr.)
- SPEA-V 512 Public Policy Process (3 cr.)
- SPEA-V 541 Benefit-Cost Analysis (3 cr.)
- SPEA-V 562 Public Program Evaluation (3 cr.)
- SPEA-P 525 Geographical Information Systems for Planning (3 cr.)
- SPEA-P 527 Planning Applications of Geographical Information Systems (P: P525) (2 cr.)
- SPEA-H 640 Topics in Health Services Administration (3 cr.)
- SPEA-H 630 Readings in Health Services Administration (3 cr.)
- PHIL-P 547 Foundations of Bioethics (3 cr.)
- SOC-R 515 Sociology of Health and Illness (3 cr.)

Nonprofit electives:

- SPEA-V 521 The Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)
- SPEA-V 557 Proposal Development and Grant Administration (3 cr.)
- SPEA-V 558 Fund Development for Nonprofits (3 cr.)
- PBHL-H 640 Topics in Health Services Administration (3 cr.)
- PBHL-H 630 Readings in Health Services Administration (3 cr.)
- ECON-E 514 The Nonprofit Economy and Public Policy (3 cr.)
- BUS-A 508 Accounting for Nonprofit Organizations (3 cr.) (with approval of Kelley School of Business)

Note: Other graduate-level electives may be approved by a faculty advisor.

Course Waivers, Substitutions, and Challenge Examinations

Students may petition the program director to waive or make substitutions for required courses based on completion of satisfactory equivalent course work or by examination (if available). The following guidelines govern the consideration of these types of petitions.

Waivers of Required Courses The requirement for a particular course may be waived if the student furnishes evidence of equivalent graduate course work completed within a reasonable period of time from an accredited institution. It should be noted that credit is not given with a waiver-only an exemption from a particular course; another course is always substituted.

Substitutions As a general rule, the substitution of a course for one that is required in the M.H.A. curriculum is prohibited. On rare occasions, petitions for substitutions may be considered, and students who believe they would benefit from such a procedure should discuss the matter with their advisors.

Challenge Examination Students who believe they possess mastery of the subject matter stipulated in a given required course may request a challenge examination. If, in the opinion of the faculty, the student has demonstrated the requisite knowledge, academic credit for the course is authorized. The university fee structure for the cost of such an examination applies.

Master of Health Administration–Doctor of Jurisprudence (M.H.A.-J.D.)

The Indiana University School of Medicine's Department of Public Health and the School of Law-Indianapolis have established a four-year, full-time program for the combined study of law and health administration. This course of study addresses the need for professionals who understand the legal and administrative frameworks necessary to function successfully as a health lawyer or a health services administrator.

The Master of Health Administration (M.H.A.) and the Doctor of Jurisprudence (J.D.) are awarded when the student meets the degree requirements of both schools. All courses are offered on the Indianapolis campus. Successful completion of this rigorous 127-credit-hour program provides the graduate sufficient depth and breadth in each discipline to be able to function effectively in the swiftly changing health field.

The delivery of health care and health services is the second largest industry in the United States, accounting for almost 14 percent of the gross national product. The importance of health care to our citizens has long been obvious.

What has become more apparent recently, however, is the growing impact of case law, statutes, and regulations on access to and availability of care; on the delivery of health care services; and, increasingly, on decisions relating to the appropriateness of individual treatment. For this reason, the Schools of Law and Indiana University School of Medicine's Department of Public Health have sought jointly to develop a strong academic curriculum to address the educational needs of health lawyers and health service administration executives as they seek to serve the public's needs.

Application and Admission

Applicants must apply for admission to each school and must meet the admission criteria published in each school's bulletin. Normally, applicants should apply to both the School of Law-Indianapolis and the Indiana University School of Medicine's Department of Public Health at the same time. However, a person enrolled in the School of Law may apply for admission to the Graduate Program in Health Administration up to the end of the second year of law study (approximately 57 credit hours). A student formally enrolled in the study of health administration may seek admission to the School of Law-Indianapolis up to the end of the first year of full-time study leading to the award of the Master of Health Administration (approximately 30 hours of graduate credit).

Academic Standing Grade point averages in the School of Law-Indianapolis and the Indiana University School of Medicine's Department of Public Health are computed separately. To continue in the joint program, the student must meet the academic standards in each school. A student failing in one school but meeting academic standards in the other may complete course work for the degree in the school in which the student is able to meet the academic standards. Such completion must be according to the same conditions (credit hours, internship, etc.) required of regular (noncombination) degree candidates. Students are eligible for honors in each school based on the criteria of each school.

Residency The student customarily completes the first 34 credit hours in the School of Law-Indianapolis. Thereafter, the student divides the remaining course work between the two schools, taking health administration courses and law courses concurrently. Thus, the student has a continuing educational experience in both schools.

Program Requirements (127 credit hours)

M.H.A. Requirements (45 credit hours)

Students must complete 43.5 credit hours distributed among the M.H.A. required core, electives, and a joint research paper.

Required Courses (34.5 credit hours):

- PBHL-H 501 U.S. Health Care: Systems, Policies, and Ethical Challenges (3 cr.)
- PBHL-H 502 Developing Strategic Capability (3 cr.)
- PBHL-H 507 Management of Individual and Group Behavior (3 cr.)
- PBHL-H 508 Managing Health Care Accounting Information for Decision Making (3 cr.)
- PBHL-H 509 Financial Management Principles of Health Care (3 cr.)
- PBHL-H 514 Health Economics (3 cr.)
- PBHL-H 518 Statistical Methods for Health Services (3 cr.)
- PBHL-H 521 Management Science for Health Services Administration (3 cr.)
- PBHL-H 612 Marketing for Health Services Delivery (3 cr.)
- PBHL-H 623 Health Care Applications of Strategic Management (3 cr.)
- PBHL-H 626 Health Services Human Resources Management (3 cr.)
- PBHL-H 628 Health Care Information Systems (3 cr.)

Elective Courses (6 credit hours):

Six credit hours of elective courses, chosen from the following:

- PBHL-H 510 Health Services Financial Management (3 cr.)
- PBHL-H 515 Seminar in Health Policy: Special Topics (3 cr.)
- PBHL-H 517 Managerial Epidemiology (3 cr.)
- PBHL-H 615Health Care Outcomes and Decision Making (3 cr.)
- PBHL-H 630 Readings in Health Services Administration (1-3 cr.)

Joint Research Paper (6 credit hours):

PBHL-H 735 Research in Health Administration is to be completed in the last year of the combined program and jointly supervised by advisors from both schools.

J.D. Requirements (82 credit hours)

Students are required to complete 82 credit hours of law courses and to satisfy all requirements for the Doctor of Jurisprudence degree.

Master of Health Administration–Master of Business Administration (M.H.A.-M.B.A.)

The combined M.H.A.-M.B.A. program enables the student to take a sequence of courses leading to the attainment of both degrees. Successful completion of this 78-credit-hour program provides the graduate student with sufficient depth and breadth in each discipline to function effectively in a health care delivery system that is driven by business principles.

Admissions To participate in the joint program, students must apply to and be accepted into both the Indiana University School of Medicine's Department of Public Health, Master of Health Administration program and the Indianapolis Kelley School of Business Master of Business Administration program.

Academic Standing Grade point averages for the two schools are computed separately. To continue in the joint

program, the student must meet the academic standards in each school. Students failing in one school but meeting academic standards in the other school may complete work for the degree in the school in which they are able to meet the standards. Such completion must be upon the same conditions as required of regular (noncombination) degree candidates. Students are eligible for honors in each school based on the criteria of each school.

Program Advisors Once students have been accepted into this joint degree program, they should meet with academic advisors to plan course sequencing. All M.B.A. core courses must be taken as intact modules. Full-time students typically take two M.H.A. and two M.B.A. courses each semester. Part-time students take either two M.H.A. or two M.B.A. courses each semester. Since M.B.A. courses must be taken as a cohort, part-time students will need to sequence all the M.B.A. courses in a block.

Program Requirements (78 credit hours)

The following degree requirements are required of all students admitted to the program.

M.H.A. Requirements (39 credit hours)

Students are required to complete 34.5 credit hours of SPEA courses and to satisfy all requirements for the joint degree.

- PBHL-H 501 U.S. Health Care: Systems, Policies, and Ethical Challenges (3 cr.)
- SPEA-H 502 Developing Strategic Capability in Healthcare (3 cr.)
- PBHL-H 507 Management of Individual and Group Behavior (3 cr.)
- PBHL-H 508 Managing Health Care Accounting Information for Decision Making (3 cr.)
- PBHL-H 509 Financial Management Principles in Healthcare (3 cr.) (P: UG accounting)
- PBHL-H 510 Health Services Financial Management (3 cr.)
- PBHL-H 514 Health Economics (3 cr.)
- PBHL-H 516 Health Services Delivery and the Law (3 cr.)
- PBHL-H 518 Statistical Methods for Health Services (3 cr.)
- PBHL-H 612 Marketing Health Services Delivery (3 cr.)
- PBHL-H 623 Health Care Applications of Strategic Management (3 cr.)
- PBHL-H 627 Seminar in Advanced Health Finance (3 cr.)
- PBHL-H 702 Internship in Health Services Management (3 cr.) **OR**
- PBHL-H 735 Research in Health Administration (3-6 cr.)

M.B.A. Requirements (39 credit hours)

Students are required to complete 39 credit hours of business administration courses and to satisfy all requirements for the joint degree. For specific guidelines, see the Indianapolis Kelley School of Business Graduate Bulletin.

Degree Programs

Ph.D. Programs

- Ph.D. in Epidemiology
- Ph.D. in Health Policy and Management

Master's Programs

- Master of Health Administration (M.H.A.)
- Master of Public Health (M.P.H.)

Joint Degree Programs

- Master of Health Administration-Doctor of Jurisprudence (M.H.A.- J.D.)
- Master of Health Administration-Master of Business Administration (M.H.A.- M.B.A.)

Graduate Certificates

- Health Policy
- Health Systems Management
- Public Health

Master of Public Health

The Indiana University MPH Program is a unique program which can be completed on a part-time basis in three years, or on a full-time basis in two years. Most of the required MPH courses are offered in the evening to allow working professionals the opportunity to continue their education. Through case studies, group and individual projects, and internships, students will explore public health problems and issues, learn how to think critically and work in teams. Courses are taught by scholars and practitioners drawn from many disciplines and perspectives.

Application, admission, and degree-granting requirements and regulations of educational programs offered by the Department of Public Health are applied equitably to all individuals, applicants and students regardless of age, gender, race, disability, sexual orientation, religion or national origin.

The MPH Program at IU School of Medicine is fully accredited by the Council on Education for Public Health.

Concentrations

Epidemiology

Concentration Advisors:
Gregory Steele, Dr.PH., MPH
Marie Swanson, PhD., MPH
, DrPH
, SciD
, MD, PhD

This concentration will prepare students to integrate the social, biological, environmental and analytic approaches to understanding determinants of health in populations. The principles and methods of epidemiology constitute a foundation essential for policy development related to surveillance activities and prevention strategies. Students will learn how to design and conduct studies, analyze data, and present findings in a variety of formats and for diverse audiences.

For more information about our Epidemiology program, click here.

Environmental Health

Concentration Advisors:

, HSD
, PhD

Students enrolled in this concentration learn to anticipate, recognize and assess environmental hazards that affect human health. Students study the impact of biological, physical and chemical factors on the health of communities. Students will acquire the skills necessary to identify susceptibility and intervention factors that lead to disease and/or its prevention.

For more information about our Environmental Health program, click here.

Health Policy and Management

Concentration Advisor: Cynthia Stone, Dr PH., MPH, RN
Nan Rong, PhD, MPH
Eric Wright, PhD

Students in this concentration will acquire skills in policy process, development and analysis. They will explore in depth current national and state public health issues and make policy recommendations to address those issues. In addition, they will develop strategic capability for managing health services organizations in a policy context.

For more information about our Health Policy and Management program, click here.

Social and Behavioral Sciences

Concentration Advisors:
David Everetts, MD, MPH
Silvia M. Bigatti, PhD
Lisa Hess, PhD

This concentration will prepare students to use behavioral science and educational content and research methods in the development, implementation, and evaluation of interventions designed to affect health behaviors in populations. Health assessment and program planning and evaluation are essential in understanding the psychosocial factors associated with health status. Students will learn how to use research, communications, and management tools to solve health problems in various professional settings including clinical, school, work site and community programs.

For more information about our Social and Behavioral Sciences program, click here.

Biostatistics (beginning Fall 2011)

Biostatistics is the development and application of statistical reasoning and methods in addressing, analyzing and solving problems in public health; health care; and biomedical, clinical and population-based research.

Student Learning Outcomes

- Epidemiology (Ph.D.)
- Health Policy and Management (Ph.D.)
- Master of Health Administration (M.H.A.)
- Master of Public Health (M.P.H.)
- Health Policy Certificate
- Health Systems Management Certificate
- Public Health Certificate

Doctor of Philosophy in Epidemiology (Ph.D.)

Upon completion of this Ph.D. program, graduates will have acquired the competency to:

- Design investigations of acute and chronic conditions as well as other adverse health outcomes in targeted populations.
- Analyze and evaluate data from epidemiologic investigations and surveillance systems.
- Differentiate special populations by race, ethnicity; culture; societal, educational, and professional backgrounds; age; sex; religion; disability; and sexual orientation.
- Critically evaluate results of epidemiologic studies, including analyses, interpretation and conclusions.
- Use current knowledge of causes of disease to guide epidemiologic practice.
- Prepare written and oral reports and presentations to effectively communicate necessary information to professional audiences, policy makers, and the general public.
- Develop community partnerships to support epidemiologic investigations.
- Prepare proposals for extramural peer-reviewed funding.
- Promote and model ethical conduct in epidemiologic practice.
- Bring epidemiologic perspectives to the development and analysis of public health policies.

Doctor of Philosophy in Health Policy and Management (Ph.D.)

Upon completion of this Ph.D. program, graduates will have acquired the competency to:

- Demonstrate in-depth knowledge of the history, structure, and operation of health care systems domestically and internationally.
- Understand and apply bioethical principles and theories and utilize them in research, policy and practice.
- Design and conduct health policy and services research studies.
- Access, manage and utilize administrative and other secondary data sources in research studies.
- Prepare grant applications and manage research projects.
- Analyze and evaluate policies and programs.
- Utilize and report the results of advanced quantitative and qualitative data analysis.
- Interpret and report the findings of original research for scholarly audiences.
- Translate and apply findings from original and existing research in policy and practice.
- Educate and train students and professionals about health policy and management.

Master of Health Administration (M.H.A.)

Upon completion of this Master's program, graduates will have acquired competencies in several domains.

- **Background information on the health care system**
- Understand an organization's place within the health care system and the larger community.
- Understand how decisions are made within the private, non-profit and government sectors; understand connections across these sectors.

- **Leadership/professionalism**
- Develop verbal and written communication and negotiation skills.
- Understand the principles of effective human resource management.
- Develop skills in relationship/team building.
- Develop an awareness of ethical standards for the profession.

- **Human resource management**
- Understand the principles of effective recruitment and personnel management.

- **Health Law/ethics**
- Have a broad understanding of legal context for health administration.
- Have a broad understanding of the values and ethics that underpin health care administration.
- Be sensitive to diversity in the population and its implications for health care delivery.

- **Quantitative Skills**
- Have a basic working knowledge of statistical analysis.
- Be able to measure and assess health status and health risks.
- Evaluate health care process improvements and performance.

- **Financial Skills**
- Have a command of the basic skills of accounting and financial management (e.g., prepare and manage budgets).
- Understand principles of sound investment decisions.

- **Information Skills**
- Understand the principles of information management, including security.
- Know sources for administrative and clinical information as appropriate for health care management and lifelong learning.
- Decision Making
- Develop analytic skills for effective decision making, including economics and management science.

- **Implementing Change**
- Understand the process of organizational development.
- Be able to identify the most appropriate business strategies, develop business plans around these strategies, and follow through with effective project management.
- Understand the principles of effective marketing.

- **Personal Development**
- talent development
- initiative
- innovative thinking

Master of Public Health (M.P.H.)

Upon completion of this Master's program, graduates will have acquired the competency to:

- Use biostatistical methods to analyze and report public health data.
- Specify approaches to assess, prevent and control environmental and occupational hazards to human health and safety.
- Use epidemiologic methods to collect, study, analyze and report the patterns of disease in human populations for diverse audiences.
- Identify and analyze the components and issues of leadership, including financing and delivery of public health services and systems.
- Apply policy process, development and analysis methods to address current national, state and local public health issues.
- Identify social and behavioral science factors, theories and models and develop, implement and evaluate interventions designed to positively affect health behaviors in populations.
- Collect and disseminate public health data through the use of technology and media.
- Explain how human biology influences health and public health practice.
- Exhibit high standards of personal and organizational integrity, compassion, honesty and respect for all people.
- Use systems methods to analyze the effects of political, social and economic influences on public health systems at the individual, community, state, national and international levels.
- Demonstrate the impact of diversity and culture on public health across discipline areas.
- Demonstrate an understanding of the basic ethical and legal principles pertaining to the collection, maintenance, use and dissemination of public health data.

Epidemiology Concentration Competencies

- Understand and apply descriptive epidemiology to assess health status and the burden of disease in populations.
- Understand, apply, and interpret epidemiologic research methods and findings to the practice of public health.
- Demonstrate the ability to identify and use existing sources of epidemiologic data at the local, state, national, and international level.
- Understand the key components of public health surveillance and public health screening programs.
- Develop written and oral presentations based on epidemiologic analyses for both public health professionals and lay audiences.
- Demonstrate a basic level of epidemiologic data management and analysis using software such as SAS.

Environmental Health Science Concentration Competencies

- Describe federal and state regulatory programs, guidelines and authorities that control environmental health issues.
- Specify current environmental risk assessment methods.
- Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety.
- Explain the general mechanisms of toxicology and eliciting a toxic response to various environmental exposures.
- Discuss various risk management and risk communication approaches in relation to issues of environmental justice and equity.

Health Policy and Management Concentration Competencies

- Discuss the policy process for improving the health status of populations.
- Apply principles of strategic planning and organizational development to public health agencies.
- Demonstrate communication and leadership skills required for building community and organizational capacity.
- Apply the principles of budgeting, management and performance evaluation in organizational and community initiatives.

Social and Behavioral Science Concentration Competencies

- In collaboration with others, prioritize individual, organizational, community, and societal concerns and resources for public health programs, policies and interventions.
- Describe steps and procedures for the planning, implementation and evaluation of public health programs, policies and interventions.
- Apply evidence-based approaches in the development, implementation, and evaluation of social and behavioral science interventions in diverse populations.
- Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice.
- Identify the causes and conditions linked to social and behavioral factors that affect health of individuals and populations.
- Specify multiple targets and levels of intervention for social and behavioral science programs and/or policies.

Biostatistics Concentration Competencies

- Describe basic concepts of probability, random variation and commonly used statistical probability distributions.
- Apply descriptive techniques commonly used to summarize public health data.
- Apply common statistical methods for inference.
- Apply descriptive and inferential methodologies according to the type of study design for answering a particular research question.
- Interpret results of statistical analyses found in public health studies.
- Develop written and oral presentations based on statistical analyses for both public health professionals and educated lay audiences.

Public Health Certificate

- Use biostatistical methods to analyze and report public health data.
- Specify approaches to assess, prevent and control environmental and occupational hazards to human health and safety.
- Use epidemiologic methods to collect, study, analyze and report the patterns of disease in human populations for diverse audiences.
- Apply policy process, development and analysis methods to address current national, state and local public health issues.
- Identify social and behavioral science factors, theories and models and develop, implement and evaluate interventions designed to positively affect health behaviors in populations.
- Exhibit high standards of personal and organizational integrity, compassion, honesty and respect for all people.
- Identify the impact of diversity and culture on public health across discipline areas.
- Identify the basic ethical and legal principles pertaining to the collection, maintenance, use and dissemination of public health data.

Health Policy Certificate

Background Information on the Health Care System

- Understand an organization's place within the health care system and the larger community.
- Understand how decisions are made within the private, non-profit and government sectors.
- Understand connections across these sectors.

Health Law/Ethics

- Have a broad understanding of legal context for health administration.
- Have a broad understanding of the values and ethics that underpin health care administration.
- Be sensitive to diversity in the population and its implications for health care delivery.

Quantitative Skills

- Have a basic working knowledge of statistical analysis.
- Be able to measure and assess health status and health risks.
- Evaluate health care process improvements and performance.

Decision Making

- Develop analytic skills for effective decision making, including economics and management science.

Personal Development

- Talent development
- Initiative
- Innovative thinking

Health Systems Management Certificate

Background Information on the Health Care System

- Understand an organization's place within the health care system and the larger community.
- Understand how decisions are made within the private, non-profit and government sectors.
- Understand connections across these sectors.

Leadership/Professionalism

- Develop verbal and written communication and negotiation skills.
- Understand the principles of effective human resource management.
- Develop skills in relationship/team building.
- Develop an awareness of ethical standards for the profession.

Human Resource Management

- Understand the principles of effective recruitment and personnel management.

Health Law/Ethics

- Have a broad understanding of the values and ethics that underpin health care administration.
- Be sensitive to diversity in the population and its implications for health care delivery.

Financial Skills

- Have a command of the basic skills of accounting and financial management (e.g., prepare and manage budgets).
- Understand principles of sound investment decisions.

Decision Making

- Develop analytic skills for effective decision making, including economics and management science.

Policies and Procedures

The Department of Public Health policies for undergraduate and graduate programs are applicable to all Public Health degrees and students. Questions about policies should be directed to the appropriate program director. Contact information is available at the Department of Public Health website at http://www.pbhealth.iupui.edu.

Graduate Policies

The academic regulations that apply to graduate programs and students in the Department of Public Health are available at the Department's Web site, available at http://www.pbhealth.iupui.edu/.

Undergraduate Policies

The following academic policies of the Department of Public Health are applicable to all Department of Public Health undergraduate programs.

Policies for Good Academic Standing, Dismissal and Reinstatement

Good Academic Standing

Matriculation Prior to January 1, 2012. Students are in good academic standing when their semester and their cumulative grade point averages are 2.0 or above, and their grade point average in all courses included in the Department of Public Health major requirements is at least 2.3. Students must be in good academic standing to graduate.

Matriculation Beginning January 1, 2012. Students are in good academic standing when their semester and their cumulative grade point averages are 2.5 or above. Students must be in good academic standing to graduate.

Probation

Matriculation Prior to January 1, 2012. A student will be placed on academic probation if his/her cumulative or semester grade point average is below 2.0 **or** if his/her Department of Public Health major GPA falls below 2.3. In order for the major GPA to be considered, students must have completed 12 or more credit hours in the major. If a student is not making satisfactory progress toward a degree at the conclusion of the probation semester, the student may be dismissed from the Department.

Matriculation Beginning January 1, 2012. A student will be placed on academic probation if his/her cumulative or semester grade point average is below 2.5. If a student is not making satisfactory progress toward a degree at the conclusion of the probation semester, the student may be dismissed from the Department.

Critical Probation

Matriculation Prior to January 1, 2012. Under special circumstances, students may be placed on critical probation. If the student is given the opportunity to enroll under critical probation, the Undergraduate Academic Progress Committee will establish strict conditions that must be met before the student will be allowed to register for future classes. Students who fail to return to good standing at the conclusion of critical probation may be dismissed from the academic program.

Matriculation Beginning January 1, 2012. Under special circumstances, students may be placed on critical probation. If the student is given the opportunity to enroll under critical probation, the Undergraduate Academic Progress Committee will establish strict conditions that must be met before the student will be allowed to register for future classes. Students who fail to return to good standing at the conclusion of critical probation may be dismissed from the academic program**.**

Dismissal

Matriculation Prior to January 1, 2012. If in the opinion of the Undergraduate Academic Progress Committee, a student is not making satisfactory progress toward his/her degree, he/she may be dismissed. Dismissed students will have their upcoming semester courses cancelled.

Matriculation Beginning January 1, 2012. If in the opinion of the Undergraduate Academic Progress Committee, a student is not making satisfactory progress toward his/her degree, he/she may be dismissed. Dismissed students will have their upcoming semester courses cancelled.

Reinstatement Students who have been formally dismissed may appeal their dismissal. Students who have been formally dismissed must apply to the Undergraduate Academic

Progress Committee for reinstatement. Students who have been dismissed are not eligible for reinstatement until at least one full regular semester (spring or fall) has passed since the dismissal.

Students petitioning for reinstatement must demonstrate by their petitions that they have prepared themselves to succeed in their studies at IUPUI.

Reinstatement is not automatic and depends on a determination that the student will succeed. This determination is based on a careful review of the student's grades leading up to the dismissal, the students' reinstatement petition, and any other relevant information. Before being reinstated, students may be required to participate in testing, advising, workshop sessions, or other activities designed to enable the student to succeed academically.

Policies for Dean's List, Grading, Grade Replacement, Grade Appeal, Incomplete, Withdrawal, Forgiveness

Dean's List Students who are enrolled in 6 or more hours of coursework are named to the Dean's List if they have earned a GPA of 3.5 or higher for the fall or spring terms. Courses must be taken for a letter grade; pass/fail credit hours are not counted in the Dean's List determination. The Dean's List is not computed for the summer sessions. Students with a grade of incomplete cannot be named to the Dean's List until the incomplete is removed.

Grading Policies The Department of Public Health follows the official grading system of Indiana University, described in the introductory section of the bulletin.

Grade Replacement The Department of Public Health students who have retaken a course (must be same department and course number) may request to have only the last grade computed in their grade point average. If a student earns the same or a higher grade after repeating a course, only the second grade will be counted in the GPA. Students may replace five grades for a total of 15 credit hours. Replacement does not occur automatically. Students must notify the Department of Public Health recorder that the course has been taken a second time and that they wish to use grade replacement for the course.

Grade Appeal A student may appeal a course grade at the completion of a course to resolve a grade discrepancy or a grade dispute. The appeal must be made within 90 days of the date when the grade was issued. In those rare instances when a student is unable to contact the professor who issued the grade, the student must give a notice of intent to appeal the grade within 90 days of the date when the grade was issued. The appeal should be made to the Director of Undergraduate Education.

Incomplete A grade of incomplete must be removed within the time specified by the instructor of the course; if not, the grade automatically changes to an F one calendar year after the Incomplete was given.

Students must formally withdraw from courses in the timeframe allowed by the Registrar's office. This information can be found at the web site www.registrar.iupui.edu.

Forgiveness Policy This policy applies to former IU students pursuing a first undergraduate degree who have been away from the IU system and have not attended any other college or university, including any campus of IU, for the last five years. This policy, which first became available to students returning to IUPUI in the fall of 1996, states that students may apply for forgiveness upon application for admission to a degree-granting unit. If the student has not yet been admitted to a degree-granting unit, the student should submit a notification of intent to petition for academic forgiveness as part of the academic advising process. If the petition is approved, the student starts with a fresh cumulative grade point index, after which all the rules of academic probation and dismissal (for the Department of Public Health) will apply. The Department of Public Health will evaluate the student's transcript, and all courses taken previously will remain on the permanent record. Only credit hours for courses with grades C or above, P, or S may be counted toward degree completion. After approval, the student must complete a minimum of 32 credit hours on the IUPUI campus in order to meet the graduation residency requirement.

Policies for Student Rights and Responsibilities, Confidentiality, and Academic Integrity

Student Rights and Responsibilities The Department of Public Health fully supports the rights and responsibilities of students as defined in the IUPUI *Code of Student Rights, Responsibilities, and Conduct*. The *Student Code* spells out the expectations for faculty and students, and it provides the framework for the Department of Public Health's judicial process, which can be accessed at the Department of Public Health website.

A student is entitled to rights in the pursuit of his or her education; freedom from discrimination and harassment; and freedom of association, expression, advocacy, and publication. A student also has the right to contribute to University governance, to receive accommodations for disabilities, and to access records and facilities. In accordance with federal law, student records are confidential and are available to other persons only under specific conditions as outlined in university regulations.

A student is responsible for upholding and following all applicable codes of conduct, including the IUPUI Student Code and course policies on classroom etiquette and disorderly conduct, and for obeying all applicable policies and procedures and all local, state, and federal laws. A student is responsible for facilitating the learning process, attending class regularly, completing class assignments and coming to class prepared. In addition, a student is responsible for planning his or her own academic program, planning class schedules, and for meeting the requirements for his or her degree or certificate programs. Faculty and academic advisors are available to assist students in meeting degree requirements. A student is responsible for maintaining and regularly monitoring his or her university accounts including e-mail and bursar accounts. A student is responsible for using university property and facilities in the pursuit of his or her education, while being mindful of the rights of others to do the same. A student is responsible for upholding and maintaining academic and professional honesty and integrity.

In accordance with Indiana University regulations, student records are confidential and are available to other persons

only under specific conditions as outlined in university regulations.

Academic Integrity Academic integrity is a basic principle of intellectual life that holds students responsible for taking credit only for ideas and efforts that are their own. Academic dishonesty violates that principle and undermines the bonds of trust and cooperation among members of the university community, and it is not tolerated. Academic misconduct includes cheating, fabrication, plagiarism, interference, violation of course rules, and facilitating academic dishonesty. Students are responsible for knowing what behaviors and activities constitute these different forms of academic misconduct. Penalties and procedures that are applicable when academic misconduct or dishonesty occurs are described in the IUPUI *Code of Student Rights, Responsibilities, and Conduct.* More information about the Department of Public Health policy and procedures is available by linking to Academic Integrity.

Sex Offenders Screening Policy for Students/Applicants Students and applicants should be aware that criminal convictions may result in ineligibility for participation in certain courses/activities within the Department of Public Health. Questions regarding the Department's policy on such matters should be addressed to the appropriate program director.

Policies Concerning Degree Requirements

Students may choose to complete either the specific degree, certificate, or minor requirements published in the appropriate bulletin at the time of entry into the university or those in the bulletin current at the time of graduation.

Application for Degree All students must fill out an application for degree at the Department of Public Health records office. This application should be completed by September 10 for a December graduation, or January 10 for a May or August graduation.

Degree Completion Students are expected to complete the requirements for their undergraduate degree within 10 years of admission to the Department of Public Health. Students are allowed to continue beyond this time period only at the discretion of the Director of Undergraduate Education. If a student has not taken classes for three years or more, he/she must satisfy program requirements of the Department of Public Health in effect at the time of reactivation. Requests for deviation from requirements listed in the bulletin must be approved in writing by the Director of Undergraduate Education, whose decision is final.

Course Substitution and Course Waiver Requests for course substitutions and course waivers must be made to the faculty advisor.

Degrees Awarded with Distinction The Department of Public Health recognizes outstanding performance by awarding bachelor's and associate degrees with three levels of distinction to students who rank in the upper 10 percent of their Department of Public Health graduating class by major and have completed a minimum of 60 hours at Indiana University for a B.S. The levels of distinction are as follows: highest distinction, 3.90 and above; high distinction, 3.70 through 3.89; distinction, 3.50 through 3.69.

Double-Counting Generally, courses taken to meet a specific degree requirement cannot be double-counted (i.e., used to satisfy any other degree requirement). Students earning a Department of Public Health major, minor, or certificate may double-count two courses across any allowable combination of these programs. The following restrictions apply: 1) students are limited to two minors and 2) Department of Public Health students may not earn a certificate or minor in the same area as their major.

Grade Point Average Requirement

Matriculation Prior to January 1, 2012. A minimum cumulative GPA of 2.0 is required for the Bachelor of Science degrees. In addition, a Department of Public Health major GPA of 2.3 must be maintained in order to graduate. For students seeking certificates or minors from Department of Public Health, the minimum GPA requirement is 2.0 in all applicable course work.

Matriculation Beginning January 1, 2012. A minimum cumulative GPA of 2.5 is required for the Bachelor of Science degrees.

Hours Requirement Students must successfully complete a minimum of 120 credit hours for most Bachelor of Science degrees. Students may transfer no more than 90 credit hours (60 credits from a junior college) toward a Bachelor of Science degree. Class standing, based on total credit hours that count toward minimum degree requirements, is as follows: senior, 86 or more; junior, 56-85; sophomore, 26-55; freshman, fewer than 26.

Independent Study Credit With prior approval, a student may take three courses totaling no more than 10 credit hours by **correspondence** through the IU Division of Extended Studies, Independent Study Program. Under no circumstances may a student satisfy a major requirement by correspondence.

Internship Credit With Department of Public Health faculty approval, a student in good standing may earn a maximum of 15 credit hours of elective credit through the Department of Public Health **internship** program. The Department of Public Health internship program is described in more detail at the Department of Public Health website.

Other Academic Programs Department of Public Health students may choose to pursue a **minor** or **certificate** from another school or department or within Department of Public Health in an area other than their degree or major. Students interested in a minor should contact that department for additional information.

Pass/Fail Credit Deadlines for exercising this option are published on the Registrar's office website (http://www.registrar.iupui.edu) and are strictly enforced.

Matriculation Prior to January 1, 2012. A student in good academic standing may choose to take a maximum of eight elective courses (two per academic year) **Pass/Fail** for a B.S. degree.

Matriculation Beginning January 1, 2012. A student in good academic standing may choose to take a maximum of four elective courses (one per academic year) but not to exceed 12 credit hours total **Pass/Fail** for a B.S. degree.

Requirements for a Second Bachelor's Degree Students must petition the Department of Public Health for approval to work toward a second bachelor's degree. If permission is

granted, students are required to take a minimum of 30 credit hours beyond the credits used for the first bachelor's degree and to satisfy all the requirements for the second degree. Generally, the Department of Public Health encourages students to work toward a graduate degree or graduate certificate rather than a second bachelor's degree. Petitions should be submitted to the Undergraduate Curriculum Committee.

Honors College and Accelerated Master's Programs

The Department of Public Health has two programs for academically talented students. Both programs provide students with an opportunity to earn advanced degrees in an accelerated timeframe.

Honors College Professional Admissions Program (HPS) - The HPS program provides incoming freshman with an opportunity to earn the bachelor's and master's degrees in five years, rather than six years. This option is available for students interested in environmental health or health administration. For more information about admission requirements, contact the IUPUI Honors College at http://honorscollege.iupui.edu/about/.

Accelerated Master's Program (AMP) - The Accelerated Master's Program is a competitive program for outstanding Department of Public Health students who are seeking an advanced degree in health administration or environmental health. Participation in this program allows students to fulfill some graduate program requirements as undergraduates, and the graduate courses count for both graduate and undergraduate degree requirements. Students seeking admission to these programs must have at least 60 credit hours in the IU system at the time of admission and a cumulative GPA of 3.5 at the time of admission. For additional information students should contact the program director or academic advisor.

Department of Public Health

The Department of Public Health is home to two centers: The Indiana Public Health Training Center (IPHTC) and the Center on Health Policy. The IPHTC is a collaborative, multi-disciplinary center that promotes, supports, and delivers public health education to improve the skills and capabilities of Indiana'd public health professionals. The Center for Health Policy (CHP) collaborates with state and local government and public and private health care organizations to conduct high quality program evaluation and applied research on critical health policy-related issues.
Student organizations include the undergraduate and graduate student councils, which provide opportunities for all students to participate in school governance. These organizations sponsor activities for professional development, service contributions, and social networking. All students enrolled in a public health degree program are members of the undergraduate or graduate student councils.

Additional student organizations are the M.P.H. Student Association, the M.H.A. Student Association, which is open to all graduate health administration students, and Upsilon Phi Delta, a national honorary society for health administration programs.

Centers

Indiana Public Health Training Center (IPHTC)

The Indiana Public Health Training Center is dedicated to the improvement of public health practices for the health, safety, and welfare of Hoosiers. As a collaborative, multi-disciplinary center, the IPHTC promotes, supports, and delivers public health education to improve the skills and capabilities of Indiana's public health professionals. The IPHTC is Indiana's premier public health continuing education resource and is recognized for its collaboration, research, and leadership in public health.
The IPHTC provides continuing education to everyone interested in the important issues of public health. In a national effort to build competencies and improve capacity, courses help participants improve their knowledge and skill in public health. Learners have the opportunity to assess levels of competency, develop an education plan, and access competency-based courses to improve professional development. The IPHTC's services include:

- Online Training Through the Learning Management System (LMS), videos, courses, satellite downlinks, and MP3 files are available.
- On-site Sessions Face-to-face classes hosted by the Training Center are available throughout the state. A Public Health Speaker's Bureau provides local and national experts to speak at conferences, meetings, and events.
- Resource connection—Assistance in researching and connecting public health organizations.
- Technical Assistance—CD-ROMS, recordings, and electronic production services are also available.

To learn more about the IPHTC Office of Public Health Practice and a listing of current training opportunities, visit www.publichealthconnect.org.

Center for Health Policy (CHP)

The Center for Health Policy (CHP), created in 2006, is housed at Indiana University School of Medicine Department of Public Health. The CHP faculty and staff collaborate with state and local government, as well as public and private health care organizations in health policy and program development to conduct high quality program evaluation and applied research on critical health policy-related issues. The CHP faculty and staff serve as a bridge between academic health researchers and state and local government, health care organizations and community leaders.
To learn more about the Center for Health Policy, visit the www.healthpolicy.iupui.edu.

Faculty

For a complete and updated listing of the IU School of Medicine Department of Public Health faculty, please choose one of the websites below:

- Epidemiology and Environmental Health
- Health Policy and Management
- Social and Behavioral Science

Department and Program Administration staff can be found at the following websites:

- Office of Department Chair

- Offices of Academic Programs and Alumni Services
- Office of Administration and Finance

Graduate Courses

PBHL-A 609 Air Pollution and Health (3 cr.) This course provides an overview and foundation in the science and management of air quality, with a focus on health impacts and strategies to reduce these impacts. Course topics include the scientific technical aspects of air pollution through the study of the characteristics of the atmosphere and atmospheric pollutants, effects of meteorology on air pollution, urban air pollution, visibility, smog, acid deposition, stratospheric ozone depletion, global warming and indoor air pollution.

PBHL-A 610 Environmental Toxicology (3 cr.) P: PBHL-A609 This course examines the extent and significance of toxic agents in the environment. It covers risk assessment of potential adverse health effect resulting from human exposure to toxic environmental agents. It also provides a background for understanding mechanistic and biologic specific processes of environmental agents.

PBHL-A 611 Environmental Health Risk Assessment (3 cr.) P: PBHL-A610 This course provides a foundation in the processes and tools of environmental risk assessment, which is the basis for making technical decisions related to environmental issues and human health. Course topics include methods of probabilistic risk analysis, toxicological estimation, regulatory requirements for risk assessment, and managing and communicating risk.

PBHL-A 611 Environmental Health Policy Analysis (3 cr.) This course provides students with a focus on the policy-making process and the many variables that comprise the dynamic framework for environmental policy formulation. The course explores the roles of politics, economics, science, health, values and ethics in setting policy through a consideration of key historical and contemporary issues.

PBHL-A 621 Solid and Hazardous Waste Management (3 cr.) This course provides students with a technical foundation in areas of solid and hazardous waste management that can be applied to the examination of policy options. Topics include characterization of the waste stream, regulations, health and environmental risks, liability issues, management techniques, and treatment and disposal options.

PBHL-A 622 Chemistry for Environmental Health Professionals (3 cr.) This course is designed to provide environmental health professionals, who are not chemists, with the technical background needed to understand and manage environmental health science issues. Topics include a detailed overview of basic principles of chemistry, followed by a more focused treatment of how these fundamentals apply to issues such as hazardous materials and wastes; water and air resources; pollution of the air, water, and land; and other related topics.

PBHL-A 623 Environmental Management Systems: ISO 14001 Based (3 cr.) This course provides students with the knowledge and skills to establish or improve an environmental management system that is compatible with ISO (International Organization for Standardization) 14001, an international, voluntary standard that is emerging as a best-management practice for environment.

PBHL-A 628 Food Safety and Sanitation (3 cr.) This course will examine the various hazards that cause food borne illness as well as the risk factors that are known to contribute to these diseases. Topics include etiological agents for common and emerging food borne diseases; basic concepts of food science and technology; food safety principles and practices that are recommended by the Food and Drug Administration's Food Code.

PBHL-A 633 Occupational Health and Safety for Public Health Professionals (3 cr.) This course provides a survey of technical and regulatory aspects of protecting the health and safety of workers. Topics include basic toxicology; skin, eye, and respiratory hazards; measuring hazardous atmospheres; ventilation systems; fire and explosion hazards; emergency response; occupational hearing loss; radiation; prevention of accidents; cumulative trauma; and personal protective equipment.

PBHL-B 640 Design and Analysis of Medical Experiments (3 cr.) P: G652, P652, B641 or equivalent This is a course into the application of experimental design to biomedical experiments, such as randomization, blocking, factorial designs and stratification. The course addresses both clinical and pre-clinical investigation as well as design of experiments to evaluate medical devices, which will likely be encountered by biomedical researchers. It is addressed to second-year graduate students in biostatistics or epidemiology with a solid understanding of analysis of variance, regression and working knowledge of survial analysis.The course will be taught in two sessions, a lecture, where the relevant theory and methods will be presented, and a practicum or laboratory session, involving hands-on analysis of real-life problems using the SAS statistical software package.

PBHL-B 641 Linear Models in Public Health (3 cr.) P: P551 or equivalent This is a first course into two multivariate statistical procedures, the Analysis of Variance (ANOVA) and Regression with special focus in problems related to the Public Health sciences. This is an introductory course that will expose students to these methods, and consolidate their understanding of statistical inference (estimation and testing of statistical hypotheses) in the context of the two procedures. The course will be taught in two sessions, a lecture, where the relevant theory and methods will be presented, and a practicum or laboratory session, involving hands-on analysis of real-life problems using the SAS statistical software package.

PBHL-B 642 Applied Survival Analysis for Public Health (3 cr.) P: Students must have taken one course in basic statistics and another course in linear regression models. Students must have prior knowledge of SAS for completion of homework. The statistical methods covered in this course focus on “time to event” data, where the event can be response to treatment, relapse of disease, or death. Topics covered in this course include estimations of survival function and regression models for survival data. Specifically, this course covers the central functions of survival analysis: the hazard, survival, and cumulative hazard functions, nonparametric estimation of survival functions using life-table method and the Kaplan-Meier method, and comparison of survival distributions using the log-rank and other tests. In addition, we will discuss regression models for survival

outcomes with emphasis on the Cox proportional hazards model. Alternative models such as the accelerated failure time model and use of parametric distributions (exponential, Weibull) will also be considered. Class material will include presentation of statistical methods for estimation and testing, along with current software (SAS) for implementing analyses of survival data. Applications to real data will be emphasized.

PBHL-B 644 Applied Generalized Linear Models and Longitudinal Data Analysis (3 cr.) P: S tudents registering for this course are expected to have completed “Linear Models in Public Health” or its equivalents with a B or better grade. This is an introductory statistical method course on generalized linear models and longitudinal data analysis for students in various public health disciplines. The course focuses on the basic concepts and implementation of four extensions to classical linear regression models: (1) generalized linear models (including logistic and log-linear regression); (2) mixed effects models; (3) generalized linear mixed models; and (4) population average models based on generalized estimating equations (GEE).

PBHL-B 653 Applied Multivariate Statistical Methods (3 cr.) P: P551 and P652. B653 is an introductory multivariate statistics course. This course is applied and is intended for non-statisticians, for example, masters or PhD students in behavioral, psychological, educational or medical sciences, or other health care professionals. Students are expected to have taken two previous courses in statistics (introductory and intermediate) covering up through t-test, ANOVA, ANCOVA and linear regression. The overall objective of the course is to introduce the most commonly used multivariate statistical techniques with emphasis on applications to real data which will be analyzed with SPSS. The emphasis will be on concepts, assumptions, applications, and hands-on interpretation of SPSS results. Formulas or matrix algebra will not be emphasized.

PBHL-E 715 Design and Implementation of Observational Studies (3 cr.) P: P517 and Research Methods This course examines fundamental aspects of designing and implementing observational epidemiology studies. The focus is on developing strategies to increase the validity of the study results by using techniques to control for possible confounding factors and biases. Topics include sampling methods, sensitivity, data weighting, standardization, selection of cases and controls, matching, data collection and project management.

PBHL-E 720 Analysis and Interpretation of Observational Studies (3 cr.) P: This course is designed for students in the PhD program in Epidemiology. Advanced students in the Master of Public Health degree program, Epidemiology concentration may register for this course with the permission of the professor. P: PBHL-E 715 Design and Implementation of Observational Studies. This course examines fundamental aspects of analyzing data generated by observational epidemiology studies. The focus is on developing a solid understanding of contemporary analytical techniques to increase the validity of the study and control for possible confounding factors and biases.

PBHL-E 730 Analysis of Genetic Associations (3 cr.) P: P601 (Advanced Epidemiology), P652 (Biostatistics for Public Health II), and P730 (Molecular and Genetic Epidemiology), or signature of instructor required. This course introduces the conceptual and practical tools needed for population-based genetic association studies among unrelated subjects. Lectures and selected readings present key issues (such as linkage disequilibrium, "tagging SNPs," haplotypes, population stratification and epistasis) and appropriate statistical methods. Students will be required to present selected papers in class. Students will gain hands-on experience with a range of analytic tools and software packages as part of a class project which gives them the opportunity to design and analyze an association study. This project will require students to work on real-world problems such as marker selection, potential multiple comparisons issues due to multiple markers and multiple outcomes, and missing data.

PBHL-E 731 Design and Analysis of Genetic Association Studies (3 cr.) P: P601 (Advanced Epidemiology), P652 (Biostatistics for Public Health II), and P730 (Molecular and Genetic Epidemiology), or signature of instructor required. This course introduces the conceptual and practical tools needed for population-based genetic association studies among unrelated subjects. Lectures and selected readings present key issues (such as linkage disequilibrium, "tagging SNPs," haplotypes, population stratification and epistasis) and appropriate statistical methods. Students will be required to present selected papers in class. Students will gain hands-on experience with a range of analytic tools and software packages as part of a class project which gives them the opportunity to design and analyze an association study. This project will require students to work on real-world problems such as marker selection, potential multiple comparisons issues due to multiple markers and multiple outcomes, and missing data.

PBHL-E 750 Doctoral Topics in Public Health (3 cr.) Courses offered under this course number would include PhD courses on topics expected to be offered only once, such as those taught by visiting faculty, and those that are newly developed and have not yet been assigned a specific course number. The course will focus on a specific topic or technique related to the field of Public Health. The material to be studied will be determined by the instructor with input from the PhD faculty.

PBHL-E 751 Doctoral Readings in Epidemiology (1-3 cr.) This course is designed to expose a PhD student to published material on a specific topic or technique related to their field of study in Epidemiology. The material to be studied will be determined primarily by the PhD student under the direction of a faculty member with input from the student’s concentration advisor. The PhD student is expected to work closely with the faculty member to develop a strategy to identify the material to study, plan a time frame for completion of the study and to determine the nature of the study product. Generally the product will be a summary and interpretation of the material studied in a literature review format. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement

PBHL-E 752 Doctoral Research in Epidemiology (1-3 cr.) This course is designed to allow PhD students the opportunity to explore research questions by collecting data or using existing data related to their field of study in Epidemiology. The study topic will be determined primarily by the PhD student under the direction of a faculty member with input from the student’s concentration advisor. The PhD

student is expected to work closely with the faculty member to develop the study protocol, obtain IRB approval if necessary, obtain the data and collect the planned data analysis. The time frame for completion and the nature of the study product will be determined by the PhD student, faculty member and advisor. Generally the product will be a manuscript for submission to an appropriate journal. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement.

PBHL-E 765 Nutritional Epidemiology (3 cr.) P: P517 and P551 This course provides students with an overview of fundamental concepts and methods of nutritional epidemiology and the current state of knowledge on well-studied associations between diet and chronic diseases. Emphasis will be placed on the design, implementation, analysis, and interpretation of nutritional epidemiologic studies

PBHL-E 775 Doctoral Research Seminar in Epidemiology (1 cr.) This course is designed to expose PhD students to a wide range of specific research topics and issues in Public Health. The seminar topics will be chosen by the Director of the PhD program with input from other faculty members. The PhD students are expected to attend each seminar session, read assigned material, and participate in the seminar discussions. The PhD students may be asked to present their research projects during the seminar to obtain feedback and recommendations from the faculty and other students.

PBHL-E 780 Pharmacoepidemiology (3 cr.) P: P517 This is an introductory pharmacoepidemiology course. Students will learn how principles of modern epidemiologic methods are used to evaluate the safety, effectiveness, and utilization patterns of medical products (drugs, vaccines, and medical devices) in human populations, with a focus on observational studies. Related topics, including therapeutic risk management, data sources and ethical principles will be discussed. Advanced methodology, such as that utilized to address confounding by indication and misclassification will be introduced.

PBHL-G 651 Introduction to Biostatistics I (3 cr.) P: One year undergraduate mathematics is required. Working knowledge on linear algebra and elementary calculus is expected. Students with insufficient mathematics preparation are expected to remedy the deficiency on their own. G651 is an introductory level biostatistics course designed for healthcare professionals. This course will cover the topics on data presentation techniques, describing data with numerical summary measures, probability and probability distributions, sampling distributions, statistical inferences from small and large samples, analysis of categorical data, analysis of variance, correlation and simple linear regression analysis.

PBHL-G 652 Introduction to Biostatistics II (3 cr.) P: G651 or equivalent G652 is an advanced biostatistics course designed for students with an interest in the health sciences. Students are expected to have completed at least one semester course of basic biostatistics. Knowledge of probability and probability distributions, concepts of estimation and hypothesis testing are assumed. Topics covered in this course include multiple linear regression, analysis of covariance, logistic regression, and survival analyses. Upon completion of the course, students are expected to understand the appropriate statistical models for various outcomes and be able to interpret results using statistical techniques covered in this course. Students are also expected to conduct simple analyses using SPSS on personal computers

PBHL-H 501 U.S. Health Care: Systems, Policies, and Ethical Challenges (3 cr.) Study of health, illness, and disease trajectories and the systemic components that mold the health care system. Ideological paradigms predicting utilization and health behaviors are addressed, as are guidelines for ethical decision making and problem analysis. Formulation and implementation of organizational and governmental policies and their associated theoretical assumptions are addressed.

PBHL-H 507 Management of Individual and Group Behavior (3 cr.) This course provides a conceptual framework for understanding behavior in the work environment by introducing concepts concerning effective management of people in organizations. Key theories and concepts in the field of organizational behavior will be introduced. The focus of this course is at the micro level of analysis, addressing topics such as individual theories of motivation, job design, and diversity issues; management of work teams; group decision making; managing conflict; and leadership, influence, and power issues.

PBHL-H 508 Managing Health Care Accounting Information for Decision-Making (3 cr.) P: undergraduate principles of accounting. Provides a user-oriented understanding of how accounting information should be utilized, focusing on balance sheet and income statement and cash flow analysis, budgeting, cost analysis, and responsibility accounting.

PBHL-H 509 Financial Management Principles of Health Care (3 cr.) P: SPHA-H 508. Provides knowledge of corporate finance practice in health care organizations. Establishes an understanding of the basic elements of financial theory used to address service expansion or contraction, capital investment issues, developing business plans and working capital management.

PBHL-H 514 Health Economics (3 cr.) P: 3 credit hours of undergraduate economics. Examines the principles and application of economic analysis in the health field and the economist's approach to health care issues. Provides insights offered by economic analysis of specific health issues and problems.

PBHL-H 515 Seminar in Health Policy: Special Topics (3 cr.) P: SPHA H501, H503, or consent of instructor. Exploration of health policy topics from economic, financial, sociological, political, and psychological perspectives. Analytical paradigms are applied to organizational or macro-policy making issues that vary in response to changing environments. May be repeated once with advisor's approval.

PBHL-H 516 Health Services Delivery and the Law (3 cr.) Medical-legal concepts related to hospitals and other health services organizations. Course provides an in-depth understanding of the law and the legal processes affecting the health services system. Presentation of the elements of

administrative and agency processes, torts, contracts, facilities, physicians, patients, and personnel.

PBHL-H 517 Managerial Epidemiology (3 cr.) Examines general epidemiologic methods such as population descriptive techniques, use of health indicators and secondary health-related data sources. Includes design, administration, and analysis of observational and experimental studies. Emphasis will be on the use of epidemiologic techniques to assess community health, determine community risk factors, and evaluate community-based programs.

PBHL-H 518 Statistical Methods for Health Services (3 cr.) P: 3 credit hours of undergraduate statistics. Study of the quantitative techniques commonly used to examine health-related data. Includes univariate, bivariate, and multivariate techniques. Emphasis is on using statistical techniques to make policy and administrative decisions in a health services setting. Students use standard computer software to analyze data.

PBHL-H 521 Management Science for Health Services Administration (3 cr.) Focus is on management science methods, as applied to health sciences administration. Includes treatment of decision theory, constrained optimization, and probability simulation.

PBHL-H 523 Health Services Human Resource Management (3 cr.) This course provides the knowledge and skills needed to understand the application of personnel and labor relations techniques to the health services sectors, with particular emphasis on human resources management, employees' benefit programs, and labor relations as applied to the health services delivery organization.

PBHL-H 606 Health Services Quality Improvement and Risk Management (3 cr.) P: H501, H503, and V504. Critically examines the concepts, strategies, and techniques related to the improvement of the quality of health service delivery. Addresses the increasing need to enhance productivity given the impact of external and other factors on the workplace. Principles and application of risk management concepts and techniques, including insurance, are emphasized.

PBHL-H 612 Marketing for Health Services Delivery (3 cr.) This course focuses on the marketing problems and strategies of health care organizations. Subjects include the nature of health care services, organizing for health service delivery, managing health services demand, tailoring customer mix, and managing supply in health care services.

PBHL-H 615 Health Care Outcomes and Decision Making (3 cr.) P: H501, H502, H514, and H518. Application of health outcomes measures in decision-making and evaluation in various health service settings. Includes designing and implementing evaluation plans of health and social programs. Emphasis on evaluation strategies, measurement of health outcomes, and management decision-making.

PBHL-H 623 Health Care Applications of Strategic Management (3 cr.) P: H501, H502, H510, and H521. This last course of the series in the capstone sequence is designed to assist students in synthesizing and summarizing all of the previous course work. Emphasis is on “real-world” case situations and requires active participation by the students. Case studies chosen reflect current management issues in health services administration.

PBHL-H 624 Developing Strategic Capability (3 cr.) This course explores management roles in health care. Application of strategic management theories, concepts and principles and an understanding of managerial roles in organizations are emphasized. Managerial process, management theories, leadership, organizational design, and strategic management are examined.

PBHL-H 628 Health Care Information Systems (3 cr.) A study of the terminology, technology, and application of information systems in various health care settings. Topics include the gathering, organization, storage, and retrieval of complex data banks, as well as assessment of health service data needs and considerations in developing information systems. Includes many computer-based exercises.

PBHL-H 702 Internship in Health Services Management (3 cr.) P: H501, H509, H514, and H650. Requires the equivalent of a minimum of 3 credit hours of on-site experience under the supervision of a qualified preceptor and program faculty. Grading is on an S/F basis.

PBHL-H 735 Research in Health Administration (3-6 cr.) P: all core courses or consent of instructor. Field research conducted under the direction of a faculty member. Designed for advanced students and those who have elected not to take a residency. Grading is on an S/F basis.

PBHL-H 746 Comparative Effectiveness Research Methods (3 cr.) P: P517 and P551 This course introduces the range of methods and associated political and ethical issues related to comparative effectiveness research in health and medicine, with a particular focus on developing quantitative skills to the design, review and analysis of clinical trials (e.g. drugs, devices, clinical or behavioral strategies). Students will learn quantitative methodologies that can be utilized to synthesize a range of evidence regarding the benefits and harms of available choices for care, and will explore the potential and limitations of comparative effectiveness findings for policy and health care decision making.

PBHL-H 775 Doctoral Readings in Health Policy and Management (1-3 cr.) This course is designed to expose a PhD student to published material on a specific topic or technique related to their field of study in Health Policy and Management. The material to be studied will be determined primarily by the PhD student under the direction of a faculty member with input from the student’s concentration advisor. The PhD student is expected to work closely with the faculty member to develop a strategy to identify the material to study, plan a time frame for completion of the study and to determine the nature of the study product. Generally the product will be a summary and interpretation of the material studied in a literature review format. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement.

PBHL-H 775 Doctoral Research Seminar in Health Policy and Management (1-3 cr.) This course is designed to expose PhD students to a wide range of specific research topics and issues in Public Health. The seminar topics will

be chosen by the Director of the PhD program with input from other faculty members. The PhD students are expected to attend each seminar session, read assigned material, and participate in the seminar discussions. The PhD students may be asked to present their research projects during the seminar to obtain feedback and recommendations from the faculty and other students.

PBHL-H 775 Doctoral Readings in Health Policy and Management (1-3 cr.) This course is designed to expose a PhD student to published material on a specific topic or technique related to their field of study in Health Policy and Management. The material to be studied will be determined primarily by the PhD student under the direction of a faculty member with input from the student's concentration advisor. The PhD student is expected to work closely with the faculty member to develop a strategy to identify the material to study, plan a time frame for completion of the study and to determine the nature of the study product. Generally the product will be a summary and interpretation of the material studied in a literature review format. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement.

PBHL-P 500 Social and Behavioral Science in Public Health (3 cr.) This course is designed to introduce students to the philosophies and principles that provide the foundation for health promotion and disease prevention with an emphasis on population-based public health approaches. Students will explore topics that promote a broader and better understanding of determinants of health; the multiple factors contributing to health and illness behaviors; fundamentals, theories and principles that shed light on health and illness behaviors; and philosophies, principles and strategies that facilitate improvements in population health and the elimination of health disparities. Students will be introduced to the important complementary relationships between and comingled effects of the determinants of health with an emphasis on the social determinants of health. Students will be presented with new approaches to improve, by not only focusing on individual capacities and capabilities to address their diseases and/or ailments, but also, most importantly perhaps, focus on the conditions and contexts in which individuals have the liberty and limits to make choices that influence health and illness behaviors in many different ways.

PBHL-P 500 Social and Behavioral Science in Public Health (3 cr.) This course is designed to introduce students to the philosophies and principles that provide the foundation for health promotion and disease prevention with an emphasis on population-based public health approaches. Students will explore topics that promote a broader and better understanding of determinants of health; the multiple factors contributing to health and illness behaviors; fundamentals, theories and principles that shed light on health and illness behaviors; and philosophies, principles and strategies that facilitate improvements in population health and the elimination of health disparities. Students will be introduced to the important complementary relationships between and comingled effects of the determinants of health with an emphasis on the social determinants of health. Students will be presented with new approaches to improve, by not only focusing on individual capacities and capabilities to address their diseases and/or ailments, but also, most importantly perhaps, focus on the conditions and contexts in which individuals have the liberty and limits to make choices that influence health and illness behaviors in many different ways.

PBHL-P 504 U.S. Health Care Systems and Health Policy (3 cr.) This course explores the U.S. health care system, policy development, and ethical challenges. It examines the structure, components, organization and financing of the U.S. health care system. The policy process at national, state and local levels will be analyzed using legislation and related activities.

PBHL-P 517 Fundamentals of Epidemiology (3 cr.) This course will introduce students to basic epidemiologic concepts including determinants of health and patterns of disease in populations, population health descriptive techniques, use of health indicators and secondary data sources. Students will gain an understanding of the role of Epidemiology in developing prevention strategies and policy. Among the topics to be covered are measures of mortality and morbidity, design and analysis of observational studies, community health assessment and program evaluation.

PBHL-P 519 Environmental Science in Public Health (3 cr.) The primary focus of this course will be on pathogenic agents (biological, chemical, and physical) in the environment and their impact on morbidity and mortality of human populations. We will study several types of common and emerging pathogens from anthropogenic and natural sources and how they cause illness and/or injury. Particular attention will be given to the mode of transmission, route of exposure, and acute and chronic diseases or injuries caused by these environmental agents. During the class we will also investigate the strategies, technologies and laws/policies that are used to prevent, control, or eliminate environmental hazards.

PBHL-P 551 Biostatistics for Public Health I (3 cr.) This course introduces the basic principles and methods of data analysis in public health biostatistics. Emphasis is placed on public health examples as they relate to concepts such as sampling, study design, descriptive statistics, probability, statistical distributions, estimation, hypothesis testing, chi-square tests, t-tests, analysis of variance, linear regression and correlation.

PBHL-P 600 Epidemiologic Research Methods (3 cr.) P: P517 and P551. This course provides an in-depth presentation of the major research designs, analytical methods, and practical issues specifically related to conducting research in the field of epidemiology, outcomes research, and health economics. Descriptive, observational and experimental designs are included. In addition, issues of ethics, protocol, data quality, instrument design, and analysis are covered.

PBHL-P 601 Advanced Epidemiology (3 cr.) P: P517 & P551 (or concurrently enrolled). This course provides students with an in-depth understanding of advanced epidemiologic concepts introduced in other courses as well as a fundamental understanding of epidemiologic techniques not covered in other classes. Topics included will represent cutting edge techniques, philosophical issues and insights to appropriately conduct and interpret the findings of

epidemiological studies. Students will gain an understanding of these concepts and issues through discussions with expert epidemiologists and hands-on exercises.

PBHL-P 602 Public Health Internship (3 cr.) P: MPH core and approval of concentration advisor. Integrates public health theory and practice in a practice setting. Students have the opportunity to apply concepts from core and concentration courses, conduct projects and interact with a range of health professionals. Students work both with a faculty advisor and qualified preceptor in the agency.

PBHL-P 609 Infections Disease Epidemiology (3 cr.) P: P517. This course is designed to provide a basic overview of the infectious disease process, including disease agents, transmission routes, immunity and public health significance. The course introduces principles of infectious disease epidemiology, including outbreak investigation and surveillance, using case studies as examples. Concepts on globalization of disease, microbial ecology, and disease eradication also are discussed.

PBHL-P 610 Chronic Disease Epidemiology (3 cr.) P: P517. This course examines chronic health conditions from epidemiological perspectives. Concepts include distribution, determinants; diagnosis; measures of severity; treatment modalities; surveillance measures; survival and prognosis; and quality of care measures. Research methods prevention strategies and screening tests are presented. Clinical expert's present diagnosis and treatment methods.

PBHL-P 611 Policy Design, Implementation and Management (3 cr.) This course will examine the reasons for this in terms of the politics of health and the implications for the future of health policy in the United States. Further, health policy topics from economic, financial, sociological, political and psychological perspectives will be covered. Analytical paradigms are applied to organizational or macro-policy making issues. Topics vary by semester according to current policy challenges faced at the federal level.

PBHL-P 612 Health Outcomes Research (3 cr.) P: P517 & P551. This web-based course is evidence-based and focused on health outcomes research in contemporary health care. The different types of health outcomes assessment tools and their application in determining patient health status, changes in health status, and the effectiveness of health care interventions will be addressed. The course will focus on generic and specific health related outcomes assessment tools, looking at such issues as disease specific outcomes and patient satisfaction.

PBHL-P 613 Public Health and Emergency Preparedness (3 cr.) This graduate elective course is designed to familiarize learners with emergency preparedness concepts due to natural and man-made disasters. The course will also review biological agents used for terrorism in the past, and agents the Centers for Disease Control consider most likely to be used at present. The content will be delivered via, seminar discussion, web based activities, CDs addressing bioterrorism, resources for infection control and key resources for further exploration. Other student opportunities include readings from past great works depicting responses to naturally occurring infectious disease or contemporary responses to disasters and terrorism/bioterrorism. Public health responses to emergency preparedness at local, state and federal levels will also be discussed.

PBHL-P 614 Program Planning in Public Health (3 cr.) This course will provide students with a systematic approach to program planning and evaluation of health programs. Students will apply program planning, implementation and evaluation theory to develop an evidence-based health promotion program that addresses a public health issue of personal interest.

PBHL-P 615 Culture and Qualitative Methods (3 cr.) This course provides learning opportunities for public health graduate students to develop an understanding of culture and of how qualitative methods can be used to develop a sensitivity to and an understanding of cultural practices. Such cultural sensitivities and competencies are basic to effective program planning, implementation, service delivery, and program evaluation. This class will provide important knowledge and opportunities related to public health practice in a community setting comprised of a multicultural population with differing health beliefs, values, behaviors and health care needs. By the end of the semester, the student will be able to define and distinguish the concepts of culture and traditions, acculturation and enculturation, traditionalism and modernism and will be able to begin to identify how to build on cultural practices to develop interventions aimed at influencing health behaviors. Further, the student will have active experience in conducting qualitative research in a community setting, including skills in conducting windshield surveys, participant observations, key informant interviews, and focus groups.

PBHL-P 616 Strategic Planning for Health Services Organizations (3 cr.) This courses aims to develop the student's knowledge and ability in strategic management in health services organizations. Based on an introduction to the general process model of strategic management, the course will engage in detailed discussions of a series of topics in strategic management. These topics include the identification of the organization's mission, vision, and values, the analysis of the external and internal environment of the organization, the identification of strategic challenges and opportunities, the development of strategies, the evaluation of strategies, the communication of strategies, and the development and evaluation of an action plan. The course emphasizes the unique strategic challenges facing health services organizations and their leadership, and aims to develop accordingly the student's ability to identify, analyze and address these challenges. The course utilizes real-world cases to facilitate the understanding of basic course content. The conceptual model of strategic management will be illustrated through the analysis of selected health care cases. The student will also be required to independently analyze a strategic case most relevant to their field of work or study applying the conceptual strategic planning process.

PBHL-P 618 Cancer Epidemiology (3 cr.) P: P517 This course is an overview of cancer epidemiology, focusing on key concepts, etiologic research, applications to public health practice and major epidemiologic methods. This course is designed for students who have an interest in epidemiology.

PBHL-P 619 Health Economics for Public Health Professionals (3 cr.) This is an introductory microeconomics course with applications to the public health and health care systems. The course objectives are that the students develop

an appreciation of economic theories and principles, exacting assumptions thereof, and how these theories and principles apply to the public health and health care markets, particularly how price drives resource allocation in addition to signaling value, substitution and technological innovation. Students will also be introduced to skills need to measure and interpret economic values and relationships including the interpretation of quantitative data analysis. We will examine how economic incentives affect the different actors in the health (care) system. The fundamental models of economic and organizational behaviors will be extended to describe the behaviors of the different health care players and the health (care) system as each tries to maximize utility and profits (or min costs), respectively, under different financial, regulatory and technological constraints. Most importantly, students will be able to explore the limits to markets and rationality, and develop an appreciation for how a variety of checks and balances-more so that unbridled competition-contribute to efficient and equitable functioning of and outcomes in a market.

PBHL-P 631 Maternal, Child, and Family Health (3 cr.) Overview of Maternal Child health with emphasis on conditions and issues effecting reproductive, childhood, and women's wellbeing. Includes classroom lecture, discussion, and student presentations.

PBHL-P 632 History of Public Health (3 cr.) This course surveys the history of public health from antiquity to the late twentieth century with the aim of providing students with an understanding of how history may inform present day challenges regarding the health of populations, including emerging infectious diseases; climate change; dislocation of populations from conflicts and natural disasters; malnutrition; and chronic diseases in aging populations. Using a chronological and thematic approach to history, students will learn of the origins, natural histories, and important determinants of the structure and function of modern systems of public health in the United States. The course will explore the complex interactions within populations of disease, science, social and cultural norms, moral/ethical values, economic and legal precepts, health professionals, institutions, and government in shaping the rate of adoption and diffusion of public health systems. The course will use a readings/discussion format with limited didactic teaching and an emphasis on active learning. Each week students will read 4-7 papers and be prepared to discuss them in class. Important goals of the course are to stimulate interest in the history of public health, learn about the methods and tools used in historical research, and promote critical thinking.

PBHL-P 644 Health Impact Assessment (3 cr.) The goal of this course is to introduce students to the theoretical and practical aspects of health impact assessment (HIA) as a methodological tool in public health. HIA utilizes a variety of qualitative and quantitative methods and tools, designed to assess the potential health effects of a public policy, program, project, or initiative. While HIA is still an emerging practice in the United States, in Europe, Canada, and other areas of the world, the assessment of the public health impact of public decisions have been performed regularly to support policy decisions and promote conditions required for optimal health. During the first part of the semester, students will learn the necessary steps to conduct an HIA, review national and international case studies, and discuss how findings may or may not impact policy making. During the second half of the course, students will work in teams with a local or state health department to examine the potential health impact of policy proposals in Indiana.

PBHL-P 650 Readings in Public Health (3 cr.) This course is designed to expose the student to different readings in public health. The course will allow the student to apply skills learned in the public health core courses by collecting data and applying techniques. The student will be required to read critically published papers and identify research topics.

PBHL-P 650 Readings in Public Health Topic: Health Communication (3 cr.) Effectively communicating health messages to the public can be a challenge. From advertising a program to promoting behavior change, there are many tools and actions that can yield positive results. This course will offer theory and practical experiences through the steps of creating a communications plan and actual campaign. Case studies, guest speakers, and hands-on experiences will be blended together.

PBHL-P 652 Biostatistics for Public Health II (3 cr.) P: P551. This course introduces the advanced principles and methods of data analysis in public health biostatistics. Emphasis is placed on public health examples as they relate to concepts such as: Multiple regression, analysis of variance and covariance, logistic regression, nonparametric statistics, survival analysis, statistics used in epidemiology, and repeated measures analysis.

PBHL-P 655 Historical Evolution of Epidemiology (3 cr.) P: P517. The course will explore the historical developments and public health responses to human disease morbidity and mortality, and their importance and influence on the role of public health in modern society. Readings and discussion will examine in detail, the evolutionary change in the epidemiologic response of a Varity of disease of national and international importance.

PBHL-P 657 Application of Cost-Effectiveness Analysis in Public Health (3 cr.) Cost-effectiveness analysis is widely used in evaluating the performance of public health programs and policies. In this course, students will learn to frame the conceptual model, to collect and synthesize data regarding "cost" and "effectiveness", to perform a cost-effectiveness analysis, and to form recommendations based on the analysis. Meta-analysis and various survey/interview techniques will be introduced as essential tools for data collection in cost-effectiveness analyses. Learning will be facilitated by numerous examples of the application of this popular method. Health Policy and Management students have option of taking this course in place of H509.

PBHL-P 658 Methods of Health Services and Policy Research (3 cr.) This is a required course for students in the Health Policy and Management concentration. It aims to familiarize students with the methods of health services research and policy research. It introduces various study designs, data collection methods, and data analysis techniques that are relevant to students and researchers in these fields. It discusses the ethical, legal and political implications of health services and policy research. Students will apply theoretical knowledge in the analysis of actual data. This course also aims to facilitate the development of student's final concentration project.

PBHL-P 659 The Tobacco Pandemic (3 cr.) This course focuses on U.S. and global Tobacco Control, including the health and economic burdens of tobacco use as well as evidence-based approaches to prevention and management. Students will explore how human use of the plant Nicotiana tobacum with its potent alkaloid, nicotine, evolved into the largest human made pandemic in world history. The nature, prevalence, and trends of tobacco addiction, tobacco-related diseases, and their treatment will be addressed, as well as the centuries long "tobacco wars," pitting the tobacco industry's effective marketing of their products against the often fragmented, underfunded, and ineffectual government and anti-tobacco forces. Students will review the rise, over the past 50 years, of effective science and evidence-based tobacco control policy in the U.S.: U.S. Surgeons General Reports; CDC Best Practices for Comprehensive Tobacco Control Programs; U.S. PHS Clinical Practice Guidelines: Treating Tobacco Use and Dependence, and related sources. The future of Tobacco Control, including various scenarios for the "end game" of tobacco use in modern societies will be addressed, in light of recent major legal, political, and economic changes in the landscape of Tobacco Control in the U.S and globally.

PBHL-P 670 Topics in Public Health (3 cr.) This course has a variable title and can be offered for variable credits. Similar to topics courses offered in other IUPUI programs, this course offers an introduction to a variety of public health topics and current issues will be covered in this course.

PBHL-P 670 Advanced Public Health Survey Research (3 cr.) This course provides an intensive focus on the formative phases of health survey research. Topics covered will include sampling methodologies, questionnaire development, testing, revision and administration, interviewing, coding procedures, as well as topical discussions related to research ethics and real world challenges of research. Active learning will be emphasized through several field based exercises, as well as a research proposal based on students' own research interests.

PBHL-P 670 Applied Public Health Campaigns and Social Marketing Strategies (3 cr.) Effectively communicating public health messages can be a challenge. From advertising a program to promoting behavior change, there are many social marketing strategies and tools that yield positive results. This course will offer students practical opportunities to apply these strategies and tools in the development and evaluation of public health campaigns. Case studies, guest speakers, and hands-on experiences will be incorporated in this class.

PBHL-P 670 Cardiovascular Epidemiology (3 cr.) P: P517 and P601 An advanced graduate course that discusses the topics related to the epidemiology and prevention diseases. The purpose is to give students an overview of the major cardiovascular diseases and their risk factors.

PBHL-P 670 Global Perspectives of Health Policy and Health Systems (3 cr.) This 3 hour course is designed to expand students' perspectives on global health care through the in-depth study of health care and health systems that are distinct from the U.S. health care system. Students also will learn how health policy and management research apply the comparative method in the study of health systems and health policy. Finally, students will explore health policy as a global challenge through a systematic discussion of international health policymaking and responses to health problems requiring global or regional nation-level cooperation.

PBHL-P 700 Concentration Project Completion (1 cr.) This course is designed for MPH students who are working on their Final Concentration Project until project grade has been assigned. Enrollment in PBHL-P700 allows students access to the library, computer labs, IRB, other campus facilities/services and to meet with academic advisors. In addition it allows students to retain eligibility for financial aid and loan deferment. Students enrolled in 45 credit hours are eligible to enroll in P700.

PBHL-P 701 Public Health Biostatistics Concentration Final Project (3 cr.) P: MPH Core; Public Health Internship.

PBHL-P 702 Public Health Social and Behavioral Science Concentration Project (3 cr.) P: MPH Core; Public Health Internship. Provides students the opportunity to synthesize and integrate knowledge through course work and the public health internship. Student projects will include components of behavioral health sciences research and application.

PBHL-P 703 Environmental Science Concentration Final Project (3 cr.) P: MPH Core; Public Health Internship. Provides students the opportunity to synthesize and integrate knowledge acquired through coursework and the public health internship. Student projects will include components of environmental science analysis, research, and application

PBHL-P 704 Public Health Epidemiology Concentration Project (3 cr.) P: MPH Core; Public Health Internship. Students synthesize and integrate knowledge acquired through course work and the public health internship by conducting an epidemiological study. Satisfactory projects include epidemiological research that involves protocol development, data collection and analysis and presentation of an oral presentation and written report.

PBHL-P 705 Public Health Policy and Management Concentration Project (3 cr.) P: MPH Core; Public Health Internship. Provides students the opportunity to synthesize and integrate knowledge acquired through coursework and the public health internship. Student projects will include components of health policy analysis or management research and application.

PBHL-R 515 Sociology of Health and Illness (3 cr.) This course will acquaint students with the theoretical and empirical foundations of the sociology of health and illness, as well as exposing him/her to the important theoretical and empirical research done by sociologists of health and illness . R515 uses sociological perspectives and sociological research techniques to investigate the social and behavioral phenomena associated with health, disease, and health care. The field deals with quite a broad range of topics, including (but not limited to): social influences on the distribution of disease, the influence of inequality on health, the impact of culture on symptom recognition and help seeking, the relation of medicine to institutions of social control, the distinctive characteristics of medicine as a type of work, cost containment issues, the impact of economic factors on the distribution and organization of health care, the implications an aging population has for the provision of health care in the United States, and a consideration of the ethical issues raised by modern biomedicine, etc.

PBHL-S 658 Methods for Research on Social and Behavioral Dimensions of Public Health (3 cr.) This course will train students in basic research methods used by social and behavioral scientists in the public health arena. Through lectures, labs, individual and group activities, students will learn how to read empirical research and evaluate its quality in order to become good consumers of existing research. Students will also learn to produce quality research through an understanding of theoretical foundations, research design and the basics of measurement theory.

Courses

The abbreviation "P" refers to course prerequisites and "R" to recommended prerequisite courses. Prerequisites can be waived by the instructor of the course. The number of hours of credit is indicated in parentheses following the course title. Courses are listed inthree groups: environmental health science, health services management, and public health.

Graduate Courses

PBHL-A 609 Air Pollution and Health (3 cr.) This course provides an overview and foundation in the science and management of air quality, with a focus on health impacts and strategies to reduce these impacts. Course topics include the scientific technical aspects of air pollution through the study of the characteristics of the atmosphere and atmospheric pollutants, effects of meteorology on air pollution, urban air pollution, visibility, smog, acid deposition, stratospheric ozone depletion, global warming and indoor air pollution.

PBHL-A 610 Environmental Toxicology (3 cr.) P: PBHL-A609 This course examines the extent and significance of toxic agents in the environment. It covers risk assessment of potential adverse health effect resulting from human exposure to toxic environmental agents. It also provides a background for understanding mechanistic and biologic specific processes of environmental agents.

PBHL-A 611 Environmental Health Risk Assessment (3 cr.) P: PBHL-A610 This course provides a foundation in the processes and tools of environmental risk assessment, which is the basis for making technical decisions related to environmental issues and human health. Course topics include methods of probabilistic risk analysis, toxicological estimation, regulatory requirements for risk assessment, and managing and communicating risk.

PBHL-A 611 Environmental Health Policy Analysis (3 cr.) This course provides students with a focus on the policy-making process and the many variables that comprise the dynamic framework for environmental policy formulation. The course explores the roles of politics, economics, science, health, values and ethics in setting policy through a consideration of key historical and contemporary issues.

PBHL-A 621 Solid and Hazardous Waste Management (3 cr.) This course provides students with a technical foundation in areas of solid and hazardous waste management that can be applied to the examination of policy options. Topics include characterization of the waste stream, regulations, health and environmental risks, liability issues, management techniques, and treatment and disposal options.

PBHL-A 622 Chemistry for Environmental Health Professionals (3 cr.) This course is designed to provide environmental health professionals, who are not chemists, with the technical background needed to understand and manage environmental health science issues. Topics include a detailed overview of basic principles of chemistry, followed by a more focused treatment of how these fundamentals apply to issues such as hazardous materials and wastes; water and air resources; pollution of the air, water, and land; and other related topics.

PBHL-A 623 Environmental Management Systems: ISO 14001 Based (3 cr.) This course provides students with the knowledge and skills to establish or improve an environmental management system that is compatible with ISO (International Organization for Standardization) 14001, an international, voluntary standard that is emerging as a best-management practice for environment.

PBHL-A 628 Food Safety and Sanitation (3 cr.) This course will examine the various hazards that cause food borne illness as well as the risk factors that are known to contribute to these diseases. Topics include etiological agents for common and emerging food borne diseases; basic concepts of food science and technology; food safety principles and practices that are recommended by the Food and Drug Administration's Food Code.

PBHL-A 633 Occupational Health and Safety for Public Health Professionals (3 cr.) This course provides a survey of technical and regulatory aspects of protecting the health and safety of workers. Topics include basic toxicology; skin, eye, and respiratory hazards; measuring hazardous atmospheres; ventilation systems; fire and explosion hazards; emergency response; occupational hearing loss; radiation; prevention of accidents; cumulative trauma; and personal protective equipment.

PBHL-B 640 Design and Analysis of Medical Experiments (3 cr.) P: G652, P652, B641 or equivalent This is a course into the application of experimental design to biomedical experiments, such as randomization, blocking, factorial designs and stratification. The course addresses both clinical and pre-clinical investigation as well as design of experiments to evaluate medical devices, which will likely be encountered by biomedical researchers. It is addressed to second-year graduate students in biostatistics or epidemiology with a solid understanding of analysis of variance, regression and working knowledge of survial analysis.The course will be taught in two sessions, a lecture, where the relevant theory and methods will be presented, and a practicum or laboratory session, involving hands-on analysis of real-life problems using the SAS statistical software package.

PBHL-B 641 Linear Models in Public Health (3 cr.) P: P551 or equivalent This is a first course into two multivariate statistical procedures, the Analysis of Variance (ANOVA) and Regression with special focus in problems related to the Public Health sciences. This is an introductory course that will expose students to these methods, and consolidate their understanding of statistical inference (estimation and testing of statistical hypotheses) in the context of the two procedures. The course will be taught in two sessions, a lecture, where the relevant theory and methods will be presented, and a practicum or laboratory session, involving hands-on analysis of real-life problems using the SAS statistical software package.

PBHL-B 642 Applied Survival Analysis for Public Health (3 cr.) P: Students must have taken one course in basic statistics and another course in linear regression models. Students must have prior knowledge of SAS for completion of homework. The statistical methods covered in this course focus on “time to event” data, where the event can be response to treatment, relapse of disease, or death. Topics covered in this course include estimations of survival function and regression models for survival data. Specifically, this course covers the central functions of survival analysis: the hazard, survival, and cumulative hazard functions, nonparametric estimation of survival functions using life-table method and the Kaplan-Meier method, and comparison of survival distributions using the log-rank and other tests. In addition, we will discuss regression models for survival outcomes with emphasis on the Cox proportional hazards model. Alternative models such as the accelerated failure time model and use of parametric distributions (exponential, Weibull) will also be considered. Class material will include presentation of statistical methods for estimation and testing, along with current software (SAS) for implementing analyses of survival data. Applications to real data will be emphasized.

PBHL-B 644 Applied Generalized Linear Models and Longitudinal Data Analysis (3 cr.) P: S tudents registering for this course are expected to have completed “Linear Models in Public Health” or its equivalents with a B or better grade. This is an introductory statistical method course on generalized linear models and longitudinal data analysis for students in various public health disciplines. The course focuses on the basic concepts and implementation of four extensions to classical linear regression models: (1) generalized linear models (including logistic and log-linear regression); (2) mixed effects models; (3) generalized linear mixed models; and (4) population average models based on generalized estimating equations (GEE).

PBHL-B 653 Applied Multivariate Statistical Methods (3 cr.) P: P551 and P652. B653 is an introductory multivariate statistics course. This course is applied and is intended for non-statisticians, for example, masters or PhD students in behavioral, psychological, educational or medical sciences, or other health care professionals. Students are expected to have taken two previous courses in statistics (introductory and intermediate) covering up through t-test, ANOVA, ANCOVA and linear regression. The overall objective of the course is to introduce the most commonly used multivariate statistical techniques with emphasis on applications to real data which will be analyzed with SPSS. The emphasis will be on concepts, assumptions, applications, and hands-on interpretation of SPSS results. Formulas or matrix algebra will not be emphasized.

PBHL-E 715 Design and Implementation of Observational Studies (3 cr.) P: P517 and Research Methods This course examines fundamental aspects of designing and implementing observational epidemiology studies. The focus is on developing strategies to increase the validity of the study results by using techniques to control for possible confounding factors and biases. Topics include sampling methods, sensitivity, data weighting, standardization, selection of cases and controls, matching, data collection and project management.

PBHL-E 720 Analysis and Interpretation of Observational Studies (3 cr.) P: This course is designed for students in the PhD program in Epidemiology. Advanced students in the Master of Public Health degree program, Epidemiology concentration may register for this course with the permission of the professor. P: PBHL-E 715 Design and Implementation of Observational Studies. This course examines fundamental aspects of analyzing data generated by observational epidemiology studies. The focus is on developing a solid understanding of contemporary analytical techniques to increase the validity of the study and control for possible confounding factors and biases.

PBHL-E 730 Analysis of Genetic Associations (3 cr.) P: P601 (Advanced Epidemiology), P652 (Biostatistics for Public Health II), and P730 (Molecular and Genetic Epidemiology), or signature of instructor required. This course introduces the conceptual and practical tools needed for population-based genetic association studies among unrelated subjects. Lectures and selected readings present key issues (such as linkage disequilibrium, "tagging SNPs," haplotypes, population stratification and epistasis) and appropriate statistical methods. Students will be required to present selected papers in class. Students will gain hands-on experience with a range of analytic tools and software packages as part of a class project which gives them the opportunity to design and analyze an association study. This project will require students to work on real-world problems such as marker selection, potential multiple comparisons issues due to multiple markers and multiple outcomes, and missing data.

PBHL-E 731 Design and Analysis of Genetic Association Studies (3 cr.) P: P601 (Advanced Epidemiology), P652 (Biostatistics for Public Health II), and P730 (Molecular and Genetic Epidemiology), or signature of instructor required. This course introduces the conceptual and practical tools needed for population-based genetic association studies among unrelated subjects. Lectures and selected readings present key issues (such as linkage disequilibrium, "tagging SNPs," haplotypes, population stratification and epistasis) and appropriate statistical methods. Students will be required to present selected papers in class. Students will gain hands-on experience with a range of analytic tools and software packages as part of a class project which gives them the opportunity to design and analyze an association study. This project will require students to work on real-world problems such as marker selection, potential multiple comparisons issues due to multiple markers and multiple outcomes, and missing data.

PBHL-E 750 Doctoral Topics in Public Health (3 cr.) Courses offered under this course number would include PhD courses on topics expected to be offered only once, such as those taught by visiting faculty, and those that are newly developed and have not yet been assigned a specific course number. The course will focus on a specific topic or technique related to the field of Public Health. The material to be studied will be determined by the instructor with input from the PhD faculty.

PBHL-E 751 Doctoral Readings in Epidemiology (1-3 cr.) This course is designed to expose a PhD student to published material on a specific topic or technique related to their field of study in Epidemiology. The material to be studied will be determined primarily by the PhD student under the direction of a faculty member with input from the student’s concentration advisor. The PhD student is expected to work closely with the faculty member to develop a strategy to

identify the material to study, plan a time frame for completion of the study and to determine the nature of the study product. Generally the product will be a summary and interpretation of the material studied in a literature review format. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement

PBHL-E 752 Doctoral Research in Epidemiology (1-3 cr.) This course is designed to allow PhD students the opportunity to explore research questions by collecting data or using existing data related to their field of study in Epidemiology. The study topic will be determined primarily by the PhD student under the direction of a faculty member with input from the student's concentration advisor. The PhD student is expected to work closely with the faculty member to develop the study protocol, obtain IRB approval if necessary, obtain the data and collect the planned data analysis. The time frame for completion and the nature of the study product will be determined by the PhD student, faculty member and advisor. Generally the product will be a manuscript for submission to an appropriate journal. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement.

PBHL-E 765 Nutritional Epidemiology (3 cr.) P: P517 and P551 This course provides students with an overview of fundamental concepts and methods of nutritional epidemiology and the current state of knowledge on well-studied associations between diet and chronic diseases. Emphasis will be placed on the design, implementation, analysis, and interpretation of nutritional epidemiologic studies

PBHL-E 775 Doctoral Research Seminar in Epidemiology (1 cr.) This course is designed to expose PhD students to a wide range of specific research topics and issues in Public Health. The seminar topics will be chosen by the Director of the PhD program with input from other faculty members. The PhD students are expected to attend each seminar session, read assigned material, and participate in the seminar discussions. The PhD students may be asked to present their research projects during the seminar to obtain feedback and recommendations from the faculty and other students.

PBHL-E 780 Pharmacoepidemiology (3 cr.) P: P517 This is an introductory pharmacoepidemiology course. Students will learn how principles of modern epidemiologic methods are used to evaluate the safety, effectiveness, and utilization patterns of medical products (drugs, vaccines, and medical devices) in human populations, with a focus on observational studies. Related topics, including therapeutic risk management, data sources and ethical principles will be discussed. Advanced methodology, such as that utilized to address confounding by indication and misclassification will be introduced.

PBHL-G 651 Introduction to Biostatistics I (3 cr.) P: One year undergraduate mathematics is required. Working knowledge on linear algebra and elementary calculus is expected. Students with insufficient mathematics preparation are expected to remedy the deficiency on their own. G651 is an introductory level biostatistics course designed for healthcare professionals. This course will cover the topics on data presentation techniques, describing data with numerical summary measures, probability and probability distributions, sampling distributions, statistical inferences from small and large samples, analysis of categorical data, analysis of variance, correlation and simple linear regression analysis.

PBHL-G 652 Introduction to Biostatistics II (3 cr.) P: G651 or equivalent G652 is an advanced biostatistics course designed for students with an interest in the health sciences. Students are expected to have completed at least one semester course of basic biostatistics. Knowledge of probability and probability distributions, concepts of estimation and hypothesis testing are assumed. Topics covered in this course include multiple linear regression, analysis of covariance, logistic regression, and survival analyses. Upon completion of the course, students are expected to understand the appropriate statistical models for various outcomes and be able to interpret results using statistical techniques covered in this course. Students are also expected to conduct simple analyses using SPSS on personal computers

PBHL-H 501 U.S. Health Care: Systems, Policies, and Ethical Challenges (3 cr.) Study of health, illness, and disease trajectories and the systemic components that mold the health care system. Ideological paradigms predicting utilization and health behaviors are addressed, as are guidelines for ethical decision making and problem analysis. Formulation and implementation of organizational and governmental policies and their associated theoretical assumptions are addressed.

PBHL-H 507 Management of Individual and Group Behavior (3 cr.) This course provides a conceptual framework for understanding behavior in the work environment by introducing concepts concerning effective management of people in organizations. Key theories and concepts in the field of organizational behavior will be introduced. The focus of this course is at the micro level of analysis, addressing topics such as individual theories of motivation, job design, and diversity issues; management of work teams; group decision making; managing conflict; and leadership, influence, and power issues.

PBHL-H 508 Managing Health Care Accounting Information for Decision-Making (3 cr.) P: undergraduate principles of accounting. Provides a user-oriented understanding of how accounting information should be utilized, focusing on balance sheet and income statement and cash flow analysis, budgeting, cost analysis, and responsibility accounting.

PBHL-H 509 Financial Management Principles of Health Care (3 cr.) P: SPHA-H 508. Provides knowledge of corporate finance practice in health care organizations. Establishes an understanding of the basic elements of financial theory used to address service expansion or contraction, capital investment issues, developing business plans and working capital management.

PBHL-H 514 Health Economics (3 cr.) P: 3 credit hours of undergraduate economics. Examines the principles and application of economic analysis in the health field and the economist's approach to health care issues. Provides insights offered by economic analysis of specific health issues and problems.

PBHL-H 515 Seminar in Health Policy: Special Topics (3 cr.) P: SPHA H501, H503, or consent of instructor. Exploration of health policy topics from economic, financial, sociological, political, and psychological perspectives. Analytical paradigms are applied to organizational or macro-policy making issues that vary in response to changing environments. May be repeated once with advisor's approval.

PBHL-H 516 Health Services Delivery and the Law (3 cr.) Medical-legal concepts related to hospitals and other health services organizations. Course provides an in-depth understanding of the law and the legal processes affecting the health services system. Presentation of the elements of administrative and agency processes, torts, contracts, facilities, physicians, patients, and personnel.

PBHL-H 517 Managerial Epidemiology (3 cr.) Examines general epidemiologic methods such as population descriptive techniques, use of health indicators and secondary health-related data sources. Includes design, administration, and analysis of observational and experimental studies. Emphasis will be on the use of epidemiologic techniques to assess community health, determine community risk factors, and evaluate community-based programs.

PBHL-H 518 Statistical Methods for Health Services (3 cr.) P: 3 credit hours of undergraduate statistics. Study of the quantitative techniques commonly used to examine health-related data. Includes univariate, bivariate, and multivariate techniques. Emphasis is on using statistical techniques to make policy and administrative decisions in a health services setting. Students use standard computer software to analyze data.

PBHL-H 521 Management Science for Health Services Administration (3 cr.) Focus is on management science methods, as applied to health sciences administration. Includes treatment of decision theory, constrained optimization, and probability simulation.

PBHL-H 523 Health Services Human Resource Management (3 cr.) This course provides the knowledge and skills needed to understand the application of personnel and labor relations techniques to the health services sectors, with particular emphasis on human resources management, employees' benefit programs, and labor relations as applied to the health services delivery organization.

PBHL-H 606 Health Services Quality Improvement and Risk Management (3 cr.) P: H501, H503, and V504. Critically examines the concepts, strategies, and techniques related to the improvement of the quality of health service delivery. Addresses the increasing need to enhance productivity given the impact of external and other factors on the workplace. Principles and application of risk management concepts and techniques, including insurance, are emphasized.

PBHL-H 612 Marketing for Health Services Delivery (3 cr.) This course focuses on the marketing problems and strategies of health care organizations. Subjects include the nature of health care services, organizing for health service delivery, managing health services demand, tailoring customer mix, and managing supply in health care services.

PBHL-H 615 Health Care Outcomes and Decision Making (3 cr.) P: H501, H502, H514, and H518. Application of health outcomes measures in decision-making and evaluation in various health service settings. Includes designing and implementing evaluation plans of health and social programs. Emphasis on evaluation strategies, measurement of health outcomes, and management decision-making.

PBHL-H 623 Health Care Applications of Strategic Management (3 cr.) P: H501, H502, H510, and H521. This last course of the series in the capstone sequence is designed to assist students in synthesizing and summarizing all of the previous course work. Emphasis is on "real-world" case situations and requires active participation by the students. Case studies chosen reflect current management issues in health services administration.

PBHL-H 624 Developing Strategic Capability (3 cr.) This course explores management roles in health care. Application of strategic management theories, concepts and principles and an understanding of managerial roles in organizations are emphasized. Managerial process, management theories, leadership, organizational design, and strategic management are examined.

PBHL-H 628 Health Care Information Systems (3 cr.) A study of the terminology, technology, and application of information systems in various health care settings. Topics include the gathering, organization, storage, and retrieval of complex data banks, as well as assessment of health service data needs and considerations in developing information systems. Includes many computer-based exercises.

PBHL-H 702 Internship in Health Services Management (3 cr.) P: H501, H509, H514, and H650. Requires the equivalent of a minimum of 3 credit hours of on-site experience under the supervision of a qualified preceptor and program faculty. Grading is on an S/F basis.

PBHL-H 735 Research in Health Administration (3-6 cr.) P: all core courses or consent of instructor. Field research conducted under the direction of a faculty member. Designed for advanced students and those who have elected not to take a residency. Grading is on an S/F basis.

PBHL-H 746 Comparative Effectiveness Research Methods (3 cr.) P: P517 and P551 This course introduces the range of methods and associated political and ethical issues related to comparative effectiveness research in health and medicine, with a particular focus on developing quantitative skills to the design, review and analysis of clinical trials (e.g. drugs, devices, clinical or behavioral strategies). Students will learn quantitative methodologies that can be utilized to synthesize a range of evidence regarding the benefits and harms of available choices for care, and will explore the potential and limitations of comparative effectiveness findings for policy and health care decision making.

PBHL-H 775 Doctoral Readings in Health Policy and Management (1-3 cr.) This course is designed to expose a PhD student to published material on a specific topic or technique related to their field of study in Health Policy and Management. The material to be studied will be determined primarily by the PhD student under the direction of a faculty member with input from the student's concentration advisor. The PhD student is expected to work closely with

the faculty member to develop a strategy to identify the material to study, plan a time frame for completion of the study and to determine the nature of the study product. Generally the product will be a summary and interpretation of the material studied in a literature review format. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement.

PBHL-H 775 Doctoral Research Seminar in Health Policy and Management (1-3 cr.) This course is designed to expose PhD students to a wide range of specific research topics and issues in Public Health. The seminar topics will be chosen by the Director of the PhD program with input from other faculty members. The PhD students are expected to attend each seminar session, read assigned material, and participate in the seminar discussions. The PhD students may be asked to present their research projects during the seminar to obtain feedback and recommendations from the faculty and other students.

PBHL-H 775 Doctoral Readings in Health Policy and Management (1-3 cr.) This course is designed to expose a PhD student to published material on a specific topic or technique related to their field of study in Health Policy and Management. The material to be studied will be determined primarily by the PhD student under the direction of a faculty member with input from the student's concentration advisor. The PhD student is expected to work closely with the faculty member to develop a strategy to identify the material to study, plan a time frame for completion of the study and to determine the nature of the study product. Generally the product will be a summary and interpretation of the material studied in a literature review format. The PhD student and faculty member will complete a written agreement, which outlines the scope of work for the semester. The concentration advisor will also sign this agreement.

PBHL-P 500 Social and Behavioral Science in Public Health (3 cr.) This course is designed to introduce students to the philosophies and principles that provide the foundation for health promotion and disease prevention with an emphasis on population-based public health approaches. Students will explore topics that promote a broader and better understanding of determinants of health; the multiple factors contributing to health and illness behaviors; fundamentals, theories and principles that shed light on health and illness behaviors; and philosophies, principles and strategies that facilitate improvements in population health and the elimination of health disparities. Students will be introduced to the important complementary relationships between and comingled effects of the determinants of health with an emphasis on the social determinants of health. Students will be presented with new approaches to improve, by not only focusing on individual capacities and capabilities to address their diseases and/or ailments, but also, most importantly perhaps, focus on the conditions and contexts in which individuals have the liberty and limits to make choices that influence health and illness behaviors in many different ways.

PBHL-P 500 Social and Behavioral Science in Public Health (3 cr.) This course is designed to introduce students to the philosophies and principles that provide the foundation for health promotion and disease prevention with an emphasis on population-based public health approaches. Students will explore topics that promote a broader and better understanding of determinants of health; the multiple factors contributing to health and illness behaviors; fundamentals, theories and principles that shed light on health and illness behaviors; and philosophies, principles and strategies that facilitate improvements in population health and the elimination of health disparities. Students will be introduced to the important complementary relationships between and comingled effects of the determinants of health with an emphasis on the social determinants of health. Students will be presented with new approaches to improve, by not only focusing on individual capacities and capabilities to address their diseases and/or ailments, but also, most importantly perhaps, focus on the conditions and contexts in which individuals have the liberty and limits to make choices that influence health and illness behaviors in many different ways.

PBHL-P 504 U.S. Health Care Systems and Health Policy (3 cr.) This course explores the U.S. health care system, policy development, and ethical challenges. It examines the structure, components, organization and financing of the U.S. health care system. The policy process at national, state and local levels will be analyzed using legislation and related activities.

PBHL-P 517 Fundamentals of Epidemiology (3 cr.) This course will introduce students to basic epidemiologic concepts including determinants of health and patterns of disease in populations, population health descriptive techniques, use of health indicators and secondary data sources. Students will gain an understanding of the role of Epidemiology in developing prevention strategies and policy. Among the topics to be covered are measures of mortality and morbidity, design and analysis of observational studies, community health assessment and program evaluation.

PBHL-P 519 Environmental Science in Public Health (3 cr.) The primary focus of this course will be on pathogenic agents (biological, chemical, and physical) in the environment and their impact on morbidity and mortality of human populations. We will study several types of common and emerging pathogens from anthropogenic and natural sources and how they cause illness and/or injury. Particular attention will be given to the mode of transmission, route of exposure, and acute and chronic diseases or injuries caused by these environmental agents. During the class we will also investigate the strategies, technologies and laws/policies that are used to prevent, control, or eliminate environmental hazards.

PBHL-P 551 Biostatistics for Public Health I (3 cr.) This course introduces the basic principles and methods of data analysis in public health biostatistics. Emphasis is placed on public health examples as they relate to concepts such as sampling, study design, descriptive statistics, probability, statistical distributions, estimation, hypothesis testing, chi-square tests, t-tests, analysis of variance, linear regression and correlation.

PBHL-P 600 Epidemiologic Research Methods (3 cr.) P: P517 and P551. This course provides an in-depth presentation of the major research designs, analytical methods, and practical issues specifically related to conducting research in the field of epidemiology, outcomes

research, and health economics. Descriptive, observational and experimental designs are included. In addition, issues of ethics, protocol, data quality, instrument design, and analysis are covered.

PBHL-P 601 Advanced Epidemiology (3 cr.) P: P517 & P551 (or concurrently enrolled). This course provides students with an in-depth understanding of advanced epidemiologic concepts introduced in other courses as well as a fundamental understanding of epidemiologic techniques not covered in other classes. Topics included will represent cutting edge techniques, philosophical issues and insights to appropriately conduct and interpret the findings of epidemiological studies. Students will gain an understanding of these concepts and issues through discussions with expert epidemiologists and hands-on exercises.

PBHL-P 602 Public Health Internship (3 cr.) P: MPH core and approval of concentration advisor. Integrates public health theory and practice in a practice setting. Students have the opportunity to apply concepts from core and concentration courses, conduct projects and interact with a range of health professionals. Students work both with a faculty advisor and qualified preceptor in the agency.

PBHL-P 609 Infections Disease Epidemiology (3 cr.) P: P517. This course is designed to provide a basic overview of the infectious disease process, including disease agents, transmission routes, immunity and public health significance. The course introduces principles of infectious disease epidemiology, including outbreak investigation and surveillance, using case studies as examples. Concepts on globalization of disease, microbial ecology, and disease eradication also are discussed.

PBHL-P 610 Chronic Disease Epidemiology (3 cr.) P: P517. This course examines chronic health conditions from epidemiological perspectives. Concepts include distribution, determinants; diagnosis; measures of severity; treatment modalities; surveillance measures; survival and prognosis; and quality of care measures. Research methods prevention strategies and screening tests are presented. Clinical expert's present diagnosis and treatment methods.

PBHL-P 611 Policy Design, Implementation and Management (3 cr.) This course will examine the reasons for this in terms of the politics of health and the implications for the future of health policy in the United States. Further, health policy topics from economic, financial, sociological, political and psychological perspectives will be covered. Analytical paradigms are applied to organizational or macro-policy making issues. Topics vary by semester according to current policy challenges faced at the federal level.

PBHL-P 612 Health Outcomes Research (3 cr.) P: P517 & P551. This web-based course is evidence-based and focused on health outcomes research in contemporary health care. The different types of health outcomes assessment tools and their application in determining patient health status, changes in health status, and the effectiveness of health care interventions will be addressed. The course will focus on generic and specific health related outcomes assessment tools, looking at such issues as disease specific outcomes and patient satisfaction.

PBHL-P 613 Public Health and Emergency Preparedness (3 cr.) This graduate elective course is designed to familiarize learners with emergency preparedness concepts due to natural and man-made disasters. The course will also review biological agents used for terrorism in the past, and agents the Centers for Disease Control consider most likely to be used at present. The content will be delivered via, seminar discussion, web based activities, CDs addressing bioterrorism, resources for infection control and key resources for further exploration. Other student opportunities include readings from past great works depicting responses to naturally occurring infectious disease or contemporary responses to disasters and terrorism/bioterrorism. Public health responses to emergency preparedness at local, state and federal levels will also be discussed.

PBHL-P 614 Program Planning in Public Health (3 cr.) This course will provide students with a systematic approach to program planning and evaluation of health programs. Students will apply program planning, implementation and evaluation theory to develop an evidence-based health promotion program that addresses a public health issue of personal interest.

PBHL-P 615 Culture and Qualitative Methods (3 cr.) This course provides learning opportunities for public health graduate students to develop an understanding of culture and of how qualitative methods can be used to develop a sensitivity to and an understanding of cultural practices. Such cultural sensitivities and competencies are basic to effective program planning, implementation, service delivery, and program evaluation. This class will provide important knowledge and opportunities related to public health practice in a community setting comprised of a multicultural population with differing health beliefs, values, behaviors and health care needs. By the end of the semester, the student will be able to define and distinguish the concepts of culture and traditions, acculturation and enculturation, traditionalism and modernism and will be able to begin to identify how to build on cultural practices to develop interventions aimed at influencing health behaviors. Further, the student will have active experience in conducting qualitative research in a community setting, including skills in conducting windshield surveys, participant observations, key informant interviews, and focus groups.

PBHL-P 616 Strategic Planning for Health Services Organizations (3 cr.) This courses aims to develop the student's knowledge and ability in strategic management in health services organizations. Based on an introduction to the general process model of strategic management, the course will engage in detailed discussions of a series of topics in strategic management. These topics include the identification of the organization's mission, vision, and values, the analysis of the external and internal environment of the organization, the identification of strategic challenges and opportunities, the development of strategies, the evaluation of strategies, the communication of strategies, and the development and evaluation of an action plan. The course emphasizes the unique strategic challenges facing health services organizations and their leadership, and aims to develop accordingly the student's ability to identify, analyze and address these challenges. The course utilizes real-world cases to facilitate the understanding of basic course content. The conceptual model of strategic management will be illustrated through the analysis of selected health care cases.

The student will also be required to independently analyze a strategic case most relevant to their field of work or study applying the conceptual strategic planning process.

PBHL-P 618 Cancer Epidemiology (3 cr.) P: P517 This course is an overview of cancer epidemiology, focusing on key concepts, etiologic research, applications to public health practice and major epidemiologic methods. This course is designed for students who have an interest in epidemiology.

PBHL-P 619 Health Economics for Public Health Professionals (3 cr.) This is an introductory microeconomics course with applications to the public health and health care systems. The course objectives are that the students develop an appreciation of economic theories and principles, exacting assumptions thereof, and how these theories and principles apply to the public health and health care markets, particularly how price drives resource allocation in addition to signaling value, substitution and technological innovation. Students will also be introduced to skills need to measure and interpret economic values and relationships including the interpretation of quantitative data analysis. We will examine how economic incentives affect the different actors in the health (care) system. The fundamental models of economic and organizational behaviors will be extended to describe the behaviors of the different health care players and the health (care) system as each tries to maximize utility and profits (or min costs), respectively, under different financial, regulatory and technological constraints. Most importantly, students will be able to explore the limits to markets and rationality, and develop an appreciation for how a variety of checks and balances-more so that unbridled competition-contribute to efficient and equitable functioning of and outcomes in a market.

PBHL-P 631 Maternal, Child, and Family Health (3 cr.) Overview of Maternal Child health with emphasis on conditions and issues effecting reproductive, childhood, and women's wellbeing. Includes classroom lecture, discussion, and student presentations.

PBHL-P 632 History of Public Health (3 cr.) This course surveys the history of public health from antiquity to the late twentieth century with the aim of providing students with an understanding of how history may inform present day challenges regarding the health of populations, including emerging infectious diseases; climate change; dislocation of populations from conflicts and natural disasters; malnutrition; and chronic diseases in aging populations. Using a chronological and thematic approach to history, students will learn of the origins, natural histories, and important determinants of the structure and function of modern systems of public health in the United States. The course will explore the complex interactions within populations of disease, science, social and cultural norms, moral/ethical values, economic and legal precepts, health professionals, institutions, and government in shaping the rate of adoption and diffusion of public health systems. The course will use a readings/discussion format with limited didactic teaching and an emphasis on active learning. Each week students will read 4-7 papers and be prepared to discuss them in class. Important goals of the course are to stimulate interest in the history of public health, learn about the methods and tools used in historical research, and promote critical thinking.

PBHL-P 644 Health Impact Assessment (3 cr.) The goal of this course is to introduce students to the theoretical and practical aspects of health impact assessment (HIA) as a methodological tool in public health. HIA utilizes a variety of qualitative and quantitative methods and tools, designed to assess the potential health effects of a public policy, program, project, or initiative. While HIA is still an emerging practice in the United States, in Europe, Canada, and other areas of the world, the assessment of the public health impact of public decisions have been performed regularly to support policy decisions and promote conditions required for optimal health. During the first part of the semester, students will learn the necessary steps to conduct an HIA, review national and international case studies, and discuss how findings may or may not impact policy making. During the second half of the course, students will work in teams with a local or state health department to examine the potential health impact of policy proposals in Indiana.

PBHL-P 650 Readings in Public Health (3 cr.) This course is designed to expose the student to different readings in public health. The course will allow the student to apply skills learned in the public health core courses by collecting data and applying techniques. The student will be required to read critically published papers and identify research topics.

PBHL-P 650 Readings in Public Health Topic: Health Communication (3 cr.) Effectively communicating health messages to the public can be a challenge. From advertising a program to promoting behavior change, there are many tools and actions that can yield positive results. This course will offer theory and practical experiences through the steps of creating a communications plan and actual campaign. Case studies, guest speakers, and hands-on experiences will be blended together.

PBHL-P 652 Biostatistics for Public Health II (3 cr.) P: P551. This course introduces the advanced principles and methods of data analysis in public health biostatistics. Emphasis is placed on public health examples as they relate to concepts such as: Multiple regression, analysis of variance and covariance, logistic regression, nonparametric statistics, survival analysis, statistics used in epidemiology, and repeated measures analysis.

PBHL-P 655 Historical Evolution of Epidemiology (3 cr.) P: P517. The course will explore the historical developments and public health responses to human disease morbidity and mortality, and their importance and influence on the role of public health in modern society. Readings and discussion will examine in detail, the evolutionary change in the epidemiologic response of a Varity of disease of national and international importance.

PBHL-P 657 Application of Cost-Effectiveness Analysis in Public Health (3 cr.) Cost-effectiveness analysis is widely used in evaluating the performance of public health programs and policies. In this course, students will learn to frame the conceptual model, to collect and synthesize data regarding "cost" and "effectiveness", to perform a cost-effectiveness analysis, and to form recommendations based on the analysis. Meta-analysis and various survey/interview techniques will be introduced as essential tools for data collection in cost-effectiveness analyses. Learning will be facilitated by numerous examples of the application of this popular method. Health Policy and Management students have option of taking this course in place of H509.

PBHL-P 658 Methods of Health Services and Policy Research (3 cr.) This is a required course for students in the Health Policy and Management concentration. It aims to familiarize students with the methods of health services research and policy research. It introduces various study designs, data collection methods, and data analysis techniques that are relevant to students and researchers in these fields. It discusses the ethical, legal and political implications of health services and policy research. Students will apply theoretical knowledge in the analysis of actual data. This course also aims to facilitate the development of student's final concentration project.

PBHL-P 659 The Tobacco Pandemic (3 cr.) This course focuses on U.S. and global Tobacco Control, including the health and economic burdens of tobacco use as well as evidence-based approaches to prevention and management. Students will explore how human use of the plant Nicotiana tobacum with its potent alkaloid, nicotine, evolved into the largest human made pandemic in world history. The nature, prevalence, and trends of tobacco addiction, tobacco-related diseases, and their treatment will be addressed, as well as the centuries long "tobacco wars," pitting the tobacco industry's effective marketing of their products against the often fragmented, underfunded, and ineffectual government and anti-tobacco forces. Students will review the rise, over the past 50 years, of effective science and evidence-based tobacco control policy in the U.S.: U.S. Surgeons General Reports; CDC Best Practices for Comprehensive Tobacco Control Programs; U.S. PHS Clinical Practice Guidelines: Treating Tobacco Use and Dependence, and related sources. The future of Tobacco Control, including various scenarios for the "end game" of tobacco use in modern societies will be addressed, in light of recent major legal, political, and economic changes in the landscape of Tobacco Control in the U.S and globally.

PBHL-P 670 Topics in Public Health (3 cr.) This course has a variable title and can be offered for variable credits. Similar to topics courses offered in other IUPUI programs, this course offers an introduction to a variety of public health topics and current issues will be covered in this course.

PBHL-P 670 Advanced Public Health Survey Research (3 cr.) This course provides an intensive focus on the formative phases of health survey research. Topics covered will include sampling methodologies, questionnaire development, testing, revision and administration, interviewing, coding procedures, as well as topical discussions related to research ethics and real world challenges of research. Active learning will be emphasized through several field based exercises, as well as a research proposal based on students' own research interests.

PBHL-P 670 Applied Public Health Campaigns and Social Marketing Strategies (3 cr.) Effectively communicating public health messages can be a challenge. From advertising a program to promoting behavior change, there are many social marketing strategies and tools that yield positive results. This course will offer students practical opportunities to apply these strategies and tools in the development and evaluation of public health campaigns. Case studies, guest speakers, and hands-on experiences will be incorporated in this class.

PBHL-P 670 Cardiovascular Epidemiology (3 cr.) P: P517 and P601 An advanced graduate course that discusses the topics related to the epidemiology and prevention diseases. The purpose is to give students an overview of the major cardiovascular diseases and their risk factors.

PBHL-P 670 Global Perspectives of Health Policy and Health Systems (3 cr.) This 3 hour course is designed to expand students' perspectives on global health care through the in-depth study of health care and health systems that are distinct from the U.S. health care system. Students also will learn how health policy and management research apply the comparative method in the study of health systems and health policy. Finally, students will explore health policy as a global challenge through a systematic discussion of international health policymaking and responses to health problems requiring global or regional nation-level cooperation.

PBHL-P 700 Concentration Project Completion (1 cr.) This course is designed for MPH students who are working on their Final Concentration Project until project grade has been assigned. Enrollment in PBHL-P700 allows students access to the library, computer labs, IRB, other campus facilities/services and to meet with academic advisors. In addition it allows students to retain eligibility for financial aid and loan deferment. Students enrolled in 45 credit hours are eligible to enroll in P700.

PBHL-P 701 Public Health Biostatistics Concentration Final Project (3 cr.) P: MPH Core; Public Health Internship.

PBHL-P 702 Public Health Social and Behavioral Science Concentration Project (3 cr.) P: MPH Core; Public Health Internship. Provides students the opportunity to synthesize and integrate knowledge through course work and the public health internship. Student projects will include components of behavioral health sciences research and application.

PBHL-P 703 Environmental Science Concentration Final Project (3 cr.) P: MPH Core; Public Health Internship. Provides students the opportunity to synthesize and integrate knowledge acquired through coursework and the public health internship. Student projects will include components of environmental science analysis, research, and application

PBHL-P 704 Public Health Epidemiology Concentration Project (3 cr.) P: MPH Core; Public Health Internship. Students synthesize and integrate knowledge acquired through course work and the public health internship by conducting an epidemiological study. Satisfactory projects include epidemiological research that involves protocol development, data collection and analysis and presentation of an oral presentation and written report.

PBHL-P 705 Public Health Policy and Management Concentration Project (3 cr.) P: MPH Core; Public Health Internship. Provides students the opportunity to synthesize and integrate knowledge acquired through coursework and the public health internship. Student projects will include components of health policy analysis or management research and application.

PBHL-R 515 Sociology of Health and Illness (3 cr.) This course will acquaint students with the theoretical and empirical foundations of the sociology of health and illness, as well as exposing him/her to the important theoretical and empirical research done by sociologists of health and illness . R515 uses sociological perspectives and sociological research techniques to investigate the social and behavioral

phenomena associated with health, disease, and health care. The field deals with quite a broad range of topics, including (but not limited to): social influences on the distribution of disease, the influence of inequality on health, the impact of culture on symptom recognition and help seeking, the relation of medicine to institutions of social control, the distinctive characteristics of medicine as a type of work, cost containment issues, the impact of economic factors on the distribution and organization of health care, the implications an aging population has for the provision of health care in the United States, and a consideration of the ethical issues raised by modern biomedicine, etc.

PBHL-S 658 Methods for Research on Social and Behavioral Dimensions of Public Health (3 cr.) This course will train students in basic research methods used by social and behavioral scientists in the public health arena. Through lectures, labs, individual and group activities, students will learn how to read empirical research and evaluate its quality in order to become good consumers of existing research. Students will also learn to produce quality research through an understanding of theoretical foundations, research design and the basics of measurement theory.

Undergraduate Courses

PBHL-A 316 Environmental Health Science (3 cr.) A study of human interaction with the environment and potential impacts of environmental agents on health and safety. Hazards from natural sources and human activities that contaminate our air, land, water, food, homes, neighborhoods, and workplaces are examined. Environmental control activities, including pollution control technology and policy, are also examined.

PBHL-A 322 Principles of Epidemiology (3 cr.) A basic overview of epidemiologic methodology and techniques. Both communicable and chronic disease risk factors will be discussed, along with data acquisition, analysis techniques, and current published epidemiological studies.

PBHL-A 367 Environmental Science and Health Practicum (2 cr.) P: PBHL-A316 The Enviornmental Science and Health Practicum will consist of a personal career-planning component coupled with a weekly field visit to environmental science and health-related organizations in central Indiana. Students must perform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-H 367 Health Services Management Practicum (2 cr.) P: PBHL-H320 and Junior Standing The Health Services Management Practicum will consist of a personal career-planning component coupled with weekly field visits to health-related organizations in central Indiana. Students must preform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-A 380 Environmental Health Science Internship (3 cr.) P: Permission of Instructor. Open to interested students upon approval of the faculty. Students are placed with governmental agencies or private and not-for-profit organizations or governmental units for assignment to a defined task relevant to their educational interests in environmental health science. Tasks may involve staff work or research. May be repeated for credit. Course is graded S/F (Satisfactory/Fail).

PBHL-A 410 Introduction to Environmental Toxicology (3 cr.) Study of toxic mechanisms, pathology, and disease development resulting from exposure to biological and chemical agents in the environment.

PBHL-A 416 Environmental Health Policy (3 cr.) Study of professional requirements and duties of the environmental health functions within health agencies; consideration of applicable laws and standards in each environmental health function; environmental health program planning, evaluation, implementation, and personnel responsibilities.

PBHL-A 424 Environmental Health Science Technology: Managing Water and Wastes (3 cr.) P: PBHL-A316; MATH 153. Technology approach to preventing the transmission of disease among humans through water and wastes. Course focuses on drinking water treatment and distribution, water quality and pollution, wastewater treatment, storm water management, municipal solid waste, and hazardous waste management.

PBHL-A 428 Food Science and Sanitation (3 cr.) Basic concepts of food technology with emphasis on methods and procedures in food processing to minimize contamination and to prevent food-related illness. Federal, state, and local food laws and inspection procedures will be examined.

PBHL-A 433 Industrial Hygiene (3 cr.) Survey of the technical and regulatory aspects of protecting the health and safety of workers. Topics include basic toxicology; skin, eye, and respiratory hazards; measuring hazardous atmospheres; ventilation systems; fire and explosion hazards; emergency response; occupational hearing loss; radiation; prevention of accidents; cumulative trauma; and personal protective equipment.

PBHL-A 451 Air Pollution in the Community (3 cr.) A survey course covering the chemistry, transport, and fate of air pollutants related to current issues of air quality, such as photochemical smog, ozone depletion, particulate matter, and indoor air quality. Topics include the types, sources, health and environmental effects, measurement, evaluation, control, regulation, and modeling of air pollution concentrations.

PBHL-A 459 Environmental Science and Health Data Analysis (3 cr.) P: PBHL-A316; SPEA0-K300; 1 semester of chemistry. Provides students with an understanding of basic principles needed to perform sampling and analysis of field and laboratory environmental data. Topics include properties of chemical and biological constituents, detection limits, calibration, quality control, precision accuracy, and statistical analysis.

PBHL-A 460 Environmental Science and Health Data Analysis (3 cr.) P: PBHL-A459. Basic physical, chemical, and biological examinations and standards for potable water quality, wastewater treatment determinations, and stream pollution control. Basic physical, chemical, and biological (ergonometric) examinations used in industrial hygiene and air pollution control. Instruction in basic laboratory skills and techniques for performing these examinations.

PBHL-A 466 Public Health Field Experience (1-3 cr.) Supervised advanced training in professional and technical functions in public health; guided student activity and performance in professional public health functions.

Individualized programs may be arranged to suit students' areas of concentration.

PBHL-B 300 Introduction to Biostatistics (3 cr.) P: MATH-M118 This is an introductory survey of statistical reasoning and analysis. Additionally, students should have a working knowledge of personal computers and the Widows operating environment

PBHL-H 120 Contemporary Health Issues (1-3 cr.) An examination of current public health, environmental health, and health service delivery issues in the U.S. Topics include the organization and costs of health systems, access to care, and the interrelationships between risk factors and health; also, environmental challenges facing our society and their impact on health.

PBHL-H 126 Introduction to Careers in Health Care (1 cr.) Introduces students to different careers and opportunities in the field of health care administration.

PBHL-H 200 Health Care Accounting (3 cr.) Course will provide students with a foundation in health care accounting from long-term care to acute care. The topics covered will include balancing sheet or statement of financial position, income statement or statement of revenue and expenses, journals, ledgers, trial balances and discrimination of formatting financial statements between acute care and long-term care organizations.

PBHL-H 320 Health Systems Administration (3 cr.) An overview of the U.S. health care delivery system. It examines the organization, function, and role of the system; current system problems; and alternative systems or solutions.

PBHL-H 352 Health Finance and Budgeting (3 cr.) P: BUS-A 200 or BUS-A 201. A study of the financial management of health care facilities based on generally accepted business principles. Accounting and managerial control of cash, accounts receivable, inventory control, budgeting, and cost control, as well as accounting and evaluation of short- and long-term debt will be examined.

PBHL-H 353 Advanced Health Finance and Budgeting (3 cr.) P: H352. This course builds upon H352 Health Finance and Budgeting as well as examines the uses of contractual language and obligations. It uses a series of case studies to apply techniques and principles taught in PBHL-H 352.

PBHL-H 354 Health Care Economics (3 cr.) This course applies economics to the study of administrative and policy issues in the health care sector. Economic concepts are used to explain the system of health care financing and the organization of health care delivery in the U.S. The economic evaluation of health care programs is also discussed.

PBHL-H 365 Health Services Practicum (2 cr.) P: PBHL-H320; junior standing The Health Services Practicum will consist of a personal career-planning component coupled with weekly field visits to health care agencies in central Indiana. Students must perform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-H 367 Health Services Management Practicum (2 cr.) P: PBHL-H320 and Junior Standing The Health Services Management Practicum will consist of a personal career-planning component coupled with weekly field visits to health-related organizations in central Indiana. Students must perform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-H 380 Health Services Management Internship (1-6 cr.) P: Permission of Instructor. Open to interested students upon approval of the faculty. Students are placed with governmental agencies or private and not-for-profit and organizations for assignment to a defined task relevant to their educational interests in health services management. Tasks may involve staff work or research. May be repeated for credit. Course is graded S/F (Satisfactory/Fail).

PBHL-H 401 Strategic Planning for Health Care Organizations (3 cr.) This course examines strategic planning techniques as they apply to health care organizations. Students will develop and defend a comprehensive strategic plan for a case facility. One half of the course will be conducted in a workshop format.

PBHL-H 411 Chronic Long-Term Care Administration (3 cr.) Administering programs across the continuum of care including nursing homes, hospice, home health, and assisted living; Medicare and Medicaid financing; quality improvement; care management; and needs of special populations, particularly, vulnerable elders.

PBHL-H 420 Health Policy (3 cr.) P: H320. This course will focus on current health policy issues within the context of the U.S. health care system. The course will familiarize students with the political environment of public policy, introduce major health care policy perspectives, and apply those analytical models to a series of health policy issues.

PBHL-H 432 Health Care Marketing (3 cr.) A practical study of marketing in health care institutions, health service organizations, and health insurers. A basic foundation in marketing principles, new methods in marketing products and services, and inexpensive marketing techniques will be examined.

PBHL-H 441 Legal Aspects of Health Care Administration (3 cr.) An overview of the liability and legal responsibility, as well as legal recourse, that health care facilities may exercise. This course will discuss policies and standards relating to health facility administration. Also included is a discussion of financial aspects unique to the hospital/health care facility environment, such as third-party payments and federal assistance.

PBHL-H 455 Topics in Public Health (1-3 cr.) Extensive discussion of selected topics in public health. The topic may change from semester to semester, based on resource availability and student demand. May be repeated for credit.

PBHL-H 472 Applied Health Care Administration (3 cr.) P: PBHL-H320 and Senior Standing. This course is a study of the complexities of multi-institutional arrangements and integrated services in the U.S. health care industry. The focus is on applying management skills to, and making comparisons of, the current driving forces among health care delivery system components.

PBHL-H 474 Health Administration Ethics Seminar (3 cr.) P: PBHL-H320 and Senior Standing. This course examines healthcare ethical decision making challenges from managerial perspective and explores broader policy issues

associated with ethical problems in healthcare institutions. It provides an overview of general theories of ethical decision-making and through case studies, debates and research examines ethical challenges in everyday managerial activities.

PBHL-P 100 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics, and issues.

PBHL-P 101 Disease, Disaster and Disparities (3 cr.) This undergraduate course will expose upper division students to a variety of public health topics including epidemiology, environmental and occupational health, social and behavioral sciences, public health preparedness, health policy and management. Guest speakers will introduce students to the various roles and functions of public health science and practice.

PBHL-P 120 Careers in Public Health (3 cr.) This undergraduate course will expose students to a variety of public health careers. Students will hear from public health professionals who hold a variety of positions in epidemiology, environmental and occupational health, social and behavioral sciences, public health preparedness, biostatistics, maternal-child-family health, chronic and infectious disease prevention, and health policy and management. Professionals from the private and public sectors will introduce students to the many careers in public health and to the various roles and functions of public health professionals. The course will focus on careers at all levels of education; bachelor's degree, master's degree and doctoral degree levels.

PBHL-P 200 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics, and issues.

PBHL-P 300 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics, and issues.

PBHL-P 300 Global Public Health (3 cr.) All public health is global in today's world. This course will explore the key global public health issues that face countries in the world with higher, middle, and lower income resources. The health policy issues that affect public health outcomes in various political, cultural, and economic environments will be analyzed. New, innovative solutions to global public health problems will also be discussed.

PBHL-P 300 Sex, Drugs & Homelessness Public Health & High Risk Behavior (3 cr.) Some individuals and groups are more likely to engage in high-risk health behaviors than others, which is costly to them and society. This class will focus on health risk related to sexual behavior, drug use, and homelessness.

PBHL-P 300 This Stress is Killing Me: Stress and Its Effect on You (3 cr.) This course will examine what stress is, where it comes from, its effects on health and what you can do about it.

PBHL-P 400 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics and issues.

Undergraduate Courses

The abbreviation "P" refers to course prerequisites and "R" to recommended prerequisite courses. Prerequisites can be waived by the instructor of the course. The number of hours of credit is indicated in parentheses following the course title. Courses are listed in three groups: environmental health science, health services management, and public health.

PBHL-A 316 Environmental Health Science (3 cr.) A study of human interaction with the environment and potential impacts of environmental agents on health and safety. Hazards from natural sources and human activities that contaminate our air, land, water, food, homes, neighborhoods, and workplaces are examined. Environmental control activities, including pollution control technology and policy, are also examined.

PBHL-A 322 Principles of Epidemiology (3 cr.) A basic overview of epidemiologic methodology and techniques. Both communicable and chronic disease risk factors will be discussed, along with data acquisition, analysis techniques, and current published epidemiological studies.

PBHL-A 367 Environmental Science and Health Practicum (2 cr.) P: PBHL-A316 The Enviornmental Science and Health Practicum will consist of a personal career-planning component coupled with a weekly field visit to environmental science and health-related organizations in central Indiana. Students must perform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-H 367 Health Services Management Practicum (2 cr.) P: PBHL-H320 and Junior Standing The Health Services Management Practicum will consist of a personal career-planning component coupled with weekly field visits to health-related organizations in central Indiana. Students must preform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-A 380 Environmental Health Science Internship (3 cr.) P: Permission of Instructor. Open to interested students upon approval of the faculty. Students are placed with governmental agencies or private and not-for-profit organizations or governmental units for assignment to a defined task relevant to their educational interests in environmental health science. Tasks may involve staff work or research. May be repeated for credit. Course is graded S/F (Satisfactory/Fail).

PBHL-A 410 Introduction to Environmental Toxicology (3 cr.) Study of toxic mechanisms, pathology, and disease development resulting from exposure to biological and chemical agents in the environment.

PBHL-A 416 Environmental Health Policy (3 cr.) Study of professional requirements and duties of the environmental health functions within health agencies; consideration of applicable laws and standards in each environmental health function; environmental health program planning, evaluation, implementation, and personnel responsibilities.

PBHL-A 424 Environmental Health Science Technology: Managing Water and Wastes (3 cr.) P: PBHL-A316; MATH 153. Technology approach to preventing the transmission of disease among humans through water and wastes. Course focuses on drinking water treatment and distribution, water quality and pollution, wastewater treatment, storm water management, municipal solid waste, and hazardous waste management.

PBHL-A 428 Food Science and Sanitation (3 cr.) Basic concepts of food technology with emphasis on methods and procedures in food processing to minimize contamination

and to prevent food-related illness. Federal, state, and local food laws and inspection procedures will be examined.

PBHL-A 433 Industrial Hygiene (3 cr.) Survey of the technical and regulatory aspects of protecting the health and safety of workers. Topics include basic toxicology; skin, eye, and respiratory hazards; measuring hazardous atmospheres; ventilation systems; fire and explosion hazards; emergency response; occupational hearing loss; radiation; prevention of accidents; cumulative trauma; and personal protective equipment.

PBHL-A 451 Air Pollution in the Community (3 cr.) A survey course covering the chemistry, transport, and fate of air pollutants related to current issues of air quality, such as photochemical smog, ozone depletion, particulate matter, and indoor air quality. Topics include the types, sources, health and environmental effects, measurement, evaluation, control, regulation, and modeling of air pollution concentrations.

PBHL-A 459 Environmental Science and Health Data Analysis (3 cr.) P: PBHL-A316; SPEA0-K300; 1 semester of chemistry. Provides students with an understanding of basic principles needed to perform sampling and analysis of field and laboratory environmental data. Topics include properties of chemical and biological constituents, detection limits, calibration, quality control, precision accuracy, and statistical analysis.

PBHL-A 460 Environmental Science and Health Data Analysis (3 cr.) P: PBHL-A459. Basic physical, chemical, and biological examinations and standards for potable water quality, wastewater treatment determinations, and stream pollution control. Basic physical, chemical, and biological (ergonometric) examinations used in industrial hygiene and air pollution control. Instruction in basic laboratory skills and techniques for performing these examinations.

PBHL-A 466 Public Health Field Experience (1-3 cr.) Supervised advanced training in professional and technical functions in public health; guided student activity and performance in professional public health functions. Individualized programs may be arranged to suit students' areas of concentration.

PBHL-B 300 Introduction to Biostatistics (3 cr.) P: MATH-M118 This is an introductory survey of statistical reasoning and analysis. Additionally, students should have a working knowledge of personal computers and the Widows operating environment

PBHL-H 120 Contemporary Health Issues (1-3 cr.) An examination of current public health, environmental health, and health service delivery issues in the U.S. Topics include the organization and costs of health systems, access to care, and the interrelationships between risk factors and health; also, environmental challenges facing our society and their impact on health.

PBHL-H 126 Introduction to Careers in Health Care (1 cr.) Introduces students to different careers and opportunities in the field of health care administration.

PBHL-H 200 Health Care Accounting (3 cr.) Course will provide students with a foundation in health care accounting from long-term care to acute care. The topics covered will include balancing sheet or statement of financial position, income statement or statement of revenue and expenses, journals, ledgers, trial balances and discrimination of formatting financial statements between acute care and long-term care organizations.

PBHL-H 320 Health Systems Administration (3 cr.) An overview of the U.S. health care delivery system. It examines the organization, function, and role of the system; current system problems; and alternative systems or solutions.

PBHL-H 352 Health Finance and Budgeting (3 cr.) P: BUS-A 200 or BUS-A 201. A study of the financial management of health care facilities based on generally accepted business principles. Accounting and managerial control of cash, accounts receivable, inventory control, budgeting, and cost control, as well as accounting and evaluation of short- and long-term debt will be examined.

PBHL-H 353 Advanced Health Finance and Budgeting (3 cr.) P: H352. This course builds upon H352 Health Finance and Budgeting as well as examines the uses of contractual language and obligations. It uses a series of case studies to apply techniques and principles taught in PBHL-H 352.

PBHL-H 354 Health Care Economics (3 cr.) This course applies economics to the study of administrative and policy issues in the health care sector. Economic concepts are used to explain the system of health care financing and the organization of health care delivery in the U.S. The economic evaluation of health care programs is also discussed.

PBHL-H 365 Health Services Practicum (2 cr.) P: PBHL-H320; junior standing The Health Services Practicum will consist of a personal career-planning component coupled with weekly field visits to health care agencies in central Indiana. Students must perform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-H 367 Health Services Management Practicum (2 cr.) P: PBHL-H320 and Junior Standing The Health Services Management Practicum will consist of a personal career-planning component coupled with weekly field visits to health-related organizations in central Indiana. Students must perform satisfactorily in both parts of the practicum to receive a passing grade.

PBHL-H 380 Health Services Management Internship (1-6 cr.) P: Permission of Instructor. Open to interested students upon approval of the faculty. Students are placed with governmental agencies or private and not-for-profit and organizations for assignment to a defined task relevant to their educational interests in health services management. Tasks may involve staff work or research. May be repeated for credit. Course is graded S/F (Satisfactory/Fail).

PBHL-H 401 Strategic Planning for Health Care Organizations (3 cr.) This course examines strategic planning techniques as they apply to health care organizations. Students will develop and defend a comprehensive strategic plan for a case facility. One half of the course will be conducted in a workshop format.

PBHL-H 411 Chronic Long-Term Care Administration (3 cr.) Administering programs across the continuum of care including nursing homes, hospice, home health, and assisted living; Medicare and Medicaid financing; quality improvement;

care management; and needs of special populations, particularly, vulnerable elders.

PBHL-H 420 Health Policy (3 cr.) P: H320. This course will focus on current health policy issues within the context of the U.S. health care system. The course will familiarize students with the political environment of public policy, introduce major health care policy perspectives, and apply those analytical models to a series of health policy issues.

PBHL-H 432 Health Care Marketing (3 cr.) A practical study of marketing in health care institutions, health service organizations, and health insurers. A basic foundation in marketing principles, new methods in marketing products and services, and inexpensive marketing techniques will be examined.

PBHL-H 441 Legal Aspects of Health Care Administration (3 cr.) An overview of the liability and legal responsibility, as well as legal recourse, that health care facilities may exercise. This course will discuss policies and standards relating to health facility administration. Also included is a discussion of financial aspects unique to the hospital/health care facility environment, such as third-party payments and federal assistance.

PBHL-H 455 Topics in Public Health (1-3 cr.) Extensive discussion of selected topics in public health. The topic may change from semester to semester, based on resource availability and student demand. May be repeated for credit.

PBHL-H 472 Applied Health Care Administration (3 cr.) P: PBHL-H320 and Senior Standing. This course is a study of the complexities of multi-institutional arrangements and integrated services in the U.S. health care industry. The focus is on applying management skills to, and making comparisons of, the current driving forces among health care delivery system components.

PBHL-H 474 Health Administration Ethics Seminar (3 cr.) P: PBHL-H320 and Senior Standing. This course examines healthcare ethical decision making challenges from managerial perspective and explores broader policy issues associated with ethical problems in healthcare institutions. It provides an overview of general theories of ethical decision-making and through case studies, debates and research examines ethical challenges in everyday managerial activities.

PBHL-P 100 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics, and issues.

PBHL-P 101 Disease, Disaster and Disparities (3 cr.) This undergraduate course will expose upper division students to a variety of public health topics including epidemiology, environmental and occupational health, social and behavioral sciences, public health preparedness, health policy and management. Guest speakers will introduce students to the various roles and functions of public health science and practice.

PBHL-P 120 Careers in Public Health (3 cr.) This undergraduate course will expose students to a variety of public health careers. Students will hear from public health professionals who hold a variety of positions in epidemiology, environmental and occupational health, social and behavioral sciences, public health preparedness, biostatistics, maternal-child-family health, chronic and infectious disease prevention, and health policy and management. Professionals from the private and public sectors will introduce students to the many careers in public health and to the various roles and functions of public health professionals. The course will focus on careers at all levels of education; bachelor's degree, master's degree and doctoral degree levels.

PBHL-P 200 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics, and issues.

PBHL-P 300 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics, and issues.

PBHL-P 300 Global Public Health (3 cr.) All public health is global in today's world. This course will explore the key global public health issues that face countries in the world with higher, middle, and lower income resources. The health policy issues that affect public health outcomes in various political, cultural, and economic environments will be analyzed. New, innovative solutions to global public health problems will also be discussed.

PBHL-P 300 Sex, Drugs & Homelessness Public Health & High Risk Behavior (3 cr.) Some individuals and groups are more likely to engage in high-risk health behaviors than others, which is costly to them and society. This class will focus on health risk related to sexual behavior, drug use, and homelessness.

PBHL-P 300 This Stress is Killing Me: Stress and Its Effect on You (3 cr.) This course will examine what stress is, where it comes from, its effects on health and what you can do about it.

PBHL-P 400 Topics in Public Health (1-3 cr.) An introduction to public health disciplines, topics and issues.

Indiana University School of Nursing

Welcome to the School of Nursing!

The Indiana University School of Nursing opened its doors in Indianapolis in 1914. Since that time, it has evolved into one of the nation's most eminent schools, as evidenced by our achievements:

- The IU School of Nursing ranks **9th** out of 80 schools and colleges of nursing who receive funding from the National Institutes of Health.
- Nearly **40%** of the baccalaureate prepared professional nurses in the State of Indiana graduate from the IU School of Nursing each year.
- US News & World Report 2012 Graduate School rankings place the IU School of Nursing's graduate program **15th** overall out of more than 200 schools of nursing that offer graduate programs, and **3rd** for the Adult Health CNS Program.
- IU School of Nursing faculty members serve as editors of prestigious nursing journals: *Nursing Outlook: The Official Journal of the American Academy of Nursing* and *Clinical Nurse Specialist: Journal for Advanced Nursing Practice*.

Overview

Vision

Indiana University School of Nursing (IUSON) is leading with excellence in research and education, powered by innovation and partnerships.

Mission

The IUSON exists to lead the "knowledge work" of nurses of today and tomorrow to positively influence the health of communities served by: inspiring learning through excellence in teaching; creating and advancing knowledge through science and research; shaping care through evidence-based practices; innovations and partnerships; and appreciating, developing, and recognizing faculty, staff, and students.

Strategic Goals for 2012 - 2014

1. Advance IUSON's reputation as a national leader in educational research, evidence-based practices, and progressive educational programs. (Teaching Excellence)
2. Position IUSON as a nationally renowned leader in research and knowledge development. (Research Excellence)
3. Develop new and sustain existing partnerships to support innovations in education and research that address current and future challenges in global health care and health professions education. (Innovations and Partnership)
4. Integrate the school's core values into the culture of the organization. (Recognition)
5. Acquire, allocate, and effectively manage resources to support the work of faculty, staff, and students. (Resources)

Core Values

*Respect*Responsibility*Trust*Dialogue*

Statement by the Dean

Since its founding in 1914, Indiana University School of Nursing has grown into one of the largest schools of nursing in the country. The school holds an excellent national reputation for nursing education with expert faculty. Nationally, our graduate programs are ranked fifteenth overall with two tracks in the top 10, and we are ranked twelfth in National Institutes of Health research funding. At IUSON we offer the full range of academic degrees, from undergraduate through doctoral levels, as well as postdoctoral research training and extensive lifelong education. We are committed to your career preparation. Our more than 26,000 graduates are chief nursing officers of large health facilities, deans of nursing schools, clinical specialists, advanced practice nurses, entrepreneurs, and staff nurses in urban and rural settings around Indiana and throughout the world.

Faced with the challenges of changing health care delivery, nurses will be called on to lead in areas never dreamed of by earlier generations. Know that the talented faculty members of Indiana University are committed to helping you realize your professional aspirations in every career transition that you undertake, and to enable you to seize your own preferred future. Indiana University School of Nursing has forged strong links between nursing education and nursing services in clinical and community settings in order to improve the health of individuals, families, and communities. We welcome you and invite you to become a part of our extended IU family.

Departmental Mission

Adult Health: The mission of the Department of Adult Health is to focus on the generation, utilization, and dissemination of knowledge related to the health care of adults while preparing nurses to provide high-quality, cost-effective patient care.

Environments for Health:Consistent with the vision and mission of the School of Nursing, faculty in the Department of Environments for Health facilitate student learning by creating, applying, and transferring their unique knowledge and skills in the areas of psychiatric nursing, nursing administration, community health nursing, nursing informatics, and nursing education.

Family Health: The Department of Family Health Nursing focuses on the care of people and their families across the life span. The department's vision arises from the broader tripartite mission of the university, the school, and the Core Campus: teaching, scholarship, and service. We embrace these essential values:

- The community is the context for our care of families.
- Interdisciplinary collaboration promotes better health care.
- Nursing of families requires a life span approach.
- Students, clients, communities, and faculty participate in connecting conversations.

- We value diversity in family constellations.
- Our practice is grounded in health as families define it.

The Department of Family Health Nursing seeks to be known for:

- Faculty clinical excellence
- Superior and innovative teaching
- Community partnerships
- Nurturing environments for students
- Research and scholarship in health promotion and family health

Accreditation & Licenses

- National League for Nursing Accrediting Commission; BSN & MSN programs
- Commission on Collegiate Nursing Education; BSN & MSN programs
- Indiana State Board of Nursing; BSN program
- American Nurses Credentialing Center's Commission on Accreditation

Memberships
The School of Nursing is an agency member of the National League for Nursing's Council of Baccalaureate and Higher Degree Programs, Commission on Collegiate Nursing Education (CCNE), as well as the Committee for Institutional Cooperation (CIC). The school is also a constituency member of the National League for Nursing and the American Association of Colleges of Nursing.

Last updated January 20, 2012

Administration

- Marion E. Broome, *PhD, RN, FAAN, Distinguished Professor, Dean*
- Judith A. Halstead, *PhD, RN, ANEF, FAAN, Professor, Executive Associate Dean for Academic Affairs*
- Victoria L. Champion, *PhD, RN, FAAN, Distinguished Professor, Executive Associate Dean for Research*
- *Associate Dean for Evaluation*
- Patricia Ebright, *PhD, CNS, RN, FAAN, Associate Professor, Associate Dean for Graduate Programs*
- Anna McDaniel, *PhD, RN, FAAN, Chancellors Professor, Associate Dean for Research*
- Susan M. Hendricks, *EdD, MSN, RN, Associate Professor, Associate Dean for Undergraduate Programs*
- Joyce Krothe, *PhD, Professor, Assistant Dean, IUBL*
- Beth Sharer, *DHA, NEA-BC, RN, HFA, FACHE, Clinical Assistant Professor, Head, Division of Nursing, IUPUC*
- Shannon McDaniel, *MS, Assistant Dean for Information Systems*
- Linda B. Griffin, *MBA, CPA, Assistant Dean for Resource Management*
- Chandra Dyson, *MS, Assistant Dean for Student Services*
- Janet McCully, *BS, Director of Development*
- Marsha Baker, *MS, Director of Diversity and Enrichment*
- Barbara Friesth, *PhD, RN, Clinical Associate Professor, Director, Learning Resource Center*
- Janice Ward, *MSN, RN, Director Office of Lifelong Learning*
- Sarah Bourff, *MPH, CCRP, Director of Research Operations*

Department Chairpersons

- Janice Buelow, *PhD, FAAN, Associate Professor, Chair, Department of Adult Health*
- Anne Belcher, *PhD, Associate Professor, Chair, Department of Environments for Health*
- Deborah Cullen, *EdD, Professor, Interim Chair, Department of Family Health*

Program Coordinators

- Mary Beth Riner, *PhD, RN, Associate Professor, DNP Program Coordinator*
- Tamilyn Bakas, *PhD, RN, FAHA, FAAN, Professor, PhD Program Coordinator*
- Deborah DeMeester, *MSN, RN, Clinical Assistant Professor, Undergraduate Coordinator Department of Adult Health*
- Corinna Mayer, *MSN, RN, Undergraduate Coordinator Department of Environments for Health*
- Joyce Welch, *MSN, RN, Clinical Assistant Professor, Undergraduate Coordinator Department of Family Health*

Undergraduate Academic Advisement

- Deborah Hrisomalos, *MBA, CPHIMS, Academic Advisor, IUBL*
- Jackie Dakich, *MS, Academic Advisor, IUPUI*
- Helen McKuras, *MS, Academic Advisor, IUPUI*
- Gregory Wible, *MS, Academic Advisor, IUPUI*
- Sarah Warfield, *Academic Counselor, IUPUC*

Graduate Advisor, MSN, RN-MSN Students

- Janet Moon, *MS, Academic Advisor, IUPUI*

Graduate Advisor, Doctoral Students

- Debbie Grew, *MA, MS*

Center for Academic Affairs

The mission of the Center for Academic Affairs in the School of Nursing is to promote and facilitate the success of its students. This mission is implemented through the functions of academic counseling, recruitment, admissions, registration, certification, academic record maintenance, academic performance monitoring, orientation programs, minority and international counseling, graduation, and student activities. Student services personnel serve as liaisons between students, faculty, and other groups in interpreting School of Nursing

and university policies and procedures, and in advocating students' rights and responsibilities.

History

The Indiana University School of Nursing opened its doors in Indianapolis in 1914. Since that time, it has evolved into one of the nation's most eminent nursing schools.

Historical Milestones

- 1914 Indiana University Training School for Nurses opened at Indianapolis
- 1932 Curricula established for Bachelor of Science in Nursing on Bloomington campus for public health nursing, administration and supervision of nursing service, and teaching in schools of nursing offered for registered nurses in Bloomington
- 1944 Division of Nursing Education placed in School of Education with preparation for teachers of science, nursing arts, medical-surgical, maternity, and pediatric nursing
- 1945 Master of Science in Nursing Education first offered at IU Bloomington
- 1950 Bachelor of Science in Nursing (BSN) Program first offered
- 1956 Name of school officially changed to Indiana University School of Nursing
- 1957 Original National League for Nursing (NLN) accreditation for the Master of Science in Nursing (MSN) Program
- 1960 Last diploma school graduates
- 1961 Original NLN accreditation for the BSN Program
- 1965 All nursing programs organized into one administrative unit to form the School of Nursing, the tenth school of Indiana University
- 1966 MSN degree first offered
- 1968 Original NLN accreditation for the Associate of Arts Program, IUPUI
- 1974 School of Nursing building dedicated at IUPUI
- 1975 Specialist in Clinical Nursing program approved
- 1975 NLN accreditation for ASN Program continued to 1983, IUPUI
- 1976 Original American Nurses' Association (ANA) accreditation for the Continuing Education program
- 1976 Doctor of Nursing Science (D.N.S.) program approved
- 1976 NLN accreditation for BSN and graduate programs continues
- 1978 First doctoral students admitted
- 1980 New upper-division baccalaureate curriculum initiated
- 1981 First Doctor of Nursing Science degree awarded
- 1982 NLN accreditation for BSN and graduate programs continued until 1990
- 1985 First master's degree courses offered at five sites—Indiana Higher Education Telecommunications System (IHETS)
- 1985 Office of Nursing Practice established
- 1987 Approval of Licensed Practical Nurse (LPN) to ASNmobility option at IUPU Columbus
- 1989 School reorganized into academic departments
- 1990 Formal planning for a PhD program in nursing initiated
- 1990 Institute of Action Research for Community Health established
- 1991 Designation of Institute of Action Research for Community Health as a World Health Organization Collaborating for Healthy Cities
- 1991 Establishment of Mary Margaret Walther Program in Oncology Care Research
- 1991 Implementation of the RN-MSN mobility options
- 1993 Accreditation of BSN and MSN programs by the National League for Nursing for eight years
- 1995 Transition from DNS to PhD degree program approved
- 1996 First class of PhD in Nursing Science students admitted
- 1998 Emily Holmquist Endowed Professorship instituted
- 1998 Commission on Collegiate Nursing Education (CCNE) Board of Commissioners granted IUPUI preliminary approval of the baccalaureate and master's nursing education programs
- 2000 Accreditation of BSN and MSN programs continued by the National League for Nursing Accrediting Commission for eight years
- 2000 New 10-year accreditation of BSN and MSN programs by the Commission on Collegiate Nursing Education
- 2003 First class of students in PhD in Nursing Science distance-accessible option admitted
- 2006 Appointment of first Edward W. and Sarah Stam Cullipher Chair
- 2006 Appointment of first Sally Reahard Chair
- 2006 Awarded designation as a Center of Excellence by the National League for Nursing
- 2006 Center for Research in Nursing Education was formed
- 2008 Grand opening of the Jean Johnson Schaefer Resource Center for Innovation in Clinical Nursing Education
- 2008 Designation of IUSON as a "system school" ended June 30, 2008
- 2008 Designation of IUSON as a "Core Campus School"-Bloomington, Columbus, Indianapolis
- 2009 Re-designation as a Center of Excellence by National League for Nursing
- 2009 Doctor of Nursing Practice (DNP) approved by the Indiana Commission for Higher Education
- 2009 95th anniversary of nursing at Indiana University

- 2010 RN to BSN Degree Completion Program begins in coordination with the state-wide consortium of IU system Schools of Nursing

Awards & Scholarships

Professional Practices, Internships, Honors at School Level

Honors and Awards

Students have the opportunity to be recognized for academic excellence both during their program and at graduation. Full-time nursing students will be placed on the Dean's List for each semester in which they earn a grade point average (GPA) of 3.5 or higher. Part-time students are eligible for the Dean's List after the completion of 12 credit hours, and for each semester they have accumulated an additional 12 credit hours of course work with a GPA of 3.5 or higher.

BSN candidates who are in the top 10 percent of their graduating class and who have demonstrated a high level of academic achievement may be selected to graduate with academic distinction. To be eligible, BSN students must have completed a minimum of 60 graded credit hours at IU. Grade point averages used in determining the category of academic distinction awarded are:

- 3.83-4.00—Highest Distinction
- 3.66-3.82—High Distinction
- 3.50-3.65—Distinction

A GPA used to determine distinction is calculated from all grades in courses up to and including the seventh semester for the BSN taken at IU. The GPA does not include transfer grades, special credit, and open electives, but does include grades received in courses that are repeated because of program stipulations. Not all students who meet the criteria for distinction may be selected for this honor.

Awards and honors are also given to recognize outstanding student performance. Students interested in specific awards should see an academic advisor for a list of available awards, along with eligibility criteria.

School Awards and Scholarships

Various scholarships and awards are granted annually to those in the nursing major through the Center for Academic Affairs at the School of Nursing (NU 122). For details on these scholarships and awards, please contact the Center for Academic Affairs, (317) 274-2806.

Last updated February 12, 2012

BSN Admissions Requirements

Applications and due dates for Indianapolis, Columbus, and Bloomington may be found at each campus' School of Nursing website. Students interested in nursing on another IU campus should consult the website of that campus for more information about nursing. *The admission process is competitive, and acceptance depends on the number of applicants and the applicant's ability to compete academically in the pool of applicants.* Students seeking admission to the nursing major must meet the following eligibility criteria (Policy VI-A-30):

1. The applicant must be admitted to Indiana University as a degree-seeking student and must submit official transcripts from other universities attended so that credits may be transferred.
2. The applicant must have a minimum Indiana University cumulative grade point average (GPA) of 2.7 on a 4.0 scale at the time of application. This does not include transfer or *X'd* courses.
3. The following six courses are required to make application: English Composition, Introductory Psychology, Introductory Sociology, Anatomy, Finite Math and one Critical/Analytical science course. Additional courses are selected from a list to total 29-31 credits.
4. A maximum of two attempts for *any* of the required courses (courses required for application) is allowed; a maximum of 9 credits total may be repeated, and the grade earned on the second attempt will be used for calculation of GPA for admission purposes. This policy relates to courses taken at IU and transfer courses.
5. The applicant must achieve a grade of C (2.0) or higher for each course and an application GPA of 3.00 in all nursing program requirements. This criterion also applies to any student wishing to transfer required courses from a university other than Indiana University.
6. The applicant must have successfully completed two semesters of high school chemistry (with a grade of C or above in both semesters) or taken a college level Introduction to Chemistry course for a minimum of 3 college credits with a grade of C or better. This requirement must be less than 7 years old at the time of admission.
7. The applicant must complete all required course work by established deadline date. This includes independent studies, correspondence course work and courses for which students have received an incomplete (I). Students wishing to transfer required course work from a university other than Indiana University must be in good academic standing in that university (i.e., must not have been dismissed) and have achieved a grade of C (2.0) or higher in courses for which transfer is being requested.
8. The applicant must submit a required student legal disclosure form to communicate any issues that would be documented on a national criminal background check as a part of the application.

Applicants who do not meet one or more of the above criteria may request special consideration by the campus Admission, Progression and Graduation (APG) Committee to which admission is requested. Consult campus policies and practices to determine the appropriate process to be followed on the campus you wish to attend.

If denied admission, the applicant may reapply to the Bachelor of Science in Nursing Program in a subsequent semester if eligibility is maintained. The applicant is not automatically considered; the student must re-submit an application.

Students will be admitted to the baccalaureate nursing program for a specific semester and are expected to enter the program that semester. Students not entering that specific semester must reapply for a subsequent semester on a competitive basis. Students will not be considered for

further admission if they have declined an admission offer two times.

The nursing faculty of the campus to which the student is seeking admission has the responsibility and authority to select applicants for admission to the baccalaureate nursing program. The faculty reviews all qualified applicants and selects those who are most qualified.

Transfer students will be considered for admission based on availability of space. Students will be admitted to the baccalaureate nursing program for a specific semester and are expected to enter the program that semester. Students must formally accept or decline admission. Students not entering that specific semester must reapply on a competitive basis for a subsequent semester. Students will not be considered for further admission if they have declined an admission offer two times. (Policy U-VI-A-16).

Applicants to IUB, IUPUC, or IUPUI will receive priority consideration for admission if they have completed the majority (51 percent) of their prerequisite general education course work on the IUPUI, IUPUC, or IU Bloomington campus. If additional spaces are available, the next priority is given to students who have completed the majority of their course work on another IU campus. Students transferring the majority of prerequisite course work from a non-IU school are accorded lowest priority for admission.

Last updated February 15, 2012

Accelerated Track Admissions Criteria

Applications and due dates may be found on the School of Nursing website http://nursing.iupui.edu/. The admission process is selective, and acceptance depends on the number of applicants and the applicant's ability to compete academically in the pool of applicants. Admission to the Accelerated BSN Track and concomitant entrance to the School of Nursing is open to those meeting the following admission criteria (Policy III-D-2):

1. Must be admitted to Indiana University as a degree-seeking student.
2. Documentation of at least a bachelor's degree (approximately 120 credits), in which a minimum cumulative grade point average (GPA) of 2.7 on a 4.0 scale was earned.
3. Must have completed all required BSN general education courses with a grade of C or higher. Required BSN general education course work may be completed at Indiana University or transferred from another college or university.
4. Must demonstrate a grade point average of 3.0 on a 4.0 scale for all general education course work applied to BSN degree.
5. Students transferring course work must have achieved a grade of C (2.0) or higher for each completed required BSN general education course to be considered from a university other than Indiana University. No more than three (3) courses may be repeated in order to meet the minimum required grade of C (2.0). Of the three courses, only two (2) failures will be allowed in required science courses.
6. Must have a minimum grade of C (2.0) in each required BSN general education course by the second attempt. This criterion also applies to any student wishing to transfer required courses from a college or university other than IU.
7. Students must complete the following sciences (with a lab component) before applications are processed for the desired admission cycle in order to remain eligible for that admission cycle: Anatomy, Physiology, and Microbiology. Applicants for Fall entry will need sciences completed by the end of the previous Spring semester; applicants for Spring entry will need sciences completed by the end of the previous Summer Session II; applicants for Summer entry will need sciences completed by the end of the previous Fall semester in order to remain eligible.
8. Must have completed a personal statement that speaks to career goals and abilities to be successful in this study option.
9. Must submit to the School of Nursing a credit transfer report (CTR) for all work being transferred from universities other than IU.
10. Must submit application by specified published dates. Applications received after deadlines may not be considered for requested admission cycle. Students wishing to reapply for a following academic cycle are invited to do so.

Admission Process:

1. Students may apply to Indiana University and the Accelerated BSN Track concurrently. Students transferring to Indiana University from another institution will have their transcript evaluated by the Admission Office of Indiana University and the School of Nursing before determining admission eligibility.
2. Students meeting above admission criteria and applying for a specific admission cycle will be admitted based on prior academic performance and strength of goal statement in pool of applicants.
3. Students will be admitted to the Accelerated BSN Track for a specific admission cycle, and are expected to enter that cycle. Students not entering that specific admission cycle may reapply for admission to a subsequent admission cycle.
4. Students will be held to all existing BSN policies related to admission, progression, and graduation not addressed in this policy.

Last updated February 15, 2012

Academic Expectations & Progression

After admission to the BSN program, placement in nursing courses for the academic year is based on the following priority ranking:

1. Full-time, regular progression students
2. Part-time, regular progression students
3. Students who have interrupted their studies but are in good academic standing
4. Students who have withdrawn from one or more nursing courses
5. Students who have failed and successfully repeated a nursing or required general-education course

6. Students who need to repeat either a nursing course or a general-education prerequisite or corequisite
7. Students who have been dismissed and reinstated
8. Intercampus transfer students
9. Transfer students from other BSN programs according to admission, progression, and graduation guidelines

If additional criteria are needed to determine placement, the Admission, Progression, and Graduation (APG) Committee considers the date of becoming out of sequence, and the grade point average (GPA). (See an academic counselor with any questions about these requirements.) Students who interrupt their studies for any reason are considered out of sequence and will be accommodated according to the above priority ranking on a space-available basis for the remainder of course work to be completed. Changes in priority rankings remain in place throughout a student's program.

A BSN student's failure to register in each sequential semester, excluding summer sessions, constitutes an interruption in a student's program. Students who have interrupted their program of study for any reason are required to submit a written request to reenter the program to the chairperson of the Core Campus BSN Admission, Progression, and Graduation (APG) Committee. This request must be received by July 1 for fall semester, April 1 for summer, and October 1 for spring. All requests for reentry will be evaluated on the basis of the availability of resources. Reentry of students who have interrupted their study for any reason is not guaranteed. Students who reenter must adhere to the policies and curriculum of the School of Nursing that are in effect at the time of reentry.

Students may progress to the next semester of courses upon the successful completion of all prior semester nursing courses designated on the campus enrolled. Students wishing exception to this practice must petition the Admission, Progression, and Graduation (APG) committee.

Last updated February 18, 2010

BSN Degree Requirements

All candidates for the degree of Bachelor of Science in Nursing on the IUB, IUPUC, and IUPUI campuses must fulfill the following requirements:

1. Complete a minimum of 125 credit hours with a grade of C or higher in each course required for the degree. Of the 125 credit hours, 63 credit hours must reflect nursing major courses. Credit earned in remedial learning-skill courses and courses that have been repeated do not count in the 125 credit hour total or the 63 nursing credit hour total.
2. Achieve a grade of C or higher in all didactic courses applied to the BSN degree and an S (Satisfactory) in all clinical/practicum courses.
3. Achieve an IU cumulative grade point average of at least a 2.0 (C). This includes all transfer course work applied to degree.
4. Complete at least 30 credit hours of required nursing major courses on the IU campus awarding the BSN degree.*
5. Complete all BSN degree requirements within six years of enrolling in the first nursing course in the nursing major.
6. Apply for degree candidacy the semester prior to completing all degree requirements and adhere to the published procedures on campus awarding degree.

*Please note that Indianapolis, Bloomington, and Columbus are considered one core campus.

For additional information about the Bachelor of Science in Nursing view the following information:

- Academic Policies and Procedures
- Accelerated Track
- Admission Requirements
- Academic Expectations & Progression
- Honors Study Option
- School Requirements

Last updated February 18, 2010

BSN Honors Study Option

Students have an opportunity to pursue School of Nursing Honors on the IUPUI campus as part of their baccalaureate degree in nursing http://nursing.iupui.edu/degrees/bsn/honors.shtml. The School of Nursing Honors Program is designed to challenge motivated students who are interested in developing skills in the areas of knowledge generation, knowledge utilization, and knowledge dissemination.

IUSON Admission & Retention Criteria for Honors
A minimum Indiana University cumulative grade point average of 3.5 is required for all college-level courses completed. A minimum of 3.5 grade point average is required for all completed courses that are credited to the nursing degree. Students must also maintain both a cumulative GPA and nursing GPA of 3.3 each semester to remain in the honors option.

IUSON Honors Study Goals

- Engage motivated students in the pursuit of academic excellence in nursing
- Create opportunities for students to build collaborative mentor partnerships with faculty
- Involve students in faculty research projects and scholarship activities
- Facilitate the transition to doctoral education

IUSON Honors Program Study Requirements

	Sophomore Year	**Credits**
3r Semester	Nursing Honors Colloquium	2
4t Semester	Nursing Honors Colloquium	2
	Junior Year	**Credits**
5t Semester	Nursing Honors Colloquium	2

	H355 Data Analysis in Clinical Practice & Health Care Research	3
6t Semester	Nursing Honors Colloquium	2
	H365 Nursing Research	3
	Senior Year	**Credits**
7t Semester	Nursing Honors Colloquium	2
	NURS-H 370 Nursing Honors Research Internship I	3
8t Semester	Nursing Honors Colloquium	2
	NURS-H 470 Nursing Honors Research Internship II	3

Students are also expected to participate in external opportunities to present research.

Total credit hours for IUPUI School of Nursing degree designation is 24 credit hours

Last updated February 15, 2012

BSN School Requirements

There are three (3) distinct tracks in the BSN program. Students in each track must complete the same program outcomes and requirements. A description of each track follows.

Sample Curriculum Plan (Traditional Track)

In general, the traditional track has been designed for students beginning their academic studies on the IUB, IUPUC, or IUPUI campus. This track requires a minimum of four academic years to complete. The baccalaureate curriculum is subject to continuous evaluation and revision. If curriculum changes occur, updated information can be obtained from the academic counselor. The following is an example of a full-time plan of study. On the IUPUI campus it is expected that students follow this published plan to facilitate their ability to meet course application requirements. Each student will develop, with the assistance of an academic advisor, an individual plan of study that reflects student need, student choices, availability of courses, and specific campus expectations.

Freshman Year**

First-Semester Courses	Credits
W131 English Composition	3
B104 or B105 Introduction to Psychology	3
Critical / Analytical Cluster	3
Communications Cluster	3
Cultural Diversity Cluster	3
Total Credits	**15**
Second-Semester Courses	**Credits**
N261 Human Anatomy	5
M118 Finite Math	3
R100 Introduction to Sociology	3
Humanistic Appreciation	3
Total Credits	**14**

Sophomore Year

Third-Semester Courses	Credits
N217 Human Physiology	5
B231 Communication for Health-Care Professionals	3
B232 Introduction to the Discipline of Nursing: Theory, Practice, Research	3
B244/B245 Comprehensive Health Assessment	4
Total Credits	**15**
Fourth-Semester Courses	**Credits**
J210 Microbiology & Immunology	4
B230 Developmental Issues & Health	4
B233 Health & Wellness	4
B248/B249 Science & Technology of Nursing	4
Total Credits	**16**

Junior Year

Fifth-Semester Courses	Credits
H351/H352 Alterations in Neuro-Psychological Health	5
H353/H354 Alterations in Health I	5
H355 Data Analysis in Clinical Practice and Health-Care Research	3
Cultural Diversity Cluster	3
Total Credits	**16**
Sixth-Semester Courses	**Credits**
H361/H362 Alterations in Health II	5
H363/H364 The Developing Family & Child	7
H365 Nursing Research	3
Social Competence Cluster	3
Total Credits	**18**

Senior Year

Seventh-Semester Courses	Credits
S470/S471 Restorative Health Related to Multi-System Failures	5
S472/S473 A Multi-System Approach to the Health of the Community	5
S474 Applied Health-Care Ethics	3
Open Elective (nursing or general-education)	3
Total Credits	**16**
Eighth-Semester Courses	**Credits**
S481/S482 Nursing Management/Nursing Management Practicum	5
S483 Clinical Nursing Practice Capstone	3
S484 Research Utilization Seminar	1
S485 Professional Growth and Empowerment	3
Open Elective (nursing or general-education)	3
Total Credits	**15**

**Successful completion of high school chemistry, and Algebra 1 and 2 required.

Last updated February 18, 2010

Student Learning Outcomes

Bachelor of Science in Nursing (BSN):

1. **Critical Thinker:** Someone who is able to demonstrate intellectual curiosity, rational inquiry, problem-solving skills, and creativity in framing problems.
2. **Culturally Competent Person:** Someone who can provide holistic nursing care to a variety of individuals, families, and communities.
3. **Knowledgeable Coordinator:** A coordinator of community resources who facilitates individual, family, and community access to resources necessary for meeting health care needs.
4. **Politically Aware Person:** Someone who participates in the profession and the practice of nursing with a global perspective.
5. **Conscientious Practitioner:** An individual who practices within the ethical and legal framework of the nursing profession.
6. **Effective Communicator:** Someone who is able to share accurate information.
7. **Therapeutic Nursing Intervention/Competent Care Provider:** A competent provider of health care who assumes the multiple role dimensions in structured and semi-structured health care settings.
8. **Professional Role Model:** A person who promotes a positive public image of nursing.
9. **Responsible Manager:** Someone who balances human, fiscal, and material resources to achieve quality health care outcomes.

Accelerated BSN Track

The Accelerated BSN Track facilitates students holding a minimum of a baccalaureate degree in an area other than nursing who now wish to earn a bachelor of science in nursing degree. The Accelerated BSN Track allows those with a bachelor's degree to apply general-education course work toward the completion of the BSN degree if prior general-education course work meets the general-education requirements for this degree. This track is currently offered on the IUPUI campus.

The Accelerated BSN Track requires a commitment to a full-time study plan that will be completed in an 18#month time frame. In order to graduate in the 18 month time frame, one must be dedicated to a full-time study plan for those 18 months. This particular track meets the entire calendar year including summer. An understanding of this time commitment is important, as there is very little ability to adjust for absences or lateness in this track. At the completion of the program, graduates will receive an Indiana University BSN degree and will be eligible to sit for the Registered Nurse Licensure Examination.

Sample Curriculum Plan (Accelerated Track)

Semester I	Credits
B232 Introduction to the Discipline of Nursing	3
B233 Health and Wellness	3
B244/B245 Comprehensive Health Assessment	4
B248/B249 Science and Technology of Nursing	4
Total Credits	**14**
Semester II	**Credits**
H351/H352 Alterations in Neuro-Psychological Health	5
H353/H354 Alterations in Health I	5
S474 Applied Health-Care Ethics	3
Total Credits	**13**
Semester III	**Credits**
H361/H362 Alterations in Health II	5
H363/H364 The Developing Family and Child	7
H365 Nursing Research	3
Total Credits	**15**
Semester IV	**Credits**
S472/S473 Health of the Community	5
S470/S471 Restorative Health	5
Total Credits	**10**
Semester V	**Credits**
S481/S482 Nursing Management	5

S483 Clinical Nursing Practice Capstone	3
S484 Research Utilization Seminar	1
S485 Professional Growth and Empowerment	3
Total Credits	**12**

Last updated February 15, 2012

Academic Policies and Procedures

Dismissal and Reinstatement

Dismissal

A student will be dismissed from the program when, in the judgment of the Admission, Progression, and Graduation (APG) Committee on the campus of enrollment, there is lack of progress toward the degree. Lack of progress will include, but not be limited to the following:

1. Failure to achieve a 2.0 semester grade point average in any two consecutive semesters;

2. Failure to earn a grade of C (2.0) or (S) in any two required nursing courses (didactic or practicum/clinical) on the first attempt.

3. Failure to achieve a minimum grade of C (2.0) in any required nursing didactic course or S (Satisfactory) in any required nursing practicum/clinical course by the second attempt.

4. Failure of more than three (3) general education courses required for the BSN degree. Of the three courses, only two (2) failures will be allowed in science course work. Any grade below a "C" is considered unsatisfactory (failing).

5. Failure to meet I.U.S.O.N. essential abilities expectations.

6. Failure to meet IU Code of Student Rights, Responsibilities, and Conduct.

Falsification of records or reports, plagiarism, or cheating on an examination, quiz, or any other assignment is cause for dismissal. (See IU Code of Student Rights, Responsibilities, and Conduct.)

The faculty reserves the right to dismiss any student whose personal integrity, health, or conduct demonstrates unfitness to continue preparation for the profession of nursing. Integrity and conduct will be judged according to the standards of the most recent *Code for Nurses* as adopted by the American Nurses' Association.

The dismissal of any student is contingent upon review by the Admission, Progression, and Graduation Committee on the campus of enrollment. *Student dismissal is subject to the appeal process on the campus of enrollment.* (Policy U-VI-A-18)

Reinstatement

A student who has been dismissed from the School of Nursing for academic failure or any other reason may request reinstatement by petitioning the School of Nursing's Admission, Progression, and Graduation (APG) Committee from the campus at which he or she was dismissed. Reinstatement by one campus is not binding on other campuses. Written request must be received by July 1 for fall reinstatement, April 1 for summer reinstatement, and October 1 for spring reinstatement. Reinstatement will be based on faculty recommendations at the time of dismissal and proposed plan for future success, as well as on availability of resources.

Students may progress to the next semester of courses upon the successful completion of all prior semester nursing courses designated on the campus enrolled. Students wishing exception to this practice must petition the Admission, Progression, and Graduation (APG) Committee.

Reinstatement is not guaranteed, and no student may be reinstated more than once. A reinstated student will be dismissed upon failure (a grade of C or lower) of one additional required course. Students who are reinstated must adhere to the policies and curriculum of the School of Nursing that are in effect at the time of reinstatement.

Last updated February 18, 2010

RN-MSN Mobility Option

Registered nurses who wish to pursue graduate education and whose highest academic credential in nursing is a diploma or an associate degree in nursing may be interested in exploring this educational option. This mobility option allows eligible registered nurses to earn a master's degree in nursing without first earning a baccalaureate degree in nursing. This option may not be the best mobility option for registered nurses, so it is important to talk with the School of Nursing's graduate student advisor early in the decision-making process. Interested nurses should contact the school's Center for Academic Affairs for more information at 317-274-2806.

Last updated February 16, 2012

Degree Programs

The baccalaureate program offers a creative curriculum for the education of professional nurses competent in meeting the current and future health needs of society. The curriculum prepares graduates to function as practitioners in acute and long-term care, community settings, home care, and other nontraditional settings, and also provides a foundation for leadership positions and graduate study.

The BSN program is offered on the IUB, IUPUC, and IUPUI campuses. Prospective students should acquaint themselves with curriculum requirements, course sequencing, and other degree requirements, along with the requirements for admission to the BSN program on either campus. Students are responsible for meeting all degree requirements.

Bachelor of Science in Nursing (BSN)

- Traditional BSN Track
- Accelerated BSN Track
- RN to BSN

Guidance & Counseling

Aa academic advisor in the Indiana University School of Nursing Center for Academic Affairs is available as a resource for students. Students must see their faculty advisors for academic counseling and program planning. The IUSON Director for Diversity and Enrichment is also available and committed to promoting an educational

environment that values, respects, and reflects a global view of diversity http://nursing.iupui.edu/diversity/index.shtml. Students at IUPUI may also consult the Counseling and Psychological Services (CAPS) at 317-274-2548 or http://life.iupui.edu/caps/, or other local agencies for specialized counseling.

Last updated February 14, 2012

Undergraduate Programs

Philosophy Statement

Baccalaureate nursing education provides a broad foundation in the sciences and liberal arts, which is necessary for preparing professional nurses who are capable of practicing in a competent and responsible fashion as informed citizens in a dynamic and diverse society. Graduates of the baccalaureate nursing program are expected to demonstrate competency in being a critical thinker; a culturally competent person; a knowledgeable coordinator of community resources; a politically aware professional; a beginning practitioner whose actions are consistent with professional legal and ethical standards; an effective communicator; a competent provider of health care; and a person who exemplifies a positive public image. These competencies are consistent with the 2008 “Essentials of Baccalaureate Education for Professional Nursing Practice,” established by the American Association of Colleges of Nursing, the 2004 “Standards of Nursing Practice,” established by the American Nurses’ Association (ANA), the ANA 2005 Code of Ethics with interpretive statements, and the ANA Scope and Standards of Practice 2004 (ISBN - 13:9781558102156). Baccalaureate graduates assist individuals, families, and communities in attaining mutually established health goals and in facilitating the highest level of functioning for individuals, families, and communities toward the maximization of their health potential. Baccalaureate education must prepare graduates to be knowledgeable workers and processors of information, and to navigate complex health care systems using available technologies as they design and develop, independently or in conjunction with others, more efficient and effective approaches to the delivery of health care services.

Purpose

The baccalaureate program offers a creative curriculum for the education of professional nurses competent in meeting the current and future health needs of society. The curriculum prepares graduates to function as practitioners in acute and long-semester care, community settings, home care, and other nontraditional settings, and also provides a foundation for leadership positions and graduate study.

The graduate of the BSN program possesses a broad knowledge of the humanities, the biological and social sciences, and nursing. As a beginning practitioner, the graduate applies well-developed problem-solving skills in caring for individuals, families, and communities.

Student Outcomes

The following outcomes are expected of a graduate of the baccalaureate program:

- **Critical Thinker:** Someone who is able to demonstrate intellectual curiosity, rational inquiry, problem-solving skills, and creativity in framing problems.
- **Culturally Competent Person:** Someone who can provide holistic nursing care to a variety of individuals, families, and communities.
- **Knowledgeable Coordinator:** A coordinator of community resources who facilitates individual, family, and community access to resources necessary for meeting health care needs.
- **Politically Aware Person:** Someone who participates in the profession and the practice of nursing with a global perspective.
- **Conscientious Practitioner:** An individual who practices within the ethical and legal framework of the nursing profession.
- **Effective Communicator:** Someone who is able to share accurate information.
- **Therapeutic Nursing Intervention/Competent Care Provider:** A competent provider of health care who assumes the multiple role dimensions in structured and semi-structured health care settings.
- **Professional Role Model:** A person who promotes a positive public image of nursing.
- **Responsible Manager:** Someone who balances human, fiscal, and material resources to achieve quality health care outcomes.

The BSN program is offered on the IUB, IUPUC, and IUPUI campuses. Prospective students should acquaint themselves with curriculum requirements, course sequencing, and other degree requirements, along with the requirements for admission to the BSN program on each campus. Students are responsible for meeting all degree requirements.

- Accelerated Track

Last updated February 14, 2012

RN to BSN Degree Completion Program

This program option is offered on the IUB, IUPUC, and IUPUI campuses for nurses holding an associate degree or diploma in nursing from an accredited nursing program. Registered nurses seeking admission to the Indiana University School of Nursing must apply to the campus Office of Admissions and may apply to the program anytime throughout the academic year. Students who have previously attended an IU campus or who are graduates of the associate program at IU should contact the nursing academic counselor. Unless otherwise specified, all School of Nursing policies pertinent to BSN program majors also apply to registered nurse undergraduate students.

Students who have attended another college or university must forward an official transcript to the campus Office of Admissions. The Office of Admissions will then generate a credit transfer report (CTR) listing transferable credit.

Upon receipt of the CTR, the student should contact the nursing academic counselor at that campus who will review the CTR, identify course work to be completed, and explain the process for achieving advanced standing with credit. Credit will be awarded for relevant courses completed at other accredited institutions of higher learning. Students are eligible to enroll in courses upon (1) receiving notification from the Office of Admissions that they have been admitted, (2) verification of a registered nurse license in Indiana, and (3) attainment of a minimum cumulative grade point average (GPA) of 2.5 on a 4.0 scale in all work attempted.

Registered nurse students need to consult with the academic counselor for course planning options. Options will vary according to student need, course availability, and resources. It is highly recommended that students complete their general education requirements before enrolling in the nursing courses within the RN-BSN Program.

- RN to BSN Degree Completion Program: Advanced Placement
- RN to BSN Degree Completion Program: Program Requirements
- RN to BSN Degree Completion Program: Residency Requirements
- RN to MSN Degree Mobility Option

Last updated February 16, 2012

Special Credit Courses

Following successful completion of the first semester of RN to BSN Degree Completion Program courses, 35 special credits are awarded for the courses listed below. In order to receive a BSN degree, the student's transcript must reflect fulfillment of all requirements, including 35 special credits. A special credit fee is set by the university and will be assessed. Special Credit courses appear on the student's transcript with a grade of S (Satisfactory.)

Courses Being Credentialed	Credits
B230 Developmental Issues and Health	4
B248 Science and Technology of Nursing	2
B249 Science and Technology of Nursing: Practicum	2
H351 Alterations in Neuro-Psychological Health	3
H352 Alterations in Neuro-Psychological Health: Practicum	2
H353 Alterations in Health I	3
H354 Alterations in Health I: Practicum	2
H361 Alterations in Health II	3
H362 Alterations in Health II: Practicum	2
H363 The Developing Family and Child	4
H364 The Developing Family and Child: Practicum	3
S470 Restorative Health Related to Multi-System Failures	3
S471 Restorative Health Related to Multi-System Failures: Practicum	2
Total Credits	35

A grade of S (Satisfactory) will be recorded on the student's transcript for the above courses according to the university credentialing process.

Nursing elective credit for NURS-K304 (Nursing Specialty Elective) may be awarded to registered nurses holding valid specialty certification from a nationally recognized nursing organization in an appropriate area of nursing. A total of 3 credit hours may be awarded.

Last updated February 16, 2012

Program Requirements & Sample Curriculum Plan

This curriculum plan is specifically for registered nurse students. The curriculum plan can be customized according to student need, interest, and academic goals. Students are expected to complete an individualized curriculum plan prior to beginning the RN-BSN nursing courses. RN to BSN Degree Completion Program nursing courses are available on the Web through Oncourse. Students must have satisfactorily demonstrated completion of the following courses (Completion may be demonstrated by course transfer, course validation, or course enrollment):

- 4-5 semester credits of anatomy
- 4-5 semester credits of physiology
- 3-4 semester credits of microbiology
- 3 semester credits of Introduction to Psychology
- 3 semester credits of Introduction to Sociology
- 3 semester credits of English composition
- 3 semester credits of a communication course
- 6 semester credits of Critical / Analytical / Science courses
- 6 semester credits of Cultural Diversity courses
- 3 semester credits of Social Competency courses
- 3 semester credits of Humanistic Appreciation courses
- 6 semester credits of open electives

Required Nursing courses:

Communications	B231
Professional Seminar I: Health Policy	B304
Professional Seminar II: Informatics	B404
Data Analysis	H355
Introduction to Research	H365
Ethics	S474
Community Health	S475
Management	S487
Capstone	S483
Nursing Electives (3 courses required)	Variable

Last updated February 16, 2012

Residency Requirements

Thirty hours of residency credit is required for the baccalaureate degree. RN to BSN Degree Completion Program students must meet this requirement to be eligible for graduation. The following required nursing courses may be used to meet the residency requirement.

B231 Communications	3
B304 Professional Nursing Seminar I	3
B404 Professional Nursing Seminar II	3
H365 Nursing Research	3
S475 A Multi-System Approach to the Health of the Community	3
S487 Nursing Management	3
S483 Clinical Nursing Practice Capstone	3
Nursing Elective (variable)	9
Total Credits	**30**

Students must petition the Admission, Progression, and Graduation (APG) Committee for special consideration if they wish to apply nursing transfer credit to meet residency requirements.

Last updated February 16, 2012

Admission

Associate degree or diploma prepared registered nurses who graduated from an NLNAC accredited program are eligible to apply to the BSN program if they meet the published admission criteria for the RN to BSN Degree Completion Program. Applicants will be considered for admission to the BSN program based on space availability.

To be eligible to apply to the RN to BSN Degree Completion Program students must:

- Have graduated from an NLNAC accredited school of nursing
- Be admitted to their home campus of Indiana University as a degree-seeking student
- Have a current, unencumbered RN license
- Achieve a minimum cumulative grade point average of 2.5 on a 4.0 scale for their prior ASN or diploma degree
- Complete required general education courses with a grade of C of above; a C- is not acceptable. A grade of C or above must be obtained by the second attempt; students may attempt a required course only twice.

School of Nursing policies related to the BSN degree pertain to RB to BSN students pursuing a BSN degree including, but not limited to, progression and graduation policies. While all existing policies related to the BSN degree pertain, the following exceptions will be followed:

- All general education requirements must be completed before enrolling in nursing courses
- Nursing courses must be completed within six years
- Anatomy, Physiology, and Microbiology do not have a 7 year "expiration date"
- Finite Math and Chemistry are not required for admission to the program

Procedures:

- Validation of prior knowledge and skills consistent with BSN expected program competencies is assessed through student learning measures that focus on application, analysis, synthesis, and evaluation of nursing knowledge and skills deemed appropriate for advanced placement in the BSN curriculum.
- RN students must complete all of the RN to BSN courses with a grade of C or better. Students must be successful in each course by the second attempt and may be dismissed from the program if unsuccessful in passing courses according to the BSN progression policy.
- Through the IU process of validation by special credit students will earn 35 credit hours for the following courses: B230, B248, H351, H353, H354, H361, H362, H363, H364, S470, and S471. (Special credit does not count towards residency credit)
- RN students may be eligible to receive additional special credit through the School of Nursing portfolio process for remaining required course work if students can meet the expectations of the portfolio review process.

Last updated February 17, 2012

Graduate Programs

The School of Nursing faculty offers the following degrees:

- Master of Science in Nursing (MSN)
- Doctor of Nursing Practice (DNP)
- Doctor of Philosophy in Nursing Science (PhD)

For information concerning these programs of study, write Graduate Programs, Indiana University School of Nursing, 1111 Middle Drive, NU 122, Indianapolis, IN 46202-5107; or telephone (317) 274-2806 or visit www.nursing.iupui.edu.

The Master of Science in Nursing (MSN) program; the PhD in Nursing Science and the Doctor of Nursing Practice (DNP) programs are offered through the Indianapolis campus. Selected courses for all programs are offered through Internet-based technologies that support student access.

Center for Academic Affairs

The mission of the Center for Academic Affairs in the School of Nursing is to promote and facilitate the success of its students. This mission is implemented through the functions of academic counseling, recruitment, admissions, registration, certification, academic record maintenance, academic performance monitoring, orientation programs, minority and international counseling, graduation, and student activities. Student

services personnel serve as liaisons between students, faculty, and other groups in interpreting School of Nursing and university policies and procedures, and in advocating students' rights and responsibilities.

Orientation

Students new to the School of Nursing will receive orientation materials in the mail prior to the start of the semester.

Guidance and Counseling

A counselor in the Indiana University School of Nursing Center for Academic Affairs is available as a resource for students. Students must see their faculty advisors for academic counseling and program planning. The counselor for minority affairs on the IUPUI campus is also available to assist minority students with special needs. Students at IUPUI may also consult the Adult Psychiatry Clinic, the Chaplain's Office, the Learning Skills Center, the Office of Career and Employment Services, Counseling and Psychological Services, or other local agencies for specialized counseling.

Graduate Minority Mentoring Program

The IU School of Nursing has initiated a graduate student mentoring program to support minority and international students during their education in the graduate program. Faculty members serve as mentors for students.

The goals of the program are:

1. To help students develop personal, social, and professional skills that will enable them to understand the challenges of graduate education and will enhance opportunities for academic and professional success.
2. To motivate students' involvement in opportunities presented through the Indiana University Graduate School, Indiana University School of Nursing, and Indiana University support services.
3. To promote communication between students, administrators, professors, mentors, staff, and the community.
4. To promote experiences that will support the accomplishment of a student's professional goals.
5. To meet regularly with students to review progress and to make plans for future success.

The benefits of the program for participating students are:

1. Opportunities to learn more about the Indiana University School of Nursing and Indiana University itself.
2. Expert assistance in developing career goals in advanced practice nursing.
3. Expert guidance in making career decisions.
4. Assistance in bridging the gap between academic achievement and its application in the workplace.
5. Participation in peer group experiences designed for students of color.
6. Individual instruction to prepare for admission into and progression through the graduate program in nursing.

Graduate Admissions

- Application
- M.S.N. Admissions
- Graduate Certificate: Teaching in Nursing
- Gradutate Certificate: Nursing Informatics
- PhD Program
- DNP Program
- Center for Academic Affairs

How to Apply

An online application process can be accessed through the School of Nursing Web site. Instructions and links can be found at nursing.iupui.edu. Other application information can be obtained from the Center for Academic Affairs, 1111 Middle Drive, NU 122, IUPUI, Indianapolis, IN 46202-5107; e-mail: oesgrad@iupui.edu phone: (317) 274-2806; fax: (317) 274-2996; Web: nursing.iupui.edu. International applicants must indicate on the graduate application that they are an International student.

Applicants need to complete an application packet that includes: (1) all forms required by the university; (2) official, original, sealed transcripts from each post-high school educational institution attended, including colleges, universities, and diploma schools of nursing (compilations on one transcript are not acceptable); (3) a 250-word essay describing career objectives; (4) payment of a nonrefundable application fee (this is required of all U.S. applicants who are new to Indiana University). All application materials must be submitted at the same time in the same packet except online applications, transcripts, and references.

Transcripts and references are submitted and should be sent to the Office of Graduate Programs, Indiana University School of Nursing, 1111 Middle Drive, NU 122, Indianapolis, IN 46202-5107. Fees are paid electronically through the OneStart system.

Application Deadlines

Applications for the master's program are considered twice a year. Completed applications are due February 15 and September 15. Acute Care NP only admits September 15. Family NP and Pediatric NP only admits February 15. Applications for the PhD program are considered twice a year - August 15 and October 15 for admission the following summer. Qualified applicants will be invited for interviews. The PhD Admissions committee makes nominations of the best-qualified candidates to the IU Graduate School. The Doctor of Nursing Practice (DNP) program admits students once a year and application materials are due March 1. Qualified applicants will be invited for interviews, and final acceptance decisions are made in April for fall admission.

Last updated: February, 2012

M.S.N. Admissions

Admission to the master's program requires approval by the faculty in the department in which study is desired. Admission is based on the composite of qualifications (as evidenced by the application), official transcripts, and references. A personal interview may be requested by the department. Acceptance into the master's program is competitive.

The criteria that follow must be met for full admission. An applicant who lacks one or more of the criteria may be considered for probationary admission or conditional admission, meaning one or more the admission criteria has not been met.

1. A grade point average (GPA) of 3.0 or higher on a 4.0 scale from a program accredited by the National League of Nursing, or an equivalent program.
2. A 250-word essay describing and explaining professional career aspirations as an advanced-practice nurse.
3. A current active, unencumbered registered professional nurse license in the state in which the student practices. International applicants must submit evidence of passing the Council of Graduates of Foreign Nursing Schools (CGFNS) qualifying examination prior to coming to Indiana University. Indiana licensure must be achieved prior to enrollment in any clinical nursing course.
4. For International students - in addition to meeting academic qualification, you must:
    - Show proficiency in English (a Test of English as foreign Language (iBT=-TOEFL) score of 550 or above is required and a speaking score of 26 or above is required for those who native language is not English.
    - Show proof of financial support, which will be processed through the Office of International Affairs.
    - Submit evidence of passing the Councils of Graduate of Foreign Nursing Schools (CGFNS) qualifying examination prior to coming to Indiana University.
5. All majors require a statistics course. Please check with the Graduate Advisor regarding your preferred MSN track requirement.
6. Ability to use computer technologies including accessing, retrieving, receiving, and communicating information.
7. Two years of relevant clinical nursing experience as a licensed registered nurse required for nurse practitioner applicants.

Mobility Option

Registered nurses wishing to pursue graduate education whose highest academic nursing credential is a nursing diploma, an associate degree in nursing, or a baccalaureate degree in another field may be interested in exploring this educational option. The mobility option allows registered nurses to earn a Master of Science in Nursing (M.S.N.) degree without the conferral of the baccalaureate degree in nursing. For more information, interested parties should contact the graduate advisor at the Center for Academic Affairs, 1111 Middle Drive, NU 122, IUPUI, Indianapolis, IN 46202-5107; telephone (317) 274-2806. Please note that this opportunity may not be the best option for all registered nurses, so it is important to talk with the School of Nursing's academic counselor early in the decision process.

Admission of Students on Academic Probation

Students with undergraduate GPAs lower than 3.0 may be admitted on academic probation upon the recommendation of the academic department in which they desire a major and with the endorsement of the Graduate Admission, Progression, and Graduation (APG) Committee.

Maintaining Active Status of Admission

Admission is valid only for the enrollment period designated in the admission letter. Deferment may be granted upon written request, subject to adjustment of admission status to requirements of the new enrollment period. Applications and transcripts are kept on file for two years only; beyond that period, reapplication is required.

Part-Time Study

Part-time study is possible, provided that the program is completed within the six-year limitation period. Part-time students should consult with their academic faculty advisors each semester in order to maintain active status.

PhD Admissions

Successful applicants must submit the following criteria by application deadlines of August 15 and October 15 for summer admission:

- Completion of a Baccalaureate in Nursing or Master of Science in Nursing from a program within a regionally accredited institution of higher education. (Indiana University School of Nursing faculty retain the right to determine acceptable accreditation status of nursing programs from which applicants have graduated.)
- A baccalaureate cumulative grade point average of 3.0 on a 4.0 scale. For applicants holding a master's degree, a graduate GPA of 3.5 or higher is required. The master's degree GPA will supersede the baccalaureate GPA. Official transcripts are required.
- Completion of a 3 credit graduate-level statistics course with a grade of B (3.0) or higher within three (3) years before the date of proposed application.
- Current Registered Nurse Licensure (RN) in state of U.S. residence.
- Competitive scores (50th percentile and above) on the verbal and quantitative sections and a score of 3.5 or better on the analytical writing section of the Graduate Record Examination (taken within the last five years). For information about the GRE —such as registration information, test dates, and testing locations—visit the Educational Testing Service (ETS) Web site or contact them by phone at 1-609-771-7670. Scores must be sent to IUSON directly from ETS and upon arrival will be matched to your application.
- International students must have competitive scores (minimum of 550) on the Test of English as a Foreign Language (TOEFL) or satisfactory performance on the International English Language Testing System (IELTS) exam for students whose first language is not English. A test of written English is also required. For more information, visit www.ielts.org. International student applicants are advised to consult with the IUPUI Office of International Affairs.
- The following materials are required to be included in the application materials:
    - A two- to three-page essay summarizing immediate and long-term professional goals and a proposed area of research.
    - Example of original scholarship or research in nursing as demonstrated by a report, published or unpublished paper, or a thesis.

- Three references, including one from a nurse faculty member who has knowledge of the applicant's academic ability from undergraduate or master's work.
- Letter from a nursing graduate faculty member with endorsement to direct dissertations who has agreed to be a Research Mentor because they share a research interest area with you (letter template must be used). For a list of IUSON faculty members and their areas of research interests http://nursing.iupui.edu/directory/faculty. Solicit a letter of support from one of these individuals whose area of research most closely matches your own. Submit this letter with the application materials. If you need help choosing faculty member(s) with similar interests, you may contact the Graduate Advisor for Doctoral Programs.
- An interview with members of the PhD faculty (arranged by school) is also required.

Qualified candidates are interviewed following each admission deadline. The PhD admissions committee makes decisions and nominates the best candidates to the IU Graduate School. Admissions decisions are finalized and students are notified of acceptance with a May (summer) start date for the program.

Application is two-fold:

1. Apply online; "Nursing Non-Degree"; "PhD Prep."
2. All application material, in one packet, should be sent no later than August 15 or October 15 to the following:

   Graduate Advisor for Doctoral Programs

   Indiana University School of Nursing Center for Academic Affairs

   1111 Middle Drive, NU 122
   Indianapolis, IN 46202-5107

For more information about the PhD program or the admission criteria, please contact:
Graduate Advisor for Doctoral Programs
Phone: (317) 274-2806
E-mail: dgrew@iupui.edu

DNP Admissions

Admission to the Indiana University School of Nursing (IUSON) DNP program requires approval by the faculty and is based on the applicant's qualifications as evidenced by grade point average, certification, statement of professional aspirations, official transcripts, references. A personal interview is also required. Acceptance into the program is competitive. The DNP program admits once a year with the application deadline of March 1 for fall admission.

The following criteria must be met for unconditional admission to the DNP program:

1) Master's Degree in Nursing from an NLNAC or CCNE accredited program.

2) MSN degree program cumulative GPA of 3.3 or higher.

3) Meet the role requirements of the agency in which you conduct your practicum.

4) Provide documentation of supervised practice hours from an accredited MSN program. Students with fewer than 500 clinical hours will take additional practicum credits to achieve the 1000 hours required by the American Association of Colleges of Nursing.

5) Have completed NURS-I 630 *Introduction to Nursing Informatics* or equivalent graduate level informatics coursework.

6) Have completed NURS-R 505 *Measurement and Data Analysis* or NURS-L 650 *Data Analysis for Clinical and Administrative Decision-making* or equivalent graduate level statistics course completed *within the last three years with a grade of B or better.*

7) An unencumbered RN license in state of practice.

8) Completed online IUSON DNP application.

9) Official transcripts from all colleges and universities attended.

10) Written career goal statement (limit of 500 words).

11) Three professional references (at least one from a current or former supervisor).

12) Resume or curriculum vitae.

13) Statement of possible community agency or health system mentor, and/or general idea of DNP scholarly inquiry project.

14) Admission interview.

- University Support

Nursing Informatics

The School of Nursing offers a Graduate Certificate in Nursing Informatics. Nursing informatics is a nursing specialty that draws from computer science, information science, cognitive and decision sciences, and nursing science. Students in nursing informatics gain knowledge and skills to enhance patient-care delivery, promote consumer health, utilize nursing research, and provide education through information technology. Completion of the certificate program fulfills the educational requirements for eligibility for the AACN certification as an Informatics Nurse. (Note: Eligibility for certification has the additional requirement of 1,000 hours of clinical informatics practice). The certificate meets the educational requirements of nurses who want to expand their current knowledge base or develop new skills in nursing informatics and meet the growing needs of clinical enterprises that are seeking nurses to fulfill roles in clinical and consumer (e-health) roles. The certificate (12 credit hours) requires completion of three core courses and an additional elective selected by the learner from a list of recommended courses.

Admissions Requirements and Procedures

Admission to the certificate program requires a bachelor's degree in nursing from an accredited institution with a recommended minimum GPA of 3.0. Appropriate work experience also will be taken into account in making

decisions about admission. Students will be required to submit a statement of interest and three letters of recommendation. Students already admitted into the Indiana University or Purdue University graduate program are automatically eligible to earn a certificate. Such students must declare their participation in the degree program and also submit a statement of interest.

Minimum Overall GPA

Students will be required to receive a final overall grade point average of 3.0 or higher to be awarded the certificate. The minimum grade accepted in any single course is B.

Maximum Number of Credits That Can Be Transferred from Another Institution

If a student is able to document appropriate graduate course work at another institution, the student can request that the transfer of a maximum of 3 credits. The faculty that oversees the program will approve all waivers and substitutions. No undergraduate courses can be applied to this certificate program.

Maximum Time for Completion

Maximum time for program completion is four years with no significant breaks (i.e., more than two semesters) between courses. (This field and its underlying technology change too rapidly to allow for longer breaks.) Most students enrolled in this program will be part-time students, employed full time. Thus four years may be needed for the completion of all courses if students take one course per semester.

Number of Credit Hours Taken Prior to Admission to the Certificate Program That May Be Counted to Completion of the Degree

There is no limit to the number of graduate courses that can be taken prior to admission to the certificate program, provided that all course work is completed within a four-year period.

Required Nursing Informatics Courses

- NURS I630 Introduction to Nursing Informatics (3 cr.)
- NURS I631 Clinical Information Systems (3 cr.)
- NURS I579 Nursing Informatics Practicum (3 cr.)

Nursing Informatics Electives

- NURS I635 Consumer Health Informatics (3 cr.)
- NURS L650 Data Analysis for Clinical and Administrative Decision Making (3 cr.)
- NURS T619 Computer Technologies for Nurse Educators (3 cr.)

Teaching in Nursing

The School of Nursing offers a Graduate Certificate in Teaching in Nursing. The certificate (15-17 credit hours) requires completion of prescribed courses and a teaching practicum. The academic certificate is for students with bachelors's or master's degrees or currently enrolled in a master's program with the career goal of teaching in an academic setting.

Admissions Requirements and Procedures

Admission to the certificate program requires a bachelor's degree in nursing from an accredited institution with a recommended minimum GPA of 3.0. Appropriate work experience also will be taken into account in making decisions about admission. Students will be required to submit a statement of interest and three letters of recommendation. Students already admitted into the Indiana University or Purdue University graduate program are automatically eligible to earn a certificate. Such students must declare their participation in the degree program and also submit a statement of interest.

Minimum Overall GPA

Students will be required to receive a final overall grade point average of 3.0 or better to be awarded the certificate. The minimum grade accepted in any single course is B.

Maximum Number of Credits That Can Be Transferred from Another Institution

If students are able to document appropriate graduate course work at another institution, they can request that they transfer a maximum of 3 credits. The faculty members who oversee the program will approve all waivers and substitutions. No undergraduate courses can be applied to this certificate program.

Maximum Time for Completion

Maximum time for program completion is four years with no significant breaks (i.e., more than two semesters) between courses. (This field and its underlying technology changes too rapidly for longer breaks.)

Number of Credit Hours Taken Prior to Admission to the Certificate Program That May Be Counted to Completion of the Degree

There is no limit to the number of graduate courses that can be taken prior to admission to the certificate program, provided that all course work is completed within a four-year period.

Required Courses for the Teaching in Nursing Certificate

- T615 Curriculum in Nursing (3 cr.)
- T617 Evaluation in Nursing (3 cr.)
- T619 Computer Technologies for Nurse Educators (3 cr.)
- T670 Teaching in Nursing (3 cr)
- T679 Nursing Education Practicum (3 cr.)

- T800 Preparing Future Faculty (2 cr.) **Optional for Graduate M.S.N. and required for Ph.D. students.**

Degree Programs

The School of Nursing faculty offers the following degrees:

- Master of Science in Nursing (MSN)
- Doctor of Nursing Practice (DNP)

- Doctor of Philosophy in Nursing Science (PhD)

The School of Nursing also offers the following certificates:

- Nursing Informatics Graduate Certificate
- Teaching in Nursing Graduate Certificate

For information concerning these programs of study, write Graduate Programs, Indiana University School of Nursing, 1111 Middle Drive, NU 122, Indianapolis, IN 46202-5107; or telephone (317) 274-2806 or visit www.nursing.iupui.edu.

The Master of Science in Nursing (MSN) program: the PhD in Nursing Science and the Doctor of Nursing Practice (DNP) programs are offered through the Indianapolis campus. Selected courses for all programs are offered through Internet-based technologies that support student access.

Doctor of Nursing Practice (DNP)

Purpose

The Doctor of Nursing Practice (DNP) is a Post-Masters 37 credit hour practice-focused professional doctorate. Graduates of the program are prepared to assume leadership positions in nursing and health care, both at system and direct patient care levels. Graduate will contribute to quality improvement and patient safety through systems thinking, reflective practice, informatics, translation science, and evidence-based clinical practice.

Program Outcomes

Graduates of the program are expected to:

1. Use relationship-centered nursing leadership to improve health care and the health status and outcomes of people.

2. Engage with communities of practice to frame problems, design and implement evidence-based interventions, and evaluate outcomes.

3. Integrate the needs of diverse societies in the design, delivery, and evaluation of health services in complex systems.

4. Transform clinical practice through reflection, action inquiry, strategic resource management, information technology and/or knowledge-based resources.

5. Translate knowledge for application to the delivery of advanced nursing practice.

6. Implement changes based on evaluation of health systems, health policy, and nursing science in response to social, political, economic, and ethical issues.

7. Evaluate the impact of change on complex health systems including individuals and populations.

DNP Curriculum

Thirty-seven credit hours (post- masters MSN) are required to complete the curriculum and include the following courses:

I631	Clinical Information Systems	3 credits
D615	Health Care Outcomes and Decision Making	3 credits
D735	Clinical Epidemiology and Statistics in Nursing	3 credits
D736	Inquiry I: Evidence-based Research & Translation Science	3 credits
D737	Inquiry II: Evidence-based Research & Translation Science	3 credits
D743	Influencing Public Health Policy	3 credits
D744	Strategic Resource Management in Nursing & Health Systems	3 credits
D749	DNP Practicum	7 credits
D751	Knowledge Complexity	3 credits
D751	Relationship-Centered Leadership in Complex Systems	3 credits
	Elective	3 credits

Last updated: February, 2012

Academic Standing

Good Standing

A student is in good academic standing when his or her cumulative grade point average is 3.0 or higher.

Disciplinary Probation

Disciplinary probation is administered under the Code of Student Rights, Responsibilities, and Conduct. The faculty reserve the right to request the withdrawal of a student when problems related to personal integrity, health, maturity, or safety in the practice of nursing demonstrate the student's unfitness to continue preparation for professional nursing.

Academic Probation

A student is placed on academic probation when the cumulative grade point average falls below 3.0 or if he or she earns a C+ or lower in a required course. The probationary status is removed within one semester or its equivalent (9 credit hours). Students who do not regain good academic standing after three semesters of probation will be dismissed from the program.

Maintaining Status

- Students who do not register for a period of three consecutive semesters will be dismissed from the program.
- Students admitted on probation who fail to remove the conditions of admission within the time frame specified are subject to dismissal.
- Students must maintain a cumulative GPA of 3.0 throughout the duration of the program. Course grades lower than B- will constitute course failure.
- Students must achieve a cumulative GPA of 3.0 to be eligible for graduation.

- Students who receive a failing course grade in a non-clinical coure will be placed on academic probation and monitored by the MSN AFP Committee. The student may request an opportunity to repeat the course one time.
- Students who receives a failing grade in a clinical course or in more than one course (clinical and/or didactic) within the same semester will be dismissed from the program.
- If a course must be repeated, the department may specify additional conditions relating to progression in the program until the course is successfully completed.
- Students will remain on academic probation, even after successful completion of a repeated course, until cumulative GPA meets or exceds 3.0.
- Students who are on academic probation and/or has one or more course Incomplete(s) outstanding cannot enroll in further coursework unless approved by the MSN APG Committee.
