- Evidence of lack of progress toward the degree is described as failure to successfully attain a B– or higher in a course in which an unsatisfactory grade has been previously received. Students who do not complete all degree requirements within a six-year period following initial registration will be dismissed.

Master of Science in Nursing

Philosophy

Nursing is a scientifically and theoretically based service profession. By embracing the contextual nature of practice through integration of multiple ways of knowing including critical thinking, research, reflection, and intuition, M.S.N. graduates become expert nurses who provide holistic, ethical, evidence-based care within an interdisciplinary environment. Through the educational process, students become visionary leaders who advance the profession of nursing and influence the future of healthcare.

Purpose

The IUSON M.S.N. programs educate nurses to become leaders within dynamic healthcare environments. As nurse leaders they are prepared to provide and improve care to patients, families, and/or communities and to lead educational and complex healthcare systems.

Program Outcomes

The goal of the Master of Science in Nursing (MSN) program is to prepare graduates for leadership roles in advanced nursing practice, those of clinical nurse specialist, nurse practitioner, nurse educator, and nurse administrator. Students select one of 8 track areas of study when they apply for admission. In addition, graduate certificates are offered in nursing informatics and teaching in nursing. Post-master's study options are available in all tracks. All degree requirements must be met within six years of initial enrollment. The pattern and duration of a program of study for individual students is determined in consultation with a faculty advisor. Degree requirements can be met through a combination of distance-accessible and on-campus learning opportunities.

All graduates of the master's degree program are expected to achieve the following outcomes:

1. Model excellence in nursing leadership to improve nursing practice within a complex health care system.
2. Conduct advanced nursing practice within ethical–legal guidelines, professional policies and regulations, and standards of practice associated with a specialty area of practice.
3. Synthesize knowledge from nursing as well as biological, behavioral, social, administrative, educational, and communication sciences for application to a chosen domain of advanced practice nursing.
4. Demonstrate scholarly inquiry and reflection that exemplifies critical, creative, and systems thinking to advance the practice of nursing.
5. Frame problems, design interventions, specify outcomes, and measure achievement of outcomes while balancing human, fiscal, and material resources to achieve quality health outcomes.
6. Use information technology and knowledge-based resources to manage and transform data that inform clinical practice.
7. Systematically apply evidence from research findings to answer clinical questions, solve clinical problems, and develop innovative nursing interventions and health policies for selected patient populations.
8. Demonstrate collaborative practice and interpret nursing science within an interdisciplinary context.
9. Articulate the effects of culture, diversity, values, and globalization in the design, delivery, and evaluation of health services.
10. Engage in life-long learning activities that contribute to professional development as well as to the advancement of nursing.

The goal of the M.S.N. program is to prepare its graduates for leadership roles in advanced nursing practice, clinical specialization, nursing education, or nursing administration. tracks are offered in eight areas. Post-master's options are also available in all the tracks. Students select a track area of study when they apply for admission.

Students may elect to follow a full- or part-time course of study. Minimum time for completion of degree requirements is three semesters. All degree requirements must be met within six years of initial enrollment. The pattern and duration for the individual student is determined in consultation with an academic advisor.

Selected master's courses are distance accessible using a variety of technologies.

- Degree Requirements
- Academic Standing of Students
- Curriculum Design
- Post-Master's Option

Curriculum Design

Minimum completion time for the master's degree program is five semesters. The pattern and duration for the individual student is determined in consultation with the student's faculty advisor.

All majors include the following areas of study:

1. **Core Courses.** One course each in nursing theory, nursing leadership for advanced practice nursing, and research methodology for a total of 9 credit hours.
2. **Courses in the Nursing Major.** Between 15 and 30 credit hours in specialty courses from the major department.
3. **Nursing Study/Thesis Option.**Three credit hours of nursing study or 6 credit hours of thesis work.
4. **Focus Area Courses.** These are required for some majors and requirements vary from 3-9 credit hours of electives chosen by the student in consultation with a faculty advisor.

Degree Requirements

Candidates must meet both the general requirements of the master's program in the School of Nursing and the specific requirements of the specialty track.

All candidates for the degree of Master of Science in Nursing must fulfill the following requirements:

1. Complete a minimum of 42 credit hours of courses (43 for Acute Care Nurse Practitioner program), depending on the track, and fulfill departmental requirements. A maximum of 3 credit hours may be taken at the undergraduate level if the track offers an elective option. Courses meeting the requirement of advanced nursing practice must be taken in or through the School of Nursing.
2. Remove all conditions, deficiencies, probation, and Deferred or Incomplete grades.
3. Achieve a 3.0 grade point average by the time the student has completed 42 credit hours of course work, as required by the major department. Credit hours toward the degree are not granted for courses with a grade below B–. All grades are included in computing the grade point average.
4. Complete all degree requirements within six years of the date the student begins course work.
5. File intent to graduate forms at least one semester before the final semester of study. A new intent to graduate form must be filed if the graduation date changes. Application forms are online and filed with the recorder for graduate programs.
6. Complete the School of Nursing Exit Survey, which is part of the intent to graduate form.

The School of Nursing is not responsible for certification for the degree if the student fails to file the application.

Portfolio Review Process for M.S.N. Course Substitution

A portfolio review process is available to all M.S.N. students who believe that they can meet the learning objectives/competencies required of a specific nursing course within their program of study. The portfolio is a mechanism used to validate the acquisition of knowledge and skills congruent with course expectations and student learning outcomes. The portfolio provides objective evidence that students have acquired the knowledge, skills, and abilities through prior learning and/or practice experiences. The decision to accept the documentation provided is based on determination of the equivalency of this prior knowledge and skills that the student would be expected to demonstrate at the completion of a specific course. The portfolio review option does not take the place of course equivalency reviews or transfer credit. For more information about specific policies and procedures related to the portfolio review process for graduate students please refer to the current graduate student handbook at the School of Nursing Web site.

Post-Master's Option

A minimum of 12 credit hours, determined by the area of study. Post-master's options are available in all Master of Science in Nursing tracks. The option varies from 12 to 29 credits, depending on previous course work. Applicants must have a Master's degree in Nursing. A 500 level graduate statistics class will be required if statistics has not been taken within 5 years and is below a B-.

Program Descriptions

Students select a specialty track at the time they apply for admission. Post-master's options are available in all clinical areas and in nursing administration and teacher education. The majors are listed by their respective departments.

Nursing Administration

Nursing Education

Clinical Specialists

- Adult Health Clinical Nurse Specialist
- Psychiatric Mental Health Nursing

Nurse Practitioners

- Pediatric Nurse Practitioner
- Adult Nurse Practitioner (geriatric and oncology tracks available)
- Family Nurse Practitioner
- Acute Care Nurse Practitioner

Curriculum

The PhD curriculum consists of six core areas of 90 credit hours. The MSN to PhD can use up to 30 credit hours from their Master of Science in Nursing course work.

Core	BSN to PhD	MSN to PhD
Professional Development Core	8 credits	6 credits
Nursing Theory Core	9 credits	6 credits
Nursing Science Research Major	21 credits	15 credits
Nursing Science Concentration	24 credits	8 credits
Minor, external or internal	12 credits	9 credits
Dissertation	16 credits	16 credits

For a complete outline of the courses required for each core, visit the Indiana University School of Nursing PhD program Web site: www.nursing.iupui.edu.

Last updated: February, 2012

Focus Areas of Study w/ Wide Applications

Scholars are prepared in clinical nursing science and health systems. PhD students work closely with faculty mentors, utilizing the resources available at IUSON, and participate in intensive research studies. Focus areas reflect faculty research strengths.

Clinical Nursing Science

Clinical nursing science concentrates on the interrelationships of health promotion, health behavior, and quality of life in acute and chronic illness throughout the life span. This focus area includes the prevention and early detection of disabilities across the continuum of care and the enhancement of the health and well-being for individuals, families, and communities. Examples of scholarship and faculty research topics in clinical nursing science include:

- Improvement of quality of life in persons with chronic illness, including epilepsy, stroke and renal disease
- Behavioral oncology across the cancer continuum (including cancer prevention, detection, and symptom management)
- Childhood and family adaptation to chronic illness
- Family caregiving across the lifespan
- Tailored intervention studies to improve quality of life
- Patient care safety

Health Systems

Health systems operate to create structures and resources that enable individuals and communities to achieve optimal health. This focus area includes the science of nursing education, informatics, health policy, and administration. Examples of scholarship and faculty research topics within the focus of health systems include:

- Teaching and learning in Web-based courses
- Clinical reasoning
- Assessment of learning and program evaluation
- Health policy and public policy analysis
- Computer systems to enhance care delivery
- Nursing informatics
- Narrative pedagogies
- Patient care simulations
- Community-based care coordination

Last updated: February, 2012

PhD in Nursing Science Program

Professional nursing is a distinct scientific discipline with a specific body of knowledge obtained through research. The Doctor of Philosophy program builds upon baccalaureate or master's nursing education and emphasizes the use of creativity in the development and formulation of ideas that contribute to nursing science. Through research, analysis, and evaluation, students are empowered to transform knowledge and critical data into viable propositions through effective communication, critical inquiry, and clinical application. As students progress through the PhD program, they are socialized to the value of research and interdisciplinary inquiry. Today's PhD in nursing science scholar is entrusted with shaping and preserving the quality and vitality of professional nursing.

- On-Campus and Distance-Accessible PhD Options
- Focus Areas of Study
- PhD Curriculum
- Opportunites for Postdoctoral Study

On-Campus and Distance-Accessible PhD Options

Indiana University School of Nursing (IUSON) offers both an on-campus and a distance-accessible option. The distance-accessible option offers bachelor's and master's prepared nurses access to our PhD program through a variety of distance technologies. Faculty and students use Web-based courses, video conferencing, discussion dialogues, telephone conferencing, and other emerging technologies to communicate and participate effectively via long distance. Courses and faculty mentoring are coupled with required two-week on-campus summer intensive sessions. Admission criteria and curriculum are the same for both options.

Graduates of the program will be able to:

- Synthesize knowledge from nursing as well as from the biological and behavioral sciences to investigate health phenomena relevant to the discipline of nursing.
- Utilize analytical and empirical methods to extend nursing knowledge and scholarship.
- Independently conduct and communicate research that advances the body of scientific nursing knowledge.
- Defend the social significance of the expanded knowledge base of nursing.
- Interpret nursing science within an interdisciplinary context.

Last updated: February, 2012

Postdoctoral Study

There are several postdoctoral research training programs at the IU School of Nursing. Advanced research training is available in the areas of Health Behaviors and Quality of Life as well as Behavioral Oncology and Cancer Control. More information is available by calling 317-274-0869 or at http://nursing.iupui.edu/research/training.shtml.

Last updated: February, 2012

Financial Information

Information about financial resources for doctoral nursing students including scholarships, traineeships, fellowships, research teaching assistantships, as well as other sources of financial aid for tuition, fees, and health insurance may be obtained by contacting IUSON's Center for Academic Affairs Web site http://nursing.iupui.edu/cost/index.shtml. To be considered for financial aid all students should complete the Free Application for Federal Student Aid located on the Web at www.fafsa.ed.gov. All graduate students are encouraged to apply for scholarships.

- University Support

University Support

To be considered for financial aid all students should complete the Free Application for Federal Student Aid, located on the Web at www.fafsa.ed.gov. Financial support for graduate students, available from the IUPUI Office of Scholarships and Financial Aid, is primarily in the form of loans and Federal Graduate Work-Study employment. Eligibility for these programs is determined by financial need. Students must submit the forms annually by March 1 to determine financial need. In addition to demonstrating financial need, students must be admitted and enrolled in a nursing graduate program for a minimum of 4 credit hours, or half-time per semester. Further information can be obtained from the Office of Student Financial Aid Services, 425 University Boulevard, Cavanaugh Hall 103, Indianapolis, IN 46202-5145; telephone (317) 274-4162.

University Fellowships

Graduate fellowships may be available from Indiana University for full-time study during the first year. These awards are competitive. Ph.D. candidates are eligible and are nominated by the IU School of Nursing faculty.

IUPUI Educational Opportunity Fellowships

These fellowships are awarded to encourage graduate students who are enrolled at a minimum of 6 credit hours per semester, and who have disadvantaged backgrounds, to participate in graduate studies. Educational Opportunity Fellowships http://www.iupui.edu/~gradoff/students/, which average $500 to $1,500 per year, are awarded on the basis of financial need and academic ability. A form must be submitted to determine financial need.

Student Learning Outcomes

- Doctor of Nursing Practice (DNP)
- Doctor of Philosophy in Nursing (PhD)
- Master of Science in Nursing (M.S.N.)
- Certificate in Nurse Teaching
- Certificate in Nursing Informatics

Master of Science in Nursing (M.S.N)

The goal of the Master of Science in Nursing (MSN) program is to prepare graduates for leadership roles in advanced nursing practice, those of clinical nurse specialist, nurse practitioner, nurse educator, and nurse administrator. Students select one of 8 major areas of study when they apply for admission. In addition, graduate certificates are offered in nursing informatics and teaching in nursing. Post-master's study options are available in all majors. All degree requirements must be met within six years of initial enrollment. The pattern and duration of a program of study for individual students is determined in consultation with a faculty advisor. Degree requirements can be met through a combination of distance-accessible and on-campus learning opportunities.

1. Model excellence in nursing leadership to improve nursing practice within a complex health care system.
2. Conduct advanced nursing practice within ethical–legal guidelines, professional policies and regulations, and standards of practice associated with a specialty area of practice.
3. Synthesize knowledge from nursing as well as biological, behavioral, social, administrative, educational, and communication sciences for application to a chosen domain of advanced practice nursing.
4. Demonstrate scholarly inquiry and reflection that exemplifies critical, creative, and systems thinking to advance the practice of nursing.
5. Frame problems, design interventions, specify outcomes, and measure achievement of outcomes while balancing human, fiscal, and material resources to achieve quality health outcomes.
6. Use information technology and knowledge-based resources to manage and transform data that inform clinical practice.
7. Systematically apply evidence from research findings to answer clinical questions, solve clinical problems, and develop innovative nursing interventions and health policies for selected patient populations
8. Demonstrate collaborative practice and interpret nursing science within an interdisciplinary context.
9. Articulate the effects of culture, diversity, values, and globalization in the design, delivery, and evaluation of health services.
10. Engage in life-long learning activities that contribute to professional development as well as to the advancement of nursing.

Doctorate Programs

Doctor of Nursing Practice (DNP)

Graduates of the program are expected to:

1. Use relationship-centered nursing leadership to improve health care and the health status and outcomes of individuals.
2. Engage with communities of practice to frame problems, design and implement evidence-based interventions and evaluate outcomes.
3. Integrate the needs of diverse societies in the design, delivery and evaluation of health services in complex systems.
4. Transform clinical practice through reflection, action inquiry, strategic resource management, information technology and/or knowledge-based resources.
5. Translate knowledge for application to the delivery of advanced nursing practice.
6. Implement changes based on evaluation of health systems, health policy and nursing science in response to social, political, economic and ethical issues.
7. Evaluate the impact of change on complex health systems including individuals and populations.

Doctor of Philosophy in Nursing Science (PhD)

Graduates of the program are expected to:

1. Synthesize knowledge from nursing as well as biological and behavioral sciences to investigate health phenomena.
2. Utilize analytical and empirical methods to extend nursing knowledge and scholarship.
3. Conduct and communicate Independent research that advances the body of scientific knowledge.
4. Defend the social significance of the expanded knowledge base of nursing.
5. Interpret nursing science within an inter-disciplinary context.

Last updated: February, 2012

Graduate Certificates

Certificate Program in Nurse Teaching

All participants who complete the nurse teaching certificate program are expected to achieve the following outcomes:

1. Facilitate learning effectively
2. Facilitate Learner Development and Socialization
3. Use Assessment and Evaluation Strategies
4. Participate in Curriculum Design and Evaluation of Program Outcomes
5. Function as a Change Agent and Leader
6. Pursue Continuous Quality Improvement in the Nurse Educator Role
7. Engage in Scholarship

8. Function within the Educational Environment

Certificate Program in Nursing Informatics

The goal of the certificate in nursing informatics is to prepare graduates with knowledge and skills to enhance patient-care delivery, promote consumer health, utilize nursing research, and provide education through information technology. All participants who complete the nursing informatics certificate program are expected to achieve the following outcomes:

1. Synthesize knowledge of system design, selection, implementation, and evaluation of information systems for nursing care delivery, including human factors and organizational change management.
2. Manage structured and unstructured data for representing nursing knowledge to inform clinical and administrative decision making, monitor quality and effectiveness of nursing care, and support evidence-based nursing practice.
3. Utilize standardized languages for storage and retrieval of healthcare information and nursing data.
4. Integrate principles of computer science, information science, cognitive and decision sciences, and nursing science within computerized decision support systems
5. Demonstrate project management skills for implementation of technological solutions to nursing and healthcare problems.
6. Develop policies to safeguard access to health information and to ensure information security, accessibility, and quality.
7. Analyze the social and ethical issues related to computerized healthcare information delivery.

Centers & Institutes

As the nation's only school of nursing offering the full range of degree programs, we provide a continuum of nursing education unmatched by any other university. Our goal is to help students reach their career goals in the health care profession and prepare them to meet the lifelong challenges they'll face as nurses.

Centers and Institutes

Student Organizations

- The Honor Society of Nursing, Sigma Theta Tau International
- Student Nurses Association
- Chi Eta Phi Sorority, Inc.
- Minority Nursing Student Organization (MNSO)
- President’s Council
- Pi Lambda Theta
- Graduate Nursing Student Organization
- IU School of Nursing Committees

Last updated February 10, 2010

Honor Society of Nursing

The Alpha chapter of the international honor society of nursing was organized at Indiana University. Membership is by invitation to baccalaureate and graduate nursing students who have demonstrated excellence in their nursing programs and have shown superior academic and personal records of achievement. Qualified members of the nursing profession, upon demonstration of marked achievement in nursing, are also eligible for membership. Leadership, research, and scholarship constitute the purposes of Sigma Theta Tau International.

Last updated February 18, 2010

Student Nurses Association

All prenursing and nursing undergraduate students are eligible for membership in the National Student Nurses Association, the Indiana Association of Nursing Students, and IU’s local chapter. The chief purpose of the organization is to help students prepare to assume professional responsibilities through programs that involve nursing students in health care issues, legal aspects of nursing, interdisciplinary questions, and community activities at the local, state, and national levels.

Last updated February 18, 2010

Chi Eta Phi Sorority, Inc.

This service organization is open to all undergraduate nursing students who demonstrate excellence in the profession of nursing, maintain an acceptable grade point average, demonstrate leadership, and participate in campus and community activities. This organization affords students an opportunity to engage in service activities and to promote interest in the field of nursing locally and nationally.

Last updated February 18, 2010

Minority Nursing Student Organization (MNSO)

The purpose of the MNSO is to serve as a peer support group for undergraduate, graduate, and prenursing minority students. The organization serves as a liaison among minority nursing students, faculty, and interested persons, groups, and organizations in the school, university, and community. At the current time, gatherings are serving as the liaison source for minority students.

Last updated February 18, 2010

President’s Council

The President’s Council is composed of the presidents of School of Nursing student organizations, class officers, faculty advisors, and representatives from school committees that deal with student matters. The purpose of this group is to be a liaison between various student groups, the faculty, and administration of the school. This group is especially involved in decisions associated with progression through the program and with graduation-related events. Class presidents are expected to keep classmates informed of issues and to act as advocates for their peers.

Last updated February 18, 2010

Pi Lambda Theta

Graduate students with GPAs of at least 3.5 who are enrolled in teacher education courses may meet selective criteria for election to Pi Lambda Theta, an international honor society and professional association in education

Last updated February 18, 2010

Graduate Nursing Student Organization

The Graduate Nursing Student Organization seeks to foster fellowship, cooperation, and communication among graduate nursing students; to provide a means for graduate students to share concerns; to share information regarding student activities and concerns; to plan service and educational projects; and to provide representation for graduate students. The goal of the organization is to uphold the ideals and standards of the School of Nursing.

Last updated February 18, 2010

IU School of Nursing Committees

Students are invited to participate on School of Nursing standing committees of the Council of Nursing Faculty, and on ad hoc task forces. Examples include the CCNF BSN Curriculum Committee and the CCNF Student Affairs Committee.

Last updated February 10, 2010

Academic Policies & Procedures

Please refer to School of Nursing policy for more information

Completion of Degree Requirements

The School of Nursing must receive notices of removal of Incomplete and Deferred grades, special credit grades, and independent study course grades no later than three weeks before the end of classes in the student's last semester prior to graduation.

Auditing of Courses

An audit student officially registers for a class and pays the applicable credit hour rate. Upon completion, the course is entered on the permanent university record as one taken for no credit (NC). Note that this option is available only with the instructor's permission.

Professional Liability Insurance

All undergraduate and graduate nursing students have liability insurance under IU's malpractice contract. This policy covers students only while caring for patients/clients in the student role. This insurance does not cover students who are working for pay or in any other capacity outside program-sanctioned learning experiences.

Criminal Background Checks

All applicants are required to submit a national criminal background check upon being admitted to the School of Nursing. Current students will be required to update their national criminal background checks on an annual basis.

Health Requirements and Insurance

All nursing students must provide evidence of compliance with health requirements including immunizations, CPR certification, Training in Universal Precautions, and Hepatitis B Vaccinations on the campus where they are enrolled. Failure to meet health requirements will prevent the student from participating in clinical learning experiences. Lack of participation could constitute a clinical course failure. Occupational Safety and Health Administration (OSHA) training related to blood-borne pathogens is required of all students annually. Students will be notified of training dates and times. Students are also expected to meet any additional mandated OSHA requirements as dictated by agencies providing clinical learning experiences. Health insurance is mandatory and students are expected to demonstrate insurance coverage on entrance to the program and continued coverage throughout the program.

Students with Disabilities

Indiana University is committed to helping temporarily and permanently disabled students make the transition to student life. Students with physical, mental, or learning impairments are encouraged to consult with counselors from the Adaptive Educational Services for assistance in meeting degree requirements. Students with disabilities must meet all academic and technical skill requirements of their program. Programs for academically disadvantaged students are available on all IU campuses. Students on the IUPUI campus can seek additional information at http://uits.iu.edu/page/akft .

Writing Competencies

Writing competency is an expected outcome of the nursing program and of the university. In an effort to prepare students well in this area, faculty have developed the following writing criteria to be used in assessing all student writing:

1. The writing has a focus related to course content.

2. The writing should be organized with an introduction, purpose, sense of audience, thesis, and conclusion.

3. The writing shows development, organization, and detail; the writing reveals the student's ability to develop ideas with balanced and specific arguments that are evidence-based.

4. The writing is clear with vocabulary that is specific to the course.

5. There is coherence within and between paragraphs.

6. The writing reflects critical thinking, linking the specific to the general and uses appropriate examples.

7. The writing follows APA requirements regarding sentence structure, punctuation, spelling, grammar and referencing unless otherwise specified by the faculty.

8. The writing is stated in the student's words and demonstrates their own, non-plagiarized work, and where ideas or materials of others are used, appropriate credit is given to original sources.

9. The writing demonstrates a reflection of Evidence Based Practice when appropriate.

10.The writing demonstrates the use of professional literature resources and WEB sites.

Technology and Information

School of Nursing students must be able to send and receive e-mail, and add and retrieve attachments. They should be comfortable using a Web browser to access Oncourse, the University's learning management system, and to navigate the course environment and use the tools included in their courses. Students should use appropriate Internet etiquette in online communications. They should be able to search for and access nursing-related materials on the Web, and to return to those sites later by using stored Web addresses. Students should be able to competently use Microsoft Word and PowerPoint to create and appropriately format written assignments and basic presentations. They should be able to differentiate between scholarly and popular sources of information on the Web and to evaluate sources for general reliability and trustworthiness. To update skills, students have many opportunities for both classroom and online learning sources through the IT Training & Education, http://ittraining.iu.edu/.

Students participating in Web-based courses and/or those using Adobe Connect Web-conferencing should have consistent access to computers with appropriately configured software and reliable Internet access at sufficient speeds (see http://nursing.iupui.edu/students/computing_technologies.shtmlfor specific information). The University officially supports both Macintosh- and Windows-based computers, but some software such as SAS is not available for Macintosh computers. Students can download applications by logging in with their IU Network ID and password to http://www.iuware.iu.edu/. Students are expected to install and maintain up-to-date virus detection software to prevent spreading harmful viruses and malware to faculty and other students when sharing files.

Formal Communication

The School of Nursing recognizes students' Indiana University / IUPUI e-mail address as the only official means of formal communication via e-mail with students. All students are required to have Indiana University / IUPUI e-mail accounts.

Transportation

Clinical practice learning experiences are varied in setting and are located within the surrounding communities of Indianapolis, Columbus, and Bloomington. Students are expected to travel to and from all clinical experiences, are responsible for providing their own transportation, and are expected to carry the appropriate insurance. The School of Nursing is not liable for any traffic violations or auto mishaps occurring during student commutes.

Additional Requirements

Students may be asked to submit to random drug screens anytime throughout their program in compliance with contract requirements of clinical agencies where students are placed. Positive drug screens may prevent a student from participating in clinical learning experiences. Lack of participation could constitute course failure and potential for dismissal from the program.

Last updated February 16, 2012

Graduate and Professional Policies

General Policies for the Graduate School of Nursing, All Campuses

Student Responsibility

Students in the School of Nursing are responsible for meeting with their academic advisors and planning their programs. Students need to acquaint themselves with all regulations and remain currently informed throughout the nursing program. All provisions of this bulletin are in effect from the year in which the graduate student enters the nursing program. The Indiana University School of Nursing reserves the right to change the regulations in this bulletin at any time during the period for which it is in effect, and to add, modify, or withdraw courses at any time.

English as a Second Language

Students for whom deficiencies in English have been identified by the IUPUI English Entrance Exam must successfully complete recommended English as a Second Language courses before enrolling in nursing courses required by the major.

General Policies

In addition to policies described under the general statement of the School of Nursing, the following policies govern master's study in particular.

Transfer of Credits

Students must obtain the consent of the associate dean for graduate programs before credit earned at other institutions may be added to the official transcript. A maximum of 9 credit hours with a minimum grade of B in courses that fulfill the curriculum requirements may be transferred from an accredited college or university with the consent of the academic advisor. Credits used to meet requirements for the Bachelor of Science in Nursing may not be used toward the Master of Science in Nursing.

Degree Programs

Students may earn only one Master of Science in Nursing degree from the Indiana University School of Nursing, although they may study in more than one major.

Study/Thesis Continuation

After completing R590 Nursing Study (3 cr.) or R699 Master's Thesis in Nursing (6 cr.), the student must enroll every semester in R900 Continuation in Study or Thesis (1 cr.), until the study or thesis is satisfactorily completed.

Academic Policies for the Graduate Programs in the School of Nursing

(The following policies apply only to students admitted to the School of Nursing.)

Semester Load
Full-time graduate students are those enrolled in 8 credit hours during a regular semester or summer session. Enrollment in fewer credits than this constitutes part-time study.

Absences
Illness is usually the only acceptable excuse for absence. Allowances for illness are based on the time at which they occur and the amount of time lost. Loss of time in any course may require that the student repeat the course.

Leave Policy
Students admitted to the graduate programs may petition for a leave of absence of up to one year for personal or health reasons. Students must obtain their advisors' approval and petition the Graduate Admission, Progression, and Graduation Committee in writing. To extend time required for completion of a program, students must obtain leave prior to extended absence.

Completion of Degree Requirements
The School of Nursing must receive notices of removal of Incomplete and Deferred grades, special credit grades, and independent study course grades no later than three weeks before the end of classes in the student's last semester prior to graduation. Transfer of external courses should be completed well in advance of graduation semester. Transcripts may not arrive in time for graduation if students choose to transfer courses in the last semester.

Auditing of Courses
An audit student officially registers for a class and pays the applicable credit hour rate. Upon completion, the course is entered on the permanent university record as one taken for no credit (NC). Note that this option is available only with the instructor's permission.

Withdrawals
Students who wish to withdraw from any or all courses should consult with their academic advisors. The steps to withdraw and possible refunds vary depending on the point in the semester. For specific steps visit registrar.iupui.edu or consult the Registration Guide and Academic Information.

Incomplete (I) Grades
The grade of Incomplete used on final grade reports indicates that the work is satisfactory as of the end of the semester, but has not been completed. The grade of Incomplete may be given only when the completed portion of a student's work in the course is of passing quality. Instructors may award the grade of Incomplete only upon a showing of such hardship to a student that would render it unjust to hold the student to the time limits previously fixed for the completion of the course work.

Deferred Grades
The grade of R (Deferred) is appropriate only as long as there is work in progress. Only certain courses are designated as courses for which the grade of R may be awarded. All R grades must be changed to a letter grade before graduation.

Addition of Courses/Change of Section
Students may add courses or change from one section of a course to another according to the dates in the Registration Guide and Academic Information. Electronic class drop and add is available for certain periods of time. Check registrar.iupui.edu.

Cumulative Grade Point Average
Grades in courses transferred from another institution are not used in calculating the cumulative grade point average. However, all grades from course work attempted at Indiana University are used in calculating the cumulative grade point average.

Computer Literacy
Prior to enrolling in nursing courses, faculty expect nursing students to be able to use computers well enough to log on to the Internet to access class content. Students should also be able to search for nursing-related materials and to return to an interesting site whenever they choose by using bookmarks or a word processor to store Internet location addresses. Students also should be able to log in to an e-mail account to communicate with other students and faculty, and to use a word-processing program.

Students participating in Web-based courses should have access to a computer with a reliable Internet connection (minimum 56K). The School of Nursing officially supports only PC-compatible computers (not Macintosh). For specifics about recommended PC configurations, see uits.iu.edu (click on "Software and Hardware"). The IUPUI SoftPak software should also be purchased. This software can be purchased at the IUPUI Cavanaugh Bookstore on CD for a minimal fee. These CDs include software to connect to the IUPUI network, Netscape Communicator to use as a World Wide Web browser, and a virus checker. If the students are outside of the Indianapolis calling area, they should acquire an Internet provider such as America On Line (AOL), Prodigy, CompuServe, or another that has a phone number in their calling area. These commercial providers have their own World Wide Web browsers. Students in R.N.–B.S.N., R.N.–M.S.N., M.S.N., and Ph.D. programs are required to have their own computer and to be able to access the IUPUI campus services.

Professional/Technical Standards
Students of the School of Nursing will be held to the American Nurses Association's "Standards of Professional Performance" and "Code of Ethics 2005," and the School of Nursing's essential abilities (outlined below). Failure to uphold these standards may result in dismissal from any nursing program.

ANA Standards of Professional Performance (revised 2004)

1. The nurse systematically evaluates the quality and effectiveness of nursing practice.
2. The nurse evaluates one's own nursing practice in relation to professional practice standards and relevant statutes and regulations.
3. The nurse acquires and maintains current knowledge in nursing practice.

4. The nurse interacts with and contributes to the professional development of peers, and other health care providers as colleagues.
5. The nurse's decisions and actions on behalf of patients are determined in an ethical manner.
6. The nurse collaborates with the patient, family and other health care providers in providing patient care.
7. The nurse uses research findings in practice.
8. The nurse considers factors related to safety, effectiveness, and cost in planning and delivering patient care.

ANA Code of Ethics for Nurses (revised 2005)

Each person, upon entering the nursing profession, inherits a measure of the responsibility and trust associated with the profession, along with the corresponding obligation to adhere to the standards of ethical practice and conduct it has set. Nursing students are expected to show responsibility in their behavior; to deal with faculty, peers, patients, and clinical staff in a direct and honest manner; and to be professional in their conduct. Students who violate accepted standards for professional nursing may be discharged from the program.

1. The nurse, in all professional relationships, practices with compassion and respect for the inherent dignity, worth, and uniqueness of every individual, unrestricted by considerations of social or economic status, personal attributes, or the nature of health problems.
2. The nurse's primary commitment is to the patient, whether an individual, family, group, or community.
3. The nurse promotes, advocates for, and strives to protect the health, safety, and rights of the patient.
4. The nurse is responsible and accountable for individual nursing practice and determines the appropriate delegation of tasks consistent with the nurse's obligation to provide optimum patient care.
5. The nurse owes the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence, and to continue personal and professional growth.
6. The nurse participates in establishing, maintaining, and improving healthcare environments and conditions of employment conducive to the provision of quality health care and consistent with the values of the profession through individual and collective action.
7. The nurse participates in the advancement of the profession through contributions to practice, education, administration, and knowledge development.
8. The nurse collaborates with other health professionals and the public in promoting community, national, and international efforts to meet health needs.
9. The profession of nursing, as represented by associations and their members, is responsible for articulating nursing values, for maintaining the integrity of the profession and its practice, and for shaping social policy.

Essential Abilities

The School of Nursing faculty have specified essential abilities (technical standards) critical to the success of students enrolled in any IU nursing program. Qualified applicants are expected to meet all admission criteria, and matriculating students are expected to meet all progression criteria, as well as these essential abilities (technical standards) with or without reasonable accommodations.

1. Essential judgment skills to include: ability to identify, assess, and comprehend conditions surrounding patient situations for the purpose of problem solving around patient conditions and coming to appropriate conclusions and/or course of actions.
2. Essential physical/neurological functions to include: ability to use the senses of seeing, hearing, touch, and smell to make correct judgments regarding patient conditions and meet physical expectations to perform required interventions for the purpose of demonstrating competence to safely engage in the practice of nursing. Behaviors that demonstrate essential neurological and physical functions include, but are not limited to observation, listening, understanding relationships, writing, and psychomotor abilities consistent with course and program expectations.
3. Essential communication skills to include: ability to communicate effectively with fellow students, faculty, patients, and families and all members of the health care team. Skills include verbal, written, and nonverbal abilities consistent with effective communication.
4. Essential emotional coping skills: ability to demonstrate the mental health necessary to safely engage in the practice of nursing as determined by professional standards of practice.
5. Essential intellectual/conceptual skills to include: ability to measure, calculate, analyze, synthesize, and evaluate in order to engage competently in the safe practice of nursing.
6. Other essential behavioral attributes: ability to engage in activities consistent with safe nursing practice without demonstrated behaviors of addiction to, abuse of, or dependence on alcohol or other drugs that may impair behavior or judgment. The student, in accordance with the Professionalism Expectation Document, must demonstrate responsibility and accountability for actions as a student in the School of Nursing and as a developing professional nurse.

(Policy III-E-13)

Undergraduate Policies

- Special Expenses
- Grade Replacement, Forgiveness, Repeating Courses, Auditing
- Good Standing
- Academic Probation
- Advanced Placement
- Orientation
- Seven-Year Limit
- Practicum/Clinical Absences Policy
- Academic Appeals
- Eligibility for Licensure
- Transfer

Special Expenses

- Practice kit fee—This kit includes supplies that the student will be using in the learning lab and clinical settings.
- Practicum fees—Certain courses at the School of Nursing are assessed practicum (clinical) fees in addition to credit hour charges.
- Uniform—All undergraduate nursing students must purchase the designated uniform and wear it, along with appropriate identification, while in clinical settings. Registered nurse students may wear a professional uniform appropriate to the clinical setting. Students not appropriately attired will be asked by their instructor to leave the clinical area.
- Lockers—Lockers are available for rental per semester for those attending the IUPUI campus in the School of Nursing building.
- Assessment—All undergraduate students receive learning assessment materials and exams to facilitate success in the program as well as on the nursing licensure examination. This fee is assessed each semester while in the nursing major.
- The student is expected to bear any programmatic expense, such as annual criminal background check fees, Kaplan Integrated Testing fees, computing expenses, and immunization costs.

Last updated February 18, 2010

Grade Replacement, Forgiveness, Repeating Courses, Auditing

Required General-Education Courses

All students attending IUPUI, IUB, and IUPUC must earn a minimum grade of C in all required general-education courses. These courses may be repeated no more than one time. All incoming freshmen, ongoing students, and transfer students may repeat no more than three (3) required general-education courses and are allowed only two (2) failures in required science courses.

Auditing of Courses

Students may register for general-education classes that will not apply to their degree on a credit or audit basis. Students auditing a course must officially register for the class and pay any applicable fees. Upon completion, the course is entered on the permanent university transcript as taken for no credit (NC). Required general-education courses taken for NC will not apply toward completion of nursing degree requirements. Students should check with an academic counselor as to procedures and fees for auditing classes.

Students may not audit nursing practicum courses. Permission to audit a didactic nursing course depends on availability of space, faculty consent, and demonstration of adequate program progression on the part of the student.

Portfolio Review

Students may also pursue the portfolio option if they believe they have knowledge and skills consistent with specific required course objectives and outcomes. For more information on the portfolio process, please consult the current undergraduate or graduate student handbook on the School of Nursing Web site. As part of the portfolio process, students will be expected to register for portfolio review credit. The academic counselor can facilitate this registration process.

Withdrawal

1. Students must complete all course work (general education and nursing) with a C or higher prior to progressing to the next semester's course work.
2. Approval for withdrawing from nursing courses is granted at the discretion of the faculty. Approval may be granted (based on circumstances) if the student has a didactic grade of at least C or a practicum grade of S (Satisfactory) in nursing major courses.
3. Withdrawal from a required general-education course in the semester \ indicated in the curriculum requires withdrawal from all co-requisite courses. Withdrawal from a required nursing didactic course requires withdrawal from the co-requisite nursing practicum / clinical course.
4. Students who withdraw from the nursing major in the first semester must seek readmission to the program, subject to competitive review.
5. Failure to register in each sequential semester, excluding summer session, constitutes disruption in progression, and students must seek reinstatement.
6. A pattern of withdrawals may influence requests for consideration of reinstatement. More than three academic withdrawals in a semester is considered lack of progress towards the degree.
7. Withdrawal must be consistent with policies in the Registrar's Office.

Last updated February 15, 2012

Good Standing

All undergraduate students who maintain a minimum cumulative grade point average (GPA) of 2.0 and earn a grade of C or higher in all required general-education and nursing didactic courses and a grade of S in all required practicum/clinical courses applied to the BSN degree will be considered in good standing.

Last updated February 18, 2010

Academic Probation

Students who maintain a minimum cumulative grade point average (GPA) of 2.0 and earn a grade of “C” (2.0) or better in all required general education and didactic courses and a grade of “S” in all required practicum/ clinical courses will be considered in good standing.

Academic Probation:

A student will be placed on probation when any of the following conditions exist:

1. The cumulative GPA falls below “C” (2.0)
2. The semester GPA falls below “C” (2.0)
3. A grade below “C” (2.0) has been received in a required didactic course, or a grade of “F” has been earned in a required practicum/clinical course.

Academic probation will be removed when all of the following conditions exist:

1. The cumulative GPA is “C” (2.0) or higher.

2. The semester GPA is “C” (2.0) or higher.
3. A minimum grade of “C” (2.0) has been received in the required didactic courses completed, and a grade of “S” has been earned in the required practicum/clinical courses completed.
4. All other specific conditions, if required, have been met.

Last updated February 15, 2012

Advanced Placement in the BSN Program

Students transferring from another BSN program may pursue advanced placement if they are in good academic standing in the program from which they are transferring. The program from which the student is seeking to transfer must be accredited. Advanced placement is determined by equivalency of course work, comparability of curricula, and space availability. Students may attain advanced standing through transfer of credit from regionally accredited colleges and universities (for grades of C or higher), credit by examination, or a portfolio review process. Credit for such courses and applicability to the degree will be determined by the university and the School of Nursing.

Last updated February 18, 2010

Orientation

All students enrolled for the first time in nursing program courses in the School of Nursing are required to attend the nursing orientation program at the beginning of the semester for which they are admitted. Freshmen and transfer students are expected to attend the campus orientation program.

Last updated February 18, 2010

Seven-Year Limit

Knowledge and competencies developed in courses that fulfill the requirements for anatomy, human physiology, finite math**,** chemistry, microbiology, statistics, and life span development, are considered to be time-limited for all individuals pursuing an undergraduate degree in nursing. If any courses were taken more than seven years prior to the semester before admission to the nursing undergraduate degree, the applicant must validate the related knowledge and competencies through testing, portfolio, or repeating the course to be eligible for admission and progression. The Registered Nurse (RN) student pursuing a bachelor degree is exempt from this policy assuming they have been actively working in healthcare.

Last updated February 15, 2012

Practicum/Clinical Absence Policy

It is required that students participate in all required (regularly scheduled or substituted) practicum/clinical experiences (including orientation). Failure to complete all regularly scheduled or substituted experiences places students at risk for not meeting course objectives. Students absent from more than 20 percent of scheduled practicum/clinical experience (10 percent in some courses) will receive a failing grade, or be allowed to withdraw according to IU School of Nursing Core Campus Policy, or take an Incomplete according to university policy dictated by the timing of and the circumstances surrounding the absences.

Last updated February 17, 2012

Course Grade Appeals

The Course Grade Appeal process provides recourse to a student who believes that an inappropriate grade has been assigned as a result of mechanical error, prejudice, caprice, or other improper conditions. The grade appeals process is designed to protect students from grade assignments that are inconsistent with policy followed in assigning grades to others in the course.

Last updated February 17, 2012

Eligibility for Licensure

Those who apply for licensure examination as a registered nurse in the state of Indiana are required to submit to the Indiana State Board of Nursing (ISBN) written evidence, confirmed by oath, that they (1) have not been convicted of any act that would constitute grounds for disciplinary sanction under the Indiana State Board rules and regulations or of any felony that has direct bearing on their ability to practice competently (note that relevant convictions include the possession and use of drugs or controlled substances); (2) have completed a high school course of study or its equivalent as approved by the appropriate educational agency; and (3) have completed all graduation requirements at a state-accredited school of nursing.

Each student is responsible for meeting licensure application deadlines. Students wishing to be licensed in another state must contact that state’s board of nursing directly. Students are responsible for processing all required licensure-related forms and applications and for meeting all state requirements for licensure. A graduate is eligible to schedule a date to take the computerized licensure examination once the State Board of Nursing has cleared the graduate to do so.

International students and graduates of foreign nursing programs should contact the Indiana State Board of Nursing for licensure requirements specific to them if they wish licensure in this state.

Last updated February 18, 2010

Transfer

Intra-Core Campus Transfer

Those students wishing to transfer intra-core campus (between IUB, IUPUC, and IUPUI campuses) need to check with the advisor on their home campus for the steps required to start the transfer process. Transfer will be granted only at the completion of the sophomore or junior year, and space is available and approved by the Dean, Director, or Head of both campuses.

Nursing students in good academic standing may seek intra-core campus transfer by petitioning the Admission, Progression, and Graduation (APG) Committee at least one semester in advance of the requested transfer. Due to the difference in course sequencing, students seeking transfer should do so only at the completion of all nursing courses required in the sophomore or junior year. Requests submitted to APG seeking mid-year program transfer are discouraged,

and these students may be required to complete supplemental course work due to course sequencing differences.

Intra-core campus transfer requests will be evaluated individually on the basis of the student's academic record, the availability of space in the required courses, faculty and facility resources to meet the student's needs, and program outcomes and competencies.

Transfer from other Universities or Colleges

Students must be in good academic standing to be considered for transfer as a prenursing or nursing student. Students wishing transfer must petition the APG Committee for acceptance. Approval is based on curriculum compatibility, space, resources, progression, and graduation requirements. Students must see an academic counselor at their current university or college prior to making transferal requests.

Last updated February 17, 2012

Academic Progression

Problems related to students' academic progression that emerge during enrollment in their undergraduate nursing program are handled through a committee hearing process. Students wishing to appeal a progression issue should consult the department's undergraduate coordinator for information regarding this process. Students requesting an exception to policy must petition for a waiver from the Admission, Progression, and Graduation (APG) Committee. Students may also consult with their academic advisor.

Essential Support Services

- Lifelong Learning/Continuing Education Program
- Center for Research & Scholarship
- Development Office
- School of Nursing Alumni Association

Last updated February 10, 2010

Lifelong Learning/Continuing Education Program

The Office of Lifelong Learning offers programs, conferences, and Web-based courses for nurses and other health care professionals at the state, regional, national, and international levels. Programs are directed to the clinical practice of nursing and to educators in all settings—academic, acute care, long-term care, and other health care settings. Programs respond to the needs of the learner in regard to scheduling, level of content, and duration of instructional period.

Educational offerings are taught by experts in nursing and allied health fields who are clinicians, educators, researchers, and consultants in specialized areas of health care in the state of Indiana, at the Indiana University School of Nursing, or at other universities. The continuing education program is accredited by the American Nurses Credentialing Center's Commission on Accreditation as a provider of continuing nursing education.

Visit our Web site at http://nursing.iupui.edu/continuing/index.shtml for complete information and registration for upcoming courses. E-mail may also be sent to censg@iupui.edu, or call (317) 274-7779.

Center for Research & Scholarship

The mission of the Center for Research and Scholarship is to support the development, dissemination, and utilization of knowledge by (1) providing for pre-award support services including grant planning and development, budget preparation, statistical consultation and data analysis, and grant routing and submission; (2) post award support services including facilitation of project start-up, budget management assistance, and facilitating the training of research assistants and project managers; (3) facilitating joint projects between practitioners and School of Nursing Educators; (4) providing ongoing information about research resources; (5) coordinating faculty research development including monthly educational programs, Faculty Research Groups (FRGs) and mock grant reviews, (6) disseminating faculty and student research accomplishments, (7) collaborating with other School of Nursing centers and programs such as the Center for Research in Nursing Education, Mary Margaret Walther Program and the Center for Enhancing the Quality of Life. Staff members also facilitate the management of the internal research funding process, especially in the review of requests and awards for intramural funding (Research Incentive Funds). For further information, contact the Indiana University School of Nursing, Center for Research and Scholarship, 1111 Middle Drive, NU 338, Indianapolis, IN 46202; telephone (317) 274-7627, or visit the Center for Research and Scholarship home page at http://nursing.iupui.edu/research/

Development Office

The Development Office, headed by the director of development, collaborates with the Indiana University Foundation to design and implement fundraising efforts under the direction of the dean of the School of Nursing. Objectives of the office include the following:

- Work with faculty, alumni, staff, and volunteers to identify, cultivate, and secure gifts from individuals, foundations, and corporations, thereby enhancing the community of learning.
- Supervise planning and implementation of fundraising activities, special events, and donor recognition programs.
- Develop and maintain opportunities for giving and involvement.

For more information, please contact the Development Office, School of Nursing, NU 101, IUPUI; phone (317) 274-1545 or (317) 274-4293; fax: (317) 278-7908.

School of Nursing Alumni Association

The IU School of Nursing Alumni Association is a constituent member of the Indiana University Alumni Association, a dues-supported membership organization.

The mission of the IU School of Nursing Alumni Association is to strengthen the school's connection

with its over 17,800 alumni by creating engagement opportunities via facilitation of professional, educational and social opportunities for not only alumni, but also students and friends of the school. The IU School of Nursing Alumni Association is governed by a Board of Directors, currently composed of 20 alumni members representing all degree levels offered by the school. In addition to professional, educational, and social opportunities, the Alumni Association presents awards annually to students and graduates for outstanding accomplishments in the school, the profession, and the community. It also publishes, in conjunction with the School of Nursing, the *Pulse of Indiana Nursing,* a quarterly magazine featuring current school and alumni news and related alumni activities. The IU Alumni Association office on the IUPUI campus is located on the 2nd floor of the University Place Conference Center, (317) 274-2289, and in Bloomington at 1000 East 17^{t} Street, (812) 855-4822.

Nursing Current Faculty

- Applegate, Beth, MSN, RN, *Visiting Lecturer*
- Arthur, Amy, PhD, FNP, APRN-BC (Indiana University, 2005), *Clinical Assistant Professor*
- *Bakas, Tamilyn, PhD, RN, FAHA, FAAN (Indiana University, 1996), *Professor, PhD Program Coordinator*
- *Belcher, Anne, PhD, MSN, BSN (Indiana University, 1998), *Associate Professor, Chair, Department of Environments for Health*
- Bell, Linda, PhD (Duke University, 1973), *Professor*
- Bowers, Cindy, MSN, RN (University of Indianapolis, 2007), *Adjunct Clinical Lecturer*
- Braun, Elizabeth, MSN, RN (Indiana University, 2009), *Adjunct Clinical Lecturer*
- *Broome, Marion, PhD, RN, FAAN (University of Georgia, 1984), *Dean and Distinguished Professor*
- *Buelow, Janice, PhD, RN, FAAN (University of Illinois at Chicago, 1999), *Associate Professor, Chair, Department of Adult Health*
- *Burrage, Joe, Jr., PhD, RN, FAAN (Georgia State University, 2000), *Associate Professor*
- *Carpenter, Janet, PhD, RN, FAAN (University of Kentucky, 1996), *Professor, Sally Reahard Endowed Chair, Center for Enchancing Quality of Life in Chronic Illness*
- *Champion, Victoria, PhD, RN, FAAN (Indiana University, 1981), *Distinguished Professor, Executive Associate Dean for Research*
- Clark, Carol, MSN, RN, *Visiting Lecturer*
- Crisp, Cheryl, PhD, RN, PCNS-BC, CRRN (Indiana University, 2009), *Assistant Professor, IUPUC*
- *Cullen, Deborah, EdD, MA, BS (University of Southern California, 1989), *Professor, Interim Chair, Department of Family Health*
- Davis, Kimberley, MSN, RN (Ball State University, 2008), *Adjunct Clinical Lecturer*
- *Draucker, Claire, PhD, RN, APRN, FAAN (Kent State University, 1988), *McBride Professor*
- *Dreifuerst, Kristina. PhD, RN (Indiana University, 2010), *Assistant Professor*
- Decker, Kim Alexander, MSN, RN, CNS (Indiana University, 1982) Clinical Assistant Professor, *IUBL*
- DeMeester, Deborah, MSN, RN, CNE (Indiana University, 1990), *Clinical Assistant Professor, Undergraduate Curriculum Coordinator, Adult Health*
- Dexter, Phyllis, PhD, RN (University of Minnesota, 1962), *Assistant Scientist, Center for Research & Scholarship*
- Dobbs, Cynthia, MSN, BSN (Indiana University, 1977), *Clinical Assistant Professor*
- *Duffy, Joanne, PhD, MSN, BSN, RN, FAAN (Catholic University of America, 1990), *Professor*
- *Ebright, Patricia, PhD, RN, FAAN (Indiana University, 1998), *Associate Professor, Associate Dean for Graduate Programs*
- *Ellett, Marsha, PhD, MSN, BSN, RN, NE-BC (Indiana University, 1996), *Professor*
- Ellis, Rebecca Bartlett, RN, MSN (Indiana University, 2005), *Clinical Assistant Professor, IUPUC*
- Eoff, Mary Jo, MS (Indiana University, 1974), *Senior Lecturer*
- Erler, Cheryl, DNP, MSN, RN (Purdue University, 2010), *Clinical Assistant Professor*
- *Feather, Rebecca, PhD, RN, NE-BC (Indiana University, 2011), *Assistant Professor, IUBL*
- Ferren, Melora, MSN, RN (Indiana Wesleyan University, 2009), *Adjunct Clinical Lecturer*
- *Fife, Betsy, PhD, RN (Indiana University, 1990), *Senior Scientist, Affiliate Faculty*
- *Fisher, Mary L., PhD, MSN (Kent State University, 1984), *Professor, Associate Vice Chancellor for Academic Affairs, IUPUI*
- Flora, Colleen, MSN, RN (Indiana University, 2008), *Adjunct Clinical Lecturer*
- *Friesth, Barbara, PhD, RN, (Indiana University, 1995), *Clinical Associate Professor, Director of Learning Resources Center*
- *Fulton, Janet, PhD, RN, ACNS-BC, FAAN (Ohio State University, 1990), *Associate Professor*
- Gates, Sharon, MSN, BSN (Indiana University, 1986), *Clinical Assistant Professor, IUBL*
- *Gerkensmeyer, Janis, PhD, MSN (Indiana University, 1999), *Associate Scientist*
- *Haase, Joan, PhD, MSN, FAAN (Texas Woman's University, 1985), *Emily Holmquist Professor in Pediatric Oncology Nursing*
- *Habermann, Barbara, PhD, RN (University of California, San Francisco, 1993), *Associate Professor*
- Hall, Norma, MSN, RN, BC (Indiana Wesleyan University, 2002), *Adjunct Clinical Lecturer*
- *Halstead, Judith A., PhD, ANEF, RN, FAAN (Indiana University, 1991), *Professor, Executive Associate Dean for Academic Affairs*
- *Hanna, Kathleen, PhD, MSN (University of Pittsburgh, 1990), *Associate Professor*
- Harmon, Debra, RN, CCRN, MSN *Visiting Lecturer, IUBL*
- *Hendricks, Susan, EdD, MSN, RN (Ball State University, 2000), *Associate Professor, Associate Dean for Graduate Programs*
- *Hensel, Desiree, PhD, RNC-NIC, CNE, RYT (Ball State University, 2004), *Assistant Professor, IUBL*
- Hernandez, Corrinne, MSN, RN, *Visiting Lecturer*

- *Hickman, Susan, PhD, MA, BS (University of Kansas, 2009), *Associate Professor*
- *Horton-Deutsch, Sara, PhD, CNS, RN (Rush Medical College, 1993), *Associate Professor*
- Hughes-Gay, Marsha, MSN, MPH, RN, CCRC (Indiana University, 2009), *Clinical Assistant Professor*
- *Ironside, Pamela, PhD, ANEF, FAAN (University of Wisconsin, Madison, 1997), *Associate Professor*
- *Krothe, Joyce, PhD, RN (Indiana University, 1991), *Professor, Assistant Dean, IUBL*
- *Lasiter, Rita Sue, PhD, RN, (Uniiversity of Missouri, 2008), *Assistant Professor*
- Laux, Marcia, MSN, RN, NE-BC (University of Colorado, 1987), *Clinical Assistant Professor, IUBL*
- *Lee, Mikyoung, PhD, MSN, BSN, RN (University of Iowa, 2009), *Assistant Professor*
- Linde, Beverly, PhD, RN, CNE (University of Michigan, 1989), *Clinical Associate Professor*
- *Lu, Yvonne, PhD, RN (Case Western Reserve University, 1997), *Assistant Professor*
- *Magee, Tracy, PhD, MSN, BSN, RN (Boston University, 2009), *Assistant Professor*
- *McDaniel, Anna, PhD, MA, BS, RN, FAAN (Indiana University, 1991), *Chancellor's Professor, Associate Dean, Center for Research & Scholarship*
- *McLennon, Susan, PhD, RN (University of Alabama, 2008), *Assistant Professor*
- *McNelis, Angela, PhD, MSN, BSN, ANEF (Indiana University, 2000), *Associate Professor*
- McNett, Susan, PhD, RN, CRRN (Indiana University, 1985), *Clinical Assistant Professor*
- Meek, Julie, PhD, BSN, RN, (Indiana University, 1993), *Clinical Associate Professor*
- Milgrom, Lesley, MSN, RN, (Indiana University–Purdue University Indianapolis, 1996), *Clinical Assistant Professor*
- Miller, Wendy, PhD, MSN, RN, CCRN (Indiana University, 2011), *Assistant Professor, IUBL*
- Moorman, Margaret, MSN, RN, WHNP (Drexel University, 2007), *Clinical Assistant Professor*
- Mueller, Mary, PhD, MSN (Case Western Reserve, 1988), *Clinical Assistant Professor*
- Murray, Bethany, RN, PMHCNS-BC (Indiana University, 1992), *Clinical Assistant Professor, IUPUC*
- Needler Hosmer, Kristen, MSN, RN (Indiana University, 2010), *Clinical Assistant Professor, IUPUC*
- *Oruche, Ukamaka, PhD, RN, PMHCNS-BC (Indiana University, 2011), *Assistant Professor*
- *Otte, Julie Elam, PhD, MSN, BSN, RN, OCN (Indiana University, 2008), *Assistant Professor*
- Perkins, Danielle, EK, MSN, RN, *Visiting Lecturer*
- *Pesut, Daniel, PhD, RN, PMHCNS-BC, FAAN (University of Michigan, 1984), *Professor*
- Phillips, Janet, PhD, RN (Indiana University, 2009), *Clinical Assistant Professor, RN-BSN Consortium Director*
- Poore, Julie, MSN, RN (University of Phoenix, 2006), *Clinical Assistant Professor*
- Powell, Jarethea, MSN, RN, CNE (Vanderbilt University, 1980), *Senior Lecturer*
- Rasmussen, Lori, PhD, MS, RN (Indiana University, 2002), *Clinical Assistant Professor*
- *Rawl, Susan, PhD, RN, FAAN (University of Illinois at Chicago, 1989), *Associate Professor*
- *Reising, Deanna, PhD, RN, ACNS-BC, ANEF (Indiana University, 1999), *Associate Professor, MSN Nursing Education Track Coordinator, IUBL*
- *Riner, Mary Beth, PhD, RN (Indiana University, 1998), *Associate Professor, DNP Program Coordinator*
- Robb, Sheri, PhD, MT-BC (University of Kansas, 1999), *Associate Scientist*
- Rowles, Connie, DSN, RN (University of Alabama-Birmingham, 1992), *Visiting Clinical Associate Professor*
- *Russell, Kathleen, PhD, MSN (Indiana University, 1993), *Adjunct Associate Scientist*
- Russo, Barbara, MSN, RN (Indiana University, 1984), *Clinical Assistant Professor*
- Sanders, Shirley, MSN, APRN-BC (Indiana University, 1998), *Clinical Assistant Professor, IUPUC*
- Schwindt, Rhonda, MSN, RN, (Indiana University, 1993), *Clinical Assistant Professor*
- Sharer, Beth, DHA, NEA-BC, RN, HFA, FACHE (Central Michigan University, 2006), *Clinical Assistant Professor, Division Head, IUPUC*
- Shea, Roberta, MSN, RN, CCNS (Indiana University, 1999), *Clinical Assistant Professor, IUBL*
- *Shieh, Carol, DNSc, MSN (Kashsiung Medical College—Yale, 1998), *Associate Professor*
- *Sims, Sharon, PhD, ANEF, FAANP (University of Utah, 1986), *Professor*
- Sinclair, Linda, MSN, RN, ONC*, Visiting Lecturer*
- Sipes-Fears, Debra, MSN, RN, *Visiting Lecturer*
- Stephenson, Evelyn, MSN, BSN (Indiana University, 1983), *Clinical Assistant Professor*
- *Stiffler, Deborah, PhD, MSN, AAS (Indiana University, 2002), *Associate Professor*
- Styron, Ann, MSN, APRN-BC (Indiana University, 2005), *Clinical Assistant Professor, IUPUC*
- *Sutton, Margaret, PhD, RN (Indiana University, 1990), *Clinical Assistant Professor*
- Sweitzer, Vema, MSN, RN (Emory University, 1978), *Adjunct Clinical Lecturer*
- *Swenson, Melinda, PhD, MSN, BSN, ANEF, FAANP (Indiana University, 1991), *Professor*
- Taylor, Carol, MSN, RN (Indiana University, 1975), *Clinical Assistant Professor*
- Tielker, Samantha, MSN, RN, *Visiting Lecturer*
- *Von Ah, Diane, PhD, RN (University of Alabama-Birmingham, 2003), *Assistant Professor*
- Walker, Mila, MSN, RN, BC (Indiana University, 2005), *Clinical Assistant Professor*
- Waltz, Rachel, DNP, MSN, RN, WHNP-BC (Purdue University, 2010), *Clinical Assistant Professor*
- Washington, Michelle, MSN, RN (University of Indianapolis, 2008), *Adjunct Clinical Lecturer*
- Watts, Pat, MNSc, BSN, RN, (University of Arkansas, 1975), *Clinical Assistant Professor, IUBL*

- *Weaver, Michael, PhD, MSN, BSN, RN, FAAN (University of Toledo, 1990), *Director, Statistical Services, Center for Nursing Research & Scholarship, Professor*
- *Welch, Janet, PhD, RN, FAAN (Indiana University, 1996), *Professor*
- Welch, Joyce, MSN, BSN (Indiana University, 1991), *Clinical Assistant Professor, Undergraduate Curriculum Coordinator, Family Health*
- Wocial, Lucia, PhD, MSN, RN (Oregon Health Sciences University, 1997), *Adjunct Asistant Professor*
- *Wonder, Amy, PhD, RN (Indiana University, 2011), *Assistant Professor, IUBL*
- Woolf, Shirley, MSN, RN, MA, CCRN, CNE (Indiana University, 1987), *Clinical Assistant Professor*
- Wyatt, Erin Elizabeth, MSN, BSN, *Visiting Lecturer, IUBL*
- Young, Judith, DNP, MSN, RN (Purdue University, 2011), Clinical *Assistant Professor*
- Zeiher, Wendy, MSN, RN, CNOR, *Visiting Lecturer*
- Ziner, Kim Wagler, PhD (Indiana University, 2008), *Assistant Scientist*

* Graduate Faculty

Nursing Emeriti Faculty

- Applegate, Margaret, *Professor Emerita*
- Austin, Joan, *Distinguished Professor Emerita*
- Backer, Jane, *Associate Professor Emerita*
- Baird, Carol, *Associate Professor Emerita*
- Baker, Constance, *Professor Emerita*
- Beausang, Carol, *Associate Professor Emerita*
- Beckstrand, Janis, *Associate Professor Emerita*
- Billings, Diane, *Chancellor's Professor Emerita*
- Blake, Patricia, *Associate Professor Emerita*
- Boland, Donna, *Associate Professor Emerita*
- Bostrom, Carol, *Clinical Assistant Professor Emerita*
- Carlley, Charlotte, *Associate Professor Emerita*
- Carter, Burdellis, *Professor Emerita*
- Casey, Marguerite, *Assistant Professor Emerita*
- Cecere, Margaret, *Associate Professor Emerita*
- Dayhoff, Nancy, *Associate Professor Emerita*
- Donnelly, Eleanor, *Associate Professor Emerita*
- Farley, Sharon, *Professor Emerita*
- Froebe, Doris, *Professor Emerita*
- Fuller, Lee, *Professor Emeritus*
- Fuller, Magdalene, *Professor Emerita*
- Gilman, Linda, *Associate Professor Emerita*
- Hammann, Sharon, *Associate Professor Emerita*
- Hoang, Ngoan, *Assistant Professor Emerita*
- Huff, Marchusa, *Associate Professor Emerita*
- Hutten, Jean, *Associate Professor Emerita*
- Joyce, Betsy, *Associate Professor Emerita*
- Keck, Juanita, *Professor Emerita*
- Kurt, Marjorie, *Clinical Assistant Professor Emerita*
- Laidig, Juanita, *Associate Professor Emerita*
- Lowenkron, Ann, *Associate Professor Emerita*
- Lyon, Brenda, *Professor Emerita*
- Markley, Valerie, *Assistant Professor Emerita*
- Martin, Joanne, *Assistant Professor Emerita*
- Martin, Joyce, *Associate Professor Emerita*
- Mays, Rose, *Professor Emerita*
- McBride, Angela Barron, *Distinguished Professor and Univeristy Dean Emerita*
- Miller, Carol, *Professor Emerita*
- Moore, Susan, *Clinical Assistant Professor Emerita*
- Morrissey, Sue, *Associate Professor Emerita*
- Nice, Ann, *Clinical Assistant Professor Emerita*
- Norton, Barbara, *Clinical Assistant Professor Emerita*
- Opie, Nancy, *Professor Emerita*
- Pontious, Jeanne, *Associate Professor Emerita*
- Poore, Ella, *Associate Professor Emerita*
- Ray, Dixie, *Associate Professor Emerita*
- Richards, Beverly, *Associate Professor Emerita*
- Richardson, Virginia, *Associate Professor Emerita*
- Ross, Beverly, *Associate Professor Emerita*
- Schwecke, Lee, *Associate Professor Emerita*
- Selmanoff, Eugene, *Associate Professor Emeritus*
- Shepherd, Mary Jane, *Assistant Professor Emerita*
- Sloan, Rebecca, *Associate Professor Emerita*
- Smith, Lorraine, *Assistant Professor Emerita*
- Soja, Mary, *Assistant Professor Emerita*
- Stern, Phyllis, *Professor Emerita*
- Stokes, Lillian, *Associate Professor Emerita*
- Van Allen, Mary, *Assistant Professor Emerita*
- Vinten, Sharon, *Clinical Associate Professor Emerita*
- White, Kathleen, *Associate Professor Emerita*
- Wood, Sandra, *Clinical Assistant Professor Emerita*
- Zwirn, Enid, *Associate Professor Emerita*

Courses

All courses are preceded by the abbreviation “NURS.” The number of credit hours is indicated in parentheses following the course title. The abbreviation “P” refers to the course’s prerequisite(s); “C” refers to corequisite(s).

Bachelor of Science in Nursing (BSN) Courses

NURS-B 230 Developmental Issues and Health (4 cr.) P: Introduction to Psychology; Recommended: Cultural Diversity cluster course. (Required on IUPUI campus.) (Traditional) This course focuses on the theoretical perspectives of growth and development, family theories and family adaptation at different stages, and usual patterns of aging. Students will make assessments of individuals in various stages of life to identify developmental issues of interest to nursing and the impact of these issues on health phenomena.

NURS-B 231 Communication Skills for Health-Care Professionals (3 cr.) (Traditional) Students in this course will focus on basic communication skills essential for working with health-care professionals and clients of various ages. Content includes interpersonal communications and group dynamics. Students will practice communication skills with individuals, within groups, and through electronic media.

NURS-B 232 Introduction to the Discipline of Nursing: Theory, Practice, Research (3 cr.) (Traditional and Accelerated) This course focuses on core theoretical concepts of nursing practice: health, wellness, illness, holism, caring, environment, self-care, uniqueness of

persons, interpersonal relationships, and decision making. Through integrating theory, research, and practice, this course helps the student understand nursing's unique contributions to meeting societal needs.

NURS-B 233 Health and Wellness (4 cr.) (Traditional and Accelerated) P/C: Physiology, Microbiology, or Anatomy. This course focuses on the use of concepts from nursing, nutrition, pharmacology, and biopsychosocial sciences to critically examine the determinants of health, wellness, and illness across the life span. Environmental, sociocultural, and economic factors that influence health-care practices are emphasized. Theories of health, wellness, and illness are related to health-promotion, disease-prevention, and illness-prevention nursing interventions.

NURS-B 244 Comprehensive Health Assessment (2 cr.) P: All third- semester nursing courses; P/C: Anatomy, Physiology, or Microbiology; C: B245. (Traditional, Accelerated) This course focuses on helping students acquire skills to conduct a comprehensive health assessment, including the physical, psychological, social, functional, and environmental aspects of health. The process of data collection, interpretation, documentation, and dissemination of assessment data will be addressed.

NURS-B 245 Comprehensive Health Assessment: Practicum (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All third-semester courses; C: B244. Students will have the opportunity to use techniques of interview, observation, percussion, palpation, inspection, and auscultation in assessing clients across the life span in simulated and actual environments.

NURS-B 248 Science and Technology of Nursing (2 cr.) P: All third-semester nursing courses; P/C: Physiology, Anatomy, Microbiology. C: B249 (Traditional and Accelerated) This course focuses on the fundamentals of nursing from a theoretical research base. It provides an opportunity for basic-care nursing skills development. Students will be challenged to use critical thinking and problem solving in developing the ability to apply an integrated nursing therapeutics approach for clients experiencing health alterations across the life span.

NURS-B 249 Science and Technology of Nursing: Practicum (2 cr.) P: All third-semester nursing courses. C: B248. (Traditional and Accelerated) Students will have the opportunity to demonstrate fundamental nursing skills in the application of nursing care for clients across the life span.

NURS-H 351 Alterations in Neuro-Psychological Health (3 cr.) P: All three fourth-semester nursing courses, Anatomy, Physiology, Microbiology; C: H352. (Traditional and Accelerated) This course focuses on individuals and small groups experiencing acute and chronic neuropsychological disorders. Content includes the effect of brain and body disturbances on health functioning. Other content areas are growth and development, stress, mental status, nurse-client relationships, psychopharmacology, and nursing approaches for clients experiencing DSM-IV neuropsychological disorders.

NURS-H 352 Alterations in Neuro-Psychological Health: Practicum (2 cr.) P: All fourth-semester nursing courses. C: H351. (Traditional and Accelerated)Students will provide nursing care to individuals and small groups who are experiencing acute and chronic neuropsychological disturbances related to psychiatric disorders. Student experiences will be with individuals and small groups in supervised settings such as acute, community-based, transitional,and/or home care.

NURS-H 353 Alterations in Health I (3 cr.) (Traditional and Accelerated) P: All fourth-semester nursing courses, Anatomy, Physiology, Microbiology; C: H354. This course focuses on the pathophysiology and holistic nursing care management of clients experiencing acute and chronic problems. Students will use critical thinking and problem-solving skills to plan interventions appropriate to health-care needs.

NURS-H 354 Alterations in Health I: Practicum (2 cr.) P: All fourth-semester nursing courses. C: H353. (Traditional and Accelerated) Students will apply the science and technology of nursing to perform all independent, dependent, and interdependent care functions. Students will engage clients in a variety of settings to address alterations in health functioning, identify health care needs, and determine the effectiveness of interventions given expected outcomes.

NURS-H 355 Data Analysis in Clinical Practice and Health-Care Research (3 cr.) P: All fourth-semester nursing courses. (Traditional) This course introduces nursing and other health sciences students to the basic concepts and techniques of data analysis needed in professional health-care practice. Principles of measurement, data summarization, and univariate and bivariate statistics are examined. Differences in types of qualitative data and methods by which these types of data can be interpreted are also explored. Emphasis is placed on the application of fundamental concepts to real-world situations in client care.

NURS-H 361 Alterations in Health II (3 cr.) (Traditional and Accelerated) P: All fifth-semester nursing courses. This course builds on Alterations in Health I, and continues to focus on pathophysiology and holistic nursing care management of the associated needs of clients experiencing acute and chronic health problems.

NURS-H 362 Alterations in Health II: Practicum (2 cr.) (Traditional and Accelerated) P: All fifth-semester nursing courses; C: H361. Students will continue to apply the science and technology of nursing to perform all independent, dependent, and interdependent care functions. Students will engage clients in a variety of settings to address alterations in health functioning.

NURS-H 363 The Developing Family and Child (4 cr.) P: All fifth-semester nursing courses. (Traditional and Accelerated) This course focuses on the needs of individuals and their families who are facing the phenomena of growth and development during the childbearing and child-rearing phases of family development. Factors dealing with preserving, promoting, and restoring the healthy status of family members will be emphasized.

NURS-H 364 The Developing Family and Child: Practicum (3 cr.) P: All fifth-semester nursing courses. C: H363. (Traditional and Accelerated) Students will have

the opportunity to work with childbearing and child-rearing families, including those experiencing alterations in health.

NURS-H 365 Nursing Research (3 cr.) P: All fifth-semester nursing courses and H355 or its equivalent. (Traditional, Accelerated) This course focuses on development of students' skills in using the research process to define clinical research problems and to determine the usefulness of research in clinical decisions related to practice. The critique of nursing and nursing-related research studies will be emphasized in identifying applicability to nursing practice.

NURS-S 470 Restorative Health Related to Multi-System Failures (3 cr.) P: All sixth-semester nursing courses. C: S471 (Traditional and Accelerated) This course focuses on the pathophysiology and nursing care management of clients experiencing multi-system alterations in health status. Correlations among complex system alterations and nursing interventions to maximize health potential are emphasized.

NURS-S 471 Restorative Health Related to Multi-System Failures: Practicum (2 cr.) (Traditional and Accelerated) P: All sixth-semester nursing courses; C: S470. Students will apply the nursing process to the care of clients experiencing acute multi-system alterations in health.

NURS-S 472 A Multi-System Approach to the Health of the Community (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All sixth-semester nursing courses; C: S473. This course focuses on the complexity and diversity of groups or aggregates within communities and their corresponding health-care needs. Through a community assessment of health trends, demographics, epidemiological data, and social/political/economic issues in local and global communities, the student will be able to determine effective interventions for community-centered care.

NURS-S 473 A Multi-System Approach to the Health of the Community: Practicum (2 cr.) P: All sixth-semester nursing courses. C: S472 (Traditional, Accelerated) Students will have the opportunity to apply the concepts of community assessment, program planning, prevention, and epidemiology to implement and evaluate interventions for community-centered care to groups or aggregates. Professional nursing will be practiced in collaboration with diverse groups within a community.

NURS-S 474 Applied Health-Care Ethics (3 cr.) P: All sixth-semester nursing courses. (Traditional, Accelerated) This course is designed to introduce the student to major ethical theory, principles, and models for the recognition, analysis, and resolution of ethical dilemmas in health-care practice.

NURS-S 481 Nursing Management (2 cr.) P: All seventh-semester nursing courses. C: S482. (Traditional, Accelerated) This course focuses on the development management skills assumed by professional nurses, including delegation of responsibilities, networking, facilitation of groups, conflict resolution, leadership, case management, and collaboration. Concepts addressed include organizational structure, change, managing quality and performance, workplace diversity, budgeting and resource allocation, and delivery systems.

NURS-S 482 Nursing Management: Practicum (3 cr.) P: All seventh-semester nursing courses. C: C: S481. (Traditional, Accelerated, and R.N.-B.S.N.) Students will have the opportunity to apply professional management skills in a variety of nursing leadership roles.

NURS-S 483 Clinical Nursing Practice Capstone (3 cr.) (Traditional, Accelerated) P: S481, S482, or permission of instructor; C: S484. Students will have the opportunity to demonstrate competencies consistent with program outcomes and to refine their nursing care practice skills. Students will collaborate with faculty and a preceptor in choosing a care setting, planning and organizing a learning experience, and practicing professional nursing in a safe and effective manner.

NURS-S 484 Evidence-Based Practice (1 cr.) (Traditional, Accelerated) C: S483. This course focuses on students' abilities to refine their critical/analytical skills in evaluating clinical research for applicability to nursing practice. Students will examine the role of evaluation, action research, and research findings in assuring quality of nursing care and in solving relevant problems arising from clinical practices.

NURS-S 485 Professional Growth and Empowerment (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P:All seventh-semester nursing courses. This course focuses on issues related to professional practice, career planning, personal goal setting, and empowerment of self and others. Students will discuss factors related to job performance, performance expectations and evaluation, reality orientation, and commitment to lifelong learning.

NURS-Z 480 B.S.N. Portfolio Review for Course Substitution (1-6 cr.) P: Permission of instructor. The portfolio review process is available to all undergraduate students who believe that they can meet the learning objectives/competencies required of a specific nursing course within their program of study. The portfolio is a mechanism used to validate the acquisition of knowledge and skills congruent with course expectations and student learning outcomes. The portfolio provides objective evidence that students have acquired necessary content and skills through prior learning and/or practice experiences.

NURS-Z 490 Clinical Experience in Nursing (1-6 cr.) Opportunity for independent study of clinical experience related to nursing practice. Before enrolling in an independent study option, each student must obtain permission from a faculty member who will supervise the study and file appropriate forms prior to registration. Planned and supervised clinical experiences will be arranged in the area of the student's major interest.

NURS-Z 492 Individual Study in Nursing (1-6 cr.) Opportunity for independent study of topics related to nursing practice. Before enrolling in an independent study option, each student must obtain permission from a faculty member who will supervise the study and file appropriate forms prior to registration.

Electives

NURS-E 401 Pediatric Intensive Care: Didactic (3 cr.) Web-based course. This online didactic course provides comprehensive content on critical care concepts of the pediatric patient and family. The course is divided into modules: psychosocial, respirator, cardiovascular,

neurology, gastroenterology, renal/endocrine, hematology/ immunology, trauma, and multisystems issues. Online activities and critical thinking vignettes help the learner apply and synthesize the critical care concepts. Modules also contain a pre-test for student self-evaluation, decision-making activities, and exams to validate the learners' knowledge. Course is open to any B.S.N. student (IU system) who has completed sixth semester and R.N.-B.S.N. students.

NURS-E 402 Pediatric Intensive Care: Practicum (3 cr.) Web-based course. This practicum involves 112 clinical hours with a selected pediatric intensive care preceptor. Clinical time is worked out with an assigned preceptor, promoting flexible, accessible learning. Students are involved in caring for clients with critical care health disruptions and multi-system problems. Within the practicum, many pediatric intensive care skills are taught, observed, practiced, and evaluated by the preceptor, such as chest tube management, cardiac rhythm interpretation, external ventricular drain management, etc. Locations for the practicum experiences may vary with individual students and request for specific locations. Course is open to any B.S.N. student (IU system) who has completed sixth semester and R.N.-B.S.N. students.

NURS-E 403 Neonatal Intensive Care: Didactic (3 cr.) Web-based course. This online didactic course provides comprehensive content on critical care concepts of the neonatal patient and family. The course is divided into modules: assessment, developmental care and pain management, skin care, respiratory, cardiology, gastrointestinal, renal, neurology, sepsis/hematology, and professional practice. Online activities and critical thinking vignettes help the learner apply and synthesize the critical care concepts. Modules also contain a pre-test for student self-evaluation, decision-making activities, and exams to validate the learners' knowledge. Course is open to any B.S.N. student (IU system) who has completed sixth semester and R.N.-B.S.N. students.

NURS-E 404 Neonatal Intensive Care: Practicum (3 cr.) Web-based course. This practicum involves 112 clinical hours with a selected neonatal intensive care preceptor. Clinical time is worked out with your assigned preceptor promoting flexible, accessible learning. Students are involved in caring for clients with neonatal intensive care health disruptions and multi-system problems. Within the clinical practicum, many neonatal intensive care skills are taught, observed, practiced, and evaluated by the preceptor (arterial blood gasses, assisting with needle aspiration, ventilator care, etc.). Location for the practicum experiences may vary with individual students and request for specific locations. Course is open to any B.S.N. student (IU system) who has completed sixth semester and R.N.-B.S.N. students.

NURS-H 370 Nursing Honors Research Internship I (3 cr.)

NURS-H 470 Nursing Honors Research Internship II (3 cr.)

NURS-H 498 Nursing Honors Colloquium (1 cr.) Specifically for students accepted to nursing honors study option. This course will cover various research topics in each semester of the nursing major, helping prepare students to complete a senior thesis. Students will receive a grade of R until senior thesis is complete.

NURS-J 360 Operating Room Nursing: Didactic (2 cr.) C: Introduction to Perioperative Nursing: Practicum. This elective is designed to enable the student to participate (with supervision) in the professional and technical components of perioperative nursing practice. Learning opportunities include care of the patient undergoing the stress of surgery. The student participates as a member of the surgical team in the circulating and scrub nurses' roles. Experiences in the preoperative and postoperative patient care areas are provided.

NURS-K 305 New Innovations in Health & Healthcare (3 cr.)

NURS-K 490 Clinical Elective (1-6 cr.) Many clinical nursing elective courses are offered under this number. These elective offerings vary from year to year depending on student interest and available resources. Students are kept informed of elective offerings both through informational forums and through listings in the online course offerings.

NURS-K 492 Nursing Elective (1-6 cr.) Many nursing elective courses are offered under this number. These elective offerings vary from year to year depending on student interest and available resources. Students are kept informed of elective offerings both through informational forums and through listings in the online course offerings.

NURS-K 495 Adult Critical Care: Didactic (3 cr.) Web-based course This online course provides comprehensive content on critical care concepts of the adult patient. The course is divided into modules: respiratory, cardiovascular, gastrointestinal, renal, endocrinology, neurology, immunology, hematology, trauma and emergencies, and professional practice. Online activities and critical thinking vignettes help the learner to apply and synthesize the critical care concepts. Course is open to any B.S.N. student (IU system) who has completed sixth semester and R.N.- B.S.N. students.

NURS-K 496 Adult Critical Care: Practicum (3 cr.) Web-based course. This practicum involves 112 clinical hours with a selected critical care preceptor. Clinical time is worked out with your assigned preceptor promoting flexible, accessible learning. Students are involved in caring for clients with critical care health disruptions and multi-system problems. Within the clinical practicum, many advanced critical care skills are taught, observed, practiced, and evaluated by the preceptor (aerial blood gases, arrhythmia analysis, ventilator care, etc.). Locations for the practicum experiences may vary with individual students and requests for specific locations. Course is open to any B.S.N. student (IU system) who has completed sixth semester and R.N.-B.S.N. students.

NURS-K 497 MINDFULNESS-BASED WELLNESS (3 cr.) This course is appropriate for all healthcare and social service related fields, including, but not limited to, pre-nursing and nursing student electives, pre-med, psychology, and social work students. This course will introduce mindfulness practice as a skillful approach to personal sustainability (care for the caregiver) and will expand one's understanding of this practice in integrative patient care. This class is appropriate for both new and

seasoned meditation practitioners. This class includes one full day meditation retreat on a weekend.

Graduate Courses

Core Courses

NURS-N 502 Nursing Theory I (3 cr.) Focus is on evaluating the factors and issues influencing the development of theory in nursing. Theoretical terminology and criteria for the evaluation of theories are examined. Linkages applied between theory, practice, and research are explored.

NURS-N 504 Leadership for Advanced Nursing Practice (3 cr.) This course addresses core competencies essential to all advanced nursing practice roles and health care in complex systems.

NURS-R 500 Nursing Research (3 cr.) P: NURS -N502 This course provides a survey of research in nursing with a focus on evaluating nursing research for usability in practice.

NURS-R 505 Measurement and Data Analysis (3 cr.) Principles and applications of scientific measurement, data summarization, and univariate and bivariate inferential statistics are addressed. The research purpose and the phenomena under study are considered as determinants of measurement techniques and data analysis.

NURS-R 590 Scholarly Project (3 cr.) The Scholarly Project is the application of knowledge and skills learned through a program of graduate study to a nursing focused question or problem. Students work individually or in groups under the supervision of a faculty advisor to complete a project that contributes to the advancement of nursing practice, education, or administration.

NURS-R 606 Intermediate Statistics in Nursing Research (3 cr.) P: An introductory statistics course within three years or permission of instructor. Understanding the mathematics and logic behind the techniques is the focus of the course. Students develop skills and answer research questions related to the critical analysis, interpretation, and evaluation of nursing research evidence. Topics include probability, sampling distributions, estimation, and hypothesis testing on means, variances, proportions, correlations, and simple regressions.

NURS-R 699 Research Inquiry (Thesis) (3-6 cr.) The Research Inquiry is a research investigation of phenomenon of interest to nursing. Students work individually with a faculty advisor or advisors to complete a research study that contributes new knowledge to nursing science.

NURS-R 900 Continuation in Study or Thesis (1 cr.) Following enrollment in R590 Nursing Study or R699 Master's Thesis in Nursing, the student must enroll every semester and first summer session in R900 (a pseudocourse) until the study or thesis has been completed.

Other Courses

NURS-C 550 Advanced Pediatric Health Assessment (3 cr.) Enables students to learn psychomotor skills required for performing physical examinations. Provides theoretical basis to begin process of physical diagnoses of health and illness. 5 clinical hrs./wk.

NURS-C 551 Health Maintenance of the Pediatric Client (5 cr.) P: C550 Provides the basis for synthesizing health status information for nursing interventions aimed at encouraging children and families to assume responsibility for the prevention of illness and the promotion and maintenance of health. 10 clinical hrs./wk.

NURS-C 555 Advanced Nursing Care of Children and Families I (6 cr.) P: C550, C661. This course prepares advanced practice nurses for the specialized care of children and their families. Complex, unique, or challenging health issues are examined. Students develop skills in critical thinking, ethical decision making, and the facilitation of behavioral change to assume a leadership role in improving health outcomes. 15 non-lecture contact hours.

NURS-C 556 Advanced Nursing Management of the Pediatric Client (3 cr.) P: C551. To prepare the student to use research data and clinical knowledge of mental, infectious, acute and chronic re-occurring conditions in supporting advanced nursing practice in primary health care nursing of children.

NURS-C 661 Psychosocial Assessment Strategies in Pediatrics and Women's Health Nursing (3 cr.) P: Statistics. Focuses on strategies to assess psychosocial health status. Assessment tools and conceptual frameworks will be analyzed. Purpose of assessment strategy, considerations for administration, technical evaluation, and implications for nursing practice will be discussed.

NURS-C 662 Issues in Adolescent Health (3 cr.) P: R500. This course uses a seminar format to survey key issues in adolescent health, such as physical and psychosocial growth and development, teenage pregnancy, HIV/AIDS, substance abuse, and violence and abuse. Findings from evidence-based practice and major theoretical perspectives are employed to formulate recommendations for clinical practice, future research, and policy.

NURS-C 666 Collaborative Clinical Practice in Pediatric Primary Health Care (5 cr.) Seminar provides students with the opportunity to present and discuss complex, multi faceted clinical situations with faculty and peers. The clinical component provides students with the opportunity to develop advanced clinical skills in pediatric primary health-care settings. Emphasis is on continuity and comprehensiveness of nursing interventions with pediatric clients. 25 clinical hrs./wk.

NURS-C 670 Advanced Nursing Care of Children and Families II (3 cr.) P: C555 This course prepares advanced-practice nurses to function effectively in leadership roles within multi disciplinary health-care systems/organizations specifically focused on children and their families. Critical issues that impact the practice environment are explored. Students develop skills in facilitating evidence-based practice for specific populations of children and their families. 10 non-lecture contact hours.

NURS-D 602 Responsible Conduct of Research (1 cr.) Students will develop knowledge regarding the responsible conduct of research, including conflict of interest, responsible authorship, policies for handling misconduct, data management, data sharing, policies

regarding the use of animals and/or human subjects, and institutional vs. individual responsibilities for scientific integrity. This meets the NIH requirements for instruction of pre- and postdoctoral fellows.

NURS-D 607 Theoretical Perspectives of Nursing Science (3 cr.) P: Placement in curriculum: first semester C: D701 Focus is on the development of nursing science. Philosophy of science as an influence on theory development and historical perspectives on the development of theory and science in the discipline will be analyzed. Identification of significant phenomena of interest to the discipline, analysis of the principles of theory construction and evaluation of the various dimensions of theoretical conceptualizations both in and outside the discipline will be included.

NURS-D 608 Middle-Range Theory (3 cr.) P: Admission into Ph.D. program, D607, or permission of instructor. This course focuses on examination and implementation of methods for applying middle range theories in nursing. Emphasis is on evolving phenomena of relevance to nursing utilizing selected middle range theories to enhance knowledge development.

NURS-D 615 Health Care Outcomes and Decision Making (3 cr.) Health care leaders of the future will be judged increasingly on their ability to achieve positive quality outcomes and safe patient care through working together in interdisciplinary leadership teams. This course is designed for graduate level learners in medicine, nursing, public health, informatics, health administration and other health related disciplines.

NURS-D 627 Health Care Outcomes and Decision Making (3 cr.) Elective course open to all graduate students regardless of major, or permission of instructor P: Graduate status or permission of instructor Computer skills required: E-mail, Microsoft Office Suite, Oncourse This course focuses on examination and discussion of the myths, theories and scientific evidence surrounding menopause, a life transition that affects all women who reach midlife. The course explores biocultural, evolutionary, adaptionist, ecological, and gerontological theories and scientific controversies surrounding women's experiences and outcomes. Course content is relevant to students from a wide range of disciplines including but not limited to nursing, education, health and rehabilitation sciences, informatics, journalism, anthropology, medicine, social work, and biology.

NURS-D 700 Nursing Research Seminar (3 cr.) P: Admission to the Ph.D. program. C: D607 Nursing Theory II. This seminar for predoctoral/postdoctoral nursing students provides an opportunity for career socialization; facilitates achievement of individual research goals; and enables students to acquire knowledge, skills, and abilities to support professional development as a nurse scientist.

NURS-D 701 Nursing Inquiry and Scholarship: Introduction to Doctoral Study (3 cr.) P: Admission to the Ph.D. program. C: D607. Examination and development of knowledge, skills, and strategies to support critical and creative thinking, identification of research and evaluation interests, socialization, and development of scholarship in nursing.

NURS-D 735 Clinical Epidemiology and Statistics in Nursing (3 cr.) This course provides students with intermediate epidemiologic concepts of populations and biostatistical techniques for understanding and using health research is the focus. Principles and methods of data analysis central to understanding health-related indicators for population health management will be used. Students will be prepared to function as members of a research team.

NURS-D 736 Inquiry I: Evidence-based Research and Translation Science (1-3 cr.) This course focuses on advanced applications of evidence-based practice. The course emphasizes foundational and advanced concepts of evidence-based practice and requires application of principals of EBP, thorough literature searches, appraisals of literature and formulation of plans. Clinical problems will be the basis of EBP literature searches and analyses.

NURS-D 737 Inquiry II: Evidence-based Research and Translation Science (1-3 cr.) Synthesis of knowledge regarding implementation models and strategies used for translating evidence into practice is the focus of this course. Students explore organizational aspects of change influencing innovation, quality improvement, and program evaluation. Developing and preparing to implement and evaluate a translational science project is a component of the course.

NURS-D 743 Influencing Health Public Policy (3 cr.) Designed for nurses and other professionals interested in influencing public policy related to the health system and resources; this course focuses on policy-making at the state/national level. Participants engage in interactive discussions with policy makers, learn about the forces that influence health policy decisions and apply health services research.

NURS-D 744 Strategic Resource Management in Nursing and Health Systems (3 cr.) The design and execution of strategies to manage human and financial resources within complex health systems. The course has two central themes: (1) How to think systematically and strategically about managing an organization's human and financial assets, and (2) How to implement these strategies to achieve the organization's objectives.

NURS-D 749 DNP Practicum (1-3 cr.) C: Concurrent enrollment in DNP didactic course required. Provides opportunities to develop knowledge and skills in specific area of advanced nursing practice or professional role, building on didactic courses. Includes in-depth work with experts from multiple disciplines, and engagement within communities of practice. Enables students to synthesize and integrate leadership, policy, inquiry, evidence-based practice, and clinical expertise in selected settings.New course with variable credit proposed. A total of 7credit hours of practicum course work will be require of students to meet the 1000 post baccalaureate practice hour requirement for the DNP degree. (DNP students will take a total of 7 credits over the course of their program). Clock hour to credit hour ratio: 5 clock hours to one credit hour per week (total 75 clock hours per credit per semester).

NURS-D 751 Knowledge Complexity (3 cr.) P: Admission to the Ph.D. program. Evaluation of models, theories, methods, and research that supports strategic

learning, knowledge work, and knowledge translation in complex systems.

NURS-D 751 Leadership in Complex Systems (3 cr.) P: Admission to the Ph.D. program. P: Admission to the Ph.D. or D.N.P. program. Analysis and evaluation of theories and research that influence leadership in complex systems. Leadership is explored in the complex system domains of education, health service, research, informatics, and public policy. Internal and external sources of knowledge are evaluated and used to enhance leader behavior/s. Core competencies and strategies for leadership effectiveness are examined and evaluated.

NURS-D 751 Quality of Life in Acute and Chronic Illness (3 cr.) P: Admission to the Ph.D. program. This course examines in depth the concept of quality of life research, beginning with the clients' perspectives across a variety of social contexts. Theoretical underpinnings and conceptualizations, research methods, and measurements are examined for congruence with various perspectives for usefulness in advancing nursing science.

NURS-D 751 Health Behaviors (3 cr.) P: D607, R603. The focus of this course is an in-depth analysis of the theoretical and research literature that supports health behavior change. Students will have the opportunity to critically evaluate theories/models applicable to health behavior and to complete an intensive analysis of a health behavior relevant to their area of research.

NURS-D 609 State of the Science Seminar (2 cr.) P: D607 • Placement in curriculum: a focus area course This course focuses on increasing the student's understanding of how knowledge has developed relevant to their phenomena of interest. Each student will develop skills needed to critically analyze and synthesize relevant literature in the area of a specific phenomenon. Special emphasis is placed on the application on critical analysis and synthesizing skills.

NURS-D 751 Stress and Coping (3 cr.) P: D607; D701. The course is designed to provide opportunities for students to critically analyze extant stress theories/ models, emphasizing the transactional orientation, to identify testable theoretical formulations for application to nursing practice. Each student will conduct a study to explicate a stress-related concept, test for mutual exclusiveness for two or more stress-related concepts, and/or test/examine a stress-related theoretical formulation in a selected population.

NURS-D 751 Relationship-Centered Leadership in Complex Systems (3 cr.) P: Admission to the Ph.D. program. This course involves the analysis and evaluation of theories and research that influence leadership in complex systems. Leadership is explored in the complex system domains of education, health service, research, informatics, and public policy. Internal and external sources of knowledge are evaluated and used to enhance leader behavior/s. Core competencies and strategies for leadership effectiveness are examined and evaluated.

NURS-D 752 Directed Research Practicum (3 cr.) P: Admission to the Ph.D. program. C: Linked in curriculum to D751 but need not be taken concurrently. Students will develop research skills through directed study and supervised research experience. Learning is related to a D751 focus course and the student's interest area. Multidisciplinary research experience may include, but is not limited to, pilot-testing and evaluating research methods, data collection, data analysis, and secondary analysis of existing datasets relevant to the student's research interests. This course may be taken more than once

NURS-F 570 Advanced Health Assessment Across the Lifespan (3 cr.) This course enables students to develop advanced practice nursing skills in individual health assessment of infants, children, adults, and aging people. In addition, students develop skills in family and community assessment.

NURS-F 572 Primary Health Care of Children (3 cr.) (3 credit hours:2 didactic, 1 clinical for F.N.P. majors) Enables students to develop a knowledge base for clinical decision making in assessment and provision of primary health-care nursing for children and families. Topics include health promotion/maintenance, disease prevention, diagnosis, and treatment of common acute and stable chronic illnesses in children. 5 clinical hrs./wk.

NURS-F 574 Primary Health Care of Adults (3 cr.) (3 credit hrs:2 didactic, 1 clinical for F.N.P. majors) Enables students to develop a knowledge base for clinical decision making in the assessment and management of primary health-care for adults and families. Topics include health promotion and maintenance, disease prevention, diagnosis, and treatment of common acute and stable chronic illnesses in adults. 5 clinical hrs./wk.

NURS-F 576 Primary Health Care of Women (3 cr.) (3 credit hrs:2 didactic, 1 clinical for F.N.P. majors) Enables students to develop a knowledge base for clinical decision making in the assessment and provision of primary health care for women and families. Topics include health promotion and maintenance, disease prevention, diagnosis, and treatment of common acute and stable chronic illnesses in women. 5 clinical hrs./wk.

NURS-F 578 Primary Health Care of Families—Clinical (5 cr.) Enables the F.N.P. student to develop a practice base for clinical decision making in the assessment and management of health care of families. The course includes identification of health needs, nursing interventions for the prevention of illness, and health promotion. 25 clinical hrs./wk.

NURS-F 700 Theories for Family Health (3 cr.) The focus of this course is identifying, analyzing, and evaluating theories relevant to physical, mental and social issues in family health. Emphasis will be on the application of theories to specific family health problems to guide theoretically driven research questions and hypotheses. Future theoretical development in family health will also be addressed.

NURS-F 701 Family Systems Interventions (3 cr.) The goal for this course is to develop an understanding of theory-based interventions for research with family systems. The course will facilitate an in-depth understanding of family system concepts. The course will also address ethical issues when working with families, and it will have a focus on culture, social class, and ethnicity.

NURS-F 702 Family Research Methods (3 cr.) This course provides the student the opportunity to analyze

and apply family research methods as a foundation for conducting family research. Students evaluate family research literature and findings and obtain the knowledge to implement family research studies. Students examine designs in family studies; apply techniques for strengthening designs and address instrumentation, sampling, data collection, and unit of analysis issues specific to family research.

NURS-G 513 Genetics (2 cr.) In-depth study of biophysical and behavioral aspects of human development, which also considers genetic, embryologic, and developmental physiological components. This course may be repeated for a maximum of 4 credits.

NURS-G 556 Primary Health Care of Women Throughout LifeSpan (4 cr.) P: Y550, Y515, Y612, G552, G555 or permission. Enables student to develop a practice base for clinical decision-making in the assessment and management of women from menarche past menopause. Includes identification of health needs, nursing interventions for illness prevention, health promotion, and therapeutic interventions. 20 clinical hours/ week.

NURS-G 901 Advanced Research (Independent Study) (6 cr.) Individual assignments arranged for doctoral students.

NURS-H 537 Community Epidemiology (3 cr.) This research course presents methodological and analytical techniques to summarize health-related indicators in populations and provides opportunities to assess mainstream and multicultural populations through existing data sets. Epidemiologic techniques will form the basis for these population assessments.

NURS-H 540 Community Assessment (3 cr.) This course focuses on concepts and methods for the assessment of a mainstream and multicultural community's strengths and needs. Students will collect and analyze secondary data for selected communities, analyze health indicators, conduct a community assessment, and delineate implications for advanced practice nursing.

NURS-H 544 Community Development and Organization for Health (3 cr.) The purpose of this course is to critically analyze ethical principles, theories, concepts, and research of community development and organization for health, and to consider the application of these issues in mainstream and multicultural communities. Students develop an evaluation research proposal to study the effects of community development efforts.

NURS-H 546 Action Research and Community Health Policy (3 cr.) Analysis of action research as a method of scientific inquiry for social and policy change. Working with mainstream and multicultural community groups, students design and conduct action research projects. Based on research results, recommendations for social and policy change and for further policy research are made.

NURS-H 548 Community-Based Nursing Practicum (3 cr.) Students conduct a practicum experience in order to synthesize theory and research related to program development or evaluation of community-based intervention. Mainstream and multicultural community experiences and activities are independently planned to meet student career goals. 15–30 clinical hrs./wk.

NURS-H 630 Community Health Planning and Implementation (4 cr.) P: H537, H538. Analysis of concepts, ethical principles, frameworks, models of practice, and research related to community-based nursing. Working with mainstream and multicultural community leaders, students design a plan for a community-based intervention and outcome evaluation appropriate at the local level.

NURS-H 733 Community Health Nursing and Primary Health Care Policy (3 cr.) P: R600 or equivalent, H730, H731, or consent of instructor. The impact of primary health care policy on nursing, health, and development in industrialized and developing countries is evaluated. Student research projects evaluate national primary health care policies, and recommendations are made for optimal policies and for further development of nursing science.

NURS-I 579 Nursing Informatics Practicum (3 cr.) This course provides an opportunity for the learner to synthesize all previous course work and to demonstrate beginning competency in nursing informatics. The course employs an application focus in which the learner demonstrates comprehension, critical thinking, and problem-solving abilities within the context of a real-world environment.

NURS-I 630 Introduction to Nursing Informatics (3 cr.) Introduction to the field of nursing informatics, current state of the science, major issues for research and development. Includes theoretical models of nursing informatics; nursing roles; information processing and data management; data acquisition and data representation; information system standards, system architecture, and networking; evaluation; and ethical/social issues in healthcare informatics.

NURS-I 631 Clinical Information Systems (3 cr.) Clinical Information systems includes: human computer interface and system design, healthcare decision support and clinical guidelines, system selection, organizational issues in system integration, project management for information technology change, system evaluation, regulatory policies, impact of the Internet, economic impacts of e-health, distributed healthcare information technologies, and future trends.

NURS-I 635 Consumer Health Informatics (3 cr.) Topics include theoretical models for the delivery of consumer health information; Internet-based information delivery, access to patient information, and privacy issues; quality of consumers health information health literacy; design and development of consumer health information resources; consumer access to clinical information; and current research.

NURS-I 639 Informatics in Nursing Administration Practice (3 cr.) This course describes the knowledge work necessary for competent practice in nursing management. The focus is on identification, acquisition, analysis, interpretation, and application of knowledge data, databases, and systems that support decision making strategies in nursing administration.

NURS-J 595 Topical Seminar (2-4 cr.) Seminar topic to be announced each semester.

NURS-J 595 Legal and Ethical Issues in Nursing Education (2 cr.) This topical seminar will be focused on a discussion of the legal and ethical issues related to nursing education.

NURS-J 690 Readings in Clinical Nursing (1-3 cr.) Topic arranged depending on the needs and interests of the student.

NURS-J 692 Hermeneutics Institute (3 cr.) Seminar focusing on hermeneutic phenomenology in the context of research and scholarship in health care and the human sciences (including design, data collection and analysis and dissemination). Readings from philosophers such as Heidegger, Gadamer and Nancy are used to situate hermeneutical methodologies in a philosophy of science.

NURS-J 692 Independent Study in Nursing (1-6 cr.) Individual assignments arranged.

NURS-L 574 Administrative Management in Nursing (3 cr.) P: L573. Content derived from contemporary environmental, personnel, and organizational issues related to the administration of nursing services with an emphasis on management principles and processes.

NURS-L 575 Corporate and Public Policy for Nursing Executives (3 cr.) This course is designed to prepare nurse administrators for active policy-making participation in health-care organizations, professional associations, and governmental agencies. The focus of the course is on managerial decisions and on building coalitions for policy at the organizational, local, regional, national, and international levels.

NURS-L 579 Nursing Administration Practicum (3-6 cr.) P: L574 and SPEA V610. A practicum experience designed for synthesis of theory and practice. Agency observation and activities are independently planned. Includes group seminars. 15 clinical hrs./wk.

NURS-L 650 Data Analysis for Clinical and Administrative Decision Making (3 cr.) Focuses on understanding, manipulating, and analyzing quantitative data in nursing and health care. Includes use of computer-based systems for data management and statistical analysis. Students learn application and interpretation of multivariate statistical models for decision making.

NURS-L 670 Economic Analysis of Nursing and Health Systems (3 cr.) This course provides the economic context for nursing administration and a forum for students to analyze key nursing administration and health systems issues from a perspective of economic value to the community they serve.

NURS-L 671 Financial Management: Nursing (3 cr.) Designed to acquaint nurses with budget preparation and fiscal management of a nursing unit or division. Methods of obtaining personnel input, estimating costs, and cost justification are analyzed in depth.

NURS-L 775 Organizational Theories in Nursing (3 cr.) An analysis of existing organizational theory for the purpose of identifying, extending, or modifying theory for application in the nursing service or education sectors.

NURS-M 500 The Scientific Basis for Clinical Nurse Specialist Practice (3-4 cr.) This course focuses on understanding the clinical nurse specialist role and practice. Emphasis is placed on theory and science related to chronic illness prevention, risk reduction and management for individuals in the context of families. Students use clinical reasoning to diagnose actual or potential problems amenable to nursing interventions, and design, implement and evaluate evidence-based nursing interventions for specialty populations of adults across the lifespan.

NURS-M 559 Stress and Coping (3 cr.) This course focuses on analyzing psychological and psycho-physiological theories of stress and coping. Students apply principles of interviewing to identify experiences of stress, and use clinical reasoning to diagnose stress related problems for adults across the life span. Students design, implement and evaluate evidence-based nursing stress management interventions for individuals and their families.

NURS-M 560 Enhancing Health Behaviors Through Psycho-Educational Intervention (3 cr.) This course focuses on the application of science to enhance individual health behaviors of adults across the lifespan through psycho-educational interventions. Emphasis is on the development of psycho-educational interventions to support health-related decision-making and self-management through learning and cognitive restructuring. Learning and other relevant theories are presented to guide intervention design, implementation and evaluation.

NURS-M 565 Symptom Management and Functional Enhancement (4 cr.) This course focuses on the application of theory and science to improve patient outcomes related to symptoms and functional status in the context of chronic illness. Theory, research and evidence are analyzed in the design, implementation and evaluation of nursing interventions to optimize outcomes for adults across the adult life span.

NURS-M 575 Clinical Nurse Specialist Role in Health Systems (3-4 cr.) This course prepares clinical nurse specialists to function as leaders within complex health systems. Students synthesize and apply theories and research to advance the practice of nursing for a specialty population of adults across the lifespan experiencing chronic illness. Emphasis is placed on leading nurses and multidisciplinary teams in achieving safety, quality, and cost-effective outcomes.

NURS-P 510 Neuro-Psychopharmacology (3 cr.) Considers indications, therapeutic uses, neurophysiological mechanisms of action, and side effects of the major classifications of psychotropic drugs. Relevant research is examined, as is clinical application pertinent to current psychiatric mental health practice, including therapeutic management, psychodynamics, and combination of drugs with other treatment modalities.

NURS-P 515 Assessment in Advanced Psychiatric Nursing (3 cr.) Methods and skills for completing a comprehensive mental health assessment are emphasized. Content includes criteria for DSM, psychiatric nursing diagnosis, ICD, and functional abilities, developmental status, and cultural influences. Students become familiar with standardized assessment tools commonly used in psychiatric/mental health settings. 5 clinical hrs./wk.

NURS-P 558 Psychiatric/Mental Health Advanced Practice Nursing Across the Lifespan (3 cr.) P: P510;

P515; N502 • Placement in curriculum: a required course for MSN, psychiatric/mental health adult/geriatric major Treatment models and research findings related to the care of persons across the lifespan with mental illness are examined, analyzed, evaluated, and implemented in clinical practice. The interrelationships of neurobiology, gender, development, environment, and culture are explored in relation to how they guide therapeutic approaches to treatment. Sociopolitical forces that influence advanced nursing practice and health care delivery are examined. Supervised clinical experiences focus on developing advanced practice skills in clinical management, crisis intervention, health promotion and illness prevention.

NURS-P 651 Psychiatric/Mental Health Nursing with Families (3 cr.) Theoretical formulations and research related to developmental and functional processes in families are examined for their relevance in designing and implementing nursing interventions. Biopsychosocial formulations are used to understand the reciprocity of individual and family function and dysfunction. Learning experiences include analysis of family therapy simulations and a family therapy practicum. 5 clinical hrs./wk.

NURS-P 652 Interprofessional Approach to the Treatment of Substance Use and Co-occurring Psychiatric Disorders (3 cr.) P: Core courses: N502, N504, R500, R505 or permission of course faculty The purpose of this course is to provide learners with knowledge, skills and the exploration of attitudes relevant to interprofessional approaches to the treatment of substance use and co-occurring psychiatric disorders.
The course will address prevention, intervention, and treatments of these disorders with diverse populations across the life span. Students draw upon previous and concurrent learning experiences and integrate values, knowledge, and skills relevant to their professional standards of practice. Students explore the relationships between and among substance use/psychiatric disorders and socioeconomic status, race, ethnicity, culture, religion, gender, sexual orientation, age, physical and mental ability, and other socio-environmental factors of vulnerability. Consistent with strengths and ecosystems perspectives, students consider the impact of social environments, physical settings, community contexts, and political realities that support or inhibit the emergence of substance use and co-occurring disorders.

NURS-P 654 Group Interventions in Advanced Psychiatric Nursing (3 cr.) The student will demonstrate an understanding of group treatment as a therapeutic modality in the advanced practice of psychiatric/mental health nursing. Various models of group intervention are analyzed to determine their relevance for meeting specialized needs of clients across the life span. Practicum required. 5 clinical hrs./wk.

NURS-P 671 Advanced Clinical Practice in Psychiatric/ Mental Health Nursing I (3 cr.) Students engage in advanced psychiatric nursing practice with selected populations. Students further define and expand their practice of psychiatric/mental health nursing based on the integration of theory, research, self-evaluation, and clinical supervision. A variety of approaches and issues of service delivery are explored. 10 clinical hrs./wk.

NURS-P 672 Advanced Clinical Practice in Psychiatric/ Mental Health Nursing II (3 cr.) In this practicum, students expand their practice to indirect care responsibilities, including clinical supervision, evaluation of treatment environments, program development, and interdisciplinary collaboration. Students examine social, legal, economic, and ethical issues to develop goals for future professional development and contributions to nursing. 10 clinical hrs./wk.

NURS-R 601 Instrumentation and Measurement (3 cr.) P: R603, R604, or consent of faculty. This course provides an opportunity for the student to develop expertise in developing and testing the psychometric properties of an instrument to measure health-related phenomena. Content focuses on theoretical foundations of measurement, item construction, questionnaire design, and content analysis, item analysis, assessment of reliability and validity, accuracy and precision, and manuscript preparation to report psychometric properties.

NURS-R 602 Instrument Development for Health Behavior II (2 cr.) P: R601. The purpose of this course is to provide an opportunity for the student to develop expertise in the testing of an instrument to measure health behavior. Content focuses on data collection, item analysis, validity and reliability assessment, and manuscript preparation to report psychometric properties.

NURS-R 603 Foundations of Quantitative Research (3 cr.) P: Concurrent or Pre-requisite to Theory 1 and R607 The focus of this course is on in-depth critique of the quality indicators for quantitative research designs. Designs, sampling methods, data collection methods, measurement strategies, and quality of measures are evaluated for threats to internal and external validity. In addition, the logical consistency among problem, purpose, design, data analysis and conclusions are examined.

NURS-R 604 Experimental and Quasi-Experimental Designs and Methods in Nursing (3 cr.) P: R603. An in-depth study of experimental and quasi-experimental research designs and methods used to evaluate the effectiveness of interventions. Designs will be evaluated to minimize error and maximize internal and external validity. Sampling methods, power analysis, Type I and II errors, and other concepts relevant to experimental and quasi-experimental research designs and related methods will be covered.

NURS-R 605 Design and Applications of Advanced Research Designs/Interventions (3 cr.) P: R603, R604. Evaluates and applies issues relevant to intervention research and health services research. Content will include intervention dosage, sensitivity, mediators and moderators, and quality assurance and feasibility of intervention delivery. Translational research, multisite research, intent-to-treat, nested designs, and outcome designs will be discussed for application.

NURS-R 607 Advanced Statistics in Nursing Research (3 cr.) P: R606 or equivalent Intermediate Statistics in Nursing Research or permission of instructor. This course covers multiple linear regression, ANCOVA, factorial ANOVA, repeated measures, sensitivity and specificity, logistic regression, and survival analyses. Understanding the mathematics and logic behind these techniques is emphasized. Students develop skills to answer research

questions, and critically analyze, interpret, and evaluate evidence related to nursing research.

NURS-R 608 Multivariate Statistics in Nursing Research (3 cr.) P: R606 Intermediate Statistics or equivalent in Nursing Research and R607or equivalent Advanced Statistics in Nursing Research or permission of instructor. The development of skills and applications that enhance student's ability to critically analyze, interpret, evaluate and conduct nursing research using canonical correlation, MANOVA/ MANCOVA, discriminant analysis, principal component analysis, exploratory and confirmatory factor analysis, and structural equation modeling. Understanding the mathematics, logic, application of these techniques is emphasized.

NURS-R 610 Foundations of Qualitative Research (3 cr.) The focus of this course is on in-depth critique of the quality indicators for qualitative research designs. Designs, sampling methods, data collection methods, and analysis methods are evaluated for threats to credulity, neutrality, consistency, and usefulness of findings. In addition, the consistency among research question, purpose, design, data analysis, and conclusions are examined.

NURS-R 611 Advanced Qualitative Research Methods (3 cr.) P: R500, R603, R610, or consent of faculty. Elective course provides context for deeper analysis of selective qualitative methodologies. Critical skills include developing research questions appropriate for selected methodologies and defending methodological choice. Students refine and conduct a pilot research project, including IRB submission, data collection/ analysis, application of quality criteria, and preparation of a publishable research report.

NURS-R 612 Interpretive Data Analysis (1-3 cr.) P: R610, R611 and completed qualitative data collection from D752 or with permission of course faculty. This course advances new qualitative researchers in building a foundation of philosophical, theoretical and practical understanding of interpretive research methods, study designs, conditions of rigor in qualitative research, and research team building. Students will explore ways of grounding their findings in the works of interpretive phenomenology, grounded theory and other interpretive methods meeting the needs of students. Students will explore multiple avenues for dissemination of interpretive research findings.

NURS-R 800 Dissertation Seminar (3 cr.) The seminar is a forum for students to explore with their peers the processes for obtaining Ph.D. candidacy status and completing the dissertation. Policies/procedures for completing the Ph.D. candidacy examination and the dissertation proposal defense will be discussed. Dissertation research compliance issues related to the IUPUI IRB application process also will be discussed. Students will collaborate with their dissertation chair to facilitate progress toward Ph.D. candidacy and the dissertation phase of their program.

NURS-R 899 Dissertation in Nursing (1-9 cr.) P: Candidacy status in the doctoral program. In collaboration with the student's dissertation chair, dissertation development is facilitated. The seminar is a forum for students to explore with their peers research problem development, theoretical foundations, methodology, and data analysis to launch their dissertation research. Format and procedures for progression in the dissertation process are also discussed. The student's dissertation chair is involved as the student progresses through the semester.

NURS-S 674 Management of the Acutely Ill Adult 1 (6 cr.) This course focuses on assessment, diagnosis, and collaborative management of adults who are acutely/ critically ill or are experiencing exacerbation of a chronic health problem. Clinical focus is on the role of the acute care nurse practitioner working with a multidisciplinary team to facilitate and accelerate the patient's return to optimal health. 15 clinical hrs./wk.

NURS-S 675 Management of the Acutely Ill Adult 2 (6 cr.) P: S674. This course focuses on assessment, diagnosis, and collaborative management of adults who are acutely/critically ill or are experiencing exacerbation of a chronic health problem. Clinical focus is on the role of the acute care nurse practitioner working with a multidisciplinary team to facilitate and accelerate the patient's return to optimal health. 15 clinical hrs./wk.

NURS-S 676 Management of the Acutely Ill Adult 3 (6 cr.) P: S674 and S675. This course focuses on assessment, diagnosis, and collaborative management of adults who are acutely/critically ill or experiencing exacerbation of a chronic health problem. Clinical focus is on the role of the acute care nurse practitioner working with a multidisciplinary team to facilitate/accelerate the patient's return to optimal health. 15 clinical hrs./wk.

NURS-T 600 Scientific Basis for Clinical Teaching in Nursing (3 cr.) P: N502, N504, R500, R505 or permission of course faculty C: T670 All students must satisfy the Indiana University School of Nursing RN licensure, background check, immunization and CPR requirements and provide documentation of this prior to the first day of class. This course includes an integration of concepts of population-based clinical practice and teaching in clinical environments. Emphasis is placed on the relationship between nursing theory, quality and safety, evidence based practice and teaching and learning in clinical settings.

NURS-T 615 Curriculum in Nursing (3 cr.) This course is designed for persons who are or will be engaged in teaching within nursing education settings. The primary focus is the process of curriculum development; philosophical, social, political, economic, and professional issues that need to be considered in planning curricula; evaluating existing curricula; and changing curricula are examined.

NURS-T 617 Evaluation in Nursing (3 cr.) Integration of concepts of assessment and evaluation into a nursing education framework. Students analyze assessment/ evaluation concepts, models, and frameworks for applicability for students, faculty, curricula, and programs.

NURS-T 619 Computer Technologies (3 cr.) This course provides nurse educators an opportunity to acquire knowledge and skills for using computer technologies to support the teaching/learning process. Emphasis is given to theoretical frameworks that guide the selection, use, and integration of computer technologies in nursing education programs.

NURS-T 670 Teaching in Nursing (3 cr.) Seminar and guided experiences in teaching of nursing, including planning, developing, implementing, and evaluating classroom and clinical instruction. The course is taught entirely on the Internet.Students work with a preceptor and submit a videotape or audio tape of teaching a unit of instruction.

NURS-T 679 Nursing Education Practicum (3 cr.) A practicum experience designed for application, demonstration, and synthesis of theory and competencies related to the role of nurse educator. Learning experiences are planned and negotiated to meet individual learning goals in the context of preceptor supervised experiences. M.S.N. nursing education major students are required to take a 2 credit J595 special topics course concurrently with T679.

NURS-T 800 Preparing Future Faculty (2 cr.) This course provides preparation for employment and development of competencies as educators in academic and other complex organizations. Course concepts include functioning within the educational environment; understanding research abilities, teaching-learning process, the use of technology, civic engagement, and service; and developing effective communication skills with diverse groups.

NURS-W 540 Writing for Publication (3 cr.) P: Permission of the faculty. This course focuses on writing for publication. The goal is to enable students to gain skill in presenting their ideas for readers of the professional/scientific literature in any discipline. The content of the course is organized to help the student through the process from the conceptualization of an idea to submission of the paper for journal review. Achieving success and overcoming obstacles, such as lack of self-confidence in writing skills and avoidance behavior, will be emphasized. Assignments are designed to facilitate the process, and students will receive personal reviews from faculty at each stage of manuscript development. The end-product will be a paper that is ready for submission for publication.

NURS-Y 512 Advanced Concepts in Gerontology (3 cr.) P: Consent of instructor. Introductory/survey course in gerontology and consent of instructor. Enables students to synthesize theoretical and practical concepts from different disciplines to meet the primary health-care needs of elderly adult clients and their families.

NURS-Y 515 Advanced Pathophysiology (4 cr.) Provides advanced knowledge of pathophysiology as the foundation for nursing management in the health care of adults.

NURS-Y 535 Dynamics of Family Health Care (3 cr.) Provides students with opportunities to study families within the community context. Consideration is given to theories of family functioning and roles in family health care, using family assessment tools and other nursing intervention strategies.

NURS-Y 550 Advanced Adult and Geriatric Health Assessment (3 cr.) Enables students to learn psychomotor skills required for performing physical examinations. This course also provides the theoretical basis to begin the process of physical diagnoses of health and illness. 5 clinical hrs./wk.

NURS-Y 552 Health Maintenance for Adults (5 cr.) Provides the basis for synthesizing health status information for nursing interventions aimed at helping adults and families to assume responsibility for the prevention of illness and the promotion and maintenance of health. 15 clinical hrs./wk.

NURS-Y 554 Advanced Nursing Management—Adult (2 cr.) Enables the student to use nursing research data and theoretical knowledge to support advanced nursing practice in primary health-care nursing.

NURS-Y 555 Collaborative Clinical Practice in Primary Health-Care Nursing (4 cr.) Provides opportunities for students to develop advanced clinical practice in primary health-care nursing. Seminar provides for the analysis of nursing management through care presentations. 20 clinical hrs./wk.

NURS-Y 556 Advanced Nursing Management of the Oncology Client (4 cr.) P: Y515, Y550, Y552, Y562, or consent of instructor. Provides the nurse practitioner concentrating in oncology with an overview of advanced nursing management for adults with cancer. Students will learn how to facilitate patient transition through screening and detection, diagnosis, acute care, rehabilitation, and the terminal phase. 5 clinical hrs./wk.

NURS-Y 562 Pathophysiology of Cancer (2 cr.) P: Y515, Y550, or consent of instructor. A pathophysiological approach to nursing care of clients with localized or invasive cancer.

NURS-Y 565 Interdisciplinary Practicum in Gerontology (3 cr.) P: Introductory/survey course in gerontology, Y512, and consent of instructor. Provides the student, as an advanced practitioner and interdisciplinary team member, with the opportunity to participate in the creation or change of health policies and/or programs affecting elderly people. Consists of a seminar and a practicum. 10 clinical hrs./wk.

NURS-Y 600 Clinical Reasoning & Diagnostic Processes in Advanced Practice Nursing (3 cr.) P: Y515, R500 or permission of instructor; C: C550, or Y550, or F570, or T550 depending on specialty major. Introduces students to clinical reasoning and diagnostic processes used in providing health care in primary and acute care settings. Students apply knowledge and skills from pathophysiology, physical assessment, and evidence based practice to decision making in direct patient care. Issues related to third party reimbursement, regulation and scope of practice, and the ethics of diagnostic decision making are included.

NURS-Y 612 Applied Pharmacology for Advanced Nursing Science (3 cr.) P: Admission to NP major or permission of instructor This guided online course focuses on pharmaceutics, pharmacokinetics, pharmacodynamics, pharmacoeconomics, and pharmacotherapeutic decision making for advanced practice nursing. This course builds on and advances understanding of anatomy, physiology, pathophysiology, physical assessment, microbiology, and pharmacology. Additionally, it emphasizes the history and foundational concepts related to pharmacotherapeutics, application of pharmacotherapeutic principles, and

synthesis of pharmacotherpeutics for advanced practice nursing.

Pre-Nursing Courses

NURS-A 100 Nursing: Drug Dosage Calculation (2 cr.) Provides a review of basic mathematics and presents a method of solving problems involving drug dosages. Course is open to those interested in nursing.

NURS-A 190 Special Topics in Nursing (1-3 cr.) P: Completion of all required course work noted or permission of instructor. Students will have an opportunity to pursue special topics of interest related to the professional practice of nursing. Topics will be offered on an as-needed basis.

NURS-A 192 Special Topics in Nursing: Practicum (1-3 cr.) P: Completion of all required course work noted or permission of instructor. Students will have an opportunity to pursue areas of nursing practice that complement their program of study. Course offerings will be based on resource availability.

NURS-B 104 Power Up: Strategies for Academic Success (3 cr.) This first-year course for students who have declared nursing as a major focuses on assisting students in gaining essential skills for academic success and in developing the ability to make use of university resources. Topics will include time management, stress management, critical thinking, development of networks of support, communication skills, learning styles, and academic responsibility. Teaching and learning strategies will incorporate campus technology and library resources as tools for completion of course requirements.

RN to MSN Mobility Option

NURS-B 490 RN–MSN Transition I (4 cr.) This course is designed to provide learning opportunities to acquire the knowledge and skills that are foundational to advanced practice nursing roles, and success in the masters program. Professional role development, evidence based practice, theories of community-based nursing, nursing leadership and management are analyzed in combination with related research and are applied to the nurse's evolving role in an era of health care reform. Learning opportunities emphasize the knowledge and skills needed to provide evidence based nursing care in complex health systems and in the community. Future trends for nursing's leadership, management, ethics, and social policy roles are examined, with particular emphasis placed on the impact of health care reform.

RN to BSN Degree Completion Program Courses

NURS-B 231 Communication Skills for Health-Care Professionals: RN BSN (3 cr.) This course addresses professional communication, inter/intra professional collaboration, and professional engagement to foster growth and development in nursing. This course also focuses on issues related to professional practice, theory, development and use, professional organization participation, service, continuing education, autonomy and accountability.

NURS-B 244 Comprehensive Health Assessment: RN BSN (3 cr.) This course focuses on the complete health assessment, the nursing process, and its relationship to the prevention and early detection of disease across the life span. Students learn the skills of interview, inspection/ observation, palpation, percussion, and auscultation in assessing clients across the life span and comparing normal from abnormal findings.

NURS-B 304 Professional Nursing Seminar I: Health Policy (3 cr.) (RN-BSN) Social, ethical, cultural, economic, and political issues that affect the delivery of health and nursing services globally are critically analyzed. Government and entrepreneurial interests are examined. Emphasis is placed on the impact of policy decisions on professional nursing practice and health services.

NURS-B 403 Gerontological Nursing (3 cr.) (RN-BSN) This course promotes a holistic approach to persons in the later years of life. Death and dying, legal and ethical issues, family care giving, and future challenges will be discussed in the context of best practices as outlined by the John A Hartford Foundation: Institute for Geriatric Nursing.

NURS-B 404 Professional Nursing Seminar II: Informatics (3 cr.) (RN-BSN) This course addresses nursing informatics: state of the science and issues for research, development, and practice. It clarifies concepts of nursing, technology, and information management; and comprises theory, practice, and the social and ethical issues in nursing and health care informatics.

NURS-H 355 Data Analysis in Clinical Practice and Health-Care Research (3 cr.) P: All fourth-semester nursing courses. (RN-BSN) This course introduces nursing and other health sciences students to the basic concepts and techniques of data analysis needed in professional health-care practice. Principles of measurement, data summarization, and univariate and bivariate statistics are examined. Differences in types of qualitative data and methods by which these types of data can be interpreted are also explored. Emphasis is placed on the application of fundamental concepts to real-world situations in client care.

NURS-H 365 Nursing Research (3 cr.) P: All fifth-semester nursing courses and H355 or its equivalent. (RN-BSN) This course focuses on development of students' skills in using the research process to define clinical research problems and to determine the usefulness of research in clinical decisions related to practice. The critique of nursing and nursing-related research studies will be emphasized in identifying applicability to nursing practice.

NURS-K 301 The Art and Science of Complementary Health (3 cr.) (RN-BSN) This course will serve as an introduction to a variety of complementary therapies, including healing touch, guided imagery, hypnosis, acupuncture, aromatherapy, reflexology, and massage. The class will critically examine each therapy through assigned readings, literature reviews, presentations, guest lecturers, and optional experiential activities.

NURS-K 304 Nursing Specialty Elective (3 cr.)

NURS-K 305 New Innovations in Health and Health Care (3 cr.) (RN-BSN) This course explores emergent trends in health and health care, including technological advances in health care, developing approaches to care based on new knowledge and/ or research findings, and trends in health care delivery in a themed, survey or independent study format.

NURS-K 499 Genetics and Genomics (3 cr.) (RN-BSN) This course introduces a basic knowledge of genetics in health care, including genetic variation and inheritance; ethical, legal, and social issues in genetic health care; genetic therapeutics; nursing roles; genetic basis of selected alterations to health across the life span; and cultural considerations in genetic health care are all considered.

NURS-P 216 Pharmacology (3 cr.) (RN-BSN) This course focuses on basic principles of pharmacology. It includes the pharmacologic properties of major drug classes and individual drugs, with an emphasis on the clinical application of drug therapy through the nursing process.

NURS-S 474 Applied Health-Care Ethics (3 cr.) P: All sixth-semester nursing courses. (RN-BSN) Building on the ANA Code of Ethics for Nurses, this course explores the nurse's role in ethical clinical practice, academic work, health policy, and research conduct, focusing particularly on the advocacy role of the nurse. Common ethical problems are discussed and strategies for resolution of ethical dilemmas are applied.

NURS-S 475 A Multisystem Approach to the Health of the Community (3 cr.) (RN-BSN) Basic epidemiological principles and community health nursing models are applied in collaboration with diverse groups. Disease prevention strategies are applied to individuals and populations to promote health. Students apply the concepts of community assessment, disease prevention, and health promotion to plan, implement, and evaluate interventions for populations in the community.

NURS-S 483 Clinical Nursing Practice Capstone (3 cr.) (RN-BSN) This course allows students to synthesize knowledge and skills learned in the baccalaureate program and to demonstrate competencies consistent with program outcomes and to refine their nursing practice skills. Students will plan and organize learning experiences, design a project, and practice professional nursing in a safe and effective manner.

NURS-S 487 Nursing Management (3 cr.) (RN-BSN) This course focuses on development of management skills assumed by professional nurses, including delegation of responsibilities, networking, and facilitation of groups, conflict resolution, leadership, case management, and collaboration. Concepts addressed include organizational structure, delivery systems, change, managing quality and performance, budgeting and resource allocation, staffing, scheduling, evaluation and career development.

IU School of Optometry

Welcome to the IU School of Optometry!

The IU School of Optometry is one of Indiana University's health profession schools and is located on the Indiana University Bloomington campus. The school has a strong clinical presence at its Indianapolis Eye Care Center near the IUPUI campus at 501 Indiana Avenue. It is expanding its clinical and research programs in cooperation with other IU health sciences programs, including the IU School of Medicine. The IU School of Optometry is also a collaborating partner with dentistry, medicine, nursing, allied health, public and environmental affairs, law, social work, and other schools and agencies in the graduate program in public health at IUPUI.

IU School of Optometry

Contact Information

Mission

The mission of the IU School of Optometry is to protect, advance, and promote the vision, eye care, and health of people worldwide by:

- Preparing individuals for careers in optometry, the ophthalmic industry, and vision science
- Advancing knowledge through teaching, research, and service.

Admission

Pre-Dental, Pre-Veterinary, and Pre-Optometry Programs

Admission to professional schools is highly competitive. The pre-professional student is therefore urged to elect a degree program rather than fulfilling the minimum requirements of these schools. Students who choose pre-dental, pre-veterinary medicine, and pre-optometry are usually placed in the Department of Biology, where pre-professional advising is available. Pre-dental students are also encouraged to meet with the health professions advisor in the School of Science to plan for the testing and admission process required by dental schools. Refer to the "Department of Biology" section of this bulletin for the required courses for the Indiana University School of Optometry and Purdue University School of Veterinary Medicine.

Graduate students holding non-science degrees who are electing courses in the School of Science to prepare for medical or dental school are also invited to use the health professions advising service for help with the admission process.

For more Admission information please refer to the website:

IU School of Optometry

Degree Programs

The school offers one of the best programs in the country for the education of optometrists. The American Optometric Association defines an optometrist as a primary health care provider who examines, diagnoses, treats, and manages diseases and disorders of the visual system. Students in the four-year Doctor of Optometry (O.D.) program study a rigorous curriculum that prepares them to provide outstanding eye care to all patients. The students learn to diagnose and treat patients with refractive errors, binocular vision problems, ocular diseases, and other eye-related problems. Practical experience is gained in the school's clinics in Indianapolis and Bloomington and on rotations to different clinical settings in and outside Indiana.

The school also provides education for professionals who complement the work of optometrists: opticians and optometric technicians. Students in the Optician/ Technician program at the IU School of Optometry earn a two-year Associate of Science (A.S.) degree.

They learn how to test visual acuity, depth perception, and field of vision, and how to help people select eyewear and learn to care for contact lenses. They also learn how to fill optical prescriptions and make spectacles. Opticians and optometric technicians are a valuable part of the eye care team.

Students interested in research can join the graduate program in vision science and study for the M.S. and Ph.D. degrees. This is an interdisciplinary program intended primarily for those who wish to prepare for teaching and/or research in the sciences related to vision. Students participate in research projects in such areas as ocular physiology, psychophysics, optics, corneal physiology, infant vision, contact lenses, and low vision. They work with world-renowned faculty members to add to the body of knowledge of the vision sciences.

Clinic Locations

The IU School of Optometry provides a broad range of clinical services for both the general public and the experience of its students. The **Atwater Eye Care Center**, located on the Bloomington campus, provides the public with primary vision care services, contact lens fitting and care, binocular vision diagnosis and treatment, and pediatric care.

The Community Eye Care Center is located on the west side of Bloomington. This busy clinic provides primary vision care, pediatric care, and experience in sports vision, low vision, and other aspects of vision care.

The Indianapolis Eye Care Center, located next to the IUPUI campus, provides primary eye care, contact lens care, low vision services, and pediatric care to the campus and to the general public.

The IU Eye Optometry Clinic is located in Carmel, Indiana. This clinic provides routine eye examinations, contact lenses, management of ocular disease, low vision services, and co-management of refractive surgery in conjunction with the IU School of Medicine Department of Ophthalmology.

The Guanajuato Eye Care Center is located in the Hospital General in the city of Guanajuato, Mexico, and is operated in cooperation with Mexico's Department of Infants and Family. Optometrists and students at this clinic provide primary eye care.

The Rural Clinics Program, with support from the Indiana State Department of Health, provides eye and vision care services to under-served, low-income residents of rural areas in five southern Indiana counties.

IU School of Optometry

Services

School of Optometry faculty members help to fulfill the school's mission by providing outstanding instruction. In addition, the school has excellent research facilities, both as part of its graduate program in vision science and as part of the Borish Center for Ophthalmic Research. There are many opportunities for students in both the doctor of optometry and graduate programs to participate in ongoing studies.

The school is also strongly committed to service for the general public and to the education of its students. Some of the activities include providing vision screenings to the homeless, eye care to uninsured/low-income patients, vision screenings in elementary schools, and helping to support new optometric education programs in other countries.

Students participate in many of these activities, on campus and in the community. Members of the School of Optometry community also travel with volunteers from organizations like Volunteer Optometric Service to Humanity to underdeveloped countries to provide examinations and eyewear to needy persons. This outreach effort led to the establishment of the school's clinic in Guanajuato, Mexico. Faculty, students, and staff join together to bring vision care to all people.

School of Physical Education and Tourism Management

Welcome to the IUPUI School of Physical Education and Tourism Management

Mission

The mission of the Indiana University School of Physical Education and Tourism Management capitalizes on its rich history and unique location in downtown Indianapolis to prepare future leaders in kinesiology and tourism by translating theory into practice.

The school's distinct culture and unique combination of disciplines foster innovative research, learning opportunities and civic engagement that enhance quality of life and economic development of local, national and global communities.

Last updated January 2012

Overview

History of the School of Physical Education and Tourism Management

The School of Physical Education and Tourism Management is the oldest unit at Indiana University Purdue University Indianapolis (IUPUI) and the oldest existing school in the country for the preparation of physical education teachers.

The school was founded in New York City in 1866 as the Normal College of the American Gymnastic Union. It was established by the American Turners to prepare instructors for their gymnastics societies.

The school moved to Chicago in 1871 only to be burned out by the great Chicago fire, which forced it to return to New York, where it remained until 1873. The school then moved to Milwaukee and finally settled in Indianapolis in 1907. During these years, the curriculum was continually expanded, from a four-month certificate program to a one-year, then a two-year, and eventually a four-year degree program. The curricular changes were in response to the ever-changing needs for trained professionals in other educational institutions.

The Normal College merged with Indiana University in 1941, when financial difficulties occurred. Under the merger, students attended the Normal College in Indianapolis for two years and completed their junior and senior years in Bloomington, where they earned the Bachelor of Science in Physical Education degree. This arrangement remained in effect until 1969, when the junior-year program was moved to Indianapolis, followed by the senior-year program in 1972. In the same year, the name of the college was changed to the School of Physical Education to reflect more closely the mission of the school as a training center for teachers of physical education. Since that time, the physical education curriculum has added majors in exercise science, fitness management and personal training, sports management, and pre–professional programs: pre-med, pre-physician assistant, and pre-occupational or physical therapy.

In 1994, the school assumed administrative responsibilities for the Purdue University Department of Restaurant, Hotel, Institutional and Tourism Management. In response to changing needs in the tourism industry, a new Indiana University degree in Tourism, Conventions and Event Management was approved in 1999. The growth of this degree program, as well as five certificate programs, resulted in another name change for the school to the School of Physical Education and Tourism Management.

Facilities

The School of Physical Education and Tourism Management and the Indiana University Natatorium share a $21.5 million facility located at 901 West New York Street on the main campus of IUPUI. The complex is divided into deck, concourse and bridge levels, covering approximately 200,000 gross square feet.

The deck level features weight-training and conditioning rooms, a 50-meter competitive pool, a diving pool, and a 50-meter instructional pool; the instructional pool is equipped with moveable bulkheads and floor so that the water depth may be adjusted to aid in instruction and recreation. A research suite for exercise physiology and biomechanics is also located on the deck level.

The concourse level of the physical education wing has a large gymnasium, an auxiliary gymnasium, racquetball courts and Informal Learning Laboratory.

The bridge level houses the administrative and faculty offices. From this level, an enclosed overhead pedestrian walkway connects the physical education complex with the Education/Social Work building across New York Street, where the three schools share classroom space.

Adjacent to the Physical Education/Natatorium building is an Olympic-caliber 400-meter track and field stadium, plus outdoor fields for instructional, recreational and competitive athletic events. The 28.7-acre outdoor facility also includes fields for softball, soccer and touch football.

The National Institute for Fitness and Sport (NIFS) was created in 1985. Dedicated to promoting healthy, active lifestyles through research, education and service, this nonprofit organization currently works in conjunction with the School of Physical Education and Tourism Management and other departments of the university. It occupies a $12 million, 120,000 square-foot facility located on the IUPUI campus and in White River State Park.

Department of Tourism, Conventions and Event Management information:
(317) 274-2248

Undergraduate Programs

The Department of Physical Education grants the Bachelor of Science in Physical Education degree and a Master's degree in Physical Education. Undergraduate students may select from five options (exercise science, exercise science with pre–occupational therapy/pre–physical therapy, pre-medical or physician assistance options, fitness management and personal training, sports management, and teacher education with physical education) and a variety of minors and certificates.

The Department of Tourism, Conventions and Event Management offers a four-year degree in Tourism, Conventions and Event Management. The program emphasizes tourism research and meeting, special event, and sports event planning to prepare graduates for management positions in a variety of profit and not-for-profit tourism organizations.

The Department of Military Science also resides in the School of Physical Education and Tourism Management.

Admission

Intercampus Transfers

Temporary

To transfer credit for an individual semester or for the summer from one campus to another campus of Indiana University, the student must file a temporary Intercampus Transfer Request through the Office of the Registrar at https://www.iupui.edu/~moveiu/ict.html.

Permanent

To transfer permanently from one campus to another campus of Indiana University, the student must file an Intercampus Transfer Application. Applications typically take 4-6 weeks to be processed. Please visit http://enroll.iupui.edu/admissions/undergraduate/transfer/intercampus.html for more detailed information, the application and deadline information.

Awards and Scholarships

School Awards and Scholarships

Dean's Honor List Students in the School of Physical Education and Tourism Management are recognized for outstanding academic achievement by having their names placed on the Dean's List. This award goes to all full-time students who have achieved a semester GPA of 3.5 or higher.

Phillip K. Hardwick Scholarship Established in 1998, this scholarship recognizes a student in the School of Physical Education and Tourism Management for outstanding community volunteerism or philanthropy.

P. Nicholas Kellum Scholarship This scholarship is awarded to a top junior in each academic department.

School of Physical Education and Tourism Management Freshman Scholarship Established by faculty gifts, this scholarship recognizes an outstanding entering freshman.

Swinford Scholarship (Students Attending Camp Brosius) Eligible students must be full-time with a minimum 2.5 GPA. Students should be enrolled for summer classes at Camp Brosius within their department. Students also must provide financial need and proof of summer employment.

Department of Physical Education Awards and Scholarships

Diversity Research Scholarship This scholarship is a one-year renewable scholarship that enables a beginning student to be matched with a faculty mentor for the purpose of establishing a comprehensive research program.

Athenaeum Turners Scholarship The Athenaeum Turners of Indianapolis established this scholarship to honor a physical education major who demonstrates academic excellence and professional promise. The School of Physical Education and Tourism Management was located at the Indianapolis Athenaeum from 1907 to 1970.

Frank and Loretta Feigl Scholarship Two $1,000 Frank and Loretta Feigl Scholarships are available for incoming freshman students who intend to study physical education teacher education.

The Clara L. Hester Scholarship This coveted award is presented in the name of the past director of the Normal College of the American Gymnastic Union. Clara Hester served the school for 44 years; the award was established in 1978 to honor her. It is given to a full time student majoring in physical education who has satisfied all academic criteria at the completion of their junior year. The recipient must use the award for academic programs in the Department of Physical Education at IUPUI.

Peg Hope Scholarship This scholarship is awarded to a student with a GPA of 2.5 or higher who demonstrates financial need and who has worked to defray the cost of his or her education.

Floyd and NiCole Keith Book Award The Department of Physical Education provides awards for book fees to Physical Education students (fall semester). Eligible applicants are sophomores or juniors majoring in a Department of Physical Education degree program. These students must have a cumulative GPA of 2.5 or higher.

Floyd and NiCole Keith Coaching Scholarship This scholarship is awarded to a sophomore or junior enrolled in the Department of Physical Education and planning to pursue a career in coaching or athletic administration. Students must have a 2.5 cumulative GPA or higher.

The John Jordan Scholarship Recognizes an outstanding active member who emulates John Jordan, an outstanding former member in the Alpha Chapter of Phi Epsilon Kappa.

The Lola L. Lohse Scholarship This scholarship is presented annually to a minority student who is majoring in physical education. The basis for the selection consists of involvement in extracurricular activities, student leadership, participation in professional organizations, and evidence of self#help in obtaining a college education. Selection is made by the faculty.

Rudolph L. Memmel Scholarship The Memmel Scholarship is given in honor and recognition of Rudolph

L. “Rudy” Memmel, former head of physical education for the Cincinnati, Ohio, Public Schools. Selection criteria include excellence of academic record and active involvement in activities related to the profession.

The Department of Physical Education Faculty Award The faculty presents this award to a graduating senior as a vote of confidence in a promising future within the profession. The award is based on scholarship performance; professional attitude toward physical education as a career; and service to the department, university, and community.

Physical Education Teacher Education Scholarship This scholarship is presented to an undergraduate student pursuing teacher education who is preparing to enter the student teaching aspect of their education. Selection criteria include excellence of academic record and the beginning of student teaching within the next academic year.

Dr. Carl B. Sputh Memorial Scholarship These memorial scholarships are presented annually to outstanding juniors enrolled full-time in the Department of Physical Education. The candidates are selected by faculty on the basis of scholastic achievement, character, need, and professional promise in the teaching of physical education.

The William A. Stecher Honor Award An outstanding graduating senior from the Department of Physical Education is recognized annually at the Commencement reception with this award. The candidate is selected by the faculty on the basis of scholarship, level of performance in physical activities, professional attitude, character, leadership, and service.

Ann Ritsert Schnurr and Katrina Schnurr Pierce Scholarship This scholarship supports out-of-state sophomore or junior physical education students. Candidates must achieve a GPA of 3.0 or higher.

Dr. Hitwant Sidhu Scholarship This scholarship honors an undergraduate physical education major with a GPA of 2.5 or higher who participates in voluntary service to the community, profession, education, or the university.

Jeff and Sue Vessely Scholarship This scholarship is awarded to an incoming freshman physical education major with an outstanding high school academic performance record.

Anna V. Wessel Memorial Scholarship The Anna V. Wessel Memorial Scholarship awards one incoming freshman female student with $10,000 for tuition and books. Qualified applicants participate in sports via youth, church, or school leagues.

Department of Tourism, Conventions and Event Management (TCEM) Awards and Scholarships

American Hotel Foundation Scholarship These scholarships are awarded to students who have demonstrated potential for leadership in hospitality management, have a minimum cumulative GPA of 3.0, and have financial need.

Brewers of Indiana Guild Scholarship The Department of Tourism, Conventions and Event Management awards the Brewers of Indiana Guild Scholarship to one student studying within the department. To be eligible, applicants must be enrolled as a Tourism, Conventions and Event Management major at IUPUI. Qualified applicants must have taken and achieved a semester grade above 90% in TCEM 328, Introduction to Microbrewing, or equivalent course. Priority consideration will be given to students who represent the top 10% majoring in Tourism, Conventions and Event Management.

Raymond A. Dault Care, Pride and Skill Scholarship In recognition of Raymond Dault’s leadership of the TCEM department and his devotion to students, two annual awards are given. One recipient is the freshman student who has earned the highest GPA. The second recipient is the student with the highest GPA on completion of the associate degree.

Bill Day Outstanding Tourism Scholarship and Award The scholarship recognizes a junior for academic achievement, extracurricular participation, and leadership potential. The award recognizes the graduating senior with the highest GPA.

Donald Durbin Memorial Scholarship Honors the memory of Donald Durbin, Indianapolis hotelier, by recognizing contributions.

Leo and Mary Durbin Scholarship This scholarship is awarded to a sophomore or junior student who is currently working in the hospitality industry and has a cumulative GPA of 2.5 or higher.

Bo L. Hagood Scholarship The scholarship recipient must be an incoming TCEM major with a high school GPA of 2.5 or higher.

Sara Hecht Memorial Scholarship In memory of Sara Hecht, a TCEM major, this scholarship is awarded to a student or to students enrolled in TCEM 306 or TCEM-L 391.

Bill and Joan McGowan Scholarship Recognizes sophomores or juniors with a cumulative GPA of 3.0 or higher who currently work or has worked in the tourism or hospitality industry.

Per Moller Scholarship This scholarship is awarded to a full-time student who has maintained a GPA of 3.0 or higher and is currently employed in the hospitality industry.

Edward and Amy Nefouse Scholarship Recognizes a TCEM major with a minimum cumulative GPA of 3.0.

Max M. Shapiro Restaurant Excellence Scholarship This scholarship recognizes an outstanding student and leader. Selection criteria include scholarship, potential for leadership in hospitality management, and commitment to the department and student organizations.

Elias and Fofo Stergiopoulos Scholarship This scholarship award goes to a full-time student in good academic standing who is currently employed in the hospitality industry and is committed to community service.

Dr. Violet White Scholarship The Department of Tourism, Conventions and Event Management awards the Dr. Violet White Scholarship to one student studying within the department who has aspirations of a career in

the tourism industry. To be eligible, applicants must be enrolled in the TCEM department at IUPUI.

Degree Programs

Bachelor of Science in Physical Education (B.S.P.E.)

- Exercise Science (Pre-Med, Pre-Occupational Therapy, Pre-Physician Assistant, Pre-Physical Therapy)
- Fitness Management and Personal Training
- Physical Education - Teacher Education
- Sports Management

Bachelor of Science (B.S.)

- Tourism, Conventions and Event Management

General Requirements

Policies Governing the Academic Program—School of Physical Education and Tourism Management

Degree Requirements

Students in the School of Physical Education and Tourism Management are responsible for fully understanding and meeting all the requirements for graduation. Information regarding the program can be obtained by consulting this bulletin.

A minimum cumulative grade point average (GPA) of 2.2 (on a 4.0 scale) is necessary. Class standing is based on credit hours completed:
Freshman—26 or fewer
Sophomore—27–55
Junior—56–85
Senior—86+

The Department of Physical Education requires a minimum of 124 credit hours for a Bachelor of Science degree. Within the physical education major, the department offers five plans of study (exercise science, exercise science with pre-med, pre-physician assistant, pre-occupational or physical therapy with pre–occupational and pre–physical therapy and pre–med options, fitness management and personal training, sports management, and teacher education, physical education and a certificate in personal training). A capstone practicum is a feature of each plan of study: student teaching, for teacher education majors, or an internship, for majors in all other plans of study. A minimum cumulative GPA of 2.5 is required for entry into the capstone course, and a minimum cumulative GPA of 2.2 is required to earn the bachelor's degree. A grade of C or higher is required in ENG-W 131, ENG-W 231/BUS-X 204 and COMM-R 110, and none of these courses may be taken by correspondence.

The exercise science plan of study is designed for the individual who wishes to work in the corporate/community fitness setting or to pursue a graduate degree in exercise science, biomechanics, physical therapy, occupational therapy, or a related health discipline. The fitness management and personal training plan of study is directed to those interested in personal fitness training, sports programming, entrepreneur activities related to fitness and sports, and related fields. The sports management plan of study prepares students for careers in the business and operational aspects of sporting activities. The teacher education plan of study prepares students to meet teacher education certification requirements set by the state of Indiana.

The Department of Tourism, Conventions and Event Management requires 124 credit hours for the Bachelor of Science degree.

The four-year degree requires a letter grade of C or higher in the general education courses of ENG-W 131, ENG-W 231 and COMM-R 110. The degree program requires 600 hours of work experience in a pre-approved tourism or hospitality organization. Students may complete the work experience with a paid or unpaid position.

Internship Programs

Internship Program in Exercise Science, Fitness Management and Personal Training and Sports Management

Students following the exercise science, fitness management and personal training and sports management plans of study complete an internship with a community agency approved by the School of Physical Education and Tourism Management. Prospective interns must have completed at least 30 semester hours in residence at IUPUI and at least 15 semester hours in the major. Students apply approximately one year before the expected internship placement. A minimum overall GPA of 2.5 is required at the time of the application. The internship assignment will entail full-time work for 12 weeks (summer, fall or spring). Only in rare and exceptional cases will students be allowed to participate in an internship at their previous or present place of employment.

Internship Program in Tourism, Conventions and Event Management (TCEM)

TCEM majors are required to complete a minimum of 600 hours of work experience in tourism/hospitality businesses. The internship should be completed after the sophomore year of attendance.

Bachelor of Science-Physical Education

Each student will select one of the following plans of study and will complete the requirements for that option: (1) exercise science; (2) exercise science (pre–occupational therapy, pre-physician assistance, pre–physical therapy, and premedical options); (3) fitness management and personal training; (4) sports management; and (5) teacher education (physical education).

- Exercise Science Plan of Study (124 credits)
- Exercise Science/Pre-Med Plan of Study (135 credits)
- Exercise Science/Pre-Occupational Therapy Plan of Study (124 credits)
- Exercise Science/Pre-Physical Therapy Plan of Study (125 credits)
- Fitness Management and Personal Training Plan of Study (125 credits)
- Sports Management Plan of Study (122-125 credits)
- Teacher Education Physical Education Plan of Study (125 credits)

- Other Programs Offered in Physical Education and Related Areas

Exercise Science Plan of Study

The exercise science plan of study will lead to a Bachelor of Science in Physical Education degree. It is designed to meet the needs of students who wish to pursue careers in a corporate/community fitness setting; a graduate degree in exercise science, biomechanics, occupational therapy, or physical therapy; or a career in a related health/wellness field. There are three categories of requirements in this program: (1) physical education; (2) general education; and (3) electives.

Physical Education Requirements

- HPER-L 135 Learning Community: Physical Education-Exercise Science (for new students & transfers with <15 hours) (1 cr.)
- HPER-H 160 First Aid and Emergency Care (3 cr.)
- HPER-N 220 Nutrition for Health (3 cr.)
- HPER-P 200 Microcomputer Applications in Kinesiology (3 cr.)
- HPER-P 205 Structural Kinesiology (3 cr.)
- HPER-P 212 Introduction to Exercise Science (3 cr.)
- HPER-P 215 Principles and Practice of Exercise Science (3 cr.)
- HPER-P 246 Performance & Teaching of Cardiovascular & Resistance Training (3 cr.)
- HPER-P 258 Activities for People with Special Needs (3 cr.)
- HPER-P 373 Resistance Exercise/Sports Conditioning* (3 cr.)
- HPER-P 374 Basic Electrocardiogram for Exercise Sciences* (2 cr.)
- HPER-P 391 Biomechanics* (3 cr.)
- HPER-P 393 Professional Practice Programs in Health, Physical Education and Recreation (Practical Experience)* (7 cr.)
- HPER-P 403 Theory and Practice of Cardiovascular Exercise* (3 cr.)
- HPER-P 405 Introduction to Sport Psychology* (3 cr.)
- HPER-P 409 Basic Physiology of Exercise* (3 cr.)
- HPER-P 410 Physical Activity Programming for Individuals with Disabilities and Other Special Populations* (3 cr.)
- HPER-P 417 Physical Activity and Disease: Prevention and Treatment* (3 cr.)
- HPER-P 419 Fitness Testing and Interpretation* (3 cr.)
- HPER-P 420 Exercise Leadership and Program Design for Apparently Healthy and Special Populations* (3 cr.)
- HPER-P 443 Internship: Physical Education (Internal capstone)* (3 cr.)
- HPER-P 452 Motor Learning* (3 cr.)
- Camp Brosius Leadership Training (3 cr.)

Total: 68 credit hours

* Go to School of Physical Education and Tourism Management website for list of prerequisites.

General Education Requirements

A. Humanities and Social/Behavioral Sciences (21 credit hours)

- COMM-R 110 Fundamentals of Speech Communication (C or higher required) (3 cr.)
- ENG-W 131 Elementary Composition (C or higher required) (3 cr.)
- ENG-W 231 Professional Writing Skills OR BUS-X 204 Business Communications (C or higher required) (3 cr.)
- PSY-B 110 Introduction to Psychology (3 cr.)

Elective Humanities and Social/Behavioral
(9 credit hours) Select at least one course outside of Communication/English. Select from:

- Anthropology (ANTH)
- Art (HER)
- Classical Studies (CLAS)
- Communication (COMM)
- Economics (ECON)
- English (ENG)
- Folklore (FOLK)
- Foreign Language
- Geography (non physical) (GEOG)
- History (HIST)
- HPER: P402, P411
- Journalism (JOUR)
- Music (MUS)
- Organizational Leadership and Supervision (OLS)
- Philosophy (PHIL)
- Political Science (POLS)
- Psychology (PSY)
- Religion (REL)
- Sociology (SOC)
- Women's Studies (WOST)

B. Life Science and Mathematics (27-28 credit hours)

- BIOL-N 261 Human Anatomy (5 cr.)
- BIOL-N 217 Human Physiology (5 cr.)
- MATH 15900 Pre-Calculus (5 cr.) OR MATH 15300 Algebra and Trigonometry I (3 cr.) AND MATH 15400 Algebra and Trigonometry II (3 cr.) may be substituted
- CHEM-C 105 Principles of Chemistry I (3 cr.)
- CHEM-C 125 Experimental Chemistry I (2 cr.)
- PHYS 21800 General Physics I (4 cr.)
- PSY-B 305 Statistics (3 cr.) OR STAT 30100 Elementary Statistical Methods (3 cr.)

C. Electives

Additional elective credits may be required to reach the 124 credit hour minimum required for the degree.

Exercise Science/Pre-Med Plan of Study

Students will earn a Bachelor of Science in Physical Education with an Exercise Science emphasis and will complete the additional courses and experiences typically needed for medical school admission.

Physical Education Requirements

- HPER-L 135 Learning Community: Physical Education-Exercise Science (for new students & transfers with <15 hours) (1 cr.)
- HPER-H 160 First Aid and Emergency Care (3 cr.)

- HPER-N 220 Nutrition for Health (3 cr.)
- HPER-P 200 Microcomputer Applications in Kinesiology (3 cr.)
- HPER-P 205 Structural Kinesiology (3 cr.)
- HPER-P 212 Introduction to Exercise Science (3 cr.)
- HPER-P 215 Principles and Practice of Exercise Science (3 cr.)
- HPER-P 246 Performance & Teaching of Cardiovascular & Resistance Training (3 cr.)
- HPER-P 258 Activities for People with Special Needs (3 cr.)
- HPER-P 373 Resistance Exercise/Sports Conditioning* (3 cr.)
- HPER-P 374 Basic Electrocardiogram for Exercise Sciences* (2 cr.)
- HPER-P 391 Biomechanics* (3 cr.)
- HPER-P 393 Professional Practice Programs in Health, Physical Education and Recreation (Practical Experience)* (7 cr.)
- HPER-P 403 Theory and Practice of Cardiovascular Exercise* (3 cr.)
- HPER-P 405 Introduction to Sport Psychology* (3 cr.)
- HPER-P 409 Basic Physiology of Exercise* (3 cr.)
- HPER-P 410 Physical Activity Programming for Individuals with Disabilities and Other Special Populations* (3 cr.)
- HPER-P 417 Physical Activity and Disease: Prevention and Treatment* (3 cr.)
- HPER-P 419 Fitness Testing and Interpretation* (3 cr.)
- HPER-P 420 Exercise Leadership and Program Design for Apparently Healthy and Special Populations* (3 cr.)
- HPER-P 443 Internship: Physical Education (Internal capstone)* (3 cr.)
- HPER-P 452 Motor Learning* (3 cr.)
- Camp Brosius Leadership Training (3 cr.)

Total: 68 credit hours

* Go to School of Physical Education and Tourism Management website for list of prerequisites.

General Education Requirements

A. Humanities and Social/Behavioral Sciences (21 credit hours)

- COMM-R 110 Fundamentals of Speech Communication (C or higher required) (3 cr.)
- ENG-W 131 Elementary Composition (C or higher required) (3 cr.)
- ENG-W 231 Professional Writing Skills OR BUS-X 204 Business Communications (C or higher required) (3 cr.)
- PSY-B 110 Introduction to Psychology (3 cr.)

Elective Humanities and Social/Behavioral (9 hours) Select at least one course outside of Communication/ English. Select from:

- Anthropology (ANTH)
- Art (HER)
- Classical Studies (CLAS)
- Communication (COMM)
- Economics (ECON)
- English (ENG)
- Folklore (FOLK)
- Foreign Language
- Geography (non physical) (GEOG)
- History (HIST)
- HPER: P402, P411
- Journalism (JOUR)
- Music (MUS)
- Organizational Leadership and Supervision (OLS)
- Philosophy (PHIL)
- Political Science (POLS)
- Psychology (PSY)
- Religion (REL)
- Sociology (SOC)
- Women's Studies (WOST)

B. Life Science and Mathematics (27 credit hours)

- BIOL-K 101 Concepts of Biology I (5 cr.)
- MATH 15900 Pre-Calculus (5 cr.) OR MATH 15300 Algebra and Trigonometry I (3 cr.) AND MATH 15400 Algebra and Trigonometry II (3 cr.) may be substituted
- CHEM-C 105 Principles of Chemistry I (3 cr.)
- CHEM-C 125 Experimental Chemistry I (2 cr.)
- PHYS 21800 General Physics I (4 cr.)
- PSY-B 305 Statistics (3 cr.) OR STAT 30100 Elementary Statistical Methods (3 cr.)

C. Additional Required Prerequisites for Pre-Med Program (23 cr.)

- CHEM-C 106 Principles of Chemistry II (3 cr.)
- CHEM-C 126 Experimental Chemistry II (2 cr.)
- CHEM-C 341 Organic Chemistry 1 Lectures (3 cr.)
- CHEM-C 343 Organic Chemistry Laboratory 1 (2 cr.)
- CHEM-C 342 Organic Chemistry Lectures 2 (3 cr.)
- CHEM-C 344 Organic Chemistry Laboratory 2 (2 cr.)
- PHYS 21900 General Physics II (4 cr.)
- BIOL-K 103 Concepts of Biology II (5 cr.)

Exercise Science/Pre-Occupational Therapy Plan of Study

Students will earn a Bachelor of Science in Physical Education with an Exercise Science emphasis and will complete the additional courses and experiences required to apply for graduate-level occupational therapy degree programs. For further information about the IUPUI Master of Science in Occupational Therapy Program, contact the School of Health and Rehabilitation Sciences (formerly the School of Allied Health Sciences), (317) 274-7238, www.shrs.iupui.edu.

Physical Education Requirements

- HPER-L 135 Learning Community: Physical Education-Exercise Science (for new students & transfers with <15 hours) (1 cr.)
- HPER-H 160 First Aid and Emergency Care (3 cr.)
- HPER-N 220 Nutrition for Health (3 cr.)
- HPER-P 200 Microcomputer Applications in Kinesiology (3 cr.)
- HPER-P 205 Structural Kinesiology (3 cr.)
- HPER-P 212 Introduction to Exercise Science (3 cr.)

- HPER-P 215 Principles and Practice of Exercise Science (3 cr.)
- HPER-P 246 Performance & Teaching of Cardiovascular & Resistance Training (3 cr.)
- HPER-P 258 Activities for People with Special Needs (3 cr.)
- HPER-P 373 Resistance Exercise/Sports Conditioning* (3 cr.)
- HPER-P 374 Basic Electrocardiogram for Exercise Sciences* (2 cr.)
- HPER-P 391 Biomechanics* (3 cr.)
- HPER-P 393 Professional Practice Programs in Health, Physical Education and Recreation (Practical Experience)* (7 cr.)
- HPER-P 403 Theory and Practice of Cardiovascular Exercise* (3 cr.)
- HPER-P 405 Introduction to Sport Psychology* (3 cr.)
- HPER-P 409 Basic Physiology of Exercise* (3 cr.)
- HPER-P 410 Physical Activity Programming for Individuals with Disabilities and Other Special Populations* (3 cr.)
- HPER-P 417 Physical Activity and Disease: Prevention and Treatment* (3 cr.)
- HPER-P 419 Fitness Testing and Interpretation* (3 cr.)
- HPER-P 420 Exercise Leadership and Program Design for Apparently Healthy and Special Populations* (3 cr.)
- HPER-P 443 Internship: Physical Education (Internal capstone)* (3 cr.)
- HPER-P 452 Motor Learning* (3 cr.)
- Camp Brosius Leadership Training (3 cr.)

Total: 68 credit hours

*Go to School of Physical Education and Tourism Management website for list of prerequisites.

General Education Requirements

A. Humanities and Social/Behavioral Sciences (21 credit hours)

- COMM-R 110 Fundamentals of Speech Communication (C or higher required) (3 cr.)
- ENG-W 131 Elementary Composition (C or higher required) (3 cr.)
- ENG-W 231 Professional Writing Skills OR BUS-X 204 Business Communications (C or higher required) (3 cr.)
- PSY-B 110 Introduction to Psychology (3 cr.)

Elective Humanities and Social/Behavioral (9 credit hours) Select at least one course outside of Communication/English. Select from:

- Anthropology (ANTH)
- Art (HER)
- Classical Studies (CLAS)
- Communication (COMM)
- Economics (ECON)
- English (ENG)
- Folklore (FOLK)
- Foreign Language
- Geography (non physical) (GEOG)
- History (HIST)
- HPER: P402, P411
- Journalism (JOUR)
- Music (MUS)
- Organizational Leadership and Supervision (OLS)
- Philosophy (PHIL)
- Political Science (POLS)
- Psychology (PSY)
- Religion (REL)
- Sociology (SOC)
- Women's Studies (WOST)

B. Life Science and Mathematics (27 credit hours)

- BIOL-N 261 Human Anatomy** (5 cr.)
- BIOL-N 217 Human Physiology** (5 cr.)
- MATH 15900 Pre-Calculus (5 cr.) OR MATH 15300 Algebra and Trigonometry I (3 cr.) AND MATH 15400 Algebra and Trigonometry II (3 cr.) may be substituted
- CHEM-C 105 Principles of Chemistry I (3 cr.)
- CHEM-C 125 Experimental Chemistry I (2 cr.)
- PHYS 21800 General Physics I (4 cr.)
- PSY-B 305 Statistics** (3 cr.) OR STAT 30100 Elementary Statistical Methods** (3 cr.)

C. Additional Required Prerequisites for Pre-OT Program (7-8 credit hours)

- CLAS-C 209 Medical Terms from Greek and Latin (2 cr.) OR RADI-R 108 Medical Terminology (1 cr.)
- PSY-B 310 Life Span Development (3 cr.)
- PSY-B 380 Abnormal Psychology (3 cr.)

D. Electives

Additional elective credits may be required to reach the 124 credit hour minimum required for the degree.

The IUPUI Master of Science in Occupational Therapy Program strongly recommends that students volunteer or observe at two or more occupational therapy sites before applying to the program.

**BIOL and statistics classes must be taken no more than seven years prior to entry into the IUPUI Master of Science in Occupational Therapy Program.

Exercise Science/Pre-Physical Therapy Plan of Study

Students will earn a Bachelor of Science in Physical Education with an Exercise Science emphasis and will complete the additional courses and experiences required to apply for graduate-level physical therapy degree programs. Graduate-level physical therapy programs require completion of any undergraduate major; completion of specific pre–physical therapy prerequisite courses (primarily math and science) and experiences (documented volunteer or paid activity in physical therapy-related settings under supervision of an approved physical therapist); and high grade point average (minimum 3.2 overall; minimum 3.2 in biology, chemistry, psychology, physics and statistics courses). For further information about the IUPUI Doctor of Physical Therapy Program, contact the School of Health and Rehabilitation Sciences (formerly the School of Allied Health Sciences) at (317) 274-7238, www.shrs.iupui.edu.

Physical Education Requirements

- HPER-L 135 Learning Community: Physical Education-Exercise Science (for new students & transfers with <15 hours) (1 cr.)

C. Additional Required Prerequisites for the Doctoral of Physical Therapy Program (13-14 credit hours)

- CHEM-C 106 Principles of Chemistry II (3 cr.)
- CHEM-C 126 Experimental Chemistry II (2 cr.)
- CLAS-C 209 Medical Terms from Greek and Latin (2 cr.) OR RADI-R 108 Medical Terminology (1 cr.)
- PHYS 21900 General Physics II (4 cr.)
- PSY-B 310 Life Span Development (3 cr.)

Fitness Management and Personal Training Plan of Study

This plan of study will lead to a Bachelor of Science in Physical Education degree. It is directed to those students who are interested in pursuing positions in personal fitness training, recreational fitness, and related areas.

Physical Education Requirements

- HPER-L 135 Learning Community: Physical Education-Exercise Science (for new students & transfers with <15 hours) (1 cr.)
- HPER-H 160 First Aid and Emergency Care (3 cr.)
- HPER-H 180 Stress Prevention and Management (3 cr.)
- HPER-H 195 Principles/Applications of Lifestyle Wellness (3 cr.)
- HPER-H 350 Complementary/Alternative Approaches to Health (3 cr.)
- HPER-H 363 Personal Health (3 cr.)
- HPER-N 220 Nutrition for Health (3 cr.)

- HPER-P 200 Microcomputers Applications in Kinesiology (3 cr.)
- HPER-P 205 Structural Kinesiology (3 cr.)
- HPER-P 212 Introduction to Exercise Science (3 cr.)
- HPER-P 215 Principles and Practice of Exercise Science (3 cr.)
- HPER-P 246 Performance & Teaching of Cardiovascular & Resistance Training (3 cr.)
- HPER-P 258 Activities for People with Special Needs (1 cr.)
- HPER-P 373 Resistance Exercise/Sports Conditioning* (3 cr.)
- HPER-P 393 Professional Practice Programs in Health, Physical Education and Recreation (Practical Experience)* (7 cr.)
- HPER-P 397 Kinesiology* (3 cr.)
- HPER-P 403 Theory and Practice of Cardiovascular Exercise* (3 cr.)
- HPER-P 405 Introduction to Sport Psychology* (3 cr.)
- HPER-P 409 Basic Physiology of Exercise* (3 cr.)
- HPER-P 410 Physical Activity Programming for Individuals with Disabilities and Other Special Populations* (3 cr.)
- HPER-P 416 Fitness Management* (3 cr.)
- HPER-P 417 Physical Activity and Disease: Prevention and Treatment* (3 cr.)
- HPER-P 419 Fitness Testing and Interpretation* (3 cr.)
- HPER-P 420 Exercise Leadership and Program Design for Apparently Healthy and Special Populations* (3 cr.)
- HPER-P 443 Internship: Physical Education (Internal capstone)* (3 cr.)
- Camp Brosius Leadership Training (3 cr.)

*=Prerequisites. Go to School of Physical Education and Tourism Management website for list of prerequisites.

Total: 78 credit hours

General Education Requirements

A. Humanities and Social/Behavioral Sciences (21 credit hours)

- COMM-C 180 Introduction to Interpersonal Communications (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (C or higher required) (3 cr.)
- ENG-W 131 Elementary Composition (C or higher required) (3 cr.)
- ENG-W 231 Professional Writing Skills OR BUS-X 204 Business Communications (C or higher required) (3 cr.)
- PSY-B 110 Introduction to Psychology (3 cr.)

Elective Humanities and Social/Behavioral (6 hours)--Select at least one course outside of Communication/English. Select from:

- Anthropology (ANTH)
- Art (HER)
- Classical Studies (CLAS)
- Communication (COMM)
- Economics (ECON)
- English (ENG)
- Folklore (FOLK)
- Foreign Language
- Geography (non physical) (GEOG)
- History (HIST)
- HPER: P402, P411
- Journalism (JOUR)
- Music (MUS)
- Organizational Leadership and Supervision (OLS)
- Philosophy (PHIL)
- Political Science (POLS)
- Psychology (PSY)
- Religion (REL)
- Sociology (SOC)
- Women's Studies (WOST)

B. Science and Mathematics (11 credit hours)

- BIOL-N 212 Human Biology (3 cr.)
- BIOL-N 213 Human Biology Lab (1 cr.)
- BIOL-N 214 Human Biology (3 cr.)
- BIOL-N 215 Human Biology Lab (1 cr.)
- STAT 11300 Statistics and Society (3 cr.)

C. Business Related Courses (9 credit hours)

- BUS-M 226 Personal Selling Techniques (3 cr.) OR BUS-M 200 Marketing and Society: Roles/Responsibilities (3 cr.)
- BUS-F 260 Personal Finance (3 cr.) OR BUS-F 200 Foundations of Financial Management (3 cr.)
- OLS 252 Human Behavior in Organizations

D. Suggested Electives (6 credit hours): Choose two of the courses listed below:

- COMM-C 392 Health Communication (3 cr.)
- FN 33000 Diet Selection and Planning (3 cr.)
- HPER-H 317 Topical Seminar in Health Education (Topic examples include program planning, health coaching, etc.) (3 cr.)
- PBHL-A 322 Principles of Epidemiology (3 cr.)
- PSY-B 365 Stress and Health (3 cr.)
- PSY-B 356 Motivation (3 cr.)
- SHRS-W 361 Health Promotion and Disease Prevention (3 cr.)

Sports Management Plan of Study

This program will lead to a Bachelor of Science in Physical Education degree. Included in this plan of study is a business component: students must complete either the Business Foundations Certificate (21 cr.) or the Business Minor (21 cr.) through the Kelley School of Business. Details of the business component are available on the Kelley School of Business website, kelley.iupui.edu/undergrad/Curriculum.cfm.

Physical Education Requirements

- HPER-L 135 Learning Community: Physical Education-Exercise Science (for new students & transfers with <15 hours) (1 cr.)
- HPER-H 160 First Aid and Emergency Care (3 cr.)
- HPER-P 200 Microcomputer Applications in Kinesiology (3 cr.) OR BUS-K 201 The Computer in Business (3 cr.)
- HPER-P 211 Principles and Practice of Exercise Science (3 cr.)

- HPER-P 215 Principles and Practice of Exercise Science (3 cr.)
- HPER-P 392 Sport in American Society (3 cr.)
- HPER-P 393 Professional Practice Programs in Health, Physical Education and Recreation (Practical Experience) (7 cr.)
- HPER-P 402 Ethics in Sport (3 cr.)
- HPER-P 411 Legal Aspects of Sport and Risk Management (3 cr.)
- HPER-P 415 Sport Promotions and Public Relations (3 cr.)
- HPER-P 418 Sport Marketing (3 cr.)
- HPER-P 423 Financial Principles of Sport (3 cr.)
- HPER-P 426 Sales Management in Sport (3 cr.)
- Course # Sports Management Consulting Project (3 cr.)
- TCEM 219 Management of Sports Events (3 cr.)
- Camp Brosius Leadership Training (3 cr.)

Total: 53 credit hours

Business Requirements

Sport Management majors must complete either Business Minor or Business Foundations Certificate.

Business Minor (21-24 credit hours)

- BUS-A 200 Foundations of Accounting (3 cr.)
- BUS-K 201 The Computer in Business (3 cr.)
- BUS-L 203 Commercial Law I (3 cr.)
- BUS-F 300 Introduction to Financial Management (3 cr.)
- BUS-M 300 Introduction to Marketing (3 cr.)
- BUS-P 300 Introduction to Operations Management (3 cr.)
- BUS-D 301 International Business Environment (3 cr.) OR BUS-Z 302 Managing and Behavioral in Organizations (3 cr.) OR BUS-Z 311 Leadership and Ethics in the Business Environment (3 cr.) AND BUS-Z 312 Human Resources and Negotiations (3 cr.)

Business Foundations Certificate (21 credit hours)

- BUS-A 186 Accounting and the Business Environment (3 cr.)
- BUS-W 200 Introduction to Business and Management (3 cr.)
- BUS-M 200 Marketing and Society: Roles/ Responsibilities (3 cr.)
- BUS-Z 200 Introduction to Human Resources Practices (3 cr.)
- BUS-F 200 Foundations of Financial Management (3 cr.)
- BUS-P 200 Foundations of Operations and Supply Chain Management (3 cr.)

Choose one of the following:

- BUS-L 100 Personal Law (3 cr.)
- BUS-F 260 Personal Finance (3 cr.)
- ECON-E 101 Survey of Economic Issues/Problems (3 cr.)
- BUS-K 201 The Computer in Business (3 cr.)
- BUS-X 204 Business Communications (3 cr.)
- BUS-M 226 Personal Selling Techniques (3 cr.)

General Education Requirements

A. Humanities (9 credit hours)

- COMM-R 110 Fundamentals of Speech Communication (3 cr.)
- ENG-W 131 Elementary Composition (3 cr.)
- ENG-W 231 Professional Writing Skills OR BUS-X 204 Business Communications (3 cr.)

A grade of C or higher is required in COMM-R 110, ENG-W 131 and ENG-W 231 or BUS-X 204, and none of these may be taken by correspondence.

B. Science, Mathematics and Technology (6 credit hours)

- MATH-M 119 Brief Survey of Calculus I (3 cr.)
- SPEA-K 300 Statistical Techniques (3 cr.) OR PSY-B 305 Statistics (3 cr.) OR STAT 30100 Elementary Statistical Methods (3 cr.) OR ECON-E 270 Introduction to Statistical Theory Economics and Business (3 cr.)

C. Social and Behavioral Sciences (15 credit hours minimum)

- SOC-R 100 Introduction to Sociology (3 cr.)
- ECON-E 201 Introduction to Microeconomics (3 cr.)
- ECON-E 202 Introduction to Macroeconomics (3 cr.)
- PSY-B 110 Course Title (3 cr.)
- OLS 25200 Human Behavior in Organizations (3 cr.)

D. Suggested Electives (21-24 credit hours)

- HPER-P 333 Sport in America: History Perspective (3 cr.)
- HPER-H 363 Personal Health (3 cr.)
- HPER-N 220 Nutrition for Health (3 cr.)
- HPER-P 331 Planning and Operation of Sports Facilities (3 cr.)
- HPER-P 324 Recreational Sports Programming (3 cr.)
- HPER-P 484 Interscholastic Athletic Administration (2 cr.)
- HPER-P 421 Special Topics in Physical Education (Summer Study Abroad Program) (3 cr.)
- TCEM 231 Tourism and Hospitality Marketing (3 cr.)
- TCEM 252 Promotional Communications (3 cr.)
- JOUR-J 321 Principles of Public Relations (3 cr.)
- MSTE 31000 Business of Motorsports I (3 cr.)
- MSTE 31100 Business of Motorsports II (3 cr.)
- INFO-I 475 Informatics in Sports (3 cr.)
- SPEA-V 362 Nonprofit Management and Leadership (3 cr.)
- SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)
- BUS-W 212 Explore Entrepreneurship (3 cr.)
- BUS-W 311 New Venture Creation (3 cr.)
- BUS-D 301 International Business Environment (3 cr.)

- *HPER-P 200 may substitute for BUS-K 201 in the Business Minor; BUS-K 201 is required for the Business Certificate.

Teacher Education Physical Eduation and Health Education Plan of Study

This program will lead to a Bachelor of Science in Physical Education degree and Indiana teaching certification in health education and physical education (dual licensure) at the elementary, junior high/middle school, and high school levels.

Physical Education Requirements

Students must pass a departmental swimming test; if necessary, students must take lessons or class, then retest.

Elective HPER activity class: (1 cr.) Students must obtain advance approval from academic advisor; activity should be new to the student. Elective dance class requirement does not meet this requirement.

- HPER-L 135 Learning Community: Physical Education-Exercise Science (1 cr.)
- HPER-H 160 First Aid & Emergency Care (3 cr.)
- HPER-H 163 Introduction to Health Education (3 cr.)
- HPER-N 220 Nutrition for Health (3 cr.)
- HPER-P 157 Teaching Individual & Team Activities (3 cr.)
- HPER-P 195 History & Principles of Physical Education (3 cr.)
- HPER-P 200 Microcomputer Applications in Kinesiology (3 cr.) (grade of C or higher required)
- HPER-P 204 Motor Development (3 cr.)
- HPER-P 205 Structural Kinesiology (3 cr.)
- HPER-P 215 Principles & Practice of Exercise Science (3 cr.)
- HPER-P 224 Teaching of Dance Activities (2 cr.)
- HPER-P 246 Performance & Teaching of Cardio & Resistance Training (3 cr.)
- HPER-P 271 Individual Sport (1 cr.)
- HPER-P 258 Performance & Teaching of Activities for Persons with Special Needs (1 cr.)
- HPER-P 290 Movement Experiences for Preschool & Elementary Children (2 cr.)
- HPER-P 390 Growth & Motor Performance of School-Age Youth K-12 (2 cr.)
- HPER-P 397 Kinesiology (3 cr.)
- HPER-P 398 Adapted Physical Education (3 cr.)
- HPER-P 405 Introduction to Sport Psychology (3 cr.)
- HPER-P 409 Basic Physiology of Exercise (3 cr.)
- HPER-P 411 Legal Issues in Sport Settings (3 cr.)
- HPER-P 452 Motor Learning (3 cr.)
- HPER-P 493 Tests & Measurements in Physical Education (3 cr.)
- HPER-P 495 Laboratory Teaching in Physical Education Program (1 cr.)
- HPER-P 497 Organizational & Curricular Structures of Physical Education K-12 (2 cr.)
- HPER-R 275 Dynamics of Camp Leadership (2 cr.)
- HPER-F 255 Human Sexuality (3 cr.)
- HPER-H 317 Special Topics: Instructional Strategies in Health Education (3 cr.)
- HPER-H 318 Drug Use in American Society (3 cr.) OR HPER-H 517 Student Assistance Program I (3 cr.)
- HPER-H 464 Coordinated School Health Program (3 cr.)

Health elective: Select 6 credits from HPER-F 258 Marriage and Family Interaction, HPER-H 180 Stress Prevention & Management, HPER-H 317 Health & Wellness Summer Institute, HPER-H 414/515 Health Education in Grades K-8 OR other course approved in advance by department chair or health education faculty.

Total: 87 credit hours

General Education Requirements

A. Humanities (9 cr.)--A grade of C or higher is required. None of these may be taken by correspondence.

- COMM-R 110 Fundamentals of Speech Communication (3 cr.)
- ENG-W 131 Elementary Composition (3 cr.)
- ENG-W 231 Professional Writing Skills OR BUS-X 204 Business Communications (3 cr.)

B. Life Science and Mathematics (8 cr.)

- BIOL-N 214 + BIOL-N 215 Human Biology (4 cr.)
- STAT 11300 Statistics and Society (3 cr.) OR more advanced mathematics course

C. Social and Behavioral Sciences (9 cr. minimum)

- ANTH-A 104 Culture and Society (3 cr.) OR similar cross-cultural course approved in advance
- PSY-B 104 Psychology as a Social Science (3 cr.)

Electives: Choose 3 credit hours from one of the following departments:

- Economics
- Geography (nonphysical)
- History
- Organizational Leadership and Supervision (OLS 252, OLS 274)
- Political Science
- Sociology
- Women's Studies

Total: 26 credit hours

Professional Education Requirements

Students must be admitted to the School of Education teacher education program to enroll in these courses. October 7 and February 10 are the deadlines for submission of teacher education applications to the School of Education. Students must pass three assessment benchmarks in addition to meeting grade point requirements. Courses must be taken in the prescribed sequence and are offered only in the daytime and in fall and summer semesters. Grades of C are required in all classes; however, a grade point average (GPA) of 2.5 or higher is required throughout the professional education courses. See the School of Education Web site (education.iupui.edu) for further details.

- EDUC-M 301 Diversity & Learning Field Experience (1 cr.)
- EDUC-M 303 Teaching & Learning in the Middle School Field Experience (1 cr.)
- EDUC-M 322 Diversity & Learning: Reaching Every Adolescent (6 cr.)
- EDUC-M 408 Methods of Teaching Physical Education Field Experience (1 cr.)

- EDUC-M 425 Student Teaching in the Elementary School (8 cr.) OR EDUC-M 451 Student Teaching in Junior High/Middle School (8 cr.)
- EDUC-M 451 Student Teaching/Secondary School (8 cr.)
- EDUC-M 456 Methods of Teaching Physical Education (3 cr.)
- EDUC-M 469 Content Area Literacy (3 cr.)
- EDUC-S 420 Teaching & Learning in the Middle School (3 cr.)

Total: 33 credit hours

D. Electives (optional)

Other Programs Offered in Physical Education and Related Areas

Adapted Physical Education Minor

This program and its curriculum are under revision. The adapted physical education program will prepare the physical educator to design and develop programs for special populations in school and community settings. Upon completion, the revised program will offer students the opportunity to earn dual teacher certification in physical education and in adapted physical education. For further information, contact Dr. Katie Stanton-Nichols, Department of Physical Education, kstanton@iupui.edu, and review the material in the "Adapted Physical Education" section of www.iupui.edu/~indyhper/pe_degrees.htm.

Dance Minor

This program is under revision. The dance minor provides students with experiences in dance performance, choreography and production, movement theory and the related arts, and teaching. For further information, contact the chairperson of the Department of Physical Education at (317) 274-2248; pedept@iupui.edu.

Health Education Minor (18 credit hours)

This program is open to all IUPUI students, regardless of major. This program allows students to obtain foundational knowledge and skills about healthy lifestyles, prevention of disease and optimal living through wellness behaviors. The students will add a health component to their academic base for careers in various fields such as wellness coaching, teaching, nursing, social work or tourism.

Required courses

- HPER-H 195 Principles & Applications of Lifestyle Wellness (3 cr.)
- HPER-N 220 Nutrition for Health (3 cr.)
- HPER-H 366 Health Problems in the Community (3 cr.)
- HPER-P 215 Principles & Practices of Exercise Science (3 cr.) OR HPER-P 216 Current Concepts & Applications in Physical Fitness (3 cr.)

Total: 12 credit hours

Elective courses--Select 2 courses from this list:

- HPER-F 258 Marriage & Family Interaction (3 cr.)
- HPER-F 255 Human Sexuality (3 cr.)
- HPER-H 180 Stress Prevention & Management (3 cr.)
- HPER-H 305 Women's Health (3 cr.)
- HPER-H 315 Consumer Health (3 cr.)
- HPER-H 317 Workshop in Health Education (3 cr.)
- HPER-H 318 Drug Use in American Society (3 cr.)
- HPER-H 350 Complementary/Alternative Approaches to Health (3 cr.)
- HPER-H 352 Secondary School Health Curriculum & Instruction (3 cr.)
- HPER-H 363 Personal Health (3 cr.)
- HPER-H 464 Coordinated School Health Programs (3 cr.)

Total: 6 credit hours

Coaching Endorsement

This program is under revision. For details, contact the Department of Physical Education at (317) 274-2248; pedept@iupui.edu.

Certificate in Personal Training

This certificate provides individuals with a basic understanding of the principles of personal training and prepares them for two national certification exams: the Exercise Leader Certificate of the American College of Sports Medicine and Certified Personal Trainer from the National Strength and Conditioning Association. Currently there are no state or national licensing requirements for personal trainers. All courses in the certificate curriculum apply to the exercise science degree.

Prerequisites: Admission to IUPUI.

- HPER-P 205 Structural Kinesiology (3 cr.)
- HPER-P 215 Principles and Practice of Exercise Science (3 cr.)
- HPER-N 220 Nutrition for Health (3 cr.)
- HPER-P 246 Performance & Teaching of Cardiovascular & Resistance Training (3 cr.)
- HPER-P 373 Resistance Exercise and Sports Conditioning (3 cr.)
- HPER-P 403 Theory and Practice of Cardiovascular Exercise (3 cr.)
- Anatomy and Physiology: BIOL-N 212 + N 213 + N 214 + N 215; or BIOL-N 261 + N 217; or BIOL-K 101 + K 103 (8 or 10 cr.)

Total: 26-28 credit hours

A grade of C or better is required in all certificate courses.

Department of Tourism, Conventions and Event Management Degree Programs

- Bachelor of Science in Tourism, Conventions and Event Management (IU degree)
- Cultural Heritage Tourism Certificate (IU)
- Food Production Management Certificate (Purdue)
- Lodging Management Certificate (Purdue)
- Beverage Management Certificate (Purdue)
- Events Management Certificate (IU)
- Health Tourism Certificate (IU)
- Travel Planning Certificate (IU)

- Sports Tourism Development (IU)
- Consumer and Family Science Transfer Program

Bachelor of Science in Tourism, Conventions and Event Management (IU degree)

This program will lead to a Bachelor of Science degree. Graduates are qualified to be employed in different segments of the tourism industry: research, destination development, adventure travel, festivals, events, travel management, entertainment, attractions, transportation, accommodations, and/or food operations. Upon completion of the degree, students will be able to:

1. Define, apply, analyze and execute operational principles of tourism and event management.
2. Perform effective oral and written communication skills.
3. Address and analyze tourism sustainability and trends both critically and reflectively.
4. Work efficiently and productively with persons from different cultures and backgrounds.
5. Demonstrate ethical behavior and leadership skills to solve issues in a tourism-related environment.
6. Advance best practices in the tourism and event profession.
7. Practice a sense of community and civic mindedness.

General Education Requirements

- ENG-W 131 English Composition I (3 cr.) (C or higher)
- ENG-W 231 Professional Writing Skills (3 cr.) (C or higher)
- ENG-W 331 Business and Administrative Writing (3 cr.) OR COMM-R 320 Public Communication (3 cr.) OR COMM-C 325 Interviewing Principles and Practices (3 cr.) OR COMM-C 482 Inter-Cultural Communication (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.) (C or higher)
- PSY-B 110 Course Title (3 cr.)
- PSY elective (300 level) (3 cr.)
- ECON-E 201 Introduction to Microeconomics (3 cr.)
- PHIL-P 162 Logic (3 cr.)
- MATH-M 118 Finite Mathematics (3 cr.)
- SPEA-K 300 Statistical Techniques (3 cr.) P: MATH-M 118 with a C- or better
- World Languages and Culture (6 cr.)
- GEOG-G 110 Introduction to Human Geography (3 cr.)
- ANTH-A 304 Social and Cultural Behavior OR ANTH-A 361 Applied Cultural Change

Choose one of the following GEOG electives:

- GEOG-G 321 Geography of Europe (3 cr.)
- GEOG-G 323 Geography of Latin America (3 cr.)
- GEOG-G 324 Geography of the Caribbean (3 cr.)
- GEOG-G 326 Geography of North America (3 cr.)
- GEOG-G 424 Geography of Africa (3 cr.)

Total: 45 credit hours

Tourism, Conventions and Event Management Requirements

- TCEM 100 Introduction to Tourism Studies (3 cr.)
- TCEM 112 Tourism and Hospitality Management Principles (3 cr.)
- TCEM 171 Introduction to Convention/Meeting Management (3 cr.)
- TCEM 181 Lodging Industry Operations (3 cr.)
- TCEM 210 Special Event Management (3 cr.) P: TCEM 171
- TCEM 219 Management of Sports Events (3 cr.)
- TCEM 241 Financial Analysis for the Service Industries (3 cr.) P: PHIL-P 162 Logic
- TCEM 252 Promotional Communications (3 cr.) P: ENG-W 231
- TCEM 271 Mechanics of Meeting Planning (3 cr.) P: TCEM 171
- TCEM 310 Event Catering Management (2 cr.)
- TCEM 312 Human Resources Management for Service Industry (3 cr.) P: TCEM 112
- TCEM 341 Financial Analysis and Decision Making in Tourism and Hospitality (3 cr.) P: TCEM 241
- TCEM 372 Global Tourism Geography (3 cr.) P: TCEM 172 and GEOG-G 300 elective
- TCEM 411 Tourism and Hospitality Law (3 cr.) P: TCEM 112 and TCEM 312
- TCEM 472 Global Tourism (3 cr.) P: TCEM 100
- TCEM 499 Operational Tourism Analysis (3 cr.) P: TCEM 112, TCEM 231, TCEM 341, SPEA-K 300

Total: 67 credit hours

Electives

- 6 credit hours must be at the 100 or 200 level.
- 6 credit hours must be at the 300 level or higher.

Total: 12 credit hours

Grand Total: 124 credit hours

*Note: TCEM classes may be used for free electives.

Cultural Heritage Tourism Certificate (IU)

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded a Cultural Heritage Tourism certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 100 Introduction to Tourism Systems (3 cr.)
- TCEM 172 The Development and Management of Attractions (3 cr.)
- TCEM 231 Marketing Tourism and Hospitality (3 cr.)
- TCEM 302 Hospitality/Tourism Industry (2 cr.)
- TCEM 334 Cultural Heritage Tourism (3 cr.)
- TCEM 372 International Travel Geography (3 cr.)
- TCEM 401 Industry Internship (2 cr.)
- TCEM 472 Global Tourism Seminar (3 cr.)

Total: 22 credit hours

Food Production Management Certificate (Purdue)

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded a Food Production Management certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 191 Sanitation and Health in Food Service, Lodging and Tourism (3 cr.)
- TCEM 218 Wines of the World (3 cr.)
- TCEM 312 Human Resource Management for the Service Industries (3 cr.)
- TCEM 318 Creative Wine Management (3 cr.)
- TCEM 385 Beer and Spirits Management (3 cr.)
- TCEM 401 Industry Internship* (2 cr.)
- TCEM 310 Event Catering Management (2 cr.)
- TCEM-L 310 Event Catering Management Laboratory (1 cr.)

Total: 20 credit hours

*Industry internship requires 400 paid hours or 200 volunteer hours. Part of the requirement is mandatory work for a week at Churchill Downs during the Kentucky Derby.

Lodging Management Certificate (Purdue)

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded a Lodging Management certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 112 Tourism and Hospitality Management Principles (3 cr.)
- TCEM 181 Lodging Industry Operations (3 cr.)
- TCEM 191 Sanitation and Health in Food Service, Lodging and Tourism (3 cr.)
- TCEM 241 Financial Accounting for the Service Industries (3 cr.)
- TCEM 281 Hotel Management (3 cr.)
- TCEM 371 Convention and Meeting Sales (3 cr.)
- TCEM 401 Tourism Internship (2 cr.)

Total: 20 credit hours

Beverage Management Certificate (Purdue)

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded a Beverage Management certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 218 Wines of the World (3 cr.)
- TCEM 308 Wine Selection (3 cr.)
- TCEM 318 Creative Wine Management (3 cr.)
- TCEM 328 Introduction to Microbrewing (3 cr.)
- TCEM 385 Beer and Spirits Management (3 cr.)
- TCEM 388 Wine Styles (3 cr.)
- TCEM 408 Food and Wine Pairing (3 cr.)
- TCEM 418 History of Wine (3 cr.)

Total: 24 credit hours

Events Management Certificate (IU)

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded an Events Management certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 171 Introduction to Convention/Meeting Management (3 cr.)
- TCEM 210 Special Event Management (3 cr.)
- TCEM 219 Management of Sport Events (3 cr.)
- TCEM 271 Mechanics of Meeting Planning (3 cr.)
- TCEM 371 Convention and Meeting Sales (3 cr.)
- TCEM 377 Exhibit Marketing (3 cr.)
- TCEM 401 Industry Internship (1 cr.)
- TCEM 471 International Meeting Planning (3 cr.)
- TCEM 477 Non-Profit Meeting Management (3 cr.)

Total: 25 credit hours

Health (Wellness) Tourism Certificate

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded a Health Tourism certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 100 Introduction to Tourism Systems (3 cr.)
- TCEM 172 The Development and Management of Attractions (3 cr.)
- TCEM 231 Hospitality and Tourism Marketing (3 cr.)
- TCEM 302 Hospitality/Tourism Trends (1 cr.)
- FN 30300 Essentials of Nutrition (3 cr.)
- HPER-H 180 Stress Prevention and Management (3 cr.)
- HPER-H 195 Principles and Applications of Lifestyle Wellness (3 cr.)
- HPER-H 350 Complementary and Alternative Approaches to Health (3 cr.)

Total: 22 credit hours

Travel Planning Certificate (IU)

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded a Travel Planning certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 100 Introduction to Tourism Systems (3 cr.)
- TCEM 231 Hospitality and Tourism Marketing (3 cr.)
- TCEM 309 Cruise Line Management (3 cr.)
- TCEM 372 Global Tourism Geography (3 cr.)
- TCEM 382 Popular Travel Trends (3 cr.)
- TCEM 482 Travel to Exotic Destinations (3 cr.)
- GEOG-G 130 World Geography (3 cr.)
- GEOG-G 321 Geography of Europe OR GEOG-G 323 Geography of Latin America OR GEOG-G 324 Geography of Caribbean OR GEOG-G 326 Geography of North America OR GEOG-G 424 Geography of Africa (3 cr.)

Total: 24 credit hours

Sports Tourism Development Certificate (IU)

Completion of the courses below with a passing grade and a cumulative GPA of 2.2 within a five-year period will qualify an IUPUI student (undergraduate non-degree seeking students are not eligible) or graduate non-degree student to be awarded a Sports Tourism Development certificate. Certificates are considered degrees and do not have to be paired with an Associate's or Bachelor's degree to be awarded.

- TCEM 100 Introduction to Tourism Systems (3 cr.)
- TCEM 219 Management of Sports Events (3 cr.)
- TCEM 231 Tourism and Hospitality Marketing (3 cr.)
- TCEM 329 Sports Marketing (3 cr.)
- TCEM 352 Promotional Communications (3 cr.)
- TCEM 362 Tourism Economics (3 cr.)
- TCEM 387 Industry Internship (1 cr.)
- HPER-P 331 Planning and Operations of Sports Facilities (3 cr.)
- HPER-P 392 Sport in American Society (3 cr.)

Total: 25 credit hours

Consumer and Family Science Transfer Program

Requirements for a Bachelor of Science degree in child development and family studies; foods and nutrition; consumer sciences and retailing; hospitality and tourism management; or family and consumer sciences education can be started at IUPUI. Students must transfer to the School of Consumer and Family Sciences at Purdue University in West Lafayette. See a TCEM academic advisor for more information on transfer completion.

Student Learning Outcomes

The **Exercise Science** (**Pre-Med**, **Pre-Occupational Therapy**, Pre-Physician Assistant, **Pre-Physical Therapy**) and **Fitness Management and Personal Training** majors in the Department of Physical Education at IUPUI align its curricular student learning outcomes with the framework of the American College of Sport Medicine (ACSM) Health Fitness Specialist (HFS) certification. The HFS is a degreed health and fitness professional qualified to pursue a career in university, corporate, commercial, hospital and community settings.

1. Student will demonstrate an understanding of general principles of exercise science concepts.
2. Student will demonstrate the ability to conduct health and fitness appraisals and clinical exercise testing.
3. Student will demonstrate an understanding of electrocardiography, diagnostics, patient management, medications, pathophysiology and risk factors associated with exercise and clinical exercise testing.
4. Student will demonstrate the ability to conduct exercise prescription and programming.
5. Student should demonstrate an understanding of basic nutrition and weight management.
6. Student should demonstrate an understanding of basic human behavior and counseling as it applies to strategies of enhancing exercise and health behaviors.
7. Student will demonstrate an understanding of safety, injury prevention and emergency procedures.
8. Student will demonstrate an understanding of program administration and outcomes assessment.

The **Physical Education Teacher Preparation program** in the Department of Physical Education at IUPUI aligns its curricular student learning outcomes with the framework of the National Association for Sport and Physical Education; as such, the student learning outcomes are:

1. Students apply discipline specific and theoretical concepts when developing physically educated individuals.
2. Students demonstrate competent movement and health enhancing fitness skills.
3. Students implement developmentally appropriate learning experiences to address the diverse needs of all students.
4. Students use effective communication and pedagogical skills and strategies to enhance student engagement and learning.
5. Students utilize assessments and reflection to foster student learning and make informed instructional decisions.
6. Students demonstrate dispositions essential to becoming effective professionals.

The **Sports Management program** in the Department of Physical Education at IUPUI deals with the business side of the multibillion dollar sports industry. Upon completion of this degree, students will be able to:

1. Demonstrate an understanding of the various revenue streams and expenses in the sport management industries.
2. Summarize the potential risks associated with managing an event, organization, stadium or other sports venue and recommend solutions to avoid the risk.
3. Integrate and apply knowledge to analyze an industry issue and recommend solutions and/or strategies.
4. Present a persuasive argument both in writing and orally.
5. Describe the governance associated with the various sport management industries.
6. Discuss the unique impact of sport on society.

The **Tourism, Conventions and Event Management program** will lead to a Bachelor of Science degree. Graduates are qualified to be employed in different segments of the tourism industry: research, destination development, adventure travel, festivals, events, travel management, entertainment, attractions, transportation, accommodations and/or food operations. Upon completion of the degree, students will be able to:

1. Define, apply, analyze, and execute operational principles of tourism and event management.
2. Perform effective oral and written communication skills.
3. Address and analyze tourism sustainability and trends critically and reflectively.
4. Work efficiently and productively with persons from different cultures and backgrounds.
5. Demonstrate ethical behavior and leadership skills to solve issues in a tourism-related environment.
6. Advance best practices in the tourism and event profession.
7. Practice a sense of community and civic mindedness.

Graduate Programs

Master of Science--Kinesiology

The Indiana University School of Physical Education and Tourism Management at Indiana University Purdue University Indianapolis offers a Master of Science degree in Kinesiology. This degree will provide students with a multidisciplinary and in#depth understanding of kinesiology and its related fields. The objectives of the program are: (1) to create coursework and experiences that promote higher learning; (2) to develop community and university-based partnerships that facilitate research and learning opportunities; and (3) to provide personal growth and professional development to teachers and others in the field.

Master of Science--Event Tourism

The Indiana University School of Physical Education and Tourism Management at Indiana University Purdue University Indianapolis offers a Master of Science degree in Event Tourism. This degree will provide students with practical and theoretical understanding of the events and experiences created by expositions, fairs, sports, festivals, conferences, meetings and cultural destinations.

The program culminates in a thesis such that graduates are well equipped to conduct research as a means to inform and improve decision making. Graduates will be prepared for positions in public, private and non-profit organizations related to event tourism experiences.

Admissions--Master of Science in Event Tourism

Master of Science—Event Tourism

Regular Admissions Requirements

Students entering the graduate program must have:

- Official transcripts from a baccalaureate degree in a related area (e.g., tourism management, hospitality management, sports management, leisure studies, recreation management, business) from an accredited institution.
- A minimum grade point average (GPA) of 3.0 on a 4.0 scale.
- A satisfactory score on the Graduate Record Examination (GRE) taken within the past five years.
- A completed graduate program application and payment of the non-refundable application fee. Link can be found at: www.iupui.edu/%7egradoff.

IMPORTANT Event Tourism Master's Application Information

The following items must be submitted online with your application:

- Three letters of recommendation that address the student's potential for academic success in a graduate program.
- Candidate's statement (1,000 words) regarding the applicant's professional experiences, personal goals, career aspirations and how earning an M.S. degree relates to each.

The following must be submitted AT ONE TIME to the School of Physical Education and Tourism Management Recorder and will be added to your application:

- GRE scores (official copy; may be opened, but may not be a photocopy)
- Official transcripts from all colleges previously attended; both undergraduate and graduate
- For international students, proof of proficiency in English, as defined by a score of 550 or above on the paper-based Test of English as a Foreign Language (TOEFL) and a minimum of 213 on the computer-based TOEFL, or 79 on the iBT.

Mail to:

School of Physical Education and Tourism Management Recorder's Office 901 West New York Street Indianapolis, IN 46202
Until all items are received, an application will be considered incomplete and cannot be reviewed.
Once complete, your application will be added to the queue for committee review. Please e-mail the PETM School Recorder at petmrec@iupui.edu if you have any questions.

Undergraduate courses required of applicants with undergraduate degrees in unrelated areas

Students who have bachelor degrees in unrelated areas or disciplines may be granted admission upon the completion of undergraduate courses listed below.

- TCEM 499 Operational Tourism Analysis (required for all) (3 cr.)
- SPEA-K 300 Statistical Techniques (3 cr.)
- MATH-M 118 Finite Mathematics (3 cr.)

Admissions--Master of Science in Physical Education

Master of Science—Physical Education

Regular Admission Requirements

Students entering the graduate program must:

- Have a bachelor's degree in physical education, exercise science, sports management or related area
- Have completed undergraduate work with a 3.0 grade point average on a 4.0 scale
- Have appropriate scores on the Graduate Record Examination (GRE)
- Submit complete application online by March 31st. Link can be found at: http://www.iupui.edu/%7egradoff.

IMPORTANT Physical Education Master's Application Information

The following items must be submitted online with your application:

- Non-refundable application fee
- All three letters of recommendation
- Personal statement

The following must be submitted AT ONE TIME to the School of Physical Education and Tourism Management Recorder and will be added to your application:

- GRE scores (official copy; may be opened, but may not be a photocopy)
- Official transcripts from all colleges previously attended; both undergraduate and graduate
- For international students, proof of proficiency in English, as defined by a score of 550 or above on the paper-based Test of English as a Foreign Language (TOEFL) and a minimum of 213 on the computer-based TOEFL.

Mail to:

School of Physical Education and Tourism Management Recorder's Office 901 West New York Street Indianapolis, IN 46202
Until all items are received, an application will be considered incomplete and cannot be reviewed.
Once complete, your application will be added to the queue for committee review. Please e-mail the PETM School Recorder at petmrec@iupui.edu if you have any questions.

Undergraduate Courses Required of Applicants with Undergraduate Degrees in unrelated areas

Students who have bachelor degrees in unrelated areas or disciplines may be granted admission upon the completion of undergraduate courses listed below.

- HPER-P 215 Principles and Practices of Exercise Science (3 cr.)
- BIOL-N 217 Human Physiology (5 cr.) OR N 214 + N 215 Human Biology (4 cr.) (**Lecture offered Spring + Summer II; lab offered Spring only; may take lecture + lab together or lecture then lab**)
- BIOL-N 261 Human Anatomy (5 cr.) OR BIOL-N 212 + N 213 Human Biology (4 cr.)
- HPER-P 391 Biomechanics (3 cr.) P: Math 111 or higher; BIOL-N 261
- HPER-P 409 Basic Physiology of Exercise

Prerequisites: HPER-P 215, BIOL-N 261, BIOL-N 217 OR N 212 + N 213

Admission

- **Master of Science--Event Tourism (M.S.)**
- **Master of Science—Physical Education (M.S.)**

Contact Information

If you have questions about Physical Education programs, please contact the Physical Education department, 317.274.0600.

If you have questions about Tourism, Conventions and Event Management programs, please contact the TCEM department, 317.274.2248.

We'll be glad to answer your questions, direct you to a faculty member, or put you in contact with the university resource you seek.

Degree Programs

Master of Science--Kinesiology

The Indiana University School of Physical Education and Tourism Management at Indiana University Purdue University Indianapolis offers a Master of Science degree in Kinesiology. This degree will provide students with a multidisciplinary and in#depth understanding of kinesiology and its related fields. The objectives of the program are: (1) to create coursework and experiences that promote higher learning; (2) to develop community and university-based partnerships that facilitate research and learning opportunities; and (3) to provide personal growth and professional development to teachers and others in the field.

Master of Science--Event Tourism

The Indiana University School of Physical Education and Tourism Management at Indiana University Purdue University Indianapolis offers a Master of Science degree in Event Tourism. This degree will provide students with practical and theoretical understanding of the events and experiences created by expositions, fairs, sports, festivals, conferences, meetings and cultural destinations.

The program culminates in a thesis such that graduates are well equipped to conduct research as a means to inform and improve decision making. Graduates will be prepared for positions in public, private and non-profit organizations related to event tourism experiences.

Master of Science in Event Tourism

Degree requirements for students in the School of Physical Education and Tourism Management are established by the faculty of the school and may change. Students are bound by rules and regulations established by the faculty at the time of their initial matriculation as a graduate student. Every graduate student will be assigned

an advisor who will help cooperatively plan their course of study depending on experiences and education objectives.

Required Courses (35 credit hours plus pre-requisites)

Foundation Courses

- HPER-T 590 Introduction to Research in Health, Kinesiology and Recreation (3 cr.)
- HPER-T 591 Interpretation of Data in Health, Kinesiology and Recreation (3 cr.)
- PSY 601 Experimental Design (3 cr.)
- PSY 608 Measurement Theory and Interpretation of Data (3 cr.)
- TCEM 599 Master's Thesis (5 cr.)

Total: 17 credit hours

Emphasis Courses (First three courses listed are required)

- TCEM 500 Foundations of Event Tourism (3 cr.)
- TCEM 531 Event Tourism Marketing (3 cr.)
- TCEM 562 Economics of Event Tourism (3 cr.)
- TCEM 519 Sports Tourism Management OR TCEM 534 Cultural Tourism Management OR TCEM 571 Strategic Meeting Management (3 cr.)

Total: 12 credit hours

Pre-Requisites

- TCEM 499 Operational Tourism Analysis (required for all) (3 cr.)
- SPEA-K 300 Statistical Techniques (3 cr.)
- MATH-M 118 Finite Mathematics (3 cr.)

Total: 9 credit hours

Elective Recommendations (Selected with approval of advisor)

- SPEA-V 506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA-V 507 Data analysis and modeling - Public Affairs (3 cr.)
- SPEA-V 521 Non-Profit and Voluntary Sector (3 cr.)
- SPEA-V 522 Human Resource Management in Non-Profit Organizations (3 cr.)
- SPEA-V 525 Management in the Non-Profit Sector (3 cr.)
- SPEA-V 526 Financial Management for Non-Profit Organizations (3 cr.)
- SPEA-V 550 Topics in Public Affairs (GIS) (3 cr.)
- SPEA-V 558 Funding Development for Non-Profits (3 cr.)
- SPEA-V 539 Management Science (3 cr.)

Total: 6 credit hours

Master of Science in Kinesiology--Clinical Exercise Science

Degree requirements for students in the School of Physical Education and Tourism Management are established by the faculty of the school and may change. Students are bound by rules and regulations established by the faculty at the time of their initial matriculation as a graduate student. Every graduate student will be assigned an advisor who will help cooperatively plan their course of study depending on experiences and education objectives.

The Master of Science degree consists of a 18 hour core of major topics in kinesiology and human performance and an additional 18 hours of elective courses, of which a minimum of 9 must be completed in the School of Physical Education and Tourism Management.

Required Courses

- HPER-K 530 Mechanical Analysis of Human Performance (3 cr.)
- HPER-K 535 Physiological Basis of Human Performance (3 cr.)
- HPER-K 542 Neuromuscular Control of Human Movement (3 cr.)
- HPER-K 562 Exercise in Health and Disease I (3 cr.)
- HPER-T 590 Introduction to Research in Human Performance (3 cr.)
- HPER- T 591 Interpretation of Data in Human Performance (3 cr.) OR BIOS-G 651 Introduction to Biostatistics I (3 cr.)

Total: 18 credit hours

Elective Courses (Non-Thesis=18 credit hours; Thesis=9 credit hours)

- HPER-K 532 Clinical Biomechanics (3 cr.)
- HPER-K 500 Muscle Physiology (3 cr.)
- GRAD-G 819 Basic Bone Biology (3 cr.)
- HPER-K 563 Cardiac Assessment in Exercise Testing (2 cr.)
- HPER-K 564 Exercise in Health and Disease II (3 cr.)
- HPER-K 500 Special Variable Topics (EMG, Gait Analysis, Cardiac Testing) (3 cr.)
- ANAT-D 850 Gross Anatomy (5 cr.)
- PHSL-F 503 Human Physiology (4 cr.)
- PHSL-F 708 Cardiac & Coronary Physiology of Exercise (1 cr.)
- HPER-K 553 Physical Activity & Disease (3 cr.)
- SHRS-W 661 Theories of Health Promotion & Disease Prevention (3 cr.)
- HPER-K 533 Advanced Theories of High Level Performance (3 cr.)
- HPER-K 552 Problems in Adapted Physical Education (3 cr.)
- SHRS-N 500 Nutrition I (3 cr.)
- HPER-K 525 Sport Psychology (3 cr.)
- HPER-K 602 Independent Research (3 cr.)
- HPER-K 576 Measurement & Evaluation in Physical Education (3 cr.)
- HPER-K 601 Readings in Physical Education (3 cr.)
- HPER-K 560 Corporate Fitness & Wellness (3 cr.)
- HPER-K 545 Childhood Motor Development (3 cr.)
- HPER-K 541 Nature of Motor Skills (3 cr.)

Research Courses for Thesis Students

- HPER-T 592 Statistical Techniques of Research in Health, Physical Education & Recreation (3 cr.) OR BIOS-G 652 Introduction to Biostatistics II (3 cr.)
- HPER-K 602 Thesis Option--Independent Research Hours (5 cr.)
- HPER-K 699 Independent Research (3 cr.)

- GRAD-N 802 Techniques of Effective Grant Writing (3 cr.)
- RAD-G 504 Introduction to Research Ethics (2-3 cr.)

Total: 11 credit hours

Grades

Quality points are assigned for purposes of determining the cumulative grade point average as follows: A+ or A = 4 credit points; A– = 3.7; B+ = 3.3; B = 3.0; B– = 2.7; C + = 2.3; C = 2.0; C– = 1.7; D+ = 1.3; D = 1.0; D– = 0.7; F = 0. No points are assigned for grades of Incomplete (I), Satisfactory (S), Pass (P) or Withdrawn (W).

All graduate students are expected to maintain an overall grade point average of 3.0 or higher. Students whose average falls below this level will be placed on probation. Grades below C– will not count toward degree requirements; however, all grades earned in courses taken for graduate credit will be included in the calculation of the grade point average.

Transfer of credit

A maximum of 9 credit hours of graduate work may be transferred from other institutions for application to the master's degree program. The admission committee will determine the distribution and acceptance of those transfer hours at the time of admission. Once students have enrolled in the Master of Science degree program in the School of Physical Education and Tourism Management, they must receive advance approval from the advisor and department chair to take work at another institution for transfer to IUPUI. This limitation does not apply to work taken at any other Indiana University campus.

Transfer credit bearing grades of Pass (P) or Satisfactory (S) cannot be accepted unless there is official documentation for the transferring institution to verify that these grades are equivalent to at least a B on a graduate grading scale. No credit can be transferred for a course that cannot be officially documented as carrying graduate credit.

Graduation

Students planning to graduate from the Master of Science program in December should apply for graduation by May 1st; May graduates by October 1st and August graduates by February 1st. The student should file an application for graduation with the School of Physical Education and Tourism Management Recorder, Physical Education/Natatorium building. Students are ultimately responsible for knowing, understanding and completing all degree requirements in a timely manner. IUPUI holds a single Commencement ceremony in May each year. To participate in Commencement activities, the student must have completed all degree requirements by the previous December or expect to complete them no later than August following the May Commencement exercises.

Last updated January 2012

Student Learning Outcomes

Upon completion of the **Master of Science in Physical Education**, students will demonstrate the following abilities:

1. Knowledge and skills needed to conduct original research within the area of kinesiology and/or to enter a program to earn an advanced degree in kinesiology or related fields.
2. Communicate the knowledge of kinesiology across disciplines and translate it to the general public.
3. Think critically and creatively to evaluate literature in the field of kinesiology.
4. Apply ethics within the field of kinesiology.

Upon completion of the **Master of Science in Event Tourism**, students will know and be able to:

1. Develop, synthesize and execute principles of event tourism through research.
2. Conduct research in an ethical and responsible manner.
3. Demonstrate best practices in event tourism research.
4. Interpret and appraise event tourism sustainability critically and reflectively.
5. Examine and predict event tourism industry trends.
6. Communicate effectively with stakeholders, including tourism professionals and the general public.
7. Work productively with persons from diverse cultures and backgrounds.
8. Practice a sense of community and civic mindedness.

Admission

Policy

The ROTC Basic Course (see ‘‘Curriculum, Basic Course’’ in this bulletin) is open to all IUPUI, IU-Kokomo, Butler University, Franklin College, Marian College, University of Indianapolis and Ivy Tech Community College of Indiana students without any prerequisites or allied requirements. Students who are not U.S. citizens must check with the Department of Military Science administrative office prior to course attendance to ensure that they have the proper permission from their home country embassy for military training.

The ROTC Advanced Course is open to all students who have completed the Basic Course or who qualify for advanced placement (see ‘‘Advanced Placement’’ in this bulletin). Entry requirements are specified below.

Standards

Applicants for the Advanced Course must have completed the Basic Course (courses MILS-G 101, MILS-G 102, MILS-G 201 and MILS-G 202) or be eligible for advanced placement (see ‘‘Advanced Placement’’ in this bulletin) prior to acceptance. Applicants must also meet the following entrance requirements.

Academic Performance

Applicants must have a minimum grade point average of 2.0 (C) throughout the first two years of college work.

Medical Evaluation

Applicants must pass a Department of Defense Medical Examination Review Board medical exam, provided free of charge.

Physical Fitness Test

Applicants must obtain a passing grade on the Army Physical Fitness Test (APFT) consisting of push-ups, sit-ups and a two-mile run.

Age

Entrance into the commissioning program is predicated on students not having reached age 30 by June 30th of the year they receive their officer’s commission. Scholarship recipients must be less than 31 years of age on December 31th of the calendar year of commissioning. Extensions of up to three years may be granted for veterans of active duty. Waivers may be granted beyond age 32 for certain students.

Dependents

To be eligible, an individual must not have more than three dependents (e.g., a spouse and two children).

Citizenship

Applicants for the Advanced Course must be U.S. citizens by birth or naturalization.

Veterans

Prior service personnel entering the program must have a qualifying reenlistment code.

Student Status

Advanced Course students must be full-time university students; that is, they must enroll for 12 hours of undergraduate credit or 9 hours of graduate credit each semester.

Marginal Students

In accordance with Army regulations, students who do not meet the academic or physical fitness requirements of the Advanced Course may be dis-enrolled from the program.

Personal History

All applicants must meet loyalty and integrity requirements established by the United States Congress for military officers.

Interview

A professor of military science will personally interview all applicants and is the final authority on a candidate’s eligibility for the program.

Emphasis

Students entering the Advanced Course must matriculate in a curriculum that will lead to a four-year bachelor’s degree or a two-year graduate degree. Any curriculum offered by IUPUI or other institution served by this department is acceptable.

Advanced Placement (Army ROTC Two-Year Program)

Although Army ROTC is often considered a four-year course of instruction, a program is available to allow students to complete ROTC in just two years. Students must have two years of course work remaining to complete degree requirements upon entering the Advanced Placement program. Under the two-year program, students who attended a junior or community college, students at four-year institutions who have not taken ROTC during their first two years of undergraduate study, and students entering a two-year postgraduate course of study may enroll in the ROTC program.

In addition, students who have past military experience may participate in this program. Students who are awarded advanced placement may go directly into the ROTC Advanced Course. In order to qualify for Advanced Course placement, the applicant must fulfill one of the following requirements:

- Leader’s Training Course
- Veterans
- Junior ROTC (JROTC)
- Simultaneous Membership Program (SMP)
- Cadet Professional Development Training
- Airborne School
- Cadet Troop Leader Training
- Financial Aid
- Compensation Outlook

Leader’s Training Course

This four-week camp is held at Fort Knox, Kentucky, each summer and is repeated several times between

June and early August. Successful completion of this camp allows direct entrance into the ROTC Advanced Course. Students' travel expenses are paid, and all food and lodging is provided. In addition, participating students earn approximately $900. ROTC scholarships are offered to well-qualified students who complete the course and meet Advanced Course eligibility requirements. Training covers rappelling, map reading/land navigation, rifle marksmanship, basic leadership techniques, physical training/marches, individual and unit tactics, communications, first aid, drills/parades/ceremonies, military courtesy/traditions, and water survival.

During this training, students learn fundamental things about the Army—weapons, combat tactics, drill and ceremonies. Students also learn basic things about themselves—their physical endurance, leadership capabilities, and ability to think and perform under pressure. Students finish the summer with other basics —discipline, pride and confidence—that will be important to them in all their future endeavors. Applications for Leader's Training Course are accepted each year from November through May.

Veterans

Veterans of prior military service with any branch of the armed services are authorized for advanced placement if they meet program admission requirements.

Junior ROTC (JROTC)

Students who have completed at least two years of Junior ROTC in high school may receive advanced placement of one year in the ROTC program, and students with three years of Junior ROTC may receive advanced placement of two years in the ROTC program if they meet Advanced Course admission requirements.

Simultaneous Membership Program (SMP)

This program is for those who desire to serve in an Army National Guard or Army Reserve unit while earning a commission through ROTC. Scholarship students are not eligible for the SMP unless they are receiving a Guaranteed Reserve Forces Duty Scholarship. If a guard or reserve member accepts an ROTC scholarship, he or she must be released and discharged from the guard or reserve unit.

As an officer trainee in the SMP, students are exempt from the ROTC Basic Course and may enroll directly in the Army ROTC Advanced Course at host colleges or at nearby institutions that permit cross-enrollment. There are also opportunities for tuition assistance with the SMP units.

SMP students draw pay from two sources. First, as advanced ROTC students, they receive $450-$500 a month for each month of the major academic term and approximately $800 for attending the National Advance Leadership Camp. Meanwhile, as officer trainees in an Army National Guard or Army Reserve unit, students attend monthly drills and annual training and receive pay equivalent to a sergeant's (E-5) or the highest grade attained if they have prior military rank. In addition, they can receive Federal Tuition Assistance and GI Bill benefits, if they qualify.

The ROTC stipend and Army National Guard or Army Reserve pay, including annual training, provides students with more than $7,000 per year, depending on the nature of their SMP participation.

Cadet Professional Development Training

One of the major advantages of the ROTC program is the opportunity for cadets to attend actual Army training courses during the summer vacation months. Attendance at one or more of these courses has multiple benefits for the ROTC student. Cadets are exposed to a unique learning experience. They learn firsthand how the Army trains. They live in an actual Army environment and gain an appreciation for the people with whom they will be working during their period of service. Students are selected for this training on a merit basis (leadership, academic and physical performance) from volunteers wishing to take advantage of this opportunity. The following list describes the two most popular types of off campus training programs. Cadets are not paid to attend these training courses; however, travel, lodging and meals are provided.

Airborne School

This course is taught at Fort Benning, Georgia, and lasts three weeks. Students completing this course are fully qualified paratroopers. The first week (ground week) consists of rigorous physical training and instruction designed to prepare the student to make a parachute jump and land safely. The second week (tower week) perfects individual skills and stresses team effort. Jump skills are taught through the use of the swing landing trainer, the suspended harness, and the 250-foot free-fall tower. The final week (jump week) consists of five parachute jumps from U.S. military aircraft.

Cadet Troop Leader Training

Cadet Troop Leader Training gives cadets who have completed Advanced Camp firsthand experience in the duties of an Army officer by providing three weeks of duty in an active Army unit or initial entry training unit (basic training), where cadets serve as platoon leaders.

If a cadet is assigned to a unit on parachute status and the cadet is already airborne qualified, the cadet may participate in unit parachute jumps with approval from the commanding officer.

Financial Aid

Army ROTC Scholarships

Army ROTC scholarships are offered for two, three and four years. The two- and three-year scholarships are awarded competitively to students who are enrolled in college. Recipients of these scholarships may be cross-enrolled at Butler University, Marian College, Franklin College, IU-Kokomo or the University of Indianapolis.

Applications for two- and three-year scholarships are available from the professor of military science and must be submitted no later than March 1st for the following fall semester. Recipients will be notified prior to the end of the spring semester.

The host ROTC unit awards scholarships based upon quotas allocated by Cadet Command. The three-year and

four-year Advanced Designee scholarships are awarded to U.S. citizens who will be entering college as freshmen. Scholarship winners must enroll at the institution (or partnership school) that awarded them the scholarship. For more information on scholarship availability and selection deadlines, contact the Department of Military Science.

Three-year Advanced Designee scholarships are awarded in a manner similar to the four-year scholarships, except that the benefits commence with the student's sophomore year if the student continues to meet eligibility requirements.

The value of the tuition/fee portion of the scholarship depends on the amount charged by the institution attended. Students may receive full compensation for tuition and fees; however, students may also receive lesser scholarships. In addition to tuition and fees, scholarship recipients receive $1200 per year for books, and a subsistence allowance of $300–$500 per month, depending on academic level, while school is in session.

Fee Scholarship

All freshmen and sophomores taking the Basic Course do not have to pay tuition for MILS-G 101, MILS-G 102, MILS-G 201 or MILS-G 202, since these courses are eligible for university fee scholarship. Note: The student must pay for MILS-G 120, MILS-G 121, MILS-G 301, MILS-G 302, MILS-G 310, MILS-G 401, MILS-G 402, HPER-E 130 and HPER-E 230 to receive academic credit.

Books/Supplies

All books, supplies and materials needed in the Basic Course are supplied to the student by the Department of Military Science free of charge.

Subsistence Allowance

Each Advanced Course student and three- and four-year scholarship recipients receive a tax-free allowance of at least $350 per month up to 10 months per year. Additionally, students are paid approximately $900 for each summer training camp they attend.

Student Employment

The department manages a limited amount of student employment. Students may apply for part-time employment. Student employees are paid on an hourly basis.

Compensation Outlook

The Department of Military Science is unique in that it publishes the salaries of its active-duty graduates. Military compensation (salary) includes pay and non-taxable allowances for subsistence and housing. Although the housing allowance varies by location, the average annual military salary earned by a new second lieutenant graduate in 2010 was $48,000. Salaries are adjusted for cost of living each year and also increase with longevity and promotions. Three years later, the officer, then a captain, would earn an average annual military salary of $74,000.

Background

Since 1918, the Reserve Officers' Training Corps has produced thousands of commissioned officers for the United States Army. While other commissioning sources exist, Army ROTC produces officers with diverse educational backgrounds and contemporary ideas. This is accomplished because the primary focus of an Army ROTC Cadet is being a student first in whatever major field of study the student desires. This collaboration with the university, along with military science classes during the school year and some military training on weekends and during summer break, is the method of producing leaders.

Many student-cadets have interest in, but no experience with, the military. ROTC is a great test-bed for that interest and can lead to a guaranteed job in a profession that the American people respect and one that may provide a lifetime of satisfaction. Monetary incentives (e.g., tuition, scholarships and stipends) that make it easier to get through college are available. Intangible incentives (including camaraderie, adventure and others too countless to name) improve quality of life and performance as a whole.

Because of the nature of the cadets' future profession, ROTC has been called the best leadership course in America. ROTC enhances a student's education by providing unique leadership and management experience. It helps develop self-discipline, physical stamina, and poise. Students develop qualities that lead to success in any career. U.S. Secretary of State Colin Powell credits ROTC for making him much of what he is today.

ROTC at IUPUI has grown with the campus. We have commissioned 250 officers since 1980, and they have served in Indiana, throughout the United States, and around the world.

What is a Commissioned Officer?

A graduate of any of this country's 270 ROTC programs is commissioned a second lieutenant in the U.S. Army. This commission can be in the Active Army or the Reserve Component (National Guard and Army Reserves). An officer plans the work of the organization, assigns tasks to subordinates, and ensures that the work is accomplished to the highest standard. Even the most junior officer routinely has 30 or more personnel working directly under his or her control.

Officers lead the army. They do so by developing missions, training their subordinates, influencing people, and solving problems. An officer must have integrity and the warrior spirit.

A commision as a second lieutenant may lead to a short stay in the Army and then a smooth transition to a civilian life. If this is the case, junior military officers leaving the service are highly sought after by Fortune 500 firms for their leadership experience. On the other hand, a junior military officer may fall in love with the lifestyle and benefits of being an officer and decide to make a rewarding career out of service to the United States.

Faculty

Active-duty or retired Army personnel are assigned to the Department of Military Science with the consent of the

ROTC Faculty Advisory Committee at Indiana University Purdue University Indianapolis (IUPUI) and the dean of faculty as confirmed by the Trustees of Indiana University. Such personnel spend an average of three years as instructors in the department. Each faculty member has a blend of practical military experience and solid educational background.

Administration

The faculty are supported by a full-time staff that has clerical, administrative and logistical responsibilities. The staff includes the military property custodian (a university employee) and the human resources assistant (a Department of the Army civilian).

Curriculum

- Basic Course (MILS-G 101, MILS-G 102, MILS-G 120, MILS-G 121, MILS-G 201 and MILS-G 202)
- Learning Community Course
- Advanced Course (MILS-G 301, MILS-G 302, MILS-G 401 and MILS-G 402)
- Suggested Schedule of Courses
- Academic Policy
- Professional Military Education Requirements

Basic Course (MILS-G 101, MILS-G 102, MILS-G 120, MILS-G 121, MILS-G 201 and MILS-G 202)

The Basic Course is usually taken in the freshman and sophomore years. All necessary textbooks and materials are furnished without cost to the student, and all tuition and fees are paid for through university fee remission. Signing up for the basic course is an excellent way to explore officership for those with an interest. No prior military experience is required, and no obligation for military service is incurred for participation in the basic course. Students may withdraw from the basic course at any time through the end of the second year.

Individual courses cover the areas of the Army profession, leadership, values and ethics, personal development, physical well-being, military history, drill and ceremony, customs and courtesies, squad tactics, map reading, first aid, and basic rifle marksmanship. Various social and professional activities are available in conjunction with the military science program.

Course credit is determined as follows: 100-level courses are one credit hour, and 200-level courses are two credit hours, for a total of six credit hours in the Basic Course. In essence, this course is intended to introduce the student to the Army and ROTC. Theoretical concepts are covered in the classroom, and practical military skills are learned in a field-training environment.

Students are encouraged to attend optional physical fitness training (Monday, Wednesday, Friday; 6:45 to 7:45 a.m.), field training exercises and periodic leadership labs.

Learning Community Course

The first year military science class is also offered as a Learning Community Course which fulfills the Freshman requirement. This course is also free for IUPUI students and is administered in the same manner as the university's other Learning Communities Courses.

Advanced Course (MILS-G 301, MILS-G 302, MILS-G 401 and MILS-G 402)

After completing the Basic Course or its equivalent (see ''Advanced Placement'' in this bulletin) and 54 credit hours that count towards the major with a grade point average of at least 2.0, students who have demonstrated officer potential and who meet Army physical standards are eligible to enroll in the Advanced Course. The Advanced Course is normally taken in the final two years of college. Instruction includes further leadership development, organization and management, tactics and administration.

A paid 32-day Leader Development and Assessment Course (LDAC) is held during the summer between the junior and senior years at one of the Army's premier training facilities at Fort Lewis (near Seattle, Washington). This camp permits cadets to put into practice the principles and theories they have learned in the classroom. It also exposes them to Army life in a tactical or field environment.

All cadets in the Advanced Course receive uniforms, compensation for attending LDAC, and an allowance between $4,000 and $5,000 each school year.

Before entering the Advanced Course, a student must sign a contract that certifies an understanding of the service obligation. This obligation may be fulfilled in various ways, depending on the individual's personal preference and the needs of the Army. Scholarship graduates serve four years on active duty (if selected by Cadet Command) and four in the Army Guard or Army Reserve, unless they receive a Guaranteed Reserve Forces Duty scholarship. If that scholarship is received, the graduate serves entirely with the Guard or Reserve. Non-scholarship graduates may serve three years on active duty (if selected by Cadet Command) and the remaining five years in the Guard or Reserve. If the non-scholarship graduate selects reserve force duty, the eight-year obligation is spent in the Guard or Reserve. There, officers assume duties for six years with a troop unit, and the last two years of the eight-year obligation require no participation (readiness status only).

The Advanced Course comprises four 3 credit hour courses (totaling 12 credit hours) and LDAC. The 300-level courses stress the military skills that will be needed to complete LDAC successfully. The 400-level courses concentrate on those skills needed by a cadet as he/she makes the transition to becoming a commissioned officer. In addition, students lead a battalion in which they are given various command and staff positions based on an order of merit established by their prior performance in the program. Advanced Course students are required to attend field training exercises and periodic leadership labs, and meet minimum physical fitness standards.

Professional Military Education Requirements

This component of the ROTC program is designed to provide the cadet with the type of academic foundation necessary to support continued intellectual growth and is a pre-commissioning requirement. As an integral part of their undergraduate education, prospective officers are required to complete the following:

1. Baccalaureate degree;
2. Advanced Course (MILS-G 301, MILS-G 302, MILS-G 401, MILS-G 402 and LDAC);

3. Military history course, including a “staff ride” (a systemic preliminary study and visit to a historic battlefield); and
4. Enhanced Skills Training Program (a program to enhance the communication, analytical, and critical thinking skills of future leaders).

Suggested Schedule of Courses

The following matrix shows the progression through the military science curriculum. It is a suggested approach; ROTC intends to be as flexible as possible in allowing a student to complete course requirements.

Freshman Year

1st Semester
- MILS-G 101 Leadership and Personal Development

2nd Semester
- MILS-G 102 Foundations in Leadership

Sophomore Year

1st Semester
- MILS-G 201 Innovative Tactical Leadership
- Enhanced Skills Training Program

2nd Semester
- MILS-G 202 Leadership in Changing Environments

Junior Year

1st Semester
- MILS-G 301 Adaptive Team Leadership
- Military History Course

2nd Semester
- MILS-G 302 Leadership Under Fire

Summer

- Leadership Development and Assessment Course
- Selected students attend Cadet Troop Leader Training, Airborne School or Air Assault School

Senior Year

1st Semester
- MILS-G 401 Developing Adaptive Leaders
- Staff Ride

2nd Semester
- MILS-G 402 Leadership in a Complex World

May

- Commissioned as a Second Lieutenant in the U.S. Army

Academic Policy

No student with a history of marginal academic performance (below a 2.0 cumulative GPA) will be admitted to the ROTC Advanced Course.

Students who have been admitted to the Advanced Course but fail to maintain good academic standing will be disenrolled from ROTC.

No student will be commissioned as an officer in the U.S. Army if not in good academic standing at the time of commissioning, even if the student has finished all military science academic requirements. Students must receive the bachelor’s degree to be commissioned.

The chairperson of the military science department admits all Advanced Course students to the program, continuously monitors their progress, disenrolls marginal performers and certifies each candidate for a commission.

Partnership Schools

The Department of Military Science at IUPUI offers participation in Army ROTC at six other Indianapolis-area institutions of higher education. Students on these six campuses may cross-enroll in the IUPUI ROTC program and earn an Army commission. Partnership students are eligible for the same benefits as IUPUI students and must meet the same admission requirements. The partnership institutions are:

Butler University

Students register and pay fees for ROTC courses just as they would for any Butler University course. Students must commute to the IUPUI campus for ROTC classes not offered at Butler University. Students may fulfill Butler University’s physical education requirement through ROTC. Military science grades are applied to the student’s overall GPA.

Indiana University Kokomo

Students register and pay fees for ROTC courses just as they would for any IUK course. The basic course and PT is taught on IUK’s campus, and advanced course cadets must commute to IUPUI for class. All students must travel to IUPUI (at the department’s expense) for Leadership Labs.

Franklin College

Students enroll in military science courses through the Consortium for Urban Education, Indianapolis, and the Franklin College registrar’s office. Students must commute to the IUPUI campus for all ROTC classes.

Marian University

Students enroll in military science courses through the Consortium for Urban Education, Indianapolis, and the Marian College registrar’s office. Students must commute to the IUPUI campus for ROTC classes not offered at Marian University.

University of Indianapolis

Students enroll in military science courses through the Consortium for Urban Education, Indianapolis, and the University of Indianapolis registrar’s office. Students must commute to the IUPUI campus for ROTC classes not offered at University of Indianapolis.

Ivy Tech Community College of Indiana

Students register and pay fees for ROTC courses just as they would for any Ivy Tech CCI course. Students must commute to the IUPUI campus for ROTC classes not offered at Ivy Tech. Students may fulfill an elective requirement through ROTC. Military science grades are applied to the student’s overall GPA.

Support Services

Library

The Department of Military Science maintains its own library facility with books, journals and training aids particular to the curriculum.

Awards

Students who merit special recognition receive it through the military science department's awards program.

Functional Awards

Made on merit, these awards provide the student with additional educational experience. For example, the Marshall Foundation Award provides for a student's attendance at a three-day seminar in the Washington, D.C. area, where national security concerns are discussed by the highest-ranking members of the Army and civilian members of the Department of the Army.

Recognition Awards

The Army and many civilian organizations, such as the American Legion, Veterans of Foreign Wars, and Daughters of the American Revolution, provide awards to deserving students, recognizing accomplishments in academic and leadership efforts.

University Awards

IUPUI, in honor of Dr. and Mrs. Otis R. Bowen, presents a trophy every year to an outstanding ROTC student.

Social Activities

The Department of Military Science provides ample opportunity for its students and faculty to meet in a social environment as well as in the classroom. Social activities include a picnic each semester and cadet-sponsored parties. Awards and commissioning ceremonies are followed by social hours. The primary social event of the year is a formal military ball.

Intramural Program

It is the policy of the Department of Military Science to enter teams or individuals, as appropriate, in university intramurals when desired by the cadets. In essence, the department acts as a vehicle for those students wishing to participate in athletics. Additionally, the "Ranger Challenge" program tests cadets in military skills against other ROTC programs around the country.

Career Counseling

The Department of Military Science maintains a vigorous counseling program. Student progress and performance level are constantly monitored. Students are periodically counseled on their status in the program, and those in academic trouble are offered assistance. The purpose of this program is to ensure that students are commissioned in the proper career field upon successful completion of the ROTC program.

IUPUI School of Physical Education and Tourism

Management Student Organizations and Services

Physical Education Student Organization (PESO)

PESO exists to improve the quality of student life. It's activities include assimilating new students into the School of Physical Education and Tourism Management program, representing the school in the shaping of university-wide policies and activities, helping students attain educational objectives and promoting participation in student activities. The general membership of the organization is composed of full- and part-time majors in the Physical Education and the Tourism, Conventions and Event Management degree programs.

Indiana Association for Health, Physical Education, Recreation and Dance and the American Alliance of Health, Physical Education, Recreation and Dance

Students in the Department of Physical Education are encouraged to affiliate with this professional organization. Annual conferences and workshops, a professional journal and a newsletter are among the membership benefits.

IUPUI Moving Company

The IUPUI Moving Company is a performing dance company composed of students enrolled at IUPUI. Prospective members audition during the first week of the fall semester, when members and apprentices are taken into the company. Approximately 4–6 hours per week are spent in rehearsals, workshops, lecture-demonstrations, or performances. Members should be enrolled concurrently in a dance technique class while performing with the company. The repertoire consists of ballet, modern, jazz, and ethnic dance forms. The IUPUI Moving Company performs on campus, at professional conferences, and for elementary, middle school, and high school audiences.

Phi Epsilon Kappa

This professional fraternity was organized in 1913 at the Indianapolis campus of the School of Physical Education and Tourism Management's predecessor, the Normal College of the American Gymnastic Union Campus. It is dedicated to advancing interest in health, physical education, recreation and safety education. It seeks to promote sound community relationships that support physical education programs. Eligibility criteria include a minimum cumulative GPA of 2.0 earned at IUPUI in addition to participation in professional activities.

Professional Convention Management Association (PCMA) Student Chapter

The Tourism, Conventions and Event Management (TCEM) department sponsors this student organization to expand students' knowledge about the meetings industry. Site visits and speakers are educational components. Social activities and fundraisers are also planned.

Tourism and Hospitality Society

The Tourism, Conventions and Event Management (TCEM) department sponsors this student organization to expand students' knowledge about the tourism industry. Site visits and speakers are educational components. Social activities and fundraisers are also planned.

Policies and Procedures

Undergraduate

Advising and Special Options

Advising Each student in the School of Physical Education and Tourism Management is assigned a faculty counselor who advises the student in program planning and assists with any academic questions or problems. All students are expected to obtain academic counseling each semester prior to enrollment.

Forgiveness Policy Policy provides a fresh start to former IU students accorded to students transferring from other universities. The policy applies only to former IU students, who have worked on a first undergraduate degree, but who have not attended any college for a minimum of three years. Students must invoke this policy upon application for admission to the School of Physical Education and Tourism Management or submit a notification of intent to petition for academic forgiveness if not yet accepted by a school. Forgiveness policy applications are located in the School of Physical Education and Tourism Management.

If the forgiveness petition is accepted, all courses previously taken will remain on the transcript, but only courses with grades of A+, A, A-, B+, B, B-, C+, C, P and S may be counted toward degree requirements, though these grades will not count in the student's GPA. In effect, the student will start with a cumulative GPA of 0.0, after which all the rules of academic probation and dismissal will apply. Forgiveness may be invoked only once and it does not preclude a student from using other grade replacement options available for course work taken after forgiveness is granted. Forgiveness is available only for courses taken at Indiana University. Visit the IUPUI Registrar's Office website to see the entire policy.

Independent Study Work may be accomplished in absence for credit through the School of Continuing Studies. A student must have satisfied the entrance requirements of the School of Physical Education and Tourism Management, however, before registering for such work if it is to be applied toward a degree. Special permission from the dean is required. Students may apply up to 18 credit hours of correspondence work from the School of Continuing Studies toward a degree in the School of Physical Education and Tourism Management.

Pass/Fail Option Students may elect to take one course each semester with a grade of P (Pass) or F (Fail), with a maximum of two such courses each school year, including summer sessions. The student must elect to exercise this option early in the semester or summer session, per the timeline contained in the Registration Guide and Academic Information. Courses that satisfy school or degree program requirements may not be taken under this option.

Excessive Withdrawal Policy After eight withdrawals, a mandatory meeting among the student, the student's advisor and department chair will be held to identify the reason(s) for the withdrawals, discuss alternatives for course scheduling and review the student's plan of study to determine if satisfactory progress is being made toward the degree objective. After 10 withdrawals, a mandatory meeting with the dean of the school will occur. A review of the previous meeting and reason(s) for subsequent withdrawals will determine if the student will be allowed to continue in the School of Physical Education and Tourism Management.

Special Credit Opportunities See department chair for procedures on special credit.

Academic Expectations Student work in general education and major courses will include content and learning activities supporting the principles of undergraduate learning as defined by the faculty of the School of Physical Education and Tourism Management. These principles relate to students' competencies in the following five areas: core skills (reading, writing, speaking, quantitative analysis and use of information technology); critical thinking; intellectual depth, breadth, and adaptiveness; understanding society and culture; and integration and application of knowledge. These general education principles are defined on course syllabi. Faculty expect students to use software applications to prepare assignments, to use electronic mail to enhance communication and/or submit assignments, and to develop competencies with various campus technology resources (e.g., OneStart, Oncourse, internet browsers). Written work is to be of high quality (focused, organized, and with an introduction, purpose, sense of audience, thesis and conclusion; appropriate sentence structure; variety; and correct spelling, grammar, and punctuation). Writing should reveal the student's ability to develop ideas with balanced and specific arguments. Papers should follow APA style unless another style is specified and should give credit to original sources when ideas or materials of others are used.

Academic Integrity Students are responsible for familiarizing themselves with the school's regulations concerning cheating and plagiarism, which appear as follows in the *IUPUI Faculty Handbook VI-5*:

Cheating is dishonesty of any kind with respect to examinations, course assignments, alteration of records or illegal possession of examinations. It is the responsibility of the student not only to abstain from cheating but, in addition, to avoid the appearance of cheating and to guard against making it possible for others to cheat. Any student who helps another student to cheat is as guilty of cheating as the student who was assisted. Students should also do everything possible to induce respect for the examining process and honesty in the performance of assigned tasks in or out of class.

Plagiarism is the claiming of the work of someone else as one's own. Honesty requires that any ideas or materials taken from another source for either written or oral use must be fully acknowledged. The language or ideas taken from another may range from isolated formulas, sentences, or paragraphs to entire articles copied from books, periodicals, speeches, databases, or the writings of other students. The offering of materials assembled or

collected by others in the form of projects or collections without acknowledgement also is considered plagiarism. Any student who fails to give credit for ideas or materials taken from another source is guilty of plagiarism.

A faculty member who has evidence that a student is guilty of cheating or plagiarism shall initiate the process of determining the student's guilt or innocence. No penalty shall be imposed until the student has been informed of the charge and of the evidence upon which it is based and has been given an opportunity to present a defense. If the faculty member finds the student guilty, the faculty member assesses a penalty within the course and promptly reports the case, in writing, to the dean of the school or comparable head of the academic unit. The report should include the names of any other students who may be involved in the incident and recommendations for further action. The dean, in consultation with the faculty member if the latter so desires, will initiate any further disciplinary proceedings and inform the faculty member of any action taken. In every case, a record of the offenses remains on file in the dean's office.

For further regulations, students should refer to *IUPUI's Code of Student Rights, Responsibilities, and Conduct* by the Board of Trustees of Indiana University. Students may obtain a copy of the Code from the dean's office or view the text on the IUPUI website at www.iupui.edu.

Academic Load

Semester Academic Load A typical academic load is 12–18 credit hours, with an average load being approximately 15 credit hours. A typical load in a summer session is 6 credit hours. Students expecting to carry more than 18 credit hours per semester or 7 credit hours per summer session must have permission of the dean of the School of Physical Education and Tourism Management and should have a minimum cumulative grade point average (GPA) of 3.0 (B), or have earned a B (3.0) average in their last full semester.

Academic Standing, Probation, Dismissal and Reinstatement

Academic Standing Students who consistently maintain a GPA of 2.2 or higher in both their cumulative and semester records are considered to be in good standing.

Academic Probation Students are on academic probation when either their semester GPA or their cumulative GPA is below 2.2. Each student on academic probation will be so advised by a letter from the dean of the School of Physical Education and Tourism Management. The student will be informed of all conditions and restrictions required for reestablishing good academic standing.

Dismissal Students are subject to dismissal when they have failed to attain a minimum of a 2.2 GPA average in any two consecutive semesters or when the cumulative GPA of the student who is on probation falls or remains below a 2.2 GPA. Each student who is dismissed will be so advised by a letter from the Office of the Dean of the School of Physical Education and Tourism Management.

Reinstatement A dismissed student who wishes to be reinstated must complete an Application for Reinstatement located on the School of Physical Education and Tourism Management website. This application requires explanation of any extenuating circumstances that may have hindered academic performance and a brief outline of future schedules and study plans. Each application will be considered on an individual basis and will receive more favorable consideration if the student has sought advice about academic progress on previous occasions and if academic records are close to the standards required for retaining the student. In order to allow time for each case to be reviewed on its own merits, petitions for re-admission must be filed at least two weeks before the first day of classes. Application for Reinstatement forms should be submitted to the School of Physical Education and Tourism Management Recorder.

The School of Physical Education and Tourism Management typically does not consider petitions for immediate reinstatement. Dismissed students who believe that circumstances warrant consideration for immediate reinstatement must meet with the dean, who will determine whether or not an application for immediate reinstatement is warranted.

One Dismissal Students who have been dismissed once for academic reasons may appeal for reinstatement subject to the conditions stated above.

Two Dismissals Students who have been dismissed twice for academic reasons may not appeal for reinstatement for any enrollment period during the next calendar year.

Students who are reinstated by the school will have to meet prescribed standards of performance for the semester for which they are reinstated. Failure to meet these standards will result in dismissal.

Student Grievance Procedures Students who feel they have been treated in an unfair or unethical manner by a member of the School of Physical Education and Tourism Management faculty are encouraged to resolve their differences directly with the faculty member. When informal solutions do not appear possible, the following procedures should be observed.

Appeal for Grade Change A student may request a change of grade in a School of Physical Education and Tourism Management course by filing a petition with the dean of the school. The petition, along with supporting evidence that the grade was improper, must be submitted to the Dean's Office (PE 251) no later than one calendar year following the final date of the term in which the course was taken.

Complaints of Unethical Treatment All academic personnel (faculty, part-time instructors and advisors) are expected to conform to the Code of Student Rights, Responsibilities, and Conduct published in the Indiana University Academic Handbook. Students who feel they have been treated unfairly by a faculty member may lodge a complaint by following the procedures outlined in the Code, a copy of which may be obtained from the Dean's Office, PE 251.

Student Advocacy The Office of Student Advocacy provides impartial, objective and confidential assistance to students regarding problems or disputes that appear unresolvable through existing procedures or systems. By considering problems in an unbiased way, the student

advocate strives to achieve a fair resolution of disputes. As an advocate for just and fair treatment, the office works to protect the rights of all parties involved. The student advocate investigates claims of unfair treatment or erroneous procedures and serves as an information resource, advisor and intermediary.

For many problems, a procedure is outlined by university rules or policies. Where practical, students should observe the policies and regulations of their school. For more information, contact the Student Advocacy Office, Campus Center 350, (317) 278-7594, or the Office of the Dean of Students, Campus Center 350, (317) 274-4431.

Graduation

Residency Requirements for Graduation Students must complete at least 30 hours of the last 60 credit hours required for a specific degree program while in residence at the School of Physical Education and Tourism Management at IUPUI. The 30 credit hours should include either one 12 credit hour regular semester or two 6 credit hour summer sessions.

Degree Application A candidate for graduation must file a formal graduation application for the degree with the School of Physical Education and Tourism Management. Applications must be filed by the following deadlines: December graduates file the application by May 1st, May graduates file by October 1st, and August graduates file by February 1st. Candidates for graduation will be notified before the start of their graduation semester/summer session regarding their graduation status.

Graduation with Honors Indiana University recognizes high cumulative grade point averages by awarding degrees with the designations “Distinction,’’ “High Distinction,’’ and “Highest Distinction.’’ Purdue programs recognize the top 10 percent of graduates with the designations “Distinction’’ and “Highest Distinction.’’ The designated individuals are presented with honor cords to wear at Commencement exercises for IUPUI.

Other Physical Education Department Information

Uniforms Physical education majors are encouraged to wear uniform shirts and shorts for several professional preparation activity classes. Instructors indicate on the first day of class if uniforms will be required. White polo shirts and long navy pants are the recommended attire for physical education majors participating in professional field experiences off campus.

Swimming classes require a one-piece bathing suit. Warm-ups or street clothes are appropriate attire for the office area on the bridge level of the Physical Education/Natatorium Building.

Camp Brosius In 1921, the Normal College (presently known as the IUPUI School of Physical Education and Tourism Management) established Camp Brosius at Elkhart Lake, Wisconsin, as a training camp for its physical education majors. Currently, the Indiana University School of Physical Education and Tourism Management operates the camp as both a College Camp (for academic credit) and Family Camp (for family vacations). The Department of Physical Education holds leadership, team building, critical thinking and personal skills development classes at Camp Brosius as a part of the physical education major's required curriculum.

The physical education major (once admitted to the Department of Physical Education) is expected to attend camp early in their academic career with three sessions now being held every summer for this purpose. Two sessions are held in mid-May and one session in mid-August. Orientation to Camp is held on the IUPUI campus the week prior to going to Camp Brosius. Students in the Department of Physical Education receive 3 credit hours towards their degree for the Camp Brosius experience.

Faculty

Administrative Officers

- James M. Gladden, Ph.D., Dean of the School of Physical Education and Tourism Management
- Rafael E. Bahamonde, Ph.D., Chairperson of the Department of Physical Education
- Sotiris Hji-Avgoustis, Ph.D., Chairperson of the Department of Tourism, Conventions and Event Management
- Thomas Rude, M.A., Chairperson of the Department of Military Science

Department of Physical Education Faculty

- Angermeier, Lisa, Ph.D. (Indiana University, 2000), Clinical Assistant Professor of Physical Education
- Bahamonde, Rafael E., Ph.D. (Indiana University, 1994), Professor of Physical Education
- Barnett, Sandra, M.S. (Indiana University, 1995), Lecturer in Physical Education
- Barton, Nancy, M.S. (Indiana University, 1986), Lecturer in Physical Education
- Bradley, Jay A., M.Ed. (University of Cincinnati, 1979), Clinical Assistant Professor of Physical Education; Coordinator of Internship Programs
- Cappaert, Thomas A., Ph.D. (University of Toledo, 2000), Visiting Lecturer in Physical Education
- Culp, Brian, Ed.D. (University of Georgia, 2005), Assistant Professor of Physical Education
- Doecke, Johannah, Ph.D. (Ohio State University, 1984), Lecturer in Physical Education; IUPUI Men's and Women's Diving Coach
- Eagleman, Andrea N., Ph.D. (Indiana University, 2008), Assistant Professor of Physical Education
- Fallowfield, Stephen M., M.S. (Indiana University, 2005), Visiting Lecturer in Physical Education
- Kaleth, Anthony, Ph.D. (Virginia Polytechnic Institute and State University, 2002), Associate Professor of Physical Education
- Keith, NiCole, Ph.D. (University of Connecticut, 1999), Associate Professor of Physical Education
- Lee, Soonhwan, D.S.M. (United States Sports Academy, 2002), Assistant Professor of Physical Education
- Mikesky, Alan E., Ph.D. (University of Texas Health Science Center Dallas, 1987), Professor of Physical Education, School of Physical Education and Tourism Management; Adjunct Professor of Anatomy and Cell Biology, School of Medicine.
- Mullins, Dena, M.A. (Ball State University, 1990), Lecturer in Physical Education

- Riley, Zachary A., Ph.D. (University of Colorado, 2008), Assistant Professor of Physical Education
- Stanton-Nichols, Kathleen A., Ph.D. (University of Virginia, 1995), Associate Professor of Physical Education
- Streepey, Jefferson, Ph.D. (University of Michigan, 2003), Assistant Professor of Physical Education
- Swinford, Rachel R., M.S. (Indiana University, 2007), Lecturer in Physical Education
- Urtel, Mark G., Ed.D. (Indiana University, 2004), Associate Professor of Physical Education

Department of Tourism, Conventions and Event Management Faculty

- Alvarez, Susan L., M.S. (Indiana University, 2005), Lecturer in Tourism, Conventions and Event Management
- Benko, Susan T., M.B.A. (Marymount University, 1983), Trustees Lecturer in Tourism, Conventions and Event Management
- Bennett, James D., M.S. (Indiana University, 1996), Senior Lecturer in Tourism, Conventions and Event Management
- Brothers, Linda R., Ph.D. (Purdue University, 1984), Associate Professor of Tourism, Conventions and Event Management
- Cecil, Amanda K., Ph.D. (Indiana University, 2005), Assistant Professor of Tourism, Conventions and Event Management
- Fu, Yao-Yi, Ph.D. (Pennsylvania State University, 2003), Associate Professor of Tourism, Conventions and Event Management
- Heo, Jinmoo, Ph.D. (Indiana University, 2007), Assistant Professor of Tourism, Conventions and Event Management
- Hji-Avgoustis, Sotiris, Ph.D. (Indiana State University, 1996), Chair of the Department of Tourism, Conventions and Event Management; Professor of Tourism, Conventions and Event Management
- Jones, Elizabeth Ann, P.E.D. (Indiana University, 1983), Associate Professor of Tourism, Conventions and Event Management
- King, Carina, Ph.D. (Indiana University, 2007), Assistant Professor of Tourism, Conventions and Event Management
- Krohn, Brian D., Ph.D. (Clemson University, 2008), Assistant Professor of Tourism, Conventions and Event Management
- Wang, Suosheng, Ph.D. (Oklahoma State University, 2003), Associate Professor of Tourism, Conventions and Event Management

Courses

Department of Tourism, Conventions and Event Management Courses

The courses below represent the total offerings of the Department of Tourism, Conventions and Event Management. Not all courses are offered every semester. The number of credit hours given for a course is indicated in parentheses following the course title. The abbreviation P refers to prerequisites. The abbreviation C refers to corequisite(s).

TCEM 100 Introduction to Tourism Studies (3 cr.) Travel, trends, travel-modes, and economic impact on destination area. Emphasis on local, regional, and national tourism.

TCEM 110 College Life Orientation (1 cr.) To introduce new TCEM majors to the department, school, and university to ensure a successful beginning to their academic careers.

TCEM 112 Tourism and Hospitality Management Principles (3 cr.) The principles of planning, organizing, directing and controlling as applied to the hospitality service industry. Topics relating to motivation and leadership will be stressed. Issues of organizational change, organizational effectiveness and the nature of managerial work will be addressed.

TCEM 171 Introduction to Convention/Meeting Management (3 cr.) An overview of the conventions, expositions and meetings industry. Focus will be on the operational aspects of various industry segments and the intra-industry interaction of each.

TCEM 172 The Development and Management of Attractions (3 cr.) An examination of the process of developing visitor attractions and a discussion of the main issues involved in their management.

TCEM 181 Lodging Industry Operations (3 cr.) Concepts of organization, communication, ethics and policy formulation in the front office. Introducing the basic techniques and trends in systems and equipment available to meet the needs of the management and the guest.

TCEM 191 Sanitation and Health in Food Service, Lodging and Tourism (3 cr.) The application of sanitary and public health engineering principles to food service and lodging operations.

TCEM 210 Special Event Management (3 cr.) P: TCEM 171. Course topics include planning for social events such as themed parties, weddings, balls, fundraiser recognition and entertainment events.

TCEM 218 Wines of the World (3 cr.) P: 21 years of age. An examination of wines produced in other countries, identifying the characteristics of the growing regions, types of wines produced, economic considerations of purchasing imported wines and marketing these wines to increase beverage sales.

TCEM 219 Management of Sports Events (3 cr.) Amateur or professional sport event planning will include discussion of site selection, logistics, personnel, marketing, economics, and legalities of hosting an event.

TCEM 231 Tourism and Hospitality Marketing (3 cr.) Development, use, and evaluation of effective merchandising, advertising, and public relations techniques in the hospitality and tourism industries.

TCEM 241 Financial Accounting for the Service Industries (3 cr.) P: PHIL-P 162. Fundamental accounting principles and procedures applied to the hospitality and service industries. Includes study of the uniform system of accounts, financial statements, special purpose journal,

and subsidiary ledgers unique to the hospitality and service industries.

TCEM 252 Promotional Communications (3 cr.) P: ENG-W 231. Provides information on the field of personal and public relations. Explores effective public relations methods. Focuses on the relationship-oriented decisions a public relations professional must make based upon different circumstances that arise within an organization.

TCEM 271 Mechanics of Meeting Planning (3 cr.) P: TCEM 171. An analysis of details pertinent to the organization and execution of a meeting. Topics include finances and contracts, site selection, program development, marketing, evaluation and wrap-up.

TCEM 302 Hospitality/Tourism Industry Trends (1-2 cr.) Supervised and structured industry practical experience. Requires signed learning agreement between student and employer prior to initiating internship: a minimum of 300 work hours for each credit. Maximum number of credit hours given for a summer is 1 (one). Maximum number of credits given in a semester experience is 2 (two).

TCEM 306 Destination Planning (1 cr.) P: TCEM 231. To prepare a business plan that presents a comprehensive outline of a proposed hospitality operation and includes a financial portfolio and work history of the applicant.

TCEM 308 Wine Selection (3 cr.) P: 21 years of age. C: TCEM 218. Topics will include types of wines, wine quality and serving suggestions. Wine tastings will be included.

TCEM 309 Cruise Line Management (3 cr.) P: Approved by the Office of International Affairs. C: 2.5 GPA. An overview of the cruise line industry and the skills needed to begin a productive career in this specialized travel segment.

TCEM 310 Event Catering Management (2 cr.) Exploration of off and on premise catering requirement. Concept of event food management including menu planning, budget preparation, logistics management, guest relations and marketing.

TCEM 312 Human Resource Management for the Service Industries (3 cr.) P: TCEM 112. The concepts of management of people for effective operation of institutions involving supervisory development and communications; the pretesting, training, and evaluating of employees; and the development of attitudes and morale of people working together.

TCEM 318 Creative Wine Management (3 cr.) P: 21 years of age. C: TCEM 218. Students will be presented with a concise, practical guide to profitable wine management. The course will incorporate the best experience amassed by operations over the years, with heavy emphasis on the recent trends.

TCEM 328 Introduction to Microbrewing (3 cr.) P: 21 years of age. This course deals with the principles of microbrewing, and each student will learn the basic concepts necessary to create beer. In this sense, students should come away from this class with the knowledge to build his or her own microbrewery. As well, this class teaches a general appreciation for brewing and beers around the world.

TCEM 329 Tourism Sports Marketing (3 cr.) The application of tourism marketing principles and activities will be analyzed in the content of effective tourism marketing.

TCEM 334 Cultural Heritage Tourism (3 cr.) Cultural and heritage tourism balances visitor interests and needs against protecting cultural and heritage resources. This course examines the range of cultural and heritage assets that can become viable tourism attractions and looks at ways of linking quality cultural heritage tourism to community development. Special emphasis will be placed on Indiana cultural and heritage tourism.

TCEM 341 Financial Analysis and Decision Making in Tourism, and Hospitality Operations (3 cr.) P: TCEM 241. Managerial and financial analyses of numerical data used for decision-making. Consideration of systems, techniques, information types, and presentational forms used by hospitality management. Emphasis on situations oriented to the hospitality industry.

TCEM 362 Economics of Tourism (3 cr.) P: TCEM 100. C: ECON-E 201. To discuss the economic impact of travel on tourism's various sectors, and the quantitative methods that can be applied to travel forecasting and tourism principles.

TCEM 371 Convention Sales and Service (3 cr.) P: TCEM 171. This course is designed as an in-depth analysis of convention and facility sales and service. The course will enable meetings and events from the pre-planning through post event evaluation from the supplies perspective. Topics include marketing and advertising a facility property, organizing a sales staff, selling to different markets and contract/legal issues.

TCEM 372 Global Tourism Geography (3 cr.) P: TCEM 172. C: GEOG 300 Elective. Analysis of U.S. and world travel destinations, including the exploration of principal geographic features, population centers and attractions, customs and traditions, habits, festivals, and events, as these relate to the hospitality and travel industry. The major airline and airport/city codes in North America and overseas are also covered.

TCEM 377 Exhibit Marketing (3 cr.) A successful exhibit can be one of the most powerful sales and marketing tools in any company's arsenal. This course is designed to help students through every phase of the endeavor-from the initial planning stage to implementation and post-show follow-up.

TCEM 382 Popular Travel Trends (3 cr.) Development of an understanding of the patterns, principles and management of international travel to popular tourist destinations.

TCEM 385 Beer and Spirits Management (3 cr.) P: 21 years of age. Students will be introduced to the basic principles of beer and spirits production with a primary focus on manufacturing quality criteria, beer and spirits styles, and sensory standards. Evaluation by tasting is an integral part of this course.

TCEM 387 Tourism Internship (1-12 cr.) P: Junior standing. To provide students an opportunity to improve

their operational/managerial skills by working in new areas.

TCEM 388 Wine Styles (3 cr.) P: 21 years of age. C: TCEM 218. The tasting of wines, application of wine fundamentals and recognition of regional varietals and their characteristics to better appreciate how history, climate and policy ultimately manifest into what's in each bottle.

TCEM 401 Tourism Internship (1-12 cr.) P: Junior standing. To provide students an opportunity to improve their operational/managerial skills by working in new areas.

TCEM 408 Food and Wine Pairing (3 cr.) P: 21 years of age. C: TCEM 218. To be able to appreciate the categories of wine, what they are and how they may be used in conjunction with making food combinations and wine lists for restaurants and other foodservice establishments.

TCEM 411 Tourism and Hospitality Law (3 cr.) P: TCEM 112. C: TCEM 312. Rights and duties of innkeepers and restaurateurs, civil rights, contracts, negotiable instruments, and types of organizations.

TCEM 418 History of Wine (3 cr.) P: 21 years of age. C: TCEM 218. A thematic understanding of the subject of wine since it was first produced everything from wine itself to the business of selling wine throughout history to its uses (both ancient and current) and its pleasure as a beverage which combines with food and makes the dining experience better.

TCEM 461 Tourism Research, Planning and Development (3 cr.) P: STAT 301. This course discusses tourism research planning and development as a process with emphasis on goal achievement for tourism and host community.

TCEM 471 International Meeting Planning (3 cr.) P: TCEM 171. The organization and production of international corporate business meetings, seminars, incentive trips and customer events using innovative and cost-effective programs that address changing business needs.

TCEM 472 Global Tourism (3 cr.) P: TCEM 100. The presentation of critical issues, problems, and opportunities that face the tourism industry.

TCEM 477 Non Profit Meeting Management (3 cr.) P: TCEM 171. Focuses on basic aspects and skills involved in planning and managing non-profit meetings and conventions. Examines sequences of events from the conceptual state of the first meeting plan through completion of the event.

TCEM 482 Travel to Exotic Destinations (3 cr.) Development of an understanding of the principles, patterns and management of international travel to exotic destinations.

TCEM 483 Ecotourism (3 cr.) Course will introduce students to the history, principles, marketing, planning, and management of ecotourism activities and development which promotes environmental awareness and adds economic benefits.

TCEM 499 Operational Tourism Analysis (3 cr.) P: TCEM 112, TCEM 341, STAT 301 and Senior standing. C: TCEM 231. Combines all of the areas concerned with executive management, marketing, personnel, cost controls, etc. Examines the hospitality organization as a total system, with emphasis on strategic planning, systems design and problem analysis.

TCEM 500 Foundations of Event Tourism (3 cr.) This course will serve as a forum for the discussion of today's tourism, including tourism trends, tourism impact, tourism policy issues, examination of the role of the tourist, the tourism manager and the host community, etc. Delivery will be through a series of structured lectures, seminars, directed activities and a research project. This will include analyses of case studies, discussions, slide shows, DVD/ videos, guided readings and individual/group research projects.

TCEM 519 Sports Tourism Management (3 cr.) This course analyzes the interconnectedness of sport and tourism from behavioral, historical, economic, management, marketing, environmental and policy perspectives. Issues and trends in the sport and tourism industry are also investigated.

TCEM 531 Event Tourism Marketing (3 cr.) The purpose of this course is to help you gain advanced marketing concepts and learn the process of formulating and managing marketing strategy for event tourism. After taking this class, you should be able to: 1) identify aspects of event tourism marketing, 2) review and critically assess different marketing theories and practices in event tourism, and 3) conduct methodological sound marketing research of your own.

TCEM 534 Cultural Tourism Management (3 cr.) The course investigates the relationship between culture and tourism, by examining the socio-cultural complexities of cultural heritage tourism. Issues and trends in the management of tangible and intangible assets, such as interpretation, globalization, cross-cultural values, impacts of development, sustainable tourism, etc., are also investigated.

TCEM 562 Economics of Event Tourism (3 cr.) P: Undergraduate Micro-Economics. The course examines the fundamental economic principles as they apply to the leisure and tourism industry. The economic complexities of the tourism product, including travel behavior, tourism spending, demand and supply of tourism services, costs and benefits of tourism events, tourism development by governments, etc., will be investigated. Trends in travel and tourism, and related socio-economic impacts are examined.

TCEM 571 Strategic Meeting Management (3 cr.) This graduate seminar is designed to address contemporary issues facing business professionals in the meeting and event industry. The course will evaluate high-level strategies that address a coordinated approach to planning and evaluating meetings.

Elective Physical Education Program

HPER-D 101 Beginning Ballet (1 cr.) This course is designed for the adult learner in ballet technique. It includes barre work and center combinations that promote strength, flexibility, balance, and coordination. Ballet

serves as a foundation for other forms of dance and enhances body posture and carriage.

HPER-D 110 Beginning Modern Jazz Dance (1 cr.) This course is designed for the adult beginner in modern jazz dance and will be concerned with rigorously training the body in the styles of leading jazz educators. Warm-up exercises and jazz combinations will be performed, and historical, social, and ethnic dance contributions will be examined.

HPER-D 201 Modern Dance Workshop (1 cr.) Collaboration of dance faculty in providing a wide variety of movement experiences in the areas of technique, composition, and improvisation. This course may be repeated.

HPER-D 202 Intermediate Ballet (1 cr.) This course is a continuation of HPER-D 101 or is for the adult beginner with previous experience in ballet technique. It will cover a technical vocabulary of barre and center work to stimulate both the mind and the body.

HPER-D 211 Advanced Technique I (2 cr.) P: HPER-E 355 or consent of instructor. Designed to allow the student to develop a higher level of technical proficiency, with an emphasis on the application and analysis of various movement principles as they relate to dance and performance.

HPER-D 212 Advanced Technique II (2 cr.) P: HPER-D 211. An extension of principles examined in HPER-D 211 through the use of longer and more complex movement sequences, with an emphasis on style and performance.

HPER-D 218 Modern Jazz Dance Technique (1 cr.) Instruction in jazz dance technique derived from the styles of Luigi and Gus Giordano; special emphasis on centering, precision and clarity of movement, and coordination and performance skills such as style and visual focus.

HPER-D 221 Dance Composition I (2 cr.) P: HPER-E 255 or HPER-E 355. Through problem-solving assignments and appropriate dance composition, tools for discovering movement will be developed.

HPER-D 332 Dance and the Allied Arts II (3 cr.) P: Consent of instructor. Historical development of dance and related art forms, Renaissance through contemporary.

HPER-D 351 Teaching of Modern Dance (1 cr.) P: HPER-D 221. Study of various approaches, methods and materials for teaching dance at the secondary level, including procedures for evaluation.

HPER-D 421 Choreographic Performance Project (2 cr.) P: Senior dance performance majors only. Under faculty guidance, each student is responsible for initiating and developing a completed work for concert performance.

HPER-D 441 Dance Production (2 cr.) Basic orientation to technical theatre, specifically for dance. Production methods for publicity, audio-visual materials, and make-up design. Includes presentation of an original lecture-demonstration.

HPER-E 100 Experiences in Physical Activity (1 cr.) Any of a series of courses in new and developing fitness and activity areas.

HPER-E 102 Group Exercise (1 cr.) A total fitness class that emphasizes cardiorespiratory conditioning, flexibility, muscular endurance, and coordination through rhythmical body movement. S/F grades.

HPER-E 105 Badminton (1 cr.) Beginning instruction in basic skills and techniques of badminton for singles, doubles, and mixed doubles play. Emphasis on basic skill development, rules, and strategy.

HPER-E 109 Ballroom and Social Dance (1 cr.) Instruction in the techniques of ballroom dance including fox trot, waltz, cha-cha, tango, rhumba, samba, and fad dances.

HPER-E 111 Basketball (1 cr.) Instruction in fundamental skills of shooting, passing, ball handling, footwork, basic strategies of offensive and defensive play, and interpretation of rules.

HPER-E 119 Personal Fitness (1 cr.) Instruction in basic principles of conditioning and fitness. Emphasis on muscular strength, muscular endurance, flexibility, and cardiorespiratory endurance. Designed for students without prior knowledge of conditioning methods.

HPER-E 121 Conditioning and Weight Training (1 cr.) Instruction in basic principles of conditioning and weight training. Emphasis on muscular strength, muscular endurance, flexibility, and cardiorespiratory endurance.

HPER-E 127 Fencing (1 cr.) Instruction in guard position, footwork, and basic defensive and offensive skills. Emphasis on fencing with foil and an overview of the sabre.

HPER-E 130 Army Physical Fitness (2 cr.) The path to total fitness requires a combination of physical conditioning, mental conditioning, and common sense dietary considerations. This course is for those willing to accept a disciplined regimen proven to lead to total fitness.

HPER-E 131 Folk and Square Dance (1 cr.) Introduction to folk dance in the United States and other countries. Instruction in fundamentals of movement, basic folk dance techniques, and square-dance patterns in traditional and modern folk dances.

HPER-E 133 Fitness and Jogging (1 cr.) Beginning instruction in the basic principles of fitness as they apply to a jogging program. Emphasis on cardiorespiratory endurance and flexibility. Basic concepts underlying Dr. Kenneth Cooper's aerobic program included. Course designed for students without prior experience in jogging programs or in aerobics levels I through III.

HPER-E 135 Golf (1 cr.) Beginning instruction in techniques for putting, chipping, pitching, iron swing, and wood stroke. Course includes rules and etiquette of golf. Students play on par-3 courses. Fee charged.

HPER-E 137 Gymnastics (1 cr.) Beginning instruction in basic skills and incorporation of basic routines in trampoline, tumbling and vaulting. Emphasis on events performed by both men and women. All events will be included.

HPER-E 148 T'ai Chi Ch'uan (1 cr.) Instruction in basic skills and techniques for beginning level participants in

this non-contact martial art. Topics include breathing, centering, postures, and movement sequences.

HPER-E 151 Self-Defense (1 cr.) Instruction techniques for practical self-defense skills and situations. No uniform required.

HPER-E 155 Modern Dance (1 cr.) Beginning instruction in modern dance technique, stressing knowledge and application of movement principles essential to dance training.

HPER-E 168 Swimming-Nonswimmers (1 cr.) Beginning instruction in self-rescue, remedial swimming skills, and several basic strokes. For the student with no swimming skills.

HPER-E 181 Tennis (1 cr.) Beginning instruction in the fundamental skills of forehand and backhand strokes and serves. Competitive play in women's, men's, and mixed doubles.

HPER-E 185 Volleyball (1 cr.) Instruction in fundamental skills of power volleyball. Emphasis on overhand serve, bump, set, dig, and spike. Team offensive and defensive strategies included.

HPER-E 190 Yoga (1 cr.) Introduction to the basic principles and techniques of yoga.

HPER-E 200 Military Science-Leadership Lab (1-6 cr.) P: Minimum 2.0 GPA, 54 total credits. Conducted at Fort Knox, Kentucky, for six weeks, this course will cover basic military skills and leadership. Students earn 1-6 credits, based on military science basic courses previously taken. Students should not have completed military basic training or Reserve Officer Training Corps (ROTC) basic course.

HPER-E 205 Badminton-Intermediate (1 cr.) Intermediate instruction in skills and techniques of badminton for singles, doubles and mixed doubles play. Emphasis on development of skills and strategy.

HPER-E 219 Weight Control and Exercise (2 cr.) Designed for overweight students, this class will stress the importance of diet and exercise in permanent weight control. Uses dietary behavior modification techniques and an exercise program to achieve a gradual reduction to and maintenance of ideal weight. S/F grades.

HPER-E 227 Intermediate Fencing (1 cr.) P: HPER-E 127 or permission of instructor. Builds upon basic knowledge of fencing. Instruction of advanced skills and new techniques with an emphasis on the tactical aspect of fencing at a competitive level.

HPER-E 230 Advanced Army Physical Fitness (2 cr.) P: HPER-E 130 or consent of instructor. Continuing along the path to total fitness begun in HPER-E 130, this course emphasizes the leadership aspect of army physical fitness. Students will lead physical training sessions, participate in and lead formation runs, and continue the discipline regimen begun in HPER-E 130.

HPER-E 248 Intermediate T'ai Chi Ch'uan (1 cr.) P: HPER-E 148 or consent of instructor. This intermediate course examines the everyday practice of t'ai chi ch'uan. Course presents refinement of William C. C. Chen's 60 movement form, da lu, and push-hands. Provides examples of neutralizing, throwing, striking, and strategic/philosophic concepts.

HPER-E 255 Modern Dance-Intermediate (1 cr.) P: HPER-E 155 or consent of instructor. Intermediate modern dance technique stressing knowledge and application of movement principles essential to dance training.

HPER-E 260 Karate-Intermediate (1 cr.) P: Yellow belt technical level or consent of instructor. Instruction in advanced applications of basic techniques and free fighting. Students should achieve technical level of green belt. Karate uniform required.

HPER-E 268 Swimming-Intermediate (1 cr.) Instruction designed to help the less-skilled swimmer master the five basic strokes and be proficient in self-rescue and basic rescue skills.

HPER-E 270 Introduction to Scientific Scuba (2 cr.) Introduction to scuba diving. Emphasis on safety and avoidance of potential dangers. A non-certification course.

HPER-E 281 Tennis-Intermediate (1 cr.) Instruction in spin service, volley, lob, and advanced drive placement. Emphasis on singles and doubles playing strategies.

HPER-E 290 Yoga II (1 cr.) P: HPER-E 190 or equivalent. Intermediate yoga builds upon material presented in HPER-E 190 Beginning Yoga. The class will continue an emphasis on breath and release work through yoga, including variations on familiar asanas, continued explorations of the body systems, and deeper understanding of the health benefits of this practice. The energizing and strengthening value of standing poses will also be featured. Grading is based on attendance, effort and the completion of out-of-class written assignments.

HPER-E 355 Modern Dance I-Advanced (1 cr.) P: HPER-E 255 or consent of instructor. Advanced techniques in modern dance with emphasis on performance of movement patterns and individual creative work.

HPER-E 356 Modern Dance II-Advanced (1 cr.) P: HPER-E 355. Course may be repeated. Continuation of advanced techniques in modern dance with emphasis on performance of movement patterns and on individual creative work.

HPER-E 371 Advanced Scuba (1 cr.) P: HPER-E 370 or National Scuba Certification. Course provides students with practical knowledge in advanced scuba. Topics include natural and compass navigation, search and recovery, night or limited visibility, and specialty/deep-diving knowledge.

HPER-E 477 Water Safety Instructor (2 cr.) Instruction prepares students to teach American Red Cross swimming and water safety courses to infants/parents, preschoolers/parents, youths and adults. Includes safety course for swim coaches. Students meeting written and skill criteria earn American Red Cross Water Safety Instructor certificate.

Foods and Nutrition Courses

FN 30300 Essentials of Nutrition (3 cr.) Basic nutrition and it's application in meeting nutritional needs of all ages.

Consideration is given to food selection, legislation, and community nutrition education programs.

FN 31300 Principles of Healthy Menu Planning and Food Programs (3 cr.) Basic nutrition as applied to food intake patterns and modifications/preparation of recipes to provide a more healthful diet.

FN 31500 Fundamentals of Nutrition (3 cr.) P: CHEM-C 101 or BIOL-N 217 or consent of instructor. Basic principles of nutrition and their application in meeting nutritional needs during the life cycle.

FN 33000 Diet Selection and Planning (3 cr.) This course examines the nutritional requirements for individuals from birth to senior years.

Graduate Physical Education Courses

HPER-A 642 Internship in Athletics (1-4 cr.) Credit for practical learning experiences as well as quality career-related work experiences.

HPER-H 510 Organization and Administration of School Health Programs (3 cr.) Recommends criteria for the organization, implementation, and evaluation of health education programs in schools. Covers the areas of administration, health instruction, health services, and a healthful school environment. Discusses special roles and responsibilities of teachers, nurses, administrators, and other school and community personnel in promoting child health.

HPER-H 517 Workshop in Health Education (1-3 cr.) Interesting topics of relevance to individuals in school, public health and related disciplines. Conducted in workshop fashion under the direction of faculty members. Emphasizes practical application, group involvement, and the use of resource personnel. Specific topics vary; course may be repeated for credit.

HPER-K 500 Special Topics in Kinesiology (3 cr.) Selected topics in physical education.

HPER-K 506 Computer Applications in Physical Education (3 cr.) Hands-on applications in the use of microcomputers as problem-solving tools in physical education. Programming applications and problems in physical education, sport sciences, administration, athletics and research.

HPER-K 511 Legal Issues in the Sport Environment (3 cr.) An introduction to legal principles involved in amateur sport. Constitutional law issues such as athletic eligibility, NCAA due process, gender discrimination and drug testing. In-depth explanation of tort liability. Contracts in amateur sport settings.

HPER-K 525 Psychological Foundations of Exercise and Sport (3 cr.) Addresses theoretical and empirical aspects of topics including exercise and mental health, anxiety and sport performance, "personology" and sport, overtraining, exercise adherence, and perceived exertion.

HPER-K 530 Mechanical Analysis of Human Performance (3 cr.) P: ANAT-A 215 or equivalent; PHYS-P 201 recommended. Newtonian mechanics applied to human movement. Analysis of sports techniques.

HPER-K 532 Clinical Biomechanics-Gait (3 cr.) Injury and pathology of the human locomotive system affects our well-being and independence. Lectures, discussions and laboratory work on the mechanics of human locomotion will focus on the understanding of the complex processes involved in able-bodied and pathological gaits. Case studies are used to link observable/measurable behavior to pathology and injury.

HPER-K 533 Advanced Theories of High-Level Performance (3 cr.) An integrative analysis of the physiological, psychological and biomechanical principles, mechanisms and phenomena underlying the acquisition of the capacities and abilities required for high-level physical performance.

HPER-K 535 Physiological Basis of Human Performance (3 cr.) P: PHYS-P 215 or equivalent. A study of physiological changes that occur with exercise. Emphasis on cardiorespiratory, muscular, and biochemical adaptations to training, and how these adaptations affect human performance. Physiological principles are applied to athletic training, adult fitness, weight regulation, and physical therapy.

HPER-K 541 Nature and Basis of Motor Skills (3 cr.) An overview of neural mechanisms underlying motor control. Application of neurophysiological principles to human motor performance.

HPER-K 542 Neuromuscular Control of Movement (3 cr.) An overview of neural mechanisms underlying motor control. Includes applications of neurophysiological principles to human motor performance.

HPER-K 552 Problems in Adapted Physical Education (3 cr.) A study of problems as they relate to philosophy, procedures, and practices in adapted physical education.

HPER-K 553 Physical Activity and Health (3 cr.) Provides an overview of the role of physical activity in the prevention of disease and disability. Explores the health-related consequences of inactivity and discusses interventions designed to increase physical activity within populations. The course will focus on obesity and it's health-related consequences.

HPER-K 562 Exercise Prescription in Health and Disease I (3 cr.) Health fitness laboratory evaluation for exercise prescription for apparently healthy adults. Modification of prescription for metabolic and immune diseases. Topics include disease etiology, pathophysiology, exercise intervention, clinical management and exercise prescription for hyperlipidemia, obesity, diabetes, stage renal disease, cancer, AIDS and organ transplantation.

HPER-K 563 Cardiac Assessment in Exercise Testing (3 cr.) Physiology, assessment techniques and interpretation of basic cardiac rhythm, 12 lead EKG and adjunctive imaging techniques in clinical exercise testing. Introduction to basic cardiac pharmacology.

HPER-K 571 Administration of Physical Education (3 cr.) Prepares individuals to assume administrative roles in physical education. Concepts and practices related to the administration of physical education. Procedures for developing and evaluating learning experiences. Aspects of administration pertaining to programming, personnel, facilities, equipment, supplies, safety, and in-service programs.

HPER-K 572 The Physical Education Curriculum (3 cr.) Influences on curricula. Designs for developing, revising, and evaluating physical education curricula. Alternative modes of curriculum organization. The interdependence of general education, specialized education, exploratory education, and enrichment education. The roles of teachers and administrators in the production of curricula. Suggested formats.

HPER-K 576 Measurement and Evaluation in Physical Education (3 cr.) Theory of measurement in physical education, selection and administration of appropriate tests, and interpretation of results by statistical procedures. Project required to apply theory taught.

HPER-K 601 Readings in Kinesiology (1-3 cr.) P: Graduate GPA of at least 3.0. Guided readings for broadening information about and understanding of the profession.

HPER-K 602 Independent Study and Research (1-5 cr.) P: Graduate GPA of at least 3.0. Independent research conducted under the guidance of a graduate faculty member.

HPER-T 590 Introduction to Research in Health, Kinesiology and Recreation (3 cr.) The course objectives are: 1) to introduce graduate students to the use of research as the basis for generating knowledge in areas related to health, kinesiology and recreation; 2) to introduce students to the importance of research and to give students practice with tools and tasks of research; 3) to introduce students to quantitative and qualitative research methodologies; 4) to assist students in the development of skills in reading, conducting and understanding research; and 5) to assist students in the development of an understanding of the conceptual foundations of research from which they will be able to: a) critically review and evaluate research, and b) pursue greater understanding of more technical aspects of research through advanced course work in research methodology and statistics.

HPER-T 591 Interpretation of Data in Health, Kinesiology and Recreation (3 cr.) Elementary and essential statistical and graphical techniques for analysis and interpretation of data; practice with actual data.

Military Science Courses

HPER-E 130 Army Physical Fitness (2 cr.) Open to all students at IUPUI who are physically able to participate in a fitness class, regardless of whether they are in another military science class. The course emphasizes the development of an individual fitness program and the role of exercise and fitness in one's life. Basic Course and Advanced Course cadets attend sessions for no credit without formally enrolling, in accordance with the Professor of Military Science's Physical Fitness Memorandum. If cadets desire credit for this course, they must formally enroll and pay for the course.

HPER-E 230 Advanced Army Physical Fitness (2 cr.) Open to all students at IUPUI who are physically able to participate in a fitness class, regardless of whether they are in another military science class. The course emphasizes the development of an individual fitness program and the role of exercise and fitness in one's life. Basic Course and Advanced Course cadets attend sessions for no credit without formally enrolling, in accordance with the Professor of Military Science's Physical Fitness Memorandum. If cadets desire credit for this course, they must formally enroll and pay for the course.

MIL-G 101 Leadership and Personal Development (1 cr.) Introduces cadets to the personal challenges and competencies that are critical for effective leadership. Cadets learn how the personal development of life skills such as critical thinking, goal-setting, time management, physical fitness and stress management relate to leadership, officership and the Army profession. The focus is on developing basic knowledge and comprehension of Army leader attributes and core leader competencies while gaining a big picture understanding of ROTC, its purpose in the Army and its advantages for the student.

MIL-G 102 Foundations in Leadership (1 cr.) This course provides an overview of leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback and using effective writing skills. Cadets explore dimensions of leadership values, attributes, skills and actions in the context of practical, hands-on and interactive exercises. Leadership labs, physical training sessions, and a weekend field training exercise are optional, but available to those looking for more out of their college experience.

MIL-G 120 Leadership Lab I (1 cr.) Must be enrolled in an Army ROTC class. Different roles assigned based on level in the program. Learn and practice basic soldiering skills. Build self-confidence, team building and leadership skills that can be applied throughout life. Course meets on most Fridays throughout the semester. Students desiring credit for this course must formally enroll and pay for the course.

MIL-G 121 Leadership Lab II (1 cr.) Must be enrolled in an Army ROTC class. Different roles assigned based on level in the program. Learn and practice basic soldiering skills. Build self-confidence, team building and leadership skills that can be applied throughout life. Course meets on most Fridays throughout the semester. Students desiring credit for this course must formally enroll and pay for the course.

MIL-G 201 Innovative Tactical Leadership (2 cr.) This course explores the dimensions of creative and innovative tactical leadership strategies and styles by studying historical case studies and engaging in interactive student exercise. Cadets practice aspects of personal motivation and team building in the context of planning, executing and assessing team exercises. Leadership labs, physical training sessions, and a weekend field training exercise are optional, but available to those looking for more out of their college experience.

MIL-G 202 Leadership in Changing Environments (2 cr.) This course examines the challenges of leading in complex contemporary operational environments. Dimensions of the cross-cultural challenges of leadership in a constantly changing world are highlighted and applied to practical Army leadership tasks and situations. Leadership labs, physical training sessions, and a weekend field training exercise are optional, but available to those looking for more out of their college experience.

MIL-G 301 Adaptive Team Leadership (3 cr.) This course challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with the demands of the ROTC Leader Development Assessment Course. Challenging scenarios related to small-unit tactical operations are used to develop self-awareness and critical thinking skills. Cadets receive systematic and specific feedback on their leadership abilities. Periodic weekend and Friday leadership labs, physical training sessions, and a weekend field training exercise are mandatory course requirements.

MIL-G 302 Leadership Under Fire (3 cr.) This course uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when "under fire" are explored, evaluated, and developed. Aspects of military operations are reviewed as means of preparing for the ROTC Leader Development Assessment Course. Periodic weekend and Friday leadership labs, physical training sessions, and a weekend field training exercise are mandatory course requirements.

MIL-G 303 Adaptive Team Leadership (3 cr.) This course challenges cadets to study, practice and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Cadets receive systematic and specific feedback on their leadership attributes and actions. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities.

MIL-G 401 Developing Adaptive Leaders (3 cr.) This course develops cadet proficiency in planning, executing, and assessing complex operations, functioning as a member of a staff, and providing leadership performance feedback to subordinates. Cadets are given situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC cadets. Periodic weekend and Friday leadership labs, physical training sessions, and a weekend field training exercise are mandatory course requirements.

MIL-G 402 Leadership in a Complex World (3 cr.) This course explores the dynamics of leading in the complex situations of current military operations. Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Aspects of interacting with non-government organizations, civilians on the battlefield, and host nation support are examined and evaluated. Periodic weekend and Friday leadership labs, physical training sessions, and a weekend field training exercise are mandatory course requirements.

MIL-G 403 Developing Adaptive Leaders (3 cr.) This course transitions the focus of student learning from being trained, mentored and evaluated as an MSL III Cadet, to learning how to train, mentor and evaluate underclass cadets. MSL IV Cadets will learn the duties and responsibilities of an Army staff officer and apply the Military Decision Making Process (MDMP), the Army Writing Style and the Army's Training Management and METL Development processes during weekly Training Meetings to plan, execute and assess battalion training events. Cadets will learn how to safely conduct this training by understanding and employing the Composite Risk Management Process. MSL IV Cadets will learn how to use the Comprehensive Soldier Fitness (CSF) program to reduce and manage stress.

MIL-G 404 Leadership in a Complex World (3 cr.) This course explores the dynamics of leading soldiers in Full Spectrum Operations in the Operating Environment (OE). Cadets examine differences in customs and courtesies, principles of war and rules of engagement in the face of terrorism. They also explore aspects of interacting with non-government organizations, civilians on the battlefield and host nation support and explore counterinsurgency operations. Cadets will learn what support services are available to assist soldiers and their families in times of need, such as: Red Cross, CFC, AER, etc. MSL IV's will develop and present a battle analysis and participate in a staff ride at an historic military site.

Professional Preparation Program in Physical Education

HPER-A 361 Coaching of Football (2 cr.) Fundamentals of offensive and defensive line and backfield play; technique of forward passing; outstanding rules; offensive plays; most frequently used defenses.

HPER-A 362 Coaching of Basketball (2 cr.) Fundamentals of basket shooting, passing, ball handling and footwork; patterns against man-to-man defense, zone defense, and zone pressure defense-full court and half court. Strategy of playing regular season and tournament play. Psychology of coaching.

HPER-A 363 Coaching of Baseball (2 cr.) Fundamentals of pitching, catching, batting, base running, infield and outfield plan; offensive and defensive strategy; organization and management.

HPER-A 484 Interscholastic Athletic Programs (2 cr.) An overview of the operation of athletic programs for men and women on national and state levels. Policies and procedures as they pertain to budget, facilities, eligibility, contest regulations, safety, and current trends.

HPER-C 366 Community Health (3 cr.) Introduction to community health within the public health context. Students will develop an understanding of historical and theoretical foundations of community health and major societal health concerns, explore community health models and programs used to address these concerns, and examine racial/ethnic, cultural, socioeconomic and related determinants of community health.

HPER-C 416 Introduction to Health Counseling (3 cr.) P: PSY-B 110 or equivalent. Reviews recent developments in mental health; implications for public health and school health programs; and roles of health educators in supportive listening, crisis intervention, and appropriate counseling and referral strategies for contemporary health issues.

HPER-F 255 Human Sexuality (3 cr.) Survey of the dynamics of human sexuality; identification and examination of basic issues in human sexuality as they relate to the larger society.

HPER-F 258 Marriage and Family Interaction (3 cr.) Basic personal and social factors that influence the achievement of satisfying marriage and family experiences.

HPER-H 160 First Aid and Emergency Care (3 cr.) Lecture and demonstration of first-aid measures for wounds, hemorrhage, burns, exposure, sprains, dislocations, fractures, unconscious conditions, suffocation, drowning, and poisons, with skill training in all procedures.

HPER-H 180 Stress Prevention and Management (3 cr.) Comprehensive course on stress management. Intended for college students from all fields of study. Applies several stress management techniques including time management, deep breathing, progressive muscular relaxation, yoga, and study skills. To benefit most from class, students must practice stress reduction techniques outside of class.

HPER-H 195 Principles and Applications of Lifestyle Wellness (3 cr.) This course will increase an awareness of and provide instruction pertaining to wellness, and will assist the student in making healthy lifestyle choices. The course supports an emphasis on measurable parameters within the physical dimension of wellness and incorporates the remaining dimensions of emotional, intellectual, occupational, social, and spiritual wellness.

HPER-H 305 Women's Health (3 cr.) Examines the relationship of women to health and health care. Five dimensions of health: physical, mental, emotional, social, and spiritual provide a framework for comparison and contrast of health concerns unique to women and common to both sexes at all ages.

HPER-H 317 Special Topics (1-3 cr.) Topical seminar in health education.

HPER-H 318 Drug Use in American Society (3 cr.) An interdisciplinary approach to the study of drug use in American society. The course will examine the effects of alcohol, tobacco, and illicit drugs on the physical, mental, and social health of the individual.

HPER-H 352 Secondary School Health Curriculum and Strategies (3 cr.) P: Admission to the School of Education Teacher Education Program and HPER-H 205 with grade of S; Junior (56-85 cr.) or Senior (86+ cr.) status. Professional competencies for planning and implementing secondary school curricula based on assessed needs. Effective curriculum characteristics, content standards, instructional strategies, curriculum analysis, lesson and unit structures. Preparation of lesson and unit plans.

HPER-H 363 Personal Health (3 cr.) Acquaints prospective teachers with basic personal health information and provides motivation for intelligent self-direction of health behavior with emphasis on responsibilities as citizens and as teachers. Study of physiological and psychological bases for health, drugs and other critical issues, and family health.

HPER-H 464 Coordinated School Health Programs (3 cr.) P: Junior (56-85 cr.) or Senior (86+ cr.) status. Organization of total health program involving health service, healthful school living and health instruction. Content and materials suitable for a high school health course stressed. Introduction to public health, functions of voluntary and official agencies, and textbook evaluation.

HPER-H 465 Community Health Education (3 cr.) Addresses the place of the teacher in community health education programs. Considers the need to program, various media and methods that may be employed, and the place of existing agencies in the program.

HPER-L 135 Learning Community: Physical Education-Exercise Science (1 cr.) Focuses on your personal development specifically as it relates to self-discovery, health and fitness, and school/life balance. Our enthusiastic instructional team will help you polish your strategies for academic and personal success and introduce you to the campus resources that will support you throughout your college career while you get to know your new colleagues in all four courses. Classes will be activity-centered and include numerous opportunities for fun and interesting campus and community engagement. Fit 'n' Healthy will culminate in a Personal Development Plan (PDP) that will help with goal-setting and steer you on the path to your college degree.

HPER-N 220 Nutrition for Health (3 cr.) Basic principles of nutrition, with emphasis on identification, functions, and food sources of nutrients required by individuals for optimum health and development.

HPER-P 157 Teaching Individual and Team Activities (3 cr.) This course is designed to provide physical education teacher education (PETE) majors with performance and teaching competencies in a variety of individual and team activities across grades P-12. There will be an emphasis on instruction and practice in using professional literature (online and in-print) as the basis for teaching decisions. Students will participate in the teaching of peers at IUPUI and settings both in and outside of class teaching middle and high school students.

HPER-P 195 History and Principles of Physical Education (3 cr.) Understanding and interpretation of principles of modern physical education programs. Contributions of historical programs related to development of present-day programs.

HPER-P 200 Microcomputer Applications in Kinesiology (3 cr.) A hands-on introduction to the use of microcomputers as problem-solving tools in physical education. Course content includes an introduction to microcomputers and DOS functions; word processing, spreadsheets, and database skills; and experience with graphic and sport-specific application programs.

HPER-P 204 Motor Development (3 cr.) Motor learning and development principles throughout the life span. Emphasis on observing and analyzing characteristic movement behavior, motor learning, and motor performance, with application to developmentally appropriate movement experiences.

HPER-P 205 Structural Kinesiology (3 cr.) Overview of basic human body structures and functions appropriate for beginning students in physical education. Fundamental concepts concerning the interaction of biological and mechanical aspects of the musculoskeletal and neuromuscular structures. Emphasis on the practical application to study and the teaching of skilled human movement.

HPER-P 211 Introduction to Sports Management (3 cr.) An examination of the broad spectrum of career opportunities available in the sport management profession. Special emphasis on career planning, sport management terminology and an overview of specific

skills and courses required for professional preparation in sport management.

HPER-P 212 Introduction to Exercise Science (3 cr.) An introduction to the science of exercise and human movement. Special topics in exercise physiology, sport biomechanics, sports medicine, and motor integration.

HPER-P 215 Principles and Practice of Exercise Science (3 cr.) A study of the scientific principles related to physical fitness and the practical application of principles to directing fitness programming in school, recreational, and corporate settings. Students will be involved in setting up, participating in, and evaluating personal fitness activities.

HPER-P 224 Teaching of Dance Activities (2 cr.) Methods and materials of folk, square, social, and modern dance. Terminology, fundamental skills, selection, and presentation of dances. Emphasis on planning dance units and teaching of dances. Fundamentals of locomotor and non-locomotor skills, as well as experiences in creative movement activities. Instruction in rhythmic movement progressions and development of materials for unit plans.

HPER-P 246 Performance and Teaching of Cardio and Resistance Training (3 cr.) This course will focus on teaching cardiovascular fitness and resistance training activities in health and fitness settings. These concepts will be covered: basic muscle anatomy, safety and etiquette, proper techniques, equipment options, aerobic fitness, exercise prescription, basic training principles and lifetime fitness activities (youth through older adults). Emphasis on design, planning and teaching of these activities.

HPER-P 258 Performance and Teaching of Activities for Persons with Special Needs (1 cr.) Theory, activity modifications and practice teaching of activities for persons with disabilities (K-12).

HPER-P 271 Individual Sport (1 cr.) Teaching of and participation in sports activities, some of which are not included in other skills courses in the curriculum. Includes badminton, bowling, archery, and golf.

HPER-P 280 Basic Prevention and Care of Athletic Injuries (2 cr.) An introduction to the principles of injury prevention. Lecture and demonstration of emergency measures (e.g., fractures, sprains, dislocations and spinal injuries). Skill training in bandaging, strapping and splinting techniques emphasized.

HPER-P 290 Movement Experiences for Preschool and Elementary Children (3 cr.) Provides the student with knowledge of potential outcomes of preschool and elementary school motor development programs, of how to implement such programs, and of appropriate movement experiences for young children. Also provides the student with opportunities for observing and teaching young children in a structured gymnasium setting.

HPER-P 324 Recreational Sports Programming (3 cr.) Course provides an overview of the programmatic elements and techniques that currently exist in recreational sports. Specific topics include informal, intramural, club, and extramural programming; value of recreational sports; programming techniques; publicity and promotion; facility utilization; equipment concerns; safety; liability; and program observation.

HPER-P 331 Planning and Operation of Sport Facilities (3 cr.) Introduction to the various methods of planning and operating sport facilities.

HPER-P 333 Sport in America-Historical Perspectives (3 cr.) Study of the evolution of sport in the United States within the larger context of historical developments in society; women's sport experiences in relation to the development of sport; and examination of sport as a reflection of American culture from the founding of the colonies to the present.

HPER-P 373 Resistance Exercise and Sports Conditioning (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. This course focuses on progressive resistance exercise and its application in physical conditioning for the competitive athlete, the fitness enthusiast and various special populations. Topics covered include: basic muscle physiology, kinesiology, musculoskeletal adaptation to resistance exercise, modes of training, muscle-specific exercises and exercise technique.

HPER-P 374 Basic Electrocardiography for the Exercise Sciences (2 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Introduction to the basic concepts, theory, interpretation of electrocardiograms (ECG/EKG), their uses in fitness programs that deal with healthy people and with cardiac rehabilitation patients.

HPER-P 390 Growth and Motor Performance of School-Age Youth K-12 (2 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. A study of growth and developmental characteristics of school-age youth. Emphasis is placed on motor development, performance, and the relationship to cognitive and affective behavior. Supervised teaching experiences are an integral part of the course.

HPER-P 391 Biomechanics (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. An introduction to the mechanics of human motion. Includes linear and angular kinematics and kinetics in the context of human motion; mechanics of fluids; mechanics of muscles; and analysis of selected sports activities.

HPER-P 392 Sport in American Society (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. An introduction to sport sociology, in which students critically examine American sport from a social context and analyze the interrelationship between sport and American culture. Lectures, discussions, videos, guest speakers, and investigative analysis.

HPER-P 393 Professional Practice Programs in Health, Physical Education and Recreation (3-10 cr.) P: At least sophomore standing, and approval of the instructor and the Office of Professional Practice Programs. This course is designed to provide the student with quality career-related work experience. Evaluation by employer and faculty sponsor.

HPER-P 397 Kinesiology (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Application of facts and principles of anatomy,

physiology and mechanics to problems of teaching physical education skills and activities of daily living.

HPER-P 398 Adapted Physical Education (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Study of conditions that require physical education programs to be adapted to special needs of individuals, including analysis of normal and faulty postures. Principles and practices in application of exercises and activities for specific handicap conditions.

HPER-P 399 Practicum in Adapted Physical Education (1-2 cr.) P: HPER-P 398. A practical learning experience in adapted physical education with children with disabilities. Course may be repeated.

HPER-P 402 Ethics in Sport (3 cr.) A study of the nature of ethics in sport with an emphasis on current application of moral principles and values. The relationship of ethics to social issues in sport will be explored, including philosophical and historical perspectives.

HPER-P 403 Theory and Practice of Cardiovascular Fitness (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. This course focuses on principles and processes of designing, organizing, and teaching a variety of rhythmic aerobic training forms. Topics covered include a review of basic exercise and rhythmic movement principles, how they are used to create modes of rhythmic aerobic training used in group and individual exercise programs.

HPER-P 405 Introduction to Sport Psychology (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. An overview of the field, including psychological aspects of sport performance, coaching and the relationship of exercise with mental health. Various theoretical orientations will be addressed with an emphasis on empirical research.

HPER-P 409 Basic Physiology of Exercise (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. A survey of human physiology parameters as related to physical exercise, work and the development of physiological fitness factors. Physiological foundations will be considered.

HPER-P 410 Physical Activity Programming for Individuals with Disabilities and Other Special Populations (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Course focuses on the provision of physical activity programs in community settings for individuals with special needs. Topics include: laws relating to service delivery, conditions which may lead to impairment of ability to participate in physical activity, facility and equipment accessibility, activity modifications, contraindications to activity, and organized disabled sport.

HPER-P 411 Legal Issues in Sport Settings (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. An introduction to legal principles involved in sport. Tort liability, including intentional tort, negligence, and product liability. Covers constitutional law issues, particularly as they relate to athletic eligibility, athletes' rights, sex discrimination, and drug testing. Discussion of sport contracts.

HPER-P 415 Sport Promotions and Public Relations (3 cr.) An introduction to the theories and techniques of sport promotions, public relations and fundraising.

HPER-P 416 Fitness Management (3 cr.) This course brings business management principles and operational guidelines to the fitness practitioner. Topics include facility management, organizational program operation, member service, health and safety facility standards, finance maintenance, evaluation and planning processes, strategic planning and facility design.

HPER-P 417 Physical Activity and Disease: Prevention and Treatment (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Provides an overview of the role of physical activity in the prevention of disease and disability. The cause of common diseases, physiological impact and treatment side effects of common diseases will be discussed to enable effective exercise prescription within special populations.

HPER-P 418 Sports Marketing (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Examination of the elements of the marketing mix as they pertain to the sport enterprise. Also includes the coverage of decision making and planning from the sport manager's perspective and the impact of corporate sponsorship on the delivery of sport.

HPER-P 419 Fitness Testing and Interpretation (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Provides a knowledge base and practical experiences in fitness testing, assessment, and exercise programming.

HPER-P 420 Exercise Leadership and Program Design (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. The course is designed to be a culminating experience for the fitness specialist student to demonstrate practical application of the theory, techniques and skills of safe, effective, efficient exercise leadership and program design in a variety of supervised settings with both apparently healthy and special populations. This course serves as a foundation for becoming a qualified candidate for the AGSM Health, Fitness Instructor national certification.

HPER-P 421 Special Topics in Physical Education (1-3 cr.) An in-depth study of a selected topic from the many areas that have contributed to the development of physical education in today's world. Topics will vary. Directed to upper-level students with a special interest in the topic presented.

HPER-P 423 Financial Principles in Sport (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. An introduction to the basic financial and managerial accounting concepts necessary to be financially literate in the sport business industry. Examination of the various means for financing sport organizations.

HPER-P 426 Sales Management in Sports (3 cr.) The application of sales strategies to the sport industry.

HPER-P 432 Sports Marketing Consulting Project (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Challenges senior-level students to apply what they have learned

to address a problem or situation presented by a sport organization. Students will follow a multiple step process to identify project objectives, collect and analyze data relevant to the problem or situation, and offer strategic recommendations that address the problem or are relevant to the situation.

HPER-P 443 Internship in Physical Education (3 cr.) The penultimate capstone activity for the refinement of knowledge, skills, and program development for exercise science students.

HPER-P 452 Motor Learning (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. An examination of factors that affect the acquisition and performance of motor skills. Topics include perception, psychomotor learning, practice methods, and theories of neuromuscular integration.

HPER-P 493 Tests and Measurements in Physical Education (3 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Theory of measurement in physical education, along with selection and administration of appropriate tests, and interpretation of their results by fundamental statistical procedures.

HPER-P 495 Laboratory Teaching in Physical Education Program (1 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Pre-practice teaching experience. Students assist and help teach activities in the Physical Education program. Student must have had a course in the teaching of chosen activity before they are allowed to enroll.

HPER-P 497 Organizational and Curricular Structures of Physical Education K-12 (2 cr.) P: Visit http://petm.iupui.edu/academics/peprereq.php for most updated information. Techniques in organization and development of all-grade curriculum in physical education. Development and implementation of extracurricular activities.

HPER-P 498 Practicum in Physical Education and Athletics (1-3 cr.) A practical learning experience in teaching and/or coaching under the guidance of faculty and supervisor. S/F grades.

HPER-P 499 Research in Physical Education and Athletics (1-3 cr.) This course is open to junior majors or minors in physical education.

HPER-P 540 Recreational Sports Programming Administration (3 cr.) The study of recreational sports (informal/intramural/extramural/club sports) relevant to historical developments, philosophical foundations, programming implications, administrative considerations, and creative activity.

HPER-R 275 Dynamics of Camp Leadership (2 cr.) Role of counselors in relation to objectives, organization, guidance, leadership skills, and program resources in organized camps.

HPER-R 324 Recreational Sports Programming (3 cr.) P: Junior (56-85 cr.) or Senior (86+ cr.) status. Overview of programmatic elements and techniques in recreational sports. Topics include informal, intramural, club, extramural and instructional sports programming; values of recreational sports; terminology and career opportunities in various recreational sport settings.

HPER-R 423 Visitor Behavior (3 cr.) Examines the theory and findings of visitor and tourism research as it is conducted in such recreation and leisure settings as parks, museums, towns, historic sites, sporting facilities, and resorts. Topics include visitor motivations, expectations, social interactions, and assessment. Students will learn nine techniques for gathering information from and about visitors.

HPER-R 470 Professional Field Experience in Recreation (1-3 cr.) P: Consent of instructor. Practical/applied field work in a Physical Education setting.

HPER-R 474 Camping Leadership II (2 cr.) Advanced camping with an emphasis on practical experience in a camp setting.

SPEA Administrative Officers and Dean's Council

Welcome to SPEA!
Indiana University founded the School of Public and Environmental Affairs (SPEA) nearly 40 years ago to prepare students to address the issues of modern society in ways that more traditional schools overlooked. At SPEA, people learn how to work in government, nonprofit and business roles to make positive changes in their communities, their states, their countries and the world.

SPEA graduates lead the organizations that make and enforce laws, keep communities livable and safe, shape smart public policy, protect the planet and help our fellow citizens. Through the combined study of civic leadership, management, policy studies, media and public affairs, criminal justice and public safety, SPEA students develop both the practical and philosophical skills that prepare them to develop solutions to society's problems.

SPEA is located on the busy IUPUI campus in the heart of downtown Indianapolis. For students learning how to make a difference in business, government and nonprofit organizations, what better place to study than a major city where such organizations are headquartered? IUPUI is just a short walk or ride from bustling city, state and federal government centers as well as hundreds of corporations and nonprofit organizations. Internships, mentors and active learning opportunities are right around the corner. Well-connected to these institutions, SPEA's faculty members are recognized for their credentials, experience, involvement and impact worldwide. With the entire Central Indiana community as their learning lab, SPEA students have unmatched access to the people and places where change happens first.

At SPEA, we believe a better world starts with you.

Overview

The School of Public and Environmental Affairs (SPEA) is a professional school dedicated to applied interdisciplinary learning combining the study of public affairs, management, criminal justice, public safety, emergency management and environmental policy. The interests of the faculty and professional staff typically fall into one or more of the following areas:

- Criminal justice
- Emergency management
- Environmental policy
- Finance and economics
- Law
- Nonprofit management
- Policy and administration
- Public safety
- Urban affairs

The school's faculty, staff, and students work individually and collaboratively to solve problems that require SPEA's unique combination of in-depth knowledge in the natural, behavioral, social, and administrative sciences.

SPEA is a resource to many Indiana communities. Public and private organizations, as well as all levels of government, benefit from the knowledge and expertise of SPEA faculty, staff, and students.

History

Welcome to SPEA!
Indiana University founded the School of Public and Environmental Affairs (SPEA) nearly 40 years ago to prepare students to address the issues of modern society in ways that more traditional schools overlooked. At SPEA, people learn how to work in government, nonprofit and business roles to make positive changes in their communities, their states, their countries and the world.

SPEA graduates lead the organizations that make and enforce laws, keep communities livable and safe, shape smart public policy, protect the planet and help our fellow citizens. Through the combined study of civic leadership, management, policy studies, media and public affairs, criminal justice and public safety, SPEA students develop both the practical and philosophical skills that prepare them to develop solutions to society's problems.

SPEA is located on the busy IUPUI campus in the heart of downtown Indianapolis. For students learning how to make a difference in business, government and nonprofit organizations, what better place to study than a major city where such organizations are headquartered? IUPUI is just a short walk or ride from bustling city, state and federal government centers as well as hundreds of corporations and nonprofit organizations. Internships, mentors and active learning opportunities are right around the corner. Well-connected to these institutions, SPEA's faculty members are recognized for their credentials, experience, involvement and impact worldwide. With the entire Central Indiana community as their learning lab, SPEA students have unmatched access to the people and places where change happens first.

At SPEA, we believe a better world starts with you.

Facilities

The School of Public and Environmental Affairs is located in the Business/SPEA Building.

Street Address 801 W. Michigan St., Indianapolis, IN

Building Code BS

Nearest Guest Parking Garage North Street

Campus map available at - http://www.iupui.edu/buildings/BS.

BS 1000 is the SPEA student lounge for undergraduate and graduate SPEA students. All current SPEA students will be given access to the lounge at the beginning of each term. Students will enter using their JagTag. The lounge includes a computer lab (available to students except when class is taking place in lab), lockers, and study space. Students can use the lounge for independent study, group study, or SPEA student organization. BS 1000 is open during normal BS building hours.

Accreditation & Licenses

The Master of Public Affairs program is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA).

SPEA is also a member of the American Society for Public Administration (ASPA) and the Association for Public Policy Analysis and Management (APPAM).

Indiana University, a member of North Central Association (NCA), is accredited by The Higher Learning Commission, www.ncahigherlearningcommission.org.

Undergraduate Admissions

The School of Public and Environmental Affairs (SPEA) considers dual admission of beginning students with University College (UCOL) and direct admission of transfer students. Students can be considered for any term.

Beginners (Direct Admission to SPEA)

Beginner students will receive Direct (Dual) Admission to SPEA and University College (UCOL), if they meet the following criteria:

1. Have completed Core 40 or Academic Honors diploma.
2. Have 1000+ SAT combined total of critical reasoning and math score or ACT composite of 21.
3. Have 3.00 GPA.

Transfer Admission

Students transferring from other institutions will receive Direct Admission to SPEA, if they meet the following criteria:

1. Cumulative GPA of 2.0 and above.
2. Last completed semester with a GPA of 2.0 and above.
3. Completed 12 or more transferable credit hours.

- SPEA reserves the right to review and withhold admission in those cases where students have been granted forgiveness, exclusion, or similar exemptions that remove from the cumulative GPA calculation grades that would typically be included in the GPA. SPEA does recognize grade replacements for courses that have been retaken at an institution where the higher of the course grades has been used to compute the cumulative GPA.
- SPEA reserves the right to review and withhold admission in those cases where students are seeking to transfer to SPEA from another institution, but they also have a previous record at IUPUI which does not meet good standing requirements.

Intercampus Transfer, Temporary or Permanent

SPEA students at any campus of Indiana University may transfer permanently to SPEA on another campus, provided they meet the requirements for admission, good academic standing, and plurality of courses on that campus. SPEA students seeking a temporary transfer to SPEA Indianapolis must meet the good academic standing requirement.

Good academic standing requires the following:

1. Cumulative GPA – 2.0 and above.
2. Semester GPA – 2.0 and above.
3. SPEA major GPA – 2.3 minimum, providing the student has completed 12 transferable credit hours or more in the major.

Intercampus transfer students must meet the plurality requirement. The campus at which a student completes the plurality (more than half) of course work will award the degree, provided that campus is authorized to grant the degree.

Permanent intercampus transfer students, who do not meet the regular admission requirements, may be considered for admission to University College.

Transfering to SPEA from University College or another IUPUI academic unit

Students who start out in University College or another academic school at IUPUI are eligible to certify or transfer into SPEA after they have declared a major in SPEA and completed a 2.0 cumulative and prior term GPA. In addition, if the student has completed 12 or more hours in the SPEA major, he or she also needs a 2.3 SPEA GPA.

Returning Students

Students who were previously in SPEA or another academic unit and were in good academic standing (semester and cumulative GPA's above 2.0, and SPEA major GPA above 2.3) when they stopped out and currently do not have a service indicator (probation with impact or academic dismissal) will be regularly admitted.

Students who were previously in SPEA and were not in good academic standing when they stopped out may be considered for admission on probation.

Students dismissed from SPEA or another IU school will need to submit a readmission petition to be considered for admission on probation.

Second Undergraduate Degree Applicants

Students who are seeking a second undergraduate degree are encouraged to explore SPEA graduate programs or graduate certificate programs.

Students must petition to SPEA for approval to pursue a second bachelor's degree.

Credit for Police and Fire training

SPEA credit for police and fire training

SPEA grants credit for graduates of the Indianapolis Fire Department Training academies and graduates of five

certified Indiana police training academies. Qualified firefighters receive 9 hours for designated SPEA courses, and qualified law enforcement academy graduates receive 12 hours for designated courses. This credit is awarded by written notification from SPEA to Admissions. The individual must either (1) be currently enrolled or (2) applied and accepted for admission. Once graduation from the academy with a 77% or better has been confirmed by SPEA, the credit is posted as transfer credit and there becomes “official” once the student completes one additional IUPUI course. There is no charge for this credit. Individuals who believe they qualify should contact SPEA Student Services. Recipients of firefighter and law enforcement credit should be directly admitted to SPEA when they apply for the credit.

Credit for law enforcement training

Sworn full-time police officers who have graduated from any of the five law enforcement academies in Indiana are eligible for 12 undergraduate credit hours from SPEA IUPUI. You can apply these credits towards any of SPEA's undergraduate degree programs. The course credit is for Criminal Law SPEA-J 301, Criminal Investigations SPEA-J 320 and six hours of Internship in Criminal Justice SPEA-J 380. For more information contact the SPEA Recorder at 317-274-4656.

Credit for fire training

Full-time firefighters who are trained and employed by the following departments are eligible for nine undergraduate credit hours from the School of Public and Environmental Affairs. You can apply these credits towards any of SPEA's undergraduate degree programs. The course credit is for Principles of Public Safety SPEA-J 376, Emergency Services Administration SPEA-V 375 and Internship in Public Affairs SPEA-V 380.

Participating fire departments:

- Indianapolis
- Decatur Township
- Franklin Township
- Lawrence Township
- Perry Township
- Pike Township
- Warren Township
- Washington Township
- Wayne Township
- Avon
- Beech Grove
- Brownsburg
- Carmel
- Fishers
- City of Franklin
- City of Lawrence
- Noblesville
- Speedway

For more information, contact the SPEA Recorder at 317-274-4656.

Probationary Admission

Probationary Admission

Applicants (undergraduate and graduate) may be admitted, case-by-case, on a probationary basis.

Graduate Admission

Procedure

Application Information about graduate study, including literature and application materials, may be obtained from the School of Public and Environmental Affairs Web site (www.spea.iupui.edu).

Eligibility For most programs, applicants with bachelor's degrees in any field from an accredited institution are eligible to apply for admission to the graduate programs of the School of Public and Environmental Affairs.

Application Submission Applicants should apply to a degree or certificate program and request financial assistance as early as possible before the desired semester of enrollment. All forms must be completed and received by the SPEA Graduate Admissions Office at IUPUI before May 15 to attend the fall semester, before September 15 to attend the spring semester, and by March 15 to attend the summer sessions. SPEA accepts late applications for admission.

Admission Each application for admission is carefully evaluated by the admissions committee for the appropriate degree. Applicants to all SPEA degree programs must do the following:

1. Submit applications to the graduate program office. Application materials can be found at www.spea.iupui.edu; select Prospective Students and click on APPLY for instructions and information.
2. Submit complete official transcripts from any other colleges and universities attended. Exception: Students who have taken course work on any Indiana University campus do not need to submit an Indiana University transcript.
3. Submit proof of bachelor's degree certification (official transcripts) from an accredited institution. Students who have not completed undergraduate course work at the time of application may be admitted based on the strength of previous work, but a final transcript attesting to the award of a bachelor's degree must be submitted before the student can enroll.
4. Pay a nonrefundable application fee to Indiana University.
5. When applying to degree programs Master of Public Affairs (M.P.A.) or Master of Science in Criminal Justice and Public Safety (M.S.C.J.P.S.), required documentation includes:
    - online application, all sections completed,
    - official transcripts for all colleges and universities attended. Students who have taken course work on any Indiana University campus do not need to submit an Indiana University transcript.
    - three Application Reference Forms completed by faculty and professionals familiar with applicant's activities and potential to succeed in graduate work.

- Graduate Record Examination (GRE) official scores preferred. GMAT and LSAT scores will be considered.
- resume
- complete personal statement and departmental question sections on application,
- supplemental questions in the application under departmental questions section

6. When applying to certificate programs, the following documentation is required:
   - online application (GRE scores and references are not required),
   - official transcripts from all colleges and universities attended. Students who have taken couse work on any Indiana University campus do not need to submit an Indiana University transcript.
   - resume
   - complete personal statement and departmental question sections on application, and
   - supplemental questions in the application under departmental questions section.
7. International students must apply to SPEA using the online application, complete the international section, and pay the nonrefundable international application fee (subject to change). SPEA will accept the same paper application that you have submitted to the Office of International Affairs (OIA), along with additional required SPEA documents, but the online application is preferable. You are required to provide official scores of one of the Engligh proficiency exams.

International application priority deadlines are February 1 for fall semester application and October 15 for spring semester application. Visit the SPEA Web site at www.spea.iupui.edu or the OIA Web site at www.international.iupui.edu for more information.

LSAT, GRE, and GMAT Requirements Applicants may submit LSAT or GMAT (Law School Admission Test or Graduate Management Admission Test) scores in lieu of GRE (Graduate Record Examination) scores. Other degrees require the GRE. Information concerning the GRE is available from Graduate Record Examination, Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541, (609) 771-7670, or (866) 473-4373, or visit the Web site: www.gre.org. Information concerning the LSAT is available from Law School Admission Services, P.O. Box 2000, Newtown, PA 18940, (215) 968-1001 or visit them on the Web site at www.lsat.org.

Admission Status

Regular (Unconditional) Admission Status Applicants with this status have met all admission requirements for the specific degree program and may enroll in accordance with the entry date contained in the application for admission.

Deferred Admission Following notice of regular admission, applicants may defer enrollment for a maximum of one year. Transcripts of course work completed during the deferral period must be submitted, and the admissions committee may request additional letters of recommendation. Should the additional material prove unsatisfactory, the admission may be canceled. Applicants who fail to enroll within one year may need to reapply for admission.

Conditional Admission Applicants may be admitted on a provisional basis if GRE or LSAT scores or prior grade point averages are below admission criteria. Conditional status is removed upon fulfillment of conditions stipulated by the relevant degree program admissions committee.

Provisional Admission Applicants may be admitted on a provisional basis if GRE or LSAT scores or prior grade point averages are below admission criteria. Provisional status is removed upon fulfillment of conditions stipulated by the reelevant degree program admissions committee.

Admission with Deficiencies Applicants may be admitted with deficiencies on a case-by-case basis if they lack course work in certain foundation areas such as mathematics, economics, or statistics.

Nondegree Enrollment Applicants who have a bachelor's degree and who have not been admitted to the graduate program may enroll in SPEA courses as nondegree graduate students. Procedures may vary across campuses. **Please note that nondegree students are not eligible for financial aid.**

If nondegree students later wish to obtain SPEA graduate degrees, they must apply for admission to the specific degree program. Note that not more than 12 hours of graduate credit completed as a nondegree student may be credited toward a SPEA graduate degree. Not more than 9 hours of SPEA graduate credit earned as a nondegree student may be credited toward SPEA certificate programs.

Admission

- Undergraduate Admission
- Credit for Police and Firefighter training
- Probationary Admission
- Graduate Admission

SPEA Accelerated Masters

The Accelerated Masters Program is a competitive program for outstanding SPEA undergraduate students. Students may apply to the Master of Public Affairs (M.P.A.) or the Master of Science in Criminal Justice and Public Safety (M.S.C.J.P.S.) early in their junior year.

Participation in this program allows students to fulfill some graduate program requirements during their senior year. Graduate courses count for both graduate and undergraduate degree requirements. Before starting the graduate program, students must have satisfied all general education and specific core requirements.

Admission

The program admits students from among the top tier of SPEA undergraduate majors. To be considered, a student must:

- Complete a minimum of 96 credit hours for the accelerated M.P.A. or 102 credits for the accelerated M.S.C.J.P.S. toward their undergraduate degree

including specified general education, major, and elective requirements (see appropriate degree planning sheet below).
- Have no more than 30 transfer hours counted toward graduation requirements.
- Have a 3.2 undergraduate GPA and a 3.5 SPEA major GPA.
- Apply online for the M.P.A. or M.S.C.J.P.S. degree programs via the school's master's programs admission process.
- Submit at least three letters of recommendation from faculty members.
- Submit a personal statement.

Degree Planning Sheet

- Accelerated M.P.A. Planning Sheet (for undergraduate Civic Leadership, Management, Policy Studies, and Media and Public Affairs majors)
  - Must complete a minimum of 96 specific undergraduate credits including general education, SPEA major courses, and elective requirements.
  - Undergraduate SPEA major courses include:
    - For Civic Leadership majors - SPEA V170, V264, V382, V412, V435, V263 or V362, V473 or V450 (Indiana Leadership Seminar)
    - For Management majors - SPEA V170, V358, V366, V372, V221 OR V264 OR V375, V346 OR V356 OR V369 OR V373 OR V379 OR V458 OR V412 OR V435 OR V443, V473 OR V450 (Indiana Leadership Seminar)
    - For Policy Studies majors - SPEA V170, V348, V372, V378, V412, V221 OR V362, V473 or V450 (Indiana Leadership Seminar)
  - The accelerated program allows students to double count 24 credits from the MPA towards the BSPA.
- Accelerated M.S.C.J.P.S. Planning Sheet (for undergraduate Criminal Justice)
  - Must complete a minimum of 102 specific undergraduate credits including general education, SPEA major courses, and elective requirements.
  - Undergraduate SPEA major courses include:
    - For Criminal Justice majors - SPEA J101, J150, J201, J202, J306, J321, J331, J301 OR J302, 1 CJ elective course (3 cr), and 1 Management and Policy course (see list on degree planning sheet)
  - The accelerated program allows students to double count 18 credits from the M.S.C.J.P.S. towards the B.S.C.J.
- Accelerated M.S.C.J.P.S. Planning Sheet (for undergraduate Public Safety Management)
  - Must complete a minimum of 102 specific undergraduate credits including general education, SPEA major courses, and elective requirements.
  - Undergraduate SPEA major courses include:
    - For Public Safety Management majors - SPEA J101, J150, J202, J272/V272, J376, J387, J429, 1 PSM elective (see list on degree planning sheet), 1 management and policy course (see list on degree planning sheet).
  - The accelerated program allows students to double count 18 credits from the M.S.C.J.P.S. toward the B.S.C.J.

SPEA Undergraduate Scholarships

IUPUI offers many scholarships for both incoming freshmen and continuing students. For a comprehensive list of all IUPUI scholarships, please visit the Office of Student Scholarships website.

In addition, the School of Public and Environmental Affairs offers scholarships to incoming and current SPEA undergraduate students. Students may apply for SPEA scholarships by submitting the appropriate SPEA scholarship application and additional required materials, including a current resume and an essay explaining why you are a good candidate for that particular scholarship (essay guidelines are in the application).

To be eligible for a SPEA Student Scholarship, students must be in good academic standing, both when you apply for the award and when you receive it.

Recipients of SPEA scholarships are selected by members of the SPEA Scholarship Committee, comprised of SPEA faculty and staff. All SPEA scholarship recipients are recognized at the SPEA scholarship luncheon in October.

Award amounts range from $500 to $2000 per year, per scholarship and are noted on the scholarship application.

All SPEA scholarships are non-renewable, though former recipients may apply again. Fall scholarships refers to those scholarships that can be used in the fall semester; spring scholarships are for spring semester

Deadlines

Fall scholarship deadline is **January 27** for:
• SPEA Alumni Association Scholarships

Fall scholarship deadline is **February 15** for:
• SPEA New Student Scholarship

Fall scholarship deadline is **March 30** for:
• Indianapolis World Police and Fire Games Scholarships

Fall scholarship deadline is **April 1** for:
• Cory R. Elson Scholarship*
• Hudnut Scholarship in Public Leadership*
• International Experience Scholars*
• Jason Baker Spirit Award*
• Lindsey Scholarship for Civic Engagement*
• Plater International Scholars*

Spring scholarship deadline is **September 15**, for the following scholarship:
• Bingham McHale LLP INGroup Legislative Conference Scholarship*

*Scholarships marked with an asterisk use the standard SPEA application. Those without an asterisk have applications specific to the scholarship.

For additional scholarship information, please contact SPEA Student Services at infospea@iupui.edu or (317) 274-4656.

SPEA Undergraduate Student Scholarships

Bingham McHale LLP INGroup Legislative Conference Scholarship (application due **September 15**)
The Bingham McHale scholarship supports academically successful students who are interested in a future career in state government. To apply, you must be a SPEA undergraduate student, have completed 60 or more credit hours, and be in good academic standing. The winner of this scholarship will attend the Bingham McHale luncheon in December.

Cory R. Elson Scholarship (application due **April 1**)
The Cory R. Elson Scholarship provides recognition and financial support to criminal justice students who wish to pursue a career in policing. To apply, students must have completed 60 or more credit hours and have a least a 2.67 cumulative IU GPA.

Hudnut Scholarship in Public Leadership (application due **April 1**)
The Hudnut Scholarship in Public Leadership supports SPEA Public Affairs majors interested in pursuing a future career in public leadership. To apply, you must be a SPEA undergraduate student pursuing a Public Affairs degree (which includes Civic Leadership, Management, Media and Public Affairs and Policy Studies majors).

International Experience Scholars (application due **April 1**)
This scholarship supports SPEA students who are studying abroad, and to apply, you must be a SPEA undergraduate student in good academic standing. Recipients will be expected to document and share their experience with SPEA through means such as photography, blogging or journaling.

Jason Baker Spirit Award (application due **April 1**)
The Jason Baker Spirit Award provides recognition and financial support to SPEA students who wish to pursue a career in law enforcement. This award honors fallen police officer Jason Baker's spirit and his enduring devotion to a career in law enforcement. To apply, you must be a SPEA undergraduate student in good academic standing. You must also have a proven track record of commitment to the profession of law enforcement.

Lindsey Scholarship for Civic Engagement (application due **April 1**)
The Lindsey Scholarship for Civic Engagement supports a SPEA student who has an interest in environmental affairs or planning. The winner should be interested in solving global problems, especially environmental degradation and poverty; have a record of volunteerism, community service and/or civic engagement; and be committed to a career in public service or in the nonprofit sector, with special emphasis on the environmental area. To apply, you must be a SPEA student in good academic standing.

SPEA Alumni Association Scholarships (application due **January 27**)
The School of Public & Environmental Affairs (SPEA) Alumni Association is proud to sponsor $1,000 scholarships for current SPEA students. The scholarships will be awarded to undergraduate and graduate students, from any IU campus, who meet the qualifications. Please click here for more information and to apply for this scholarship.

SPEA New Student Scholarship (application due **February 15**)
This scholarship provides $500 to a student who is in his or her first semester of majoring in a SPEA academic program. Qualified students must have graduated in the top 25% of their high school class and earned an SAT score of 1000 or more (or ACT score of 21 or more). Apply online by February 15.

Plater International Scholars (application due **April 1**)
The Plater International Scholars award supports a SPEA student committed to international affairs. A typical winner may be participating in an overseas experience or involved in campus or academic pursuits related to international affairs. To apply, you must be a SPEA student in good academic standing and demonstrate academic excellence.

World Police & Fire Games Scholarships (application due **March 30**)
Current full-time and retired police officers and firefighters in the state of Indiana are eligible to receive scholarship money to pay for the cost of tuition and fees for up to four IUPUI courses each year (two courses per semester, maximum). For more information, contact Jim White; jw1@iupui.edu or (317) 278-8624. Download the application

Credit for Fire Training

Full-time firefighters who are trained and employed by the following departments are eligible for nine undergraduate credit hours from the School of Public and Environmental Affairs. You can apply these credits towards any of SPEA's undergraduate degree programs. The course credit is for Principles of Public Safety SPEA-J 376, Emergency Services Administration SPEA-V 375 and Internship in Public Affairs SPEA-V 380.

Participating fire departments:

- Indianapolis
- Decatur Township
- Franklin Township
- Lawrence Township
- Perry Township
- Pike Township
- Warren Township
- Washington Township
- Wayne Township
- Avon
- Beech Grove
- Brownsburg
- Carmel
- Fishers
- City of Franklin
- City of Lawrence
- Noblesville
- Speedway

For more information, contact the SPEA Recorder at 317-274-4656. Download an application for credit .

Credit for Law Enforcement Training & Correctional Training Institute

Credit for Law Enforcement Training

Sworn full-time police officers who have graduated from any of the five law enforcement academies in Indiana are eligible for 12 undergraduate credit hours from SPEA IUPUI. You can apply these credits towards any of SPEA's undergraduate degree programs. The course credit is for Criminal Law SPEA-J 301, Criminal Investigations SPEA-J 320 and six hours of Internship in Criminal Justice SPEA-J 380. For more information contact the SPEA Recorder at 317-274-4656. Download an application for credit .

Correctional Training Institute

SPEA students who have completed the Correctional Training Institute through the Department of Corrections have the opportunity to earn 6 credits toward their degree. Credit is earned through Indiana State University (ISU). Applications are sent to ISU during the training sessions. The admission and registration process can take up to 6 months to process. Once processed, IUPUI students will need to request an official ISU transcript to be sent to IUPUI for transfer credit evaluation. At the Correctional Training Institute, state employees are given the opportunity to take ISU Criminology 210 and Criminology 298 for a total of 6 credits. CRIM 210 (Introduction to Corrections) will transfer to IUPUI as SPEA-J 331 (Corrections). CRIM 298 (Practicum in Criminal Justice) will transfer to IUPUI as SPEA UN 200 and will count as an elective. For more information please visit http://www.indstate.edu/cep/Buttons/CTI.htm.

Civic Leadership (B.S.P.A.)

The Bachelor of Science in Public Affairs in Civic Leadership requires 120 credit hours. The SPEA curriculum is divided into three categories: general education, electives, and major area. Public Affairs majors focus on how we provide for our citizens, making our communities better places to live, work and raise a family. Public Affairs students study and analyze government policies, and learn how to manage government and nonprofit organizations. A Civic Leadership major teaches students how individuals and organizations can work together to provide for their communities. Graduates often work in public service roles - leading businesses, nonprofit organizations or government agencies. This major is ideal for pre-law students, or students interested in advocacy or community leadership.

1. Communications (3 courses; 9 cr.)

- ENG-W 131 Elementary Composition I (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)

Choose **one** course:

- BUS-X 204 Business Communications (3 cr.)
- ENG-W 231 Professional Writing Skills (3 cr.)

2. Quantitative Methods (5 courses; 15 cr.)

Choose **one** computer course:

- SPEA-V 261 Computers in Public Affairs (3 cr.)
- BUS-K 201 The Computer in Business (3 cr.)

Select **one** mathematics courses:

- MATH-M 118 Finite Mathematics (3 cr.)
- MATH-M 119 Survey of Calculus I (3 cr.)
- MATH 15300 Algebra and Trigonometry I (3 cr.)
- MATH 15400 Algebra and Trigonometry II (3 cr.)

Choose **one** statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.)
- ECON-E 270 Intro to Stat Theory Econ & Bus (3 cr.)
- PSY-B 305 Statistics (3 cr.)
- STAT 301 Elem. Stat Method I (3 cr.)
- SOC-R 359 Sociological Statistics (3 cr.)

Select **one** accounting course:

- BUS-A 200 Foundations of Accounting (3 cr.)
- BUS-A 201 Introduction to Financial Accounting (3 cr.)

Select **one** research methods course:

- SPEA-V 370 Research Methods and Statistical Research (3 cr.)
- SPEA-J 202 Criminal Justice Data, Methods and Resources (3 cr.)

3. Social Sciences, Humanities & Natural Sciences (3 courses; 9 cr.)

- POLS-Y 103 Intro to American Politics (3 cr.)
- ECON-E 201 Intro to Microeconomics (3 cr.)
- ECON-E 202 Into to Macroeconomics (3 cr.)

CHOOSE EITHER 3A OR 3B

3A. Option 1: Language Option - Recommended (13-15 cr.)

Complete first-year foreign language requirements:

1. Three foreign language 100-level courses OR
2. Complete a 200-level or 300-level foreign lanuage course with a grade of C or better OR
3. Complete placement test, placing into 200-level or higher; this waives 100-level requirement but does not carry credit toward graduation

Choose **one** Natural Science course (3-5 cr.) - *select from list below*

Students only required to complete three credits, however if lab course is taken, may have up to five credits.

3B. Option 2: No Foreign Language (15-17 cr.)

Choose **one** of the following courses:

- HIST-H 105 American History I (3 cr.)
- HIST-H 106 American History II (3 cr.)
- HIST-H 108 Perspectives on the World to 1800 (3 cr.)
- HIST-H 114 History of Western Civilization II (3 cr.)
- ANTH-A l04 Culture and Society (3 cr.)
- CLAS-C 205 Classical Mythology (3 cr.)
- FLAC-F 200 World Cultures through Literature (3 cr.)
- GEOG-G 110 Introduction to Human Geography (3 cr.)

- REL-R 133 Introduction to Religions (3 cr.)
- REL-R 212 Comparative Religion (3 cr.)

Choose **two** Natural Science courses (one w/lab) - *select from list below*

Choose **two** Social Science/Humanities courses - *select from list below*

4A. Civic Leadership Major (16 courses; 45-48 cr.)

NOTE: A minimum of 15 courses are required in the major.

Required courses:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)
- SPEA-V 376 Law and Public Policy (3 cr.)
- SPEA-V 382 Political Action and Civic Engagement (3 cr.)

Select **one** of the following:

- SPEA-V 263 Public Management (3 cr.)
- SPEA-V 362 Nonprofit Management and Leadership (3 cr.)

Select **one** of the following:

- SPEA-V 378 Policy Processes in the United States (3 cr.)
- SPEA-V 408 Individual Rights, Common Goods and Public Policies (3 cr.)
- SPEA-V 438 Mass Media and Public Affairs (3 cr.)

Select **two** of the following:

- SPEA-V 412 Leadership and Ethics (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)

Choose **one** Capstone course:

- SPEA-V 473 Management, Leadership, and Policy (3 cr.)
- SPEA-V 450 Indiana Leadership Seminar (3 cr.)

Required Internship courses:

- SPEA-V 380 Internship in Public and Environmental Affairs (1-6 cr.)
- SPEA-V 252 Career Development & Planning (2 cr.)

4B. Emphasis Area (12 cr. minimum)

The four courses (12 credit hours) must be chosen in consultation with a faculty advisor to allow the student to study a sector, policy, or skill in depth. At least two courses must be 300-level or above.

Choose a concentration and at least **four** courses:

Nonprofit and Community Leadership

- SPEA-V 362 Nonprofit Management and Leadership (3 cr.)
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)
- SPEA-V 450 Contemporary Issues in Public Affairs (3 cr.)
- SPEA-V 458 Fund Development for Nonprofits (3 cr.)
- POLS-Y 301 Political Parties and Interest Groups (3 cr.)

Political Process and Civic Leadership

- SPEA-V 378 Policy Processes in the United States (3 cr.)
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)
- SPEA-V 408 Individual Rights, Common Goods and Public Policies (3 cr.)
- POLS-Y 317 Voting, Elections, and Public Opinion (3 cr.)

International Affairs

- SPEA-V 272 Terrorism and Public Policy (3 cr.)
- POLS-Y 219 Introduction to International Relations (3 cr.)
- POLS-Y 375 War and International Conflict (3 cr.)
- POLS-Y 377 Globalization (3 cr.)

Legal Studies

- POLS-Y 211 Introduction to Law (3 cr.)
- POLS-Y 221 Leg Res/ Writing/ Paralegal Studies (3 cr.)
- POLS-Y 304 Constitutional Law (3 cr.)
- POLS-Y 305 Constitutional Rights and Liberties (3 cr.)
- SPEA-J 301 Substantive Criminal Law (3 cr.)
- SPEA-J 302 Procedural Criminal Law (3 cr.)

Important Notes

Students may transfer to IUPUI School of Public & Environmental Affairs once they acquire 12 credit hours, have a cumulative GPA of 2.3 in SPEA major courses (listed in requirement section #4A & #4B), an overall cumulative GPA of 2.0 and a previous semester GPA of 2.0.

SPEA Good Standing requires: a previous semester 2.0 GPA, a cumulative 2.0 GPA, as well as 2.3 GPA in SPEA major courses (listed in requirement section #4A & #4B).

Please see your SPEA Academic Advisor with any questions. To make an appointment with your advisor, call SPEA Student Services at 317-274-4656.

Natural Science Course List

- ANTH-A 103 Human Origins and Prehistory (3 cr.)
- AST-A 100 The Solar System (3 cr.)

- WOST-W 105 Introduction to Women's Studies (3 cr.)

Degree Programs

Indiana University's School of Public and Environmental Affairs (SPEA) helps students with a desire to change the world prepare for careers that change the world.

Created to address the complex issues that face society today - issues on field of study alone can't solve - SPEA integrates business, government, the social and physical sciences.

As a SPEA student, you learn how people and organizations work together toward the greater good. You also get a versatile "go-anywhere" degree that can lead to jobs and careers in public service, business, and government.

At SPEA, a better world starts with you.

Majors

- Civic Leadership (B.S.P.A.)
- Criminal Justice (B.S.C.J.)
- Management (B.S.P.A.)
- Policy Studies (B.S.P.A.)
- Public Safety Management (B.S.C.J.)
- Media and Public Affairs (B.S.P.A.)
- Sustainable Management and Policy (B.S.P.A)

For more information about the above majors visit spea.iupui.edu/students/checksheets/index.php.

Students pursuing the **Bachelor of Science in Criminal Justice** (B.S.C.J.) may major in Criminal Justice or Public Safety Management. Criminal Justice students learn to protect communities and their citizens.

- Students majors in **Criminal Justice** study law enforcement, the judicial system, corrections and national security.
- Students who major in **Public Safety Management** focus on large-scale disaster preparedness, homeland security and delivery of lifesaving services including fire fighting, emergency medical services and disaster recovery.

Students pursuing the **Bachelor of Science in Public Affairs** (B.S.P.A.) may major in Civic Leadership, Media and Public Affairs, Management, Policy Studies, or Sustainable Management and Policy. Public Affairs majors focus on how we provide for our citizen, making our communities better places to live, work and raise a family. Public Affairs students study and analyze government policies, and learn how to manage government and nonprofit organizations.

- A **Civic Leadership** major teaches students how individuals and organizations can work together to provide for their communities. Graduates often work in public service roles - leading businesses, nonprofit organizations or government agencies. This major is ideal for pre-law student, or students interested in advocacy or community leadership.
- **Media and Public Affairs** gives students an in-depth understanding of governance plus the skills needed to use today's media to communicate to customers, constituents, employees, supporters, opponents and the many other audiences involved in shaping effective public policy. Students who major in Media and Public Affairs will be prepared for careers as public information officers; government affairs personnel for private or nonprofit organizations; public administrators at the local, state, and federal level; lobbyists; representatives of trade organizations; and reporters for various media on the subjects of public affairs, public administration, public policy personnel and decisions. This major teaches anyone who intends to go in to management (public, private or nonprofit) or who will work in the policy area, when and how to deploy traditional and new media tools to achieve their goals.
- A **Management** major teaches some of the things you'd learn in a business school, but you get the additional benefit of leaning how public agencies and nonprofit organizations operate. This holistic approach helps graduates move seamlessly between business, nonprofit and government management roles.
- A **Policy Studies** major prepares students to analyze and assess the usefulness of existing and proposed laws. This major emphasizes critical thinking skills. Graduates often go on to law school or directly into positions in government or government relations.
- A **Sustainable Management and Policy** major gives students a solid understanding of public affairs, finance, policy-making and civic engagement, combined with specialized classes in the principles of sustainability, environmental justice and green technologies. Graduates of the program will find employment in the growing field of sustainability by assuming community and government roles, working for environmental nonprofit groups, owning or managing “green” businesses, and conducting research and legislative analysis. This major is also an excellent choice for a pre-law student.

Criminal Justice (B.S.C.J.)

The Bachelor of Science in Criminal Justice requires 120 credit hours. The program includes three main areas: general education (including a foreign language and a non-foreign language component), and criminal justice.

1. Communications (3 courses; 9 cr.)

- ENG-W 131 Elementary Composition (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)

Choose **one** course:

- ENG-W 231 Professional Writing Skills (3 cr.)
- BUS-X 204 Business Communications (3 cr.)

2. Quantitative Methods (3 courses; 9 cr.)

Select **one** omputer course:

- BUS-K 201 The Computer in Business (3 cr.)
- SPEA-J 426 Mapping and Analysis for Public Safety (3 cr.)
- SPEA-V 261 Computer in Public Affairs (3 cr.)

Select **one** mathematics course:

- MATH-M 118 Finite Mathematics (3 cr.)
- MATH-M 119 Survey of Calculus I (3 cr.)
- MATH 15300 Algebra and Trigonometry I (3 cr.)
- MATH 15400 Algebra and Trigonometry II (3 cr.)

Choose **one** statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.)

3. Social Sciences (4 courses; 12 cr.)

Required course:

- SPEA-J 275 Diversity Issues in Criminal Justice (3 cr.)

Select **three** courses from the Social Science Course List below.

CHOOSE EITHER 4A OR 4B

4A. Option 1: Language Option - Recommended (13-18 cr.)

Complete first-year foreign language requirements:

1. Complete three 100-level foreign language courses in a single language **OR**
2. Complete a 200-level or 300-level foreign language course with a grade of C or better **OR**
3. Complete a placement test, placing into the 200 level or higher; this waives the 100-level requirement but does not carry with it credit toward graduation.

Complete HIST-H 105 American History I (3 cr.)

Choose **one** Natural Science course (3-5 cr.) - *select from Natural Science Course List below*

Students are only required to complete three credits, however if lab course is taken, may have up to five credits.

4B. Option 2: No Foreign Language (15-20 cr.)

Complete both courses:

- HIST-H 105 American History I (3 cr.)
- HIST-H 106 American History II (3 cr.)

Choose **two** courses from the Humanities Course List below.

Select **two** courses (one wi/ lab) from the Natural Science Course List below.

5. Criminal Justice Major (16 courses; 48 cr.)

Required courses:

- SPEA-J 101 The American Criminal Justice System (3 cr.)
- SPEA-J 150 Public Safety in America (3 cr.)
- SPEA-J 201 Theoretical Foundations of Criminal Justice Policies (3 cr.)

- SPEA-J 202 Criminal Justice Data, Methods, and Resources (3 cr.)
- SPEA-J 302 Procedural Criminal Law (3 cr.)
- SPEA-J 306 The Criminal Courts (3 cr.)
- SPEA-J 321 American Policing (3 cr.)
- SPEA-J 331 Corrections (3 cr.)
- SPEA-J 439 Crime and Public Policy (3 cr.)

Choose **one** Criminal Law course:

- SPEA-J 301 Substantive Criminal Law (3 cr.)
- SPEA-J 302 Procedural Criminal Law (3 cr.)

Choose four Criminal Justice elective courses totaling 12 credit hours.

With approval by the faculty advisor, other non-criminal justice SPEA courses may be substituted. SPEA-J 260 and SPEA-J 380 may count toward this requirement, but are limited to a maximum of three credits each.

Select **three** Management and Policy courses (9 credit hours):

- SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 263 Public Management (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)
- PBHL-A 316 Environmental Health Science (3 cr.)
- SPEA-V 348 Management Science (3 cr.)
- SPEA-V 361 Financial Management (3 cr.)
- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)
- SPEA-V 368 Managing Government Operations (3 cr.)
- SPEA-V 372 Government Finance and Budgets (3 cr.)
- SPEA-V 373 Human Resource Management in the Public Sector (3 cr.)
- SPEA-V 375 Emergency Services Administration (3 cr.)
- SPEA-V 376 Law and Public Policy (3 cr.)
- SPEA-V 432 Labor Relations in the Public Sector (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)
- SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)

6. General Electives (approx. 22-29 cr.)

Additional courses beyond the General Education and Major requirements to total 120 credit hours (these are not required to be SPEA courses but could be):

- SPEA-V 100 or UCOL-U 100 First Year Seminar (1 cr.)
- PLUS electives

PLEASE NOTE, preparatory math and English courses do not count towards graduation credits. If you have questions regarding this, please ask your advisor.

Students may transfer to IUPUI School of Public & Environmental Affairs once they acquire 12 credit hours, have a cumulative GPA of 2.3 in SPEA major courses (listed in requirement section #5), an overall cumulative GPA of 2.0 and a previous semester GPA of 2.0.

SPEA Good Standing requires: a previous semester 2.0 GPA, a cumulative 2.0 GPA, as well as 2.3 GPA in SPEA major courses (listed in requirement section #5 + SPEA J275).

Please see your SPEA Academic Advisor with any questions. To make an appointment with your advisor, call SPEA Student Services at 317-274-4656.

Social Science Course List

- ANTH-A 104 Culture and Society (3 cr.)
- ECON-E 201 Microeconomics (3 cr.)
- ECON-E 202 Macroeconomics (3 cr.)
- GEOG-G 110 Introduction to Human Geography (3 cr.)
- GEOG-G 130 World Geography (3 cr.)
- POLS-Y 101 Principles of Political Science (3 cr.)
- POLS-Y 103 Introduction to American Politics (3 cr.)
- POLS-Y 217 Introduction to Comparative Politics (3 cr.)
- POLS-Y 219 Introduction to International Relations (3 cr.)
- PSY-B 104 Introduction to Psychology as a Social Science (3 cr.)
- PSY-B 310 Life Span Development (3 cr.)
- PSY-B 380 Abnormal Psychology (3 cr.)
- SOC-R 100 Introduction to Sociology (3 cr.)
- SOC-R 121 Social Problems (3 cr.)
- SOC-R 461 Race and Ethnic Relations (3 cr.)
- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- WOST-W 105 Introduction to Women's Studies (3cr.)

- PHYS 21900 General Physics II (4 cr.) - *w/lab*
- PSY-B 105 Psychology as a Biological Science (3 cr.)

Management (B.S.P.A.)

The Bachelor of Science in Public Affairs in Management requires 120 credit hours. The SPEA curriculum is divided into three categories: general education, electives, and major area. Public Affairs majors focus on how we provide for our citizen, making our communities better places to live, work and raise a family. Public Affairs students study and analyze government policies, and learn how to manage government and nonprofit organizations. A Management major teaches some of the things you'd learn in a business school, but you get the additional benefit of leaning how public agencies and nonprofit organizations operate. This holistic approach helps graduates move seamlessly between business, nonprofit and government management roles.

1. Communications (3 courses; 9 cr.)

- ENG-W 131 Elementary Composition I (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)

Choose **one** course:

- BUS-X 204 Business Communications (3 cr.)
- ENG-W 231 Professional Writing Skills (3 cr.)

2. Quantitative Methods (5 courses; 15 cr.)

Choose **one** computer course:

- SPEA-V 261 Computers in Public Affairs (3 cr.)
- BUS-K 201 The Computer in Business (3 cr.)

Select **one** mathematics courses:

- MATH-M 118 Finite Mathematics (3 cr.)
- MATH-M 119 Survey of Calculus I (3 cr.)
- MATH 15300 Algebra and Trigonometry I (3 cr.)
- MATH 15400 Algebra and Trigonometry II (3 cr.)

Choose **one** statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.)
- ECON-E 270 Intro to Stat Theory Econ & Bus (3 cr.)
- PSY-B 305 Statistics (3 cr.)
- STAT 301 Elem. Stat Method I (3 cr.)
- SOC-R 359 Sociological Statistics (3 cr.)

Select **one** accounting course:

- BUS-A 200 Foundations of Accounting (3 cr.)
- BUS-A 201 Introduction to Financial Accounting (3 cr.)

Select **one** research methods course:

- SPEA-V 370 Research Methods and Statistical Research (3 cr.)
- SPEA-J 202 Criminal Justice Data, Methods and Resources (3 cr.)

3. Social Sciences, Humanities & Natural Sciences (3 courses; 9 cr.)

- POLS-Y 103 Intro to American Politics (3 cr.)
- ECON-E 201 Intro to Microeconomics (3 cr.)
- ECON-E 202 Into to Macroeconomics (3 cr.)

CHOOSE EITHER 3A OR 3B

3A. Option 1: Language Option - Recommended (13-15 cr.)

Complete first-year foreign language requirements:

1. Three foreign language 100-level courses OR
2. Complete a 200-level or 300-level foreign lanuage course with a grade of C or better OR
3. Complete placement test, placing into 200-level or higher; this waives 100-level requirement but does not carry credit toward graduation

Choose **one** Natural Science course (3-5 cr.) - *select from list below*

Students only required to complete three credits, however if lab course is taken, may have up to five credits.

3B. Option 2: No Foreign Language (15-17 cr.)

Choose **one** of the following courses:

- HIST-H 105 American History I (3 cr.)
- HIST-H 106 American History II (3 cr.)
- HIST-H 108 Perspectives on the World to 1800 (3 cr.)
- HIST-H 114 History of Western Civilization II (3 cr.)
- ANTH-A l04 Culture and Society (3 cr.)
- CLAS-C 205 Classical Mythology (3 cr.)
- FLAC-F 200 World Cultures through Literature (3 cr.)
- GEOG-G 110 Introduction to Human Geography (3 cr.)
- REL-R 133 Introduction to Religions (3 cr.)
- REL-R 212 Comparative Religion (3 cr.)

Choose **two** Natural Science courses (one w/lab) - *select from list below*

Choose **two** Social Science/Humanities courses - *select from list below*

4. Management Major (17 courses; 48-51 cr.)

Required courses:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- SPEA-V 348 Management Science (3 cr.)
- SPEA-V 361 Financial Management (3 cr.)
- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)
- SPEA-V 376 Law & Public Policy (3 cr.)

Choose **two** courses:

- PBHL-H 316 Environmental Science & Health (3 cr.)
- PBHL-H 320 Health Systems Adminstration (3 cr.)
- SPEA-V 221 Nonprofit & Voluntary Sector (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)
- SPEA-V 375 Emergency Services Administration (3 cr.)

Choose **one** course:

- SPEA-V 263 Public Management (3 cr.)
- SPEA-V 362 Nonprofit Management & Leadernship (3 cr.)

Choose **one** course:

- SPEA-V 346 Intro to Government Accounting & Financial Reporting (3 cr.)
- SPEA-V 356 Intro to Nonprofit Accounting & Reporting (3 cr.)

Management Electives (15 credit hours)

Choose **one** course from each section below:

Section 1

- SPEA-V 372 Government Finance & Budgets (3 cr.)
- SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)

Section 2

- SPEA-V 369 Managing Information Technology (3 cr.)
- SPEA-V 379 Performance Measurement & Program Evaluation (3 cr.)

Section 3

- SPEA-V 373 Human Resource Management in the Public Sector (3 cr.)
- SPEA-V Leadership & Ethics (3 cr.)
- SPEA-V Negotiation & Alternative Dispute Resolution (3 cr.)
- SPEA-V Managing Workforce Diversity (3 cr.)

Choose **two** additional courses from Sections 1, 2, & 3 above. The courses must come from two different sections.

Choose **one** Capstone course:

- SPEA-V 473 Management, Leadership & Policy (3 cr.)
- SPEA-V 450 Indiana Leadership Seminar (6 cr.) - *application required*

Required Internship course:

- SPEA-V 380 Internship in Public & Environmental Affairs (1-6 cr.)
- SPEA-V 252 Career Development & Planning (2 cr.)

5. General Electives (approx. 19-26 cr.)

Complete SPEA-V 100 or UCOL-U 100 First Year Seminar.

Additional courses beyond the General Education and Major requirements to total 120 credit hours (these are not required to be SPEA courses but could be):

PLEASE NOTE, preparatory math and English courses do not count towards graduation credits. If you have questions regarding this, please ask your advisor.

Important Notes

Students may transfer to IUPUI School of Public & Environmental Affairs once they acquire 12 credit hours, have a cumulative GPA of 2.3 in SPEA major courses (listed in requirement section #4A & #4B), an overall cumulative GPA of 2.0 and a previous semester GPA of 2.0.

SPEA Good Standing requires: a previous semester 2.0 GPA, a cumulative 2.0 GPA, as well as 2.3 GPA in SPEA major courses (listed in requirement section #4A & #4B).

Please see your SPEA Academic Advisor with any questions. To make an appointment with your advisor, call SPEA Student Services at 317-274-4656.

Policy Studies (B.S.P.A.)

The Bachelor of Science in Public Affairs in Policy Studies requires 120 credit hours. The SPEA curriculum is divided into three categories: general education, electives, and major area. Public Affairs majors focus on how we provide for our citizen, making our communities better places to live, work and raise a family. Public Affairs students study and analyze government policies, and learn how to manage government and nonprofit organizations. A Policy Studies major prepares students to analyze and assess the usefulness of existing and proposed laws. This major emphasizes critical thinking skills. Graduates often go on to law school. or directly into positions in government or government relations.

1. Communications (3 courses; 9 cr.)

- ENG-W 131 Elementary Composition I (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)

Choose **one** course:

- BUS-X 204 Business Communications (3 cr.)
- ENG-W 231 Professional Writing Skills (3 cr.)

2. Quantitative Methods (5 courses; 15 cr.)

Choose **one** computer course:

- SPEA-V 261 Computers in Public Affairs (3 cr.)
- BUS-K 201 The Computer in Business (3 cr.)

Select **one** mathematics courses:

- MATH-M 118 Finite Mathematics (3 cr.)
- MATH-M 119 Survey of Calculus I (3 cr.)
- MATH 15300 Algebra and Trigonometry I (3 cr.)
- MATH 15400 Algebra and Trigonometry II (3 cr.)

Choose **one** statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.)
- ECON-E 270 Intro to Stat Theory Econ & Bus (3 cr.)
- PSY-B 305 Statistics (3 cr.)
- STAT 301 Elem. Stat Method I (3 cr.)
- SOC-R 359 Sociological Statistics (3 cr.)

Select **one** accounting course:

- BUS-A 200 Foundations of Accounting (3 cr.)
- BUS-A 201 Introduction to Financial Accounting (3 cr.)

Select **one** research methods course:

- SPEA-V 370 Research Methods and Statistical Research (3 cr.)
- SPEA-J 202 Criminal Justice Data, Methods and Resources (3 cr.)

Choose **two** Natural Science courses (one w/lab) - *select from list below*

Choose **two** Social Science/Humanities courses - *select from list below*

4A. Policy Studies Major (42-45 cr.)

Required course:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)

Select **one** of the following courses:

- SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.) or
- SPEA-V 362 Nonprofit Management and Leadership (3 cr.)

Select **one** of the following courses:

- SPEA-V 263 Public Management (3 cr.) or
- SPEA-V 372 Government Finance and Budgets (3 cr.)

Select **one** of the following courses:

- SPEA-V 382 Political Action and Civic Engagement (3 cr.) or
- SPEA-V 408 Individual Rights, Common Goods and Public Policies (3 cr.)

Choose **four** courses from the following:

- SPEA-V 348 Management Science (3 cr.) P: SPEA K300, MATH M118 or MATH M025
- SPEA-V 369 Managing Information Technology (3 cr.)
- SPEA-V 376 Law and Public Policy (3 cr.)
- SPEA-V 378 Policy Processes in the United States (3 cr.)
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)

Select **one** Capstone Courses:

- SPEA-V 473 Management, Leadership, and Policy (3 cr.)
- SPEA-V 450 Indiana Leadership Seminar (3 cr.)

Required Internship Courses:

- SPEA-V 473 Internship in Public and Environmental Affairs (0-6 cr.)
- SPEA-V 252 Career Development and Planning (2 cr.)

4B. Policy Emphasis Area (12 cr. minimum)

Criminal Justice

- SPEA-J 101 The American Criminal Justice System (3 cr.)
- SPEA-J 150 Public Safety in America (3 cr.)
- SPEA-J 222 Murder in America: Causes and Consequences (3 cr.)
- SPEA-J 272 Terrorism and Public Policy (3 cr.)
- SPEA-J 305 Juvenile Justice (3 cr.)
- SPEA-J 426 Mapping and Analysis for Public Safety (3 cr.)

Environment

- PBHL-A 162 Environment and People (3 cr.)
- PBHL-A 316 Environmental Science and Health (3 cr.)
- PBHL-A 416 Environmental Health Policy (3 cr.)
- BIOL-K 341 Principals of Ecology (3 cr.)

Health

- PBHL-A 316 Environmental Science and Health (3 cr.)
- PBHL-H 320 Health Systems Administration (3 cr.)
- PBHL-H 354 Health Economics (3 cr.)
- PBHL-H 401 Strategic Planning in Health Care Organizations (3 cr.)
- PBHL-A 416 Environmental Health Policy (3 cr.)
- PBHL-H 420 Health Policy (3 cr.)
- PBHL-H 474 Health Administration Seminar (3 cr.) P: SPEA H320 and senior standing.

Urban

- SPEA-J 426 Mapping and Analysis for Public Safety (3 cr.)
- SPEA-J 387 Foundations of Homeland Security (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)

- SPEA-V 450 Contemporary Issues in Public Affairs (3 cr.)
- POLS-Y 308 Urban Politics (3 cr.)

Nonprofit

- SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 260 Topics in Public Affairs (3 cr.)
- SPEA-V 362 Nonprofit Management and Leadership (3 cr.)
- SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)

International Policy

- SPEA-V 272 Terrorism and Public Policy (3 cr.)
- POLS-Y 219 Introduction to International Relations (3 cr.)
- ECON-E 303 Survey of International Economics (3 cr.)
- POLS-Y 377 Globalization (3 cr.)
- POLS-Y 360 U.S. Foreign Policy (3 cr.)
- POLS-Y 217 Introduction to Comparative Politics (3 cr.)

5. General Electives (approx. 25-32 cr.)

Complete SPEA-V 100 or UCOL-U 100 First Year Seminar.

Additional courses beyond the General Education and Major requirements to total 120 credit hours (these are not required to be SPEA courses but could be):

PLEASE NOTE, preparatory math and English courses do not count towards graduation credits. If you have questions regarding this, please ask your advisor.

Important Notes

Students may transfer to IUPUI School of Public & Environmental Affairs once they acquire 12 credit hours, have a cumulative GPA of 2.3 in SPEA major courses (listed in requirement section #4A & #4B), an overall cumulative GPA of 2.0 and a previous semester GPA of 2.0.

SPEA Good Standing requires: a previous semester 2.0 GPA, a cumulative 2.0 GPA, as well as 2.3 GPA in SPEA major courses (listed in requirement section #4A & #4B).

Please see your SPEA Academic Advisor with any questions. To make an appointment with your advisor, call SPEA Student Services at 317-274-4656.

- FLAC-F 200 World Cultures through Literature (3 cr.)
- FOLK-F 100 Introduction to Folklore (3 cr.)
- FOLK-F 101 Folklore (3 cr.)
- GEOG-G 110 Introduction to Human Geography (3 cr.)
- GEOG-G 130 World Geography (3 cr.)
- HER-H 100 Art Appreciation (3 cr.)
- HER-H 101 History of Art I (3 cr.)
- HER-H 102 History of Art II (3 cr.)
- HIST-H 105 American History I (3 cr.)
- HIST-H 106 American History II (3 cr.)
- HIST-H 108 Perspectives on the World to 1800 (3 cr.)
- HIST-H 113 History of Western Civilization I (3 cr.)
- HIST-H 117 Introduction to Historical Studies (3 cr.)

- PHST-P 105 Giving and Volunteering in America (3 cr.)
- POLS-Y 101 Principles of Political Science (3 cr.)
- POLS-Y 219 Introduction to International Relations (3 cr.)
- PSY-B 104 Introduction to Psychology as a Social Science (3 cr.)
- PSY-B 310 Life Span Development (3 cr.)
- PSY-G 380 Abnormal Psychology (3 cr.)
- SOC-R 100 Introduction to Sociology (3 cr.)
- SOC-R 121 Social Problems (3 cr.)
- SPEA-J 101 The American Criminal Justice System (3 cr.)
- WOST-W 105 Introduction to Women's Studies (3 cr.)

Public Safety Management (B.S.C.J.)

The Bachelor of Science in Criminal Justice in Public Safety Management requires 120 credit hours. The program includes three main areas: general education (including a foreign language and a non-foreign language component), and management and policy. Criminal Justice and Public Safety majors learn to protect communities and their citizens. Students who major in Public Safety Management focus on large-scale disaster preparedness, homeland security and delivery of lifesaving services including fire fighting, emergency medical services and disaster recovery.

1. Communications (3 courses; 9 cr.)

- ENG-W 131 Elementary Composition (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)

Choose **one** course:

- ENG-W 231 Professional Writing Skills (3 cr.)
- BUS-X 204 Business Communications (3 cr.)

2. Quantitative Methods (3 courses; 9 cr.)

Select **one** omputer course:

- BUS-K 201 The Computer in Business (3 cr.)
- SPEA-V 261 Computer in Public Affairs (3 cr.)

Select **one** mathematics course:

- MATH-M 118 Finite Mathematics (3 cr.)
- MATH-M 119 Survey of Calculus I (3 cr.)
- or another math course approved by your advisor

Choose **one** statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.)
- ECON-E 270 Into to Stat Theory Econ & Bus (3 cr.)
- PSY-B 305 Statistics (3 cr.)
- STAT 301 Elem. Stat Method I (3 cr.)

3. Social Sciences (4 courses; 12 cr.)

Required course:

- SPEA-J 275 Diversity Issues in Criminal Justice (3 cr.)

Select **three** courses from the Social Science Course List below.

CHOOSE EITHER 4A OR 4B

4A. Option 1: Language Option - Recommended (13-18 cr.)

Complete first-year foreign language requirements:

1. Complete three 100-level foreign language courses in a single language **OR**
2. Complete a 200-level or 300-level foreign language course with a grade of C or better **OR**
3. Complete a placement test, placing into the 200 level or higher; this waives the 100-level requirement but does not carry with it credit toward graduation.

Complete HIST-H 105 American History I (3 cr.)

Choose **one** Natural Science course (3-5 cr.) - *select from Natural Science Course List below*

Students are only required to complete three credits, however if lab course is taken, may have up to five credits.

4B. Option 2: No Foreign Language (15-20 cr.)

Complete both courses:

- HIST-H 105 American History I (3 cr.)
- HIST-H 106 American History II (3 cr.)

Choose **two** courses from the Humanities Course List below.

Select **two** courses (one wi/ lab) from the Natural Science Course List below.

5. Public Safety Management Major (15 courses; 45 cr.)

Required courses:

- SPEA-J 101 American Criminal Justice System (3 cr.)
- SPEA-J 150 Public Safety in America (3 cr.)
- SPEA-J 202 Criminal Justice Data, Methods, and Resources (3 cr.)
- SPEA-J 272/V 272 Terrorism and Public Policy (3 cr.)
- SPEA-V 375 Emergency Services Administration (3 cr.)*
- SPEA-J 376 Principles of Public Safety (3 cr.)*
- SPEA-J 387 Foundations of Homeland Security (3 cr.)
- SPEA J426 Mapping and Analysis for Public Safety (3 cr.)**
- SPEA J429 Public Safety Management Capstone (3 cr.)

Select **three** Public Safety elective courses totaling 9 credit hours. These courses will be counted only in the major and may not be used to satisfy the general education computer requirement. Students may select only V263 or V366, not both.

- SPEA-V 263 Public Management (3 cr.) **OR**
- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)
- SPEA-J 324 Technology, Crime, and Public Safety (3 cr.)
- SPEA V 348 Management Science (3 cr.)
- SPEA-V 368 Managing Government Operations (3 cr.)

- SPEA-V 372 Government Finance and Budgets (3 cr.)
- SPEA-V 361 Financial Management (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)
- SPEA-V 380 Internship for Public and Environmental Affairs (3 cr.)*

Select **three** Management and Policy courses (9 credit hours):

- SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)
- PBHL-A 316 Environmental Science and Health (3 cr.)
- SPEA-V 373 Human Resources in the Public Sector (3 cr.)
- SPEA-V 376 Law and Public Policy (3 cr.)
- SPEA-V 378 Policy Processes in the United States (3 cr.)
- SPEA-V 432 Labor Relations in the Public Sector (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)

*Students who are graduates of a number of fire academies may receive credit for V375, J376, and V380 (limited up to 3 credits) upon admission. Please see the Fire-Training area of the bulletin for more information.

Transfer Course Policy: On the Indianapolis campus, no more than 50 percent of courses taken to satisfy the requirements of the Public Safety Management Concentration may be transfer courses from other accredited institutions of higher learning; including all IU campuses.

6. General Electives (approx. 25-32 cr.)

Additional courses beyond the General Education and Major requirements to total 120 credit hours (these are not required to be SPEA courses but could be):

- SPEA-V 100 or UCOL-U 100 First Year Seminar (1 cr.)
- Other electives

PLEASE NOTE, preparatory math and English courses do not count towards graduation credits. If you have questions regarding this, please ask your advisor.

Important Notes

Students may transfer to IUPUI School of Public & Environmental Affairs once they acquire 12 credit hours, have a cumulative GPA of 2.3 in SPEA major courses (listed in requirement section #5), an overall cumulative GPA of 2.0 and a previous semester GPA of 2.0.

SPEA Good Standing requires: a previous semester 2.0 GPA, a cumulative 2.0 GPA, as well as 2.3 GPA in SPEA major courses (listed in requirement section #5 + SPEA J275).

Please see your SPEA Academic Advisor with any questions. To make an appointment with your advisor, call SPEA Student Services at 317-274-4656.

Social Science Course List

- ANTH-A 104 Culture and Society (3 cr.)
- ECON-E 201 Microeconomics (3 cr.)
- ECON-E 202 Macroeconomics (3 cr.)
- GEOG-G 110 Introduction to Human Geography (3 cr.)
- GEOG-G 130 World Geography (3 cr.)
- POLS-Y 101 Principles of Political Science (3 cr.)
- POLS-Y 103 Introduction to American Politics (3 cr.)
- POLS-Y 217 Introduction to Comparative Politics (3 cr.)
- POLS-Y 219 Introduction to International Relations (3 cr.)

- PHYS 21900 General Physics II (4 cr.) - *w/lab*
- PSY-B 105 Psychology as a Biological Science (3 cr.)

Media and Public Affairs (B.S.P.A.)

The Bachelor of Science in Public Affairs in Media and Public Affairs requires 120 credit hours. The SPEA curriculum is divided into three categories: general education, electives, and major area. Public Affairs majors focus on how we provide for our citizen, making our communities better places to live, work and raise a family. Public Affairs students study and analyze government policies, and learn how to manage government and nonprofit organizations. Media and Public Affairs gives students an in-depth understanding of governance plus the skills needed to use today's media to communicate to customers, constituents, employees, supporters, opponents and the many other audiences involved in shaping effective public policy. Students who major in Media and Public Affairs will be prepared for careers as public information officers; government affairs personnel for private or nonprofit organizations; public administrators at the local, state, and federal level; lobbyists; representatives of trade organizations; and reporters for various media on the subjects of public affairs, public administration, public policy personnel and decisions. This major teaches anyone who intends to go in to management (public, private or nonprofit) or who will work in the policy area, when and how to deploy traditional and new media tools to achieve their goals.

1. Communications (3 courses; 9 cr.)

- ENG-W 131 Elementary Composition I (3 cr.)
- COMM-R 110 Fundamentals of Speech Communication (3 cr.)

Choose **one** course:

- BUS-X 204 Business Communications (3 cr.)
- ENG-W 231 Professional Writing Skills (3 cr.)

2. Quantitative Methods (5 courses; 15 cr.)

Choose **one** computer course:

- SPEA-V 261 Computers in Public Affairs (3 cr.)
- BUS-K 201 The Computer in Business (3 cr.)

Select **one** mathematics courses:

- MATH-M 118 Finite Mathematics (3 cr.)
- MATH-M 119 Survey of Calculus I (3 cr.)
- MATH 15300 Algebra and Trigonometry I (3 cr.)
- MATH 15400 Algebra and Trigonometry II (3 cr.)

Choose **one** statistics course:

- SPEA-K 300 Statistical Techniques (3 cr.)
- ECON-E 270 Intro to Stat Theory Econ & Bus (3 cr.)
- PSY-B 305 Statistics (3 cr.)
- STAT 301 Elem. Stat Method I (3 cr.)
- SOC-R 359 Sociological Statistics (3 cr.)

Select **one** accounting course:

- BUS-A 200 Foundations of Accounting (3 cr.)
- BUS-A 201 Introduction to Financial Accounting (3 cr.)

Select **one** research methods course:

- SPEA-V 370 Research Methods and Statistical Research (3 cr.)
- SPEA-J 202 Criminal Justice Data, Methods and Resources (3 cr.)

3. Social Sciences, Humanities & Natural Sciences (3 courses; 9 cr.)

- POLS-Y 103 Intro to American Politics (3 cr.)
- ECON-E 201 Intro to Microeconomics (3 cr.)
- ECON-E 202 Into to Macroeconomics (3 cr.)

CHOOSE EITHER 3A OR 3B

3A. Option 1: Language Option - Recommended (13-15 cr.)

Complete first-year foreign language requirements:

1. Three foreign language 100-level courses OR
2. Complete a 200-level or 300-level foreign lanuage course with a grade of C or better OR
3. Complete placement test, placing into 200-level or higher; this waives 100-level requirement but does not carry credit toward graduation

Choose **one** Natural Science course (3-5 cr.) - *select from list below*

Students only required to complete three credits, however if lab course is taken, may have up to five credits.

3B. Option 2: No Foreign Language (15-17 cr.)

Choose **one** of the following courses:

- HIST-H 105 American History I (3 cr.)
- HIST-H 106 American History II (3 cr.)

- HIST-H 108 Perspectives on the World to 1800 (3 cr.)
- HIST-H 114 History of Western Civilization II (3 cr.)
- ANTH-A l04 Culture and Society (3 cr.)
- CLAS-C 205 Classical Mythology (3 cr.)
- FLAC-F 200 World Cultures through Literature (3 cr.)
- GEOG-G 110 Introduction to Human Geography (3 cr.)
- REL-R 133 Introduction to Religions (3 cr.)
- REL-R 212 Comparative Religion (3 cr.)

Choose **two** Natural Science courses (one w/lab) - *select from list below*

Choose **two** Social Science/Humanities courses - *select from list below*

4. Media and Public Affairs (18 courses; 51 credits)

Required (33 credits):

- SPEA-V170 Intro to Public Affairs (3 cr.)
- SPEA-V372 Government Finance & Budgets (P: V170, ECON-E201 or ECON-E202) (3 cr.)
- SPEA-V376 Law & Public Policy (P: BUS-A200 or BUS-A201) (3 cr.)
- SPEA-V378 Policy Processes in the United States (3 cr.)
- SPEA-V382 Political Action and Civic Engagement (3 cr.)
- SPEA-V438 Mass Media and Public Affairs (3 cr.)
- INFO-N311 Digital Paradigm Shift: Effects on International Culture & Society (3 cr.)
- JOUR-C300 The Citizen and the News (3 cr.)
- JOUR-J375 Race, Gender and Media (3 cr.)
- JOUR-J410 Media as Social Institutions (P: JOUR-J300) (3 cr.)
- POLS-Y317 Voting, Elections, and Public Opinion (3 cr.)

Select **four** courses from below (12 credits):

- SPEA-V221 Nonprofit & Voluntary Sector
- SPEA-V263 Public Management
- SPEA-V412 Leadership & Ethics
- JOUR-J110 Foundations of Journalism & Mass Media
- JOUR-J210 Visual Communications
- JOUR-J321 Principles of Public Relations
- JOUR-J423 Public Opinion
- JOUR-J450 History of Journalism
- POLS-Y215 Introduction to Political Theory
- POLS-Y321 Media & Politics
- POLS-Y377 Globalization
- POLS-Y382 Modern Political Thought
- SOC-R355 Social Theory (P: SOC-R100) or SOC-R356 Foundations of Social Theory (P: SOC-R100)

Choose **one** Capstone Course:

- SPEA-V473 Management, Leadership & Policy (P: Sr. Standing)
- SPEA-V450 Indiana Leadership Seminar (application required)

Required Internship courses:

- SPEA-V380 Internship in Public & Environmental Affairs
- SPEA-V252 Career Development & Planning

5. General Electives (approx. 19-26 cr.)

Complete SPEA-V 100 or UCOL-U 100 First Year Seminar.

Additional courses beyond the General Education and Major requirements to total 120 credit hours (these are not required to be SPEA courses but could be):

PLEASE NOTE, preparatory math and English courses do not count towards graduation credits. If you have questions regarding this, please ask your advisor.

Important Notes

Students may transfer to IUPUI School of Public & Environmental Affairs once they acquire 12 credit hours, have a cumulative GPA of 2.3 in SPEA major courses (listed in requirement section #4A & #4B), an overall cumulative GPA of 2.0 and a previous semester GPA of 2.0.

SPEA Good Standing requires: a previous semester 2.0 GPA, a cumulative 2.0 GPA, as well as 2.3 GPA in SPEA major courses (listed in requirement section #4A & #4B).

Please see your SPEA Academic Advisor with any questions. To make an appointment with your advisor, call SPEA Student Services at 317-274-4656.

Undergraduate Programs

General Information

The School of Public and Environmental Affairs (SPEA) on the Indianapolis campus offers a wide range of undergraduate programs. The following is a list of bachelors degrees offered through SPEA:

- Bachelor of Science in Public Affairs (B.S.P.A.) with majors in:
  - Civic Leadership
  - Management
  - Media and Public Affairs
  - Policy Studies
  - Sustainable Management and Policy
- Bachelor of Science in Criminal Justice (B.S.C.J.) with majors in:
  - Criminal Justice
  - Public Safety Management

Minors are available in the following areas:

- Civic Leadership
- Criminal Justice General
- Criminal Justice Accounting (for accounting students admitted to the Kelley School of Business)
- Human Resource Management
- Management
- Policy Studies
- Public and Nonprofit Financial Management
- Public Safety Management

In addition, SPEA offers a number of undergraduate certificates:

- Nonprofit Management
- Public Affairs
- Public Management

General information concerning these programs can be obtained by visiting our website at www.spea.iupui.edu or from the SPEA Student Services:

SPEA Student Services
School of Public and Environmental Affairs

SPEA Honors Program

The SPEA Honors Program offers select students across all SPEA majors an opportunity to enrool in a challenging academic program that will enhance learning opportunities. Benefits include:

- Increased opportunities to interact with faculty members.
- Greater depth of learning in your major through additional challenges.
- Enhanced relationships with other motivated, high-achieving students.
- Enriched classroom discussions.

- Access to the IUPUI Honors College facility such as dedicated study space, computer lab, group-work rooms, interaction with other honors students, and access to the honors college advisors.
- Opportunity to pursue the Honors Minor in Leadership .

Admission Requirements

1. Be admitted to SPEA.
2. Have 12 IUPUI GPA hours completed with at least a 3.5 cumulative GPA.
3. Complete SPEA Honors Program application.

Program Requirements

To successfully complete the SPEA Honors Program, a student must:

- Maintain a cumulative and term GPA or 3.3 or above.
- Maintain a 3.3 or above in honors courses.
- Complete 24 total honors credit hours (15 hours of required SPEA honors courses plus 9 hours of honors electives).

Probation

Any student who fails to maintain the GPA requirements will be put on probation status for one semester, will be required to meet with the SPEA Honors Advisor to discuss his or her standing in the program and must complete an Honors Probation Contract. If the student is unable to meet the GPA requirements in subsequent terms, he or she may be dismissed from the SPEA Honors program

Honors Courses

1. Complete 15 hours of SPEA Major courses for Honors credit.
    1. We recommend working with the SPEA Honors Advisor to plan these courses. Taking courses from full-time SPEA faculty will be preferred for Honors credit SPEA courses.
    2. b. SPEA classes being taken for Honors credit will include additional requirements beyond those in the regular course offering. Examples of additional requirements include (applicable paperwork must be submitted and approved prior to the experience in order to receive Honors credit):
        - A major paper not required in the regular course
        - Additional readings not required in the regular course
        - Additional or different questions on exams; these questions may cover additional material or require mastery of material beyond the level required in the regular course
        - Other additional assignments not required in the regular course
        - Adding an Honors component to study abroad, service learning, senior capstone, or internship experiences
    3. Students in the SPEA Honors Program will be required to meet with faculty outside of regular class meetings. Such interaction could take different forms and can be arranged for individual students or groups of students. Options include in-person meetings, online interaction, telephone conference calls, etc. We would recommend at least six hours of interaction per semester (that would be half an hour per week or one hour every other week for 12 of the 15 weeks of a semester).
    4. To complete the program, we recommend completing 1 Honors course per semester.
2. Complete 9 hours of Honors elective courses.

A student must meet with the SPEA Honors Advisor each term to complete the contract required to enroll in an honors course. Students then will submit the contract to the Honors College no later than the third week of classes, though we recommend submitting paperwork prior to the start of the semester.

Off Campus Study

Education is all about new experiences, and SPEA offers several ways to gain different perspectives while remaining an IUPUI student:

Study abroad

Both SPEA and IUPUI offer opportunities to study abroad, and offer scholarships to help you do so! SPEA's Overseas Education Programs are detailed at http://www.indiana.edu/%7espea/spea_abroad/index.shtml, and IUPUI's offerings can be found at http://abroad.iupui.edu/. Every SPEA student who is accepted into a SPEA study abroad program will be awarded a SPEA Overseas Education Scholarship. Awards range from $1000 to $2000. Additional scholarships are also available. Please visit SPEA's scholarships page.

SPEA has a diverse range of locations and programs, from Beijing to Berlin, Moscow to Kenya, Paris to Pamplona. If you are considering international study, make an appointment with your SPEA academic advisor to explore the possibilities and find a fit that's right for you.

Study in Washington, DC

SPEA offers the Washington Leadership Program in Washington, DC during the spring and fall semesters. Junior and senior undergraduate students from all majors at all IU campuses are eligible to apply. This program consists of two senior-level seminars (each worth 3 credit hours) and an internship (worth 5-6 credit hours). Students complete internships by working four days per week at an assigned congressional office, trade association or federal agency, or at a health, environmental or nonprofit organization. To learn more, visit the WLP website: http://www.iu.edu/%7espeaweb/careers/wlp.php.

Study at other universities

IUPUI participates in National Student Exchange (NSE), a nonprofit education consortium that allows students to spend a summer, a semester or an academic year at one of the nearly 200 NSE institutions in the U.S., Canada or U.S. territories. Students pay tuition and fees at IUPUI rates even while they are on exchange, and all course credits transfer back to IUPUI. To qualify, students must:

- Have completed 24 credit hours
- Have a GPA of 2.5 or higher
- Be a full-time student at IUPUI.

For more information, contact Asha McCauley, NSE Coordinator at IUPUI, azwillia@iupui.edu or 317-274-2517. http://www.nse.org/

Take a course at another IU campus and transfer credits to IUPUI

Select the IU campus that you plan to attend. Make sure the courses you plan to take are being offered. Complete an intercampus transfer form with the IU campus you plan to attend. Once you have registered and completed your courses, they should appear on your IU Academic Advising Report. If you are unsure how a course will transfer to IUPUI, contact IUPUI Admissions at 317-274-4591 or Admissions website: http://enroll.iupui.edu/admissions/. Check with your advisor to ensure the class you want to take will fulfill a requirement in your major.

Leadership Programs

Washington Leadership Program

The School of Public and Environmental Affairs offers the Washington Leadership Program each fall and spring semester in Washington, D.C. This program consists of two senior-level seminars (each worth 3 credit hours) and an internship (worth 5 or 6 credit hours). Students complete internships by working four days per week in an assigned congressional office, public interest group, federal agency, or nonprofit organization.

Students reside and attend classes in nearby Falls Church, Virginia. Tuition is based on the regular fees for Indiana University, plus any special program charges. Students in the program remain eligible for any scholarships or financial aid they would normally receive as Indiana University students. Interested students should contact the SPEA undergraduate advisor or program director.

Indiana Leadership Seminar

The Indiana Leadership Seminar offers honors students a chance to participate in a year-long course consisting of projects and specialized experiences with a local government or agency. The focus is to develop professional skills and provide networking opportunities for future career connections as students apply classroom theory to real-world activities. The Indiana Leadership Seminar has a strong tradition of helping students become superior candidates for both public and private sector jobs.

Minors and Certificates

Minors

Any Indiana University student enrolled in a baccalaureate program may pursue one or more of the minors offered by the School of Public and Environmental Affairs. Individuals interested in one or more of these minors should inquire in the SPEA undergraduate advising office for additional details. Students who successfully complete the requirements will have the minor conferred with their degree. SPEA's multidisciplinary faculty and curricula address environmental, public policy, and management issues from a variety of perspectives. A minor in SPEA can enhance career opportunities for liberal arts and other majors.

- Civic Leadership
- Criminal Justice and Criminal Justice Accounting
- Human Resources Management
- Management
- Policy Studies
- Public Safety Management
- Public and Nonprofit Financial Management

Certificates

General Requirements

1. Students must be in good academic standing and enrolled in a baccalaureate program to be eligible to apply for most of these certificates. Interested students must apply for a certificate before completing 15 credit hours of applicable course work.
2. SPEA students cannot earn a certificate in the same area as their major concentration.
3. A grade point average of 2.0 or higher is required in all course work credited toward the certificate.
4. Students earning a SPEA certificate and SPEA major may double-count two courses across any allowable combination of these programs.

- Public Affairs
- Nonprofit Management
- Public Management

Certificate in Public Affairs

The School of Public and Environmental Affairs offers the Certificate in Public Affairs to provide an organized approach to the study of public policy, governmental organization and public management for undergraduates in addition to the major area of their undergraduate program.

Eligibility and Application Procedure

1. Students enrolled in baccalaureate programs from nearly any department or school of Indiana University and other accredited colleges or universities who are in good academic standing are eligible
2. SPEA students cannot get an area certificate in the same area as their concentration
3. Students must declare their intent to earn this certificate prior to completing fifteen (15) semester hours creditable toward the certificate. Applications for admission may be obtained through the SPEA Student Services office, BS 3027.
4. Upon certification that the student has been awarded a baccalaureate degree and completion of all certificate requirements, the student will be awarded the certificate.

General Requirements

1. A minimum of 27 credit hours of which at least 15, but not more than 21 credit hours, must have been in SPEA courses.
2. A minimum cumulative grade point average of 2.3.
3. A maximum of six (6) hours of appropriate credit from another institution may be applied toward this Certificate.
4. Credit work for this certificate may be taken at any campus of the Indiana University system.

Certificate Requirements (nine courses):

The following courses:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)
- SPEA-V 378 Policy Process in the United States (3 cr.)

ONE of the following courses:

- SPEA-E 162 Environment and People (3 cr.)
- SPEA-H 316 Environemental Sciece and Health (3 cr.)

A total of TWO courses from groups A, B, and C, with no more than one course from any group.

A. Organizational Behavior

- BUS-Z 302 Managing and Behavior in Organizations (3 cr.)

B. Public Administration

- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)

C. Law

- SPEA-J 301 Substantive Criminal Law (3 cr.)
- SPEA-V 376 Law and Public Policy (3 cr.)
- BUS-L 201 Legal Environment of Business (3 cr.)
- POLS-Y 304 American Constitutional Law I (3 cr.)
- POLS-Y 305 American Constitutional Law II (3 cr.)

Choose any **four** of the following courses:

- SPEA-J 101 The American Criminal Justice System (3 cr.)
- SPEA-J 272 Terrorism and Public Policy (3 cr.)
- SPEA-J 302 Procedural Criminal Law (3 cr.)
- SPEA-J 322 Introduction to Criminalistics (3 cr.)
- SPEA-V 260 Topics in Public Affairs (approved topics) (3 cr.) (may be repeated)
- SPEA-V 346 Introduction to Government Accounting and Financial Reporting (3 cr.)
- SPEA-V 348 Management Science (3 cr.)
- SPEA-V 361 Financial Management (3 cr.)
- SPEA-V 372 Government Finance and Budgets (3 cr.)
- SPEA-V 373 Human Resources Management in the Public Sector (3 cr.)
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)
- SPEA-V 450 Contemporary Issues in Public Affairs (approved topics) (3 cr.) (may be repeated)
- SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)
- POLS-Y 306 State Politics in the United States (3 cr.)

Certificate in Nonprofit Management

Eligibility and Application Procedure

1. Students enrolled in baccalaureate programs from nearly any department or school of Indiana University and other accredited colleges or universities who are in good academic standing are eligible.
2. SPEA students cannot get an area certificate in the same area as their concentration.
3. Students must declare their intent to earn this certificate prior to completing fifteen semester hours creditable toward the certificate. Applications for admission may be obtained through the SPEA Student Services office, BS 3027.
4. Upon certification that the student has been awarded a baccalaureate degree and completion of all Certificate requirements, the student will be awarded the certificate.

General Requirements

1. A minimum cumulative grade point average of 2.3.
2. A maximum of six (6) hours of appropriate credit from another institution may be applied toward this certificate.
3. Credit work for this certificate may be taken at any campus of the Indiana University system.

Courses must be selected from the following categories. Alternate courses may be substituted with the approval of the campus undergraduate program director. Courses listed with an asterik are included in the American Humanics program. Complete of the American Humanics program at IUB or IUPUI qualifies a student for the IU Nonprofit Management Certificate.

Nonprofit Institutions (minimum of 3 credit hours)

- *SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.)

Nonprofit Management (minimum of 6 credit hours)

- *SPEA-V 362 Nonprofit Management and Leadership (3 cr.) **AND**

Choose **one** of the following courses:

- *SPEA-V 356 Introduction to Nonprofit Accounting and Reporting (3 cr.)
- *SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)
- *BUS-A 200 Foundations in Accounting (3 cr.)

Nonprofit Field (minimum of 3 credit hours)

Select **one** of the following courses:

- POLS-Y 326 American Social Welfare Policy (3 cr.) (offered on the Bloomington campus)
- *PSY-B 310 Life Span Development (3 cr.)
- *SOC-R 335 Sociological Perspectives on the Life Course (3 cr.)

Internship (minimum of 3 credit hours)

- SPEA-V 380 Internship with Nonprofit Organization (3 cr.) **OR**
  SPEA-V 388 American Humanics Internship (3 cr.)

Certificate in Public Management

The School of Public and Environmental Affairs offers the Certificate in Public Management to provide a systematic program that gives students an understanding of how to work in and with public organizations.

Eligibility and Application Procedure

1. Students enrolled in baccalaureate programs from nearly any department or school of Indiana University and other accredited colleges or

universities who are in good academic standing are eligible.
2. SPEA students cannot get an area certificate in the same area as their concentration.
3. Students must declare their intent to earn this certificate prior to completing fifteen (15) semester hours creditable toward the certificate. Applications for admission may be obtained through the SPEA Student Services office, BS 3027.
4. Upon certification that the student has been awarded a baccalaureate degree and completion of all certificate requirements, the student will be awarded the certificate.

General Requirements

1. A minimum of 21 credit hours.
2. A minimum cumulative grade point average of 2.3.
3. A maximum of six (6) hours of appropriate credit from another institution may be applied toward this Certificate.

Certificate Requirements (7 courses minimum):

Complete the following course:

- SPEA-V 263 Public Management (3 cr.)

Choose **SIX** of the following courses:

- SPEA-V 346 Introduction to Government Accounting and Financial Reporting (3 cr.)
- SPEA-V 348 Management Science (3 cr.)
- SPEA-V 361 Financial Management (3 cr.)
- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)
- SPEA-V 369 Managing Information Technology (3 cr.)
- SPEA-V 370 Research Methods and Statistical Modeling (3 cr.)
- SPEA-V 372 Government Finance and Budgets (3 cr.)
- SPEA-V 373 Human Resources Management in the Public Sector (3 cr.)
- SPEA-V 375 Emergency Services Administration (3 cr.)
- SPEA-V 376 Law and Public Policy in Nonprofit Management (3 cr.)
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)
- SPEA-V 438 Mass Media and Public Affairs (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)
- SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)

Minor in Civic Leadership

Any Indiana University students enrolled in a baccalaureate program, except those pursuing a Bachelor of Science in Public Affairs with a concentration in Civic Leadership, may pursue the minor in Civic Leadership. Students who successfully complete the requirements will have the minor conferred with their degree.

Students must declare their intentions to receive a minor by completing an application, which is available in SPEA Student Services, BS 3027. A minimum GPA of 2.3 is required in courses taken specifically for the minor. At least 9 of the 15 credit hours must be taken on the IUPUI campus.

SPEA Students earning a SPEA minor may double count two minor courses.

Curriculum (5 courses/15 credit hours)

Complete the following courses 6 credit hours):

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- SPEA-V 412 Leadership and Ethics (3 cr.)

Select **one** of the following (3 credit hours):

- SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.) **OR**
- POLS-Y 378 Civil Society and Public Policy (3 cr.)

Select **two** of the following courses (6 credit hours):

- SPEA-V 263 Public Management (3 cr.) **OR**
- SPEA-V 362 Nonprofit Management and Leadership (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)
- SPEA-V 376 Law and Public Policy (3 cr.)
- SPEA-V 382 Political Action and Civic Engagement (3 cr.)
- SPEA-V 408 Individual Rights, Common Goods, and Public Policies (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)
- SPEA-V 436 Communication for Government and Nonprofit Organizations (3 cr.)
- SPEA-V 438 Mass Media and Public Affairs (3 cr.)
- SPEA-V 450 Contemporary Issues in Public Affairs (3 cr.) - **as approved**
- SPEA-V 458 Fund Development for Nonprofit Organizations

Minor in Criminal Justice and Criminal Justice Accounting

Criminal Justice Minor

Criminal Justice Accounting Minor

Criminal Justice Minor

Any Indiana University students enrolled in a baccalaureate program, except those pursing a major in criminal justice, may pursue the minor in criminal justice. Students who successfully complete the requirements will have the minor conferred with their degree.

Students must declare their intentions to receive a minor by completing an application, which is available in SPEA Student Services, BS 3027. A minimum GPA of 2.3 is required in courses taken specifically for the minor. At least 9 of the 18 credit hours must be taken on the IUPUI campus.

Curriculum (6 courses/18 credit hours)

Required Courses (2 courses/6 credit hours)

- SPEA-J 101 The American Criminal Justice System (3 cr.)
- SPEA-J 201 Theoretical Foundations of Criminal Justice Policies (3 cr.)

Criminal Justice Core Courses (2 courses/6 credit hours)

Choose **two** courses from the following:

- SPEA-J 202 Criminal Justice Data, Methods, and Resources (3 cr.)
- SPEA-J 301 Substantive Criminal Law (3 cr.)
- SPEA-J 305 Juvenile Justice (3 cr.)
- SPEA-J 306 The Criminal Courts (3 cr.)
- SPEA-J 321 American Policing (3 cr.)
- SPEA-J 331 Corrections (3 cr.)
- SPEA-J 439 Crime and Public Policy (3 cr.)

Electives Courses (2 courses/6 credit hours minimum)

Take two other criminal justice courses ("J" prefix). These may be drawn from the courses in the above list NOT used to fulfill that requirement. At least one of these two courses must be at the 300 or 400 level. Only one of the following courses may be used to meet this requirement: J370, J380, J470, or J480.

NOTE: At least 9 of the 18 credit hours must be taken on the IUPUI campus.

Criminal Justice Accounting Minor

Any Indiana University students enrolled in a Kelley School of Business baccalaureate program pursuing the accounting major may pursue the minor in criminal justice accounting. Students who successfully complete the requirements will have the minor conferred with their degree.

Students must declare their intention to receive a minor by completing an **application** which will be available in **SPEA Student Services, BS 3027.** This application should be completed at the same time the student completes an application for graduation for the baccalaureate degree.

A cumulative grade point average of 2.0 or above is required, in all course work, credited toward the minor.

Curriculum (5 courses/15 credits)

- SPEA J101 - The American Criminal Justice System (3 cr.)
- SPEA J301 - Substantive Criminal Law (3 cr.)
- SPEA J303 - Evidence (3 cr.)
- SPEA J320 - Criminal Investigation (3 cr.)
- SPEA J322 or FIS 20500 - Introduction to Criminalistics or Introduction to Forensic Science (3 cr.)

Minor in Human Resources Management

Any Indiana University students enrolled in a baccalaureate program may pursue the minor in Human Resources Management. Students who successfully complete the requirements will have the minor conferred with their degree.

Students who are pursing the BSPA Management major should consult with their academic advisor to ensure they are following the Bulletin policy on double counting courses.

Students must declare their intentions to receive a minor by completing an application, which is available in SPEA Student Services, BS 3027. A minimum GPA of 2.3 is required in courses taken specifically for the minor. At least 9 of the 15 credit hours must be taken on the IUPUI campus.

SPEA Students earning a SPEA minor may double count two minor courses.

Curriculum (5 courses/15 credit hours)

Complete the following two courses:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- SPEA-V 373 Human Resources Management in the Public Sector (3 cr.)

Choose **three** of the following courses:

- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)
- SPEA-V 436 Communication for Government and Nonprofit Organizations (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)
- SPEA-V 450 Contemporary Issues in Public Affairs (3 cr.) - **Approved Topics ONLY**

Minor in Management

Any Indiana University students enrolled in a baccalaureate program, except those pursuing a Bachelor of Science in Public Affairs with a concentration in Management, may pursue the Management Minor. Students who successfully complete the requirements will have the minor conferred with their degree.

Students must declare their intentions to receive a minor by completing an application, which is available in SPEA Student Services, BS 3027. A minimum GPA of 2.3 is required in courses taken specifically for the minor. At least 9 of the 15 credit hours must be taken on the IUPUI campus.

SPEA Students earning a SPEA minor may double count two minor course.

Curriculum (5 courses/15 credit hours)

Complete the following course:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)

Select **one** of the following:

- SPEA-V 263 Public Management (3 cr.)
- SPEA-V 362 Nonprofit Management and Leadership (3 cr.)

Select **one** of the following:

- SPEA-V 361 Financial Management (3 cr.)

- SPEA-V 373 Human Resources Management in the Public Sector (3 cr.)

Select **two** of the following:

- SPEA-V 346 Introduction to Government Accounting and Financial Reporting (3 cr.) **OR** SPEA-V 356 Introduction to Nonprofit Accounting and Reporting (3 cr.)
- SPEA-V 348 Management Science (3 cr.)
- SPEA-V 361 Financial Management (3 cr.) *If not taken to satisfy the requirement above.*
- SPEA-V 366 Managing Behavior in Public Organizations (3 cr.)
- SPEA-V 369 Managing Information Technology (3 cr.)
- SPEA-V 372 Government Finance and Budgets (3 cr.)
- SPEA-V 373 Human Resources Management in the Public Sector (3 cr.) *If not taken to satisfy the requirement above.*
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)
- SPEA-V 412 Leadership and Ethics (3 cr.)
- SPEA-V 435 Negotiation and Alternative Dispute Resolution (3 cr.)
- SPEA-V 436 Communication for Government and Nonprofit Organizations (3 cr.)
- SPEA-V 443 Managing Workforce Diversity (3 cr.)
- SPEA-V 450 Contemporary Issues in Public Affairs (3 cr.) - **as approved**
- SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.)

Minor in Policy Studies

Any Indiana University students enrolled in a baccalaureate program, except those pursuing a Bachelor of Science in Public Affairs with a concentration in Policy Studies, may pursue the Policy Studies minor. Students who successfully complete the requirements will have the minor conferred with their degree.

Students must declare their intentions to receive a minor by completing an application, which is available in SPEA Student Services, BS 3027. A minimum GPA of 2.3 is required in courses taken specifically for the minor. At least 9 of the 15 credit hours must be taken on the IUPUI campus.

SPEA Students earning a SPEA minor may double count two minor courses.

Curriculum (5 courses/15 credit hours)

Complete the following courses:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- SPEA-V 376 Law and Public Policy (3 cr.)

Choose **one** of the following courses:

- SPEA-V 348 Management Science (3 cr.)
- SPEA-V 379 Performancement Measurement and Program Evaluation (3 cr.)

Select **two** of the following courses:

- SPEA-J 272 Terrorism and Public Policy (3 cr.)
- SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 263 Public Management (3 cr.) **or** SPEA-V 362 Nonprofit Management and Leadership (3 cr.)
- SPEA-V 264 Urban Structure and Policy (3 cr.)
- SPEA-V 348 Management Science (3 cr.) *If not taken to satisfy the requirement above.*
- SPEA-V 369 Managing Information Technology (3 cr.)
- SPEA-V 372 Government Finance and Budgets (3 cr.)
- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.) *If not taken to satisfy the requirement above.*
- SPEA-V 450 Contemporary Issues in Public Affairs (3 cr.) - **as approved**
- POLS-Y 213 Introduction to Public Policy (3 cr.)

Minor in Public Safety Management

Any Indiana University students enrolled in a baccalaureate program, except those pursing a major in public safety management, may pursue the minor in public safety management. Students who successfully complete the requirements will have the minor conferred with their degree.

Students must declare their intentions to receive a minor by completing an application, which is available in SPEA Student Services, BS 3027. A minimum GPA of 2.3 is required in courses taken specifically for the minor. At least 9 of the 15 credit hours must be taken on the IUPUI campus.

SPEA Students earning a SPEA minor may double count two courses between their major and minor courses.

Curriculum (5 courses/15 credit hours)

Complete the following courses:

- SPEA-J 150 Public Safety in America (3 cr.)
- SPEA-J 272 Terrorism and Public Policy (3 cr.)
- SPEA-J 375 Emergency Services Administration (3 cr.)
- SPEA-J 376 Principles of Public Safety (3 cr.)
- SPEA-J 387 Foundations of Homeland Security (3 cr.)

Minor in Public and Nonprofit Financial Management

Any Indiana University students enrolled in a baccalaureate program may pursue the Public and Nonprofit Financial Management minor. Students who successfully complete the requirements will have the minor conferred with their degree.

Students who are pursing the BSPA Management major should consult with their academic advisor to ensure they are following the Bulletin policy on double counting courses.

Students must declare their intentions to receive a minor by completing an application, which is available in SPEA Student Services, BS 3027. A minimum GPA of 2.3 is required in courses taken specifically for the minor. At least 9 of the 15 credit hours must be taken on the IUPUI campus.

SPEA Students earning a SPEA minor may double count two minor courses.

Curriculum (5 courses/15 credit hours)

Complete the following courses:

- SPEA-V 170 Introduction to Public Affairs (3 cr.)
- SPEA-V 346 Introduction to Government Accounting and Financial Reporting (3 cr.)
- SPEA-V 361 Financial Management (3 cr.)
- SPEA-V 372 Government Finance and Budgets (3 cr.)

Choose **one** of the following courses:

- SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.)
- SPEA-V 458 Fund Development for Nonprofits (3 cr.)

Student Learning Outcomes

Criminal Justice

- Bachelor of Science in Criminal Justice
  - Criminal Justice Major
  - Public Safety Management Major

Public Affairs

- Bachelor of Science in Public Affairs
  - Civic Leadership Major
  - Management Major
  - Policy Studies Major

Certificates

- Nonprofit Management
- Public Affairs
- Public Management

Bachelor of Science in Public Affairs (BSPA)

Graduates of the Bachelor of Science in Public Affairs program should have the intellectual depth, breadth, and mental agility of learning to anticipate, recognize, evaluate, and solve problems in public affairs using knowledge, skills, and tools appropriate to entry-level management, civic leadership, and policy studies positions. A student who is awarded the Bachelor of Science in Public Affairs will be able to:

- Communicate effectively important information and ideas in public affairs (especially within their major), both with individuals and in group settings, and using oral, written, visual, and electronic modes.
- Recognize, characterize and analyze issues and problems in public affairs using appropriate technology to collect, collate and assess data through statistics and other quantitative tools.
- Apply knowledge and theory of the public, nonprofit and private sectors (e.g., microeconomics) to analyze, evaluate and contribute to the development of solutions for public affairs issues and problems.
- Recognize and incorporate concerns, theories, concepts and other information rooted in the broader concepts of globalization, civic engagement, sustainability, and management in working with public affairs issues and problems.
- Work effectively in a team.
- Recognize and demonstrate sensitivity to diverse points of view.
- Develop an awareness of one's personal responsibility and service to the public, and to seek principled solutions to problems in public affairs.

Students will be able to demonstrate additional learning specific to their major.

Civic Leadership Major

The civic leadership major is intended to impart knowledge and skills needed to catalyze community actions. Students electing a civic leadership major will analyze the elements necessary to successful community solutions, and will learn to solve public problems in the context of shared power and authority. Students in civic leadership will be able to:

- Understand and communicate the nature of civil society.
- Understand and apply theoretical and applied concepts of the political process to civic engagement.
- Understand and apply the theoretical and practical foundations of leadership.
- Engage in negotiations and conflict resolution.

Management Major

The management major is concerned with the functioning of organizations, whether public, private or nonprofit. Students electing the management major will study resource allocation, organizational design, accountability, and other generally applicable principles involved in all organizational structures, with an emphasis on issues specific to public and nonprofit organizations. Students in management will be able to:

- Understand and participate in the management of public and nonprofit organizations.
- Understand the principles of finance and budgeting in the public sector, and be able to undertake basic finance and budgeting activities in that context.
- Understand the principles of finance and budgeting in the nonprofit sector, and be able to undertake basic finance and budgeting activities in that context.
- Understand the principles of human resource management, and be able to apply them in the context of a public or nonprofit organization.
- Manage diversity in a changing workforce.
- Understand the decision-making in public and nonprofit organizations, and be able to contribute to that process in those organizations.

Policy Studies Major

The policy studies major is concerned with the exercise of power and the nature and wisdom of the rules that constrain the use of power. In contrast to the management student, whose focus in on the organization, and the civic leadership student, whose focus is on the community and community networks, the policy studies student will primarily be concerned with the rules we establish to govern our communal endeavors. Students in policy studies will be able to:

- Understand, explain and apply common models of the policy process to problems in public affairs.

- Understand the options for public input into public decision-making and policy implementation.
- Read, understand and evaluate program evaluations and policy analyses reported by others, and communicate those digested findings clearly and concisely.
- Understand and apply basic methods of program evaluation using common quantitative, qualitative and mixed tools.
- Understand and apply basic methods of public policy analysis using common quantitative, qualitative and mixed tools.
- Understand a policy area in depth.

Bachelor of Science in Criminal Justice (BSCJ)

Graduates of the Bachelor of Science in Criminal Justice program should have the intellectual depth, breadth, and adaptiveness of learning to anticipate, recognize, evaluate, and solve problems in criminal justice or public safety using knowledge, skills, and tools appropriate to entry-level criminal justice and public safety positions. Bachelor of Science in Criminal Justice graduates will be able to:

- Communicate effectively important information and ideas in criminal justice or public safety management (especially within their major), both with individuals and in group settings, and using oral, written, visual, and electronic modes.
- Recognize, characterize and analyze issues and problems in criminal justice or public safety using appropriate technology to collect, collate and assess data through statistics and other quantitative tools.
- Apply extant criminal justice or public safety management knowledge and theory to analyze, evaluate and contribute to the development of solutions for criminal justice or public safety management issues and problems.
- Recognize and demonstrate sensitivity to diverse points of view.

Students will be able to demonstrate additional learning specific to their major.

Criminal Justice Major

The criminal justice major is concerned with the functioning of the major elements of the criminal justice system, policing, courts and corrections, including both public and non-governmental agencies. Students learn what crime is, why and how often it occurs, how we attempt to prevent it, and how we punish those who commit crimes. Criminal justice graduates will be able to:

- Define crime, legally and socially, discuss how it is measured, and current trends in crime.
- Describe major theories of crime and discuss corresponding public policies to reduce crime.
- Discuss the constitutional foundations of the criminal justice system, especially the tension between individual rights and public order.
- Discuss the history and evolution of policing, the role of discretion, the nature and effectiveness of police activities, and issues of police misconduct.
- Describe the structure, process, and actors in the court system, as well as current issues in processing criminal cases.
- Describe the major philosophies of punishment, the history and evolution of corrections systems, and the current issues in corrections.
- Describe current crime control strategies, and discuss the strengths and limitations of various approaches.
- Read criminal justice research and communicate findings clearly, and apply basic research methods to criminal justice research questions.

Public Safety Management Major

The public safety management major is intended to prepare students to work in agencies that ensure public safety, such as fire departments, emergency management and homeland security agencies. Public safety management graduates will be able to:

- Define public safety, and discuss the major components of the public safety system and how they operate.
- Define and describe homeland security, how federal state and local agencies work to maintain homeland security, and how it relates to public safety, in theory and in practice.
- Discuss the constitutional foundations of public safety, especially the tension between individual rights and public order.
- Discuss the history and evolution of terrorism, the motivations that lead to terrorism, and the nature and effectiveness of responses to terrorism.
- Describe emergency service agencies, and current issues and trends in emergency service in the United States and around the world.
- Discuss technology and how it relates to maintaining public safety, particularly the use of geographic information systems.
- Describe current public safety strategies, and discuss the strengths and limitations of various approaches.
- Read public safety research, communicate findings clearly, and apply basic research methods to criminal justice research questions.
- Articulate methods of recognizing and resolving crisis situations, including crisis planning, crisis management and ethical decision making processes and practices.
- Describe the dynamics and processes (individual, group, institutional bureaucratic and psychological) that can impact decision making during crises, and articulate methods of learning from past approaches/ experience to build future strategies for managing disasters or crises.

Undergraduate Certificates

Nonprofit Management Certificate

Upon completion of this certificate program, students should:

- Demonstrate their grasp of the distinctive attributes of the three sectors: private, nonprofit and public.

- Be able to describe the mechanisms through which nonprofit organizations interact with and influence the public and private sectors.

Public Affairs Certificate
Upon completion of this certificate program, students should:

- Demonstrate an understanding of the legal and political context within which American policy formation occurs.
- Demonstrate understanding of the policy process, including the interplay between constitutional norms and majority opinion.

Public Management Certificate
Upon completion of this certificate program, students should:

- Demonstrate understanding of the differences between the public, private and nonprofit sectors, and be able to identify the responsibilities unique to the public sector.
- Be able to identify the basic principles of management that are applicable to the public sector.

Information....

Admissions

For most programs, applicants with bachelor's degrees in any field from an accredited institution are eligible to apply for admission to the graduate programs of the School of Public and Environmental Affairs.

Application Submission

Applicants should apply to a degree or certificate program and request financial assistance as early as possible before the desired semester of enrollment.

All application forms must be completed and received by the SPEA Graduate Admissions Office at IUPUI **before May 15** to attend the fall semester, **before September 15** to attend the spring semester, and **by March 15** to attend the summer sessions. SPEA accepts late applications.

International application deadlines for the Master of Public Affairs are **February 1** to attend the fall semester and **September 15** to attend the spring semester.

To receive **priority attention** for **financial aid** for the fall semester, send all Free Application for Federal Student Aid (FASFA) and renewal forms to the Office of Student Financial Aid Services by **February 1**.

Graduate Assistantship

SPEA application priority date is **February 1**.

Admission

Each application for admission is carefully evaluated by the admissions committee for the appropriate degree. Applicants to all SPEA degree programs must do the following:

- Submit applications to the graduate program office.
- Pay a nonrefundable application fee to Indiana University.
- Read carefully the applicable sections in this bulletin for any specific program or campus admission requirements.
- Submit proof of bachelor's degree certification from an accredited institution. Students who have not completed undergraduate course work at the time of application may be admitted based on the strength of previous work, but a final transcript attesting to the award of a bachelor's degree must be submitted before the student can enroll.
- When applying to degree programs, Master of Public Affairs (M.P.A.) required documentation includes:
  - Online application, all sections completed.
  - Official transcripts from all colleges and universities attended. Students who have taken course work on any Indiana University campus do not need to submit an Indiana University transcript.
  - Three Application Reference Forms completed by faculty and professionals familiar with applicant's activities and potential to succeed in graduate work. References are required for the M.P.A. programs.
  - Official test scores for the GRE, GMAT or LSAT.
  - Resumes are required for all programs.
  - Complete personal statement and departmental question sections on application.
  - Supplemental questions in the application under departmental questions section.
- When applying to certificate programs the following documentation is required:
  - Online application (GRE scores and references are not required).
  - Official transcripts from all colleges and universities attended. Students who have taken course work on any Indiana University campus do not need to submit an Indiana University transcript.
  - Complete personal statement and departmental question sections on application.
  - Supplemental questions in the application under departmental questions section.
  - Resumes are required for all certificate programs.
- International Students must apply to SPEA using the online application, completing the international section, and paying the nonrefundable international application fee (subject to change). SPEA will accept the same paper application that you have submitted to the Office of International Affairs (OIA), along with additional required SPEA documents, but the online application is preferable. You are required to provide TOEFL scores. International application priority deadlines: for fall semester apply by February 1; for spring semester apply by September 15. Visit the SPEA Web site or the OIA Web site for more information.

GRE and LSAT Requirements

Applicants may submit LSAT (Law School Admission Test) scores in lieu of GRE (Graduate Record

Examination) scores. Applicants must mail a copy of their LSAT score report to SPEA Graduate Admissions.

Information concerning the GRE is available from Graduate Record Examination, Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541, (609) 771-7670 or (866) 473-4373.

Information concerning the LSAT is available from Law School Admission Services, P.O. Box 2000, Newtown, PA 18940, (215) 968-1001.

Master of Public Affairs

Applications for SPEA's graduate programs are processed on a year-round basis for admission in any academic semester. Each application to SPEA's graduate programs is carefully evaluated by the admissions committee for the appropriate degree. Admission to SPEA's graduate programs is competitive. Each program has its own admissions criteria and meeting these criteria does not guarantee admission to that program.

Admission Deadlines

Fall: May 15
Spring: September 15
Summer: March 15

SPEA accepts late applications.

IUPUI Graduate Fellowships: January 15*
Graduate Assistantships: February 1*

*SPEA degree program application must be submitted and an admission decision made to be eligible for the upcoming fall/spring term assistantships and fellowships.

Admission Requirements

Minimum preferred requirements for admission include:

1. A baccalaureate degree from an accredited college or university with a grade point average of B (3.0) or higher
1. Apply online
1. All transcripts for work that was done outside of the Indiana University system*
1. A resume*
1. A personal statement*
1. Three (3) letters of recommendation*
1. Official test scores for the GRE, GMAT or LSAT. We recommend the following scores
    1. A combined score of 300 or more (verbal and quantitative) on the Graduate Record Examination (GRE) or
    1. A total score of 500 or higher on the GMAT or
    1. A total score of 150 or higher on the LSAT.

SPEA considers results from the GRE, GMAT or LSAT, but the GRE (http://www.ets.org/gre) is the most common among our applicants. Preparing to take the test and getting official test scores can be a lengthy process, so plan accordingly.

You can request a waiver of the GRE/GMAT/LSAT if you have already earned a Master's degree from an accredited college or university in the United States or if you have completed a SPEA graduate certificate with a 3.5 GPA or higher. To discuss options regarding the standardized test requirement, contact Luke Bickel, 317-278-0308 or lbickel@iupui.edu.

Although not required for admission, students applying for the MPA are strongly encouraged to complete MATH-M 110 or higher (algebra), ECON-E 201 (microeconomics) and SPEA-K 300 (statistics).

*These documents will be kept on file until we receive your online application. Send them to:

Awards & Scholarships

SPEA offers many scholarships to SPEA graduate students.

SPEA Alumni Association Scholarships
The School of Public and Environmental Affairs is proud to sponsor $1,000 scholarships for current SPEA students. The scholarships will be awarded to undergraduate and graduate students, from any IU campus, who meet the qualifications. Applications are due January 27. For more information, contact Jenna Morrison Civitello at 812-856-0597 or jm98@indiana.edu.

Lawrence M. Borst Fellowship
This unique fellowship provides financial support for a talented SPEA graduate student to gain experience with the Indiana Senate, specifically in finance and budgetary analysis and programs. This one-year experience requires a commitment of 20 hours per week during the fall semester, with the student typically enrolled as a full-time graduate student. The approximate award for the fall semester is $5,000. The spring semester requires a full-time commitment, so the student may register in a practicum course but take no other classes. During the spring semester, the Borst Intern will be paid at the rate earned by other interns, approximately $350 per week. Deadline is March 1. For more information, contact Kathy Hursh at 317-278-3651 or hurshk@iupui.edu.
Download the application

Johnson Community Service Fellowship Approximately $8,000 awarded to a first- or second-year graduate student in SPEA. Any previous graduate GPA must be a 3.0 or above. Students must demonstrate their record of community service and complete an internship (approved by a SPEA faculty member) with a community nonprofit organization or governmental agency. The deadline is April 1. For more information, contact Luke Bickel at 317-278-0308 or lbickel@iupui.edu.
Download the application

C. Michael Pitts Scholarship This award was established in memory of C. Michael Pitts, who served as an associate professor for SPEA in labor relations and mediation for many years before his death in 2002. It awards two scholarships of $1,000 each to a first- or second-year graduate student in SPEA. It is for IUPUI SPEA students seeking an MPA and who have an interest in pursuing a career in public service or the nonprofit sector. Applicants must have a 3.0 grade point average, be a resident of the state of Indiana and demonstrate financial need. Deadline is April 1. For more information, contact Luke Bickel 317-278-0308 or lbickel@iupui.edu.
Download the application

Tom and Pat DeCoster Scholarship An award of $2,000 to support a first- or second-year graduate student in SPEA for one year. To be eligible, a student must be a single parent, attend full-time or part-time and have a cumulative GPA of 3.0. Recipient(s) will be chosen by members of the SPEA Scholarship Committee based on academic achievement and quality of the application. The deadline is April 1. For more information, contact Luke Bickel at 317-278-0308 or lbickel@iupui.edu.
Download the application

Robert E. Martin Scholarship Two $1,350 scholarships will be awarded to a first- or second-year graduate student in SPEA. This award is for an IUPUI SPEA student seeking an MPA who has an interest in public management and/or financial management. Applicants must have a 3.0 grade point average, be a resident of the state of Indiana and demonstrate financial need. Deadline is April 1. For more information, contact Luke Bickel at 317-278-0308 or lbickel@iupui.edu.
Download the application

Lindsey Scholarship for Civic Engagement A $2,500 scholarship will be awarded to a student majoring in one of SPEA's academic programs (graduate or undergraduate), with preference given to students who focus on environmental issues. Essay and transcript must be submitted with application to SPEA Student Services. Deadline is April 1.
Download the application

Carl and Lisa Schodel Scholarship Two $2,500 scholarships will be awarded to an MPA student in good academic standing. Essay must be submitted with application to SPEA Student Services. Deadline is April 1.
Download the application

SPEA International Experience Scholar Application
This scholarship supports graduate students who are participating in an overseas study opportunity. Award amounts range from $500 to $2000 per year, per scholarship. Essay must be submitted with application to SPEA Student Services. Deadline is April 1.
Download the application

SPEA Overseas Education Scholarship SPEA students who study abroad may be eligible for scholarships of $1,000 to $2,000. For more information, contact Casey Windhorst, cwindhor@iupui.edu or 317-274-4656.

Graduate Student Assistantships SPEA IUPUI offers graduate assistantships and University Fellowships through a competitive application process. The graduate assistants work 20 hours per week during the academic year. These are research assistantships and not teaching assistantships. In exchange for the 20 hours per week, GAs receive full tuition, most fees, student health insurance and a stipend of $9,000 that is paid out monthly over the academic year. Graduate Assistantships are awarded in March for students who will attend full time. Applications are accepted year-round, but priority deadline is February 1. For more information, contact Luke Bickel at 317-278-0308 or lbickel@iupui.edu.

Nonprofit Management

The Certificate in Nonprofit Management is a 15 credit-hour program of study. The certificate is designed to serve the needs of individuals who would like exposure to nonprofit sector and nonprofit management issues but who do not wish or need to pursue a degree in nonprofit management. The certificate complements other courses of study or career experience in such areas as social work, library science, and parks and recreation. Students pursuing a nonprofit management certificate gain and understanding of how to work in and with nonprofit organizations.

Eligibility and Application Procedure

1. Any holder of a baccalaureate of higher degree from an accredited college or university is eligible for admission
2. An online application and information may be obtained from the www.spea.iupui.edu. Students should apply to the SPEA admissions online only. Application deadlines for the certificate programs are before May 15 for the fall semester, before September 15 for the spring semester, and before March 15 for summer sessions. Students must pay a nonrefundable application fee.
3. Admission requires only the approval of the respective graduate program director or SPEA campus director.

Program Restrictions

1. Students enrolled in a certificate program must complete it within 15 credit hours of approved SPEA course work with a minimum cumulative GPA of 3.0(B). Failure to do so results in automatic dismissal from the certificate program.
2. Students who have completed more than three SPEA Graduate courses are not eligible for admission to certificate program.
3. Transfer credit, course substitutions, or course waivers are not allowed.
4. Students admitted to a SPEA graduate degree program are not eligible for admission to the certificate program or eligible to be awarded the certificate.
5. Admission to or successful completion of the Nonprofit Management Certificate program does not guarantee subsequent admission to the M.P.A. program or other graduate programs in the School of Public and Environmental Affair.
6. Students enrolled in the certificate program who apply to SPEA's graduate programs must meet all existing admission requirements. If a student has a cumulative GPA of 3.5 or better at the completion of the certificate, the student can request a waiver of the GRE requirement if applying to the MPA program.

Certificate Requirements (15 credit hours)

Required Courses (9 credit hours)

EACH of the following courses:

- SPEA-V 522 Human Resource Management in Nonprofit Organizations (3 cr.)
- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)
- SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)

Electives (6 credit hours)

TWO additional SPEA graduate public affairs courses that cannot include independent research studies, readings, or internship classes.

Students interested in continuing for the Master of Public Affairs (M.P.A.) should consider selecting from the nonprofit management concentration, particularly V521 Nonprofit and Voluntary Sector.

For degree requirements prior to May 2003, please contact SPEA Student Services at 317-274- 4656.

Nonprofit Management (Online)

The Certificate in Nonprofit Management program is a 15-credit-hour program of study in nonprofit management. The certificate program is flexible enough to be adapted to the needs of pre-career and in-service individuals. Graduate students in other disciplines can use the program to supplement their primary fields with course work in nonprofit management, possibly using the certificate courses as part or all of a doctoral or master's degree minor.

Admission Eligibility

The student must have a bachelor's degree from an accredited college or university to apply.

Application

An online application and information may be obtained from the Web site; materials are also available from the Graduate Program Office. Students should apply to the SPEA admissions office on the IUPUI campus. Application deadlines for the certificate programs are May 15 for the fall semester, September 15 for the spring semester, and March 15 for summer sessions. Students must pay a nonrefundable application fee.

Program Restrictions

1. Students enrolled in a certificate program must complete it within 15 credit hours of approved SPEA course work with minimum cumulative GPA of 3.0 (B). Failure to do so results in automatic dismissal from the certificate program.
2. Students who have completed more than three SPEA graduate courses are not eligible for admission to a certificate program.
3. Transfer credit, course substitutions, or course waivers are not accepted for meeting the Public Management certificate requirements.
4. Students admitted to a SPEA graduate degree program are not eligible for admission to the certificate program or eligible for the awarding of a certificate.
5. Admission to or successful completion of a certificate program does not guarantee subsequent admission to a SPEA graduate degree program.
6. Students enrolled in the certificate program who apply to SPEA's graduate degree programs must meet all existing admission requirements. If a

student has a cumulative GPA of 3.5 or better at the completion of the certificate, the student can request a waiver of the GRE requirement in applying to the M.P.A.

Proposed Course Schedule Rotation (subject to change)

Fall 2011

- V525 Management for Nonprofit Sector
- V558 Fund Development for Nonprofits
- V598 Governing and Leading in a Global Society

- V521 Nonprofit and Voluntary Sector
- V522 Human Resource Management in Nonprofit Organizations
- V562 Public Program Evaluation
- V557 Proposal Development and Grant Administration

Summer 2012

- V526 Financial Management for Nonprofit Organizations
- V557 Proposal Development and Grant Administration

Fall 2012

- V521 Nonprofit and Voluntary Sector
- V522 Human Resource Management in Nonprofit Organizations
- V525 Management for Nonprofit Sector
- V558 Fund Development for Nonprofits
- V598 Governing and Leading in a Global Society

Spring 2013

- V525 Management for Nonprofit Sector
- V526 Financial Management for Nonprofit Organizations
- V562 Public Program Evaluation

Summer 2013

- V522 Human Resource Management in Nonprofit Organizations
- V526 Financial Management for Nonprofit Organizations
- V557 Proposal Development and Grant Administration
- V558 Fund Development for Nonprofits

Courses

The fifteen-hour certificate consists of three required courses and two electives.

Required Courses (9 credit hours)

- **SPEA-V 522 Human Resource Management in Nonprofit Organizations (3 cr.)** Effective resource management is vital for the long-term success of nonprofit organizations. This course provides an overview of human resource management strategies and practices necessary for the productive functioning of nonprofit organizations. Theories of motivation applicable to the management of staff and volunteers, and personnel topics of recruitment, selection, board-staff relations, compensation, training, and development are covered.
- **SPEA-V 525 Management in the Nonprofit Sector (3 cr.)** The course provides a survey of topics important for non-profit management. Internal dynamics, environmental relationships, and public policy are considered. Topics include the legal environment, governance, strategic planning, staff and volunteers, marketing, ethics, evaluation, and change.
- **SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)** This course emphasizes a thorough under-standing of the language and key concepts of nonprofit financial management. The course covers applications of budgeting, and financial and managerial accounting principles and procedures to nonprofit organizations. The emphasis throughout the course is on the practical application of the fundamental requirements of accounting and financial decision making in the nonprofit organization.

Electives (6 credit hours)

- **SPEA-V 521 Nonprofit and Voluntary Sector (3 cr.)** The theory, size, scope, and functions of the nonprofit and voluntary sector are covered from multiple disciplinary perspectives including historical, political, economic, and social.
- **SPEA-V 557 Proposal Development and Grant Administration (3 cr.)** This course provides the opportunity for each student to develop a complete proposal through participation in the entire grant application process. The integration of case studies, visual media, printed materials, and class discussions provides students with practical knowledge for writing successful proposal.
- **SPEA-V 558 Fund Development for Nonprofit Organizations (3 cr.)** Important aspects of the fund raising process in nonprofit organizations are covered, including techniques and strategies for assessing potential sources of support; effective use of human resources; process management; theory to underlay practice; analysis of current practice; practice standards; and discussion of ethical problems.
- **SPEA-V 559 Principles and Practices of Social Entrepreneurship (3 cr.)** This course will survey issues in social entrepreneurship and engage students in completing class projects applying principles and practices of social entrepreneurship to problems of nonprofit organizations, government agencies, and social-purpose business.
- **SPEA-V 562 Public Program Evaluation (3 cr.)** Examination of how the programs of public agencies are proposed, established, operated, and evaluated. Discussion of the role and conduct of research in the program evaluation process. In addition, techniques of effective evaluation and analysis are discussed.
- **SPEA-V 598 Governing and Leading in a Global Society (3 cr.)** This gateway course will increase student appreciation of the role of public affairs professionals in governance across multiple sectors of society within the global context. Students will learn norms associated with effective practice in public affairs and frame a professional development

plan to acquire leadership skills to support these norms.

Public Management

The Certificate in Public Management program is a 15-credit-hour program of study in public management. The certificate program is flexible enough to be adapted to the needs of precareer and in-service individuals. Graduate students in other disciplines can use the program to supplement their primary fields with course work in public management, possibly using the certificate courses as part or all of a doctoral or master's degree minor. Career employees of public and private sector agencies seeking courses in public management, and especially those changing from professional or technical roles to managerial roles, find the certificate program beneficial.

Admission Eligibility

The student must have a bachelor's degree from an accredited college or university to apply.

Application

An online application and information may be obtained from the Web site; materials are also available from the Graduate Program Office. Students should apply to the SPEA admissions office on the IUPUI campus. Application deadlines for the certificate programs are May 15 for the fall semester, September 15 for the spring semester, and March 15 for summer sessions. Students must pay a nonrefundable application fee.

Program Restrictions

1. Students enrolled in a certificate program must complete it within 15 credit hours of approved SPEA course work with a minimum cumulative GPA of 3.0 (B). Failure to do so results in automatic dismissal from the certificate program.
2. Students who have completed more than three SPEA Graduate courses are not eligible for admission to a certificate program.
3. Transfer credit, course substitutions, or course waivers are not accepted for meeting the Public Management certificate requirements.
4. Students admitted to a SPEA graduate degree program are not eligible for admission to the certificate program or eligible for the awarding of a certificate.
5. Admission to or successful completion of a certificate program does not guarantee subsequent admission to a SPEA graduate degree program.
6. Students enrolled in the certificate program who apply to SPEA's graduate programs must meet all existing admission requirements. If a student has a cumulative GPA of 3.5 or better at the completion of the certificate, the student can request a waiver of the GRE requirement in applying to the M.P.A.

Certificate Requirements (15 credit hours)

Required Courses (9 credit hours)

EACH of the following courses:

- SPEA-V 502 Public Management
- SPEA-V 560 Public Finance and Budgeting
- SPEA-V 561 Public Human Resource Management

Electives (6 credit hours)

TWO additional SPEA graduate public affairs courses that cannot include independent research studies, readings, or internship classes.

Students interested in continuing on for the Master of Public Affairs degree should select two courses for the M.P.A. core.

Public Management (Online)

The Certificate in Public Management program is a 15-credit-hour program of study in public management. The certificate program is flexible enough to be adapted to the needs of precareer and in-service individuals. Graduate students in other disciplines can use the program to supplement their primary fields with course work in public management, possibly using the certificate courses as part or all of a doctoral or master's degree minor. Career employees of public and private sector agencies seeking courses in public management, and especially those changing from professional or technical roles to managerial roles, find the certificate program beneficial.

Admission Eligibility

The student must have a bachelor's degree from an accredited college or university to apply.

Application

An online application and information may be obtained from the Web site; materials are also available from the Graduate Program Office. Students should apply to the SPEA admissions office on the IUPUI campus. Application deadlines for the certificate programs are May 15 for the fall semester, September 15 for the spring semester, and March 15 for summer sessions. Students must pay a nonrefundable application fee.

Program Restrictions

1. Students enrolled in a certificate program must complete it within 15 credit hours of approved SPEA course work with a minimum cumulative GPA of 3.0 (B). Failure to do so results in automatic dismissal from the certificate program.
2. Students who have completed more than three SPEA courses are not eligible for admission to a certificate program.
3. Transfer credit, course substitutions, or course waivers are not accepted for meeting the Public Management certificate requirements.
4. Students admitted to a SPEA graduate degree program are not eligible for admission to the certificate program or eligible for the awarding of a certificate.
5. Admission to or successful completion of a certificate program does not guarantee subsequent admission to a SPEA graduate degree program.
6. Students enrolled in the certificate program who apply to SPEA's graduate degree programs must meet all existing admission requirements. If a student has a cumulative GPA of 3.5 or better at the completion of the certificate, the student can request a waiver of the GRE requirement in applying to the MPA.

Proposed Course Schedule Rotation (subject to change)

Semester Online Course Offered

Spring 2012

- V 502 Public Management
- V562 Public Program Evaluation
- V654 Public Program Management and Contracting

Summer 2012

- V561 Public Human Resources Management

Fall 2012

Courses

The fifteen-hour certificate consists of three required courses and two electives.
Required Courses (9 credit hours)

- **SPEA-V 502 Public Management (3 cr.)** Analysis of concepts, methods, and procedures involved in managing pubic organizations. Problems of organization, planning, decision making, performance, evaluation, and management of human resources are considered. Cases are drawn from a variety of public services found at federal, state, and local levels of government.
- **SPEA-V 560 Public Finance and Budgeting (3 cr.)** The fiscal role of government in a mixed economy; sources of public revenue and credit; administrative, political, and institutional aspects of the budget and budgetary process; problems and trends in intergovernmental fiscal relations.
- **SPEA-V 561 Public Human Resource Management (3 cr.)** Analysis of the structure, operations, and design of public personnel systems, including government agencies and public enterprise. Relationships between public policy and personnel concepts, values, and operations considered.

Electives (6 credit hours)

- **SPEA-V 509 Administrative Ethics in the Public Sector (3 cr.)** Ethical conduct in the public sector is examined. Topics covered could include personal ethical responsibility, deception, corruption, codes of ethics, policy-making, morality, politics, and whistle blowing. Case studies and media material will be used to illustrate these and other such issues affecting the workplace.
- **SPEA-V 516 Public Management Information Systems (3 cr.)** This course focuses on the application of information systems concepts and tools to challenges and opportunities in the public sector. Topics covered will include current trends in information systems; managerial use of information systems; hardware software, and telecommunications; systems development processes and practices; and strategic and policy issues in IS.
- **SPEA-V 562 Public Program Evaluation (3cr.)** Examination of how the programs of public agencies are proposed, established, operated, and evaluated. Discussion of the role and conduct of research in the program evaluation process. In addition, techniques of effective evaluation and analysis are discussed.
- **SPEA-V 598 Governing and Leading in a Global Society (3 cr.)** This gateway course will increase student appreciation of the role of public affairs professionals in governance across multiple sectors of society within the global context. Students will learn norms associated with effective practice in public affairs and frame a professional development plan to acquire leadership skills to support these norms.
- **SPEA-V 559 Principles and Practices of Social Entrepreneurship (3 cr.)** This course will survey issues in social entrepreneurship and engage students in completing class projects applying principles and practices of social entrepreneurship to problems of nonprofit organizations, government agencies, and social-purpose business.
- **SPEA-V 654 Public Program Management and Contracting (3 cr.)** An examination of theories, concepts, and processes concerning multi-actor program implementation and alternative forms of service delivery. Focus will be on the problems and challenges public managers face in designing and managing contractual relationships, networks, and other complex implementation structures.

Other electives may be chosen with approval from the faculty advisor.

Master of Library Science - Public Management

The Dual-MLS/SPEA PMC is designed for students who are enrolled in the MLS program and wish to obtain organizational management skills through the SPEA certificate. The Dual-MLS/SPEA Public Management Certificate program is flexible enough to be adapted to the needs of pre-career and in-service individuals. Career employees of public and private sector agencies seeking courses in public management, and especially those changing from professional or technical roles to managerial roles, find the certificate program beneficial.

Admission Eligibility

General criteria for all SLIS dual programs:

- Apply and meet admission requirements for both degrees; prefer within the same academic year.
- Meet requirements of SLIS L401 Computer-Based Information Tools.
- Complete a minimum of 30 graduate SLIS credits, including courses to meet the MLS core areas, and special SLIS electives as noted.
- May complete up to six credits in internship if a dual master's degree.
- The two degrees (or certificate) are awarded simultaneously.
- Dual programs are campus-based for advising and award. Up to 12 SLIS graduate credits may be taken

outside the Indianapolis campus which may include courses from the Bloomington campus and up to six graduate credits from another ALA-accredited program leading to the MLS.
- The second degree or certificate granted with the MLS is subject to the individual unit requirements and specific electives as approved by that unit.

Application
An online application and information may be obtained from the Web site; materials are also available from the Graduate Program Office. Students should apply to both programs, preferably within the same academic year. Application deadlines for the SPEA certificate programs are May 15 for the fall semester, September 15 for the spring semester, and March 15 for summer sessions. Students must pay a nonrefundable application fee.

Certificate Requirements (42 credit hours)
SLIS (30 credit hours)
- SLIS-S 505 Organization and Representation of Knowledge (3 cr.) **OR** SLIS-L 520 Bibliographic Access and Control (3 cr.)
- SLIS-L 524 Introduction to Information Sources and Services (3 cr.)
- SLIS-L 527 Management of Libraries and Information Centers (3 cr.)
- SLIS-L 528 Collection Development and Management (3 cr.)
- SLIS-L 550 Management of Specific Library Institutions: Public, Academic, or Special (3 cr.)
- SLIS-L 563 Information Policies, Economics and the Law (3 cr.) **OR** SLIS-L 608 Intellectual Freedom (3 cr.)
- SLIS-L 570 Online Information Retrieval (3 cr.)
- SLIS-L 628 Government Information (3 cr.) **OR** SLIS-L 629 Business Information (3 cr.)
- SLIS-L 651 Evaluation of Library Sources and Services (3 cr.) **OR** SLIS-L 509 Research Methods and Statistics (3 cr.)
- SLIS-L 596 Internship in Library and Information Science: Community Leadership and Management (3 cr.)

SPEA (12 credit hours)
- SPEA-V 502 Public Management (3 cr.)
- SPEA-V 560 Public Finance and Budgeting (3 cr.)
- SPEA-V 561 Public Human Resource Management (3 cr.)

Electives (3 credit hours)
ONE additional SPEA-V course approved by the SPEA Graduate Program Director.

Master of Library Science - Nonprofit Management
The Dual-MLS/SPEA NPMC is designed for students who are enrolled in the MLS program and wish to obtain organizational management skills through the SPEA certificate. The Dual-MLS/SPEA Nonprofit Management Certificate program is designed to serve the needs of individuals who would like exposure to nonprofit sector and nonprofit management issues but who do not wish or need to pursue a degree in nonprofit management.

Admission Eligibility
General criteria for all SLIS dual programs:

- Apply and meet admission requirements for both degrees; prefer within the same academic year
- Meet requirements of SLIS L401 Computer-Based Information Tools.
- Complete a minimum of 30 graduate SLIS credits, including courses to meet the MLS core areas, and special SLIS electives as noted.
- May complete up to six credits in internship if a dual master's degree.
- The two degrees (or certificate) are awarded simultaneously.
- Dual programs are campus-based for advising and award. Up to 12 SLIS graduate credits may be taken outside the Indianapolis campus which may include courses from the Bloomington campus and up to six graduate credits from another ALA-accredited program leading to the MLS.
- The second degree or certificate granted with the MLS is subject to the individual unit requirements and specific electives as approved by that unit.

Application
An online application and information may be obtained from the Web site; materials are also available from the Graduate Program Office. Students should apply to both programs, preferably within the same academic year. Application deadlines for the SPEA certificate programs are May 15 for the fall semester, September 15 for the spring semester, and March 15 for summer sessions. Students must pay a nonrefundable application fee.

Certificate Requirements (42 credit hours)
SLIS (30 credit hours)
- SLIS-S 505 Organization and Representation of Knowledge (3 cr.) **OR** SLIS-L 520 Bibliographic Access and Control (3 cr.)
- SLIS-L 524 Introduction to Information Sources and Services (3 cr.)

SPEA (12 credit hours)
- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)
- SPEA-V 526 Financial Management for Nonprofit Organizations(3 cr.)

- SPEA-V 522 Human Resources Management in Nonprofit Organizations(3 cr.)

Electives (3 credit hours)

ONE additional SPEA-V course approved by the SPEA Graduate Program Director.

Executive Graduate Certificate in Library Management

The Executive Graduate Certificate in Library Management is designed for students who have completed a Master's degree in Library or Information Science and wish to obtain organizational management skills through the SPEA certificate.

Career employees of public and private sector agencies seeking courses in public management, and especially those changing from professional or technical roles to managerial roles, will find this certificate program beneficial.

All SPEA courses are offered both online as well as in residence.

Admission Eligibility

- All applicants must have completed a Masters Degree in Library and Information Sciences.
- Complete the online application. Information on the application may be obtained from the SPEA website at www.spea.iupui.edu. Application deadlines are before May 15 for the fall semester, before September 15 for the spring semester, and before March 15 for summer sessions. Students must pay a nonrefundable application fee.
- Admission requires only the approval of the respective graduate program director or SPEA campus director.

Application

An online application and information may be obtained from the Web site; materials are also available from the Graduate Program Office. Application deadlines for the SPEA certificate programs are May 15 for the fall semester, September 15 for the spring semester, and March 15 for summer sessions. Students must pay a nonrefundable application fee.

Public Management Track Requirements (15 credit hours)

- SPEA-V 502 Public Management (3 cr.)
- SPEA-V 560 Public Finance and Budgeting (3 cr.)
- SPEA-V 561 Public Human Resourse Management (3 cr.)
- SLIS-S 505 Evaluation of Library Sources and Services [Formerly SLIS-L 651] OR SLIS-S 602 Directed Research [Formerly SLIS-L 594]
- SLIS-S 605 Internship in Library and Information Science: Community Leadership and Management [Formerly SLIS-L 596]

Nonprofit Management Track Requirements 915 credit hours)

- SPEA-V 522 Human Resourse Management in Nonprofit Organizations (3 cr.)
- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)
- SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)
- SLIS-S 505 Evaluation of Library Sources and Services [Formerly SLIS-L 651] OR SLIS-S 602 Directed Research [Formerly SLIS-L 594]
- SLIS-S 605 Internship in Library and Information Science: Community Leadership and Management [Formerly SLIS-L 596]

Effective Fall 2007

Social Entrepreneurship

In 2006, Indiana University inaugurated the first formal university-based Social Entrepreneurship program in Indiana. The Certificate in Social Entrepreneurship: Nonprofit and Public Benefit Organizations is a cooperative program between the School of Public and Environmental Affairs (SPEA) and the Kelley School of Business. The Social Entrepreneurship certificate prepares students for innovatively approaching public needs with a combination of entrepreneurial practices and social purposes – through the for-profit, nonprofit, and governmental sectors.

Admission Eligibility

Students must be admitted to the Master of Public Affairs program or the Master of Business Administration program at IUPUI to participate in this certificate program.

Application

An online application and information may be obtained from the SPEA Web site, www.spea.iupui.edu. Please contact Dr. Bielefeld, wbielefe@iupui.edu, 317-278-0306, early in your graduate program if you are interested in the certificate program. The certificate program requires a special internship and permission for some courses.

Certificate Requirements (18 credit hours)

Required Courses (9 credit hours)

EACH of the following courses:

- SPEA-V 521 The Nonprofit and Voluntary Sector (3 cr.)
- BUS-W 511 Venture Strategy (3 cr.)
- SPEA-V 559 Principles and Practices of Social Entrepreneurship (3 cr.)

Electives (9 credit hours)*

Kelly Electives

- BUS-F 509 Advanced Capital Budgeting (1.5 cr.)
- BUS-F 517 Venture Capital and Entrepreneurial Finance (1.5 cr.)
- BUS-M 503 Applied Marketing Research (3 cr.)
- BUS-M 513 Marketing Strategy Simulation
- BUS-P 510 Service Operations (1.5 cr.)
- BUS-P 552 Project Management (1.5 cr.)
- BUS-P 527 Operations Processes I (1.5 cr.)
- BUS-P 528 Operations Processes II (1.5 cr.)
- BUS-J 522 Strategic Management of Technology and Innovation (1.5 cr.)
- BUS-W 525 New Ventures and the Venture Community of Indianapolis (1.5 cr.)

SPEA Electives

- SPEA-V 522 Human Resource Management in Nonprofit Organizations (3 cr.)

- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)
- SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)
- SPEA-V 539 Management Science for Public Affairs (3 cr.)
- SPEA-V 541 Benefit and Cost Analysis for Public and Environmental Affairs (3 cr.)
- SPEA-V 558 Fund Development for Nonprofits (3 cr.)
- SPEA-V 562 Public Program Evaluation
- SPEA-V 602 Strategic Management of Public and Nonprofit Organizations (3 cr.)

*At least 3 credit hours must be taken in school other than one offering degree. Alternative courses may be included as electives, depending upon faculty and course availability.

Social Entrepreneurship Internship Program

Internships for the Certificate in Social Entrepreneurship need to satisfy certain criteria to qualify and must be approved by the Director of the Social Entrepreneurship program. All internships must receive prior approval unless it can be shown that a student has had prior experience in social entrepreneurship and the student applies for experiential credit instead of an internship.

STUDENTS ARE REQURED TO TAKE V559 BEFORE THEY CAN QUALIFY FOR AN INTERNSHIP IN SOCIAL ENTREPRENEURSHIP.

A Social Entrepreneurship Internship should meet three criteria:

- The development of the project the semester before the internship starts
- A 480 hour internship on site at the host organization, agency, or business to execute the project (may be extended over a longer period than 3 months, with less than 40 hours per week
- A final evaluation of the project, related to social entrepreneurial approaches

In addition, a Social Entrepreneurship Internship project must have social goals as well as quantifiable financial goals – and both of these goals should increase the financial profitability of the overall organization while also improving its social mission and outcomes. These objectives need to be identified before the internship and used to evaluate effectiveness at the completion of the internship project.

The final project evaluation should include an analysis of how the doublebottom line was used in the planning and operation process and how it was or is expected to be achieved. If the anticipated financial and social goals were not attained, the analysis should include a critique of what prevented their achievement and suggestions on how the obstacles to successful completion might have been overcome.

The internship may be satisfied by an Internship Practicum through V585 Practicum in Public Affairs (3 - 6 credits), X523 and X524 Enterprise Experience I and II (1.5 credits each), or approved experiential credit.

Certificate Programs

Nine graduate certificates are offered by the School of Public and Environmental Affairs at IUPUI:

- Nonprofit Management (on campus)
- Nonprofit Management (online)
- Public Management (on campus)
- Public Management (online)
- Master of Library Science - Public Management Certificate (MLS - PMC)
- Master of Library Science - Nonprofit Management Certificate
- Master of Library Science - Executive Graduate Certificate in Library Management
- Social Entrepreneurship: Nonprofit and Public Benefit Organizations
- Homeland Security and Emergency Management

Admissions

Admission Eligibility The student must have a bachelor's degree from an accredited college or university to apply. For the Certificate in Social Entre-preneurship, students must be enrolled in the M.P.A.

Application Application and program information may be obtained from SPEA Student Services in the Business/ SPEA building 3027. Students should apply to a SPEA graduate program using the online application on the campus where they plan to enroll.

Application Deadlines Application deadlines for the certificate programs are May 15 for the fall semester, Sept. 15 for the spring semester, and March 15 for the summer sessions.

Application Fee Students must pay a nonrefundable application fee.

Program Restrictions

1. Students enrolled in a certificate program must complete it with no more than 18 credit hours of approved SPEA course work with a minimum cumulative GPA of 3.0 (B). Failure to do so results in automatic dismissal from the certificate program. A student will be dismissed if, after 9 credit hours of coursework, the GPA is below a 3.0.
2. Students who have completed more than three SPEA graduate courses are not eligible for admission to a certificate program.
3. Transfer credit, course substitutions, or course waivers are not accepted for fulfilling the certificate requirements.
4. Students admitted to a SPEA graduate degree program are not eligible for admission to the certificate program or eligible for the awarding of a certificate.
5. Admission to or successful completion of a certificate program does not guarantee subsequent admission to a SPEA graduate degree program.
6. Students enrolled in a certificate program who apply to SPEA's graduate degree programs must meet all existing admission requirements.
7. Students planning to request admission to a SPEA graduate degree program after successfully completing a certificate program should refer to

the application procedure presented earlier in this bulletin.

Homeland Security and Emergency Management

The Certificate in Homeland Security and Emergency Management is a 15-credit-hour program of study. The certificate program is flexible enough to be adapted to the needs of pre-career and in-service individuals. Graduate students in other disciplines can use the program to supplement their primary fields with course work in homeland security and emergency management, possibly using the certificate courses as part of a doctoral or master's degree minor. Career employees of public and private sector agencies seeking courses in homeland security and emergency management, especially those changing from professional or technical roles to managerial roles, should find the certificate program beneficial.

Admission Eligibility

The student must have a bachelor's degree from an accredited college or university to apply.

Application

An online application and information may be obtained from the Web site, www.spea.iupui.edu/graduate; materials are also available from the Graduate Program Office. Students should apply to the SPEA admissions office on the IUPUI campus. Students must pay a nonrefundable application fee.

Program Restrictions

1. Students enrolled in a certificate program must complete 15 credit hours of approved SPEA course work with a minimum cumulative GPA of 3.0 (B). Failure to do so results in automatic dismissal from the certificate program.
2. Students enrolled in a certificate program must complete 15 credit hours of approved SPEA course work with a minimum cumulative GPA of 3.0 (B). Failure to do so results in automatic dismissal from the certificate program.
3. Transfer credit, course substitutions, or course waivers are not accepted for meeting the Public Management certificate requirements.
4. Students admitted to a SPEA graduate degree program are not eligible for admission to the certificate program or eligible for the awarding of a certificate.
5. Admission to or successful completion of a certificate program does not guarantee subsequent admission to a SPEA graduate degree program.
6. Students enrolled in the certificate program who apply to SPEA's graduate programs must meet all existing admission requirements. If a student has a cumulative GPA of 3.5 or better at the completion of the certificate, the student can request a waiver of the GRE requirement in applying to the MPA or the MSCJPS.

Certificate Requirements (15 credit hours)

Required Courses (9 credit hours)

- SPEA-J 524 Crisis Management for Public Safety (3 cr.)
- SPEA-J 528 Risk Analysis for Public Safety (3 cr.)
- SPEA-J 531 Homeland Security (3 cr.)

Electives (6 credit hours)

Two additional SPEA graduate courses that cannot include independent research studies, readings, or internship classes.

- SPEA-J 520 Mapping and Analysis for Public Safety (3 cr.)
- SPEA-J 682 Planning and Management for Crimina Justice and Public Safety (3 cr.)
- SPEA-V 540 Law and Public Affairs (3 cr.)
- SPEA-V 581 Public Safety Law (3 cr.)
- SPEA-V 654 Public Program Management and Contracting (3 cr.)

Degree Programs

The School of Public and Environmental Affairs offers degree programs that range from the bachelors degree to the Ph.D. The IUPUI campus offers two professional master's degrees for individuals interested in leadership positions in public, private, and nonprofit organizations:

- Master of Public Affairs (M.P.A.)
- Master of Science in Criminal Justice and Public Safety (M.S.C.J.P.S.)

The M.P.A. is a professional program that prepares students for leadership positions in government agencies and nonprofit organizations, and for positions addressing public affairs in the private sector. The M.S.C.J.P.S. provides a balanced foundation of practical and theoretical knowledge and technical skills needed to succeed in criminal justice and public safety. Additionally, master's degrees may be pursued in combination with degrees in law and philanthropy.

The School of Public and Environmental Affairs offers a variety of graduate degrees and certificate programs.

Master's Degrees

- Master of Public Affairs
  - Criminal Justice
  - Nonprofit Management
  - Policy Analysis
  - Public Management
- Master of Science in Criminal Justice and Public Safety

Dual Degrees

- Master of Public Affairs-Doctor of Jurisprudence
- Master of Public Affairs-Master of Arts in Philanthropic Studies

Master of Public Affairs

- Criminal Justice
- Nonprofit Management
- Policy Analysis
- Public Management

Criminal Justice

The M.P.A. is a course of study that requires the completion of (1) the M.P.A. core, (2) the concentration requirement, (3) the experiental requirement, and (4) sufficient electives and/or mid-career option credit to total **48 credit hours**.

EXPERIENTIAL COMPONENT: In order to be awarded the M.P.A. degree, students must obtain professionally relevant experience through an internship in **SPEA-V 585**. This requirements is automatically satisfied if a student is granted **Mid-Career Option** credit.

M.P.A. Core (21 credit hours) - Effective Fall 2005

Required of all students:

- SPEA V502 Public Management (3 cr.)
- SPEA V506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA V517 Public Management Economics (3 cr.)
- SPEA V540 Law and Public Affairs (3 cr.)
- SPEA V560 Public Finance and Budgeting (3 cr.)
- SPEA V598 Governing and Leading in a Global Society (3 cr.)
- SPEA V600 Capstone in Public and Environmental Affairs (3 cr.)

NOTE: V600 cannot be taken until all M.P.A. core courses are completed. V600 is only offered as an in-person class and cannot be substituted or transferred in from another university. Plan your schedule accordingly!

- SPEA-V 585 Internship or Mid Career Option Credit (3 cr.)
- Elective #1 (3 cr.)
- Elective #2 (3 cr.)

Criminal Justice Concentration (18 credit hours)

A minimum of nine credit hours of SPEA graduate courses with a "J" prefix is required (Effective January 2000).

Each of the following:

- SPEA-J 501 Evolution of Criminological Thought and Policy (3 cr.)
- SPEA-J 502 Research Methods in Criminal Justice and Public Affairs (3 cr.)
- SPEA-V 509 Administrative Ethics in the Public Sector (3 cr.)

One of the following:

- SPEA-J 666 Criminal Justice Policy and Evaluation (3 cr.)
- SPEA-J 682 Criminal Justice Planning and Management (3 cr.)

Two courses from one of the following groups:

Group A:

- SPEA-J 550 Topics in Criminal Justice (3 cr.)
- SPEA-J 582 Criminal Justice Systems (3 cr.) [Formerly V582]
- SPEA-J 587 Criminal Violation: Problems and Characteristics (3 cr.) [Formerly V587]
- SPEA-J 588 Law and Control in Society (3 cr.) [Formerly V588]
- SPEA-V 550 Topics in Public Affairs (criminal justice topics only) (3 cr.)
- SPEA-V 580 Readings in Public Affairs (criminal justice topics only) (3 cr.)
- SPEA-V 585 Practicum in Public Affairs (criminal justice topics only) (3 cr.)
- SPEA-V 685 Research Seminar in Public Affairs (criminal justice topics only) (3 cr.)

Group B:

- SPEA-J 550 Topics in Criminal Justice (3 cr.)

Management, Organizations, and Policy

- SPEA-V 504 Public Organizations (3 cr.)
- SPEA-V 512 Public Policy Process (3 cr.)
- SPEA-V 539 Management Science for Public Affairs (3 cr.)
- SPEA-V 547 Negotiation and Dispute Resolution for Public Affairs (3 cr.)
- SPEA-V 561 Public Human Resources Management (3 cr.)
- SPEA-V 562 Public Program Evaluation (3 cr.)
- SPEA-V 564 Urban Management (3 cr.)
- SPEA-V 566 Executive Leadership (3 cr.)
- SPEA-V 569 Managing Interpersonal Relations (3 cr.)
- SPEA-V 570 Public Sector Labor Relations (3 cr.)

Nonprofit Management

- SPEA-V 522 Human Resource Management in Nonprofit Organizations (3 cr.)
- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)

Finance

- SPEA-V 541 Benefit-Cost Analysis of Public and Environmental Policies (3 cr.)
- SPEA-V 542 Governmental Financial Accounting and Reporting (3 cr.)

Information Systems

- SPEA-V 516 Public Management Information Systems (3 cr.)
- SPEA-V 518 Intergovernmental Systems Management (3 cr.)
- SPEA-V 519 Database Management Systems (3 cr.)
- SPEA-V 550 Topics in Public Affairs (non-criminal justice topics) (3 cr.)

Other courses must approved by a faculty advisor.

PLUS A SUFFICIENT NUMBER OF ADDITIONAL COURSES TO MEET THE MINIMUM DEGREE REQUIREMENT OF 48 CREDIT HOURS WITH A 3.0 CUMULATIVE GRADE AVERAGE.

NOTE: Please note that the course rotation is subject to change. Please see your faculty advisor.

Nonprofit Management

The M.P.A. is a course of study that requires the completion of (1) the M.P.A. core, (2) the concentration requirement, (3) the experiental requirement, and (4) sufficient electives and/or mid-career option credit to total **48 credit hours**.

EXPERIENTIAL COMPONENT: In order to be awarded the M.P.A. degree, students must obtain professionally relevant experience through an internship in **SPEA-V 585**. This requirements is automatically satisfied if a student is granted **Mid-Career Option** credit.

M.P.A. Core (21 credit hours) - Effective Fall 2005

Required of all students:

- SPEA-V 506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA V 517 Public Management Economics (3 cr.)
- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)
- SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)
- SPEA-V 540 Law and Public Affairs (3 cr.)
- SPEA-V 598 Governing and Leading in a Global Society (3 cr.)
- SPEA-V 600 Capstone in Public and Environmental Affairs (3 cr.)

NOTE: V600 cannot be taken until all M.P.A. core courses are completed. V600 is only offered as an in-person class and cannot be substituted or transferred in from another university. Plan your schedule accordingly!

Nonprofit Management Concentration (18 credit hours)

- SPEA-V 521 The Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 522 Human Resource Management in Nonprofit Organizations (3 cr.)

Group A:

Nonprofit Theoretical Course - *Select ONE of the following:*

- SPEA-V 523 Civil Society and Public Policy (3 cr.)
- SPEA-V 524 Civil Society in Comparative Perspective (3 cr.)
- ECON-E 514 The Nonprofit Economy and Public Policy (3 cr.)
- HIST-H 509 History of Philanthropy in the West (3 cr.)
- HIST-H 516 History of American Philanthropy (3 cr.)
- PHIL-P 542 Ethics and Values of Philanthropy (3 cr.)

Other courses must be approved by the faculty advisor.

Group B:

Nonprofit Application Courses - *Select THREE of the following:*

- SPEA-V 550 Topics in Public Affairs: Leadership and Board Development (3 cr.)
- SPEA-V 544 Marketing for Nonprofit Organizations (3 cr.)
- SPEA-V 557 Development and Grant Administration (3 cr.)
- SPEA-V 558 Fund Development for Nonprofit Organizations (3 cr.)
- SPEA-V 559 Principles and Practices of Social Entrepreneurship (3 cr.)
- SPEA-V 602 Strategic Management for Public and Nonprofit Organizations (3 cr.)
- PHST-P 535 Law of Nonprofit Organizations (3 cr.)

Other courses must be approved by the faculty advisor.

- SPEA-V 585 Internship or Mid Career Option Credit (3 cr.)
- Elective #1 (3 cr.)
- Elective #2 (3 cr.)

Recommended electives:

- SPEA-V 504 Public Organizations (3 cr.)
- SPEA-V 509 Administrative Ethics in the Public Sector (3 cr.)
- SPEA-V 516 Public Management Information Systems (3 cr.)
- SPEA-V 539 Management Science of Public Affairs (3 cr.)
- SPEA-V 541 Benefit-Cost Analysis of Public and Environmental Policies (3 cr.)
- SPEA-V 547 Negotiation and Dispute Resolution for Public Affairs (3 cr.)
- SPEA-V 562 Public Program Evaluation (3 cr.)
- SPEA-V 566 Executive Leadership (3 cr.)

PLUS A SUFFICIENT NUMBER OF ADDITIONAL COURSES TO MEET THE MINIMUM DEGREE REQUIREMENT OF 48 CREDIT HOURS WITH A 3.0 CUMULATIVE GRADE AVERAGE.

NOTE: Please note that the course rotation is subject to change.

Policy Analysis

The M.P.A. is a course of study that requires the completion of (1) the M.P.A. core, (2) the concentration requirement, (3) the experiential requirement, and (4) sufficient electives and/or mid-career option credit to total **48 credit hours**.

EXPERIENTIAL COMPONENT: In order to be awarded the M.P.A. degree, students must obtain professionally relevant experience through an internship in **SPEA-V 585**. This requirement is automatically satisfied if a student is granted **Mid-Career Option** credit.

M.P.A. Core (21 credit hours) - Effective Fall 2005

Required of all students:

- SPEA V506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA V517 Public Management Economics (3 cr.)
- SPEA V540 Law and Public Affairs (3 cr.)
- SPEA V598 Governing and Leading in a Global Society (3 cr.)

- SPEA V502 Public Management (3 cr.)
- SPEA V560 Public Finance and Budgeting (3 cr.)

NOTE: V600 cannot be taken until all M.P.A. core courses are completed. V600 is only offered as an in-person class

and cannot be substituted or transferred in from another university. Plan your schedule accordingly!

- SPEA V-585 Internship or Mid Career Option Credit (3 cr.)
- Elective #1 (3 cr.)
- Elective #2 (3 cr.)

Policy Analysis Concentration (18 credit hours)
Required Policy Process Course (3 credit hours)

- SPEA-V 512 Public Policy Process (3 cr.)

Required Policy Skills Courses (9 credit hours)
Choose **THREE** of the following:

- SPEA-V 507 Data Analysis and Modeling for Public Affairs (3 cr.)
- SPEA-V 539 Management Science for Public Affairs (3 cr.)
- SPEA-V 541 Benefit-Cost Analysis of Public and Environmental Policies (3 cr.)
- SPEA-V 562 Public Program Evaluation (3 cr.) **OR** SPEA-J 502 Research Methods in Criminal Justice and Public Affairs (3 cr.)
- SPEA-V 654 Public Program Management and Contracting (3 cr.)

Required Policy Field Courses (6 credit hours)
Select **TWO** courses with the permission of a faculty advisor. Courses include, but are not limited to, the following:

- SPHA-H 501 U.S. Health Care: Systems, Policies, and Ethical Challenges (3 cr.)
- SPHA-H 515 Seminar in Health Policy Process Special Topics (3 cr.)
- SPHA-H 640 Topics in Health Services Administration: Health Care Policy Planning (3 cr.)
- SPEA-J 501 Evolution of Criminological Thought and Policy (3 cr.)
- SPEA-J 550 Topics in Criminal Justice (topics approved by faculty advisor) (3 cr.)
- SPEA-J 582 Criminal Justice Systems (3 cr.)
- SPEA-J 587 Criminal Violation: Problems and Characteristics (3 cr.)
- SPEA-J 588 Law and Control in Society (3 cr.)
- SPEA-J 666 Criminal Justice Policy and Evaluation (3 cr.)
- SPEA-V 520 Environmental Policy Analysis (3 cr.)
- SPEA-V 523 Civil Society and Public Policy (3 cr.)
- SPEA-V 550 Topics in Public Affairs (3 cr.) (public policy topics approved by advisor)
- SPEA-V 580 Readings in Public Affairs (3 cr.)
- SPEA-V 590 Research in Public Affairs (3 cr.)

PLUS A SUFFICIENT NUMBER OF ADDITIONAL COURSES TO MEET THE MINIMUM DEGREE REQUIRMENT OF 48 CREDIT HOURS WITH A 3.0 CUMULATIVE GRADE AVERAGE.

NOTE: Please note that the course rotation is subject to change. Please see your faculty advisor.

Public Management
The M.P.A. is a course of study that requires the completion of (1) the M.P.A. core, (2) the concentration requirement, (3) the experiential requirement, and (4) sufficient electives and/or mid-career option credit to total 48 credit hours.

EXPERIENTIAL COMPONENT: In order to be awarded the M.P.A. degree, students must obtain professionally relevant experience through an internship in SPEA-V 585. This requirement is automatically satisfied if a student is granted Mid-Career Option credit.

M.P.A. Core (21 credit hours) - Effective Fall 2005
Required of all students:

- SPEA V506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA V517 Public Management Economics (3 cr.)
- SPEA V540 Law and Public Affairs (3 cr.)
- SPEA V598 Governing and Leading in a Global Society (3 cr.)
- SPEA V600 Capstone in Public and Environmental Affairs (3 cr.)
- SPEA V502 Public Management (3 cr.)
- SPEA V560 Public Finance and Budgeting (3 cr.)

NOTE: V600 cannot be taken until all M.P.A. core courses are completed. V600 is only offered as an in-person class and cannot be substituted or transferred in from another university. Plan your schedule accordingly!

- SPEA-V 585 Internship or Mid Career Option (3 cr.)
- Elective #1 (3 cr.)
- Elective #2 (3 cr.)

Public Management Concentration (18 credit hours)
Group A:
Managing People - *Select TWO of the following:*

- SPEA-V 504 Public Organizations (3 cr.)
- SPEA-V 561 Public Human Resource Management in the Public Sector (3 cr.)
- SPEA-V 566 Executive Leadership (3 cr.)
- SPEA-V 569 Managing Interpersonal Relations (3 cr.)
- SPEA-V 652 Manging Workforce Diversity in Public Organizations (3 cr.)

Group B:
Managing Processes and Programs - *Select TWO of the following:*

- SPEA-V 509 Administrative Ethics in the Public Sector (3 cr.)
- SPEA-V 539 Management Science for Public Affairs (3 cr.)
- SPEA-V 547 Negotiation and Dispute Resolution for Public Affairs (3 cr.)
- SPEA-V 602 Strategic Management of Public and Nonprofit Organizations (3 cr.)
- SPEA-V 639 Managing Government Operations (3 cr.)
- SPEA-V 654 Public Program Management & Consulting (3 cr.)

Group C:
Managing Information and Evaluating Effectiveness - *Select TWO of the following:*

- SPEA-V 516 Public Management Information Systems (3 cr.)

- SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)
- SPEA-V 541 Benefit-Cost Analysis for Public and Environmental Policies (3 cr.)
- SPEA-V 542 Governmental Financial Accounting and Reporting (3 cr.)
- SPEA-V 562 Public Program Evaluation (3 cr.)

PLUS A SUFFICIENT NUMBER OF ADDITIONAL COURSES TO MEET THE MINIMUM DEGREE REQUIRMENT OF 48 CREDIT HOURS WITH A 3.0 CUMULATIVE GRADE AVERAGE.

NOTE: Please note that the course rotation is subject to change. Please see your faculty advisor.

Master of Public Affairs-Doctor of Jurisprudence

The combined M.P.A.-J.D. program enables the student to take a sequence of courses leading to the attainment of both degrees.

Requirements for Graduation:

- 84 credit hours of law courses and satisfy all requirements for the degree of Doctor of Jurisprudence.
- 34 credit hours of SPEA courses.
- Complete of a research paper in the last year of the combined program.

M.P.A. Course Requirements (18 credit hours):

- SPEA-V 502 Public Management (3 cr.) **OR**
- SPEA-V 525 Management in the Nonprofit Sector (3 cr.)
- SPEA-V 506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA-V 517 Public Management Economics (3 cr.)
- SPEA-V 560 Public Finance and Budgeting (3 cr.) **OR**
- SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)
- SPEA-V 598 Governing and Leading in a Global Society (3 cr.)
- SPEA-V 600 Capstone in Public and Environmental Affairs (3 cr.)

M.P.A. Concentration Requirements (14 credit hours):

Will consist of the required courses for a concentration to be chosen by the student

Joint Research Paper (2 credit hours):

To be completed in the last year of the combined program and jointly supervised by advisors from both schools.Credit for this supervised research will be arranged and will count toward degree requirements in both schools. Two hours of V590, Research in Public Affairs, will toward the M.P.A. degree program.

The topic must be selected no later than the end of the third year of the combined program, must include elements of both disciplines, and must be approved by the student's co-advisors.

From degree requirements prior to May 2003, please contact SPEA Student Services at 317-274-4656.

Effective Fall 2005

Master Public Affairs-M.A. in Philanthropic Studies

Recommended Undergraduate Preparation: Algebra, Micro-Economics, and Basic Statistics

M.P.A. Core Requirements (21 credit hours)

- SPEA-V 506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA-V 517 Public Management Economics (3 cr.)
- SPEA-V 525 Public Management (3 cr.)
- SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.)
- SPEA-V 540 Law and Public Affairs (3 cr.)
- SPEA-V 598 Governing and Leading in a Global Society (3 cr.)
- SPEA-V 600 Capstone in Public and Environmental Affairs (3 cr.)**

NOTE: V600 cannot be taken until all M.P.A. core courses are completed. V600 is only offered as an in-person class and cannot be substituted or transferred in from another university. Plan your schedule accordingly!

Required Nonprofit Management Courses (6 credit hours)

- SPEA-V 521 The Nonprofit and Voluntary Sector (3 cr.) **OR**
  PHST-P 521 The Nonprofit and Voluntary Sector (3 cr.)
- SPEA-V 522 Human Resource Management in Nonprofit Organizations (3 cr.)

Required courses in Philanthropic Studies (12 credit hours)

- PHST-P 523 Civil Society and Philanthropy
- HIST-H 509 History of Philanthropy in the West **OR**
- HIST- H 516 History of American Philanthropy
- PHIL-P 542 Ethics and Values of Philanthropy
- ECON-E 514 Nonprofit Economy and Public Policy **OR**
- PHST-P 535 Law of Nonprofit Organizations

Nonprofit Application Courses (9 credit hours)

THREE of the following courses:

- SPEA-V 544 Marketing for Nonprofit Organizations (3 cr.)
- SPEA-V 550 Topics in Public Affairs: Leadership and Board Development (3 cr.)
- SPEA-V 557 Proposal Development and Grant Administration (3 cr.)
- SPEA-V 558 Fund Development for Nonprofit Organizations (3 cr.)
- SPEA-V 559 Principles and Practices of Social Entrepreneurship (3 cr.)
- SPEA-V 602 Strategic Management of Public and Nonprofit Organizations (3 cr.)
- PHST-P 535 Law of Nonprofit Organizations

Or other appropriate course approved by faculty advisor

- ONE comparative elective in Philanthropic Studies (3 credit hours):
  - REL-R 590 Religion and Philanthropy/ Comparative Religious Ethics

- PHST-P 530 Civil Society in Comparative Perspective
- AHT-A 509 Cross-Cultural Dimensions of Philanthropy

- ONE additional elective course approved by the faculty advisor (3 credit hours)
- Internship in Philanthropic Studies (3 credit hours): PHST-P 590
- Thesis (3 credit hours): PHST-P 600 or an elective with a significant research component as approved by advisor.

M.A. students can use SPEA-V 600 in place of the thesis. This will allow for an extra elective, which must be a Liberal Arts course.

MUST MAINTAIN A 3.0 CUMULATIVE GRADE POINT AVERAGE.

NOTE: The Dual M.A. in Philanthropic Studies/M.P.A. Nonprofit Management concentration require a minimum of 60 credit hours.

A minimum of 21 credit hours must be in courses in Liberal Arts departments.

Master of Science in Criminal Justice and Public Safety

The M.S.C.J.P.S. is a course of study that requires the completion of (1) the core, (2) the electives, (3) the experiential requirement or mid-career option credit to total 36 credit hours.

EXPERIENTIAL COMPONENT: In order to be awarded the M.S.C.J.P.S. degree, students must obtain professionally relevant experience through an internship in SPEA-V 585. This requirement is automatically satisfied if a student is granted Mid-Career Option credit.

Core Requirements (24 credit hours)

- FOR CRIMINAL JUSTICE TRACK - SPEA-J 501 Evolution of Criminological Thought and Policy (3 cr.) **OR**
- FOR PUBLIC SAFETY TRACK - SPEA-J 528 Risk Analysis for Public Safety (3 cr.)
- SPEA-J 502 Research Methods in Criminal Justice and Public Affairs (3 cr.)
- SPEA-J 582 Criminal Justice Systems (3 cr.)
- SPEA-J 682 Planing and Management for Crimnal Justice and Public Safety (3 cr.)
- SPEA-V 506 Statistical Analysis for Effective Decision Making (3 cr.)
- SPEA-V 581 Public Safety Law (3 cr.)
- SPEA-V 586 Public Safety in the United States (3 cr.)
- SPEA-V 600 Capstone in Public and Environmental Affairs (3 cr.)

*NOTE: V600 cannot be taken until all M.S.C.J.P.S. core courses are completed. V600 is only offered as an in-person class and cannot be substituted or transferred in from another university. Plan your schedule accordingly!

- SPEA-V 585 Internship or Mid Career Option Credit (1-6 cr.)

Those with mid-career credit should consult with their faculty advisor to determine how this alters their course plans.

Electives (12 credit hours)

4 courses (12 credits) from one of the following groups:

Criminal Justice

- SPEA-J 520 Mapping and Analysis for Public Safety (3 cr.)
- SPEA-J 524 Crisis Management for Public Safety (3 cr.)
- SPEA-J 528 Risk Analysis for Public Safety (3 cr.)
- SPEA-J 550 Topics in Criminal Justice and Public Safety (3 cr.)
- SPEA-J 587 Criminal Violation: Problems and Characteristics (3 cr.)
- SPEA-J 588 Law and Control in Society (3 cr.)
- SPEA-J 666 Criminal Justice Policy and Evaluation (3 cr.)
- SPEA-V 509 Administrative Ethics in the Public Sector (3 cr.)
- SPEA-V 539 Management Science (3 cr.)
- SPEA-V 560 Public Finance and Budgeting (3 cr.)
- SPEA-V 561 Public Human Resourece Management (3 cr.)
- SPEA-V 562 Public Program Evaluation (3 cr.)
- SPEA-V 585 Practicum in Public Affairs (1-6 cr.)
- SPEA-V 639 Manageing Government Operations (3 cr.)

Public Safety

- SPEA-E 520 Environmental Toxicology (3 cr.)
- SPEA-E 542 Hazardous Materials (3 cr.)
- SPEA-E 560 Environmental Risk Analysis (3 cr.)
- SPEA-J 501 Evolution of Criminilogical Thought and Policy (3 cr.)
- SPEA-J 520 Mapping and Analysis for Public Safety (3 cr.)
- SPEA-J 524 Crisis Management for Public Safety (3 cr.)
- SPEA-J 550 Topics in Criminal Justice and Public Safety (3 cr.)
- SPEA-V 509 Administrative Ethics in the Public Sector (3 cr.)
- SPEA-V 539 Management Science (3 cr.)
- SPEA-V 560 Public Finance and Budgeting (3 cr.)
- SPEA-V 561 Public Human Resourece Management (3 cr.)
- SPEA-V 562 Public Program Evaluation (3 cr.)
- SPEA-V 585 Practicum in Public Affairs (1-6 cr.)
- SPEA-V 639 Manageing Government Operations (3 cr.)

Up to 3 credit hours of the concentration coursework may be taken in SPEA-V 585 Practicum in Public Affairs if approved in advance by the faculty advisor.

TO GRADUATE STUDENTS MUST MEET THE MINIMUM DEGREE REQUIREMENT OF 36 CREDIT HOURS WITH A 3.0 CUMULATIVE GRADE AVERAGE.

NOTE: Please note that the course rotation is subject to change. Please see your faculty advisor.

Sample Plan of Study
Criminal Justice Track

Fall 1	Spring 1	Fall 2	Spring 2
J582	J502	J501	V600
V586	J682	V506	V585

Public Safety Track

Fall 1	Spring 1	Fall 2	Spring 2
J582	J502	J528	V600
V586	J682	V506	V585
elective	V581	elective	elective

Student Learning Outcomes

Criminal Justice

- Master of Science in Criminal Justice and Public Safety (M.S.C.J.P.S.)

Public Affairs

- Master of Public Affairs (M.P.A.)

Certificates

- Executive Graduate Certificate in Library Management
- Homeland Security and Emergency Management (HSEM) Certificate
- Nonprofit Management Certificate
- Public Management Certificate
- Social Entrepreneurship Certificate

Master of Public Affairs (MPA)

General Learning Outcomes
Upon completion of the MPA degree program, students shall:

- Demonstrate the ability to lead and manage public and nonprofit organizations.
- Demonstrate the ability to participate in and contribute to the policy process.
- Demonstrate the ability to analyze, synthesize, think critically, solve problems and make decisions.
- Demonstrate the ability to articulate and apply a public service perspective.
- Demonstrate the ability to communicate and interact productively with a diverse and changing workforce and citizenry.

Concentrations will have the above general outcomes plus the additional ones listed below.

Criminal Justice Concentration
Upon completion of this concentration, students will:

- Identify and critically analyze current criminal justice policies, using available research, and discuss the strengths and limitations of various approaches.
- Communicate effectively within a complex and diverse criminal justice or public safety environment.
- Rigorously analyze criminal justice and public safety policies using a variety of tools, including quantitative research methods and statistical techniques.
- Define crime, discuss and evaluate major theories of crime, and critically discuss criminal justice system and non-criminal justice programs and policies that respond to crime.

Policy Analysis Concentration
Upon completion of thI concentration, students shall:

- Demonstrate the ability to rigorously analyze public policies using a variety of tools, including microeconomics, institutional analysis, and other common public affairs models of policy development, implementation and evaluation using quantitative, qualitative and mixed approaches.
- Demonstrate experience in the practical conduct and communication of results of policy analysis.

Public Management Concentration
Upon completion of this concentration, students should:

- Demonstrate the ability to evaluate management practices, using a variety of outcome measurements to assess efficacy, efficiency and economic costs and benefits.
- Demonstrate experience in the conduct of management tasks, and the ability to communicate effectively with the appropriate constituencies.

Nonprofit Management Concentration
Upon completion of this concentration, students will:

- Demonstrate the managerial and policy skills to effectively undertake leadership roles in the nonprofit sector.
- Demonstrate the managerial and policy skills to effectively undertake leadership roles in the public or private sectors as they apply to working with organizations in the nonprofit sector.
- Demonstrate an understanding of the philanthropic tradition in the broadest sense (voluntary action for the public good).

Graduate Certificates

Executive Graduate Certificate in Library Management
Upon completion of this certificate program, students shall:

- Demonstrate the ability to lead and manage public and nonprofit organizations.
- Demonstrate the ability to analyze, synthesize, think critically, solve problems and make decisions.
- Demonstrate the ability to communicate and interact productively with a diverse and changing workforce and citizenry.
- Demonstrate the ability to evaluate the credibility of library resources and services.

Homeland Security and Emergency Management (HSEM) Certificate
Upon completion of this certificate program, students will:

- Manage and lead individuals and organizations with an understanding of the ethical underpinnings and professional standards of criminal justice and public safety agencies.
- Communicate effectively and interact productively within a complex and diverse criminal justice or public safety environment.

- Identify public safety risks using various risk analysis tools, and describe ways to plan, prepare, manage, and mitigate natural and human made risks.
- Critically discuss criminal justice and public safety system actors, agencies, and processes, describe the underlying operations of police, emergency management, courts, and corrections agencies, and identify the major policy issues in criminal justice and public safety systems.
- Define and describe homeland security, how federal state and local agencies work to maintain homeland security, and how it relates to public safety, in theory and in practice.
- Describe the elements of effective leadership before, during, and after major public safety events.

Nonprofit Management Certificate
Upon completion of this certificate program, students shall:

- Students shall demonstrate the ability to lead and manage public and nonprofit organizations.
- Students shall demonstrate the ability to analyze, synthesize, think critically, solve problems and make decisions.
- Students shall demonstrate the ability to communicate and interact productively with a diverse and changing workforce and citizenry.

Public Management Certificate
Upon completion of this certificate program, students shall:

- Demonstrate the ability to lead and manage public and nonprofit organizations.
- Demonstrate the ability to analyze, synthesize, think critically, solve problems and make decisions.
- Demonstrate the ability to communicate and interact productively with a diverse and changing workforce and citizenry.

Social Entrepreneuship Certificate
Upon completion of this certificate program, students shall:

- Demonstrate the ability to lead and manage public and nonprofit organizations.
- Demonstrate the ability to analyze, synthesize, think critically, solve problems and make decisions.
- Demonstrate the ability to communicate and interact productively with a diverse and changing workforce and citizenry.
- Demonstrate an understanding of social entrepreneurship in public and private sectors.
- Demonstrate the managerial and policy skills to effectively undertake leadership roles in social entrepreneurship.

Master of Science in Criminal Justice and Public Safety (MSCJPS)

MSCJPS graduates will be able to:

- Manage and lead individuals and organizations with an understanding of the ethical underpinnings and professional standards of criminal justice and public safety agencies.
- Communicate effectively within a complex and diverse criminal justice or public safety environment.
- Rigorously analyze criminal justice and public safety policies using a variety of tools, including quantitative research methods and statistical techniques.
- Identify public safety risks using various risk analysis tools, and describe ways to plan, prepare, manage, and mitigate natural and human made risks.
- Discuss the philosophical underpinnings and development of law, and critically evaluate how public safety policies balance individual rights and public order.
- Discuss the nature and extent of crime, discuss and critically evaluate major theories of crime, and critically discuss criminal justice system and non-criminal justice programs and policies that respond to crime.
- Critically discuss criminal justice and public safety system actors, agencies, and processes; describe the underlying operations of police, emergency management, courts, and corrections agencies, and identify the major policy issues in criminal justice and public safety systems.
- Identify and critically analyze current criminal justice and public safety policies, using available research, and discuss the strengths and limitations of various approaches.

Graduate Programs

The School of Public and Environmental Affairs offers degree programs that range from the bachelors degree to the Ph.D. The IUPUI campus offers two professional master's degrees for individuals interested in leadership positions in public, private, and nonprofit organizations:

- Master of Public Affairs (M.P.A.)
- Master of Science in Criminal Justice and Public Safety (M.S.C.J.P.S.)

The M.P.A. is a professional program that prepares students for leadership positions in government agencies and nonprofit organizations, and for positions addressing public affairs in the private sector. The M.S.C.J.P.S. provides a balanced foundation of practical and theoretical knowledge and technical skills needed to succeed in criminal justice and public safety. Additionally, master's degrees may be pursued in combination with degrees in law and philanthropy.

The School of Public and Environmental Affairs offers a variety of graduate degrees and certificate programs.

Master's Degrees

- Master of Public Affairs
  - Criminal Justice
  - Nonprofit Management
  - Policy Analysis
  - Public Management
- Master of Science in Criminal Justice and Public Safety

Dual Degrees

- Master of Public Affairs-Doctor of Jurisprudence
- Master of Public Affairs-Master of Arts in Philanthropic Studies

Certificates

- Nonprofit Management (on campus)

- Nonprofit Management (online)
- Public Management (on campus)
- Public Management (online)
- Master of Library Science - Public Management Certificate (MLS - PMC)
- Master of Library Science - Nonprofit Management Certificate
- Master of Library Science - Executive Graduate Certificate in Library Management
- Certificate in Social Entrepreneurship: Nonprofit and Public Benefit Organizations

Centers

The research institute, research centers and Executive Education program at Indiana University's School of Public and Environmental Affairs (SPEA) at IUPUI deliver public service along with innovative academic programs.

- IU Public Policy Institute
- Center for Urban Policy and the Environment
- Center for Criminal Justice Research
- Executive Education Program

The IU Public Policy Institute is a collaborative, multidisciplinary research institute within SPEA. The Institute serves as an umbrella organization for two research centers: the Center for Urban Policy and the Environment, and the Center for Criminal Justice Research. The Institute also supports the Office of International Community Development and the Indiana Advisory Commission on Intergovernmental Relations.

Today, IU Public Policy Institute researchers—who also serve as faculty for SPEA—conduct studies critical to the vitality of Indiana and its communities. Historically, its main topics of research have included:

- Land use, smart growth and environmental issues
- Housing issues
- Criminal justice and public safety
- Nonprofit organizations
- Economic development and fiscal policy
- Intergovernmental cooperation.

The Center for Urban Policy and the Environment is devoted to supporting economic success for Indiana and a high quality of life for all Hoosiers. An applied research organization, CUPE was created by SPEA in 1992. The Center works in partnership with community leaders, business and civic organizations, nonprofits and government. CUPE's work is focused on urban policy, intergovernmental cooperation, community and economic development, housing, environmental issues and fiscal affairs research essential to developing strategies to strengthen Indiana's economy and quality of life.

Center for Urban Policy and the Environment
334 North Senate Avenue, Suite 300
Indianapolis, IN 46204-1708

SPEA's Executive Education Program is one of the most prestigious leadership programs in the nation. The Executive Education Program works with government entities, nonprofit agencies and the private sector to prepare leaders and managers to meet today's challenges and prepare for tomorrow's opportunities.

The Executive Education Program offers graduate-level programs at four sites nationally: Washington, D.C.; Seattle, Washington; and Indianapolis, Indiana. Graduate programs include the Master of Public Affairs and the Public Management Certificate.

The Executive Education Program has long offered courses to the American Association of State Highway and Transportation Officials (AASHTO). Executive Education and AASHTO have also partnered to create two institutes to challenge and educate transportation managers and leaders: the National Transportation Leadership Institute and the Advanced Leadership Institute.

In partnership with the Indiana Hospital Association (IHA), Executive Education created a 10-course management institute for health care officials in Indiana to prepare them to lead their organizations through the changes affecting the health care industry. Executive Education has also partnered with Indiana Association of Cities and Towns (IACT) to offer workshops for Mayors of cities throughout Indiana. The IU Center on Philanthropy's Fund Raising School and SPEA's Executive Education offers the Nonprofit Executive Leadership Certificate. The

four course program, designed for the nation's nonprofit executive leaders, is offered over a twelve month period.

SPEA's Executive Education Program also offers customized leadership and management programs for local and national clients including the United States Navy and the United States Army.

Academic Policies and Procedures

The links to the left showcase SPEA undergraduate and graduate policies.

Graduate and Professional Policies

- **Confidentiality of Student Records**
- **Student Rights and Responsibility**
- **Applicability of Degree and Certificate Requirements**
- **Residency Requirements-Master's and Certificate Programs**
- **Academic Standing**
- **Academic Probation**
- **Grading System**
- **Incomplete**
- **Withdrawals**
- **Intercampus Transfer**
- **Transfer of Credit**
- **Credit Earned in Nondegree Status**
- **Course Waivers**
- **Program Deviations**
- **Minimum Credit Hours**
- **Academic Integrity**
- **Academic Appeals**

The following academic regulations of the School of Public and Environmental Affairs are applicable to all graduate programs.

Confidentiality of Student Records In accordance with Indiana University regulations, student records are confidential and are available to other persons only under specific conditions as outlined in university regulations.

Student Rights and Responsibility Students are responsible for planning their own academic programs and for meeting the requirements for their degree or certificate programs. Faculty and academic advisors may assist students in meeting their responsibilities. Due process is followed in the event of disciplinary or other actions. Students should read the *IUPUI Code of Student Rights, Responsibilities, and Conduct*, which can be accessed at **http://life.iupui.edu/help/code.asp**, to ensure they are aware of these rights and responsibilities.

Applicability of Degree and Certificate Requirements Students may choose to complete either the specific degree and certificate requirements published in the appropriate bulletin at the time of entry into the university or those in the bulletin current at the time of graduation.

Residency Requirements-Master's and Certificate Programs The campus at which a student completes the majority of required course work will certify and award the degree or certificate, provided the campus is authorized to grant that degree or certificate. The student must have been admitted by the SPEA campus awarding the degree or certificate.

Academic Standing Students are considered to be in good standing during any semester in which their academic grade point average is at least 3.0 (B) both for their last semester's course work and for the cumulative average of all course work completed. Only courses with grades of C (2.0) or above may be counted toward degree requirements. However, grades below C are used in computing the cumulative grade point average, even if a course is repeated and a higher grade is earned. Certificate students who do not have a 3.0 cumulative grade point average within their first 9 credit hours will be dismissed.

Academic Probation Students are placed on probation following a semester in which their cumulative or semester grade point average falls below 3.0. Students on probation or admitted provisionally are required to attain an average of at least 3.0 for all work completed by the end of the next semester. Failure to do so is cause for dismissal. Certificate students who do not have a 3.0 cumulative grade point average within their first 9 credit hours will be dismissed.

Grading System SPEA follows the official grading system of Indiana University described in the introductory section of the bulletin.

Incomplete A grade of Incomplete must be removed within the time specified by the instructor of the course; if not, the grade automatically changes to an F one calendar year after the Incomplete was given.

Withdrawals Students must formally withdraw from courses in the timeframe allowed by the Registrar's office. This information can be found at the Web site www.registrar.iupui.edu.

Intercampus Transfer Students enrolled in the School of Public and Environmental Affairs at any campus of Indiana University may transfer to SPEA on another campus, provided they are in good standing. Communication with the appropriate campus is appropriate.

Transfer of Credit A maximum of 9 credit hours of appropriate graduate course work with grades of B (3.0) or better may be transferred from degree programs of other academic units within Indiana University or other accredited colleges and universities and applied to SPEA master's-level degree programs. The transfer must be approved by the appropriate graduate program director.

Credit Earned in Nondegree Status Not more than 12 hours of graduate credit completed as a nondegree student may be credited toward a SPEA graduate degree. Not more than 9 hours of SPEA graduate credit earned as a nondegree student may be credited toward SPEA certificate programs.

Course Waivers Requests for waiver of specific courses or requirements on the basis of previous course work are to be submitted in writing to the appropriate faculty member or program director.

Program Deviations Requests for deviation from SPEA programs or school requirements are granted only with written approval from an academic advisor and a campus

or program director. Disposition by the SPEA program or campus director is final.

Minimum Credit Hours To qualify for the M.P.A. degree, students must complete a minimum of 24 of the required 48 credit hours of graduate SPEA courses at Indiana University. Credit granted to transfer students and those exercising the mid-career option does not reduce the number of courses taken in SPEA below this 24 credit hour minimum.

Academic Integrity Academic integrity requires that students take credit only for their own ideas and efforts. Misconduct, including cheating, fabrication, plagiarism, interference, or facilitating academic dishonesty, is prohibited because it undermines the bonds of trust and cooperation among members of this community and between us and those who may depend on our knowledge and integrity. Complete details are contained in the Indiana University *Code of Student Rights, Responsibilities, and Conduct* at http://life.iupui.edu/help/code.asp.

Academic Appeals Students may appeal academic decisions made by SPEA faculty members. Attempts to resolve such issues should be made first at the class/instructor level. If necessary, written appeals should be submitted to relevant program directors. Appeals must be submitted before the last day of classes in the semester following the point at which the events in question occurred.

Undergraduate Policies

Undergraduate Policies & Procedures

The following policies are specific to SPEA-Indianapolis, though some may also be consistent with SPEA school policy. For a list of all SPEA school policies, please visit the SPEA School Bulletin.

- Academic Standing
  - Good Standing
  - Probation
  - Critical Probation
  - Dismissal
  - Freshman Dismissal
  - Reinstatement/Readmission
- Academic Integrity
- Acceptance of Grade Replacement
- Application for Degree
- Bulletin Policy
- Degrees awarded with Distinction
- Double Counting
- Forgiveness Policy
- Grade Appeals
- Grade Point Average Requirement
- Grading Policies
- Hours Requirements
- Independent Study Credits
- Internship Credits
- Other academic programs
- Pass/Fail Credit
- Repeat Rule
- Requirements for a second bachelor's degree
- Sex Offenders Screening Policy for Students/Applicants
- Statement on Civility
- Student Rights and Responsibilities
- Transfer Course Policy

Academic Standing

Good Standing Students are in good academic standing when their semester and cumulative grade point averages are 2.0 or above, and their GPA in all courses included in the SPEA major requirements is at least 2.3. Students must be in good academic standing to graduate.

Probation

1. Students will be placed on academic probation if any of the following occur:
   1. IU cumulative grade point average (GPA) falls below 2.0,
   2. Semester GPA falls below 2.0, or
   3. With at least 12 credits in the major, the SPEA GPA falls below 2.3.
2. Student will be informed of their probationary status by letter.
3. SPEA students on academic probation are required to participate in an approved intervention provided by SPEA during their first semester on academic probation.
4. SPEA students will be continued on probation when their semester GPA is a 2.0 or above but their cumulative IU GPA is below 2.0.

Critical Probation

1. SPEA Students will be placed on critical probation during the second term (consecutive or nonconsecutive) that their SPEA major GPA is below 2.3.
   1. The SPEA major GPA is considered when a student completes 12 or more credits in the major.
2. If a student is making positive progress in their SPEA courses, but their SPEA GPA continues below 2.3, at the discretion of SPEA undergraduate student services, a student could continue on Critical Probation.
3. Critical probation students must participate in intrusive advising and will create a strategic academic plan to return to good standing in consultation with their academic advisor.
4. After the third semester in which a student's SPEA GPA is below 2.3, the student could be dismissed if not making positive progress.
5. Regardless of SPEA GPA, a student could be dismissed if his/her CGPA or semester GPA is below 2.0 for the second consecutive semester.

Dismissal

1. SPEA students on probation who have completed a minimum of 12 IUPUI GPA

hours are subject to dismissal if any of the following occur:

1. They fail to attain a semester GPA of at least 2.0 for two consecutive semesters,
2. Their Indiana University cumulative GPA is below 2.0 for two consecutive semesters, or
3. They fail to attain a SPEA major GPA of at least 2.3 after any three semesters (consecutive or non-consecutive).

2. Any SPEA student not making satisfactory progress could be dismissed at the discretion of SPEA Student Services and the appropriate program directors. This includes situations in which graduation is mathematically impossible.
3. Students who are dismissed for the first time must sit out for a minimum of one regular (fall or spring) semester and must petition by the established deadlines to be eligible for reinstatement. Reinstatement is not automatic.
4. Students dismissed two or more times must remain out of school for the next two consecutive regular (fall and spring) semesters and petition by the established deadlines to be eligible for reinstatement. Reinstatement after a second dismissal is extremely rare.

Freshman Dismissal

1. SPEA students with less than 26 credits are subject to dismissal if they have attempted at least 12 credits (including Ws) and do not obtain a semester GPA of at least 1.0.
2. Students with less than 26 credits who withdrew from all courses in a term are exempt from dismissal.
3. Students who are dismissed for the first time must sit out for a minimum of one regular (fall or spring) semester and must petition by the established deadlines to be eligible for reinstatement. Reinstatement is not automatic.
4. Students dismissed two or more times must remain out of school for the next two consecutive regular (fall and spring) semesters and petition by the established deadlines to be reinstated.

Reinstatement

1. Reinstatement will be the decision of the academic unit to which the students are petitioning.
2. Students who are reinstated will be classified as probationary students until the IU CGPA is at least a 2.0. During the first regularly enrolled term on probation, the student must achieve a semester GPA and SPEA GPA of at least 2.3. In some cases students may be required to attain a higher semester or SPEA GPA as determined by the reinstatement committee. In each subsequent semester on probation, the student must achieve a semester GPA of at least 2.0 and SPEA GPA of 2.3. Failure to meet the semester GPA and SPEA GPA requirements while on probation could result in dismissal.
3. Reinstatement after a second dismissal is extremely rare.
4. Student's chances of reinstatement will be enhanced by taking workshops, removing grades of incomplete, undertaking assessment of their academic problems, and providing evidence of their ability to complete successful academic work upon their reinstatement to IUPUI.

Academic Integrity This is a basic principle of intellectual life that holds students responsible for taking credit only for ideas and efforts that are their own. Academic dishonesty violates that principle and undermines the bonds of trust and cooperation among members of the university community, and it is not tolerated. Academic misconduct includes cheating, fabrication, plagiarism, interference, violation of course rules, and facilitating academic dishonesty. Students are responsible for knowing what behaviors and activities constitute these different forms of academic misconduct. Penalties and procedures that are applicable when academic misconduct or dishonesty occurs are described in the IUPUI *Code of Student Rights, Responsibilities, and Conduct*.

Acceptance of Grade Replacement SPEA students may replace any grade in a course by retaking it a second time. Students may replace a total of 15 credit hours. Additional information about the IUPUI Grade Replacement Policy can be found on the Registrar's page. Students interested in using this option should talk to their academic advisor to complete the necessary paperwork.

Application for Degree All students must fill out an application for degree on their campus. This application should be completed by September 10 for December graduation, or January 10 for May or August graduation. The SPEA graduation application is found online or by visiting SPEA Student Services.

Bulletin Policy Students are expected to complete the requirements for their undergraduate degree within 10 years of admission to the School of Public and Environmental Affairs. Students are allowed to continue beyond this time period only at the discretion of the undergraduate program director or campus director. If a student has not taken classes for three years or more, that student must satisfy program requirements of the School of Public and Environmental Affairs in effect at the time of reactivation. Requests for deviation from requirements listed in the bulletin must be approved in writing by the program director, whose decision is final.

Degrees Awarded with Distinction SPEA recognizes outstanding performance by awarding bachelor's and associate degrees with three levels of distinction to students who rank in the upper 10 percent of their SPEA graduating class and have completed a minimum of 60 hours at Indiana University for a B.S. (30 hours for an A.S.). The levels of distinction are as follows: highest

distinction, 3.90 and above; high distinction, 3.70 through 3.89; distinction, 3.50 through 3.69.

Double Counting Generally, courses taken to meet a specific degree requirement cannot be double-counted (i.e., used to satisfy any other degree requirement). Students earning a SPEA major, minor, or certificate may double-count two courses across any allowable combination of these programs. The following restrictions apply: 1) students are limited to two minors and 2) SPEA students may not earn a certificate or minor in the same area as their major.

Forgiveness Policy This policy applies to former IU students pursuing a first undergraduate degree who have been away from the IU system and have not attended any other college or university, including any campus of IU, for the last five years. This policy first became available to students returning to SPEA in the fall of 1996. Students may apply for forgiveness upon application for admission to a degree-granting unit. If the student has not yet been admitted to a degree-granting unit, the student should submit a notification of intent to petition for academic forgiveness as part of the academic advising process. If the petition is approved, the student starts with a fresh cumulative grade point index, after which all the rules of academic probation and dismissal (for SPEA) will apply. The school will evaluate the student's transcript, and all courses taken previously will remain on the permanent record. Only credit hours for courses with grades C or above, P, or S may be counted toward degree completion. After approval, the student must complete a minimum of 32 credit hours on the IUPUI campus in order to meet the graduation residency requirement.

Grade Appeals Students have 90 days after the conclusion of a course to appeal a grade. Resolution of the issue with the class instructor must be attempted before submitting a written appeal to the appropriate program director. In the event the instructor for the **Indianapolis** campus cannot be contacted, the student must give a notice of intent to appeal at 90 days.

Grade Point Average Requirement A minimum cumulative GPA of 2.0 is required for the B.S. degrees. In addition, a SPEA major GPA of 2.3 must be maintained in order to graduate. For students seeking certificates from SPEA, the minimum cumulative GPA requirement is a 2.0 or higher, and for students pursuing a minor the minimum cumulative GPA is a 2.3 or higher in all applicable course work.

Grading Policies SPEA follows the official grading system of Indiana University, described in the introductory section of the bulletin.

Hours Requirements Students must successfully complete a minimum of 120 credit hours. The campus at which a student completes the plurality of course work will award the degree, provided that campus is authorized to grant the degree/major/concentration and that the student has been admitted to that campus. Students may transfer no more than 90 credit hours (60 credits from a junior college) toward a Bachelor of Science degree or 30 credit hours toward an Associate of Science degree. Class standing, based on total credit hours that count toward minimum degree requirements, is as follows: senior, 86 or more; junior, 56-85; sophomore, 26-55; freshman, fewer than 26.

Independent Study credits With prior approval, a student may take three courses totaling no more than 10 credit hours by **correspondence** through the IU Division of Extended Studies, Independent Study Program. Under no circumstances may a student satisfy a core/major/concentration requirement by correspondence.

Internship credits With SPEA faculty approval, a student in good standing may earn a maximum of 9 credit hours of elective credit through the SPEA **internship** program. The SPEA internship program is described here.

Other academic programs SPEA students may choose to pursue a **minor** or **certificate** from another school or department or within SPEA in an area other than their degree or major/concentration. Students interested in a minor should contact that department for additional information.

Pass/Fail credit A student in good academic standing may choose to take a maximum of eight elective courses (two per academic year) Pass/Fail for a B.S. degree or two courses for an A.S. degree. Deadlines for exercising this option are published on the Registrar's website.

Repeat Rule SPEA students who repeat a course and do not exercise their right to grade replacement will have both courses averaged in their program GPA, though only one of the repeated courses will count toward graduation. There are some courses that are an exception to this policy such as SPEA J380/V380.

Requirements for a second bachelor's degree Students must petition for approval to work toward a second bachelor's degree. If permission is granted, students are required to take 30 credit hours beyond the credits used for the first bachelor's degree and to satisfy all the requirements for the second degree. Generally, SPEA encourages students to work toward a graduate degree or graduate certificate rather than a second bachelor's degree.

Sex Offenders Screening Policy for Students/ Applicants Indianapolis applicants should be aware that criminal convictions may result in ineligibility for participation in certain courses/activities within the School of Public and Environmental Affairs. Questions regarding school policy on such matters should be addressed to the appropriate program director.

Statement on Civility SPEA, which is a professional school, expects students to conduct themselves in a courteous and civil manner in interactions with professors, staff and fellow students. Examples of discourteous behavior during class include reading the newspaper, working crossword puzzles, listening to headphones, using computers to surf the Web or for other non-class activities, talking or laughing with others, arriving late, and so forth. These behaviors are distracting to the instructor and to classmates, and SPEA faculty and staff will address these problems as they arise either in class or on an individual basis. Disorderly conduct that interferes with teaching, research, administration, or other university or university-authorized activity will not be tolerated, and it may result in disciplinary action, including possible suspension and/or expulsion from the university.

Student Rights and Responsibilities SPEA IUPUI fully supports the rights and responsibilities of students as defined in the IUPUI *Code of Student Rights, Responsibilities, and Conduct*. The *Student Code*spells out the expectations for faculty and students, and it provides the framework for SPEA's judicial process.

A student is entitled to rights in the pursuit of his or her education; freedom from discrimination and harassment; and freedom of association, expression, advocacy, and publication. A student also has the right to contribute to university governance, to receive accommodations for disabilities, and to access records and facilities. In accordance with federal law, student records are confidential and are available to other persons only under specific conditions as outlined in university regulations.

A student is responsible for upholding and following all applicable codes of conduct, including the IUPUI *Student Code* and SPEA's policy on classroom etiquette and disorderly conduct, and for obeying all applicable policies and procedures and all local, state, and federal laws. A student is responsible for facilitating the learning process, attending class regularly, completing class assignments, and coming to class prepared. In addition, a student is responsible for planning his or her own academic program, planning class schedules, and for meeting the requirements for his or her degree or certificate programs. Faculty and academic advisors are available to assist students in meeting this responsibility. A student is responsible for maintaining and regularly monitoring his or her university accounts, including e-mail and bursar accounts. A student is responsible for using university property and facilities in the pursuit of his or her education, while being mindful of the rights of others to do the same. A student is responsible for upholding and maintaining academic and professional honesty and integrity.

Transfer Course Policy (also stated in Hours Requirement) Students may transfer no more than 90 credit hours (60 credits from a junior college) toward a Bachelor of Science degree or 30 credit hours toward an Associate of Science degree.

Student Organizations & Services

SPEA Student Organizations

- **Alpha Phi Sigma**
- **Pi Alpha Alpha**
- **SPEA Student Council**
- **American Criminal Justice Association**
- **SPEA Ambassadors**
- **Public Affairs Student Association (PASA)**

Alpha Phi Sigma

Alpha Phi Sigma is the national criminal justice honor society, with chapters established on the Northwest, Fort Wayne, South Bend, Kokomo, and Indianapolis campuses of Indiana University. The society recognizes scholastic excellence by students in the field of criminal justice. It was founded in 1942 and was admitted to the Association of College Honor Societies in l980. To be eligible, undergraduate students must have earned an overall grade point average of at least 3.2 for at least 40 credit hours of course work, including at least four criminal justice courses with a minimum 3.2 grade point average. To remain in good standing, students must maintain an overall grade point average of at least 3.2 and a grade point average of at least 3.2 in all criminal justice courses completed. Membership of graduate students is limited to those who have a bachelor's degree in criminal justice or who are currently doing graduate work in this field. A minimum grade point average of 3.4 is required of graduate students seeking membership in Alpha Phi Sigma.

Pi Alpha Alpha

Pi Alpha Alpha is the national honorary society for schools of public affairs and administration. The society acknowledges outstanding scholarship and contributions to these fields. It was founded in 1972 by the National Association of Schools of Public Affairs and Administration (NASPAA) to honor those whose performance in public affairs has been distinguished. The Indiana chapter of Pi Alpha Alpha is a charter chapter. Membership in Pi Alpha Alpha may be compared to membership in Phi Beta Kappa for liberal arts graduates. A person evaluating credentials in the various fields of public service should recognize the professional quality such a membership represents.

Undergraduate students are eligible for Pi Alpha Alpha membership when they are in the top 10 percent of their graduating class with a minimum grade point average of 3.5 in at least 15 credit hours of SPEA courses, when they are in the last semester of the junior year or in the senior year, and when they have earned a grade point average of at least 3.0 in all course work.

Graduate students can qualify for membership by being in the top 20 percent of their M.H.A. or M.P.A. class, with a minimum overall grade point average of 3.5, a 3.7 in at least 50 percent of all required courses, and by having completed 50 percent of the required course work (i.e., 24-30 credit hours).

Alumni are eligible for membership if they meet all the requirements of student membership, even if they graduated before induction by the Indiana chapter.

Honorary membership is available to any person who has achieved distinction in public administration and who has the distinguished qualities that Pi Alpha Alpha fosters.

SPEA Student Council

SPEA Student Council is a great way for students to get involved and effect positive change in the school. The purposes of the SPEA Student Council are to: assist students in the resolution of issues relating to the School of Public and Environmental Affairs (SPEA), assist and promote SPEA student organizations, allocate undergraduate Student Activity Fees (SAF) according to university and state guidelines, represent SPEA students' interests at faculty committee meetings, represent SPEA students' interests to the IUPUI Undergraduate Student Government (USG), and represent SPEA students' interests to the associate dean.

American Criminal Justice Association

Join the IUPUI chapter (Alpha Eta Omega) of the American Criminal Justice Association. Open to all criminal justice and public safety management majors,

take part in hands-on activities (such as demonstrations and tours) related to all aspects of the criminal justice system, attend informational sessions designed to prepare you for entrance into various criminal justice and public safety careers, and participate in meaningful service projects that allow you to make a difference while you are still in college.

SPEA Ambassadors

The SPEA Ambassadors serve as representatives for SPEA during recruitment events with SPEA faculty and staff. Ambassadors speak about their experiences in SPEA both academically and socially.

Public Affairs Student Association (PASA)

Public Affairs Student Association is a social organization that will provide networking and volunteer opportunities for all public affairs undergraduate and graduate students.

Internships and Experiential Learning

The SPEA internship program provides students with work experience that complements your classroom preparation. Internships allow you to

- Apply what you've learned in the classroom to real-world situations
- Gain valuable work experience relevant to your academic program
- Spot career opportunities
- Connect with professionals who can mentor you, write letters of recommendations and help you find jobs

SPEA students take advantage of a wide range of internship opportunities. Internship programs are designed for maximum flexibility so that many valid learning experiences can qualify as internships. The internship can be full or part time, and paid or unpaid; however, prior approval by the student's faculty mentor is always required. After obtaining approval for an internship, a student may register for 1-6 credit hours, earning 1 credit for every 80 hours of work. All credit for an internship is awarded on an S/F (Satisfactory/Fail) basis. **Credit is not granted for work experience obtained prior to approval of an internship and enrollment in the appropriate internship class.**

Eligibility

You are eligible for an internship if you meet the following requirements:

BSCJ undergraduate students

- are at least a sophomore (26 or more hours)
- have a cumulative GPA of 2.5 or more
- have completed at least one semester at IUPUI
- have been admitted to a SPEA program.

BSPA undergraduate students

- are at least a sophomore (26 or more hours)
- meet SPEA good standing requirements (2.0 current GPA, 2.0 prior term GPA, 2.3 SPEA GPA)
- have completed at least one semester at IUPUI
- have been admitted to a SPEA program.

Graduate students

- have a cumulative GPA of 3.0 or more
- have completed at least one semester at IUPUI
- have been admitted to a SPEA program.

The SPEA internship process is lead by the student. While required for BSPA majors, all students are encouraged to take advantage of relevant internship opportunities. Instructions for obtaining credit for your internship is available on the SPEA website - www.spea.iupui.edu.

SPEA Alumni Association

Mission: To inspire and cultivate dynamic interactions among alumni, SPEA, and students, for the betterment of SPEA and the professions that it serves. SPEA has a strong commitment to its alumni and considers them among our most valued resources. Contact with the alumni community is maintained through the SPEA Alumni Association, a constituent society within the parent Indiana University Alumni Association. The IUAA SPEA supports many educational, social, and networking events for alumni across the country. In addition the association supports the School's alumni e-newsletter, Connect@SPEA, e-mailed quarterly to nearly 28,000 SPEA alumni located across the country and world. The SPEA Alumni Association awards annual student scholarships to undergraduate and graduate SPEA students from either of SPEA's core campuses (Bloomington and Indianapolis) as well as from other IU campuses which are SPEA program affiliates. The SPEA Alumni Association is governed by an elected board of directors comprised of SPEA Alumni who represent diverse academic and geographic backgrounds.

Faculty

Courses

The notations list prerequisites, recommended prerequisites and corequisites. The abbreviation P refers to course prerequisites and recommended refers to courses listed as recommended prerequisites. Prerequisites can be waived by the instructor of the course. The number of hours of credits is indicated in parentheses following the course title. Courses are listed in four groups: criminal justice and public safety (J), environmental (E) and public affairs (V and K).

Graduate Courses

Criminal Justice Courses

SPEA-J 501 Evolution of Criminological Thought and Policy (3 cr.) This course provides an intensive introduction to the theoretical literature on crime and delinquency. Its purpose is to develop students' ability to critically evaluate and compare theories of crime as they apply to public policy and the criminal justice system.

SPEA-J 502 Research Methods in Criminal Justice and Public Affairs (3 cr.) This course examines research techniques necessary for systematic analysis of the criminal justice system, offenders' behavior, crime trends, and program effectiveness. The course requires that students actively pursue such techniques as conducting interviews, coding data, and designing studies. Criminological research will be critically examined.

SPEA-J 520 Mapping and Analysis for Public Safety (3 cr.) The use of geographic information systems to map locations of events and analyze patterns for decision making and facility location in areas of public safety including criminal justice, fire services, emergency management and homeland security; and the management and application of those systems.

SPEA-J 524 Crisis Management in Public Safety (3 cr.) The identification and management of criminal justice and public safety crisis. Issues of psychological and behavioral responses to crisis, mitigation, contingency and response plans, coordination with governmental, nonprofit agencies and private corporations, crisis decision making, communication, infrastructure and proactive planning. Practical crisis management techniques for use in public safety.

SPEA-J 528 Risk Analysis for Public Safety (3 cr.) An examination of theoretical foundations of risk analysis including the history of risk analysis, risk assessment, perception and communications; models for decision making, techniques for generating alternative courses of action and definitions of risk and opportunity within a context of local, state and federal regulatory guidelines, media and social context.

SPEA-J 531 Homeland Security in the United States (3 cr.) This course addresses federal policy and management issues related to preventing, mitigating, preparing for, responding to, and recovering from major catastrophic events; both natural and man-made, including acts of terrorism. Topics include emergency management, resource and response infrastructures, public health issues, best practices, crisis communications, and business and governmental continuity.

SPEA-J 550 Topics in Criminal Justice (1-3 cr.) Selected research and special topics in criminal justice and public safety. Yes

SPEA-J 582 Criminal Justice Systems (3 cr.) Detailed examination of operations of police, courts, and correctional agencies. Study of management problems in system response to criminal activity. Development of understanding of relationships among system components. Examination of major policy issues in criminal justice, with emphasis on decision-making techniques.

SPEA-J 587 Criminal Violation: Problems and Characteristics (3 cr.) Commonalities in criminal behavior. Circumstances leading to the commission of the criminal act, subsequent perceptions of them. Family, community, and other environments affecting criminal behavior. Behavioral consequences of processes of crime control.

SPEA-J 588 Law and Control in Society (3 cr.) The role of law versus other forms of social control. How social change and social institutions shape the law. Social factors influencing the administration of law.

SPEA-J 666 Criminal Justice Policy and Evaluation (3 cr.) An empirical assessment of the foundations of contemporary and historical attempts to control or prevent crime. Major policies, programs, and strategies are reviewed and critically analyzed. Specific topics and policies will vary in this capstone seminar.

SPEA-J 682 Planning and Management for Criminal Justice and Public Safety (3 cr.) Methods and procedures involved in criminal justice and public safety planning and management. Administration and implementation of public policies in policing, courts, corrections, emergency management and homeland security. Organization, decision making, evaluation and human resource issues of public policy.

Environmental Science Courses

SPEA-E 510 Environmental Regulation and Compliance (3 cr.) The course provides an in-depth study of federal, state, and local regulations and requirements pertaining to the management of hazardous materials.

SPEA-E 511 Sustainability Assessment (3 cr.) P: SPEA-E 538, SPEA-V 506 or equivalent. There has been a proliferation of various metrics that measure the sustainability of products, services, buildings, and institutions. Three are developed: life cycle analysis (IS014040), the USGBC's LEED certification, and the AASHE's STARS metric. Various uses of these metrics to design products, certify performances, and improve outcomes will be evaluated.

SPEA-E 515 Fundamentals of Air Pollution (3 cr.) The purpose of the course is to provide the student with an understanding of the field of air pollution, including the behavior of the atmosphere and pollutants in the atmosphere, effects of air pollution, regulatory programs, engineering controls, and air quality management programs.

SPEA-E 520 Environmental Toxicology (3 cr.) An examination of the principles of toxicology and the toxicity

resulting from environmental exposure to chemical substances.

SPEA-E 526 Applied Mathematics for Environmental Science (3 cr.) P: differential and integral calculus. Applications of mathematics to modeling environmental processes. Applied calculus, numerical analysis, differential equations.

SPEA-E 527 Applied Ecology (3 cr.) P: one introductory-level ecology course. Ecosystem concepts in natural resource management. Techniques of ecosystem analysis. Principles and practices of ecological natural resource management.

SPEA-E 529 Application of Geographic Information Systems (3 cr.) Conceptual and technical overview of geographic information systems (GIS). Applications in various fields of public affairs and environmental science.

SPEA-E 533 Environmental Management Systems: ISO 14001 Based (3 cr.) This course provides students with the knowledge and skills to establish or improve an environmental management system that is compatible with ISO (International Organizations for Standardization) 14001, an international, voluntary standard that is emerging as a best-management practice for environment.

SPEA-E 535 International Environmental Policy (3 cr.) This course examines the forces in society alternately promoting and impeding cooperation in the environmental realm. Our inquiry is guided by four interrelated course units: (1) international environmental law, (2) international political order, (3) the environment and global markets, and (4) sustainable development.

SPEA-E 536 Environmental Chemistry (3 cr.) P: one course in chemistry with lab. Gas law calculations, stoichiometry, steady and nonsteady state box models, stratospheric ozone, chemical kinetics, photochemical smog, greenhouse effect, CO2 equilibria, chemodynamics, pesticides, and toxic metals.

SPEA-E 537 Environmental Chemistry Laboratory (3 cr.) P or C: E536 or consent of instructor. Experimental work in environmental chemical analysis to demonstrate analytical methods and instrumentation used in environmental laboratories, having reference to air, water, and soil quality.

SPEA-E 541 Controversies in Environmental Health (3 cr.) Research, presentation, writing, and argumentation skills will be developed using a debate format. The course focuses on topics related to environmental health and the health of the environment.

SPEA-E 542 Hazardous Materials (3 cr.) Topics of discussion include properties and chemistry of hazardous materials; recognition of potential hazards associated with the use, storage, and transport of these materials; emergency and spill response; health effects of hazardous materials; hazard communication and personal protection; and case studies related to the management of hazardous materials.

SPEA-E 546 Stream Ecology (3 cr.) P: E455. Advanced limnology course that explores patterns and processes characterizing stream ecosystems. Takes a holistic approach that includes: physical, chemical, and biological stream characteristics; watershed patterns; and stream processes (trophic dynamics, colonization and dispersal, community dynamics, and responses to change). A four-hour weekly lab and group project develop necessary analytical skills.

SPEA-E 547 Applied Earth Science (3 cr.) Principles of the earth sciences and their applications to environmental analysis and management. Identification, quantification, and analysis of critical components of watershed systems. Interaction of human activities with the physical environment.

SPEA-E 548 Applied Earth Science Laboratory (3 cr.) Principles and methods of sampling, collection, measurement, analysis, and interpretation of data concerning processes and features of the physical environment. Students will become familiar with field and laboratory equipment within the context of research projects. Emphasis is placed on practical application of basic techniques to real problems.

SPEA-E 549 Environmental Planning (3 cr.) Concepts and methodologies in environmental planning. The planning process. Topics may include environmental impact assessment, economic approaches to environmental decision-making, use of computer models in environmental planning, geographic information systems in environmental planning, environmental perception, and construction of environmental indices. Team projects with planning agencies.

SPEA-E 552 Environmental Engineering (3 cr.) Concerned with biological, chemical, physical, and engineering knowledge essential to the achievement of environmental quality objectives. Theory and design of unit operations and processes for air, water, and land pollution abatement. Emphasis on water quality control, industrial wastewater treatment, and solid waste management.

SPEA-E 555 Topics in Environmental Science (2-3 cr.) Selected research and discussion topics in environmental science. Usually organized in a seminar format.

SPEA-E 560 Environmental Risk Analysis (3 cr.) P: SPEA-E 538, V 506 or consent of instructor Methods of probabilistic risk analysis applied to environmental situations. Event trees, fault trees, toxicological estimation, ecological risk analysis. Social and psychological aspects of risk. Individual and group projects assessing some real environmental risk are an important part of the course.

SPEA-E 562 Solid and Hazardous Waste Management (3 cr.) The purpose is to provide students with a technical foundation in areas of solid and hazardous waste management that can be applied to the examination of policy options. Topics include characterization of the waste stream, regulations, health and environmental risks, liability issues, management technologies, and treatment and disposal options.

SPEA-E 579 Readings in Environmental Science (1-6 cr.) Readings on selected topics in environmental science to be arranged with the individual instructor. Yes

SPEA-E 620 Environmental Analysis Workshop (3 cr.) Projects in environmental analysis.

SPEA-E 625 Research in Environmental Science (1-12 cr.) Research on selected topics in environmental science to be arranged with the individual instructor. Yes

Public Affairs Courses

SPEA-V 502 Public Management (1-3 cr.) Analysis of concepts, methods, and procedures involved in managing public organizations. Problems of organization, planning, decision making, performance evaluation, and management of human resources are considered. Cases are drawn from a variety of public services found at federal, state, and local levels of government.

SPEA-V 504 Public Organizations (1-3 cr.) This course focuses on the behavior and theory of public organizations in four areas: (1) individuals and groups in public organizations, (2) the design of public organizations, (3) organization-environment relations, and (4) interorganizational relations.

SPEA-V 506 Statistical Analysis for Effective Decision Making (3 cr.) Noncalculus survey of concepts in probability, estimation, and hypothesis testing. Applications of contingency table analysis and analysis of variance, regression, and other statistical techniques. Computer processing of data emphasized.

SPEA-V 507 Data Analysis and Modeling for Public Affairs (3 cr.) P: E538 or V506. Focus on analytical models and their use in solving problems and making decisions in the public sector. Discussion of standard approaches to modeling and estimation of parameters.

SPEA-V 508 Topics in Quantitative Analysis (1-3 cr.) P: consent of instructor. Study and application of selected quantitative methods of analysis. Additional topics that are not included in V506 and V507 may be presented, or more advanced examination of topics that are introduced in V506 or V507 may be presented.

SPEA-V 509 Administrative Ethics in the Public Sector (3 cr.) Ethical conduct in the public sector is examined. Topics covered could include personal ethical responsibility, deception, corruption, codes of ethics, policymaking, morality, politics, and whistle blowing. Case studies and media material will be used to illustrate these and other such issues affecting the workplace.

SPEA-V 512 Public Policy Process (1-3 cr.) An examination of the role of public affairs professionals in policy processes. Focuses on relationships with political actors in various policy areas.

SPEA-V 515 Sustainable Communities (3 cr.) Course explores proactive strategies for moving communities toward economic, social and environmental sustainability. Through case studies, projects, tours, and visiting professionals the new thinking in community design, from individual green buildings to regional scales of transportation, land use, commerce, natural systems restoration, waste, food, water, and energy is developed.

SPEA-V 516 Public Management Information Systems (3 cr.) This course focuses on the application of information systems concepts and tools to challenges and opportunities in the public sector. Topics covered will include current trends in information systems; managerial use of information systems; hardware, software, and telecommunications; systems development processes and practices; and strategic and policy issues in information systems.

SPEA-V 517 Public Management Economics (3 cr.) This course focuses on applications of the principles and concepts of intermediate microeconomic theory and managerial economics to public sector management decisions and policy analysis. The course utilizes case studies to give students opportunities to recognize the economic dimensions inherent in the public policy problems and to develop an analytical problem-solving orientation.

SPEA-V 520 Environmental Policy Analysis (3 cr.) The interrelationships among social, technical, and natural systems. Theories of growth. Causes and implications of environmental problems. Alternative policies and mechanisms for environmental control and bases for choice.

SPEA-V 521 The Nonprofit and Voluntary Sector (3 cr.) Same as PHST P521. The theory, size, scope, and functions of the nonprofit and voluntary sector are covered from multiple disciplinary perspectives including historical, political, economic, and social.

SPEA-V 522 Human Resource Management in Nonprofit Organizations (3 cr.) This course provides an overview of the human resource management areas necessary for the productive functioning of nonprofit organizations. Theories of motivation applicable to the management of staff and volunteers and personnel topics of recruitment, selection, board-staff relations, compensation, training, and development are covered.

SPEA-V 523 Civil Society and Public Policy (3 cr.) Exploration of interaction of public policy and nonprofit organizations, drawing on history, political theory, and social science. Includes examination of regulations and taxation. Depending on instructor's interests, course covers nonprofit role in selected policy arenas (such as environment and poverty) and industries (such as international development and health care).

SPEA-V 524 Civil Society in Comparative Perspective (3 cr.) An exploration of state-society relationships in a variety of regimes and time periods. Focuses on ways regimes' policies affect the existence and contribution of those nongovernmental and nonprofit organizations that stand between the individual and the state and how nonprofit organizations shape the policy agenda of a regime.

SPEA-V 525 Management in the Nonprofit Sector (3 cr.) P: V521 or PHST P521. An examination of nonprofit organizations and their role in society. Management issues and public policy affecting these organizations are discussed. Primary emphasis is on U.S. organizations, but attention is given to the global nature of the sector.

SPEA-V 526 Financial Management for Nonprofit Organizations (3 cr.) This course emphasizes a thorough understanding of the language and key concepts of nonprofit financial management. A working knowledge of the basic analytical tools used in financial decision making for nonprofit organizations will be examined through the use of computer software.

SPEA-V 529 Seminar in Career and Professional Development (1 cr.) Introduction to career development in public and environmental affairs. Orientation to career development approaches and resources. Discussion and practice of professional skills and techniques. Orientation to career development opportunities. Grading is on an S/F basis.

SPEA-V 539 Management Science for Public Affairs (3 cr.) P: SPEA-V 506 Focuses on management science methods as applied to public affairs. Includes treatment of decision theory, constrained optimization, and probability simulation.

SPEA-V 540 Law and Public Affairs (1-3 cr.) Explanation of law in society and its influence on public sector operations. Examination of some of the central substantive areas of the study of law, including regulatory processes, administrative adjudication, the Administrative Procedures Act, ombudsmen, and citizen rights, among others.

SPEA-V 541 Benefit-Cost Analysis of Public and Environmental Policies (3 cr.) P: SPEA-V 517 or consent of instructor A course applying benefit-cost analysis to public and environmental policies. The first part of the course develops the foundation of benefit-cost analysis. The second part of the course consists of case studies applying benefit-cost analysis to actual policy decisions.

SPEA-V 542 Governmental Financial Accounting and Reporting (3 cr.) P: SPEA-V 560 or corequisite C: SPEA-V 560 An introduction to the fundamentals of accounting in business, nonprofit, and public sectors. Intended only for students without previous accounting courses. Primary emphasis is on municipal entity fund accounting, including the development and use of financial statements.

SPEA-V 543 Health Services Management (3 cr.) A course that integrates theory and application with respect to management of health service organizations. Emphasis on the role of managers and management within formal health service organizations. Current management and organization theories are applied to an understanding of health care delivery settings.

SPEA-V 544 Marketing for Nonprofit Organizations (3 cr.) This course examines the concepts of marketing and the extent to which they apply to the nonprofit sector, as well as how marketing can assist organizations both in resource acquisition and program development/ implementation. Contexts such as social marketing, arts marketing, fundraising, education, and health care marketing will be considered.

SPEA-V 545 The U.S. Health Care System (3 cr.) An analysis of the delivery of health care in the United States from 1900 to the present. Major system components are defined and studied with emphasis on current health care policy. Topics include the organization of health care delivery on federal, state, and local levels, in both public and private sectors.

SPEA-V 546 Health Services Utilization (3 cr.) An examination of problems of access to health care and the utilization of health services. The social, political, and individual factors associated with utilization are studied, along with social change and control strategies. Special emphasis is given to power and the definition of power in the system.

SPEA-V 547 Negotiation and Dispute Resolution for Public Affairs (3 cr.) Students will learn the skill of interest-based negotiation through role play and simulation. Students will learn about dispute resolution techniques such as mediation, arbitration, fact finding, early neutral evaluation, ombudsmanship, and facilitation. The course covers dispute resolution in federal government and in the context of public, environmental, labor, and business disputes.

SPEA-V 550 Topics in Public Affairs (1-4 cr.) Selected research and discussion topics organized on a semester-by-semester basis, usually with significant student input in the course design. This course may be repeated for credit.

SPEA-V 557 Proposal Development and Grant Administration (3 cr.) This course provides the opportunity for each student to develop a complete proposal through participation in the entire grant application process. The integration of case studies, visual media, printed materials, and class discussions provides students with practical knowledge for writing successful proposals.

SPEA-V 558 Fund Development for Nonprofits (3 cr.) Important aspects of the fundraising process in nonprofit organizations are covered, including techniques and strategies for assessing potential sources of support, effective use of human resources, process management, theory to underlay practice, analysis of current practice, practice standards, and discussion of ethical problems.

SPEA-V 559 Principles and Practices of Social Entrepreneurship (3 cr.) This course will survey issues in social entrepreneurship and engage students in completing class projects applying principles and practices of social entrepreneurship to problems of nonprofit organizations, government agencies, and social-purpose business.

SPEA-V 560 Public Finance and Budgeting (1-3 cr.) The fiscal role of government in a mixed economy; sources of public revenue and credit; administrative, political, and institutional aspects of the budget and the budgetary process; problems and trends in intergovernmental fiscal relations.

SPEA-V 561 Public Human Resources Management (3 cr.) Analysis of the structure, operations, and design of public personnel systems, including government agencies and public enterprise. Relationships between public policy and personnel concepts, values, and operations are considered.

SPEA-V 562 Public Program Evaluation (1-3 cr.) Examination of how the programs of public agencies are proposed, established, operated, and evaluated. Discussion of the role and conduct of research in the program evaluation process. In addition, techniques of effective evaluation and analysis are discussed.

SPEA-V 564 Urban Management (3 cr.) This course deals with the management of public policy in American urban government, with special attention to the relationships between structure, process, and policy. Readings and case studies will focus on urban

management problems relating to leadership, planning, and operations.

SPEA-V 566 Executive Leadership (3 cr.) The course offers an in-depth examination of factors that contribute to successful executive leadership practice in a wide variety of organizational settings. Topics include what leadership is, what impact leadership has, and how leaders use various approaches and powers to achieve their goals.

SPEA-V 569 Managing Interpersonal Relations (3 cr.) P: SPEA-V 502 This course will teach students the theory and application of individual and group human behavior. Key interpersonal skills will be modeled expertly on videotape. Students will be expected to practice these key skills and receive feedback on their performance.

SPEA-V 570 Public Sector Labor Relations (1-3 cr.) An introductory overview of labor relations concepts within the framework of the public sector. The development, practice, and extent of the collective bargaining process, as well as the administration of the labor agreement, will be examined for state agencies, local municipalities, and school districts.

SPEA-V 572 Urban Topics (3 cr.) Selected topics in urban policy and administration. The course is sometimes restricted to a special group of students in order to focus on a particular research interest.

SPEA-V 580 Readings in Public Affairs (1-3 cr.) P: Consent of instructor Readings on selected topics in public affairs. This course may be repeated for credit.

SPEA-V 581 Public Safety Law (1-3 cr.) Survey of historical development of Anglo-American law of public safety, including criminal law, civil remedies, administrative regulation of risk, and recent developments in employee and consumer safety. Emphasis on understanding legal theory and practice as basis for management decisions. Comparison of jurisprudential viewpoints and other disciplinary approaches to causation, prevention, and correction of public safety problems.

SPEA-V 585 Practicum in Public Affairs (1-6 cr.) Students hold work assignments with public agencies. Grading is on an S/F basis. This course may be repeated for credit.

SPEA-V 586 Public Safety in the U.S. (2-3 cr.) Overview of criminal justice and public safety. Definitions of public safety and identification of major components. Functional description of major public safety agencies. Discussion of basic issues in public safety. Management in public safety system.

SPEA-V 590 Research in Public Affairs (1-6 cr.) P: Consent of instructor Research on selected topics in public affairs. This course may be repeated for credit.

SPEA-V 595 Managerial Decision Making (1-3 cr.) P: SPEA-V 504 and V 539 Applications of decision-making tools to substantive public management problems. A variety of managerial cases and issues are selected for intensive discussion and analysis.

SPEA-V 597 Land Use Planning (3 cr.) The course examines the theoretical basis and practical need for land use planning. Emphasis is placed on the institutional context in which land use planning occurs. The course provides an in-depth analysis and exercise in plan preparations.

SPEA-V 598 Governing and Leading in a Global Society (3 cr.) This gateway course will increase the student's appreciation of the role of the profession in governance across multiple sectors of society within the global context. Students will learn norms associated with effective practice and frame a professional development plan to acquire the leadership skills to support these norms.

SPEA-V 600 Capstone in Public and Environmental Affairs (3 cr.) Interdisciplinary course designed to expose students to the realities of the policy process through detailed analyses of case studies and projects. Course integrates science, technology, policy, and management.

SPEA-V 601 Workshop in Public Affairs (1-6 cr.) Projects in public affairs. The students work on a research and resource team to complete a project for a public-sector client. Faculty act as project managers and resource personnel.

SPEA-V 602 Strategic Management of Public and Nonprofit Organizations (3 cr.) P: V502. Concepts, cases, and problem solving associated with the structure and process of strategic management in the public sector, broadly defined to include governmental and nongovernmental organizations.

SPEA-V 639 Managing Government Operations (3 cr.) P: V502. This is an introductory survey of operations management. Emphasis is placed on the analysis, design, and management of operation systems using models from operations management. Readings, lectures, and structured exercises are used to present the models and demonstrate their application.

SPEA-V 645 Environmental Law (3 cr.) An overview of U.S. environmental law. Key environmental statutes are examined, as are court decisions interpreting those statutes. Topics include water and air pollution, hazardous waste, toxins, pesticides, and environmental impact statements.

SPEA-V 650 Topics in Public Personnel Management (1-3 cr.) P: V561. Readings and research on selected topics in the public personnel field. Topics may include such subjects as affirmative action, occupational health and safety, workforce forecasting and planning, and personnel approaches to position classification.

SPEA-V 652 Managing Work Force Diversity in Public Organizations (3 cr.) P: SPEA-V 502 Explores and applies theoretical and empirical research from a management perspective on workforce diversity. Topics include theories and constructs pertaining to diversity in work organizations, organizational postures toward workplace diversity, the interface between heterogeneity, work processes, and management practices; and the effects of heterogeneity on work-related outcomes.

SPEA-V 662 Public Program Management and Contracting (3 cr.) An examination of theories, concepts, and processes concerning multi-actor program implementation and alternative forms of service delivery. Focus will be on the problems and challenges public managers face in designing and managing

contractual relationships, networks, and other complex implementation structures.

SPEA-V 662 Seminar in Productivity and Program Evaluation (3 cr.) Examines the problem of rigorously determining the productivity of governmental services, including problems of defining and measuring public products, specifying public service inputs, and statistically estimating public service production functions. Concepts are given concrete application through careful investigation of attempts to measure productivity of governmental services.

Undergraduate Courses

Criminal Justice Courses

SPEA-J 101 The American Criminal Justice System (3 cr.) Introduction to the criminal justice system of the United States and its function in contemporary society.

SPEA-J 150 Public Safety in America (3 cr.) The protection of persons and property involves a number of public and private organizations. This course examines the roles that agencies working within the fire services, emergency management, criminal justice, and the private security sector play in securing public safety in the United States.

SPEA-J 201 Theoretical Foundations of Criminal Justice Policies (3 cr.) P: SPEA-J 101 This course examines the impact of sociological, biological, and economic theories of crime and the practice of criminal justice. Focus is on the nature and importance of theory, context of theoretical developments, methods for the critical analysis of theoretical developments, and policy implications of the varying perspectives considered.

SPEA-J 202 Criminal Justice Data, Methods, and Resources (3 cr.) P: SPEA-J 101 Course examines basic concepts of criminal justice. Students become familiar with research techniques necessary for systematic analysis of the criminal justice system, offender behavior, crime trends, and program effectiveness. Students will learn to critically evaluate existing research. Students will become familiar with existing sources of criminal justice data and will learn to assess the quality of that data.

SPEA-J 215 Concepts of Forensic Science (3 cr.) Forensic science and the criminal justice system. Evidence collection and analysis. Forensic chemistry including drugs and trace evidence; biology including blood spatter and DNA; pathology; entomology; anthropology; and forensic science and the law. Please note that students taking this course cannot also receive credit for J322.

SPEA-J 222 Murder in America: Causes and Consequences (3 cr.) An investigation of homicide in the United States. Focus on the level and nature of homicides as well as domestic homicides; serial and mass murder; race, ethnicity, and gender; drugs and alcohol; school and workplace homicides; investigation; profiling and the death penalty; and homicide prevention and intervention programs.

SPEA-J 260 Topics in Criminal Justice (1-3 cr.) Study of selected issues in criminal justice. Topics vary from semester to semester. This course may be repeated for credit.

SPEA-J 272 Terrorism and Public Policy (3 cr.) This course surveys terrorism in democratic societies, with an emphasis on public policy responses designed to combat terrorism. Overviews of terrorist organizations in various countries are interspersed with analyses of significant terrorist events and public policies, and legal and public safety responses the events create.

SPEA-J 275 Diversity Issues in Criminal Justice (3 cr.) This course will examine the influence of diversity issues such as race, ethnicity, class, and gender on crime and the treatment of underrepresented groups thoughout the American criminal justice system.

SPEA-J 301 Substantive Criminal Law (3 cr.) P: SPEA-J 101 Recommended: SPEA-J 201, SPEA-J 202 The development, limitations, and application of substantive criminal law utilizing the case-study method.

SPEA-J 302 Procedural Criminal Law (3 cr.) P: SPEA-J 101 Criminal law application and procedure from the initiation of police activity through the correctional process, utilizing the case-study method.

SPEA-J 303 Evidence (3 cr.) P: SPEA-J 101 The rules of law governing proof at trial of disputed issues of fact; burden of proof; presumptions and judicial notice; examination, impeachment, competency, and privileges of witnesses; hearsay rule and exceptions—all related as nearly as possible to criminal, as opposed to civil, process.

SPEA-J 304 Correctional Law (3 cr.) P: SPEA-J 101 Legal problems from conviction to release: pre-sentence investigations, sentencing, probation and parole, incarceration, loss and restoration of civil rights.

SPEA-J 305 Juvenile Justice (3 cr.) P: SPEA-J 101 This course is designed to provide an overview of the justice system's response to abused, neglected, and dependent children; juvenile misconduct; and delinquent behavior. An extensive review of the development of recent legal changes to the court, options for prevention, treatment of juvenile offenders, and possible system reforms.

SPEA-J 306 The Criminal Courts (3 cr.) P: SPEA-J 101 Recommended: SPEA-J 201, SPEA-J 202 An analysis of the criminal justice process from prosecution through appeal. The organization and operation of felony and misdemeanor courts are examined. Topics include prosecutorial decision-making, plea bargaining, judicial selection, and the conduct of trials, sentencing, and appeal.

SPEA-J 310 Introduction to Administrative Processes (3 cr.) P: SPEA-J 101 Introduction to principles of management and systems theory for the administration of criminal justice agencies. Credit not given for both J310 and V270.

SPEA-J 312 White Collar Crime (3 cr.) P: SPEA-J 101 White collar crime is an examination of the definitions, theories, laws, and policy responses that shape crimes by corporations, government agencies, professionals, and others engaged in legitimate occupations.

SPEA-J 320 Criminal Investigation (3 cr.) P: SPEA-J 101 Theory of investigation, crime scene procedures, interviews, interrogations, surveillances, and sources of information; collection and preservation of physical evidence; investigative techniques in specific crimes.

SPEA-J 321 American Policing (3 cr.) P: SPEA-J 101 Recommended: SPEA-J 201, J 202 This course will examine the history, evolution, and organization of policing in the United States. Emphasis is placed on such major contemp-orary issues as the police role, discretion, use of force, corruption, accountability, and community policing.

SPEA-J 322 Introduction to Criminalistics (3 cr.) P: SPEA-J 101 Recommended: SPEA-J 301 The broad range of physical evidence developed through the investigative process, and methods of identifying and establishing validity and relevance through forensic laboratory techniques.

SPEA-J 324 Technology, Crime, and Public Safety (3 cr.) P: SPEA-J 101 Focuses on role of technological systems in criminal justice, system types available, evolving applications, usages by public safety organizations, technology use by criminals and terrorists, the management and organizational effects of technologies, training, cost issues, anticipated impacts of technologies, and the political and legal implications for citizens and the public.

SPEA-J 331 Corrections (3 cr.) P: SPEA-J 101 Recommended: SPEA-J 201, J 202 This course examines the historical development of the American correctional system and the study of administration of local, state, and federal corrections programs, including jails, probation, community corrections, and prisons. Includes the study of punishment rationales, current correctional policies, and possibilities for reform.

SPEA-J 355 Global Criminal Justice Perspectives (3 cr.) P: SPEA-J 101 An international review of select criminal justice perspectives and systems within the primary legal traditions of common, civil, Islamic, and socialist systems, as well as those that do not fit into established categories, such as Native American and African tribal justice.

SPEA-J 369 Private Justice: Police, Courts, and Corrections (3 cr.) P: SPEA-J 101 This course examines the role of private policing and security, courts and adjudication, and corrections. Includes legislative and ethical issues and the economics of criminal and juvenile justice privatization. Principles of loss prevention, protection of assets, relationship between public and private services, current issues in privatization.

SPEA-J 370 Seminar in Criminal Justice (3 cr.) P: SPEA-J 101 Selected contemporary topics in criminal justice. This course may be repeated for credit.

SPEA-J 376 Principles of Public Safety (3 cr.) P: SPEA-J 101 Examination of threats to public safety and of governmental response at various levels to those threats. Treatment of such areas as transportation and highway threats, occupational safety and health, criminal threats, emergency and disaster planning, consumer protection, and fire control and suppression. Discussion of techniques to identify and measure risk, the acceptability of risk, and governmental attempts to control risk.

SPEA-J 380 Internship in Criminal Justice (1-6 cr.) P: Permission of instructor Open to interested students who qualify upon approval of the faculty. Students may be placed with various criminal justice agencies for assignment to a defined task relevant to their educational interests. Tasks may involve staff work or research. Full-time participants may earn up to 6 credit hours. Course is graded S/F (Satisfactory/Fail). This course may be repeated for credit.

SPEA-J 387 Foundations of Homeland Security (3 cr.) Examination of the theory and research driving homeland security and emergency management measures and an analytical look at the practices and principles of homeland security from an empirical perspective.

SPEA-J 426 Mapping & Analysis-Public Safety (3 cr.) P: SPEA-J 101 or SPEA-J 150 The use of the geographic information systems to map locations of events and analyze patterns for decision making in areas of public safety including criminal justice, fire services, emergency management, and homeland security.

SPEA-J 429 Public Safety Management and Leadership (3 cr.) This capstone course is designed to examine the major public management principles, policy concerns, and leadership theories learned in an undergraduate management curriculum as they relate to how public safety is achieved in the field and in the policy making arena.

SPEA-J 433 Institutional Corrections (3 cr.) P: SPEA-J 101 The history and development of the jail, penitentiary, prison, and reformatory. Analysis and evaluation of contemporary imprisonment.

SPEA-J 439 Crime and Public Policy (3 cr.) P: SPEA-J 201, J 202 and K 300 A detailed examination of the major efforts designed to control or reduce crime. A review of existing knowledge is followed by an investigation of current crime-control theories, proposals, and programs.

SPEA-J 440 Corrections in the Community (3 cr.) P: SPEA-J 101 A detailed analysis of correctional alternatives to incarceration that focus on the reintegration of the offender while remaining in the community. Because of their extensive use, considerable attention is given to probation and parole. Other topics include diversion, community residential programs, restitution, halfway houses, and home detention.

SPEA-J 445 Trends in Corrections (3 cr.) P: SPEA-J 101 Analysis and evaluation of contemporary correctional systems. Discussion of recent research concerning the correctional institution and the various field services.

SPEA-J 460 Police in the Community (3 cr.) P: SPEA-J 101 In-depth examination of crime as an urban policy problem, focusing on the role of police and victims in defining crime as a policy problem and their role in seeking to reduce the incidence of crime.

SPEA-J 470 Seminar in Criminal Justice (1-3 cr.) P: Senior Standing Emphasizes current developments in legal, administrative, and operational aspects of the criminal justice system.

SPEA-J 480 Research in Criminal Justice (1-6 cr.) P: Junior standing and consent of instructor Individual research under guidance of faculty member. This course may be repeated for credit.

SPEA-E 100 Environmental Topics (1-3 cr.) Study of selected issues in environmental affairs. Topics vary from semester to semester. This course is repeatable.

SPEA-E 162 Environment and People (3 cr.) An interdisciplinary examination of the problems of population, pollution, and natural resources and their implications for society. Credit not given for both SPEA-E 162 and E 262.

SPEA-E 272 Introduction to Environmental Sciences (3 cr.) P: statistics Application of principles from life and physical sciences to the understanding and management of the environment. Emphasis will be placed on (1) the physical and biological restraints on resource availability and use, and (2) the technological and scientific options to solving environmental problems.

SPEA-E 400 Topics in Environmental Studies (1-3 cr.) An interdisciplinary consideration of specific environmental topics. This course is repeatable.

SPEA-E 412 Risk Communication (3 cr.) Risk communication is the means by which technical information is communicated to others (the public included), especially in the context of making decisions about environmentally related policy (such as siting of a landfill). The course emphasizes both theory (in lectures) and practical experience through developing and acting in role-play scenarios.

SPEA-E 431 Water Supply and Wastewater Treatment (3 cr.) P: SPEA-E 272, CHEM-C 101 or equivalent, and MATH-M 119 or equivalent Health and ecological premises for water and wastewater treatment; principles of water supply; treatment, distribution, and construction; basis for water standards and laboratory examinations; wastewater disposal methods and construction for private installations, institutions, municipalities, and industries; water quality control with respect to wastewater pollution.

SPEA-E 451 Air Pollution and Control (3 cr.) P: SPEA-E 272, CHEM-C 101 or equivalent, and MATH-M 118 or equivalent A survey course covering the chemistry, transport, and fate of air pollutants related to current issues of air quality, such as photochemical smog, ozone depletion, particulate matter, and indoor air quality. Topics include the types, sources, health and environmental effects, measurement, evaluation, control, regulation, and modeling of air pollution concentrations.

SPEA-E 452 Solid and Hazardous Waste Management (3 cr.) P: SPEA-E 272 Types and sources of solid waste; collection methods; disposal techniques: sanitary landfill, incineration, composting, reclaiming, or recycling; advantages and disadvantages of each; special and hazardous waste handling; operation and management of solid and hazardous waste programs.

SPEA-E 476 Environmental Law and Regulation (3 cr.) Introductory course in environmental law and regulation. Subjects covered include command and control regulation, air quality, water quality, toxics, waste management, energy, natural resources, international environmental law, and alternative dispute resolution.

SPEA-E 490 Directed Field Research in Environmental Science (1-4 cr.) Individualized laboratory or field-based research in any field of environmental science, under the direction of an advising professor. Students are expected to write a report on their research at the end of each semester. May be used to fulfill laboratory course requirement with the permission of the appropriate science department.

SPEA-E 491 Honors Research in Environmental Science (1-4 cr.) Individualized laboratory or field-based honors research in any field of environmental science, under direction of an advising professor. Students are expected to write a report on their research at the end of each semester. May be used to fulfill laboratory course requirement with permission of the appropriate science department.

Public Affairs Courses

SPEA-K 300 Statistical Techniques (3 cr.) P: MATH M 014 or equivalent Recommended: MATH-M 118 Nature of statistical data. Ordering and manipulation of data. Measures of central tendency and dispersion. Elementary probability. Concepts of statistical inference decision: estimation and hypothesis testing. Special topics discussed may include regression and correlation, analysis of variance, nonparametric methods. Credit not given for both K300 and either ECON E270/E370, SOC S250, or PSY/MATH K310.

SPEA-K 301 Statistics Laboratory (1 cr.) C: SPEA-K 300 This course is an optional 1 credit hour module to accompany K300 and must be taken concurrently with K300. The course focuses on application of techniques being taught in K300. The course will allow students to obtain tutoring with specific problems. K301 sessions will be linked with K300 lectures.

SPEA-V 100 Current Topics in Public Affairs (1-3 cr.) Readings and discussion of current public issues and problems. This course may be repeated for credit.

SPEA-V 170 Introduction to Public Affairs (3 cr.) Broad coverage of public affairs through critical and analytical inquiry into policy making at all levels of government. Particular emphasis on intergovernmental relations as they affect policy in the federal system. Credit not given for both V160 and V170.

SPEA-V 221 Nonprofit and Voluntary Sector (3 cr.) This course provides a broad overview of the United States nonprofit sector. Topics include the sector's size and scope and its religious, historical, and theoretical underpinnings. It also examines perspectives on why people organize, donate to, and volunteer for nonprofit organizations and looks at current challenges that the sector faces.

SPEA-V 241 Management Foundations and Approaches (3 cr.) This course examines core functions of management and the political socioeconomic context within which organizations operate in different sectors of employment. It is organized into five main parts: what management entails, approaches to the study of management, contextual factors, core issues, and management functions. Course concludes with a capstone exercise.

SPEA-V 246 Elements of Governmental and Nonprofit Financial Accounting Cycle (3 cr.) This is a course designed to prepare students for next-level courses in governmental accounting and reporting, nonprofit accounting and reporting, and health accounting and finance.

SPEA-V 252 Career Development (3 cr.) Career planning and placement strategies, assessment of labor market information, market surveys, and development of customized portfolios. Emphasis given to projects, papers, and independent research.

SPEA-V 260 Topics in Public Affairs (1-3 cr.) Study of selected issues in public affairs. Topics vary from semester to semester. This course may be repeated for credit.

SPEA-V 261 Computers in Public Affairs (3 cr.) An introduction to computer applications in public affairs. Topics include basic terminology, core concepts, and issues associated with managing operating systems, designing networks, and applying user information technology to public affairs problems. Issues of security and ethics in computing are also considered.

SPEA-V 263 Public Management (3 cr.) This course is an examination of the management process in public organizations in the United States. Special attention will be given to external influences on public managers, the effect of the intergovernmental environment and, in particular, problems of management in a democratic, limited government system.

SPEA-V 264 Urban Structure and Policy (3 cr.) An introduction to urban government and policy issues. Topics include urban government structure and policy making, the economic foundations and development of cities, demography of cities and suburbs, land-use planning, and other selected urban policy problems. Credit not given for both SPEA V161 and SPEA V264.

SPEA-V 270 Survey of Administrative Techniques (3 cr.) Introduction to principles of management and systems theory for the administration of public agencies. Credit not given for both V270 and J310.

SPEA-V 272 Terrorism and Public Policy (3 cr.) A survey of the incidence of terrorism in democratic societies, with particular emphasis on public policy responses designed to combat terrorism in cities. Overviews of ongoing conflicts with terrorist organizations in various countries are interspersed with analyses of significant terrorist events and the public policies and responses such events create.

SPEA-V 340 Urban Government Administration (3 cr.) Structure of local government in the United States, federalism and intergovernmental relations, policy problems faced by local officials, and the implications of these problems for local government administrators.

SPEA-V 346 Introduction to Government Accounting and Financial Reporting (3 cr.) P: BUS-A 200 or A 201 or consent of instructor An introduction to government accounting, including comparison with accounting for the private sector, intended as background for the use of financial administrators. The course deals primarily with municipal accounting. Not open to students with more than 7 credit hours of accounting.

SPEA-V 348 Management Science (3 cr.) P: SPEA-K 300, MATH M025 or MATH-M 118 Introduction to management science models and methods for policy analysis and public management. Methods include decision analysis, linear programming, queuing analysis, and simulation. Computer-based applications are included. Prior familiarity with computers is recommended, though not required.

SPEA-V 350 Introduction to Development Administration (3 cr.) Introduction to the administration of development activities in poor countries. Examines key problems, including the complexity of development, the interplay of external donors and domestic administration, and the difficulties of organizing and managing development efforts. Combines cases and textual readings, allowing the student to analyze actual programs, policies, and projects.

SPEA-V 352 Personal Career Planning (1 cr.) Investigation of careers, the world of work, and the career planning process. The focal point is on students and their goals. Provides assistance in developing practical, meaningful, and realistic insights into the nature of making a public career choice in today's world. Credit not awarded for both V352 and BUS X420.

SPEA-V 356 Introduction to Nonprofit Accounting and Reporting (3 cr.) P: P: BUS-A 200 or A 201 or consent of instructor This course covers concepts and processes of nonprofit accounting and financial reporting with exploration of differences between for-profit, governmental, and nonprofit systems. Examples will be drawn from health organizations, welfare agencies, charities, and educational institutions.

SPEA-V 361 Financial Management (3 cr.) P: BUS-A 200 or BUS-A 201 This course introduces students to accounting, financial management techniques, and financial reporting. Topics include accounting, debit/credit sheets and balance sheets, financial indicators, fund balances, fringe benefits and pensions, and payroll management.

SPEA-V 362 Nonprofit Management and Leadership (3 cr.) Students in this course examine the management practices of nonprofit organizations. The course encourages students to take the perspectives of nonprofit managers, volunteers, board members, policy makers, donors, and clients. Course projects expand understanding of the nonprofit sector and develop students' management skills, analytical tools, and knowledge.

SPEA-V 365 Urban Development and Planning (3 cr.) P: SPEA-V 264 and K 300 This course identifies the major problems associated with urban development in the United States and investigates the potential of public planning strategies and tools to deal with these problems. An emphasis is placed on the application of analytical approaches to problem definition and solution.

SPEA-V 366 Managing Behavior in Public Organizations (3 cr.) This course provides an introduction to the management of people in public organizations. Focus is on behavioral science in management and related analytical and experiential applications.

SPEA-V 368 Managing Government Operations (3 cr.) P: SPEA-V 348 Application of analytical techniques to operating decisions in public management sector. Cases are used extensively to illustrate the application of techniques (such as charting, capacity and demand analysis, forecasting, performance measurement, decision

analysis, queuing/simulation, Markov modeling, and cost-effective analysis) to design, scheduling, inventory assignment, transportation, and replacement decisions.

SPEA-V 369 Managing Information Technology (3 cr.) Analysis and application of information technology to problem solving.

SPEA-V 370 Research Methods and Statistical Modeling (3 cr.) P: SPEA-K 300 or equivalent This course will introduce the student to the basic methods, issues, analytical techniques, and ethical considerations of evaluation research.

SPEA-V 371 Financing Public Affairs (3 cr.) P: SPEA-V 170, ECON-E 201, and E 202 A survey of economic and political theories of market failures, public expenditure evaluation, economic stabilization, systems of redistribution, and fiscal federalism. Examples and applications to contemporary government decisions.

SPEA-V 372 Government Finance and Budgets (3 cr.) P: SPEA-V 170, ECON-E 201 or E 202 Study of fiscal management in public agencies, including revenue administration, debt management, and public budgeting.

SPEA-V 373 Human Resources Management in the Public Sector (3 cr.) The organization and operation of public personnel management systems with emphasis on concepts and techniques of job analysis, position classification, training, affirmative action, and motivation.

SPEA-V 375 Emergency Services Administration (3 cr.) An overview of management principles and functional components of EMS systems.

SPEA-V 376 Law and Public Policy (3 cr.) The purpose of this course is to provide a basic understanding of the origins, process, and impact of law in the making and implementing of public policy. The course's major objective is to provide students with the substantive concepts necessary to understand the judicial system and law in its various forms.

SPEA-V 377 Legal Process and Contemporary Issues in America (3 cr.) P: SPEA-V 376 An introduction to the American legal system, including the Constitution, courts system, and administrative law in federal and state agencies. Readings and discussion center around current issues affected by the legal process.

SPEA-V 378 Policy Processes in the United States (3 cr.) P: senior standing. Intended as an integrative senior course, primarily for SPEA students. Course content includes analytical perspectives of the policy process, the centers of policy, and the public interest. Selected cases involving problem analysis and decision making on public issues are included, as well as discussion of current policy issues.

SPEA-V 379 Performance Measurement and Program Evaluation (3 cr.) This course provides an overview of program evaluation as it relates to public affairs, criminal justice, health policy, and environmental science, with particular emphasis on measuring program outcomes. The course is designed for students who envision themselves working in management, policy making, or research roles.

SPEA-V 380 Internship in Public and Environmental Affairs (0-6 cr.) P: Consent of instructor Open to interested students upon approval of the faculty. Students are placed with public agencies or governmental units for assignment to a defined task relevant to their educational interests in public affairs. Tasks may involve staff work or research. Full-time participants may earn up to 6 credit hours. Course is graded S/F. This course may be repeated for credit.

SPEA-V 381 Professional Experience (1-6 cr.) Students will be required to fulfill a minimum of 120 hours of relevant professional work.

SPEA-V 382 Political Action and Civic Engagement (3 cr.) Examines citizen efforts to effect social change, with an emphasis upon political movements and parties as mechanisms for achieving that change.

SPEA-V 386 Case Studies for Policy Analysis (3 cr.) This course focuses on analyzing case studies of public policies using a variety of disciplinary perspectives, including application of the principles and concepts of intermediate microeconomic theory.

SPEA-V 390 Readings in Public and Environmental Affairs (0-3 cr.) P: Consent of instructor Independent readings and research related to a topic of special interest to the student. Written report required. This course may be repeated for credit.

SPEA-V 391 Honors Readings in Public and Environmental Affairs (1-3 cr.) P: Consent of instructor and honors advisor Restricted to students in SPEA Honors Program. This course may be repeated for credit.

SPEA-V 401 Financial and Cost-Benefit Analysis (3 cr.) This course familiarizes students with the principles of financial analysis, cost-benefit analysis, and Kaldor/Hicks accounting. Topics include net present value calculation, net annual worth, public and private decision criteria, and market data adjustment for taxes, rents, and other market distortions.

SPEA-V 405 Public Law and the Legislative Process (3 cr.) This course focuses on Congress as a policy-making body in the United States public law system. It covers the constitutional framework for congressional operations as well as technical aspects of the legislative process such as bill drafting and analysis, the role of leadership, and the prerogatives of individual members.

SPEA-V 406 Public Law and the Electoral Process (3 cr.) The purpose of this course is to facilitate understanding of the interaction of electoral politics and policy. It covers the legal framework of the evolution of the "right" to vote, the impact of the judiciary on the structure of elections, limitations on campaign practices, and the importance of legislative districting and its control.

SPEA-V 408 Individual Rights, Common Goods and Public Policies (3 cr.) Considers the tension between individual and majoritarian rights in our constitutional system, and the effects of that tension on the formulation of public policy.

SPEA-V 412 Leadership and Ethics (3 cr.) This course is designed to examine the complex leadership issues and challenges facing communities and explore how citizens and government can work together to address these challenges. This includes exploration of how the problems, conflicts, and dilemmas encountered by leaders when

making decisions must be considered within an ethical framework.

SPEA-V 421 Metropolitan Development (3 cr.) Discussion of the process of development in metropolitan regions. Includes topics such as economic development, land use evolution, and demographic change. Consideration of relevant policy issues.

SPEA-V 422 Transportation Policy Analysis (3 cr.) This course examines current issues in transportation to identify the key analytic and management issues that must be considered in developing effective public policy. Particular emphasis will be placed on examining the rationale for and actual impact of existing government policies, and on analyzing the likely impacts of policy alternatives.

SPEA-V 432 Labor Relations in the Public Sector (3 cr.) An introductory overview of labor relations in the public sector. Course includes the development, practice, and extent of the collective bargaining process and administration of the labor agreement by state and local governments.

SPEA-V 435 Negotiation and Alternative Dispute Resolution (1-4 cr.) This course introduces students to the theories and techniques of alternative dispute resolution. The course covers interest-based negotiation, mediation, arbitration, fact finding, early neutral evaluation, and other techniques used in business, labor relations, environmental disputes, family relations, and international affairs.

SPEA-V 436 Communication for Government and Nonprofit Organizations (3 cr.) This course will develop an appreciation regarding the critical nature of communication by managers in the public and nonprofit sector. It will introduce students to the skills critical to effective communication as professionals.

SPEA-V 438 Mass Media and Public Affairs (3 cr.) Course will analyze the role of the media in the formation of public policy, including the responsibility of journalists, legal and ethical constraints, business pressures and their effects, impact of technology, and similar issues.

SPEA-V 441 Topics in Financial Management and Policy (3 cr.) P: SPEA-V 372 Various topics focusing on financial management and policy are examined in state and local settings. This course may be repeated for credit.

SPEA-V 442 Topics in Budgeting or Cost/Benefit (3 cr.) P: SPEA-V 372 Various topics in budgeting or cost/benefit analysis are examined. This course may be repeated for credit.

SPEA-V 443 Managing Workforce Diversity (3 cr.) The composition and nature of the work force is changing. Managers must decide how to accommodate real differences among the members of their organizations. This course seeks to provide information for practitioners who hope to integrate an understanding of workforce diversity into their management style and professional behavior.

SPEA-V 444 Public Administrative Organization (3 cr.) A review of research findings and analysis of the operation of public agencies and their performance.

SPEA-V 447 Federal Budget Policy (3 cr.) Examination of the institutions and processes involved in putting together the annual federal budget, with emphasis on the role of the Appropriations and Budget Committees in Congress and on the White House and the Office of Management and Budget in the executive branch. Selected major policy areas will be considered.

SPEA-V 449 Policy Senior Seminar (3 cr.) P: V348. Discussion of the role of policy analysts in government. Applications of analytical tools to substantive policy areas such as transportation, community development, education, poverty, manpower, and health.

SPEA-V 450 Contemporary Issues in Public Affairs (1-3 cr.) Extensive analysis of selected contemporary issues in public affairs. Topics vary from semester to semester. This course may be repeated for credit.

SPEA-V 451 Social Policy and the Aging (3 cr.) A focused examination of government and the elderly. Public policy and administration of income, health, housing, employment, and social service programs, as well as analysis of the context of aging policy.

SPEA-V 456 Topics in Public Law (3 cr.) Extensive analysis of selected contemporary issues in public law. Topics vary from semester to semester. This course may be repeated for credit.

SPEA-V 457 Management Science in the Public Sector (3 cr.) P: V348, CSCI C211, and K300. An intermediate treatment of management science methods with primary application to public managerial decision support. Topics include network analysis, queuing, simulation, and others. Computer-based analysis is emphasized.

SPEA-V 458 Fund Development for Nonprofit Organizations (3 cr.) Course builds an understanding of the practice, philosophy, law, and theory of fundraising. Students establish an organization's value base and mission, prepare funding appeals, evaluate readiness for a campaign, assess funding sources, implement fundraising vehicles, evaluate effectiveness, and discuss stewardship of contributions.

SPEA-V 460 Intergovernmental Relations (3 cr.) Overview of the dynamics of multiorganizational governance in the United States. Examination of federal and other systems. Structure and operations of intergovernmental programs and the role of managers within these systems.

SPEA-V 461 Computer Applications in Public Affairs (3 cr.) P: BUS K201. This course is designed to provide students with the essentials of computer hardware and software needed to operate effectively in a public sector environment. The course will emphasize public sector applications using software packages or microcomputers and minicomputers.

SPEA-V 462 Community Development (3 cr.) The process and outcomes of local citizen-based efforts to improve social, economic, and cultural conditions. Interaction of public and nonprofit sectors in community revitalization. Experiences, cases, and problems involving both rural and urban settings.

SPEA-V 463 Interpersonal Relations in the Workplace (1-4 cr.) Key interpersonal skills will be modeled through

a variety of media and experiences. Students will practice these skills and receive feedback. Students will be expected to participate in structured experiences designed to give them insight into their behavior and how it will affect their ability to achieve personal and professional objectives.

SPEA-V 465 Geographic Information Systems for Public and Environmental Affairs (3 cr.) P: V261 and V369. Students will learn the concepts, methodologies, and perspectives essential for using geographic information systems (GIS) to address critical public affairs issues. Through course projects, students will learn how to use desktop and Internet-based GIS applications and will develop complementary skills related to designing and implementing GIS applications for public-sector organizations.

SPEA-V 470 Community Development Workshop (3 cr.) This course will be conducted as an undergraduate research workshop. The focus will be on community development problems, such as long-range planning, the delivery of government services, or local economic development. The research topic of the course will change each year and will be announced the preceding semester.

SPEA-V 471 Urban Management Systems (3 cr.) P: V348 and senior standing. This course is designed to extend the student's skill in applying a variety of qualitative and quantitative methods to the problems of urban government planning and management.

SPEA-V 473 Management, Leadership, and Policy (3 cr.) P: SPEA-K 300 and V 370 This course seeks to integrate learning across the public affairs curriculum. Students will review and reflect about their learning in management, leadership, and policy. Experiential methods —service learning, projects, cases, and exercises—will be used to help students apply theory, concepts, and skills.

SPEA-V 475 Database Management Systems (3 cr.) P: SPEA-V 261, V 369 or equivalent Students learn contemporary theories and methodologies regarding design, use, and management of database systems among public-sector organizations. The course provides hands-on experience with tools such as entity-relationship diagrams, query languages, database management software; and an understanding of critical database management issues such as security, backup, and recovery.

SPEA-V 490 Directed Research in Public and Environmental Affairs (0-3 cr.) To be arranged with the individual instructor and approved by the chairperson of the undergraduate program. This course may be repeated for credit.

SPEA-V 491 Honors Research in Public and Environmental Affairs (1-3 cr.) P: Consent of instructor and honors advisor Restricted to students in the SPEA Honors Program. This course may be repeated for credit.

SPEA-V 499 Honors Thesis (3 cr.) P: Consent of instructor and honors advisor Research and paper to be arranged with individual instructor and approved by the campus SPEA Honors Program director. This course may be repeated for credit.

School of Science

Welcome to the School of Science at IUPUI!

The School of Science at IUPUI provides an environment where students are both challenged and nurtured by each other, faculty and staff on a campus with a multitude of resources to help students succeed.

The School of Science offers over 25 undergraduate, ten masters, and nine Ph.D. degree programs across seven departments. In addition to preparing students for science or technology-related careers and for advanced study in graduate school, an undergraduate program in one of the sciences is an excellent background for professional study in medicine (including veterinary medicine), dentistry, business administration, law, and areas of the social sciences where quantitative methods are important.

Students here reap the benefits of small classes, an interactive learning environment, and challenging material and lab work. As early as their freshman year, our undergraduates are able to participate in real research with renowned faculty. Our undergraduate students have co-authored research papers and presented at national conferences.

We're a community of learners and students thrive here. Students support each other through peer-led mentoring, providing a unique environment where students become leaders by teaching others. Student organizations and volunteer programs are just a couple of the ways for students to get involved outside of the classroom.

We're great scientists, but more importantly, we're innovative teachers. As a school and a university, we've developed teaching methods that engage and encourage students—and are used at universities throughout the United States. Simply put, we care about our students.

The School of Science and its seven departments are situated in the heart of Indianapolis, near five hospitals, the Indiana University schools of medicine, dentistry and nursing, and countless science and technology companies. Through internships and undergraduate research, our students have opportunities to collaborate across disciplines, across campus, and across the academic and business communities. Our graduates emerge as well-rounded scientists whose experiences have prepared them to solve the problems of the future.

The School of Science at IUPUI is critical to the success of the life, health and technology industries in central Indiana—our graduates are the life blood of an economy that needs innovative thinkers, contributing team members and eager learners. Committed to having real impact in their work and community, our graduates emerge from the School of Science as well-rounded scientists whose experiences have prepared them to solve the problems of the future.

Bulletin Designation and Program Planning

Bulletin Designation

All colleges and universities establish certain academic requirements that must be met before a degree is granted. These regulations concern such things as curricula and courses, majors and minors, and campus residence. Advisors, directors, and deans will aid students in meeting these requirements, but students are responsible for fulfilling them. At the end of the course of study, the faculty and the Board of Trustees vote on the conferring of degrees. If requirements have not been satisfied, degrees will be withheld pending satisfactory completion of these requirements. For this reason, students need to acquaint themselves with all regulations and to remain informed throughout their university career.

This bulletin lists the requirements and regulations in effect for students who are admitted to the School of Science in August 2012 (Fall semester). Students who enter after this date may be subject to different requirements; students who entered before August 2012 may elect to follow the graduation requirements that were in effect at the time of their admission to their degree program or the graduation requirements that became effective thereafter. However, the requirements chosen must be from only one bulletin. If a student has not completed a bachelor's degree program within eight years of admission, the student may be obliged by the major department to meet the requirements of a subsequent bulletin. Additionally, students in good standing who have not been enrolled at the university for two or more consecutive years must satisfy the requirements of the School of Science bulletin in effect upon their return.

Program Planning and Advising Guidelines

The experience of academic advisors and of successful students suggests the following guidelines for effective planning of undergraduate programs:

- Students should be thoroughly familiar with all academic requirements that must be met before a degree is granted.
- Students should seek appointments with academic advisors in their major departments before the dates established by the university calendar for registration. In such conferences students should, as a minimum objective, make certain that they review their degree requirements and that they have made an appropriate plan for the next semester.
- Each student should understand that the responsibility for determining an appropriate academic program and for meeting every degree requirement rests with the student; faculty or staff members acting in the capacity of advisors are obligated only to assist students in meeting this responsibility. Any student who needs clarification of any of the requirements for the degree program is urged to obtain this clarification from an academic advisor or from the School of Science, Science Building, Room LD 222, phone (317) 274-0625.

Centers of Research Excellence in the School of Science

School of Science research centers enable faculty and their student teams to engage in ongoing interdisciplinary projects, funded in part by federal grants and foundation support. Research Centers include:

- Assertive Community Treatment Center of Indiana (ACT)
- Center for Earth and Environmental Science (CEES)
- Center for Mathematical Biosciences
- Center for Membrane Biosciences

- Center for Nuclear Magnetic Resonance
- Center for Regenerative Biology and Medicine
- Center for Urban Health
- Center for Visual Information Sensing and Computing
- Institute for Integrated Nanosystems Development
- Institute for Mathematical Modeling and Computational Science

Degree and Certificate Programs

Degree Programs in the School of Science

The School of Science at Indiana University–Purdue University Indianapolis awards students degrees from both Purdue University (PU) and Indiana University (IU). This list shows all the degrees awarded and the institution granting the degree.

Biology

- Bachelor of Arts - PU
- Bachelor of Science - PU
- Master of Science - PU
- Doctor of Philosophy[1] - PU

Biotechnology

- Bachelor of Science - PU

Chemistry

- Bachelor of Arts - PU
- Bachelor of Science in Chemistry - PU
- Master of Science - PU
- Doctor of Philosophy[1,2] - PU

Computer and Information Science

- Bachelor of Science - PU
- Master of Science - PU
- Doctor of Philosophy[1] - PU

Environmental Science

- Bachelor of Science - IU

Forensic and Investigative Sciences

- Bachelor of Science in Forensic and Investigative Sciences - PU
- Master of Science - PU

Geology

- Bachelor of Arts - IU
- Bachelor of Science - IU
- Master of Science - IU
- Doctor of Philosophy in Applied Earth Sciences - IU

Interdisciplinary Studies

- Bachelor of Science - PU

Mathematical Sciences

- Bachelor of Science - PU
- Actuarial Science
- Applied Math
- Pure Math
- Math Education

- Master of Science - PU
- Pure/Applied Math
- Applied Statistics
- Math Education

- Doctor of Philosophy (Mathematics)[1] - PU
- Applied Math
- Pure Math
- Mathematical Statistics

- Doctor of Philosophy (Biostatistics)[3] - IU

Physics

- Bachelor of Science - PU
- Bachelor of Science (Physics) / Bachelor of Science (Electrical Engineering) dual degree program - PU
- Bachelor of Science (Physics) / Master of Science (Mechanical Engineering) dual degree program - PU
- Master of Science - PU
- Doctor of Philosophy[1,2] - PU

Psychology

- Bachelor of Arts - PU
- Bachelor of Science - PU
- Master of Science - PU
- Industrial/Organizational (I/O) Psychology
- Clinical Psychology

- Doctor of Philosophy in Clinical Psychology - PU
- Doctor of Philosophy[1] - PU

Several departments participate in the joint M.D.-Ph.D. program with the Indiana University School of Medicine. In this program, students concurrently earn an Indiana University Doctor of Medicine degree and a Ph.D. degree in the School of Science.[1,2]

1. Purdue University Ph.D. Programs, pursued at IUPUI, arranged through Purdue, West Lafayette.
2. Indiana University Ph.D. Programs, pursued at IUPUI, in departments or programs of the Indiana University School of Medicine in which School of Science faculty hold adjunct appointments.
3. Indiana University Ph.D. program, pursued at IUPUI, in collaboration with the Division of Biostatistics in the IU School of Medicine.

Certificate Programs in the School of Science (PU)

The School of Science at Indiana University–Purdue University Indianapolis also awards Purdue University (PU) certificates.

Computer and Information Science

Undergraduate

- Certificate in Applied Computer Science

Graduate

- Certificate in Biocomputing
- Certificate in Biometrics
- Certificate in Computer Security
- Certificate in Databases and Data Mining
- Certificate in Software Engineering

Overview

Mission

The School of Science offers undergraduate and graduate programs that prepare students for a variety of careers. As part of its instructional mission, the school also provides non-science majors with the scientific background to help them become more aware and better-informed consumers and citizens. Scientists advance the boundaries of our knowledge of the natural world through applied and basic research. Science benefits society by providing fundamental knowledge and technical advances in such areas as health, ecology, computer and software design, mathematical modeling, and chemistry. Science informs the social sciences with scientific understanding of psychology, applications of statistics, and an understanding of environmental issues. Science contributes to the arts and humanities by offering knowledge of the physical universe and the symmetry and wonder of nature.

In addition to preparing students for science-related careers and for advanced study in graduate school, an undergraduate program in one of the sciences is an excellent background for professional study in medicine (including veterinary medicine), dentistry, business administration, law, and areas of the social sciences where quantitative methods are important.

An education in the sciences also opens the door to employment in the high-tech industry in sales and management.

Supplementing the full-time instructional staff, with ranks ranging from instructor through full professor, is a contingent of well-qualified, experienced lecturers who are recruited from the reserve of talent existing in the Indianapolis area.

Last Updated: February 2012

History

Indiana University (IU) established its first extension center at Indianapolis in 1916, although the first IU course was taught in Indianapolis in 1890. The Indianapolis campus of Purdue University (PU) grew out of World War II training programs sponsored by Purdue, and began its major operations in 1946. Indiana University established the Indianapolis regional campus in the mid-1960s. In 1968, the Trustees of Indiana University created Indiana University at Indianapolis, and less than a year later, in 1969, the Trustees of Indiana and Purdue universities merged their Indianapolis operations to form Indiana University–Purdue University at Indianapolis (IUPUI). Indiana University was selected to administer the campus. Purdue brought to the merger a growing complex of degree programs and Purdue's traditional strengths in the physical sciences, engineering, and technology. The name of the campus was changed to Indiana University–Purdue University Indianapolis in 1992. As of Fall 2011, IUPUI enrolled more than 28,000 students.

A restructuring of undergraduate programs at IUPUI in the Fall of 1972 created three new schools: the School of Liberal Arts (humanities and the social sciences), the School of Engineering and Technology, and the School of Science (physical, behavioral, and life sciences).

After being housed for almost 22 years on the 38th Street campus, the School of Science made a historic move in two phases into two buildings on the main campus during 1991-1993.

Mission

The School of Science at IUPUI provides an environment where students are both challenged and nurtured by each other, faculty and staff on a campus with a multitude of resources to help students succeed.

The School of Science offers over 25 undergraduate, ten masters, and nine Ph.D. degree programs across seven departments. In addition to preparing students for science or technology-related careers and for advanced study in graduate school, an undergraduate program in one of the sciences is an excellent background for professional study in medicine (including veterinary medicine), dentistry, business administration, law, and areas of the social sciences where quantitative methods are important.

Students here reap the benefits of small classes, an interactive learning environment, and challenging material and lab work. As early as their freshman year, our undergraduates are able to participate in real research with renowned faculty. Our undergraduate students have co-authored research papers and presented at national conferences.

We're a community of learners and students thrive here. Students support each other through peer-lead mentoring, providing a unique environment where students become leaders by teaching others. Student organizations and volunteer programs are just a couple of the ways for students to get involved outside of the classroom.

We're great scientists, but more importantly, we're innovative teachers. As a school and a university, we've developed teaching methods that engage and encourage students—and are used at universities throughout the United States. Simply put, we care about our students.

The School of Science and its seven departments are situated in the heart of Indianapolis, near five hospitals, the Indiana University schools of medicine, dentistry and nursing, and countless science and technology companies. Through internships and undergrad research, our students have opportunities to collaborate across disciplines, across campus, and across the academic and business communities. Our graduates emerge as well-rounded scientists whose experiences have prepared them to solve the problems of the future.

The School of Science at IUPUI is critical to the success of the life, health and technology industries in central Indiana—our graduates are the life blood of an economy that needs innovative thinkers, contributing team members and eager learners. Committed to having real impact in their work and community, our graduates emerge from the School of Science as well-rounded scientists whose experiences have prepared them to solve the problems of the future.

Undergraduate Requirements

Beginning Students

Students entering IUPUI directly from high school should file their applications for admission early in their senior year.

Acceptance to the university as a new student is influenced by several factors. The Undergraduate Admissions Center is guided by the following:

- The applicant should be a high school graduate or be scheduled to graduate before enrolling at IUPUI.
- The extent to which the student meets or exceeds the minimum subject requirements indicated below is considered. For admission to the School of Science, the student's record should include the following course work:

Subjects	Semesters
English	8
History and Social Science	6
Algebra	4
Geometry	2
Trigonometry	1-2
Laboratory Science	6 (including chemistry and biology)
Combination of foreign language, additional mathematics, laboratory science, social science, or computer science courses	6-7

Applicants to the School of Science are strongly encouraged to complete AP science and mathematics courses if available at their high school. Applicants considering majors in physics or chemistry are encouraged to complete a calculus course in high school.

In planning high school electives, the curricula of the various departments of the School of Science contained in this bulletin should be reviewed. Departmental advisors will be glad to help with planning for admission.

- All applicants are required to take the Scholastic Aptitude Test (SAT) or the American College Test

(ACT). IUPUI requires that the writing section of the test also be completed. It is recommended that these tests be taken in the spring of the junior year in high school or fall of the senior year.

The Undergraduate Admissions Center will examine the applicant's high school transcript and standardized test scores to determine both admission to the university and acceptance to the School of Science.

Students should declare a major when applying for admission so a departmental advisor can be assigned.

Transfer Students

From IUPUI Schools, Indiana University Campuses, and Purdue University Campuses

Prospective transfer students should have a minimum grade point average of 2.00 on a 4.00 scale, meet the requirements of the department or program they wish to enter, and be in good disciplinary standing. In order to be accepted for admission to the School of Science, students must first provide the materials indicated below.

- An IUPUI campus student should file a record change form, which may be obtained from the School of Science.
- A Purdue University campus student must make an official application through the IUPUI Undergraduate Admissions Center at www.enroll.iupui.edu.
- A student from another Indiana University campus, must make an official application through the IUPUI Undergraduate Admissions Center using the Intercampus Transfer Application. Additional information is available at www.enroll.iupui.edu.

From Other Colleges and Universities

Students who have earned transfer credit for 12 credit hours and have a minimum cumulative grade point average of 2.00 on a 4.00 scale from other institutions may be considered for admission to the School of Science. Admittance to the school is contingent upon acceptance into a departmental program. Students should submit the following with their application for admission to the IUPUI Undergraduate Admissions Center:

- a copy of their high school record showing satisfactory completion of entrance requirements; students with less than 26 hours of transfer work must present SAT or ACT scores.
- an official transcript of work completed in all institutions previously attended
- evidence of good academic and disciplinary standing at the institution last attended

The Undergraduate Admissions Center evaluates credit from other institutions, and the major department and the School of Science determine its applicability toward degree requirements in the School of Science.

A marginal applicant may be granted admission, admitted on probation, or have admission denied.

From IUPUI to Other Indiana University and Purdue University Campuses

Students transferring from IUPUI to other Indiana University and Purdue University campuses should consult the appropriate departments at those campuses about equivalence of courses.

Transfer Credit Evaluation

The student's major department and the School of Science determine acceptability of transfer credits from another college or university to the School of Science. In some cases, a course description and/or a course syllabus may need to be reviewed by the corresponding IUPUI department for consideration of applicability to a degree requirement.

Graduate Requirements

To be considered for admission, a candidate must have a bachelor's degree from an accredited institution and must show promise of ability to engage in advanced work and evidence of adequate preparation to pursue graduate study in the field chosen. The minimum standard for unconditional admission to the graduate school is a graduation grade point average of 3.00 (B) or the equivalent. An applicant not meeting these requirements should take the aptitude tests section of the Graduate Record Examination (GRE). Individual departments may set higher grade point requirements and may require the submission of additional evidence of academic performance, such as GRE scores.

A minimal score of 550 on the Test of English as a Foreign Language (TOEFL) paper version/PBT or a minimal score of 213 on the TOEFL computer-based version/CBT is required for admission to the graduate school for applicants whose native language is not English. Departments may set higher requirements. Applicants in the Indianapolis area may substitute the IUPUI English as a Second Language (ESL) Placement Examination for the TOEFL. See the English for Academic Purposes web site for additional information. Information about this test is also available from the Office of International Affairs online at http://international.iupui.edu/.

Application should normally be made at least six months before the beginning of the session in which the student wishes to enroll. However, please refer to the specific academic program for admission deadlines. Late applications may also be accepted. Applicants will be advised of the action taken on their applications by the Dean of the Purdue University Graduate School. Applications to the Department of Earth Sciences will be considered by the Department of Earth Sciences and forwarded to the IUPUI office of the Indiana University Graduate School; applicants will be notified of the results by the graduate advisor in the Department of Earth Sciences. Applications to the Biostatistics Ph.D. Program will be considered by the Department of Mathematical Sciences and forwarded to the IUPUI office of the Indiana University Graduate School; applicants will be notified of the results by the graduate advisor in the Department of Mathematical Sciences.

Qualified students may be authorized to pursue a Ph.D. degree at IUPUI in areas where a program has been arranged with Purdue-West Lafayette, Indiana University-Bloomington, or the Indiana University School of

Medicine. For further details, contact the department in which study is desired.

Applicants should be aware that, under Indiana law, criminal convictions might result in ineligibility for admission to certain programs at IUPUI. For the School of Science, criminal convictions may also result in ineligibility for enrollment in certain courses or participation in certain projects. Questions regarding school policy on such matters should be addressed to the Associate Dean for Research and Graduate Affairs.

Financial support in the form of teaching and research assistantships is available through the departments of the School of Science. Students who want to be considered for IUPUI fellowships must submit GRE (verbal/quantitative/analytic) scores. GRE Area examination scores may be submitted for consideration. Visit the School of Science web site for more information.

Degree-Seeking Graduate Student Application

Application to all graduate programs must be made by electronic applications accessible through the School of Science web site. Application fees are submitted online at the time of application. If necessary, paper applications may be obtained from each department.

Applicants must submit complete, official transcripts of all previous college and university studies and three letters of academic reference for evaluation by the major department.

Non-Degree Students

Undergraduate Non-Degree Program

Students who hold a bachelor's degree from IUPUI or another university may register at IUPUI as Undergraduate Non-Degree students. This enrollment status is desirable for students who need to take a small number of undergraduate courses in order to apply for medical school or other professional programs in, for example, dentistry, occupational therapy, optometry, pharmacy, physical therapy, and veterinary medicine. Students enrolled as undergraduate non-degree pay undergraduate tuition and fees, but may only register for undergraduate courses.

Undergraduate non-degree students who enroll in graduate courses may be administratively withdrawn from these courses and may forfeit tuition and associated fees. Undergraduate non-degree students may seek academic advising through the School of Science. Students enrolled as undergraduate non-degree are eligible for Stafford loans only, provided they have not used up their undergraduate financial aid eligibility. They may also seek loans or support through banks or other financial institutions. Students enrolled as undergraduate non-degree are not eligible for other forms of financial aid through IUPUI.

Graduate Non-Degree Program

Students normally use the graduate non-degree classification whose intent is to take course work for personal improvement. A student who wishes to become a candidate for an advanced degree should consult with the chosen major department at the time of application for admission as a graduate non-degree student. The major department will advise applicants of the procedure for obtaining status as a degree-seeking student. An application to become a graduate non-degree student is obtained through the IUPUI Graduate Office at the following Web site: http://www.iupui.edu/~gradoff/gnd/. Additional information can be obtained at the IUPUI Graduate Office, University Library, Room UL 1170, 755 W. Michigan Street, Indianapolis, IN 46202; telephone (317) 274-1577.

No more than 12 hours of credit earned under this classification may be used on a plan of study for a Purdue University degree program without approval of the major department and the Purdue University Graduate School. Similarly, no more than 9 hours of credit earned under this classification may be used in a plan of study for an Indiana University degree program without approval of the major department.

Admission

All students entering the School of Science must have been officially admitted to the university by the IUPUI Undergraduate Admissions Center, Campus Center, Room 255, 420 University Blvd., Indianapolis, IN 46202. Further information and application forms may be obtained at this address, by calling (317) 274-4591, or on the Web at www.enroll.iupui.edu.

Applicants should be aware that, under Indiana law, criminal convictions might result in ineligibility for admission to certain programs at IUPUI. For the School of Science, criminal convictions may also result in ineligibility for enrollment in certain courses or participation in certain projects. Questions regarding school policy on such matters should be addressed to the Executive Director of Academic and Student Affairs or the Associate Dean for Academic Affairs.

International Students

International students seeking admission to the School of Science at IUPUI must submit the international application for admission, which is available online from the IUPUI Office of International Affairs. Additional information can be obtained at IUPUI Office of International Affairs, 902 W. New York St., ES 2126 46202; phone (317) 274-7000; fax (317) 278-2213; email: @..

Area Requirements

Area Requirements for Baccalaureate Degrees

The faculty of the School of Science has adopted the following degree requirements for the Bachelor of Arts and Bachelor of Science degrees. Students may follow the School of Science and departmental requirements that are in effect when they enter the School of Science, or they may choose new requirements that become effective after that date.

School of Science requirements are the minimal requirements in various areas, and individual departments may require more, as stated in their degree descriptions. Students should consult with departmental advisors in planning their courses of study.

- Bachelor of Arts Degree and Bachelor of Science Degree Requirements

Degree Programs

The Purdue School of Science offers the following undergraduate degree programs:

Baccalaureate Degrees

- Biology (B.A.)
- Biology (B.S.)
- Biology Secondary School Teaching
- Biotechnology
- Chemistry (B.A.)
- Chemistry (B.S., ACS Certified)
- Chemistry Secondary School Teaching
- Computer and Information Science
- Earth Science Secondary School Teaching
- Environmental Science
- Forensic and Investigative Sciences (FEPAC accredited)
- Geology (B.A.)
- Geology (B.S.)
- Interdisciplinary Studies
- Mathematics
- Physics
- Physics Secondary School Teaching
- Psychology (B.A.)
- Psychology (B.S.)

Undergraduate Programs

The Purdue School of Science offers the following undergraduate degree programs:

Baccalaureate Degrees

- Biology (B.A.)
- Biology (B.S.)
- Biology Secondary School Teaching
- Biotechnology
- Chemistry (B.A.)
- Chemistry (B.S., ACS certified)
- Chemistry Secondary School Teaching
- Computer and Information Science
- Earth Science Secondary School Teaching
- Environmental Science
- Forensic and Investigative Sciences (FEPAC accredited)
- Geology (B.A.)
- Geology (B.S.)
- Interdisciplinary Studies
- Mathematics
- Physics
- Physics Secondary School Teaching
- Psychology (B.A.)
- Psychology (B.S.)

Bachelor of Arts Degree and Bachelor of Science Degree Requirements

The requirements for these bachelor's degree programs include the common general education core approved by the faculties of both the School of Liberal Arts and the School of Science. This general education core, together with the major, is a curriculum based on the IUPUI Principles of Undergraduate Learning (see the front part of this bulletin for a description of these principles).

First-Year Experience Course

Each beginning freshman and transfer student (with less than 18 credit hours) in both the Bachelor of Arts and Bachelor of Science programs in the School of Science is required to take either SCI-I120 Windows on Science (1 cr.) or an equivalent freshman experience course that may be offered by a department in which the student is a major. Beginning computer science majors are encouraged to take CSCI 12000 Windows on Computer Science (1 cr.).

Area I English Composition and Communication Skills

Both Bachelor of Arts and Bachelor of Science students are required to take two courses in English composition worth at least 3 credit hours each and COMM-R110 Fundamentals of Speech Communication (3 cr.). The English composition requirement is partially satisfied by completing ENG-W131 (or ENG-W140 Honors). The second composition course must have ENG-W131 (or ENG-W140) as a prerequisite. An appropriate course in technical or research writing may be used to complete the second composition course requirement. Consult departmental guidelines. A grade of C or higher must be obtained in both composition courses.

Area II Foreign Language

1. A first-year proficiency in a foreign language is required for the Bachelor of Arts degree program. Note that American Sign Language may be used to satisfy this requirement. This requirement may be satisfied in one of the following ways:
   - by completing first-year courses (8-10 credit hours) in a single language with passing grades;
   - by completing a second-year or third-year course with a grade of C or higher;
   - by taking a placement test and placing into the 200 level or higher. See the School of Liberal Arts section of this bulletin for items related to the placement test, courses numbered 117, nonnative speakers, and credit for lower division language courses.
2. Check the department section of the bulletin for any reference to a language proficiency requirement for a Bachelor of Science degree program (e.g. Mathematical Sciences).

Area III

IIIA Humanities, Social Sciences, and Comparative World Cultures

Four courses totaling 12 credit hours are required. The courses are to cover each of four areas:

1. HIST-H114 History of Western Civilization II (3 cr.) or *HIST-H109 Perspectives on the World: 1800 to Present (3 cr.) (*NOTE: Environmental Science, Geology, and Interdisciplinary Studies majors must take HIST-H114. HIST-H109 will not meet this requirement for these majors.)
2. One course in humanities from List H
3. One course in social sciences from List S
4. One course in comparative world cultures from List C

Courses taken from lists H, S, and C must be outside the student's major.

It is recommended that the student see an academic advisor for updated lists.

Note that some courses may appear on more than one list. A cross-listed course may apply to only one of the required areas specified by the lists.

List H: Humanities

- Afro-American Studies (AFRO)
- AFRO-A150 Survey of the Culture of Black Americans (3 cr.)

- American Studies (AMST)
- *AMST-A103 Topics in American Studies (3 cr.) (*NOTE: Not all topics are acceptable. Please confirm with the School of Science Dean's Office for approval.)

- Art History (HER)
- HER-H100 Art Appreciation (3 cr.)
- HER-H101 History of Art I (3 cr.)
- HER-H102 History of Art II (3 cr.)

- Classical Studies (CLAS)
- CLAS-C205 Classical Mythology (3 cr.)

- Communication Studies (COMM)
- COMM-T130 Introduction to Theatre (3 cr.)

- English (ENG)
- ENG-L105 Appreciation of Literature (3 cr.)
- ENG-L115 Literature for Today (3 cr.)

- Film Studies (FILM)
- FILM-C292 Introduction to Film (3 cr.)

- Folklore (FOLK)
- FOLK-F101 Introduction to Folklore (3 cr.)

- History (HIST)
- HIST-H105 American History I (3 cr.)
- HIST-H106 American History II (3 cr.)
- HIST-H108 Perspectives on the World to 1800 (3 cr.)
- HIST-H113 History of Western Civilization I (3 cr.)
- HIST-H217 The Nature of History (3 cr.)

- Music (MUS)
- MUS-M174 Music for the Listener (3 cr.)

- Philanthropic Studies (PHST)
- PHST-P105 Giving and Volunteering in America (3 cr.)

- Philosophy (PHIL)
- PHIL-P110 Introduction to Philosophy (3 cr.)
- PHIL-P120 Ethics (3 cr.)

- Religious Studies (REL)
- REL-R133 Introduction to Religion (3 cr.)
- REL-R173 American Religion (3 cr.)
- REL-R180 Introduction to Christianity (3 cr.)
- REL-R212 Comparative Religions (3 cr.)

- Women's Studies (WOST)
- WOST-W105 Introduction to Women's Studies (3 cr.)

- World Languages and Cultures (WLAC)
- WLAC-F200 Cross-Cultural Encounters (3 cr.)

List S: Social Sciences

- Afro-American Studies (AFRO)
- AFRO-A150 Survey of the Culture of Black Americans (3 cr.)

- Anthropology (ANTH)
- *ANTH-A104 Culture and Society (3 cr.)

  (*Note: ANTH-A304 may be substituted for ANTH-A104. Students may not receive credit for both. ANTH-A304 is typically offered in Summer II.)
- Communication Studies (COMM)
- COMM-C180 Introduction to Interpersonal Communication (3 cr.)

- Economics (ECON)
- ECON-E101 Survey of Current Economic Issues and Problems (3 cr.)
- ECON-E201 Introduction to Microeconomics (3 cr.)
- ECON-E202 Introduction to Macroeconomics (3 cr.)

- English (ENG)
- ENG-G104 Language Awareness (3 cr.)

- Folklore (FOLK)
- FOLK-F101 Introduction to Folklore (3 cr.)

- Geography (GEOG)
- GEOG-G110 Introduction to Human Geography (3 cr.)
- GEOG-G130 World Geography (3 cr.)

- History (HIST)
- HIST-H117 Introduction to Historical Studies (3 cr.)

- Political Science (POLS)
- POLS-Y101 Principles of Political Science (3 cr.)
- POLS-Y103 Introduction to American Politics (3 cr.)
- *POLS-Y213 Introduction to Public Policy (3 cr.)
- POLS-Y219 Introduction to International Relations (3 cr.)

  (*Note: POLS-Y213 and SPEA-V170 are equivalent courses. Students may not receive credit for both.)
- Psychology (PSY)
- PSY-B104 Psychology as a Social Science (3 cr.)
- or
- PSY-B110 Introduction to Psychology (3 cr.)
- PSY-B310 Life Span Development (3 cr.)

- Public and Environmental Affairs, School of (SPEA)
- *SPEA-V170 Introduction to Public Affairs (3 cr.)

  (*Note: POLS-Y213 and SPEA-V170 are equivalent courses. Students may not receive credit for both.)
- Sociology (SOC)
- SOC-R100 Introduction to Sociology (3 cr.)
- SOC-R121 Social Problems (3 cr.)

- Women's Studies (WOST)
- WOST-W105 Introduction to Women's Studies (3 cr.)

List C: Comparative World Cultures

- Anthropology (ANTH)
- *ANTH-A104 Culture and Society (3 cr.)

  (*Note: ANTH-A304 may be substituted for ANTH-A104. Students may not receive credit for both. ANTH-A304 is typically offered in Summer II.)

- Classical Studies (CLAS)
- CLAS-C205 Classical Mythology (3 cr.)

- Geography (GEOG)
- GEOG-G110 Introduction to Human Geography (3 cr.)

- History (HIST)
- HIST-H108 Perspectives on the World to 1800 (3 cr.)

- Political Science (POLS)
- POLS-Y217 Introduction to Comparative Politics (3 cr.)

- Religious Studies (REL)
- REL-R133 Introduction to Religion (3 cr.)
- REL-R212 Comparative Religions (3 cr.)

- World Languages and Cultures (WLAC)
- WLAC-F200 Cross-Cultural Encounters (3 cr.)

IIIB Junior/Senior Integrator (3 cr.)

The Junior/Senior Integrator requirement is suspended indefinitely as a School-level requirement.

Please refer to the Department section of the Bulletin for additional information as to whether a Junior/Senior Integrator is still required at the major level or if the Department has replaced it with an additional requirement.

You may also contact your academic advisor with questions regarding this requirement suspension.

IIIC Physical and Biological Sciences

Both Bachelor of Arts and Bachelor of Science students are required to complete at least four science lectures courses totaling a minimum of 12 credit hours outside the major department. At least one of the courses must have a laboratory component.

Courses that do not count in Area IIIC include AST-A130; BIOL-N100, BIOL-N200, CHEM-C100, FIS 10500, GEOL-G103, GEOL-G130, PHYS 10000, PHYS 14000, PHYS 20000, and all agriculture courses.

NOTE: This is not a complete list. If you have a question about whether a course is applicable or not, please speak with your academic advisor prior to registering to confirm.

Topics or variable credit hour courses (e.g., BIOL-N222) must receive approval from the School of Science Academic Dean's Office. Consult with your major department or the School of Science Academic Dean's Office for additional course restrictions.

Courses that do not count for any credit toward any degree program in the School of Science include, but are not limited to, BIOL-N120 and PHYS 01000.

Except for laboratory courses combined with corresponding lecture courses, 1 credit hour and, in general, 2 credit hour courses do not apply to this area. In addition, students must obtain grades of C- or higher in their Area IIIC courses. However, a single grade of D+ or D will be allowed for one course only. Check with the major department for additional restrictions or requirements. Some majors may require a minimum grade of C or higher.

Note that if credit has been established for both GEOL-G132 and GEOL-G107, then only GEOL-G107 may apply to Area IIIC. In this case, GEOL-G132 may count as a general elective provided that credit was established in GEOL-G132 preceding GEOL-G107.

Note that GEOG-G107 Physical Systems of the Environment (3 cr.)/GEOG-G108 Physical Systems of the Environment: Laboratory (2 cr.) may apply to Area IIIC with approval of the student's major department. Also, GEOG-G185 Global Environmental Change (3 cr.) is an acceptable substitute for GEOL-G185 Global Environmental Change (3 cr.).

IIID Mathematical Sciences

Bachelor of Arts students must have at least one course of at least 3 credit hours in mathematics and one course of at least 3 credit hours in computer science.

Bachelor of Science students must have at least two courses beyond college algebra and trigonometry, totaling 6 credit hours. In addition, one course of at least 3 credit hours in computer science is required. Courses in applied statistics are not acceptable.

MATH-M010, 00100, MATH-M001, 00200, 11000, 11100, 12300, 13000, 13200, 13600; BUS-K201, BUS-K204, CSCI-N100-level courses; CIT 10600 do not count for any credit toward any degree in the School of Science. Computer Science CSCI-N241 and CSCI-N299 do not count in this area, but may count as general electives.

Students must obtain grades of C- or higher in their Area IIID courses. However, a single grade of D+ or D will be allowed for one course only. Check with the major department for additional restrictions or requirements. Some majors may require a minimum grade of C or higher.

Area IV

Major Department

Consult the listing of the major department for courses required within the major subject as well as courses required by the major department in the other areas (e.g. Biotechnology, Environmental Science, and Forensic & Investigative Sciences).

Capstone Experience Course

Each undergraduate major in the School of Science is to be provided a Capstone Experience (research, independent study/project, practicum, seminar, or field experience). The capstone, required of all majors, is to be an independent, creative effort of the student that is integrative and builds on the student's previous work in the major. See departmental sections of the bulletin for specific information about capstone courses.

General Requirements

School of Science requirements are the minimal requirements in various areas, and individual departments/programs may require more, as stated in their degree descriptions. Students should consult with departmental/program advisors in planning their courses of study.

1. A minimum of 124 credit hours (or a minimum of 122 for environmental science and geology) must be completed. Approval must be obtained from the School of Science to use as credit toward graduation any

course that was completed 10 or more years previously.

2. A minimum grade point average of 2.00 is required.
3. A minimum of 24 credit hours must be taken in a major subject (see program requirements) with a minimum grade point average of 2.00. No grade below C- is acceptable in the major subject. Some majors may have higher minimum grade requirements (see program requirements).
4. At least four courses totaling a minimum of 12 credit hours in the major subject must be completed at IUPUI (see departmental/program requirements).
5. Residence at IUPUI for at least two semesters and completion, while at IUPUI, of at least 32 credit hours of work in courses at the 300 level or higher are required.
6. With the approval of the Executive Director of Academic and Student Affairs or the Associate Dean for Academic Affairs, students who have had at least four semesters of resident study may complete up to 15 credit hours of the senior year at another approved college or university. In order to transfer back to IUPUI, a transfer course must be a grade of C or higher.
7. Courses taken on the Pass/Fail option may be applied only as general electives and not toward degree AREA requirements of the school or department/program. Courses taken on the Pass/Fail option may apply to the 32 credit hours residency requirement listed in item 5 if the course is at the 300-level or higher.
8. No more than 64 credit hours earned in accredited junior colleges can be applied toward a degree.
9. Students may enroll in independent study (correspondence) courses for general electives up to a maximum of 12 credit hours with permission of the Executive Director of Academic and Student Affairs or the Associate Dean for Academic Affairs. Independent study (correspondence) courses may not apply to the 32 credit hours residency requirement listed in item 5.
10. With permission of the appropriate department or program, credit may be earned through special credit examination. Credits earned by special credit examination may be used toward the total credit hours required and to satisfy AREA requirements for a degree.
11. The following courses do not count for any credit toward any degree program in the School of Science: AGR 10100; BIOL-N120; BUS-K201, BUS-K204; CSCI-N100-level courses; CIT 10600; all remedial and developmental courses; EDUC-U205, EDUC-W200, EDUC-W201, EDUC-X100, EDUC-X150, EDUC-X151, EDUC-X152; ENG-G010, ENG-G011, ENG-G012, ENG-W001, ENG-W031, ENG-W130; MATH-M010, MATH 00100, MATH-M001, MATH 00200, MATH 11000, MATH 11100, MATH 12300, MATH 13000, MATH 13200, MATH 13600; PHYS 01000; UCOL-U112, UCOL-U210.

NOTE: This is not a complete list. The School and department/program reserve the right to exclude course credit when it is deemed as overlapping with other earned credit or it is determined to be remedial in nature.

- Unless approved as part of the major or an AREA requirement, note that all courses taken outside the Schools of Science and Liberal Arts must receive approval from the School of Science Academic Dean's Office. Consult with your major department, program or the School of Science Academic Dean's Office for additional course restrictions.
- Note that CHEM-C100 may count for general elective credit only if the student has not already established credit in CHEM-C101 or CHEM-C105/CHEM-C106, or equivalent courses. Otherwise, CHEM-C100 does not count for credit in any given degree program.
- Note that if credit has been established for both GEOL-G132 and GEOL-G107, then only GEOL-G107 may apply to AREA IIIC. In this case, GEOL-G132 may count as a general elective provided that credit was established in GEOL-G132 preceding GEOL-G107.

12 No more than 6 credit hours of studio, clinical, athletic, or performing arts course work will be approved unless the additional credit hours are required to complete (or were previously earned) a certificate, minor, or second degree. Verification of academic intent or program completion of a certificate, minor, or second degree is required. Also, any credit earned through military service that is eligible for transfer to IUPUI will count and not be considered as part of the 6-credit hour minimum. Consult a school or departmental/program advisor with questions.

12 An online application for a degree or certificate graduation must be completed by the following deadlines. All students nearing graduation are required to enroll in CAND 99100. Authorization for this course will be given once the application has been submitted. Applications must be submitted by February 1 for August graduation; May 1 for December graduation; and October 1 for May graduation. Students should also register for the appropriate section of CAND 99100 (0 credit hours) during their final semester before graduation. Degree candidates for December, May, or August graduation of a particular academic year may participate in the May Commencement (e.g. students having graduated in December 2010, May 2011, or August 2011 will participate in the May 2011 Commencement Exercises). Students completing a certificate program do not participate in Commencement Exercises.

12 In general, credit is not allowed for both of two overlapping courses. Examples of course overlaps include **(NOTE: This is not a complete list.)**:

- BIOL-N100 and BIOL-K101/BIOL-K103
- BIOL-N212/BIOL-N213 and BIOL-N217
- BIOL-N214/BIOL-N215 and BIOL-N261
- CHEM-C101/CHEM-121 and CHEM-C105 and/or CHEM-C106

- CHEM-C102 and CHEM-C341/CHEM-C343
- CHEM-C110 and CHEM-C341
- CHEM-C110/CHEM-C115 and CHEM-C341/CHEM-C343
- CHEM-C360 and CHEM-C361
- CHEM-C325 and CHEM-C410/CHEM-C411
- GEOL-G110 and GEOG-G107
- GEOL-G185 and GEOG-G185
- MATH-M119 and MATH 22100 or MATH 23100 or MATH 16300 or MATH 16500
- MATH 15100 or 15900 and MATH 15300/15400
- MATH 15100 and MATH 15900
- MATH 22100/MATH 22200 and MATH 23100/MATH 23200
- MATH 22100/MATH 22200 and MATH 16300/MATH 16400 or MATH 16500/MATH 16600
- MATH 23100/MATH 23200 and MATH 16300/MATH 16400 or MATH 16500/MATH 16600
- MATH 16300 and MATH 16500
- MATH 16400 and MATH 16600
- PHYS-P201/PHYS-P202 or PHYS 21800/PHYS 21900 and PHYS 15200/PHYS 25100
- PSY-B320 and BIOL-L391 Addictions (IU East)
- SCI-I120 and UCOL-U110
- STAT 30100 and PSY-B305

In addition, any course that is retaken is considered an overlap. Consult with your academic advisor regarding other overlapping courses.

15 See statements about required First-Year Experience Course and Senior Capstone Experience in the description of the Bachelor of Arts degree and the Bachelor of Science degree programs.

Minors and Certificate Programs

Minors

Minors are often awarded with the completion of a bachelor's degree, but may be awarded earlier. Independent Study (correspondence) courses may not be used to fulfill course requirements in a minor program. Check with the department or program offering the minor for additional restrictions or requirements.

- Applied Computer Science (minor)
- Biology
- Chemistry
- Computer and Information Science
- Forensic and Investigative Sciences
- Geology
- Mathematics
- Physics
- Psychology

Certificate Program

- Applied Computer Science (certificate)

Departments & Centers

- Teaching Certification
- PreProfessional Programs
- Honors Program
- Undergraduate Research

Teaching Certification

Becoming a Licensed Teacher

Top quality science and mathematics teachers are in high demand, and the IU School of Education at IUPUI is recognized as a leader in urban education. Students who want to become teachers of middle school and/or high school science or mathematics must take specific programs of study aligned to the standards for teaching these subject areas. Teachers must fully understand the content they teach, the realities of schools, and methods for successfully teaching every child. This requires earning a major or a degree in the School of Science and completing a teacher preparation program in the School of Education.

Mathematics and science majors who want to become teachers need to seek advising from the School of Science as soon as possible so that they take the right courses as they complete their majors. Mathematics majors often find they can complete both their major in mathematics and the *Learning to Teach/Teaching to Learn (LTTL)* program as part of their bachelor's degree. Science majors typically complete their bachelor's degree in science and then enter the *Transition to Teaching (T2T)* program as post baccalaureate students, earning the first half of their master's degree in this 12-month teacher education program. The *Transition to Teaching* program is also an option for mathematics graduates or returning students.

Admission to either the undergraduate (LTTL) or the graduate (T2T) teacher education program is competitive. Students must complete a formal application and have most of the required courses in the major, passing PRAXIS test scores, a clear criminal history check, and at least a 2.50 overall GPA. Specific information about admission to each program is available on the School of Education Web site.

Both the *Learning to Teach/Teaching to Learn* program and the *Transition to Teaching* program enable students to earn Rules 2002 Indiana Teacher Licenses. The LTTL program consists of 43 credit hours of undergraduate study, sequenced across four semesters including a final semester of student teaching. The T2T program is 18 credit hours (plus program fees) of graduate study done while practice teaching in schools everyday for one school year.

Note: Information about teacher education and licensing may change for many reasons, including legislative mandates and state policies. Students need to check for current information on the School of Education web site and meet with School of Education advisors regularly.

Preprofessional Programs

While some professional programs (dental, pharmacy, veterinary medicine) may not require an undergraduate degree for strong applicants, many do require an undergraduate degree. The preprofessional student is urged to select a degree program rather than fulfilling the minimum

requirements for entry into professional programs. This provides the necessary background if a degree is required, and serves as a backup plan if the student does not matriculate to a professional program.

Students may choose from a variety of majors while completing preprofessional requirements. Students are encouraged to consult with their major advisor, as well as the School of Science health professions' advisor, if enrolled in a School of Science degree program.

Although there are many professional programs from which to choose and we encourage students to apply to multiple programs, our preprofessional advising is aligned with the programs with which we are most closely affiliated –IU in Bloomington, the IUPUI campus in Indianapolis and Purdue University in West Lafayette.

Post-baccalaureate students holding non-science degrees may choose to take prerequisite courses through the School of Science for entry into professional programs. These students should consult with the health professions' advisor for help with the admission process and course selection. For additional information, see the School of Science Bulletin, Graduate Programs, Graduate Non-Degree Study section.

Most professional programs require not only specific prerequisite courses, a strong GPA, and a profession-specific or general entrance test, but also experience including shadowing in the field, volunteering and leadership activities.

Premedical Program

Students planning to apply to medical school must choose a degree program in addition to taking courses that fulfill the admission requirements for their chosen medical school. While many opt to complete their degrees with science majors, other fields of specialization are acceptable. Freshmen should declare their chosen major and seek advising for their degree requirements from the advisor in their major department. IUPUI also offers health professions advising in the School of Science and the School of Liberal Arts. Premedical students should consult the health professions advisor in their school once they have completed the 10 credit hours of biology and 10 credit hours of inorganic (introductory) chemistry required for medical school in order to plan the additional courses needed for medical school, timing for the MCAT test and the admission process to medical school.

Graduate students holding non-science degrees who are electing courses in the School of Science to prepare for medical or dental school are also invited to use the health professions advising service for help with the admission process.

Prerequisites for the IU School of Medicine

The premedical student should complete the bachelor's degree. The Medical College Admission Test (MCAT) is required.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
CHEM-C342 Organic Chemistry II	3 cr.
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.

Predental, Preveterinary Medicine, Preoptometry Programs

Admission to professional schools is highly competitive. The preprofessional student is therefore urged to elect a degree program rather than fulfilling the minimum requirements of these schools. Students who choose predental, preveterinary medicine, and preoptometry are usually placed in the Department of Biology where preprofessional advising is available. Predental students are also encouraged to meet with the health professions advisor in the School of Science to plan for the testing and admission process required by dental schools. Refer to the Department of Biology section of this bulletin for the required courses for Indiana University School of Optometry and Purdue University School of Veterinary Medicine.

Graduate students holding non-science degrees who are electing courses in the School of Science to prepare for medical or dental school are also invited to use the health professions advising service for help with the admission process.

Pre-Dentistry Prerequisites for IU Dental School

Minimum requirements include 90 credit hours of coursework. Bachelor's degree strongly recommended. The Dental Admission Test (DAT) is required. Applicants should also show evidence of manual dexterity.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
BIOL-K483 Biological Chemistry or CHEM-C483 Biomolecules and Catabolism	3 cr.
BIOL-N217 Human Physiology	5 cr.
BIOL-N261 Human Anatomy	5 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
CHEM-C342 Organic Chemistry II	3 cr.
PHYS-P201 General Physics I	5 cr.

PHYS-P202 General Physics II	5 cr.
PSY-B104 Psychology as a Social Science	3 cr.
or PSY-B105 Psychology as a Biological Science	
ENG-W131 English Composition I	3 cr.

Pre-Veterinary Science Prerequisites for Purdue School of Veterinary Medicine

Bachelor's degree is not required. The Graduate Record Exam (GRE) is required for admission.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
BIOL-K322 / BIOL-K323 Genetics and Molecular Biology/Lab	3 cr./2 cr.
BIOL-K356 / BIOL-K357 Microbiology/Lab	4 cr. to 5 cr.
(or MICR-J210 Microbiology and Immunology)	
BIOL-K483 Biological Chemistry	3 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
CHEM-C342 / CHEM-C344 Organic Chemistry II/Lab	3 cr./2 cr.
MATH 23100 Calculus for the Life Sciences I	3 cr. to 4 cr.
(or MATH 22100 or MATH 16500)	
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
(or STAT-N501 or SPEA-K300)	
ANSC 22300 Animal Nutrition	3 cr.
(may be taken at Purdue WL or online)	
ENG-W131 English Composition I	3 cr.
COMM-R110 Fundamentals of Speech Communication	3 cr.
Arts and Humanities electives	9 cr.

Pre-Optometry Prerequisites for IU School of Optometry

Minimum of 90 credit hours of coursework. Bachelor's degree strongly recommended. The Optometry Aptitude Test (OAT) is required.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
BIOL-K356 / BIOL-K357 Microbiology/Lab	3 cr./2 cr.
Advanced Biology: BIOL-K322 Genetics and Molecular Biology	3 cr. to 5 cr.
or BIOL-K324 Cell Biology	
or BIOL-N217 Human Physiology	
or BIOL-N261 Human Anatomy	
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
ENG-W131 English Composition I	3 cr.
ENG-W132 English Composition II	3 cr.
or ENG-W231 Professional Writing Skills	
MATH 23100 Calculus for the Life Sciences I	3 cr. to 4 cr.
or MATH 22100 or MATH 16500 or MATH-M119	
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.
PSY-B104 Psychology as a Social Science	3 cr.
or PSY-B105 Psychology as a Biological Science	3 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
or STAT-N501 or PSY-B305 or ECON-E270	
If the student does NOT have a bachelor's degree, additional courses are required:	
Arts and Humanities	6 cr.
Foreign language	6 cr.
(students having completed 2 or more years in high school with C or better are exempt)	
Social and Historical Studies	6 cr.

Additional credit hours to reach 90 credit hours	

Prepharmacy Program

The prepharmacy program at IUPUI consists of approximately 70-90 credit hours of course work required to apply to pharmacy school. Students declaring prepharmacy upon admission to IUPUI are assigned to the Department of Biology, where prepharmacy advising is available. After completion of the required courses for admission, students apply to the pharmacy school of their choice. Refer to the Department of Biology section of this bulletin for required courses to apply to the pharmacy program at the Purdue College of Pharmacy.

Pre-Pharmacy Prerequisites for Purdue College of Pharmacy

A bachelors' degree is not required. The Pharmacy College Admission Test (PCAT) is not required for admission to Purdue's program. Those entering the professional program beginning Fall 2010 will have additional course requirements to fulfill. Interested students should contact Purdue University College of Pharmacy for more information.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
BIOL-K356 / BIOL-K357 Microbiology/Lab	3 cr./2 cr.
BIOL-N217 Human Physiology	5 cr.
BIOL-N261 Human Anatomy	5 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
CHEM-C342 / CHEM-C344 Organic Chemistry II/Lab	3 cr./2 cr.
ECON-E101 Survey of Economic Issues and Problems	3 cr.
MATH 23100 / MATH 23200 Calculus for the Life Sciences I and II	3 cr./3 cr.
or MATH 22100 / MATH 22200 or MATH 16500 / MATH 16600	
PHYS-P201 General Physics I	5 cr.
ENG-W131 English Composition I	3 cr.
ENG-W132 English Composition II	3 cr.

Additional categories of electives are required for graduation from the pharmacy program at Purdue University. Since they are not required for admission to the program, they may be completed concurrently with prerequisite course work or after admission to the pharmacy program. Students must select a minimum of one course each from Humanities and Behavioral Sciences, Business and Administration, and Science and Technology groups. Please see the health professions' advisor for options.

Pre-Occupational Therapy Program

Students may take any undergraduate program and include a set of core courses needed as prerequisites for a graduate degree in occupational therapy at the Indiana University School of Health and Rehabilitation Sciences. Undergraduate degree programs in biology or psychology in the School of Science may be of interest to the pre-occupational therapy student. Advising for the undergraduate degree and planning the requirements for application/admission to a graduate degree program in occupational therapy is available in those departments. An academic advisor in the IUPUI School of Health and Rehabilitation Sciences is also available for consultation.

Pre-Occupational Therapy Prerequisites for IU School of Health and Rehabilitation Sciences-IUPUI Campus

Applicants must have completed a bachelor's degree. No entrance exam is required.

BIOL-N217 Human Physiology	5 cr.
BIOL-N261 Human Anatomy	5 cr.
PSY-B310 Life Span Development	3 cr.
PSY-B380 Abnormal Psychology	3 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
or STAT-N501 or PSY-B305 or ECON-E270	
CLAS-C209 Medical Terms from Greek and Latin	2 cr.

Note: Biology and statistics courses must be taken no more than seven years before admission.

The program requires a minimum of 12 hours of observation in three or more sites.

The pre-occupational therapy student should consult with an academic advisor for updates of pre-occupational therapy criteria.

Pre-Physical Therapy Program

Students may take any undergraduate program and include a set of core courses needed as prerequisites for a graduate degree in physical therapy at the Indiana University School of Health and Rehabilitation Sciences. Undergraduate degree programs in biology, chemistry, or psychology in the School of Science may be of interest to the pre-physical therapy student. Advising for the undergraduate degree and planning the requirements for application/admission to a graduate degree program in physical therapy is available in those departments. An academic advisor in the IUPUI School of Health and Rehabilitation Sciences is also available for consultation.

Pre-Physical Therapy Prerequisites for IU School of Health and Rehabilitation Sciences-IUPUI Campus

Applicants must have completed a bachelor's degree. The Graduate Record Exam (GRE) is required for admission.

BIOL-N217 Human Physiology	5 cr.
BIOL-N261 Human Anatomy	5 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.
PSY-B104 Psychology as a Social Science	3 cr.
or PSY-B105 Psychology as a Biological Science	
PSY-B310 Life Span Development	3 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
or STAT-N501 or PSY-B305 or ECON-E270 or SOC-R359 or SPEA-K300	
Two 3-credit hour courses in the humanities, social sciences area.	6 cr.

The pre-physical therapy student should consult with an academic advisor for updates of pre-physical therapy requirements.

Undergraduate Research Program

IUPUI has established an Undergraduate Research Opportunities Program (UROP) to encourage and recognize undergraduates who participate in research projects with faculty in the school.

Undergraduate research students may receive the transcript notation on their academic transcript concurrent with the awarding of the degree by fulfilling a set of requirements listed below. Such a transcript notation provides obvious evidence of a student's participation in independent laboratory and scholarly and research other creative work. The notation will certify and spotlight research proficiency or successful completion of some other creative activity.

UROP has established a program of requirements that must be fulfilled to qualify for transcript notation. The requirements are:

1. Students must register for and complete five credits of formal research in their departments or units. Students whose departments have no independent research credit may use the Honors Course HON-H399. The definition of research credit will be left up to the student's department or unit, but should conform to the general definition of research and consist substantially of an independent project by the student.
2. Students must prepare a substantial written product from the research. This could include a senior thesis or journal publication. Other appropriate activities to the discipline may be substituted for this, for example, an art exhibit or other performance. Substitutions must receive prior approval from the UROP Director.
3. Students must attend an outside professional meeting in a discipline at the state, regional, or national level. Attendance at other professional events will be considered as appropriate to the discipline. The student's faculty mentor will certify attendance. Students will be encouraged to present their work at a professional meeting or other event.
4. Students must participate in at least one annual UROP symposium. Students must present at least one oral paper to receive transcript notation. If appropriate to research and creative activity in the discipline, other types of presentations may be acceptable at the discretion of the UROP Director and with the recommendation the student's faculty mentor.
5. Students must prepare a Research Portfolio, which may be in an electronic form. The Research Portfolio is prepared with the student's faculty mentor and must be submitted four weeks prior to the student's anticipated graduation date. Information about preparing a research portfolio can be found at the Center for Research and Learning web site.

Further information about undergraduate research opportunities and transcript notation may be found at the Center for Research and Learning web site.

Honors Program

The IUPUI Honors College is open to specific scholarship cohorts of incoming freshmen in every major offered at IUPUI. Entering freshmen with a minimum combined math and verbal (critical reading) SAT score of 1250 or an ACT of 28 and a high school GPA of at least 3.75 are directly admitted to the Honors College. This includes all Bepko Scholars and Fellows, Adam W. Herbert Presidential Scholars, Plater International Scholars, and Chancellor's Scholars. Current IUPUI students who are not in the Honors College, but have at least a 3.50 GPA, may be allowed to complete an Honors course or experience with permission from the Honors College. Interested students should discuss this with their academic advisor and then contact an Honors advisor for authorization prior to registration.

All Honors College Scholars are required to complete one Honors course or experience every semester. Students may take no more than 6 credit hours of Honors work each semester. Students admitted to the Honors College prior to Fall 2010 are required to complete 18 Honors credits with a minimum 3.30 grade point average in order to graduate from IUPUI with Honors; those admitted Fall 2010 and thereafter are required to complete 24 Honors credits with a minimum 3.30 grade point average in order to graduate with Honors.

Students have the following options for earning Honors credit: complete an Honors course, complete an Honors Contract, engage in research, study abroad, or take a graduate course as an undergraduate student. Students must complete and submit applicable paperwork to the Honors College office in order to earn Honors credit for all options other than an Honors course. All students must contact an Honors College

staff member in order to obtain authorization to register for an Honors course with the exception of chemistry courses and Organizational Leadership and Supervision (OLS) courses. Students should contact those departments to request authorization.

The Honors Contract, the most common method for earning Honors credit, enables qualified students to engage in Honors work in courses not specifically designed as Honors courses by working with the faculty member to create a special Honors project for the course. The student who enters into an Honors Contract with a faculty member will engage in work beyond what is required for a regular undergraduate course; the course will appear as Honors credit on the student's transcript. Honors Contract forms must be submitted to the Honors College office no later than the end of the third week of classes during Fall and Spring semesters and by the end of the first week of classes during Summer sessions. For additional information, visit the Honors College website at http://www.honorscollege.iupui.edu

Indianapolis, IN 46202-5164

(317) 274-2660

Biology

Students with a GPA of 3.30 and 12 hours of credit, or newly entering freshmen with a minimum combined math and verbal (critical reading) SAT score of 1200 or who are graduating in the top 10 percent of their high school class, qualify for the Biology Honors Program. Students wishing to participate in the Biology Honors Program must first receive approval from the Department of Biology. Students may choose from two tracks. In Track 1 (honors with thesis), students must complete 21 credit hours of honors work including 6 credit hours outside of biology and 15 credit hours in biology. These biology hours are to include 4 credit hours of BIOL K102/BIOL K104 honors sections of lab/recitation, 6 credit hours in honors sections of BIOL-K493, and 5 credit hours in H-Option biology courses and/or 500-600-level biology courses. In Track 2 (honors without thesis), students must complete 24 credit hours of honors work. These hours are to include 6 credit hours outside of biology, 4 credit hours of BIOL-K102/BIOL-K104 honors sections of lab/recitation, and 14 credit hours in H-Option biology courses and/or 500-600-level biology courses.

Chemistry

Students with a minimum GPA of 3.00 may be admitted into the Chemistry Honors Program with approval of the Honors Program and the Department of Chemistry and Chemical Biology. After entering the program, maintenance of a GPA of 3.30 in all courses and of 3.50 in honors courses is necessary. The curriculum committee of the chemistry department will approve any honors Bachelor of Science degrees awarded in chemistry. In addition to meeting general honors requirements, students who intend to graduate with honors in chemistry must complete 24 honors credit hours, consisting of 1 credit hour in the CHEM-C301 or CHEM-C302 Chemistry Seminar, 6 credit hours in CHEM-C409 Chemical Research, 5 credit hours of H-Options in undergraduate courses and/or graduate chemistry courses, and 12 credit hours of honors credit in courses outside of chemistry.

Geology

For the Bachelor of Science degree, honors students must complete 24 credit hours of honors work, 18 credit hours in geology and 6 credit hours in other approved honors courses. For the Bachelor of Arts degree, the requirements are 15 credit hours in geology and 9 credit hours outside geology in other approved honors courses. The following upper-division geology courses are approved for H-Option contracts: GEOL-G205 Reporting Skills in Geoscience, GEOL-G209 History of the Earth, GEOL-G221 Introductory Mineralogy, GEOL-G222 Introductory Petrology, GEOL-G304 Principles of Paleontology, GEOL-G323 Structural Geology, GEOL-G334 Principles of Sedimentation and Stratigraphy, GEOL-G403 Optical Mineralogy and Petrography, GEOL-G404 Geobiology, plus GEOL-G410 Undergraduate Research in Geology (1 cr.), GEOL-G406 Introduction to Geochemistry, GEOL-G413 Introduction to Geophysics, GEOL-G415 Principles of Geomorphology, GEOL-G416 Economic Geology, GEOL-G430 Principles of Hydrology, and GEOL-G499 Honors Research in Geology. The student must complete 3 credit hours in GEOL-G499 Honors Research in Geology to satisfy the requirements for the honors component. The overall grade point average must be 3.30 with a 3.50 in all honors work.

Psychology

To graduate with honors, the student must earn at least 24 hours of honors credit, six of which must be in psychology and six of which must be outside of psychology (the remaining 12 credit hours can be either in or outside psychology). Three to six hours of this credit must be for PSY-B499 Honors Research, which should culminate in an honors thesis. Only grades of A or B will count for honors credit. To graduate with honors, the student must have an overall GPA of 3.30, a GPA of 3.30 in all honors coursework, and a GPA of 3.50 in psychology classes. For additional information , go to http://honorscollege.iupui.edu/ or contact Dr. Bethany Neal-Beliveau (LD 126L, 274-6751, bnealbe@iupui.edu, the Psychology Department's Honors Program advisor.

Student Learning Outcomes

- Biology
- Biotechnology
- Chemistry
- Computer and Information Science
- Environmental Science
- Forensic and Investigative Sciences
- Geology
- Interdisciplinary Studies
- Mathematics
- Physics
- Psychology

Bachelor of Arts & Bachelor of Science in Biology

Students who graduate with a B.A. or B.S. in Biology will be able to:

1. Demonstrate knowledge of how biological molecules such as DNA, RNA, proteins, lipids, and carbohydrates contribute to the structure and function of prokaryotic and eukaryotic cells.
2. Integrate the cellular, molecular and physiological basis of how organisms develop structure, carry out functions, sense and control their environment, and respond to external change.
3. Describe how genetic principles associated with natural selection contribute to the functioning of an organism and the evolutionary diversity of life on earth.
4. Access, evaluate, and communicate information relevant to the study of biological sciences.
5. Work safely and effectively with basic laboratory techniques and instrumentation.
6. Exhibit problem solving and critical thinking skills needed to design and implement laboratory projects, and gather, analyze and draw conclusions from data.
7. Apply basic principles of chemistry, math, and other disciplines to the functioning of living systems.
8. Successfully complete a laboratory or literature-based research project with supervision from a faculty sponsor.

Chemistry

Bachelor of Arts in Chemistry (B.A.)

Students who graduate with a B.A. in Chemistry will be expected to:

1. Understand major concepts and theoretical principles in organic chemistry, analytical chemistry and physical chemistry.
2. Exhibit problem solving and critical thinking skills relevant to the field of chemistry.
3. Access, retrieve, and interpret accurate and meaningful information from the chemical literature.
4. Communicate scientific information effectively, both orally and in writing.
5. Work effectively in teams in both classroom and laboratory.
6. Design, carry out, record, analyze the results and draw conclusion of chemical experiments.
7. Use instrumentation for chemical analysis and separation.
8. Use computers in experiments, data analysis, and in communication.
9. Understand and follow safety guidelines in chemical labs.
10. Be aware of and abide by ethical standards in chemical discipline.
11. Integrate knowledge from mathematics, physics and other disciplines in support of chemistry.

Bachelor of Science in Chemistry (B.S.)

Student who graduate with a B.S. in Chemistry (including biochemistry options) will be expected to:

1. Understand major concepts, theoretical principles and experimental findings in organic chemistry, analytical chemistry, inorganic chemistry, physical chemistry and biochemistry.
2. Exhibit problem solving and critical thinking skills relevant to the field of chemistry.
3. Access, retrieve, and interpret accurate and meaningful information from the chemical literature.
4. Communicate scientific information effectively, both orally and in writing.
5. Work effectively in teams in both classroom and laboratory.
6. Design, carry out, record and analyze the results of chemical experiments.
7. Use instrumentation for chemical analysis and separation.
8. Use computers in experiments, data analysis, and in communication.
9. Understand and follow safety guidelines in chemical labs.
10. Be aware of and abide by ethical standards in chemical discipline.
11. Integrate knowledge from mathematics, physics and other disciplines in support of chemistry.
12. Conduct research projects with supervision.

Bachelor of Arts & Bachelor Science in Geology

Upon graduating, students with an undergraduate degree in Geology (BA or BS) will:

- gain access to employment in professions of their choosing related to Earth Science, Science Education, and/or Environmental Science (BA, BS);
- gain acceptance to reputable graduate programs in the Earth Sciences, Environmental Sciences, or a program of their choosing (BS); and
- successfully complete state and/or national professional competency examinations in Earth Sciences (BA, BS).

Students who graduate with a BA or BS will achieve the following objectives:

1. Solve earth science problems using the scientific method and critical thinking.
2. Describe spatial and temporal variations in Earth processes through modeling, mapping, observation and measurement.
3. Understand the evolution of physical Earth and life as reflected in the geologic time scale.
4. Understand the structural and chemical controls on the physical properties and behavior of Earth materials.
5. Evaluate how physical, chemical and biological cycles are integrated into Earth systems from the local to global scale.
6. Understand how events of the geologic past control the current distribution of resources.
7. Assess the impact of physical and chemical cycles on human health and welfare.
8. Evaluate impacts and potential mitigation strategies for natural hazards, resource utilization, climate and environmental change.
9. Demonstrate competence in communicating Earth science problems to a broad audience through written, oral and visual means.

10. Understand the interdependence of the diverse sub-disciplines of Earth science.

Bachelor of Arts and Bachelor of Science in Psychology

Student graduating with a B.A. or B.S. in Psychology will demonstrate the following learning outcomes.

1. **Content of Psychology:** to show familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology. In particular, students should understand that:
1. Psychology is a science. Its purpose is to describe, explain, predict, and change behavior.
2. Behavior is influenced by person variables, environment variables, and their interaction. B = f(P + E + PE).
3. Psychology has evolved in a socio-historical context and it is characterized by a variety of theoretical perspectives.
4. Our experience of the world is highly subjective and influenced by our cultural heritage.

2. **Research in Psychology:** to understand and use basic research methods in psychology, including design, data analysis, and interpretation.
3. **Application of Psychology:** to understand and generate applications of psychology to individual, social, and organizational issues.
4. **Ethics in Psychology:** to understand and abide by the ethics of psychology, including those that encourage the recognition, understanding, and respect for the complexity of socio-cultural and international diversity.
5. **Personal Development, Relationship Building, and Career Planning:** to understand themselves and others, acquire effective collaboration skills, and develop realistic ideas about how to pursue careers in psychology and related fields.
6. **Communication Skills, Information Competence, and Technological Proficiency:** to write and speak effectively, demonstrate information competence, and utilize technology for many purposes.
7. **Critical and Creative Thinking and Problem Solving:** to use critical and creative thinking in the scientific approach to problem solving.

Biotechnology

Bachelor of Science in Biotechnology (B.S.)

Computer and Information Science

The Department's Undergraduate Committee states the following Student Learning Outcomes. After graduation, a student should be able to:

1. Write software programs in multiple programming languages.
2. Understand the theoretical foundations of computer science, including the study of discrete computational structures.
3. Understand and use different programming language paradigms such as procedural, object-oriented, etc.
4. Use different data structures such as linked lists, arrays, stacks, trees, graphs, hash tables, etc. to improve efficiency of software, and mathematically or experimentally analyze them and operations on them.
5. Know a diverse array of computational algorithms and their analysis techniques, as related to searching, sorting, optimization, and graph problems.
6. Know fundamental limitations of designing efficient algorithms and the theoretical meaning of the P?=NP problem.
7. Know the basic concepts in formal language theory and their application to compiler design.
8. Understand the basic design of computer architecture and their relationship to software design.
9. Understand and design the basic functionalities of different computer operating systems.
10. Acquire knowledge in multiple advanced areas of computer science, such as databases, data mining, multimedia, graphics, computing security, networking, software engineering, bio-computing, etc.
11. Design, develop, and test small scale software projects.
12. Write scientific project reports and software documentation.

Bachelor of Science in Environmental Science (B.S.)

Upon graduating, students with an undergraduate degree in Environmental Science will:

- gain access to employment in professions of their choosing related to Earth Science, Science Education, and/or Environmental Science; and
- gain acceptance to reputable graduate programs in the Earth Sciences, Environmental Sciences, or a program of their choosing.

Students who graduate with a BSES degree will achieve the following objectives:

1. Solve environmental science problems using the scientific method and critical thinking.
2. Evaluate physical, chemical and biological cycles related to surficial earth processes and how they operate to describe integrated earth systems from a local to global scale.
3. Demonstrate competence in communicating environmental science problems to a broad audience through written, oral, and visual means.
4. Describe the structure and function of major environmental systems.
5. Effectively apply analytical skills, including basic measurement and monitoring skills, and use of appropriate technology.
6. Understand current thinking and research on the nature, causes, and solutions of environmental problems as they affect human health and the environment.
7. Develop knowledge in advanced disciplines of environmental sciences and evaluate inter-relationships between disciplines.

Specialization leading to an advanced understanding of one of the three component areas that are central to the BSES program:

Earth and Water Resources

1. Understand interactions between land, soil, and water and quantitatively assess processes in soils, hydrogeology, and biogeochemistry.
2. Describe physical, chemical, and biological interactions and processes affecting soil and water resources.
3. Apply advanced analytical techniques related to environmental quality assessments.

Environmental Management

1. Apply skills needed to characterize hazards, track the fate and transport of pollutants.
2. Identify health and environmental effects of pollutants and plan and manage programs to control environmental hazards.
3. Identify and solve problems in solid and hazardous waste, water quality and wastewater treatment, and air quality.

Environmental Remote Sensing and Spatial Analysis

1. Develop spatial analytical techniques using remote sensing (satellite and airborne sensors), geographic information system (GIS), and global positioning system (GPS) technologies.
2. Integrate technologies of remote sensing and spatial analysis to problems of environmental modeling and analysis.

Forensic and Investigative Sciences

Students who graduate from the Forensic and Investigative program will learn:

1. **Forensic Science System** - Understand the general overview of the forensic science system.
1. Explain and describe areas in forensic science.
2. Understand the fundamentals of crime laboratory culture and organization.
3. Understand the role of forensic science in crime scene investigation.
4. Explain and be able to classify evidence.
5. Explain and describe quality assurance and control used in forensic science laboratories.
6. Prepare a resume and coverletter for a job in forensic science.
7. Demonstrate proper interviewing skills for a job in forensic science.

2. **Forensic Chemistry** - Understand how chemical and instrumental techniques can be applied to forensic chemical evidence.
1. Describe the possible job functions of a chemist in a forensic science laboratory.
2. Describe how statistical techniques can be used to describe the quality of data, classify samples or determine proper sampling protocol.
3. Explain the chemical principles behind acid-base, liquid-liquid, liquid-solid and solid-vapor extractions.
4. Explain the principles, instrumentation and applications of chromatographic techniques such as TLC, HPLC, and GC.
5. Explain the principles, instrumentation and applications of spectroscopic techniques such as UV/vis/fluorescence, FTIR and Raman.
6. Explain the principles, instrumentation and applications of mass spectrometry using EI and ESI ionization.
7. Demonstrate the ability to prepare and examine samples using analytical techniques such as TLC, GC/MS, Pyrolysis-GC/FID, LC/MS, FTIR, Raman, and UV/vis/fluorescence.
8. Explain the principles, instrumentation and applications of microscopic techniques such as light microscopy, polarized light microscopy, hot stage microscopy and microspectrophotometry.
9. Demonstrate the ability to prepare and examine samples using microscopic techniques such as light microscopy, polarized light microscopy, hot stage microscopy and microspectrophotometry.
10. Describe the chemical composition, origins and significance of the most commonly encountered types of trace evidence such as ink, paint, fibers, explosives, ignitable liquids, glass and hairs.
11. Determine the appropriate chemical analytical scheme to be used on physical evidence.
12. Successfully apply the chemical and instrumental techniques described above on mock case work.

3. **Pattern Evidence** - Understand pattern evidence in forensic science and the appropriate analytical techniques.
1. Explain, evaluate, and identify characteristics of fingerprints.
2. Understand the application of firearm and toolmark analysis used in forensic science.
3. Describe forensic techniques used on questioned documents.
4. Understand the application of impression evidence such as tiretreads and footwear.

4. **Forensic Biology** - Understand how to identify and analyze forensic biological evidence.
1. Describe the possible job functions of a forensic biologist in a forensic science laboratory.
2. Describe how to recognize, collect and preserve biological evidence.
3. Describe the principles and techniques of blood spatter pattern analysis.
4. Describe the principles and techniques of identification of body fluids.
5. Describe the principles and techniques of identification of the species of biological evidence.
6. Describe the principles and techniques of DNA isolation from various biological evidence.
7. Explain the principles, instrumentation and applications of DNA typing techniques.
8. Describe how statistics and population genetics can be used for data interpretation.

5. **Photography and Imaging** - Explain and implement the basic and advanced principles of photography and imaging in the processing of a crime scene.
1. Describe the basic elements of the theory of photography.
2. Understand and describe the photographic process.
3. Describe and apply the principles of photography to crime scene analysis.

4. Describe how the techniques and methods of processing images are used on photographic evidence obtained at a crime scene.

6. **Ethics** - Understand the importance of ethics in the practice of forensic science.
1. Define ethics.
2. Describe how ethics are applied in the analysis of forensic evidence.
3. Describe how ethics are applied to the presentation of expert testimony in court.
4. Describe the major features of the Code of Ethics of the American Academy of Forensic Sciences and of other major forensic science organizations.

7. **Forensic Science and the Law** - Understand how criminal and civil laws and procedures are applied to Forensic Science.
1. Apply the evidentiary rules and law of evidence in the collection of evidence, examination of the evidence, and preparation of scientific reports and testimony.
2. Describe the kinds of evidence that require a scientific foundation for its admission.
3. Demonstrate the ability to conduct accurate, comprehensive and focused scientific investigations and apply appropriate rules of evidence.
4. Interpret and implement standards of forensic practice as established by the rules of evidence.
5. Apply knowledge of forensic science to case scenarios.

8. **Research** - Understand how to conduct forensic science research.
1. Conduct a literature search on a forensic scinece research topic.
2. Participate in the design of a research project.
3. Carry out experiments to properly collect data.
4. Ability to document research data.
5. Ability to evaluate and interpret research data.
6. Effectively communicate research results through written, oral and visual presentations.

Bachelor of Science in Interdisciplinary Studies (B.S.)

"The purpose of the Bachelor of Science (B.S.) in Interdisciplinary Studies Program is to provide an opportunity for IUPUI students to construct individual majors that are science-based, interdisciplinary, and not represented by an existing major program". Interdisciplinary Studies Majors create individualized courses of study; each student, in consultation with his or her faculty mentor, will individually develop student learning outcomes. The following SLOs, however, are common for all Interdisciplinary Studies Majors:

1. Create and develop an individualized plan of study for the proposed major, the interdisciplinary nature between science and at least one other discipline.
2. Design, in consultation with a faculty mentor, 4-6 individualized Student Learning Outcomes that specify an action or outcome of the plan of study that is
3. Successfully design, present, and defend an experimental or literature-based research project or internship experience, culminating with a written report or presentation of the findings.

Bachelor of Science in Mathematics and Mathematics Education (B.S.)

The Department of Mathematical Sciences synthesized the IUPUI's Principles of Undergraduate Learning, the National Council of Teachers of Mathematics Standards, and the Mathematics Association of America's competencies for undergraduate mathematics majors to create the following 10 Student Learning Outcomes for the undergraduate mathematics programs. Students will be able to:

1. Understand and critically analyze mathematical arguments.
2. Understand, appreciate, and identify connections between different areas of mathematics.
3. Understand, appreciate, and solve some applications of mathematics to other subjects.
4. Develop a deeper knowledge and competence of at least one area of mathematics.
5. Develop and demonstrate abstract reasoning in a mathematical context.
6. Develop and demonstrate the principle modes of discovery in mathematics.
7. Develop and demonstrate careful and ethical analysis of data.
8. Develop and demonstrate problem-solving skills.
9. Demonstrate effective communication skills of mathematical ideas precisely and clearly, both orally and in writing.
10. Utilize a variety of technological tools (CAS, statistical packages, programming languages, etc.) in analyzing and solving mathematical problems.

Concentrations include: Applied Mathematics, Pure Mathematics, Actuarial Science, and Secondary School Teaching

All majors should work on a senior-level project that requires them to analyze and create mathematical arguments and leads to a written and oral report (capstone).

Bachelor of Science in Physics (B.S.)

Students who graduate with a B.S. in Physics will achieve the following objectives:

1. Know and understand the basic and advanced concepts of classical and modern physics.
2. Master the mathematical skills relevant to the study of physics.
3. Apply the knowledge of physics and mathematics to solve physical problems.
4. Design and perform laboratory experiments in physics.
5. Use computers and software to solve physics problems and to obtain and analyze experimental data.
6. Successfully collaborate with peers, attain the necessary skills, and develop the work ethic to perform and complete physics research.
7. Prepare a written technical document and deliver an oral presentation relevant to physics.
8. Apply her or his skills to other areas or problems.

Admissions

- Biology

- Chemistry
- Computer and Information Science
- Earth Sciences
- Forensic and Investigative Sciences
- Mathematics
- Physics
- Psychology

Biology, MS & PhD

Students must hold a baccalaureate degree from an accredited institution of higher learning and demonstrate good preparation in the following subjects: Biological Sciences, Organic Chemistry, Physics, and Mathematics.

A minimum graduation grade-point index of 3.00 or equivalent is required for unconditional admission. An undergraduate GPA of 3.00 does not guarantee admission. Applicants with GPAs of 3.00 or slightly above will be expected to have a science course GPA of 3.00.

Transfer Students

Transfer credits from other institutions of higher learning cannot be used to replace the minimum of 9 hours of Biology Department course work required for the M.S. thesis degree. Up to 12 hours of Biology graduate credits taken at IUPUI by graduate non-degree students may be transferred to the non-thesis option. At least half of the coursework hours in a Ph.D. program of study must be taken while enrolled at IUPUI.

Application Process

REMEMBER: ALL MATERIALS MUST BE SUMBITTED TO THE DEPARTMENT BEFORE THE GRADUATE COMMITTEE WILL REVIEW YOUR FILE.

Online Application

In the online application, please make sure you complete all sections. This includes the Personal Statement, Departmental Question, and Recommendations sections. It is helpful to include your name on all typed, uploaded documents.

In the Educational Objective Section, you must select: **Academic Objectives: Biology (Purdue University)**

For the **:** Provide a statement (approximately 750 words) that identifies your academic goals, career objectives, why you are applying to this program, and the qualifications you have that make you a strong candidate for this program. *(On the application, ignore the statement that says "check the department page for more specific information". The statement provided above is sufficient for the writing your personal statement.)*

In the section, you must specify which program you are pursuing. The choices are as follows: Pre-Professional Non-Thesis, M.S. non-thesis, M.S. thesis, and Ph.D. Simply write a sentence saying "I am applying for the .... program." and upload it.

The last step before submitting an on-line application is the application fee. ***You must pay this fee in order to submit your application.***

IMPORTANT NOTE: An email will be sent to you when our department receives your complete application. If you do not receive an application submission email within 3-4 weeks, please email or call to verify that we have it. We have several students who mistakenly select the wrong Academic Objective and their application goes to another department. It is important to check your email to verify we received your application. If your application is mis-directed, it can be easily switched over to our department.

Letters of Recommendation

At least 2 letters should come from professors in previous science courses and should address the applicant's aptitude and potential in a science program at the graduate level.

The preferred method is using the online section within the application. If you have a person who does not wish to fill out the recommendation online, he or she may write a standard letter and mail it to the department. They can also include an optional recommendation form, but it is NOT required (click here to print the form). Or, you may call the Department of Biology at (317) 274-0577, or e-mail biograd@iupui.edu, with your address to have the optional form mailed to you. We also accept "committee packets" that universities put together for their students.

Official Transcripts

Send two (2) official copies of transcripts from all attended institutions (including any IU campus) directly to the Biology Department:

IUPUI Biology Department

ATTN: Graduate secretary

723 West Michigan Street, SL 306
Indianapolis, IN 46202

Official GRE and TOEFL Scores

(TOEFL scores are for international students only)* The GRE general test is required and be substituted with other test scores. You only need to take the general test, **do not** take a subject test. To find testing sites or to send scores, visit the ETS website at www.ets.org.

MCAT scores and scores from other professional exams do not substitute for the GRE score. A cumulative GRE score of 1000 with a minimum score of 400 in the verbal section is the minimum required for admission. The average verbal plus quantitative totals in recent years are 1170 for M.S. programs and 1200 for the Ph.D.

GRE and TOEFL codes: IUPUI = 1325, Biology Department = 0203

*Test of English as a Foreign Language (TOEFL) with a minimum score of 600 on the paper-based test, 250 on the computer-based test, or 80 on the internet-based test (foreign students only).

To be eligible for Teaching Assistantships, foreign applicants must pass the English Language Proficiency screening administered by the IUPUI ESL Program.

Application Deadlines

Ph.D.: March 1

M.S. Thesis (full time with support): May 1 for Fall entry or October 1 for Spring entry

Pre-Professional Non-Thesis and M.S. Non-Thesis: August 1 for Fall entry or December 1 for Spring entry

Chemistry, MS & PhD

Applications for full-time study should be completed by January 31st for entry the following fall semester to ensure complete consideration for fellowships and other financial support.

Late applications will be considered only if full-time positions are available. Applications for part-time graduate admission may be submitted up to two months prior to the intended starting date.

University Code: 1325

Application Process

Graduate Application Form: Complete the application online or download the application and mail it to the address below.

Letters of Recommendation: We require three letters of recommendation from people familiar with you and your student and/or professional career. (See recommended letter format) Letters on letterhead are also acceptable.

Transcripts: One original copy of the official transcript(s) of all previous university work is required. All degrees awarded should be documented. A list of university courses and their titles that do not appear on the transcript(s) should also be sent to us.

GRE: All students are required to take the Graduate Record Examination general test; the chemistry exam is not required but will be considered if a score is submitted. Please have the documentation of your score mailed directly to us from Educational Testing Service.

TOEFL: Foreign students must take the TOEFL or IELTS. The minimum scores required for admission are 79 (TOEFL internet-based test); 213 (TOEFL computer-based test); or 6.5 (IELTS).

Application Fee: An application fee will be charged which may be paid by credit or debit card.

Fellowships & Assistantship: If you are interested in applying for a fellowship, please download and mail to us the form: "Release of Confidential Information to the University Fellowship Subcommittee ."

Note: Fall semester deadline to be considered for a Fellowship or a Teaching Assistantship is March 15th. In addition University Fellowships are available. Those have an earlier deadline of January 15th.

Applications, letters of recommendation, transcripts, and exam scores should be mailed to:

Graduate Admissions Committee

Department of Chemistry and Chemical Biology

Indiana University-Purdue University Indianapolis

402 North Blackford Street, LD 326
Indianapolis, IN 46202-3274

Graduate Continuing Non-Degree (GCND) Students

Graduate Continuing Non-Degree (GCND) students who wish to enroll in courses, though not necessarily in a degree program, should contact the IUPUI Graduate Office. Students should be aware that no more than 12 credit hours earned as a non-degree student may be counted toward a degree program.

Computer and Information Science

Master of Science in Computer Science (M.S.)
Doctor of Philosophy in Computer Science (Ph.D.)

MS in Computer Science

The applicant to the graduate program must have a four-year bachelor's degree or equivalent. Interested students with 3-year degree should contact the department for information.

The applicant's record should exhibit outstanding achievement as indicated by the grade point average for each degree over his or her entire academic record. An applicant is expected to have a GPA of at least a 3.00 on a scale of 4.00. The record should also demonstrate strong individual accomplishments and recommendations from independent references.

Applicants who do not have a Bachelor's degree in Computer Science or a related field may be required to take prerequisite courses and pass with a grade of B+ or higher.

Application Process

1. IUPUI online application
2. Three (3) letters of recommendation.
3. Statement of purpose
4. Official transcripts and evidence of degrees awarded from each post-secondary school attended. If the original documents are in not in English, you must submit a certified translation of each official transcript and degree certificate. Notarized copies are NOT acceptable. Transcript request form
5. Demonstration of English proficiency: Students whose native language is not English must demonstrate English proficiency through one of the following options:

1. Official TOEFL* score report with the following minimum scores:
   550 (paper),
   213 (computer),
   or **79** (internet: writing 18, speaking 18, listening 14, reading 19)
2. Official IELTS (International English Language Testing System) score of at least **6.5**.

6. GRE* score (if seeking financial aid)
7. Download and complete the Financial Instructions and attached Financial Support Agreement (international students only).

*GRE and TOEFL school code: **1325**
GRE department code: **0402**
TOEFL department code: **78**

Send application materials the following address.

Graduate Admissions Committee

723 W. Michigan Street, SL 280
Indianapolis, Indiana 46202

If you have additional questions during the application process, do not hesitate to contact a graduate advisor. You can call during business hours. Our telephone number is (317) 274-9727. or email us at admissions@cs.iupui.edu.

Application Deadlines
Fall Semester: January 15 (with priority consideration for financial aid), May 1 (with limited financial aid consideration)

Spring Semester: September 15 (with limited financial aid consideration)

PhD in Computer Science
Applicants must have a four-year bachelor's or equivalent degree. We place great weight on the quality of the institution. The applicant must have adequate computer science background, as determined by the admissions committee.

Applicants who begin a graduate program in computer science at another institution should complete at least a year in that program before applying to us. If the program is a master's program, we normally require completion of the program before registration here. If the program is a doctoral program, we ask for evidence of eligibility to continue that program.

GPA. We expect our entering students to have a grade point average (GPA) equivalent to at least 3.50 (A = 4, B = 3, C = 2, D = 1, F = 0) in all their courses as well in computer science and mathematics courses. If the institution does not use an ABC... grading system and does not publish an official algorithm for converting its grades to such a system, then we expect applicants from it to be in the top ten percent of their class.

Application Deadlines
Fall Admission: January 15

Spring Admission: September 15

Application Process
Complete the online application and then complete the following items and mail them to the Department of Computer and Information Science:

- Official transcripts and evidence of degrees awarded (with English translation), if necessary Transcript Request Form
- Computer Science Application Form 1 (.doc) and Form 2 (.doc)
- Letters of recommendations (3)
- Statement of purpose
- Copies of TOEFL reports, if appropriate
- GRE score, if appropriate*
- Financial statement (international students only). The form can be obtained at http://iapply.iupui.edu/expenses/support-agreement.pdf.

Graduate Record Examination
Scores on the Graduate Record Exam are not required for admissions. Applicants seeking financial aid, however, must submit general GRE exam scores. The applicants are strongly encouraged to submit scores for the Computer Science subject test.

International Students
All applicants whose native language is not English must submit scores for TOEFL. Requirement is a 550 score for paper-based and 250 for the computer-based test. Students submitting TOEFL iBT must have minimum scores of:

- Reading (19)
- Listening (14)
- Speaking (18)
- Writing (18)

An overall TOEFL i BT score of 79 is required. An IELTS band score of 6.5 is also acceptable.

Potential applicants with questions are advised to contact a graduate advisor by calling 317-274-9727.

Earth Sciences
Ph.D. in Applied Earth Sciences
One of the nation's first doctoral programs in applied earth sciences merging geoscience, geoinformatics and human health has been established in the School of Science at Indiana University-Purdue University Indianapolis.

When you have decided to apply to join us, fill out the Online Application Form provided by the IUPUI Graduate Office (scroll down to "Proceed to Online Application").

NOTE: The suggested application submission date is January 15th. Submission in mid-January maximizes the prospective student's opportunity to receive financial aid.

Master of Science in Geology
The IUPUI graduate program in Geology leads to a Master of Science degree from Indiana University. We offer a thesis and non-thesis option; however, typically only thesis-option students are considered for funding. Our thesis option requires 24 credit hours of graduate level courses and 6 credit hours of a research thesis. See Requirements of MS Degree for more details.

When you have decided to apply to join us, fill out the Online Application Form provided by the IUPUI Graduate Office (scroll down to "Proceed to Online Application").

NOTE: The suggested application submission date is January 15th. Submission in mid-January maximizes the prospective student's opportunity to receive financial aid. However, the Earth Sciences Department will consider applications for admission throughout the year.

Forensic and Investigative Sciences, MS
The M.S. Program in Forensic Science, which awards a Purdue University degree, requires 35 credit hours of study beyond the baccalaureate level. It is designed for students seeking careers as professional forensic scientists who desire employment in the criminal justice field or a related area.

The **admission requirements** are as follows:

- A Bachelor's degree from an accredited institution in chemistry, biology, forensic science, pharmacology/toxicology, or a related science
- A minimum GPA of 3.00 for all undergraduate work
- A score in the upper one-half in the GRE general exam

The program will serve full time students who meet the above requirements as well as students who are presently employed full time in a forensic science laboratory or other analytical laboratory.

A non-thesis option is permitted only for those students who must enroll part time in the program because they are employed full time in a forensic science or related laboratory. These students will be permitted to complete a lab based project if they wish, including one that does not rise to the level of a thesis but, in addition, all students in this category must complete a literature based research project, write it up and report it orally to the faculty and students of the FIS program in the manner that one would defend a thesis.

How to Apply

Application to the program can be done completely online and this is the preferred way to apply although hard copies of forms will be accepted. The online application is called the "eApp Online Admissions Application."

You will be directed to create an account to begin your application. The application can be filled out in stages and saved along the way so you can return to it later. The eApp has provisions for uploading your personal statement and listing contact names for three letters of recommendation.

These people will automatically be emailed and asked to input their letters of recommendation.

The Forensic and Investigative Sciences Program accepts applications once a year for beginning matriculation in the Fall semester. The deadline for applying to the program is **January 15th** of the year you wish to start. Applications must be complete by **January 15th** or they will not be considered. Applicants must submit the following:

1. The completed application which will also require
- Three (3) letters of recommendation. These would normally be from professors who can evaluate your ability to successfully complete graduate work in forensic science
- A personal statement that discusses your educational and work background, interest and experience (if any) in forensic science, and research interests if you are full time. For part-time students, also include your current work experience.

2. Official final transcripts from all higher education institutions that you attended.
3. Applicants must arrange to have the testing agency send their GRE scores (and TOEFL, if applicable) directly to the university (University code is 1325).

Applications are not normally considered on a rolling basis. They are generally considered en masse after the January 15th deadline. You will be notified within a few weeks after the decision is made.

Mathematics

Master of Science in Mathematics (M.S.)
Doctor of Philosophy in Biostatistics (Ph.D.)
Doctor of Philosophy in Mathematics (Ph.D.)

MS in Mathematics
Application Process

1. IUPUI online application
2. A statement of personal and professional goals (300-500 words). This can be submitted as part of the online application or sent directly to the department.
3. A resume or CV. This can be submitted as part of the online application or sent directly to the department.
4. Three letters of recommendation. These can be submitted online or you may download and print the form.
5. Official transcripts and evidence of degrees awarded from each post-secondary school attended. If the original documents are in not in English, you must submit a certified translation of each official transcript and degree certificate. Notarized copies are NOT acceptable. Transcript request form
6. Demonstration of English proficiency*: Students whose native language is not English must demonstrate English proficiency through one of the following options:

1. Official TOEFL score report not more than two years old with the following minimum scores:
   570 (paper),
   230 (computer),
   or **79** (internet: writing 18, speaking 18, listening 14, reading 19)
2. Official IELTS (International English Language Testing System) score of at least **6.5**.
3. Official PTE (Pearson Test of English) score of at least **58**.

7. Non-waiveable, non-refundable application fee of $60 for domestic applicants and $60 for international applicants.
8. International Student Financial Information Form (For international students only; download and print the form).

*If you are a native speaker of English, you are not required to demonstrate English proficiency. An exception will be granted for non-native speakers of English who have completed a post-secondary degree at a college or university in a native-English speaking country within two years of the anticipated enrollment semester and for non-native speakers of English who are U.S. citizens or permanent residents.

NOTE: All documents submitted become the property of IUPUI. After one year of **no** enrollment, hard copies will be discarded.

Send application materials the following address.

Graduate Programs

Department of Mathematical Sciences

IUPUI

402 N. Blackford St. Rm. 270

Indianapolis IN 46202-3216

Email: grad-program@math.iupui.edu
Phone: 1-317-274-6918
Fax: 1-317-274-3460

Admission Deadlines
Fall Semester

- Assistantship consideration: March 1
- All international applicants: March 1
- All other applicants: May 1*

Spring Semester

- All international applicants: October 1
- All domestic applicants: October 15*

Spring applicants are not considered for financial support; due to schedule of course offerings, it is not always feasible to begin the program in the Spring semester. Email grad-program@math.iupui.edu for more information before applying for Spring admission.

Summer Semester

- April 1*

This deadline applies for M.S. Math Education majors only. Summer applicants are not considered for financial support; due to schedule of course offerings, it is not always feasible to begin the program in the Summer semester (with the exception of math education). Email grad-program@math.iupui.edu for more information before applying for Summer admission (unless you are math education).

*If you cannot provide all application materials by this date, we encourage you to apply to the Graduate Non-Degree program through the IUPUI Graduate School Office. This program will allow you to take courses towards your intended degree program, and you may transfer up to 12 credit hours into the M.S. program, subject to graduate committee approval. Email grad-program@math.iupui.edu for more information.

PhD in Biostatistics

Admission Requirements

Applications are invited from individuals with strong quantitative and analytical skills and a strong interest in biological, medical and/or health related sciences.. This program requires completion of at least 90 credit hours of graduate work. A maximum of 30 credit hours completed in either a previous degree program, or in graduate non-degree status, may contribute towards this requirement, subject to program approval. However, transfer of credit hours completed in graduate non-degree status is limited to no more than 12. All course grades must be a B or higher in order to be considered for transfer into the program.

Application Process

1. IUPUI online application
2. A statement of personal and professional goals (300-500 words). This can be submitted as part of the online application or sent directly to the department.
3. A resume or CV. This can be submitted as part of the online application or sent directly to the department.
4. Three letters of recommendation. These can be submitted online or you may download and print the form.
5. Official transcripts and evidence of degrees awarded from each post-secondary school attended. If the original documents are in not in English, you must submit a certified translation of each official transcript and degree certificate. Notarized copies are NOT acceptable. Transcript request form
6. Non-native speakers of English must provide proof of English proficiency. See the IUPUI Office of International Affairs English Language Requirements for details.
7. Non-waiveable, non-refundable application fee of $60 for domestic applicants and $60 for international applicants.
8. International Student Financial Information Form (For international students only; download and print the form).
9. ALL applicants must submit official general GRE test scores.

NOTE: All documents submitted become the property of IUPUI. After one year of **no** enrollment, hard copies will be discarded.

Send application materials the following address.

Graduate Programs

Department of Mathematical Sciences

IUPUI

402 N. Blackford St. Rm. 270

Indianapolis IN 46202-3216

Email: grad-program@math.iupui.edu
Phone: 1-317-274-6918
Fax: 1-317-274-3460

Admission Deadlines

Fall Semester

- All applicants: January 15

Applications are considered for Fall entry only; application entries for Spring (January) and Summer (June) will not be considered. However, any prospective applicant who would like to start taking classes during a Spring or Summer session is welcome to do so as a graduate non-degree student. A separate application is required.

PhD in Mathematics

Admission Requirements

Applications are invited from individuals with a strong background in mathematics who either have an M.S. in mathematics or else have been admitted to our combined M.S.- Ph.D. program. This program requires completion of at least 90 credit hours of graduate work. An M.S. degree from an accredited university may contribute up to 30 credit hours toward this requirement, subject to approval.

Application Process

1. IUPUI online application
2. A statement of personal and professional goals (300-500 words). This can be submitted as part of the online application or sent directly to the department.
3. A resume or CV. This can be submitted as part of the online application or sent directly to the department.
4. Three letters of recommendation. These can be submitted online or you may download and print the form.
5. Official transcripts and evidence of degrees awarded from each post-secondary school attended. If the original documents are in not in English, you must submit a certified translation of each official transcript and degree certificate. Notarized copies are NOT acceptable. Transcript request form

6. Demonstration of English proficiency*: Students whose native language is not English must demonstrate English proficiency through one of the following options:
1. Official TOEFL score report not more than two years old with the following minimum scores:
   570 (paper),
   230 (computer),
   or **79** (internet: writing 18, speaking 18, listening 14, reading 19)
2. Official IELTS (International English Language Testing System) score of at least **6.5**.
3. Official PTE (Pearson Test of English) score of at least **58**.

7. Non-waiveable, non-refundable application fee of $60 for domestic applicants and $60 for international applicants.
8. International Student Financial Information Form (For international students only; download and print the form).

*If you are a native speaker of English, you are not required to demonstrate English proficiency. An exception will be granted for non-native speakers of English who have completed a post-secondary degree at a college or university in a native-English speaking country within two years of the anticipated enrollment semester and for non-native speakers of English who are U.S. citizens or permanent residents.

NOTE: All documents submitted become the property of IUPUI. After one year of **no** enrollment, hard copies will be discarded.

Send application materials the following address.

Graduate Programs

Department of Mathematical Sciences

IUPUI

402 N. Blackford St. Rm. 270

Indianapolis IN 46202-3216

Email: grad-program@math.iupui.edu
Phone: 1-317-274-6918
Fax: 1-317-274-3460

Admission Deadlines

Fall Semester

- Fellowship consideration: February 1
- Assistantship consideration: March 1
- All international applicants: March 1
- All other applicants: May 1

Spring Semester

- All international applicants: October 1
- All domestic applicants: October 15

Spring applicants are not considered for financial support; due to schedule of course offerings, it is not always feasible to begin the program in the Spring semester. Email grad-program@math.iupui.edu for more information before applying for Spring admission.

Physics, MS & PhD

Students seeking to enroll in the physics graduate programs should have a background in the usual undergraduate courses in physics, mathematics and other sciences. Graduates from related fields of study in pure and applied sciences, and engineering, may be accepted on a probationary basis until they have completed any necessary undergraduate courses in physics.

Letters of Recommendation: We require three letters of recommendation from people familiar with you and your student and/or professional career. (See recommended letter format .)

Transcripts: One original copy of the official transcript(s) of all previous university work is required. All degrees awarded should be documented. A list of university courses and their titles that do not appear on the transcript(s) should also be sent to us.

GRE: You are required to take the Graduate Record Examination general test. The subject test in physics is not required, but is strongly encouraged. Please have the documentation of your score mailed directly to us from Educational Testing Service.

IMPORTANT: All potential applicants be advised that if you need your score reports before November 1, 2011, you should take the current GRE General Test before August 1, 2011. A revised GRE test has been created and will be implemented August 1, 2011, and scores for tests taken in August - October 31 will not be released until November 1, 2011, at the earliest. For more information please visit www.ets.org/gre.

TOEFL: Foreign students must take the TOEFL or IELTS. The minimum scores required for admission are 79 (TOEFL internet-based test); 213 (TOEFL computer-based test); or 6.5 (IELTS).

Physics Qualifying Exam: The Qualifying Exam must be taken, at the latest, after completing the first semester of graduate work. Two consecutive attempts are permitted to obtain a passing grade. A free attempt is granted to the student upon first enrolling in the Department.

Online Application: Please be sure to complete the Statement of Purpose regarding your goals and plans for your professional career in the on-line application. Also note the specific area of Physics that interests you. Apply now.

Application Fee: An application fee will be charged which may be paid by credit or debit card.

Fellowships & : If you are interested in applying for a fellowship, please download and mail to us the form: "Release of Confidential Information to the University Fellowship Subcommittee ." Note: Fall semester deadline to be considered for a Fellowship or a Teaching Assistantship is March 15th. In addition University Fellowships are available. Those have an earlier deadline of January 15th.

Letters of recommendation, transcripts and exam scores should be mailed to:

Director of Graduate Programs

Department of Physics

IUPUI School of Science

402 N. Blackford St., LD 154
Indianapolis IN 46202-3273

Clinical Psychology, MS & PhD

Students will be admitted to the program only at the beginning of the Fall Semester. The CP program is designed for full-time students only.

All admission materials must be submitted by December 1.

Admission Materials

1. A graduate school application that can be electronically submitted
2. A full set of undergraduate and graduate transcripts
3. Three (3) letters of recommendation
4. Verbal and quantitative GRE (Graduate Record Examination) scores and the GRE advanced subtest in psychology (subject test required for PhD program only).
5. Foreign students must submit TOEFL scores (Test of English as a Foreign Language) *unless* student has a Bachelor's degree from a predominantly English-speaking country (check here for the official list).
6. Personal Statement.
7. Departmental Questions.

Admission Requirements

- An undergraduate and graduate grade point average of 3.20 or higher on a 4-point scale for the Ph.D. program, and higher than 3.00 for the M.S. program.
- Three (3) favorable letters of recommendation. The recommendation form must be attached to all reference letters and may be submitted by the recommenders through the online application or mail. Download the Recommendation form if you plan to submit your letters by mail.
- A personal statement displaying an interest in the field of clinical psychology with a focus in psychiatric rehabilitation or health psychology.
- Prior research experience is strongly recommended, but not required, for admission.

Undergraduate Prerequisites

Except in unusual circumstances students admitted to the program are expected to complete at least 15 credit hours in psychology.

Although there are no specific undergraduate course prerequisites for program entry, students without coursework in the following areas will likely be at a disadvantage when taking some of the required courses:

1. Tests and Measurement
2. Statistics
3. Human Physiology or Physiological Psychology
4. Abnormal Psychology

Students without preparation in these areas may be asked by their instructors to complete some remedial activity prior to enrolling in the graduate course (e.g., reading an undergraduate text or taking an undergraduate course).

MS in I/O Psychology

All applicants must have a Bachelor's degree from an accredited institution. Entrants are typically accepted for full-time study beginning in the Fall semester; on rare occasions part-time applicants are considered case-by-case.

Admission Requirements

1. Apply online
2. Graduate Record Examination (the psychology subtest is not required) To be considered, an applicant must have a combined verbal and quantitative GRE score of **1100**, including a minimum quantitative score of **550**.
3. Also, students must have an undergraduate GPA of at least 3.00 on a 4-point scale
4. Three (3) strong letters of recommendation (including the recommendation Form).
5. Personal statement
6. Two (2) official transcripts of all undergraduate and graduate coursework.
7. Foreign students must submit TOEFL scores (Test of English as a Foreign Language) unless student has a Bachelor's degree from a predominantly English-speaking country (check here for the official list).
8. A program prerequisite is a course in statistics.

Students are admitted only for Fall enrollment. Application materials should be submitted no later than **February 1**.

Psychobiology of Addictions

Admission Requirements

1. Apply online
2. Take the GRE (no minimum score required).
3. A minimum undergraduate grade point average of 3.20*
4. Foreign students must submit TOEFL scores (Test of English as a Foreign Language) unless student has a Bachelor's degree from a predominantly English-speaking country (check here for the official list).
5. A personal statement
6. Three (3) letters of recommendation (including the recommendation form).
7. Two (2) official transcripts of all undergraduate and graduate coursework.

*Majors in the life sciences (psychology, biology, or chemistry) are particularly encouraged to apply. Academic preparation and performance in the life sciences (e.g., experimental psychology and behavioral neuroscience; cell and systems biology; chemistry) are given high priority in considering candidates for admission.

Women and minorities are strongly encouraged to apply.

Financial support is typically provided to all students in good standing.

Applications and supporting materials should be received by January 1st for admission for the following Fall semester.

For more information about the program, contact Dr. Stephen Boehm (slboehm@..

Psychology

All applicants must have a bachelor's degree from an accredited institution, Masters degree not required for admission into the Ph.D. programs.

Applicants must

- take the Graduate Record Examination (GRE), including the advanced test in psychology (Clinical Ph.D. only),
- submit three letters of recommendation (including the recommendation form),
- a personal statement, and
- provide official transcripts (2 copies) of past academic work.

Admission Deadlines

- December 1 (Clinical Psychology Ph.D.)
- January 1 (Psychobiology of Addictions Ph.D.)
- February 1 (Industrial/Organizational Psychology M.S.)
- March 15 (Clinical Psychology M.S.)

Online Applications

Applications are completed online and additional information is available at the Department of Psychology or through the graduate psychology office. Call **317-274-6945** or email gradpsy@iupui.edu for additional information.

General Requirements for Graduate Degrees

Students must be seeking graduate degrees and meet the general requirements of the Indiana University Graduate School or the Purdue University Graduate School, depending on the degree. Specific requirements of the individual department in which the student enrolls must also be met. Special departmental requirements are listed under the major department.

At least 30 academic credits are required for the master's degree and at least 90 academic credits are required for the Ph.D. Some programs may require more credits. The maximum number of transfer credits allowed is 12 hours, but some programs may allow fewer. The student's major department and the Office of the Associate Dean for Research and Graduate Education determine acceptability of transfer credits from another college or university. No work may be transferred from another institution unless the grade is a B or higher.

Students must meet graduate school resident study requirements. At least one-half of the total credit hours used to satisfy a Purdue master's degree must be earned while in residence at IUPUI. At least 30 credit hours of IU graduate work must be completed while enrolled on a campus of Indiana University to satisfy the master's degree. At least one-third of the total credit hours used to satisfy degree requirements must be earned (while registered for doctoral study) in continuous residence on the IUPUI campus. The major department should be consulted for other more specific rules.

All non-native speakers of English must submit results of the Test of English as a Foreign Language (TOEFL). A minimal score of 550 on the paper version/PBT TOEFL or a minimal score of 213 on the computer-based version/CBT TOEFL is required. Departments may set higher standards. Applicants in the Indianapolis area may substitute the IUPUI English as a Second Language (ESL) Placement Examination for the TOEFL. See the English for Academic Purposes web site for additional information. Information about this test is also available from the Office of International Affairs online at http://international.iupui.edu/.

Each student must file a plan of study that conforms to the departmental and disciplinary requirements. This is normally done in consultation with a faculty advisory committee. A tentative plan of study should be drawn up in advance of registration for the first semester of graduate work. The student and the graduate advisor should do this. Students and advisors should pay careful attention to the deadlines established by the graduate schools for filing plans of study.

Students must meet the grade and grade point average requirements. Only grades of A, B, or C are acceptable in fulfilling graduate school requirements in any plan of study. An advisory committee or department may require higher performance than C in certain courses. Grades of Pass (P) are not acceptable. Specific cumulative grade point average requirements, if any, are determined by the individual departments.

Students must fulfill departmental requirements regarding oral and written examinations. These requirements vary by program and students should consult the major department. The graduate school has no general requirement for oral and written examinations for the non-thesis master's degree.

Graduate Non-Degree Study

A student who has previously earned a bachelor's degree may enroll in graduate courses without making formal application as a degree-seeking student. Application as a graduate non-degree student is, however, required and may be obtained through the IUPUI Graduate Office at the Web site www.iupui.edu/~gradoff/gnd.

Additional information can be obtained at the IUPUI Graduate Office, University Library, Room UL 1170, 755 West Michigan Street, Indianapolis, IN 46202; phone (317) 274-1577. Students should consult the major department to determine how many credits earned in a non-degree status may be transferred into a graduate degree program.

Degree Programs

Graduate Certificates

Purdue University Graduate Certificates, offered through the Department of Computer and Information Science, include Databases and Data Mining, Computer Security, Software Engineering, Biocomputing, and Biometrics. For more information on these graduate certificates visit the Computer and Information Science department website.

Master of Science Degrees

Purdue University Master of Science degrees are offered in all School of Science departments except Earth Sciences, which offers an Indiana University Master of Science degree. All departments award either a thesis or nonthesis option.

- Applied Statistics
- Biology
- Chemistry
- Clinical Psychology
- Computer and Information Science
- Forensic and Investigative Sciences
- Geology
- Industrial Organizational Psychology
- Mathematics
- Mathematics Education
- Physics
- Psychobiology of Addictions

Doctor of Philosophy Degrees

A Purdue University Ph.D. program in Clinical Psychology is offered by the Department of Psychology. Purdue University Ph.D. Programs pursued at IUPUI, arranged through Purdue, West Lafayette, are available in biology, chemistry, computer science, mathematics, physics, and an additional area of psychology.

The Department of Earth Sciences offers an Indiana University Ph.D. program in Applied Earth Sciences.

In addition, together with the Division of Biostatistics in the Indiana University School of Medicine, the Department of Mathematical Sciences administers and offers an Indiana University Doctor of Philosophy in Biostatistics, with all requirements completed on the IUPUI campus.

Indiana University Ph.D. Programs pursued at IUPUI in departments or programs of the Indiana University School of Medicine in which School of Science faculty hold adjunct appointments are available.

- Biology
- Biostatistics
- Chemistry
- Clinical Psychology
- Computer and Information Science
- Mathematics
- Physics
- Psychobiology of Addictions

Joint M.D. - Ph.D. Degrees

Several departments participate in the joint M.D. - Ph.D. program with the Indiana University School of Medicine. In this program students concurrently earn an Indiana University Doctor of Medicine degree in the School of Medicine and a Ph.D. degree arranged through the School of Science. Students interested in this option should consult the program in which they wish to earn the Ph.D.

Student Learning Outcomes

- Biology
- Chemistry
- Clinical Psychology
- Computer and Information Science
- Forensic and Investigative Sciences
- Geology
- Industrial Organizational Psychology
- Mathematics
- Physics
- Psychobiology of Addictions

Biology

Master of Science in Biology (M.S.)

Students pursuing the Biology Pre-Professional M.S. will be able to:

1. Integrate biological knowledge and information incorporating cellular, molecular, genetic, physiological, and biochemical approaches.
2. Use critical thinking to access, analyze and evaluate information relevant to the study of biological sciences.
3. Develop proficiency in reading, interpreting, and evaluating primary scientific literature.
4. Summarize and present scientific ideas and biological information in a formal setting, in writing and orally, to faculty or fellow students.

Students pursuing the Biology Thesis M.S. will be able to:

1. Conduct independent research under the supervision of a research advisor to design, test, and analyze original laboratory and/or field experiments.
2. Demonstrate the ability to read, interpret, and incorporate the results of primary literature into the research design.
3. Employ rigorous approaches to data collection, replication of experimental results, set up of experimental controls and sampling design, and organization of raw data.
4. Summarize, describe and analyze patterns in data, interpret results and draw conclusions from data to defend an argument.
5. Present and communicate research results to peers through a poster presentation, research seminar and/or publication of results.
6. Write and defend a thesis that demonstrates mastery in at least one discipline of biological sciences.

Doctor of Philosophy in Biology (Ph.D.)

In addition to the above outcomes, students completing the Ph.D. in Biology will be able to:

1. Demonstrate a comprehensive knowledge in biological sciences through successful completion of a qualifying and preliminary examination.
2. Document an original contribution to biology through independent experimental design, peer-reviewed publication of results, and presentation and defense of a thesis.

Chemistry

Master of Science in Chemistry (M.S.)

In addition to SLOs proposed for B.A. and B.S. students, those who graduate with a M.S. in Chemistry will be expected to:

1. Demonstrate increased depth of understanding in most sub-disciplines of chemistry.
2. Integrate sub-disciplines of chemistry and other disciplines as applicable in problem solving and research.
3. Read and understand peer-reviewed chemical literature, and apply in field of study.
4. Present and communicate results to peers through poster, seminar and/or publishing.
5. Identify chemical problems and design experiments to solve these problems.
6. Teach effectively in labs or recitations in lower-level undergraduate chemistry courses.
7. For thesis MS, propose major area of research and conduct independent research under the mentoring of a research advisor.
8. For thesis MS, write and defend the thesis.

Doctor of Philosophy in Chemistry (Ph.D.)

In addition to the above learning outcomes for the M.S. degree, Chemistry Ph.D. students upon graduation will be expected to:

1. Think critically and creatively.
2. Propose original research project and conduct this research independently, including project design, analysis and conclusion.
3. Demonstrate mastery of chemistry in at least one discipline of chemistry.
4. Communicate and defend scholarly works.

Geology

Upon graduating, students with a graduate degree (MS in Geology or PhD in Applied Earth Sciences) will:

- Broadly understand and explain the significance of major research questions in one or more areas of earth sciences.
- Formulate testable scientific hypotheses.
- Carry out independent research in one or more subfields of earth sciences, using appropriate field, experimental, analytical, and/or computational methods.
- Describe, synthesize, and interpret the results of a scientific investigation orally and in writing.

Master of Science in Geology (M.S.)

Students who graduate with an MS degree* will achieve the following objectives:

1. Demonstrate the ability to synthesize current research questions and approaches in one or more subfields of Earth Sciences by critical evaluation of primary scientific literature.
2. Write a research proposal that presents a testable hypothesis, outlines the types of data needed to test the hypothesis, and describes how the collected data will be used to test the hypothesis.
3. Devise and implement a field, experimental, analytical, and/or computational plan aimed at collecting and analyzing the data necessary to address a specific scientific question.
4. Communicate research results to peers via poster or oral presentation, or publication in peer-reviewed journals, meeting abstracts, and/or technical reports.
5. Write and defend their research results (orally or in poster format) to demonstrate mastery of the material and an ability to communicate the results and significance of their work.

**numbers 1-5 apply to thesis-option MS graduates. Number 1 applies to non-thesis option MS graduates.*

Doctor of Philosophy in Applied Earth Sciences (Ph.D.)

Students who graduate with a Ph.D. in Applied Earth Science will achieve the following objectives:

1. Conduct independent research under the supervision of a research advisor to design, test, and analyze the results of original laboratory and/or field experiments.
2. Demonstrate the ability to read, interpret, and incorporate the results of primary literature into the research design.
3. Employ rigorous approaches to sampling design and data collection, replication of experimental results, set up of experimental controls, and organization of raw data.
4. Summarize, describe and analyze patterns in data, interpret results and draw conclusions from data to defend or refute a hypothesis.
5. Demonstrate a comprehensive knowledge of applied earth sciences through successful completion of preliminary and qualifying examinations.
6. Document an original contribution to applied earth sciences through publication of peer-reviewed results, and presentation and defense of an original dissertation.

Clinical Psychology

Doctor of Philosophy in Clinical Psychology (Ph.D.)

Graduate students earning a Purdue University Ph.D. in Clinical Psychology on the IUPUI campus will demonstrate the following abilities:

1. Students will demonstrate knowledge in the breadth of scientific psychology, including historical perspectives ofits foundations and development.
2. Students will demonstrate knowledge in the theory, methodology, and data analytic skills related to psychological research.
3. Students will demonstrate the ability to generate new scientific knowledge and theory related to the field of psychology.
4. Students will acquire knowledge and skills in the assessment of individual strengths and weaknesses, as well as the diagnosis of psychological problems and disorders.
5. Students will acquire knowledge and skills in the conceptualization, design, implementation, delivery, supervision, consultation, and evaluation of empirically-supported psychosocial interventions for psychological problems and disorders.
6. Students will demonstrate sensitivity, knowledge, and skills in regard to the role of human diversity in the research and practice of clinical psychology.
7. Students will demonstrate a working knowledge of the APA ethical code and will demonstrate their ability to apply ethical principles in practical contexts.

Master of Science in Clinical Psychology (M.S.)

Students graduating with a M.S. in Clinical Psychology will be able to demonstrate:

1. Students will demonstrate knowledge in the breadth of scientific psychology, including historical perspectives of its foundations and development.
2. Students will demonstrate knowledge in the theory, methodology, and data analytic skills related to psychological research.
3. Students will demonstrate the ability to synthesize and to critically evaluate new scientific knowledge and theory related to the field of psychology.
4. Students will acquire knowledge and skills in the assessment of individual strengths and weaknesses, as well as the diagnosis of psychological problems and disorders.
5. Students will acquire knowledge and skills in the conceptualization, design, implementation, delivery, supervision, consultation, and evaluation of empirically-supported psychosocial interventions for psychological problems and disorders.
6. Students will demonstrate sensitivity, knowledge, and skills in regard to the role of human diversity in the research and practice of clinical psychology.
7. Students will demonstrate a working knowledge of the APA ethical code and will demonstrate their ability to apply ethical principles in practical contexts.

Computer and Information Science

Graduate Certificates

The CIS department offers graduate certificates in Biocomputing, Computer Security, Software Engineering, Databases and Data Mining, and Biometrics. After graduation, a student should be able to:

1. Demonstrate a sound understanding of computing principles in the chosen area of study (Biocomputing, Biometrics, Computer Security, Databases and Data Mining, Software Engineering).
1. As evident from appropriate grades earned to satisfy the core course requirement for a specific certificate program

2. Demonstrate an ability to work in a group.
1. As evident from successfully developing moderately intense collaborative projects (e.g., semester projects in courses)

3. Demonstrate an ability to solve moderately complex problems in the chosen area of study.
1. As evident from successful completion of elective courses in Computer Science or related fields, as required by the Certificate program(s)

Master of Science in Computer and Information Science (M.S.)

After graduation, a student should be able to:

1. Demonstrate a sound understanding of general fundamental computing concepts (e.g., algorithms, programming languages, operating systems, etc.).
1. As evident from appropriate grades earned to satisfy the core course requirements

2. Demonstrate a relatively in-depth understanding of a subarea.
1. As evident from successfully completing a series of courses in a sub-area (e.g., databases

3. Demonstrate an ability to successfully work in a group and/or demonstrate an ability to successfully carry out moderately complex software projects.

1. As evident from successfully developing moderately intense collaborative projects (e.g., semester projects in courses) and/or
2. As evident from software development assignments/projects in courses (e.g., projects in networking course)

Additional Expectation from M.S. students choosing Thesis or Project Option:

1. Demonstrate an ability to systematically carry out scientific research (empirical and/or theoretical) on a moderately complex problem.

Doctor of Philosophy in Computer and Information Science (Ph.D.)

In addition to the above M.S. outcomes, Ph.D. students will:

1. Demonstrate an ability to develop original solutions and their validation that extend the state-of-art in a chosen specialization to significant research problem(s) as evident from publications in highly-ranked conferences/journals.

Forensic and Investigative Sciences

Master of Science in Forensic and Investigative Sciences (M.S.)

Mathematics

Master of Science in Mathematics (M.S.)

Degree concentrations include: Applied Mathematics, Pure Mathematics, Applied Statistics, and Math Education. In addition to the Student Learning Outcomes for the B.S. degree, those who graduate with a M.S. degree in Mathematics will be able to:

1. Demonstrate increased depth of understanding in most sub-disciplines of mathematics.
2. Integrate sub-disciplines of mathematics and other disciplines as applicable in problem solving.
3. Read and understand peer-reviewed mathematical literature.
4. Identify mathematical problems and design solutions to solve these problems.

Doctor of Philosophy in Mathematics (Ph.D.)

In addition to the Student Learning Outcomes for the M.S. degree, those who graduate with a Ph.D. degree in Mathematics will be able to:

1. Demonstrate a basic understanding of the fundamental ideas underlying the basic mathematical disciplines.
2. Demonstrate the ability to recognize significant research problems.
3. Demonstrate the ability to analyze problems, reach research solutions, and transmit the fundamental ideas to others.
4. Demonstrate a comprehensive knowledge in mathematical sciences through successful completion of a qualifying and preliminary examination.
5. Document an original contribution to mathematics through independent experimental design, peer-reviewed publication of results, and presentation and defense of an original thesis.

Doctor of Philosophy in Biostatistics (Ph.D.)

In addition to the Student Learning Outcomes for the M.S. degree, those who graduate with a Ph.D. degree in Biostatistics will be able to:

1. Demonstrate a basic understanding of the fundamental ideas underlying the basic mathematical disciplines.
2. Demonstrate the ability to recognize significant research problems.
3. Demonstrate the ability to analyze problems, reach research solutions, and transmit the fundamental ideas to others.
4. Demonstrate a comprehensive knowledge in biostatistics through successful completion of a qualifying and preliminary examination.
5. Document an original contribution to biostatistics through independent experimental design, peer-reviewed publication of results, and presentation and defense of an original thesis.

Physics

Master of Science in Physics (M.S.)

Student will demonstrate the following learning outcomes:

1. Students demonstrate proficiency in the core areas of physics (Classical Mechanics, Electromagnetism, Thermal Physics and Quantum Physics), and have knowledge of math sufficient to perform the calculations needed to apply their knowledge (Linear Algebra, Ordinary and Partial Differential Equations, Vector Calculus).
2. The most important outcome of their Masters is an ability to carry out a research project under the supervision of a faculty member. Research includes written and verbal communication. The written portion is demonstrated in a thesis or report. The ability to communicate verbally is demonstrated during the first part of the defense, which is open to the public. It is not required but expected that students will present their research at scientific conferences.

The students' progress towards their MS degree is evaluated by their advisors and advisory committee.

Doctor of Philosophy in Physics (Ph.D.)

Students will demonstrate the following learning outcomes:

1. Students demonstrate expertise in core areas of physics (Electromagnetism, Thermal Physics and Quantum Physics), as well as in other areas associated specifically with their research.
2. They demonstrate proficiency in widely used areas of mathematics (Linear Algebra, Ordinary and Partial Differential Equations, Vector Calculus) and in the use of advanced mathematical tools needed in their physics courses and their research.
3. The most important outcome of their PhD is an ability to perform independent research in collaboration with a faculty member. Their research culminates in an original project, written as a Thesis and defended in

an examination, which has a public part and a meeting with the examination committee.
4. Communication skills are emphasized throughout the PhD. The Thesis and examination establish the student's ability to communicate verbally and in scientific writing at a high level. Students also write reports in their courses, they have to present their research results at conferences, and it is expected that they will publish their results in scientific journals.
5. Their ability to plan and design a research plan is evaluated at a Preliminary exam when, if successful, they are fully admitted into the PhD program. Students in the PhD program meet at least once a year with their advisory committee to report on their progress.

Master of Science in Industrial/Organizational Psychology (M.S.)

Students graduating with a M.S. in I/O Psychology will be able to demonstrate:

1. Knowledge of the historical foundations of I/O psychology.
2. Knowledge of the theory, methodologies, and data analytic procedures used to conduct research in organizational settings.
3. Ability to synthesize and critically evaluate psychological theory and research as they relate to human cognition and behavior in organizations.
4. Knowledge related to the two core content domains within the field: *personnel psychology* (e.g., selection, training, and performance management) and *organizational psychology* (e.g., motivation, leadership, job attitudes, and group/team performance).
5. Knowledge and skills related to the conceptualization, implementation, and evaluation of scientifically based interventions intended to improve organizational functioning.
6. Awareness of, and appreciation for, the many aspects of human diversity in the workplace.
7. Knowledge of the American Psychological Association's code of ethics and the ability to apply ethical principles in the conduct of research and the application of knowledge in workplace settings.

Doctor of Philosophy in Psychobiology of Addictions (Ph.D.)

Graduate students earning a Purdue University Ph.D. in Psychobiology of Addictions on the IUPUI campus will demonstrate the following abilities related to the research focus of the degree:

1. Demonstrate knowledge of key concepts in the psychological and brain sciences, including the methods, history, and theoretical and empirical foundations, with special emphasis on the neuroscience of addiction.
2. Demonstrate the knowledge and skills necessary to conduct, analyze, interpret, and communicate original research and scholarship in behavioral neuroscience, particularly in addiction neuroscience.
3. Demonstrate understanding of the neural mechanisms and processes associated with the causes and consequences of substance abuse, including integration across genetic, neurobiological, developmental, and behavioral levels.
4. Think critically and creatively to solve problems and generate new knowledge in behavioral neuroscience in general, with focus on and application to problems of drug abuse and addiction.
5. Conduct research in the behavioral and addiction neurosciences in an ethical and responsible manner.

Department of Biology

- *Preprofessional:* Yost
- *Prepharmacy, Preoptometry, Preveterinary:* Alexander, Landaw
- *Biology programs:* Alexander, Landaw
- *Graduate programs:* Bard

The Department of Biology offers undergraduate instructional programs leading to the Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees. These programs are designed to prepare students for a variety of careers in the biological sciences and allow sufficient flexibility to accommodate the needs and interests of students. Postgraduate activities frequently selected by biology majors include graduate schools, medical and dental schools, other health care professions, agricultural schools, industrial positions in research and technology, and secondary teaching. The selection of a particular degree program in biology should be made in consultation with a departmental advisor.

The Department of Biology offers graduate study leading to the Master of Science (M.S.) degree. The M.S. degree program may be completed with a thesis option or with a nonthesis option. Among the nonthesis options is the M.S. degree in the teaching of biology, which is designed primarily for secondary school teachers, and a one-year preprofessional option for those seeking admission to medical or dental schools. The Doctor of Philosophy (Ph.D.)

degree can be pursued in a variety of areas through the Purdue University Graduate School and through several programs and departments in the Indiana University School of Medicine.

The Department of Biology regards research as an important component of its programs at both the undergraduate and graduate levels. Students may work in such specific areas as microbial genetics, immunology, plant cell and molecular biology, recombinant DNA, cell biology, developmental biology, regenerative biology, microbiology, oncology, plant and animal tissue culture, and forensic biology.

- Bachelor of Arts Degree Requirements

- Master of Science
- Doctor of Philosophy
- Other Programs

Biology Plans of Study

No single semester-by-semester plan of study will guide all students through the degree options because of the flexibility encouraged within the programs. However, one possible sequence of courses for each option is given below; variations from these examples of plans of study should be made in consultation with a departmental advisor.

Bachelor of Arts Sample Program (124 cr. required)

Freshman Year

First Semester	
SCI-I120 Windows on Science	1
BIOL-K101 Concepts of Biology I	5
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
MATH 15300 Algebra and Trigonometry I	3
ENG-W131 Elementary Composition I	3
Total	**17**
Second Semester	
BIOL-K103 Concepts of Biology II	5
CHEM-C106 Principles of Chemistry II	3
CHEM-C126 Experimental Chemistry II	2
MATH 15400 Algebra and Trigonometry II	3
ENG-W132 Elementary Composition II	3
Total	**16**

Sophomore Year

Third Semester	
BIOL-K322 Genetics and Molecular Biology	3
BIOL-K323 Genetics and Molecular Biology Lab	2
CHEM-C341 Organic Chemistry I	3
CHEM-C343 Organic Chemistry Laboratory I	2
Humanities-List H	3
Elective or major's course	3
Total	**16**
Fourth Semester	
BIOL-K322 Genetics and Molecular Biology	3
CHEM-C342 Organic Chemistry II	2
CHEM-C344 Organic Chemistry Laboratory II	3
COMM-R110 Fund of Speech Communication	3
CSCI Course	3
Total	**14**

Junior Year

Fifth Semester	
BIOL-K341 Principles of Ecology and Evolution	3
PHYS-P201 General Physics I	5
Comparative World Cultures-List C	3
Foreign language I	3
Social Sciences-List S	3
Total	**17**
Sixth Semester	
BIOL Course and Lab (Area II)	5
HIST-H114 History of Western Civilization II	3
CHEM-C341 Organic Chemistry I	3
Foreign language II	3
Total	**16**

Senior Year

Seventh Semester	
BIOL Course and Lab (Area I)	5
300 level elective	3
Foreign language III	4
Elective	3
Total	**15**
Eighth Semester	

BIOL-K490 Capstone in Biology (or BIOL-K493 Independent Research)	1
BIOL Course and Lab (Area III)	4
Electives	7
CAND 99100 Candidate for Graduation	0
Total	**13**

Bachelor of Science Sample Program (124 cr. required)

The major has 40 credit hours.

The School of Science Purdue degrees are 124 credit hours. To graduate in four years a student generally must take four semesters of 15 credits and four semesters of 16 credits. When figuring the number of credit hours that you will take each semester, students should be sure to consider the effect on total number of credit hours balanced over four years.

Freshman Year

First Semester	
SCI-I120 Windows on Science	1
BIOL-K101 Concepts of Biology I	5
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
ENG-W131 Elementary Composition I	3
Elective or precalculus math	3
Total	**17**
Second Semester	
BIOL-K103 Concepts of Biology II	5
CHEM-C106 Principles of Chemistry II	3
CHEM-C126 Experimental Chemistry II	2
MATH 23100 Calculus for the Life Sciences I	3
ENG-W132 Elementary Composition II	3
Total	**16**

Sophomore Year

Third Semester	
BIOL-K322 Genetics and Molecular Biology	3
BIOL-K323 Genetics and Molecular Biology Laboratory	2

Minor in Biology

The Department of Biology offers an undergraduate minor in biology with the following requirements:

- BIOL-K101 Concepts of Biology I (5 cr.)
- BIOL-K103 Concepts of Biology II (5 cr.)
- BIOL-K322 Genetics and Molecular Biology (3 cr.)
- BIOL-K341 Principles of Ecology and Evolution (3 cr.)
- Additional BIOL-K prefixed biology course of at least 3 credits

  At least half of the minimum 19 credit hours required to minor in biology must be completed at IUPUI. The minor requires a minimum grade point average of 2.0, and all grades must be C- or higher. Correspondence courses may not be used to fulfill requirements for the minor.

Honors in Biology

The Department of Biology offers two separate tracks that lead to a degree with honors. Admission to either program requires a combined math and verbal (critical reading) SAT of 1200, or placement in the top 10 percent of the high school class for incoming freshmen, or a minimum GPA of 3.3 based on at least 12 hours of university work for continuing students. Students must maintain an overall GPA of 3.3 and an honors GPA of 3.5 to remain in good standing in the program.

Track 1 in biology is an honors-with-thesis program consisting of a total of 21 credit hours of honors registrations. 6 credit hours are taken outside of the major; 4 credit hours are taken as the special experimental laboratory and recitation sections of freshman biology (BIOL-K101 and BIOL-K103); 5 hours are taken as H-Option registrations or 500-level courses; and 5 credit hours are taken as BIOL-K493 Independent Research and 1 credit hour for BIOL-K494 Senior Research Thesis.

Track 2 is an honors program without thesis and consists of a total of 24 credit hours of honors registrations. This option requires 6 credit hours of honors outside of the major, the BIOL-K101 and BIOL-K103 sections, and 14 credit hours of H-Option or 500-level course registrations.

Bachelor of Arts Degree Requirements

Degree Requirements

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area Requirements

Area I English Composition and Communication Skill

See the School of Science requirements under "Undergraduate Programs" in this bulletin.

Written Communication (6 cr.)

ENG-W131 Elementary Composition I (3 cr.)

A second writing course with ENG-W131 as a prerequisite, e.g. ENG-W132 (or ENG-W150), ENG-W231, TCM 22000, or TCM 32000.

Oral communication

COMM-R110 Fundamentals of Speech Communication (3 cr.)

Area II Foreign Language

See School of Science requirements under "Undergraduate Programs." Students must have first-year proficiency in a foreign language (10 cr.): exam placement, two 5-credit courses, or three courses (3 cr., 3 cr., and 4 cr.).

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.)

- HIST-H114 Western Civilization II or HIST-H109 Perspectives on the World: 1800-Present
- List H course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List S course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List C course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator

The Junior/Senior Integrator requirement is suspended indefinitely as a School-level requirement. No junior/senior integrator course is required for biology majors.

Area IIIC Physical and Biological Sciences

Physics Two semesters of basic physics (PHYS-P201 / PHYS-P202 or PHYS 15200 / PHYS 25100).

Chemistry Two semesters of Principles of Chemistry (CHEM-C105/CHEM-C125 3/2 cr.; CHEM-C106/CHEM-C126 3/2 cr.), two semesters of organic chemistry lecture and one semester of laboratory (CHEM-C341, CHEM-C342, CHEM-C343), plus prerequisite basic sequence or background to enter sequence above. The second laboratory in organic chemistry (CHEM-C344) is required for admission to some medical schools and is strongly recommended for students in most other programs. Consult a departmental advisor.

Area IIID Mathematical Sciences

MATH 15900 or MATH 15300 / MATH 15400. (However, the starting point for mathematics courses should be worked out with a departmental advisor based on the math placement test and/or background of the student.) The

computer science requirement may be satisfied with CSCI-N201, CSCI-N207, or CSCI-N211.

Note: Computer Science CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV Biology Requirements

Required Core Sequence

- BIOL-K101 / BIOL-K103 Concepts of Biology I and II
- BIOL-K322 Genetics and Molecular Biology
- BIOL-K341 Principles of Ecology and Evolution

Upper-Level Courses

- At least one lecture course from each of areas I-III listed below.
- Three laboratory courses beyond BIOL-K101 / BIOL-K103 selected from areas I-IV below. To receive credit for a laboratory for which there is an accompanying pre- or co-requisite lecture, the lecture must be completed with a minimum grade of C-. A maximum of 2 credit hours of BIOL-K493 Independent Research may be applied to the biology credit hour requirement. BIOL-K493 will count as one laboratory course.
- Capstone Experience. This requirement is met by taking either BIOL-K493 Independent Research (1 cr.) or BIOL-K490 Capstone (1 cr.) in the senior year. BIOL-K493 cannot be used as both a third laboratory and as a Capstone. BIOL-K490 addresses the integration of knowledge in the principles of undergraduate education as well as values and ethics as they relate to the student's major. It is generally taken in the senior year. The capstone is an independent, creative effort by the student that is integrative and builds on the student's previous work in the major; it may include research projects, independent study and projects, a practicum, a seminar, and/or a field experience.
- Electives consisting of sufficient lecture and laboratory course work to total 30 credit hours (including core sequence credit hours). These credits may be selected from any of the areas I-IV below.
- Residency Credits. In order to graduate students must have a minimum of 32 credit hours at the 300 level or above at IUPUI. B.A. students usually need at least one 300 level course in addition to their biology and chemistry courses to meet this requirement.

Areas/Electives

I. Molecular Area

- Undergraduate Level
- BIOL-K338 Introductory Immunology
- BIOL-K339 Immunology Laboratory
- BIOL-K483 Biological Chemistry
- BIOL-K484 Cellular Biochemistry

- Undergraduate and Graduate Level
- BIOL 50700 Principles of Molecular Biology
- BIOL 51600 Molecular Biology of Cancer
- BIOL 53000 Introductory Virology
- BIOL 55000 Plant Molecular Biology
- BIOL 55900 Endocrinology
- BIOL 56100 Immunology
- BIOL 56400 Molecular Genetics of Development
- BIOL 57000 Biological Membranes

II. Cellular Area

- Undergraduate Level
- BIOL-K324 Cell Biology
- BIOL-K325 Cell Biology Laboratory
- BIOL-K356 Microbiology
- BIOL-K357 Microbiology Laboratory
- BIOL-K416 Molecular and Cellular Neuroscience
- Undergraduate and Graduate Level
- BIOL 56600 Developmental Biology
- BIOL 57100 Developmental Neurobiology

III. Organismal Area

- Undergraduate Level
- BIOL-K331 Embryology
- BIOL-K333 Embryology Laboratory
- BIOL-K350 Comparative Animal Physiology
- BIOL-K411 Global Change Biology

- Undergraduate and Graduate Level
- BIOL 55600 Physiology I
- BIOL 55700 Physiology II

IV. Biotechnology Electives

- Undergraduate Level
- BIOL-K493 Independent Research

- Undergraduate and Graduate Level
- BIOL 54000 Topics in Biotechnology
- BIOL 54800 Techniques in Biotechnology
- BIOL 56800 Regenerative Biology and Medicine

Additional laboratory courses for the B.A.

- BIOL-K323 Genetics and Molecular Biology Laboratory
- BIOL-K342 Principles of Ecology and Evolution Laboratory

A maximum of 15 credit hours of biology earned previously at other institutions is applicable toward the major for the B.A. degree.

Unless approved as part of the major, note that all courses taken outside the Schools of Science and Liberal Arts must receive approval from the student's major department and the School of Science Academic Dean's Office. Consult with your major department or the School of Science Academic Dean's Office for additional course restrictions.

Once admitted, students are expected to fulfill their course requirements within the major at IUPUI.

Bachelor of Science Degree Requirements

Degree Requirements

First-Year Experience Course

Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills
See the School of Science requirements under "Undergraduate Programs" in this bulletin. The second semester of English composition may be satisfied with ENG-W132 (or ENG-W150), ENG-W231, TCM 22000, or TCM 32000.

Area II Foreign Language
No foreign language proficiency is required for a Bachelor of Science degree. However, knowledge of a foreign language is strongly recommended for any student planning to attend graduate school.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.)

- HIST H114 Western Civilization II or HIST-H109 Perspectives on the World: 1800-Present
- List H course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List S course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List C course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator
The Junior/Senior Integrator requirement is suspended indefinitely as a School-level requirement. No junior/senior integrator course is required for biology majors.

Area IIIC Physical and Biological Sciences
Physics Two semesters of basic physics (PHYS-P201 / PHYS-P202 or PHYS 15200 / PHYS 25100).

Chemistry Two semesters of Principles of Chemistry (CHEM-C105/CHEM-C125 3/2 cr.; CHEM-C106/CHEM-C126 3/2 cr.), two semesters of organic chemistry with laboratories (CHEM-C341, CHEM-C342, CHEM-C343, CHEM-C344), plus prerequisite basic sequence or background to enter sequence above. (A course in analytical chemistry or biochemistry is also strongly recommended; determination should be made in consultation with departmental advisor.)

Area IIID Mathematical Sciences
Course work through two semesters of calculus (MATH 23100 / MATH 23200 or MATH 22100 / MATH 22200 or MATH 16500 / MATH 16600). Starting point to be worked out with departmental advisor based on the math placement test and/or background of the student. The computer science requirement may be satisfied with CSCI-N201, CSCI-N207, or CSCI-N211.

Note: Computer Science CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV Biology Requirements
Required Core Sequence

- BIOL-K101 / BIOL-K103 Concepts of Biology I and II
- BIOL-K322 Genetics and Molecular Biology
- BIOL-K341 Principles of Ecology and Evolution

Capstone; met by option A or B.

A. BIOL-K493 Independent Research; 2 cr. min., 3 cr. max. and

BIOL-K494 Senior Research Thesis

B. BIOL-K490 Capstone

Upper-Level Courses
A. At least one lecture course from each of areas I-III listed below.

B. Four laboratory/lecture courses beyond BIOL-K101 / BIOL-K103 selected from areas I-IV. To receive credit for a laboratory for which there is an accompanying pre- or co-requisite lecture, the lecture must be completed with a minimum grade of C-.

C. Capstone for the BS may be met with BIOL-K493 Independent Research (2 to 3 credit hours) and BIOL-K494 Senior Research Thesis or by taking the BIOL-K490 Capstone. The BIOL-K493 / BIOL-K494 option will consist of the completion BIOL-K493 and the preparation of a written report on the results of the research project. The title and nature of the BIOL-K493 / BIOL-K494 sequence is to be determined in consultation with the department research sponsor.

D. Electives consisting of sufficient lecture and laboratory course work to total 40 credit hours (including core sequence credit hours). These credits may be selected from any of the areas I-IV below.

E. Residency Credits. In order to graduate students must have a minimum of 32 credit hours at the 300 level or above at IUPUI. B.S. students usually fulfill the requirement with biology and chemistry courses. Transfer students may need additional 300 level hours.

Areas/Electives
I. Molecular Area

- Undergraduate Level
- BIOL-K338 Introductory Immunology
- BIOL-K339 Immunology Laboratory
- BIOL-K483 Biological Chemistry
- BIOL-K484 Cellular Biochemistry

- Undergraduate and Graduate Level
- BIOL 50700 Principles of Molecular Biology
- BIOL 51600 Molecular Biology of Cancer
- BIOL 53000 Introductory Virology
- BIOL 55000 Plant Molecular Biology
- BIOL 55900 Endocrinology
- BIOL 56100 Immunology
- BIOL 56400 Molecular Genetics of Development
- BIOL 57000 Biological Membranes

II. Cellular Area

- Undergraduate Level
- BIOL-K324 Cell Biology
- BIOL-K325 Cell Biology Laboratory
- BIOL-K356 Microbiology
- BIOL-K357 Microbiology Laboratory

- BIOL-K416 Molecular and Cellular Neuroscience

- Undergraduate and Graduate Level
- BIOL 56600 Developmental Biology
- BIOL 57100 Developmental Neurobiology

III. Organismal Area

- Undergraduate Level
- BIOL-K331 Embryology
- BIOL-K333 Embryology Laboratory
- BIOL-K350 Comparative Animal Physiology
- BIOL-K411 Global Change Biology

- Undergraduate and Graduate Level
- BIOL 55600 Physiology I
- BIOL 55700 Physiology II

IV. Biotechnology Electives

- Undergraduate Level
- BIOL-K493 Independent Research

- Undergraduate and Graduate Level
- BIOL 54000 Topics in Biotechnology
- BIOL 54800 Techniques in Biotechnology
- BIOL 56800 Regenerative Biology and Medicine

Additional laboratory courses for the B.S.

- BIOL-K323 Genetics and Molecular Biology Laboratory
- BIOL-K342 Principles of Ecology and Evolution Laboratory

A maximum of 20 credit hours of biology earned previously at other institutions is applicable toward the major for the B.S. degree.

Unless approved as part of the major, note that all courses taken outside the Schools of Science and Liberal Arts must receive approval from the student's major department and the School of Science Academic Dean's Office. Consult with your major department or the School of Science Academic Dean's Office for additional course restrictions.

Once admitted, students are expected to complete their course requirements within the major at IUPUI.

Master of Science

Degree Options

M.S. Non-thesis in Interdisciplinary Biology This program requires a minimum of 30 credit hours of registration, at least 21 of which must be in biology. For students who wish to combine biology training with work in a secondary area as a mechanism to meet career objectives, up to 9 credit hours can be taken in the secondary area. Advanced-level undergraduate course work hours are limited to 6. Examples of secondary areas include, but are not limited to, chemistry, mathematics, public affairs, business, statistics, law, computer science, administration, and, for those interested in teaching, education. For those students with no secondary area of interest, all 30 credit hours may be taken in biology. The program requires registrations in BIOL 59500 Special Assignments and BIOL 69600 Seminar. The former consists of an independent, creative project done in association with a faculty member. Typical examples include a limited laboratory research experience or a library research assignment. The results of the project are reported both in writing and orally in BIOL 69600.

M.S. Pre-professional Non-thesis

This program also consists of a minimum of 30 credit hours, all of which must be taken over two semesters. This challenging program is highly intensified and is open only to those students who meet a high admission standard based on undergraduate GPA and GRE scores. The program is available to those students planning careers in medicine, dentistry, optometry, or other health-related fields and differs from the interdisciplinary non-thesis M.S. by having no requirement for the BIOL 59500 and BIOL 69600 registrations.

M.S. with Thesis

This 30 credit hour program requires a minimum of 9 credit hours of 500-level and 600-level course work in biology, chosen in consultation with the student's graduate advisory committee, and intensive research leading to a thesis. Most full-time students should expect to spend two full years to complete this program. Areas in which research opportunities are available include: immune dysfunction, yeast molecular biology, renal physiology, wound repair and tissue regeneration, oncology, tumor immunology, plant hormones, antifungal antibiotics, developmental genetics, cell biology, membrane biochemistry and biophysics, molecular toxicology, plant tissue culture, plant physiological ecology, plant and animal molecular biology, and regenerative biology and medicine. The overall emphasis of the department's research program focuses on questions at the cellular, biochemical, and molecular levels. Many of the projects provide a foundation in biotechnology and an excellent preparation for biomedical and industrial applications.

Admission Requirements

- Students must hold a bachelor's degree from an accredited institution of higher learning and demonstrate good preparation in biological sciences, organic chemistry, physics, and mathematics.
- Students must take the GRE aptitude tests.
- Three letters of recommendation are required.
- A minimum graduation grade point average of 3.0 or its equivalent is required for unconditional admission.

Transfer of Credit

Transfer credit to be used in the nonthesis option may be given for up to 9 credit hours of graduate work completed elsewhere with a grade of B or higher. Such credit may be used only in the secondary area and will be accepted only after one semester of satisfactory work is completed in residence at IUPUI. Transfer credit is not accepted in the thesis option. Up to 12 hours of biology graduate credit taken at IUPUI under graduate nondegree status may be transferred to the thesis or nonthesis options.

Requirements

Grades

Only grades of A, B, or C are acceptable, although performance higher than C may be required. Pass/Fail grades are unacceptable.

Residence Requirements

Thirty (30) credit hours of registration are required for the M.S. degree. Students entering with advanced standing from another graduate school are given residence credit commensurate with the graduate work accomplished.

Final Examination

A comprehensive written or oral examination in the individual's primary area may be required of nonthesis students unless their cumulative GPA is 3.0 or higher. The final examination for thesis students will consist of a thesis defense, which will be done in conjunction with BIOL 69600 Seminar.

All students are required to take BIOL 69600 Seminar. The creative project required of all nonthesis students will provide the basis for the public presentation.

Financial Assistance

The Department of Biology has financial support available in the form of tuition-refund assistantships, associate faculty positions, fellowships, and stipends from local industry on a limited basis.

Doctor of Philosophy

Doctor of Philosophy—Purdue University

The degree of Doctor of Philosophy (Ph.D.), the highest earned degree conferred by Purdue University, can be pursued in the Department of Biology through Purdue University, West Lafayette. The doctoral degree is restricted to those scholars who have demonstrated superior ability in a recognized academic discipline. The Ph.D. degree is not awarded on the basis of time spent in residence or following the completion of any specific number of formal courses, nor is the degree granted on the basis of miscellaneous course studies and research effort. The entire Ph.D. program must be rationally related, should be highly research oriented, and should culminate in a thesis of scholarly merit indicative of the candidate's ability to conduct original research in a recognized field of specialization.

Ph.D. programs are directed by professors who work in close association with selected graduate students. In practice, doctoral programs are composed of formal courses, guided individual study in a chosen field or discipline, study in such cognate subjects as may be required by the candidate's advisory committee, and original research that serves as the basis of a scholarly thesis.

As part of their graduate training, all Ph.D. candidates are expected to teach at least quarter time for one year.

Ninety (90) credit hours of registration are required for the Ph.D. degree. Students entering with advanced standing from another graduate school are given residence credit commensurate with the graduate work accomplished.

Fields of Study

Ph.D. degrees are offered in most of the fields described for the M.S. degree. Until a major professor is named, a student is counseled by a temporary advisor. In order to help familiarize students with the department and to assist the student in the selection of a major professor, a series of laboratory rotations is available.

Admission and Qualifying Examination

To enter the Ph.D. program, a student must satisfy the admission requirements for the M.S. with thesis option and also take a qualifying examination in two areas at the end of the first year of graduate study. By the end of the second year, both must have been passed with a grade of B or higher. The examination areas are as follows: (1) immunobiology, (2) biochemistry and molecular biology, (3) cell and developmental biology, and (4) membrane biology.

Plan of Study

Each prospective candidate for the doctoral degree, with the approval of the head of the Department of Biology, shall select a major professor from the department who will act as the chairperson of the student's advisory committee and who will direct the research. An advisory committee of five faculty members who have been approved to guide graduate students will then be appointed.

The plan of study shall include a primary area and related area or areas. The plan will be appropriate to meet the needs of the student in a chosen field as determined by the advisory committee. The Graduate School of Purdue University does not impose any minimum number of required course credit hours, but the plan shall specify the area or field of interest in which the student proposes to study and to conduct research. The plan will include the specific courses that the student is expected to complete, all specific course and language (if any) requirements, and 2 credit hours of BIOL 69600 Seminar.

The department or school head, the school dean, and the dean of the Graduate School at Purdue University, West Lafayette, must approve the plan of study. The graduate school dean reserves the right to refer any or all plans of study to the Purdue Graduate Council for review and approval when deemed advisable. The Graduate Council has the final authority to supervise the quality of all graduate programs.

Preliminary Examination

After the student has completed most of the formal study to the satisfaction of the advisory committee and met any language requirement(s), the student becomes eligible to take the preliminary examinations. The results of these written and oral examinations will be reported to the graduate school by the examining committee with an appropriate recommendation for the student's admission to candidacy, continued preparatory study, or discontinuation. The graduate school dean reserves the right to appoint additional members to the preliminary examining committee. The dean must be informed of the date and place of the examination and the membership of the examining committee at least two weeks before the examination. No examining committee shall have fewer than three faculty members.

The examining committee will conduct the written preliminary examination. In some cases, parts of the examination may be delegated to certain other staff members, but the final responsibility for the examination rests with the student's examining committee.

If the student does not pass the preliminary examinations, at least one semester must elapse before reexamination. Should the preliminary examinations be failed twice, the

student may not be given a third examination, except upon the recommendation of the examining committee and with special approval of the Graduate Council.

Ph.D. Thesis

After admission to candidacy, the candidate must devote at least two semesters to research before the final examination.

The special research carried on as part of the doctoral work is expected to make a definite contribution to the candidate's chosen field of knowledge–a contribution of sufficient importance to merit publication. Each candidate must, therefore, prepare a thesis showing the research results.

After the research has been completed and the thesis written, the candidate shall be given a final examination in which the candidate defends the thesis and demonstrates to the examining committee all of the capabilities for which the Doctor of Philosophy degree is awarded. The examining committee shall consist of no fewer than four members. The dean of the graduate school reserves the right to appoint additional committee members and must be informed of the place and time of the final examination at least two weeks in advance.

Doctor of Philosophy—Indiana University

The Ph.D. degree conferred by Indiana University can be pursued under the direction of faculty in the Department of Biology who hold adjunct appointments with departments or programs in the Indiana University School of Medicine. All Indiana University doctoral degrees require 90 credit hours of registration; specific course and examination requirements vary with the department or program in which the student is enrolled. Contact the graduate program director in the Department of Biology for additional information.

Other Programs

Bachelor of Arts with Secondary Teaching Certification

Students planning to teach biology at the secondary school level usually enter the Bachelor of Arts degree

Pre-Medical Studies

Most students interested in a career in medicine follow the Biology B.A. or B.S. program of study. For those who major in another discipline consult with the basic pre-medical requirements listed in the School of Science section on pre-medical preparation program. Elective hours within this program will be used to satisfy the requirements of the School of Education and the State of Indiana.

Pre-Pharmacy

The prepharmacy program comprises two years of study at IUPUI during which time students will apply to a Pharm.D. program at a school of pharmacy. The following scheme provides the course preparation for application to the School of Pharmacy and Pharmacal Sciences at Purdue University, West Lafayette. A similar program has been designed to interface with the Butler University School of Pharmacy; consult the prepharmacy advisor in the Department of Biology.

Pre-Pharmacy Sample Program (Purdue University)

Freshman Year

First Semester	
BIOL-K101 Concepts of Biology I	5
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
ENG-W131 Elementary Composition I	3
MATH 23100 Calculus for the Life Sciences I	3
Total	**16**
Second Semester	
BIOL-K103 Concepts of Biology II	5
CHEM-C106 Principles of Chemistry II	3
CHEM-C126 Experimental Chemistry II	2
ENG-W132 Elementary Composition II	3
MATH 23200 Calculus for the Life Sciences II	3
Total	**16**

Summer Session	
Humanities and Behavioral Sciences (Group 1) Elective	3
Business and Administration (Group 2) Elective	3
Total	**6**

Sophomore Year

Third Semester	
CHEM-C341 Organic Chemistry I	3
CHEM-C343 Organic Chemistry Laboratory I	2
ECON-E101 Survey of Current Economic Issues and Problems	3
PHYS-P201 General Physics I	5
Science and Technology (Group III) Elective	3
Total	**16**
Fourth Semester	
BIOL-K356 Microbiology	3
BIOL-K357 Microbiology Laboratory	2
CHEM-C342 Organic Chemistry II	3
CHEM-C344 Organic Chemistry Laboratory II	2

BIOL-N261 Human Anatomy	5
Total	**15**

Summer Session	
BIOL-N217 Human Physiology	5
Total	**5**

Years Three and Beyond

The Doctor of Pharmacy (Pharm.D.) degree is now required to obtain a license to practice pharmacy. This program encompasses six years of study (two prepharmacy and four professional). Years three through six for the Pharm.D. degree are to be completed at the School of Pharmacy and Pharmacal Sciences, Purdue University, West Lafayette.

Pre-Dental, Pre-Veterinary, and Pre-Optometry Programs

Admission to professional schools is highly competitive. The pre-professional student is therefore urged to elect a degree program rather than fulfilling the minimum requirements of these schools. Students who choose pre-dental, pre-veterinary medicine, and pre-optometry are usually placed in the Department of Biology, where pre-professional advising is available. However, as long as prerequisites are met, students can choose to major in any program. Pre-dental students are also encouraged to meet with the health professions advisor in the School of Science to plan for the testing and admission process required by dental schools. Refer to the “Department of Biology” section of this bulletin for the required courses for the Indiana University School of Optometry and Purdue University School of Veterinary Medicine.

Graduate students holding non-science degrees who are electing courses in the School of Science to prepare for medical or dental school are also invited to use the health professions advising service for help with the admission process.

Pre-Optometry

This program is specifically designed for transfer to the professional program at Indiana University Bloomington. Typically, three preoptometry years are spent at IUPUI.

Pre-Optometry Program Requirements

- Inorganic Chemistry
- CHEM-C105 / CHEM-C125 and CHEM-C106 / CHEM-C126 (10 cr.)

- Organic Chemistry
- CHEM-C341 and CHEM-C342 or CHEM-C343 (5-6 cr.)

- Mathematics
- MATH 16500 (4 cr.)

- Physics
- PHYS-P201 / PHYS-P202 (10 cr.)

- Psychology
- PSY-B104 and PSY-B105 (6 cr.)

- Statistical techniques
- PSY-B305 or STAT 30100 or ECON-E 27000 (3 cr.)

- Biology
- BIOL-K101 and BIOL-K103 (10 cr.)

- Microbiology
- BIOL-K356 and BIOL-K357 (5 cr.)

- Genetics or Cell Biology
- BIOL-K322 or BIOL-K324 (3 cr.)

- English Composition
- ENG-W131 (3 cr.)

- Arts and humanities
- Variable (6 cr.)

- Social and behavioral sciences
- Variable (6 cr.)

- Foreign language (6-8 cr.)
- (Note: waived with 2 years of high school foreign language with grades or C or better)

- Electives
- BIOL-N261 and BIOL-N217 recommended as needed

90 credit hours

Pre-Veterinary Medicine

IUPUI offers an organized two-year (including summers) preveterinary curriculum for students who want to meet the requirements for admission to the Purdue University School of Veterinary Medicine. This curriculum provides for a rigorous program in the biological and physical sciences that may be used as a basis for achieving a Bachelor of Science if the student is not admitted to veterinary school or wants to complete the undergraduate degree. Most students complete a Bachelor of Arts or Science degree before being admitted to the School of Veterinary Medicine at Purdue University.

Students who have successfully completed two or more years of preveterinary instruction (including all required courses) at IUPUI are eligible to apply for admission to the School of Veterinary Medicine at Purdue University, West Lafayette. Admission to the School of Veterinary Medicine is highly competitive. Students are selected on the basis of college course work and grades, Graduate Record Exam (GRE) scores (General Aptitude Test only), and the extent and nature of the applicant’s experience with animals and practicing veterinarians. The selection committee is also concerned with the individual’s level of motivation, degree of maturity, and general character.

The requirements for admission to the preveterinary curriculum also serve as general requirements for admission to many College of Agriculture programs at Purdue.

Pre-Veterinary Medicine Sample Program

Freshman Year

First Semester

BIOL-K101 Concepts of Biology I	5
CHEM-C105 Principles of Chemistry I	3

Total	**9**

NOTE: Students must also take Animal Science on-line from Purdue University West Lafayette.

Junior and Senior Years

Transfer to School of Veterinary Science and Medicine, Purdue University, West Lafayette.

Biotechnology Program

IUPUI
723 W. Michigan Street, SL 306
Indianapolis, IN 46202-5132
Phone: (317) 274-0577; fax: (317) 274-2846

This program is available only to students who have an earned Associate degree in Biotechnology from Ivy Tech Community College.

What has become known as the Biotechnology industry has been going through some transforming changes that mandate more sophisticated workforce training at many levels. In order to place central Indiana at the forefront in the preparation of a suitable workforce for existing industry as well as a flexible training program that may be attractive to biotechnology industries considering a move to Indiana, IUPUI has developed education-training programs at the bachelor's level. This program has been developed in collaboration with the several local biotechnology industries to ensure relevance and appropriateness of the education-training program content. The program includes an extensive industrial internship that, along with the basic and applied courses in biotechnology, meet industrial objectives for preparation for positions in the biotechnology industry.

The curriculum of the bachelor's degree also allows sufficient flexibility within the major and with electives to meet basic requirements for application to most graduate and professional programs.

Degree Characteristics

Bachelor of Science in Biotechnology (BSB)

- 124 credit hour Purdue degree
- additional courses in the major and flexibility to add areas of specialization
- full general-education course work in the humanities and social sciences
- flexibility to become eligible for most graduate and professional degree programs

Bachelor of Science in Biotechnology (BSB)

Degree Requirements

Area I English Composition and Communication Skills See the School of Science requirements under "Undergraduate Programs" in this bulletin.

Written Communication (6 cr.)

- ENG-W131 English Composition I (3 cr.)
- TCM 32000 Written Communication in Science and Industry (3 cr.)

Speech Communication (3 cr.)

- COMM-R110 Fundamentals of Speech Communication (3 cr.)

Area II Foreign Language No foreign language is required for a Bachelor of Science degree. However, knowledge of a foreign language is strongly recommended for any student planning to attend graduate school.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures

- HIST-H114 Western Civilization II or HIST-H109 Perspectives on the World: 1800-Present
- List H course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements “Undergraduate Programs” in this bulletin.
- List S course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements “Undergraduate Programs” in this bulletin.
- List C course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements “Undergraduate Programs” in this bulletin.

Area IIIB Junior/Senior Integrator The Junior/Senior Integrator requirement is suspended indefinitely as a School-level requirement. No junior/senior integrator course is required for biotechnology majors.

Area IIIC Physical and Biological Sciences

Chemistry

Two semesters of Principles of Chemistry with laboratory:

- CHEM-C105 / CHEM-C125 Principles of Chemistry I with lab
- CHEM-C106 / CHEM-C126 Principles of Chemistry II with lab

One semester of organic chemistry lecture:

- CHEM-C341 Organic Chemistry Lecture I

Physics One semester of basic physics

- PHYS-P201 **or** PHYS 15200

Area IIID Mathematical Sciences

Course work through two semesters of calculus:

- MATH 23100 / MATH 23200 **or**
- MATH 22100 / MATH 22200 **or**
- MATH 16500 / MATH 16600

The starting point for mathematics courses should be worked out with a departmental advisor based on the math placement test and/or background of the student.

The computer science requirement may be satisfied with CSCI-N207.
A statistics course is required: STAT 30100.

Area IV Biotechnology Requirements

Required courses

- BIOL-K101 Concepts of Biology I (5 cr.)
- BIOL-K483 Biological Chemistry (3 cr.) **or** CHEM-C484 Biomolecules and Catabolism (3 cr.)

Specialized courses in Biotechnology, including the internship, are to be taken at Ivy Tech Community College, Indianapolis. This program is available only to students who have an earned Associate degree in Biotechnology from Ivy Tech Community College. See departmental advisor for additional information.

Elective courses in area of specialization

Electives chosen with advisor to total at least 40 credits

No grade below a C- will be accepted toward the degree program in any biology, biotechnology and chemistry course.

To receive credit for a laboratory for which there is an accompanying pre- or corequisite lecture, the lecture must be completed with a minimum grade of C-.

Department of Chemistry and Chemical Biology

IUPUI
Science Building, LD 326

Faculty

- **Professors** Long, Malik (*Chancellor’s Professor*), Naumann, O'Donnell, Siegel (*Chair*), Varma-Nelson (*Executive Director of the Center for Teaching and Learning)*
- **Professors Emeriti** Boaz, Boschmann (Associate Vice President), Dubin, Fife, Sunderwirth (IUPU Columbus), Welcher
- **Associate Professors** McLeish, Minto, Muhoberac, Oh
- **Associate Professor and Associate Dean Emeritus** Fricke
- **Associate Professors Emeriti** Cutshall, Nurok, Wyma
- **Assistant Professors** Ge, Goodpaster, Li, Pu, Sardar
- **Research Scientist** Dria
- **Research Professors** Blacklock, Boyd, Kneen, McCarthy, Scott
- **Lecturer/Coordinator of Student Services** Nguyen
- **Senior Lecturer** Anliker
- **Lecturers** Zhao, Zhu
- **Academic Specialist** Denton

Departmental Academic Advisors Contact the department for assignment to an advisor.

Chemistry is the science that studies substances, both natural and synthetic, and their compositions, properties, transformations, and interactions with external forces.

The Department of Chemistry and Chemical Biology offers the Bachelor of Arts (B.A.) degree, the Bachelor of Science in Chemistry (B.S.) degree with a chemistry option and a biological chemistry option, and the Master of Science (M.S.) degree. All degrees carry the general requirements of the School of Science, which are described elsewhere in this bulletin. An undergraduate minor in chemistry is also offered. The Bachelor of Science degree carries certification by the American Chemical Society (ACS) Committee on Professional Training. The Master of Science degree has both a thesis and nonthesis option. An Industrial Co-op Program is also offered for the Master of Science degree. Qualified students may be authorized to pursue the Doctor of Philosophy (Ph.D.) degree in chemistry in the areas of analytical, biological, inorganic, organic, and physical chemistry. Contact the Department for details or visit the Web site chem.iupui.edu.

To enter the undergraduate curriculum in chemistry, a student should have completed a minimum of two years of algebra, one semester of trigonometry, one year each of chemistry and physics, and two years of a modern foreign language. The choice of a particular degree program in chemistry and the selection of courses for that degree must be made in consultation with a departmental advisor.

Courses for Nonmajors

Students in programs that require only one semester of chemistry should take CHEM-C100, CHEM-C101, or CHEM-C110, depending on their specific degree program. CHEM-C100 and CHEM-C110 are both nonmathematical introductions to chemistry, while CHEM-C101 requires one semester of high school algebra. Students in programs that require two semesters of chemistry take either CHEM-C101 / CHEM-C121 with CHEM-C110 / CHEM-C115 or the CHEM-C105 / CHEM-C125 with CHEM-C106 / CHEM-C126 sequence. (See specific program for degree major.) The CHEM-C105 / CHEM-C125 with CHEM-C106 / CHEM-C126 sequence is designed for students pursuing advanced work in scientific fields (e.g., biology, chemistry, geology, medicine, and physics). Students with an insufficient background in high school chemistry for CHEM-C105 should take CHEM-C101 as a preparatory course. Credit for CHEM-C101 cannot count toward the total credit hours needed for graduation if either of the following courses is taken: CHEM-C105, CHEM-C106. Completion of CHEM-C101 does not qualify a student for admission to CHEM-C106.

Academic Advising in Chemistry

Academic success requires frequent and regular interaction between students and faculty in the classroom as well as outside it. In keeping with this departmental philosophy, chemistry majors are required to meet with their advisor at least once a year, preferably in the first half of the fall semester. Students who do not meet with their advisor by October 21 will not be permitted to register for the following spring semester until their advisor approves their registration.

Course Prerequisites

The Department enforces all prerequisites for chemistry courses as indicated in the course listing of this bulletin. For course equivalency of prerequisites, consult the instructor.

- Bachelor of Arts Preprofessional Chemistry Major
- Bachelor of Science in Chemistry, Professional Chemistry Major, A.C.S. Certified
- Graduate Programs (M.S. and Ph.D. Degrees)
- Minor

Bachelor of Science in Chemistry, Professional Chemistry Major, A.C.S. Certified

This degree is for students who plan to be professional chemists or who plan to pursue graduate studies in chemistry. It carries certification by the Committee on Professional Training of the American Chemical Society. Two options are available: a chemistry option and a biological chemistry option.

Degree Requirements (Chemistry Option)

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills See the School of Science requirements under “Undergraduate Programs” in this bulletin. The second semester of English composition may be satisfied only by ENG-W132 (or ENG-W150), ENG-W231, ENG-W233, ENG-W290, TCM 22000, or TCM 32000.

Area II Foreign Language No foreign language proficiency is required for a Bachelor of Science degree.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures See the School of Science requirements under "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator The Junior/Senior Integrator requirement is suspended indefinitely as a School-level requirement. No junior/senior integrator course is required for chemistry majors.

Area IIIC Physical and Biological Sciences PHYS 15200, PHYS 25100, and at least two additional courses outside chemistry, which may be chosen from, for example, biology, geology, or physics.

Area IIID Mathematical Sciences MATH 16500, MATH 16600, MATH 17100, and MATH 26100. One computer science course is also required.

Note: Computer Science CSCI-N100 level courses and CIT 10600 do not count for any credit toward any degree in the School of Science. Also, CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV Chemistry Concentration Requirements CHEM-C105, CHEM-C125, CHEM-C106, CHEM-C126, CHEM-C310, CHEM-C311, CHEM-C341, CHEM-C342, CHEM-C343, CHEM-C344, CHEM-C361, CHEM-C362, CHEM-C363, CHEM-C410, CHEM-C411, CHEM-C430, CHEM-C435, CHEM-C484, CHEM-C494 and CHEM-C495. A total of 47 credit hours of chemistry courses are required. The Department of Chemistry requires a minimum grade of C in all chemistry courses (C- grades are unacceptable).

In addition to the above requirements, a minimum of 6 additional credit hours of advanced chemical elective courses

is required. Courses may be chosen from the following: CHEM-C409 (3 cr. min.), CHEM-C309, CHEM-C371, CHEM-C372, CHEM-C485, CHEM-C488, CHEM-C489, certain CHEM-C496 topics courses (permission required) or any graduate-level chemistry course (permission required).

Degree Requirements (Biological Chemistry Option)

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills See the School of Science requirements under "Undergraduate Programs" in this bulletin. The second semester of English composition may be satisfied only by ENG-W132 (or ENG-W150), ENG-W231, ENG-W233, ENG-W290, TCM 22000, or TCM 32000.

Area II Foreign Language No foreign language proficiency is required for a Bachelor of Science degree.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures See the School of Science requirements under "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator The Junior/Senior Integrator requirement is suspended indefinitely as a School-level requirement. No junior/senior integrator course is required for chemistry majors.

Area IIIC Physical and Biological Sciences PHYS 15200, PHYS 25100, BIOL-K101, and BIOL-K103. Beyond the introductory level, an additional 3 credit hours of biology should be chosen from one of the following: BIOL-K324 Cell Biology, BIOL-K356 Microbiology, or BIOL-K322 Genetics and Molecular Biology.

Area IIID Mathematical Sciences MATH 16500, MATH 16600, MATH 17100, and MATH 26100. One computer science course is also required.

Note: Computer Science CSCI-N100 level courses and CIT 10600 do not count for any credit toward any degree in the School of Science. Also, CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV Chemistry Concentration Requirements CHEM-C105, CHEM-C125, CHEM-C106, CHEM-C126, CHEM-C310, CHEM-C311, CHEM-C341, CHEM-C342, CHEM-C343, CHEM-C344, CHEM-C361, CHEM-C362, CHEM-C363, CHEM-C430, CHEM-C435, CHEM-C484, CHEM-C485, CHEM-C486, CHEM-C494, and CHEM-C495. A total of 47 credit hours of chemistry courses are required. The Department requires a minimum grade of C in all chemistry courses (C- grades are unacceptable).

In addition to the above requirements, a minimum of 6 additional credit hours of advanced chemical elective courses is required. Courses may be chosen from the following: CHEM-C409 (3 cr. min.), CHEM-C309, CHEM-C371, CHEM-C372, CHEM-C410, CHEM-C485, CHEM-C488, CHEM-C489, certain CHEM-C496 topics courses (permission required), any graduate-level chemistry course (permission required), BIOL 54000, or BIOL 54800 (permission required).

The Department will not grant credit for a course when considerable duplication of course content may occur with another course taken. In general, credit will be allowed for the higher-level course, but not for the lower-level course. The following listings are considered to be duplications (lower-level courses listed first):

- CHEM-C360 and CHEM-C361
- MATH 22100 / MATH 22200 and MATH 16500 / MATH 16600
- PHYS-P201 / PHYS-P202 or PHYS 21800 / PHYS 21900 and PHYS 15200 / PHYS 25100
- PHYS 10000 or PHYS 20000 and PHYS-P201, PHYS 21800, or PHYS 15200

For example, if a student has earned credit in MATH 16500 / MATH 16600, the student will receive no credit for MATH 22100 / MATH 22200, even if earned previously.

On occasion, a student who initially enrolled in the preprofessional B.A. in chemistry program decides to transfer to the B.S. in Chemistry program, having already taken one or more of the above-listed lower-level courses. The following policies will apply:

- If a student has a minimum grade of B (B- or lower is unacceptable) in CHEM-C360 and approval of the departmental chairperson, credit will be granted for CHEM-C361 and the student may proceed to CHEM-C362.
- If a student has earned credit for the MATH 22100 / MATH 22200 sequence, the student will be placed in MATH 16600. If the student passes MATH 16600, the MATH 16500 / MATH 16600 requirement will be considered fulfilled. Credit will be granted for MATH 22100 and MATH 16600 only (8 credit hours). If the student does not pass MATH 16600, the student must start with MATH 16500.
- If a student has earned credit for MATH 22100 only, the student must take the MATH 16500 / MATH 16600 sequence, and no credit will be allowed for MATH 22100.
- If a student has earned credit for the PHYS-P201 / PHYS-P202 or PHYS 21800 / PHYS 21900 sequence, the student will be placed in PHYS 25100. If the student passes PHYS 25100, the PHYS 15200 / PHYS 25100 requirement will be considered fulfilled. Credit will be granted for PHYS-P201 and PHYS 25100 only (10 credit hours). If the student does not pass PHYS 25100, the student must start with PHYS 15200.
- If a student has earned credit for PHYS-P201 or PHYS 21800 only, the student must take the PHYS 15200 / PHYS 25100 sequence, and no credit will be allowed for PHYS-P201 or PHYS 21800.

On occasion, a student who initially enrolled in the B.S. in Chemistry program decides to transfer to the preprofessional B.A. in Chemistry program, having already taken one or more of the above-listed higher-level courses. A higher-level course will always substitute for a lower-level course to satisfy the requirement.

Bachelor of Arts Preprofessional Chemistry Major

For students who require a knowledge of chemistry as a basis for work in other fields such as business, dentistry, environmental science and policy, law, medicine, or other allied health fields. Recommended for premedical and predentistry students.

Degree Requirements

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills See the School of Science requirements under “Undergraduate Programs” in this bulletin. The second semester of English composition may be satisfied only by ENG-W132 (or ENG-W150), ENG-W231, ENG-W233, ENG-W290, TCM 22000, or TCM 32000.

Area II Foreign Language See the School of Science requirements under “Undergraduate Programs” in this bulletin.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures See the School of Science requirements under "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator The Junior/Senior Integrator requirement is suspended indefinitely as a School-level requirement. No junior/senior integrator course is required for chemistry majors.

Area IIIC Physical and Biological Sciences PHYS-P201 and PHYS-P202 (recommended PHYS 15200 and PHYS 25100). Also, at least two additional courses outside chemistry having a laboratory component, which may be chosen from, for example, biology, geology, or physics.

Area IIID Mathematical Sciences MATH 22100 and MATH 22200 (recommended MATH 16500 and MATH 16600). One computer science course is also required.

Note: Computer Science CSCI-N100 level courses and CIT 10600 do not count for any credit toward any degree in the School of Science. Also, CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV Chemistry Concentration Requirements CHEM-C105, CHEM-C125, CHEM-C106, CHEM-C126, CHEM-C310, CHEM-C311, CHEM-C341, CHEM-C342, CHEM-C343, CHEM-C344, CHEM-C360 (recommended CHEM-C361), CHEM-C410, CHEM-C411 and CHEM-C494. Recommended CHEM-C484. A total of 33 credit hours of chemistry courses are required. The Department requires a minimum grade of C in all chemistry courses (C- grades are unacceptable).

Bachelor of Arts Preprofessional Chemistry Major Sample Program (124 cr. required):

Freshman Year

First Semester	
SCI-I120 Windows on Science	1
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
MATH 22100 Calculus for Technology I	3

Graduate Programs (M.S. and Ph.D. Degrees)

Admission Requirements

The prospective student should have a bachelor's degree from an accredited institution, show promise of ability to engage in advanced work, and have adequate preparation, at least 35 credit hours of chemistry, broadly representative of the fields of the discipline, in a chemistry curriculum. The GRE subject exam in chemistry is strongly recommended.

Incoming students with an undergraduate grade point average (GPA) of 3.0 or higher (on a 4.0 scale) will automatically be recommended for admission as regular graduate students. Those with a GPA below 3.0 will be admitted as temporary graduate students with the provision that a 3.0 average must be achieved in the first three graduate courses (or 9 credit hours) if they are to be admitted as regular graduate students.

Application for Admission

Inquiries concerning the application process can be made directly to the Department by writing to Graduate Admissions; Department of Chemistry and Chemical Biology, IUPUI, 402 N. Blackford Street, Indianapolis, IN 46202-3272; phone (317) 274-6876; www.chem.iupui.edu. Applications for full-time study should be completed by March for the following Fall semester to ensure complete consideration for fellowships and other financial support (see "Graduate Program Financial Aid" in this section). Applications for part-time graduate admission may be submitted at any time.

Temporary graduate students who wish to enroll in courses, though not necessarily in a degree program, should contact the IUPUI Graduate Office, Union Building, Room UN-207, 620 Union Drive, Indianapolis, IN 46202-5167; phone (317) 274-1577. Students should be aware that no more than 12 credit hours earned as a nondegree student may be counted toward a degree program.

Transfer Credit

The Department will accept by transfer a maximum of 6 hours of graduate credit, in excess of undergraduate degree requirements, from approved institutions.

Graduate Program Financial Aid

All full-time thesis graduate students receive support stipends through teaching assistantships, research assistantships, departmental fellowships, university fellowships, or through the Industrial Co-op Program. Full-time students receive fee remissions; students with assistantships and fellowships are also eligible for health insurance. Consult the graduate advisor for current funding levels.

Master of Science Program

The M.S. program in chemistry, which awards a Purdue University degree, requires 30 credit hours of study beyond the baccalaureate level. It is designed for students seeking careers as professional chemists. Graduates of the program often choose industrial positions, but others enter Ph.D. programs in chemistry or related areas. Graduates have been placed in positions throughout the United States and abroad.

General Degree Options and Requirements

Specific area requirements (core courses) apply for course work. Courses from three of the following areas must be taken: analytical, biological, inorganic, organic, and physical. Typically, students take three courses in their primary area and two courses outside of it to meet these requirements.

The M.S. degree can be earned through any of three different options: the thesis option, the Industrial Co-op Program, and the nonthesis option.

Thesis Option This traditional full-time program requires 20 hours of course work and 10 hours of thesis research. The research activity culminates in the completion and defense of a thesis. This option is available to full- or part-time students.

Industrial Co-op Program This full-time program has the same requirements as the thesis option, but it includes industrial work experience in the Indianapolis area. The program is described in detail in the following section, "Master of Science Industrial Co-op Program."

Nonthesis Option The nonthesis option requires 30 hours of course work alone. Because actual research experience is essential in an advanced chemistry program, this option is recommended for part-time students only. Students in this option are usually employed full time and are already engaged in research activity as part of their employment. However, nonthesis students may still enroll in a limited amount of research study that applies to the degree requirements (usually through CHEM 59900).

Master of Science Industrial Co-op Program

Although most chemists seek careers in industry upon completion of their educational goals, few have had industrial experience or the opportunity to develop an appreciation for the types of problems presented in the industrial setting. The Industrial Co-op Program in Indianapolis is designed to provide industrial experience and to offer an alternative approach to career preparation. Most graduates leave with a strong, research-based M.S. degree plus meaningful work-study experience commensurate with graduate-level training. Students may also enter the Ph.D. program and participate in the co-op program for the first two years of their residency.

The M.S. Industrial Co-op Program requires 24 months of full-time study. The first semester consists of intensive course work, interviews with personnel from several local industrial laboratories, and familiarization with faculty research interests. In the second and subsequent semesters, the student continues course work and engages in parallel work experience and academic experience, consisting of 20 hours per week at an industrial lab and 20 hours per week in an

academic lab. This work experience is commensurate with the student's background and interests and is an important part of the overall training program. The faculty thesis advisor and the industrial supervisor serve together to monitor each student's progress in the program.

Most students who enter the co-op program have sound academic backgrounds and some research experience, and they desire industrial experience and an opportunity to pursue graduate studies in chemistry.

Ph.D. Program

The Ph.D. program is a full-time, thesis-based research program. This program provides a substantially larger research component than that of the M.S. degree and requires original and significant research contributions by the student. As a result, the Ph.D. student is qualified for employment where the ability to design, develop, and complete a research program is expected.

The program is part of the Purdue University system-wide doctoral program in chemistry, and, as such, identical requirements apply to all campuses participating in the program.

To establish candidacy, students must pass five written 'cumulative' examination questions within their first four semesters and an oral examination before the end of their fifth semester of graduate study. The oral examination will include a discussion of the student's research and defense of an original research proposal that is different from the student's thesis research.

Course requirements include a core of three courses in the student's major division plus three additional courses outside the major division. A number of additional courses may be recommended that cover material appropriate to the written part of the preliminary examination.

Joint M.D.-Ph.D. Program

The Department participates in the joint M.D.-Ph.D. program with the Indiana University School of Medicine. In this program, students concurrently earn an Indiana University M.D. degree and Purdue University Ph.D. degree in chemistry. Students take courses in both chemistry and medicine, with several courses simultaneously satisfying both degree requirements.

Eligible students must be admitted separately to the School of Medicine and the Department of Chemistry and Chemical Biology. Once admission to each is approved, students, together with advisors from medicine and chemistry, plan a tentative course outline for a concurrent program. Graduate and teaching assistantships or fellowships are arranged primarily through the Department of Chemistry and Chemical Biology.

Medical Biophysics Ph.D. Program

In cooperation with departments in the Indiana University School of Medicine and the Purdue University School of Science, this interdisciplinary program leads to an Indiana University Ph.D. degree in biophysics. The program is designed to give talented graduate students the skills required of the next generation of biologically oriented scientists. The program combines a core of courses in molecular and cellular biophysics with flexible electives and a seminar program. The training is oriented primarily toward faculty-directed research with focus points at the boundaries of the traditional disciplines of physics, chemistry, and biology. Prospective students should contact the director of graduate programs in the chemistry department for further information.

Biomedical Engineering Ph.D. and Master's Program

Biomedical engineering is a rapidly emerging interdisciplinary field combining engineering, chemistry, biology, and medicine. The curriculum involves mathematics, engineering, and classical and medical sciences. The doctoral program is a joint effort between the Biomedical Engineering Programs at IUPUI and Purdue University, West Lafayette. In this case, students apply to the West Lafayette campus and can take courses and do research at IUPUI. Students for the master's program apply to the Biomedical Engineering Program at IUPUI.

Minor in Chemistry

The undergraduate minor in chemistry requires a minimum of 21 credit hours of chemistry courses. The following courses are required: CHEM-C105, CHEM-C125, CHEM-C106, CHEM-C126, CHEM-C341, CHEM-C342, CHEM-C343, and either CHEM-C310 or CHEM-C360. MATH 22200 and PHYS-P202 are prerequisites for CHEM-C360. For other requirements see the School of Science requirements under "Undergraduate Programs, Minors" elsewhere in the bulletin.

Department of Computer and Information Science

IUPUI
Engineering, Science and Technology Building, SL 280
723 W. Michigan Street
Indianapolis, IN 46202-5132
Phone: (317) 274-9727; fax: (317) 274-9742

www.cs.iupui.edu
Academic Advising Appointments First year students should contact Andy Harris or Joshua Morrison. All other students should contact their assigned advisor.

- **Professor** Fang (*Chair*), Palakal, Mukhopadhyay, Raje, Zheng
- **Professor and Dean Emeritus** Yovits
- **Emeritus Faculty** Gersting, John; Gersting, Judith; Olson
- **Associate Professors** Baker, Chen, Durresi, Liang, Tuceryan, Zou
- **Assistant Professors** Al Hasan, Dundar, Hill, Tsechpenakis, Xia
- **Senior Lecturer** Harris
- **Lecturers** Acheson, Roberts
- **Adjunct Professors** Mahoui, L. Shen, Wu, Y. Zhou

The department offers Purdue University Bachelor of Science (B.S.), Graduate Certificates, and Master of Science (M.S.) degrees. It also offers a Certificate in Applied Computer Science. Students interested in research may arrange to pursue a Doctor of Philosophy (Ph.D.) degree through the Purdue University Graduate School. The programs of study

emphasize the basic principles of computing and information processing, which include the creation, representation, display, storage, transformation, and transmission of information, as well as the software to accomplish these tasks. Because computers are used in all segments of society, the theory and practice of computer and information science are pervasive and the field is, therefore, interdisciplinary. It is also young and dynamic, as evidenced by the growth of the computer industry, so the curriculum itself evolves rapidly.

- Bachelor of Science
- Certificate in Applied Computer Science
- Graduate programs
- Minor

Bachelor of Science

Students completing the undergraduate degree in computer and information science will have acquired a fundamental understanding of computing, information processing, and information communication. The department's graduates serve in a variety of programming, software engineering, database administration, systems analysis, management, and research positions.

Degree Requirements

NOTE: These degree requirements are effective for students admitted beginning in the Fall of 2012.

See the School of Science requirements under ‘‘Undergraduate Programs” in this bulletin for the general and area degree requirements. Computer science majors are admitted only provisionally to the program until they have completed MATH 16500 and CSCI 23000 and 24000 with a grade point average of 2.7 or higher for the three courses. Please note that computer and information science courses below CSCI 23000 or CSCI-N305 with certain exceptions, mathematics courses below MATH 16500, and statistics courses below STAT 35000 are not credited toward the degree. Furthermore, the School of Science will not accept certain university courses for the computer science degree program. The Bachelor of Science degree program in computer science requires a minimum of 124 credit hours.

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take CSCI 12000 Windows on Computer Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills (9 cr.) See the School of Science requirements under ‘‘Undergraduate Programs” in this bulletin for details.

- ENG-W131 Elementary Composition I
- COMM-R110 Fundamentals of Speech Communication

The second semester of English composition must be satisfied with:

- TCM 32000 Written Communication in Science and Industry

Area II Foreign Language No foreign language proficiency is required for a Bachelor of Science degree.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.) The information about the IIIA requirements in the School of Science "Undergraduate Programs" section of this bulletin lists courses that may be used to satisfy the requirements below. Students should consult a departmental advisor before registering for these courses.

- HIST-H114 Western Civilization II (3 cr.) or HIST-H109 Perspectives on the World: 1800-Present (3 cr.)
- List H One course from a list of humanities courses (3 cr.).
- List S One course from a list of social science courses (3 cr.).
- List C One course from a list of comparative world culture courses (3 cr.).

Area IIIB Junior/Senior Integrator (3 cr.) The Junior/Senior Integrator requirement is suspended indefinitely. The three credit hours formerly required for this Area may be replaced with a sixth CSCI 40000 level course.

Area IIIC Physical and Biological Sciences The Department of Computer and Information Science requires all computer science majors to take PHYS 15200 and three other physical science courses chosen from the areas of biology, chemistry, geology, and physics, or from certain courses in engineering. Each course that counts as one of the physical science required courses must have a lecture component and be at least 3 credit hours. Courses that may not be used to fulfill Area IIIC requirements include: BIOL-N100, BIOL-N107, BIOL-N120, BIOL-N200; CHEM-C100, CHEM-C101, CHEM-C102, CHEM-C110; PHYS 01000, PHYS 10000, PHYS 14000, PHYS 20000, PHYS 21800, PHYS 21900, PHYS-P201, PHYS-P202; AST-A130; GEOL-G 103, GEOL-G107, GEOL-G115, GEOL-G130, GEOL-G132, GEOL-G135; and all agriculture and geography courses. Consult a departmental academic advisor concerning the acceptability of other courses. The following engineering courses may be applied toward Area IIIC requirements: ECE 20100, ECE 20200, and ECE 26600. Laboratory courses without a lecture component may be taken for credit, but do not count toward the four-course requirement.

Area IIID Mathematical Sciences Computer Science majors are required a minimum of 17 credit hours of mathematical sciences. A single grade of D or D+ is acceptable in this Area. Otherwise, all courses must be completed with a C- or higher. Five course requirements are MATH 16500, MATH 16600, MATH 17100, MATH 35100 or MATH 51100, STAT 35000 or STAT 41600 or STAT 51100.

Area IV Major Requirements Minimum requirements include 26 credit hours of core computer science courses and at least 33 additional hours of computer science and supporting course electives. Core courses are: CSCI 23000, CSCI 24000, CSCI 34000, CSCI 36200, CSCI 40200, CSCI 40300, CSCI 48400, and CSCI 49500. Students who do not maintain a minimum GPA of 2.5 in MATH 17100, and in CSCI 23000, CSCI 24000, CSCI 34000, and CSCI 36200 will not be permitted to continue as departmental majors.

Computer and Information Science Electives

Students are encouraged to focus their required electives in such areas as databases and data mining, software engineering, game and graphics, networking, and security.

Students choose a minimum of 11 courses from among the list of computer science and supporting course electives. No more than 3 courses can be chosen from the select list of N-series courses; a minimum of 6 courses must be CSCI 40000-level or above, and no more than 2 courses can be chosen from a recommended list of courses outside of computer science.

- CSCI-N-Series and 300 level Electives—Choose no more than three
- CSCI 30000 Systems Programming
- CSCI 35500 Introduction to Programming Languages
- CSCI-N300 Mobile Computing Fundamentals
- CSCI-N311 Advanced Database Programming, Oracle
- CSCI-N321 System and Network Administration
- CSCI-N335 Advanced Programming, Visual Basic
- CSCI-N342 Server Side Web Development
- CSCI-N343 Object-Oriented Programming for the Web
- CSCI-N345 Advanced Programming, Java
- CSCI-N351 Introduction to Multimedia Programming
- CSCI-N355 Introduction to Virtual Reality
- CSCI-N410 Mobile Computing Application Development
- CSCI-N420 Mobile Computing Cross Platform Development
- CSCI-N430 Mobile Computing and Interactive Applications
- CSCI-N431 E-Commerce with ASP.NET
- CSCI-N435 Data Managment Best Practices with ADO.NET
- CSCI-N450 Mobile Computing with Web Services
- CSCI-N451 Web Game Development (Pending)
- CSCI-N452 3D Game Programming
- CSCI-N461 Software Engineering for Applied Compter Science
- CSCI-N499 Topics in Applied Computing (topic varies)

CSCI 400 and 500 level Electives—Choose at least six courses

- CSCI 43200 Security in Computing
- CSCI 43500 Multimedia Information Systems
- CSCI 43600 Principles of Computer Networking
- CSCI 43700 Introduction to 3D Game Graphics
- CSCI 43800 Advanced Game Development
- CSCI 44300 Database Systems
- CSCI 44800 Biometric Computing
- CSCI 45000 Principles of Software Engineering
- CSCI 45200 Object-Oriented Analysis and Design
- CSCI 46300 Analysis of Algorithms
- CSCI 47000 Automata and Formal Languages
- CSCI 47500 Scientific Computing I
- CSCI 47600 Scientific Computing II
- CSCI 47700 High Performance Computing
- CSCI 48100 Data Mining
- CSCI 48500 Expert System Design
- CSCI 48700 Artificial Intelligence
- CSCI 49000 Variable Title
- CSCI 53600 Data Communication and Computer Networks
- CSCI 54100 Database Systems
- CSCI 54800 Bioinformatics
- CSCI 55000 Computer Graphics
- CSCI 55200 Advanced Graphics and Visualization
- CSCI 59000 Cryptography and Network Security (P or C: CSCI 43600)

Computer Science Supporting Electives

Choose no more than 2 courses. Note that this list of courses is not all inclusive. Other courses outside of computer science can be considered and can be counted with prior written approval of a computer science faculty advisor.

- NEWM-N204 Introduction to Interactive Media
- NEWM-N210 Introduction to Digital Sound
- NEWM-N230 Introduction to Game Design and Development
- NEWM-N304 Interactive Media Applications
- NEWM-N330 Game Design, Development, and Production
- NEWM-N335 Computer-Based Character Simulation/Animation II
- CIT 40200 Design and Implementation of Local Area Networks
- CIT 40600 Advanced Network Security
- CIT 42000 Digital Forensics
- CIT 44000 Computer Network Design
- HERR-A371 Introduction to Interactive Design

NOTE: Three to six (3-6) unrestricted (free) electives are required to earn 124 credit hours depending on the physical science courses chosen by the student.

Certificate in Applied Computer Science

The certificate program introduces computer science principles, develops practical skills in market-driven software applications, and prepares students to be successful with emerging technologies. The program is designed to supplement and enhance a primary degree program. It serves current IUPUI students and returning adults who are interested in gaining knowledge and skills in computing applications.

Those who earn the certificate will have demonstrated that they have the core competencies necessary for entry-level positions in information technology. They will have the ability to solve complex problems, design and implement algorithms, apply computer science theory to practical problems, adapt to technological change and to develop software solutions.

Admission Requirements

- A cumulative GPA of at least 2.0 and enrollment in or successful completion (no grade below C–) of MATH-M118 Finite Mathematics or higher or PHIL-P162 Logic or PHIL-P265 Introduction to Symbolic Logic

Students must declare their intent to earn this certificate before completing the core requirements (9 credit hours) described below. No more than 9 credit hours earned before to admission to the program will be accepted toward the certificate requirements.

Program Requirements

Students are required to successfully complete 18 credit hours (six courses) to earn the certificate. Three courses are core requirements and three courses are advanced electives. Core requirements must be completed before enrolling in the advanced electives. No individual grade below a C– is acceptable. At least 9 credit hours in the certificate program must be taken in the Department of Computer and

Information Science. A GPA of at least 2.0 is required for the complete certificate program.

Required Core CSCI Courses (9 credit hours):

- CSCI-N241 Fundamentals of Web Development
- CSCI-N301 Fundamental Computer Science Concepts
- CSCI-N361 Fundamentals of Software Project Management

Advanced Electives (9 credit hours):
In addition to the three core courses, students must successfully complete three other N-series courses that complete Tier 1 and Tier 2 requirements.

To enroll in this certificate program, students must be formally admitted by the Office of Undergraduate Admissions on the IUPUI campus. For currently enrolled (admitted) IUPUI students, an online application is available at http://www.cs.iupui.edu/form/certificate/. Credit may be given for applicable courses taken at other colleges or universities.

Graduate programs

Master of Science

This program leads to a Master of Science degree from Purdue University. Many courses are offered in the late afternoon or evening to accommodate working students.

The Department offers three options for Master of Science studets: Thesis, Project, and Course Only. Each option requires 30 completed credit hours. Thesis students complete a research project that counts for 6 or 9 credit hours of the 30 required credits. Project students complete a project, usually of a more practical nature related to their work or academic interests, counting for 3 or 6 of the 30 required credits. Course Only option students take 30 credit hours of course work, and select an area or areas of concentration. No thesis or project work is required.

Application for Admission

Submit applications for admission to the graduate program directly to the Department of Computer and Information Science by May 1 for the following Fall semester and September 15 for the following Spring semester. To be considered for departmental graduate assistant positions for the following Fall semester, all application materials *must* be received by *January 15*. Financial support is generally not available for Spring applicants. Apply early because it may take up to six months to complete the application process.

Students interested in advanced study or students who are required to complete preparatory courses and are waiting on application processing may take courses as graduate nondegree students. However, no more than 12 graduate credit hours earned as a nondegree student may be counted toward a graduate degree program.

See the department's Web site (www.cs.iupui.edu) for additional information on requirements and application deadlines. For guidelines and online applications, follow the link to the IUPUI Graduate Office on the department's Web site.

General Admission Requirements

The applicant to the graduate program must have a four-year bachelor's degree or equivalent. Students with three-year degrees may be required to complete additional course work in order to be eligible for admission.

The applicant's record should demonstrate strong individual accomplishments, include recommendations from independent references and exhibit outstanding achievement as indicated by the grade point average for each degree over his or her entire academic record. An applicant is expected to have a GPA of at least a 3.0 on a scale of 4.0.

The Graduate Record Exam (GRE) General Test is optional for admission, but required to be eligible for financial aid. Those submitting GRE General Test scores are encouraged to submit Computer Science Subject Test scores.

All applicants should have a background in the following core areas of computer science:

- software development experience in a high-level language
- data structures and algorithms
- systems (operating systems, compilers, and programming languages)
- theory (discrete math and theory of computation)
- hardware (computer architecture)

In addition, applicants should have a strong background in mathematics, including calculus, linear algebra, and numerical computations.

All applicants whose native language is not English must submit a Test of English as a Foreign Language (TOEFL) score of at least 550 on the paper-based test, or 250 on the computer-based, or 77 on the Internet Based Test (iBT), or have International English Language Testing System (IELTS) band score of 6.5.

Provisional Admission

Those students who do not satisfy the admission requirements may request *provisional admission only* to the graduate program if they satisfy the following requirements:

- possess a bachelor's degree with a cumulative GPA of 3.0 on a 4.0 scale
- have taken MATH 16500
- have taken CSCI 24000 or equivalent experience or credit

If provisional admission to the graduate program in computer science is granted, the student will be required to satisfy the stipulations of the admission, which may include satisfactorily completing one or more courses, before admission without provisions is granted.

Degree Requirements

To receive the Master of Science degree, the applicant must be admitted as a graduate student *without provisions* and complete 30 semester credit hours of study in CSCI courses numbered 500 or above, at least 6 credit hours of which must be from the following core courses:

- CSCI 50300 Operating Systems
- CSCI 50400 Concepts in Computer Organization

- CSCI 56500 Programming Languages
- CSCI 58000 Algorithm Design, Analysis, and Implementation

Each student is required to submit to the graduate committee for approval an initial plan of study during the first year in the program. This is prepared in consultation with the faculty advisor. Before the semester of expected graduation, the student's formal plan of study must be submitted to, and accepted by, Purdue University Graduate School. Each student must register in CAND 99100 for 0 credits during the final semester before graduation.

Credit for Courses from Outside the Department

Credit for graduate courses taken at other institutions may be transferred with the approval of the graduate committee and the Graduate School if the courses have not been used for other degree requirements. Transfer credits are normally limited to 6 credit hours and are restricted to courses in which the grade is B or higher. Up to 6 credit hours of graduate credit from a closely related discipline may be used to substitute for the elective courses, subject to approval by the department before enrollment.

Assessment

The student's graduate examination committee will examine the student's project or thesis and general proficiency in computer science. Grades of A and B are expected; up to 6 credit hours of C may be included, provided an overall GPA of 3.0 (B) is maintained. Other grades are unacceptable.

Programs of Study

The department offers three programs of study within its M.S. program: the Research Program, the Applied Program, and the Course Only option.

Research Program

The objective of the Research Program is to help students develop a general knowledge of computer science, depth in a specific area, and an ability to do independent research. The student learns research techniques by working in close cooperation with a faculty member while doing the thesis research. In addition to the two core courses and 6 to 9 credit hours of thesis work, the student completes a sufficient number of electives from the department's graduate level courses to satisfy the requirement of 30 credits hours total.

Applied Program

The objective of the Applied Program is to develop skills and knowledge of the computer science fundamentals and an ability to apply these to practical problems. In addition to the two core courses, it requires at least two courses in a specialization, 3 to 6 credits of work in the M.S. Project course, CSCI 69500, and a sufficient number of electives from the department's graduate courses to complete the requirement of 30 credits hours. The course work is designed to provide breadth of knowledge to the professional as well as specialized knowledge in the areas that the project will require. The project normally involves at least two semesters of intensive work on an application of the course material to a problem of practical importance. This might be a project from the student's work environment, internship, or a faculty member's work. Its objective is generally more immediately practical than the thesis in the Research Program. The student carries out the project under the supervision of a faculty member.

The Applied Program offers a menu of courses from which the individual selects one or more specializations to prepare for the proposed project. To define a specialization, the graduate advisor and student identify in the plan of study two or more courses that provide depth in a cohesive theme.

Course Only Option

The Course Only option is meant for students who desire practical knowledge and skills in a range of specializations in computer science. It offers a menu of courses from which the individual selects one or more specializations to define a concentration area. The program provides both depth and breadth of knowledge in the discipline, and is ideal for students who are not planning careers exclusively in research.

Doctor of Philosophy

Students interested in research in certain areas and who qualify may be admitted to pursue a Ph.D. degree. Information on the general nature of the program appears in the "Graduate Programs" section of the School of Science part of this bulletin. Consult the department's Web page (www.cs.iupui.edu) for more specific information on how this might be arranged.

Minor in Computer and Information Science

The undergraduate minor in computer and information science requires at least 20 credit hours in computer science courses, including CSCI 23000, 24000, 34000, 36200, and two CSCI elective courses chosen from selected N300-N400 and 300-400 level courses. Course prerequisites must be fulfilled prior to enrollment in CSCI courses.

A minimum GPA of 2.50 must be maintained in these courses. At least 9 credit hours of the minor must be taken at IUPUI.

Students who wish to pursue a minor in computer and information science must consult with a department advisor, who can be reached at (317) 274-9727. They must also file a formal application online. Students should consult an advisor in the department before their final semester regarding minor completion.

Minor in Applied Computer Science

The Minor in Applied Computer Science is available to currently enrolled IUPUI undergraduate students pursuing bachelor's degrees outside computer science. The applied minor requires at least 19 credit hours in computer science courses, including CSCI-N201, CSCI-N207 or CSCI-N211, CSCI-N241, CSCI 23000, and two three-credit electives from two separate areas of computer science. Information on electives is available at www.cs.iupui.edu. Course prerequisites must be fulfilled prior to enrollment in CSCI courses.

A minimum 2.0 GPA must be maintained in these courses, a no grade below C- is allowed. Students who wish to pursue a minor in Applied Computer Science should apply online

at
http://www.cs.iupui.edu/form/minor_application/applied.php. Students should consult an advisor in the department before their final semester regarding minor completion.

Geology is the study of the planet Earth: the materials of which it is made, the processes that act upon these materials, and the history of the planet and life forms since its origin. Geology considers the physical forces acting on the earth, the chemistry of its constituent materials, and the biology of its past inhabitants. Geology also includes the study of the interrelationships in the modern environment of humans and geological phenomena and focuses on such important concerns as how our global climate is changing and how that change will affect human activities.

The Department of Earth Sciences offers the Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in Geology from Indiana University and a Bachelor of Arts (B.A.) in Earth Science Education from Indiana University. These programs prepare students for graduate studies and for a variety of careers with emphasis on investigation of the environment by federal and state agencies, industries, and consulting companies, or earth and space science education. The programs allow flexibility to accommodate the needs and interests of all students. Selection of a particular program should be made in consultation with a departmental advisor.

The Department of Earth Sciences offers graduate study leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees granted by Indiana University. The M.S. program in Geology offers both thesis and non-thesis options. The Ph.D. program in Applied Earth Sciences is an interdisciplinary research training program involving students and faculty from the IUPUI schools of Science, Liberal Arts, and Medicine.

Faculty and students of the Department of Earth Sciences are actively engaged in basic and applied research. Specific research areas include biogeochemistry, biomineralization, glacial geology, history of geology, paleoceanography, paleoclimatology, paleontology, petrology, and sedimentology.

Bachelor of Arts in Geology

(Granted by Indiana University)

Degree Requirements

First-Year Experience Course Beginning freshmen and transfer students with less than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills See the School of Science requirements under "Undergraduate Programs" in this bulletin. The second semester of English composition may be satisfied by ENG-W132 or ENG-W231. GEOL-G205 may satisfy the second writing requirement in Area I, but the 3 credit hours cannot then also be counted as part of the geology credit hours required in Area IV.

Area II Foreign Language First-year proficiency in a modern foreign language is required for the Bachelor of Arts degree program. See the School of Science requirements under "Undergraduate Programs" in this bulletin.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures See the School of Science requirements under "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator The Junior/Senior Integrator requirement is suspended indefinitely as a department-level requirement.

Area IIIC Physical and Biological Sciences See the School of Science requirements under "Undergraduate Programs" in this bulletin, but all four courses must include laboratories; Two of the four courses must include CHEM-C105 / CHEM-C125 and CHEM-C106 / CHEM-C126 and at least one of the four courses must be in biological sciences. No grade below C- will be accepted in any of these courses.

Area IIID Mathematical Sciences MATH 15300 / MATH 15400 or MATH 15900 and CSCI-N207 or another CSCI course approved by the Department of Earth Sciences. No grade below C- will be accepted in any of these courses.

Note: Computer Science CSCI-N100 level courses and CIT 10600 do not count for credit toward any degree in the School of Science. Also, CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as an elective.

Area IV Geology Concentration Requirements
GEOL-G110, GEOL-G120, GEOL-G205, GEOL-G335, GEOL-G221, GEOL-G222, GEOL-G334 and four 300-level or higher geology courses. Other 100-level courses, GEOL-G300, GEOL-G307, and one to two credit courses do not count toward the geology concentration, but may be applied as electives toward the university-required total of 122 credit hours. No grade below C- will be accepted in any of these courses.

Students pursuing the earth science teaching option must complete: GEOL-G110, GEOL-G120, GEOL-G205, GEOL-G221, GEOL-G222, GEOL-G304, GEOL-G334,

GEOL-G335, and two 400-level electives approved by the academic advisor.

Other Requirements

See the School of Science requirements under Undergraduate Programs, Baccalaureate Degree, General Requirements in this bulletin. GEOL-G420, GEOL-G460, or GEOL-G495 may be used to satisfy the School of Science capstone requirement, with approval by the Department of Earth Sciences.

Graduate Programs

Master of Science in Geology

The Department of Earth Sciences graduate program leads to a Master of Science degree from Indiana University. The program is administered by a departmental graduate advisory committee, composed of the graduate advisor and two or more members of the graduate faculty.

Admission Requirements

Prospective students should have a bachelor's degree in geology, including a summer field course, and a minimum of a B (3.0) average in geology courses. One year of chemistry and mathematics through college algebra and trigonometry are required. Individuals with a bachelor's degree in another area of science are also encouraged to apply; the departmental graduate advisory committee will prescribe a plan of study to remove deficiencies. The Graduate Record Examination (GRE) General Test is required; the Subject Test in Geology is optional. Each student must submit three letters of recommendation.

Financial Aid

Admitted students may be appointed as research assistants or as teaching assistants in introductory geology courses. Several such assistantships are available each year. Assistantships include remission of tuition and fees.

Degree Requirements

Both thesis and non-thesis options are available. Both options require at least 18 credit hours of non-research course work in geology and at least 3 credit hours in courses approved for graduate credit from allied sciences, mathematics, or the environmental program of the School of Public and Environmental Affairs (SPEA). Up to 6 credit hours of 400-level courses approved for graduate credit may be counted toward the degree with the approval of the graduate advisor. The thesis option requires the completion of 30 credit hours, 6 of which are taken as GEOL-G810 Research (the thesis). The non-thesis option requires the completion of 36 credit hours, 3 of which consist of a research project taken as GEOL-G700 Geologic Problems. The departmental graduate committee must approve elective credits outside of the Department of Earth Sciences for both options.

Admitted students will be assigned a three-person advisory committee at the beginning of the first year of graduate study. The committee will prescribe a study program based on the interests of the student and the principal graduate advisor. Students must complete all degree requirements within six years of beginning the study program. Students must maintain a B (3.0) average or higher, and no grade below C is acceptable.

Bachelor of Science/Master of Science in Geology

The B.S./M.S. program combines the undergraduate B.S. program with the M.S. program in geology, leading to the award of an Indiana University bachelor's and master's degree with completion of the M.S. thesis. The departmental graduate advisory committee administers the B.S./M.S. program.

Admission Requirements

Prospective students should have advanced standing in the undergraduate program. Students should apply to the program in early spring of the junior year. Students should submit GRE scores and three letters of recommendation. Application requires a minimum GPA of 3.0 and will be considered by the departmental graduate committee.

Degree Requirements

Course and thesis requirements are the same as those listed under the Master of Science program in this bulletin. Upon acceptance into the program, the student will prepare a research and course plan in consultation with a graduate academic advisory committee. Research reading and data collection begins in the summer prior to the senior year of undergraduate study, and will be completed the following summer. The fifth year of study is devoted to graduate course work and completion of the M.S. thesis.

Doctor of Philosophy in Applied Earth Sciences

The Ph.D. program prepares students for academic positions or research and leadership positions in local, state, national, or private environmental organizations. The goal of the program is to prepare future researchers and leaders who assess complex environmental systems and assist in providing sound options and solutions for optimizing human-environment interactions.

Admisasion Requirements

Prospective students should have a B.S. or M.S. degree in the physical, biological, or health sciences, and a cumulative GPA of 3.0 or higher is expected. The Graduate Record Examination (GRE) General Test is required. Individuals for whom English is a second language must demonstrate proficiency in English. Scores from the TOEFL exam should be submitted with the application for admission. Each student must submit three letters of recommendation.

Degree Requirements

Upon admittance to the program, students are assigned a preliminary advisory committee from among program faculty. Students identify an appropriate sub-discipline after their first year, and the preliminary advisory committee is reconstituted into a research committee to suit the research goals of the student. The research advisory committee ensures successful progress in later coursework, coordinates oral qualifying exams, and advises students in their progress to degree completion as appropriate. Students will complete four or five core graduate courses in applied earth science topical areas, based on their prior academic background. After completing the core courses, students identify a specialization area and enroll in at least 18 credit hours of additional courses in support of that specialization, with consultation of the research advisory committee. Students must complete all degree requirements within six years of beginning the study program, and must maintain a B (3.0) average.

Minor in Geology

(Granted by Indiana University)

The undergraduate minor in geology requires 18 credit hours, with an overall grade point average of 2.0 (C) and with no grade less than a C-, distributed as follows:

- Students must complete the following four courses that total 12 credit hours: GEOL-G110 (3 cr.), GEOL-G120 (1 cr.), GEOL-G335 (4 cr.), and GEOL-G221 (4 cr.) or GEOL-G306 (4 cr.).
- Students must complete an additional 6 credit hours minimum, including two of the following courses: GEOL-G222 (4 cr.), GEOL-G304 (3 cr.), GEOL-G334 (4 cr.), GEOL-G406 (3 cr.), GEOL-G415 (3 cr.), GEOL-G430 (4 cr.), GEOL-G451 (3 cr.) or another 400-level geology course with departmental aproval.

At least 9 credit hours of the minor must be taken at IUPUI. In addition, recommended courses include one year of college chemistry and at least one course in college algebra.

Participating Faculty

- **Professors** Filippelli, McSwane, Ottensmen, Siegel, Wilson
- **Associate Professors** Brothers, Dwyer, Jacinthe, Li, Licht, Martin, Ritchie, Wang
- **Assistant Professors** Babbar-Sebens, Johnston
- **Lecturers** Nelson, Swope,
- **Adjunct Faculty** Cantwell, Holm, Magoun, Thompson
- **Program Director** Fillipelli
- **Academic Advisor** Park
- **Concentration Academic Advisors** Nelson (Science, Earth Sciences), Ritchie (Public Health), Wilson (Liberal Arts, Geography)

Environmental Science is an interdisciplinary field of study that investigates the interrelationships in the modern environment of humans and natural phenomena and focuses on important modern concerns, like how our global climate is changing and how that change may affect human activities, how to maintain and improve vital natural resources like drinking water, and how to manage and balance the quality of the environment in the face of improving the quality of life in the United States and abroad.

The Bachelor of Science in Environmental Science is an interdisciplinary degree within the School of Science that is offered in partnership with the Department of Public Health in the School of Medicine and the School of Liberal Arts.

Bachelor of Science in Environmental Science

The Bachelor of Science of Environmental Science (B.S.E.S.) degree is awarded by Indiana University. This program prepares students for graduate studies and for a variety of careers with emphasis on investigation of the environment by federal and state agencies, industry, and consulting firms. The program allows flexibility to accommodate the needs and interests of all students.

There are three Environmental Science Concentrations within the Bachelor of Science of Environmental Science Program. Selection of a particular concentration should be made in consultation with the academic and concentration advisors.

Earth and Water Resources Concentration

Understanding interactions between land, soil, and water is critical to ensuring environmental quality. The Earth and Water Resources concentration provides students with a quantitative background in soils, hydrogeology, and biogeochemistry and an understanding of biological interactions, processes affecting soil and water resources, and advanced analytical techniques related to environmental quality assessments. Students can pursue detailed course work in either the Water or Earth options of this concentration and are prepared for continued advanced study or careers in government, industry, and environmental consulting.

Environmental Management Concentration

The Environmental Management concentration prepares students who wish to focus on the management of pollution in the air, land, and water. Students who complete this concentration have the theoretical foundation and applied skills needed to characterize hazards, track the fate and transport of pollutants, identify health and environmental effects of pollutants, and plan and manage programs to control environmental hazards. The required courses in the concentration focus on identification and solving multimedia problems in solid and hazardous waste, water quality and wastewater treatment, and air quality in the outdoors, inside homes, or in industrial workplaces. The options allow students to focus more specifically on the assessment of pollution, policy and planning, or occupational safety and health. Students are prepared for careers in government, industry, and nonprofit agencies.

Environmental Remote Sensing and Spatial Analysis Concentration

Spatial information technologies provide important tools for measurement, analysis, and modeling of environmental

systems and their dynamic interaction with human impacts. The Environmental Remote Sensing and Spatial Analysis concentration builds theoretical background and advanced knowledge in spatial analytical techniques using remote sensing (satellite and airborne sensors), geographic information system (GIS), and global positioning system (GPS) technologies. The concentration emphasizes integration of these technologies and their applications to problems of environmental modeling and analysis.

Research Areas

Faculty and students in the Departments of Earth Sciences (Science), Geography (Liberal Arts), and the Department of Public Health in the School of Medicine are actively engaged in basic and applied research. Specific research areas include geochemistry, hydrology, paleoclimatology, biogeochemical cycles, soils, wetland restoration, water resource analysis, environmental remote sensing, land cover dynamics, urban ecosystems, human health and the environment, environmental and water resources planning, environmental health policy, food science, and indoor air quality.

- Centers and Programs

Centers and Programs

Center for Earth and Environmental Science

The Center for Earth and Environmental Science (CEES) at IUPUI is an interdisciplinary research and outreach center promoting science-based environmental stewardship through research, education, and public service. Research activities at CEES focus on applied environmental issues in five principle areas: water resource evaluation and watershed management; wetland and stream assessment and restoration; assessment of environmental constituents; environmental data management and visualization; and science education.

CEES has developed a network of experimental ecosystem restoration sites throughout central Indiana that are evaluating restoration strategies for riparian and wetland ecosystems and investigating watershed and water quality improvement strategies. CEES is developing an integrated network of remote environmental sensors that are actively monitoring water quality throughout area streams, reservoirs, riparian, and groundwater systems in an effort to support faculty and student research programs, improve our understanding of water resources and provide critical information to support environmental decision-making and water resource management. In partnership with the local water company, CEES is evaluating approaches to maintaining sustainable water resources for central Indiana. Through a long-term research and development program, CEES researchers are working to understand triggers of algal blooms in drinking water reservoirs, evaluate watershed best management approaches to reduce contaminants in source water, develop rapid assessment tools, and assess water supplies.

CEES works with community stakeholder groups to facilitate watershed management programs and provides research and infrastructure support to area environmental consulting firms, nonprofit agencies, and local, state and federal government agencies. CEES is also partnering with area schools, museums, parks and nature centers to develop and support authentic, high quality science education programs for students, and families, and provide instructional support and training for teachers. CEES public service programs are building capacity for service learning in the environmental sciences by providing opportunities for students and the community to engage in hands-on projects that address current environmental issues and improve natural areas in Central Indiana.

Center for Urban Health

The central theme of the Center for Urban Health is Environment, Community, and Health. The goal is to enhance the health of cities by focusing on communities and the environment.

A number of critical human health issues are unique to cities. These include environmental legacies like contamination and exposure to harmful pollutants, urban community disparities stemming from both social and physical factors, inadequate access to quality health care due to safety and transportation realities, poor alignment of community resources and social structure to promote healthy lifestyles. Future threats include climate change impacts on urban infrasturcture and community health. The Center for Urban Health will pormote discovery to address these critical health issues by building research collaborations, stimulating new research areas, funding graduate fellowships, and sponsoring educational activities.

For more information, contact:

Center for Urban Health
723 W. Michigan Street
Indianapolis, IN 46202-5132
http://www.urbanhealth.iupui.edu

Center for Urban Policy and the Environment

The Center for Urban Policy and the Environment is a nonpartisan applied research organization in the School of Public and Environmental Affairs at IUPUI. The Center, founded in 1992, is now one of the largest of its kind in the country.

Any social and economic issues that affect quality of life are of interest to Center researchers. Some of the research topics have ranged from community safety and riverboat gambling to neighborhood empowerment, urban development and land use,the economic impact of the arts and sports, and drinking water and sewer infrastructures. With an award of general support from Lilly Endowment, Inc., Center scholars have conducted ongoing studies on Central Indiana. These investigations have helped policy makers understand how investments by households, businesses, governments, and nonprofits have influenced the Central Indiana region.

Center scholars, staff, and graduate student interns typically form project teams and work in partnership with local governments, nonprofit organizations, and private businesses. Over the years, the Center has worked with more than 150 clients and partners. These include the city of Indianapolis, the Indiana Port Commission, Indianapolis-Marion County Public Library, Indiana Gaming Commission, Indiana General Assembly and Office of the Governor, Indianapolis Museum of Art, Indianapolis Neighborhood Housing Partnership, Indiana Land Resources Council, and the Ford Foundation.

Sustainable Campus Ecosystem Program

As a university institution within an urban environment, the IUPUI community has a unique and important responsibility to educate and encourage environmental stewardship. The Sustainable Campus Ecosystem Program is working to implement environmentally sustainable projects and policies for IUPUI through a consortium of faculty, staff, and students. The initiative focuses on a multi-tiered approach to environmental sustainability and includes the following aspects: education and outreach, green landscaping, waste reduction, energy conservation, transportation, and water resources. Participants will identify goals and objectives for achieving sustainable policies at IUPUI as well as initiate projects and participate in service learning and outreach events on campus and in the community.

For more information, contact:

Center for Earth and Environmental Science
723 W. Michigan Street
Indianapolis, IN 46202-5132
(317) 274-7154

Student Organizations

Environmental Awareness League

The mission of the Environmental Awareness League (EAL) is “to promote awareness of environmental issues and to exchange the latest ideas and tools in order to better the future of environmental health.” The League promotes service activities (such as river clean-ups and recycling programs), sponsors social activities (such as the hiking, river rafting, IUPUI Carnival in the Courtyard, and IUPUI Student Activities and Volunteer Fair), and offers professional development and networking opportunities (guest speakers and tours to industrial plants).

Green IUPUI

Green IUPUI explores issues related to promoting a sustainable society, both at IUPUI and globally. Activities include educational outreach at events on campus and in the City of Indianapolis, as well as opportunities to study energy efficiency, ecological sustainability, and water, earth, and air quality.

Geology Club

The Geology Club organizes a number of activities related to learning about earth sciences, including trips to the field and to museums, and informal discussions with faculty on research topics and career possibilities. The Club provides an opportunity to meet and socialize with other students with interests in earth sciences.

Bachelor of Science in Environmental Science

(Granted by Indiana University)

Degree Requirements

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows in Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills (9 cr.) See the School of Science requirements under “Undergraduate Programs” in this bulletin. The second semester of English composition may be satisfied by ENG-W132 or ENG-W231. GEOL-G205 may be used to fulfill the second writing course requirement, but the 3 credit hours cannot then also be counted as part of the core and concentration credit hours required in Area IV.

Area II Foreign Language No foreign language proficiency is required for a Bachelor of Science degree.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.) See the School of Science requirements under “Undergraduate Programs” in this bulletin.

Area IIIB Junior/Senior Integrator (3 cr.) The Junior/Senior Integrator requirement is suspended indefinitely as a School and program-level requirement.

Area IIIC Physical and Biological Sciences (33 cr.) BIOL-K101 / BIOL-K103, CHEM-C105 / CHEM-C106, GEOL-G107, GEOL-G110 / GEOL-G120, PHYS-P201 / PHYS-P202. No grade below C- will be accepted in any of these courses.

Area IIID Mathematical Sciences (12 cr.) MATH 22100 / MATH 22200; CSCI-N207 or another course approved by the program advisor; and STAT 30100, SPEA-K300, or a course in statistics approved by the program advisor. No grade below C- will be accepted in any of these courses.

Note: Computer Science CSCI-N100 level courses and CIT 10600 do not count for credit toward any degree in the School of Science. Also, CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as an elective.

Area IV Major Core and Concentration Requirements (43-44 Credits)

Core Requirements Twenty-five (25) credit hours of environmental science core courses including:

- GEOL-G221 Introductory Mineralogy or GEOL-G306 Earth Materials
- PBHL-A326 Mathematical Methods in Environmental Science or GEOL-G490 Introduction to Fluid Mechanics for Earth and Environmental Sciences

- PBHL-A316 Environmental Health Science
- PHIL-P237 Environmental Ethics
- PBHL-A459 Environmental Science and Health Data Analysis or an approved field methods course
- GEOG-G303 Weather and Climate or GEOL-G430 Principles of Hydrology (GEOL-G430 is required for the Earth and Water Resources Concentration)
- BIOL-K341 Principles of Ecology and Evolution or GEOG-G307 Biogeography: Distribution of Life
- GEOG-G338 Geographic Information Science or GEOG-G336 Environmental Remote Sensing

No grade below C- will be accepted in any of these courses.

Concentration Requirements Eighteen to nineteen (18 to 19) credit hours of courses within one of three Environmental Science concentrations. Students select one of the Environmental Science Concentrations – Earth and Water Resources, Environmental Management, or Environmental Remote Sensing and Spatial Analysis.

A. Earth and Water Resources Eighteen to nineteen (18 -19) credit hours, including:

Required Courses:

- CHEM-C341 Organic Chemistry I
- GEOL-G431 Wetland Ecosystems
- GEOL-G486 Soil Biogeochemistry

Capstone Requirement (one of the following):

- GEOL-G445 Applied Analytical Techniques in Geology
- GEOL-G490 Stream Ecosystems and their Restoration
- PBHL-A460 Environmental Health Science Data Analysis
- One capstone course as approved by the Program Director and concentration advisor

Water Resources option, take the following:

- GEOL-G451 Principles of Hydrogeology
- PBHL-A410 Introduction to Environmental Toxicology

Earth Resources option, take the following:

- GEOL-G406 Introduction to Geochemistry
- BIOL-K356 Microbiology or PBHL-A410 Introduction to Environmental Toxicology

No grade below C- will be accepted in any courses in the Earth and Water Resources concentration.

B. Environmental Management Eighteen to nineteen (18-19) credit hours, including

Required Courses (4 courses):

- CHEM-C341 Organic Chemistry I
- PBHL-A423 Environmental Health Science and Technology: Managing Water and Waste
- PBHL-A451 Air Pollution and Control
- PBHL-A400 Public Health Risk Analysis, Communication and Management

Public Assessment option take the following:

- PBHL-A433 Industrial Hygiene
- PBHL-A460 Techniques in Environmental Science and Health (capstone requirement)

Policy and Planning option take the following:

- GEOG-G438 Advanced Geographic Information Science
- PBHL-A416 Environmental Health Policy (capstone requirement)

Occupational Safety and Health option take the following:

- PBHL-A410 Introduction to Environmental Toxicology
- PBHL-A433 Industrial Hygiene (capstone requirement)

No grade below C- will be accepted in any courses in the Environmental Management concentration.

C. Environmental Remote Sensing and Spatial Analysis Eighteen (18) credit hours, including:

- GEOG-G336 Environmental Remote Sensing or GEOG-G338 Geographic Information Science
- GEOG-G337 Computer Cartography and Graphics or INFO-I400 Programming for Geographic Information Systems or GEOL-G490 Hyperspectral Remote Sensing
- Three courses chosen from:
- GEOG-G436 Advanced Remote Sensing
- GEOG-G438 Advanced Geographic Information Science
- *GEOG-G442 Seminar in Remote Sensing
- GEOG-G488 Applied Spatial Statistics
- GEOL-G490 Planetary Remote Sensing
- GEOG-G439 Seminar in Geographic Information Science *(capstone requirement)*

No grade below C- will be accepted in any courses in the Environmental Management concentration.

D. Other Requirements See the School of Science requirements under “Undergraduate Programs, Baccalaureate Degree, General Requirements” in this bulletin.

- **Environmental Science Plans of Study**

  There is no single semester-by-semester plan of study for the B.S.E.S. degree because of the flexibility encouraged within the program and the three concentration options. However, a possible plan for courses is given below. Variations from this sample plan of study should be made in consultation with the academic and concentration advisors.

  Bachelor of Science Environmental Science Sample Program - Environmental Management Concentration (122 hours required)

  Freshman Year

First Semester	
GEOL-G110 Physical Geology	3
GEOL-G120 Physical Geology Laboratory	1
CHEM-C105 Principles of Chemistry I	3

MATH 22100 Calculus for Technology I	3
ENG-W131 Elementary Composition I	3
PHIL-P237 Environmental Ethics	3
SCI-I120 Windows on Science	1
Total	**17**
Second Semester	
CHEM-C106 Principles of Chemistry II	3
GEOL-G107 Environmental Geology	3
MATH 22200 Calculus for Technology II	3
COMM-R110 Fundamentals of Speech Communication	3
Second Composition Course	3
Total	**15**

Sophomore Year

Third Semester	
GEOL-G306 Earth Materials	4
BIOL-K101 Concepts of Biology I	5
CSCI-N207 Data Analysis Using Spreadsheets	3
CHEM-C341 Organic Chemistry I	3
HIST-H114 History of Western Civilization II	3
Total	**18**
Fourth Semester	
BIOL-K103 Concepts of Biology II	5
GEOG-G338 Geographic Information Science	3
GEOL-G430 Principles of Hydrology	3
STAT 30100 Elementary Statistical Methods	3
PBHL-A316 Environmental Health Science	3
Total	**17**

Junior Year

Fifth Semester	
PHYS-P201 General Physics I	5
GEOL-G431 Wetland Ecosystems	3
PBHL-A326 Mathematical Methods in Environmental Science	3
PBHL-A459 Environmental Science and Health Data Analysis	3
Comparative World Cultures-List C	3
Total	**17**
Sixth Semester	
PHYS-P202 General Physics II	5

Forensic and Investigative Sciences Program

IUPUI
Science Building, LD 326
402 N. Blackford Street
Indianapolis, IN 46202-3274
Phone: (317) 274-6882; fax: (317) 274-4701

www.forensic.iupui.edu

- **Professor** Siegel
- **Assistant Professor** Goodpaster (*Program Director*), Picard
- **Lecturer** Ammerman
- **Program Academic Advisor** Shea

Forensic science is the application of the methods of science to matters involving the public. In many cases this means the application of science in solving crimes. Forensic science is multidisciplinary; it involves chemistry, biology, physics, math, biochemistry, engineering, computer science, psychology, medicine, law, criminal justice, etc. Forensic scientists analyze evidence and testify in court. They may be called upon to attend some crime scenes, train police investigators and attorneys, and conduct research.

In the fall of 2004, IUPUI began the first forensic science degree program in Indiana. This FEPAC accredited program was developed by faculty from the School of Law, the School of Science, and the School of Public and Environmental Affairs (SPEA). Each school contributes to the Forensic and Investigative Sciences (FIS) program by offering required and elective classes, and by mentoring students in the program. Completion of this program leads to the Bachelor of Science in Forensic and Investigative Sciences. All students take a core of science classes and university-required courses. Then each student chooses one concentration:

- Biology
- Chemistry

The baccalaureate program also includes courses in law and forensic science (taught by law faculty), laboratory courses in forensic chemistry and biology, as well as an opportunity to complete either an internship at a crime laboratory or a research project with a member of faculty. Graduates of the program will be able to seek employment in crime labs, scientific industries, environmental agencies, and federal or local law enforcement.

Admission to the Major

There are specific credit, GPA, and course requirements for admission to the FIS program. These depend upon your status. Please contact the FIS Academic Advisor for more information by e -mail forsci@iupui.edu or phone 317-274-6882.

- Bachelor of Science
- Minor in Forensic and Investigative Sciences
- Graduate Program

Bachelor of Science

This degree is for students who plan to work in the criminal justice system as scientists in crime laboratories or other enforcement environments.

Degree Requirements

See the School of Science requirements under "Undergraduate Programs" in this bulletin for additional restrictions.

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills (9 cr.)

Written Communication (6 cr.)

A minimum grade of C must be obtained in both composition courses.

- ENG-W131 English Composition I
- The second semester of English composition may be satisfied only by ENG-W132 (or ENG-W150), ENG-W231, or TCM 32000.

Oral Communication (3 cr.)

A minimum grade of C must be obtained.

- COMM-R110 Fundamentals of Speech Communication

Area II Foreign Language

No foreign language proficiency is required for a Bachelor of Science degree.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.)

- HIST H114 Western Civilization II or HIST-H109 Perspectives on the World: 1800-Present
- List H course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List S course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List C course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator (3 cr.)

FIS 41500 Forensic Science and the Law (3 cr.)

Area IIIC Physical and Biological Sciences (20 cr.)

- *Physics* Two semesters of basic physics: PHYS-P201 General Physics I (5 cr.) and PHYS-P202 General Physics II (5 cr.)
- *Chemistry* Two semesters of introductory college chemistry with a laboratory: CHEM-C105 Principles of Chemistry I (3 cr.) / CHEM-C125 Experimental Chemistry I (2 cr.) and CHEM-C106 Principles of Chemistry II (3 cr.) / CHEM-C126 Experimental Chemistry II (2 cr.)

Area IIID Mathematical Sciences (9 cr.)

- *Mathematics* MATH 23100 Calculus for the Life Sciences I (3 cr.) and MATH 23200 Calculus for the Life Sciences II (3 cr.)
- *Computer Science* Choose one course from the following: CSCI-N201, CSCI-N207, CSCI-N211, or CSCI-N301 (all are 3 cr.)

Note: Computer Science CSCI-N100 level courses and CIT 10600 do not count for credit toward any degree in the School of Science. Also, CSCI-N241 and CSCI-N299 do not count in Area IIID but may count as a general elective.

Area IV Forensic and Investigative Sciences Major Concentration

A) Required forensic science courses in addition to those required for the concentration (14 cr.) All FIS courses applicable to the major must have a minimum grade of C.

- FIS 10500 Concepts of Forensic Science I (3 cr.)
- FIS 10600 Concepts of Forensic Science II (3 cr.)
- FIS 20100 Professional Issues in Forensic Science (3 cr.)
- FIS 49000 Capstone Experience (5 cr.) This is a required course that can be completed during any Summer, Fall, or Spring semester during/after the

Junior year. Semester and method of completion will be determined on an individual basis. Please see your academic advisor for guidance.

B) Required biology courses (10 cr.)

- BIOL-K101 Concepts of Biology I (5 cr.)
- BIOL-K103 Concepts of Biology II (5 cr.)

C) Required chemistry courses beyond introductory chemistry (10 cr.)

- CHEM-C341 Organic Chemistry Lectures I (3 cr.)
- CHEM-C343 Organic Chemistry Laboratory I (2 cr.)
- CHEM-C342 Organic Chemistry Lectures II (3 cr.)
- CHEM-C344 Organic Chemistry Laboratory II (2 cr.)

D) Required criminal justice courses (3 cr.)

- SPEA-J101 The American Criminal Justice System (3 cr.)

E) Required statistics course (3 cr.)

- STAT 30100 Elementary Statistical Methods (3 cr.)

F) Concentrations

- **Biology Concentration (24 cr.)**
- BIOL-K322 Genetics and Molecular Biology (3 cr.)
- BIOL-K323 Genetics and Molecular Biology Lab (2 cr.)
- BIOL-K338 Intro Immunology (3 cr.)
- BIOL-K339 Immunology Laboratory (2 cr.)
- BIOL-K483 Biological Chemistry (3 cr.)
- BIOL-K484 Cellular Biochemistry (3 cr.)
- FIS 40200 Forensic Biology I (Fall) (4 cr.)
- FIS 40300 Forensic Biology II (Spring) (4 cr.)

- **Chemistry Concentration (19 cr.)**
- CHEM-C310 Analytical Chemistry (Spring/Summer) (3 cr.)
- CHEM-C311 Analytical Chemistry Lab (1 cr.)
- CHEM-C360 Elementary Physical Chemistry (3 cr.)
- CHEM-C410 Principles of Chemical Instrumentation (Fall) (3 cr.)
- CHEM-C411 Prin of Chemical Instrumentation Lab (Fall) (2 cr.)
- FIS 40100 Forensic Chemistry I (Fall) (4 cr.)
- FIS 40400 Forensic Chemistry II (Spring) (4 cr.)
- FIS 30600 Forensic Microscopy (3 cr.)

G) Advanced science courses, based on the concentration selected; refer to the lists below (12 cr. minimum)

- **Biology Concentration advanced science elective course list**
- ANTH-B426 Human Osteology (3 cr.)
- BIOL-K324 Cell Biology (3 cr.)
- BIOL-K325 Cell Biology Laboratory (2 cr.)
- BIOL-K356 Microbiology (3 cr.)
- BIOL-K357 Microbiology Laboratory (2 cr.)
- BIOL-N217 Human Physiology (5 cr.)
- BIOL-N261 Human Anatomy (5 cr.)
- CHEM-C310 Analytical Chemistry (3 cr.)
- CHEM-C311 Analytical Chemistry Lab (1 cr.)
- CHEM-C360 Elementary Physical Chemistry (3 cr.)
- CHEM-C410 Principles of Chemical Instrumentation (3 cr.)
- CHEM-C411 Prin of Chemical Instrumentation Lab (2 cr.)
- CHEM-C430 Inorganic Chemistry (3 cr.)
- CHEM-C435 Inorganic Chemistry Lab (1 cr.)
- CHEM-C484 Biomolecules and Catabolism (3 cr.)
- CHEM-C485 Biosynthesis and Physiology (3 cr.)
- CHEM-C486 Biological Chemistry Lab (2 cr.)
- FIS 40100 Forensic Chemistry I (4 cr.)
- FIS 40400 Forensic Chemistry II (4 cr.)
- FIS 30600 Forensic Microscopy (3 cr.)
- GEOL-G306 Earth Materials (4 cr.)

- **Chemistry Concentration advanced science elective course list**
- ANTH-B426 Human Osteology (3 cr.)
- BIOL-K322 Genetics and Molecular Biology (3 cr.)
- BIOL-K323 Genetics and Molecular Biology Lab (2 cr.)
- BIOL-K324 Cell Biology (3 cr.)
- BIOL-K325 Cell Biology Laboratory (2 cr.)
- BIOL-K338 Intro Immunology (3 cr.)
- BIOL-K339 Immunology Laboratory (2 cr.)
- BIOL-K356 Microbiology (3 cr.)
- BIOL-K357 Microbiology Laboratory (2 cr.)
- BIOL-K483 Biological Chemistry (3 cr.)
- BIOL-K484 Cellular Biochemistry (3 cr.)
- BIOL-N217 Human Physiology (5 cr.)
- BIOL-N261 Human Anatomy (5 cr.)
- CHEM-C430 Inorganic Chemistry (3 cr.)
- CHEM-C435 Inorganic Chemistry Lab (2 cr.)
- CHEM-C484 Biomolecules and Catabolism (3 cr.)
- CHEM-C485 Biosynthesis and Physiology (3 cr.)
- CHEM-C486 Biological Chemistry Lab (2 cr.)
- FIS 40200 Forensic Biology I (4 cr.)
- FIS 40300 Forensic Biology II (4 cr.)
- GEOL-G306 Earth Materials (4 cr.)

Area V Electives A minimum of 124 credit hours must be completed for graduation. The number of electives required will depend upon your situation.

Additional Policies

1) Overlapping Courses

The Forensic and Investigative Sciences Program will not grant credit for a course when considerable duplication of course content occurs with another course that has been taken for credit. In general, credit will be allowed for the higher-level course, but not for the lower-level course. The following listings are considered to be duplications (lower-level courses listed first):

- MATH 22100 / MATH 22200 and MATH 23100 / MATH 23200 and MATH 16500 / MATH 16600
- PHYS-P201 / PHYS-P202 and PHYS 15200 and PHYS 25100

For example, if a student has earned credit for MATH 16500 / MATH 16600, the student will receive no credit for MATH 22100 / MATH 22200, even if earned previously.

2) Minor earned as a result of completing degree requirements for the Forensic and Investigative Sciences major

As a result of completing a Bachelor of Science in Forensic and Investigative Sciences and depending on the concentration selected, a student may earn enough credit hours to satisfy the requirements for a minor in chemistry in addition to the major in FIS. Also, a student majoring in FIS, with the selection of additional electives, may also earn minors in other areas (e.g., biology minor or criminal justice general minor). Please consult with the academic advisor for the FIS program and the appropriate academic unit that awards the minor.

Minor in Forensic and Investigative Sciences

The minor in Forensic and Investigative Sciences can be used in relevant majors where the student's primary interest is in the major but who wishes to learn the basic concepts of forensic science and how to apply them to other fields of knowledge. Prerequisites to any of the minor courses are not included but are required in order to complete the minor.

- FIS 10500 Concepts of Forensic Science I (3 cr.)
- FIS 10600 Concepts of Forensic Science II (3 cr.) or PSY-B375 Psychology and Law (3 cr.)
- FIS 20100 Professional Issues in Forensic Science (3 cr.)
- PSY-B375 Psycholoy and Law (3 cr.)
- FIS 41500 Forensic Science and the Law (3 cr.)
- SPEA-J303 Evidence (3 cr.)
- SPEA-J320 Criminal Investigation (3 cr.)

Graduate Program

Master of Science in Forensic Science

Description

The M.S. Program in Forensic Science, which awards a Purdue University degree, requires 35 credit hours of study beyond the baccalaureate level. It is designed for students seeking careers as professional forensic scientists who desire employment in the criminal justice field or a related area.

General Degree Options and Requirements

Students must apply in one of the following concentrations; forensic chemistry or biology. All students take a core of required courses which include a professional issues course, law courses and a clinical law course. Each concentration contains specific required courses taken by students in that concentration.

With the exception of students who are employed full time in an analytical or forensic science laboratory, all students must include a thesis. This program requires 20 credit hours of course work and 15 credit hours of thesis completion and defense and is available to full time and part time students. Students who are employed full time in a forensic science or related laboratory may elect the non thesis option. This program includes 35 credit hours of classes approved by the department. This may include up to six credits of internship.

Admission

The **admission requirements** are as follows:

- A Bachelor's degree from an accredited institution in chemistry, biology, forensic science, pharmacology/toxicology, or a related science
- A minimum GPA of 3.0 for all undergraduate work
- A score in the upper one-half in the GRE general exam

The program will serve full time students who meet the above requirements as well as students who are presently employed full time in a forensic science laboratory or other analytical laboratory.

A non thesis option is permitted only for those students who must enroll part time in the program because they are employed full time in a forensic science or related laboratory. These students will be permitted to complete a lab based project if they wish, including one that does not rise to the level of a thesis but, in addition, all students in this category must complete a literature based research project, write it up and report it orally to the faculty and students of the FIS program in the manner that one would defend a thesis.

How to Apply

Application to the program can be done completely online and this is the preferred way to apply although hard copies of forms will be accepted. The online application is called the "eApp Online Admissions Application."

You will be directed to create an account to begin your application. The application can be filled out in stages and saved along the way so you can return to it later. The eApp has provisions for uploading your personal statement and listing contact names for three letters of recommendation.

These people will automatically be emailed and asked to input their letters of recommendation.

The Forensic and Investigative Sciences Program accepts applications once a year for beginning matriculation in the fall semester. The deadline for applying to the program is **January 15** of the year you wish to start. Applications must be complete by **January 15** or they will not be considered. Applicants must submit the following:

1. The completed application which will also require

- Three (3) letters of recommendation. These would normally be from professors who can evaluate your ability to successfully complete graduate work in forensic science.

- A personal statement that discusses your educational and work background, interest and experience (if any) in forensic science, and research interests if you are full time. For part time students, also include your current work experience.

2. Official final transcripts from all higher education institutions that you attended.

3. Applicants must arrange to have the testing agency send their GRE scores (and TOEFL, if applicable) directly to the university. (University code is 1325)

Applicants are not normally considered on a rolling basis. They are generally considered en masse after the January 15 deadline. You will be notified within a few weeks after the decision is made.

The Curriculum

The M.S. program consists of 35 semester credit hours. It is anticipated that the program can be completed within two years by full time students. The credit hours are to be distributed as follows:

All students (full and part time) take the following courses:

1. FIS 50500 (3) - Professional and Ethical Issues in Forensic Science
2. FIS 51500 (3) - Legal Issues in Forensic Science
3. LAW-D774 (2) - Law and Forensic Science (a clinical law class)

Students in the forensic chemistry concentration (full and part time) must take the following courses:

1. FIS 50600 (3) - Forensic Microscopy
2. FIS 51100 (4) - Forensic Chemistry 1
3. FIS 51200 (4) - Forensic Chemistry 2

Students in the forensic biology concentration (full and part time) must take the following courses:

1. FIS 52100 (4) - Forensic Biology 1
2. FIS 52200 (4) - Forensic Biology 2

Full time students must take the following courses:

1. FIS 69800 (15) - Thesis Research
2. Electives (1 - 4) - approved by department

Part time students must take the follwoing courses:

1. FIS 697 (6) - Design of a Research Project
2. Electives (10 - 13) - approved by department. This may include up to 6 credits of internship. A student may also take courses in other concentrations as part of theses credits.

Fall Semester

- FIS 50500 (3)
- FIS 51100 (4)
- FIS 50600 (3)

Spring Semester

- FIS 51500 (3)
- FIS 51200 (4)
- FIS 69800 (4)

Summer Semester

- LAW-D774 (2)
- FIS 69800 (6)

Fall Semester

- FIS 69800 (5)
- Elective (1)

The Thesis

The faculty of the Forensic and Investigative Sciences Program strongly believe that research should be a major component of a Master of Science degree. For full time students, 15 of the 35 credit hours of the program are devoted to the thesis. Students are encouraged to identify a thesis topic with the help of the FIS faculty as soon as possible in the program. It is normally expected that the research and write up of the thesis will take at least one year of the program. A master's thesis project may be begun in conjunction with an internship at a crime laboratory and then finished at IUPUI. It may be possible for a student to remain at the internship host for longer than a semester and complete the research. Thesis research done in conjunction with a crime lab must be approved by the student's thesis director at IUPUI.

Financial Aid

Contrary to the situation with Ph.D. programs, there is limited financial support for master's programs. Nonetheless, we are committed to developing as many financial resources for our students as possible. Decisions concerning fellowships and assistantships will normally be at least partly based on merit. Other factors will also be considered. Some funds are usually available from the unit, School of Science, IUPUI and external grants. These will vary from year to year. The "Online Admissions Application" contains a box that should be checked if you would like to be considered for financial aid.

Graduate Student Handbook

The Graduate Student Handbook contains additional information pertaining to the M.S. program.

Interdisciplinary Studies of Bachelor of Science Degree Program

School of Science, IUPUI
Science Building, LD 222
402 N. Blackford Street
Indianapolis, IN 46202-3276
Phone: (317) 274-0625; fax: (317) 274-0628

- **Director** Kathleen A. Marrs, Associate Dean and Associate Professor
- **Program Advisor** Joseph L. Thompson, jlthomp@iupui.edu

The purpose of the Bachelor of Science (B.S.) in Interdisciplinary Studies Program is to provide an opportunity for IUPUI students to construct individual majors that are science-based, interdisciplinary, and not represented by existing major programs. Instead of a prescribed area of

study as with standard majors, the interdisciplinary studies major will accommodate a variety of plans of study, with courses drawn from many subject areas in the sciences and beyond. The Interdisciplinary Studies degree program provides an academic structure that encourages creative and motivated undergraduates to design unique science-based interdisciplinary majors. In collaboration with a faculty mentor, students will create plans of study that demonstrate coherence, rigor, rationale, and vision. The B.S. in Interdisciplinary Studies requires a capstone project or internship experience, including a strong writing component. Particular plans of study may take advantage of the IUPUI Honors Program, the IUPUI Undergraduate Research Opportunities Program, the Consortium for Urban Education to include relevant courses taught at five other Indianapolis colleges and universities, or may include specialized service learning experiences in consultation with the IUPUI Center for Public Service and Leadership.

Each individualized major student, in consultation with the program advisor, will select a faculty mentor that best fits the student's interests. Once assigned, the student will work with the faculty mentor to develop a plan of study outlining the proposed curriculum, which will be submitted to a faculty committee for approval. As progress is made on the approved curriculum, the student will be expected to maintain a journal of this progress. The journal will be reviewed periodically by the program advisor, faculty mentor, and faculty committee to ensure progress is made and to provide guidance for course enrollment.

Though not meant to be a definitive list, examples of interdisciplinary majors with an emphasis in the sciences include:

- Art Therapy
- Art Restoration and Preservation
- Geochemistry
- Chemical Science and Technology
- Music Therapy
- Neuroscience
- Physics of Music
- Scientific Writing

View the following information to learn more about Interdisciplinary Studies.

- Admissions and Curriculum
- Bachelor of Science

Admissions

All students admitted to the Interdisciplinary Studies Program must have a minimum GPA of 2.50 and meet existing admission requirements of the School of Science. A student may apply for admission to the Interdisciplinary Studies Program by enrolling in a 1-credit hour tutorial (SCI-I200) and preparing an in-depth proposal for an interdisciplinary studies major under the guidance of a faculty mentor who will function as the main program advisor for the student. The student is accepted for admission to the Interdisciplinary Studies Program when the faculty mentor and the Educational Policies Committee of the School of Science approve the student's proposal.

Before admission to the Interdisciplinary Studies Program, students must have completed a minimum of 15 credit hours of course work, but no more than 60 credit hours. The course work must include ENG-W131, a science course with lab, and an appropriate mathematics course. All science and mathematics courses on record must have minimum grades of C. Courses included in a specific interdisciplinary studies major may have prerequisites specified by the departments that offer them.

Curriculum

The curriculum for each interdisciplinary studies student will vary so as to meet the particular academic objective of the student. The interdisciplinary studies major areas of study will consist of a coherent set of courses that define a clearly recognizable focus of study for which faculty can provide oversight and ensure intellectual integrity and rigor. A faculty committee will approve all interdisciplinary study major areas, and each student in the program will work closely with a faculty mentor.

The interdisciplinary major will comprise 40 credit hours of regular courses from at least two disciplines, a 1-hour tutorial, and culminate with a 3- to 6-hour senior capstone project or internship. The tutorial will include the development of an in-depth proposal for the major and the regular submission of a journal on the progress in the major.

- A minimum of 124 credit hours distributed as follows
- General education (47 credits)
- Interdisciplinary major with courses from at least two disciplines (40 credits)
- Electives (37 credits)

- The 40 credit hours within the interdisciplinary major has the following framework:

1. SCI-I200 Tutorial in Interdisciplinary Studies (1 credit) includes the development of an in-depth proposal for the major and the submission of a journal on progress in the major
2. SCI-I494 (3-6 credits) Internship in Science-Based Fields or SCI-I495 (3-6 credits) Readings and Research in Science to address the senior capstone experience
3. 36 credit hours of courses from at least two disciplines defining the major area

Bachelor of Science Degree Requirements

For details on school specific policies, see the School of Science requirements under ''Undergraduate Programs" in this bulletin. Please note that at least 32 credit hours of course work must be at the 300 level or higher.

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI I120 Windows on Science (1 cr.), or an equivalent first-year experience course.

Area I English Composition and Communication Skills (9 cr.)

English Composition (6 cr.)

- ENG-W131 Elementary Composition I
- Second Composition Course that has ENG-W131 as a prerequisite

Speech Communication (3 cr.)
- COMM-R110 Fundamentals of Speech Communication

Area II Foreign Language

No foreign language proficiency is required for the Bachelor of Science degree. However, if knowledge of a foreign language is pertinent to the interdisciplinary major, a student may choose to pursue one.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.)

The information about the IIIA requirements in the School of Science part of this bulletin lists courses that may be used to satisfy the requirements below. Students should consult the program advisor before registering for these courses.

- HIST-H114 Western Civilization II
- List H course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List S course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.
- List C course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator (3 cr.)

No junior/senior integrator course is required.

Area IIIC Physical and Biological Sciences

See the School of Science requirements under "Undergraduate Programs" in this bulletin. Four courses outside the major from the physical/biological sciences, one of which must include a corresponding laboratory. Laboratory courses without a lecture component may be taken for credit, but do not count toward the four-course requirement. No grade below C- will be accepted in any of these courses. Consult the program advisor concerning the acceptability of courses.

Area IIID Mathematical Sciences (9 cr.)

- Two courses beyond algebra and trigonometry. (6 cr.)
- One course in computer science. (3 cr.)

No grade below C- will be accepted in any of these courses.

Note: Computer Science CSCI-N100 level courses and CIT 10600 do not count for credit toward any degree in the School of Science. Also, CSCI-N241 and CSCI-N299 do not count in Area IIID but may count as a general elective.

Area IV Interdisciplinary Major Concentration (40 cr.)

Minimum requirements include 40 credit hours of core interdisciplinary major courses.

All courses applicable to the major must have a minimum grade of C.

Other Requirements

1. SCI-I200 Tutorial in Interdisciplinary Studies (1 cr.) is a tutorial under the supervision of a faculty mentor to guide a student in the development of a proposal to pursue a specially focused, science-based, interdisciplinary major. The student-generated proposal must include justification for selecting the interdisciplinary major, a comprehensive plan of study that lists courses comprising the major and a timetable for completing the plan, rationale for coherence of the plan, and a description of future prospects in terms of graduate/professional study and/or career opportunities. The student will be required to consult faculty in the fields that encompass the interdisciplinary major. The proposal must be submitted for approval to the School of Science Educational Policies Committee, which has faculty representation from all departments in the school. Upon approval, the student will begin the program and maintain a journal detailing progress on the plan of study. The plan may be modified only in consultation with the faculty mentor and with approval of the Educational Policies Committee. The faculty mentor will determine the grade for the tutorial.
2. Interdisciplinary Major (36 credits)
3. The Senior Capstone Experience will be accomplished through either SCI-I494 Internship in Science-Based Fields (3-6 cr.) or SCI-I495 Readings and Research in Science (3-6 cr.). For a student choosing the internship experience, there must be a direct match to the interdisciplinary major in an industrial, business, government, or other suitable setting. The student's faculty mentor must approve the internship. A comprehensive written report of the internship experience is required. Alternatively, a student may be engaged in a research project under faculty oversight that links directly to the student's interdisciplinary major. The faculty mentor must approve the research project. The student is required to submit a detailed research report at the conclusion of the project.

Mathematical sciences include the areas of pure and applied mathematics, mathematics education, actuarial science, and statistics. Mathematics involves the study of problems in areas such as algebra, geometry, analysis, and logic and of problems arising in the real world. Mathematics, actuarial science and statistics are used in the physical sciences, engineering, the social, life, and management sciences. Mathematics education involves the training of prospective secondary teachers.

- Requirements
- Degree Programs
- Graduate
- Minor

Degree Programs

The department offers the Purdue University Bachelor of Science degree in mathematics with options in pure mathematics, applied mathematics, actuarial science, and secondary school teaching.

Graduate degrees offered include the Purdue University Master of Science, with concentrations in Pure Mathematics, Applied Mathematics, Mathematics Education, Applied Statistics, and the Purdue University Doctor of Philosophy in mathematics, by arrangement with Purdue University, West Lafayette, with all requirements completed on the IUPUI campus. In addition, together with the Division of Biostatistics in the Indiana University School of Medicine, the department administers and offers an Indiana University Doctor of Philosophy in Biostatistics, with all requirements completed on the IUPUI campus.

Bachelor of Science

Students are encouraged to declare a mathematics major in their freshman year, so they can receive proper academic advising. A grade point average of 2.50 with no grades below C in mathematics courses through MATH 35100 is a minimum indication of success in this major.

Degree Requirements

The baccalaureate degree general requirements, the area requirements are listed earlier in this bulletin (see the School of Science requirements under “Undergraduate Programs”). For a Bachelor of Science degree in mathematics, the following additional requirements and restrictions apply:

First-Year Experience Course

Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills

No additional requirements beyond School-level requirements, located under the School of Science requirements “Undergraduate Programs” in this bulletin. The second semester of English composition may be satisfied by ENG-W132 (or ENG-W150), ENG-W231, or TCM 32000.

Area II Foreign Language

All degree options require 5 credit hours in a modern foreign language.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.)

HIST-H114 Western Civilization II or HIST-H109 Perspectives on the World: 1800-Present

List H course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements “Undergraduate Programs” in this bulletin.

List S course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements “Undergraduate Programs” in this bulletin.

List C course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements “Undergraduate Programs” in this bulletin.

Area IIIB Junior/Senior Integrator

The Junior/Senior Integrator requirement is suspended indefinitely as a school-level requirement.

Area IIIC Physical and Biological Sciences

Refer to specific mathematics option major requirements for any additional Area IIIC course requirement.

Note: Certain courses, such as CHEM-C101, CHEM-C102, CHEM-C110; PHYS 10000, PHYS 20000, PHYS 21800, and PHYS 21900, may not be used to fulfill the science requirement, Area IIIC, of the School of Science.

If in doubt about a particular course, the student should consult a mathematics department advisor.

Area IIID Mathematical Sciences

See Area IV Major Requirements for required mathematics courses. Mathematics courses below MATH 16500 and those mathematics courses in which the student has received grades below C- do not count toward the degree. MATH-M118 will count as general elective.

The Area IIID computer science requirement must be in a higher-level programming course (not BASIC). A grade of C (2.0) or better is required.

Note: Computer Science CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV

Mathematics courses in which a student has received grades below C (2.0) do not count in Area IV. The Area IV requirements for the secondary area of concentration and the major for the four degree options—pure mathematics, applied mathematics, actuarial science, and secondary teaching—are described in the following sections. There is no single semester-by-semester plan of study for any of the options because flexibility is encouraged within the various programs. However, a sample program that shows one possible sequence of courses is given for each option.

Variations from the sample program should be made in consultation with the student's advisor. Because of the complexity of the requirements and because certain courses are not offered every semester, it is important that each student consult his or her assigned advisor as soon as possible in order to proceed through a proper plan of study for the chosen degree program. A minimum grade point average of 2.50 is required in all mathematics courses that count toward the major.

Area IV Secondary Area of Concentration Requirements

For each student to acquire some depth of study in a subject outside of the major area, the Department of Mathematical Sciences requires students to have a secondary area of concentration or minor outside of the department. The secondary area of concentration consists of at least 18 credit hours and includes at least three courses beyond the introductory level or a recognized minor from another department. It is subject to the approval of the student's advisor. Although a second area of concentration is usually in one department, it may be from two or more if the advisor approves.

Courses may be used for the double purpose of fulfilling the general requirements and for fulfilling the secondary area of concentration requirements of the Department of Mathematical Sciences. For students in the Pure Mathematics Option or the Applied Mathematics Option, a secondary area in one of the physical sciences or in a subject that makes substantial use of mathematics, such as computer science, engineering, or economics, is desirable. Students in the Secondary School Teaching Option satisfy the requirements for a secondary area by the courses they take to meet the professional education requirement. Students in the Actuarial Science Option satisfy the requirements for a secondary area by the required economics and business courses they take.

The requirement of 18 credit hours in a secondary area of concentration does not, by itself, constitute an official minor that would be acknowledged on the student's transcript. A minor must be offered through the department or school in which the minor is taken. Students in the Actuarial Science Option satisfy the requirements for a minor in economics by the economics courses they are required to take (Students must apply to the Economics Department to be awarded an official minor.).

Degree Requirements

Major Requirements

Pure Mathematics Option

With this option, students will be well prepared for graduate work in pure mathematics. However, students with undergraduate degrees in pure mathematics have also been successful with graduate studies in business administration, computer science, economics, educational research, engineering, law, medicine, operations research, physics, psychology, and statistics. Persons with advanced degrees in pure mathematics find careers primarily in college teaching, but careers in business, industry, or government service are also possible.

Courses taken to satisfy the Area IIIC requirements must include PHYS 15200 (or a more advanced physics course).

The Area IV major requirements are as follows:

1. Core curriculum: MATH 16500, MATH 16600, MATH 17100, MATH 26100, MATH 26600, and MATH 35100
2. MATH 45300 Beginning Abstract Algebra
3. MATH 46200 Elementary Differential Geometry
4. Two of the three: MATH 44400, MATH 42500, MATH 32101
5. Twelve (12) additional credit hours selected from MATH 27600, mathematics courses at the 300 level or above, and statistics courses numbered 35000 or higher. Courses in computer science or courses in other departments of the School of Science that have appropriate mathematical content may be selected with the approval of the advisor. Normally, no more than 6 credit hours will be approved outside of mathematics and statistics.
6. The 45 credit hours required above must include at least 6 credit hours in each of two of the course sequences listed below.
7. Minimum of two credit hours of MATH 49200 Capstone Experience

Course Sequences

Two course sequences (each course 3 credit hours) are required. There must be at least one * sequence. No overlaps are allowed.

- *Foundations of Analysis: MATH 44400 and MATH 44500
- *Biomathematics: Biomathematics course and STAT 35000 or higher
- *Complex Analysis and Differential Equations: MATH 42500 and MATH 52000
- *Abstract Algebra: MATH 45300 and MATH 45400
- *Algebra and Number Theory: MATH 45600 and MATH 45300
- *Linear Algebra: MATH 35100 and MATH 35300
- *Differential Geometry: MATH 46200 and MATH 56200
- *Topology: MATH 32101 and MATH 57100
- Probability and Statistics: Two statistical-type courses at the STAT 35000 level or higher, with advisor's approval
- Modeling: MATH 42100 and MATH 42600
- Numerical Analysis: MATH 41400 and CSCI 51500
- Scientific computing: CSCI 47500 and 47600[1]
- Theoretical computer science: CSCI 34000[1]

[1] Students are generally allowed to select only one of these two course sequences.

Pure Mathematics Option Sample Program (124 credits required)

Freshman Year

First Semester

Total	**14**

Applied Mathematics Option

Graduates with training in applied mathematics are employed in business, industry, and government. They would probably work as part of a team and would often need to communicate mathematical ideas to persons trained in other subjects. In many instances, they would need to formulate problems for solution on a computer and interpret the answers. Thus, besides a fundamental knowledge of mathematics, a knowledge of what computers can do is essential. This option is also good preparation for graduate study in applied mathematics, computer science, statistics, and engineering.

Courses taken to satisfy the Area IIIC requirements must include PHYS 15200 and PHYS 25100 (or more advanced physics courses).

The Area IV major requirements are as follows:

1. Core curriculum: MATH 16500, MATH 16600, MATH 17100, MATH 26100, MATH 26600, and MATH 35100
2. MATH 41400 Numerical Methods
3. Mathematical modeling: MATH 42600 Introduction to Applied Mathematics and MATH 42100 Linear Programming and Optimization Techniques
4. MATH 44400 Foundations of Analysis I
5. Twelve (12) additional credit hours selected from MATH 27600 and mathematics courses at the 300 level or above and statistics courses numbered 35000 or higher. Courses in computer science or courses in other departments of the School of Science that have appropriate mathematical content may be selected with the approval of the advisor. Normally, no more

than 6 credit hours outside of mathematics and statistics will be approved.

6. The 45 credit hours of courses required above must include at least 6 credit hours in each of two of the course sequences listed below. Students planning on attending graduate school in mathematics are advised to take MATH 44500.
7. Minimum of two credit hours of MATH 49200 Capstone Experience

Course Sequences

Two course sequences (each course 3 credit hours) are required. There must be at least one * sequence. No overlaps are allowed.

- *Differential Equations: MATH 52000 and MATH 52200
- *Biomathematics: Biomathematics course and STAT 35000 or higher
- Foundations of Analysis: MATH 44400 and MATH 44500
- Complex Analysis and Differential Equations: MATH 42500 and MATH 52000
- Abstract Algebra: MATH 45300 and MATH 45400
- Algebra and Number Theory: MATH 45600 and MATH 45300
- Linear Algebra: MATH 35100 and MATH 35300
- Differential Geometry: MATH 46200 and MATH 56200
- *Probability and Statistics: Two statistical-type courses at the STAT 35000 level or higher, with advisor's approval
- *Modeling: MATH 42100 and MATH 42600
- *Numerical Analysis: MATH 41400 and CSCI 51500
- *Scientific computing: CSCI 47500 and 47600[2]
- *Theoretical computer science: CSCI 34000 and 48400[2]

[2]Students are generally allowed to select only one of these two course sequences.

Applied Mathematics Option Sample Program (124 credits required)

Freshman Year

First Semester	
MATH 16500 Analytic Geometry and Calculus I	4

Actuarial Science Option

The Actuarial Science Option for mathematics majors will provide students with the strong background in mathematics, statistics, and economics necessary to analyze financial risks. This concentration aims to prepare students for the first three actuarial examinations administered by the professional actuarial organizations. The secondary area of concentration for students in this option is fulfilled by required courses in business and economics.

Actuarial science deals with the analysis of financial consequences of risk. Actuaries are highly trained professionals, well versed in mathematical, statistical, and economic techniques that enable them to evaluate financial risk of uncertain future events, especially those pertaining to health care, insurance, and pension plans. Actuaries answer risk-related questions by developing, implementing, and interpreting sophisticated mathematical models.

Courses taken to satisfy Area IIIC requirements must include PHYS 15200 (or a more advanced physics course).

The Area IV major requirements are as follows:

1. Core Curriculum: MATH 16500, MATH 16600, MATH 17100, MATH 26100, MATH 26600, and MATH 35100
2. ECON-S201, ECON-E202 or ECON-S202, ECON-E305, ECON-E321, ECON-E322
3. BUS-A200, BUS-F300, BUS-F305
4. MATH 37300 Mathematical Finance
5. Mathematical Modeling: MATH 42600 Introduction to Applied Mathematics or MATH 42100 Linear Programming and Optimization Techniques
6. STAT 41600 Probability and STAT 41700 Statistical Theory
7. Actuarial Models: STAT 47200 and STAT 47300
8. Two credit hour or three credit hour STAT elective at the 300 level or above (not STAT 30100, 30200, or 31100) Suggested course: STAT 37100 (Prep for Actuarial Exam 1)
9. Three credit hour MATH or STAT course selected from MATH 27600 and mathematics and statistics courses at the 300 level or above (not STAT 30100, 30200, or 31100). Suggested course: STAT 35000 Introduction to Statistics
10. Two or three credit hours of MATH 49200 Capstone Experience

Secondary School Teaching Option

Students who wish to teach in secondary schools must meet the requirements for teacher certification in the state in which they expect to teach. Interested persons can obtain these requirements by writing to the Department of Public Instruction, Certification Office, in the capital city of any state.

To satisfy Indiana law, a student should have 40 credit hours in general education courses and a specified core of professional education courses as part of the requirement for a teaching license. Students should be sure to see an advisor to ensure that these hours are properly distributed and that the professional education requirements are met.

Courses taken to satisfy the Area IIIC requirements must include PHYS 15200 (or a more advanced physics course).

The Area IV major requirements are as follows:

1. Core curriculum: MATH 16500, MATH 16600, MATH 17100, MATH 26100, MATH 26600, and MATH 35100
2. MATH 27600 Discrete Math
3. MATH 30000 Logic and the Foundations of Algebra
4. MATH 45300 Abstract Algebra
5. MATH 46300 Intermediate Euclidean Geometry for Secondary Teachers
6. Probability and statistics: STAT 35000
7. MATH 58300 History of Elementary Mathematics
8. EDUC M457 Methods of Teaching Senior High/Junior High/Middle School Mathematics

Graduate Programs

The Department of Mathematical Sciences offers graduate training leading to the Purdue University Master of Science degree in Mathematics, with concentrations in pure mathematics, applied mathematics, math education, and applied statistics. By arrangement with Purdue University, West Lafayette, qualified students may also pursue a Ph.D. in Mathematics. Together with the Division of Biostatistics in the Indiana University School of Medicine, the department also administers and offers an Indiana University Ph.D. in Biostatistics. Requirements for both Ph.D. programs are completed entirely on the IUPUI campus. The M.S. degree requires two years of full-time study, and the Ph.D. typically requires two to three additional years of full-time study.

Admission Requirements

Students entering a graduate program in mathematics should have completed an undergraduate program containing as many courses as possible in abstract algebra, linear algebra, advanced calculus, differential equations, logic and foundations, and probability.

Students entering the graduate program in applied mathematics should have completed an undergraduate program in mathematics or in engineering or physical sciences that was strongly oriented toward mathematics.

Students entering the master's program in applied statistics must have a bachelor's degree from an accredited institution. The minimal mathematics requirement for admission to this program includes an undergraduate sequence in univariate and multivariate calculus (equivalent to MATH 16500, MATH 16600, MATH 26100) and one course in linear algebra (equivalent to MATH 35100). Prospective applicants who do not have this background must acquire it prior to admission to the program.

Students entering the graduate program in biostatistics must have a suitable bachelor's or master's degree from an accredited institution and shows promise for successfully completing all the degree requirements. In addition to satisfying general Indiana University Graduate School requirements for admission, applicants must have at least a B (3.00 GPA) in courses required as prerequisites for the program. The minimal mathematics background consists of an undergaduate course sequence in univariate and multivariate calculus (equivalent to MATH 16500, MATH 16600 and MATH 26100) and a course in linear algebra (equivalent to MATH 35100). In addition, applicants should have had a calculus-based undergraduate level course in probability or statistics. Prospective applicants who do not have this background must acquire it prior to admission to the program.

Application for Admission

Students who wish to pursue an advanced degree in the Department of Mathematical Sciences should complete an online application available from the department's web site at www.math.iupui.edu. For Ph.D. mathematics applicants, the GRE general score is required. For PhD biostatistics applicants, the GRE general test is required. Students for whom English is not their native language and who have not completed a post-secondary degree program from an English-speaking university within the past two years must submit TOEFL scores. While this application is being processed, the student may enter IUPUI as a graduate nondegree student. No more than 12 hours of credit earned under this classification may be applied toward an advanced degree. Those who do not want to pursue an advanced degree, but who desire to take graduate courses for personal improvement, may also take courses under the graduate nondegree classification.

Transfer Credit

The Department of Mathematical Sciences will accept by transfer a maximum of 12 hours of graduate credit, in excess of undergraduate degree requirements, from approved institutions. Transfer credit must be approved by the student's faculty advisor.

Assistantships and Fellowships

Financial support is available to qualified students in the form of university fellowships, school fellowships, graduate teaching assistantships, and research assistantships. Additional summer appointments may be available for students whose performance in course work and assistantship duties is satisfactory.

English Requirements

All advanced degree candidates are required to demonstrate acceptable proficiency in English composition.

Students for whom English is not their native language must take the EAP exam administered by the IUPUI English for Academic Purposes program. Students not scoring high enough will be required to take designated courses in English while pursuing their graduate studies.

Master of Science (Pure and Applied Mathematics Concentrations)

A minimum of 30 credit hours of course work is required for an M.S. degree. Course grades must be A or B with the possible exception of at most two grades of C. Neither a thesis nor a comprehensive examination is required. Several core courses are specific to an M.S. plan of study and vary according to the student's interest in (a) pure mathematics with a Ph.D. objective, (b) pure mathematics without a Ph.D. objective, (c) applied mathematics with a Ph.D. objective, or (d) applied mathematics without a Ph.D. objective. The remaining courses are selected by the student and his or her advisory committee.

Master of Science (Mathematics Education Concentration)

This non-thesis program requires a minimum of 30 credit hours of coursework and is tailored for secondary school teachers and students who are preparing to become secondary school teachers. Core requirements include a course in geometry, a course in algebra, a course in analysis, a course in modeling/differential equations, and a course in probability. (See the Department of Mathematical Sciences for a more complete description of this program.) Course grades must be A or B with the possible exception of at most two grades of C.

Master of Science (Applied Statistics Concentration)

The Master of Science degree with a concentration in Applied Statistics consists of a minimum of 30 credit hours. Course grades must be A or B with the possible exception of at most two grades of C. Candidates for this degree may choose either the thesis option or the non-thesis option. Both options require 15 credit hours in the core curriculum consisting of STAT 51200, STAT 51400, STAT 51900, STAT 52400, and STAT 52800. A combined written and oral final examination is required.

The non-thesis option consists of 15 credit hours beyond the core curriculum, at least 9 of which must be statistics (STAT) courses. The remaining courses may be taken in mathematics or in areas relevant to statistical applications, subject to approval of the academic advisor.

The thesis option requires a thesis worth 6 credit hours on a topic approved by the student's academic advisor. At least 6 of the remaining 9 credit hours must be taken in statistics or in a subject related to statistical applications that have been approved by the advisor. An oral defense of the thesis is required.

Doctor of Philosophy (Mathematics)

By arrangement with Purdue University, West Lafayette, qualified students may pursue a Ph.D. in Mathematics, with all requirements completed on the IUPUI campus. To be admitted to candidacy for the Ph.D. degree, the student must fulfilll the following require-ments and must be accepted by the graduate committee of the Department of Mathematical Sciences.

Requirements

- The student must pass a suite of four qualifying exams. They must select at least two out of four subject areas from the Core 4 with at least one being either Real Analysis (MATH 54400) or Abstract Algebra (MATH 55300). They must also pass two additional exams from either the remaining Core 4 or the Area Exams.
- The student must satisfy, by one of the five options approved by the graduate school, the foreign language requirement in German, Russian, or French.
- The student must submit to the graduate school through the department a plan of study including at least 42 credit hours of approved Purdue University graduate coursework.
- The student must pass an advanced topics examination. This examination may be taken only by students who have already passed the qualifying examinations.

A candidate will be recommended to the faculty to receive the Ph.D. degree after a dissertation, submitted in final form, has been accepted by the advisory committee and successfully defended before an open colloquium or seminar.

The department has set time limits for completion of the Ph.D. degree.

Doctor of Philosophy (Biostatistics)

Together with the Department of Biostatistics and the Department of Public Health in the Indiana University School of Medicine, the Department of Mathematical Sciences offers graduating training leading to a Ph.D. in Biostatistics from Indiana University, with all requirements completed on the IUPUI campus. To be admitted to candidacy for the Ph.D. degree, the student must fulfill the following requirements.

Requirements

- The student must pass an initial qualifying examination on the five core courses: STAT 51900, STAT 52500, STAT 52800, STAT 53600, and BIOS-S546.
- The student must complete at least 45 credit hours of formal coursework, consisting of 33 credit hours of

required courses and additional 12 credit hours in elective statistics/biostatistics courses of which six credit hours must be at the 600 level and above. An additional 42 credit hours are required and will consist of coursework in a minor area (minimum of 12 credits), further elective courses, independent studies, and directed Ph.D. dissertation research.
- The student must pass a preliminary oral examination, which consists of an oral presentation on an advanced research topic.

A candidate will be recommended to the faculty to receive the Ph.D. degree after a dissertation, submitted in final form, has been accepted by the advisory committee and successfully defended before an open colloquium or seminar.

The department has set time limits for the completion of the Ph.D. degree.

Minor in Mathematical Sciiences

An undergraduate minor in mathematics is useful in many fields. A scientist or engineer may need knowledge of differential equations and linear algebra, while someone in business or a social science may need a background in probability or statistics.

Requirements

1. The calculus sequence MATH 16500, MATH 16600, MATH 17100, and MATH 26100 (15 cr.)
2. Two additional courses selected from mathematics courses numbered MATH 26600 or higher or from statistics courses numbered STAT 35000 or higher
3. Nine (9) credit hours of the minor must be completed at IUPUI.
4. The grade in each course submitted for the minor must be C (2.0) or higher.

Correspondence courses may not be used to fulfill requirements for the minor.

- **Associate Professor Emeritus** Kleinhans, Seubert
- **Associate Professors** Decca, Gavrin (*Chair*), Wassall
- **Assistant Professors** Cheng, Joglekar, Luo, Petrache, Zhu
- **Lecturers** Rhoads, Ross, Woodahl
- **Departmental Academic Advisor** Park

Physics is the study of matter and energy, from the smallest scale, as in the study of elementary particles, to the largest, as in the study of the formation and evolution of stars and galaxies. In this sense, physics is the science that underlies all of the other sciences. In principle, as well as in practice, physics is involved in virtually all scientific and technical endeavors (e.g., biophysics, geophysics, health physics, etc.).

Physicists tend to view themselves primarily as solvers of problems, especially problems that can be expressed in mathematical terms. Physics students are trained to solve complex problems by learning to analyze complex relations in mathematical terms, often with the help of today's fast computers. Because of this broadly based and flexible problem-solving background, physics graduates find employment in a variety of fields, many of which are not directly associated with physics.

The Department of Physics offers a program leading to a Bachelor of Science degree from Purdue University. In addition, the department offers courses in physics and astronomy for nonmajors. The department also offers graduate courses that lead to a Purdue Master of Science degree. Qualified students may be authorized to pursue the Ph.D. degree in physics at IUPUI in areas where a program has been arranged with Purdue, West Lafayette.

Members of the department conduct research in several disciplines of physics and participate in joint projects with a number of other research groups, such as the Indianapolis Center for Advanced Research and the IU School of Medicine. Student participation in these projects is welcomed and encouraged.

Students majoring in physics consolidate their undergraduate studies by putting what they have learned to use in a capstone experience in one of the department's research laboratories. Each student joins a faculty member in a project that provides experience in a professional setting. The student must obtain the approval of a faculty member and register for PHYS 49000.

Guide to Service Courses

Each student should consult an advisor in the department in which a degree is sought to determine which service course is appropriate. A general guide to the schools served by these courses is as follows:

- AST-A100 / AST-A105: General science courses for students in all majors.
- AST-A130: Focused short courses for students in all majors.
- PHYS 14000: Focused short courses for students in all majors.
- PHYS 10000: For students in allied health, business, and liberal arts (a traditional survey course).
- PHYS 20000: For students in education, SPEA, and liberal arts (a nontraditional course).
- PHYS 21800 / PHYS 21900: A noncalculus sequence for technology students.
- PHYS-P201 / PHYS-P202: A noncalculus sequence for preprofessional students.
- PHYS 15200 / PHYS 25100 / PHYS 34200: For students in science and engineering requiring a calculus-based sequence.

- Bachelor of Science
- Bachelor of Science-Biophysics Option
- Plan of Study
- Graduate Program
- Minor

Bachelor of Science

Degree Requirements

First-Year Experience Course Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills

Minimum requirements for the School of Science are given in this bulletin (see the School of Science requirements under "Undergraduate Programs"). The second semester of English composition may be satisfied only with ENG-W132 (or ENG-W150), ENG-W231, ENG-W250, ENG-W290, ENG-W331, ENG-W350, TCM 22000, or TCM 32000.

Area II Foreign Language

No foreign language proficiency is required for a Bachelor of Science degree.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.)

HIST-H114 Western Civilization II or HIST-H109 Perspectives on the World: 1800-Present

List H course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

List S course: Choose one course (3cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

List C course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator

The School of Science has indefinitely suspended the Junior/Senior Integrator requirement. The Department of Physics has chosen to allow physics majors to satisfy the three credit hours with a course decided upon in consultation with their physics advisor. This course might be outside physics, but can be satisfied with a physics course. For additional information, please consult your academic advisor.

Area IIIC Physical and Biological Sciences

Minimum requirements for the School of Science are given in this bulletin (see the School of Science requirements under "Undergraduate Programs").

Courses must include CHEM-C105 / CHEM-C125 and CHEM-C106 / CHEM-C126 with laboratory or their approved equivalent.

Area IIID Mathematical Sciences

Minimum requirements for the School of Science are given in this bulletin (see the School of Science requirements under "Undergraduate Programs").

Twenty-four (24) credit hours of courses in mathematics are required, which must include MATH 16500, MATH 16600, MATH 17100, MATH 26100 and MATH 26600.

The computer science requirement of the School of Science may be satisfied with CSCI 23000, CSCI-N305, CSCI-N331, or any higher-level CSCI course.

Note: Computer Science CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV Physics Concentration

The Department of Physics offers four options for students pursuing the Bachelor of Science degree: a traditional physics program; a biophysics option; a program designed for students planning a career in physics teaching; an accelerated program with a B.S. in physics and a B.S. in electrical engineering; and an accelerated program known as the BPMME program because students earn both a bachelor's in physics and a master's in mechanical engineering.

Students pursuing the traditional program must complete PHYS 15200, PHYS 25100, PHYS 30000, PHYS 31000, PHYS 33000, PHYS 34200, PHYS 35300, PHYS 40000, PHYS 40100, PHYS 41600, PHYS 44200, and PHYS 49000. These students must complete 6 hours of mathematics above the level of MATH 26600 in courses approved by the Department of Physics.

Students pursuing the biophysics option must complete: Introductory course sequence PHYS-P201 or PHYS 15200, PHYS-P202 or PHYS 25100; two of the following three: PHYS PHYS 30000, PHYS 31000, PHYS 33000; Complete PHYS 34200, 35300, PHYS 44200, and PHYS 49000 (Biophysics Capstone). In addition, a minimum of 15 credit hours of biology and 23 credit hours of chemistry is required.

Students pursuing the teaching option must complete: PHYS 15200, PHYS 25100, PHYS 30000, PHYS 31000, PHYS 33000, PHYS 34200, PHYS 35300, and PHYS 49000. The Department of Physics may substitute other science courses for the 400-level courses and recommend education courses in order to meet teacher certification requirements. These students must complete 6 hours of mathematics above the level of MATH 26600 in courses approved by the Department of Physics.

Students pursuing the program in physics and mechanical engineering must complete: PHYS 15200,PHYS 25100,PHYS 31000,PHYS 33000,PHYS 34200,PHYS 35300, and PHYS 41600. These students must complete 3 hours of mathematics above the level of MATH 26600 in courses approved by the Department of Physics. Students in this program must satisfy additional requirements specified by the Department of Mechanical Engineering.

Unless approved as part of the major, note that all courses taken outside the Schools of Science and Liberal Arts must receive approval from the student's major department and the School of Science Academic Dean's Office. Consult with your major department or the School of Science Academic Dean's Office for additional course restrictions.

No more than 6 credit hours of studio, clinical, athletic, or performing arts courses will be approved. See the departmental advisor for details.

Biophysics Option

For students who desire an interdisciplinary knowledge of physics and biology pursuant to a career in medicine or biophysics. The program meets typical medical school entrance requirements.

Degree Requirements

First-Year Experience Course
Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Area I English Composition and Communication Skills
Minimum requirements for the School of Science are given in this bulletin (see the School of Science requirements under "Undergraduate Programs"). The second semester of English composition may be satisfied only with ENG-W132 (or ENG-W150), ENG-W231, ENG-W250, ENG-W290, ENG-W331, ENG-W350, TCM 22000, or TCM 32000.

Area II Foreign Language
No foreign language proficiency is required for a Bachelor of Science degree.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures (12 cr.)
HIST-H114 Western Civilization II or HIST-H109 Perspectives on the World: 1800-Present

List H course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

List S course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

List C course: Choose one course (3 cr.) from this list. The list of course choices is located under the School of Science requirements "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator
The School of Science has indefinitely suspended the Junior/Senior Integrator requirement. The Department of Physics has chosen to allow physics majors to satisfy the three credit hours with a course decided upon in consultation with their physics advisor. This course might be outside physics, but can be satisfied with a physics course. For additional information, please consult your academic advisor.

Area IIIC Physical and Biological Sciences
See requirements listed below under Area IV Physics (Biophysics) Concentration Requirements.

Area IIID Mathematical Sciences
Eighteen (18) credit hours of courses in mathematics are required, which must include MATH 16500, MATH 16600, MATH 17100, MATH 26100, and MATH 26600.

The computer science requirement of the School of Science may be satisfied with CSCI 23000, CSCI-N305, CSCI-N331, or any higher-level CSCI course.

Note: Computer Science CSCI-N241 and CSCI-N299 do not count in Area IIID, but may count as a general elective.

Area IV Physics (Biophysics) Concentration Requirements

Physics: A minimum of 26 hours of physics is required.

- PHYS-P201 or PHYS 15200 and PHYS-P202 or PHYS 25100 (Introductory Physics).
- Two of the following three courses: PHYS 30000 Intro to Elementary Mathematical Physics, PHYS 31000 Intermediate Mechanics, PHYS 33000 Intermediate Electricity and Magnetism.
- PHYS 34200 Modern Physics and PHYS 35300 Electronics Laboratory, PHYS 44200 Quantum Mechanics, and PHYS 49000 Physics (Biophysics) Capstone experience (3 cr.)

Biology: A minimum of 15 credit hours of biology is required.

- General Biology: BIOL-K101 and BIOL-K103.
- Five additional hours of biology drawn from BIOL-K324 / BIOL-K325 Cell Biology and Lab, or BIOL-K356 / BIOL-K357 Microbiology and Lab, or BIOL-K483 Biological Chemistry and BIOL-K484 Cellular Biochemistry.

Chemistry: A minimum of 23 credit hours of chemistry is required.

- General Chemistry: CHEM-C105 / CHEM-C125 and CHEM-C106 / CHEM-C126.
- Organic Chemistry: CHEM-C341 / CHEM-C343 and CHEM-C342 / CHEM-C344.
- Physical Chemistry: CHEM-C360 or CHEM-C361.

Unless approved as part of the major, note that all courses taken outside the Schools of Science and Liberal Arts must receive approval from the student's major department and the School of Science Academic Dean's Office. Consult with your major department or the School of Science Academic Dean's Office for additional course restrictions.

No more than 6 credit hours of clinical, athletic, or performing arts courses will be approved. See the departmental advisor for details.

Plans of Study

Bachelor of Science Sample Program (124 cr. required)

The Department of Physics recommends the following sample program leading to the degree of Bachelor of Science.

Freshman Year

First Semester	
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
MATH 16500 Analytic Geometry and Calculus I	4
MATH 17100 Multidimensional Mathematics	3
SCI-I120 Windows on Science	1
ENG-W131 Elementary Composition I	3
Total	**16**
Second Semester	
PHYS 15200 Mechanics	4
CHEM-C106 Principles of Chemistry II	3
CHEM-C126 Experimental Chemistry II	2

MATH 16600 Analytic Geometry and Calculus II	4
Second Composition Course	3
Total	**16**

Sophomore Year

Third Semester	
PHYS 25100 Heat Electricity and Optics	5
MATH 26100 Multivariate Calculus	4
CSCI course	3-4
HIST-H114 History of Western Civilization II or HIST-H109 Perspectives on the World: 1800 to Present	3
Total	**15-16**
Fourth Semester	
PHYS 30000 Mathematical Physics	3
PHYS 34200 Modern Physics	3
MATH 26600 Ordinary Differential Equations	3
COMM-R110 Fundamentals of Speech Communication	3
One course from List H, S, or C	3
Total	**15**

Junior Year

Fifth Semester	
PHYS 31000 Intermediate Mechanics	4
MATH Course	3
One course from remaining two lists H, S, or C	3
One course from the remaining List H, S, or C	3
Elective	3
Total	**16**
Sixth Semester	
PHYS 33000 Intermediate Electricity and Magnetism	3
PHYS 35300 Electronics Laboratory	2
MATH Course	3
Physical or Biological Science Elective	3
Junior/Senior Integrator course	3
Elective	3
Total	**17**

Senior Year

Seventh Semester	
PHYS 40000 Physical Optics	3
PHYS 40100 Physical Optics Laboratory	2
PHYS 44200 Quantum Mechanics	3
Physical or Biological Science Elective	3
Elective	3
Total	**14**
Eighth Semester	
PHYS 41600 Thermal Physics	3
PHYS 49000 Capstone Experience	1-3
Electives	8-10
CAND 99100 Candidate for Graduation	0
Total	**12-16**

Biophysics Option Sample Program (minimum 124 cr. required)

Freshman Year

First Semester	
PHYS-P201 General Physics I	5
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
MATH 16500 Analytic Geometry and Calculus I	4
SCI-I120 Windows on Science	1
Total	**15**
Second Semester	
PHYS-P202 General Physics II	5
CHEM-C106 Principles of Chemistry II	3
CHEM-C126 Experimental Chemistry II	2
MATH 16600 Analytic Geometry and Calculus II	4
MATH 17100 Multidimensional Mathematics	3
Total	**17**

Sophomore Year

Third Semester	
BIOL-K101 Concepts of Biology I	5
CHEM-C341 Organic Chemistry I	3
CHEM-C343 Organic Chemistry Laboratory I	2

MATH 26100 Multivariate Calculus	4
ENG-W131 Elementary Composition I	3
Total	**17**
Fourth Semester	
PHYS 30000 Mathematical Physics	3
BOIL-K103 Concepts of Biology II	5
CHEM-C342 Organic Chemistry II	3
CHEM-C344 Organic Chemistry Laboratory II	2
MATH 26600 Ordinary Differential Equations	3
Total	**16**

Junior Year

Fifth Semester	
PHYS 31000 Intermediate Mechanics	4
BIOL-K324 Cell Biology	3
BIOL-K325 Cell Biology Laboratory	2
CSCI Course	3-4
HIST-H114 History of Western Civilization II or HIST-H109 Perspectives on the World: 1800 to Present	3
Total	**15-16**
Sixth Semester	
PHYS 34200 Modern Physics	3
PHYS 35300 Electronics Laboratory	2
CHEM-C360 Physical Chemistry	3
Second composition course	3
One course from List H, S, or C	3
Elective	2
Total	**16**

Senior Year

Seventh Semester	
PHYS 44200 Quantum Mechanics	3
PHYS 49000 Capstone Experience	3
One course from remaining two Lists H, S, or C	3
Junior/Senior Integrator course	3
Elective	3
Total	**15**
Eighth Semester	
COMM-R110 Fundamentals of Speech Communication	3
One course from remaining List H, S, or C	3
Electives	8
CAND 99100 Candidate for Graduation	0
Total	**14**

Bachelor of Science in Physics and Electrical Engineering Sample Program (139 cr. required)

The Department of Physics recommends the following sample program for students pursuing the program.

Freshman Year

First Semester	
SCI-I120 Windows on Science or ENGR 19500 Introduction to the Engineering Profession	1
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
MATH 16500 Analytic Geometry and Calculus I	4
MATH 17100 Multidimensional Mathematics	3
ENG-W131 Elementary Composition I	3
Total	**16**
Second Semester	
PHYS 15200 Mechanics	4
CHEM-C106 Principles of Chemistry II	3
CHEM-C126 Experimental Chemistry II	2
MATH 16600 Analytic Geometry and Calculus II	4
One course from List H, S, or C	3
Total	**16**

Summer 1 Term	
HIST-H114 History of Western Civilization II or HIST-H109 Perspectives on the World: 1800 to Present	3
Total	**3**
Summer 2 Term	
One course from remaining two lists H, S, or C	3
Total	**3**

Sophomore Year

Third Semester	
PHYS 25100 Heat Electricity and Optics	5
MATH 26100 Multivariate Calculus	4
CSCI 23000 Computing I	4
ECE 20100 Linear circuit analysis I	3
ECE 207 Electronic Measurement Techniques	1
ENGR 297 Computer Tools for Engineering	1
Total	**18**
Fourth Semester	
PHYS 34200 Modern Physics	3
MATH 26600 Ordinary Differential Equations	3
ECE 20200 Circuit Analysis II	3
ECE 20800 Electronic Design and Devices lab	1
ECE 27000 Digital Logic with lab	4
ECE 25500 Introduction to Electronic Analysis and Design	3
Total	**17**

Junior Year

Fifth Semester	
PHYS 31000 Intermediate Mechanics	4
MATH 35100 Elementary Linear Algebra or MATH 51100 Linear Algebra with Applications	3
ECE 30100 Signals and Systems	3
ECE 36200 Microprocessor Systems and Interfacing	4
One course from the remaining List H, S, or C	3
Total	**15**
Sixth Semester	
PHYS 33000 Intermediate Electricity and Magnetism	3
PHYS 35300 Electronics Laboratory	2
ECE 30200 Probabilistic Methods in Electrical Engineering	3
ECE 38200 Feedback Systems Analysis	3
TCM 32000 Written Communication in Science and Industry	3
General Education Elective	3
Total	**16**

Senior Year

Seventh Semester	
PHYS 40000 Physical Optics	3
PHYS 40100 Physical Optics Laboratory	2
PHYS 44200 Quantum Mechanics	3
ECE 40000 Senior Seminar	1
ECE 44000 Introduction to Comm. Systems Analysis	4
ECE Elective	3
Total	**15**
Eighth Semester	
PHYS 41600 Thermal Physics	3
ECE 40100 Ethics	1
ECE 49200 Senior Design	3
ECE Elective	3
COMM-R110 Fundamentals of Speech Communication	3
CAND 99100 Candidate for Graduation	0
Total	**14**

Bachelor of Science and Master of Science (BPMME) Sample Program (142 cr. required)

The Department of Physics recommends the following sample program for students pursuing the BPMME program.

Freshman Year

First Semester	
CHEM-C105 Principles of Chemistry I	3
CHEM-C125 Experimental Chemistry I	2
MATH 16500 Analytic Geometry and Calculus I	4
MATH 17100 Multidimensional Mathematics	3
SCI-I120 Windows on Science	1
ENG-W131 Elementary Composition I	3
Total	**16**
Second Semester	
PHYS 15200 Mechanics	4
CHEM-C106 Principles of Chemistry II	3
CHEM-C126 Experimental Chemistry II	2
MATH 16600 Analytic Geometry and Calculus II	4
Second composition course	3

Total	**16**

Summer Term	
Two courses from Lists H, S, or C	6
Total	**6**

Sophomore Year

Third Semester	
PHYS 25100 Heat Electricity and Optics	5
MATH 26100 Multivariate Calculus	4
CSCI Course	4
HIST-H114 History of Western Civilization II or HIST-H109 Perspectives on the World: 1800 to Present	3
Total	**16**
Fourth Semester	
PHYS 33000 Intermediate Electricity and Magnetism	3
PHYS 34200 Modern Physics	3
PHYS 35300 Electronics Laboratory	2
MATH 26600 Ordinary Differential Equations	3
COMM R110 Fundamentals of Speech Communication	3
Elective	3
Total	**17**

Summer Term	
One course from the Lists H, S, or C	3
Total	**3**

Junior Year

Fifth Semester	
PHYS 31000 Intermediate Mechanics	4
ME 27200 Mechanics of Materials	4
ME 33000 Modeling and Analysis of Dynamic Systems	3
Physical or biological science elective	5
Total	**16**
Sixth Semester	
PHYS 41600 Thermal Physics	3
ME 46200 Engineering Design	4
MATH Course	3
Physical or Biological Science Elective	3
Junior/Senior Integrator Course	3
Total	**16**

Senior Year

Seventh Semester	
ME 500-level ME primary area course	3
Elective: 400 or 500 level Engineering or Physics	3
MATH 53700 Applied Mathematics for Sci. & Eng I	3
Total	**9**
Eighth Semester	
ME 500-level ME primary area course	3
Elective: 400 or 500 level Engineering or Physics	3
MATH 53800 Applied Mathematics for Sci. & Eng II	3
Total	**9**

Fifth Year

Ninth Semester	
PHYS 55000 Introduction to Quantum Mechanics	3
ME 500-level ME primary area course	3
ME 500-level ME primary area course	3
Total	**9**
Tenth Semester	
ME 69800 (thesis option) or ME 500-level ME primary/related area course	3
ME 69800 (thesis option) or ME 500-level ME primary/related area course	3
Science Elective: Graduate PHYS or MATH course	3
CAND 99100 Candidate for Graduation (with B.S. in Physics)	0
CAND 99100 Candidate for Graduation (with an M.S. in ME)	0
Total	**9**

Science Electives (5th and 6th semesters) may be replaced by engineering courses with departmental approval.

Consult the Department of Mechanical Engineering Master's Program Handbook (2010-2012) for ME primary and related courses.

Graduate Programs

Graduate Program

The Department of Physics offers graduate programs leading to Purdue University Master of Science and Doctor of Philosophy degrees. For master's degree students, both thesis and nonthesis options are available.

Admission Requirements

Students who seek enrollment in the physics graduate program should have a baccalaureate degree from an accredited institution and have a background in the usual undergraduate courses in physics, mathematics, and other sciences. An average grade point average of 3.0 (B) or higher in physics courses is expected. Graduates from related fields of study in pure and applied science or engineering may be accepted on a probationary basis until they have completed any necessary undergraduate courses in physics. The Graduate Record Examination (GRE) is normally expected of all applicants. The GRE physics test is recommended, but not required.

Transfer Credit

The Department of Physics will normally accept, from approved institutions, a maximum of 6 transfer hours of graduate credit that are in excess of undergraduate degree requirements.

Application for Admission

Application materials and information can be obtained online at www.physics.iupui.edu or by writing to the chairperson of the graduate committee, IUPUI Department of Physics, Science Building, LD 154, 402 N. Blackford Street, Indianapolis, IN 46202-3273; phone (317) 274-6900. While the application is being processed, it is possible to enter IUPUI as a temporary graduate student. Generally, only 12 hours of credit earned under this classification may be counted toward an advanced degree.

Financial Assistance

Most physics graduate students receive financial support. Types of support available include teaching and research assistantships, fellowships, and tuition remission.

Master of Science

The general requirements include admission to regular graduate status, completion of the English requirement, a passing score on the Physics Qualifying Examination, satisfactory completion of an approved plan of study, and 30 hours of graduate credit as outlined below.

The English requirement for candidates whose native language is English is satisfied by having no undergraduate grades below B in English composition or by scoring 600 or higher on the Verbal Aptitude Section of the Graduate Record Examination. Students who do not satisfy the English requirement by either of the above methods may take a written examination administered by the Department of English to demonstrate their proficiency. Students whose native language is not English must pass the TOEFL examination with a grade of 550 or higher and take a diagnostic test when they arrive at IUPUI. The score on this test will determine what English courses are required.

The Physics Qualifying Examination is administered throughout the Purdue graduate system and must be taken, at the latest, after completing the introductory graduate courses. Two attempts are permitted to obtain a passing grade.

The student's plan of study is worked out in cooperation with the student's graduate advisor and committee. It must be submitted and accepted by the graduate school no later than the semester before the one in which the student plans to graduate. The English requirement must be satisfied before the plan of study may be filed.

The master's degree requires the satisfactory completion of 30 credit hours of course work at the 500 and 600 level. Twenty-four (24) credit hours must be in physics and biophysics, including one laboratory course. In the thesis option, 6 of the physics credit hours will be earned by enrolling in PHYS 69800 Research M.S. Thesis. This option requires a written thesis. In the nonthesis option, 6 of the physics credit hours will typically be earned through enrollment in PHYS 59000 Reading and Research. This option requires a written report. Six (6) credit hours must be in mathematics, which may be replaced in part by PHYS 60000 Methods of Theoretical Physics. The grade requirements are A or B in 500-level courses; A, B, or C in 600-level courses; A, B, or C in mathematics courses; and a minimum grade point average of 2.8.

Doctor of Philosophy

Qualified students may be authorized to pursue the Ph.D. degree at IUPUI in areas where a program has been arranged with Purdue, West Lafayette. Students are usually expected to complete an M.S. degree before pursuing the Ph.D. degree. Interested students should contact the Department of Physics for further details.

Research Interests and Facilities

The department's major research strengths and facilities are in the area of biological physics and magnetic resonance, in experimental and theoretical laser physics and quantum optics, and in experimental materials physics. The physics faculty directs use of four magnetic resonance spectrometers in two locations. In addition, the school has a high-performance absorption spectrometer equipped to examine cryogenic samples, as well as other instrumentation for biophysical research. Current experimental research includes EPR and NMR investigations of cells, enzymes, proteins, and model membranes. Theoretical work involves calculations and computer simulations of magnetic resonance lineshapes, studies of the biophysics of photosynthesis, and theoretical condensed matter physics. The optics labs are equipped with argon ion, titanium sapphire, diode, and helium-neon lasers, in addition to state-of-the-art equipment, including digital oscilloscopes and spectrum analyzers, which allow students and faculty to probe fundamental issues in laser noise and the quantum nature of light. The materials lab includes an advanced magnetron sputter deposition system, and systems for the measurement of magnetic and electronic properties of thin film materials. All students have access to the IUPUI computing facilities, which include dedicated Unix machines, as well as the minicomputers in the department. Several ongoing projects involve collaborations with the IU School of Medicine, Methodist

Hospital of Indiana, and other departments in the School of Science.

Minor in Physics

The Department of Physics offers an undergraduate minor in physics with the following requirements:

- The introductory physics sequence: PHYS 15200 and PHYS 25100.
- Modern Physics: PHYS 34200.
- Six (6) more credit hours chosen from PHYS 30000, PHYS 31000, PHYS 33000, PHYS 40000, PHYS 41600, or PHYS 44200.
- The grade for each course submitted for the minor must be a C (2.0) or higher.

Correspondence courses may not be used to fulfill requirements for the minor.

Department of Psychology

IUPUI
Science Building, LD 124
402 N. Blackford Street
Indianapolis, IN 46202-3275
Phone: (317) 274-6947; fax: (317) 274-6756

- **Professors** Goodlett, Johnson (*Associate Vice Chancellor for Undergraduate Education, Dean of University College and Professor of Psychology*), McGrew
- **Chancellor's Professor Emeritus** Bond
- **Professors Emeriti** Appleby, Davis, Hanford, Kremer, Murphy, Rajecki, Tzeng
- **Associate Professors** Ashburn-Nardo, Boehm, Czachowski, Devine, Felsten (*IUPU Columbus*), Grahame, Neal-Beliveau, Rand, Salyers, J. Stewart, Williams (Interim Chair)
- **Associate Professors Emeriti** Fleener, Fortier, Goldberg, Lauer, Svanum, Ware
- **Assistant Professors** Cyders, Hirsh, Lapish, Mosher, Poposki
- **Senior Lecturer** Contino
- **Lecturers** Compton (*IUPU Columbus*), Herold, Kroupa, R. Stewart
- **Director of Clinical Training** Guare
- **Adjunct Professors** Alexy, Austin, Badia-Elder, Bell, Campbell, Carpentier, Colquitt, Engleman, Futrell, Hansen, Kareken, Lysaker, McKinzie, Morzorati, Rodd, Shain, Swiezy, Tarr, Unverzagt, Witken, F. Zhou, Zimet
- **International Associate** Roman

Psychology is the study of behavior and mental processes. Psychologists apply the scientific method to a range of questions that are as varied as how eyes perceive light and form, how children develop a sense of morality, and under what conditions people help in emergencies. As an applied profession, psychologists use research results to solve personal and social problems. Because the subject matter of psychology is broad, psychologists have become specialized. Specialization allows each psychologist to apply the general principles of science and behavior to a given area of interest. These include motivation and learning, child and adult development, social behavior of humans and animals, personality, thought processes, consumer behavior, and many more. Many psychologists, who function as research professionals, have academic positions in colleges and universities where they teach and conduct research. Psychologists who function as applied professionals specialize in areas that include clinical, counseling, health care, rehabilitation, human factors, and industrial psychology.

The Department of Psychology offers undergraduate programs leading to the Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees. Four recurring themes are emphasized throughout the curriculum. First, psychology is a science, and its purpose is to describe, explain, predict, and change behavior. Second, behavior is influenced by person variables (internal factors), environment variables (external factors), and their interaction. Third, psychology has evolved in a socio-historical context and its major theoretical perspectives reflect this phenomenon, and fourth, cultural contexts influence how psychological concepts are understood and applied by individuals.

The Department of Psychology offers graduate study in industrial/organizational psychology (Master of Science (M.S.) degree), clinical (M.S. and Doctor of Philosophy (Ph.D.) degrees) and psycholobiology of addictions (Ph.D. degree).

Undergraduate Degree Programs

Bachelor of Arts and Bachelor of Science

Students are encouraged to consult with an academic advisor for determination of whether to pursue B.A. or a B.S. degree.

Degree Requirements

The School of Science Requirements for the Bachelor of Arts and Bachelor of Science degrees are listed in this bulletin (see Area and General Requirements under "Undergraduate Programs").

First-Year Experience Course

Beginning freshmen and transfer students with fewer than 18 credit hours are required to take SCI-I120 Windows on Science (1 cr.) or an equivalent first-year experience course.

Transfer students with over 18 credit hours are not required to take SCI-I120, but are strongly urged to take PSY-B303 *Career Planning for Psychology Majors* (1 cr.) in their first semester on campus.

Area Requirements

Area I English Composition and Communication Skills

See the School of Science requirements under “Undergraduate Programs” in this bulletin.

All students are required to complete three courses, totaling 9 credit hours:

- ENG-W131 English Composition I
- Second semester of English composition (ENG-W132, ENG-W150, or ENG-W231*)

- COMM-R110 Fundamentals of Speech Communication

*ENG-W231 is recommended for psychology majors.

Area II Foreign Languange

See the School of Science Area Requirements under "Undergraduate Programs" for details

Bachelor of Arts students must have first-year proficiency in a foreign language: first-year sequence (three courses (3cr., 3cr., and 4cr.) or two 5-cr. courses); or exam placement into a second-or third-year course.

Bachelor of Science students are not required to have first-year foreign language proficiency.

Area IIIA Humanities, Social Sciences, and Comparative World Cultures

See the School of Science requirements under “Undergraduate Programs” in this bulletin for details.

All students are required to complete four courses, totaling 12 credit hours.

HIST-H114 Western Civilization II HIST-H109 Perspectives on the World: 1800-Present

List H course: Choose one course from this list. The list of course choices is located under the School of Science Area requirements under "Undergraduate Programs" in this bulletin.

List S course: Choose one course from this list. The list of course choices is located under the School of Science Area requirements "Undergraduate Programs" in this bulletin. The S course cannot be a psychology course.

List C course: Choose one course from this list. The list of course choices is located under the School of Science Area requirements under "Undergraduate Programs" in this bulletin.

Area IIIB Junior/Senior Integrator

The Junior/Senior Integrator requirement is suspended indefinitely as a school-level requirement. No junior/senior integrator course is required for psychology majors.

Area IIIC Physical and Biological Sciences

See the School of Science requirements under “Undergraduate Programs” in this bulletin for details.

Bachelor of Arts students are required to complete at least four science lectures courses (minimum of 12 credit hours), and at least one of the courses must have a laboratory component.

Bachelor of Science students are required to complete at least four science lectures courses (minimum of 12 credit hours), and at least one of the courses must have a laboratory componenet. Two of the required four courses must be biology and/or chemistry courses.

Students should consult with an academic advisor to determine which courses are most appropriate to take based on their academic and career goals.

NOTE: There are science courses that do not count in Area IIIC, as well as overlapping courses with credit not being allowed for both of two overlapping courses / course sequences. A partial list can be found in the School of Science Area or General Requirements. If you have a question about whether a course is applicable or if it overlaps with a course that you have already taken, please consult with an academic advisor or check with the School of Science Dean's Office prior to registering to confirm.

Area IIID Mathematical Sciences

See the School of Science requirements under “Undergraduate Programs” in this bulletin for details.

Bachelor of Arts students must have at least one 3-cr. course in mathematics and one 3-cr. course in computer science. MATH-M118 Finite Mathematics and CSCI-N207 Data Analysis Using Spreadsheets are recommended to fulfill the IIID Mathematical Sciences Requirement.

Bachelor of Science students must have at least two 3-cr. courses beyond algebra and trigonometry, (total of 6 credit hours). In addition, one 3-cr. computer science course is required. MATH-M118 Finite Mathematics, MATH-M119 Brief Survey of Calculus, and CSCI-N207 Data Analysis Using Spreadsheets are recommended to fulfill the IIID Mathematical Sciences requirement. However, some pre-professional programs require specific mathematics courses, so students should consult with an academic advisor.

Note: There are math and computer science courses that do not count for any credit toward a degree in the School of Science or do not count in Area IIID. A partial list can be found in the School of Science Area and General Requirements. If you have a question about whether a course counts toward your degree or fulfills the Area IIID requirement, please consult with an academic advisor or check with the School of Science Dean's Office prior to registering to confirm.

Area IV Major Requirements

See the following section, “Major in Psychology (B.A. or B.S.).”

Major in Psychology (B.A. or B.S.)

The Department of Psychology at IUPUI has a program for majors that requires a minimum of 40 credit hours of selected course work.

Introductory Sequence (Three courses; 7 credit hours)

- PSY-B110 Introduction to Psychology
- PSY-B203 Ethics and Diversity in Psychology
- PSY-B303 Career Planning for Psychology Majors

Research Methods Sequence (Two courses; 6 credit hours)

- PSY-B305 Statistics
- PSY-B311 Research Methods in Psychology

Psychology Foundation Courses (Four courses, 12 credit hours)

- PSY-B310 Life Span Development
- PSY-B320 Behavioral Neuroscience
- PSY-B340 Cognition
- PSY-B370 Social Psychology

Psychology Content Courses (Four courses; 12 credit hours)

Select four of the following courses:

- PSY-B201 Foundations of Neuroscience

- PSY-B307 Tests and Measurement
- PSY-B322 Introduction to Clinical Psychology
- PSY-B334 Perception
- PSY-B344 Learning
- PSY-B346 Theories of Personality
- PSY-B356 Motivation
- PSY-B358 Introduction to Industrial/Organizational Psychology
- PSY-B360 Child and Adolescent Psychology
- PSY-B365 Health Psychology
- PSY-B366 Concepts and Applications in Organizational Psychology
- PSY-B368 Concepts and Applications in Personnel Psychology
- PSY-B375 Psychology and Law
- PSY-B376 The Psychology of Women
- PSY-B380 Abnormal Psychology
- PSY-B386 Introduction to Counseling
- PSY-B394 Drugs and Behavior
- PSY-B396 Alcoholism and Drug Abuse
- PSY-B398 Brain Mechanisms of Behavior

Capstone (One course; 3 credit hours)

Select one of the following courses:

- PSY-B433 Capstone Laboratory in Psychology
- PSY-B454 Capstone Seminar in Psychology
- PSY-B462 Capstone Practicum in Industrial/Organizational Psychology*
- PSY-B482 Capstone Practicum in Clinical Psychology*
- PSY-B499 Capstone Honors Research**

*Capstone Practicum courses require an application the semester prior to taking the course. Ask your advisor for details.

**PSY-B499 requires an application due in April for the following academic year and a two-semester commitment that begins in the fall semester. Ask your advisor for details.

Note: Students should discuss capstone options with an advisor to determine which is most appropriate for you based on your career and academic goals.

Elective Courses

Depending on your program, there will be approximately 40 credit hours of electives. These elective courses can be used to complete minor, certificate, or double major requirements. Psychology offers a number of courses that fulfill the RISE initiative. Students should talk to an advisor to determine which elective courses fit best with their academic and career goals.

Undergraduate Honors

IUPUI's Honors College provides high ability students the opportunity to enroll in small, dynamic classes and to collaborate with faculty in independent study and research projects. Psychology majors admitted to the IUPUI Honors College will be eligible to participate in all psychology honors courses and to graduate with honors in psychology. Usually honors credit is based on individual student-faculty agreement to enhance normal course requirements called H-Options, which can be added to existing courses in psychology. Honors students can also enroll in graduate-level psychology courses if they receive the consent of the instructors in these courses. Students who are not in the IUPUI Honors College, but who meet the minimum GPA criterion will be able to participate in honors courses, but will not receive honors credit. For currently enrolled students who have completed at least 12 credit hours, the GPA criterion for admission to the honors program is 3.3. For new students, the criteria for admission are re-centered SAT scores of 1200 or graduation in the top 10 percent of their high school class.

To graduate with Honors in Psychology, the student must earn at least 24 hours of honors credit, six of which must be in psychology and six of which must be outside of psychology (the remaining 12 can be either in or outside psychology). Three to six hours of this credit must be PSY-B499 Honors Research, which should culminate in an honors thesis. Only grades of A or B will count for honors credit. To graduate with honors, the student must have an overall GPA of at least 3.3 and a GPA of at least 3.3 in all honors coursework, and a GPA of 3.5 in psychology classes. For additional information, go to http://honorscollege.iupui.edu/ or contact Dr. Bethany Neal-Beliveau (LD 126L, 274-6751, bnealbe@iupui.edu), the Psychology Department's Honors Program advisor.

PSY-B499 Capstone Honors Research in Psychology

Departmental Honors culminates in an independent honors thesis project that is mentored by a faculty advisor. This is a yearlong research experience that includes two components:

- Students will conduct their own research project under the guidance of a faculty member in psychology.
- Students will attend capstone honors research seminar meetings every other Friday (beginning in the fall and ending in the spring semester). Seminar meetings will focus on a diverse array of topics related to research in psychology.

Capstone Honors Research (PSY-B499) fulfills the capstone requirement within the psychology major. Students do not have to be in the Honors program to take PSY-B499. Additional information about Capstone Honors Research is available in the Psychology Advising Office (LD 123) or by contacting Dr. Jane Williams (LD 126N), 274-2966, jrwillim@iupui.edu.

Psi Chi: The International Honor Society in Psychology

To become a member of Psi Chi, an undergraduate psychology major must have earned at least 9 credit hours of psychology classes and possess an overall GPA of 3.0 and a GPA of 3.5 in psychology classes. Interested students should submit an application to the Psi Chi faculty advisor. There is a one-time, lifetime membership fee.

Graduate Programs

The department offers Purdue University Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degree programs. At the M.S. level, programs are offered in industrial/organizational psychology and clinical psychology. At the Ph.D. level, programs are offered in clinical psychology and psychobiology of addictions.

M.S. Programs

Graduate training at the M.S. level is designed to provide students with theory and practice that will enable them to apply psychological techniques and findings in a subsequent job setting. Depending on the program, the M.S. degree may be completed on a full- or part-time basis and normally takes two or three years to finish. Depending on the case, a minimum of 36 credit hours is required, including departmental core, area core, and elective courses.

Industrial/Organizational Psychology

This emphasis is designed to prepare individuals for positions in industry or for entry into an industrial/ organizational doctoral Program. Students are familiarized with the scientist-practitioner model, which emphasizes both research and the application of problem-solving skills to organizational problems. Students in the Program are taught analytic methods for diagnosing work-related problems, developing solutions, and evaluating the effectiveness of those solutions. While the primary focus of the curriculum is on the traditional personnel psychology areas of selection, training, compensation, and performance evaluation, students also learn about topics such as decision-making, motivation, leadership, and organizational effectiveness.

Clinical Psychology

This Program is designed to prepare students in the science of clinical psychology. The Program is intended for individuals who plan to enter or continue careers or education in the behavioral sciences, health, or rehabilitation fields upon completion of the M.S. degree. The Program's focus upon core skills and methods would be particularly suitable for those students who plan to pursue the Ph.D. degree following completion of the M.S., or for students who have an interest in jobs in health care settings that involve research design and collection and analysis of data. A core set of courses introduces the methods and basic skills of clinical psychology, including courses in counseling and psychological assessment. The curriculum is flexible and designed to be individually tailored by selection of elective courses and practicum experiences. Graduation requires the completion of a minimum of 36 hours of graduate course work, including the required core, electives, and at least two practicum placements. The Program does not require a thesis, although students who have research interests are encouraged to pursue a faculty mentor relationship and a thesis option.

Ph.D. Programs

Clinical Psychology

Using a scientist-practitioner model, the Program is designed to integrate the assessment and intervention strategies of empirically-based clinical psychology with rehabilitation: community psychology's emphasis on optimizing the adaptation of persons with psychiatric conditions and health psychology's emphasis on understanding factors impacting the prevention, development, treatment and maintenance of health and mental health conditions. As researchers, we study behaviors, experiences, and attitudes of persons with disabilities and illness, develop and assess theoretical models that attempt to understand how behavior, health, and illness interact, and develop and evaluate treatment approaches and their effectiveness. As practitioners, we assess individuals and their environments, plan and implement interventions, and monitor the success of their work. The Program emphasizes the acquisition of the methods, theories, and knowledge of behavioral science along with the practitioner skills of clinical psychology. As a Program, we offer specialization training in two areas within clinical psychology: psychiatric services and health psychology. Within both areas there is a strong emphasis on research. The range of populations subsumed is broad and includes such populations as persons with traumatic injuries, sever and persistent mental illness, chronic heart disease, cancer, ad addictions.

The Program subscribes to a scientist-practitioner model of clinical training, with an emphasis on clinical science. As such, individuals seeking strong research training, in conjunction with empirically-based practicum experiences, would be the most desirable students for the Program.

Graduates of the Program will be qualified to assume positions as academicians, evaluators, researchers, trainers, planners, consultants, and direct-service providers. The Program emphasizes rigorous academic training, which is combined with practical application in a wide variety of clinical centers in Indianapolis and elsewhere. Full-time study and a minimum of 90 credit hours (post-baccalaureate) are required, and it is expected that it will take five years to complete the Program. The Program includes a diverse training in psychology, including a psychology core, statistics and measurement, clinical psychology, internships and practica, and an empirical thesis and doctoral dissertation. Clinical specialty courses in Health Psychology and Psychiatric Rehabilitation are offered. A course in ethics is also required.

Psychobiology of Addictions

This Program is designed to promote a comprehensive understanding of the neurobiological bases of behavior, with an emphasis on the behavioral and neurobiological aspects of drugs of abuse and addictive behaviors. General goals of the Program are to develop knowledge and expertise in the neurobiological mechanisms of behavior, develop skills in applying methods of behavioral neuroscience research to the problems of alcohol and drug abuse and addiction, and train competence in communication and teaching of knowledge and research skills. Students will obtain broad training in the combined disciplines of the neurosciences (e.g., behavioral and developmental neuroscience, psychopharmacology, neurobiology) and the behavioral sciences (e.g., experimental psychology, cognitive psychology, learning, experimental design and analysis, and animal models of drug abuse and addiction). The psychobiology of addictions program is an IUPUI program that is administered through the Department of Psychological Sciences at Purdue, West Lafayette. Students take courses at IUPUI, but must meet all Purdue requirements and have a Purdue faculty member on their Ph.D. preliminary and final examination committees. A minimum of 85 credit hours (post-baccalaureate) are required, plus approval of the plan of study by the student's advisory committee. The Program intends to train students seeking careers in teaching and/or research in academic environments, medical institutions, pharmaceutical firms, and governmental agencies.

Financial Support

Financial support for eligible graduate students at both the M.S. and Ph.D. levels is available through teaching and

research assistantships, tuition stipends, and fellowships. Full assistantships require a minimum of 20 hours of work per week and include at least partial tuition remission in addition to salary.

Admission Requirements

Industrial/Organizational Psychology

Undergraduate training in psychology, mathematics, and the sciences is highly desirable, though not required. Applicants should have had at least one undergraduate course in statistics, and one in tests and measurements is also advantageous. To be considered for admission without probation, applicants must obtain (a) a baccalaureate degree from a college or university of recognized standing, (b) a GPA of 3.0 or higher on a 4.0 scale, (c) competitve GRE scores, and (d) three favorable letters of recommendation. The student who does not meet the above standards, but shows potential for graduate studies, could be recommended for conditional admission.

Clinical Psychology

Undergraduate training in psychology, mathematics, and the physical sciences is highly desirable, though not required.

Except in unusual circumstances, students admitted to the Program are expected to complete at least 15 credit hours in psychology. Although there are no specific undergraduate course prerequisites for Program entry, students without coursework in the following areas will likely be at a disadvantage when taking some of the required courses: (1) tests and measurement, (2) statistics, (3) human physiology or physiological psychology, and (4) abnormal psychology. Students without preparation in these areas may be asked by their instructors to complete some remedial activity prior to enrolling in the graduate course (e.g., reading an undergraduate text or taking an undergraduate course).

Students may apply directly to the Ph.D. Program or to the terminal M.S. Program (or both simultaneously). For an applicant to be considered for admission to the M.S. Program, the applicant must obtain (a) a baccalaureate degree from a college or university of recognized standing, (b) a GPA of 3.0 or higher on a 4.0 scale, (c) competitive GRE scores and (d) three favorable letters of recommendation.

The Ph.D. Program seeks talented and motivated persons who have an interest in clinical health psychology and psychiatric rehabilitation and who have the potential to make creative contributions as clinical psychologists. Admission to the Ph.D. Program is competitive and only under unusual circumstances will students be considered for admission if they fail to meet the following minimum standards: (a) an undergraduate and graduate grade point average of 3.2 or higher on a 4.0 scale, (b) competitive GRE scores, (c) three favorable letters of recommendation, and (d) a personal statement expressing an interest in the field of clinical psychology. Prior clinical and research experience is recommended, but not required for admission. Applicants are also required to take the GRE Advanced Test in Psychology.

Psychobiology of Addictions

This Ph.D. Program is designed for individuals interested in academic or research careers studying the psychobiology of addictive behaviors and drugs of abuse. Successful applicants typically have (a) an undergraduate and graduate grade point average of 3.2 or higher on a 4.0 scale, (b) competitive GRE scores, (c) three favorable letters of recommendation, and (d) a personal statement expressing an interest in the psychobiology of addictions. Students with undergraduate degrees in psychology or the life sciences (e.g., biology, chemistry, neuroscience) are encouraged to apply.

Admission Information

Students are admitted only for fall enrollment, and the deadline for receipt of application materials is specific to each graduate program:

- December 1 - Clinical (Ph.D.)
- January 1 - Psychobiology of Addictions (Ph.D.)
- February 1 - Industrial/Organizational Psychology (M.S.)
- March 15 - Clinical (M.S.)

Students interested in information about admission to graduate programs in psychology should email directly to the graduate program coordinator at gradpsy@iupui.edu, phone (317) 274-6945, or visit the Psychology Department webpage at http://psych.iupui.edu.

Transfer Credit

A maximum of 12 credit hours can be transferred into the M.S. program, and a maximum of 36 credit hours can be transferred into the Ph.D. program. Transfer hours will be accepted only if they are appropriate and judged acceptable by the student's plan-of-study committee.

Temporary Student Status

A student may enroll in some graduate courses without formal admission into a Psychology graduate program; however, they must be admitted by the IUPUI Graduate Office into the Graduate Non-Degree Program. No more than 12 hours of credit may be applied to an advanced degree program if an individual is later admitted as a regular graduate student. However, if an application to a regular degree program is approved during the session in which a person is enrolled for the 12th credit hour as a non-degree registrant, then all credits taken before and during that term will be eligible for inclusion in a plan of study for a degree program. For inclusion, the courses must be appropriate to the degree program and acceptable to the department and the graduate school. No course in which a grade of less than B (e.g., B-) has been received will be permitted in a plan of study if the course was taken while the student was enrolled as a non-degree registrant. Non-degree registrants may be required to secure consent from each of the departments in which they would like to register for courses

Research Facilities

The Department of Psychology has extensive laboratory and computer facilities to support faculty and student research. More than 8,000 square feet of laboratory space in the School of Science complex is devoted to psychological research in the areas of clinical psychology, industrial/organizational psychology, life span development, and cognition. Separate animal quarters and modern laboratories are also available to support research in psychobiology. Computer support includes computer clusters and networks within the department, as well as access to a variety of software packages. Internship and practicum sites are available at the Indiana University Medical Center and

with numerous other organizations in metropolitan Indianapolis.

Research Interests of Faculty

Major research interests of faculty include social psychology, biofeedback, industrial/organizational psychology, measurement theory and development, program planning and evaluation, clinical psychology, health psychology, psychiatric rehabilitation, behavioral and psychopharmacology, developmental psychobiology, behavioral genetics, cognitive developmental psychology, animal cognition, and student/faculty performance. A current and more detailed listing of faculty research interests is available from the department.

Plans of Study

Although there is no single semester-by-semester plan of study for either the B.A. or the B.S. degree, one possible sequence of courses for each of these degrees is given below. Variations from these examples should be made, based on the student's academic history and career plans, through consultation with an academic advisor. For career and graduate school information related to psychology, please refer to relevant sections of the psychology department's website www.psych.iupui.edu. To graduate in four years, a student generally must take at least four semesters of 15 credits and four semesters of 16 credits. Students with heavy outside commitments (e.g., work and/or family) may want to decrease their course load each semester. By taking additional courses each summer, it may still be possible to graduate in four years.

Bachelor of Arts Sample Program (124 cr. required)

Freshman Year

First Semester	
SCI-I120 Windows on Science	1
PSY-B110 Introduction to Psychology	3
ENG-W131 Elementary Composition I	3
Comparative World Cultures course (C list)	3
Foreign Language I*	3-5
Total	**13-15**
Second Semester

* Students who do not test successfully into MATH-M118/M119 must complete one or more lower-level math courses to develop the skills necessary to perform well in M118/M119. Credits earned for the remedial math courses do not count as part of the required 124 credit hours to graduate.

Minor in Psychology

The Department of Psychology offers an undergraduate minor program in psychology that requires a minimum of 18 credit hours of selected course work. Interested students should obtain information from the Psychology Advising Office (LD123). Course requirements are as follows:

Introductory Psychology (One course; 3 credit hours)

- PSY-B110 Introduction to Psychology

Psychology Foundation Courses (Two courses; 6 credit hours)

Select two courses from the following:

- PSY-B310 Life Span Development
- PSY-B320 Behavioral Neuroscience
- PSY-B340 Cognition
- PSY-B370 Social Psychology

Psychology Content Courses (Three courses; 9 credit hours)

Select three additional 300-level psychology courses. Students may also take PSY-B203 Ethics and Diversity in Psychology and/or PSY-B201 Foundations of Neuroscience as content courses.

- No grade lower than C- is acceptable for any course in the minor.
- A minimum grade point average of 2.0 in minor courses is required.
- A minimum of 6 credit hours of the minor must be taken at IUPUI.

Departments & Programs

- Biology
- Biotechnology
- Chemistry and Chemical Biology
- Computer and Information Science
- Earth Sciences
- Environmental Science
- Forensic and Investigative Sciences
- Interdisciplinary Studies
- Mathematical Sciences
- Physics
- Psychology
- Special Programs

Departments & Centers

- Teaching Certification
- Pre-Professional Programs
- Honors Program
- Undergraduate Research

Teaching Certification

Becoming a Licensed Teacher

Top quality science and mathematics teachers are in high demand, and the IU School of Education at IUPUI is recognized as a leader in urban education. Students who want to become teachers of middle school and/or high school science or mathematics must take specific programs of study aligned to the standards for teaching these subject areas. Teachers must fully understand the content they teach, the realities of schools, and methods for successfully teaching every child. This requires earning a major or a degree in the School of Science and completing a teacher preparation program in the School of Education.

Mathematics and science majors who want to become teachers need to seek advising from the School of Science as soon as possible so that they take the right courses as they complete their majors. Mathematics majors often find they can complete both their major in mathematics and the *Learning to Teach/Teaching to Learn* (*LTTL*) program as part of their bachelor's degree. Science majors typically complete their bachelor's degree in science and then enter the *Transition to Teaching* (*T2T*) program as post baccalaureate students, earning the first half of their master's degree in this 12-month teacher education program. The *Transition to Teaching* program is also an option for mathematics graduates or returning students.

Admission to either the undergraduate (LTTL) or the graduate (T2T) teacher education program is competitive. Students must complete a formal application and have most of the required courses in the major, passing PRAXIS test scores, a clear criminal history check, and at least a 2.5 overall GPA. Specific information about admission to each program is available on the School of Education Web site. education.iupui.edu

Both the *Learning to Teach/Teaching to Learn* program and the *Transition to Teaching* program enable students to earn Rules 2002 Indiana Teacher Licenses. The LTTL program consists of 43 credit hours of undergraduate study, sequenced across four semesters including a final semester of student teaching. The T2T program is 18 credit hours (plus program fees) of graduate study done while practice teaching in schools everyday for one school year.

Note: Information about teacher education and licensing may change for many reasons, including legislative mandates and state policies. Students need to check for current information on the School of Education Web site education.iupui.edu and meet with School of Education advisors regularly.

Pre-Professional Programs

While some professional programs (dental, pharmacy, veterinary) may not require an undergraduate degree for strong applicants, many do require an undergraduate degree. The preprofessional student is urged to elect a degree program rather than fulfilling the minimum requirements for entry into professional programs. This provides the necessary background if a degree is required, and serves as a backup plan if the student does not matriculate to a professional program.

Students may choose from a variety of majors while completing preprofessional requirements. Students are encouraged to consult with their major advisor, as well as the School of Science health professions advisor, if enrolled in a School of Science degree program.

Although there are many professional programs from which to choose and we encourage students to apply to multiple programs, our preprofessional advising is aligned with the programs with which we are most closely affiliated –IU in Bloomington, the IUPUI campus in Indianapolis and Purdue University in West Lafayette.

Post-baccalaureate students holding non-science degrees may choose to take prerequisite courses through the School of Science for entry into professional programs. These students should consult with the health professions advisor

for help with the admission process and course selection. For additional information, see the School of Science Bulletin, Graduate Programs, Graduate Nondegree Study section.

Most professional programs require not only specific prerequisite courses, a strong GPA, and a profession-specific or general entrance test, but also experience including shadowing in the field, volunteering and leadership activities.

Pre-Medical Program

Students planning to apply to medical school must choose a degree program in addition to taking courses that fulfill the admission requirements for their chosen medical school. While many opt to complete their degrees with science majors, other fields of specialization are acceptable. Freshmen should declare their chosen major and seek advising for their degree requirements from the advisor in their major department. IUPUI also offers health professions advising in the School of Science and the School of Liberal Arts. Premedical students should consult the health professions advisor in their school once they have completed the 10 credit hours of biology and 10 credit hours of inorganic chemistry required for medical school in order to plan the additional courses needed for medical school, timing for the MCAT test and the admission process to medical school.

Prerequisites for IU School of Medicine

The premedical student should complete the bachelor's degree. The Medical College Admission Test (MCAT) is required.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
CHEM-C342 Organic Chemistry II	3 cr.
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.

Pre-Dental, Pre-Veterinary, Pre-Optometry Programs

Admission to professional schools is highly competitive. The preprofessional student is therefore urged to elect a degree program rather than fulfilling the minimum requirements of these schools. Students who choose predental, preveterinary medicine, and preoptometry are usually placed in the Department of Biology where preprofessional advising is available. Predental students are also encouraged to meet with the health professions advisor in the School of Science to plan for the testing and admission process required by dental schools. Refer to the Department of Biology section of this bulletin for the required courses for Indiana University School of Optometry and Purdue University School of Veterinary Medicine.

Graduate students holding non-science degrees who are electing courses in the School of Science to prepare for medical or dental school are also invited to use the health professions advising service for help with the admission process.

Pre-Dentistry Prerequisites for IU Dental School

Minimum requirements include 90 credit hours of coursework. Bachelor's degree strongly recommended. The Dental Admission Test (DAT) is required. Applicants should also show evidence of manual dexterity.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
BIOL-K483 Biological Chemistry	3 cr.
or CHEM-C483 Biomolecules and Catabolism

CHEM-C342 / CHEM-C344 Organic Chemistry II/Lab	3 cr./2 cr.
MATH 23100 Calculus for the Life Sciences I	3 cr. to 4 cr.
(or MATH 22100 or MATH 16500)	
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
(or STAT-N501 or SPEA-K300)	
ANSC 22300 Animal Nutrition	3 cr.
(may be taken at Purdue WL or online)	
ENG-W131 English Composition I	3 cr.
COMM-R110 Fundamentals of Speech Communication	3 cr.
Arts and Humanities electives	9 cr.

Pre-Optometry Prerequisites for IU School of Optometry

Minimum of 90 credit hours of coursework. Bachelor's degree strongly recommended. The Optometry Aptitude Test (OAT) is required.

BIOL-K101 Concepts of Biology I	5 cr.
BIOL-K103 Concepts of Biology II	5 cr.
BIOL-K356 / BIOL-K357 Microbiology/Lab	3 cr./2 cr.
Advanced Biology: BIOL-K322 Genetics and Molecular Biology	3 cr. to 5 cr.
or BIOL-K324 Cell Biology	
or BIOL-N217 Human Physiology	
or BIOL-N261 Human Anatomy	
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
ENG-W131 English Composition I	3 cr.
ENG-W132 English Composition II	3 cr.
or ENG-W231 Professional Writing Skills	
MATH 23100 Calculus for the Life Sciences I	3 cr. to 4 cr.
or MATH 22100 or MATH 16500 or MATH-M119	
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.
PSY-B104 Psychology as a Social Science	3 cr.
or PSY-B105 Psychology as a Biological Science	3 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
or STAT-N501 or PSY-B305 or ECON-E270	
If the student does NOT have a bachelor's degree, additional courses are required:	
Arts and Humanities	6 cr.
Foreign language	6 cr.
(students having completed 2 or more years in high school with C or better are exempt)	
Social and Historical Studies	6 cr.
Additional credit hours to reach 90 credit hours	

Pre-Pharmacy Program

The prepharmacy program at IUPUI consists of approximately 70-90 credit hours of course work required to apply to pharmacy school. Students declaring prepharmacy upon admission to IUPUI are assigned to the Department of Biology, where prepharmacy advising is available. After completion of the required courses for admission, students apply to the pharmacy school of their choice. Refer to the Department of Biology section of this bulletin for required courses to apply to the pharmacy program at the Purdue School of Pharmacy and Pharmacal Sciences.

Pre-Pharmacy Prerequisites for Purdue School of Pharmacy and Pharmacal Sciences

A bachelors' degree is not required. The Pharmacy College Admission Test (PCAT) is not required for admission to Purdue's program. Those entering the professional program beginning Fall 2010 will have additional course requirements to fulfill. Interested students should contact Purdue University School of Pharmacy and Pharmacal Sciences for more information.

BIOL-K101 Concepts of Biology I	5 cr.

BIOL-K103 Concepts of Biology II	5 cr.
BIOL-K356 / BIOL-K357 Microbiology/Lab	3 cr./2 cr.
BIOL-N217 Human Physiology	5 cr.
BIOL-N261 Human Anatomy	5 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
CHEM-C341 / CHEM-C343 Organic Chemistry I/Lab	3 cr./2 cr.
CHEM-C342 / CHEM-C344 Organic Chemistry II/Lab	3 cr./2 cr.
ECON-E101 Survey of Economic Issues and Problems	3 cr.
MATH 23100 / MATH 23200 Calculus for the Life Sciences I and II	3 cr./3 cr.
or MATH 22100 / MATH 22200 or MATH 16500 / MATH 16600	
PHYS-P201 General Physics I	5 cr.
ENG-W131 English Composition I	3 cr.
ENG-W132 English Composition II	3 cr.

Additional categories of electives are required for graduation from the pharmacy program at Purdue University. Since they are not required for admission to the program, they may be completed concurrently with prerequisite course work or after admission to the pharmacy program. Students must select a minimum of one course each from Humanities and Behavioral Sciences, Business and Administration, and Science and Technology groups. Please see the health professions advisor for options.

Pre-Occupational Therapy Program

Students may take any undergraduate program and include a set of core courses needed as prerequisites for a graduate degree in occupational therapy at the Indiana University School of Health and Rehabilitation Sciences. Undergraduate degree programs in biology or psychology in the School of Science may be of interest to the pre-occupational therapy student. Advising for the undergraduate degree and planning the requirements for application/admission to a graduate degree program in occupational therapy is available in those departments. An academic advisor in the IUPUI School of Health and Rehabilitation Sciences is also available for consultation.

Pre-Occupational Therapy Prerequisites for IU School of Health and Rehabilitation Sciences-IUPUI Campus

Applicants must have completed a bachelor's degree. No entrance exam is required.

BIOL-N217 Human Physiology	5 cr.
BIOL-N261 Human Anatomy	5 cr.
PSY-B310 Life Span Development	3 cr.
PSY-B380 Abnormal Psychology	3 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
or STAT-N501 or PSY-B305 or ECON-E270	
CLAS-C209 Medical Terminology	2 cr.

Note: Biology and statistics courses must be taken no more than seven years before admission.
The program requires a minimum of 12 hours of observation in three or more sites.

The pre-occupational therapy student should consult with an academic advisor for updates of pre-occupational therapy criteria.

Pre-Physical Therapy Program

Students may take any undergraduate program and include a set of core courses needed as prerequisites for a graduate degree in physical therapy at the Indiana University School of Health and Rehabilitation Sciences. Undergraduate degree programs in biology, chemistry, or psychology in the School of Science may be of interest to the pre-physical therapy student. Advising for the undergraduate degree and planning the requirements for application/admission to a graduate degree program in physical therapy is available in those departments. An academic advisor in the IUPUI School of Health and Rehabilitation Sciences is also available for consultation.

Pre-Physical Therapy Prerequisites for IU School of Health and Rehabilitation Sciences-IUPUI Campus

Applicants must have completed a bachelor's degree. The Graduate Record Exam (GRE) is required for admission.

BIOL-N217 Human Physiology	5 cr.
BIOL-N261 Human Anatomy	5 cr.
CHEM-C105 / CHEM-C125 Principles of Chemistry I/Lab	3 cr./2 cr.
CHEM-C106 / CHEM-C126 Principles of Chemistry II/Lab	3 cr./2 cr.
PHYS-P201 General Physics I	5 cr.
PHYS-P202 General Physics II	5 cr.
PSY-B104 Psychology as a Social Science	3 cr.
or PSY-B105 Psychology as a Biological Science	
PSY-B310 Life Span Development	3 cr.
STAT 30100 Elementary Statistical Methods I	3 cr.
or STAT-N501 or PSY-B305 or ECON-E270 or SOC-R359 or SPEA-K300	

Two 3-credit hour courses in the humanities, social sciences area.	6 cr.

The pre-physical therapy student should consult with an academic advisor for updates of pre-physical therapy requirements.

Undergraduate Research Program

IUPUI has established an Undergraduate Research Opportunities Program (UROP) to encourage and recognize undergraduates who participate in research projects with faculty in the school.

Undergraduate research students may receive the transcript notation on their academic transcript concurrent with the awarding of the degree by fulfilling a set of requirements listed below. Such a transcript notation provides obvious evidence of a student's participation in independent laboratory and scholarly and research other creative work. The notation will certify and spotlight research proficiency or successful completion of some other creative activity.

UROP has established a program of requirements that must be fulfilled to qualify for transcript notation. The requirements are:

1. Students must register for and complete five credits of formal research in their departments or units. Students whose departments have no independent research credit may use the Honors Course HON-H399. The definition of research credit will be left up to the student's department or unit, but should conform to the general definition of research and consist substantially of an independent project by the student.
2. Students must prepare a substantial written product from the research. This could include a senior thesis or journal publication. Other appropriate activities to the discipline may be substituted for this, for example, an art exhibit or other performance. Substitutions must receive prior approval from the UROP Director.
3. Students must attend an outside professional meeting in a discipline at the state, regional, or national level. Attendance at other professional events will be considered as appropriate to the discipline. The student's faculty mentor will certify attendance. Students will be encouraged to present their work at a professional meeting or other event.
4. Students must participate in at least one annual UROP symposium. Students must present at least one oral paper to receive transcript notation. If appropriate to research and creative activity in the discipline, other types of presentations may be acceptable at the discretion of the UROP Director and with the recommendation the student's faculty mentor.
5. Students must prepare a Research Portfolio, which may be in an electronic form. The Research Portfolio is prepared with the student's faculty mentor and must be submitted four weeks prior to the student's anticipated graduation date. Information about preparing a research portfolio can be found at http://crl.iupui.edu/resources/.

Further information about undergraduate research opportunities and transcript notation may be found at http://crl.iupui.edu/resources/.

Honors Program

The IUPUI Honors Program is open to students in both the Purdue and Indiana University degree programs. Students with an overall grade point average (GPA) of 3.0 after their first full semester of work, entering freshmen with a minimum combined math and verbal (critical reading) SAT score of 1200, or ACT of 26, and those who have graduated in the top 10 percent of their high school class, are automatically invited to participate in the Honors Program. Students with a GPA of less than 3.0 may be permitted to take honors courses. They should, however, discuss the matter with their academic advisor and the honors advisor before doing so.

In general, students may take no more than 6 credit hours of honors work each semester. Students may earn honors credit by taking special Honors Program courses (HON H300, HON H399, HON H400), by taking specially designated sections of multisection courses, by doing special overseas or internship work, or by contracting for honors credit using an H-Option contract in conjunction with regular classes.

H-Option contracts are the most popular and frequent way that students earn honors credit. An H-Option requires that a student work out with the instructor of a course a specific contract for a paper, field project, oral presentation, etc., early in the semester. The contract is not merely an extension of the regular class work, but an opportunity not provided by regular assignments. All the necessary signatures of approval, including that of the director of the Honors Program, must be submitted to the Honors Program office before consent to begin the project will be given.

Students completing honors work or an honors degree will, upon request, receive an honors course record listing all honors work, to be included with official university grade transcripts.

For additional information, contact the IUPUI Honors Program, University College, UC 3140, 815 W. Michigan Street, Indianapolis, IN 46202-5164; phone (317) 274-2660; www.honors.iupui.edu.

To obtain an honors degree in computer science, mathematics, or physics, a student must have a cumulative grade point average of 3.3 and a minimum of 24 credit hours, with a 3.5 average in honors work. 6 hours of honors credit must be outside the student's major field. A senior thesis track is also available. To obtain an honors degree in biology, chemistry, geology, or psychology, a student should follow the requirements described below.

Biology

Students with a GPA of 3.3 and 12 hours of credit, or newly entering freshmen with a minimum combined math and verbal (critical reading) SAT score of 1200 or who are graduating in the top 10 percent of their high school class, qualify for the Biology Honors Program. Students wishing to participate in the Biology Honors Program must first receive approval from the Department of Biology. Students may choose from two tracks. In Track 1 (honors with thesis), students must complete 21 credit hours of honors work including 6 credit hours outside of biology and 15 credit hours in biology. These biology hours are to include 4 credit hours of BIOL K101/BIOL K103 honors sections of lab/recitation, 6 credit hours in honors sections of BIOL K493, and 5 credit hours in H-Option biology courses and/or 500-600-level biology courses. In Track 2 (honors without thesis), students

must complete 24 credit hours of honors work. These hours are to include 6 credit hours outside of biology, 4 credit hours of BIOL K101/BIOL K103 honors sections of lab/recitation, and 14 credit hours in H-Option biology courses and/or 500-600-level biology courses.

Chemistry

Students with a minimum GPA of 3.0 may be admitted into the Chemistry Honors Program with approval of the Honors Program and the Department of Chemistry and Chemical Biology. After entering the program, maintenance of a GPA of 3.3 in all courses and of 3.5 in honors courses is necessary. The curriculum committee of the chemistry department will approve any honors Bachelor of Science degrees awarded in chemistry. In addition to meeting general honors requirements, students who intend to graduate with honors in chemistry must complete 24 honors credit hours, consisting of 1 credit hour in the CHEM C301 or CHEM C302 Chemistry Seminar, 6 credit hours in CHEM C409 Chemical Research, 5 credit hours of H-Options in undergraduate courses and/or graduate chemistry courses, and 12 credit hours of honors credit in courses outside of chemistry.

Geology

For the Bachelor of Science degree, honors students must complete 24 credit hours of honors work, 18 credit hours in geology and 6 credit hours in other approved honors courses. For the Bachelor of Arts degree, the requirements are 15 credit hours in geology and 9 credit hours outside geology in other approved honors courses. The following upper-division geology courses are approved for H-Option contracts: GEOL G205 Reporting Skills in Geoscience, GEOL G209 History of the Earth, GEOL G221 Introductory Minerology, GEOL G222 Introductory Petrology, GEOL G304 Principles of Paleontology, GEOL G323 Structural Geology, GEOL G334 Principles of Sedimentation and Stratigraphy, GEOL G403 Optical Mineralogy and Petrography, GEOL G404 Geobiology, plus GEOL G410 Undergraduate Research in Geology (1 cr.), GEOL G406 Introduction to Geochemistry, GEOL G413 Introduction to Geophysics, GEOL G415 Principles of Geomorphology, GEOL G416 Economic Geology, GEOL G430 Principles of Hydrology, and GEOL G499 Honors Research in Geology. The student must complete 3 credit hours in GEOL G499 Honors Research in Geology to satisfy the requirements for the honors component. The overall grade point average must be 3.3 with a 3.5 in all honors work.

Psychology

To graduate with honors, the student must earn at least 24 hours of honors credit, 6 credit hours of which must be in psychology and 6 credit hours of which must be outside of psychology (the remaining 12 credit hours can be either). At least 3 hours of this credit must be for PSY B499 Honors Research, which culminates in an honors thesis. Only grades of A or B will count for honors credit. To graduate with honors, the student must have an overall GPA of 3.3 with at least a 3.5 in honors and psychology courses.

Academic Policies & Procedures

- Academic Regulations
- Academic Standing

Academic Regulations

See the Office of the Registrar's website for general information about grades. The following policies are specific to the School of Science.

Pass/Fail Option During the four years of their undergraduate program, all undergraduates in good standing (with an overall GPA of 2.00 or higher) may enroll in up to eight elective courses to be taken with a grade of P or F. The Pass/Fail option is open for a maximum of two courses per year, including summer sessions. For this option, the year is defined as August 15 to August 15. The Pass/Fail option form is available in School of Science departmental offices and in the School of Science, LD 222.

The course selected for Pass/Fail grading must be an elective. It may not be used to satisfy any of the school area requirements, nor may it be counted as a part of the student's major. If the course is at the 300-level or higher, with a grade of P, the course may apply to the 32 credit hour School of Science residency requirement. After the form is submitted to the Office of the Registrar, a grade of P cannot be subsequently changed to a grade of A, B, C, or D.

For additional information, visit the Office of the Registrar's website: http://registrar.iupui.edu/passfail.html

Withdrawal Students may officially withdraw from classes without penalty during the first half of a semester or session if they secure the approval of their advisor; a grade of W (Withdrawal) is recorded on the final grade report. Students may withdraw from classes during the third quarter of a semester or session if they secure the approval of their advisor and the instructor of the course; the instructor may assign a grade of W or F. The grade so assigned is recorded on the final grade report. A student may withdraw from classes during the last quarter of a semester or session only under extraordinary circumstances. In such cases, the student must secure the approval of their advisor, the instructor of the course, and the dean of their school; the instructor may assign a grade of W or F. A written justification from a doctor, member of the clergy, advisor, etc., must be presented indicating that the student could not have withdrawn earlier. The grade so assigned is recorded on the final grade report. The necessary form for withdrawal from a course is available in School of Science departmental offices and in the School of Science, LD 222. To maintain integrity as to how students are accountable in this area, the policy for School of Science students is considered to be the policy for all students served by the School, regardless of academic unit or school.

Students who alter their schedules, whether by personal incentive or by departmental directive, must follow correct withdrawal procedures. Students who do not follow these procedures risk jeopardizing their record by incurring a failing grade in a course not properly dropped, or they risk not receiving credit for work done in a course that has not been properly added.

Grade Replacement Policy The Grade Replacement Policy is available only to undergraduate students. It may be exercised for a maximum of 15 credit hours, no more than two times for a given course, with each attempted replacement counting toward the 15 credit hour limit. Any grade may be replaced with the last grade earned for the course, as long as the most recent grade is equal to or higher

than the grade being replaced. The replaced grade will then be excluded from the cumulative grade point average. However, the course listing and the replaced grade will remain on the student's academic record with an "X" notation indicating that the grade is excluded from the cumulative grade point average.

The policy became effective beginning with the Fall 1996 semester, and any courses being used to replace an earlier grade must have been taken in the Fall of 1996 or later. Grades previously granted FX will be honored and will count toward the 15 credit hour limit. Once invoked, a student may not subsequently request reversal of the grade replacement granted for a given course. Also, this policy is not available for graduate students or students seeking any second undergraduate degree. A science major interested in the Grade Replacement Policy should contact the School of Science, LD 222. For more information about the policy, visit http://registrar.iupui.edu/replace.html.

Degree Grade Point Average

The School of Science computes a school grade point average, which is the basis for recommending the awarding of a degree. This grade point average is computed at the completion of the degree program. Only the most recent grade in repeated courses counts in computing the school grade point average for the purpose of graduation. Remedial courses and courses that overlap are also excluded. Other course exclusions may apply.

Special Credit

Special credit by examination, by credentials, and/or by experience may be awarded in order to help qualified students earn their degrees more quickly. Each instructional department determines which of its courses are available for special credit and establishes procedures to determine student eligibility, administer evaluations for special credit, and grade students. The evaluations are as comprehensive as those given in the course. Credit earned by examination will be assigned an A (highest passing grade) or S (passing grade). Credit earned by credentials and/or experience will be assigned an S. An S (passing) grade is considered to be equivalent to performance at a minimum grade level of C.

Responsibility for initiating a request for special credit in a specific course normally rests with the student. To find out if special credit is warranted, the student should consider meeting first with the department chair, advisor, or course instructor.

For additional information, refer to the front part of this bulletin under "Special Credit" or go to the following website: http://registrar.iupui.edu/specred.html

Auditing Courses

University policy permits the auditing of courses, but audited courses may not be retaken later for academic credit. Written permission from the instructor to audit a class must be obtained before the student attempts to register. See the Office of the Registrar's website for general information about auditing courses.

Review of Final Grade in a Course

A student has the right to request and receive a review of the student's final grade in a course. However, the request for such a review must be made in a timely manner; that is, within one year of the completion of the course.

Petition for Grade Change

Faculty Petition A faculty member may request a change of grade for a student. This request can be honored only after approval of the department chair and the School of Science Executive Director for Academic and Student Affairs.

Student Petition In certain cases, a student may request a change of grade. Students should contact the School of Science, LD 222, for information about procedures and time limits for applicable cases.

Science Scholars List and Dean's Honor List

The School of Science recognizes exceptional academic performance in baccalaureate and associate degree programs before graduation from the university by periodically publishing the Science Scholars List and the Dean's Honor List.

Science Scholars List eligibility includes:

- Full-time enrolled student (between 12 or more credit hours) who has completed at least 26 credit hours of course work at IUPUI and who has a semester and IU cumulative grade point average (GPA) of 3.75 or higher.
- Part-time enrolled student (between 5 and 11 credit hours) who has completed at least 26 credit hours of course work at IUPUI and who has a semester and IU cumulative grade point average (GPA) of 3.75 or higher.

Dean's Honor List eligibility includes:

- Full-time enrolled student (12 or more credit hours) who has a semester grade point average (GPA) of 3.50 or higher.
- Part-time enrolled student (between 5 and 11 credit hours) who has completed at least 26 credit hours of course work at IUPUI and who has a semester and IU cumulative grade point average (GPA) of 3.50 or higher.

Courses assigned a deferred grade (R) will count toward the 12 credit hour minimum required of full-time students. Courses taken on a Pass/Fail basis will not count toward the 12 credit hour minimum. Students who received an Incomplete (I) will not be placed on the Science Scholars List or the Dean's Honor List. No Science Scholars List or Dean's Honor List is published for the summer sessions.

Candidates for Baccalaureate Degrees

Students are considered to be candidates in good standing for baccalaureate degrees awarded by the School of Science when they have been admitted as regular students by the Undergraduate Admissions Center, when their last semester's grade point average is not less than a 2.00, and when their cumulative grade point average is not below this same level (2.00).

Double Major

A double major is awarded to students who complete the requirements for two Purdue Bachelor of Science degree programs or two Purdue Bachelor of Arts degree programs in the School of Science. Students who plan to double major must have their programs approved by both major departments and the academic dean or director. A form to declare a double major can be obtained from the School of Science, LD 222. A student declaring a double major must satisfy the departmental requirements for the second major as stated in the School of Science bulletin in effect when the second major is approved.

Double Degree

A student may be awarded two degrees by completing bachelor's degree programs from two different schools at IUPUI or by simultaneously completing two baccalaureate major programs from the School of Science, one leading to a Purdue Bachelor of Arts degree and the other leading to a Purdue Bachelor of Science degree, or one leading to a Purdue degree and the other leading to an Indiana University degree. A student who plans to pursue a double degree must receive approval from the two major departments and the academic deans of the schools awarding the degrees. A form to petition for a double degree can be obtained from the School of Science, LD 222. A student who declares a double degree, and who is accepted by a department in the School of Science for the additional degree program, must satisfy the requirements for that program as stated in the School of Science bulletin in effect when the additional degree program is approved.

Change of Major within the School of Science

A student who desires to change majors within the School of Science should petition the School of Science, LD 222. If the petition is approved, the student may be placed under the bulletin in effect during the time of admission into the new major.

Second Baccalaureate Degree

Normally the holder of a bachelor's degree who wishes to pursue a further educational goal is encouraged to consider a graduate degree program. However, a student interested in pursuing a second degree should apply through the IUPUI Undergraduate Admissions Center, Campus Center Room 255, 420 University Boulevard, Indianapolis, IN 46202. Further information and application forms may be obtained at this address, by calling (317) 274-4591, or online at www.enroll.iupui.edu.

In order to be admitted to the degree program, the applicant must meet admission requirements of the School of Science and of the department. If admitted, the candidate will be placed under the bulletin in effect during the time of admission into the second-degree program.

Degrees Awarded with Distinction

IUPUI recognizes outstanding performance in course work by awarding bachelor's degrees with distinction. Purdue degrees are awarded with distinction and highest distinction. Indiana University degrees are awarded with distinction, high distinction, and highest distinction.

To award graduation with distinction for baccalaureate degrees, there must be at least 20 students in the respective pool of Spring semester candidates.

To be eligible for graduation with distinction, candidates must complete all the requirements of their degree programs. Additionally, the following conditions apply:

- A candidate for a baccalaureate degree with distinction must have a minimum of 65 credit hours of course work from Purdue University or Indiana University applicable to the graduation index (degree grade point average) on record.
- The minimum graduation index for distinction (Purdue and IU degrees) shall be no less than the 90th percentile of the graduation indexes of all the graduates in the school for the spring semester, provided that the index is at least 3.30;
- Of those who qualify for distinction under these rules for the Spring semester, the six-tenths of the baccalaureate graduates having the highest graduation indexes shall be designated as graduating with high distinction (IU degrees only);
- Of those who qualify for distinction under these rules for the Spring semester, the three-tenths of the baccalaureate graduates having the highest graduation indexes shall be designated as graduating with highest distinction (Purdue and IU degrees);
- The minimum graduation indexes determined for the Spring semester for graduation with distinction, high distinction, and highest distinction shall be applied for graduation with those respective levels of distinction for the subsequent Summer sessions and Fall semester.

Academic Standing

Academic Warning

A student whose IU semester grade point average (GPA) falls below a 2.00, but whose IU cumulative GPA is a 2.00 or higher will be placed on academic warning. Students on academic warning will be required to meet with their academic advisor before being able to register for classes. A student will be advised of academic warning status by letter from the Associate Dean for Academic Affairs.

Academic Probation

A student whose IU cumulative grade point average (GPA) falls below a 2.00 will be placed on probation. The student may continue studies provided the student achieves an IU GPA of at least 2.00 for each semester while on probation. Once the IU cumulative GPA is at least 2.00, the student will be removed from probationary status. A student will be advised of probationary status by letter from the Associate Dean for Academic Affairs.

Dismissal

A student on probation who has completed a minimum of 12 IUPUI grade point average (GPA) hours is subject to dismissal if the student fails to attain an IU semester GPA of at least 2.00 in any two consecutive IUPUI semesters (Fall and Spring), including the semester that the student was first placed on probation and when the student's IU cumulative GPA is below a 2.00.

A student can also be dismissed from the university when, in the opinion of the Associate Dean for Academic Affairs of the School of Science, the student has ceased making progress in the degree program.

Readmission

A student dismissed for the first time must remain out of school at least one regular (Fall or Spring) semester. During the semester out of school, the student may petition the School of Science for readmission. A student dismissed for the second time must remain out of school at least two regular semesters (Fall and Spring), but may petition for readmission during the second semester out of school. Readmission after a second dismissal is extremely rare.

In order to allow sufficient time for considering a petition for readmission, a student eligible to submit a petition should do so before June 15 for the Fall semester, October 15 for the Spring semester, or March 15 for either Summer session.

A student readmitted will be so informed by letter from the Associate Dean for Academic Affairs. The letter will

indicate any conditions and restrictions affecting readmission and continuance in the degree program.

Awards & Scholarships

School of Science

- **D. J. Angus Scientech Educational Foundation Scholarship** is awarded to an undergraduate science major from Marion County, or one of the contiguous counties, who has demonstrated financial need, a minimum grade point average of 2.80, and shows future promise.
- **Frank G. and Ernestine M. Lambertus Scholarship** is awarded to a student who has demonstrated progress and significant improvement in his/her academic program, and who is a working student or who otherwise demonstrates financial need. Preference will be given to a student who is from central Indiana and to a student who demonstrates civic engagement.
- **John D. Barnwell Memorial Scholarship** is awarded to a student in the School of Science who has effectively integrated the sciences and the arts into his or her undergraduate career.
- **Indianapolis Project SEED Scholarship** is awarded to an IUPUI undergraduate student who is pursuing his/her first degree in science, engineering, technology or one of the health sciences and who has successfully participated in the American Chemical Society Indiana Chapter Project SEED summer research program. Preference will be shown to a School of Science major. It is renewable based on academic performance.
- **Robert W. Tuveson Memorial Scholarship** is awarded to a student majoring in the biological sciences. Consideration is given to financial need, academic performance, and future promise.
- **David E. White Alumni Scholarshi**p is awarded to a School of Science major who plans to graduate within one year of receiving the scholarship and who has demonstrated how his/her personal life experiences have affected his/her educational career.
- **School of Science Dean's Scholarships and Health and Life Sciences Scholarships** recognize School of Science and health and life science majors attending IUPUI who excel academically and show promise of success in their future careers.
- **Women in Science Scholarships** are awarded to School of Science majors selected to live in the Women in Science residential learning community. Selection is based on academic achievement and educational and career goals.

Department of Biology

- **Award for Outstanding Academic Achievement** is awarded to the student with the best overall academic record in the Department of Biology.
- **Biology Research Awards** are awarded to undergraduate and graduate students making the most outstanding contributions in scientific research.
- **Elizabeth Steele Creveling Memorial Scholarship** is awarded to the outstanding continuing graduate student pursuing a thesis program in the Department of Biology.
- **Richard O. McCracken Memorial Scholarship** is awarded to the outstanding sophomore or junior biology major.
- **Ronald E. Kirk Memorial Award** is awarded to the outstanding freshman biology student.
- **The Tah Tah Self Achievement Award** is awarded to a biology major who plans to pursue a medical career. Preference is shown to African American females.

Department of Chemistry and Chemical Biology

- **American Institute of Chemists Student Research and Recognition Award** is awarded to an outstanding senior student majoring in chemistry.
- **Wilmer K. Fife Memorial Scholarship** is awarded to a chemistry major who is a single parent and demonstrates financial need. The scholarship is renewable and covers tuition and fees.
- **Chemical Rubber Company Outstanding Freshman Award** is awarded to the outstanding student in general chemistry.
- **Frank J. Welcher Award** is awarded to the graduating senior with greatest professional promise.
- **Loren T. Jones Award** is awarded to the graduating senior with the highest academic achievement in a Bachelor of Science degree program.
- **Loren T. Jones Memorial Scholarship** is awarded as summer support to an outstanding chemistry major.
- **Outstanding Undergraduate Analytical Chemistry Award** sponsored by the American Chemical Society.
- **Patricia A. Boaz Award** is awarded to the graduating senior with highest academic achievement in a Bachelor of Arts degree program.
- **Scott Alan Kent Memorial Scholarshi**p is awarded to a promising sophomore or junior chemistry major.
- **Rich-Keller Elementary Chemistry Scholarship** is awarded each semester to students who excel in CHEM-C101 and CHEM-C121 with a minimum 3.00 grade point average for each course. Preference will be shown to students who demonstrate financial need.

Department of Computer and Information Science

- **Gersting Graduate Student Award** is awarded to an outstanding graduating graduate student in computer and information science.
- **Gersting Undergraduate Student Award** is awarded to an outstanding graduating senior in computer and information science.

Department of Earth Sciences

- **Academic Achievement Award** is awarded to the graduating senior with highest academic achievement.
- **Arthur Mirsky Geology Graduate Scholarship** is awarded to an outstanding master's degree student.
- **Geology Alumni Scholarship** is awarded to a senior geology major.
- **Indiana Geology and Gem Society Scholarship** is awarded to a sophomore or junior geology major.
- **Leadership and Service Award** is awarded to the graduating senior with outstanding leadership and service to the department.

Environmental Science Program

- **Carl H. Johnson Achievement Scholarship** memorializes Susan Cornacchione's father. Inspired by Matt and Susan Cornacchione's daughter, it supports students working in interdisciplinary fields of

applied environmental problems. Preference will be shown to a student who is pursuing a degree in earth or environmental sciences or is succeeding in spite of learning challenges.
- **The Center for Earth and Environmental Science (CEES) Engaged Scholar Award** supports students working in interdisciplinary fields of applied environmental problems.

Forensic and Investigative Sciences Program

- **Academic Achievement Award** is given for outstanding achievement, including high grade point average and challenging course enrollment.
- **Student Leadership Award** is awarded to a student with outstanding leadership and service to the program.

Department of Mathematical Sciences

- **Anna K. Suter Outstanding Undergraduate Student Achievement Award** is awarded to the outstanding senior mathematics major.
- **Anna K. Suter Scholarship** is awarded to full-time undergraduate mathematics majors. It is renewable based on academic performance.
- **Best Academic Performance by a Graduate Student Award** is awarded for exceptional scholastic performance by a beginning graduate student (before Master's degree is earned or pre-qualifying exams) and an advanced graduate student (post-qualifying exam).
- **The Igor Kuznetsov Outstanding Teaching Award** by a Graduate Student is awarded for outstanding performance in classroom teaching by a graduate student.
- **Outstanding Undergraduate Award** is awarded to an outstanding junior or senior (or both) based on achievements in advanced mathematics.
- **Yuri Abramovich Memorial Scholarship** is awarded to an undergraduate or graduate student who is enrolled in the School of Science and who has a keen interest in the study of mathematics, who demonstrates academic excellence especially in mathematics courses beyond the sophomore level, and who shows promise for a career in mathematics.

Department of Physics

- **D. J. Angus-Scientech Award** is awarded by the Physics Department to the most improved sophomore or junior student in the physical sciences and engineering.
- **The Forrest Meiere Prize for Outstanding Physics Major** is awarded to the undergraduate major with the best academic record.
- **Outstanding Graduate Student Award** is based upon achievements in research and academics.
- **The University Physics Award** is awarded to the best student in the PHYS 15200/PHYS 25100-course sequence.

Department of Psychology

- **Robert I. Long Award** recognizes contributions, leadership, and service to other psychology students, the department, or the School of Science.
- **Robert G. Neel Undergraduate Academic Achievement Award** recognizes outstanding academic performance, as exemplified through the GPA for course work completed at IUPUI.
- **Undergraduate Research Award** recognizes student contributions to psychological science, particularly with regard to the development and testing of research ideas, the carrying out of research, and the dissemination of scholarly products based on research.
- **Bingham Psi Chi Scholarship** recognizes outstanding academic performance and leadership activities in the service of Psi Chi and the Psychology Club. The award was endowed by Deidre Bingham, a 2003 graduate of the Department of Psychology, and an active student leader.
- **John F. Kremer Undergraduate Mentor Award** recognizes the peer mentor who best exemplifies the characteristics associated with this success: dedication, relentless persistence, creativity, enthusiasm, flexibility, and the ability to connect with all students. Throughout his career, John Kremer believed that peer mentors could have a powerful effect on student success in Introductory Psychology.
- **Outstanding Student Teaching Award** recognizes outstanding graduate student teaching assistance for their superior ability to import knowledge of chosen topics to students and to stimulate their desire to master such topics. The award recognizes that teaching extends beyond the classroom and includes activities such as mentoring and motivating students either formally or informally.
- **Paul J. McKinley Award** recognizes an outstanding doctoral student in the Psychobiology of Addictions program.
- **Industrial/Organizational Graduate Psychology Award** recognizes an outstanding master's student in I/O Psychology.
- **Clinical Psychology Award for Research Excellence** recognizes a graduate student with outstanding performance in research -- going above and beyond the research requirements of the graduate degree. Indicators of research excellence may include presentations of research, particularly at regional or national conferences, publications, grant applications, and thesis or dissertation projects that are especially innovative or exemplary in theory, design, or execution.
- **Clinical Psychology Award for Citizenship** recognizes a graduate student with outstanding performance in citizenship service to the department. Citizenship can be exemplified in two key domains: Personal Support and Organizational Support. Personal support includes helping other students, faculty, and staff, being cooperative, treating others with courtesy, and providing encouragement. Organization support is evidenced by positively representing the psychology department, supporting our mission and objectives, following rules and procedures, and suggesting improvements.
- **Outstanding Practicum Supervisor Award** recognizes exemplary supervision and training provided to graduate students in clinical psychology who are engaged in clinical practica.

Other Recognition

In addition, many science honor students compete successfully for scholarships awarded by IUPUI. Freshmen with a high level of achievement are eligible for election to the IUPUI chapters of Alpha Lambda Delta and Phi Eta Sigma honorary societies. Psychology majors may be elected to the Psi Chi Honorary, which recognizes outstanding students in that discipline.

Distinguished Faculty and Staff Awards

The School of Science proudly salutes faculty and staff who have distinguished themselves in the areas of teaching, research, service, and academic advising. The following full-time faculty and staff have been chosen by their colleagues and students to receive awards in recognition of their outstanding contributions to the academic mission of the School of Science and the university.

W. David Laverell	1975
L. Kent Morrison	1976
Gordon H. Fricke	1977
Erwin Boschmann	1978
Frederick W. Kleinhans	1978
Terry L. Hall	1979
Robert D. Hall	1980
John F. Kremer	1980
Patricia A. Boaz	1981
Martin J. O'Donnell	1981
Forrest T. Meiere	1982
Peter W. Rabideau	1982
Frederick C. Thatcher	1982
Erwin Boschmann	1983
Robert D. Hall	1983
David J. Malik	1983
Martin J. O'Donnell	1983
Stanley Aeschleman	1984
Elaine V. Alton	1984
Patricia A. Boaz	1984
Marvin D. Kemple	1984
John F. Kremer	1984
B. D. Nageswara Rao	1984
Richard Bodonyi	1985
Frederick W. Kleinhans	1985
Arthur Mirsky	1985
Richard G. Pflanzer	1985
D. W. Rajecki	1985
J. Roger Ware	1985
Shirley A. Bayer	1986
Joan B. Lauer	1986
J. Roger Ware	1986
C. D. Aliprantis	1987
Owen Burkinshaw	1987
Judith L. Gersting	1987
John F. Kremer (two awards)	1987
Richard R. Patterson	1987
J. Roger Ware	1987
Pascal de Caprariis	1988
Theodore W. Cutshall	1988
Robert D. Hall	1988
Charles Schauf	1988
C. D. Aliprantis	1989

Marilyn K. Baker*	2011
Christopher T. Dona	2011
John C. Guare	2011
Lin Li	2011
Joshua D. Morrison*	2011
Stephen K. Randall	2011
John C. Watson	2011

*Professional staff member.

Student Services, Organizations, Scholarships and Awards

Career Development Services

The Office of Career Development Services (CDS) provides comprehensive career services for all School of Science undergraduate students, graduate students, and alumni. This includes individual appointments, walk-in advising, workshops, and classroom presentations. Our staff can help with each step of the career development process including career exploration, developing professional experience through internships, job shadowing and volunteering, and preparing for graduate school and the world of work. We help students learn to identify and articulate their unique skills and strengths, particularly through creating effective résumés, cover letters, graduate school essays and when preparing for interviewing and networking. Since most students seek higher education in order obtain good career prospects or to advance to graduate or professional school, Career Development Services should be a component of your academic and professional planning.

The Office of Career Development Services is located in the lower level of Taylor Hall, B006D.

Extracurricular Activities

A wide variety of activities are available to School of Science students, both activities sponsored by the School of Science and those open to all students. Students seeking involvement in campus-wide activities, such as the IUPUI Undergraduate Student Government, should contact the Office of Student Involvement, Campus Center third floor, call (317) 274-3931, email osi@iupui.edu, or visit http://life.iupui.edu/osi/

Clubs and Organizations in the School of Science

The following activities are of particular interest to students in the School of Science:

Science Undergraduate Student Council and Science Graduate Student Council

These councils, composed of student representatives from each department in the School of Science, advise the dean and the school on matters of concern to students. Each council decides how to allocate the student activity fee to support school projects, departmental and program clubs, and other initiatives.

Departmental and Program Student Organizations

Most departments and programs within the School of Science sponsor clubs and other activities for majors and interested students. Contact the specific department or program for additional information.

Faculty Emeriti

- Appleby, Drew C., Professor Emeritus of Psychology (1999): B.A., 1969, Simpson College; M.S., 1971, Ph.D., 1972, Iowa State University. Specialty: Teaching and Learning.
- Bittinger, Marvin, Honorary Emeritus Professor of Mathematical Sciences (1968); B.A., 1963, Manchester College; M.S., 1965, The Ohio State University; Ph.D., 1968, Purdue University. Specialty: Mathematics Education.
- Boaz, Patricia A., Associate Professor Emerita of Chemistry (1967); B.S., 1944, Vassar College; Ph.D., 1951, State University of Iowa. Specialties: General Chemistry, Physical Chemistry, Geochemistry.
- Bond, Gary R., Chancellor's Professor Emeritus of Psychology (1983); B.S., 1966, Michigan State University; M.A., 1972, Ph.D., 1975, University of Chicago. Specialties: Psychiatric Rehabilitation, Program Evaluation.
- Boschmann, Erwin, Associate Vice President for Distributed Education and Professor Emeritus of Chemistry (1968); B.A., 1963, Bethel College (Kansas); M.S., 1965, Ph.D., 1968, University of Colorado. Specialties: General Chemistry, Inorganic Chemistry, Bioinorganic Chemistry.
- Burkinshaw, Owen, Professor Emeritus of Mathematical Sciences, (1972); B.S., 1966, M.S., 1968, Ohio University; Ph.D., 1972, Purdue University. Specialty: Functional Analysis.
- Cutshall, Theodore W., Associate Professor Emeritus of Chemistry (1961); B.S.Ch.E., 1949, Purdue University; M.S., 1959, Ph.D., 1964, Northwestern University. Specialty: Organic Chemistry.
- Davis, Robert M., Professor Emeritus of Psychology (1976); B.S., 1958, Salisbury State University; M.Ed., 1962, Pennsylvania State University; Ed.D., 1968, University of Maryland. Specialties: Rehabilitation Psychology, Family Therapy.

- Dubin, Paul L., Professor Emeritus of Chemistry (1981); B.S., 1962, City University of New York; Ph.D., 1970, Rutgers University. Specialties: Analytical Chemistry, Polymer Chemistry.
- Fife, Wilmer K., Professor Emeritus of Chemistry (1971); B.S., 1955, Case Institute of Technology; Ph.D., 1960, The Ohio State University. Specialties: General Chemistry, Organic Chemistry, Biochemistry.
- Fleener, Don E., Associate Professor Emeritus of Psychology (1966); B.S. (Ed), 1949, Indiana Central College; Ph.D., 1967, Indiana University. Specialties: Behavioral Medicine, Clinical Psychology, Developmental Psychology.
- Fortier, Robert H., Associate Professor Emeritus of Psychology (1966); B.S., 1947, Ph.D., 1952, Western Reserve University. Specialties: Child Psychology, Personality.
- Fricke, Gordon H., Associate Dean Emeritus for External Development, School of Science, and Associate Professor Emeritus of Chemistry (1972); B.A., 1964, Goshen College; M.S., 1966, State University of New York at Binghamton; Ph.D., 1970, Clarkson College of Technology. Specialties: General Chemistry, Analytical Chemistry.
- Gersting Jr., John M., Professor Emeritus of Computer Science (2011); B.S., 1962, Purdue University; M.S., 1964, Ph.D., 1969, Arizona State University. Specialties: Databases, Computer Science Education.
- Gersting, Judith L., Professor Emeritus and Chair of Computer Science (2011); B.S., 1962, Stetson University; M.S., 1964, Ph.D., 1969, Arizona State University.
- Goldberg, Carlos I., Associate Professor Emeritus of Psychology, (1969); B.S., 1961, Brooklyn College; M.A., 1964, Ph.D., 1969, City University of New York. Specialties: Social Psychology, Panic Disorder, Agoraphobia, Obsessive-Compulsive Disorder.
- Hanford, Peter V., Professor Emeritus of Psychology, (1960); B.S., 1952, M.S., 1953, Ph.D., 1958, Pennsylvania State University. Specialties: Experimental Analysis of Behavior, Motivation.
- Juillerat, Florence, Associate Professor Emerita of Biology (1966); B.S., 1962, M.S., 1967, Ph.D., 1974, Purdue University. Specialties: Cell Biology, Biology for Teachers, Biology for Nonmajors.
- Kaminker, Jerome A., Professor Emeritus of Mathematical Sciences (1973); B.A., 1963, University of California, Berkeley; M.A., 1965, Ph.D., 1968, University of California, Los Angeles. Specialties: Operator Algebras, K-Theory.
- Kaplan, Jerome I., Professor Emeritus of Physics (1974); B.S., 1950, University of Michigan; Ph.D., 1954, University of California, Berkeley. Specialities: Condensed Matter, Solar Energy, Biological Physics.
- Keck, Robert William, Professor Emeritus of Biology (1972); B.A., 1962, M.S., 1964, University of Iowa; Ph.D., 1968, The Ohio State University. Specialty: Plant Physiology.
- Kleinhans, Frederick W., Associate Professor Emeritus of Physics and Adjunct Professor of Earth Sciences (1972); B.S., 1965, University of Michigan; Ph.D., 1971, The Ohio State University. Specialties: Biological Physics, Computational Physics.
- Kleyle, Robert M., Professor Emeritus of Mathematical Sciences (1973); B.A., 1960, Duquesne University; M.S., 1962, University of Pittsburgh; Ph.D., 1968, Harvard University. Specialty: Statistics.
- Kremer, John F., Professor Emeritus of Psychology (1975); B.A., 1966, St. Meinrad College; M.S., 1969, University of Notre Dame; M.S., 1974, Ph.D., 1975, Loyola University. Specialties: Clinical Psychology, Evaluating Teaching, Teaching Introductory Psychology.
- Kuczkowski, Joseph E., Associate Dean Emeritus for Academic Programs and Student Development, School of Science, and Professor Emeritus of Mathematical Sciences (1966); B.S., 1961, Canisius College; M.S., 1963, Ph.D., 1968, Purdue University. Specialties: Semigroup Theory, Mathematics Education, College Student Development.
- Lauer, Joan B., Associate Professor Emerita of Psychology (1973); A.B., 1964, Ph.D., 1973, Indiana University. Specialties: Clinical Psychology, Physiological Psychology, Learning.
- Luke, John, Associate Professor Emeritus of Mathematical Sciences and Associate Professor of Computer and Information Science (1975); B.S., 1962, M.S., 1963, Massachusetts Institute of Technology; Ph.D., 1966, California Institute of Technology. Specialty: Applied Mathematics.
- Meiere, Forrest T., Professor Emeritus of Physics (1969); B.S. (Physics) and B.S. (Mathematics), 1959, Carnegie-Mellon University; Ph.D., 1964, Massachusetts Institute of Technology. Specialties: High Energy Physics, Biological Physics.
- Miller, John Grier, Associate Professor Emeritus of Mathematical Sciences (1978, IUPU Columbus); S.B., 1963, S.M., 1964, University of Chicago; Ph.D., 1967, Rice University. Specialty: Geometric and Algebraic Topology.
- Mirsky, Arthur, Professor Emeritus of Geology (1967); B.A., 1950, University of California, Los Angeles; M.S., 1955, University of Arizona; Ph.D., 1960, The Ohio State University. Specialties: Urban Geology, Environmental Geology, Geowriting, Evolution of the Earth.
- Murphy, James M., Professor Emeritus of Psychology, Associate Dean for Research and Graduate Education, School of Science (1989); B.A., 1971, Edinboro University of Pennsylvania; M.A., 1974, Ph.D., 1978, Bowling Green State University. Specialities: Psychopharmacology and the Neurobiology of Behavior, Alcoholism and Drugs of Abuse.
- Ng, Bart, Professor Emeritus of Mathematics (2011); B.S., 1968, St. Joseph College; M.S., 1970, Ph.D., 1973, University of Chicago. Specialty: Applied Mathematics.
- Novak, Gregor M., Professor Emeritus of Physics (1964); M.S., 1964, University of Chicago; Ph.D., 1975, Indiana University. Specialties: Physics Education, Mathematical Physics.
- Nurok, David, Associate Professor Emeritus of Chemistry (1978); B.Sc., 1959, Ph.D., 1966, University of Cape Town, South Africa. Specialties: Analytical Chemistry, Chromatography.

- Ockerse, Ralph, Professor of Biology (1976); B.A., 1956, State Teachers College, Netherlands; B.S., 1962, Baldwin Wallace College; Ph.D., 1966, Yale University. Specialties: Plant Physiology, Cellular Biochemistry.
- Olson, Andrew M., Associate Professor Emeritus of Computer and Information Science (1984); B.S., 1959, University of Wyoming; M.S., 1961, University of Wisconsin; D.Sc., 1969, Washington University. Specialties: Computational Mathematics, Advanced Computing Environments, Software Engineering.
- Patterson, Richard R., Associate Professor Emeritus of Mathematical Sciences and Associate Professor of Computer and Information Science (1974); B.A., 1961, DePauw University; Ph.D., 1966, University of California, Berkeley. Specialty: Geometric Modeling.
- Pflanzer, Richard Gary, Associate Professor Emeritus of Biology, School of Science, and Associate Professor of Physiology and Biophysics, School of Medicine (1969); A.B., 1964, Ph.D., 1969, Indiana University. Specialty: Medical Physiology.
- Rajecki, D. W., Professor Emeritus of Psychology (1980); B.A., 1968, Kent State University; Ph.D., 1972, University of Michigan. Specialty: Attitudes and Public Opinion.
- Reid, William H., Professor Emeritus of Mathematical Sciences (1989); B.S., 1949, M.S., 1951, University of California, Berkeley; Ph.D., 1955, Sc.D., 1968, Cambridge University, U.K. Specialty: Applied Mathematics.
- Rigdon, Robert, Associate Professor Emeritus of Mathematical Sciences (1975); A.B., 1965, Princeton University; Ph.D., 1970, University of California, Berkeley. Specialty: Algebraic Topology.
- Rothman, Neal J., Professor Emeritus of Mathematical Sciences (1982); B.S., 1951, University of Delaware; M.S., 1954, Tulane University; Ph.D., 1958, Louisiana State University. Specialties: Functional Analysis, Harmonic Analysis.
- Rytting, Marvin, Associate Professor Emeritus of Psychology (1975, IUPU Columbus); B.S., 1971, Brigham Young University; M.S., 1973, Ph.D., 1975, Purdue University. Specialties: Personality Theory, Social Psychology, Human Sexuality.
- Seubert, James W., Associate Professor Emeritus of Physics (1968); A.B., 1958, Washington University; M.S., 1964, Ph.D., 1968, Indiana University. Specialty: Nuclear Physics.
- Stillwell, William H., Professor Emeritus of Biology (1978); B.S., 1967, State University of New York at Albany; M.S., 1973, Ph.D., 1974, Pennsylvania State University. Specialties: Biochemistry, Membranes, Origin of Life.
- Stocum, David L., Dean Emeritus of the School of Science and Professor of Biology (1989); B.A., 1961, Susquehanna University; Ph.D., 1968, University of Pennsylvania. Specialties: Developmental Biology, Regenerative Biology.
- Sunderwirth, Stanley G., Professor Emeritus of Chemistry (1988, IUPU Columbus); B.A., 1951, Tarkio College; Ph.D., 1955, The Ohio State University. Specialties: General Chemistry, Organic Chemistry.
- Svanum, Soren, Associate Professor Emeritus of Psychology (1976); A.B., 1971, San Francisco State University; M.A., 1973, Ph.D., 1976, University of Montana. Specialties: Clinical Psychology, Alcoholism, Health Care Psychology.
- Tzeng, Oliver C. S., Professor Emeritus of Psychology (1976); B.Ed., 1966, National Taiwan Normal University, Republic of China; M.S., 1969, University of Wisconsin-Stout; Ph.D., 1972, University of Illinois. Specialties: Quantitative Psychology, Cross-Cultural Social Psychology, Personality.
- Vasavada, Kashap V., Professor Emeritus of Physics (1970); B.S., 1958, University of Baroda, India; M.S., 1960, University of Delhi, India; Ph.D., 1964, University of Maryland. Specialties: High Energy Physics, Biological Physics.
- Ware, Joseph Roger, Associate Professor Emeritus of Psychology (1972); B.S., 1957, M.S., 1961, University of Louisville; Ph.D., 1972, University of Kentucky. Specialties: Personality Theory, Humanistic Psychology, Group Dynamics, Psychological Type.
- Welcher, Frank J., Professor Emeritus of Chemistry (1935); A.B., 1929, M.A., 1930, Ph.D., 1932, Indiana University. Specialties: Analytical Chemistry and General Chemistry.
- Wyma, Richard J., Associate Professor Emeritus of Chemistry (1969); A.B., 1958, Hope College; M.S., 1960, Ph.D., 1964, University of Michigan. Specialties: General Chemistry, Physical Chemistry.
- Yovits, Marshall C., Dean Emeritus, School of Science, and Professor Emeritus of Computer and Information Science (1980); B.S., 1944, M.S., 1948, Union College; M.S., 1950, Ph.D., 1951, Yale University. Specialties: Information Systems, Decision Making.

Resident and Adjunct

- Acheson, Lingma L., Lecturer in Computer and Information Science (2007); M.S., 2004, Purdue University. Specialties: Databases, Web Development.
- Al Hasan, Mohammad, Assistant Professor in Computer and Information Science (2010); B.Sc., 1998, Bangladesh University of Engineering and Technology; M.S., 2002, University of Minnesota; Ph.D., 2009, Rensselaer Polytechnic Institute. Specialty: Data Mining.
- Alexy, William D., Adjunct Assistant Professor of Psychology (1992); B.A., 1971, Concord College; M.A., 1972, Radford University; Ph.D., 1981, State University of New York at Buffalo. Specialty: Rehabilitation Counseling.
- Ammerman, Gina M., Lecturer in Forensic and Investigative Sciences (2006); B.S., 2004, Ball State University; M.S., 2006, Purdue University. Specialities: Analytical Chemistry, Forensic Chemistry.
- Anderson, Gregory G., Assistant Professor of Biology (2009); B.S., 1998, Brigham Young University; Ph.D., 2004, Washington University in St. Louis. Specialty: Microbiology.
- Anliker, Keith S., Senior Lecturer in Chemistry and Chemical Biology (2002); B.A., 1982, University of Northern Iowa; M.S., 1985, Purdue University. Specialty: Chemical Education.
- Arciero, Julia, Assistant Professor in Mathematical Sciences (2011); B.S., 2003, University of Michigan;

M.S., 2005, Ph.D., 2008, University of Arizona. Specialty: Mathematical Biology/Physiology.

- Ashburn-Nardo, Leslie, Associate Professor of Psychology (2003); B.A., 1994, Wake Forest University; M.A., 1997, University of North Carolina at Wilmington; Ph.D., 2003, University of Kentucky. Specialty: Social Psychology.
- Atkinson, Simon J., Chair and Professor of Biology (2010); B.Sc., 1986, King's College London; Ph.D., 1990, University of Cambridge. Specialties: Cell Biology, Kidney Disease, Microscopy.
- Austin, Joan K., Adjunct Professor of Psychology (1997); B.S.N., 1976, Texas Woman's University; M.S.N., 1978, D.N.S., 1981, Indiana University. Specialty: Psychiatric/Mental Health Nursing.
- Babbar-Sebens, Meghna, Assistant Professor of Earth Sciences (2008); B.Eng., 2000, Indian Institute of Technology; M.S., 2002, Ph.D., 2006, University of Illinois at Urbana-Champaign. Specialties: Water Resources Systems Analysis, Water Quality, Hydrology, Environmental Sustainability.
- Badia-Elder, Nancy E., Adjunct Assistant Scientist in Psychology (1995); B.A., 1990, Fort Hays State University; M.S., 1992, Ph.D., 1995, Kansas State University. Specialty: Behavioral Neuroscience.
- Bard, Martin, Professor of Biology (1975); B.S., 1965, City College of New York; Ph.D., 1971, University of California, Berkeley. Specialty: Molecular Genetics.
- Barman, Charles R., Adjunct Associate Professor of Biology (1994); B.S., 1968, University of Wisconsin-Oshkosh; M.S.T., 1972, University of Wisconsin-Superior; Ed.D., 1974, University of Northern Colorado. Specialty: Teacher Education.
- Barth, Andrew P., Professor of Earth Sciences (1989); B.S., 1981, M.S., 1985, California State University, Los Angeles; Ph.D., 1989, University of Southern California. Specialties: Petrology, Geochemistry.
- Belecky-Adams, Teri L., Associate Professor of Biology (2001); B.S., 1985, University of Wyoming; Ph.D., 1994, University of Cincinnati College of Medicine. Specialties: Developmental Biology, Retinal Regeneration.
- Bell, Rick L., Adjunct Assistant Professor of Psychology (2007); B.A., 1994, Minot State University; M.A., 1996, Ph.D., 1998, University of New Orleans. Specialty: Applied Biopsychology.
- Blacklock, Brenda J., Research Professor in Chemistry and Chemical Biology (2005); B.S., 1989, University of Waterloo; Ph.D., 1994, University of Alberta. Specialty: Biochemistry.
- Blazer-Yost, Bonnie J., Professor of Biology (1993); B.S., 1973, Lebanon Valley College; Ph.D., 1984, University of Pennsylvania. Specialty: Physiology.
- Bleher, Paul M., Chancellor's Professor of Mathematical Sciences (1994); M.S., 1970, Moscow State University, U.S.S.R.; Ph.D., 1974, Institute of Applied Mathematics of the Russian Academy of Sciences, U.S.S.R. Specialties: Probability Theory, Mathematical Physics, Statistical Physics.
- Boehm II, Stephen L., Associate Professor of Psychology (2009); B.A., 1994, M.A., 1996, University of Northern Colorado; Ph.D., 2002, Oregon Health and Science University. Specialty: Behavioral Neuroscience.
- Boukai, Benzion, Co-Director of Biostatistics Ph.D. Program (2008) and Professor of Mathematical Sciences (1990); B.A., 1983, M.A., 1985, University of Haifa, Israel; Ph.D., 1988, State University of New York at Binghamton. Specialties: Statistical Theory, Applied Statistics, Applied Probability.
- Boyd, Donald, Research Professor of Chemistry and Chemical Biology (1986); B.S., 1963, Pennsylvania State University; Ph.D., 1968, Harvard University. Specialty: Organic Chemistry.
- Brothers, Timothy S., Adjunct Associate Professor of Earth Sciences (1984); B.A., 1978, University of California, Davis; M.A., 1981, Ph.D., 1985, University of California, Los Angeles. Specialties: Biogeography, Human Impacts on Vegetation.
- Buse, Olguta, Assistant Professor of Mathematical Sciences (2005); B.S., 1996, University of Bucharest; Ph.D., 2002, SUNY at Stony Brook. Specialty: Symplectic Geometry, Algebraic Topology.
- Carpentier, Melissa Y., Adjunct Assistant Professor of Psychology (2009); B.A., 2001, Our Lady of the Lake University, San Antonio, Texas, M.S., 2003, Ph.D., 2007, Oklahoma State University. Specialty: Health Psychology.
- Chandrasekhar, Srinivasan, Adjunct Assistant Professor of Biology (1987); B.Sc., 1970, M.S., 1973, University of Madras, India; M.Sc., 1977, Ph.D., 1981, State University of New York at Albany. Specialty: Developmental Biology.
- Chang, Hua-Chen, Assistant Professor of Biology (2009); B.S., 1991, National Chung Hsing University; M.S., 1996, Ph.D., 2000, Purdue University. Specialty: Immunology.
- Chen, Yue (Jake), Associate Professor of Computer and Information Science and Informatics (2004); B.S., 1995, Peking University, China; M.S., 1997, Ph.D., 2001, University of Minnesota-Twin Cities. Specialties: Bioinformatics, Data Warehousing, Data Mining.
- Cheng, Ruihua, Assistant Professor of Physics (2005); B.Sc., 1993, Northern Jiaotong University; M.Sc., 1996, Northern Jiaotong University; M.Sc., 2000, University of Nebraska-Lincoln; Ph.D., 2002, University of Nebraska-Lincoln. Specialties: Condensed Matter, Magnetic Nano Structures.
- Chernoff, Ellen A. G., Associate Professor of Biology (1986); B.A., 1973, Ph.D., 1978, University of Chicago. Specialties: Developmental Biology, Regenerative Biology.
- Chin, Raymond C. Y., Professor of Mathematical Sciences (1990); B.A.E., 1962, M.A.E., 1964, Rensselaer Polytechnic Institute; Ph.D., 1970, Case Western Reserve University. Specialties: Parallel Solution of Partial Differential Equations, Asymptotic-Numerical Methods.
- Chintalacharuvu, Subba, Adjunct Professor in Biology (2002); B.Sc., 1990, Osmania University; Ph.D., 1996, Case Western Reserve University; Eli Lilly & Company Senior Biologist. Specialties: Glyobiology, Immunology.
- Chism, Grady W., III, Adjunct Professor of Biology (2004); Ph.D., 1973, University of Massachusetts. Specialties: Food Science, Biology Teaching.

- Clack, James W., Associate Professor of Biology (1990, IUPU Columbus); B.A., 1974, Indiana University; Ph.D., 1982, Purdue University. Specialties: Neurobiology, Visual Physiology.
- Clark, Patricia, Lecturer in Biology (2003); B.A., 1983, Franklin College; M.A., 1986, Ph.D., 2000, Indiana University. Specialties: Ecology and Ethology, Biology Education.
- Cohen, Michael R., Adjunct Professor of Earth Sciences (1968); B.S., 1960, City University of New York; M.A., 1963, Columbia University; M.S.T., 1964, Ph.D., 1968, Cornell University. Specialties: Science and Environmental Education.
- Colquitt, Alan L., Adjunct Associate Professor of Psychology (2009); B.A., 1982, Indiana University; Ph.D., 1986, Wayne State University. Speciality: Industrial/Organizational Psychology.
- Compton, Kathy, Lecturer in Psychology (2001, IUPU Columbus); B.A., 1993, Purdue University; M.S.W., 1996, Indiana University. Specialties: Clinical, Families and Children.
- Contino, Lisa, Senior Lecturer in Psychology (2002); B.A., 1972, Indiana University; M.S., 1975, Ph.D., 2000, Indiana University-Purdue University Indianapolis. Specialties: Clinical Rehabilitation Psychology (child and adolescent), Teaching of Psychology.
- Cowen, Carl C., Professor of Mathematical Sciences and Program Director, Actuarial Sciences (2004); A.B., 1967, M.A., 1971, Indiana University; Ph.D., 1976, University of California, Berkeley. Specialties: Linear Algebra, Operator Theory.
- Cross, William, Senior Lecturer in Mathematical Sciences (2007); B.S., 1990, California Institute of Technology; M.S., 1991, University of Chicago; Ph.D., 1995, University of Michigan. Specialty: Actuarial Science.
- Cyders, Melissa A., Assistant Professor of Psychology (2009); B.A., 2003, The Ohio University; M.S., 2005, Ph.D., 2006, University of Kentucky. Specialty: Clinical Psychology.
- Czachowski, Cristine, Associate Professor of Psychology (2007); B.S., 1989, Rutgers University; M.A., 1994, Ph.D., 1998, University of California, Santa Barbara.
- Dai, Guoli, Assistant Professor of Biology (2009); D.V.M., 1984, M.S., 1987, Changchun Veterinary University; Ph.D., 1990, Jilin University. Specialty: Regenerative Biology.
- Decca, Ricardo S., Associate Professor of Physics (2000); M.S., 1988, Universidad Nacional de Cordoba and Instituto Balseiro, Universidad Nacional de Cuyo, Argentina; Ph.D., 1994, Instituto Balseiro, Universidad Nacional de Cuyo, Argentina. Specialties: Condensed Matter, Near-Field Scanning Optical Microscopy (NSOM).
- Denton, Ryan E., Academic Specialist in Chemistry and Chemical Biology (2009); B.A., 2003, Anderson University; Ph.D., 2009, Purdue University. Specialties: Organic Chemistry and Chemical Education.
- Devine, Dennis J., Associate Professor of Psychology (1996); B.S., 1990, University of Illinois, Urbana-Champaign; M.A., 1993, Ph.D., 1996, Michigan State University. Specialties: Psychology and Law, Group Decision Making, Team Selection and Training.
- Dona, Christopher T., Lecturer in Mathematical Sciences (2007); B.A., 1998, University of Wisconsin-Milwaukee; B.S., 2001, University of Wisconsin-Oshkosh; M.S., 2006, Purdue University at Indianapolis. Specialties: Mathematics Instruction, Curriculum Development.
- Dria, Karl J., Research Scientist in Chemistry and Chemical Biology (2005); B.S., 1997, Ashland University; M.S., 2000, Ph.D., 2004, The Ohio State University. Specialty: Analytical Chemistry
- Druschel, Greg K., Associate Professor of Earth Sciences (2011); B.S., B.A., 1995, Muskingum College; M.S., 1998, Washington State University; Ph.D., 2002, University of Wisconsin. Specialties: Geochemistry, Geomicrobiology, Mineralogy.
- Dundar, Murat, Assistant Professor of Computer and Information Science; B.Sc., 1997, Bogazici University, Turkey; M.S., 1999, Ph.D., 2003, Purdue University. Specialties: Machine Learning, Pattern Recognition.
- Durresi, Arjan., Associate Professor of Computer and Information Science (2007); B.S., 1986, M.S., 1990, Ph.D., 1993, Polytechnic University of Tirana, Albania. Specialties: Network Architectures, Wireless Networks, Security.
- Engleman, Eric A., Adjunct Assistant Professor of Psychology (2006); B.S., 1984, Indiana University; M.A., 1987, Indiana University Indianapolis; Ph.D., 1992, Indiana University Medical Center. Specialty: Medical Neurobiology.
- Fang, Shiaofen, Chair and Professor of Computer and Information Science (1996); B.S., 1983, M.S., 1986, Zhejiang University, China; Ph.D., 1992, University of Utah. Specialties: Computer Graphics and Visualization.
- Farris, G. Duane, Lecturer in Mathematical Sciences (2005); B.S., 1970, Ball State University; M.S., 1974, Butler University. Specialty: Math Curriculum.
- Felsten, Gary, Associate Professor of Psychology (1993, IUPU Columbus); B.A., 1974, Cornell University; M.S., 1977, Ph.D., 1979, Purdue University. Specialty: Health Psychology.
- Filippelli, Gabriel M., Director of the Environmental Science Program and Professor of Earth Sciences (1994); B.S., 1986, University of California, Davis; Ph.D., 1994, University of California, Santa Cruz. Specialties: Sedimentary Geochemistry, Paleoceanography, Paleoclimatology.
- Fisher, Timothy G., Adjunct Assistant Professor of Earth Sciences (1996); B.Sc., 1987, University of Alberta; M.Sc., 1989, Queen's University; Ph.D., 1993, University of Calgary. Specialties: Glacial Geology, Glacial Sedimentology.
- Fokin, Vladimir, Associate Research Professor of Mathematical Sciences (2002); B.S., 1995, M.S., 1995, Novosibirsk State University, Russia; M.S., 2002, Ph.D., 2005, Purdue University. Specialty: Mathematical Biology.
- Frey, Patrick A., Lecturer in Mathematical Sciences (2006); B.S., 1992, Purdue University; M.S., 2000, Purdue University at Indianapolis. Specialties: Mathematics Education, Content Area Development of Peer Tutors.

- Futrell, David Adjunct Associate Professor (2009); B.S., 1986, Murray State University; Ph.D., 1992, University of Tennessee, Knoxville. Specialty: industrial/Organizational Psychology.
- Gavrin, Andrew D., Chair and Associate Professor of Physics (1995); B.S., 1983, Massachusetts Institute of Technology; M.A., 1986, Ph.D., 1992, The Johns Hopkins University. Specialty: Materials Physics.
- Ge, Haibo, Assistant Professor of Chemistry and Chemical Biology (2009); M.S., 2001, Ph.D., 2006, University of Kansas. Specialty: Organic Chemistry.
- Geller, William, Associate Professor of Mathematical Sciences (1994); A.B., 1982, Harvard University; Ph.D., 1989, University of California, Berkeley. Specialty: Dynamical Systems.
- Ghosh, Swapan K., Adjunct Associate Professor of Earth Sciences (1988); M.S., 1973, University of Wisconsin, Milwaukee; Ph.D., 1975, Syracuse University. Specialties: Geochemistry, Sedimentology, Environmental Chemistry.
- Gilhooly III, William P., Assistant Professor of Earth Sciences (2011); B.A., 1993, M.S., 1996, Ph.D., 2006, University of Virginia. Specialties: Stable Isotope Geochemistry, Biogeochemistry, Geomicrobiology.
- Goodlett, Charles R., Professor of Psychology (1993); B.S., 1977, University of Kentucky; M.A., 1981, Ph.D., 1983, State University of New York at Binghamton. Specialty: Biopsychology.
- Goodpaster, John V., Director of the Forensic and Investigative Sciences Program and Assistant Professor of Chemistry and Chemical Biology (2007); B.A., 1995, Gustavus Adolphus College; M.S., 2000, Ph.D., 2000, Michigan State University. Specialties: Explosives, Canine Detection, Trace Evidence, Chemometrics.
- Grahame, Nicholas J., Associate Professor of Psychology (2005); B.A., 1987, Vassar College; Ph.D., 1992, Binghamton University. Specialty: Behavioral Genetics.
- Guare, John C., Director of Clinical Training in Psychology (2002); B.A., 1977, M.A., 1982, State University of New York College at Brockport; Ph.D., 1991, University of Pittsburgh. Specialty: Health Psychology.
- Guidoboni, Giovanna, Associate Professor of Mathematical Sciences (2010); Laurea, 2000, Ph.D., 2004, University of Ferrara. Speciality: Applied Mathematics.
- Haitjema, Hendrick M., Adjunct Associate Professor of Earth Sciences (part-time), School of Science, and Associate Professor of Public and Environmental Affairs, School of Public and Environmental Affairs (1989); M.S., 1976, Delft University of Technology, Netherlands; Ph.D., 1982, University of Minnesota. Specialties: Groundwater Mechanics, Groundwater Flow Modeling, Soil Mechanics.
- Hansen, Michele J., Adjunct Associate Professor of Psychology (2009); B.A., 1993, Michigan State University; M.A., 1998, Ph.D., 2001, Loyola University. Specialties: Program Evaluation, Outcomes Assessment.
- Harris, Andrew J., Senior Lecturer in Computer and Information Science (1995); B.S., 1990, M.S., 2003, Indiana University-Purdue University Indianapolis. Specialties: General Computing, Multimedia and Game Programming.
- Heiman, Mark L., Adjunct Assistant Professor of Biology (1996); B.A., 1974, University of New Orleans; Ph.D., 1978, Louisiana State University Medical School. Specialties: Physiology, Neuroendocrinology.
- Hernandez, Henry A., Lecturer in Mathematical Sciences (2002); B.A., 1994, Indiana University; M.S., 1998, IUPUI. Specialty: Mathematics Instruction.
- Herold, Deborah S., Lecturer in Psychology, (2006); B.A., 2001, Indiana University; M.A., 2003, Ph.D., 2006, Emory University. Specialty: Cognitive Development.
- Hicks, Clay A., Lecturer in Mathematical Sciences (2002); B.S., 1995, Northwestern University; M.S., 1999, Purdue University (IPFW). Specialty: Mathematics Education and Statistics.
- Hill, James, H., Assistant Professor of Computer and Information Science (2009); B.S., 2004, Morehouse College; M.S., 2006, Ph.D., 2009, Vanderbilt University. Specialties: Agile Software Engineering, Quality of Service.
- Hirsh, Adam T., Assistant Professor of Psychology (2010); B.A., 2001, University of Central Florida; M.S., 2004, Ph.D., 2008, University of Florida. Specialty: Health Psychology.
- Its, Alexander R., Distinguished Professor of Mathematical Sciences (1993); M.S., 1974, Ph.D., 1977, Leningrad State University, U.S.S.R. Specialties: Integrable Systems, Mathematical Physics.
- Its, Elizabeth N., Senior Lecturer in Mathematical Sciences (1997); B.S., 1973, M.S., 1975, Ph.D., 1980, Leningrad State University, U.S.S.R. Specialties: Mathematical Geophysics, Applied Mathematics.
- Jacinthe, Pierre-Andre, Associate Professor of Earth Sciences (2004); B.S., 1985, State University of Haiti; M.S., 1991, Ball State University; Ph.D., 1995, Ohio State University. Specialty: Geochemistry.
- Ji, Ronghui, Associate Professor of Mathematical Sciences (1986); B.S., 1982, University of Science and Technology of China, China; Ph.D., 1986, State University of New York at Stony Brook. Specialties: Operator Algebras, K-Theory.
- Joglekar, Yogesh N., Assistant Professor of Physics (2005); M.Sc., 1996, Indian Institute of Technology; Ph.D., 2001, Indiana University. Specialties: Condensed Matter, Noise Spectroscopy.
- Johnson, Kathy E., Associate Vice Chancellor for Undergraduate Education, Dean of University College, and Professor of Psychology (1993); B.S., 1987, M.S., 1989, University of Massachusetts-Amherst; Ph.D., 1992, Emory University. Specialty: Cognitive/Developmental Psychology.
- Kareken, David A., Adjunct Assistant Professor of Psychology (1998); B.A., 1986, Miami University; Ph.D., 1992, Hahnemann University. Specialty: Clinical Neuropsychology.
- Kemple, Marvin D., Professor of Physics (1977); B.S., 1964, Purdue University; M.S., 1965, Ph.D., 1971, University of Illinois. Specialties: Magnetic Resonance, Biological Physics.
- Kitchens, Bruce, Associate Professor of Mathematical Sciences (2004); B.A., 1976, B.S., 1976, Emory and

Henry College; M.Sc., 1980, Ph.D., 1981, University of North Carolina at Chapel Hill. Specialties: Dynamical Systems, Ergodic Theory.

- Kitt, Nancy A., Lecturer in Mathematical Sciences (2005); B.S., 1977, Ball State University; M.A., 1981, Ball State University. Specialty: Mathematics Education.
- Klimek, Slawomir, Associate Professor of Mathematical Sciences (1991); M.Sc., 1983, Ph.D., 1988, Warsaw University, Poland. Specialties: Mathematical Physics, Noncommutative Geometry.
- Kneen, Malea, Research Professor in Chemistry and Chemical Biology (2009); B.Sc.(Agr.), 1982, Ph.D., 1991, University of Melbourne, Australia.
- Krishnan, Gary, Adjunct Assistant Professor of Biology (1999); B.Sc., 1987, M.Sc., 1989, University of Bombay, India; Ph.D., 1994, Texas A & M University. Specialty: Developmental Biology.
- Kroupa, Shenan L., Lecturer in Psychology (2000); B.A., 1993, University of Wisconsin-Madison; M.S., 1996, Ph.D., 1999, Purdue University. Specialties: Developmental Psychology, Social Psychology.
- Kuznetsov, Alexey S., Associate Professor of Mathematical Sciences (2005); B.S., 1994, M.S., 1996, Ph.D., Nizhny Novgorod State University. Specialties: Mathematical Biology, Applied Dynamical Systems.
- Lapish, Christopher C., Assistant Professor of Psychology (2011); B.S., 1999, Clemson University; Ph.D., 2006, Medical University of South Carolina. Specialty: Neural Basis of Cognition.
- Lees, Norman Douglas, Associate Dean for Planning and Finance and Professor of Biology (1973); A.B., 1967, Providence College; Ph.D., 1973, Northwestern University. Specialties: Microbiology, Molecular Biology.
- Li, Fang, Associate Professor of Mathematical Sciences (2004); B.S., 1995, M.S., 1998, Beijing Normal University; Ph.D., 2004, Michigan State University. Specialties: Statistics, Linear and Nonlinear Models.
- Li, Jiliang, Assistant Professor of Biology (2006); M.D., 1990, Beijing Medical University; Ph.D., 2000, Kagawa Medical University. Specialty: Cell Biology/Bioengineering.
- Li, Lei, Assistant Professor in Chemistry and Chemical Biology (2009); B.S., 1996, M.S., 1999, Ph.D., 2005, The Johns Hopkins University. Specialties: Biochemistry, Enzymology.
- Li, Lin, Associate Professor of Earth Sciences (2004); B.S., 1986, Jilin University; M.S., 2001, Ph.D., 2002, Brown University. Specialty: Remote Sensing.
- Liang, Yao, Associate Professor of Computer and Information Science (2007); Ph.D., 1997, Clemson University. Specialties: Adaptive Network Control/Resource Allocation, Wireless Networks, Network QoS.
- Licht, Kathy J., Associate Professor of Earth Sciences (2000); B.S., 1992, St. Norbert College; M.S., 1995, Ph.D., 1999, University of Colorado. Specialty: Glacial Geology.
- Long, Eric C., Professor of Chemistry and Chemical Biology (1991); B.S., 1984, Albright College; Ph.D., 1989, University of Virginia. Specialties: Biological Chemistry, Peptide and Metallopeptide-DNA Interactions.
- Luo, Le, Assistant Professor of Physics (2011); B.S., 1999, Sun Yat-sen University, China; M.S., 2002 Peking University, China; M.A., 2005, Ph.D., 2008, Duke University. Specialties: Experimental and Theoretical Optics, Quantum Optics.
- Lysaker, Paul H., Adjunct Professor of Psychology (2007); B.A., 1982, Kenyon College; M.A., 1986, Ph.D., 1991, Kent State University. Specialty: Clinical Psychology.
- Mahoui, Malika, Adjunct Assistant Professor of Computer and Information Science; B.S., 1990, University of Algiers, Algeria; M.S., 1991, Ph.D., 1995 University of Montpellier, France. Specialties: Data Management and Integration, Bioinformatics.
- Malik, David J., Chancellor's Professor of Chemistry and Chemical Biology (1980); B.S., 1968, M.S., 1969, California State University; Ph.D., 1976, University of California, San Diego. Specialties: Theoretical Physical Chemistry, Chemical Physics.
- Malkova, Anna, Associate Professor of Biology (2003); M.S., 1986, Ph.D., 1993, St. Petersburg State University. Specialty: Molecular Genetics.
- Mandernack, Kevin W., Chair and Professor of Earth Sciences (2010); B.S., 1983, University of Wisconsin; Ph.D., 1992, Scripps Institution of Oceanography. Specialties: Geomicrobiology, Stable Isotope Biogeochemistry.
- Marrs, James A., Associate Professor of Biology (2008); B.S., 1984, University of Illinois at Urbana-Champaign; Ph.D., 1991, University of Illinois at Chicago. Specialty: Cell and Developmental Biology.
- Marrs, Kathleen A., Associate Dean for Academic Affairs, School of Science, and Associate Professor of Biology (1998); B.A., 1984, Illinois Wesleyan University; Ph.D., 1990, University of Illinois-Chicago. Specialties: Science Teaching, Plant Molecular Biology.
- Martin, Pamela A., Associate Professor of Earth Sciences (2011); B.A., 1989, University of Chicago; Ph.D., 2000, University of California, Santa Barbara. Specialties: Paleoceanography, Paleoclimatology, Sustainability Science.
- McBride, Judy E., Senior Lecturer in Mathematical Sciences (1999); B.A., 1975, M.S., 1979, Indiana State University. Specialty: Mathematics Education.
- McCarthy, James R., Research Professor in Chemistry and Chemical Biology (2009); B.S., 1965 Arizona State University; Ph.D., 1969, University of Utah. Specialty: Medicinal Chemistry
- McGrew, John H., Professor of Psychology (1991); B.M.E., 1977, GMI Engineering and Management Institute; M.S.E., 1977, University of Michigan; Ph.D., 1991, Indiana University. Specialties: Psychiatric Rehabilitation, Health Psychology.
- McIntyre, John A., Adjunct Professor of Biology (1987); A.B., 1966, Rockford College; Ph.D., 1971, Wake Forest University. Specialties: Immunology, Reproductive Biology.
- McKinzie, David L., Adjunct Assistant Professor of Psychology (1999); B.A., 1989, Purdue University; Ph.D., 1993, Binghamton University. Specialty: Behavioral Neuroscience.

- McLeish, Michael J., Associate Professor of Chemistry and Chemical Biology (2008); B.Sc., 1978, Ph.D., 1984, La Trobe University, Melbourne, Australia. Specialty: Mechanistic Enzymology.
- Melsheimer, Bryan K., Lecturer in Mathematical Sciences (2002); B.S., 1989, M.S., 1992, University of Louisville. Specialty: Mathematics Instruction.
- Meshulam, Susan G., Senior Lecturer in Mathematical Sciences (2002); B.S., 1980, Purdue University (IUPUI); M.S., 1983, Indiana University (IUPUI). Specialty: Mathematics Instruction.
- Miller, John L., Lecturer in Mathematical Sciences (2005); M.A., 1972, Ph.D., 1974, University of California, Berkeley. Specialties: Mathematics Instruction, Algebraic Topology.
- Minto, Robert E., Associate Professor of Chemistry and Chemical Biology (2005); B.S., 1989, University of Waterloo; Ph.D., 1994, University of California, Berkeley. Specialties: Biochemistry, Organic Chemistry.
- Misiurewicz, Michal, Professor of Mathematical Sciences (1992); M.A., 1971, Ph.D., 1974, Warsaw University, Poland. Specialties: Dynamical Systems, Ergodic Theory.
- Molkov, Yaroslav, Assistant Professor of Mathematical Sciences (2011); B.S., 1994, M.S., 1996, Nizhniy Novgorod State University; Ph.D., 2009, Institute of Applied Physics, Russian Academy of Sciences. Specialty: Mathematical Neuroscience.
- Morton, R. Patrick, Professor of Mathematical Sciences (2003); B.A., 1975, University of Arizona; Ph.D., 1979, University of Michigan. Specialties: Number Theory, Algebra, Mathematics Education.
- Morzorati, Sandra L., Adjunct Associate Professor of Psychology (2009); R.N., 1969, St. Francis Hospital School of Nursing; B.A., 1972, Lewis University; Ph.D., Indiana State University. Specialty: Physiology-Neurophysiology.
- Mosher, Catherine E., Assistant Professor of Psychology (2010); B.A., 2002, Youngstown State University; M.A., 2004, Ph.D., 2007, State University of New York, Albany. Specialty: Psycho-oncology.
- Muhoberac, Barry B., Associate Professor of Chemistry and Chemical Biology (1985); B.S., 1972, Louisiana State University; Ph.D., 1978, University of Virginia. Specialties: Biophysical Chemistry, Biospectroscopy.
- Mukhin, Evgeny, Professor of Mathematical Sciences (2001); M.S., 1992, Moscow State University, U.S.S.R.; Ph.D., 1998, University of North Carolina at Chapel Hill. Specialties: Modern Analysis, Representation Theory.
- Mukhopadhyay, Snehasis, Professor of Computer and Information Science (1994); B.E., 1985, Jadavpur University, Calcutta; M.E., 1987, Indian Institute of Science, Bangalore; M.S., 1991, Ph.D., 1994, Yale University. Specialties: Intelligent Systems, Information Management.
- Naumann, Christoph A., Professor of Chemistry and Chemical Biology (1999); Diploma, 1990, University of Leipzig, Austria; Ph.D., 1995, Technical University of Munich, Germany. Specialties: Biological Chemistry, Physical Chemistry, Biomaterials.
- Neal-Beliveau, Bethany S., Associate Professor of Psychology (1993); B.S., 1980, Purdue University; M.S., 1985, Ph.D., 1987, University of Minnesota. Specialties: Psychopharmacology, Developmental Psychobiology.
- Nelson, Jennifer A., Lecturer in Earth Sciences (2008); B.S., 2003, M.S. 2006, Indiana University. Specialty: Geoscience Education.
- Nguyen, Marie L., Lecturer in Chemistry and Chemical Biology (1994); B.S., 1983, M.S., 1993, Purdue University. Specialties: Physical Chemistry, Chemical Education.
- O'Donnell, Martin J., Professor of Chemistry and Chemical Biology (1975); B.S., 1968, University of Iowa; Ph.D., 1973, Yale University. Specialty: Organic Chemistry.
- Oh, Kyungsoo, Associate Professor of Chemistry and Chemical Biology (2005); B.S., 1999, Queen Mary and Westfield College, University of London; Ph.D., 2002, Univ. of Sussex. Specialties: Synthetic Organic and Bioorganic Chemistry.
- Ou, Zhe-Yu (Jeff), Professor of Physics (1992); B.S., 1984, Beijing University, China; M.S., 1986, Ph.D., 1990, University of Rochester. Specialties: Experimental Physics, Quantum Optics.
- Pachut, Joseph F., Jr., Associate Professor of Earth Sciences (1978), B.A., 1972, State University of New York College at Oneonta; Ph.D., 1977, Michigan State University. Specialties: Invertebrate Paleontology, Paleoecology, Geobiology, Biometrics, Evolution of the Earth.
- Palakal, Mathew J., Associate Dean for Research and Graduate Education in the IU School of Informatics (IUPUI) and Professor of Computer and Information Science (1988); B. Comp. Sci., 1979, M. Comp. Sci., 1983, Ph.D., 1987, Concordia University, Canada. Specialties: Artificial Intelligence, Bioinformatics, Pattern Recognition, Artificial Neural Networks.
- Peng, Hanxiang, Associate Professor of Mathematical Sciences (2008); M.S., 1987, Peking University; Ph.D., 2001, State University of New York at Binghamton. Specialties: Asymptotic Theory, Robust Regression and Data Mining, Modeling of Correlated Binary Data, Survival Analysis.
- Perez, Rodrigo, Associate Professor of Mathematical Sciences (2005); B.S., 1996, National University, Mexico; Ph.D., 2002, Stony Brook University. Specialties: Complex Dynamics, Geometric Group Theory, Combinatorics.
- Perry, Allen O., Adjunct Professor of Earth Sciences (2001); B.S., 1961, Indiana University; M.S., 1972, Ph.D., 1977, Purdue University. Specialties: Environmental Geology, Engineering Geology, Processing, Mined Land Reclamation.
- Petolino, Joseph F., Adjunct Assistant Professor of Biology (1994); B.A., 1976, M.S., 1978, Rutgers University; Ph.D., 1982, University of Maryland. Specialties: Biotechnology, Plant Genetics.
- Petrache, Horia I., Assistant Professor of Physics (2005); Physics Diploma, 1992, University of Bucharest, Romania; Ph.D., 1998, Carnegie Mellon University. Specialty: Molecular Interactions within Biomembranes.
- Picard, Christine J., Assistant Professor of Biology and Forensic and Investigative Sciences (2011); B.S., 2000, University of New Brunswick; M.S., 2002, University

of Toronto; Ph.D., 2010, West Virginia University. Specialties: Forensic Biology, Forensic Entomology.

- Poposki, Elizabeth M., Assistant Professor of Psychology (2010); B.A., 2003, Central Michigan University; M.A., 2008, Ph.D., 2010, Michigan State University. Specialty: Industrial/Organizational Psychology.
- Prezbindowski, Dennis R., Adjunct Associate Professor of Earth Sciences (1991); B.S., 1973, Indiana University; M.S., 1974, Michigan State University; Ph.D., 1981, University of Texas at Austin. Specialties: Environmental Geochemistry, Sedimentology, Hydrogeology, Petroleum Geology.
- Pu, Jungzhi, Assistant Professor in Chemistry and Chemical Biology (2010); B.S., 1999, Peking University; Ph.D., 2004, University of Minnesota. Specialty: Physical Chemistry.
- Rainey, Joan P., Lecturer in Mathematical Sciences (2005); B.S., 1980, University of Dayton; M.A., 1983, The Ohio State University. Specialties: Mathematics Instruction, Curriculum Development.
- Raje, Rajeev R., Professor of Computer and Information Science (1996); B.E., 1984, University of Bombay, India; M.S., 1994, Ph.D., 1994, Syracuse University. Specialties: Distributed Processing and Programming, Object-Oriented Design and Programming, Component-Based Programming.
- Rand, Kevin L., Associate Professor of Psychology (2006); B.A., 2000, Northern Kentucky University; M.A., 2002, Ph.D., 2006, University of Kansas. Specialty: Clinical/Health Psychology.
- Randall, Stephen K., Associate Professor of Biology (1990); B.S., 1976, University of Connecticut; Ph.D., 1982, Indiana University. Specialties: Biochemistry, Cell Biology.
- Rangazas, Sharon Z., Senior Lecturer in Mathematical Sciences (1989); B.S., 1984, M.A.T., 1987, Indiana University. Specialties: Mathematics Instruction, Curriculum Development.
- Rao, B. D. Nageswara, Professor of Physics (1978); B.S., 1955, M.S., 1956, Andhra University, India; Ph.D., 1961, Aligarh Muslim University, India. Specialties: Nuclear Magnetic Resonance, Biological Physics.
- Rashid, Mamunur, Lecturer in Mathematical Sciences (2011); B.Sc., 1997, M.Sc., 1999, University of Dhaka; M.A., 2004, Ball State University; Ph.D., 2008, Bowling Green State University. Specialty: Statistics.
- Reese, Brittiney, Academic Specialist (2011); B.S., 2008, Rose-Hulman Institute of Technology; M.S., 2010, Purdue University. Specialty: Biology Education.
- Rhoads, Edward A., Lecturer in Physics (2006); B.S., 1999, University of Washington; Ph.D., 2005, University of Minnesota. Specialty: Astronomy.
- Rhodes, Simon J., Dean, School of Science, and Professor of Biology (2011); B.Sc., 1984, University of Sheffield, United Kingdom; Ph.D., 1991, Purdue University; Postdoctoral Fellowship, 1995, University of California. Specialties: Developmental Biology, Genetics, Regenerative Biology.
- Roberts, Michele S., Lecturer in Computer and Information Science (1998); B.S., 1976, Central College; M.S., 1978, Indiana State University; M.B.A., 1994, Indiana Wesleyan University. Specialties: Application Courses for Nonmajors, Web Authoring, Java, Client/Server Programming, Program Management, Object-Oriented Design.
- Robinson, Bret A., Adjunct Assistant Professor of Earth Sciences (1991); B.A., 1984, Indiana University; M.S., 1986, Ph.D., 1991, Southern Illinois University. Specialties: Fluvial Geomorphology, Hydrogeology.
- Rodd, Zachary A., Adjunct Assistant Professor of Psychology (2009); B.A., Ph.D., State University of New York, Albany. Specialty: Biopsychology.
- Roeder, Roland A.W., Assistant Professor of Mathematical Sciences (2009); B.A., 2000, University of California; Ph.D., 2005, Cornell University.
- Roman, Erika M., International Associate of Psychology (2009); University Diploma in Pharmacy, 1998, Bachelor of Pharmaceutical Science, 1999, Ph.D. Pharmaceutical Pharmacology, 2004, Uppsala University, Sweden. Speciality: Pharmaceutical Biosciences.
- Roper, Randall J., Assistant Professor of Biology (2006); B.S., 1995, Brigham Young University; Ph.D., 2001, University of Illinois Urbana-Champaign. Specialty: Genetics.
- Rosenberg, Gary D., Associate Professor of Earth Sciences (1979), B.S., 1966, University of Wisconsin; Ph.D., 1972, University of California, Los Angeles. Specialties: Biomineralization, Evolution, Paleobiochemistry, Historical Geology.
- Ross, John B., Lecturer in Physics (2005); B.S., 1987, Oakland University; M.A., 1992, Boston University; Ph.D., 1993, Boston University. Specialty: Physics Education.
- Rubchinsky, Leonid L., Associate Professor of Mathematical Sciences (2004); B.S., 1995, University of Nizhny; M.S., 1997, University of California, San Diego; Ph.D., 2000, Institute for Applied Physics, Russian Academy of Science. Specialty: Mathematical Neurosciences.
- Rusu, Dumitru Dan, Assistant Professor of Mathematic Sciences (2005, IUPU Columbus); B.S./M.S., 1983, University of Bucharest, Romania; Ph.D., 2000, University of Guelph, Canada. Specialties: Applied Dynamical Systems, Applied Mathematics.
- Saligoe-Simmel, Jill, Adjunct Professor of Earth Sciences (2001); B.S., 1990, Ball State University; M.S., 1984, Indiana State University; Ph.D., 1997, Oregon State University. Specialties: Resource Geography, Spatial Analysis, and GIS Policy and Planning.
- Salyers, Michelle P., Associate Professor in Psychology (1999); B.S., 1989, Purdue University; M.S., 1996, Ph.D., 1998, Indiana University-Purdue University Indianapolis. Specialties: Psychiatric Rehabilitation, Assertive Community Treatment, PTSD.
- Sardar, Rajesh, Assistant Professor in Chemistry and Chemical Biology (2010); B.Sc., 1999, University of Calcutta; M.Sc., 2001, Indian Institute of Technology; Ph.D., 2006, The Graduate Center, CUNY. Specialty: Analytical Chemistry.
- Sarkar, Jyotirmoy, Professor of Mathematical Sciences (1991); B.Stat., 1985, M.Stat., 1987, Indian Statistical Institute, India; Ph.D., 1990, University of Michigan. Specialties: Statistics, Applied Probability.

- Schild, John H., Adjunct Assistant Professor of Biology (1999); B.S., 1983, M.S., 1988, Case Western Reserve University; Ph.D., 1994, Rice University. Specialties: Sensory Electrophysiology, Computational Neuroscience.
- Schoepp, Darryle D., Adjunct Assistant Professor of Biology (1989); B.S., 1978, North Dakota State University; Ph.D., 1982, West Virginia University. Specialty: Pharmacology.
- Schuster, Dwight A., Adjunct Assistant Professor of Earth Sciences (2005); B.S., 1994, Wheaton College; M.A.T., 1998, Cornell University; Ph.D., 2005, Penn State University. Specialties: General Science Education, Earth Science Education.
- Scott, William L., Research Professor of Chemistry and Chemical Biology (2002); B.A., 1967, Williams College; Ph.D., 1972, University of California, Los Angeles. Specialty: Organic Chemistry.
- Sen, Asok K., Professor of Mathematical Sciences (1981); B.S., 1972, Indian Institute of Technology, India; M.S., 1975, University of Minnesota; Ph.D., 1979, Cornell University. Specialties: Applied Mathematics, Biomedical Signal Processing.
- Shain, Michael P., Adjunct Assistant Professor of Psychology (1996); B.A., 1983, DePaul University; Ph.D., 1990, Southern Illinois University. Specialty: Clinical Psychology.
- Shen, Li, Adjunct Assistant Professor of Computer and Information Science and Assistant Professor of Radiology, Indiana University School of Medicine; B.S., 1993, Xi'an Jiao Tong University; M.S., 1996, Shanghai Jiao Tong University; Ph.D., 2004, Dartmouth College. Specialties: Medical Image Computing, Computational Biology, Bioinformatics.
- Shen, Zhongmin, Chair and Professor of Mathematical Sciences (1992); B.S., 1983, University of Science and Technology of China, China; M.S., 1986, Academia Sinica, China; Ph.D., 1990, State University of New York at Stony Brook. Specialty: Differential Geometry.
- Siddiqui, Rafat Ali, Adjunct Professor of Biology (1996); B.Sc., 1978, M.Sc., 1980, University of Karachi, Pakistan; Ph.D., 1988, Australian National University, Australia. Specialty: Biochemistry.
- Siegel, Jay A., Chair and Professor of Chemistry and Chemical Biology (2004); B.S., 1968, M.S., 1970, Ph.D., 1975, George Washington University. Specialty: Forensic Chemistry.
- Skalnik, David G., Associate Dean for Research and Graduate Studies and Professor of Biology, (2011); B.A., 1981, University of California, Santa Barbara; Ph.D., 1987, Stanford University. Specialties: Biochemistry, Epigenetics.
- Slayback-Barry, Denise L., Lecturer (2009); B.A., 1995, IUPUI; Ph.D., 2001, Purdue University-IUPUI. Specialty: Immunology/Biology Teaching.
- Sloop, Kyle L., Adjunct Assistant Professor of Biology (2004); B.S., 1993, Indiana University; M.S., 1994, Northwestern University; Ph.D., 2001, Purdue University-IUPUI. Specialty: Endocrinology.
- Smith, Charles K. II, Adjunct Assistant Professor of Biology (1994); B.S., 1973, University of Pittsburgh; Ph.D., 1979, University of New Hampshire. Specialty: Animal Science.
- Smith, Rosamund C., Adjunct Assistant Professor of Biology (1991); B.A., 1979, Cambridge University, U.K.; Ph.D., 1983, Oxford University, U.K. Specialty: Developmental Biology.
- Srour, Edward F., Adjunct Assistant Professor of Biology (1996); B.S., 1979, M.S., 1981, American University of Beirut, Beirut; Ph.D., 1986, University of Illinois. Specialties: Immunology, Virology.
- Stewart, Jesse, Associate Professor of Psychology (2006); B.S., 1998, University of Illinois; M.S., 2000, Ph.D., 2003, Ohio University. Specialty: Clinical/Health Psychology.
- Stewart, Robert B., Lecturer in Psychology (1995); B.Sc., 1981, M.Sc., 1984, Ph.D., 1988, University of Toronto, Canada. Specialty: Behavioral Pharmacology.
- Swiezy, Naomi B., Adjunct Associate Professor of Psychology (2007); B.A., 1986, Washington University; M.A., 1989, Ph.D., 1993, Louisiana State University. Specialty: Clinical Psychology.
- Swope, R. Jeffrey, Lecturer in Earth Sciences (2000); B.S., 1983, M.S., 1988, The Ohio State University; Ph.D., 1997, University of Colorado. Specialty: Mineralogy.
- Tam, Richard Yiu Hang, Associate Professor of Mathematical Sciences (1986); B.S., 1980, University of Alberta, Canada; M.Sc., 1982, Virginia Polytechnic Institute and State University; Ph.D., 1986, Cornell University. Specialty: Applied Mathematics.
- Tan, Fei, Assistant Professor of Mathematical Sciences (2010); B.S., 2001, Nanjing University, M.S. 2005, Ph.D., 2007, Florida State University. Specialty: Biostatistics.
- Tarasov, Vitaly O., Professor of Mathematical Sciences (2003); M.S., 1982, Leningrad University, U.S.S.R.; Ph.D., 1985, Dr.Sci., 2002, Steklov Mathematical Institute. Specialties: Mathematical Physics, Quantum Integrable Systems.
- Tarr, Terri A., Adjunct Assistant Professor of Psychology (1994); B.A., 1977, M.A., 1978, Ball State University; Ph.D., 1992, Purdue University. Specialty: Developmental Psychology.
- Tsechpenakis, Gavriil, Assistant Professor in Computer and Information Science (2010); Diploma, 1999, Ph.D., 2003, National Technical University of Athens Greece. Specialties: Computer Vision, Image Processing.
- Tuceryan, Mihran, Associate Professor of Computer and Information Science (1997); B.S., 1978, Massachusetts Institute of Technology; Ph.D., 1986, University of Illinois. Specialties: 3D Computer Graphics and Visualization, Augmented Reality/Virtual Reality, User Interfaces, Image Processing and Computer Vision, Pattern Recognition.
- Ulbright, Corinne, Lecturer in Biology and University College; B.A., 1971, Washington University in St. Louis; M.A., 1972, University of Texas, Austin; Ph.D., 1980, Washington University in St. Louis.
- Unverzagt, Frederick W., Adjunct Professor of Psychology (2001); B.A., 1982, M.A., 1987; Ph.D., 1991, Southern Illinois University. Specialty: Neuropsychology.
- Varma-Nelson, Pratibha, Executive Director of the Center for Teaching and Learning and Professor of Chemistry and Chemical Biology (2008); B.S., 1970,

Poona University, India; Ph.D., 1978, University of Illinois at Chicago. Specialties: Pedagogies in Science, Technology, Engineering and Mathematics (STEM) Disciplines.

- Vaughan, Martin A., Lecturer in Biology (2003); B.S., 1977, M.S., 1981, Ohio University; Ph.D., 1985, Indiana State University. Specialties: Plant Physiology, Biology Education.
- Vemuri, Gautam, Professor of Physics (1992); B.Sc., 1984, Delhi University, India; M.S., 1986, Brown University; Ph.D., 1990, Georgia Institute of Technology. Specialties: Laser Physics, Nonlinear Optics.
- Vidon, Philippe G.-F., Assistant Professor of Earth Sciences (2004); B.S., 1995, Pierre et Marie Curie University; M.S., 1996, University of Toulon; Ph.D., 2004, York University. Specialty: Hydrology.
- Vlahos, Chris J., Adjunct Assistant Professor of Biology (1999); B.S., 1984, Santa Clara University; M.S., 1984, Ph.D., 1987, University of Michigan. Specialties: Cell Biology, Signal Transduction.
- Wang, Xianzhong, Associate Professor of Biology and Associate Professor of Earth Sciences (2001); B.A., 1986, Zhejian University, China; M.S., 1989, Academia Sinica, China; Ph.D., 1999, The Ohio State University. Specialties: Ecology, Plant Physiological Ecology.
- Wassall, Stephen R., Associate Professor of Physics (1984); B.Sc., 1973, Southampton University, U.K.; Ph.D., 1981, Nottingham University, U.K. Specialties: Nuclear Magnetic Resonance, Biological Physics.
- Watson, John C., Associate Professor of Biology (1994); B.S., 1975, Butler University; Ph.D., 1982, Indiana University. Specialties: Plant Physiology, Biochemistry, Molecular Biology.
- Watt, Jeffrey X., Associate Dean for Student Affairs and Outreach, School of Science, and Associate Chair and Associate Professor of Mathematical Sciences (1988); B.S., 1983, Michigan Technological University; M.S., 1986, Purdue University; Ph.D., 1990, Indiana University. Specialty: Mathematics Education.
- Williams, Jane R., Interim Chair and Associate Professor of Psychology (1995); B.A., 1989, College of St. Benedict; M.A., 1992, Ph.D., 1995, University of Akron. Specialties: Industrial/Organizational Psychology, Human Resource Management.
- Wilson, Jeffrey S., Professor of Earth Sciences (2004); B.S., 1991, California University of Pennsylvania; M.S., 1994, Ph.D., 1998, Indiana State University. Specialties: Environmental Remote Sensing, Geographic Information Science, Human Health and the Environment.
- Wilson, Kathryn J., Associate Professor of Biology (1976); B.A., 1971, University of Wisconsin-Madison; M.A., 1976, Ph.D., 1976, Indiana University. Specialties: Plant Developmental Anatomy and Morphology, Electron Microscopy.
- Witkin, Jeffrey M., Adjunct Professor of Psychology (2007); B.S., 1975, University of Maryland, College Park; Ph.D., 1979, University of North Carolina, Chapel Hill. Specialty: Neurobiology.
- Witzmann, Frank A., Adjunct Professor in Biology and Professor, School of Medicine, Department of Physiology (2002); B.A., 1976, Defiance College; M.S., 1978, Ball State University; Ph.D., 1981, Marquette University. Specialty: Proteomics.
- Woodahl, Brian A., Lecturer in Physics (2003); B.S., 1987, M.S., 1993, Washington State University; Ph.D., 1999, Purdue University. Specialties: Physics Education, Theoretical Particle Physics.
- Worth, Robert, Adjunct Professor of Mathematical Sciences (2004); B.A., 1963, Butler University; M.D., 1966, Ph.D., 1987, Indiana University; M.S., 2004, Purdue University. Specialty: Mathematical Neuroscience.
- Wu, Huanmei, Adjunct Professor of Computer and Information Science; B.S., 1996, Tsinghua University, China; M.S., 2003, Ph.D., 2005, Northeastern University. Specialties: Health Informatics, Bioinformatics.
- Xia, Yuni, Assistant Professor of Computer and Information Science (2005); B.S., 1996, Huazhong University of Science and Technology; M.S. 2002, Ph.D., 2005 Purdue University. Specialties: Databases, Data Mining.
- Yard, Michael, Lecturer in Biology (2006); B.S., 1985, Purdue University; Ph.D., 2007, Indiana University. Specialties: Anatomy, Neurobiology.
- Yiannoutsos, Constantin T., Adjunct Professor of Mathematical Sciences (2004); B.A., 1986, Central Connecticut State University; M.S., 1989, Ph.D., 1991, University of Connecticut. Specialties: Biostatistics, Design of Clinical Trials, Diagnostic Testing, Sequential Design, and Bayesian Statistics.
- Yost, Robert W., Senior Lecturer in Biology (1993); B.S., 1973, Lebanon Valley College; Ph.D., 1984, University of Pennsylvania. Specialties: Physiology, Biochemistry.
- Zevin, Miles R., Lecturer in Biology (1980); B.S., 1969, M.S., 1977, University of Chicago. Specialty: Anatomy.
- Zhao, Hongqiu, Lecturer in Chemistry and Chemical Biology (2008); B.S., 1998, M.S., 2001, Ph.D., 2007, University of Notre Dame. Specialty: Biophysical Chemistry.
- Zheng, Jiang Y., Professor of Computer and Information Science (2001); B.S. Comp. Sci., 1983, Fudan University, China, M.S., 1987, Ph.D., 1990, Control Eng., Osaka University, Japan. Specialties: Computer Vision, Image Processing, Computer Graphics, Virtual Reality, Robotics.
- Zheng, Wei, Assistant Professor of Mathematical Sciences (2011); B.S., 2005, Zhejiang University, M.S., 2008, Ph.D., 2011, University of Illinois, Chicago. Specialty: Statistics.
- Zhou, Feng C., Adjunct Professor of Psychology (2009); B.S., 1975, National Taiwan Normal University; M.Ph., 1982,Ph.D., 1983, Mount Sinai School of Medicine. Specialty: Biomedicine.
- Zhou, Yaoqi, Adjunct Professor of Computer and Information Science; B.S., 1984, University of Science and Technology of China; Ph.D., 1990, State University of New York at Stony Brook. Specialty: Computational Biophysics.
- Zhu, Fangqiang, Assistant Professor of Physics (2012); B.S., 1997, M.S., 1999, Tsinghua University, China; M.S., 2003, Ph.D., 2004, University of Illinois,

Urbana-Champaign. Specialties: Computational and Theoretical Biophysics.
- Zhu, Lin, Lecturer in Chemistry and Chemical Biology (2006); B.S., 1992, Peking University; Ph.D., 2000, University of Hawaii at Manoa. Specialties: Chemistry Education, Physical Chemistry.
- Zhu, Luoding, Associate Professor of Mathematical Sciences (2004); B.S., 1989, Zhejiang University, Hangzhou; M.S., 1992, Beijing Institute of Applied Physics and Computational Mathematics; Ph.D., 2001, Courant Institute of Mathematical Sciences, New York University. Specialties: Scientific Computing, Numerical Methods, Biofluid Mechanics.
- Zimet, G. D., Adjunct Assistant Professor of Psychology (1994); B.A., 1978, Vassar College; Ph.D., 1985, Duke University. Specialty: Clinical and Health Psychology.
- Zou, Jian, Assistant Professor of Mathematical Sciences (2011); B.S., 2000, Shandong University; M.S., 2005, Ph.D., 2009, University of Connecticut. Specialties: Financial Time Series, Statistics.
- Zou, Xukai, Associate Professor of Computer and Information Science (2003); B.S., 1983, Zhengzhou University; M.S., 1986, Huazhong University of Science and Technology; Ph.D., 2000, University of Nebraska-Lincoln. Specialties: Secure E-Services: Access Control Issues in Banking and Financial Systems, Secure Group Communications in Wired/Wireless Networks.
- Zuckerman, Steven H., Adjunct Assistant Professor of Biology (1988); B.S., 1973, New York University; Ph.D., 1977, University of Minnesota. Specialty: Immunology

Administration

Administrative Officers

- SIMON J. RHODES, Ph.D., Dean
- N. DOUGLAS LEES, Ph.D., Associate Dean for Planning and Finance
- KATHLEEN A. MARRS, Ph.D., Associate Dean for Academic Affairs
- DAVID G. SKALNIK, Ph.D., Associate Dean for Research and Graduate Education
- JEFFREY X. WATT, Ph.D., Associate Dean for Student Affairs and Outreach

Departmental Chairpersons

- SIMON J. ATKINSON, Ph.D., Department of Biology
- JAY A. SIEGEL, Ph.D., Department of Chemistry and Chemical Biology
- SHIAOFEN FANG, Ph.D., Department of Computer and Information Science
- KEVIN MANDERNACK, Ph.D., Department of Earth Sciences
- ZHONGMIN SHEN, Ph.D., Department of Mathematical Sciences
- ANDREW D. GAVRIN, Ph.D., Department of Physics
- JANE R. WILLIAMS, Ph.D., Interim Chair, Department of Psychology

Program Directors

- SIMON J. ATKINSON, Ph.D., Biotechnology
- GABRIEL M. FILIPPELLI, Ph.D., Environmental Science
- JOHN V. GOODPASTER, Ph.D., Forensic and Investigative Sciences
- KATHLEEN A. MARRS, Ph.D., Interdisciplinary Studies

Courses

Biology

Advanced Undergraduate and Graduate Level

BIOL 50700 Principles of Molecular Biology (3 cr.) P: K322, CHEM C342, or consent of instructor. Fall, night. Molecular aspects of structure and function of nucleic acids and proteins, including recombinant DNA research. Prokaryotic and eukaryotic molecular biology are given equal weight.

BIOL 51600 Molecular Biology of Cancer (3 cr.) P: CHEM C342 and K322 or a course in biochemistry. A detailed course examining the molecular mechanisms controlling the growth of animal cells. Emphasis on current experimental approaches to defining the molecular basis of growth regulation in developing systems and the uncontrolled proliferation of cells in metabolic disorders, such as cancer.

BIOL 53000 Introductory Virology (3 cr.) P: K356, CHEM C342. Fall, odd years, night. Detection, titration, and chemistry of viruses; viral host interactions: bacteriophage-bacterium, animal virus-animal cell, plant virus-plant cell; tumor viruses: infection and transformation.

BIOL 54000 Topics in Biotechnology (3 cr.) P: K322 and CHEM C341, or consent of instructor. Fall, night. Examines research techniques and applications for several technologies situated at currently recognized biological frontiers, including recombinant DNA technology, hybridoma technology, protein engineering, agricultural research, and microbiological engineering.

BIOL 54800 Techniques in Biotechnology (3 cr.) P: K322, CHEM C342, or consent of instructor. Fall, day, night. Laboratory experience in techniques applicable to biotechnology: protein chemistry, molecular biology, and immunology.

BIOL 55000 Plant Molecular Biology (3 cr.) P: K322, CHEM C341, or consent of instructor. Fall, day, night. A comprehensive study of plant molecular biology and plant molecular genetics. Topics will include the structure and expression of plant nuclear, chloroplast, and mitochondrial genomes, and plant viruses.

BIOL 55600 Physiology I (3 cr.) P: K103, CHEM C342. Fall, night. Principles of physiology: nerve and muscle, temperature regulation, ion and water balance.

BIOL 55700 Physiology II (3 cr.) P: 556 or consent of instructor. Spring, night. A study of human cardiovascular, pulmonary, blood, and gastrointestinal systems. Higher neuronal functions and intersystem interactions will be discussed.

BIOL 55900 Endocrinology (3 cr.) P: 55600 or equivalent, and CHEM C342. Fall. The study of hormone function. Consideration will be given to the role of hormones in growth, development, metabolism, homeostasis, and reproduction.

BIOL 56100 Immunology (3 cr.) P: K103, CHEM C341. Spring, night. Introduction to basic principles and experimentation in cellular and humoral immunology.

BIOL 56400 Molecular Genetics of Development (3 cr.) P: K322 or similar or consent of instructor. R: BIOL 56600. Spring, day, night. Examines how key regulatory genes and molecular signaling pathways regulate development in both lower eukaryotic organisms and mammalian organ systems, with emphasis on the function and evolution of signaling molecules and transcription factor superfamilies.

BIOL 56600 Developmental Biology (3 cr.) P: K322. Fall. Principles of animal development. The emphasis is on concepts and underlying mechanisms of developing and regenerating systems and stem cell properties, including molecular and biochemical approaches.

BIOL 56800 Regenerative Biology and Medicine (3 cr.) P: K324 or K331 or a biochemistry course. Spring. This course examines the mechanisms of natural regeneration (regenerative biology) and the application of these mechanisms to the development of therapies to restore tissues damaged by injury or disease (regenerative medicine).

BIOL 57000 Biological Membranes (3 cr.) P: CHEM C342 or consent of instructor. Spring, night. An examination of structure and function of biological membranes. Topics include lipid and protein composition and interactions, physiological properties of membranes, physiological methods of analysis, model membrane systems, and survey of specific biological membranes and their modes of action.

BIOL 57100 Developmental Neurobiology (3 cr.) P: consent of instructor. Fall, odd years, night. The major phases of nervous system development beginning with neurolation and neurogenesis and ending with the onset of physiological activity will be studied in a variety of animals, mainly avians and mammals (including man). Neural developmental disorders and behavioral ontogeny will also be considered.

BIOL 59500 Special Assignments (1-3 cr.) P: consent of instructor. Fall, Spring, Summer. Special work, such as directed reading, independent study or research, supervised library, laboratory or fieldwork, or presentation of material not available in the formal courses of the department.

Courses for the Nonmajor

BIOL 10011 Principles of Biomedical Sciences (3 cr.) Students investigate the human body systems and various health conditions including heart disease, diabetes, sickle-cell disease, hypercholesterolemia, and infectious diseases. They determine the factors that led to the death of a fictional person, and investigate lifestyle choices and medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, medicine, research processes and bioinformatics. This course is designed to provide an overview of all the courses in the Biomedical Sciences program and lay the scientific foundation for subsequent courses. This course is one in a series of classes for the Project Lead the Way series of courses in the area of Biomedical Sciences.

BIOL 10012 Human Body Systems (3 cr.) P: BIOL 10011 Students examine the interactions of body systems as they explore identity, communication, power, movement, protection and homeostasis. Students design data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration. Exploring science in action, students build organs and tissues on a skeletal manikin, work through interesting real world cases and often play the role of biomedical professionals to solve medical mysteries. This course is one in a series of classes for the Project Lead the Way series of courses in the area of Biomedical Sciences.

BIOL 10013 Medical Interventions (3 cr.) P: BIOL 10012 Students investigate the variety of interventions involved in the prevention, diagnosis and treatment of disease as they follow the lives of a fictitious family. The course is a "How-To" manual for maintaining overall health and homeostasis in the body as students explore: how to prevent and fight infection; how to screen and evaluate the code in human DNA; how to prevent, diagnose and treat cancer; and how to prevail when the organs of the body begin to fail. Through these scenarios, students are exposed to the wide range of interventions related to immunology, surgery, genetics, pharmacology, medical devices and diagnostics. Lifestyle choices and preventive measures are emphasized throughout the course as well as the important roles scientific thinking and engineering design play in the development of interventions of the future. This course is one in a series of classes for the Project Lead the Way series of courses in the area of Biomedical Sciences.

BIOL 10014 Biomedical Innovation (3 cr.) P: BIOL 10013 In this capstone course, students apply their knowledge and skills to answer questions or solve problems related to the biomedical sciences. Students design innovative solutions for the health challenges of the 21st century as they work through progressively challenging open-ended problems, addressing topics such as clinical medicine, physiology, biomedical engineering, and public health. They have the opportunity to work on an independent project and may work with a mentor or advisor from a university, hospital, physician's office, or industry. Throughout the course, students are expected to present their work to an adult audience that may include representatives from the local business and health care community. This course is one in a series of classes for the Project Lead the Way series of courses in the area of Biomedical Sciences.

BIOL-N 100 Contemporary Biology (3 cr.) Fall, day, night; Spring, day, night; Summer. Selected principles of biology with emphasis on issues and problems extending into everyday affairs of the student.

BIOL-N 107 Exploring the World of Animals (4 cr.) Equiv. PU BIOL 109. Fall, day, night; Spring, day, night; Summer, day. This course introduces students to animals and their native environments. It surveys individual ecosystems and highlights the interactions, features, and characteristics of the animals found there. Examples of discussion topics include unique features of animals, animal relationships, societies and populations, exotic species, and behavior, including mating, communication, feeding and foraging, and migration. Environmental issues including the effects of pollution on ecosystems are also discussed. Not equivalent to K103.

BIOL-N 108 Plants, Animals and the Environment (3 cr.) Fall, day, night; Spring, day, night; Summer, day. This course

is designed to provide students and future K-8 teachers with a background in the general biology concepts of plants, animals and the environment, which are the backbone of the State of Indiana science standards.

BIOL-N 120 Topics in Biology (3 cr.)

BIOL-N 200 The Biology of Women (3 cr.) Fall, day, night; Spring, day, night; Summer. This course examines the biological basis for bodily functions and changes that take place throughout the life of females.

BIOL-N 212 Human Biology (3 cr.) Equiv. PU BIOL 201. Fall, day. First course in a two-semester sequence in human biology with emphasis on anatomy and physiology, providing a solid foundation in body structure and function.

BIOL-N 213 Human Biology Laboratory (1 cr.) P or C: N212. Fall, day. Accompanying laboratory for N212.

BIOL-N 214 Human Biology (3 cr.) P: N212. Equiv. PU BIOL 202. Spring, day. Continuation of N212.

BIOL-N 215 Human Biology Laboratory (1 cr.) P or C: N214. Spring, day. Accompanying laboratory for N214.

BIOL-N 217 Human Physiology (5 cr.) Equiv. IU PHSL P215. Fall, day; Spring, day; Summer, day. Lectures and laboratory work related to cellular, musculoskeletal, neural, cardiovascular, gastrointestinal, renal, endocrine, and reproductive function in humans.

BIOL-N 222 Special Topics in Biology (1-3 cr.) A variable-topic course dealing with current topics in biology. In a given semester, a topic such as disease, genetics, the environment, etc., will be dealt with as a separate course.

BIOL-N 251 Introduction to Microbiology (3 cr.) P: one semester general chemistry or one semester life science. Spring, night. This course includes a laboratory component. The isolation, growth, structure, functioning, heredity, identification, classification, and ecology of microorganisms; their role in nature and significance to humans.

BIOL-N 261 Human Anatomy (5 cr.) Equiv. IU ANAT A215. Fall, day, night; Spring, day, night; Summer, day, night. Lecture and laboratory studies of the histology and gross morphology of the human form, utilizing a cell-tissue-organ system-body approach.

BIOL-N 322 Introductory Principles of Genetics (3 cr.) P: N107 or K101. Equiv. PU AGR 430. Spring, night. Basic principles of plant and animal genetics. Emphasis on transmission mechanisms as applied to individuals and populations. For students in health and agricultural sciences.

BIOL-N 400 Biological Skills for Teachers (3 cr.) P: consent of instructor. Fall, night. Concepts and laboratory skills necessary to prepare teachers with diverse backgrounds to return to graduate academic biology courses are reviewed. Topics include general principles of biology, biochemistry, and biomathematics.

Graduate Level

BIOL 64100 Microbial Genetics (2 cr.) P: K323, CHEM C342, and consent of instructor. Spring, odd years, night. Genetics of bacteria, bacterial viruses, and other microorganisms with emphasis on organization, replication, and function of the genetic material.

BIOL 69600 Seminar (1 cr.) Fall, Spring. Each semester there are several separate offerings. They will likely be on the following topics: biochemistry, biology teaching, ecology and population biology, genetics, mechanisms of development, microbiology, neurobiology, and plant physiology. Oral presentations required. May be repeated for credit.

BIOL 69700 Special Topics (1-3 cr.) Fall, Spring. The frontiers of biology. Critical examination of developments in the various specialties represented by the members of the department. Currently, advanced work in the following and related fields can be offered: molecular genetics; structure and biosynthesis of biologically significant molecules; the nature of biological specificity and enzyme catalysis; the fine structure and chemistry of subcellular particles, cells, and tissues; microbial and plant metabolism; comparative biochemistry; genetics and physiology of viruses, bacteria, fungi, protozoa, helminths, and cells of higher forms of life; the genetics, structure, development, and physiology of plants and animals, including endocrinology and work physiology; excitable membranes; neurobiology, ecology, systematics, and evolution of microorganisms, plants, and animals; host-parasite relationships including immunology; and the teaching of biology. The field in which work is offered will be indicated in the student's record. May be repeated for credit.

BIOL 69800 Research M.S. Thesis (Arr. cr.) M.S. Thesis.

BIOL 69900 Research Ph.D. Thesis (Arr cr.) Research Ph.D. Thesis.

BIOL-G 901 Advanced Research (6 cr.)

Undergraduate Level

BIOL-K 101 Concepts of Biology I (5 cr.) P: high school or college chemistry Fall, day; Spring, day, night; Summer, day. An introductory course emphasizing the principles of cellular biology; molecular biology; genetics; and plant anatomy, diversity, development, and physiology.

BIOL-K 102 Honors Concepts of Biology I (5 cr.) P: high school or college chemistry For Honors Credit: Fall, day; Spring, day, night; Summer, day. An introductory course emphasizing the principles of cellular biology; molecular biology; genetics; and plant anatomy, diversity, development, and physiology.

BIOL-K 103 Concepts of Biology II (5 cr.) P: K101 Fall, day, night; Spring, day; Summer, day. An introductory biology course emphasizing phylogeny, structure, physiology, development, diversity, evolution and behavior in animals.

BIOL-K 104 Honors Concepts of Biology II (5 cr.) P: K101 For Honors Credit: Fall, day, night; Spring, day; Summer, day. An introductory biology course emphasizing phylogeny, structure, physiology, development, diversity, evolution and behavior in animals.

BIOL-K 295 Special Assignments (Arr cr.) P: consent of instructor. Fall, Spring. Special work, such as directed readings, laboratory or fieldwork, or presentation of material not available in the formal courses in the department.

BIOL-K 322 Genetics and Molecular Biology (3 cr.) P: K103 and CHEM C106. Fall, day. Spring of even-numbered years. The course covers the principles of classical and

molecular genetics including Mendelian inheritance, linkage, nucleic acids, gene expression, recombinant DNA, genomics, immunogenetics, and regulation.

BIOL-K 323 Genetics and Molecular Biology Laboratory (2 cr.) P or C: K322. Fall, day. Applied principles of genetics and molecular biology using organisms of increasing complexity from viruses to fruit fly. Laboratory experiments include linkage analyses, deletion mapping, isolation of human chromosomes, mutagenesis, DNA extraction, restriction enzyme analysis, and PCR.

BIOL-K 324 Cell Biology (3 cr.) P: K103 and CHEM C106. Spring, day. Examination of the structure and activity of eukaryotic cells and subcellular structures. Emphasis is on regulation of and interactions among subcellular events, such as protein targeting, transmembrane signaling, cell movement, and cell cycle.

BIOL-K 325 Cell Biology Laboratory (2 cr.) P or C: K324. Spring, day. Experiments on the molecular and biochemical basis of organization and function of eukaryotic cells.

BIOL-K 331 Embryology (3 cr.) P: K103. Fall, Spring, day. The development of animals through differentiation of cells, tissues, organs, and organ systems will be examined.

BIOL-K 333 Embryology Laboratory (1 cr.) P or C: K331. Spring, day. Processes of animal development are examined in a series of classical and modern experiments using cell, tissue and embryo culture, drug treatments, and microscopic techniques.

BIOL-K 338 Introductory Immunology (3 cr.) P: K103 and CHEM C106. Fall, day, night. Principles of basic immunology with an emphasis on the cells and molecules underlying immunological mechanisms.

BIOL-K 339 Immunology Laboratory (2 cr.) P or C: K338. Fall, day, night. Demonstration of immunological principles by experimentation. Exercises include cells and factors of the innate and the adaptive immune systems.

BIOL-K 341 Principles of Ecology and Evolution (3 cr.) P: K103. Fall, day. A study of the interactions of organisms with one another and with their nonbiotic environments in light of evolution.

BIOL-K 342 Principles of Ecology and Evolution Laboratory (2 cr.) P or C: K341. Fall, day. Application of ecology and evolution principles in laboratory and field experiments as well as demonstration of techniques of general ecology.

BIOL-K 350 Comparative Animal Physiology (3 cr.) P: N107 or K103, CHEM C106. Fall. A comparative examination of principles of animal physiology from molecular to organismal levels using homeostasis, regulation, and adaptation as central themes.

BIOL-K 356 Microbiology (3 cr.) P: K103, CHEM C341 Spring, day, night. Introduction to microorganisms: cytology, nutrition, physiology, and genetics. Importance of microorganisms in applied fields including infectious disease.

BIOL-K 357 Microbiology Laboratory (2 cr.) P or C: K356. Spring, day. Laboratory experiments and demonstrations to yield proficiency in aseptic cultivation and utilization of microorganisms; experimental investigations of biological principles in relation to microorganisms.

BIOL-K 411 Global Change Biology (3 cr.) P: K101 and K103 or GEOL G109 and one course in chemistry or consent of instructor. Examination of changes in earth's environment over history. In-depth study of effects of environmental change, including global warming, on the ecology of various organisms.

BIOL-K 416 Cellular Molecular Neuroscience (3 cr.) P: BIOL-K324 Cell Biology. This course is designed to provide an in-depth analysis of topics within the field cellular and molecular neuroscience. It will cover invertebrate and vertebrate neurobiology, cell and molecular biology of the neuron, neurophysiology, neuroanatomy, developmental neurobiology, regeneration and degeneration, learning and memory, and will include comparisions of neural mechanisms throughout the animal kingdom.

BIOL-K 483 Biological Chemistry (3 cr.) P: CHEM C342. Fall, day. Chemistry of biologically important molecules including carbohydrates, lipids, proteins, and nucleic acids. Special emphasis on chemistry of intermediary metabolism.

BIOL-K 484 Cellular Biochemistry (3 cr.) P: CHEM C342. Spring, day, night. Emphasis on selected topics in cellular biochemistry, including nucleic acid: protein interactions, protein: protein interactions, protein synthesis, biogenesis of membranes, and signal transduction. Current techniques for studying these processes in higher eukaryotes will be discussed.

BIOL-K 490 Capstone (1 cr.) P: senior standing. Faculty-directed or approved independent library research on an area of public, scientific interest or a community service activity in local industry, government, schools, or other public science-related groups or organizations. Topics for independent research and a list of service opportunities are available in the Department of Biology Office.

BIOL-K 493 Independent Research (1-3 cr.) P: consent of instructor. Fall, Spring, Summer. A course designed to give undergraduate students majoring in biology an opportunity to do research in fields in which they have a special interest.

BIOL-K 494 Senior Research Thesis (1 cr.) P: K493. Fall, Spring, Summer. A formally written report describing the results or accomplishments of K493.

Biostatistics

BIOS-S 515 Biostatistical Practicum (1-3 cr.) P: STAT 52100; BIOS S527, S546; or consent of instructor. Real-world projects in biostatistics involving participation in consulting sessions, directed reading in the literature, research ethics, design of experiments, collection of data and applications of biostatistical methods. Detailed written and oral reports required. May be repeated, up to 6 credits.

BIOS-S 527 Introduction to Clinical Trials (3 cr.) P: STAT 51200, exposure to survival analysis; or consent of instructor. Prepares biostatisticians for support of clinical trial projects. Topics: fundamental aspects of the appropriate design and conduct of medical experiments involving human subjects including ethics, design, sample size calculation, randomization, monitoring, data collection analysis and reporting of the results.

BIOS-S 530 Statistical Methods in Bioinformatics (pending approval) (3 cr.) P: STAT 51200, 51900; or consent of instructor. Covers a broad range of statistical methods used in many areas of bioinformatics research, including sequence alignment, genome sequencing and gene finding, gene expression microarray analysis, transcriptional regulation and sequence motif finding, comparative genomics, and proteomics.

BIOS-S 546 Applied Longitudinal Data Analysis (3 cr.) P: STAT 51200, 52500; or permission of instructor. Covers modern methods for the analysis of repeated measures, correlated outcomes and longitudinal data. Topics: repeated measures ANOVA, random effects and growth curve models, generalized estimating equations (GEE) and generalized linear mixed models (GLMMs). Extensive use of statistical software, e.g. SAS, R.

BIOS-S 598 Topics in Biostatistical Methods (1-3 cr.) P: Consent of advisor. Directed study and reports for students who wish to undertake individual reading and study on approved topics.

BIOS-S 612 Modern Statistical Learning Methods (3 cr.) P: STAT 52500. This course covers the various topics pertaining to the modern methods of high-dimensional data analysis. Course is still subject to final approval by The University Graduate School.

BIOS-S 621 Advanced Statistical Computing (pending approval) (3 cr.) P: STAT 52100, 52500, 52800. A study of computing methods commonly used in statistics. Topics include computer arithmetic, matrix algebra, numerical optimization methods with application to maximum likelihood estimation and GEEs, spline smoothing and penalized likelihood, numerical integration, random number generation and simulation methods, Gibbs sampling, bootstrap methods, missing data problems and EM, imputation, data augmentation algorithms, and Fourier transforms. Students should be proficient with effective implementation of numerical algorithms in one of commonly used computer languages (C, Fortran, S, R or similar).

BIOS-S 627 Statistics in Pharmaceutical Research (3 cr.) P: STAT 51200; BIOS S527, S546. An overview of the drug development process, including the various phases of development from pre-clinical to post-marketing. Topics: statistical issues in design, study monitoring, analysis and reporting. Additional topics may include regulatory and statistical aspects of population pharmacokinetics and real world applications.

BIOS-S 634 Stochastic Modeling in Biomedical and Health Sciences (pending approval) (3 cr.) P: STAT 52800. The aim of this course is to develop those aspects of stochastic processes that are relevant for modeling important problems in health sciences. Among the topics to be covered are: Poisson processes, birth and death processes, Markov chains and processes, semi-Markov processes, modeling by stochastic diffusions. Applications will be made to models of prevalence and incidence of disease, therapeutic clinical trials, clinical trials for prevention of disease, length biased sampling, models for early detection of disease, cell kinetics and family history problems.

BIOS-S 636 Advanced Survival Analysis (pending approval) (3 cr.) P: STAT 62800. Discusses the theoretical basis of concepts and methodologies associated with survival data and censoring, nonparametric tests, and competing risk models. Much of the theory is developed using counting processes and martingale methods. Material is drawn from recent literature.

BIOS-S 646 Advanced Generalized Linear Models (Pending Approval) (3 cr.) P: BIOS S546. Presents classical and modern approaches to the analysis of multivariate observations, repeated measures, and longitudinal data. Topics include the multivariate normal distribution, Hotelling's T2, MANOVA, the multivariate linear model, random effects and growth curve models, generalized estimating equations, statistical analysis of multivariate categorical outcomes, and estimation with missing data. Discusses computational issues for both traditional and new methodologies.

BIOS-S 698 Topics in Biostatistical Methods (1-3 cr.) P: Consent of instructor. Directed study and reports for students who wish to undertake individual reading and study on approved topics.

BIOS-S 699 Ph.D. Thesis/Research (1-15 cr.) P: Must have been admitted to candidacy. See advisor for more information. Research required by the graduate students for the sole purpose of writing a Ph.D. Dissertation.

Candidate

CAND 99100 Candidate (0 cr.) If you are an undergraduate, you will be given permission to register for CAND 99100 within one week of applying for graduation. Graduate students do not require course permission to register.

Chemistry

Graduate

CHEM 53300 Introductory Biochemistry (3 cr.) P: C342 or equivalent. A rigorous one-semester introduction to biochemistry.

CHEM 54200 Inorganic Chemistry (3 cr.) P: C362 or equivalent or consent of instructor. Atomic structure; periodic trends and properties of the elements. Introduction to symmetry and group theory. Valence bond, molecular orbital, and ligand field theories of bonding and their application to structure and properties of inorganic and organometallic compounds. Spectroscopic properties and acid-base, oxidation-reduction, and coordination reactions of inorganic compounds. Advanced topics in main group or transition element chemistry.

CHEM 57500 Intermediate Physical Chemistry (3 cr.) P: C362 or equivalent. Quantum theory of atoms and molecules, theories of chemical bonding, molecular spectroscopy, methods for determining molecular structure, and electrical and magnetic properties.

CHEM 59900 Special Assignments (1-4 cr.) P: consent of instructor. Every semester including summer I and II, time arranged. Directed reading or special work not included in other courses.

CHEM 62100 Advanced Analytical Chemistry (3 cr.) P: C311 and C410. A critical survey of recent developments in chemical and instrumental methods of analysis.

CHEM 62900 Chromatographic Methods of Analysis (3 cr.) P: C410 or equivalent or consent of instructor. Principles and practice of modern gas and liquid

chromatography and capillary electrophoresis are developed from an integrated point of view. Emphasis is placed both on theory and on features useful for practical analytical separations.

CHEM 63400 Biochemistry: Structural Aspects (3 cr.) P: C311, C342, C361, and C362 or equivalent. Chemistry of materials of biochemical interest: carbohydrates, lipids, proteins, amino acids, nucleic acids, porphyrins, biochemistry of blood.

CHEM 63600 Biochemical Mechanisms (3 cr.) P: one year of physical chemistry and CHEM 65100. The chemical basis of enzymatic catalysis with particular emphasis on catalytic interactions important in aqueous media.

CHEM 64100 Advanced Inorganic Chemistry (3 cr.) P: C430 or 54200 or equivalent or consent of instructor. Applications of symmetry and group theory to structure, bonding and spectral properties of inorganic compounds. Advanced topics in main group and transition element chemistry including determination of structure from physical and spectroscopic properties, bonding in coordination, and organometallic compounds and inorganic reaction mechanisms.

CHEM 65100 Advanced Organic Chemistry (3 cr.) P: C342 or equivalent. Modern structural organic chemistry. Introduction to bonding theory, stereochemistry, and computational chemistry.

CHEM 65200 Synthetic Organic Chemistry (3 cr.) P: 65100 or 65700. An advanced treatment of methods for preparing major types of organic functionalities and bonds, stressing stereo chemical and radiochemical control, and employing mechanistic organic chemistry for understanding choice of reagents and reactions conditions

CHEM 65700 Reaction Mechanisms (3 cr.) P: C342 or equivalent or consent of instructor. Modern structural organic chemistry, introduction to physical organic chemistry, mechanisms of representative reactions, and methods used for understanding reactivity in organic transformations.

CHEM 67200 Quantum Chemistry (3 cr.) P: one year of physical chemistry. Basic principles of classical and quantum mechanics, approximation methods, atomic structure, spectroscopy, application of group theory, and theory of molecular bonding.

CHEM 67500 Chemical Kinetics (2-3 cr.) P: one year of physical chemistry. Experimental and theoretical considerations of chemical reaction rates and mechanisms.

CHEM 68200 Statistical Thermodynamics (3 cr.) P: C362 or equivalent. Application of statistical mechanics to the description of imperfect gases, liquids, and solutions, to order-disorder phenomena in solids and surfaces; Monte Carlo techniques and molecular dynamics.

CHEM 69500 Seminar (0-1 cr.)

CHEM 69600 Special Topics in Chemistry: Analytical Spectroscopy (1-3 cr.) P: Bachelor of Science in chemistry from an accredited institution or consent of instructor. Survey of modern techniques, applications of spectroscopy, and imaging in analytical chemistry.

CHEM 69600 Special Topics in Chemistry: Applied Computational Chemistry and Molecular Modeling (1-3 cr.) Applied computational techniques that are widely used in the chemical and pharmaceutical industry, including computational chemistry, molecular modeling, and computer-aided synthesis.

CHEM 69600 Special Topics in Chemistry: Electroanalytical Chemistry (3 cr.) Principles of modern methods of electroanalytical chemistry and quantitative applications to electrode reaction mechanisms and analytical determinations.

CHEM 69600 Special Topics in Chemistry: Medicinal Chemistry (1-3 cr.) The application of basic concepts of organic chemistry, biochemistry, and pharmacology to the design of organic medicinal agents as well as recent advances in synthesis and evaluation of pharmaceuticals.

CHEM 69600 Special Topics in Chemistry: Organometallics in Organic Synthesis (1-3 cr.) Recent developments in the use of transition metals in synthetic organic methodology. Emphasis is placed on applications of methods in the synthesis of complex organic molecules.

CHEM 69600 Special Topics in Chemistry: Protein Structure and Function (1-3 cr.) Physical forces stabilizing protein structure; protein folding. Essential features of macromolecular interactions. Introduction to enzyme kinetics and chemical mechanism in enzyme reactions.

CHEM 69600 Special Topics in Chemistry: Group Theory in Chemistry (1-3 cr.) This course is on molecular symmetry and how we obtain information about the quantum states of molecules through application of group theoretical techniques related to the symmetries of molecules.

CHEM 69600 Special Topics in Chemistry: Solid-Phase Synthesis and Combinatorial Chemistry: Theory and Practice (1-3 cr.) This course will explore how the tools of solid-phase synthesis and combinatorial chemistry are being used to solve a wide variety of problems requiring chemical solutions. Examples range from medicinal chemistry and drug discovery to new catalyst creation, from new "chiral selectors" to new biochemical probes. The course will focus on the rationale for employing a combinatorial approach in chemical discovery. It will teach the basics of solid-phase organic chemistry, and the methodology, equipment, and analytical technology employed to use it as a tool to rapidly and effectively carry out a combinatorial approach to problem solving.

CHEM 69600 Special Topics In Chemistry: Bioanalytical Chemistry (3 cr.) Modern techniques for the study of biological macromolecules, such as protein and peptides, carbohydrates, DNA, RNA, and lipids, including (1) spectroscopy (UV-Vis, Raman, NMR, mass spectrometry, and light scattering); (2) bioseparations (chromatography, electrophoresis, and microdialysis); (3) electrochemistry (sensors, electron transfer, and LCEC); and (4) miscellaneous topics (amino acid analysis, sequencing, microcalorimetry, and immunochemistry).

CHEM 69600 Special Topics in Chemistry: Biochemistry-Dynamic Aspects (1-3 cr.) Mechanisms of biological catalysis, metabolism, biosynthesis, regulation of genetic information, and molecular biology.

CHEM 69600 Special Topics in Chemistry: Bioelectrochemistry (1-3 cr.) Principles of electrochemical measurements including potentiometry, amperometry, and linear sweep and cyclic voltammetry and application to the study and utilization of biological molecules. Topics covered include redox transformations in biological systems, electron transfer between electrodes and biological molecules, and electrochemical sensors for detection and quantitation of biological analytes.

CHEM 69600 Special Topics in Chemistry: Bioinorganic Chemistry (1-3 cr.) A study of the occurrence, properties, and mechanistic roles of transition and main group elements in biological processes including photosynthesis, oxygen evolution, respiration, nitrogen fixation, metabolic detoxification, and electron transfer.

CHEM 69600 Special Topics in Chemistry: Bioorganic Chemistry (1-3 cr.) Structure and reactivity of biological macromolecules, such as proteins, enzymes, and nucleic acids, and their relevance to bioorganic chemistry. Current experimental studies of enzymes, nucleic acids, and model systems.

CHEM 69600 Special Topics in Chemistry: Biomaterials (1-3 cr.) Introduction to the field of biomaterials science including chemistry, physics, and engineering of biomaterials; biological and biochemical aspects of biomaterials; and biomaterials in medicine.

CHEM 69600 Special Topics in Chemistry: Biophysical Chemistry (1-3 cr.) The study of structure and properties of biologically important macromolecules in solution using physical techniques, with special emphasis on optical, fluorescence, and magnetic resonance spectroscopy to describe protein conformation, denaturation, catalytic center structure, thermodynamics of ligand binding, time-dependent processes, and membrane properties.

CHEM 69600 Special Topics in Chemistry: Chemical Information Technology (1-3 cr.) Overview of chemical informatics techniques, including chemical information and data systems, chemical structure and data representation and search systems, and bioinformatics techniques.

CHEM 69800 Research M.S. Thesis (Arr. cr.) Research M.S. Thesis

CHEM 69900 Research Ph.D. Thesis (Arr. cr.) Research Ph.D. Thesis

Undergraduate

CHEM-C 100 The World of Chemistry (3 cr.) A topically oriented, nonmathematical introduction to the nature of matter. Topics covered include fossil fuel and nuclear sources of power; environmental issues involving chemistry such as recycling, acid rain, air and water pollution, global warming, ozone depletion; genetic modification of foods, DNA profiling, use of food additives and herbal supplements; and other public policy issues involving science.

CHEM-C 101 Elementary Chemistry I (3 cr.) P: at least one semester of high school algebra. Usually taken concurrently with C121. Fall, day, night; Spring, day, night; Summer II, day. Essential principles of chemistry, atomic and molecular structure, bonding, properties and reactions of elements and compounds, stoichiometry, solutions, and acids and bases. For students who are not planning careers in the sciences and for those with no previous course work in chemistry. Note: most degree programs that include C101 require the concurrent laboratory, C121.

CHEM-C 105 Principles of Chemistry I (3 cr.) P: two years of high school algebra and one year of high school chemistry. Fall, day, night; Spring, day; Summer I, day. Usually taken concurrently with C125. A placement examination may be required for admission to this course. See "Chemistry Placement Examination" above. Principles of inorganic and physical chemistry emphasizing physical and chemical properties, atomic and molecular structure, chemical bonding, and states of matter.

CHEM-C 106 Principles of Chemistry II (3 cr.) P: C105 or equivalent. Fall, day; Spring, day, night; Summer II, day. Continuation of C105. Usually taken concurrently with C126. Topics include condensed phases, solution chemistry, thermodynamics, equilibrium, and kinetics.

CHEM-C 110 The Chemistry of Life (3 cr.) High school chemistry recommended. Optional laboratory: C115. A nonmathematical introduction to organic molecules and their transformation to useful materials such as drugs and polymers. An emphasis is placed on the chemical features of biomolecules including hormones and neurotransmitters, proteins, lipids (fats), carbohydrates (sugars), and nucleic acids (DNA/RNA). The chemistry of enzymes, carcinogens, vitamins, antihistamines, anesthetics, genetic engineering, mental health, and other health-related topics.

CHEM-C 115 Laboratory for C110 The Chemistry of Life (2 cr.) P or C: C110. Laboratory work illustrating topics covered in C110.

CHEM-C 121 Elementary Chemistry Laboratory I (2 cr.) P or C: C101 (3 cr.) Fall, day, night; Spring, day, night; Summer II, day. Introduction to the techniques and reasoning of experimental chemistry. Emphasis is given to study of physical and chemical properties of inorganic compounds.

CHEM-C 125 Experimental Chemistry I (2 cr.) P or C: C105 or equivalent. Fall, day, night; Spring, day; Summer I, day. Laboratory work illustrating topics covered in C105.

CHEM-C 126 Experimental Chemistry II (2 cr.) P: C105 and C125; P or C: C106 or equivalent. Fall, day; Spring, day, night; Summer II, day. Continuation of C125. Laboratory work illustrating topics covered in C105 and C106.

CHEM-C 209 Special Problems (1-2 cr.) P: two semesters of college chemistry and consent of instructor. Every semester, time arranged. Individually supervised special problems of chemical interest, e.g., environmental problems, development of experiments, development of audiovisual materials, etc. May be repeated for credit, but maximum of 2 credit hours may be applied toward a chemistry degree.

CHEM-C 301 Chemistry Seminar I (1 cr.) P or C: C409 and consent of instructor. Fall, day. Topics in various areas of chemistry. Students are required to attend departmental seminars and prepare and present at least one seminar on their research. C301 and C302 may be elected three semesters for credit.

CHEM-C 302 Chemistry Seminar II (1 cr.) P or C: C409 and consent of instructor. Spring, day. Content same as C301.

CHEM-C 309 Cooperative Education in Chemistry (1 cr.) P: general and organic chemistry and consent of departmental chairperson. Every semester, time arranged. Industrial or similar experiences in chemically oriented employment. Grade is determined on basis of employment visitations, a written student report, and a supervisor evaluation report. May be repeated for a maximum of 5 credit hours, of which 3 may be used to satisfy an advanced chemistry elective.

CHEM-C 310 Analytical Chemistry (3 cr.) P: C106 and C126. Spring, Summer I, day. Fundamental analytical processes including solution equilibria, theory and applications of electrochemistry and spectrophotometry, and chemical methods of separation.

CHEM-C 311 Analytical Chemistry Laboratory (1 cr.) P or C: C310. Spring, Summer I, day. Laboratory instruction in the fundamental analytical techniques discussed in C310.

CHEM-C 341 Organic Chemistry I (3 cr.) P: C106. Fall, day, night; Spring, day; Summer I, day. Comprehensive study of organic compounds. Valence bond theory, stereochemistry, and physical properties of organic compounds are discussed in detail. Introduction to reaction mechanisms and to spectroscopic identification. Synthesis and reactions of selected compounds are also discussed.

CHEM-C 342 Organic Chemistry II (3 cr.) P: C341. Fall, day; Spring, day, night; Summer II, day. Continuation of C341. The chemistry of aromatic compounds and other major functional groups are discussed in detail. Multistep synthetic procedures and reaction mechanisms are emphasized. Introduction to biological chemistry.

CHEM-C 343 Organic Chemistry Laboratory I (2 cr.) P: C126; P or C: C341. Fall, day, night; Spring, day, night; Summer I, day. Fundamental laboratory techniques of organic chemistry, introduction to spectroscopic methods of compound identification, and general synthetic methods.

CHEM-C 344 Organic Chemistry Laboratory II (2 cr.) P or C: C342; P: C343. Fall, night; Spring, day, night; Summer II, day. Preparation, isolation, and identification of organic compounds, spectroscopic methods of compound identification, qualitative organic analysis, multistep synthesis.

CHEM-C 360 Elementary Physical Chemistry (3 cr.) P: C106, MATH 22200, PHYS P202. Spring, day. Properties of gases and liquids, intermolecular forces, diffusion, chemical thermodynamics, ligand binding, kinetics, and introduction to quantum chemistry and spectroscopy. Includes topics in biophysical chemistry. For students who desire a survey course in physical chemistry.

CHEM-C 361 Physical Chemistry of Bulk Matter (3 cr.) P: C106, MATH 16600, and PHYS P202 or PHYS 25100 and C: MATH 26100. Spring, day. Kinetic-molecular theory, gases, liquids, thermodynamics, statistical mechanics, solutions, transport properties, and phase and chemical equilibria.

CHEM-C 362 Physical Chemistry of Molecules (4 cr.) P: C106, MATH 16600, and PHYS P202 or PHYS 25100 and C: MATH 26100. Fall, day. Quantum chemistry, symmetry, atomic and molecular structure and spectra, solids, chemical kinetics, photochemistry, and introduction to statistical thermodynamics.

CHEM-C 363 Experimental Physical Chemistry (2 cr.) P: C361 and C362 or P: C362 and C: C361. Spring. Experimental work to illustrate principles of physical chemistry and to introduce research techniques.

CHEM-C 371 Chemical Informatics I (1 cr.) P: C106, Fall. Basic concepts of information representation, storage, and retrieval as they pertain to chemistry. Structures, nomenclature, molecular formulas, coding techniques for visualization of chemical structures and properties.

CHEM-C 372 Chemical Informatics II: Molecular Modeling (2 cr.) P: C341. Introduction to computer representation of molecular structure and simulation of chemical reactions; visualizing fundamental chemical concepts, such as reaction paths of standard organic reactions, molecular orbital diagrams, vibrations and conformational changes; quantitative structure activity relationships (QSAR), pharmacophore docking to biomolecules, and related methods for drug design.

CHEM-C 409 Chemical Research (1-3 cr.) P: junior or senior standing and consent of instructor. Every semester, time arranged. Chemical or literature research with a report. Can be elected only after consultation with research advisor and approval of program. May be taken for a total of 10 credit hours, which count toward graduation. A minimum of three (3) credit hours may be used to satisfy the advanced chemical elective in the Bachelor of Science in Chemistry degree program.

CHEM-C 410 Principles of Chemical Instrumentation (3 cr.) P: C310 and C361. P or C: C362. Fall. Modern methods of instrumental analysis, including spectroscopy, chromatography, and electrochemistry.

CHEM-C 411 Principles of Chemical Instrumentation Laboratory (2 cr.) P: C311. P or C: C410. Fall. Laboratory instruction in the instrumental analysis techniques discussed in C410.

CHEM-C 430 Inorganic Chemistry (3 cr.) P: C362. Spring. Atomic structure; periodic trends and properties of the elements. Introduction to symmetry and group theory. Valence bond, molecular orbital and ligand field theories of bonding and their application to structure and properties of inorganic and organometallic compounds. Spectroscopic properties and acid-base, oxidation-reduction, and coordination reactions of inorganic compounds.

CHEM-C 435 Inorganic Chemistry Laboratory (1 cr.) P or C: C430. Spring. Synthesis, characterization, and study of chemical and physical properties of inorganic and organometallic compounds.

CHEM-C 471 Chemical Information Sources (1 cr.) P: C341. Fall. Techniques for the storage and retrieval in both printed and computer-readable formats; sources of chemical information, including Chemical Abstracts; development of search strategies; and online searching of chemical databases.

CHEM-C 472 Computer Sources for Chemical Information (1 cr.) P: C471. Spring. Techniques for the utilization of the

major computer-based information tools found in academic and industrial environments.

CHEM-C 484 Biomolecules and Catabolism (3 cr.) P: C342. Fall. The chemical and biophysical properties of biologically important molecules and systems. Special emphasis on the relationship between structure and function in proteins, nucleic acids, and biomembranes, as well as bioenergetics, kinetics, allosteric interactions, and enzyme catalysis.

CHEM-C 485 Biosynthesis and Physiology (3 cr.) P: C484. Spring. Mechanisms of biological catalysis, metabolism, biosynthesis.

CHEM-C 486 Biological Chemistry Laboratory (2 cr.) P: C484 or equivalent. P or C: C485. Spring. An introduction to the important laboratory techniques currently employed by practicing biological chemists, including biomolecule isolation, purification, enzyme kinetics, and biomolecule characterization by electrophoresis, centrifugation, and spectroscopic methods.

CHEM-C 488 Introduction to Medicinal and Agricultural Chemistry (3 cr.) Medicinal chemistry plays an integral role in drug discovery, providing the link between target identification and the development of a therapeutic agent. This course examines the role of chemistry in the discovery of bioactive molecules, highlighting the similarities and differences in the search for novel medicinal and agricultural chemicals.

CHEM-C 494 Introduction to Capstone (1 cr.) P: junior standing, B.A. or B.S. program. Fall, day; Spring, day. Course objectives are to: (1) facilitate student career planning, including topics such as work place or graduate school, and resume preparation; (2) improve verbal communication and presentation skills; and (3) provide appropriate discussion and planning for the independent study project, the major objective of the C495 Capstone course.

CHEM-C 495 Capstone in Chemistry (1 cr.) P: senior standing, B.A. or B.S. program. Fall, day; Spring, day. Independent study, under the supervision of a chemistry faculty member or appropriate academic advisor can be earned by completion of: (a) a chemical research project; (b) a library research project in an area of current scientific investigation; (c) a research investigation in industry; or (d) a service activity in university, government, public schools, or other science-related groups or organizations. Students will report the results of their activities in both a formal written report and oral presentation, prepare portfolios of undergraduate work in chemistry, discuss recent scientific literature, and explore chemistry in society. Enrollment in the Capstone in Chemistry requires joint approval of the capstone instructor and the independent project advisor.

CHEM-C 496 Special Topics in Chemistry (0-3 cr.) P: junior or senior standing; other prerequisites will be announced at the time of topic offering. Lectures on contemporary issue in chemistry. This course may also include reading assignments and special projects. Lectures on selected topics of current interest, as follows:

CHEM-C 496 Methods in Teaching Chemistry (1 cr.) P: C105. Fall; Spring. Designed for workshop leaders, this course offers continued support and training in-group dynamics and learning theory. The larger goals for this course are to continue the development of leadership skills, foster ongoing communication among workshop leaders, and provide an environment for reviewing content knowledge.

Computer and Information Science

Advanced Undergraduate and Graduate Level

CSCI 50200 Compiling and Programming Systems (3 cr.) P: 30000. R: 47000. Fall. Basic principles of compilers and compiler design; control of translation, loading, and execution; symbolic coding systems; lexical and syntactic analysis; design and operation of assemblers and macroprocessors; and design of interpretive systems. Students are expected to complete a large programming project as part of the course.

CSCI 50300 Operating Systems (3 cr.) P: 40300. Spring. Basic principles of operating systems: addressing modes, indexing, relative addressing, indirect addressing, stack maintenance; implementation of multitask systems; control and coordination of tasks, deadlocks, synchronization, and mutual exclusion; storage management, segmentation, paging, virtual memory, protection, sharing, and access control; file systems; resource management; and evaluation and prediction of performance.

CSCI 50400 Concepts in Computer Organization (3 cr.) P: 40200.The fundamentals of computer hardware for computer scientists. An overview of the organization of modern computers, ranging from sequential to advanced machines. CISC, RISC, and vector processors; multiprocessors; virtual storage, hierarchical memory; interaction with O/S; connection models; high-level programming support; and cost/performance analysis.

CSCI 50600 Management of the Software Development Process (3 cr.) A survey of the fundamental principles and concepts of managing a software project. Topics include life cycle models, standards and goals, cost estimation, risk analysis, tool use, component reuse, traceability, metrics, and process control and improvement. Students are required to apply management concepts using a project-based approach.

CSCI 50700 Object-Oriented Design and Programming (3 cr.) An advanced exploration of the object-oriented model and programming. Topics range from a review of the object model to advanced concepts such as abstraction mechanisms, standard library/packages, OO design using an OO language, and the syntax and the semantics of constructs.

CSCI 51200 Numerical Methods for Engineers and Scientists (3 cr.) P: MATH 35100 or MATH 51100; MATH 51000; and knowledge of programming. Not open to students with credit in 41400. Not normally accepted for graduate credit in computer science programs. A survey of the useful methods of computation. Solution of nonlinear equations and systems of nonlinear equations. Numerical methods for systems of linear equations. Approximate differentiation and integration. Numerical solution of ordinary differential equations. Introduction to partial differential equations and elementary approximation methods.

CSCI 51400 Numerical Analysis (3 cr.) P: 41400 or equivalent. Iterative methods for solving nonlinear equations, linear difference equations, applications to solution of polynomial equations, differentiation and integration formulas,

numerical solution of ordinary differential equations, and round-off error bounds.

CSCI 51500 Numerical Analysis of Linear Systems (3 cr.) P: knowledge of programming, and MATH 35100 or MATH 51100. Computational aspects of linear algebra; linear equations and matrices; direct and iterative methods; eigenvalues and eigenvectors of matrices; error analysis.

CSCI 51600 Computational Methods in Applied Mathematics (3 cr.) P: 26500 and MATH 51000 or consent of instructor. A study of techniques such as direct integration, shooting, finite difference, finite elements, method of weighted residuals, and methods of characteristics for solving problems in fluid mechanics, solid mechanics, dynamics, and other fields of applied mathematics.

CSCI 52000 Computational Methods in Analysis (3 cr.) P: 23000 or equivalent, and MATH 35100 or MATH 51100. A treatment of numerical algorithms for solving classical problems in real analysis with primary emphasis on linear and nonlinear systems of equations and on optimization problems; the writing, testing, and comparison of numerical software for solving such problems; and a discussion of the characteristics of quality software for implementing these algorithms.

CSCI 52600 Information Security (3 cr.) Basic notions of confidentiality, integrity, availability; authentication and protection models; security kernels; secure programming; audit; intrusion detection/response; operational security issues; personal security; policy formation/enforcement; access controls; information flow; legal/social issues; identification and authentication in local and distributed systems; classification and trust modeling; risk assessment.

CSCI 53600 Data Communication and Computer Networks (3 cr.) P: 40200. Data communications: communication hardware technologies including local area and long-haul network hardware, circuit and packet switching, interfaces between computer and network hardware, and performance issues. Network architecture: protocol software and conceptual layering, reliable delivery over an unreliable channel, transport protocols, virtual circuits, datagrams, Internet working as a fundamental design concept, the client-server paradigm, naming and name binding, name servers, addressing and address resolution, routing algorithms, congestion and flow control techniques, network file systems, distribution of computation, and DARPA Internet protocols (TCP/IP) as examples of protocol organization.

CSCI 53700 Introduction to Distributed Computing (3 cr.) P: 50300 and 53600. Introduction to the principles and methods in the design of distributed computing systems. It covers the fundamentals of distributed computing from four perspectives: underlying communication media, protocols and their implications; operating system issues; high-level language constructs; and distributed algorithms.

CSCI 53800 The Design of Interactive Systems (3 cr.) Fundamental concepts and tools employed in designing the interaction between humans and machines and the mediating interfaces. Topics include: design problem, interface design concepts, experimental design and analysis, cognitive and predictive models, the design project, case studies, and applications.

CSCI 53900 Computing with Distributed Objects (3 cr.) An introductory treatment of the distributed-object model and programming. The topics range from a review of the distributed and object models of computation to advanced concepts such as remote method invocations, object brokers, object services, open systems, and future trends for distributed-object systems.

CSCI 54100 Database Systems (3 cr.) P: 44300 or equivalent. Spring. Fundamentals for the logical design of database systems. The entity-relationship model, semantic model, relational model, hierarchical model, network model. Implementations of the models. Design theory for relational databases. Design of query languages and the use of semantics for query optimization. Design and verification of integrity assertions, and security. Introduction to intelligent query processing and database machines.

CSCI 54300 Introduction to Simulation and Modeling of Computer Systems (3 cr.) P: 26500 and STAT 51100 or equivalent. Simulation: discrete event simulation, process-oriented simulation, generating random numbers, simulation languages, simulation examples of complex systems. Nondeterministic models: random variables, Poisson process, moment generating functions, statistical inference, and data analysis. Modeling: elementary queuing models, network of queues, and applications to performance evaluation of computer systems.

CSCI 54700 Information Storage and Retrieval and Natural Language Processing (3 cr.) P: 54100. Complex data structures of fields within records, as well as clustered, multilist, and inverted files; key decoding by tree and randomized techniques; overall techniques of classical document retrieval systems, e.g., the MEDLARS and NASA systems; overall techniques of automatic document retrieval systems, e.g., TIP and SMART, the internal structure of SMART; question answering systems; and natural language translation.

CSCI 54800 Introduction to Bioinformatics (3 cr.) P: 34000, BIOL K483, CHEM C483, or MATH 51100. Analysis of biological data employing various computational methods to obtain useful information in the emerging area of bioinformatics. Topics include structures, functions and evolution of proteins and nucleic acids, retrieval and interpretation of bioinformation from the Internet, learning principles, algorithms and software for sequence alignment, similarity search of sequence databases, estimation of phylogenetic trees, structural prediction, and functional inference.

CSCI 54900 Intelligent Systems (3 cr.) This course will discuss problems in the area of intelligent systems. Topics include the formalisms within which these problems are studied, the computational methods that have been proposed for their solution, and the real-world technological systems to which these methods have been applied.

CSCI 55000 Computer Graphics (3 cr.) An introduction to computer graphics. Topics include the concepts, principles, algorithms, and programming techniques in 3D interactive computer graphics. Emphasis is on the development and applications of 3D graphic algorithms and methods.

CSCI 55200 Advanced Graphics and Visualization (3 cr.) P: 55000. An introduction to data visualization methods and

tools, and related graphics techniques. Students will explore a variety of data representation and modeling techniques, their corresponding visualization algorithms, and practical visualization applications in scientific, engineering, and biomedical fields.

CSCI 55500 Cryptography (3 cr.) P: MATH 351, CS 251, CS 381, and CS 426 or equivalent. Concepts and principles of cryptography and data security. Cryptography (secret codes): principles of secrecy systems; classical cryptographic systems, privacy enhanced email; digital signatures. Proprietary software protection; information theory and number theory; complexity bounds on encryption; key escrow; traffic analysis; attacks against encryption; basic legal issues; e-commerce; the role of protocols.

CSCI 55600 Fault-Tolerant Computing (3 cr.) P: 36200. Concepts of fault-tolerant computing; phases of fault-tolerance; applications to commercial, communication, and aerospace systems; fault-tolerance in multi-processor systems; diagnosis techniques; software fault-tolerance.

CSCI 56500 Programming Languages (3 cr.) P: 30000. R: 47000. Fall. An exploration of modern or unconventional concepts of programming languages, their semantics, and their implementations; abstract data types; axiomatic semantics using Hoare's logic and Dijkstra's predicate transformers; denotational semantics; functional, object-oriented, and logic programming; concurrency and Owicki-Gries theory. Example languages include ML, Ada, Oberon, LISP, PROLOG, and CSP.

CSCI 57300 Data Mining (3 cr.) P: STAT 511 or equivalent, CS 381 or equivalent, or permission of the instructor. Data Mining has emerged at the confluence of artificial intelligence, statistics, and databases as a technique for automatically discovering summary knowledge in large datasets. This course introduces students to the process and main techniques in data mining, including classification, clustering, and pattern mining approaches. Data mining systems and applications will also be covered, along with selected topics in current research.

CSCI 58000 Algorithm Design, Analysis, and Implementation (3 cr.) P: 46300 and 47000. Basic techniques for designing and analyzing algorithms: dynamic programming, divide-and-conquer, balancing, upper and lower bounds on time and space costs, worst case and expected cost measures. A selection of applications such as disjoint set union/find, graph algorithms, search trees, pattern matching. The polynomial complexity classes P, NP, and co-NP; intractable problems.

CSCI 58200 Automata and Formal Languages (3 cr.) P: 47000. Spring. Finite automata, regular expressions; push-down automata, context-free grammars; and languages and behaviors. Closure properties, pumping lemmas, and decision procedures. Deterministic context-free languages and LR(k) parsing; brief survey of the Chomsky hierarchy.

CSCI 58500 Mathematical Logic I (3 cr.) Students should register for MATH 58500. P: MATH 35100. Formal theories for propositional and predicate calculus with study of models, completeness, and compactness. Formalization of elementary number theory; Turing machines, halting problem, and the undecidability of arithmetic.

CSCI 59000 Topics in Computer Science (3 cr.) Fall, spring. Directed study for students who wish to undertake individual reading and study on approved topics.

Courses for Majors

CSCI 12000 Windows on Computer Science (1 cr.) A first-year seminar for beginning majors in Computer Science. Open to all beginning IUPUI students and transfer students with below 18 credit hours.

CSCI 23000 Computing I (4 cr.) P or C: MATH 15400 or MATH 15900. The context of computing in history and society, information representation in digital computers, introduction to programming in a modern high-level language, introduction to algorithm and data structures, their implementation as programs.

CSCI 24000 Computing II (4 cr.) P: 23000. Continues the introduction of programming began in CSCI 230, with particular focus on the ideas of data abstraction and object-oriented programming. Topics include programming paradigms, principle of language design, object-oriented programming, programming and debugging tools, documentation, recursion, linked data structures, and introduction to language translation.

CSCI 26500 Advanced Programming (3 cr.) P or C: ECE 26400 and CSCI 24200 or CSCI 23000. Spring. Learn advanced programming skills and concepts. Introduction to software engineering: problem specification and program design with emphasis on object-oriented programming, programming style, debugging, and documentation. A significant software project's required. (This course is for computer engineering and computer information systems majors.)

CSCI 30000 Systems Programming (3 cr.) P or C: 23000 and 24000. Fall. Assembly language programming and structure of a simple and a typical computer. Pseudo operations, address structure, subroutines, and macros. File I/O and buffering techniques. Interfacing with high-level languages. Assemblers: one- and two-pass assemblers, system dependent and independent assembler features, and design options. Loaders, linkers, and macro processors.

CSCI 34000 Discrete Computational Structures (3 cr.) P: 23000 and MATH 16500. Fall. Theory and application of discrete mathematics structures and their relationship to computer science. Topics include mathematical logic, sets, relations, functions, permutations, combinatorics, graphs, Boolean algebra, digital logic, recurrence relations, and finite-state automata.

CSCI 34050 Honors Discrete Computational Structures (3 cr.) P: MATH 16500 or equivalent and CSCI 23000 or equivalent, or instructor permission. Fall/Spring. Discrete structures introduces students to the vocabulary, notation, formalisms, constructs, and methods of abstraction in which almost all of the advanced thinking in and about computer science is carried out. Topics include basic logic, proof techniques, recursion and recurrence relations, sets and combinatorics, probability, relations and functions, graphs and trees, Boolean algebra, and models of computation. An advanced project is expected in this course.

CSCI 35500 Introduction to Programming Languages (3 cr.) P: 24000 and 34000. Spring. Programming language concepts and different paradigms of programming. Topics

include syntax and semantics of high-level languages, parsing methods, subprograms and their implementation, data abstraction, language translation overview including lexical analysis, syntax-directed translation, symbol table handling, code generation, functional programming, logic programming, and object-oriented programming.

CSCI 36200 Data Structures (3 cr.) P: 24000 and 34000. Spring. A study of the design and analysis of data structures and algorithms. Abstract data types: arrays, stacks, queues, lists, trees, and graphs. Algorithms: sorting, searching, and hashing. File structures: organization and access methods.

CSCI 36250 Honors Data Structures and Algorithms (3 cr.) P: CSCI 23000, CSCI 24000, and CSCI 34000 or CSCI 34050. Fall/Spring. This course includes fundamentals of data structures and algorithms, such as algorithm analysis, lists, stacks, and queues, trees, hashing and heaps, sorting, graph algorithms, and file structures. An advanced project is expected.

CSCI 40200 Architecture of Computers (3 cr.) P: 34000. Fall. Basic logic design. Storage systems. Processor organization: instruction formats, addressing modes, subroutines, hardware and microprogramming implementation. Computer arithmetic, fixed and floating point operations. Properties of I/O devices and their controllers. Interrupt structure. Virtual memory structure, cache memory. Examination of architectures such as microcomputers, minicomputers, and vector and array processors.

CSCI 40300 Introduction to Operating Systems (3 cr.) P: 36200, and 40200. Spring. Operating system concepts; history, evolution and philosophy of operating systems. Concurrent processes, process coordination and synchronization, CPU scheduling, deadlocks, memory management, virtual memory, secondary storage and file management, device management, security and protection, networking, and distributed and real-time systems.

CSCI 41400 Numerical Methods (3 cr.) P: MATH 26200 or MATH 35100. Fall. Error analysis, solution of nonlinear equations, direct and iterative methods for solving linear systems, approximation of functions, numerical differentiation and integration, and numerical solution of ordinary differential equations. Not open to students with credit in 51200.

CSCI 43200 Security in Computers (3 cr.) P:40300. An introduction to computing security to include cryptography, identity and authentication, software security, operatiing system security, trusted operating system design and evaluation, network threats and defenses, security management, legal aspects of security, privacy and ethics.

CSCI 43500 Multimedia Information Systems (3 cr.) P or C: CSCI 36200, MATH 35100/51100. Multimedia inforamtion systems concepts, evolution of multimedia information systems, media and supporting device commonly associated, image databases, techniques for presenting visual information, video databases, multimodels, audio databases, text databases, and multimedia information systems architecture.

CSCI 43600 Principles of Computer Networking (3 cr.) P: CSCI 36200. Survey of underlying principles, fundamental problems, and their solutions in designing computer networks. Laboratory projects include using network systems and network simulation environments. Topics include: motivations, networking topologies, layered open systems protocols, transmission capacity, circuit and packet switching, packet framing and error correction, routing, flow and congestion control, and internetworking.

CSCI 43700 Introduction to Computer Graphics (3 cr.) P: 36200 and MATH 35100/51100. An introduction to 3D programming with emphasis on game engine development using 3D graphics techniques and the standard and platform independent OpenGL library. Topics include lighting, shading, texture mapping, coordinate systems and transformations, collision detection, 3D geometric and physically based modeling and animation.

CSCI 43800 Advanced Game Development (3 cr.) P: 43700. Advanced game design and development principles and technologies. Students will gain practical experience through extensive game development project. Topics include character animation, special effects, user interface design, networking for computer games, game engine components and variations, game performance considerations, artificial intelligence, and ethics in computer games.

CSCI 44100 Client-Server Database Systems (3 cr.) P or C: CSCI 36200. Database system concepts, data models database design, CASE tools, SQL, query processing and query optimization, transaction processing, reliability and security issues, database interactions on the World Wide Web.

CSCI 44300 Database Systems (3 cr.) P: 36200. Fall. Relational database systems: architecture, theory, and application. Relational data structure, integrity rules, mathematical description, data manipulation. Standard SQL and its data manipulation language, engineering aspects of database design in industry, introduction to nonrelational database systems.

CSCI 44600 Introduction to Microprocessor Architecture (3 cr.) P: 40200. Introduction to programmable logic; elements of microprocessor system design; interrupt structures; interfacing using LSI devices; hardware timers; interactive debugging; physical device I/O programming; vectored and polled service; microprocessor architecture; and self-paced laboratory using A/D converters, D/A converters, etc.

CSCI 44800 Biometric Computing (3 cr.) P: CSCI 36200 and STAT 41600 or STAT 51100. Biometrics is capturing and using physiological and behavioral characteristics for personal identification. It is set to become the successor to the PIN. This course will introduce computational methods for the implementation of various biometric technologies including face and voice recognition, fingerprint and iris identification, and DNA matching.

CSCI 45000 Principles of Software Engineering (3 cr.) P: CSCI 36200. Fall. Tools and techniques used in software development. Lifecycle concepts applied to program specification, development, and maintenance. Topics include overall design principles in software development; the use of structured programming techniques in writing large programs; formal methods of program verification; and techniques and software tools for program testing, maintenance, and documentation. A primary goal of this course is to provide experience in team development of software.

CSCI 45200 Object-Oriented Analysis and Design (3 cr.) P: CSCI 36200. Spring. Introduction to the object-oriented paradigm in software development. Basic concepts: objects, classes, messaging, inheritance, and methodologies. Analysis: defining objects, structures, attributes, and services. Design: transforming the analytic model into the design model. Implementation: comparison of the support features provided by languages such as Smalltalk, C++, Eiffel, and CLOS. A significant design project is required.

CSCI 46300 Analysis of Algorithms (3 cr.) P: 36200. Techniques for analyzing and comparing algorithms. Average case analysis in sorting and searching; dynamic programming: greedy algorithms, amortized analysis, and applications; matrix algorithms: polynomials, discrete Fourier transforms, and fast Fourier transforms, parallel algorithms: examples in sorting, searching, graphs, and matrices, computational complexity, polynomial complexity classes P, NP.

CSCI 47000 Automata and Formal Languages (3 cr.) P: 36200. Fall. Introduction to formal languages and automata theory: finite automata and regular expressions, context-free grammars and languages, pushdown automata, equivalence of CFGs and pushdown automata, application of pushdown automata in parsing, closure properties, pumping lemmas, decision procedures, Turing machines, computability, undecidability, and a brief survey of the Chomsky hierarchy.

CSCI 47500 Scientific Computing I (3 cr.) P: 23000 and MATH 35100. P or C: MATH 26200. Fall. Solving scientific problems on computers. Languages for scientific computing. Software development on workstations: using tools the environment provides, organization of programs. Computer architecture: impact on software and algorithms. Problem formulation: model selection/simplification, relationship to numerical methods. Solution of linear equations: methods and packages. Nonlinear equations and optimization problems.

CSCI 47600 Scientific Computing II (3 cr.) P: 47500. Spring. Elementary statistical computing: time series analysis, model fitting, robust methods, generation of pseudorandom numbers, and Monte Carlo methods. Interpolation and curve fitting; numerical integration. Solving ordinary differential equations. Use of packaged environments and symbolic computation for scientific purposes.

CSCI 47700 High Performance Computing (3 cr.) P: 47600. Fall. Architecture of supercomputers: pipelined, vector, SIMD, MIMD; implications for algorithm and program design; and vectorization, parallelization, loop restructuring, and nonstandard language features. Splitting computation between supercomputers and workstations; interactive analyses of remote machines' output. Numerical methods for large-scale problems: examples from continuum mechanics, graphical visualization, and statistical computing. A project is required.

CSCI 48100 Data Mining (3 cr.) P or C: 24000, MATH 35100/51100, STAT 51100/41600. An introduction to data warehousing and OLAP technology for data mining, data processing, languages and systems, and descriptive data mining: characterization and comparison, association analysis classification and predication, cluster analysis mining complex types of data, application, and trends in data mining.

CSCI 48400 Theory of Computation (3 cr.) P: CSCI 36200 Techniques for analyzing and comparing algorithms are presented. Algorighms analyzed include those for sorting, searching, graph theory, combinatorics, computational geometry, matrices, and other problems. Computational complexity, including Turing Machines, NP completeness, and effecive computability.

CSCI 48500 Expert System Design (3 cr.) P: 36200. Overview of artificial intelligence; expert system technology; early expert systems: MYCIN, DENDRAL; theoretical foundations, uncertainty measures, knowledge representation, inference engines; reasoning mechanisms: forward and backward chaining; and explanation systems, expert system shells, tools, and intelligent hybrid systems.

CSCI 48700 Artificial Intelligence (3 cr.) P: 36200. Study of key concepts and applications of artificial intelligence. Problem-solving methods, state space search, heuristic search, knowledge representation: predicate logic, resolution, natural deduction, nonmonotonic reasoning, semantic networks, conceptual dependency, frames, scripts, and statistical reasoning; advanced AI topics in game playing, planning, learning, and connectionist models.

CSCI 49000 Topics in Computer Sciences for Undergraduates (1-5 cr.) By arrangement. Fall, spring, summer. Supervised reading and reports in various fields. Open to students only with the consent of the department.

CSCI 49500 Explorations in Applied Computing (1-6 cr.) Fall, spring, summer. Explorations in Applied Computing is an undergraduate capstone experience. Students will work in teams, advised by faculty and external liaisons, to solve real-world computing problems. This hands-on experience will cultivate technical expertise, utilization of analytical thinking, quantitative reasoning, project management skills, and communication skills.

Graduate

CSCI 60300 Advanced Topics in Distributed Systems (3 cr.) P: CS 503. R: CS 542. Design and control of distributed computing systems (operating systems and database systems). Topics include principles of namings and location, atomicity, resources sharing, concurrency control and other synchronization, deadlock detection and avoidance, security, distributed data access and control, integration of operating systems and computer networks, distributed systems design, consistency control, and fault tolerance.

CSCI 61400 Numerical Solution of Ordinary Differential Equations (3 cr.) P: 51400. Numerical solution of initial-value problems by Runge-Kutta methods, general one-step methods, and multistep methods. Analysis of truncation error, discretization error, and rounding error. Stability of multistep methods. Numerical solution of boundary-value and eigenvalue problems by initial-value techniques and finite difference methods.

CSCI 61500 Numerical Solution of Partial Differential Equations (3 cr.) P: 51500 and MATH 52300. The numerical solution of hyperbolic, parabolic, and elliptic equations by finite difference methods; iterative methods (Gauss-Seidel, overrelaxation, alternating direction) for solving elliptic equations; discretization and round-off errors; explicit and implicit methods for parabolic and hyperbolic systems; the

method of characteristics; the concept of stability for initial value problems.

CSCI 66000 Design of Translating Systems (3 cr.) P: 50200. Systems design of higher-level programming languages and their processors; symbol tables, lexical scan, syntax scan, object code generation and optimization; boot-strapping techniques, higher-level translators, self-compilers, and decompilers; and heuristic generators.

CSCI 66100 Formal Compiling Methods (3 cr.) P: 50200. Application of concepts developed in formal language and automata theory to the design of programming languages and their processors. Models of syntactic analysis, including canonical precedence, LR(k) and LL(k) parsing methods and variants; efficiency of each. Synthesis techniques, including symbol tables, storage administration, parameter mechanisms, garbage collection; optimization considerations. Models of synthesis, including level, affix, attributed grammars; prospects of fully automating compiler design. Applicative vs. procedural languages and their implementations based on semantic definition of a language (LISP, Lucid) and on proof-like techniques (PROLOG, equational systems); merits of such approaches.

CSCI 66200 Pattern Recognition and Decision-Making Processes (3 cr.) (Pending) P: EE 302 or equivalent. Introduction to basic concepts and various approaches to pattern recognition and decision-making processes. The topics include various classifier designs, evaluation of classifiability, learning machines, feature extraction, and modeling.

CSCI 69500 M.S. Project (1-9 cr.) Maximum of 6 credit hours apply to degree P: consent of instructor. The student integrates and applies the knowledge gained from the formal course work to formulate and execute a solution to a problem of practical importance. The faculty advisor and the sponsoring organization mentor, if applicable, provide guidance and evaluation.

CSCI 69800 Research M.S. Thesis (1-18 cr.) P: Consent of instructor. Formal research on M.S. Thesis supervised by the faculty advisor.

CSCI 69900 Research Ph.D. Thesis (1-9 cr.) P: Consent of instructor. Formal research on Ph.D. Thesis supervised by the faculty advisor.

CSCI-C 591 Research Seminar (0-1 cr.) First-year seminar in research methods and current research directions of the faculty. Repeatable.

Undergraduate

CSCI-N 100 Introduction to Computers and Computing (3 cr.) P or C: MATH 001, M001, or equivalent. No computing experience assumed. How computers work, word processing, spreadsheets, file management, and Internet skills. Emphasis on problem-solving tech-niques. Lecture and laboratory. Credit given for only one of CSCI N100, CPT 10600, CIT 10600, or BUS K201.

CSCI-N 199 Introductory Computing Topics (topic varies) (1-3 cr.) Seminars in emerging technologies. May be repeated for credit.

CSCI-N 201 Programming Concepts (3 cr.) Summary of basic computing topics, problem solving techniques, and their application to computing. Introduction to programming concepts with a focus on language-independent principles, such as algorithm design, debugging strategies, essential control structures, and basic data structure concepts. Lecture and laboratory.

CSCI-N 207 Data Analysis Using Spreadsheets (3 cr.) Summary of basic computing topics. An introduction to data analysis using spreadsheets. Emphasis on the application of computational problem-solving techniques. Lecture and laboratory.

CSCI-N 211 Introduction to Databases (3 cr.) Summary of basic computing topics. Introduction to database design concepts, creation of user forms, development of databases, querying techniques, and building reports. Focus on relational database systems from development and administration point of view. Lecture and laboratory.

CSCI-N 241 Fundamentals of Web Development (3 cr.) Introduction to writing content for the Internet and World Wide Web. Emphasis on servers, hand-coded HTML, Cascading Style Sheets, and extending HTML with other Web technologies. Lecture and laboratory.

CSCI-N 299 Survey of Computing Applications (topic varies) (1-3 cr.) An introduction to an emerging technology in the computing field. It will emphasize the various problems technology helps to solve and specific problem-solving strategies. Lecture and laboratory. May be repeated for credit.

CSCI-N 300 Mobile Computing Fundamentals (3 cr.) P: N241 (or equivalent). Survey of programming & application development for mobile computing devices. Topics include mobile technology, location-based technology, mobile security, mobile platforms, programming languages & application development for mobile devices. Lecture and Laboratory.

CSCI-N 301 Fundamental Computer Science Concepts (3 cr.) P: MATH M 118. An introduction to fundamental principles of computer science, including hardware architecture, algorithms, software engineering, and data storage. Lecture and laboratory.

CSCI-N 305 C Language Programming (3 cr.) The basics of computer programming concepts using the C programming language. Emphasis on problem solving and algorithm implementation using a universal subset of the C programming language. Lecture and laboratory.

CSCI-N 311 Advanced Database Programming, Oracle (3 cr.) P: N211 or equivalent. Focus on the concepts and skills required for database programming and client server development. Concepts will apply to any modern distributed database management system. Emphasis on developing Oracle SQLPlus scripts, PL/SQL server side programming, and Oracle database architecture. Students with programming experience in ODBC compliant languages will be able to practice connecting such languages to an Oracle database. Lecture and laboratory.

CSCI-N 321 System and Network Administration (3 cr.) P: N301 or equivalent. Fundamental concepts of system administration. Design and administration of network servers and workstations. Focus on basic network concepts, such as user account administration, resource allocation, security

issues, and Internet service management. Lecture and laboratory.

CSCI-N 331 Visual Basic Programming (3 cr.) An introduction to programming with a focus on rapid application development environments, event-driven programming, and programming in the Windows environment. Course will demonstrate how the major application types (spreadsheets, databases, text editors) are written. Lecture and laboratory.

CSCI-N 335 Advanced Programming, Visual Basic (3 cr.) P: N331 or equivalent. Databases and VB, object-oriented design and practice, the component object model, interobject communication, related RAD environments such as VB for Applications and ActiveX using the Windows API, and generating online help. Lecture and laboratory.

CSCI-N 341 Introduction to Client-Side Web Programming (3 cr.) P: N241 or equivalent. Introduction to programming with a focus on the client-side programming environment. Programming using languages commonly embedded in Web browsers. Lecture and laboratory.

CSCI-N 342 Server-Side Programming for the Web (3 cr.) P: N341. Designing and building applications on a Web server. Focuses on the issues of programming applied to Web servers. Emphasis on relational database concepts, data design, languages used on the server, transaction handling, and integration of data into Web applications.

CSCI-N 343 Object-Oriented Programming for the Web (3 cr.) P: N341 or N307. Algorithm design and development within the object-oriented paradigm. Students will utilize Java to create Web-based application software with strong user interaction and graphics. In addition, students will utilize Oracle and SQL to learn introductory database design principles, coupling back-end database operation to application software. Lecture and laboratory.

CSCI-N 345 Advanced Programming, Java (3 cr.) P: N307 or N331 or N341 or equivalent. A Java language course designed for students familiar with programming and the World Wide Web. Focus on the unique aspects of Java, Applet, and GUI design, object-oriented programming, event-handling, multithreaded applications, animation, and network programming. Lecture and laboratory.

CSCI-N 351 Introduction to Multimedia Programming (3 cr.) An integration of computing concepts and multimedia development tools. An introduction to the science behind multimedia (compression algorithms and digital/audio conversion). Use of authoring tools to create compositions of images, sounds, and video. Special emphasis given to using the Web as a multimedia presentation environment. Lecture and laboratory.

CSCI-N 355 Introduction to Virtual Reality (3 cr.) Explore concepts of 3D imaging and design including primitive shapes, transformations, extrusions, face sets, texture mapping, shading, and scripting. Lecture and laboratory.

CSCI-N 361 Fundamentals of Software Project Management (3 cr.) P: N300-level programming class or consent of instructor. Tools and techniques used to manage software projects to successful completion. Problem-solving focus to learn specification development and management, program success metrics, UML modeling techniques, code design and review, principles, testing procedures, usability measures, release and revision processes, and project archival. Lecture and laboratory.

CSCI-N 399 Topics in Computing (topic varies) (1-3 cr.) P: N200-level course or equivalent. An investigation of an emerging language or topic in computing. May be repeated for credit.

CSCI-N 410 Mobile Computing Application Development (3 cr.) P: Visual Basic.NET or C# (Any of the following: N331, N351, N431, N499). Focus of this course is to give programmers information they need to develop new applications or move existing applications to handheld devices and other resource-constrained hardware. All programming is done via Visual Basic.NET or C#.

CSCI-N 420 Mobile Computing Cross Platform Development (3 cr.) P: N343. Survey of programming & application development for mobile and wireless computing devices. Topics include recommended practices using the J2 platform for micro devices such as cell phones and PDAs, the implementation of cross-device GUI's, using event handlers and remote server access.

CSCI-N 430 Mobile Computing & Interactive Applications (3 cr.) P: N201. Introduction to programming with emphasis on the Flash ActionScript environment as used in mobile devices. Topics include interface design for mobile devices, use of Flash as an application environment, game and multimedia development, communication with a web server, and parsing XML data.

CSCI-N 431 E-Commerce with ASP.NET (3 cr.) P: N331 or equivalent. Topics include basic Web controls, form validation, connecting to an Enterprise-level database, SSL, and sending email within an ASP.NET Web page. A significant software development final project creating a functional Web store is featured. Lecture and laboratory.

CSCI-N 435 Data Management Best Practices with ADO.NET (3 cr.) P: N331 or equivalent. A study of managing data in the .NET environment. Focus on strategies to efficiently manage data for large-scale projects. Topics include XML, DataSets, SQL, and error management. Lecture and laboratory.

CSCI-N 443 XML Programming (3 cr.) P: N241 and an N300-level programming course. Fundamentals of XML programming language. After mastering fundamental XML scripting syntax, the course focuses on narrative-centric and data-centric XML applications. Narrative content includes CSS, DTD and XSLT, and X-path, -link, and -pointer tools; data-centric content includes the DOM, Schemas, and ADO/ASP. A required masterpiece project summarizes course competencies. Lecture and laboratory.

CSCI-N 450 Mobile Computing with Web Services (3 cr.) P: Any of the following: N410, N420, N430. Fundamental concepts of data transport between client devices and a server. Topics include web services, SOAP (simple object access protocol), and XML.

CSCI-N 451 Web Game Development (3 cr.) Study of basic game development principles with a focus on client-side web delivery. Topics to include creation of sprite objects, user interaction concepts, basic intelligence concepts, game data structures, and basic game physics. Lecture and laboratory.

CSCI-N 461 Software Engineering for Applied Computer Science (3 cr.) P: N361 or consent of the instructor. This is a survey course covering software engineering concepts, tools, techniques, and methodologies. The topics covered include software engineering, software process and its difficulties, software lifecycle models, project planning including cost estimation, design methodologies including structured design, data structure-oriented design, object-oriented design, and software testing. This course is intended for nonmajors, and credit will not be awarded to computer science majors.

CSCI-N 485 Capstone Project in Applied Computing (3 cr.) P: N301 and N341. This course provides students with a mechanism for producing and integrating technical achievement meritorious of program culmination. The project will demonstrate subject matter mastery within project development guidelines and reflect both a breadth and depth of technically focused problem-solving skills.

CSCI-N 499 Topics in Applied Computing (topic varies) (1-3 cr.) P: N300-level course or equivalent. An investigation and examination of an emerging discipline in applied computer science.

Forensic and Investigative Sciences

Graduate

FIS 50500 Seminar in Forensic Science (3 cr.) P: Open only to majors admitted to B.S. or M.S. program. Fall. Development of Forensic Science. Ethics and quality assurance and control. Laboratory management, use of scientific evidence in criminal justice system.

FIS 50600 Forensic Microscopy (3 cr.) Learn techniques in the analysis of forensic microscopic evidence. Topics include property of light, compound microscopy, micrometry, refraction, dispersion, stereomicroscopy, sample preparation, polarizing light microscopy, and instrumental microscopy.

FIS 51100 Forensic Chemistry I (4 cr.) P or C: 50500. Fall. Open only to majors admitted into the B.S. or M.S. program. This course covers major techniques used in the analysis of chemical evidence commonly encountered at crime scenes. Various instrumental methods of analysis will be used. There are lecture and laboratory components for each type of evidence covered.

FIS 51200 Forensic Chemistry II (4 cr.) P or C: 50500; P: 51100. Spring. Open only to majors admitted into the B.S. or M.S. program. Continuation of 51100. This course covers major techniques used in the analysis of chemical evidence commonly encountered at crime scenes. Various instrumental methods of analysis will be used. There are lecture and laboratory components for each type of evidence covered.

FIS 51500 Forensic Science and the Law (3 cr.) P: Open only to students enrolled in the Master of Science in Forensic Science program or students enrolled in the IU School of Law or with consent of the instructor. Fall. Application of various laws and rules of evidence to the forensic sciences and how the admission of evidence derived from forensic sciences can impact the administration of justice in the United States. Topics include preparation for testimony, expert testimony, subpoenas, basic judicial processes, admissibility of scientific evidence.

FIS 52100 Forensic Biology I (4 cr.) P or C: FIS 50500. Fall. Open only to majors in B.S. or M.S. program. Forensic identification of biological evidence including blood and other body fluids. Blood spatter analysis.

FIS 52200 Forensic Biology II (4 cr.) P or C: FIS 50500, 52100. Spring. Open only to majors in B.S. or M.S. program. Continuation of FIS 52100. Extraction and analysis of DNA evidence by PCR based methods including STR and SNP. Determination of sex. Interpretation of DNA evidence. Quality assurance and control.

FIS 53100 Forensic Toxicology I (pending approval) (4 cr.) P or C: 50500; P: 51100. Fall. Open only to FIS majors admitted into the B.S. or M.S. program. Analysis of forensic chemical and trace evidence. Includes hairs and fibers, paints and coatings, glass and soil, inks, fingerprints, and fire and explosive residues.

FIS 53200 Forensic Toxicology II (pending approval) (4 cr.) P or C: 50500; P: 53100. Spring. Open only to FIS majors admitted into the B.S. or M.S. program. Continuation of FIS 53100. The course covers the issue of ethyl alcohol intoxication and drunk driving laws and the analysis of alcohol. In addition, illicit drugs and their fate in the body will be surveyed, including methods of analysis. There will be lectures and laboratories.

FIS 59000 Special Topics: Forensic and Investigative Sciences (3 cr.) Lecture or lecture/lab courses offered on topic areas that are not part of the regular M.S. curriculum. These topics may include: firearms and tool marks, questioned documents, forensic pathology, fingerprints, and others. They are electives in the M.S. in Forensic Science Progra

FIS 69500 Seminar (0-1 cr.) Fall, Spring. Group meetings for review and discussion of current topics in forensic and investigative sciences. All graduate students are required to attend.

FIS 69600 Special Topics in Forensic and Investigative Sciences (pending approval) (1-4 cr.) P or C: FIS 50500 and consent of instructor. Fall, Spring. Selected research and topics of current interest to the field of forensic and investigative sciences. May be repeated for credit provided that the topic is different.

FIS 69800 Research M.S. Thesis (pending approval) (1-10 cr.) P: Consent of instructor. Credit hours arranged.

Undergraduate

FIS 10500 Concepts of Forensic Science I (3 cr.) P: None. Fall, Summer. Forensic science and the criminal justice system. Evidence collection and analysis. Fingerprints, firearms, questioned documents, engineering, behavioral forensic sciences, pathology, entomology, anthropology. Forensic science and the law.

FIS 10600 Concepts of Forensic Science II (3 cr.) P: FIS 10500, CHEM C101 or CHEM C105. Spring. Continuation of FIS 105. Forensic chemistry and biology; hairs and fibers, fires and explosions, paints and coatings, blood and DNA, drugs, and toxicology.

FIS 20100 Professional Issues in Forensic Science (3 cr.) P: FIS 10500, FIS 10600 and junior status required. Spring, day. Open only to majors in the FIS program or with consent

of the instructor. Ethical issues in forensic science. History, development, and culture of crime laboratories. Expert testimony, quality assurance, and control in a crime lab. Preparing for employment in a forensic science agency; locating jobs and preparing for interviews.

FIS 30600 Forensic Microscopy (3 cr.) P: FIS 10500, FIS 10600 Fall. Students will learn techniques in the analysis of forensic microscopic evidence. Topics include: property of light, compound light microscopy, micrometry, refraction, dispersion, stereomicroscopy, sample preparation, polarizing light microscopy, and instrumental microscopy. Microsopes are used every day in class to handle forensic type of evidence. The overall goal of this course is to develop techniques to analyze trace evidence.

FIS 40100 Forensic Chemistry I (4 cr.) P: FIS 10600, CHEM C342, CHEM C344, CHEM C310, CHEM C311, CHEM C410, CHEM C411. Open only to majors in the FIS program or with consent of the instructor. Fall. Techniques in the analysis of forensic chemical evidence. Topics include chromatography (thin layer, gas, liquid), mass spectrometry, spectroscopy (IR, UV-visible), weighing, and sample preparation.

FIS 40200 Forensic Biology I (4 cr.) P: FIS 10600, BIOL K322, BIOL K323, BIOL K338, BIOL K339. Open only to majors in the FIS program or with consent of the instructor. Fall. Analysis of blood and other human and animal bodily fluids, including semen, saliva, and vaginal swabs. Analysis of blood splatter patterns.

FIS 40300 Forensic Biology II (4 cr.) P: FIS 40200. Open only to majors in the FIS program or with consent of the instructor. Spring. Continuation of FIS 40200. Forensic analysis of DNA evidence.

FIS 40400 Forensic Chemistry II (4 cr.) P: FIS 40100. Spring. Open only to majors in the FIS program or with consent of the instructor. Spring. Continuation of FIS 401. Applications of microscopy, chromatography and spectroscopy to the analysis of real and mock evidence including hairs and fibers, soil and glass, paint, fire residues, drugs, and other chemical evidence.

FIS 40900 Forensic Science Research (1-4 cr.) P: junior or senior standing in FIS Program or consent of instructor. Every semester, time arranged. Forensic science or literature research with a report. Can be elected only after consultation with research advisor and approval of program advisor.

FIS 41500 Forensic Science and the Law (3 cr.) P: FIS 10600, 21000. Open only to majors in the FIS program or with consent of the instructor. Application of various laws and rules of evidence to the forensic sciences and how the admission of evidence derived from forensic sciences can impact the administration of justice in the United States. Topics include preparation for testimony, expert testimony, subpoenas, basic judicial processes, admissibility of scientific evidence.

FIS 49000 Forensic Science Capstone (5 cr.) P: junior or senior standing in FIS Program and program advisor approval. Fall, day, night; Spring, day, night; Summer, day, night. One of the following: Internship at an approved crime laboratory or other organization, or laboratory research supervised by an FIS faculty member. Final paper required in all cases.

General Science

SCI-I 495 Readings and Research in Science (1-3 cr.) P: junior or senior standing, consent of instructor(s), and approval of review committee. Every semester, time arranged. Independent, interdisciplinary study and research in science and science-related fields. A major paper must be submitted. May be repeated for a maximum of 6 credit hours.

SCI-I 120 Windows on Science (1 cr.) Fall, spring. Designed for new and prospective science majors, the course covers an integrative overview of science, examining science and society, the scientific method and community of scientists, undergraduate research, professional ethics, an exploration of science-based careers, and strategies for success as a science major.

SCI-I 200 Tutorial in Interdisciplinary Studies (1 cr.) Fall, Spring. Tutorial under the supervision of a faculty mentor to develop a proposal to pursue a plan of study focused on a science-based, interdisciplinary area. The proposal is to be submitted to the review committee for approval. Each student will maintain a journal on the progress on the plan of study.

SCI-I 220 Introduction to Research Methods (1 cr.)

SCI-I 225 Mentor-based Research Experience (0-3 cr.)

SCI-I 294 Beginning Science-Based Internship (0-3 cr.) P: sophomore or junior standing and program advisor approval. Fall, spring. A semester of full- or part-time beginning internship experience in an industrial, government, or business setting matching the student's academic and career objectives. A comprehensive written report on the experience is required.

SCI-I 494 Internship in Science-Based Fields (0-6 cr.) P: junior or senior standing and program advisor approval. Fall, spring. A semester of full-time or part-time internship experience in an industrial, government, or business setting matching the student's academic or career objective. A comprehensive written report on the experience is required.

SCI-I 495 Readings and Research in Science (1-3 cr.) P: junior or senior standing, consent of instructor(s), and approval of review committee. Every semester, time arranged. Independent, interdisciplinary study and research in science and science-related fields. A major paper must be submitted. May be repeated for a maximum of 6 credit hours.

Geology

GEOL-G 103 Introduction to the Origin and Classification of Minerals and Rocks (3 cr.) This course is taught by the School of Continuing Studies for semester Online Self-Study Electives. Relationships between rock types, rock structures, surficial geological processes of running water, subsurface water, glaciation, wind, tides, and landform evolution. Geolocial time. Credit given for only one of the following: G103 or G111.

GEOL-G 107 Environmental Geology (3 cr.) P: none. Fall, Spring, Summer. An introduction to geology through discussion of geological topics that show the influence of geology on modern society. Topics include mineral and energy resources, water resources, geologic hazards and problems, geology and health, and land use.

GEOL-G 109 Fundamentals of Earth History (3 cr.) P: none. Fall, Spring, Summer. Basic principles of earth history: geologic time, basic rock types, reconstructing past environments. Physical development of the earth: its interior, mountain formation, plate tectonics. Origin and development of life: evolution, the fossil record. With laboratory G119, equivalent to IUB GEOL G104, IUB GEOL G112, and PU GEOS 112.

GEOL-G 110 Physical Geology (3 cr.) P: none. Fall, Spring, Summer. Introduction to processes within and at the surface of the earth. Description, classification, and origin of minerals and rocks. The rock cycle. Internal processes: volcanism, earthquakes, crustal deformation, mountain building, plate tectonics. External processes: weathering, mass wasting, streams, glaciers, ground water, deserts, coasts. With laboratory G120, equivalent to IU GEOL G103, IU GEOL G111, and PU GEOS 111.

GEOL-G 115 Introduction to Oceanography (3 cr.) P: none. Fall, Spring, Summer. Nonmathematical introduction to the geology, biology, and physical characteristics of the ocean. Includes waves, tides, and currents of the world ocean, the adaptations and distribution of marine animals, pollution of the marine ecosystem, and an introduction to the global ocean/atmosphere system.

GEOL-G 117 Environmental Geology Laboratory (1 cr.) P or C: G107. Fall, Spring, Summer. Laboratory exercises in environmental aspects of the geosciences. To accompany G107.

GEOL-G 119 Fundamentals of Earth History Laboratory (1 cr.) P or C: G109. Fall, Spring, Summer. Laboratory studies of rocks, fossils, and stratigraphic principles to reconstruct past environments and interpret Earth history. To accompany G109.

GEOL-G 120 Physical Geology Laboratory (1 cr.) P or C: G110. Fall, Spring, Summer. Laboratory studies of minerals and rocks, landscapes, and earth structures.

GEOL-G 123 Art and the Earth Sciences (3 cr.) The principles of geology and the evolution of the Earth and life as revealed by art objects. Use of Earth materials in art. The influence of art history on the development of modern geologic thought. Laboratories in lithography, etching, music, morphing, and microscopy.

GEOL-G 130 Short Courses in Earth Science (topic varies) (1 cr.) P: none. Five-week courses on a variety of topics in the earth sciences. Examples of topics include lunar and planetary geology; geology of Indiana; geology of national parks; glaciers; water; gemstones; geology of art; earthquakes and volcanoes; dinosaurs. Each short course is one credit; no topic may be taken for credit more than once.

GEOL-G 132 Environmental Problems (3 cr.) This course is offered via the Internet, and provides experience in addressing some of the kinds of problems that arise in studies of the environment. Particular attention is given to developing skills in evaluating scientific articles; specifically, the relevance of the information in an article, the credibility of the author, and the accuracy and usefulness of the quantitative information provided. The kinds of problems considered in this course will vary from semester to semester, but will be chosen from a list that includes global warming, tropical rain forests, acid rain, water pollution, solid waste disposal, appropriate use of land, and the ability of regulations to protect the environment. Three or four such topics will be covered each semester.

GEOL-G 135 Indiana Geology (3 cr.) P: none. Fall, Spring, Summer. An in-depth investigation of Indiana's geology, including minerals and rocks, geologic time, mineral resources, fossils, topography, soil, water resources, and special geologic features such as the Falls of the Ohio River and Indiana Dunes.

GEOL-G 136 Indiana Geology Laboratory (1 cr.) P or C: G107, G110, or G135. Fall, Spring, Summer. Field experiences and practical exercises in applying geologic principles and observing the geologic phenomena of Indiana. Topics may include sedimentary rocks and fossils, soils, mineral resources, hydrology, glacial history, and karst topography. Students will visit multiple park areas, complete problem solving or hands-on exercises, and submit written reports.

GEOL-G 180 Dinosaurs (3 cr.) P: none. Fall, Spring, Summer. A survey of the characteristics and evolution of dinosaurs. Topics include: occurrence of dinosaur remains in the fossil record, basic anatomy, principles used in classification, types of predatory and plant-eating dinosaurs, environments occupied during life, biology and behavior, extinction theories, dinosaur hunters, and dinosaurs in the media and the public eye.

GEOL-G 199 Service Learning in Geology (1 cr.) P or C: G107, G110, G115, or G135. Students participate in community service projects. Completion of the project includes a paper reflecting on how the service experience contributed to their application of the principles of general education.

GEOL-G 205 Reporting Skills in Geoscience (3 cr.) P: G110, G335, and ENG W131. Spring. Techniques of presenting written and oral reports from the geoscience approach. The written report: mechanics of format and illustrations, proper citation of geoscience literature, the abstract, proofreading, and editing. The oral report: effective presentation and response to audience questions, simulating a professional science meeting.

GEOL-G 206 Advanced Physical Geology Laboratory (1 cr.) P or C: G110. Fall, Spring. The laboratory study of minerals, rocks, topographic maps and aerial photographs, landforms and landscapes, structural geology, and geologic maps.

GEOL-G 209 History of the Earth (3 cr.) P: G110, G120. Fall, Spring. Earth history emphasizing physical and biological evolution. Geologic time, stratigraphic correlation, plate tectonics, depositional environments, paleogeography, and evolution of life. Laboratory. Field trips.

GEOL-G 221 Introductory Mineralogy (4 cr.) P: G110, G120 and CHEM C105. Fall. Crystallography: symmetry, morphology, classes. Mineral chemistry, physics, and genesis. Description, identification, association, occurrence, and use of common and important minerals.

GEOL-G 222 Introductory Petrology (4 cr.) P: G221 and CHEM C106. Spring. Igneous, sedimentary, and metamorphic rocks: composition, field occurrence,

characteristics, classification, origin, laboratory description, and identification.

GEOL-G 250 Water and Environmental Issues in Earth Sciences (3 cr.) P: G107, GEOG G107 or equivalent. This interdisciplinary course addresses the relationship between water and current environmental issues in Earth Sciences both from a physical (processes) and human perspective.

GEOL-G 300 Environmental and Urban Geology (3 cr.) P: G107 or G110 or consent of instructor. Significance of regional and local geologic features and geologic processes in land use planning; use of geologic data in areas of rapid urbanization to properly utilize mineral and water resources and to assess potential geologic hazards.

GEOL-G 303 Geologic Mapping and Field Methods (4 cr.) P: G205, G222 and G335; or consent of instructor. Fall. Brunton-compass and GPS/GIS mapping. Measuring and describing stratigraphic sections of sedimentary rocks and surficial deposits. Mapping geologic structures. Field hydrology. Interpretation of maps, aerial photographs, and satellite imagery.

GEOL-G 304 Principles of Paleontology (3 cr.) P: G119 or G335 or consent of instructor. Spring. Biological principles applied to the fossil record. Examination of the quality of the fossil record, taxonomic principles and procedures, analytical techniques, evolutionary theory, evolution and paleoecology of species, populations and communities, diversification and extinction, paleogeography. Laboratories: systematics, stratigraphic distribution, and ecology of major fossilized invertebrate phyla.

GEOL-G 306 Earth Materials (4 cr.) P: G110, G120 and CHEM C105. Spring. The physical and chemical properties of Earth materials, and the chemical processes that have altered them to cause Earth to evolve to its present state. This course covers properties of minerals and their identification, genesis of igneous, metamorphic and sedimentary rocks, interactions between solid Earth and the hydrosphere, and interactions between humans and the solid Earth.

GEOL-G 307 Environmental Problems and Restoration (3 cr.) P: One introductory college course in geology, biology, or chemistry and one course in college algebra. Human impact on natural environments in urban settings, emphasizing field and laboratory exercises designed for developing proficiency and understanding in sampling, testing and data analysis of ground and surface water, soils, and ecosystems. Creating and delivering presentations geared for public education regarding urban environmental problems and their remediation.

GEOL-G 323 Structural Geology (4 cr.) P: G205, G222, and G335. Spring. Nature and origin of primary and secondary structural features of the earth's crust, with emphasis on mechanics of deformation and origin, and three-dimensional problems illustrating structural concepts. Laboratory.

GEOL-G 334 Principles of Sedimentation and Stratigraphy (4 cr.) P: G205, G222, and G335 or consent of instructor. Fall. Processes and factors influencing genesis of sedimentary particles and their deposition. Interpretation of depositional environments. Sedimentary facies and interpretation of stratigraphic record from outcrop, core sequence, and remote sensing. Laboratory. Field trip.

GEOL-G 335 Evolution of the Earth and Life (4 cr.) P: G110/G120. Evidence for evolution of the Earth and life in the rock record, Sequence of events, time of occurrence, rates of change. Interrelationships of principal themes: chemical evolution of the planet, evolution of the biosphere, plate tectonics, mountain building, and sea level changes. Bearing of evolution on human welfare.

GEOL-G 403 Optical Mineralogy and Petrography (3 cr.) P: G205 and G222. Identification of rock-forming minerals in fragments and thin sections using principles of optical crystallography and the petrographic microscope. Description of common igneous, sedimentary, and metamorphic rocks and interpretation of their genesis using hand specimens and thin sections.

GEOL-G 404 Geobiology (3 cr.) P: G205, G119, and G222 and BIOL K101 or BIOL K103 or BIOL N107, or consent of instructor. Principles of paleontology. Emphasis on invertebrates. Major patterns and fundamentals of biological evolution as revealed by the fossil record. Use of fossils in the study of stratigraphy and Earth's history. Laboratory exercises examine the form, ecology, and stratigraphic record of major phyla with a fossil record.

GEOL-G 406 Introduction to Geochemistry (3 cr.) P: G205, CHEM C106, or consent of instructor. Interactions between geology, chemistry, and biology in natural systems. Explores biogeochemical processes on small scales and in terms of global cycles, as well as human impacts on biogeochemical cycling.

GEOL-G 410 Undergraduate Research in Geology (1-3 cr.) P: G205, junior standing, and consent of instructor. Field and laboratory research in selected problems in geology. May be repeated. A total of 3 credit hours may be applied toward the degree.

GEOL-G 413 Introduction to Geophysics (3 cr.) P: G205 and consent of instructor. Applications of gravity, magnetics, seismology, electricity, and other methods of mineral exploration, engineering, and environmental investigations.

GEOL-G 415 Principles of Geomorphology (3 cr.) P: G205, and G222. P or C: G334. Natural processes that create landforms and land-scapes. Physics and chemistry of weathering and soil formation. Dynamics of mass wasting, streams, and glaciers. Includes field and laboratory investigations.

GEOL-G 416 Economic Geology (3 cr.) P: G205 and G222; or consent of instructor. Origin, geologic occurrence, distribution, use, and conservation of important geologic natural resources: metallic minerals; industrial minerals and rocks; coal, petroleum, natural gas, and other energy resources.

GEOL-G 418 Igneous and Metamorphic Petrology (3 cr.) P: G222 or equivalent. The petrogenesis of igneous and metamorphic rocks. Both lecture and laboratory portions of the course will stress the application of modern petrographic, mineralogic, geochemical, and phase equilibria techniques to the solution of relevant petrologic problems.

GEOL-G 420 Regional Geology Field Trip (1-3 cr.) P: G205 or consent of instructor. Summer. Field trip to selected regions for study of mineralogic, lithologic, stratigraphic, structural, paleontologic, geomorphologic, or other geological relationships.

GEOL-G 430 Principles of Hydrology (3 cr.) P: G205, G117 or G120, MATH 15400, CHEM C106, PHYS P201 or PHYS 15200 or PHYS 21800, and introductory biology. An introduction to the hydrologic cycle, reviewing processes such as precipitation, evaporation and transpiration, infiltration, runoff, streamflow and watersheds, and groundwater.

GEOL-G 431 Wetland Ecosystems (3 cr.) P: G430 or G451. Wetland ecosystems will explore wetlands and their role in ecosystem function. Topics will encompass wetland definitions, geomorphic setting, functions and values, hydrology, vegetation and soils, wetland biogeochemistry, and wetland mitigation and the regulatory framework in which wetlands are treated. The course evaluates the status and trends of Indiana wetlands and types of wetlands common in Indiana.

GEOL-G 436 Geological Remote Sensing (3 cr.) P: GEOL G222, GEOG G336, and PHYS P202 or consent of instructor. Spectroscopic analysis of rocks and minerals from terrestrial and extraterrestrial environments, and geologic application of remotely sensed spectral information. Topics include mapping rock-forming minerals, assessing and monitoring geologic hazards, and exploration for mineral deposits.

GEOL-G 445 Applied Analytical Techniques in Geology (3 cr.) P: G221 and consent of instructor. Principles of advanced analytical techniques, including X-ray analysis, electron beam imaging and analysis, and mass spectrometry, with applications in geosciences. Lectures on theory followed by laboratory exercises. Students will complete individual or collaborative research projects.

GEOL-G 447 Planetary Geology (3 cr.) P: G110 or equivalent course, or consent of instructor. Origin and evolution of planets. The roles of impacts and volcanism in surface dynamics, and the role of water in planetary climates.

GEOL-G 451 Principles of Hydrogeology (3 cr.) P: G205 and G110 or G117, MATH 16600 or MATH 22200, CHEM C106 and PHYS 15200 or PHYS-P201 or PHYS 21800. Geologic and hydrologic factors controlling the occurrence and dynamics of groundwater. Emphasis on basic physical and chemical relationships between water and geologic material.

GEOL-G 460 Internship in Geology (3 cr.) P: Junior or senior standing, and consent of faculty mentor. Fall, Spring, Summer. Industrial or similar experiences in geologically oriented employment. Projects jointly arranged, coordinated, and evaluated by faculty and industrial/governmental supervisors.

GEOL-G 486 Soil Biogeochemistry (3 cr.) P: G406, or consent of instructor. Biological and geochemical processes controlling the cycling of elements in soils and freshwater sediments with emphasis on cycles of carbon, nitrogen and phosphorous.

GEOL-G 490 Seminar in Geology (1-3 cr.) P: junior or senior standing and consent of instructor. Readings and discussion of selected topics. May be repeated, provided different topics are studied, for a maximum of 6 credit hours.

GEOL-G 495 Senior Thesis in Geology (1 cr.) P: Senior standing and consent of faculty mentor. Capstone experience involving a research project. Written report required.

GEOL-G 499 Honors Research in Geology (3 cr.) P: approval of departmental Honors Committee.

GEOL-G 502 Trace Element and Isotope Geochemistry (3 cr.) P: CHEM C360 or C361 or GEOL G406, or consent of instructor. Principles governing the distributions of trace elements, radioisotopes, and stable isotopes in igneous, metamorphic, or sedimentary environments. Emphasis on applications to petrology and geochronology.

GEOL-G 525 Glacial Geology (3 cr.) P: G415 or consent of instructor. Formation, dynamics, and regimen of glaciers. Erosional and depositional processes and landforms. Glaciation of North America with emphasis on stratigraphy, soils, climates, and physical changes resulting from glacial processes and environments. Field investigations and a student research project required.

GEOL-G 527 Geological Oceanography (3 cr.) P: graduate standing, G334, or consent of instructor. Geological features and processes operating in the oceans; continental shelf, slope and ocean-basin geomorphology, sedimentology, structure, and composition; origin and geologic history of seawater and ocean basins; tools applied to marine geological studies.

GEOL-G 535 Quaternary Geology (3 cr.) P: G415 or consent of instructor. Characteristics, distribution, and origin of Pleistocene and recent deposits, stratigraphy and chronology; formation of associated landforms, landscapes, paleosols, and soils; Quaternary environments and paleoclimatic interpretation.

GEOL-G 545 Applied Analytical Techniques in Geology (3 cr.) P: G221, CHEM C105-C106, and consent of instructor. Principles of advanced analytical techniques, including X-ray analysis, electron beam imaging and analysis, and mass spectrometry, with applications in geosciences. Lectures on theory followed by laboratory exercises. Students will complete individual or collaborative research projects.

GEOL-G 546 Planetary Remote Sensing (3 cr.) P: Previous course work in remote sensing, or consent of instructor. Application of multi-spectral data for exploration and mapping of planetary surfaces.

GEOL-G 550 Surface-Water Hydrology (3 cr.) P: G430 or G451. In-depth analysis of surface water components of hydrologic cycle: hydrometeorology, evaporation/transpiration, rainfall-runoff relationships, open-channel flow, flood hydrology, and statistical and probabilistic methods in hydrology.

GEOL-G 551 Advanced Hydrogeology (3 cr.) P: G430 or G451. Advanced treatment of concepts fundamental to subsurface hydrologic processes. Applications to groundwater resource development and environmental protection such as aquifer mechanics and well hydraulics, heterogeneity and anisotropy, ground water and surface water interactions, unsaturated flow, and tracer and contaminant transport.

GEOL-G 585 Environmental Geochemistry (3 cr.) P: G406 or consent of instructor. Aquatic and environmental geochemistry, including freshwater and marine systems, natural and human-induced changes to geochemical systems, and the geochemical record of paleoceanographic and paleoclimatic variations.

GEOL-G 595 Data Analysis Techniques in Geoscience (3 cr.) P: STAT 30100 and CSCI N207, or equivalent. Application of statistical and numerical analysis techniques to geoscience data, including sampling methods, confidence intervals, least squares methods, correlation, time series analysis, and multivariate techniques. Emphasis on using a computer to solve geoscience problems.

GEOL-G 596 Topics in Applied Environmental Geology (3 cr.) P: consent of instructor. Application of geologic principles to common environmental problems. Topics covered include waste site assessment, flood hazard analysis and mitigation, slope stability, and hydrogeology. Application of principles to problems pertaining to urban planning, earthquake-resistant design, and waste site/landfill development.

GEOL-G 621 Modeling Hydrological Systems (3 cr.) P: G430 or G451 and consent of instructor. Introduction to groundwater flow and solute transport modeling. Includes development of equations describing ground water flow and applied ground water/contaminant transport modeling, using a variety of current software packages.

GEOL-G 635 Soil Geomorphology (3 cr.) P: G415. Application of geomorphic principles in evaluation of weathering and soil formation; systems analysis of soil-landscape models; paleogeomorphology and paleopedology. Lectures and discussion; field and laboratory problems.

GEOL-G 640 Fluvial Geomorphology (3 cr.) P: G415 or consent of instructor. Survey of fluvial processes including sediment transport, bed and bank erosion, and river metamorphosis. Examination of the controls on channel form. Analysis of landform genesis with an emphasis on feature sedimentology and stratigraphy. Application of fluvial geomorphic principles to land management and restoration of riparian ecosystems.

GEOL-G 645 Carbonate Sedimentology (3 cr.) P: G334 or consent of instructor. Spring. Course focuses on origin and generation of carbonate grains, description of modern carbonate depositional environments, interpretation of ancient limestone and dolomite sequences, and carbonate diagenesis.

GEOL-G 690 Advanced Geology Seminar (Arr. cr.) P: consent of instructor.

GEOL-G 700 Geologic Problems (1-5 cr.) P: consent of faculty mentor. Consideration of special geologic problems.

GEOL-G 810 Thesis Research (6 cr.) P: consent of faculty mentor. Thesis Research.

Mathematical Sciences

Advanced Undergraduate and Graduate

MATH 50400 Real Analysis (3 cr.) P: 444 or consent of instructor. Completeness of the real number system, basic topological properties, compactness, sequences and series, absolute convergence of series, rearrangement of series, properties of continuous functions, the Riemann-Stieltjes integral, sequences and series of functions, uniform convergence, the Stone-Weierstrass theorem, equicontinuity, and the Arzela-Ascoli theorem.

MATH 50500 Intermediate Abstract Algebra (3 cr.) P: 453 or consent of instructor. Group theory with emphasis on concrete examples and applications. Field theory: ruler and compass constructions, Galois theory, and solvability of equations by radicals.

MATH 51000 Vector Calculus (3 cr.) P: 261. Spring, summer. Calculus of functions of several variables and of vector fields in orthogonal coordinate systems. Optimization problems, implicit function theorem, Green's theorem, Stokes's theorem, divergence theorems, and applications to engineering and the physical sciences.

MATH 51100 Linear Algebra with Applications (3 cr.) P: 261. Fall, spring, summer. Not open to students with credit in 351. Matrices, rank and inverse of a matrix, decomposition theorems, eigenvectors, unitary and similarity transformations on matrices.

MATH 51400 Numerical Analysis (Pending Approval) (3 cr.) P: MATH 26600 and MATH 35100 or MATH 51100, or consent of instructor and familiarity with one of the high-level programming languages: Fortran 77/90/95, C, C++, Matlab. This course is pending. Numerical Analysis is concerned with finding numerical solutions to problems, especially those for which analytical solutions do not exist or are not readily obtainable. This course provides an introduction to the subject and treats the topics of approximating functions by polynomials, solving linear systems of equations, and of solving nonlinear equations. These topics are of great practical importance in science, engineering and finance, and also have intrinsic mathematical interest. The course concentrates on theoretical analysis and on the development of practical algorighms.

MATH 51800 Advanced Discrete Mathematics (3 cr.) P: 266 or consent of instructor. This course covers mathematics useful in analyzing computer algorithms. Topics include recurrence relations, evaluation of sums, integer functions, elementary number theory, binomial coefficients, generating functions, discrete probability, and asymptotic methods.

STAT 51900 Introduction to Probability (3 cr.) P: 261. See course listing for STAT 519.

MATH 52000 Boundary Value Problems of Differential Equations (3 cr.) P: 261 and 266. Sturm-Liouville theory, singular boundary conditions, orthogonal expansions, separation of variables in partial differential equations, and spherical harmonics.

MATH 52200 Qualitative Theory of Differential Equations (3 cr.) P: 266 and 351. Nonlinear ODEs, critical points, stability and bifurcations, perturbations, averaging, nonlinear oscillations and chaos, and Hamiltonian systems.

MATH 52300 Introduction to Partial Differential Equations (3 cr.) P: 266 and 510, or consent of instructor. Method of characteristics for quasilinear first-order equations, complete integral, Cauchy-Kowalewsky theory, classification of second-order equations in two variables, canonical forms,

difference methods of hyperbolic and parabolic equations, and Poisson integral method for elliptic equations.

MATH 52500 Introduction to Complex Analysis (3 cr.) P: 261 and 266. Complex numbers and complex-valued functions; differentiation of complex functions; power series, uniform convergence; integration, contour integrals; and elementary conformal mapping.

MATH 52600 Principles of Mathematical Modeling (3 cr.) P: 266 and 510, or consent of instructor. Ordinary and partial differential equations of physical problems, simplification, dimensional analysis, scaling, regular and singular perturbation theory, variational formulation of physical problems, continuum mechanics, and fluid flow.

MATH 52700 Advanced Mathematics for Engineering and Physics I (3 cr.) P: 266 and 351 or 511. Linear algebra, systems of ordinary differential equations, Laplace transforms, Fourier series and transforms, and partial differential equations.

MATH 52800 Advanced Mathematics for Engineering and Physics II (3 cr.) P: 537 or consent of instructor. Divergence theorem, Stokes's Theorem, complex variables, contour integration, calculus of residues and applications, conformal mapping, and potential theory.

MATH 53000 Functions of a Complex Variable I (3 cr.) P or C: 544. Complex numbers, holomorphic functions, harmonic functions, and linear transformations. Power series, elementary functions, Riemann surfaces, contour integration, Cauchy's theorem, Taylor and Laurent series, and residues. Maximum and argument principles. Special topics.

MATH 53100 Functions of a Complex Variable II (3 cr.) P: 530. Compactness and convergence in the space of analytic functions, Riemann mapping theorem, Weierstrass factorization theorem, Runge's theorem, Mittag-Leffler theorem, analytic continuation and Riemann surfaces, and Picard theorems.

STAT 53200 Elements of Stochastic Processes (3 cr.) P: 519. See course listing for STAT 532.

MATH 53500 Theoretical Mechanics (3 cr.) P: 266 and PHYS 152. Kinematics and dynamics of systems of particles and of rigid bodies, Lagrange and Hamilton-Jacobi equations, oscillations about equilibrium, Hamiltonian systems, integral invariants, and transformation theory.

MATH 53600 Perturbation and Asymptotic Analysis (3 cr.) P: 525 or 530, and 523. Matched asymptotic expansions, inner and outer expansions, strained coordinates and multiple scales, and turning point analysis.

MATH 53700 Applied Mathematics for Scientists and Engineers I (3 cr.) P: 261, 266, and consent of instructor. Covers theories, techniques, and applications of partial differential equations, Fourier transforms, and Laplace transforms. Overall emphasis is on applications to physical problems.

MATH 54400 Real Analysis and Measure Theory (3 cr.) P: 444 or consent of instructor. Algebra of sets, real number system, Lebesgue measure, measurable functions, Lebesgue integration, differentiation, absolute continuity, Banach spaces, metric spaces, general measure and integration theory, and Riesz representation theorem.

MATH 54500 Principles of Analysis II (3 cr.) P: 544. Continues the study of measure theory begun in 544.

MATH 54600 Introduction to Functional Analysis (3 cr.) P: 545. By arrangement. Banach spaces, Hahn-Banach theorem, uniform boundedness principle, closed graph theorem, open mapping theorem, weak topology, and Hilbert spaces.

MATH 54700 Analysis for Teachers I (3 cr.) P: 261. Set theory, logic, relations, functions, Cauchy's inequality, metric spaces, neighborhoods, and Cauchy sequence.

MATH 54800 Analysis for Teachers II (3 cr.) P: 547. Functions on a metric space, continuity, uniform continuity, derivative, chain rule, Riemann integral, fundamental theorem of calculus, and double integrals.

MATH 54900 Applied Mathematics for Secondary School Teachers (3 cr.) P: 266 and 351. Summer, odd-numbered years. Applications of mathematics to problems in the physical sciences, social sciences, and the arts. Content varies. May be repeated for credit with the consent of the instructor.

MATH 55000 Algebra for Teachers I (3 cr.) P: 351. Definitions and elementary properties of groups, rings, integral domains, and fields. Intended for secondary school teachers.

MATH 55100 Algebra for Teachers II (3 cr.) P: 550. Polynomial rings, fields, vector spaces, and matrices.

MATH 55200 Applied Computational Methods II (3 cr.) P: 559 and consent of instructor. The first part of the course focuses on numerical integration techniques and methods for ODEs. The second part concentrates on numerical methods for PDEs based on finite difference techniques with brief surveys of finite element and spectral methods.

MATH 55300 Introduction to Abstract Algebra (3 cr.) P: 45300 or consent of instructor. Group theory: finite abelian groups, symmetric groups, Sylow theorems, solvable groups, Jordan-Holder theorem. Ring theory: prime and maximal ideals, unique factorization rings, principal ideal domains, Euclidean rings, and factorization in polynomial and Euclidean rings. Field theory: finite fields, Galois theory, and solvability by radicals.

MATH 55400 Linear Algebra (3 cr.) P: 351. Review of basics: vector spaces, dimension, linear maps, matrices, determinants, and linear equations. Bilinear forms, inner product spaces, spectral theory, and eigenvalues. Modules over principal ideal domain, finitely generated abelian groups, and Jordan and rational canonical forms for a linear transformation.

MATH 55900 Applied Computational Methods I (3 cr.) P: 266 and 351 or 511. Computer arithmetic, interpolation methods, methods for nonlinear equations, methods for solving linear systems, special methods for special matrices, linear least square methods, methods for computing eigenvalues, iterative methods for linear systems; methods for systems of nonlinear equations.

MATH 56100 Projective Geometry (3 cr.) P: 351. Projective invariants, Desargues' theorem, cross-ratio, axiomatic foundation, duality, consistency, independence, coordinates, and conics.

MATH 56200 Introduction to Differential Geometry and Topology (3 cr.) P: 351 and 445. Smooth manifolds, tangent vectors, inverse and implicit function theorems, submanifolds, vector fields, integral curves, differential forms, the exterior derivative, DeRham cohomology groups, surfaces in E3, Gaussian curvature, two-dimensional Riemannian geometry, and Gauss-Bonnet and Poincare theorems on vector fields.

MATH 56300 Advanced Geometry (3 cr.) P: 300 or consent of instructor. Topics in Euclidean and non-Euclidean geometry.

MATH 56700 Dynamical Systems I (3 cr.) P: 545, 571 Fundamental concepts and examples, one-dimensional systems, symbolic dynamics, topological entropy, hyperbolicity, structural stability, bifurcations, invariant measures, ergodicity.

MATH 57100 Elementary Topology (3 cr.) P: 444. Topological spaces, metric spaces, continuity, compactness, connectedness, separation axioms, nets, and function spaces.

MATH 57200 Introduction to Algebraic Topology (3 cr.) P: 571. Singular homology theory, Ellenberg-Steenrod axioms, simplicial and cell complexes, elementary homotopy theory, and Lefschetz fixed point theorem.

MATH 57400 Mathematical Physics I (3 cr.) P: 545 Topics in special functions, representation theory, spectral theory, modern differential geometry and topology, rigorous results in statistical physics.

MATH 57800 Mathematical Modeling of Physical Systems I (3 cr.) P: 266, PHYS 152, PHYS 251, and consent of instructor. Linear systems modeling, mass-spring-damper systems, free and forced vibrations, applications to automobile suspension, accelerometer, seismograph, etc., RLC circuits, passive and active filters, applications to crossover networks and equalizers, nonlinear systems, stability and bifurcation, dynamics of a nonlinear pendulum, van der Pol oscillator, chemical reactor, etc., introduction to chaotic dynamics, identifying chaos, chaos suppression and control, computer simulations, and laboratory experiments.

MATH 58100 Introduction to Logic for Teachers (3 cr.) P: 351. Not open to students with credit in 385. Logical connectives, rules of sentential inference, quantifiers, bound and free variables, rules of inference, interpretations and validity, theorems in group theory, and introduction to set theory.

MATH 58300 History of Elementary Mathematics (3 cr.) P: 261. A survey and treatment of the content of major developments of mathematics through the eighteenth century, with selected topics from more recent mathematics, including non-Euclidean geometry and the axiomatic method.

MATH 58500 Mathematical Logic I (3 cr.) P: 351. Formal theories for propositional and predicate calculus with study of models, completeness, and compactness. Formalization of elementary number theory; Turing machines, halting problem, and the undecidability of arithmetic.

MATH 58700 General Set Theory (3 cr.) P: 351. Informal axiomatization of set theory, cardinal numbers, countable sets, cardinal arithmetic, order types, well-ordered sets and ordinal numbers, axiom of choice and equivalences, paradoxes of intuitive set theory, and Zermelo-Fraenkel axioms.

MATH 58800 Mathematical Modeling of Physical Systems II (3 cr.) P: 578. Depending on the interests of the students, the content may vary from year to year. Emphasis will be on mathematical modeling of a variety of physical systems. Topics will be chosen from the volumes Mathematics in Industrial Problems by Avner Friedman. Researchers from local industries will be invited to present real-world applications. Each student will undertake a project in consultation with one of the instructors or an industrial researcher.

MATH 59800 Topics in Mathematics (1-5 cr.) By arrangement. Directed study and reports for students who wish to undertake individual reading and study on approved topics.

Graduate

MATH 61100 Methods of Applied Mathematics I (3 cr.) P: consent of instructor. Introduction to Banach and Hilbert spaces, linear integral equations with Hilbert-Schmidt kernels, eigenfunction expansions, and Fourier transforms.

MATH 61200 Methods of Applied Mathematics II (3 cr.) P: 611. Continuation of theory of linear integral equations; Sturm-Liouville and Weyl theory for second-order differential operators, distributions in n dimensions, and Fourier transforms.

MATH 62600 Mathematical Formulation of Physical Problems I (3 cr.) P: graduate standing and consent of instructor. Topics to be chosen from the following: Tensor formulation of the field equations in continuum mechanics, fluid dynamics, hydrodynamic stability, wave propagation, and theoretical mechanics.

MATH 62700 Mathematical Formulation of Physical Problems II (3 cr.) P: 62600. Continuation of 62600.

MATH 64200 Methods of Linear and Nonlinear Partial Differential Equations I (3 cr.) P: 52000, 52300, and 61100. Topics from linear and nonlinear partial differential equations, varied from time to time.

MATH 64600 Functional Analysis (3 cr.) P: 546. Advanced topics in functional analysis, varying from year to year at the discretion of the instructor.

MATH 66700 Dynamical Systems II (3 cr.) P: 567 Topics in dynamics. Continuation of MATH 567.

MATH 67200 Algebraic Topology I (3 cr.) P: 572. Continuation of 572; cohomology, homotopy groups, fibrations, and further topics.

MATH 67300 Algebraic Topology II (3 cr.) P: 672. continuation of 672, covering further advanced topics in algebraic and differential topology such as K-theory and characteristic classes.

MATH 67400 Mathematical Physics II (3 cr.) P: 574 Topics in mathematical physics. Continuation of MATH 574.

MATH 69200 Topics in Applied Mathematics (1-3 cr.)

MATH 69300 Topics in Analysis (1-3 cr.)

MATH 69400 Topics in Differential Equations (1-3 cr.)

MATH 69700 Topics in Topology (1-3 cr.)

MATH 69900 Research Ph.D. Thesis (Arr. cr.)

Undergraduate

Lower-Division

MATH 00100 Introduction to Algebra (4 cr.) Placement. Fall, spring, summer. Covers the material taught in the first year of high school algebra. Numbers and algebra, integers, rational numbers, equations, polynomials, graphs, systems of equations, inequalities, radicals. Credit does not apply toward any degree.

MATH 11000 Fundamentals of Algebra (4 cr.) P: MATH 00100 (with a minimum grade of C-) or placement. Intended primarily for liberal arts and business majors. Integers, rational and real numbers, exponents, decimals, polynomials, equations, word problems, factoring, roots and radicals, logarithms, quadratic equations, graphing, linear equations in more than one variable, and inequalities. This course satisfies the prerequisites needed for MATH M118, M119, 13000, 13600, and STAT 30100.

MATH 11100 Fundamentals of Algebra (4 cr.) P: MATH 00100 (with a minimum grade of C) or placement.Fall, spring, summer. Real numbers, linear equations and inequalities, systems of equations, polynomials, exponents, and logarithmic functions. Covers material in the second year of high school algebra. This course satisfies the prerequisites needed for MATH M118, M119, 13000, 13600, 15300, 15400, and STAT 30100.

MATH 12300 Elementary Concepts of Mathematics (3 cr.) Mathematics for liberal arts students; experiments and activities that provide an introduction to inductive and deductive reasoning, number sequences, functions and curves, probability, statistics, topology, metric measurement, and computers.

MATH 13000 Mathematics for Elementary Teachers I (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent. Fall, spring, summer. Numeration systems, mathematical reasoning, integers, rationals, reals, properties of number systems, decimal and fractional notations, and problem solving.

MATH 13100 Mathematics for Elementary Teachers II (3 cr.) P: 13000. Fall, spring, summer. Number systems: numbers of arithmetic, integers, rationals, reals, mathematical systems, decimal and fractional notations; probability, simple and compound events, algebra review.

MATH 13200 Mathematics for Elementary Teachers III (3 cr.) P: 13000 and one year of high school geometry. Fall, spring, summer. Rationals, reals, geometric relationships, properties of geometric figures, one-, two-, and three-dimensional measurement, and problem solving.

MATH 13600 Mathematics for Elementary Teachers (6 cr.) P: 11100 or 11000 (with a minimum grade of C) or equivalent, and one year of high school geometry. Fall, spring, summer. 13600 is a one-semester version of 13000 and 13200. Not open to students with credit in 13000 or 13200.

MATH 15200 College Algebra (3 cr.) P: MATH 11100 Algebra with a grade of C or better, MATH 11000 Fundamentals of Algebra with a grade of B or better, or placement. (Not available for credit toward graduation in the School of Science.) Typically offered Fall, Spring, Summer. MATH 15200 is a terminal course and not part of a sequence that is meant to be a prerequisite for higher level mathematics courses. MATH 15200 is not considered a prerequisite for higher level mathematics courses. MATH 15200 is not considered a prerequisite for MATH 15400 College Algebra and Trigonometry II. This course is specifically designed for students who do not need the same technical skills as those required by students planning to continue with calculus. There will be an emphasis on applied problems and graphing techniques. Real numbers, linear functions, linear equations, and systems of linear equations, absolute value equations, rational expressions, complex numbers, quadractic equations, exponential and logarithmic functions, circle parabola, and the mathematics of finance including compound interest and annuities are topics covered in this course.

MATH 15300 Algebra and Trigonometry I (3 cr.) P: 11100 (with a minimum grade of C) or placement. Fall, spring, summer. 15300-15400 is a two-semester version of 15900. Not open to students with credit in 15900. 15300 covers college-level algebra and, together with 15400, provides preparation for 16500, 22100, and 23100.

MATH 15400 Algebra and Trigonometry II (3 cr.) P: 15300 (with a minimum grade of C) or equivalent. Fall, spring, summer. 15300-15400 is a two-semester version of 15900. Not open to students with credit in 15900. 15400 covers college-level trigonometry and, together with 15300, provides preparation for 16500, 22100, and 23100.

MATH 15900 Precalculus (5 cr.) P: 11100 (with a minimum grade of B) or placement. Fall, spring. 15900 is a one-semester version of 15300-15400. Not open to students with credit in 15300 or 15400. 15900 covers college-level algebra and trigonometry and provides preparation for 16500, 22100, and 23100.

MATH 16500 Analytic Geometry and Calculus I (4 cr.) P: 15900 or 15400 (minimum grade of C) or equivalent, and one year of high school geometry. Fall, spring, summer I. Introduction to differential and integral calculus of one variable, with applications. Conic sections.

MATH 16600 Analytic Geometry and Calculus II (4 cr.) P: 16500 (minimum grade of C). Fall, spring, summer I. Continuation of MA 16500. Vectors in two and three dimensions. Techniques of integration, infinite series, polar coordinates, surfaces in three dimensions.

MATH 17100 Multidimensional Mathematics (3 cr.) P: 15900 or 15400 (minimum grade of C) or equivalent, and one year of high school geometry. An introduction to mathematics in more than two dimensions. Graphing of curves, surfaces and functions in three dimensions. Two and three dimensional vector spaces with vector operations. Solving systems of linear equations using matrices. Basic matrix operations and determinants.

MATH 19000 Topics in Applied Mathematics for Freshmen (3 cr.) Treats applied topics in mathematics at the freshman level. Prerequisites and course material vary with the applications.

MATH 22100 Calculus for Technology I (3 cr.) P: 15400 or 15900 (with a minimum grade of C-) or equivalent, and

one year of geometry. Fall, spring, summer. Analytic geometry, the derivative and applications, and the integral and applications.

MATH 22200 Calculus for Technology II (3 cr.) P: 22100 (with a minimum grade of C-). Fall, spring, summer. Differentiation of transcendental functions, methods of integration, power series, Fourier series, and differential equations.

MATH 23100 Calculus for Life Sciences I (3 cr.) P: 15400 or 15900 (with a minimum grade of C-) or equivalent, and one year of geometry. Limits, derivatives and applications. Exponential and logarithmic functions. Integrals, antiderivatives, and the Fundamental Theorem of Calculus. Examples and applications are drawn from the life sciences.

MATH 23200 Calculus for Life Sciences II (3 cr.) P: 23100 (with a minimum grade of C-). Matrices, functions of several variables, differential equations and solutions with applications. Examples and applications are drawn from the life sciences.

MATH 26100 Multivariate Calculus (4 cr.) P: 16400. Equiv. IU MATH M311. Fall, spring, summer. Spatial analytic geometry, vectors, curvilinear motion, curvature, partial differentiation, multiple integration, line integrals, and Green's theorem. An honors option for this course is available. Note: Effective Fall 2009, this course is offered under an updated course description, as below.

MATH 26600 Ordinary Differential Equations (3 cr.) P: 16400 and 17100 (minimum grade of C in each). Fall, spring, summer. First order equations, second and nth order linear equations, series solutions, solution by Laplace transform, systems of linear equations.

MATH 27600 Discrete Math (3 cr.) P or C: 16500 or consent of instructor. Spring. Logic, sets, functions, integer algorithms, applications of number theory, mathematical induction, recurrence relations, permutations, combinations, finite probability, relations and partial ordering, and graph algorithms.

MATH 29000 Topics in Applied Mathematics for Sophomores (3 cr.) Applied topics in mathematics at the sophomore level. Prerequisites and course material vary with the applications.

MATH-M 118 Finite Mathematics (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent. Fall, spring, summer. Set theory, logic, permutations, combinations, simple probability, conditional probability, Markov chains. An honors option is available in this course.

MATH-M 119 Brief Survey of Calculus I (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent. Fall, Spring, Summer. Sets, limits, derivatives, integrals, and applications. An honors option is available in this course.

MATH-S 118 Honors Finite Mathematics (3 cr.) P: Mastery of two years of high school algebra and consent of instructor. Designed for students of outstanding ability in mathematics. Covers all material of M118 and additional topics from statistics and game theory. Computers may be used in this course, but no previous experience is assumed.

MATH-S 119 Honors Brief Survey of Calculus I (3 cr.) P: Mastery of two years of high school algebra and consent of instructor. Designed for students of outstanding ability in mathematics. Covers all material of M119 and additional topics. Computers may be used in this course, but no previous experience is assumed.

MATH-S 165 Honors Analytic Geometry and Calculus I (4 cr.) Precalculus or trigonometry and consent of instructor. This course covers the same topics as MATH 16500. However, it is intended for students having a strong interest in mathematics who wish to study the concepts of calculus in more depth and who are seeking mathematical challenge.

MATH-S 166 Honors Analytic Geometry and Calculus II (4 cr.) P: S165 (minimum grade of B-) or 16500 (minimum grade of A-), and consent of instructor. This course covers the same topics as MATH 16600. However, it is intended for students having a strong interest in mathematics who wish to study the concepts of calculus in more depth and who are seeking mathematical challenge.

Upper-Division

MATH 30000 Logic and the Foundations of Algebra (3 cr.) P: 16500. Fall. Logic and the rules of reasoning, theorem proving. Applications to the study of the integers; rational, real, and complex numbers; and polynomials. Bridges the gap between elementary and advanced courses. Recommended for prospective high school teachers.

MATH 32101 Elementary Topology (3 cr.) P: 26100. Introduction to topology, including metric spaces, abstract topological spaces, continuous functions, connectedness, compactness, curves, Cantor sets, coninua, and the Baire Category Theorem. Also, an introduction to surfaces, including spheres, tori, the Mobius band, the Klein bottle and a description of their classification.

MATH 33300 Chaotic Dynamical Systems (3 cr.) P: 16600 or 22200. Spring. The goal of the course is to introduce some of the spectacular new discoveries that have been made in the past twenty years in the field of mathematics known as dynamical systems. It is intended for undergraduate students in mathematics, science, or engineering. It will include a variety of computer experiments using software that is posted on the Web.

MATH 35100 Elementary Linear Algebra (3 cr.) P: 26100. Not open to students with credit in MATH 51100. Fall, spring. Systems of linear equations, matrices, vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and applications.

MATH 37300 Financial Mathematics (3 cr.) P: 26100. An introduction to the theory of finance, including such topics as compound interest, annuities certain, amortization schedules, sinking funds, bonds, and related securities.

MATH 39000 Topics in Applied Mathematics for Juniors (3 cr.) Applied topics in mathematics at the junior level. Prerequisites and course material vary with the applications.

MATH 39800 Internship in Professional Practice (1-3 cr.) P: Approval of Department of Mathematical Sciences. Professional work experience involving significant use of mathematics or statistics. Evaluation of performance by employer and Department of Mathematical Sciences. May count toward major requirements with approval of the Department of Mathematical Sciences. May be repeated

with approval of the Department of Mathematical Sciences for a total of 6 credits.

MATH 41400 Numerical Methods (3 cr.) P: 26600 and a course in a high-level programming language. Not open to students with credit in CSCI 51200. Fall. Error analysis, solution of nonlinear equations, direct and iterative methods for solving linear systems, approximation of functions, numerical differentiation and integration, and numerical solution of ordinary differential equations.

MATH 42100 Linear Programming and Optimization Techniques (3 cr.) P: MATH 26100 and 35100. This course covers a variety of topics in operations research, including solution of linear programming problems by the simplex method, duality theory, transportation problems, assignment problems, network analysis, dynamic programming.

MATH 42300 Discrete Modeling and Game Theory (3 cr.) P: MATH 26200 or 26600 and MATH 35100 or consent of instructor. Linear programming, mathematical modeling of problems in economics, management, urban administration, and the behavioral sciences.

MATH 42500 Elements of Complex Analysis (3 cr.) P: 26100 Complex numbers and complex-valued functions; differentiation of complex functions; power series, uniform convergence; integration, contour integrals; elementary conformal mapping.

MATH 42600 Introduction to Applied Mathematics and Modeling (3 cr.) P: 26600 and PHYS 15200. Introduction to problems and methods in applied mathematics and modeling. Formulation of models for phenomena in science and engineering, their solutions, and physical interpretation of results. Examples chosen from solid and fluid mechanics, mechanical systems, diffusion phenomena, traffic flow, and biological processes.

MATH 44400 Foundations of Analysis (3 cr.) P: 26100. Fall. Set theory, mathematical induction, real numbers, completeness axiom, open and closed sets in Rm, sequences, limits, continuity and uniform continuity, inverse functions, differentiation of functions of one and several variables.

MATH 44500 Foundations of Analysis II (3 cr.) P: 44400. Spring. Continuation of differentiation, the mean value theorem and applications, the inverse and implicit function theorems, the Riemann integral, the fundamental theorem of calculus, point-wise and uniform convergence, convergence of infinite series, and series of functions.

MATH 45300 Beginning Abstract Algebra (3 cr.) P: 35100 or consent of instructor. Fall. Basic properties of groups, rings,and fields, with special emphasis on polynomial rings.

MATH 45400 Galois Theory (3 cr.) P: MATH 45300. An introduction to Galois Theory, covering both its origins in the theory of roots of polynomial equation and its modern formulation in terms of abstract algebra. Topics include field extension extensions and their symmetries, ruler and compass constructions, solvable groups, and the solvability of polynomial equations by radical operation.

MATH 45600 Introduction to the Theory of Numbers (3 cr.) P: 26100. Divisibility, congruences, quadratic residues, Diophantine equations, and the sequence of primes.

MATH 46200 Elementary Differential Geometry (3 cr.) P: 35100. Calculus and linear algebra applied to the study of curves and surfaces. Curvature and torsion, Frenet-Serret apparatus and theorem, and fundamental theorem of curves. Transformation of R2, first and second fundamental forms of surfaces, geodesics, parallel translation, isometries, and fundamental theorem of surfaces.

MATH 46300 Intermediate Euclidean Geometry for Secondary Teachers (3 cr.) P: 30000 and one year of high school geometry, or consent of instructor. Spring. History of geometry. Ruler and compass constructions, and a critique of Euclid. The axiomatic method, models, and incidence geometry. Presentation, discussion and comparison of Hilbert's, Birkhoff's, and SMSG's axiomatic developments.

MATH 49000 Topics in Mathematics for Undergraduates (1-5 cr.) By arrangement. Open to students only with the consent of the department. Supervised reading and reports in various fields.

MATH 49100 Seminar in Competitive Math Problem-Solving (1-3 cr.) Approval of the director of undergraduate programs is required. This seminar is designed to prepare students for various national and regional mathematics contests and examinations such as the Putnam Mathematical Competition, the Indiana College Mathematical Competition and the Mathematical Contest in Modeling (MCM), among others. May be repeated twice for credit.

MATH 49200 Capstone Experience (1-3 cr.) Credits by arrangement.

MATH 49500 TA Instruction (0 cr.) For teaching assistants. Intended to help prepare TAs to teach by giving them the opportunity to present elementary topics in a classroom setting under the supervision of an experienced teacher who critiques the presentations.

EDUC-M 457 Methods of Teaching Senior High/Junior High/Middle School Mathematics (2-4 cr.) P: 30 credit hours of mathmatics. Study of methodology, heuristics of problem solving, curriculum design, instructional computing, professional affilia-tions, and teaching of daily lessons in the domain of secondary and/or junior high/ middle school mathematics.

Physics

Advanced Undergraduate and Graduate

PHYS 50100 Physical Science (3 cr.) Fall, Spring. Survey of the physical sciences with emphasis on methods of presentation appropriate to the elementary school. Graduate credit is extended only for elementary school teacher programs.

PHYS 51000 Physical Mechanics (3 cr.) P: 31000 or equivalent, and courses in calculus and differential equations. Mechanics of particles, rigid bodies, and vibrating systems.

PHYS 51500 Thermodynamics (3 cr.) P: 31000 and 33000 and a course in differential equations or advanced calculus. Equilibrium states, the concept of heat, and the laws of thermodynamics; the existence and properties of the entropy; different thermodynamic potentials and their uses; phase diagrams; introduction of statistical mechanics and its relation to thermodynamics; and treatment of ideal gases.

PHYS 51700 Statistical Physics (3 cr.) P: 34200, 51000, and 51500 or equivalent. Laws of thermodynamics; Boltzmann and quantum statistical distributions, with applications to properties of gases, specific heats of solids, paramagnetism, black-body radiation, and Bose-Einstein condensation; Boltzmann transport equation and transport properties of gases; and Brownian motion and fluctuation phenomena.

PHYS 52000 Mathematical Physics (3 cr.) P: 31000, 32200, 33000, or consent of instructor. Vectors and vector operators, tensors, infinite series, analytic functions and the calculus of residues, partial differential equations, and special functions of mathematical physics. When interests and preparation of students permit, calculus of variations and/or group theory are covered.

PHYS 52200 Coherent Optics and Quantum Electronics (3 cr.) P: 33000, 44200, and 55000, or ME 58700. Recent experimental and theoretical developments in optics, emphasizing concepts of coherence. Fourier optics and the quantum theory of radiation. Applications to lasers and masers, nonlinear optics, holography, and quantum electronics.

PHYS 53000 Electricity and Magnetism (3 cr.) P: 33000 or equivalent. Electrostatic problems; theory of dielectrics; theory of electric conduction; electromagnetic effects due to steady and changing currents; magnetic properties of matter; Maxwell's equations; and electromagnetic radiation.

PHYS 53300 Principles of Magnetic Resonance (3 cr.) P: 55000 or equivalent. Magnetic resonance in bulk matter; classical and quantum descriptions, relaxation, CW and pulse experiments, interactions and Hamiltonians. Magnetic interactions between electrons and nuclei; nuclear quadrupole interaction, crystal field interactions, and effect of molecular motion. High-resolution NMR spectra; EPR of free-radical solutions; and powder patterns.

PHYS 54500 Solid-State Physics (3 cr.) P: an undergraduate course in modern physics. Crystal structure; lattice vibrations; free electron theory of solids; band theory of solids; semiconductors; superconductivity; magnetism; and magnetic resonance.

PHYS 55000 Introduction to Quantum Mechanics (3 cr.) P: 34200 and at least one other junior-level course in each of mathematics and physics or equivalent. Brief historical survey; waves in classical physics; wavepackets; uncertainty principle; operators and wave functions; Schrodinger equation and application to one-dimensional problems; the hydrogen atom; electron spin; multielectron atoms; periodic table; molecules; periodic potentials; and Bloch wave functions.

PHYS 55600 Introductory Nuclear Physics (3 cr.) P: 55000 or equivalent. Theory of relativity; brief survey of systematics of nuclei and elementary particles; structure of stable nuclei; radioactivity; interaction of nuclear radiation with matter; nuclear reactions; particle accelerators; nuclear instruments; fission; and nuclear reactors.

PHYS 57000 Selected Topics in Physics (3 cr.) Specialized topics in physics selected from time to time.

PHYS 59000 Reading and Research (1-3 cr.)

PHYS 59300 Advanced Physics Laboratory (3 cr.)

Astronomy

AST-A 100 The Solar System (3 cr.) Fall. Survey of the solar system, including the Earth, sun, moon, eclipses, planets and their satellites, comets, laws of planetary motion, etc. Discussion of the origin of the solar system, life on earth, and the possibilities of extraterrestrial life. Also astronomical instruments and celestial coordinates.

AST-A 105 Stars and Galaxies (3 cr.) Spring. Survey of the universe beyond the solar system, including stars, pulsars, black holes, principles of spectroscopy and the H-R diagram, nebulae, the Milky Way, other galaxies, quasars, expanding universe, cosmology, and extraterrestrial life.

AST-A 130 Short Courses in Astronomy (1 cr.) Five-week short courses on a variety of topics in astronomy. Examples of topics include: the Big Bang, Black Holes, Astronomy from your Backyard, How to See Stars, and The Birth and Death of Our Sun.

AST-A 205 Quasars, Pulsars, Black Holes (3 cr.) P: Introductory High School mathematics. Fall, day. For both science and non-science majors interested in astronomy. Surveys stars of all types and their life cycles. Includes the H-R diagram, star clusters, and exploration of our own sun. Discussion of relativistic effects on certain astronomical objects and on human space exploration.

Graduate

PHYS 58500 Introduction to Molecular Biophysics (3 cr.)

PHYS 60000 Methods of Theoretical Physics (3 cr.) P: graduate standing in physics or consent of instructor. 600 is designed to provide first-year physics graduate students with the mathematical background for subsequent studies of advanced mechanics, electrodynamics, and quantum theory. Topics include functions of a complex variable, ordinary and partial differential equations, eigenvalue problems, and orthogonal functions. Green's functions, matrix theory, and tensor analysis in three and four dimensions.

PHYS 60100 Methods of Theoretical Physics II (3 cr.) P: 60000 or equivalent. A continuation of 60000.

PHYS 61000 Advanced Theoretical Mechanics (3 cr.) P: 51000 or equivalent. Lagrangian and Hamiltonian mechanics; variational principles; canonical transformations; Hamilton-Jacobi theory; theory of small oscillations; and Lagrangian formulation for continuous systems and field.

PHYS 61700 Statistical Mechanics (3 cr.) P: 66000 or equivalent. Classical and quantum statistical mechanics.

PHYS 63000 Advanced Theory of Electricity and Magnetism (3 cr.) P: 53000 and 60000, or equivalent. The experimental origins of Maxwell's equations. Electrostatics and magnetostatics; solution of boundary value problems. Quasistatic currents. Electromagnetic energy and momentum and the Maxwell stress tensor. Foundations of optics. Radiation from antennae, multipole expansion; waveguides.

PHYS 63100 Advanced Theory of Electricity and Magnetism (3 cr.) P: 63000 or equivalent. Covariant formulation of electrodynamics; Lienard-Wiechert potentials; radiation from accelerated particles; Cerenkov radiation;

dynamics of relativistic particles; radiation damping; and introduction to magnetohydrodynamics.

PHYS 63300 Advanced Topics in Magnetic Resonance (3 cr.) P: 53300 or consent of instructor. Rotation operators, coupling of angular momenta, Wigner-Eckhart theorem, and density matrix; theory of magnetic resonance, relaxation in liquids, chemical exchange, double resonance, cross-polarization, and magic angle spinning; two-dimensional NMR, correlation spectroscopy, and exchange and NOE spectroscopies; application to biological macromolecules; time domain EPR; and lineshape under slow motion.

PHYS 66000 Quantum Mechanics I (3 cr.) P: 53000, 55000, 60000, and 61000, or equivalent. Origins of the quantum theory, the uncertainty and complementarity principles. The Schrodinger equation and its solutions for simple physical systems. Mathematical formulation of the quantum theory. Applications: simple harmonic oscillator, theory of angular momentum, and hydrogen atom. Time-independent and time-dependent perturbation theory. The Pauli exclusion principle. Spin of the electron. Elementary theory of scattering.

PHYS 66100 Quantum Mechanics II (3 cr.) P: 60100, 63000, and 66000, or equivalent. Symmetry and conservation laws. The Klein-Gordon and Dirac equations. Interaction of radiation with matter. Applications of quantum mechanics to atomic structure. Scattering theory.

PHYS 67000 Selected Topics in Physics (1-3 cr.) P: consent of instructor. Specialized topics in physics, varied from time to time.

PHYS 68500 Physics Seminar (0-1 cr.) Offered on Pass/Fail basis only. May be repeated for credit. Weekly physics seminar presented by faculty and invited speakers from outside the department.

PHYS 69800 Research M.S. Thesis (Arr. cr.) Research M.S. Thesis.

PHYS 69900 Research (Arr. cr.) Ph.D. thesis.

PHYS-G 901 Advanced Research (6 cr.)

Undergraduate

PHYS 01000 Pre-Physics (3 cr.) P: MATH 15900, or MATH 15300 and 15400, or equivalent. Fall, Spring. For students not ready to take the algebra- and trigonometry-based courses in physics (21800 and P201). Basic concepts of physics. Methods of analyzing physics problems. Setting up equations for physics problems. Interpreting information in physics problems. Analyzing and presenting the results of laboratory measurements. Extensive drill in these topics.

PHYS 10000 Physics in the Modern World (5 cr.) P: Introductory high school mathematics. Spring, day. Ideas, language, methods, and impact of physics today.

PHYS 14000 Short Courses in Physics (1 cr.) Five-week courses on a variety of topics related to the physical world. Examples of topics include: Waves and Particles Are the Same Thing, Relativity, Quarks and Other Inhabitants of the Zoo, Why Things Work and Why They Don't, Lasers and Holography, and Physics of Star Trek.

PHYS 15200 Mechanics (4 cr.) P or C: MATH 16600. Equiv. IU PHYS P221. Fall, day; Spring, day, night; Summer, day. Statics, uniform and accelerated motion; Newton's laws; circular motion; energy, momentum, and conservation principles; dynamics of rotation; gravitation and planetary motion; properties of matter; and simple harmonic and wave motion. For more information, visit our Web page at webphysics.iupui.edu/introphysics.

PHYS 20000 Our Physical Environment (3 cr.) Fall, night; Spring, night. A nonmathematical introduction to physical concepts and methods by means of examples from daily life and current technological applications.

PHYS 21800 General Physics (4 cr.) P: MATH 15900 or equivalent. Fall, night; Spring, night; Summer, day. Mechanics, conservation laws, gravitation; simple harmonic motion and waves; kinetic theory, heat, and thermodynamics for students in technology fields.

PHYS 21900 General Physics (4 cr.) P: 21800. Fall, night; Spring, night; Summer, day. Electricity, light, and modern physics.

PHYS 25100 Heat, Electricity, and Optics (5 cr.) P: either P201 or 15200. P or C: MATH 26100. Equiv. IU PHYS P222. Fall, day, night; spring, day; summer, day. Heat, kinetic theory, elementary thermodynamics, and heat transfer. Electrostatics, electrical currents and devices. Magnetism and electromagnetic radiation. Optics. For more information, visit the Web site at webphysics.iupui.edu/introphysics.

PHYS 29900 Introduction to Computational Physics (2 cr.) P: 15200. Fall. Application of computational techniques to physical concepts. Topics include mechanics, oscillations, chaos, random processes, etc.

PHYS 30000 Introduction to Elementary Mathematical Physics (3 cr.) P: P202 or 25100, and MATH 26100. Spring. Brief but practical introduction to various mathematical methods used in intermediate-level physics courses. Vector analysis, orthogonal coordinate systems, matrices, Fourier methods, complex numbers, special functions, and computational methods. Emphasis will be on examples and the application of these methods to physics problems.

PHYS 31000 Intermediate Mechanics (4 cr.) P: P202 or 25100 and 30000 or MATH 26600. Fall. For students familiar with calculus. Elements of vector algebra; statics of particles and rigid bodies; theory of couples; principle of virtual work; kinematics; dynamics of particles and rigid bodies; work, power, and energy; and elements of hydromechanics and elasticity.

PHYS 33000 Intermediate Electricity and Magnetism (3 cr.) P: P202 or 25100 and 30000 or MATH 26600. Spring. Electrostatics; electric currents; magnetostatics; electromagnetic induction; Maxwell's equations; electromagnetic waves.

PHYS 34200 Modern Physics (3 cr.) P: P202 or 25100 and MATH 26100. Equiv. IU PHYS P301. Spring. A survey of basic concepts and phenomena in atomic, nuclear, and solid state physics.

PHYS 35300 Electronics Laboratory (2 cr.) P: 25100. Spring. Introduction to electronic circuits and test equipment for scientists. Circuits including LRC networks, diodes,

transistors, amplifiers, and digital components will be constructed and measured using oscilloscopes, function generators, and digital multimeters. Results will be analyzed in terms of basic circuit properties such as impedance and frequency response.

PHYS 40000 Physical Optics (3 cr.) P: 33000. Fall. Electromagnetic waves; wave theory of reflection, refraction, diffraction, and interference. Spatial and temporal coherence. Fourier optics, coherent imaging, and holography. Polarization phenomena; Jones vectors and matrices.

PHYS 40100 Physical Optics Laboratory (2 cr.) P: 33000. C: 40000 (majors). Experiments to accompany PHYS 40000 in reflection, refraction, and interference using lasers. Interferometry. Diffraction patterns with emphasis on Fourier analysis and Fourier transformations. Polarization, Brewster's angle. Coherence length of lasers.

PHYS 41600 Thermal Physics (3 cr.) P: 34200, and 31000 or 33000. Spring. Temperature, equations of state, first and second laws of thermodynamics, entropy and applications, kinetic theory, transport processes, statistical mechanics.

PHYS 44200 Quantum Mechanics (3 cr.) P: 34200, and 31000 or 33000 Fall. Inadequacies of classical physics; wave packets and Schrodinger equation, one-dimensional problems; operator formulation of quantum mechanics; linear harmonic oscillator; angular momentum; hydrogen atom; and Pauli principle and application to helium atom.

PHYS 47000 Reading in Special Topics (1-3 cr.)

PHYS 48000 Solar Energy Usage (3 cr.) P: MATH 16600 or equivalent, and two courses in general physics. Theoretical and practical aspects, including collector design, modeling of solar systems, economic evaluation of solar alternatives, and photovoltaics.

PHYS 49000 Undergraduate Reading and Research (1-3 cr.) Independent study for undergraduates.

PHYS-P 201 General Physics I (5 cr.) P: MATH 15900 or equivalent. Fall, day; Spring, night; Summer, day. Newtonian mechanics, wave motion, heat, and thermodynamics. Application of physical principles to related scientific disciplines, especially life sciences. Intended for students preparing for careers in the life sciences and the health professions. Three lectures, one discussion section, and one two-hour laboratory period each week.

PHYS-P 202 General Physics II (5 cr.) P: P201. Fall, night; Spring, day; Summer, day. Electricity and magnetism; geometrical and physical optics; introduction to concepts of relativity, quantum theory, and atomic and nuclear physics. Three lectures, one discussion section, and one two-hour laboratory period each week.

Psychology
Graduate Level

PSY 51800 Memory and Cognition (3 cr.) A graduate-level survey of theories and research concerned with the acquisition, retention, and retrieval of information. Topics include amnesia, eyewitness memory, forgetting, developmental trends in memory, related issues in attention, language processing, and problem solving.

PSY 54000 History of Psychology (3 cr.) P: Nine (9) credit hours of psychology. A review of the philosophical, theoretical, and methodological issues that entered into the development of modern psychology. Emphasis on historical themes that continue to be active in the science and profession of psychology.

PSY 56500 Interpersonal Relations (3 cr.) P: Nine (9) credit hours of psychology. Review of major current theoretical formulations of the interpersonal relationship, including a discussion of some of the more prominent research. Focus is primarily on two-person interpersonal relations.

PSY 57000 Industrial Psychology (3 cr.) Survey of the applications of psychological principles and of research methodology to the various human problems in the industry, such as personnel selection and appraisal, the organizational and social context of human work, the job and work situation, human errors and accidents, and psychological aspects of consumer behavior.

PSY 57200 Organizational Psychology (3 cr.) 572 Organizational Psychology (3 cr.) A survey of basic behavioral science research and thinking as these contribute to the understanding of individual, dyadic, group, intergroup, and other large organization behavioral phenomena. The topics covered include motivation, perception, attitudes and morale, communication, leadership, conflict, problem solving, behavior change, and organizational effectiveness.

PSY 57400 Psychology of Industrial Training (3 cr.) P: Three (3) credit hours of psychology. Use of psychological measurement techniques in assessing training needs and evaluating training effectiveness and the application of learning research and theory to industrial training.

PSY 59000 Individual Research Problems (1-3 cr.) 590 Individual Research Problems (1-3 cr.) P: Twelve (12) credit hours of psychology and consent of instructor. Opportunity for students to study particular problems in any field of psychology or to learn research techniques under the guidance of a faculty member.

PSY 60000 Statistical Inference (3 cr.) 600 Statistical Inference (3 cr.) P: Student must be a degree-seeking student in psychology graduate program or have consent of instructor and B305 or equivalent. Emphasis on principles underlying both parametric and nonparametric inference.

PSY 60100 Correlation and Experimental Design (3 cr.) 601 Correlation and Experimental Design (3 cr.) P: 600. Continuation of 600, with emphasis on the design and analysis of experiments.

PSY 60500 Applied Multivariate Analysis (3 cr.) 605 Applied Multivariate Analysis (3 cr.) P: 600. A survey of the most frequently employed multivariate research techniques, such as multivariate generalizations of univariate tests and analysis of variance, principal components, canonical analysis, and discriminant analysis. A central theme of the course is the general linear model, both univariate and multivariate. A multipurpose program for this model provides the student with practical experience in conducting multivariate research.

PSY 60800 Measurement Theory and the Interpretation of Data (3 cr.) 608 Measurement Theory and the

Interpretation of Data (3 cr.) P: 600 and B307, or equivalent. The theory of measurement and the development of reliability and the Spearman-Brown equations, true scores and variables, and correction for attenuation. Variance or covariance of combinations of variables. Item analysis and test construction strategies. Reliability and validity of measurements and the influence of measurement error and measurement threats to research design.

PSY 61100 Factor Analysis (3 cr.) 611 Factor Analysis (3 cr.) P: 600. Theory and applications of factor analysis in psychological research.

PSY 61500 Introduction to Psychobiology (3 cr.) P: Consent of instructor. A survey of the integrated neurosciences emphasizing physiological psychology. Neural processes of sensory and motor function, arousal and sleep, motivation, learning and memory, language function, and personality disorders will be presented with selected coverage of neuroanatomy, neurophysiology, neuropharmacology, and neuroendocrinology. Both normal and pathological functions will be covered.

PSY 62200 Animal Learning (3 cr.) 622 Animal Learning (3 cr.) A survey of the methods, problems, and research in Pavlovian, instrumental, and operant conditioning. Current issues and attempts at theoretical integration are highlighted. Emphasis is also given to the empirical and conceptual foundations of the present views on the mechanisms governing learned behavior.

PSY 62400 Human Learning and Memory (3 cr.) P: A first course in human learning and consent of instructor. Selected survey of important problems in the encoding, storage, and retrieval of laboratory and naturalistic events.

PSY 62800 Perceptual Processes (3 cr.) 628 Perceptual Processes (3 cr.) This course is an advanced introduction to the psychology of perception. The course emphasizes visual and auditory perception, reviewing basic concepts, methodologies, research findings, and theoretical approaches. Theories of direct perception, constructivist perception, and computational vision are discussed in detail.

PSY 64000 Survey of Social Psychology I (3 cr.) P: B370 or equivalent. An extensive survey of methods, research, and theory in social psychology.

PSY 64600 Seminar in Social-Personality Psychology (3 cr.) 646 Seminar in Social-Personality Psychology (3 cr.) P: consent of instructor. A seminar covering a special topic in personality or social psychology. Specific topic varies from seminar to seminar.

PSY 65500 Cognitive Development (3 cr.) 655 Cognitive Development (3 cr.) P: consent of instructor. An analysis of research findings and current theories relevant to the development of cognitive processes. Emphasis on the changing characteristics of some fundamental cognitive processes. Special attention is given to verbal behavior and language.

PSY 68000 Seminar in Industrial-Personnel Psychology (3 cr.) 680 Seminar in Industrial-Personnel Psychology (3 cr.) P: 570, 572, and 601. Extensively surveys the various areas of industrial-personnel psychology (e.g., selection, placement, training, performance appraisal). Provides a critical and up-to-date review of recent and classical research in these areas.

PSY 68100 Seminar in Research Methodologies of Industrial/Organizational Psychology (3 cr.) P: 57000, 57200, 60100, or consent of instructor. Intensive analysis of application of various research and statistical methods to the study of human behavior in organizational settings.

PSY 68200 Advanced Seminar in Industrial/Organizational Psychology (3 cr.) P: 57000, 57200, or equivalent. Special topics in industrial and organizational psychology are offered on a rotating basis. Examples of the special topics are work motivation, leadership, advanced selection and placement, and performance appraisal. One topic will be treated each semester.

PSY 68300 Seminar in Industrial-Social Psychology (3 cr.) P: 57000, 57200, or equivalent. Study of research and theory emphasizing social perception, attitudes, supervisory behavior, employee participation, motivation, and organizational structure.

PSY 68400 Practicum in Industrial/Organizational Psychology (3 cr.) 684 Practicum in Industrial/Organizational Psychology (3 cr.) P: 570, 572, and consent of instructor. Practical experience in the development and implementation of field research in organizational settings. Gives students the opportunity to spend eight hours per week in local business organizations to gain experience and skills in industrial/organizational psychology.

PSY 69800 Research M.S. Thesis (3 cr.) 698 Research M.S. Thesis (3 cr.)

PSY 69900 Research Ph.D. Thesis (0-12 cr.) 699 Research Ph.D. Thesis (0-12 cr.)

PSY-G 901 Advanced Research (6 cr.)

PSY-I 501 Multicultural Counseling (3 cr.) I501 Multicultural Counseling (3 cr.) P: graduate standing. This course explores the role of increasing diversity in the U.S. population and how it will affect the delivery of mental health services. The focus of the course is on different ethnic and minority groups, their customs and values, and the impact that these cultural factors have on the utilization of psychological services.

PSY-I 544 Psychobiology of Learning and Motivation (3 cr.) I544 Psychobiology of Learning and Motivation (3 cr.) P: B320 or equivalent. The course examines past and present biologically based theories of learned and motivated behavior. Neural processes of feeding, drinking, aggression, fear, anxiety, and sexual behavior will be emphasized. Selected coverage of behavioral research principles used to investigate these processes also will be discussed.

PSY-I 545 Psychopharmacology (3 cr.) I545 Psychopharmacology (3 cr.) P: 615 or consent of instructor. A survey of the effects of drugs on behavior, cognitive functioning, and emotions. Emphasis will be placed on the practical advantages of understanding how psychotropic drugs work, and on how the brain functions in health and disease. Students will be exposed to the most current theories and research in the field.

PSY-I 549 Introduction to Vocational Rehabilitation (3 cr.) I549 Introduction to Vocational Rehabilitation (3 cr.) P: Nine (9) credit hours of psychology. Philosophy, procedures, and practices underlying the vocational rehabilitation movement, including the historical, social, cultural, and economic factors and legislation that have contributed to its rapid development.

PSY-I 555 Medical and Psychosocial Aspects of Chronic Illness (3 cr.) I555 Medical and Psychosocial Aspects of Chronic Illness (3 cr.) P: Nine (9) credit hours of psychology including I549. Provides medical information for rehabilitation counselors and introduces students to medical terminology. Includes knowledge of the etiology, prognosis, methods of treatment, and effects of disabling conditions, and implications for the rehabilitation counselor. Counselor relationships with other health-related personnel are emphasized.

PSY-I 560 Behavioral Genetics (3 cr.)

PSY-I 578 Occupational Analysis (3 cr.) I578 Occupational Analysis (3 cr.) P: 570. Survey of systematic study of human work, including techniques for analyzing jobs and occupations for personnel and related purposes. Survey of occupational research and related topics. Practice in job analysis.

PSY-I 580 Survey of Clinical Approaches with Children and Adolescents (3 cr.) I580 Survey of Clinical Approaches with Children and Adolescents (3 cr.) P: Nine (9) credit hours in psychology. Introduction to the following as they relate to children and adolescents: (1) psychopathological disorders and behavior problems, (2) theories of psychopathology and behavior problems, (3) evaluation techniques, and (4) therapeutic and behavioral change procedures. This is a lecture course.

PSY-I 591 Psychopathology (3 cr.) I591 Psychopathology (3 cr.) P: enrollment in psychology graduate program or consent of instructor. An intensive survey of the methods, theories, and research concerning the nature, causes, and development of psychopathology. An evaluation of current systems of assessment and classification of abnormal behavior is emphasized.

PSY-I 595 Seminar in Teaching Psychology (0-3 cr.) I595 Seminar in Teaching Psychology (0-3 cr.) P: consent of the Department of Psychology. A problem-solving approach to teaching psychology at IUPUI. Planning the course; anticipating problems; and dealing with ongoing teaching problems. Current faculty members will present their innovative techniques. Participants will evaluate each other's classroom performance.

PSY-I 613 Psychiatric Rehabilitation (3 cr.) I613 Psychiatric Rehabilitation (3 cr.) P: consent of instructor. A seminar examining recent developments in the rehabilitation of persons with severe psychiatric disabilities. Covers assertive case management, vocational approaches, clubhouse models, residential alternatives, psychoeducation, and the consumer movement. Field observations complement classroom instruction. Issues in program planning and cost effectiveness will be discussed.

PSY-I 614 Behavioral Medicine in Rehabilitation (3 cr.) P: Consent of instructor. The theory and practice of behavioral medicine will be explored. Emphasis is on the application of behavioral principles to individuals suffering from various chronic diseases or disabilities including spinal cord injury, chronic pain, cancer, diabetes, strokes, cardiovascular diseases, and epilepsy.

PSY-I 618 Interventions in Health Psychology (3 cr.) I618 Interventions in Health Psychology (3 cr.) P: consent of instructor. The goal of the course is to familiarize students with clinical interventions and research relevant to health problems and lifestyle. This will enable students to critically evaluate the work that has been accomplished, and to design and implement intervention protocols.

PSY-I 643 Field Methods and Experimentation (3 cr.) I643 Field Methods and Experimentation (3 cr.) P: 600. Covers methods appropriate for field experimentation and program evaluation. Topics will include quasi-experimental designs, sampling procedures, and issues associated with program evaluation.

PSY-I 650 Developmental Psychology (3 cr.) I650 Developmental Psychology (3 cr.) Major concepts, principles, and facts concerning the biological and environmental influences on behavioral and psychological development. Particular emphasis on essential principles of ontogenetic development (lifespan) emerging from current research in genetics and psychology.

PSY-I 664 Psychological Assessment in Rehabilitation I (3 cr.) I664 Psychological Assessment in Rehabilitation I (3 cr.) P: consent of instructor. Presentation of general principles of psychological assessment, professional practice, interviewing, intelligence/cognitive assessment, and psychological report writing. Supervised practice in the development of direct service skills in interviewing, behavioral observation, and psychometric assessment of cognitive abilities. Emphasis on functional implications of test results for rehabilitation populations.

PSY-I 665 Intervention I: Counseling Approaches (3 cr.) P: Consent of instructor. Introduces doctoral students to intervention procedures used in rehabilitation psychology. The course has both didactic and clinical skills components, involving traditional counseling interventions, behavior therapy, and biofeedback. Applications to disabled populations will be emphasized.

PSY-I 666 Intervention II: Cognitive Behavioral Interventions (3 cr.) I666 Intervention II: Cognitive Behavioral Interventions (3 cr.) P: consent of instructor. Theory, research, and clinical application of cognitive-behavioral therapy (CBT). Addresses the history and development of CBT, assessment and intake interview process, CBT intervention techniques, and CBT treatment of several disorders. Relevant multicultural issues will also be discussed.

PSY-I 669 Psychological Assessment in Rehabilitation II (3 cr.) I669 Psychological Assessment in Rehabilitation II (3 cr.) P: I664 and consent of instructor. Presentation of psychometric foundations and the basic prediction model in personality/interest assessment. Coverage of the history of personality, assessment, personality development, and supervised clinical practice in personality/interest assessment in rehabilitation. Emphasis on prediction of everyday functioning.

PSY-I 670 Ethical, Legal, and Cultural Issues in Psychology (3 cr.) I670 Ethical, Legal, and Cultural Issues

in Psychology (3 cr.) P: admission to graduate training in psychology or consent of instructor. Exploration of models of ethical decision making. Examination of ethical principles and legal mandates that apply to professional psychology including psychologists' roles in health care service delivery, consultation (clinical and organizational), research, and teaching. Examination of cultural issues, including issues related to ethnicity, age, gender, religion, and sexual orientation.

PSY-I 675 Human Neuropsychology (3 cr.) P: Admission to graduate training in psychology or consent of instructor. Review of essential neuroanatomy, survey of experimental and correlational research methods in the study of brain-behavior relationships, and overview of the history of neuropsychology. Critical examination of neural models for human behavior: hemispheric specialization and integration, sensation/perception, motor skills, language, spatial processing, attention, memory, executive operations, and gender differences.

PSY-I 676 Principles of Clinical Neuropsychology (2 cr.) P: Admission to graduate training in clinical rehabilitation psychology or consent of instructor. Application of theoretical models of brain-behavior relationships to evaluation of patients with suspected nervous system disorders. Review of neuropsychological profiles associated with various neurological and psychiatric disorders. Examination of ethical/cultural issues in neuropsychological evaluation. This course does not provide training in test administration (see PSY I677).

PSY-I 677 Neuropsychological Assessment Lab (1 cr.) I677 Neuropsychological Assessment Lab (1 cr.) P: I664 and I669 and admission to graduate training in clinical rehabilitation psychology. Students must register for I676 concurrently with I677. Training and supervised practice in neuropsychological assessment techniques and procedures. Critical review of the psychometric properties of prevailing assessment tools. Review models of interpretation/reporting. Development of proficiencies in administering prominent neuropsychological tests, neuropsychological interviewing, and writing of reports that integrate multidisciplinary data.

PSY-I 689 Practicum in Clinical Rehabilitation Psychology (3 cr.) I689 Practicum in Clinical Rehabilitation Psychology (3 cr.) P: I549 and consent of instructor. Supervised practice of rehabilitation psychology in a community agency or organization.

PSY-I 691 Seminar in Clinical Rehabilitation Psychology (3 cr.) I691 Seminar in Clinical Rehabilitation Psychology (3 cr.) P: consent of instructor. Current trends, problems, and developments in rehabilitation. Students pursue a special interest and share information and experience with the group. Individual reports and group discussions.

PSY-I 697 Internship in Clinical Psychology (0-9 cr.) I697 Internship in Clinical Psychology (0-9 cr.) P: consent of instructor. Opportunities for application of theory and practice of rehabilitation psychology and case management in a rehabilitation setting under supervision of the Department of Psychology and the agency.

Undergraduate Level

PSY-B 103 Orientation to a Major in Psychology (1 cr.) This course will help students establish goals for their academic experience in three areas: career, relationships, and personal life. They will be introduced to psychological resources on campus, the faculty, and student organizations. They also will make a curriculum plan to meet their learning objectives. Course will no longer be taught after Summer 2012.

PSY-B 104 Psychology as a Social Science (3 cr.) Equiv. to IU PSY P102 and PU PSY 12000. Fall, Spring, Summer. Introduction to scientific method, individual differences, personality, developmental, abnormal, social, and industrial psychology. Course will no longer be taught after Summer 2012.

PSY-B 105 Psychology as a Biological Science (3 cr.) Equiv. to IU PSY P101 and PU PSY 12000. Fall, Spring, Summer. Research methods and content areas of learning, sensation-perception, psychophysiology, motivation, emotions, and statistics. Course will no longer be taught after Summer 2012.

PSY-B 110 Introduction to Psychology (3 cr.) Equiv. to IU PSY P155 and PU PSY 12000. Fall, Spring, Summer. This foundational course introduces students to psychology as a systematic and scientific way to think about the biological and social aspects of behavior and mental processes. Topics include Research Methods, Behavioral Neuroscience, Sensation/Perception, Learning, Memory, Cognition and Language, Motivation/Emotion, Personality, Social, Stress and Health, Psychological Disorders and Treatment, and Life-span Development.

PSY-B 201 Foundations of Neuroscience (3 cr.) P: PSY-B105, PSY-B110 or BIOL-K101. Fall, Spring, Summer. An introduction to neuroscience that explores how our brains develop, how they work, and how they are changed by life experiences. Topics include neural communication, localization of brain function, neural systems, and control of behavior.

PSY-B 203 Ethics and Diversity in Psychology (3 cr.) P: Three (3) credit hours of introductory psychology. Fall, Spring, Summer. This course introduces students to values and professional issues in psychology, with an emphasis on ethics and diversity. Students will learn to recognize the importance of ethical behavior in all aspects of science and practice of psychology and that sociocultural factors and personal biases may shape research and practice.

PSY-B 252 Topics in Psychology (1-3 cr.) B252 Topics in Psychology (1-3 cr.) Topics in psychology and interdisciplinary applications. May be repeated, provided different topics are studied, for a maximum of 4 credit hours.

PSY-B 292 Readings and Research in Psychology (1-3 cr.) P: Consent of instructor. Fall, Spring. Independent readings and research on psychology problems. For freshmen and sophomores only.

PSY-B 303 Career Planning for Psychology Majors (1 cr.) P: Three (3) credit hours of introductory psychology. Equiv. to IU PSY-P 199. Fall, Spring, Summer. Students will explore careers, practice job search skills, and learn about graduate and professional school application processes. Students will utilize resources across campus and in psychology, map an academic and co-curriculuar plan, and develop an understanding of how knowledge gained from the discipline of psychology can be integrated into their career.

PSY-B 305 Statistics (3 cr.) P: Three (3) credits of introductory psychology, and 3 credits of mathematics that carry School of Science credit. Equiv. to IU PSY K300, PSY K310, and PU PSY 20100. Fall, Spring, Summer. Introduction to basic statistical concepts; descriptive statistics and inferential statistics. Introduction to data analytic software.

PSY-B 307 Tests and Measurement (3 cr.) P: Three (3) credit hours of introductory psychology and B305. Equiv. to IU PSY P336 and PU PSY 20200. Overview of statistical foundations of psychological measurement (e.g., test development, norms, reliability, validity). Survey of commonly used assessment instruments (e.g., intelligence/aptitude, personality, academic achievement tests) and applications of psychological testing in different settings (e.g., clinical, industrial/ organizational, school, forensic/legal settings). Recommended for students considering graduate training in clinical, industrial/organizational, school, or related areas of psychology.

PSY-B 310 Life Span Development (3 cr.) Fall, Spring, Summer. Equiv. to PU PSY 23000. Emphasizes the life span perspective of physical and motor, intellectual and cognitive, language, social and personality, and sexual development. Commonalities across the life span, as well as differences among the various segments of the life span, are examined. Theory, research, and practical applications are stressed equally.

PSY-B 311 Research Methods in Psychology (3 cr.) P: Three (3) credit hours of introductory psychology and PSY-B305, or consent of instructor. Equiv. to IU PSY P211, and PU PSY 20300. Fall, Spring, Summer. Introduction to the science of psychology and to the basic research methods that psychologists use to study thoughts, feelings, and behavior. Topics include measurement, research design (descriptive, correlational, experimental), scientific writing, and ethical issues. By the end of the course, you should be ready to design and analyze your own research.

PSY-B 320 Behavioral Neuroscience (3 cr.) P: Three (3) credit hours of introductory psychology. Equiv. to IU PSY P326 and PU PSY 22000. Fall, Spring, Summer. This course focuses on how behavior emerges from the organ that produces it, the brain. Topics include evolution and anatomy of the brain, neurophysiology, how brain networks function, and what happens to behavior when the brain has problems. A better understanding of structure-function relationships within the central and peripheral nervous system will be achieved through examples from human neuropsychology and animal behavior.

PSY-B 322 Introduction to Clinical Psychology (3 cr.) P: Three (3) credit hours of introductory psychology. A survey of various aspects of the practice of clinical psychology from a scientist-practioner perspective. Aspects of the historical framework of clinical psychology will be discussed. In addition, various aspects of the present state of clinical psychology will be covered in addition to directions for the future.

PSY-B 334 Perception (3 cr.) P: Three (3) credit hours of introductory psychology.. Equiv. to IU PSY-P 329 and PU PSY 31000. Consideration of the concepts and research in perception. Relation of sense organ systems to human behavior. Some attention to social and cultural factors.

PSY-B 340 Cognition (3 cr.) P: Three (3) credit hours of introductory psychology. Equiv. to IU PSY-P 335 and PU PSY 20000. Fall, Spring, Summer. A survey of information processing theories from historical antecedents through current theories. Research methodology and theory will be emphasized throughout the discussion of issues such as perception, attention, memory, reasoning, and problem solving.

PSY-B 344 Learning (3 cr.) P: Three (3) credit hours of introductory psychology.. Equiv. to IU PSY-P 325 and PU PSY 31400. History, theory, and research involving human and animal learning and cognitive processes.

PSY-B 346 Theories of Personality (3 cr.) P: Three (3) credit hours of introductory psychology. Equiv. to IU PSY-P 319 and PU PSY 42000. Methods and results of the scientific study of personality, including the development, structure, and functioning of the normal personality.

PSY-B 356 Motivation (3 cr.) P: Three (3) credit hours of introductory psychology. Equiv. to IU PSY-P 327 and PU PSY 33300. Study of motivational processes in human and animal behavior, how needs and incentives influence behavior, and how motives change and develop.

PSY-B 358 Introduction to Industrial/Organizational Psychology (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. Equiv. to IU PSY-P 323 and PU PSY 37200. This course surveys various aspects of behavior in work situations using the scientist-practitioner perspective. Traditional areas covered from personnel psychology include selection, training, and performance appraisal; areas surveyed from organizational psychology include leadership, motivation, and job satisfaction.

PSY-B 360 Child and Adolescent Psychology (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. Equiv. to IU PSY-P 316 and PU PSY 23500. Development of behavior in infancy, childhood, and adolescence, including sensory and motor development and processes such as learning, motivation, and socialization.

PSY-B 365 Health Psychology (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. This course will familiarize students with the study of physical health within the field of psychology. Topics include the relationship between stress and health, health promotion, health behaviors, chronic illness, and the patient-physician relationship. Research methods in health psychology as well as major theories underlying the field will be examined and evaluated. Psychological variables related to physical health will be examined within the framework of these theories. Practical application of constructs will be emphasized through activities and writing assignments.

PSY-B 366 Concepts and Applications in Organizational Psychology (3 cr.) P: PSY-B358 or consent of instructor. Some organizational psychology topics introduced in the I/O psychology survey course are covered in more depth. Advanced information is presented for each topic, and students have the opportunity for several different hands-on applications, including case projects and computer exercises. Example topics are organizational culture, employee attitudes, motivation, and leadership.

PSY-B 368 Concepts and Applications in Personnel Psychology (3 cr.) P: PSY-B358 or consent of instructor.

Some personnel psychology topics introduced in the I/O psychology survey course are covered in more depth. Advanced information is presented for each topic, and students have the opportunity for several different hands-on applications, including case projects and computer exercises. Example topics are job analysis, selection, performance appraisal, and training.

PSY-B 370 Social Psychology (3 cr.) P: Three (3) credit hours of introductory psychology. Equiv. to IU PSY-P 320 and PU PSY 24000. Fall, Spring, Summer. Study of the individual in social situations including socialization, social perception, social motivation, attitudes, social roles, and small group behavior.

PSY-B 375 Psychology and Law (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. This course provides an overview of the U.S. legal system from a behavioral science perspective. Topics include: careers in psychology and law; theories of crime; police investigations and interrogations; eyewitness accuracy; jury decision-making; sentencing; assessing legal competence; insanity and dangerousness; and the psychology of victims.

PSY-B 376 The Psychology of Women (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. Equiv. to IU PSY-P 460 and PU PSY 23900. A survey of topics in psychology as related to the biological, social, and psychological development of women in modern society.

PSY-B 380 Abnormal Psychology (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. Equiv. to IU PSY-P 324 and PU PSY 35000. Various forms of mental disorders with emphasis on cause, development, treatment, prevention, and interpretation.

PSY-B 386 Introduction to Counseling (3 cr.) P: Three (3) credit hours of introductory psychology, PSY-B310, and PSY-B380. This course will help students acquire a repertoire of basic counseling interview skills and strategies and expose students to specific helping techniques. This will be an activity-based course and students will enhance the general-education goals of listening and problem solving.

PSY-B 394 Drugs and Behavior (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. Equiv. to PU PSY 42800. An introduction to psychopharma-cology, the study of drugs that affect behavior, cognitive functioning, and emotions, with an emphasis on drugs of abuse. The course will explore how drugs alter brain function and the consequent effects, as well as the long-term consequences of drug exposure.

PSY-B 396 Alcoholism, and Drug Abuse (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. Provides introduction to the use, misuse, and dependent use of alcohol and other mood-altering drugs. Topics include basic principles of drug action, the behavioral and pharmacological effects of drugs, and the factors that influence use, abuse, and addiction. Addiction assessment, treatment, and treatment outcome also will be covered.

PSY-B 398 Brain Mechanisms of Behavior (3 cr.) P: B320. Spring. An advanced topical survey of the neurobiological basis of behavior, focusing on the neural substrates and the cellular and neurochemical processes underlying emotions, motivation and goal-directed behavior, hedonic experience, learning, and cognitive function. Integrates experimental research across different levels of analysis (genetic, molecular, cellular, neural systems).

PSY-B 420 Humanistic Psychology (3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. A comprehensive survey of the field of humanistic psychology. Explores human experience as a focal point in the study of psychology. Use of didactic and experiential teaching methods.

PSY-B 421 Internship in Psychology (1-3 cr.) P: consent of instructor, B103, B104, B305 and three additional credit hours of psychology. Fall, Spring, Summer. A professional internship that allows students to apply psychological knowledge and skills to a specific work setting, develop work related skills, explore career options and gain experience in a field of interest.

PSY-B 422 Professional Practice (1-3 cr.) P: consent of instructor. Can include a professional internship in the community, peer advising in the psychology advising office, or teaching internship in the department. Faculty mentor must approve and oversee activity. Academic work will be required to earn credit.

PSY-B 433 Capstone Laboratory in Psychology (3 cr.) P: PSY-B305, PSY-B311, and at least two 300-level PSY foundation courses. Fall, Spring. This advanced research course builds on the skills and knowledge students have acquired during their undergraduate education that will enable them to conduct a research project whose purpose is to further develop and consolidate their understanding of psychology as an applied science.

PSY-B 452 Seminar in Psychology (1-3 cr.) P: Three (3) credit hours of introductory psychology or consent of instructor. Topics in psychology and interdisciplinary applications. May be repeated, provided different topics are studied, for a maximum of 6 credit hours.

PSY-B 454 Capstone Seminar in Psychology (3 cr.) P: PSY-B305, PSY-B311, and at least two 300-level PSY foundation courses or consent of instructor. Topics in psychology and interdisciplinary applications, which have been approved to fulfill the capstone course requirement.

PSY-B 462 Capstone Practicum in Industrial/Organizational Psychology (3 cr.) P: B305, B311, B366 or B368 or equivalent, at least two 300 level PSY foundation courses and consent of instructor. Provides students with work experience, one day per week, in local organizations. Practice will be obtained in using the applied skills of industrial psychology to solve actual organizational problems.

PSY-B 482 Capstone Practicum in Clinical Psychology (3 cr.) P: B305, B311, B386, at least two 300-level PSY foundation courses and consent of instructor. Students are placed in a clinical/community setting and gain applied practicum experience working with individuals who have psychological, medical, and/or physical health problems. Relevant multicultural issues will be addressed.

PSY-B 492 Readings and Research in Psychology (1-3 cr.) P: Consent of instructor. P: Consent of instructor. Equiv. to IU PSY-P 495 and PU PSY 39000 and

39100. Fall, Spring, Summer. Independent readings and research on psychological problems.

PSY-B 499 Capstone Honors Research (ARR. cr.) P: PSY-B305, PSY-B311, at least two 300-level PSY foundation courses, and consent of instructor. Equiv. to IU PSY-P 499. Fall, Spring, Summer. Independent readings and research resulting in a research paper.

Statistics

Advanced Undergraduate and Graduate

STAT 51100 Statistical Methods I (3 cr.) P: MATH 16500. Spring. Descriptive statistics; elementary probability; random variables and their distributions; expectation; normal, binomial, Poisson, and hypergeometric distributions; sampling distributions; estimation and testing of hypotheses; one-way analysis of variance; and correlation and regression.

STAT 51200 Applied Regression Analysis (3 cr.) P: 51100. Fall. Inference in simple and multiple linear regression, estimation of model parameters, testing, and prediction. Residual analysis, diagnostics and remedial measures. Multicollinearity. Model building, stepwise, and other model selection methods. Weighted least squares. Nonlinear regression. Models with qualitative independent variables. One-way analysis of variance. Orthogonal contrasts and multiple comparison tests. Use of existing statistical computing package.

STAT 51300 Statistical Quality Control (3 cr.) P: 51100. Control charts and acceptance sampling, standard acceptance plans, continuous sampling plans, sequential analysis, and response surface analysis. Use of existing statistical computing packages.

STAT 51400 Designs of Experiments (3 cr.) P: 51200. Spring. Fundamentals, completely randomized design, and randomized complete blocks. Latin squares, multiclassification, factorial, nested factorial, incom-plete blocks, fractional replications, confounding, general mixed factorial, split-plot, and optimum design. Use of existing statistical computing packages.

STAT 51500 Statistical Consulting Problems (1-3 cr.) P: consent of advisor. Consultation on real-world problems involving statistical analysis under the guidance of a faculty member. A detailed written report and an oral presentation are required.

STAT 51600 Basic Probability and Applications (3 cr.) P: MATH 26100 or equivalent. Fall. A first course in probability intended to serve as a foundation for statistics and other applications. Intuitive background; sample spaces and random variables; joint, conditional, and marginal distributions; special distributions of statistical importance; moments and moment generating functions; statement and application of limit theorems; and introduction to Markov chains.

STAT 51700 Statistical Inference (3 cr.) P: 51100 or 51600. Spring. A basic course in statistical theory covering standard statistical methods and their applications. Includes unbiased, maximum likelihood, and moment estimation; confidence intervals and regions; testing hypotheses for standard distributions and contingency tables; and introduction to nonparametric tests and linear regression.

STAT 51900 Introduction to Probability (3 cr.) P: MATH 26100 or equivalent. Fall. Sample spaces and axioms of probability, conditional probability, independence, random variables, distribution functions, moment generating and characteristics functions, special discrete and continuous distributionsunivariate and multivariate cases, normal multivariate distributions, distribution of functions of random variables, modes of convergence and limit theorems, including laws of large numbers and central limit theorem.

STAT 52000 Time Series and Applications (3 cr.) P: 51900. A first course in stationary time series with applications in engineering, economics, and physical sciences. Stationarity, autocovariance function and spectrum; integral representation of a stationary time series and interpretation; linear filtering; transfer function models; estimation of spectrum; and multivariate time series. Use of existing statistical computing packages.

STAT 52100 Statistical Computing (3 cr.) C: 51200 or equivalent. A broad range of topics involving the use of computers in statistical methods. Collection and organization of data for statistical analysis; transferring data between statistical applications and computing platforms; techniques in exploratory data analysis; and comparison of statistical packages.

STAT 52200 Sampling and Survey Techniques (3 cr.) P: 51200 or equivalent. Survey designs; simple random, stratified, and systematic samples; systems of sampling; methods of estimation; ratio and regression estimates; and costs. Other related topics as time permits.

STAT 52300 Categorical Data Analysis (3 cr.) P: 52800 or equivalent, or consent of instructor. Models generating binary and categorical response data, two-way classification tables, measures of association and agreement, goodness-of-fit tests, testing independence, large sample properties. General linear models, logistic regression, and probit and extreme value models. Loglinear models in two and higher dimensions; maximum likelihood estimation, testing goodness-of-fit, partitioning chi-square, and models for ordinal data. Model building, selection, and diagnostics. Other related topics as time permits. Computer applications using existing statistical software.

STAT 52400 Applied Multivariate Analysis (3 cr.) P: 52800 or equivalent, or consent of instructor. Fall. Extension of univariate tests in normal populations to the multivariate case, equality of covariance matrices, multivariate analysis of variance, discriminant analysis and misclassification errors, canonical correlation, principal components, and factor analysis. Strong emphasis on the use of existing computer programs.

STAT 52500 Intermediate Statistical Methodology (3 cr.) C: 52800 or equivalent, or consent of instructor. Generalized linear models, likelihood methods for data analysis, and diagnostic methods for assessing model assumptions. Methods covered include multiple regression, analysis of variance for completely randomized designs, binary and categorical response models, and hierarchical loglinear models for contingency tables.

STAT 52800 Mathematical Statistics (3 cr.) P: 51900 or equivalent. Spring. Sufficiency and completeness, the exponential family of distributions, theory of point estimation,

Cramer-Rao inequality, Rao-Blackwell Theorem with applications, maximum likelihood estimation, asymptotic distributions of ML estimators, hypothesis testing, Neyman-Pearson Lemma, UMP tests, generalized likelihood ratio test, asymptotic distribution of the GLR test, and sequential probability ratio test.

STAT 52900 Applied Decision Theory and Bayesian Analysis (3 cr.) C: 52800 or equivalent. Foundation of statistical analysis, Bayesian and decision theoretic formulation of problems; construction of utility functions and quantifications of prior information; methods of Bayesian decision and inference, with applications; empirical Bayes; combination of evidence; and game theory and minimax rules, Bayesian design, and sequential analysis. Comparison of statistical paradigms.

MATH 53200 Elements of Stochastic Processes (3 cr.) P: 51900 or equivalent. A basic course in stochastic models including discrete and continuous time processes, Markov chains, and Brownian motion. Introduction to topics such as Gaussian processes, queues and renewal processes, and Poisson processes. Application to economic models, epidemic models, and reliability problems.

STAT 53300 Nonparametric Statistics (3 cr.) P: 51600 or equivalent. Binomial test for dichotomous data, confidence intervals for proportions, order statistics, one-sample signed Wilcoxon rank test, two-sample Wilcoxon test, two-sample rank tests for dispersion, and Kruskal-Wallis test for one-way layout. Runs test and Kendall test for independence, one- and two-sample Kolmogorov-Smirnov tests, and nonparametric regression.

STAT 53600 Introduction to Survival Analysis (3 cr.) P: 51700 or equivalent. Deals with the modern statistical methods for analyzing time-to-event data. Background theory is provided, but the emphasis is on the applications and the interpretations of results. Provides coverage of survivorship functions and censoring patterns; parametric models and likelihood methods, special life-time distributions; nonparametric inference, life tables, estimation of cumulative hazard functions, and the Kaplan-Meier estimator; one- and two-sample nonparametric tests for censored data; and semiparametric proportional hazards regression (Cox Regression), parameters' estimation, stratification, model fitting strategies, and model interpretations. Heavy use of statistical software such as Splus and SAS.

STAT 59800 Topics in Statistical Methods (1-3 cr.) P: consent of instructor. Directed study and reports for students who wish to undertake individual reading and study on approved topics.

STAT 61900 Probability (3 cr.) P: STAT 51900, 52800. Theory Measure theory based course in probability. Topics include Lebesgue measure, measurable functions and integration. Radon-Nikodym Theorem, product measures and Fubini's Theorem, measures on infinite product spaces, basic concepts of probability theory, conditional probability and expectation, regular conditional probability, strong law of large numbers, martingale theory, martingale convergence theorems, uniform integrability, optional sampling theorems, Kolmogorov's Three series Theorem, weak convergence of distribution functions, method of characteristic functions, the fundamental weak compactness theorems, convergence to a normal distribution, Lindeberg's Theorem, infinitely divisible distributions and their subclasses.

STAT 62800 Advanced Statistical Inference (3 cr.) P: STAT 51900, 52800, C: STAT 61900. Real analysis for inference, statistics and subfields, conditional expectations and probability distributions, UMP tests with applications to normal distributions and confidence sets, invariance, asymptotic theory of estimation and likelihood based inference, U-statistics, Edgeworth expansions, saddle point method.

STAT 63800 Stochastic Processes I (pending approval) (3 cr.) P: STAT 61900. Advanced topics in probability theory which may include stationary processes, independent increment processes, Gaussian processes; martingales, Markov processes, ergodic theory.

STAT 63900 Stochastic Processes II (pending approval) (3 cr.) P: STAT 63800. This is the continuation of STAT 63800. We will concentrate on specific chapters from the textbook, including Ch VI-IX (Local Times, Generators, Girsanov's theorem, Stochastic Differential Equations). Some material from another textbook (Karatzas and Shreve, Brownian Motion and Stochastic Calculus), and the instructor's own work, may also be used, especially to cover Feynman-Kac formulas and the connection to PDEs and Stochastic PDEs. New topics not treatable using martingales will also be investigated, include stochastic integration with respect to Fractional Brownian Motion and other, more irregular Gaussian processes; anticipative stochastic calculus; Gaussian and non-Gaussian regularity theory.

STAT 69500 Seminar in Mathematical Statistics (pending approval) (1-3 cr.) P: Consent of advisor. Individual Study that meets 3 times per week for 50 minutes per meeting for 16 weeks.

STAT 69800 Research M.S. Thesis (6 cr.) P: consent of advisor. M.S. thesis in applied statistics.

STAT 69900 Research Ph.D. Thesis (pending approval) (1-18 cr.)

Undergraduate

STAT 11300 Statistics and Society (3 cr.) Fall, spring. Intended to familiarize the student with basic statistical concepts and some of their applications in public and health policies, as well as in social and behavioral sciences. No mathematics beyond simple algebra is needed, but quantitative skills are strengthened by constant use. Involves much reading, writing, and critical thinking through discussions on such topics as data ethics, public opinion polls and the political process, the question of causation the role of government statistics, and dealing with chance in everyday life. Applications include public opinion polls, medical experiments, smoking and health, the consumer price index, state lotteries, and the like. STAT 11300 can be used for general education or as preparation for later methodology courses.

STAT 19000 Topics in Statistics for Undergraduates (1-5 cr.) Supervised reading course or special topics course at the freshman level. Prerequisites and course material vary with the topic.

STAT 29000 Topics in Statistics for Undergraduates (1-5 cr.) Supervised reading course or special topics course

at the sophomore level. Prerequisites and course material vary with the topic.

STAT 30100 Elementary Statistical Methods I (3 cr.) P: MATH 11000 or 11100 (with a minimum grade of C-) or equivalent. Not open to students in the Department of Mathematical Sciences. Fall, spring, summer. Introduction to statistical methods with applications to diverse fields. Emphasis on understanding and interpreting standard techniques. Data analysis for one and several variables, design of samples and experiments, basic probability, sampling distributions, confidence intervals and significance tests for means and proportions, and correlation and regression. Software is used throughout.

STAT 35000 Introduction to Statistics (3 cr.) P: MATH 16500 or equivalent. Fall, spring. A data-oriented introduction to the fundamental concepts and methods of applied statistics. The course is intended primarily for majors in the mathematical sciences (mathematics, actuarial sciences, mathematics education). The objective is to acquaint the students with the essential ideas and methods of statistical analysis for data in simple settings. It covers material similar to that of 51100 but with emphasis on more data-analytic material. Includes a weekly computing laboratory using Minitab.

STAT 37100 Prep for Actuarial Exam I (2 cr.) This course is intended to help actuarial students prepare for the Actuarial Exam P.

STAT 39000 Topics in Statistics for Undergraduates (1-5 cr.) Supervised reading course or special topics course at the junior level. Prerequisites and course material vary with the topic.

STAT 41600 Probability (3 cr.) P: MATH 26100 or equivalent. Not open to students with credit in 31100. Fall. An introduction to mathematical probability suitable as preparation for actuarial science, statistical theory, and mathematical modeling. General probability rules, conditional probability, Bayes theorem, discrete and continuous random variables, moments and moment generating functions, continuous distributions and their properties, law of large numbers, and central limit theorem.

STAT 41700 Statistical Theory (3 cr.) P: 41600. C: 35000 or equivalent. Spring. An introduction to the mathematical theory of statistical inference, emphasizing inference for standard parametric families of distributions. Properties of estimators. Bayes and maximum likelihood estimation. Sufficient statistics. Properties of test of hypotheses. Most powerful and likelihood-ratio tests. Distribution theory for common statistics based on normal distributions.

STAT 47200 Actuarial Models I (3 cr.) P: 41700 or equivalent. Fall. Mathematical foundations of actuarial science emphasizing probability models for life contingencies as the basis for analyzing life insurance and life annuities and determining premiums. This course, together with its sequel, 47300, provides most of the background for Course 3 of the Society of Actuaries and the Casualty Actuarial Society.

STAT 47300 Actuarial Models II (3 cr.) P: 47200. Spring. Continuation of 47200. Together, these courses cover contingent payment models, survival models, frequency and severity models, compound distribution models, simulation models, stochastic process models, and ruin models.

STAT 49000 Topics in Statistics for Undergraduates (1-5 cr.) Supervised reading and reports in various fields.

IU School of Social Work

Welcome to the IU School of Social Work!

The following mission statement was adopted by the School Assembly on April 4, 2008. In shaping its curriculum, the BSW program draws on the intent and concepts of the mission.

Vision Statement: An exemplary university and community-based collaboration advancing social and economic justice, empowerment, and human well-being in a changing global landscape.

Mission Statement: The mission of the IUSSW is excellence in education, research and service to promote health, well-being, and social and economic justice in a diverse world.

As of July 1, 2007, the Division of Labor Studies merged into the School of Social Work to become the fourth academic program under the auspices of the School. The Labor Studies Program is a system wide program, offering academic programs on six of the Indiana University campuses, and it has a social justice mission that is compatible with Social Work.

Policy on Nondiscrimination

Based on the tradition of the social work profession and consistent with Indiana University's Equal Opportunity Policy, the Indiana University School of Social Work affirms and conducts all aspects of its teaching, scholarship, and service activities without discrimination on the basis of race, color, gender, socioeconomic status, marital status, national or ethnic origin, age, religion or creed, disability, and political or sexual orientation.

The School of Social Work has a strong commitment to diversity and nondiscrimination. Indeed, diversity is celebrated as strength. This perspective demonstrates the composition of its faculty and student body, curriculum content, and recruitment and retention activities; by participation in university committees dealing with oppressed populations; by numerous service activities, including advocacy on behalf of the disadvantaged; and by its selection of field practicum sites.

Overview

History

Indiana University has a long history of providing preparation for entry into social work practice. Courses in this area were offered in 1911 through the Department of Economics and Sociology. Between 1911 and 1944, various administrative and curricular changes were put into effect, and degree programs at both the undergraduate and graduate levels were offered. In 1944, the Indiana University Division of Social Service was established by action of the Trustees of Indiana University. The organizational status was changed in 1966 when the Graduate School of Social Service was created. In 1973, the name was changed to School of Social Service in recognition of the extent and professional nature of the school's graduate and undergraduate offerings. It became the School of Social Work in 1977 to reflect a clearer identification with the profession.

The School offers the following social work degrees: baccalaureate, masters, and doctoral degrees. The Bachelor of Social Work (B.S.W.) Program prepares students for generalist social work practice; the Master of Social Work (M.S.W.) Program prepares graduate students for advanced social work practice in an area of specialization; and the Doctoral (Ph.D.) Program prepares professional social workers for leadership roles in research, education, and policy development.

Although the degree programs vary in their emphases and levels of complexity, the school's curricula embody features that are systemic in their educational effects:

1. The total curriculum articulates the relationship of the undergraduate and graduate levels as components of a continuum in education for providing social services.
2. The mechanisms of instruction provide opportunities for a range of experiences in substantive areas of interest to students and of importance to society.
3. The curriculum focuses on problem-solving and strength-enhancing experiences; involving the classroom, learning resources laboratory, and field experience.
4. The excellent library and technology resources offer opportunities for social work students to become effective users of social science information.
5. An array of individual and educational procedures optimizes effective training; including rigorous accreditation and innovative teaching/learning approaches.

The School also offers the following Labor Studies degrees: baccalaureate, associate, certificate and minor. The Labor Studies program offers courses on all I.U. campuses and all Labor Studies courses are available online, many in the compressed (8 week) course format.

While the school is headquartered in Indianapolis, it also offers the B.S.W., Labor Studies, and M.S.W. degrees on other IU campuses: Bloomington, Fort Wayne (IPFW), Gary (IU Northwest), Richmond (IU East), and South Bend. It also delivers B.S.W. courses on the

Columbus and Kokomo campuses. Reference to some of these offerings will be made in the text that follows.

Graduates of the school move into a broad variety of social service settings. These include those concerned with aging, family and child welfare, corrections, mental and physical health, communities, political change and analysis, and school adjustment, union leadership, and human resources management. In anticipation of such professional activities, the school provides field instruction placements throughout the state where students engage in services to individuals, groups, families, and communities or function in planning and management roles.

The Council on Social Work Education (CSWE) accredits both the Bachelor of Social Work and Master of Social Work Programs. The school is a member of the International Association of Schools of Social Work. The school's administrators are active participants in the National Association of Deans and Directors of Schools of Social Work, the Association of Baccalaureate Social Work Program Directors and the Group for the Advancement of Doctoral Education, among others.

Ph.D.

Courses

In the following course listings, the abbreviation "P" refers to prerequisite and "C" indicates core requisite courses. This bulletin lists only prerequisite and core requisite social work courses. A list of the specific prerequisite and core requisite courses from the general and supportive area requirements needed for social work courses can be requested from the B.S.W. program office on the campus of your choice. The number of hours of credit given to a course is indicated in parentheses following the course title.

Bachelor of Social Work

The following course listing includes B.S.W. required courses and selected elective courses.

SWK-S 100 Understanding Diversity in a Pluralistic Society (3 cr.) Theories and models that enhance understanding of our diverse society. This course provides content about differences and similarities in the experiences, needs, and beliefs of selected minority groups and their relation to the majority group.

SWK-S 141 Introduction to Social Work (3 cr.) Examination of characteristics, function, and requirements of social work as a profession. Emphasis on ideological perspectives of the profession and the nature of professional function and interaction.

SWK-S 180 Exploring Child Welfare in Indiana (3 cr.) Provides a comprehensive overview of the child welfare system, with special emphasis on current child protection and child welfare services in Indiana. Students have the opportunity to explore careers working with children and families in the child welfare system. This course is a service learning course with a required component of a minimum of twenty hours of volunteer work in an identified social service agency in the child welfare system.

SWK-S 200 Introduction to Case Management (3 cr.) Explores current models of case management. It addresses emerging case manager's functions and roles within the contemporary network of human services. This is a required course to fulfill requirements for the Certificate on Case Management. It may also be taken as an elective.

SWK-S 221 Human Behavior and Social Environment I: Individual Functioning (3 cr.) P: S141 or consent of instructor. Understanding of human behavior and the social environment as a basis for social work practice. Focuses on understanding the interaction between person and environment. Coverage of major theories of individual functioning, life cycle development, and the family context. Exploration of inequality, discrimination, and differential access to opportunities for diverse populations.

SWK-S 231 Generalist Social Work Practice I: Theory and Skills (3 cr.) P or C: S221. Development of a critical understanding of social work practice. It focuses on the beginning phase of the helping process and related skills. Topics include the nature of the helping relationship, NASW Code of Ethics, practice as it relates to oppressed groups, assessment, and practice evaluations.

SWK-S 251 Emergence of Social Services (3 cr.) P: S141 or consent of the instructor. Examination of the evolution of social services in response to human needs and social problems as related to economic, political, and social conditions.

SWK-S 280 Introduction to Field Experience (1-3 cr.) P: consent of the instructor. Introductory field experience for testing interest in a social work career. It is also required for non-social work students pursuing the Case Management Certificate.

SWK-S 300 Computer Technology for Social Workers (3 cr.) Broad overview of computer software applications and Internet and World Wide Web, with an emphasis on their utilization in the social work profession. Ethical and social implications of computer technology for the social work profession, highlighting considerations specific to at-risk populations. Students may use this course to fulfill the computer course requirement or they may take it as an elective.

SWK-S 300 Crisis Intervention (3 cr.) Focuses on the increasing number of complex and painful personal, couple, family, and community crisis situations human service providers encounter in the course of service delivery. This is a required course to fulfill requirements for the Certificate on Case Management. It may also be taken as an elective.

SWK-S 300 Developmental Issues for Gay, Lesbian, and Bisexual People (3 cr.) Gay, lesbian, and bisexual (GL&B) people constitute an important presence in American society. They are denied full participation in a wide range of social institutions including family life, religion, education, employment, recreation, the military and many others. Serious issues related to lack of legal protection, violence, and limited political representation is analyzed.

SWK-S 300 Statistical Reasoning in Social Work Practice (3 cr.) Introductory statistics course is designed for students who wish to master some very important tools used by contemporary social work practitioners to better understand the world of practice. The primary purpose of the course is to enable students to gain an understanding of the basic principles that guide statistical reasoning, especially as they relate to making informed decisions about the quantitative aspects of their practice. Students will learn how to collect and organize data, examine it for patterns and relationships, and analyze it for purposes of drawing plausible and defensible conclusions.

SWK-S 300 Global Society: Human, Economic, Social, and Political Issues (3 cr.) The purpose of this course is to examine a range of issues including human rights, distribution of wealth, ethnic diversity, and social development, within the context of global interdependence. Problems of global poverty, social injustice, and inequality will receive special attention. These areas will be examined utilizing empowerment, strengths, and multicultural perspectives.

SWK-S 300 Working with Families (3 cr.) Exploration of family relationships and roles in the twenty-first century. Examination of challenges encountered by families across the family life cycle. This is a required course to fulfill requirements for the Certificate in Family Life Education. It may also be taken as an elective. Also available online at IUPUI.

SWK-S 300 Family Life Education (3 cr.) An understanding of the general philosophy and broad principles of family life education in conjunction with the ability to plan, implement, and evaluate such educational programs. This is a required course to fulfill requirements for the Certificate in Family Life Education. It may also be taken as an elective.

SWK-S 300 Sel Topics in Social Work (3 cr.)

SWK-S 322 Human Behavior and Social Environment II: Small Group Functioning (3 cr.) P: S221. Examination of the significance of the small group as context and means for social development of individuals and as agent of change in the social environment. Discussion of the individual as a member of a variety of groups, including the family. The

course considers the formal organization as a composite of groups.

SWK-S 323 Organization Behavior and Practice within a Generalist Perspective (3 cr.) P or C: S322. This course provides a theoretical and conceptual foundation on community and formal organizations necessary to social work practice. Topics include conceptual approaches for understanding communities and organizations; community research; institutional discrimination; distribution of community resources; and power and control as they relate to oppressed groups.

SWK-S 332 Generalist Social Work Practice II: Theory and Skills (3 cr.) P: S231and S251; P or C: S352; C: S381. Examination of middle and ending phases of the helping process and related skills. Topics include the helping relationship with various client system sizes; impact of agency policies and procedures upon practice and resolution of clients' problems; and practice evaluation.

SWK-S 352 Social Service Delivery Systems (3 cr.) P: S251. Examination of policies, structures, and programs of service delivery systems at local, regional, and national levels with emphasis on relations among such systems as formal organizations. Students acquire knowledge of the policy development process, which helps them establish beginning capacity for policy analysis and policy practice.

SWK-S 371 Social Work Research (3 cr.) P: junior standing. Examination of basic research methods in social work, the relevance of research for social work practice, and the selection of knowledge for use in social work.

SWK-S 381 Social Work Practicum I (4 cr.) P: S231 and S251; P or C: S352; C: S332. Guided field practice experience (12 hours per week) for application of generalist practice concepts and principles and the development of basic practice skills. Students are to intern in a human service organization for a minimum of 240 clock hours, which includes a bimonthly seminar.

SWK-S 400 Developmental Issues for Gay, Lesbian, and Bisexual People (3 cr.) Gay, lesbian, and bisexual (GL&B) people constitute an important presence in American society. They are denied full participation in a wide range of social institutions including family life, religion, education, employment, recreation, the military and many others. Serious issues related to lack of legal protection, violence, and limited political representation is analyzed.

SWK-S 400 Global Society: Human, Economic, Social, and Political Issues (3 cr.) The purpose of this course is to examine a range of issues including human rights, distribution of wealth, ethnic diversity, and social development, within the context of global interdependence. Problems of global poverty, social injustice, and inequality will receive special attention. These areas will be examined utilizing empowerment, strengths, and multicultural perspectives.

SWK-S 400 Family Life Education (3 cr.) An understanding of the general philosophy and broad principles of family life education in conjunction with the ability to plan, implement, and evaluate such educational programs. This is a required course to fulfill requirements for the Certificate in Family Life Education. It may also be taken as an elective.

SWK-S 400 Practicum Seminar (1 cr.) P: all junior-level social work courses. C: S433, S472, and S482. Discussion of practice issues as experienced in S482.

SWK-S 400 Special Tpcs in Fields of Prac (1-6 cr.)

SWK-S 433 Community Behavior and Practice within a Generalist Perspective (3 cr.) P: all junior-level social work courses. C: S400, S472, and S482. This course provides the theoretical foundation about community functioning and behavior and the knowledge and skills of community interventions geared to mitigate social, political, and

economic injustice and bring social change.

SWK-S 442 Practice-Policy Seminar in Fields of Practice (3 cr.) 2 courses required P: S433, S472, and S482. Addresses practice and policy issues in specific fields of practice such as child and family, aging, addictions, and developmental disabilities.

SWK-S 472 Practice Evaluation (3 cr.) P: S371 and all other junior-level social work courses. C: S433 and S482. Develops the knowledge and skills necessary for students to evaluate their own practice with individuals, groups, communities, and organizations. The use of selected software is explored.

SWK-S 482 Social Work Practicum II (5 cr.) P: all junior-level social work courses. C: S433 and S472. Guided field practice experience (20 hours per week) for application of concepts and principles and development of skills for generalist practice with selected social systems. Students are to practice in a human service organization for a minimum of 320 clock hours.

SWK-S 490 Independent Study (1-6 cr.) P: permission of instructor. An opportunity to engage in a self-directed study of an area related to the school's curriculum in which no formal course is available.

Labor Studies

Advanced Courses

LSTU-L 314 Ethical Dilemmas in the Workplace (3 cr.) This courses explores the ethical decision-making and behavior in a unionized workplace, based on the values and social justice mission of unions. Students will examine what constitutes ethical standards on issues such as affirmative action, transparency, membership involvement, and democratic procedures. This includes the philosophical and theoretical bases for ethics and discussions on the relationship between law and ethics in dealing with workplace conflict.

LSTU-L 315 The Organization of Work (3 cr.) This course examines how work is organized and how jobs are evaluated, measured, and controlled. It explores social and technical elements of work through theories of scientific management, the human relations school of management, and contemporary labor process literature.

LSTU-L 320 Grievance Arbitration (3 cr.) P: Recommended only after L220 or with permission of instructor. This course explores the legal and practical context of grievance arbitration, and its limitations and advantages in resolving workplace problems. Varieties of arbitration clauses and the status of awards are also explored. Students analyze research, prepare, and present cases in mock arbitration hearings.

LSTU-L 330 Global Compars: Exples 3 Conts (3 cr.)

LSTU-L 350 Issues in Collective Bargaining (3 cr.) This course includes readings and discussions on selected problems. A research paper is usually required.

LSTU-L 360 Union Administration and Development (1-3 cr.) This is course covers practical and theoretical perspectives on strategic planning, budgeting, and organizational decision making. It addresses the needs and problems of union leaders by studying organizational change, staff development, and cohesiveness within a diverse workforce. This course may be repeated for up to 3 credits with department approval.

LSTU-L 370 Labor and Religion (3 cr.) This course examines the relationship between religion and the labor movement as it has developed in the United States over the course of the 19th and 20th centuries. Students will analyze the approach taken by religious institutions concerning workers' issues and assess the tradition in which workers of faith connect to more secular concerns for social and economic justice.

LSTU-L 380 Theories of the Labor Movement (3 cr.) This course examines various perspectives on the origin, development, and goals of organized labor. Theories include those that view the labor movement as a business union institution, an agent for social reform, a revolutionary force, a psychological reaction to industrialization, a moral force, and an unnecessary intrusion.

LSTU-L 385 Class, Race, Gender, and Work (3 cr.) This course provides a historical overview of the impact and interplay of class, race, and gender on shaping U.S. labor markets, organizations, and policies. It examines union responses and strategies for addressing class, race, and gender issues.

LSTU-L 390 Topics in Labor Studies (3 cr.)

LSTU-L 420 Labor Studies Internship (1-6 cr.) This course applies classroom knowledge in the field. L420 may be repeated for a maximum of 6 credit hours.

LSTU-L 430 Labor Research Methods (3 cr.) This course focuses on the study of research design, methods, techniques, and procedures applicable to research problems in labor studies.

LSTU-L 480 Senior Seminar or Readings (3 cr.) This course can be used as a classroom seminar or directed reading course. It addresses current issues, historical developments, and other labor-related concerns. Topics may vary each semester.

LSTU-L 490 Topics in Labor Studies (1-3 cr.) This is a variable-title course. L490 can be repeated for credit with different subjects. The transcript will show a different subtitle each time the course is taken. Some courses focus on contemporary or special areas of labor studies. Others are directed toward specific categories of employees and labor organizations. Inquire at Labor Studies offices.

LSTU-L 495 Directed Labor Study (1-6 cr.) This is a variable credit course. L495 may be repeated for a maximum of 6 credit hours. Students arrange to study with an individual labor studies faculty member, designing a course of study to suit their individual and varied needs and interests. The contract might include reading, directed application of prior course work, tutorials, or internships. Competencies are assessed through written papers, projects, reports, or interviews.

LSTU-L 499 Self-Acquired Competency in Labor Studies (1-15 cr.) See description in this bulletin for a description of self-acquired competency.

Core Courses

The courses are divided between core courses (all 100- and 200-level courses, except L199, L290, and L299) and advanced courses (300-400 level).

LSTU-L 100 Survey of Unions and Collective Bargaining (3 cr.) This course includes coverage of historical development, labor law basics, and contemporary issues. It also discusses a survey of labor unions in the United States; focusing on their organization and their representational, economic, and political activities.

LSTU-L 101 American Labor History (3 cr.) This course explores the struggles of working people to achieve dignity and security from social, economic, and political perspectives. It also explores a survey of the origin and development of unions and the labor movement from colonial times to the present.

LSTU-L 104 Labor History (3 cr.) This course serves as an orientation for the study of labor history. It explores both critical and historical methodologies based on primary and secondary sources, biases, and interpretations. Discussions focus on selective questions and events.

LSTU-L 110 Introduction to Labor Studies: Labor and Society (3 cr.) This course introduces students to the interdisciplinary and advocacy approach of labor studies. Exploring labor's role in society, the class will look at how unions have changed the lives of working people and contributed to better social policies. Discussions will highlight the relationship of our work lives to our non-work lives and will look at U.S. labor relations in a comparative framework.

LSTU-L 190 The Labor Studies Degree (1 cr.) Required for all Labor Studies program majors. This course provides an introduction to the Labor Studies degree and to the knowledge and skills needed by students to progress toward a degree in a reasonable time frame. Students will learn how to build a plan of study that takes advantage of both credit for prior learning and new learning opportunities.

LSTU-L 199 Portfolio Development Workshop (1 cr.) Emphasis for this course is placed on developing learning portfolios as foundation documents for academic self-assessment and planning and as applications for self-acquired competency (SAC) credit. This course applies only as elective credit to labor studies degrees.

LSTU-L 200 Survey of Employment Law (3 cr.) This course explores statutes and common-law actions protecting income, working conditions, and rights of workers. Topics include workers' compensation, unemployment compensation, fair labor standards, Social Security, retirement income protection, and privacy and other rights.

LSTU-L 201 Labor Law (3 cr.) This course reviews a survey of the law governing labor-management relations. Topics include the legal framework of collective bargaining, problems in the administration and enforcement of agreements, and protection of individual employee rights.

LSTU-L 203 Labor and the Political System (3 cr.) This course examines federal, state, and local governmental effects on workers, unions, and labor-management relations; political goals; influences on union choices of strategies and modes of political participation, past and present; relationships with community and other groups.

LSTU-L 205 Contemporary Labor Problems (3 cr.) This course examines some of the major problems confronting society, workers, and the labor movement. Topics may include automation, unemployment, international trade, environmental problems, minority and women's rights, community relations, and changing government policies.

LSTU-L 210 Workplace Discrimination and Fair Employment (3 cr.) This course examines policies and practices that contribute to workplace discrimination and those designed to eliminate it. It explores effects of job discrimination and occupational segregation. It analyzes Title VII, the Americans with Disabilities Act, and related topics in relation to broader strategies for addressing discrimination.

LSTU-L 220 Grievance Representation (3 cr.) This course looks at union representation in the workplace. It evaluates uses of grievance procedures to address problems and administer the collective bargaining agreement. It also explores analyses of relevant labor law and the logic applied by arbitrators to grievance decisions. Students learn about the identification, research, presentation, and writing of grievance cases.

LSTU-L 230 Labor and the Economy (3 cr.) This course analyses aspects of the political economy of labor and the role of organized labor within it. It emphases the effect on workers, unions, collective bargaining of unemployment, investment policy, changes in technology and corporate structure. It also explores patterns of union political and bargaining responses.

LSTU-L 240 Occupational Health and Safety (3 cr.) This course reviews elements and issues of occupational health and safety. It emphases the union's role in the implementation of workplace health and safety programs, worker and union rights, hazard recognition techniques, and negotiated and statutory remedies-in particular the OSHA Act

of 1970.

LSTU-L 250 Collective Bargaining (3 cr.) This course emphasizes development and organization of collective bargaining in the United States, including union preparation for negotiations; bargaining patterns and practices; strategy and tactics; economic and legal considerations.

LSTU-L 251 Collective Bargaining Laboratory (1-3 cr.) This course provides collective bargaining simulations and other participatory experiences in conjunction with L250. L250 is either a prerequisite or a corequisite.

LSTU-L 255 Unions in State and Local Government (3 cr.) This course explores union organization and representation of state and municipal government employees, including patterns in union structure, collective bargaining, grievance representation, and applicable law.

LSTU-L 260 Leadership and Representation (3 cr.) This course evaluates organizational leadership issues for union, community, and other advocate organizations. It analyzes leadership styles, membership recruitment, and leadership development. It examines the role of leaders in internal governance and external affairs, including committee building, delegation, negotiations, and coalition building.

LSTU-L 270 Union Government and Organization (3 cr.) This course provides an analysis of the growth, composition, structure, behavior, and governmental processes of U.S. labor organizations, from the local to the national federation level. It considers the influence on unions of industrial and political environments; to organizational behavior in different types of unions; and to problems in union democracy.

LSTU-L 280 Union Organizing (3 cr.) This course explores various approaches and problems in private- and public-sector organizing. Traditional approaches are evaluated in light of structural changes in labor markets and workforce demographics. Topics range from targeting and assessments to committee building and leadership development.

LSTU-L 285 Assessment Project (1 cr.) This is a capstone experience for associate degree students.

LSTU-L 290 Topics in Labor Studies (1-3 cr.) This is a variable-title course. L290 can be repeated for credit with different subjects. The transcript will show a different subtitle each time the course is taken. Some courses focus on contemporary or special areas of labor studies. Others are directed toward specific categories of employees and labor organizations. Inquire at Labor Studies offices.

LSTU-L 299 Self-Acquired Competency in Labor Studies (1-15 cr.) See this bulletin for a description of Self-Acquired Competency.

M.S.W. Courses

SWK-S 501 Professional Social Work at the Master's Level: An Immersion (3 cr.) This foundation course provides an overview of social work, including the definition, scope, history, ethics, and values of the profession. This course will provide basic orientation to the available resources and expectations of graduate education in general and the M.S.W. Program, in particular, all within the framework of the adult learner model. Students will develop basic communication, self-assessment, and reflection skills necessary for success in the M.S.W. Program. Students will have an opportunity to survey various fields of practice and will begin to identify personal learning goals for their M.S.W. education as well as develop a commitment to lifelong learning as a part of professional practice.

SWK-S 502 Research I (3 cr.) This foundation research course assists students in developing the knowledge, skills, and values necessary to evaluate the effectiveness of social work practice. Emphasis is placed on knowledge of qualitative and quantitative

designs, methodologies, and techniques that inform students of best practices in social work. Students will recognize the impact of ethnicity, gender, age, and sexual orientation on the research process and be able to critically review published studies with attention to researcher bias.

SWK-S 503 Human Behavior in the Social Environment I (3 cr.) This course provides content on the reciprocal relationships between human behavior and social environments. It includes empirically based theories and knowledge that focus on the interactions between and within diverse populations of individuals, groups, families, organizations, communities, societal institutions, and global systems. Knowledge of biological, psychological, sociological, cultural, and spiritual development across the lifespan is included. Students learn to analyze critically micro and macro theories and explore ways in which theories can be used to structure professional activities. Concepts such as person-in-environment are used to examine the ways in which social systems promote or deter human well-being and social and economic justice.

SWK-S 504 Professional Practice Skills I (3 cr.) This foundation practice course focuses on basic generalist theory and skills that are necessary when working with a wide variety of client systems: individuals, families, small groups, communities, and organizations. Students are expected to demonstrate competent use of the following skills: attending, establishing rapport, reflecting, summarizing, exploring, questioning, contracting, and establishing clear well-formed goals. In this course students will have opportunities to continue learning about themselves and will examine their personal values and any conflict between personal and professional values so the professional practice standards can be upheld.

SWK-S 505 Social Policy Analysis and Practice (3 cr.) This foundation policy course will focus on using several policy analysis frameworks to analyze current social policies and programs both at the state and federal levels and to develop policies that increase social and economic justice. Students will be expected to develop a range of policy practice skills to influence policy development within legislative, administrative, community, political, and economic arenas.

SWK-S 513 Human Behavior and the Social Environment II (3 cr.) This course builds upon S503 and focuses on developing further knowledge of human behavior theories and their application to practice. Students will link course content to the concentration that the student has selected.

SWK-S 514 Practice with Individuals, Families and Groups I (3 cr.) This course builds on the practice theories, principles, and skills introduced in S504 to prepare students for competent social work practice with individuals and families. A strengths perspective will be emphasized, and students will be introduced to the fundamental components of the task-centered and solution-focused approaches to practice. The transtheoretical model of change will be presented, and students will develop skills that will empower individuals and families to engage in the process of change. Students will be prepared to complete assessments and to use intervention skills that will serve diverse populations with specific attention to gender, class, race, and ethnicity.

SWK-S 515 Social Policy and Services II (3 cr.) A group of courses covering topics or content including social problems, special populations, particular social service delivery areas, and social indicators that predict areas of future social policy transformations.

SWK-S 516 Practice with Organizations, Communities, and Societies II (3 cr.) This course is concerned with helping communities and other social units to empower themselves and eradicate oppressive situations and practices through networking, political participation, leadership development, mobilization, utilization of resources, and other strategies and techniques.

SWK-S 517 Assessment in Mental Health and Addictions (3 cr.) Recognizing the

social, political, legal, and ethical implications of assessment, students enrolled in this course critically examine various conceptual frameworks and apply bio-psychosocial and strengths perspectives to understand its multidimensional aspects. Students learn to conduct sophisticated mental status and lethality risk interviews, engage in strengths and assets discovery, and apply the Diagnostic and Statistical Manual of the American Psychiatric Association and other classification schemes in formulating assessment hypotheses. They gain an understanding of the application of several relevant assessment instruments and learn to evaluate their relevance for service to at-risk populations, including persons affected by mental health and addictions issues. Students learn to collaborate with a diverse range of consumers and other professionals in developing meaningful assessments upon which to plan goals, intervention strategies, and means for evaluation.

SWK-S 555 Social Work Practicum I (3 cr.) The M.S.W. Social Work Practicum I is an educationally directed practice experience under the direct supervision of an approved field instructor. The assigned faculty liaison oversees the practicum to ensure that course objectives have been met. The practicum provides opportunities for the application and integration of classroom concepts and principles for the development of core skills in generalist social work practice with selected social systems using a strengths perspective. It builds upon the knowledge and skills learned and developed during the immersion and intermediate course work of the program. Learning opportunities emphasize the values and ethics of the profession, foster the integration of empirical and practice-based knowledge, and promote the development of professional competence. Field education is systematically designed, supervised, coordinated, and evaluated on the basis of criteria by which students demonstrate the achievement of program objectives. The Field Practice Seminar is designed to assist students in integrating classroom learning with the experience of an internship. Students will also be introduced to assessment systems including the DSM and SWOT. The seminar provides a supportive setting for students to discuss practice issues raised in the field placement related to their Learning Agreement and field experience. This involves recognizing/exploring professional and personal biases, discussing ethical dilemmas and supervisory issues, and increasing cross-cultural competencies.

SWK-S 600 Elective (3 cr.) Electives Vary in subject matter. Scheduling of these courses will be announced prior to semester registration.

SWK-S 616 Social Work Practice in Schools (3 cr.) This advanced level practice course is designed to provide students with an overview of contemporary social work practice in school settings. Specific topical areas include the historical and contemporary contexts of social work service in school settings, legal mandates for social work practice in schools, social policies and trends in education affecting school settings and social work practice in schools, preventive and intervention methods and roles applicable to diverse populations in school settings, research issues and practice effectiveness, and multiculturalism and diversity issues in social work practice in schools.

SWK-S 618 Social Policy and Services (3 cr.) A group of courses covering topics or content including social problems, special populations, particular social service delivery areas, and social indicators that predict areas of future social policy transformations.

SWK-S 619 Social Work Practice with Children and Adolescents (3 cr.) This course is designed to develop and broaden student knowledge and skill in direct practice with children and adolescents. Social work practice will be examined within the context of meta-frameworks that include developmental stages/tasks, sexual development and orientation, gender issues, family context, culture, larger environmental systems, discrimination/oppression, and legal rights and responsibilities. Emphasis will be placed on practice methods including assessment, interviewing, comparative treatment models, and practice with special populations.

SWK-S 623 Practice Research Integrative Seminar I (3 cr.) This course furthers the knowledge, skills, and values students develop in the foundation-year research course. Students will apply their knowledge and skills in research to evaluate practice or program effectiveness in their concentrations, using research methods that are sensitive to consumers' needs and clients' race, ethnicity, gender, sexual orientation, and additional aspects important to effective and ethnicity research.

SWK-S 632 Child Welfare Practice I: Working with Children Impacted by Violence in the Family (3 cr.) This course is designed to provide practice skills for students working with children and families impacted by abuse, neglect, or family violence. The course is designed to cover the scope, causes, and consequences of child physical, emotional, and sexual abuse and neglect and applications of this knowledge in a wide range of settings that deal with children and families as well as formal child protection services. Students will learn about the dynamics and indicators of maltreatments, etiology of child abuse and neglect, assessing risk, the continuum of intervention from prevention through intervention and future planning, out-of-home placement considerations, and the issues impacting particular oppressed and underserved populations. The focus of this course will be on how to work effectively with clients to achieve the goals of safety, permanency, and well-being.

SWK-S 633 Child Welfare Practice II: Working with Diverse and Transitioning Families (3 cr.) This course will focus on the experiences of children and families in the child welfare system. Content will include interventions with families through all stages of change including preparation for change, separation and loss, the changed family system, reintegration as children transition into a family, and adolescents transitioning into independent living. Content will include the impact on families when the natural cycle of family development is disrupted. Special consideration will be given to various family types including adoptive, foster care, kinship, extended, single parent, multigenerational, and homosexual families. Practice content will emphasize strengths based and family-centered approaches and include knowledge and skill development to help children and families work through their family and personal crisis and grief in a timely manner to achieve permanency for children in safe and nurturing environments within 12 months after separation.

SWK-S 634 Community-Based Practice with Children and Families (3 cr.) This course will examine the development and implementation of a wide range of prevention and intervention strategies provided at the community level. Special attention will be given to the philosophy of empowerment-oriented and client-driven service models. The course will explore the community as a resource and discuss strategies of collaboration and advocacy to enhance the well-being of children and families. Issues explored will include services for families and children to prevent out-of-home placement or involvement in other formal child protection/juvenile justice services, such as models of community-building, youth development, and family group conferencing/restorative justice. This course will also provide content on mutual aid and self-help groups to support and educate children and families on issues such as parenting, domestic violence, and abuse.

SWK-S 651 Concentration Practicum II (4 cr.) Taken with S652, Practicum III. These courses together provide an in-depth practicum experience for M.S.W. Concentration students under the guidance and supervision of an approved field instructor. A faculty field liaison oversees the practica. Students complete both courses in the same agency although the students may use multiple departments or programs as sites for learning experiences. Practicum II and III build upon and deepen the practicum experiences and classroom knowledge gained in the intermediate year. The practicum courses provide students with experiences in the aforementioned curricular emphasis areas, which support the processes of synthesis, application, critical analysis, and evaluation of knowledge using a strengths perspective. The field practice seminar integrates concentration classroom learning with the experience of an internship. Students have the opportunity to apply their basic

knowledge of group process as well as practice group leadership skills. This seminar will assist students in the identification and examination of significant practice and professional issues that occur in the last phase of the M.S.W. Program. A major instructional goal of the practicum is to increase students' competence in understanding and dealing with cross-cultural issues. Information and resources on diversity are discussed and applied in seminar and field placement, and students are encouraged to further explore and increase their own competence in dealing with cross-cultural issues. It is expected that students will develop an awareness of their own privilege in relationship to their client systems. Further, students are expected to use advocacy skills in a cultural context and carry these skills into action in their agencies and the wider community.

SWK-S 652 Practicum III (5 cr.) Taken with S651, Concentration Practicum II. These courses together provide an in-depth practicum experience for M.S.W. Concentration students under the guidance and supervision of an approved field instructor. A faculty field liaison oversees the practica. Students complete both courses in the same agency although the students may use multiple departments or programs as sites for learning experiences. Practicum II and III build upon and deepen the practicum experiences and classroom knowledge gained in the intermediate year. The practicum courses provide students with experiences in the aforementioned curricular emphasis areas, which support the processes of synthesis, application, critical analysis, and evaluation of knowledge using a strengths perspective. The field practice seminar integrates concentration classroom learning with the experience of an internship. Students have the opportunity to apply their basic knowledge of group process as well as practice group leadership skills. This seminar will assist students in the identification and examination of significant practice and professional issues that occur in the last phase of the M.S.W. Program. A major instructional goal of the practicum is to increase students' competence in understanding and dealing with cross-cultural issues. Information and resources on diversity are discussed and applied in seminar and field placement, and students are encouraged to further explore and increase their own competence in dealing with cross-cultural issues. It is expected that students will develop an awareness of their own privilege in relationship to their client systems. Further, students are expected to use advocacy skills in a cultural context and carry these skills into action in their agencies and the wider community.

SWK-S 661 Executive Leadership Practice (3 cr.) This course addresses administrative, management, leadership, and supervisory skills necessary for leadership practice. Included are staff hiring, supervision, evaluation, and termination; working with boards and volunteers, leadership styles, strategic planning, and current best practices in administration.

SWK-S 662 Fiscal Management, Marketing, and Resource Development (3 cr.) This course consists of three modules designed to develop core skills in fiscal management (including issues of budgeting, understanding balance sheets, audits, and theories of accounting); resource development (including fund raising, grant writing, and personnel policies), and marketing for social work leaders.

SWK-S 663 Leveraging Organizations, Communities, and Political Systems (3 cr.) This course focuses on the knowledge and skills essential for understanding, analyzing, and application in organizations, communities, and political arenas. Such knowledge and skills include, but are not limited to organizational theories, structures, and processes; examination and application of rural, urban, and virtual community models, themes and practices; and understanding and involvement in political, social action, and social change interventions and empowerment practices.

SWK-S 664 Designing Transformational Programs (3 cr.) This course focuses on alternative, transformational models of strategic, community, and program planning. Featured development models center on collaboration, cultural competence, empowerment, and social justice. The course will address advanced grant writing,

identification of funding and other resources, and philanthropic trends within a variety of social service delivery systems. It will move beyond a focus on the technology of program development, to examine planning as a vehicle for designing organizational, community, and social change.

SWK-S 672 Families, Theories, and Culture (3 cr.) This course is designed to enhance student ability to assess and intervene with families in a culturally sensitive way from a strengths-oriented perspective. It examines the cultural context of families from a multidimensional perspective including race, ethnicity, age, gender, sexual orientation, religion, education, economics, and regional background. This course overviews the major theories of family intervention and discusses how students can apply family theory into practice situations.

SWK-S 673 Couples and Families Interventions I (3 cr.) This course provides in-depth discussion of ways to intervene with individuals on family-of-origin issues, couples at different stages of family development, parents with children at different ages, and the family as part of a larger social context utilizing a strengths perspective.

SWK-S 674 Couples and Family Interventions II (3 cr.) This course emphasizes family interventions on a variety of family challenges often seen in family agencies (substance abuse, violence, physical illness, mental illness, family life cycle disruption, etc.). The course reviews assessment and intervention strategies and how to build skills with a variety of family issues.

SWK-S 680 Special Social Work Practicum (1-9 cr.) An educationally directed field experience in addition to the required practicum courses.

SWK-S 682 Assessment in Mental Health and Addictions (3 cr.) Recognizing the social, political, legal, and ethical implications of assessment, students enrolled in this course critically examine various conceptual frameworks and apply bio-psychosocial and strengths perspectives to understand its multidimensional aspects. Students learn to conduct sophisticated mental status and lethality risk interviews, engage in strengths and assets discovery, and apply the Diagnostic and Statistical Manual of the American Psychiatric Association and other classification schemes in formulating assessment hypotheses. They gain an understanding of the application of several relevant assessment instruments and learn to evaluate their relevance for service to at-risk populations, including persons affected by mental health and addictions issues. Students learn to collaborate with a diverse range of consumers and other professionals in developing meaningful assessments upon which to plan goals, intervention strategies, and means for evaluation.

SWK-S 683 Community-Based Practice in Mental Health and Addiction (3 cr.) Students enrolled in this course examine a wide range of community-based services provided for people with severe mental illness and/or severe addiction problems. Special attention is given to strength-based, client-driven, and evidence-based practice models. Content includes community-based services in areas of case management, employment, housing, illness management, family, dual disorder treatment, and consumer self-help. Students also examine a variety of issues involved in the provision of community-based services such as ethical and legal issues, quality and continuity of care, cultural competency, organizational and financial factors, and other relevant policy and practice issues.

SWK-S 685 Mental Health and Addictions Practice with Individuals and Families (3 cr.) Students enrolled in this course develop knowledge, values and ethics, skills, and judgment necessary for competent application of selected evidence-based, best practice approaches for service for children, youth, adults, and families affected by mental health and addictions issues. Students explore topics such as risk and resilience, recovery, and relapse prevention, and consider implications of current social and policy factors affecting

service delivery to persons affected by mental health and addictions issues. Students learn to discover, analyze, synthesize, and evaluate evidence of practice effectiveness and apply that knowledge in communication, strengths discovery and assessment, hypothesis formation, contracting, intervention and prevention planning, service delivery, and evaluation. Students develop professional understanding and expertise in the application of at least one evidence-based approach for service to individuals and families affected by at least one specific mental health or addictions issues.

SWK-S 686 Social Work Practice: Addictions (3 cr.) The purpose of this course is to provide learners with knowledge and skills relevant to various aspects of social work practice in prevention, intervention, and treatment of selected addictions. Students draw upon previous and concurrent learning experiences and integrate values, knowledge, and skills acquired in other social work courses with the values, knowledge, and skills characteristic of addictions practice. The course assists students to develop a multidimensional understanding of prevention, intervention, and treatment needs of diverse populations and associated social work practice principles, methods, and skills. Students explore the relationships between and among addiction and socioeconomic status, race, ethnicity, culture, religion, gender, sexual orientation, age, physical and mental ability, and other socio-environmental factors of vulnerability. Consistent with strengths and ecosystems perspectives, students consider the impact of social environments, physical settings, community contexts, and political realities that support or inhibit the emergence of addiction problems.

SWK-S 687 Mental Health and Addiction Practice with Groups (3 cr.) Students enrolled in this course develop professional knowledge and skills for group work services to persons affected by mental health and addictions issues. The phases of group development and intervention during the various group work stages provide a conceptual framework for the course experience. Students learn to serve children, youth, adults, and families in groups that are therapeutic, growth producing, and life enhancing. Students examine a number of theoretical perspectives, including cognitive behavioral, communications, behavioral, and interpersonal approaches.

SWK-S 690 Independent Study (1-6 cr.) An opportunity to engage in a self-directed study of an area related to the school's curriculum in which no formal course is available. (In order to enroll in S690, approval from an academic advisor and the director of the M.S.W. Program is required.)

SWK-S 692 Health Care Practice I (3 cr.) This course will focus on the role of the social worker in a health care setting. Issues such as team building, professional identity, patient advocacy, ethics, and managed care will be addressed. Also, the impact of health care payment sources and health care choices for patients will be explored.

SWK-S 693 Health Care Practice II (3 cr.) This course will examine the psychosocial impact of illnesses. Areas such as coping with chronic illness, caregiver stress, grieving and loss, medical ethics, and violence as a health care issue will be examined. The needs of at-risk populations (i.e., children, survivors of sexual assault and domestic violence, frail elderly, individuals living with HIV/AIDS, etc.) will be addressed.

Ph.D. Courses

In addition to the required courses listed below, all students must complete a minimum of 12 credit hours outside the School of Social Work related to their area of specialization. All students enroll for 6 elective credits, which may be taken within or outside the School of Social Work with the approval of the student's advisory committee.

SWK-G 901 Advanced Research (6 cr.)

SWK-S 700 Integrative Seminar (3 cr.) P: completion of specialization requirements,

or consent of instructor. This seminar is scheduled at the conclusion of the didactic component of the program and is intended to provide an opportunity for students to examine within the context of a social work perspective the relevant research and practice issues that have emerged as a consequence of having participated in an educational program that includes content taken both within and outside the School of Social Work.

SWK-S 710 Social Work Theories of Human and Social Behavior (3 cr.) This seminar focuses on the converging forces that have shaped the development, dissemination, and utilization of the human behavior knowledge base of social work. It specifically examines the social and behavioral science theory and research that provide the foundation for social work practice across a variety of system levels.

SWK-S 718 Intermediate Statistics for Social Work (3 cr.) Students will learn selected parametric and non-parametric statistics to examine research problems. Included in the learning process are hand computations of statistics, development of skills in using a comprehensive computer statistics package, and selection of statistical techniques based on levels of measurement and analyses of the assumptions of statistics.

SWK-S 720 Philosophy of Science and Social Work (3 cr.) This course examines the nature and sources of social work knowledge and considers a range of epistemological issues involved in the selection, development, evaluation, and use of knowledge for social work.

SWK-S 721 Preparing to Publish: Seminar in Advanced Scholarship Skills (3 cr.) This course prepares doctoral students for academic scholarship. Topics include expectations and standards for scholarly discourse, critical and analytic thinking skills, logical argument, scholarly writing publication, and the development of a research agenda. Web-based peer and instructor review of successive drafts of writing assignments culminate in a synthesized review of literature.

SWK-S 724 Theory, Practice, and Assessment of Social Work Teaching (3 cr.) This course prepares doctoral students to effectively and competently teach social work courses. Content includes teaching philosophies; curriculum and syllabus development; teaching methods; technology related to teaching; assessment, testing, and evaluation of students; and research related to teaching.

SWK-S 725 Social Work Research Internship (6 cr.) P: S720, S721, a foundation statistics course, and at least one of the following: S710, S730, or S740. This supervised field internship provides practical experience in conducting research relevant to social work practice. Students participate in a new or ongoing faculty-supervised research project involving the design and implementation of a study, including the collection and analysis of data and the development of appropriate research reports. May be registered for up to three times.

SWK-S 726 Advanced Social Work Research: Qualitative Methods (3 cr.) This course provides an opportunity for students to initiate a research project using qualitative research methods. Topics covered will include developing the research question, exploring the literature, writing an interview guide, interviewing, analyzing data, computer analysis, writing reports, subjectivity and bias, ethics, role of theory, trustworthiness, and audits.

SWK-S 727 Advanced Social Work Research: Quantitative Methods (3 cr.) This course on quantitative research explores the similarities and differences in the various research methods and provides an opportunity to formulate and test a research question. Students will formulate and refine a research question based on interest and a thorough review of the literature. They will learn how to choose an appropriate design for answering testable problems, questions, or hypotheses. The role of theory, fundamentals of sampling, the role of informants, and steps of preparatory work will be explored. Students will generate, test, and refine interview questions or instruments appropriate to their chosen design. They will identify potential funding opportunities and current research through

online data searches. Computer demonstrations and experiential computer exercises will expose students to research software and available databases. At the conclusion of the semester, students will have developed a research proposal and field tested their data collection instruments.

SWK-S 728 Advanced Statistics for Social Work (3 cr.) Students in this course learn how to evaluate statistical assumptions and select, compute, and substantively interpret a variety of multivariate statistics, using SPSS (Statistical Package for the Social Sciences) to analyze actual social work research data. Online resources, Web-based materials, and model applications of the statistics support students' learning.

SWK-S 730 Pro-seminar on Social Work Policy Analysis (3 cr.) This seminar focuses on the development and application of analytical tools necessary to critically examine and evaluate social policy theory and research germane to social work, including the values and ideologies that under gird social problem construction, social policy creation, and social program design. Specific attention is devoted to the application of this schema for diverse populations.

SWK-S 740 Social Work Practice: Theory and Research (3 cr.) This seminar provides students opportunities to refine the knowledge, skill, and judgment necessary for competent analysis and evaluation of various aspects of social work practice. During the seminar, students conduct an intensive analysis of the effectiveness of practice services to a distinct at-risk population affected by a contemporary social problem.

SWK-S 790 Special Topics in Social Work Practice, Theory, and Research (1-3 cr.) P: approval by appropriate instructor. This course provides students with an opportunity to engage in focused study of a substantive area of social work practice directly related to the student's identified area of theoretical and research interest. It is completed with the approval and under the guidance of a member of the Ph.D. faculty.

SWK-S 791 Integrative Seminar I (1.5 cr.) This course acquaints incoming doctoral students with campus resources for graduate students and with the expectations for doctoral education, including the policies, procedures, and academic standards of the Graduate School and of the School of Social Work. Students register for this seminar in their first semester.

SWK-S 800 Ph.D. Dissertation Research (12 cr.) Students must be continually registered for dissertation credits every Fall and Spring semester once they are admitted to candidacy up to a total of 12 credits of S800. Students do not need to register for dissertation credits in the summer unless they graduate in the summer. You are considered graduated when you deposit your final bound dissertation with the Graduate School.

Labor Studies Degree Program

Admissions Requirements

All prospective applicants must 1) possess a high school diploma or a General Education Development (GED) certificate, 2) apply to the university campus of their choice (requires a one-time, non-refundable application fee of $50.00), 3) complete a labor studies application form, and 4) have a minimum of a 2.0 GPA. In addition to the above requirements, international applicants must 1) complete an International Student Application form, and 2) contact the nearest International Office on the IUPUI, Bloomington, or South Bend campuses for specific application details pertaining the completion of all necessary documentation. Please visit the labor studies website (http://www.labor.iu.edu/) for a copy of the LS application form and link to the IUPUI application form.

Electives

Any course offered by IU fulfills elective requirements. Students are encouraged to focus their elective course work in related subjects to complete a minor concentration.

Grades

An overall minimum grade point average of 2.0 (a C average) must be maintained. Course grades of D or lower in LS courses or in courses under "Required Areas of Learning" do not count toward the LS degree but are accepted as electives.

Labor Studies Degree Program

Bachelor of Science in Labor Studies

With 60 years of leadership in Labor Studies and labor education, Indiana University continues to pioneer innovative and quality education. The Labor Studies Program educates students - with special emphasis on adult learners and workers - on work, the workplace, organized labor, and the changing effects of global economic markets. The program prides itself on being not only a locally but nationally and internationally recognized, interdisciplinary, labor education program housed in the School of Social Work as of July 1st, 2007.

The credit courses are offered at all eight Indiana University campuses and worldwide via the Internet. The program prepares students and workers to assume leadership roles in labor organizations and their communities. Labor Studies is designed to serve all constituencies with a strong commitment to help working adults gain access to university-level education.

The Labor Studies faculty members bring academic expertise and valuable union experience to their instruction. They are committed to continue the strengthening of the Labor Studies Program to make it the best it can be. The program offers online and face-to-face courses to fulfill requirements for Certificate, Associate, and Bachelor of Science degrees in Labor Studies. The program offers a selected number of graduate courses.

Labor Studies is interdisciplinary; it draws from the fields of communication, economics, industrial relations, history, law, philosophy, political science, and sociology. The program integrates these disciplines in order to study work, the work process, workers' lives and experiences; to understand the needs and questions facing labor in unions and labor organizations.

The Labor Studies Program educates current and future workers with the essential knowledge and skills 1) to strengthen the labor movement, 2) to advance trade unionism, 3) and to achieve workers rights and equity; central to the development of democratic institutions nationally and around the world.

The Labor Studies Program is a fully accredited program offering the following for-credit options:

- Bachelor of Science in Labor Studies
- Associate of Science in Labor Studies
- Certificate in Labor Studies
- Minor in Labor Studies

Students who demonstrate competency in one or more specific areas may apply to receive credit for prior learning. Labor Studies also offers a large selection of noncredit courses and programs tailored to the interests and needs of working people and their unions.

This program has distinguished alumni that hold positions of leadership around the country, including union president, bargaining committee chairperson, education director for an international union, director of organizing, union staff representative, occupational health and safety inspector, labor journalist, labor lawyer, labor educator, National Labor Relations Board staff member, executive director of a nonprofit organization, and community organizer.

Required Areas of Learning

The following are representative subjects in the three major required areas of learning:

Arts and Humanities

- Afro American Studies
- Classical Studies
- Comparative Literature
- English
- Fine Arts
- Folklore and Ethnomusicology
- History
- History and Philosophy of Science
- Journalism
- Languages
- Music
- Philosophy
- Religious Studies
- Speech and Communication
- Theatre and Drama

Science and Mathematics

- Astronomy
- Biology
- Chemistry
- Computer Science
- Geological Sciences
- Mathematics
- Physics
- Psychology
- Zoology

Social and Behavioral Sciences

- Anthropology
- Economics
- Geography
- Linguistics
- Political Science

- Psychology
- Social Work
- Sociology

For the A.S. and B.S. in Labor Studies, courses within each major area must be in at least two different subjects.

Financial Aid Programs

The Gerald Bepko Education Assistance Fund provides financial assistance for tuition to students based on need. Funding can be applied to credit and noncredit courses and is available to full-time and part-time students. Students applying for assistance for credit courses must be majors in the Labor Studies Program.

Other financial aid opportunities are available.

Contact the IUPUI Office of Student Financial Aid Services at (317) 274-4162 or visit http://www.iupui.edu/~finaid/.

Labor Studies Degree Program

Labor Studies Online

Labor Studies offers online courses and degrees to meet the needs of students seeking distance education opportunities. With the wide array of online course offerings, it is possible for students to fulfill degree requirements for all Labor Studies degrees entirely online.

Labor Studies Online courses are designed to be flexible and are very similar to classroom courses in content and workload. As in a classroom, online students complete readings and other assignments and then discuss them with their instructor and classmates. The difference is that these discussions take place completely online through the IU Oncourse system (oncourse.iu.edu).

Labor Studies Online courses include students from all eight IU campuses and are available to students 24 hours a day, seven days a week.

The Labor Studies Online faculty includes IU campus-based Labor Studies faculty and nationally and internationally known instructors. The Labor Studies program offers students opportunities to study online with authors like Michael Yates, economist and author of Why Unions Matter.

Students enroll in Labor Studies Online classes the same way they enroll in classroom courses—through the Office of the Registrar at an IU campus. Faculty advisors provide guidance to Labor Studies Online students throughout their course of study. The tuition and fees for online classes are the same as for traditional classroom courses.

Undergraduate Programs

Labor Studies Degree Program

Other Degrees and Minors

For the Bachelor of Science in Labor Studies, students must earn 30 credit hours in 300- and 400-level courses, and at least 12 of these 30 credit hours must be earned in Labor Studies courses. At least 24 credit hours must be earned from Indiana University. No more than 21 credit hours may be earned within a single subject other than labor studies. Credits earned through prior learning, DANTES (Defense Activity for Nontraditional Education Support), and CLEP (College-Level Examination Program) cannot be applied to these requirements. Please consult with your advisor about how best to meet the requirements in the three required areas of learning outside the Labor Studies program, as these requirements may vary by campus.

For the Associate of Science in Labor Studies, at least 12 credit hours must be earned from Indiana University. No more than 15 credit hours may be earned within a single subject other than labor studies.

A minor in labor studies requires the completion of 15 credit hours in Labor Studies courses. Course requirements vary by campus and the school of your major. Contact the Labor Studies Office on your campus for further information.

Credit Hour Requirements

Bachelor of Science - 120 total credit hours

- Core Courses - 15 hours
- Additional Labor Studies Requirements - 27 hours
- Arts and Humanities - 12 hours**
- Science and Math - 15 hours***
- Social and Behavioral Sciences - 12 hours****
- Additional Credit Hours* - 12
- Electives - 27 hours

Associate of Science - 60 total credit hours

- Core Courses - 15 hours
- Additional Labor Studies Requirements - 12 hours
- Arts and Humanities - 12 hours**
- Science and Math - 6 hours*****
- Social and Behavioral Sciences - 9 hours****
- Additional Credit Hours* - 0 hours
- Electives - 6 hours

Certificate - 30 total credit hours

- Core Courses - 15 hours
- Additional Labor Studies Requirements - 3 hours
- Arts and Humanities - 3 hours
- Science and Math - 3 hours
- Social and Behavioral Sciences - 3 hours
- Additional Credit Hours* - 3 hours
- Electives - 0 hours

Minor - 15 total credit hours in Core Courses

*Courses must be from one of the three required areas of learning. Arts & Humanities; Physical Sciences and Mathematics; Social and Behavioral Sceinces.
**ENG W131 and one additional writing course required.
***One computer course required.
****One course in economics required. L230 meets requirement.
*****One computer course recommended.

Student Learning Outcomes

Undergraduate Programs

Labor Studies Degree Program

Self-Acquired Competency

Self-Acquired Competency (SAC) can be awarded for learning gained outside of the university setting, such as learning derived from union activities. Students must demonstrate and document that their learning is equivalent to college-level material. To be considered for SAC, students must:

- Be admitted to the Labor Studies Program and have successfully completed four Labor Studies credit hours before applying for SAC.
- Be in good academic standing.
- Prepare an extensive portfolio under the guidance of a faculty member.
- Be interviewed and approved by two Labor Studies faculty.
- Pay tuition for the academic credit awarded.

Credit for Prior Learning

Students entering the Labor Studies Program may be awarded academic credit for previous college-level learning and life experience. The general guidelines for awarding credit for prior learning are as follows:

Bachelor of Science Degree

Up to 30 credit hours may be awarded for Self-Acquired Competency in courses such as the following:

- Collective Bargaining
- Grievance Representation
- Leadership and Representation

Associate of Science Degree

Up to 15 credit hours may be awarded for Self-Acquired Competency.

Applying Credit for Prior Learning

Military or law enforcement training may count for up to 6 credit hours upon submitting the proper documentation.

The College Level Examination Program (CLEP) can be taken in a variety of subjects. Credits will be awarded to students based on Indiana University guidelines.

Several non-collegiate educational programs, which appear in The National Guide to

Educational Credit for Training Programs, will be seriously considered.

Previously awarded credits within the IU system is honored by the Labor Studies Program.

Transfer of Credit

Credit earned at other institutions will be evaluated by the appropriate Indiana University admissions office. If the course work is in the field of Labor Studies, it will be evaluated by the Labor Studies Program.

Union Education Program

The Labor Studies program offers the Union Education Program (UEP); an extensive noncredit program offering workshops, short courses, and conferences that emphasize the development of union skills. UEP courses, scheduled to suit the needs of local unions and Central Labor Councils, often meet on Saturdays for three to eight consecutive weeks and are held in union halls and on IU campuses.

The LS program offers a variety of UEP courses and can design a course to meet specific unions' needs. Some of the course offerings include:

- Arbitration
- Collective Bargaining
- Contract Campaigns
- Family and Medical Leave Act
- Grievance Handling/Steward Training
- Indiana Workers' Rights
- Labor Law
- Legal Rights of Union Stewards
- Mobilizing the Membership
- Occupational Safety and Health
- Researching a Company/Employer
- Union Officers' Training
- Workers' Compensation

The UEP does not have admission requirements, tests, or grades. Courses are tailored to meet the needs of local or international unions, with enrollments limited to the contracting union. Contact the IU campus nearest you to inquire about the UEP. Participants who complete 150 hours in the UEP are awarded a Certificate of Recognition.

Social Work Degree Program

Bachelor of Social Work

This four-year degree program prepares students for generalist social work practice. It helps students develop the competence to apply knowledge, values, and skills to practice with individuals, small groups, organizations, and communities. The program also prepares students for graduate education. The B.S.W. equips the practitioner to work with people who are encountering problems related to personal or social circumstances. In addition, highly qualified graduates may apply for advanced standing to the Indiana University School of Social Work or other M.S.W. programs nationwide.

Following the equivalent of a minimum of two postgraduate years of supervised social work practice experience, B.S.W. graduates of IU are eligible to apply for licensure by the state of Indiana. Upon successful completion of licensing requirements, the Indiana State Health Professions Bureau designates the B.S.W. graduate a Licensed Social Worker (L.S.W.).
The Bachelor of Social Work Program is offered at the Indianapolis (IUPUI), Bloomington, and Richmond (IU East) campuses. A limited number of social work courses are offered on the Columbus and Kokomo campuses. Students in the B.S.W. Program must complete all sophomore and junior social work courses and achieve senior standing before enrolling in the senior social work courses.

For specific information regarding the B.S.W. Program, contact the appropriate campus:

Social Work Degree Program

Certificates

The School of Social Work offers two certificates: a Certificate in Case Management at the undergraduate level and a Certificate in Family Life Education at the undergraduate and graduate levels. Both certificates are open to social work and non–social work students.

The requirements for the Certificate in Case Management are as follows:

- S200 Introduction to Case Management
- S221 Human Behavior and Social Environment I: Individual Functioning
- S231 Generalist Social Work Practice I: Theory and Skills
- S251 Emergence of Social Services
- S300 Crisis Intervention
- S332 Generalist Social Work Practice II: Theory and Skills
- S371 Social Work Research
- S381 Social Work Practicum or S482 Social Work Practicum II (or S280 for non–social work students)
- S442 Practice Policy Seminar in Field of Practice: Case Management

The requirements for the Certificate in Family Life Education at the undergraduate level are as follows:

Each of the following courses (15 cr.):

- S221 Human Behavior and Social Environment I: Individual Functioning
- S300 Working with Families
- S300/S400 Family Life Education
- S371 Social Work Research
- S490 Teaching Approaches to Family Life Education (by permission only)

Select one of the following (3 cr.):

- F255 Human Sexuality
- R320 Sexuality and Society

Select one of the following (3 cr.):

- L100 Personal Law
- S442 Practice-Policy Seminar in Fields of Practice: Children and Family

Undergraduate Programs

Social Work Degree Program

Education Requirements for B.S.W.

A total of 122 credit hours is required for the B.S.W. degree. In addition to School of Social Work requirements and electives, the following are general liberal arts requirements:

General Requirements (8 courses)

English Composition (2 courses)

- ENG W131 Elementary Composition I
- ENG W231 Professional Writing Skills

Modern American History

- HIST H106 American History II

Two courses designated arts and humanities from the following departments:

- Afro-American Studies
- American Sign Language
- Communications and Theatre
- English (excluding the basic composition
- course)
- Fine Arts
- Folklore
- Foreign Languages and Cultures (100 level
- and above)
- History
- Music (non–performance courses)
- Philosophy
- Religious Studies
- Women's Studies

Human Biology (1 course)

- One course in human biological sciences

Mathematics and Physical Sciences (2 courses)

- Computer Science. (On the IUPUI campus, it is strongly recommended that students take SWK S300 Computer Technology for Social Work.)

Select one course from the following departments:

- Astronomy
- Chemistry
- Geology
- Mathematics (110 or higher)
- Physical Geography
- Physics
- Statistics (strongly recommended)

Supportive Area Requirements

(6 courses)

1. ANTH A104 Cultural Anthropology
2. ECON E101 Survey of Current Economic Issues and Problems, E201 Introduction to Microeconomics, or E202 Introduction to Macroeconomics
3. POLS Y103 Introduction to American Politics
4. PSY 300-level psychology course
5. PSY B104 Psychology as a Social Science
6. SOC R100 Introduction to Sociology

Social Work Requirements (17 courses)

- S100 Understanding Diversity in a Pluralistic Society (3 cr.)
- S141 Introduction to Social Work (3 cr.)
- S221 Human Behavior and Social Environment I: Individual Functioning (3 cr.)
- S231 Generalist Social Work Practice I: Theory and Skills (3 cr.)
- S251 Emergence of Social Services (3 cr.)
- S322 Human Behavior and Social Environment II: Small Group Functioning (3 cr.)
- S323 Organization Behavior and Practice within a Generalist Perspective (3 cr.)
- S332 Generalist Social Work Practice II: Theory and Skills (3 cr.)
- S352 Social Service Delivery Systems (3 cr.)
- S371 Social Work Research (3 cr.)
- S381 Social Work Practicum I (4 cr.)
- S400 Practicum Seminar (1 cr.)
- S433 Community Behavior and Practice within a Generalist Perspective (3 cr.)
- S442 Practice-Policy Seminar in Fields of Practice (2 courses, 3 cr. each)
- S472 Practice Evaluation (3 cr.)
- S482 Social Work Practicum II (5 cr.)

Labor Studies Degree Program

Social Work Degree Program

- Bachelor of Social Work
- Certificates
- Education Requirements for B.S.W.
- Selected Educational Policies

Student Learning Outcomes

Undergraduate Programs

Social Work Degree Program

Selected Educational Policies

For continuance in and graduation from the program, students are required to: (1) maintain a minimum cumulative GPA of 2.5 in all letter-graded courses, (2) attain a minimum grade of C (2.0) or satisfactory in each required social work course, and (3) carry out professional activity in conformity with the values and ethics of the profession.

In the event of failure to meet such requirements, students will be ineligible to continue the program. Such students are encouraged to consult with their faculty advisor regarding realistic planning, including the right to petition for administrative review. Detailed descriptions of student continuation policies are in the *B.S.W. Student Handbook*.

Repeated Courses The School of Social Work faculty has approved a course of action where lower than acceptable grades attained must be repeated or substituted with a comparable social work course. Required social work courses may be repeated only after the student is reinstated in the program with permission from the school.

Incompletes Instructors at Indiana University School of Social Work follow closely the University policy regarding the assignment of grades of Incomplete [I]. An Incomplete may be assigned by an instructor when exceptional circumstances, such as an illness, injury, or a family emergency prevent a student from finishing all the work required for the course. Instructors may award the grade of Incomplete only when due to such hardship would render it unjust to hold the student to the time limits previously set. Furthermore, the grade of Incomplete may be given only when the student has completed three-fourths of the semester with course work of passing quality.

The instructor, on a case-by-case basis, evaluates incompletes. The grade of Incomplete (I) will be changed to a grade by the instructor of record, based upon the contract devised by the course instructor and approved by the BSW Program Director.

If the terms of the Incomplete contract are not met by the student, the instructor will assign the original grade.

Pass/Fail Grades Students can take a maximum of four non–social work elective courses as Pass/Fail. All general requirements and supportive area requirements need a letter grade. All required social work courses receive a letter grade, except for S482 Practicum II, which is graded as Satisfactory/Fail.

Liability Insurance Students are required to carry professional liability insurance. Under the school's blanket policy, the cost of insurance is included in the student's practicum course fee.

Credit for Life Experience Academic credit for life experience and previous work experience is not given in whole or in part toward the social work degree.

Undergraduate Programs

Student Learning Outcomes

Bachelor of Social Work (BSW)

The Student Learning Outcomes for the BSW degree program are derived from the Council on Social Work Education's (CSWE) competencies and specific practice behaviors required for professional social work practice at the Bachelor's level, as articulated in the Educational Policy and Accreditation Standards document (CSWE, 2008).

Competency #1: Identify as a professional social worker and conduct oneself accordingly.

1. Students advocate for client access to the services of social work.
2. Students practice personal reflection and self-correction to assure continual professional development.
3. Students attend to professional roles and boundaries.
4. Students demonstrate professional demeanor in behavior, appearance, and communication.
5. Students engage in career-long learning.
6. Students use supervision and consultation.

Competency #2: Apply social work ethical principles to guide professional practice.

1. Students recognize and manage personal values in a way that allows professional values to guide practice.
2. Students make ethical decisions by applying standards of the National Association of Social Work Code of Ethics and, as applicable, of the International Federation of Students/International Association of Schools of Social Work Ethics in Social Work, Statement of Principles.
3. Students tolerate ambiguity in resolving ethical conflicts.

Competency #3: Apply critical thinking to inform and communicate professional judgments.

1. Students apply strategies of ethical reasoning to arrive at principled decisions.
2. Students distinguish, appraise, and integrate multiple sources of knowledge, including research-based knowledge, and practice wisdom.
3. Students analyze models of assessment, prevention, intervention, and evaluation.
4. Students demonstrate effective oral and written communication in working with individuals, families, groups, organizations, communities, and colleagues.

Competency #4: Engage diversity and difference in practice.

1. Students recognize the extent to which a culture's structures and values may oppress, marginalize, alienate, or create or enhance privilege and power.
2. Students gain sufficient self-awareness to eliminate the influence of personal biases and values in working with diverse groups.
3. Students recognize and communicate their understanding of the importance of difference in shaping life experiences.
4. Students view themselves as learners and engage those with whom they work as informants.

Competency #5: Advance human rights and social and economic justice.

1. Students understand the forms and mechanisms of oppression and discrimination.
2. Students advocate for human rights and social and economic justice.
3. Students engage in practices that advance social and economic justice.

Competency #6: Engage in research-informed practice and practice-informed research.

1. Students use practice experience to inform scientific inquiry.
2. Students use research evidence to inform practice.

Competency #7: Apply knowledge of human behavior and the social environment.

1. Students utilize conceptual frameworks to guide the processes of assessment, intervention, and evaluation.
2. Students critique and apply knowledge to understand person and environment.

Competency #8: Engage in policy practice to advance social and economic well-being and to deliver effective social services.

1. Students analyze, formulate, and advocate for policies that advance social well-being.
2. Students collaborate with colleagues and clients for effective policy action.

Competency #9: Respond to contexts that shape practice.

1. Students continuously discover, appraise, and attend to changing locales, populations, scientific and technological developments, and emerging societal trends to provide relevant services.
2. Students provide leadership in promoting sustainable changes in service delivery and practice to improve the quality of social services.

Competency #10(a): Engage with individuals, families, groups, organizations and communities.

1. Students substantively and affectively prepare for action with individuals, families, groups, organizations, and communities.
2. Students use empathy and other interpersonal skills.
3. Students develop a mutually agreed-on focus of work and desired outcomes.

Competency #10(b): Assess with individuals, families, groups, organizations and communities.

1. Students collect, organize, and interpret client data.
2. Students assess client strengths and limitations.
3. Students develop mutually agreed-on intervention goals and objectives.

Competency #10(c): Intervene with individuals, families, groups, organizations

and communities.

1. Students select appropriate intervention strategies.
2. Students initiate actions to achieve organizational goals.
3. Students implement prevention interventions that enhance client capacities.
4. Students help clients resolve problems.
5. Students negotiate, mediate, and advocate for clients.

Competency #10(d): Evaluate with individuals, families, groups, organizations and communities.

1. Students facilitate transitions and endings.
2. Students critically analyze, monitor, and evaluate interventions.

Social Work Certificates

Certificate in Case Management

Upon completion of this certificate program, students will:

1. Practice personal reflection and self-correction to assure continual professional development.
2. Demonstrate professional demeanor in behavior, appearance, and communication.
3. Use supervision and consultation to enhance case management practice.
4. Demonstrate practice which embraces values and ethical consideration in the provision of case management.
5. Demonstrate effective oral and written communication in working with individuals and families.
6. Gain sufficient self-awareness to eliminate the influence of personal biases and values in working with diverse groups.
7. Identify the forms and mechanisms of oppression and discrimination and demonstrate how they impact the practice of case management.
8. Advocate for human rights and social and economic justice in the role of a case manager.
9. Critique and apply knowledge to understand person and environment as a case manager.
10. Apply knowledge about case management including current models & perspectives with individuals and families.
11. Apply case management research in practice.
12. Demonstrate an understanding of the public policy context in which case management takes place.
13. Substantively and affectively prepare for action with individuals & families.
14. Demonstrate empathy and other interpersonal skills.
15. Collect, organize, and interpret client data.
16. Assess client strengths and limitations.
17. Identify and utilize case management interventions to address clients' problems.
18. Facilitate transitions and endings.
19. Critically analyze, monitor, and evaluate interventions.

Certificate in Family Life Education

Upon completion of this certificate program, students will:

1. Understand the social institution of the family and its relationship to other institutions.
2. Understand and identify family strengths and deficits.
3. Understand and identify how family members relate to one another.

4. Understand the developmental changes of individuals in families throughout the life span.
5. Recognize and communicate their understanding of the importance of difference in shaping life experiences of families and their individual members.
6. Identify the physiological, psychological and social aspects of sexual development throughout the life span, so as to promote and achieve health sexual development.
7. Apply knowledge about family life education including current models & perspectives for practice in a variety of settings./li>
8. Understand teaching and learning processes to facilitate family life education in a variety of settings.
9. Apply research in the development of family life education teaching tools.
10. Demonstrate effective oral and written communication in working with others in the practice of family life education.
11. Demonstrate an understanding of the public policy context in which family life education takes place.

Labor Studies Degree Program

Social Work Degree Program

Student Learning Outcomes

Undergraduate Programs

Student Learning Outcomes

Labor Studies

The following Student Learning Outcomes for the Department of Labor Studies are currently under review and are pending faculty approval.

These SLOs apply to all Labor Studies programs.

1. Apply knowledge of labor and working class movements from a global perspective.
2. Apply knowledge from a labor studies perspective which draws from diverse fields including history, economics, industrial relations, political science, law, sociology, communications and others.
3. Analyze the impact of globalization on working class and diverse groups.
4. Analyze how global issues affect local, regional, and national labor markets.
5. Apply strategies of advocacy and social change and related skills to strengthen the labor movement.
6. Demonstrate the values and conduct of social and economic justice.
7. Demonstrate knowledge and skills to effectively advocate for the well being of the working class and their organizations.
8. Apply critical thinking skills and the process of inquiry to advance working class and social movement causes.
9. Assess the role of liberal arts in bringing justice and equality to working people.
10. Demonstrate commitment and skills to continue education and lifelong learning in an ever-changing world of work.
11. Demonstrate commitment and skills to become agents of change to promote a just and equitable world of work.

Admissions

Master of Social Work

Professional social work education requires students at the master's level to undertake a rigorous program of classroom and practice work. The Indiana University School of Social Work seeks to admit individuals who have demonstrated competency though previous academic work, professional achievements, and volunteer commitments. A strong commitment to social justice and service to others should be evident in the application.

Enrollment in the M.S.W. Program requires official admission to the Indiana University School of Social Work. A limited number of students are admitted each year. The following items are the minimum requirements for consideration for admission:

1. An earned bachelor's degree from an accredited college or university.
2. Evidence of course work in liberal arts.
3. Successful completion of a minimum of six courses in social or behavioral sciences, as defined in the application packet.
4. Successful completion of a course in statistics.
5. An earned cumulative undergraduate grade point average (GPA) of at least 3.0 on a 4.0 scale for the final 60 credit hours (90 quarter hours).
6. Submission of the completed application packet by the due date.

Applications are available in early fall of the year preceding admission. Information pertaining to the deadlines, requirements, and program details can be found in the application packet. Applicants can apply to only one location and one specific program. All applicants are encouraged to submit applications as soon as possible and well before the final application priority date. The M.S.W. admissions committee will make all decisions and notify students in early spring. Applications are evaluated on the basis of the six criteria outlined above. Admission is competitive and the instructional resources of the school determine total enrollment.

International Students/International Degrees Applicants who are not citizens of the United States should apply as early as possible preceding the fall in which they wish to enter. They must fill out the international application and the Indiana University School of Social Work application by the posted deadlines. They also must provide proof of their ability to pay fees and support themselves adequately during the period of their study and, through examinations designated by the school, must demonstrate an ability to comprehend, write, and speak English at an acceptable level.
International students or any person holding a degree obtained outside of the United States applying to study at IUPUI should request an international application from the following address:
Office of International Affairs
IUPUI

902 W. New York Street
Indianapolis, IN 46202-5197
Phone: (317) 274-7000
E-mail: oia@iupui.edu

Transfer Students A limited number of transfer students from other accredited M.S.W. programs may be accepted each year. Master of Social Work students interested in transferring to Indiana University must complete an application for admission to the program. Upon receipt of the completed application, the M.S.W. program director and the chair of the admissions committee will review the materials and decide if the applicant will be accepted into the program. If accepted, the M.S.W. program director will analyze the student's transcript and course syllabi to determine which credits earned in another accredited social work program will transfer to Indiana University. In all circumstances, however, the transfer student must complete all required courses in their chosen concentration curriculum.

Non-M.S.W. Students With permission of the school, Indiana University students enrolled in other graduate degree programs or persons possessing the M.S.W. degree may request permission to enroll in selected elective courses within the program. Enrollment of non-degree students is restricted by the availability of space and faculty. Persons interested in such enrollment are required to request such permission in writing to the M.S.W. admissions coordinator of the school.

Admission information for all of the M.S.W. Programs may be obtained from:

Ph.D. in Social Work

Admission Requirements

All applicants to the Ph.D. Program must have a master's degree in social work or a related field. Admission to the Ph.D. Program is based on evaluations of: (1) the applicant's professional resume, (2) professional experience, (3) undergraduate and graduate transcripts, (4) three letters of reference, (5) an example of the applicant's scholarly writing, (6) a 500-word statement of purpose, and (7) Graduate Record Examination General Test scores.

Application Deadlines

Applications are accepted throughout the year. Applications received by April 1 are guaranteed consideration for fall entry. Applications received by February 1 are eligible to be nominated for a University Fellowship. For application materials and further information, write to:

Certificate Programs

The School of Social Work offers two certificates: a Certificate in Case Management at the undergraduate level and a Certificate in Family Life Education at the undergraduate and graduate levels. Both certificates are open to social work and non–social work students.

The requirements for the Certificate in Family Life Education at the graduate level are as follows:

- F500 Introduction to Teaching and Learning
- G567 Marriage and Family Counseling, or S644 Social Work Practice III: Families
- S503 Human Behavior and the Social Environment I or P514 Lifespan Development Birth to Death
- S543 Family Life Education or S600 Family Life Education
- S631 Social Policy and Services II or P650 Children's Rights and Child Development
- one human sexuality course

Select one of the following:

- S520 Evaluation Processes in Social Work
- Y520 Strategies for Educational Inquiry
- Y535 Evaluation Models and Techniques
- Y611 Qualitative Inquiry in Education

For further information, please contact Katrina Brown at kabrown@iupui.edu or by phone at (317) 274-8359.

Degree Programs

Master of Social Work

Students are admitted on the assumption that they have the potential academic ability and personal suitability for completing the professional program in which they are enrolled. All students in the M.S.W. Program are expected to maintain the standards established by the School of Social Work and those held by the social work profession. In order to detect possible problems, the School of Social Work reviews students' performance periodically.

The Master of Social Work degree is recommended by the school and conferred by the university. Students must successfully complete 60 credit hours of required and elective courses carrying graduate credit. Each student is expected to follow the university and school schedules and dates for completion of requirements, including completion of all work within five calendar years from the time of first enrollment.

Liability Insurance Students are required to carry professional liability insurance. Under the school's blanket policy, the cost of insurance is included in the student's practicum course fee.
Credit for Life Experience Academic credit for life experience and previous work experience is not given in whole or in part toward the social work degree.

For more information about the Master of Social Work review the following:

- Curriculum
- Programs of Study

Master of Social Work

Curriculum

Social work is a dynamic profession concerned with changing needs of persons and the society. To respond to such needs, the curriculum of the School of Social Work undergoes continuing review by the faculty with the participation of students, members of the practice community, and others. Students must complete 60 credit hours of graduate-level course work to meet the minimum requirements for the Master of Social Work degree. All students complete a common 15 credit Foundation Curriculum and 15 credits Intermediate Curriculum that emphasizes a generalist perspective for social work practice. The Intermediate Curriculum includes a one-semester practicum of a minimum of 320 clock hours. Following that, students complete a Concentration Curriculum that prepares them for advanced practice in child welfare, school social work, health, leadership, mental health, and addictions. The Concentration Practicum of a minimum of 640 clock hours is usually completed over two semesters. All Foundation Curriculum course work must be completed before students are eligible to enroll in any required courses in the Concentration Curriculum.

The overall objectives of the Foundation and Intermediate Curricula of the M.S.W. Program include development of:

1. Basic, generalist competence applicable to a broad range of social work practice;
2. Basic competence at all levels: individual, family, groups, communities, and organization; and
3. Basic competence for practice in social service delivery systems.

The overall objectives of the Concentration Year include development of special competence in a concentration area.
Typical course arrangements for students admitted to the M.S.W. program are shown below.

Foundation Curriculum (15 cr.)

- S501 Professional Social Work at the Master's Level: An Immersion
- S502 Research I
- S503 Human Behavior and the Social Environment I
- S504 Professional Practice Skills I
- S505 Social Policy Analysis and Practice

Intermediate Curriculum (15 cr.)

- S513 Human Behavior and the Social Environment II
- S514 Practice with Individuals, Families and Groups I
- S516 Social Work Practice II: Organizations, Communities, Societies
- S517 Assessmetn in Mental Health and Addictions
- S555 Social Work Practicum I

Concentration Curriculum (30 cr.)

Child Welfare

- S618 Social Policy and Services: Child Welfare
- S623 Practice Research Integrative Seminar I
- S632 Child Welfare Practice I: Working with Children Impacted by Violence in the Family*
- S633 Child Welfare Practice II: Working with Diverse and Transitioning Families*
- S634 Community-Based Practice with Children and families*
- S636 Social Work Practice with Involuntary Populations*
- S651 Practicum II and S652 Practicum III
- S661 Executive Leadership Practice

Students must take 3 of the 4 starred courses, or all 4.

School Social Work

- S600 Social Work Practice in Schools
- S618 Social Policy and Services: Schools
- S623 Practice Research Integrative Seminar I
- S632 Child Welfare Practice I
- S651 Practicum II and S652 Practicum III
- S661 Executive Leadership Practice

3 additional credit hours at the 600-level

Leadership

- S618 Social Policy and Services
- S623 Practice Research Integrative Seminar I
- S661 Executive Leadership Practice
- S662 Fiscal Management, Marketing, and Resource Development
- S663 Leveraging Organizations, Communities, and Political Systems
- S651 Practicum II and S652 Practicum III
- S664 Designing Transformational Programs

3 credit hours of other 600-level courses

Mental Health and Addictions

- S618 Social Policy and Services: Mental Health and Addictions
- S623 Practice Research Integrative Seminar I
- S651 Practicum II and S652 Practicum III
- S661 Executive Leadership Practice
- S683 Community-Based Practice in Mental Health/Addiction*
- S685 Mental Health and Addictions Practice with Individuals and Families*
- S686 Social Work Practice: Addictions*
- S687 Mental Health and Addiction Practice with Groups*

3 credit hours of other 600-level courses (or a fourth mental health course above)

Health

- S618 Social Policy and Services: Health
- S623 Practice Research Integrative Seminar I
- S651 Practicum II and S652 Practicum III
- S661 Executive Leadership Practice
- S692 Health Care Practice I
- S693 Health Care Practice II
- S694 Social Work Practice with Older Adults*
- S600 Loss, Greif, Death, and Bereavement*

*Students must take one of the two starred courses, or both.

Master of Social Work

Programs of Study

In recognition of the time and geographic constraints of many students who seek professional social work education, the Indiana University School of Social Work offers six programs of study leading to the 60 credit hour M.S.W. degree. The Indianapolis campus offers a two-year full-time program, a three-year part-time weekday program, a three-year part-time evening program, a three-year part-time Saturday program, and an Advanced Standing Program. (The Advanced Standing Program is designed for students with a strong academic record who have earned a Bachelor of Social Work (B.S.W.) degree, within five years of their admission date, from a program accredited by the Council of Social Work Education.) Indiana University South Bend offers a three-year part-time evening program and Indiana University Northwest offers a three-year part-time program. The general goal of the program is preparation for advanced social work practice. In addition to generic knowledge and skills, the program provides an opportunity for development of special competence in child welfare, school social work, health, leadership, and mental health and addictions. Educational resources for students in the program include a substantial library, an audiovisual center, student computer modules, and diversified field instruction settings throughout the state.

M.S.W. Programs of Study—Indianapolis

Indiana University School of Social Work provides several programs of study leading to the M.S.W. degree. Each program requires 60 credit hours of graduate-level course work.

Two-Year Full-Time Program

The Two-Year Full-Time Program consists of two years of course work taken over four academic semesters. Courses may be taken during the summer.

Part-Time Day Program

The Part-Time Day Program enables students to complete the Foundation and Intermediate Curriculum over two calendar years. Students attend classes during the academic year, starting in August. The complete program requires at least three calendar years.

Part-Time Evening Program

The Part-Time Evening Program enables students to complete the Foundation and

Intermediate Curriculum (the first 30 credit hours of the program) over two calendar years. Classroom courses are offered on weekday evenings. Students begin this program in late June by enrolling in their first course during the summer II session. Part-time evening students are required to complete the Concentration Curriculum (the final 30 credit hours of the program) with most classes and internships held during the week (usually Monday through Thursday). The complete program requires at least three calendar years.

Part-Time Saturday Program

The Part-Time Saturday Program enables students to complete the Foundation and Intermediate Curriculum (the first 30 credit hours of the program) over two calendar years. Classroom courses are offered on Saturdays. Students begin this program in late June by enrolling in their first course during the summer II session. Following completion of the Intermediate Curriculum, part-time Saturday students are required to complete the Concentration Curriculum (the final 30 credit hours of the program) with most classes and internships held during the week (usually Monday through Thursday). The complete program requires at least three calendar years.

Advanced Standing Program

Students holding undergraduate social work degrees may be eligible for this program, which begins at various times based on the cohort chosen. The following are specific requirements for consideration for admission to the advanced standing program:

1. Graduation within five years from a baccalaureate social work program accredited (or admitted to candidacy for accreditation) by the Council on Social Work Education.
2. Successful completion of a statistics course.
3. A cumulative grade point average of at least 3.0 on a 4.0 scale.
4. A cumulative grade point average of at least 3.0 in all social work courses taken prior to admissions committee action. Accordingly, applicants to the advanced standing program must provide the admissions committee with an official transcript. Senior B.S.W. students must provide a transcript including the fall semester (or winter quarter) grades of their senior year.
5. Evidence of characteristics and/or potentials required for competent social work practice as defined in the mission statement of the school. Such evidence may be derived from application materials, letters of reference, and/or pertinent work or volunteer experience.
6. **A reference letter is required from a full-time faculty member of the applicant's undergraduate program.**

Accelerated Program

Students with a strong academic record, who have earned a Bachelor of Social Work (B.S.W.) degree in the past five years from a program accredited by the Council on Social Work Education, may apply for the Advanced Standing Accelerated Program on the IUPUI campus. Students who are accepted into this program receive special credit for the foundation courses required. Then they complete the Intermediate course work through intensive study and practicum during the two summer sessions. This program begins in May and is full time for one calendar year.

Part-Time Advanced Standing Programs

Students with a strong academic record, who have earned a Bachelor of Social Work

(B.S.W.) degree in the past five years from a program accredited by the Council on Social Work Education, but are unable to attend the M.S.W. Program on a full-time basis, are eligible to apply to one of the other part-time programs offered on the IUPUI campus, while still receiving special credit for the foundation courses required.

Indiana Partnership for Social Work Education in Child Welfare (Title IV-E)

The Title IV-E Program is offered to students involved in the Indiana Partnership for Social Work Education in Child Welfare, funded in part by Title IV-E, and enables students to complete the Foundation and Intermediate Curriculum (the first 30 credit hours of the program) over two calendar years. Eligibility for the Title IV-E program is typically limited to current employees of the Indiana Division of Family and Children. Classroom courses are offered on weekdays. Students begin the program by enrolling in their first courses during the fall semester. Students are allowed to apply for one of the other IUPUI cohorts and request IV-E status and funding. The schedule will then match the identified cohort.

Joint Degree Options

M.S.W. students on the Indianapolis campus have an opportunity to explore a joint degree opportunity pursuing an M.S.W./J.D. (Law) or an M.S.W./M.P.H. (public health).
The prospective student will need to explore all of the admission requirements and application deadlines at each school. Additionally, the student will need to be accepted separately in each school.

Students accepted into the IUPUI M.S.W. program and the law or public health program will receive additional information from each school.

Graduate Programs

Degree Programs

Ph.D. in Social Work

The student must complete 90 credit hours, including a dissertation and a research internship. Candidates for the Ph.D. may offer up to 30 hours of graduate credit from other institutions as follows:

1. Of the 30 graduate transfer credit hours counted toward the Ph.D. degree in social work, 15 of these credits must be in an area directly related to research (e.g., research methods, statistics, a mentored research project, etc.).
    - Of these 15 research-related credit hours, at least 6 credits must have been completed within three calendar years prior to the date the student enrolls in his/her first doctoral class following acceptance into the Ph.D. Program.
    - All 15 research transfer credits must have been successfully completed as prerequisites for the two advanced research methods courses (S726 and S727), the Research Internship (S725), and the Advanced Statistics course.
2. All students must have successfully completed a graduate-level statistics course within three calendar years before enrolling in the required Advanced Statistics course. Students who have completed a statistics course more than three years before enrolling in the Advanced Statistics course may petition the director of the Ph.D. Program to test out of this requirement.
3. Any research transfer credits not completed prior to acceptance into the Ph.D. Program must be completed as part of the student's doctoral studies in accordance with the above provisions.

All courses credited toward the Ph.D. degree must have a minimum grade of B and must receive written approval of the University Graduate School. Specific program requirements include: (1) professional social work component, 33 credit hours; (2) specialization component, 18 credit hours; (3) research component, 21 credit hours; (4) research internship, 6 credit hours; and (5) dissertation, 12 credit hours.

All students in the Ph.D. Program, with the approval of the program director, will select three faculty members to serve as their academic advisors throughout their doctoral studies, one of whom will represent the student's area of specialization outside the School of Social Work.

Qualifying Examination Process

The qualifying examination process is comprehensive and integrative in nature. Specific guidlines for the completion of the qualifying process are available from the Ph.D. program director.

Admission to Candidacy

Following the passing of the qualification examination and the completion of all course work, the student's advisory committee will submit a Nomination to Candidacy Form to the University Graduate School. Upon approval of the dean, the student will be admitted to candidacy and awarded a Certificate of Candidacy.

Research Proposal

After nomination to candidacy, the student, with the approval of the program director, will select a research committee of no fewer than four faculty members, including a member outside of the School of Social Work. This committee must approve the proposed dissertation topic.

Final Examination

The final examination is the oral defense of the dissertation.

Degree Programs

Ph.D. in Social Work

Pre-Doc Exploratory Option

The Pre-Doc Exploratory Option allows prospective doctoral students who are not yet able to, or not yet certain that they want to, apply to the Ph.D. Program, to test their interest and commitment to doctoral education. Providing students with the time to gain the information and experience needed to make an informed decision about the program. This option permits qualified students to enroll in up to three of the school's regular Ph.D. foundation courses and to complete up to 9 credit hours of doctoral course work before deciding to apply formally to the program. If a student later applies and is accepted to the regular Ph.D. Program, credits earned during the pre-doc phase will automatically apply toward the Ph.D. degree.

Participation in the Pre-Doc Exploratory Option does not guarantee acceptance into the Ph.D. Program. It does, however, provide a unique opportunity for students to explore that possibility.

The selection of candidates for enrollment in the Pre-Doc Exploratory Option is based on the following criteria:

1. An earned master's degree in social work or a related field.
2. A graduate grade point average of 3.5 on a 4.0 scale (preferred).
3. Official copies of all baccalaureate- and master's-level transcripts.
4. A 500-word written statement that outlines the applicant's reasons for seeking enrollment in the Pre-Doc Exploratory Option.
5. One letter of reference.
6. A professional resume.
7. A sample of scholarly writing.

Applicants are strongly encouraged to apply by April 1 for fall admission and by October 1 for spring admission.

Students enrolled in the Pre-Doc Exploratory Option are encouraged to complete the S721 Preparing to Publish: Seminar in Advanced Scholarship Skills (3 credit hours) as part of their program of studies.

The following is a list of other S700-level courses:

- S710 Social Work Theories of Human and Social Behavior (3 cr.)
- S720 Philosophy of Science and Social Work

- S724 Theory, Practice, and Assessment of Social Work Teaching (3 cr.)
- S726 Advanced Social Work Research: Qualitative Methods (3 cr.)
- S727 Advanced Social Work Research: Quantitative Methods (3 cr.)
- S728 Advanced Statistics for Social Work (3 cr.)
- S730 Pro-seminar on Social Work Policy Analysis (3 cr.)
- S740 Social Work Practice: Theory and Research (3 cr.)

Student Learning Outcomes

Ph.D. in Social Work

Five major curriculum components comprise the structure of the Ph.D. program. These components are designed-both individually and as a strategically integrated course of study-to challenge and extend the knowledge and skills of doctoral students to the highest level.

- **Core Social Work Courses:** exploration and critical assessment of current knowledge and values
- **External Minor:** intensive and focused study through an academic discipline other than social work
- **Research Courses:** designed to build a mastery of quantitative and qualitative methods, measurement, and statistics
- **Research Internship:** investigation of viable research questions, typically tied to an on-going faculty research project
- **Dissertation:** the design, implementation and completion of an independent empirical study that extends the knowledge base of the social work profession

Master of Social Work

The MSW program prepares graduates for:

- Providing counseling and support to individuals, families, groups and communities.
- Helping people with serious problems, such as those confronted with violence, financial hardship, social or emotional problems, substance abuse, legal matters, or health and disability challenges.
- Making connections with community resources and services.
- Conducting research, advocating for improved services, planning and policy development, or managing organizations.

Student Organizations

Students of the school maintain B.S.W. and M.S.W. Social Work Student Associations that sponsor program meetings and social affairs during the year. Through elected officers and committees, the associations serve as important channels for communication between students and faculty. In addition, these organizations appoint student representatives to various school committees. Students also are encouraged to participate in organizations related to the social work profession. Information about these organizations can be found in the B.S.W. and M.S.W. student handbooks, and at http://iupui.socialwork.iu.edu/.

Students with Disabilities

By anticipating some common problem areas, the university makes every effort to help students with physical or learning disabilities make the transition to university life. A detailed list of services is available through the Office of Adaptive Educational Services, 425 University Boulevard, (317) 274-3241, TDD/TTY (317) 278-2050.

Furthermore, the Indiana University School of Social Work makes every reasonable attempt to accommodate participants in all our programs.

Students' Rights

Social work students in the B.S.W., M.S.W., and Ph.D. Programs have a right to participate in decision-making activities about the educational program and the School of Social Work. Students regularly contribute to the continued development and growth of programs. The school values students' input in several critical areas: faculty and course evaluation, school committee work, faculty hiring, and student field placements.

All students enrolled at Indiana University have an opportunity each semester to evaluate their courses and instructors. At the end of each course, students are given standardized faculty evaluation forms to complete. These evaluations are confidential, and the results are computer generated. The evaluations are returned to the faculty to use for strengthening content and learning methods to improve instruction.

Through their elected and/or volunteer representatives, social work students provide input to and learn from each of the following committees: B.S.W., M.S.W., Ph.D., and various others that are convened throughout the year. Student representatives are viewed as valuable members of these committees.

Students have the opportunity to meet both informally and formally with any candidates being considered for faculty positions.

Each student has the opportunity to provide input for the selection of his or her field practicum assignments. The field practicum coordinator works closely with the student to negotiate a suitable placement.

Social work students have the right to provide feedback about school policies and procedures and the behavior of faculty and staff members. In providing either positive or critical feedback, students are expected to follow professional social work norms, values, and ethics. For example, if a student believes that a faculty or staff member's behavior is discourteous or ineffective, she or he should discuss the concern directly with the faculty or staff member in question. If the student has reason to believe that in addressing the faculty or staff member directly, that their grade or safety would be placed in jeopardy, the student should register the concern with the respective program director, who will address and respond to the issue.

If a student believes that she or he has been treated unfairly or unprofessionally by a faculty or staff member or that a policy or procedure is unjust or unwise and the student has been unsuccessful in her or his attempt to address the concern directly with the faculty or staff member, then the student may submit in writing a formal grievance petition to the respective program director. Grievance petitions are reserved for those

issues or incidences that warrant formal investigation and full exploration. Such petitions should be submitted in a professional manner, consistent with social work norms, values, and ethics.

Student complaints regarding discrimination, sexual harassment, racial harassment, and harassment on the basis of sexual orientation need to be addressed with the Dean of the School of Social Work. There exists an established complaint procedure available in the Indiana University *Code of Student Rights, Responsibilities, and Conduct*.

Academic and Scholarly Guidelines

Policy Regarding Individuals Convicted of Sex Offenses against Children

Academic Policies and Procedures

Academic and Scholarly Guidelines

CAMPUS POLICIES

View the IUPUI Campus Bulletin Policies & Procedures

Students admitted to any Indiana University School of Social Work program have already demonstrated potential for superior academic work. Most social work students are therefore very familiar and comfortable with high academic and scholarly standards. Obviously, students are expected to attend classroom and practicum course meetings. Regular attendance is viewed as the personal and professional responsibility of each social work student. Active participation in course activities is the expected norm. In participating, it is expected that students reflect interest in, and respect for, their colleagues in a manner that is congruent with the values, ethics, and skills of the profession.

Students are expected to prepare documents in a scholarly and professional manner. Students are to use the latest edition of Publication Manual published by the American Psychological Association. Submissions should be in typewritten format and carefully edited for spelling and grammar.

Competent and effective social work practice requires well-developed and refined communication skills, including the use of the written word. Writing well helps social workers communicate information accurately and concisely to others involved in helping client systems. For this reason, formal writing assignments in social work courses will be evaluated on both the basis of the quality of the scholarly content as well as the quality of its presentation.

Electronic Communication

Students are expected to follow appropriate e-mail etiquette when communicating with faculty, staff, and peers. Correct grammar is expected at all times. Inappropriate use of email will be grounds for student review and disciplinary actions. For specific guidelines, please visit www.itpo.iu.edu/policies.html and www.itpo.iu.edu/computeruse.html.

Student Misconduct

The following is based on Indiana University's Code of Student Rights, Responsibilities, and Conduct (Part III, pp. 17-18), Bloomington, IN: Indiana University, and on Indiana University–Purdue University Indianapolis (1997), Code of Student Rights, Responsibilities, and Conduct (Part III, pp. 28-29), Indianapolis, IN:

Academic Misconduct.

Indiana University School of Social Work and/or the university may discipline a student for academic misconduct, defined as any activity that tends to compromise the academic

integrity of the institution and undermine the educational process. Academic misconduct includes, but is not limited to, the following:

Cheating.

- A student must not use external assistance on any ''in-class'' or ''take-home'' exami-nation, unless the instructor specifically has authorized such assistance. This prohibition includes, but is not limited to, the use of tutors, books, notes, and calculators.
- A student must not use another person as a substitute in the taking of an examination or quiz.
- A student must not steal examinations or other course materials.
- A student must not allow others to conduct research or to prepare any work for him or her without advance authorization from the instructor to whom the work is being submitted. Under this prohibition, a student must not make any unauthorized use of materials obtained from commercial term paper companies or from files of papers prepared by other persons.
- A student must not collaborate with other persons on a particular project and submit a copy of a written report that is represented explicitly or implicitly as the student's own individual work.
- A student must not use any unauthorized assistance in a laboratory, at a computer terminal, or on fieldwork.
- A student must not submit substantial portions of the same academic work for credit or honors more than once without permission of the instructor to whom the work is being submitted.
- A student must not alter a grade or score in any way.

Fabrication.

A student must not falsify or invent any information or data in an academic exercise including, but not limited to, records or reports, laboratory results, and citations to the sources of information.

Plagiarism.

A student must not adopt or reproduce ideas, words, or statements of another person without an appropriate acknowledgment. A student must give due credit to the originality of others and acknowledge indebtedness whenever he or she does any of the following:

- quotes another person's actual words, either oral or written
- paraphrases another person's words, either oral or written
- uses another person's idea, opinion, or theory
- borrows facts, statistics, or other illustrative material, unless the information is common knowledge

Interference.

A student must not steal, change, destroy, or impede another student's work. Impeding another student's work includes, but is not limited to, the theft, defacement, or mutilation of resources to deprive others of the information they contain.

- A student must not give or offer a bribe, promise favors, or make threats with the intention of affecting a grade or the evaluation of academic performance.

Violation of Course Rules.

A student must not violate course rules as contained in a course syllabus or other information provided to the student.

Facilitating Academic Dishonesty.

A student must not intentionally or knowingly help or attempt to help another student to commit an act of academic misconduct.

IU School of Social Work Addendum to Indiana University Policy on Plagiarism

In addition to the university statement on plagiarism, the IU School of Social Work defines plagiarism as including:

- The intentional or unintentional use of information from another person without full acknowledgement. Such use, even when unintended, causes the work to appear to be the student's own work and thus the student, not the original author, benefits from the omission of proper acknowledgement.
- Copying or using information from web sites without appropriately documenting the internet source.
- Buying or using a document written by another person.
- Submitting any part of the student's own work which has been previously submitted, unless one's own prior work is fully acknowledged and appropriately cited.

Academic and Scholarly Guidelines

Policy Regarding Individuals Convicted of Sex Offenses against Children

Academic Policies and Procedures

Policy Regarding Individuals Convicted of Sex Offenses against Children

Policy Statement

It is the policy of the School of Social Work that no students or applicants who have been convicted of sex offenses against children shall be eligible for admission or continuation in the B.S.W., M.S.W., or Ph.D. programs.

CAMPUS POLICIES

View the IUPUI Campus Bulletin Policies & Procedures

University Procedure

The Office of the Registrar is responsible for running a report every semester against the state's Sex Offender Registry and notifying the school of anyone who appears on the Registry.

School Procedure

1. **Applicants and Transfer Students** Applicants will be asked to self-report any history of Sexual Offenses against children. Any applicant or transfer student whose name is on the registry will be ineligible for admission or transfer and shall be notified.
2. **Continuing Students** Any continuing student whose name appears on the registry during the time of matriculation, or has been convicted of an offense for which the student can be listed on the registry, shall be ineligible for continuation in the program.
3. **Notice** The school bulletin shall include a statement giving notice to potential applicants that criminal convictions may render persons ineligible for admission.
4. **Nonexclusive Policy** Nothing in this policy shall be deemed to preclude the school from taking other appropriate action in such cases, or in the case of applicants or students involved in other conduct or criminal activities not covered in this policy.
5. **Right to Appeal** Any applicant or student already admitted to one of the Indiana University School of Social Work programs who is deemed ineligible for admission or continuation based upon a record of criminal conviction may appeal to the dean of the school for reconsideration if she/he believes there are extenuating circumstances that might mitigate the findings. The dean will appoint a review panel, of three full-time faculty members to consider the student's appeal. The review panel, in consultation with the office of University Counsel, will consider all pertinent information and make a ruling that shall be considered final.

For other policies, please visit http://iupui.socialwork.iu.edu/.

- Olszanski, Michael, Part-time Instructor, Swingshift College, Labor Studies, IUNW
- Osborn, Anita M.S.W. (Indiana University, 1987), M.S.W. IV-E Field Coordinator
- Ouellette, Philip, Ph.D. (Laval University, 1995), Associate Professor of Social Work, IUPUI
- Patchner, Michael, Ph.D. (University of Pittsburgh, 1980), Dean of the School of Social Work and Professor of Social Work, IUPUI
- Pike, Cathy, Ph.D. (University of Alabama, 1994), Professor of Social Work, IUPUI
- Queiro-Tajalli, Irene, Ph.D. (University of Illinois, 1984), Executive Director of Undergraduate Education, Interim Executive Director of Labor Studies, and Professor of Social Work, IUPUI
- Quinn, Carlene, M.S.W. (Indiana University, 1995), Coordinator of Field Instruction, IUB
- Ramsey, Marilyn, Ph.D. (University of Denver, 2004), Director and Assistant Professor of Social Work, IUSB
- Roberts, Theresa, Ph.D. (University of Illinois, 1992), Assistant Professor of Social Work, IUPUI
- Satre, Carol, M.S.W. (University of Minnesota, 1990), School M.S.W. Field Instruction Coordinator and Teacher Practitioner, IUPUI
- Snyder-Brandon, Kristin, M.S.W. (), Field Coordinator and Lecturer, IUSB
- Sovereign, Rae, M.A. (Applied Professional Studies, DePaul University), Lecturer of Labor Studies, IU South Bend
- Steiner, Lisa, M.S.W. () Assistan Professor of Social Work, IU East
- Sullivan, William Patrick, Ph.D. (University of Kansas, 1989), Professor of Social Work, IUPUI
- Thigpen, Jeffry, Ph.D. (University of Chicago, 2006), Assistant Professor of Social Work, IUPUI
- Thomas, Mar, M.S.W. (), Assistant Professor of Social Work, IUN
- Travis, Denise, Ph.D. (University of Illinois at Chicago, 1997), Assistant Professor of Social Work, IUN
- Varga, Joseph, Ph.D. (New School for Social Research, 2009), Assistant Professor of Labor Studies, IU Bloomington
- Vernon, Robert, Ph.D. (University of Michigan, 1990), Associate Professor of Social Work, IUPUI
- Vincson, Jacquelyn M.S.W. ()
- Walker, Marquita, Ph.D. (Educational Leadership and Policy Analysis, University of Missouri, Columbia, 2004), Assistant Professor of Labor Studies
- Weiler, Robert, M.S.W. (Un, IUPUIiversity of Illinois at Urbana Champaign, 1988), Senior M.S.W. Field Coordinator and Teacher Practitioner, IUPUI
- Westhuis, David, Ph.D. (Florida State University, 1987), Executive Director of M.S.W. Programs and Associate Professor of Social Work, IUPUI
- Williamson, Sabrina, Ph.D. (University of North Carolina-Chapel Hill, 2003), Assistant Professor of Social Work, IUB

Faculty Emeriti

- Beall, Patricia, A.M. (Indiana University, 1950), Professor Emerita of Social Work
- Behroozi, Cyrus, D.S.W. (University of Pennsylvania, 1974), Professor Emeritus of

Social Work
- Chang, Valerie, Ph.D. (University of Illinois, 1993), Professor Emeritus of Social Work
- Copeland, Ruth V., M.S.W. (University of Michigan, 1948), Associate Professor Emerita of Social Work
- Cox, Gayle, Ph.D., (University of Denver, 1988), Associate Professor Emerita of Social Work
- Fortner, Mary E., A.M. (Indiana University, 1959), Associate Professor Emerita of Social Work
- Iverson, Elsa, M.S.W. (Indiana University, 1969), Senior Lecturer, IUPUI
- Kapoor, Jitendra M., Ph.D. (Lucknow University, India, 1965), Associate Professor Emeritus of Social Work
- Koleski, Raymond A., M.S.W. (Boston College, 1951), Associate Professor Emeritus of Social Work
- Marshall, Eldon, Ph.D. (St. Louis University, 1972), Professor Emeritus of Social Work
- Metzger, David, F., M.A. (Ball State University, 1962), Associate Professor Emeritus of Social Work
- Pardo, George, M.S.S. (Fordham University, 1959), Associate Professor Emeritus of Social Work
- Powers, Gerald T., Ph.D. (University of Pittsburgh, 1973), Professor Emeritus of Social Work
- Siegel, Sheldon, Ph.D. (University of Michigan, 1974), Dean Emeritus of the School of Social Work and Professor Emeritus of Social Work
- Singh, Sudarshan, K., A.M. (International Institute for Social Studies, The Netherlands, 1955), Assistant Professor Emerita of Social Work
- Smith, Jerome, Ph.D. (University of Chicago, 1975), Associate Professor Emeritus of Social Work
- Tennant, Violet E., D.S.W. (University of Pennsylvania, 1968), Professor Emerita of Social Work
- VanVoorhis, Rebecca, Ph.D. (The Ohio State University, 1974), Associate Professor of Social Work, IUPUI
- Wagner, Marion, Ph.D. (University of Illinois, 1991), Professor Emeritus of Social Work
- Weeks, Genevieve C., A.M., M.S.W. (Indiana University, 1994), (University of Chicago, 1946), Professor Emerita of Social Work

Staff

- Bailey, Sarah, Administrative Services Coordinator, Labor Studies, IUB
- Banic, Diane, Secretary to the Director, Social Work, IUSB
- Barnes, Demetri, M.S.W. Field Secretary, Social Work, IUPUI
- Brooks, Charles, Labor Studies, IUN
- Carter, Julia, Receptionist/Assistant Ph.D., External Affairs, Editorial Assistant, Social Work, IUPUI
- Decker, Valarie, Project Evaluator, Child Welfare IV -E Project
- Flynn, Cathy, Administrative Assistant to the Dean, Office Manager, IUPUI
- Gengo, Cindy, Administrative Secretary, Labor Studies, IUFW
- Gerber, Jennifer, Administrative Secretary/Recorder, Social Work, IUB
- Godby-Schwab, Ali, Fiscal Affairs Coordinator, IUPUI
- King, Kesha Hearn, Administrative Coordinator and Recorder, IUN
- Hill, Patrick, Recorder, Labor Studies, IUK
- Huntsman, Talena, M.S.W. Student Services Secretary/Recorder, Social Work, IUPUI
- Justus, Terresa, Administrative Secretary, IV-E Project, IUPUI
- Khamis, Sameeh, Technical Coordinator, IUPUI
- Klein, Shirley, Secretary/Recorder, Labor Studies, IUSB

- Lindop, Mary, Executive Secretary to the Associate Dean, IUPUI
- Landis, Patriece Roulette, Assistant to the Executive Director M.S.W. Program, Social Work, IUPUI
- Melody-Cottongim, Linda, Senior Administrative Secretary, IUE
- Patterson, Katrina, B.S.W. Student Services Secretary/Recorder, Social Work, IUPUI
- Ringler, Miranda, B.S.W Administrative Assistant, IUPUI
- Rucker, Velma, Principal Secretary/Recorder, Labor Studies, IUNW
- Schneider, Rob, Coordinator of External Affairs, IUPUI
- Snyder, Celisa, Director of Fiscal Affairs, IUPUI
- Soares, MeLinda, Academic Support Specialist, Labor Studies, IUPUI
- Sweeny, Karen, Online Support Coordinator, Labor Studies, IUB
- Tonti, Giulianna, M.S.W Administrative Secretary, IUPUI
- Valentine, Kelly, M.S.W Administrative Field Support Assistant, IUPUI
- Vines, Jennifer, Financial Aid Coordinator

* Eligible to Chair Dissertation Committees

University College

Welcome to University College!

University College was founded to aid students in the transition from high school to college. A model urban academic program, University College has a unique curriculum for all entering students and offers opportunities to participate in programs that will help ensure academic success and campus engagement.

All students entering IUPUI are granted admission to University College (either full or dual admission with a degree-granting school). Students remain in University College until they have declared a major and meet the necessary conditions for transfer to a degree-granting school.

Programs and services offered by University College focus on assisting students with the development of the knowledge and skills needed for success in the collegiate environment, including academic advising, academic support, career planning, first-year seminars, themed learning communities, peer mentoring, and new student orientation. University College also offers several college readiness programs, which focus on helping area students become college bound.

Overview

Mission

University College is the academic unit at IUPUI that provides a common gateway to the academic programs available to entering students. University College coordinates existing university resources and develops new initiatives to promote academic excellence and to enhance student persistence. It provides a setting where faculty, staff, and students share in the responsibility for making IUPUI a supportive and challenging environment for learning. University College seeks out and emulates national best practices whenever possible for the benefit of students. In addition, the unit is committed to providing an environment that encourages respect for diversity in all initiatives.

University College Web Site

History

As part of the institutional efforts to provide one portal of entry to the multiple degree units and to support student success, the IUPUI Faculty Council approved the formation of University College in spring 1997. The founding faculty (representing all degree-granting schools at IUPUI) and the dean were appointed soon thereafter, with the first students entering the college in summer 1998. The founding faculty approved the mission statement that is still used today.

Resources

In addition to managing basic college responsibilities, students must find their way in a new environment that is very different from what they were accustomed to in high school. University College student mentors, faculty, and staff are committed to helping students make the transition from high school to college by providing resources and support, often in collaboration with other schools and units, to ensure that all entering students make a smooth transition to IUPUI.

Academic and Career Development

Academic Advising

The advisors in University College help students choose an appropriate major, develop a plan for completing the requirements to transfer to a school as quickly as possible, and identify university resources they can use to improve their academic standing. Most students meet with their advisors at least once a semester to review their academic plans and to check on changes in degree requirements. In addition, most schools join University College in offering information sessions that review degree requirements and procedures for admission to the majors. Students can call the school they are interested in for information about the dates and locations of these sessions. All students are required to meet with their advisors during the first semester at IUPUI to develop an academic plan for transferring to their degree-granting schools.

Degree Planning Sheets

University College provides degree planning sheets outlining academic requirements for each major area. Students may also review degree planning sheets online.

Personal Development Plan

The Personal Development Plan (PDP) allows students to more effectively map out and navigate their academic and co-curricular experiences, as well as their subsequent careers. As defined by IUPUI's University College, the PDP is the product of a personalized planning process that enables students to understand, implement, and chart progress toward their degree and college goals. Students develop a PDP in their first-year seminar course with the guidance of their instructional team, but the PDP is intended to be a living portfolio for each student—open to revision and re-evaluation at critical points in their college journey. Overall, the PDP gives students a compass to navigate complex educational settings, further intellectual development, and see the relevance and value of learning.

Career Planning

Career professionals are available for all current and former IUPUI students (unless services are provided in their schools) and can provide assistance with career development needs and services such as:

- Major and career exploration
- Career assessments
- Career counseling
- Practice interviews for application to programs
- Professional Connection Central

- Externship Program and other job shadow opportunities
- Job search strategies, resume, and interview assistance (for degreed positions)
- Workshop/classroom/group presentations

The office is located on the third floor of Taylor Hall. For more information or to make an appointment, visit our website or call (317) 274-4856.

Bepko Learning Center

The Bepko Learning Center is devoted to students helping students. The center, which includes the Office of Academic Mentoring, the Office of Tutorial Support, and the Office of Academic Enrichment, is located on the second floor of Taylor Hall (UC 2006). For more information, call (317) 274-4818 or visit our website.

As part of University College, the Bepko Learning Center's programs are based on a belief that highly successful academic students can play an integral role in the academic development of their peers. Collaborative learning, role modeling, peer interaction, and peer support are all components of this process.

Office of Academic Mentoring

The central focus of the Office of Academic Mentoring is to provide support services to academic peer mentoring programs in various courses. The office's mission is to recruit, train, and develop highly qualified student mentors to provide students with assistance in successfully navigating through these courses.

Office of Tutorial Support

The Office of Tutorial Support strives to serve all IUPUI undergraduate students by connecting them with departmental-certified tutoring assistance with a major focus on gateway courses. In conjunction with all departments on campus, it is the goal of the Office of Tutorial Support to disseminate peer and departmental academic support services to students and to publicize specialized support programs provided to specific student populations. Some services offered by the office include:

- Tutor Matching Service
- Veterans Affairs and Vocational Rehabilitation Academic Support
- Free Departmental Tutoring
- Biology Resource Center

Office of Academic Enrichment

The Office of Academic Enrichment serves all IUPUI students in developing and implementing academic support initiatives related to augmenting students' metacognitive skills. Students can seek out individualized meetings with trained learning specialists to help with learning inventories and study skills assistance. In addition, the office works collaboratively with academic units to develop new partnerships to help support student academic success. Some services offered by the office include:

- Study Skills Presentations
- Time Management Workshops
- Learning Style Assessments
- General Learning Inventories
- One-On-One Mentoring

College Readiness Initiatives

College Readiness Initiatives seek to increase the capacity of parents, community groups, and schools to encourage and support middle and high school students' college preparedness. All college readiness programs strive to develop and implement strategies to increase students' academic success.

Twenty-first Century Scholars

The Twenty-first Century Scholars Regional Support Program equips students and parents with the academic, social, and cultural skills needed to attain secondary and postsecondary success. The program engages the community in meaningful conversations and services that make postsecondary education desirable, accessible, and affordable. Upon graduating from high school, enrolled students can receive up to four years of undergraduate tuition to attend an eligible Indiana public or private college, university, or proprietary institution. (also see http:scholars.in.gov)

Upward Bound

The Upward Bound program is designed to provide fundamental support to first-generation and income-eligible students in their preparation for college entrance. The goal of the program is to increase the rate at which participants complete secondary education and enroll in and graduate from institutions of postsecondary education. The Upward Bound program at IUPUI provides a wide variety of services and activities to students attending our target schools, which are Arlington, Arsenal Tech, Broad Ripple, Emmerich Manual, Northwest, and Warren Central high schools. Some of the services provided include academic support, such as tutoring and mentoring, college entrance preparation, college visits, cultural activities, and enrichment programs designed to not only engage students but the parents of participants as well. In addition, Upward Bound participants also have the opportunity to participate in a summer residential component and a summer bridge program for graduating seniors. These summer programs are designed to provide the skills, knowledge, and abilities needed to successfully facilitate a successful transition from secondary to postsecondary education for participants.

Mathematics Assistance Center

The Mathematics Assistance Center (MAC) is a service of the Department of Mathematical Sciences and University College. The MAC is located in Taylor Hall (UC B001) and offers tutoring and peer mentoring to any mathematics student. Assistance with online homework and software projects is available for certain courses. For more information, please call (317) 274-7898.

New Student Orientation

The New Student Orientation Program prepares new and transfer students for a successful transition to the IUPUI campus. University College collaborates with the schools to provide an introduction to IUPUI's exciting programs, resources, and services. During the orientation sessions, students take a campus tour, meet with their academic advisors, register for classes, and hear presentations about academic excellence and graduation requirements. Faculty and student leaders are involved with orientation, giving new students an opportunity to ask questions and make connections to people on campus. Orientation is a

required program for all new and transfer students. For more information, call (317) 274-4240.

Office for Student Success

The Office for Student Success seeks to positively impact the retention and graduation rates of underrepresented minority students at IUPUI with a particular focus on first- and second-year University College students. Intentional transition and retention programming is developed and offered to students participating in the Brother2Brother/SAAB and Sister2Sister/SAAS programs. The office takes a holistic student development approach to working with these students and provides services such as individual planning and accountability sessions, group personal development opportunities, proactive academic interventions, intrusive advising, mentoring, and referrals to various campus and community resources. The office is located in the Multicultural Success Center on the first floor of Taylor Hall. For more information, please call 317-278-6856.

Scholar Support Programs

Nina Scholars

The IUPUI Nina Scholars Program provides a unique opportunity for students from underserved backgrounds to obtain the resources and support needed to successfully complete their college education. This program serves students who meet one of the following criteria: a returning student who is 25 years of age or older with dependents in the family unit, a college-age youth or adult with physical disabilities, or an incoming freshman between the ages of 18 and 25 who has been raised in the child welfare system and has no form of financial support. Scholarship recipients receive financial support toward the cost of attendance for up to six years at IUPUI and a laptop computer. Program participation includes cohort-based course work; academic-focused mentoring; meetings and workshops focused on academic success, career development, and personal growth; community service; and engagement in the university through the Nina Scholars community. A cohort of eight scholarship recipients are selected each year. For more information, please visit the Nina Mason Pulliam Legacy Scholars Program website or contact program staff at nina@iupui.edu.

Twenty-first Century Scholars Success Program

The Twenty-first Century Scholars Success Program is available to all Twenty-first Century Scholars attending IUPUI. The program is one of many university support sites around the state for students who have successfully completed high school and affirmed their Twenty-first Century Scholars Pledge. The Twenty-first Century scholarship award covers tuition and regularly assessed fees, such as technology fees, student activity fees, and health services at any participating Indiana college or university. The mission of the Twenty-first Century Scholars Success Program is to provide support services and systematic programs that will assist students in developing strategies for academic and personal success through academic support, peer mentoring, individual coaching, referrals, campuswide initiatives, and networking opportunities. The program focuses on developing key skills in an environment of caring, support, and encouragement that increases student confidence, contributing to the students' success. For more information, please visit the Twenty-first Century Scholars Success Program website or contact the program coordinator at (317) 274-5973 or phwashin@iupui.edu.

Student Employment

The mission of the Office of Student Employment is to provide resources and to empower students to find meaningful, academically relevant part-time work experiences that enhance both academic and personal success. The office is a valuable resource for students seeking part-time employment on or near campus while enrolled at IUPUI. The staff works directly with campus departments and off-campus employers to promote various employment opportunities to IUPUI students through annual job fairs and JagJobs, the student job search website.

Services

The Office of Student Employment provides the following services to IUPUI students:

- Part-time job search strategies
- Resume basics
- Cover letter development
- Networking
- Work-study position questions
- Employee support issues
- Workshops and special events

The office is located in the Business Building (BS 2010). For more information, please visit the Office of Student Employment website or contact the main desk at future@iupui.edu or (317) 274-0857.

Student Support Services

Student Support Services (SSS) provides support and guidance for selected first-generation and low-income students while they obtain their undergraduate degrees. The program fosters a nurturing environment that offers counseling, tutoring, mentoring, and cultural enrichment activities. Financial assistance and scholarships are available to SSS students. This award-winning program is one of the most successful in the nation. Students participating in the program have high persistence and graduation rates. While in the program, students become a part of the SSS family and can receive free tutoring and help with financial aid. SSS is a home base on campus where students have mentors, develop friendships, and participate in social events.

Academic Programs

University College, often in collaboration with other schools and units, offers many academic programs and student support services. The mission of University College is to provide students with holistic support and an engaging first-year experience to ensure that all entering students make a smooth transition to IUPUI, are academically successful, and are certified to the academic schools of their choice as quickly as possible.

Early College Entrance Programs

Special Programs for Academic Nurturing (SPAN)

Early College Entrance Programs offer innovative educational choices that respond to the unique interests and talents of high-ability secondary students, celebrate cultural and ethnic diversity, and foster student

achievement. Since 1984, our Early College Entrance Programs have been effective in helping students customize their educational programs and experience academic success while earning dual credit (both high school and college credit simultaneously).

The IUPUI SPAN Division follows the immersion model in which eligible high school students enroll in regular IUPUI courses taught by full-time faculty alongside regular IUPUI full-time students for full college credit. Through this model, we are developing a collaborative initiative that makes a difference by impacting the student academic success rate in subsequent college courses and will facilitate the increase in the number of students from less-represented populations who enroll in and successfully complete courses in the STEM areas.

In addition, the faculties of our area high school partners and IUPUI have become partners in inquiry by impacting teaching and learning, and offering experiences, internships, and mentoring for students. This collaboration has created a solid pathway for students to matriculate to IUPUI and for parent support through information about college and college readiness.

First-Year Seminars

In order to ensure a solid start at IUPUI, all new students and transfer students with 17 or fewer credit hours are required to enroll in a first-year seminar. This requirement may be waived if the student enrolls in fewer than 7 credit hours.

The first-year seminar facilitates student transition to college by introducing key information and skills needed to succeed and by offering opportunities to connect with faculty, staff, and other students. The small classroom environment provides opportunities for open inquiry and individual advising, motivates students to actively participate in learning through critical inquiry and contributing to classroom discussion, and identifies key campus resources to enhance academic success.

The courses are taught by an instructional team, including a faculty member who sets academic goals and is the team leader, a student mentor who serves as a role model and a peer guide to the college experience, a librarian who introduces library resources and literacy information, and an academic advisor who provides information on academic policies and procedures and works with students to begin academic planning as well as major and career decision making. First-year seminars are often linked with other entry-level courses to form learning communities where faculty may collaborate in creating class assignments.

First-year seminars are offered by University College and all undergraduate schools. IUPUI academic advisors assist beginning students in selecting the first-year seminar that best suits their needs.

Please visit http://uc.iupui.edu/Academics/Courses.aspx for more information.

Gateway to Graduation Program

Gateway courses are those courses that enroll the highest numbers of first-time, full-time freshmen at IUPUI. Most gateway courses help satisfy the general education requirements of undergraduate degrees. Since fall 2007, 59 gateway courses have been identified as having the highest enrolling classes. The Gateway to Graduation Program is housed in University College, but faculty representatives across disciplines and schools work together in a joint effort to improve DFW rates and to improve retention at the first-year level.

Led by the dean of University College, a director, and gateway coordinators, the program includes faculty professional development offerings, a series of professional development seminars, Gateway Communities of Practice, an interdisciplinary assignment/project grant, and a retention research project that has identified at-risk students within two weeks and offered intervention recommendations. In addition, the monthly gateway coordinator meetings have become a central driving force of the program. These meetings have highlighted best practices for gateway courses that have led to program recommendations for enhancing and revising gateway courses and policies.

100-Level Courses

First-Year Seminars (FYS-U 110)

Students who complete a University College First-Year Seminar should:

1. Attain beginning levels of competency in all Principles of Undergraduate Learning (PULs) areas: Core Communication; Critical Thinking; Integration and Application of Knowledge; Intellectual Depth, Breadth, and Adaptiveness; Understanding Society and Culture, and Values and Ethics:
    1. Demonstrate effective writing and speaking (Core Communication).
    2. Make effective use of information resources and technology (Core Communication).
    3. Create knowledge, procedures, processes, or products to discern bias, challenge assumptions, identify consequences, arrive at reasoned conclusions, generate and explore new questions, solve challenging and complex problems, and make informed decisions (Critical Thinking).
    4. Be critical thinkers who demonstrate intellectual curiosity, rational inquiry, problem solving skills, and creativity in framing problems (Critical Thinking).
    5. Evaluate the quality of information (Critical Thinking).
    6. Apply their skills learned in first-year seminars (e.g., career exploration, time management, evaluation of information) to other areas or problems (Integration and Application of Knowledge).
    7. Compare and contrast approaches to knowledge in different disciplines and fields of study (Intellectual Depth, Breadth, and Adaptiveness).
    8. Describe cultural traditions, appreciate the diversity of the human experience, and make sound decisions with respect to individual conduct and citizenship (Understanding Society and Culture).
    9. Define and develop an appreciation of social and cultural diversity (Understanding Society and Culture).

10. Describe ethical principles within diverse cultural, social, environmental, and personal settings (Values and Ethics).
11. Describe University rules regarding academic honesty (Values and Ethics).
12. Describe University rules regarding plagiarism (Values and Ethics).

2. Complete a Personal Development Plan (PDP).
    1. Self Assessment: Students will identify success-related competencies that are natural strengths as well as other skills that they need to build.
    2. Exploration: Students will research and develop a realistic, informed, and detailed vision of related academic and career goals. Students will describe academic majors and career options.
    3. Evaluation: Students will analyze their academic progress over the semester in terms of academic and career success strategies.
    4. Goal Setting: Students will connect a larger sense of personal values and life purpose to the motivation and inspiration behind their academic and career goals.
    5. Planning: Students will locate programs, information, people, and opportunities to support and reality test their goals. They identify specific short term steps to reach their long term goals.

Critical Inquiry (U112)

Students who complete a University College Critical Inquiry course should:

1. Confront challenging problems arising from text and relevant issues they have a stake in solving.
2. Synthesize multiple viewpoints to arrive at reasoned conclusions about challenging texts and issues.
3. Analyze, reflect, and develop questions about challenging texts, relevant problems, and issues.
4. Collaborate with other students for multiple viewpoints and different approaches to challenging texts and issues.
5. Analyze challenging texts, pertinent problems, and issues to make sense of those texts' and issues' complexity.
6. Apply new knowledge to situations and problems posed within challenging texts and issues.

200-Level Courses

Career Connections (U210)

Students who complete a University College Career Connections Course should:

1. Identify their career-related interests, personality preferences, values, and skills based on self-assessment exercises.
2. Identify several academic and career options that are compatible with their self assessment information.
3. Locate and utilize information resources and people to research and explore academic majors and career paths.
4. Evaluate the suitability of several major and career options based on an integration of self-assessment and researched major/career information.
5. Develop and implement a specific plan of action for subsequent semesters to assist them in confirming their tentative choice(s) of majors/careers.

Mentor Development Courses

Outdoor Leadership Experience (U200)

Students who complete a University College Outdoor Leadership course should:

1. Describe their leadership development process and goals for the future.
2. Apply relational leadership skills in leadership experiences.
3. Identify factors and behaviors that influence group development.
4. Demonstrate effective communication skills for working in group.
5. Analyze through writing self reflections your strengths and limitations of group role.
6. Apply experiential learning skills to practical and everyday references.

Introduction to Mentoring Techniques (U201)

Students who complete a University College Introduction to Mentoring Techniques course should:

1. Explain your role, responsibility, and contribution to the campus community.
2. Explain understand traits, functions, and activities associated with mentoring.
3. Demonstrate how to access campus resources to support student success at IUPUI.
4. Apply active listening skills and communication principles when working with students in their mentoring program.
5. Identify characteristics of diversity within the semester about our student community to promote an inclusive learning experience.
6. Recognize two positive tactics to maintain life balance in order to stay motivated for yourself and your students.

Active and Collaborative Learning in Groups (U202)

Students who complete a University College Active and Collaborative Learning in Groups course should:

1. Summarize the collaborative learning process and its role in the mentoring experience.
2. Implement developmental and holistic approaches for student learning and academic success.
3. Apply positive relationship and communication skills to individual and group mentoring experiences.
4. Differentiate the stages of group and individual mentoring techniques and strategies.
5. Implement collaborative and assessment guided approaches to mentoring activities.

Leadership and Transition (U203)

Students who complete a University College Leadership and Transition course should:

1. Identify relational leadership principles through readings, class discussions, and self reflection.
2. Describe the role of relational leadership.

3. Compare and contrast relational leadership with other leadership theories.
4. Apply relational leadership principles by characterizing the unique traits of themselves and their group members.
5. Summarize the values, qualities, and skills necessary to being a relational leader through small group discussions.
6. Analysis through writing your self-awareness of your mentoring skills, competencies, and leadership philosophy.
7. Construct a leadership action plan by synthesizing the information gained from class readings and inventories completed.

Independent Study (U204)
Students who complete a University College Independent Study course should:

1. Generate a researchable question to address a mentoring issue.
2. Conduct a competent literature search for empirically based articles.
3. Apply quantitative and/or qualitative research methods to a question or problem.
4. Interpret results of data collected.
5. Synthesize the data and implications of your results as it applies to your question/problem.
6. Demonstrate the ability to clearly communicate and illustrate, both orally and in writing, the findings of original research on mentoring.
7. Summarize your individual mentoring experience within the larger mentoring context.

Student Learning Outcomes

One Hundred Level

- First-Year Seminars (FYS-U110)
- Critical Inquiry (U112)

Two Hundred Level

- Career Connections (U210)
- Mentor Development Courses
  - Outdoor Leadership Experience (U200)
  - Introduction to Mentoring Techniques (U201)
  - Active and Collaborative Learning in Groups (U202)
  - Leadership and Transition (U203)
  - Independent Study (U204)

Summer Bridge Program

The IUPUI Summer Bridge Program is a two-week program for incoming first-year students held in August before fall classes begin. Students are divided into groups of 25 based on their interest in pursuing a particular major or in exploring various major options. Summer Bridge participants establish networks for success with faculty, advisors, student mentors, and librarians; make friends with other students; learn about college-level expectations for reading and writing; receive individualized support for math; begin connecting with a school and major; become acquainted with the campus; and gain experience in using instructional technology.

For more information, please visit https://bridge.uc.iupui.edu or e-mail ucbridge@iupui.edu.

Summer Success Academy

The Summer Success Academy provides students with instruction in writing and math before the fall semester begins. The program offers students an opportunity to participate in community-building activities, explore the IUPUI campus, and prepare for the transition to college.

Themed Learning Communities

Themed learning communities (TLCs) are a group of three to five classes connected by a theme in which 25 entering students enroll. Each TLC includes a first-year seminar course taught by an instructional team consisting of faculty, a librarian, an academic advisor, and a student mentor. TLC faculty work together to coordinate their classes through active and collaborative learning, co-curricular activities, service learning, and reflective assignments.

TLCs provide students with an opportunity to become part of a group of students with similar academic interests, thereby fostering the development of a support network of friends and study partners to share experiences with. Students who have participated in TLCs tend to have higher grade point averages and more interaction with students and faculty than students who do not participate in the program. IUPUI offers a variety of TLCs tailored toward an assortment of majors and interests. Academic advisors assist students in finding a TLC that matches their interests and intended majors.

Please visit the TLC website for more information.

Student Organizations

University College Student Council

The University College Student Council (UCSC) is a student group made up of students from University College. The UCSC represents University College students in the Undergraduate Student Government on various issues. UCSC also plans entertaining and educational events throughout the year to help students meet new people and to have fun. UCSC also provides funding for organizations that want to create programs, events, or initiatives that support University College students and their interests.

Academic Policies and Procedures

University College has academic policies and procedures in place to help students persist and succeed in their studies. These policies apply to students who are enrolled in University College. Please see the University College website for the most current information.

56 Credit Hour Policy

Each semester a number of University College students have met or exceeded 56 IU GPA credit hours (including transfer credit hours, if any) and 1) have not completed all requirements or 2) will not meet certain GPA standards to matriculate to their degree school. Students not making

satisfactory academic progress in their major will be strongly advised to pursue another major. Students with established majors must take only courses related to their major that are required for admittance into their degree school.

In an effort to provide more direction and better academic advising assistance to ensure that students have a realistic and attainable plan in place, the following grade point guidelines have been established for continuing in University College with 56 credits or more:

1. **Continuing Students**—defined as students who have been enrolled at IUPUI the previous semester
   Returning Students—defined as returning students with an IU cumulative GPA after an absence of one or more semesters and not previously dismissed from an IU campus
   - IU cumulative GPA 2.0 or above: Students may remain in University College if they are making progress toward certification or application requirements into their degree school.
   - IU cumulative GPA below 2.0: If students earned a semester GPA of 2.0 or above for the previous semester in which they attended but have a cumulative GPA below 2.0, students may continue as long as they are making satisfactory academic progress toward acceptance into their degree school.
   - IU semester GPA below 2.0 with cumulative GPA below 2.0: Students will be dismissed from the university.

2. **Transfer Students**–defined as students from another institution admitted to University College with 56 credits or more
   Intercampus Transfer Students—defined as students transferring from another IU campus and admitted to University College with 56 credits or more
   - IU cumulative GPA 2.0 or above: Students may remain in University College if they are making progress toward certification or application into their degree school.
   - IU semester GPA below 2.0: Students who have attempted a minimum of 12 IUPUI credits (including Ws) will have one more semester in which to achieve a semester GPA of 2.0 or above. Two consecutive semesters below a 2.0 with a cumulative GPA below 2.0 will result in academic dismissal from the university.

3. **Previously Dismissed Students**—defined as students reinstated from a previous dismissal from IUPUI University College or an IU campus.
   - IU cumulative GPA below 2.0: Applying for reinstatement does not guarantee that the student will be reinstated to University College. If students have met one of the conditions below, they may apply for reinstatement to University College. Students must successfully complete all requirements during the reinstatement process with their advisor.
     - Student has attended another institution since being dismissed from IUPUI and completed a minimum of 6 credit hours of transferable course work with a 2.0 GPA or above.
     - Student has been out of school for more than five years since leaving the IU system, including IUPUI.
   - IU semester GPA of 2.3 or above: Students may remain in University College as long as they achieve a first semester GPA of 2.3 or achieve a cumulative GPA of 2.0 or above and are making satisfactory progress toward completion of certification or application to their degree school.
   - IU semester GPA below 2.0 with cumulative GPA below 2.0: Students will be dismissed from the university.

Adopted: 1998 (with move from Office of Admissions to newly formed University College)
Revised: 4/05; 5/08; 9/11
Current Policy Approved by University College Faculty 9/16/11

Academic Appeals Process

When a student wishes to appeal a decision made by University College faculty, administrators, or staff regarding academic misconduct, requirements, or policies, the student should first attempt to resolve the issue by discussing his or her concerns with the member of the university involved in the dispute. If the matter is not resolved to the complainant's satisfaction by contacting the person(s) involved, the University College formal appeals process should be invoked.

This appeals process does not generally apply in cases of grade change appeals based on quality of work for which the final decision rests with the faculty member and/or course coordinator. It can only be used for grade appeals when there is a procedural or policy issue involved.

All appeals are subject to relevant campus policies and procedures as well as the University College appeals process outlined below. Thus, the appeals process for academic misconduct outlined in the *Code of Student Rights, Responsibilities, and Conduct* will be followed in all University College academic appeals. The items below clarify implementation of the stated university process within University College.

1. The student meets with the assistant dean/executive director of Academic and Career Development of University College to discuss options for resolution of the problem.
2. If the problem is not resolved in the meeting with the assistant dean/executive director of Academic and Career Development of University College, the student may submit a letter to the associate dean of Academic Affairs within seven calendar days of the meeting with the assistant dean/executive director of Academic and Career Development (excluding university recognized holidays and breaks) requesting that the matter be handled by the University College Appeals Board.

3. The appeal is considered by the University College Appeals Board formed by the associate dean of Academic Affairs. This committee is comprised of three members of the University College Curriculum Committee, associate dean for Academic Affairs, and two student representatives from the University College Student Council. The associate dean for Academic Affairs will appoint a faculty member to serve as the presiding officer and to convene the appeals board. Procedures for convening and holding the appeals board hearing will follow the process for academic misconduct as stated in the *Code of Student Rights, Responsibilities, and Conduct*.
4. The University College Appeals Board is the final decision-making body for all University College academic appeals unless a documentable procedural error occurred during the appeals board process in which case a final appeal may be made to the executive vice chancellor. In such a case, the procedures outlined in the *Code of Student Rights, Responsibilities, and Conduct* will be followed.

Academic Dismissal

First-Year Undergraduate Students*

Beginning students who *attempted* 12 or more credit hours (including Ws) must obtain at least a 1.0 GPA at the end of their first semester or they will be dismissed. Students who withdrew from all courses are exempt. Students dismissed for the first time must sit out for a minimum of one regular (fall or spring) semester and petition by the established deadlines to be reinstated. Reinstatement is not automatic. Students dismissed two or more times must remain out of school for two regular (fall and spring) semesters and petition by the established deadlines to be eligible for reinstatement.

***NOTE:** Defined by the IUPUI Admissions Center as high school graduates (or students who have completed the GED or equivalent credential) with less than 12 hours of attempted college credit at the time of enrollment at IUPUI.

Admission of Transient Students Under Dismissal Status

Any student who has been dismissed from University College and has subsequently attended another institution and earned above a 2.0 cumulative GPA for a minimum of 6 credit hours may be admitted as a transient student for summer session(s) only. Students seeking readmission for a regular term or wanting to continue their enrollment after the summer session(s) must complete the regular reinstatement process.

All Other Students

All other students on probation who have completed a minimum of 12 IU GPA hours are subject to dismissal if they fail to attain a GPA of at least 2.0 in any two consecutive semesters (fall and spring) and their cumulative IU GPA is below 2.0. Students who are dismissed for the first time must sit out for a minimum of one regular (fall or spring) semester and petition by the established deadlines to be eligible for reinstatement. Reinstatement is not automatic. Students dismissed two or more times must remain out of school for two regular (fall and spring) semesters and petition by the established deadlines to be eligible for reinstatement.

***Please Note:** The School of Liberal Arts, School of Science, and University College, in agreement with this common policy, will honor academic probation and dismissal status from other units when students have an IU cumulative GPA below 2.0. Students may also be academically dismissed or released from a particular program if they do not make consistent and appropriate academic progress relevant to their fields of study. This is left to the discretion of the appropriate officer in the school. University College policy concerning academic dismissal is that students who are dismissed for the first time from IUPUI, IU-B, PU, IU regional campuses, or other IUPUI schools must sit out for a minimum of one regular (fall or spring) semester and petition by the established deadlines to be eligible for reinstatement.

Academic Probation

First-Year Undergraduate Students*

Students will be placed on academic probation at the end of their first semester of attendance if their IU GPA is between 1.0 and 1.99. Students will be informed of their probationary status by letter. Students on first-time academic probation will be required for the next semester of enrollment to participate in an approved intensive intervention provided by University College.

Students on academic probation must register before the end of the first full week of classes. No full-term courses or first eight-week courses can be added after the first full week of classes. Students may be continued on probation when their next semester GPA is 2.0 or above, but their cumulative IU GPA is between 1.0 and 1.99. Students will be removed from probationary status once their cumulative IU GPA is 2.0 or above.

*Defined by the IUPUI Admissions Center as high school graduates (or students who have completed the GED or equivalent credential) with less than 12 hours of attempted college credit at the time of enrollment at IUPUI.

All Other Students

All other students whose cumulative IU GPA falls below 2.0 will be placed on academic probation. Students will be informed of their probationary status by letter. Students on first-time academic probation will be required for the next semester of enrollment to participate in an approved intensive intervention provided by University College. Students on academic probation must register before the end of the first full week of classes. No full-term courses or first eight-week courses can be added after the first full week of classes. Students may be continued on probation when their semester GPA is 2.0 or above, but their cumulative IU GPA is below 2.0. Students will be removed from probationary status once their cumulative IU GPA is 2.0 or above.

***Please Note:** The School of Liberal Arts, School of Science, and University College, in agreement with this common policy, will honor academic probation and dismissal status from other units when students have an IU cumulative GPA below 2.0. Students may also be academically dismissed or released from a particular program if they do not make consistent and appropriate academic progress relevant to their fields of study. This is left to the discretion of the appropriate officer in the school. University College policy concerning academic dismissal is that students who are dismissed for the first time from IUPUI, IU-B, PU, IU regional campuses, or other IUPUI

schools must sit out for a minimum of one regular (fall or spring) semester and petition by the established deadlines to be eligible for reinstatement.

Academic Reinstatement

Reinstatement will be the decision of the school to which students are petitioning. Students' chances of readmission will be enhanced by taking workshops, removing grades of incomplete, undertaking assessment of their academic problems, and providing evidence of their ability to complete successful academic work upon their reinstatement to IUPUI. Students who are reinstated will be classified as probationary students until their cumulative IU GPA is 2.0 or above.

During the first regularly enrolled semester on probation, the student must achieve a semester GPA of at least a 2.3. In each subsequent semester on probation, the student must achieve a semester GPA of 2.0. Failure to meet the semester GPA requirement will result in dismissal. Students who are reinstated must register before the first day of classes of the term for which they are reinstated. If a student does not register, registration will be blocked on the first day of classes.

In addition, a note will be placed in the student's file indicating that the student failed to meet the registration deadline. Readmission after a second dismissal is extremely rare. Students' chances of readmission will be enhanced by taking workshops, removing grades of incomplete, undertaking assessment of their academic problems, and providing evidence of their ability to complete successful academic work upon their reinstatement to IUPUI.

***Please Note:** The School of Liberal Arts, School of Science, and University College, in agreement with this common policy, will honor academic probation and dismissal status from other units when students have an IU cumulative GPA below 2.0. Students may also be academically dismissed or released from a particular program if they do not make consistent and appropriate academic progress relevant to their fields of study. This is left to the discretion of the appropriate officer in the school. University College policy concerning academic dismissal is that students who are dismissed for the first time from IUPUI, IU-B, PU, IU regional campuses, or other IUPUI schools must sit out for a minimum of one regular (fall or spring) semester and petition by the established deadlines to be eligible for reinstatement.

Certification to a Degree-Granting School

University College will certify (transfer) students to a degree-granting school when they have met the following criteria:

1. Completed the minimum number of credit hours and specific courses required for admission to a particular school
2. Achieved the required grade point average for admission to a specific school
3. Formally declared a major by following the procedures necessary to record the intended major in the university student record system

Upon completion of 56 credit hours, students must be certified to a degree-granting school. Some schools have competitive admissions and require submission of an application at least a month before the start of a semester. In addition, if students are uncertain about degree requirements or cannot decide on a major, it is essential that they talk with an academic advisor before reaching the 56 credit hour limit.

Dean's List

University College recognizes exceptional academic performance by students enrolled in six or more credit hours per semester and earn a grade point average (GPA) of 3.0 or higher for the semester. Students with a semester GPA from 3.7 to 4.0 receive Dean's List Highest Honors; those with a GPA from 3.30 to 3.69 receive Dean's List High Honors; and those with a GPA from 3.0 to 3.29 receive Dean's List Honorable Mention.

Enrollment Requirements for Conditionally Admitted Students

Conditionally admitted students are not allowed to enroll in more than 12 credit hours, including a learning community. They must also meet a minimum of two times with their academic advisor, attend classes, and participate in an appropriate academic support program such as structured learning assistance or critical inquiry.

Freshman Drop Policy

University College first-year students (25 credit hours or below) may not drop more than one course per semester. This policy will be enforced through advisor sign-off on drop requests. This policy does not include course adjustments made during the first week of class nor does it apply to classes in which a student has been "administratively withdrawn."

University College Faculty

In support of the University College mission and principles, University College faculty are committed to enhancing and improving undergraduate education for students in all units, to supporting interdisciplinary studies, and to promoting academic and scholarly excellence. Unique to University College is the faculty's focus on creating a community distinguished by multidisciplinary faculty involved with students through effective mentoring, rigorous teaching, and responsible curriculum design. University College faculty play a major role in making decisions that direct University College governance and operations, supporting curriculum development, and serving as ambassadors to the campus and community.

Administration

Administrative Officers

Kathy Johnson, Dean of University College and Associate Vice Chancellor for Undergraduate Education

Sarah Baker, Associate Dean, Faculty and Curricular Affairs

Catherine Buyarski, Executive Assistant Dean for Student Retention and Success

Executive Directors

Harriett Bennett, Executive Director, Administration and Development

Barbara Browning, Executive Director of College Readiness and Director of Student Support Services

Andrea Engler, Executive Director of Transition Services and Mentoring

Michele Hansen, Executive Director of Research, Evaluation, and Planning

Program Directors

Heather Bowman, Director of First-Year Programs

Lauren Chism, Director of Themed Learning Communities

Yvonne Fitzgerald, Director of Academic Advising

Jonika Hudson, Director of Twenty-first Century Scholars

Charlie Johnson, Director of Scholar Support Programs

Janna McDonald, Director of Student Employment

Mark Minglin, Director of Bepko Learning Center

J. R. Russell, Division Director of Early College Entrance Programs and SPAN

Jennifer Schott, Director of Career Planning

Khalilah Shabazz, Director for Student Success

Kathryn Thedwall, Director of Gateway to Graduation

Tamra Wright, Assistant Director of Upward Bound

Administrative Officers Emeriti

Scott E. Evenbeck, Dean Emeritus, University College.

Barbara D. Jackson, Associate Dean Emerita, University College.

Senior Faculty

Enrica Ardemagni, Professor of Spanish and Director of the Certificate in Translation Studies Program, Department of World Languages and Cultures, School of Liberal Arts; B.A., University of Arkansas, 1973; M.A., 1977; Ph.D., University of Wisconsin, 1985.

Simon Atkinson, Professor and Chair of Biology, School of Science; B.Sc., King's College London, 1986; Ph.D., University of Cambridge, 1990.

Rafael Bahamonde, Professor and Chair of Department of Kinesiology, School of Physical Education and Tourism Management; Fellow of the American College of Sport Medicine; Research Associate, National Institute for Fitness and Sport; B.A., DePauw University, 1980; M.S., Indiana State University, 1981; Ph.D., Indiana University, 1994.

Andrew Barth, Professor of Earth Sciences, School of Science; B.S., California State University, Los Angeles, 1981; M.S., 1985; Ph.D., University of Southern California, 1989.

Anne E. Belcher, Associate Professor and Department Chair, Environments for Health, School of Nursing; B.S.N., Indiana University, 1971; M.S.N., 1976; D.N.S., 1998.

Jacqueline Blackwell, Associate Professor, Early Childhood/Elementary Education, School of Education; B.S., Coppin State College, 1970; M.S., Southern Illinois University, 1971; Ph.D., University of Maryland, 1977.

Donna Boland, Associate Dean for Evaluation and Associate Professor, School of Nursing; B.S., New York State University, 1976; M.S., Russell State College, 1979; Ph.D., University of Utah, 1986.

Benzion Boukai, Professor of Statistics, Department of Mathematical Sciences, School of Science; B.A., Haifa University, Israel, 1983; M.A., 1985; Ph.D., State University of New York at Binghamton, 1988.

Robert Bringle, Chancellor's Professor of Psychology, School of Science; Philanthropic Studies, School of Liberal Arts; Executive Director, Center for Service and Learning; B.A., Hanover College, 1969; M.S., University of Massachusetts at Amherst, 1972; Ph.D., 1974.

Barbara Christe, Associate Professor of Electrical and Computer Engineering Technology, Program Director, Biomedical Engineering Technology, School of Engineering and Technology; B.S., Marquette University, 1984; M.S., Rensselaer at Hartford, 1986.

Owen Dwyer, Associate Professor of Geography and Adjunct Associate Professor of American Studies, School of Liberal Arts; B.S., Pennsylvania State University, 1992; M.S., 1995; Ph.D., University of Kentucky, 2000.

Mary Fisher, Professor of Nursing Administration, School of Nursing; Associate Vice Chancellor for Academic Affairs and Associate Dean of the Faculties; B.S.N., Kent State University, 1966; M.S.N., 1980; Ph.D., 1984.

Steve Fox, Associate Professor of English and Director of Writing, School of Liberal Arts; B.A., University of Georgia, 1976; M.A., Duke University, 1977; Ph.D., University of Wisconsin, Madison, 1992.

Crystal Garcia, Associate Professor of Criminal Justice, Law, and Public Safety, School of Public and Environmental Affairs; B.A., San Diego State University, 1990; Ph.D., University of California, Irvine, 1996.

Andrew Gavrin, Associate Professor of Physics and Chair, Department of Physics, School of Science; B.S., Massachusetts Institute of Technology, 1983; M.S., Johns Hopkins University, 1986; Ph.D., 1992.

Gina Sanchez Gibau, Associate Dean for Student Affairs and Associate Professor of Anthropology, IU School of Liberal Arts; A.B., Rollins College, 1991; M.A., University of California, Los Angeles, 1993; Ph.D., University of Texas, Austin, 1999.

Clifford Goodwin, Associate Professor of Organizational Leadership and Supervision, School of Engineering and Technology; B.S., Purdue University, 1970; M.A., Ball State University, 1979; Ed.D., Indiana University, Bloomington, 1997.

Randall Halverson, Associate Librarian, University Library; B.S., South Dakota State University, 1981; M.Ed., 1990; M.S., 1992; M.L.S., Emporia State University, 1998.

Stephen Hundley, Associate Professor of Organizational Leadership and Supervision, School of Engineering and Technology.

N. Douglas Lees, Professor and Associate Dean for Planning and Finance, School of Science; B.A., Providence College, 1967; Ph.D., Northwestern University, 1973.

Beverly J. Linde, Associate Clinical Professor, School of Nursing; B.S.N., Ohio State University, 1965; M.S.N., University of Michigan, 1971; Ph.D., 1989.

Monroe H. Little Jr., Associate Professor of History and Director of Africana Studies, School of Liberal Arts; B.A., Denison University, 1971; M.A., Princeton University, 1973; Ph.D., 1977.

Joyce MacKinnon, Associate Dean for Academic Affairs and Professor of Health Sciences, School of Health and Rehabilitation Sciences; B.A., Ohio Wesleyan University, 1973; M.P.T., Baylor University, 1974; Ed.D., North Carolina State University, 1987.

David Malik, Chancellor's Professor and Professor of Chemistry, School of Science; Interim Executive Vice Chancellor for Academic Affairs, Indiana University Northwest; University Director, Faculty Colloquium on Excellence in Teaching (FACET), Indiana University; B.S., California State University, 1968; M.S., 1969; Ph.D., University of California, San Diego, 1976.

Kathleen A. Marrs, Associate Professor of Biology, Associate Dean of Academic Affairs, School of Science; B.A., Illinois Wesleyan University, 1984; Ph.D., University of Illinois, 1991.

Lisa McGuire, Associate Professor, School of Social Work.

Bethany S. Neal-Beliveau, Associate Professor of Psychology; B.S., Purdue University; M.S., University of Minnesota, 1985; Ph.D., 1987.

Obioma Nnaemeka, Chancellor's Professor of French and Women's Studies, Adjunct Professor of African and African Diaspora Studies, School of Liberal Arts; B.A., University of Nigeria, Nsukka, 1972; M.A., University of Minnesota, 1977; Ph.D., 1989.

William Orme, Associate Librarian and Adjunct Associate Professor of Library and Information Science, University Library; B.A., Indiana University, 1976; M.L.S., 1981.

Rebecca Porter, Executive Director, Enrollment Services; Associate Professor of Physical Therapy, School of Health and Rehabilitation Sciences; Associate Vice Chancellor of Student Services; B.S., Indiana University, 1972; M.S., 1977; Ph.D., 1991.

William W. Potter, Associate Professor of Foundation Studies, Director of Foundations, Herron School of Art and Design; B.F.A., Columbus College of Art and Design, 1995; M.F.A., University of Cincinnati, 1997.

Irene Queiro-Tajalli, Professor of Social Work, Executive Director of Undergraduate Education and Acting Executive Director of Labor Studies, School of Social Work; B.S.W., University of Buenos Aires, Argentina; M.S.W., Tehran School of Social Work, Iran; Ph.D., University of Illinois, 1984.

Joshua S. Smith, Associate Dean for Research and Academic Affairs, Associate Professor of Educational Psychology, Director for the Center for Urban and Multicultural Education, School of Education; B.A., University at Albany, State University of New York, 1994; M.S., 1997; Ph.D., 2002.

Anthony Stamatoplos, Associate Librarian, University Library; Assistant Professor, School of Library and Information Science; B.A., Eastern Washington University, 1980; M.A., Washington State University, 1985; M.L.S., Indiana University, 1989.

Pratibha Varma-Nelson, Professor of Chemistry, Department of Chemistry and Chemical Biology, School of Science; Executive Director, Center for Teaching and Learning; B.Sc., University of Pune, India, 1969; M.S. and Ph.D., University of Illinois, Chicago, 1978.

Richard E. Ward, Executive Director, Center for Research and Learning; Professor of Anthropology, School of Liberal Arts; B.A., University of Northern Colorado, 1972; M.A., University of Colorado, 1976; Ph.D., 1980.

Jeffrey X. Watt, Associate Dean for Student Affairs and Outreach, Associate Chair of Mathematical Sciences, Associate Professor of Mathematical Sciences, School of Science; Adjunct Associate Professor of Education, School of Education; B.S., Michigan Technological University, 1983; M.S., Purdue University, 1985; Ph.D., Indiana University, 1990.

Robert W. White, Professor of Sociology, School of Liberal Arts; B.A., Indiana University, 1980; M.A., 1982; Ph.D., 1987.

Marianne S. Wokeck, Chancellor's Professor of History and Associate Dean for Academic Affairs, School of Liberal Arts; Staatsexamen, Hamburg University, Germany, 1973; Ph.D., Temple University, 1982.

Adjunct Faculty

Keith S. Anliker, Senior Lecturer, Chemistry and Chemical Biology, School of Science; B.A., University of Northern Iowa, 1982; M.S., Purdue University, 1985.

Robert Beck, Senior Lecturer, Department of Geography, School of Liberal Arts; B.A., Hastings College, 1973; M.A., Indiana State University, 1976; Ph.D., 1982.

Karen E. Black, Director of Program Review, IUPUI and Associate Faculty, Organizational Leadership and Supervision and Technical Communication, School of Engineering and Technology; B.A., Indiana University, 1982; M.S., 1985.

Lorrie A. Brown, Associate Director for Civic Engagement, Campus and Community Life and the Center for Service and Learning; B.A., Baldwin-Wallace College, 1996; M.A., Bowling Green State University, 1999.

Lauren Chism, Director of Themed Learning Communities, University College; B.A., College of Charleston, 2000; M.S., Indiana University, 2003.

Jerome Clark, Lecturer, Computer and Information Technology, School of Engineering and Technology.

Lisa Contino, Senior Lecturer in Psychology, School of Science; Faculty Fellow, Center for Teaching and Learning; B.A., Indiana University, 1972; M.S., IUPUI, 1975; Ph.D., 2000.

Deborah DeMeester, Clinical Assistant Professor and Undergraduate Curriculum Coordinator, Department

of Adult Health, School of Nursing; B.S.N., Indiana University, 1979; M.S.N., 1990.

Aye-Nu Duerksen, Associate Director of English for Academic Purposes Program and Senior Lecturer, Department of English, School of Liberal Arts; B.A., Rangoon University; M.A., Macquarie University; Ph.D., Ball State University.

Kenneth Durgans, Assistant Chancellor for Diversity, Equity, and Inclusion.

Russell Eberhart, Professor of Electrical and Computer Engineering, Adjunct Professor of Biomedical Engineering, Department of Electrical and Computer Engineering, School of Engineering and Technology; Ph.D., Kansas State University, 1972.

Johnny Flynn, Assistant Professor of Religious Studies and Director of Native American Programs, School of Liberal Arts; B.A., University of California, Santa Barbara, 1984; M.A., 1987; Ph.D., 1991.

Pat Fox, Clinical Assistant Professor of Organizational Leadership and Supervision, School of Engineering and Technology.

Julie Freeman, Associate Director of Writing, Department of English, School of Liberal Arts; M.S. Ed., Indiana University, 1996.

Edward Gonzalez, Associate Librarian, University Library; Research Support and Liaison Librarian, Center for Research and Learning; B.A., University of San Diego, 1983; M.L.S., San Jose State University, 1991.

Michele Hansen, Executive Director of Research, Evaluation, and Planning, University College; Adjunct Associate Professor, Department of Psychology, School of Science; B.A., Michigan State University, 1993; M.A., Loyola University Chicago, 1998; Ph.D., 2001.

Julie Adele Hatcher, Associate Director, Center for Service and Learning; Faculty, Philanthropic Studies, School of Liberal Arts; B.S., Indiana University, 1975; M.S., 1988; Ph.D., 2008.

Rhonda Huisman, Assistant Librarian, University Library; B.S., University of South Dakota, 2001; M.A.E., Briar Cliff University, 2005; M.A., University of Missouri, Columbia, 2009.

Amy Jones Richardson, Assistant Director of Recruitment, Retention, and Academic Services, School of Liberal Arts; B.A., Wells College, 1982.

Susan Kahn, Director, Office of Institutional Effectiveness; B.A., Smith College, 1974; M.A., University of Wisconsin, Madison, 1975; Ph.D., 1981.

Pamela King, Director, Adaptive Educational Services; B.S., University of Cincinnati, 1973; M.A., 1974.

Francia Kissel, Senior Lecturer of English and First-Year Experience Coordinator, School of Liberal Arts; B.A., Butler University, 1973; M.A., 2001.

Claudette Lands, Assistant Dean of Student Support and Diversity, School of Education.

Sarah Lang, Clinical Assistant Professor and STEM Education Specialist, School of Science; A.B., Bryn Mawr College, 1995; B.S., University of Texas, Austin, 2000; M.A., 2004; Ph.D., 2008.

Kim Brian Lovejoy, Associate Professor of English, Director of the Graduate Certificate in Teaching Writing, and Editor of the Journal of Teaching Writing, Department of English, School of Liberal Arts; B.A., St. Michael's College, 1974; M.A., Purdue University, 1977; Ph.D., University of Missouri, Columbia, 1987.

Judy McBride, Senior Lecturer, Department of Mathematical Sciences, School of Science; Director of the Developmental Mathematics Program; B.A., Indiana State University, 1975; M.S., 1979.

Helen Meisenhelder, Visiting Lecturer, School of Engineering and Technology; B.S., United States Air Force Academy, 1990; M.S., University of Oregon, 1997; Ph.D., Loyola University, Chicago, 2002.

Janet Meyer, Advisor and Lecturer, Learning Community Coordinator, School of Engineering and Technology; B.S.Met.E., Purdue University, 1968; M.A., Catholic Seminary, 1974; M.S., Indiana University, 2009.

Mary Beth Myers, Registrar, IUPUI Office of the Registrar.

Peter Orono, Senior Lecturer, Freshman Engineering, School of Engineering and Technology; B.S., Makarere University College, Uganda, 1979; M.S., Texas Tech University, 1985; Ph.D., Wayne State University, 1991.

Tralicia Powell Lewis, Director for the Office of Student Rights, Responsibilities, and Conduct; B.S., Indiana University–Purdue University Indianapolis, 1995; M.S., Indiana University, 1999.

Ingrid Ritchie, Associate Professor and Director of Academic Affairs, School of Public and Environmental Affairs; B.S., Southwestern State University, 1972; M.S., University of Minnesota, 1973; Ph.D., 1980.

Denise Slayback-Barry, Lecturer in Department of Biology, School of Science; B.A., IUPUI, 1995; Ph.D., Purdue University, 2001.

Sherry Stone, Senior Lecturer in Foundation Studies, Herron School of Art and Design; B.F.A., Indiana University, 1975.

Kate Thedwall, Senior Lecturer, Department of Communication Studies, School of Liberal Arts; Director, Gateway to Graduation Program, University College; B.S., Mansfield University, 1974; M.A., University of Scranton, 1989.

Jessica Trinoskey, Assistant Librarian, University Library; B.S., Southern Illinois University, 1998; M.L.S., University of Illinois, 2002.

Mark G. Urtel, Assistant Professor, School of Physical Education and Tourism Management; B.A., Canisius College, 1990; M.S., Ball State University, 1992; Ed.D., Indiana University, 2003.

Marquita Walker, Assistant Professor of Labor Studies, School of Social Work; B.S., Drury University, 1998; M.A., Missouri State University, 2000; M.A., University of Missouri, Columbia, 2005; Ph.D., University of Missouri, Columbia, 2004.

Scott Weeden, Senior Lecturer and W131 Course Coordinator, Department of English, School of Liberal Arts; B.A., SUNY College at Oswego, 1979; M.A., University of Iowa, 1988; Ph.D., Illinois State University, 1998.

Kenneth Wendeln, Clinical Associate Professor of Management, Kelley School of Business; B.S.E.E., University of Notre Dame, 1967; M.B.A., University of Chicago, 1970; M.P.A., Indiana University, 2001.

Dawn Michele Whitehead, Director of Curriculum Internationalization; B.A., Indiana University, 1997; M.S., 2003; Ph.D., 2007.

Gail Williamson, Professor of Dental Diagnostic Sciences, Indiana University School of Dentistry; A.S., Indiana University, 1974; B.S., 1979; M. S., 1982.

Kathryn Wilson, Associate Professor of Biology, School of Science; Assistant Vice Chancellor for Research, IUPUI Office of the Vice Chancellor for Research; Director of the IUPUI Ronald E. McNair Scholars Program; B.A., University of Wisconsin, Madison, 1971; M.S. and Ph.D., Indiana University, 1976.

Robert Wolter, Senior Lecturer in Department of Computer, Information, and Leadership Technology, Organizational Leadership and Supervision Program, School of Engineering and Technology; A.S., Purdue University, 1995; B.S., 1997; M.S., Indiana University, 2002.

Michael Yard, Lecturer, Department of Biology, School of Science; B.S., Purdue University, 1985; M.S. (Neuroscience), Indiana University School of Medicine, 2009.

Robert Yost, Senior Lecturer, Department of Biology, School of Science; B.S., Lebanon Valley College, 1973; Ph.D., University of Pennsylvania, 1984.

Marla H. Zimmerman, Coordinator of Ph.D. Student Services and Adjunct Assistant Professor, School of Nursing; Licensed Clinical Social Worker; Licensed Marriage and Family Therapist; B.A., University of Florida, 1972; M.A., Ball State University, 1974.

Lecturers

Jan DeWester, Senior Lecturer, Department of Communication Studies, School of Liberal Arts; Academic Coordinator for Online Learning Communities and Summer Bridge Program Co-Director, University College; B.A., Purdue University, 1975; M.A., 1979.

Nancy Goldfarb, Visiting Assistant Professor, English and American Studies, School of Liberal Arts; B.A., Brandeis University, 1985; M.A., University of Michigan, 1989; Ph.D., 1994; M.A., IUPUI, 2005.

Sara Harrell, Lecturer, Department of English, School of Liberal Arts.

Deborah Keller, Lecturer, School of Education and University College; B.A., Purdue University, 1992; M.S., 1996; Ph.D., 2004.

Susan Meshulam, Senior Lecturer in Mathematics, School of Science; Math Coordinator for Summer Bridge Program, University College; B.S., IUPUI, 1980; M.S., Indiana University, 1983.

Leslie Miller, Lecturer, Department of English, IU School of Liberal Arts; Adjunct in University College; B.A., Southwest Texas State University, 1977; M.A., IUPUI, 2004.

Joan Pedersen, Lecturer and Career Development Specialist, University College; B.A., Duke University, 1970; M.Ed., University of New Hampshire, 1977; D.A.Ed., George Mason University, 1988.

David J. Sabol, Senior Lecturer, Department of English, School of Liberal Arts; Academic Coordinator for Learning Communities and Summer Bridge Program Co-Director, University College; B.S., Butler University, 1989; M.A., 1994.

Corinne Ulbright, Lecturer in Department of Biology and University College; B.A., Washington University in St. Louis, 1971; M.A., University of Texas, Austin, 1972; Ph.D., Washington University in St. Louis, 1980.

Courses

UCOL-U 110 First-Year Seminar (1-2 cr.) All learning communities share a common set of learning objectives that address issues of transition to the university environment. This first-year seminar is offered in a variety of formats, including a freestanding one credit course, a similar course linked to a general education requirement, and with the transition learning objectives embedded in a departmental introductory course. Learning communities are designed to assist entering students as they form connections with the IUPUI community, including other students, faculty, and advisors in a prospective major. Different learning community formats are sponsored by the various academic units, and the learning community may consist of a single course or a pair of linked courses.

UCOL-U 112 Critical Inquiry (1 cr.) This course facilitates the acquisition of collegiate academic skills for first-year students by identifying and applying strategies such as critical thinking, independent learning, reading, writing, and information management in relation to a specific academic discipline. Requirements and formats vary according to the introductory discipline course to which it is linked.

UCOL-U 200 Outdoor Leadership Experience (1 cr.) This course introduces students to the knowledge, attitudes, and inner resources needed to be an effective leader in their lives and in the outdoors. Participants will be involved with activities that require various degrees of teamwork, fun, trust, cooperation, and communication. Goals for each activity will be set by both students and instructors. Also, analogies will be made to real orientation and life situations whenever possible to demonstrate connections between learning and practice. Students will utilize their firsthand experiences to obtain the techniques needed to improve their leadership skills.

UCOL-U 201 Introduction to Mentoring Techniques (1 cr.) P: Must complete the application and selection process; must have acquired a mentoring assignment within an authorized University College program. This is an introductory course for students who will be serving

in their first semester (year) as a student mentor. This course is designed to provide a foundation of mentoring knowledge such as the history of, nature of, and skills associated with mentoring. This will be accomplished through readings, discussions, and activities. Mentors will also be introduced to information about the university structure, active learning exercises to define and develop their own mentoring styles and skills, and the diverse needs of undergraduate students. Attendance, class participation, purposeful integration of information, and self-reflective writings are essential for success in this course.

UCOL-U 202 Mentoring: Active and Collaborative Learning (1 cr.) P: UCOL-U 201; must have acquired a mentoring assignment within an authorized University College program. This course is designed to help mentors learn more about mentoring using a collaborative process that applies to both group and one-on-one mentoring. This course will expand the mentor's knowledge and skills by developing a deeper understanding of how students learn, collaborative learning techniques, and how to utilize collaborative learning to meet learning objectives in mentoring. Readings, discussions, and activities will be assigned in an effort to help mentors become acquainted with learning theory, techniques for engaging mentees in active learning, and refining their mentoring relationships.

UCOL-U 203 Mentoring: Leadership and Transition (1 cr.) P: UCOL-U 201 and UCOL-U 202; must have acquired a mentoring assignment within an authorized University College program. This course is designed to provide seasoned mentors the opportunity to explore and apply leadership theory and principles as they transition from their current mentoring role to the leadership of their individual mentoring program or other leadership opportunities on campus or in the community. Mentors will also be asked to develop plans for how their mentoring experiences can be applied to enrich their academic pursuits and career development.

UCOL-U 204 Mentoring: Independent Study (1 cr.) P: UCOL-U 201, UCOL-U 202, and UCOL-U 203; must have been awarded the University College Leadership Scholarship and acquired a mentoring assignment within an authorized University College mentoring program. This course is intended to provide seasoned mentors the opportunity to apply mentoring theories, knowledge, and experiences toward purposing or completing an independent research study on mentoring. The student mentor, with his or her component director and a faculty member, will develop the inquiry project.

UCOL-U 210 Career Connections (1 cr.) This course is designed to assist University College students in the major/career exploration and selection process. Especially targeted are students who are beyond their first year with less than 56 credit hours and who want or need to change majors or to declare a major. The course is designed to help students develop and execute a personalized plan of major and career exploration. This will be encouraged by using the first eight weeks of weekly class meetings to develop an individualized exploration contract and then using the second eight weeks to implement that plan outside of class. Students will also meet individually with the instructor and academic/career advisor. Through the course emphasis on experiential learning, students will be making connections with people, activities, and resources that will facilitate a more realistic approach to major/career decision making.

NSXP-Y 399 National Student Exchange (1-18 cr.) This course is for students participating in the National Student Exchange program.

IUPUI INDIANA UNIVERSITY PURDUE UNIVERSITY INDIANAPOLIS

IUPUC Campus Bulletin 2012-2014

Welcome to the Indiana University-Purdue University Columbus (IUPUC) Bulletin!

Mission

IUPUC is a leading resource in South Central Indiana for the university-based education of its citizens through excellence in teaching, scholarship, creative activity, and service which together yield competent and motivated graduates.

Reflecting the hopes and dreams of the community it serves, IUPUC aspires to be

- **Distinguished as a destination university of choice** for students seeking professional degrees or education in liberal arts and science, known for graduating students who are uniquely well-prepared for successful careers in the regional and global economies
- **Recognized as an institution of focused academic inquiry** guided by an outstanding faculty and staff who create a world class intellectual, creative, and scholastic experience in a small campus environment, and
- **Known internationally** as a uniquely creative, cost effective and nimble collaborator in the delivery of high-quality education solutions aligned with the needs of the learners and employers, and communities in South Central Indiana and beyond.

Overview

Established in 1970, Indiana University-Purdue University Columbus (IUPUC) is located one hour south of Indianapolis. While Columbus has a population of only 39,000, it is ranked sixth in the nation for architectural innovation and design by the American Institute of Architects. Visitors will find more than 60 buildings and pieces of public art by internationally noted architects and artists, including I.M. Pei, Eliel Saarinen, Eero Saarinen, Richard Meier, Harry Weese, Dale Chihuly, and Henry Moore. Columbus is also home to the Indiana University Center for Art and Design, which opened in 2011.

Students and faculty

IUPUC primarily serves students who live in Bartholomew, Brown, Decatur, Jackson, Jefferson, Jennings, Johnson, Ripley, Shelby, and other counties in southern Indiana, although it has begun to attract a growing number students from outside the state of Indiana.

In 2011-12, IUPUC served more than 1,700 undergraduate and graduate students. Many students complete their entire degree programs on the IUPUC campus. Other students complete their first year or two at IUPUC and then transfer to Indiana University-Purdue University Indianapolis (IUPUI) or Indiana University's Bloomington campus to complete degree programs that are not currently offered on the Columbus campus.

- About 60 percent of IUPUC undergraduate students carry a full-time academic load. In comparison, 75 percent of its graduate students carry part-time academic loads. At 61 percent, the majority of its students are 24 years of age or younger, although nearly 40 percent are 25 years of age or older. Nearly 70 percent of the undergraduate students are female, while males comprise nearly 60 percent of its graduate student population.
- IUPUC has 53 full-time faculty members, seven of whom are tenured and 19 of whom are tenure-track, as well as 125 part-time adjunct faculty. On average, they teach more than 90 online and 475 on-campus courses in Columbus each fall and spring. A small number of courses are also taught off-campus at learning centers in Seymour and Greensburg.
- IUPUC works closely with its educational partner, Ivy Tech Community College of Columbus, to develop articulation agreements so that students who hold associate degrees can apply those credits toward a bachelor’s degree.

The advantages IUPUC offers include: (1) a campus that is close to where its southern Indiana students live and work, making it geographically convenient; (2) the ability to earn prestigious IU and PU degrees in Columbus, and (3) an affordable, cost-effective alternative to relocating and/or commuting to campuses in Bloomington, Indianapolis, or elsewhere.

Degree programs

Currently, IUPUC offers undergraduate degree programs in business, education, mechanical engineering, general studies, liberal arts, nursing, and psychology and two graduate degree programs (Master of Business Administration and Master of Arts in Mental Health Counseling).

Closely affiliated with IUPUI, IUPUC affords students the opportunity to complete general education, elective, and some major courses at IUPUC and then transfer to IUPUI to complete degrees in areas that are not available on the Columbus campus, like informatics, physical education, health sciences, tourism management, public and environmental affairs, and other academic disciplines. IUPUC graduates also enroll in graduate programs in law, medicine, and other fields at IUPUI or other institutions.

In 2011, the Indiana Commission on Higher Education granted IUPUC approval to launch its second graduate program: The Master of Arts in Mental Health Counseling. Students are expected to begin this program in Fall 2012.

Regional focus

In addition, IUPUC has a long-standing tradition of partnering with key business and civic leaders to develop educational solutions aligned with regional needs. The university received a substantial grant from Duke Energy in 2011 for a regional outreach initiative to strengthen science, technology, engineering, and math (STEM) teaching and learning in K-6 school districts throughout southern Indiana.

Because the region IUPUC serves has a strong and growing niche in advanced automotive manufacturing, there is a growing need for professional engineers in the local workforce. To help meet that need, IUPUC launched a Purdue University Bachelor of Science in Mechanical Engineering (BSME) in 2011, making it the only university in the southern half of the state to offer a four-year degree in engineering. The new program will be fully developed in collaboration with faculty and staff at Indiana University-Purdue University Indianapolis (IUPUI) and Purdue University. With support from two private funding sources, IUPUC was also able to establish an endowed scholarship for women engineers in 2011.

Although many IUPUC students begin their studies in Columbus and transfer to IUPUI or other campuses to complete their degrees, data indicates that most IUPUC graduates have deep roots in the region. The majority of its graduates have lived, worked, and raised families in southern Indiana for generations.

Graduate Programs

Undergraduate Programs

IUPUC Programs

Undergraduate Certificate Programs

Certificate programs resemble minors but generally require more credit hours. Some certificate programs are stand-alone programs, which means that a student does not have to be working toward a two- or four-year degree to complete a certificate program. Specific requirements can be found in the section for the division offering the certificate.

Bachelor's Degree (Baccalaureate) Programs

The typical undergraduate degree program is either a bachelor of science or a bachelor of arts degree. The degree takes four years for full-time students and substantially longer for part-time students. IUPUC's baccalaureate degrees are awarded in the professional divisions and within the arts and sciences.

Master's Degree Programs

Outstanding students wishing who wish to continue their education may begin graduate work after the completion of their bachelor's degrees. Most master's degree programs require applicants to take standardized national examinations. To be considered for admission, a four-year baccalaureate degree or its equivalent from an accredited institution is required.

Graduate Programs

Undergraduate Programs

IUPUC Programs

Graduate Programs

Outstanding students wishing to continue their education may begin graduate work after the completion of their bachelor's degrees. Most master's degree programs require applicants to take standardized national examinations. The **IU MBA Columbus** program requires students to take the Graduate Management Admission Test (GMAT) (www.gmat.org) and the **Master of Arts in Mental Health Counseling** program requires students to take the Graduate Record Examination (GRE) (www.ets.org/gre) as part of the admission process. To be considered for admission to either program, a four-year bachelor's degree or its equivalent from an accredited institution is required.

Master's Degrees

Master of Business Administration

The M.B.A program at Columbus is a 45 credit hour general management degree program. Courses are sequenced to maximize learning potential while balancing the work load to accommodate the needs of working students. To be considered for admission, a four-year bachelor's degree or its equivalent from an accredited institution is required. While an undergraduate business degree is not required, some preparatory work in mathematics, computing skills, and a business foundation, such as accounting and statistics, is expected. If such course work has been taken but is older than five years, demonstration of currency will be required and may be provided by taking Indiana University or Purdue University undergraduate courses, as suggested below, and earning above-average grades. The student is required to submit scores of the Graduate Management Admission Test (GMAT), which must be taken within the five years prior to applying to the program. If applicable, the student is also required to submit scores of the Test of English as a Foreign Language (TOEFL) and/or take the IUPUI language examination.

Master of Arts in Mental Health Counseling

The Master of Arts in Mental Health Counseling at IUPUC is a 60 credit hour program that will prepare graduates to become Licensed Mental Health Counselors (LMHC). Courses are offered in sequences that will allow students to complete this IU degree in two years or three years. Included in the 60 credit hours are field experiences with a 100-hour practicum, 600-hour internship, and 300-hour advanced internship, with 100 hours of face to face supervision. The program is rigorous in academic challenge and students will need to allow ample time for class preparation and the practica and internships. Students and faculty will work closely together during academic preparation and practicum training. To be considered for admission, applicants must have an undergraduate degree from an accredited university with at least 15 credits in psychology or behavioral science courses. Applicants must take the Graduate Record Examination (GRE), including verbal, quantitative, and analytical writing sections, and a minimum score of 500 on each section is preferred. Completion of the GRE Psychology Subject Test is recommended and good

scores will provide an advantage.

IUPUC Programs

Undergraduate Programs

Division of Business

The Indiana University-Purdue University Columbus Undergraduate Program in Business provides opportunities for breadth of education as well as for a reasonable amount of specialization. Consistent with the American Assembly of Collegiate Schools of Business (AACSB) perspective, the school subscribes to the principle that a significant portion of a student's academic program should be in general education subjects, complemented by study in the basic areas of business administration. This assures the planning of balanced study programs while enabling a student with an interest in one or more of the professional areas of business to specialize in those fields. Courses and assignments expose students to ethical decision making, diversity, corporate social responsibility, and international business.

Bachelor of Science Degree Programs

Bachelor of Science in Business Administration with a Concentration in Accounting

The accounting curriculum prepares students for careers in corporate accounting, auditing, management consulting, taxation, and accounting for governmental and nonprofit organizations. In addition, it equips the future business executive with tools for intelligent analysis, planning, control, and decision making. The accounting curriculum helps students prepare to pass the Certified Public Accountant (CPA) exam and Certified Management Accountant (CMA) exam, and provides an excellent foundation for students who want to pursue graduate work in business, public administration, or law.

Bachelor of Science in Business Administration with a Concentration in Finance

As the most common professional background among the CEO's of the Fortune 500 (Stuart Scott, 2011), Finance as a body of knowledge allows students and practitioners to understand the value of business activities, and how to decide which activities to pursue. Finance as an academic concentration explains the connections between business activity, societal utility, money, and the capital markets. Every day, business managers, investment managers, bankers, and individual investors around the globe make choices about buying, selling, or holding assets and liabilities, and the field of Finance comprises the study of how these resources are best allocated and managed. Knowledge learned in the area of Finance allows a business manager to understand how to measure the value of their resources, providing a basis for the manager to invest in business projects, to manage debt, or to reward shareholders with a dividend.

Concepts learned in finance will apply to business management, investment management,

and personal financial acumen. Financial analysis and study will involve other areas such as marketing, forecasting, risk assessment, and psychology.

Bachelor of Science in Business Administration with a Concentration in Management

Society recognizes the importance of understanding both management itself and the complex nature of the organizations—in business, government, hospitals, and universities—in which managers operate. The faculty is concerned with improving this understanding through the study of strategic management, organizational theory, and human resource development.

The undergraduate courses offered in this major are concerned not only with the broad aspects of management and organization, but also with developing skills for dealing with problems of a global business environment and the increasingly complex problems of human resource allocations.

Bachelor of Science in Business Administration with a Concentration in Marketing

The study of marketing concerns all activities related to the marketing and distribution of goods and services from producers to consumers. Areas of study include customer behavior, the development of product offerings to meet consumer needs, pricing policies, institutions and channels of distribution (including retailers and wholesalers), advertising, selling, sales promotion, research, and the management of marketing to provide for profitable and expanding businesses.

The marketing curriculum endeavors to provide the business community with broadly trained men and women who can approach problems with a clear understanding both of marketing and of the interrelationships between marketing and other functions of the firm. Students planning careers in marketing management, advertising, sales, sales management, retailing, wholesaling, marketing research, or distribution normally major in marketing.

Minors

Business

A minor in business can be a valuable addition to any major. The study of business will help you in your roles as a citizen, consumer, and employee. It will accentuate your decision-making skills, help you understand and improve processes, give you the tools to manage people, and broaden your perspective in the workplace beyond your role as an individual. A business minor can be particularly worthwhile for students who may someday hope to run their own business.

Undergraduate Programs

Division of Continuing Studies

The Bachelor of General Studies Degree (BGS) reflects the commitment of Indiana University and the state of Indiana to meet the educational needs of adult citizens. The BGS at IUPUC extends to students the opportunity to pursue a college education regardless of their work schedules, domestic responsibilities or location.

The General Studies Degree Program is specifically designed for students who want a degree that combines IU's high academic standards with a great level of flexibility and convenience. The BGS allows students to customize their own degree programs. Students may select courses from a broad range of subjects to tailor their course work to personal interests, goals, or career needs. Earning a degree in general studies allows students to apply for and pursue advanced degrees in a variety of fields, increase earnings, advance in careers, build confidence, and become role models for their children.

Degree Program

The core of each general studies degree is a broadly based education encompassing the arts and humanities; the social and behavioral sciences; and mathematics and natural sciences. The curriculum expands students' body of knowledge and awareness of major areas of human experience.

Bachelor of General Studies

The General Studies Degree Program is specifically designed for students who want a degree that combines IU's high academic standards with a great level of flexibility and convenience. The Bachelor of General Studies allows students to customize their own degree programs. Students may select courses from a broad range of subjects to tailor their course work to personal interests, goals, or career needs.

Division of Education

The mission of the Indiana University School of Education at Columbus is to improve teaching, learning, and human development in a diverse, rapidly changing, and increasingly technological society. We prepare reflective, caring, and highly skilled educational practitioners and scholars who lead in their chosen professions; participate in dialogue and inquiry into school change; and work in partnership with a range of constituents to improve teaching and learning at the local, national and international levels. To serve the region in which it is situated, the IUPUC Education Programs focus on Learner Centered Education within the context of a professional community and facilitate post-secondary investigations into the teaching profession. Students will recognize the interdependency of professionals within the educational community and will come to regard teaching as a complex, multidimensional act that requires many different types of knowledge, interactions, behaviors and decision-making abilities.

Undergraduate Programs

Division of Mechanical Engineering

The Purdue University Bachelor of Science in Mechanical Engineering (BSME) program at IUPUC offers a unique engineering education. In the spirit of a responsive, regional campus, IUPUC is focused on ensuring student success and meeting the educational needs of southeastern Indiana. Graduates are well-prepared for employment with major employers in the local market and beyond. They also have a firm foundation for graduate study and pursing master's and Ph.D. degrees in diverse engineering disciplines.

The BSME program builds on the fundamental principles of science and engineering, including engineering theories, concepts, and practical applications so graduates have the skills to serve as innovative leaders and highly competent professionals.

Why choose a mechanical engineering career?

- Mechanical engineering is an exciting discipline, with great potential for careers in traditional fields like propulsion, power generation, and automotive engineering as well as emerging enterprises, such as sustainable design, energy conversion, biomedical and forensic engineering, and advanced nanoscale materials. In the complex, ever-evolving world in which we live, the field of mechanical engineering offers tremendous opportunities!
- The skills required for mechanical engineers are diverse and emphasize the ability to work in collaborative design teams, technical competence, having a global perspective and an entrepreneurial spirit, sound managerial ability, and an understanding of societal forces governing new product development and the marketplace.
- BSME students at IUPUC may have the opportunity to minor in business or math, which can make a significant impact on post-graduation employment.
- Student research and internship opportunities with major employers in the engineering and advanced manufacturing sector are available for IUPUC's BSME students. Seniors in the program will complete design projects sponsored by local industry, for example, providing them with a professional experience requiring real-world problem-solving and the need to effectively communicate ideas and results—all before they graduate and enter the workplace.
- Mechanical engineers are in demand. Average entry-level salaries for mechanical engineering graduates are nearly $59,000, according to the National Association of Colleges & Employers.

For more information:

If you have questions about the BSME program at IUPUC or would like more information, please call 812.348.7271 or e-mail engineering@iupuc.edu. For additional information,

including required coursework and information on careers in engineering, you may also visit IUPUC's Mechanical Engineering program online.

Undergraduate Programs

Division of Liberal Arts

A liberal arts education begins with the premise that one's world and one's self are at the core of the pursuit of knowledge. It leads to viewing the world from more than one perspective and learning something about its social, cultural, intellectual, and spiritual dimensions. Those different perspectives within the liberal arts encompass two major groups of academic disciplines: the humanities, which explore the history and experience of human culture; and the social sciences, which examine the social and material foundations of human life.

Regardless of the perspective, the focus in the liberal arts is on knowledge itself, on both its substance and the tools for pursuing it, on what is known and what is worth knowing. Skills for acquiring and generating knowledge, as well as the preservation of knowledge, are contained within the School of Liberal Arts curriculum.

The following liberal arts programs are jointly offered by IUPUC and IUPUI. Successful IUPUC students automatically have access to specialized courses on the Indianapolis campus required for graduation.

Anthropology

Anthropology is the study of human culture, biology, and social interaction across time and place. It includes the archaeological investigation of past and present human material culture; ethnographic study of contemporary cultures around the work and in the United States; research into human evolution and the origins of human physical diversity; and analysis concerning the origins, structure, and social use of language.

Communication Studies

Communication studies is an integral part of the liberal arts. The curriculum focuses on communication theories, methods, and competencies from a variety of contexts: rhetorical symbolism, public address, organizations, family, health, media, and theatre. The department offers a diverse curriculum for majors, minors, and service courses for other departments and units within the university. Students learn about the communication process inherent in the areas of interpersonal, group, organizational, public, and media studies.

Communication course work assists students in enhancing their critical inquiry, oral performance, media and message design, problem-solving, and relational conversation skills. A foundation is provided for graduate work in various areas of communication studies, humanities, and/or social science and in professional programs such as law, business, health, and social work. Course work also assists those students pursuing career

fields that apply communication principles: public relations, marketing, video or film production, corporate media production, training and development, human resources, public affairs, and special events planning.

English

The English major is an exciting journey into the study of language, literature, and our culture. The major is divided into six different concentrations: Creative Writing, Film Studies, Linguistics, Literature, Writing and Literacy, and Individualized Studies. Many of the courses required for a major in English with a concentration in Literature or Creative Writing are available at IUPUC. See the listing of degree programs (majors and minors), and the list of degree requirements and course descriptions for a more detailed view of the options in English.

Geography

Geographers study the connections between the landscapes they see and the forces that shape them. No matter what they're studying - a deceptively fragile rainforest, the silent diffusion of a disease, or the creeping sprawl of a suburb - geographers ask three basic questions: (a) Where are things located? (b) Why are they there? and (c) How do they interact with the world around them? Where, why, and how: three commonplace interrogatives that help chart a path through the maze of places and processes, change, and continuity that give our world its hues, tastes, and sounds. Where the historian sees order in the past, the geographer seeks a rationale for the location of things in their place.

History

A history major makes a fine foundation for a career in politics, activism, law, or journalism. Many students find the stories of the past—whether they involve ancient Greece or modern Africa—to be an exciting field of study. If that's you, be prepared for lots of critical thinking and a great deal of research—because historians are good at digging up information, remembering it, and finding patterns.

Philosophy

Philosophic inquiry aims, ultimately, at a general understanding of the whole of reality. It draws on the insights of the great historical philosophers, on what has been learned in all other major fields of study, and on the rich perspective embodied within our ordinary ways of thinking. Philosophers address a diverse array of deep, challenging, and profoundly important questions. Examples include the nature of the self and of personal identity; the existence or nonexistence of God; and the nature of such phenomena as time, mind, language, and science.

Political Science

Politics is about power: who has it and how it is used. The study of political science provides students with an understanding of the many different and intriguing ways in which power is given, taken, distributed, limited, manipulated, and used, and helps them better appreciate and understand the many different forms taken by systems of government around the world.

Religious Studies

The discipline of religious studies offers students opportunities to explore the patterns and dimensions of the many different religious traditions of the world from the perspectives of the academic study of religion. The courses are designed to help students develop basic understandings of the many ways in which religions shape personal views of the world,

create and sustain the communities in which we live, and interact with politics, economics, literature and the arts, and other structures of society.

Sociology

Human beings are social animals. We live in groups and do most things with other people. Much of what we think, say, and do is influenced by what others expect of us and by how others treat us. Sociologists study the patterns of interaction between people in all sorts of settings: at work, at play, at home, etc. They try to clarify what is going on, what lies behind it, what is likely to come from it, and what might be done differently. Their theories and research findings can provide insights into processes and events that affect us in our everyday lives.

Perhaps you have wondered why some families get along fine while others seem mired in problems, why some people get involved in criminal careers while others resist temptations, why some companies are much more productive than others, why some government programs succeed while others backfire. These are the kinds of issues sociologists look into in systematic ways.

Division of Nursing

The IUPUC Division of Nursing is a part of Indiana University School of Nursing, the largest school of its kind in the nation and one of the most respected multi-program nursing schools in the world. Our Bachelor of Science in Nursing program is designed for students who wish to enter nursing for the first time. The RN to BSN option is designed especially for Registered nurses (RNs) who hold an associate degree (ASN) or a nursing diploma.

Division of Science

Bachelor of Arts/Bachelor of Science in Psychology

Psychology is a science that studies behavior and mental processes, including perceptions, thoughts, feelings, and actions. Understanding human behavior is essential for improving the quality of life of individuals and improving relationships within and between societies.

There are many areas within psychology and many types of psychologists. Although about half of all psychologists work to help people with psychological problems, others seek new knowledge or apply their understanding of psychology to solve problems and improve the way things work. Research psychologists seek new knowledge using the scientific method to describe, predict, and understand behavior and mental processes. For example, developmental psychologists study how infants acquire language skills, psychobiologists investigate how brain function influences drug addiction, and social psychologists study how peer pressure influences decisions. Research psychologists often teach in colleges and universities.

Applied psychologists use psychological principles to help change behavior and solve real-world problems. For example, school psychologists help children adjust academically and socially, industrial/organizational psychologists suggest how companies can improve employee morale, human factors psychologists determine the best place to put gauges in an airplane cockpit, and clinical psychologists help people change their thoughts and behaviors to relieve anxiety or depression. Some applied psychologists also teach in colleges and universities and some engage in research.

Bachelor of Arts/Bachelor of Science Degree Requirements

Certificates

IUPUC offers a certificate in Case Management and a Certificate in Substance Abuse Counseling and Prevention. These certificates, which can help students prepare for positions as Case Managers and Substance Abuse Counselors, are available to students whether or not they are majoring in psychology.

IUPUC Programs

Undergraduate Programs

Other Areas of Study at IUPUC

The following is a list of programs offered jointly by IUPUC and IUPUI. Successful IUPUC students automatically have access to specialized courses on the Indianapolis campus that are required for graduation. Support for these programs is provided by University College resident staff.

Engineering

Engineering students learn the principles and theories needed to plan, design, and create new products. Engineering students use broad analytical skills in achieving engineering solutions.

Computer Engineering, B.S.

The computer engineering program is designed to prepare students for careers in the commercial, government, and academic sectors, where computer engineering expertise is needed in hardware and software design, information processing, circuit and electronic design, control and robotics, communications and signal processing, biomedical engineering, energy systems, and manufacturing.

Electrical Engineering, B.S.

The electrical engineering program prepares students for career opportunities in the hardware and software aspects of design, development, and operations of electronic systems and components, hardware and software design, control and robotics, communications, digital signal processing, and energy systems.

Informatics

The emerging field of informatics is the study and application of information technology to the arts, sciences, and professions. Informatics also examines how people and organizations work with and use information technology. The Bachelor of Science in Informatics program provides students with a firm grounding in the social and technical aspects of advanced technologies. In addition, students must complete a cognate area program of study in a field outside of informatics. The expanding list of fields includes biology, chemistry, computer science, computer technology, economics, English and technical communication, geography, health science, journalism, mechanical engineering, new media, and fine arts.

Health Information Administration, B.S.

Health information administrators collect, interpret, and protect health data and determine how data are used. They are managers and information specialists who frequently interact

with other members of the medical, financial, and administrative staffs. It is their responsibility to ensure that the information system is protected and driven by accurate, up-to-the-minute information.

Labor Studies

Labor studies is an interdisciplinary field that deals with work, the workplace, and workers and their organizations. It draws from the fields of history, economics, industrial relations, political science, law, sociology, communication, and philosophy, as well as other disciplines. As an academic discipline, labor studies educates workers and future workers to strengthen the labor movement and provide a richer understanding of its functions in society. Indiana University faculty teach the essential tools for the advancement of trade unionism with the view that the efforts of working people to achieve workplace equity is central to the development of our nation and, indeed, the world

As a program, labor studies enables participants to serve more effectively as members and leaders in their organizations. Participants can also gain a sense of the past and present contexts of work and unionism. Because labor leaders need to be familiar with economics, communications, and other subjects, labor studies can assist them in mastering a broad range of learning. Degree Programs:

- Certificate in Labor Studies
- Associate of Science in Labor Studies
- Bachelor of Science in Labor Studies

Public and Environmental Affairs

This discipline is dedicated to applied interdisciplinary learning combining the study of public affairs and environmental sciences. The following areas are covered by this discipline: criminal justice, environmental science and policy, finance and economics, law, nonprofit management, policy and administration, public safety, and urban affairs.

Criminal Justice, B.S.

A degree in criminal justice gives students a broad understanding of the operations of the criminal justice system. Students take courses in research methods, criminological theory and policy, criminal law, courts, corrections, and policing. Students may also study such specialized topics as homicide, terrorism, juvenile justice, and cyber crime. A criminal justice major is a great option for any student who is interested in the criminal justice system or law, wants a rewarding career that involves helping others, and enjoys working and interacting with people.

Public Affairs, B.S.

The Bachelor of Science in Public Affairs provides students with an overview of the issues that engage the public and nonprofit sectors such as: (1) how organization and management differ among sectors, (2) the tools required to solve public problems and undertake leadership roles in the community, and (3) the policy processes that lead to effective decision making.

Tourism, Conventions and Event Management

Graduates of this program are qualified to be employed in different segments of the tourism industry: research, destination development, adventure travel, festivals, events, travel management, entertainment, attractions, transportation, accommodations, and/or food operations.

Tourism, Conventions, and Event Management, B.S.

This program emphasizes tourism research and meeting, special events, and sporting event planning to prepare graduates for management positions in a variety of profit and not-for-profit tourism organizations.

Undergraduate Certificate Programs

Certificate programs resemble minors but generally require more credit hours. Some certificate programs are stand-alone programs, which means that a student does not have to be working toward a two- or four-year degree to complete a certificate program. Specific requirements can be found in the section for the division offering the certificate.

Bachelor Degree (Baccalaureate) Programs

The typical undergraduate degree program is either a bachelor of science or a bachelor of arts degree. The degree takes four years for full-time students, and substantially longer for part-time students. IUPUC's bachelor degrees are awarded in the professional divisions and within the arts and sciences.

Admission

The best and most complete information source on admission standards and procedures is the IUPUC Admissions Guide and Application., which is published annually. It contains an application form, fee schedules, detailed instructions, numbers to call, and the relevant deadlines.

Zachary's Law

The state of Indiana maintains a registry of individuals who have been convicted of sex offenses committed against minors. As a number of degree programs and specific courses either prepare students to work with minors or place them in contact with minors as a part of the course, enrollment in those courses or programs is not available to anyone who appears on the Sex Offender Registry. Consult individual division sections to see if appearance on the registry will be a barrier to enrollment.

Criminal Activity Disclosure

IUPUC is committed to maintaining a safe environment for all members of the university community. As part of this commitment, the university requires applicants who have been convicted of any felony or a misdemeanor such as simple battery or other convictions for behavior that resulted in injury to a person(s) or personal property to disclose this information as a mandatory step in the application process. A previous conviction or previous conduct does not automatically bar admission to the university, but does require review. For more information visit the Admissions website.

Admission

Adult Special Student

You may apply as an adult special student if you wish to take a course for self-enrichment or if you are sponsored by your employer to enroll in a specific IUPUC course. You are strongly encouraged to discuss your plans and previous education with an admissions counselor before filing an application. Permission to enroll is usually for one term.

You are **not** eligible for financial aid as an adult special student.

If you wish to enroll in mathematics or English courses, you must either have completed a transferable (non-remedial) college course in that academic area or complete the IUPUC placement tests.

Required Credentials and Qualifications

1. You must be 21 or older.
2. You must provide a photocopy of your diploma, high school transcript, or GED results.
3. If you previously attended college, you must not have enrolled anywhere for the past three years and you must provide photocopies of grade reports or a college transcript.
4. If you are being sponsored by an employer and you are not able to obtain the above documents, you may submit a letter of sponsorship from your employer.

Please visit admissions for application.

International Students

The best guide to international admission standards and procedures is the "International Undergraduate Application for Admission." This pamphlet is revised annually and contains an application form, financial support agreement form, estimated tuition and living expenses, English language proficiency requirements, detailed instructions, numbers to call, and relevant deadlines. The Office of International Affairs Web site (www.international.iupui.edu) provides information on admissions for international undergraduates and graduates, links to the online applications, downloadable and printable application and financial support agreement forms, and links to Web sites of other offices.

Admission Requirements

The admission requirements for students hoping to enter an associate, bachelor bachelor's, or certificate program as either a beginning or transfer student are described below. Depending upon the admission requirements of their desired programs, students will be considered either for admission to University College or for dual admission to University College and the division of their intended program. Regardless of the admission category, beginning undergraduate students and most undergraduate transfer students will have the benefit of the University College Orientation program.

Primary and Secondary Education

Beginning undergraduate applicants should have completed the primary and secondary education system of their own country. The U.S. primary and secondary education system consists of 12 years of study. IUPUC expects that applicants from other countries will have studied for a similar number of years in primary and secondary school to be eligible for university admission.

Pre-primary education is not included in this total number of years. However, applicants from countries with at least 11 standard years in the primary and secondary system may be considered if they have achieved a strong academic record and can submit the final, official school-leaving certificate.

Applicants applying from abroad are expected to have reached their 18th birthdays **no later** than the end of their first semester of study here.

Applicants from countries with more than 12 years of primary and secondary study may qualify for advanced standing.

Secondary school programs should have included study of a student's native language, English or other foreign languages, mathematics, natural and/or physical science,

humanities, and social sciences.

General Certificate of Secondary Education

Applicants from British-style systems must have earned at least six GCSE (General Certificate of Secondary Education)—or their equivalents—0-level passes, including passes in English and mathematics. GCE (General Certificate of Education) Advanced A-level results may be considered to yield credit for advanced standing where the grade earned is D or higher.

Students with 0-level certificates who do not meet the minimum age requirements are encouraged to continue their studies to earn A-level certificates prior to applying to IUPUC.

Undergraduate Programs

Admission

Freshman Admission and Qualifications

IUPUC offers beginning freshmen enrollment as degree-seeking or visiting students.

Degree-Seeking Students

If you wish to enter an undergraduate certificate, associate, or bachelor bachelor's degree program, apply as a degree-seeking student (even if you are unsure of which degree program). As a beginning freshman, you must not have enrolled in any college, business, or vocational school after high school graduation.

For a beginning student, we will examine your high school record including courses completed, grades earned, and standardized test results. The trend in your grades and the difficulty of your courses are also important. The most important factors in our decision will be the courses you attempted and the grades you earned.

High School Graduates Admission Requirements Regular Admission

- Graduated from high school or will graduate before enrolling at IUPUC.
- Provide the results of your SAT or ACT, and the required writing section of the test.
- Indiana high school graduates are expected to complete Core 40. (Academic Honors diploma is highly encouraged.)

For students who have completed Core 40 with a C average or higher in all Core 40 courses, SAT combined math and verbal (critical reading) combined scores should be 900 or higher; ACT composite should be 19 or higher.

Applicants who have earned Academic Honors diplomas will be considered fully qualified regardless of test scores; however, scores must be provided.

We recommend that all high school students complete the following: four years of English; three years of mathematics (including second year algebra), three years of social sciences; three years of laboratory science; four years of additional college preparatory courses selected from English, mathematics, social sciences, laboratory sciences, or foreign language.

Returning adult students should note that SAT or ACT scores are not required and, although a high school transcript is required, the admissions committee also considers such things as military experience, life experiences, and job responsibilities when reviewing applications.

Conditional Admission

If you do not meet the above criteria, you will be considered for conditional acceptance based on other factors that will indicate your potential for success at IUPUC: overall quality of your high school course work, work experience, maturity, and military service.

If you have significant deficiencies in either academic preparation or performance, we will defer your acceptance until you complete designated courses at Ivy Tech or another two-year college. A deferral contract outlining the courses to complete will be sent to you.

GED Admission Requirements

Students enrolling at IUPUC who have not attended college after earning a GED are considered beginning freshmen students. The following are the admission requirements:

- Earned the GED with a score of 53 (530 on new scale) or higher. If your GED score is below 53 (530), you may be deferred to the Community College of Indiana. (See above section on conditional admission.)
- If you are under 19 years of age, you must provide the results of an ACT or SAT I test.

Visiting Students during Summer after Graduation

Students graduating from high school may enroll at IUPUC as a visiting student for the June summer session. As a student applying under this status, you must do the following:

- Verify with the Admissions Office of the institution you will attend in the fall that they will accept the course credits.
- Submit an IUPUC application as a visiting student.
- Submit a copy of your high school transcript and test scores.
- Submit a copy of your letter of acceptance.
- Submit the application fee.

Note:

1. Visiting students are not eligible for financial aid, according to federal regulations.
2. If admitted, you must complete IUPUC placement tests in mathematics and/or writing. These must be done before you can register for classes.
3. You may apply only for the June semester and you are encouraged to do this no later than the end of May.

Qualifications

1. If you will attend IU Bloomington, IUPUI, or Purdue West Lafayette in the fall, provide a photocopy of your letter of acceptance. A high school transcript is not necessary. You will be offered acceptance based upon proof of your acceptance to either campus.
2. If you are attending any other college in the fall, provide a high school transcript and SAT/ACT scores. Beginning in March 2005, students taking the SAT I or the ACT must take the essay component and have all scores reported to IUPUC. You must meet our admission requirements for entering freshman.

To apply under either of these please complete the application through admissions.

Transfer Admission and Qualifications

Transfers from Other IU Campuses

Students who are eligible to transfer to IUPUC as degree candidates from another campus of Indiana University must meet the degree requirements of the IUPUC division from which they expect to graduate. Students who plan to obtain a degree from another campus should contact and remain in contact with the dean of their prospective school for specific information on course, degree, and residency requirements.

A student at another Indiana University campus, whether coming to IUPUC on a temporary or permanent basis, should contact the IUPUC Office of Admissions for help in beginning the intercampus transfer process.

If a student has earned college credits after leaving the IU campus, the student must provide an official transcript and contact the IUPUC Admissions Office, requesting that the new courses be evaluated for transfer credit.

If a student at another Indiana University campus is not in good standing and wishes to attend IUPUC, he or she should contact the IUPUC Office of Admissions for an explanation of the procedures.

Transfers from Other Purdue Campuses

A Purdue University student from another campus must complete an official undergraduate application through the IUPUC Office of Admissions. If credits have been earned outside of Purdue, an official transcript from the non-Purdue schools must be provided. An application fee does not need to be paid.

Note: Courses with grades from C– to D from other Purdue campuses will appear on the IUPUC transcript. The grades are not calculated in a student's IUPUC GPA; however, individual divisions and programs may choose to use the courses to satisfy degree requirements.

Transfers from Other Universities

A student from any other college or university must complete an official undergraduate application through the IUPUC Office of Admissions. Applicants are required to provide official transcripts from all post-secondary institutions they have attended.

Transfers from Universities with Articulation Agreements

IUPUC has increasing numbers of articulation agreements with Ivy Tech Columbus and other Ivy Tech campuses that permit courses taken at Ivy Tech to transfer to IUPUC with a grade of C or higher. Effective dates for each course are listed, but no courses completed prior to the fall 1990 semester will transfer.

Passport to IUPUC

Passport to IUPUC is a program created by Indiana University-Purdue University Columbus (IUPUC) to facilitate the transfer of Ivy Tech State College Columbus courses and associate degree credits toward several IUPUC baccalaureate bachelor's degree programs. The Passport program makes it easy to continue your education and become an IUPUC student.

IUPUC offers transfer students two categories of undergraduate admission (degree-seeking and visitor).

Degree-Seeking Students

If you wish to enter an undergraduate certificate, associate, or bachelor bachelor's degree program, you will apply as a degree-seeking student (even if you are unsure of which degree program).

Admission Standards General Policy

For regular admission you must have a cumulative grade point average of 2.0 on a 4.0 scale and be eligible to return to your previous college. If you do not have a 2.0 or you are not eligible to return to your former school, you must sit out for one regular semester*. Summer sessions do not count. If you have been dismissed twice, you must be out of school for two full semesters. Please mail a statement with your application explaining what caused the low grades and how you will approach your studies at IUPUC.

Admission on Probation

If your grade point average is below 2.0, you will be considered for admission on probation provided you have met or are meeting the required time out of school. In some cases students with a GPA below 2.0 will be required to file a petition and/or complete an interview. After reviewing your application, the Undergraduate Admissions Office will advise you if you must take these steps. We encourage you to apply at least three months in advance of your proposed starting date.

Credentials needed:

- Official college transcript from every college attended. An official copy is one that has the embossed or raised seal of the school. Fax copies, photocopies, and grade reports are not considered official.
- High school transcript or GED if you have fewer than 26 hours of transferable work. (We will accept a faxed high school transcript provided it is sent directly from the high school with the school fax number on the faxed pages.)

Please note that you are responsible for mailing the request to your former colleges and paying whatever fee is charged. Purdue students and Ivy Tech Indianapolis students do not have to order transcripts; however, if you have attended other colleges, you must request those transcripts.

Transfer Credit

The grades from all course work previously completed are considered in the admission process.
Most divisions require a minimum GPA of 2.0 to be considered for admission; some divisions have a higher GPA requirement. Other factors may also be considered, including space available in the program, the specific course work completed, recent grades, and disciplinary standing.

Course work done outside of the IU system with grades of C (2.0) or better are transferred for possible use toward an IUPUC degree. No courses with grades of C– or lower will transfer to IUPUC. None of the grades transferred from other colleges or universities count in the IUPUC grade point average. Some divisions, however, may consider such grades for admission purposes and other academic matters.

How accepted credit is applied to program requirements is determined by the division and/or department that offer the course(s). Courses that were completed 10 years ago or even more recently may not be accepted in some programs and must be approved by the individual division awarding the degree.

Course work taken at another institution for which there is an equivalent Indiana or Purdue University course (in terms of course description, level, and prerequisites) will generally be transferred as credit in the equivalent courses. Other course work will be transferred as undistributed and reviewed by the appropriate division to determine how it will be counted toward degree requirements. In addition, the university does not accept the transference of special credit by examination awarded by another college or university.

Courses taken at another institution on a quarter system rather than a semester system will be evaluated as carrying fewer credit hours (e.g., a 3 credit hour course taken on a quarter system will transfer as 2 credit hours).

Visiting Students

If you are working on a degree from another institution and wish to take courses at IUPUC, apply as a visiting student. You are responsible for verifying that your home institution will accept the course credits. Your permission to enroll is for one term; however, an admissions counselor can authorize enrollment for additional terms if you are completing your final courses for a degree or if you are in the area on an internship or co-op program. You are not eligible for financial aid as a visiting student.

If you wish to enroll in mathematics or English courses, you must either have completed a transferable (non-remedial) college course in that academic area or you must complete the IUPUC placement tests.

Students at Other IU Campuses

Students working on degrees at other IU campuses who wish to register for courses at IUPUC one semester should complete the VISITING intercampus transfer online through admissions.

Required Credentials and Qualifications

- Must be a current college student (enrolled within the last 12 months). If you have not enrolled within the past 12 months, provide a letter from either the dean or your academic advisor at your home institution stating that you have permission to transfer credits from IUPUC to the degree program.
- Provide a photocopy of your most recent grade report or transcript.
- Have a cumulative grade point average of at least 2.0 on a 4.0 scale. (Purdue students are eligible regardless of grade point average provided they are not on drop status.)

When to Apply

You may apply as early as one year in advance of your proposed enrollment.

If you file an application with all required credentials and the application fee by the priority date, you will receive full consideration for the semester requested. If admitted, you will be invited to an early orientation program during which you will register for classes.

Academic Advising

New and transfer students with less than 12 transferable credit hours receive their initial academic advising during orientation. Students with 12 or more transferable credit hours, returning students, and students from other IU campuses receive academic advising from their academic division. University College advisors provide advising services to undergraduate students who have not yet been admitted to their degree program as well as to students who are undecided about their program. For contact information visit http://www.iupuc.edu/universitycollege/contacts/.

Developmental or Refresher Course Work

If placement test results indicate that a student needs more work or a refresher in reading, writing, or mathematics, the student will be required to take these classes first. The basic skills of reading, writing, and calculating are building blocks to most other college classes.

Advisors will assist students in selecting a balanced schedule with refresher courses as well as regular college classes when appropriate. In general, students will not be certified to move into their schools until they have successfully addressed any skill deficiencies they may have. Students who have been conditionally admitted to IUPUC may be required to participate in an academic support program prior to enrolling in courses.

Elements of an Undergraduate Degree

Basic to planning a college education, rather than just semester-by-semester picking of classes, is an understanding of what components make up a college degree. Most four-year college degrees are made up of about 40 courses. These courses generally are 3 credit hour courses, though some are 1, 2, 4, 5, and even 6 credit hour courses. Each hour of credit generally means four hours of academic work (i.e., one hour per week in class plus three hours of study time outside of class), though in some programs, especially in the sciences, there are additional credit hours for laboratory or recitation work.

Courses fall into three categories: general-education requirements, major or concentration requirements, and electives. The exact courses that may be used in each of these areas vary according to the program of study.

First-year students generally begin with a learning community, general-education courses, and introductory courses in their majors. Courses required for college degrees are often sequential (that is, they build on the content, concepts, and skills learned in lower-level courses). As a result, most schools number their courses 100, 200, 300, and 400 to indicate the order in which students should take the courses. First-year students should generally take courses in which the first number in the course number is either a 0 or 1; occasionally, first-year students might take a 200-level course.

Some courses require students to take prerequisites or lower-level courses before enrolling in the higher-level courses. Prerequisites are listed in the course descriptions in this bulletin. General-education requirements and the specific major requirements are listed in school sections of this bulletin. University College advisors also have checksheets of requirements for the different degree programs. Electives, generally five to ten courses depending on a student's program, are usually taken during junior or senior year.

First-Year Seminars or Learning Communities

National studies have shown that successful first-year students need five elements: an introduction to campus resources and support services, the creation of a support network (which is especially important on a commuter campus), ongoing personal interaction with faculty and staff, the development of skills and habits basic to academic achievement, and a realization of the high expectation that the campus has for each of its learners.

IUPUC has developed learning communities, including First-Year Seminar courses, and is dedicated to achieving the objectives spelled out above. Often these First-Year Seminars are linked with another course so that the students in the seminar can work together across classes to learn the material and otherwise support one another. The team approach of faculty members, librarians, advisors, and student mentors provides students with in-depth knowledge and contacts for key elements of the campus.

General-Education Requirements/Introduction to Majors

Beginning students will also be advised to start on the general-education requirements for the program(s) in which they are interested. These classes may include communication skills, natural and mathematical sciences, social and behavioral sciences, or arts and humanities, depending on the division or program. Particularly if students are attending full time, they will be encouraged to enroll in the introductory course or courses in their program of study during the first or second semester of enrollment. These are usually 100-level courses.

Preparing for Advising Sessions

Students are ultimately responsible for their own success. Students need to prepare themselves by understanding their degree requirements. University College and division advisors can provide tools and advising that aid students in making wise choices in the types and numbers of classes to take. Visit University College or your division advisor for helpful hints on preparing for an advising appointment.

Scheduling Tools and Information

IUPUC provides a number of resources for students to conduct their work with the university. OneStart (onestart.iu.edu) allows students to review information about themselves, including the status of an admission application, the status of a financial aid application (and any award), their latest course schedule, book list, bursar account (fees owed or refund due), unofficial transcript, as well as information about a federal tax law that may result in an income tax credit tied to tuition paid in a calendar year. Students may also update address information through OneStart. In addition, students and the public may review course offerings for current and upcoming semesters via OneStart. The OneStart system is not intended to replace regular meetings with an academic advisor.

Students planning their schedules should also consult the degree requirements in this bulletin, the IUPUC Web site or the appropriate checklists provided by their advisors. The Registration Guide is available every March for summer and fall classes and in October for spring classes.

Academic Advising

Undecided and Exploratory Options

Some students come to IUPUC uncertain of what they want to study, in part because they do not know all their options, and because they are unsure of their own strengths. They want to remain undecided until they explore all their options and feel more certain of their interests. "Undecided" and "exploratory" students receive special counseling to allow them to explore possible programs of study.

Taking introductory courses in different fields often helps students make up their minds or determine their aptitude or interest. The advisors may urge students to go to the College and Career Exploration Center to investigate career options or take tests that will reflect the students' areas of interest. There also are courses specifically focused on helping students make career choices. This is a healthy process. Exploring possible options early in a college career is common and far better than changing direction in the junior or senior year.

Financial Aid & Scholarships

Eligibility

The federal government determines a students financial aid eligibility by evaluating the information submitted on the Free Application for Federal Student Aid (FAFSA). Financial aid is available in the form of grants, loans, and work-study employment.

The FAFSA priority deadline to qualify for State financial aid is March 10. The federal school code for IUPUC is E01033. It is important for students to list the IUPUC school code on their FAFSA to ensure processing for financial aid at IUPUC. It is recommended that all students file their FAFSA online at www.fafsa.ed.gov.

To qualify for financial aid a student must enroll in a degree program and be in good academic standing. While there is no minimum enrollment to receive a Pell Grant, the federal government requires a student to enroll as a half time student (six credit hours as an undergraduate student or four as a graduate student each fall and spring semester to be eligible for student loans or work-study employment. (The State Student Assistance Commission of Indiana (SSACI) requires eligible students to be enrolled in at least 12 credit hours each fall and spring semester and to review their FAFSA each year by March 10 to receive these funds.)

A student's academic progress is carefully monitored throughout each semester. Please remember, a student may be required to pay back all or a portion of any financial aid received should the student adjust his/her enrollment status during a semester. Please visit Student Services for financial aid counseling or call 812-348-7231.
Students may also email financialaid@iupuc.edu or visit the Office of Financial Aid and Scholarships online.

Scholarship Information

Freshman Scholarships

These scholarships are performance based and are awarded in recognition of academic achievement, rewarding excellence and providing a monetary incentive to enroll at IUPUC. Early admission is the best way for students to be assured of scholarship opportunities. Beginning freshmen are considered for scholarships after admission to IUPUC, so for full consideration you should apply for admission in the fall of your senior year. Only one freshman scholarship is allowed per student. The deadline for all freshman scholarships is March 1.

IUPUC Hoosier Presidential Scholar

$9,000 annually for four years

Deadline: March 1, admission

Incoming freshman in the top 10% of their graduating class (minimum 26 students in class) with minimum 1250 SAT (Math/Critical Reading) or 27 ACT may qualify. IUPUC campus awards up to two recipients annually. For renewal, student must be full-time at IUPUC, maintain minimum 3.3 CGPA, and volunteer at one campus event per academic year. Limited to the first two eligible applicants.

IUPUC Valedictorian and Salutatorian Scholarship

$6,000 annually for four years

Deadline: March 1, admission

Incoming freshmen who are ranked first or second in their graduating class (minimum 26 students in class) with minimum CGPA of 3.3/4.0 may qualify. For renewal, student must be full time at IUPUC, maintain minimum 3.0 CGPA, and volunteer at one campus event per academic year.

IUPUC Academic Excellence Scholarship

$3,000 annually for four years

Deadline: March 1, admission

Incoming freshmen with minimum CGPA of 3.5/4.0 and 1100 SAT (Math/Critical Reading) or 24 ACT may qualify. For renewal, student must be full-time at IUPUC, maintain minimum 2.75 CGPA, and volunteer at one campus event per academic year.

IUPUC First Generation Scholarship

$2,000 annually for four years

Deadline: March 1, admission

Incoming freshmen first in their family of origin (mother/father) to graduate from an accredited college, minimum CGPA of 3.0/4.0 and 1000 SAT (Math/Critical Reading) or 21 ACT may qualify. For renewal, student must be full-time at IUPUC, maintain minimum 2.50 CGPA, and volunteer at one campus event per academic year.

IUPUC Service Scholarship

$1,500 annually for four years

Deadline: March 1, admission

Incoming freshmen who have a minimum CGPA of 3.25/4.0 may qualify. For renewal, student must be full-time at IUPUC, maintain minimum 3.0 CGPA, and volunteer for 10 hours of campus events per academic year.

IUPUC High School Counselor Scholar Award

$3,750 annually for four years

Deadline: March 1, admission and certificate

Incoming freshman with minimum CGPA of 3.5/4.0 and 1100 SAT (Math/Critical Reading) or 24 ACT may qualify.

Recipients must be nominated by their school counselor.

For renewal, student must be full-time at IUPUC, maintain minimum 3.0 CGPA, and volunteer at one campus event per academic year.

IUPUC High School Counselor Recognition Scholarship

$2,000 annually for four years

Deadline: March 1, admission and certificate

Incoming freshman who have a minimum CGPA of 3.0/4.0 may qualify.

Recipients must be nominated by their school counselor.

For renewal, student must be full-time at IUPUC, maintain minimum 2.5 CGPA, and

volunteer at one campus event per academic year.

Additional IUPUC Scholarship opportunities

Passport Scholarship

This $1,500 annually /renewable scholarship for up to four semesters may be available to students who transfer to IUPUC within one year of completing an Associate's degree (A.A., A.S. or A.A.S.) from Ivy Tech. The non-competitive scholarship would be automatically offered at the point of admission to IUPUC. Recipients must have a minimum cumulative GPA of 3.3. The scholarship is renewable if the student maintains a GPA of at least 3.0 and continuous fulltime enrollment in a campus-based program. Scholarships will be awarded based on available funds. Full consideration will be given to early applicants. Final Ivy Tech Community College transcripts must be submitted before scholarship will be awarded.

Campus Campaign Scholarship

IUPUC faculty and staff make contributions each year to fund these achievement-based scholarships.

Donor Funded Scholarships

Every year many IUPUC students receive private sector scholarships, providing thousands of dollars to pay for their education. Information on external scholarships can be found from high school guidance offices, scholarship source books, and online scholarship search databases. The IUPUC Web site lists some of the online free database search sites.

Blue & Company Scholarship – One $500 Scholarship

- Junior or Senior majoring in Accounting at IUPUC.

CAAIFA Scholarship – One $1,000 Scholarship

- Enrolled in a minimum of 6 credits per semester (part-time) in Business.
- Resident of Bartholomew, Brown, Decatur, Jackson, Jennings, Johnson, or Shelby counties.
    - CGPA 2.5 or higher.
    - Financial need as well as community service or extracurricular activities will be considered.

Additional requirement: Attach an essay (maximum one-page) over: "Why it is important to plan your financial future?"

Community Education Coalition – Maximum Scholarship level is $2,000

- Enrolled in a minimum of 12 credits per semester (full-time).
- CGPA 3.0 or higher.
- Financial need will be considered.

Faurecia Scholarship – Two $1,000 Scholarships

- Engineering or Science student.

Glenn Klipsch Memorial Scholarship – One $1,000 Scholarship

- Enrolled in a minimum of 12 credits per semester (full-time).
- CGPA of 3.0 or higher.
- Must complete some form of volunteer service during each semester.

Additional requirement: Attach document describing community service activity(s) in which you are involved.

Institute of Management Accountants Scholarship – One $1,000 Scholarship

- Enrolled in a minimum of 12 credits per semester (full-time) in Finance/Accounting.
- CGPA of 3.0 or higher.
- Financial need to be considered.

Additional requirement: Submit a 300 word essay on the topic of: Career Aspirations. References will be accepted

IUPUC Alumni Association Scholarship – Three $1,500 & One $1,000 Scholarships

- Enrolled in a minimum 6 credit hours per semester (part-time) and completed a minimum of nine credit hours at IUPUC.
- Nontraditional or continuing students.

Additional requirement: Submit letter of endorsement by an employer, IUPUC faculty member, or IUPUC alumnus.

IUPUC Scholarship – Five $1,000 & Two $1,500 Scholarships

Additional requirement: Submit letter of endorsement by an employer, IUPUC faculty member, or IUPUC alumnus.

Jay Howard Scholarship – One $500 Scholarship

- Enrolled in a minimum 6 credit hours per semester (part-time) & admitted as Sociology major or minor.
- CGPA of 3.0 or higher.
- Merit (evaluated in terms of academic accomplishments) & service to IUPUC and the community will be considered.

Additional requirement: Provide up to 500 words describing your contributions to the IUPUC campus and/or your community.

Kristen Schildmier Scholarship – One $1,000 Scholarship

- Enrolled in a minimum 12 credit hours per semester (full-time) and working part-time or full-time.
- Financial need will be considered.
- Preference will be given to students who have earned an associate degree from Ivy

Tech.

Taylor Bros. Construction Co., Inc. Scholarship – One $1,000 Scholarship

Additional requirement: Submit letter of endorsement by an employer, IUPUC faculty member, or IUPUC alumnus.

Wafa Family Scholarship – Maximum Scholarship level is $1,000

- First consideration will be given to an undergraduate student seeking first degree demonstrating financial need.
- Recipient will demonstrate academic promise as determined by an IUPUC faculty member.
- The number, amount, and recipient(s) of the scholarship will be determined by the Scholarship Committee of IUPUC.

Additional requirement: Applicant must submit a letter/statement of endorsement by an IUPUC faculty member.

Zonta Club Scholarship – One $400 Scholarship

- Enrolled in a minimum 6 credit hours per semester (part-time).
- Female student who is a resident of Bartholomew County.
- CGPA of 3.0 or higher.

Check the IUPUC Scholarship site frequently for updates. While this information is current as of print, we will post any changes in scholarship opportunities and the Web site should be consulted as the final source of information.

Undergraduate Programs

Graduation Requirements

Applying for Graduation

Candidates for graduation initiate the certification process by filing an Intent to Graduate form with the advisor of their division at least one year prior to their expected graduation date. Purdue degree candidates must register for CAND 991 as noted in the Registration Guide. Details concerning the application deadlines of specific divisions and any additional requirements related to graduation are available from the advisor or the division sections of this bulletin.

Completion of Degree Requirements

When students contact the advisor about graduation, they should double-check that they in fact will have completed graduation requirements. The "My Degree Progress" option in the self-service area in OneStart shows which courses students still need to take and whether all transfer work has been entered. Some divisions perform degree audits either when students file for graduation or at the beginning of their senior year.

Students should go over audits with their advisors to make sure they are accurate, and contact the division advisor with questions. Common mistakes that result in a student's failure to graduate are unacceptable grades and not registering for necessary courses, dropping courses during the last semester, or otherwise failing to complete required courses. Students may graduate with incompletes on their record, provided they are not for required courses. Residency requirements also affect graduation eligibility.

Required Grade Point Average

In addition to completing all the required course work, students must have a specific overall grade point average and a specific GPA in their program to graduate. Most divisions also require grades of C or higher in program courses. Students should familiarize themselves with the policies of their program.

Undergraduate Programs

Orientation

University College, in conjunction with the divisions, requires all beginning and transfer students with less than 12 transferable credits to attend an orientation program. At orientation, students receive an overview of campus resources, receive information about the divisions/program in which they are interested, receive success tips from current IUPUC students, meet with an academic advisor, register for classes, and have their photo taken for their student I.D. card. Students must obtain their technology account before attending orientation. Technology will be covered during one portion of the orientation program.

Students are required to pay a New Student Enrollment Fee that is assessed to all students who are beginning their first semester in a degree-seeking program. The fee is not contingent on participation in the orientation program.

Undergraduate Programs

Placement Testing

A student's academic career begins with placement testing, followed by attending orientation. The placement test results indicate the student's level of preparedness and the proper or recommended course placement in writing and mathematics.

Mathematics Placement Testing

All beginning students must complete the COMPASS Mathematics test. Transfer students who have received credit for IUPUC math courses, including MATH 001, 11000, 11100, M118, M119 or any calculus course do not need to take the mathematics placement test, if the course was completed within 5 years. The mathematics placement scores are valid for two years from the test date.

Click here for detailed mathematics test information including sample questions: Compass Mathematics Test

English Placement Essay

The English placement test requires students to write a short essay that takes, and supports, a stand on a social issue. The essay determines which of the two writing courses is the best place for students to begin their college writing career.

Students who plan to enroll in ENG-W 130, the lower-level of the two beginning English courses, are not required to write the placement essay, but are welcome to write it to help determine whether ENG-W 130 is the best placement. ENG-W 130 does not count for most degree programs but is required of students who place into it. On the other hand, ENG-W 131 is a required class for graduation. Students are eligible to register for ENG-W 131 if at least one of the following criteria is met:

- student has an SAT critical reading score of 500 or higher, or
- student received a grade of D- or better in ENG-W 130 or
- student's placement test result recommends placement into ENG-W 131.

Transfer students who have received credit for ENG-W 130 or ENG-W131 do not need to complete the English placement essay.
For more information on placement testing, see the Placement Testing Web site at www.iupuc.edu/ students/placement_testing.asp. Continuing students obtain their placement test results through their academic advisors. Placement test results are given to new students at orientation. If students have not taken the placement tests or their results are not available, they are limited to a restricted list of courses that do not require placement tests. Placement tests in math and English are administered at no cost to the student.

Accomodations for Placement Testing

Students who need accommodation because of disabilities or need special equipment, extended time, or tests taken in separate rooms—whether for placement testing, orientation, or for actual classes—must contact the Adaptive Educational Services (AES) Coordinator before or at the same time they schedule placement tests. Since registering with AES and providing them with documentation takes time, as does the arrangement of services, students must contact AES (812)314-8539 as soon as possible before classes start.

Testing for Students Whose Native Language is Not English/English for Academic Purposes (EAP) Placement Testing

All new students—graduate and undergraduate—whose native language is not English are required to take the ESL placement test prior to registration. This test is administered by the IUPUI Testing Center on behalf of the English as a Second Language Program. All international students from non–English speaking countries as well as U.S. permanent residents and others referred by the Office of Admissions take the ESL placement test in lieu of the English Placement Test that native speakers of English are required to take.

Undergraduate Programs

Registration

Dropping and Adding Classes

Students can make changes in their schedule, commonly known as add and drop. Students may add courses from the time of their initial registration up through the end of the first week of classes via Onestart. After the first week of classes, students may add courses only with a paper Schedule Adjustment form and the instructor signature. Students may drop courses from the time of their initial registration through the last day of the automatic W period using Onestart. After the automatic W period, the student may drop a course with a Schedule Adjustment form with instructor signature and instructor designation of W or F; this option ends on the last day for withdrawal for the semester. After the last day for withdrawal, students may only make adjustments to their schedule using a schedule adjustment form and obtaining signatures from the heads of the division offering the course; this option may only occur in rare situations with documentation from clergy, legal representation, or the equivalent. Students receiving financial aid should be aware that dropping a course may change the amount of aid for which a student is eligible and may require that the student repay some of the money already received.

Students must drop classes officially; to stop attending a class or even to never attend the class does not cause the student to be dropped from the class. Failing to attend class does not mean a student has dropped a class but rather will result in an F in the course. Failing to pay for the course once registered and not attending will result in both an F and a bill for the course. After the middle of the semester, students need the instructor's signature in order to drop a class.

Dropping classes is done online through OneStart or by using the Schedule Adjustment forms, which are available at the Office of the Registrar. If using a form it must be filled out, signed, and returned to the Office of the Registrar, Room 156M.

While withdrawals do not change a student's GPA, withdrawals may trigger the federal government's definition of "not making academic progress" and may result in the loss of eligibility for certain types of aid. Contact the Office of Financial Aid and Scholarships for more information about Satisfactory Academic Progress at http://www.iupuc.edu/financialaid/contacts/.

Check the Academic Calendar page, found on the Office of the Registrar web site, each semester for exact drop/withdraw and refund dates. You may also contact the Office of the Registrar at 812.348.7287 or online.

Registration

Enrollment Permissions and Holds

An advisor's approval for a student to register does not guarantee enrollment in a particular class; it only authorizes that the student is eligible for enrollment that term. Divisions may restrict enrollment in particular courses, so students should review the course descriptions in this bulletin or view course listings online through OneStart to see if they fit the requirements.

For instance, some courses, such as upper-division courses in business, are open only to students officially enrolled in certain divisions. Other courses may be restricted to students with sophomore, junior, senior, or graduate student status. Finally, some courses require a student to have completed one or more courses prior to enrollment (known as "prerequisites"). Otherwise ineligible students who believe their personal preparation overrides the restrictions may seek the division's or instructor's permission to enter the class.

On occasion, students have a hold placed on their enrollment. When this occurs, they cannot register for courses because they have failed to meet some requirement of the university or division and cannot proceed until the problem is resolved. Problems that result in a hold include having a grade point average below the required level or failure to pay tuition or other fees.

Students with unpaid library fines, outstanding parking tickets, or with a disciplinary problem also may be placed on hold. Students can review their status on OneStart, and if they find they have such a hold, they should contact the office(s) listed to resolve the problem. For more information about holds, students may contact the department or division involved or the Office of the Registrar at 812.347.7287.

Undergraduate Programs

Registration

Fees

IUPUC tuition is set annually by the Trustees of Indiana University. Current fee information appears in the Registration Guide, available online, and the rules that determine whether students are residents or nonresidents for fee-paying purposes are available online as well. Undergraduate programs and most graduate/professional programs charge by the credit hour.

In addition to tuition, there are some special course fees for equipment or supplies; all undergraduates are assessed technology and student activities fees. New students are charged a New Student Enrollment Fee. The semester parking fee is optional, and books and supplies are additional. Various payment options are described in the Registration Guide. See bursar.iupuc.edu for more information, including current fees.

Students whose financial aid or loans have not yet arrived may qualify for automatic aid deferments through the Financial Aid Office. As long as students have anticipated aid listed on their OneStart account, they only need to pay tuition and fees in excess of the amount of anticipated aid listed. If the anticipated aid has not been credited by the second due date of the semester, it is the student's responsibility to resolve his or her issue with the financial aid office or personally pay the balance. Students are not removed from classes for failing to pay their bills.

If a bill remains unpaid and the student does not withdraw during the refund period, he or she is still responsible for the unpaid tuition and fees regardless of attendance or grade received. If the student withdraws, the bills will be adjusted accordingly, only if the withdraw occurs during a refund period. It is, therefore, critical that students check with the Bursar or monitor their accounts via OneStart to determine whether they received financial aid.

Undergraduate Programs

Registration

Registration Process

Registration for first-time students takes place in conjunction with orientation. In subsequent semesters, students may register themselves using Onestart. Information about registration is available in the Registration Guide, online at the Office of the Registrar. The Schedule of Classes is also available online at the Office of the Registrar. Students may contact their academic advisor for assistance with registration or questions regarding degree requirements.

It is vital that students keep both local and home addresses and phone numbers up to date with the university. In some cases, local and home addresses are identical, though some use their parents address as their home address. Students can change their addresses online through onestart.iu.edu. Addresses may also be changed by completing an address change form, available in the Office of the Registrar.

All students are issued university e-mail addresses. It is the responsibility of the student to learn how to access their university e-mail and to check it frequently. Many university offices correspond with students and share announcements only through university e-mail accounts.

Waitlisting

Occasionally, students will be turned away from a class section because it is filled to capacity. Seats may open up, however, if registered students drop the class during the registration period. Through an automated waitlisting system, the first person to make a waitlist request for a class is placed at the top of the waitlist. When a seat opens up, that person is registered automatically for the course. For more information, check the Registration Guide or visit the Web site registrar.iupuc.edu.

Student Learning Outcomes

The IUPUC campus offers Student Learning Outcomes (SLO's) for the following undergraduate programs:

- Anthropology*
- Business**
- Case Management
- Chemistry*
- Communication Studies*
- Computer Engineering*
- Criminal Justice (with majors in Criminal Justice and Public Safety Management)*
- Education
- Electrical Engineering*
- English (with concentrations in Creative Writing, Literature, and Writing and Literacy)*
- Forensic and Investigative Sciences*
- General Studies
- Geography*
- Health Information Administration*
- Health Services Management*
- History*
- Informatics*
- Mechanical Engineering
- Media Arts and Science*
- Nursing
- Philosophy*
- Political Science*
- Psychology
- Public Affairs (with majors in Civic Leadership, Management, and Policy Studies)*
- Public Health (with the Environmental Health Science major)*
- Religious Studies*
- Sociology*
- Tourism, Conventions and Event Management*

*Articulated Programs are offered through a cooperative agreement with IUPUI. See individual degree program websites for more detailed information, including how much of each program can be completed at the IUPUC campus.

**Includes concentrations in Accounting, Computer Information Systems, Finance, Management, Human Resources Management, and Marketing.

Student Learning Outcomes

Bachelor of Science in Anthropology

Students completing the Anthropology degree program, will demonstrate the following outcomes:

I. **Anthropological Diversity**
   - All students are expected to demonstrate an understanding of the broad Anthropological scope of the human condition with respect to cultural, biological, linguistic, and material diversity.

II. **Anthropological Research Methods**
   - Students will demonstrate ability to formulate an anthropological research question and design a research proposal using appropriate anthropological research methods.

III. **Engaged Research Skills**
   - Students will carry out research in collaboration with an agency, organization or external mentor, articulate the ethical implications of such research partnerships, and understand the goals of the scholarly project for academics and community partners alike.

IV. **Communication**
   - Students will demonstrate cross-cultural communication skills.

V. **Anthropological Writing**
   - Students must write a research paper or report that frames a concrete problem in anthropological terms.

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in Business

Program Philosophy

The undergraduate program for the Division of Business is focused on doing two things especially well:

1. Providing students with personal attention to their academic careers that is uncommon at the university level. This includes attention to the quality and effectiveness of students' learning environments.
2. Pushing the pedagogical envelop for integration of basic business knowledge and skills.

Driving these is an underlying proposition that we serve our students best by helping them develop as business managers (rather than as business specialists). Concentrations complement business management studies and help students develop their individual interests and target specific careers. Requiring one half of our program's credits in general education creates a much-needed balanced academic experience and connects business to the broader issues at work in a global society and business environment.

This philosophy is reflected in the structure of the B.S. in Business:

- Basic Skills
- General Education
- Business Fundamentals
- Integrative Core (I-Core)
- International Dimension
- Upper Level Courses
- Functional Concentrations

Student Learning Outcomes and Performance Criteria

The Division of Business has adopted as its program learning outcomes the Principles of Undergraduate Learning (PULs) in place for all undergraduate programs at IUPUC and IUPUI. What follows below are these program outcomes, with directions for assessments that are aimed specifically at business studies.

I. **Core Communication and Quantitative Skills (Foundation Skills)**

Upon completion of the program, students are able to:

i. Write, read, speak and listen.

ii. Develop and deliver effective presentations.

iii. Perform quantitative analysis.
iv. Use information resources and technology.

What we will assess in business:

i. Effectiveness of business memos to communicate results of business analyses, strategies and recommendations.
ii. Effectiveness of individual and group presentation skills.
iii. The ability to use quantitative methods to analyze business and economic data

II. **Critical Thinking Skills**

Upon completion of the program, students are able to:

i. Analyze information and ideas carefully and logically from multiple perspectives.

What we will asses in business:

i. The ability to identify problems, develop feasible solutions, and then choose form alternatives.

III. **Integration and Application of Knowledge**

Upon completion of the program, students are able to:

i. Use information and concepts from studies in multiple disciplines in their intellectual, professional, and community lives.

What we will asses in business:

i. The ability to work effectively as a business manager who harnesses skills and knowledge from across the key business disciplines.
ii. Productive participation in a team and meaningful contribution to team goals.

IV. **Intellectual Depth, Breadth, and Adaptiveness**

Upon completion of the program, students are able to:

i. Examine and organize disciplinary ways of knowing and to apply them to specific issues and problems.

What we will asses in business:

i. The ability to use the primary analytical tools and decision-making skills in at least one key business discipline to identify problems and develop solutions.

V. **Understanding Society and Culture**

Upon completion of the program, students are able to:

i. Demonstrate the ability to recognize their own cultural traditions and to understand and appreciate the diversity of the human experience, both within the United States and internationally.

What we will asses in business:

i. The ability to analyze strategic issues and make strategic decisions within a global context.

VI. **Values and Ethics**

Upon completion of the program, students are able to:

i. Make judgments with respect to individual conduct, citizenship, and aesthetics.

What we will asses in business:

i. The ability to make informed and principled choices regarding conflicting situations.

NOTE: Includes concentrations in Accounting, Computer Information Systems, Finance, Management, Human Resources Management, and Marketing.

Certificate in Case Management

Upon completion of this certificate program, students will:

1. Practice personal reflection and self-correction to assure continual professional development.
2. Demonstrate professional demeanor in behavior, appearance, and communication.
3. Use supervision and consultation to enhance case management practice.
4. Demonstrate practice which embraces values and ethical consideration in the provision of case management.
5. Demonstrate effective oral and written communication in working with individuals and families.
6. Gain sufficient self-awareness to eliminate the influence of personal biases and values in working with diverse groups.
7. Identify the forms and mechanisms of oppression and discrimination and demonstrate how they impact the practice of case management.
8. Advocate for human rights and social and economic justice in the role of a case manager.
9. Critique and apply knowledge to understand person and environment as a case manager.
10. Apply knowledge about case management including current models & perspectives with individuals and families.
11. Apply case management research in practice.
12. Demonstrate an understanding of the public policy context in which case management takes place.
13. Substantively and affectively prepare for action with individuals & families.
14. Demonstrate empathy and other interpersonal skills.
15. Collect, organize, and interpret client data.
16. Assess client strengths and limitations.
17. Identify and utilize case management interventions to address clients' problems.
18. Facilitate transitions and endings.
19. Critically analyze, monitor, and evaluate interventions.

Student Learning Outcomes

Bachelor of Science in Chemistry

Student who graduate with a B.S. in Chemistry will be expected to:

1. Understand major concepts, theoretical principles and experimental findings in organic chemistry, analytical chemistry, inorganic chemistry, physical chemistry and biochemistry.
2. Exhibit problem solving and critical thinking skills relevant to the field of chemistry.
3. Access, retrieve, and interpret accurate and meaningful information from the chemical literature.
4. Communicate scientific information effectively, both orally and in writing.
5. Work effectively in teams in both classroom and laboratory.
6. Design, carry out, record and analyze the results of chemical experiments.
7. Use instrumentation for chemical analysis and separation.
8. Use computers in experiments, data analysis, and in communication.
9. Understand and follow safety guidelines in chemical labs.
10. Be aware of and abide by ethical standards in chemical discipline.
11. Integrate knowledge from mathematics, physics and other disciplines in support of chemistry.
12. Conduct research projects with supervision.

Bachelor of Arts in Communication Studies

The Communication Studies degree program will train and equip students to:

1. Design effective messages for different media.
2. Utilize appropriate principles of interpersonal communication and public speaking skills to engage in face to face communication.
3. Utilize basic social and scientific analytic tolls in communication to solve problems.
4. Be able to act appropriately and ethically in communicative transactions.
5. Be able to use experience gained in service learning to enhance their communities.
6. Be able to work productively in groups and teams.

Bachelor of Science in Computer Engineering

The Computer Engineering degree program will train and equip students to:

1. Apply knowledge of mathematics, science, and engineering.
2. Design and conduct experiments, as well as to analyze and interpret data.
3. Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. Function on multidisciplinary teams.
5. Identify, formulate, and solve engineering problems.
6. Understand professional and ethical responsibility.
7. Communicate effectively.
8. Demonstrate the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. Demonstrate a recognition of the need for, and an ability to engage in lifelong learning.
10. Deomonstrate a knowledge of contemporary issues.
11. Use the techniques, skills, and modern engineering tools necessary for engineering practice.

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in Criminal Justice

Graduates of the Bachelor of Science in Criminal Justice program should have the intellectual depth, breadth, and adaptiveness of learning to anticipate, recognize, evaluate, and solve problems in criminal justice or public safety using knowledge, skills, and tools appropriate to entry-level criminal justice and public safety positions. Bachelor of Science in Criminal Justice graduates will be able to:

1. Communicate effectively important information and ideas in criminal justice or public safety management (especially within their major), both with individuals and in group settings, and using oral, written, visual, and electronic modes.
2. Recognize, characterize and analyze issues and problems in criminal justice or public safety using appropriate technology to collect, collate and assess data through statistics and other quantitative tools.
3. Apply extant criminal justice or public safety management knowledge and theory to analyze, evaluate and contribute to the development of solutions for criminal justice or public safety management issues and problems.
4. Recognize and demonstrate sensitivity to diverse points of view.

Students will be able to demonstrate additional learning specific to their major.

Criminal Justice Major

The criminal justice major is concerned with the functioning of the major elements of the criminal justice system, policing, courts and corrections, including both public and non-governmental agencies. Students learn what crime is, why and how often it occurs, how we attempt to prevent it, and how we punish those who commit crimes. Criminal justice graduates will be able to:

1. Define crime, legally and socially, discuss how it is measured, and current trends in crime.
2. Describe major theories of crime and discuss corresponding public policies to reduce crime.
3. Discuss the constitutional foundations of the criminal justice system, especially the tension between individual rights and public order.
4. Discuss the history and evolution of policing, the role of discretion, the nature and effectiveness of police activities, and issues of police misconduct.
5. Describe the structure, process, and actors in the court system, as well as current issues in processing criminal cases.
6. Describe the major philosophies of punishment, the history and evolution of

corrections systems, and the current issues in corrections.

7. Describe current crime control strategies, and discuss the strengths and limitations of various approaches.
8. Read criminal justice research and communicate findings clearly, and apply basic research methods to criminal justice research questions.

Public Safety Management Major

The public safety management major is intended to prepare students to work in agencies that ensure public safety, such as fire departments, emergency management and homeland security agencies. Public safety management graduates will be able to:

1. Define public safety, and discuss the major components of the public safety system and how they operate.
2. Define and describe homeland security, how federal state and local agencies work to maintain homeland security, and how it relates to public safety, in theory and in practice.
3. Discuss the constitutional foundations of public safety, especially the tension between individual rights and public order.
4. Discuss the history and evolution of terrorism, the motivations that lead to terrorism, and the nature and effectiveness of responses to terrorism.
5. Describe emergency service agencies, and current issues and trends in emergency service in the United States and around the world.
6. Discuss technology and how it relates to maintaining public safety, particularly the use of geographic information systems.
7. Describe current public safety strategies, and discuss the strengths and limitations of various approaches.
8. Read public safety research, communicate findings clearly, and apply basic research methods to criminal justice research questions.
9. Articulate methods of recognizing and resolving crisis situations, including crisis planning, crisis management and ethical decision making processes and practices.
10. Describe the dynamics and processes (individual, group, institutional bureaucratic and psychological) that can impact decision making during crises, and articulate methods of learning from past approaches/ experience to build future strategies for managing disasters or crises.

Student Learning Outcomes

Undergraduate Programs

Student Learning Outcomes

Education

The following Student Learning Outcomes apply to all undergraduate degree and certification programs offered by the School of Education: Elementary Education, Secondary Education, Transition to Teaching Programs.

Principle 1: Conceptual Understanding of Core Knowledge

Definition: The ability of teachers to communicate and solve problems while working with the central concepts, tools of inquiry, and structures of different disciplines. For prospective secondary teachers this means developing rich expertise within their chosen discipline. This principle is demonstrated by the ability to:

- Set learning goals that reflect command of the subject matter.
- Design and implement instruction that develops students' conceptual understanding of core knowledge.
- Interact with learners, providing meaningful and strategic information.
- Improve learners' communication and quantitative skills through meaningful learning engagements.
- Model effective communication and problem solving.
- Use a variety of media and technology.
- Distinguish high quality educational materials.
- Write and speak with clarity.

Principle 2: Reflective Practice

Definition: The ability of teachers to step outside of the experiences that make up teaching and to analyze and critique from multiple perspectives the impact of these experiences and contexts. This principle is demonstrated by the ability to:

- Explain the principles that guide teaching.
- Demonstrate teaching as an inquiry process, collecting and analyzing data about students' learning and generating plans designed to support student understanding.
- Entertain multiple perspectives.
- Self-assess from multiple perspectives.
- Collect information through observation of classroom interaction.
- Assess learners' development and knowledge.
- Use assessment processes appropriate to learning outcomes.
- Invite learners to employ multiple approaches, solutions, and diverse pathways to

learning.

Principle 3: Teaching for Understanding
Definition: The ability of teachers to draw on their conceptual understanding to plan, implement, and assess effective learning experiences and to develop supportive social and physical contexts for learning. This principle is demonstrated by the ability to:

- Set clear and developmentally appropriate goals for learning experiences.
- Establish suitable classroom routines.
- Provide learners with meaningful choices.
- Create a collaborative, supportive social environment.
- Engage learners in generating knowledge and testing hypotheses.
- Help learners articulate their ideas and thinking processes.
- Use multiple strategies that engage students in active, meaningful learning.
- Encourage learners to see, question, and interpret ideas from diverse perspectives.
- Support learners in assuming responsibility for themselves and for their own learning.
- Create an inviting, interactive learning environment.
- Ask questions that promote meaningful learning.
- Build on children's prior knowledge.

Principle 4: Passion for Learning
Definition: The ability of teachers to continually develop their own complex content and pedagogical knowledge and to support the development of students' habits of continual, purposeful learning. This principle is demonstrated by the ability to:

- Synthesize and teach complex concepts and networks of knowledge.
- Learn about learners and teaching through reflective practice.
- Recognize and support learners' intellectual, social, and personal growth.
- Support all learners with special needs including learners new to English.
- Engage learners in multiple ways of knowing.
- Convey reasonable, but high and positive expectations for learner achievement.
- Integrate the disciplines to create meaningful curriculum.
- Give learners opportunities to solve community problems and to make authentic and meaningful choices.
- Provide all learners with equitable access to meaningful learning opportunities.
- Seek help from other professionals when needed.
- Engage in personal inquiry to construct content and pedagogical knowledge and skills.

Principle 5: Understanding School in Context of Society and Culture
Definition: The ability of teachers to value and to teach about diversity, inclusivity, and equity; to recognize the impact of social, cultural, economic, linguistic, geographic and political systems on daily school life; and to capitalize on the potential of school to minimize inequities. This principle is demonstrated by the ability to:

- Act as a change agent.
- Demonstrate willingness and growth toward multicultural competence and culturally responsive teaching.

- Recognize cultural differences and strive to address the discontinuities that can become obstacles to equitable teaching and learning.
- Mediate when learners need help to resolve problems or change attitudes.
- Initiate and engage in partnerships with families, teachers, administrators, and other community members involved in the lives of students, and respect families as partners in teaching and learning.
- Embed knowledge of home, school, and community into teaching.
- Recognize and challenge deficit perspectives about, and utilize strength-based approaches to engage with students, families, and communities.

Principle 6: Professionalism

Definition: The ability of teachers to be active contributors to professional communities that collaborate to improve teaching and student achievement by developing shared ethics, standards, and research-based practices. This principle is demonstrated by the ability to:

- Demonstrate the ethical principles guiding professional conduct.
- Demonstrate and document standards-based practice that aligns with Common Core, Indiana, and professional standards.
- Stay current in terms of research on pedagogy, content, and assessment.
- Participate in professional organizations and resource networks beyond the school.
- Collaborate with colleagues about issues that are complex and difficult.
- Give presentations for other professionals.
- Initiate activities such as teacher research, study groups, and coaching to improve the teaching and learning of a school community.
- Promote positive attitudes.
- Facilitate decision making.
- Operate on democratic principles.

Student Learning Outcomes

Bachelor of Arts in English

The English degree program will train and equip graduates to demonstrate the following outcomes:

1. Demonstrate the importance and power of reading/thinking critically and writing with clarity and purpose.
2. Define basic concepts, terms and theories in at least two areas of English studies (creative, literature, writing and literacy).
3. Read analyze, synthesize, evaluate, and interpret language and texts critically.
4. Construct and write a reasoned argument integrating public/expert and personal voices.
5. Recognize the importance of diverse perspectives and specializations in English studies.
6. Analyze and evaluate the impact of culture, diversity, and time on texts and ideas as well as language use and structure.
7. Describe and discuss the interdisciplinary context of English as a field of study and its connection to other disciplines.
8. Explain how language influences intellectual and emotional responses.

This degree program also includes concentrations in Creative Writing, Literature, and Writing and Literacy.

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in Forensic and Investigative Sciences

Students who graduate from the Forensic and Investigative program will learn:

1. **Forensic Science System** - Understand the general overview of the forensic science system.
    - Explain and describe areas in forensic science.
    - Understand the fundamentals of crime laboratory culture and organization.
    - Understand the role of forensic science in crime scene investigation.
    - Explain and be able to classify evidence.
    - Explain and describe quality assurance and control used in forensic science laboratories.
    - Prepare a resume and coverletter for a job in forensic science.
    - Demonstrate proper interviewing skills for a job in forensic science.
2. **Forensic Chemistry** - Understand how chemical and instrumental techniques can be applied to forensic chemical evidence.
    - Describe the possible job functions of a chemist in a forensic science laboratory.
    - Describe how statistical techniques can be used to describe the quality of data, classify samples or determine proper sampling protocol.
    - Explain the chemical principles behind acid-base, liquid-liquid, liquid-solid and solid-vapor extractions.
    - Explain the principles, instrumentation and applications of chromatographic techniques such as TLC, HPLC, and GC.
    - Explain the principles, instrumentation and applications of spectroscopic techniques such as UV/vis/fluorescence, FTIR and Raman.
    - Explain the principles, instrumentation and applications of mass spectrometry using EI and ESI ionization.
    - Demonstrate the ability to prepare and examine samples using analytical techniques such as TLC, GC/MS, Pyrolysis-GC/FID, LC/MS, FTIR, Raman, and UV/vis/fluorescence.
    - Explain the principles, instrumentation and applications of microscopic techniques such as light microscopy, polarized light microscopy, hot stage microscopy and microspectrophotometry.
    - Demonstrate the ability to prepare and examine samples using microscopic techniques such as light microscopy, polarized light microscopy, hot stage

microscopy and microspectrophotometry.

- Describe the chemical composition, origins and significance of the most commonly encountered types of trace evidence such as ink, paint, fibers, explosives, ignitable liquids, glass and hairs.
- Determine the appropriate chemical analytical scheme to be used on physical evidence.
- Successfully apply the chemical and instrumental techniques described above on mock case work.

3. **Pattern Evidence** - Understand pattern evidence in forensic science and the appropriate analytical techniques.
   - Explain, evaluate, and identify characteristics of fingerprints.
   - Understand the application of firearm and toolmark analysis used in forensic science.
   - Describe forensic techniques used on questioned documents.
   - Understand the application of impression evidence such as tiretreads and footwear.
4. **Forensic Biology** - Understand how to identify and analyze forensic biological evidence.
   - Describe the possible job functions of a forensic biologist in a forensic science laboratory.
   - Describe how to recognize, collect and preserve biological evidence.
   - Describe the principles and techniques of blood spatter pattern analysis.
   - Describe the principles and techniques of identification of body fluids.
   - Describe the principles and techniques of identification of the species of biological evidence.
   - Describe the principles and techniques of DNA isolation from various biological evidence.
   - Explain the principles, instrumentation and applications of DNA typing techniques.
   - Describe how statistics and population genetics can be used for data interpretation.
5. **Photography and Imaging** - Explain and implement the basic and advanced principles of photography and imaging in the processing of a crime scene.
   - Describe the basic elements of the theory of photography.
   - Understand and describe the photographic process.
   - Describe and apply the principles of photography to crime scene analysis.
   - Describe how the techniques and methods of processing images are used on photographic evidence obtained at a crime scene.
6. **Ethics** - Understand the importance of ethics in the practice of forensic science.
   - Define ethics.
   - Describe how ethics are applied in the analysis of forensic evidence.
   - Describe how ethics are applied to the presentation of expert testimony in court.
   - Describe the major features of the Code of Ethics of the American Academy of Forensic Sciences and of other major forensic science organizations.
7. **Forensic Science and the Law** - Understand how criminal and civil laws and procedures are applied to Forensic Science.

- Apply the evidentiary rules and law of evidence in the collection of evidence, examination of the evidence, and preparation of scientific reports and testimony.
- Describe the kinds of evidence that require a scientific foundation for its admission.
- Demonstrate the ability to conduct accurate, comprehensive and focused scientific investigations and apply appropriate rules of evidence.
- Interpret and implement standards of forensic practice as established by the rules of evidence.
- Apply knowledge of forensic science to case scenarios.

8. **Research** - Understand how to conduct forensic science research.
   - Conduct a literature search on a forensic scinece research topic.
   - Participate in the design of a research project.
   - Carry out experiments to properly collect data.
   - Ability to document research data.
   - Ability to evaluate and interpret research data.
   - Effectively communicate research results through written, oral and visual presentations.

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in General Studies

Upon completion of the General Studies program, students will acquire the following competencies:

I. **General Studies Core Competencies**
   i. ***Communication - Written/Oral:*** Students effectively communicate in written or spoken language to diverse audiences. Students comprehend, evaluate and respectfully respond to the ideas of others.
   ii. ***Diversity:*** Students appreciate local and global diversity and are respectful and empathetic during personal interactions. Students effectively collaborate and resolve conflicts.
   iii. ***Mathematical/Quantitative Reasoning:*** Students demonstrate the ability to use symbolic, graphical, numerical, and written representations of mathematical ideas. Students compute, organize data and effectively problem-solve using quantitative tools.
   iv. ***Computer:*** Students locate, critically evaluate, synthesize, and communicate information in various traditional and new media formats. Students understand the social, legal, and ethical issues related to information and its use.

II. **General Studies Degree Requirements**
   i. ***Arts and Humanities:*** Students interpret and critique the historical, cultural and literary dimensions of human experience. Students develop an appreciation of the aesthetic value of these subjects.
   ii. ***Science and Math:*** Students investigate, evaluate and develop skills to comprehend and apply basic principles of scientific methodology and differentiate among facts and theories.
   iii. ***Social and Behavioral:*** Students compare, contrast and construct an understanding of the role social, economic, cultural and political institutions play in shaping human thought and behavior. Students are able to function as engaged members of society, who are willing and able to assume leadership roles.

III. **General Studies Academic and Career Development**
   i. ***Academic Planning:*** Students assess their own knowledge, skills and abilities and develop plans of study for degree completion.
   ii. ***Career Planning:*** Students identify classes, minors and/or certificates that will enable them to achieve career goals upon graduation.
   iii. ***Distance Education:*** Students develop computing and communication

technology skills in the growing open and distance learning environment.

Student Learning Outcomes

Undergraduate Programs

Student Learning Outcomes

Bachelor of Arts in Geography

The Bachelor of Arts degree in geography provides a general introduction to the philosophy, content, and methods of the discipline. The Department of Geography is also developing an applied emphasis in environmental analysis, including courses in field methods, remote sensing, cartography, and geographic information systems.

Students can thus select a broad academic program or emphasize acquisition of job-related skills. Through course work and individualized instruction, the BA in Geography prepares students for fulfilling careers in a variety of fields or for admission to the best graduate programs nationally and internationally.

The Geography B.A. curriculum will train and equip students to:

- Understand the relevance of geographic knowledge to the interactions among natural and cultural phenomena from local to global scales.
- Demonstrate effective communication skills, use of critical thinking, and application of spatial analysis methods and tools to comprehend and interpret geographic problems and phenomena.

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in Health Information Administration

Students in the Health Information Administration program will acquire competencies in several domains.

I. **Health Data Management**
   A. ***Health Data Structure, Content and Standards***
      i. Manage health data (such as data elements, data sets, and databases).
      ii. Ensure that documentation in the health record supports the diagnosis and reflects the patient's progress, clinical findings, and discharge status.
      iii. Maintain processes, policies, and procedures to ensure the accuracy of coded data.
      iv. Monitor use of clinical vocabularies and terminologies used in the organizations' health information system.
   B. ***Healthcare Information Requirements and Standards***
      i. Develop organization-wide health record documentation guidelines.
      ii. Maintain organizational compliance with regulations.
      iii. Ensure organizational survey readiness for accreditation, licensing and/or certification processes.
   C. ***Clinical Classification Systems***
      i. Select electronic applications for clinical classification and coding.
      ii. Implement and manage applications and processes for clinical classification and coding.
   D. ***Reimbursement Methodologies***
      i. Manage the use of clinical data required in prospective payment systems (PPS) in healthcare delivery.
      ii. Manage the use of clinical data required in other reimbursement systems in healthcare delivery.
      iii. Participate in selection and development of applications and processes for chargemaster and claims management.
      iv. Implement and manage processes for compliance and reporting such as the National Correct Coding Initiative.

II. **Health Statistics, Biomedical Research and Quality Management**
   A. ***Healthcare Statistics and Research***
      i. Manage clinical indices/databases/registries.
      ii. Analyze and present data for quality management, utilization management, risk management, and other related studies.
      iii. Utilize statistical software.
      iv. Ensure adherence to institutional Review Board (IRB) processes and policies.

B. ***Quality Management and Performance Improvement***

i. Organize and coordinate facility-wide quality management and performance improvement programs.

ii. Analyze clinical data to identify trends.

iii. Analyze and present data for healthcare decision-making (such as demonstrating quality, safety, and effectiveness of healthcare).

III. **Health Services Organization and Delivery**

A. ***Healthcare Delivery Systems***

i. Monitor the impact of national health information initiatives on the healthcare delivery system for application to information system policies and procedures.

ii. Interpret, communicate, and apply current laws accreditation, licensure and certification standards related to health information initiatives at the national, state, local, and facility levels.

iii. Analyze and respond to the information needs of internal and external customers throughout the continuum of healthcare services.

iv. Revise policies and procedures to comply with changing health information regulations.

v. Translate and interpret health information for consumers and advocates.

B. ***Healthcare Privacy, Confidentiality, Legal and Ethical Issues***

i. Coordinate the implementation of legal and regulatory requirements related to the health information infrastructure.

ii. Manage access and disclosure of personal health information.

iii. Develop and implement organization-wide confidentiality policies and procedures.

iv. Develop and implement privacy training programs.

v. Resolve privacy issues/problems.

vi. Apply and promote ethical standards of practices.

IV. **Information Technology and Systems**

A. ***Information and Communication Technologies***

i. Implement and manage use of technology, including hardware and software, to ensure data collection, storage, analysis and reporting of information.

ii. Contribute to the development of networks, including intranet and internet applications to facilitate the electronic health record (EHR), personal health record (PHR), public health, and other administrative applications.

iii. Interpret the derivation and use of standards to achieve interoperability of healthcare information systems.

B. ***Data, Information, and File Structures***

i. Apply knowledge of data base architecture and design (such as data dictionary, data modeling, data warehousing, and so on) to meet organizational needs.

C. ***Data Storage and Retrieval***

i. Apply appropriate electronic or imaging technology for data/record storage.

ii. Apply knowledge of database querying and data mining techniques to facilitate information retrieval.

iii. Implement and manage knowledge-based applications to meet end-user information requirements.

iv. Design and generate administrative reports using appropriate software.

D. ***Data Security***

i. Enforce confidentiality and security measures to protect electronic health information.

ii. Protect data integrity and validity using software or hardware technology.

iii. Implement and monitor department and organizational data and information system security policies.

iv. Recommend elements that must be included in the design of audit trail and data quality monitoring programs.

v. Recommend elements that should be included in the design and implementation of risk assessment, contingency planning, and data recovery procedures.

E. ***Healthcare Information Systems***

i. Compare and contrast the various clinical, administrative, and specialty service applications used in healthcare organizations.

ii. Apply appropriate systems life cycle concepts, including systems analysis, design, implementation, evaluation, and maintenance to the selection of healthcare information systems.

iii. Facilitate project management by integrating work efforts, as well as planning and executing project tasks and activities.

iv. Formulate planning, design, selection, implementation, integration, testing evaluation, and support for organization-wide information systems.

v. Apply ergonomic and human factors in interface design.

V. **Organization and Management**

A. ***Human Resources Management***

i. Manage human resources to facilitate staff recruitment, retention, and supervision.

ii. Ensure compliance with employment laws.

iii. Develop and implement staff orientation and training programs.

iv. Develop and implement continuing education programs.

v. Develop productivity standards for health information functions.

vi. Monitor staffing levels and productivity, and provide feedback to staff regarding performance.

vii. Benchmark staff performance data.

viii. Develop, motivate, and support work teams.

B. ***Financial and Resource Management***

i. Demonstrate knowledge of financial management and accounting principles.

ii. Prepare and monitor budgets and contracts.

iii. Demonstrate and apply knowledge of cost-benefit analysis techniques to justify resource needs.

iv. Manage organization-wide coding and revenue cycle processes.

C. ***Strategic Planning and Organizational Development***

i. Develop strategic and operational plans for facility-wide information systems.

ii. Assess organization-wide information needs.

iii. Facilitate retrieval, interpretation, and presentation of data/information appropriate to user needs.

iv. Demonstrate and apply principles of organization behavior to facilitate team

building, negotiation, and change management.

D. ***Project and Operations Management***

i. Apply general principles of management in the administration of health information services.

ii. Assign projects and tasks to appropriate staff.

iii. Implement process engineering and project management techniques to ensure efficient workflow and appropriate outcomes.

Student Learning Outcomes

Bachelor of Science in Health Services Management

The Bachelor of Science in Health Services Management (BSHSM) degree combines a liberal arts education with a professional orientation. Students receive a broad general education in communications, arts and humanities, social sciences, natural sciences, and quantitative methods. The curriculum introduces students to the complex issues involved in the delivery of health care at the local, regional, national, and global levels.

It fosters appreciation for the interdisciplinary nature of these issues and that problem-solving occurs in political and culturally diverse environments. The curriculum develops students' critical thinking and problem-solving abilities, oral and written communication skills, and organizational skills so they are prepared to enter a broad range of organizations in a variety of entry level positions.

B.S.H.S.M. Learning Outcomes

Graduates of the Bachelor of Science in Health Services Management learn to anticipate, recognize, evaluate, and solve problems in health services organizations using knowledge, tools, and skills appropriate to entry- and mid-level health services management positions. The learning outcomes for the Health Services Management major are given below along with the PULs addressed in each learning outcome and the courses that address each learning outcome.

A student who graduate with the B.S. in Health Services Management will demonstrate mastery of the following learning outcomes:

1. Communicate effectively with diverse stakeholders, including public health and health care professionals, individually and in group settings using verbal, written, and electronic modes of communication (PUL #1).
2. Use statistical and other quantitative analysis tools and techniques to understand issues and problems in health care organizations and systems(PULs #1d, #2, #3).
3. Use basic financial tools, principles and practices to review and analyze financial performance of organizations and implement controls as required (PULs #1d, #2 thru #4).
4. Apply human resource best practices for management of human capital in an organization (PULs #4, #5).
5. Use marketing concepts and skills to analyze markets, develop marketing plans, and measure the impact of marketing activities to raise awareness and increase growth of the organization’s market share (PULs #2 thru #4).
6. Participate in developing and implementing plans and policies to improve the

delivery of health services (PULs #2 thru #6).

7. Work individually and within a team-setting by applying organizational knowledge and leadership skills (PULs #1 thru #6).
8. Recognize and demonstrate sensitivity to diverse points of view (PUL #5).
9. Seek principled solutions to health services delivery issues (PUL #6).

Bachelor of Science in History

The History degree program will train and equip students to do the following:

1. Know the importance and critical perspective of historical knowledge for understanding contemporary society.
2. Know basic facts, concepts, terms, and theories germane to historical study.
3. Understand how people have existed, acted, and thought in the past in various regions of the world.
4. Understand the nature of history as a discipline, including the existence of differing historiographical traditions and interpretations of the past.
5. Be able to locate historical evidence and determine its quality, including both primary and secondary sources.
6. Be able to read, evaluate, and interpret texts critically.
7. Be able to research, describe, and explain a complex historical event in a coherent manner, employing the conventions and standards of the discipline.

Student Learning Outcomes

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in Informatics

The Informatics undergraduate student will acquire competencies in the technical dimensions of informatics and information technology (IT). Students will:

1. Demonstrate knowledge and skills in the mathematical and logical foundations of informatics.
2. Define terms and explain basic principles essential to the design and development of IT and computing systems.
3. Acquire fundamental concepts and skills in software architectures and the development of information systems.
4. Demonstrate knowledge and skills in data representation, models, structures, and informatics-centric management.

The Informatics undergraduate will acquire competencies in the social dimensions of informatics and information technology. Students will:

1. Articulate and acquire strategies for staying abreast of major societal trends, such as access, privacy, intellectual property, security and others, affecting the development and deployment of modern day IT.
2. Critically analyze the intended and unintended consequences of IT on individuals, groups, formal and informal organizations at local and global levels.
3. Apply a user-centered approach to interaction design and product usability, including techniques for quantitative and qualitative testing of interface and interaction design.
4. Utilize digital tools to communicate with a range of audiences.
5. Analyze the social, cultural, and organizational settings in which IT solutions will be deployed to increase the chances of successful implementation.

Students will develop critical thinking and problem solving skills that can be applied to at least one other domain of endeavor, such as business, science, the arts, or humanities. They will:

1. Define terms and explain basic principles, concepts and theories from another domain or discipline in which the students' IT skills will be applied.
2. Demonstrate the ability to deploy IT resources in the context of another domain and/or discipline.
3. Synthesize, analyze, and conceptualize information and ideas from multiple sources

and perspectives.

4. Evaluate data, arrive at reasoned conclusions and solve challenging problems.
5. Execute a "real world" senior informatics capstone that demonstrates the skills they have acquired throughout their undergraduate education.

Students will develop collaborative skills and the ability to work in teams. They will:

1. Select and effectively utilize oral, written, visual and quantitative communication skills within the context of an interdisciplinary team.
2. Identify and demonstrate the skills, behaviors and attitudes necessary to function as an effective team member, including working cooperatively with diverse group members.
3. Acquire the skills to initiate, manage and execute an IT project.
4. Articulate legal and ethical issues when using the creative work of others; respect the intellectual property of others.

Students will acquire the behaviors of an autonomous, socially responsible professional capable of conducting professional informatics best practice. They will:

1. Create a personal code of ethics; articulate principles for resolving ethical conflicts.
2. Commit to a regular program of continuing education and lifelong learning that is independent of employer sponsorship.
3. Participate in professional organizations that promote responsible computing and service to society.

Bachelor of Science in Mechanical Engineering

Upon completion of this degree program, students will be able to:

1. Demonstrate and apply knowledge of mathematics, science, and engineering with chemistry and calculus-based physics in depth; mathematics through multivariate calculus, differential equations, and linear algebra; probability and statistics; and mechanical engineering sciences: solid mechanics, fluid-thermal sciences, materials science, systems dynamics.
2. Conduct experiments methodically, analyze data, and interpret results.
3. Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability, with applications to mechanical systems and thermal systems.
4. Function in teams to carry out multidisciplinary projects.
5. Identify, formulate, and solve engineering problems.
6. Understand professional and ethical responsibilities.
7. Communicate effectively in writing and orally.
8. Understand the impact of engineering solutions in a global, economic, environmental, and societal context through broad education.
9. Recognize the need to engage in lifelong learning.
10. Demonstrate knowledge of contemporary issues.
11. Use the techniques, skills, and modern tools of engineering effectively and correctly in engineering practice with mechanical engineering analysis tools (e.g., ProMechanica); engineering design and manufacturing tools (e.g., ProEngineer); internet and library information resources; and mathematical computing and analysis tools (e.g., Matlab, Excel, LabView, and C).

Bachelor of Science in Media Arts and Science

Students in the Media Arts and Science program will acquire competencies in several domains. They will:

1. Understand digital media and its effective use as a form of communication.
2. Communicate ideas effectively in written and oral form to a range of audiences.
3. Work effectively as a member of a team to achieve a common goal.
4. Analyze a problem, identify and evaluate alternatives, plan an appropriate solution.
5. Appreciate the history, theory, and traditions of digital media. Evaluate media from multiple perspectives using the theories, concepts, and language of digital media.
6. Demonstrate mastery of the concepts, techniques, and tools in one or more digital media specialties.
7. Apply knowledge and skills to develop professional quality digital media productions in a timely manner and utilizing best practices and standards.
8. Explain the impact of digital media on individuals, organizations, and society.
9. Acknowledge diverse opinions regarding professional, ethical, legal, and social issues with a global perspective.
10. Appreciate the need for lifelong learning and have a plan for continuing professional development.

Bachelor of Science in Nursing

Upon completion of the Nursing program, the graduate will be a:

1. **Critical Thinker:** Someone who is able to demonstrate intellectual curiosity, rational inquiry, problem-solving skills, and creativity in framing problems.
2. **Culturally Competent Person:** Someone who can provide holistic nursing care to a variety of individuals, families, and communities.
3. **Knowledgeable Coordinator:** A coordinator of community resources who facilitates individual, family, and community access to resources necessary for meeting health care needs.
4. **Politically Aware Person:** Someone who participates in the profession and the practice of nursing with a global perspective.
5. **Conscientious Practitioner:** An individual who practices within the ethical and legal framework of the nursing profession.
6. **Effective Communicator:** Someone who is able to share accurate information.
7. **Therapeutic Nursing Intervention/Competent Care Provider:** A competent provider of health care who assumes the multiple role dimensions in structured and semi-structured health care settings.
8. **Professional Role Model:** A person who promotes a positive public image of nursing.
9. **Responsible Manager:** Someone who balances human, fiscal, and material resources to achieve quality health care outcomes.

Bachelor of Arts in Philosophy

The Philosophy degree program will train and equip students to:

1. Know the important figures and movements in the history of philosophy.
2. Understand the major questions, positions, distinctions, and arguments in the main branches of philosophy.
3. Be able to write clear, cogent, and informed philosophical papers.
4. Speak clearly, accurately, and in an academic manner on philosophical topics; comprehend, interpret, and analyze complex philosophical writings.
5. Make relevant distinctions.
6. Clarify important concepts and claims.
7. Competently analyze, evaluate.
8. Construct both deductive and inductive arguments.

Bachelor of Arts in Political Science

The Political Science B.A. curriculum will train and equip students to:

1. Know how to distinguish among theories of politics and analyze current political situations in theoretical terms.
2. Know how to identify the various types of actors in international relations and relate these in describing current global issues.
3. Know how to locate appropriate sources by searching electronic and traditional data bases.
4. Understand basic structural components of state and national government (legislative, executive, and judicial) and explain their relationship to each other and to subnational units.
5. Understand the roles of significant actors, including elites, masses and institutions in the governmental processes.
6. Be able to formulate hypotheses, construct research designs, and apply appropriate analytical skills (both qualitative and quantitative) to the study of political science.
7. Be able to use and cite appropriate sources correctly.
8. Be able to write and speak with sufficient clarity to convey their attitudes, knowledge, and skills.

Undergraduate Programs

Student Learning Outcomes

Psychology

PUL #1: Core Communication and Quantitative Skills
The ability of students to write, read, speak, and listen, perform quantitative analysis, and use information resources and technology - the foundation skills necessary for all IUPUC students to succeed.

#1A: Language Skills

Psychology SLOs Equivalent to this Learning Outcome

- Demonstrate effective, situation appropriate, writing and speaking skills.
- Comprehend, interpret, and analyze college-level sources of information and vocabulary.
- Understand and correctly use discipline-specific terminology in psychology.

#1B: Quantitative Skills

Psychology SLOs Equivalent to this Learning Outcome

- Read, comprehend, and critique research methods in original research articles.
- Use scientific research methods including design, data analysis, and interpretation to solve problems related to issues in psychology.
- Identify and propose solutions for problems using quantitative tools and reasoning.
- Interpret and perform statistical analyses for basic research designs and understand distinctions between and appropriate use of correlational and experimental findings.

#1C: Information Resources Skills

Psychology SLOs Equivalent to this Learning Outcome

- Perform literature searches effectively using a variety of sources and techniques.
- Conduct literature reviews of existing research.
- Utilize computers and other technologies for many purposes, including professional communication of information.

PUL #2: Critical Thinking
The ability of students to analyze carefully and logically information and ideas from multiple perspectives.

Psychology SLOs Equivalent to this Learning Outcome

- Understand, remember, apply, analyze, evaluate, create, and synthesize knowledge, procedures, processes, or products.
- Use these skills to solve problems, produce reasoned choices, make informed decisions, and generate new questions.
- Design, carry out, and defend research projects.

PUL #3: Integration and Application of Knowledge
The ability of students to use information and concepts from studies in multiple disciplines in their intellectual, professional, and community lives.

Psychology SLOs Equivalent to this Learning Outcome

- Develop self-awareness by identifying personal strengths, weaknesses, values, and goals.
- Develop clear and realistic goals and expectations for a career in psychology or related field.
- Apply psychological knowledge to enhance their personal lives and the lives of others.
- Further the goals of society and pursue them at a local level.
- Understand and abide by the ethics of psychology.

PUL #4: Intellectual Depth, Breadth, and Adaptiveness
The ability of students to examine and organize disciplinary ways of knowing and to apply them to specific issues and problems.

Psychology SLOs Equivalent to this Learning Outcome

- Remember and understand the major concepts, theoretical perspectives, methodologies, and empirical findings in psychology.
- Be able to distinguish between approaches to knowledge in psychology and other fields.
- Be able to modify approaches based on context or situational demands.

PUL #5: Understanding Society and Culture
The ability of students to recognize their own cultural traditions and to understand and appreciate the diversity of the human experience, both within the United States and internationally.

Psychology SLOs Equivalent to this Learning Outcome

- Recognize, understand, and respect the similarities and differences that exist between individuals, societies, and cultures on values, behaviors, and thought processes.
- Understand the influence of culture and society on individuals' cognition and behavior.
- Analyze and understand the interconnectedness of local and global communities.
- Operate with civility, especially toward those who differ from oneself.
- Work effectively, respectfully, and collaboratively with others with diverse backgrounds and perspectives.

PUL #6: Values and Ethics
The ability of students to make judgments with respect to individual conduct, citizenship, and aesthetics.

Psychology SLOs Equivalent to this Learning Outcome

- Make informed and principled choices in their personal and public lives and be aware of the consequences of these choices.
- Recognize the importance of aesthetics in their personal lives and to society.
- Understand ethical principles within diverse cultural, social, environmental, and personal settings.
- Understand and abide by ethical standards of the professional organization of the chosen profession (e.g., APA for clinicians and psychologists, Belmont Report for researchers).

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in Public Affairs

Graduates of the Bachelor of Science in Public Affairs program should have the intellectual depth, breadth, and mental agility of learning to anticipate, recognize, evaluate, and solve problems in public affairs using knowledge, skills, and tools appropriate to entry-level management, civic leadership, and policy studies positions. A student who is awarded the Bachelor of Science in Public Affairs will be able to:

1. Communicate effectively important information and ideas in public affairs (especially within their major), both with individuals and in group settings, and using oral, written, visual, and electronic modes.
2. Recognize, characterize and analyze issues and problems in public affairs using appropriate technology to collect, collate and assess data through statistics and other quantitative tools.
3. Apply knowledge and theory of the public, nonprofit and private sectors (e.g., microeconomics) to analyze, evaluate and contribute to the development of solutions for public affairs issues and problems.
4. Recognize and incorporate concerns, theories, concepts and other information rooted in the broader concepts of globalization, civic engagement, sustainability, and management in working with public affairs issues and problems.
5. Work effectively in a team.
6. Recognize and demonstrate sensitivity to diverse points of view.
7. Develop an awareness of one's personal responsibility and service to the public, and to seek principled solutions to problems in public affairs.

Students will be able to demonstrate additional learning specific to their major.

Civic Leadership Major

The civic leadership major is intended to impart knowledge and skills needed to catalyze community actions. Students electing a civic leadership major will analyze the elements necessary to successful community solutions, and will learn to solve public problems in the context of shared power and authority. Students in civic leadership will be able to:

1. Understand and communicate the nature of civil society.
2. Understand and apply theoretical and applied concepts of the political process to civic engagement.
3. Understand and apply the theoretical and practical foundations of leadership.
4. Engage in negotiations and conflict resolution.

Management Major

The management major is concerned with the functioning of organizations, whether public, private or nonprofit. Students electing the management major will study resource allocation, organizational design, accountability, and other generally applicable principles involved in all organizational structures, with an emphasis on issues specific to public and nonprofit organizations. Students in management will be able to:

1. Understand and participate in the management of public and nonprofit organizations.
2. Understand the principles of finance and budgeting in the public sector, and be able to undertake basic finance and budgeting activities in that context.
3. Understand the principles of finance and budgeting in the nonprofit sector, and be able to undertake basic finance and budgeting activities in that context.
4. Understand the principles of human resource management, and be able to apply them in the context of a public or nonprofit organization.
5. Manage diversity in a changing workforce.
6. Understand the decision-making in public and nonprofit organizations, and be able to contribute to that process in those organizations.

Policy Studies Major

The policy studies major is concerned with the exercise of power and the nature and wisdom of the rules that constrain the use of power. In contrast to the management student, whose focus in on the organization, and the civic leadership student, whose focus is on the community and community networks, the policy studies student will primarily be concerned with the rules we establish to govern our communal endeavors. Students in policy studies will be able to:

1. Understand, explain and apply common models of the policy process to problems in public affairs.
2. Understand the options for public input into public decision-making and policy implementation.
3. Read, understand and evaluate program evaluations and policy analyses reported by others, and communicate those digested findings clearly and concisely.
4. Understand and apply basic methods of program evaluation using common quantitative, qualitative and mixed tools.
5. Understand and apply basic methods of public policy analysis using common quantitative, qualitative and mixed tools.
6. Understand a policy area in depth.

Undergraduate Programs

Student Learning Outcomes

Bachelor of Science in Public Health - Environmental Health Science Major

The Bachelor of Science in Public Health (BSPH) degree combines a liberal arts education with a professional orientation. Students receive a broad general education in communications, arts and humanities, social sciences, natural sciences, and quantitative methods. The curriculum introduces students to the complex public health issues and environmental health problems facing contemporary society at the local, regional, national, and global levels.

It fosters appreciation for the interdisciplinary nature of these issues and that problem-solving occurs in politically and culturally diverse environments. The curriculum develops students' critical thinking and problem-solving abilities, oral and written communication skills, and organizational skills so they are prepared to enter a broad range of organizations in a variety of entry level positions.

Learning Outcomes

The BSPH - Environmental Health Science major prepares students to anticipate, recognize, evaluate, and solve problems in environmental science and health using knowledge, tools, and skills appropriate to entry- and mid-level environmental health science positions. The learning outcomes for the Environmental Health Science major are given below along with the PULs addressed in each learning outcome and the general education courses and courses in the major that support each learning outcome.

A student who graduate with the B.S.P.H. will demonstrate mastery of the following learning outcomes:

1. Communicate effectively with diverse stakeholders individually and in group settings using verbal, written, and electronic modes of communication (PUL #1).
2. Apply statistical and other quantitative analysis tools and techniques to identify, characterize, and manage issues and problems in environmental science and health.
3. Anticipate, recognize, evaluate, and solve environmental science and health problems by applying scientific and technical knowledge and principles (PULs #1 thru #4).
4. Monitor a community’s environmental health status using epidemiological tools, laboratory techniques, and field methods appropriate to individual issues (PULs #1 thru #4).
5. Participate in developing and implementing plans and policies to improve environmental health using scientific and technical knowledge (PULs #1 thru #6).

6. Work effectively in a team-setting by applying organizational knowledge and leadership skills (PULs #1 thru #6).
7. Recognize and demonstrate sensitivity to diverse points of view (PUL #5).
8. Seek principled solutions to environmental health problems (PUL #6).

Bachelor of Arts in Religious Studies

The Religious Studies B.A. curriculum will train and equip students to:

1. Know: the basic worldviews and practices of a variety of religious traditions (e.g., tribal/indigenous traditions, Hinduism, Buddhism, Judaism, Christianity, Islam).
2. Know the concepts and methods of religious studies as a nonsectarian, interdisciplinary way of exploring the amazing diversity of the world's religions.
3. Understand the dimensions of religion (experiential, mythical, doctrinal, ethical, ritual, social) as a tool for analyzing and comparing religious traditions.
4. Understand how religions change over time in response to both internal and external circumstances.
5. Be able to read and analyze religious sources, both textual and non-textual, in social and historical context.
6. Be able to speak and write about competing religious claims in a fair-minded and informed manner
7. Be able to deal comfortably with complexity and diversity in a way applicable not only to careers in religion but also to jobs in business, communication, education, international relations, fine arts, government, law, medicine, nonprofit management, social services, and other fields.

Bachelor of Science in Tourism, Conventions, and Event Management

The Tourism, Conventions and Event Management program will lead to a Bachelor of Science degree. Graduates are qualified to be employed in different segments of the tourism industry: research, destination development, adventure travel, festivals, events, travel management, entertainment, attractions, transportation, accommodations, and/or food operations. Upon completion of the degree, students will be able to:

1. Define, apply, analyze, and execute operational principles of tourism and event management.
2. Perform effective oral and written communication skills.
3. Address and analyze tourism sustainability and trends critically and reflectively.
4. Work efficiently and productively with persons from different cultures and backgrounds.
5. Demonstrate ethical behavior and leadership skills to solve issues in a tourism-related environment.
6. Advance best practices in the tourism and event profession.
7. Practice a sense of community and civic mindedness.

IUPUI INDIANA UNIVERSITY PURDUE UNIVERSITY INDIANAPOLIS

IUPUC Campus Bulletin 2012-2014

Master of Business Administration

Master of Mental Health Counseling

Graduate/Professional Program Overview

Students who already hold bachelor's degrees frequently want to take courses without being admitted to one of the university's degree programs. These are students who are not currently enrolled in a degree program but are working toward admission or taking classes for personal or professional enrichment with no plans to work toward a degree.

Such students must apply to the Graduate Non-Degree (GND) program. As GND students, they can take both undergraduate and graduate courses. However, many graduate courses will require GND students to obtain preregistration permission from either the instructor or the department. GND students may not accumulate more than 18 credit hours in a single subject area.

Students who are initially admitted as nondegree students, but who later wish to obtain a graduate degree, must make formal application for admission to a departmental degree program. Once admitted, the department may recommend to the dean of the Indiana University Graduate School that credit earned as a nondegree student be applied to degree requirements. Students should be aware that certain divisions specifically prohibit course work taken under nondegree status from counting toward a degree after a student has been admitted to a degree program.

The types of financial aid available to graduate students include loans and federal work study from Federal Title IV programs and scholarships from IUPUI. A small number of graduate students qualify for fee credits from SSACI.

M.B.A. Curriculum

M.B.A. Learning Outcomes

Master of Mental Health Counseling

Graduate / Professional Program Overview

Master of Business Administration

- Application Deadlines
  - The M.B.A. Program at IUPUC starts new student cohorts every fall semester. Application deadlines are usually March 1 for international students and May 1 for all M.B.A. applicants. Please visit the program web site for current details.
- The M.B.A. program is....
  - Six **thematic modules** breakdown the walls of the traditional class-by-class structure. You learn much more similarly to how real business is conducted.
  - **Integrated** instead of isolated teaching and learning.
  - **Analytical skills** you need to understand business problems. But also the **personal and professional development skills** you need to address those problems in productive, ethical ways.
  - **Full-time**, **available faculty** who combine their industry experience with ongoing academic and applied research.
  - A **team-based consulting project** with the region's non-profit organizations. Learn by doing really good things for area communities.
  - **International perspectives** in the curriculum as well as in the classroom, with approximately a dozen countries represented in current cohorts.

Overview

Study part-time, finish in 24 months.

By targeting general management and decision-making skills, the IU M.B.A. Columbus becomes a powerful credential that continues serving you well as your professional life develops and grows.

It is an applied educational experience, utilizing problem- and project-based learning to exercise concepts and strategies. Faculty mentor you through the program by fusing their own business experiences with ongoing academic and applied research. And they are easily available to you: At a time when so much educational contact is relegated to a kind of digital hither land, IU M.B.A. Columbus faculty interact with you face-to-face. In real life 3D, inside and outside of the classroom.

Best of all, the IU M.B.A. Columbus is convenient and affordable. Begin your studies in August, attend classes part-time, two nights a week, and complete your degree in 24 months.

Boot Camp

We've transformed the traditional prerequisites into an intensive, smart Boot Camp. The advantage for you is, once admitted, direct entry into the M.B.A. program after a two-week workshop that targets the content and skills needed to be successful as a graduate business student.

Based on the overall weight of their academic background, some students may be asked to delay application to the program until further work at the undergraduate level is completed.

Master of Mental Health Counseling

Graduate / Professional Program Overview

Master of Business Administration

M.B.A. Admissions

To be considered for the IU M.B.A. Columbus program, you need to have a bachelor's degree from a regionally accredited institution (or an equivalent international institution). An undergraduate business degree is helpful, but not required. In fact, our current students and alumni have brought with them a wide range of quality undergraduate degrees outside of business.

Your application to the program will consists of several items:

- A completed application form, available below for download.
- Submission of scores from the Graduate Management Admissions Test (GMAT) taken within the past five years.
- Submission of official transcripts from any institution of higher education at which you have studied.
- Submission of a 500-word essay (about two pages, double-spaced) based on one of three topics we provide (See "Application Instructions and Explanations" below).

NOTE: Some international students may also be required to submit scores from the Test of English as a Foreign Language (TOEFL).

Application Documents

Visit the IUPUC M.B.A. website for current application instructions and deadlines.

Application Deadlines

Application Deadlines

The M.B.A. Program at IUPUC starts new student cohorts every fall semester. Application deadlines are usually March 1 for international students and May 1 for all M.B.A. applicants. Please visit the program web site for current details: IUPUC M.B.A. website

What We Look For

Our admissions decisions rest on three pillars of evaluation:

1. **Academic Performance:** Your GMAT, GPA, and quality of undergraduate institution and program are combined into a metric to rate academic potential. There is no minimum GMAT or GPA; the combination is what matters. We weigh GPA slightly more strongly, however.
2. **The Whole Person:** Your resume and essay are significant considerations for

admission. These items help us evaluate the experiences you might bring to the cohort, and the communication and critical thinking skills necessary to both succeed in graduate business studies and manage well in an organization. Professional work experience is not required, though many of our students have at least a few years of such experience.

3. **Dynamics and Diversity of the Cohort:** Finally, because we target small cohorts, it is important to us to consciously consider each student as a contributor to cohort dynamics and diversity. For example, IU MBA Columbus has always had a strong international element to it, in large part because we have students from several countries. And while most of our students have several years of professional experiences, often in technical fields such as engineering, we also value the fresh perspectives of quality students with little professional experience but who often bring an entrepreneurial flair to the cohort.

Overview: Master of Business Administration (MBA) Program

Are you ready for an MBA student experience like no other? Discover a part-time, 24-month graduate program that is custom-designed to meet the high expectations and busy schedules of working professionals like you. Really! Here's why:

- Integrative learning.
  Real business isn't conducted in silos—so you should not have to learn that way. At Indiana University-Purdue University Columbus (IUPUC), every course in our MBA curriculum is integrated with others into thematic modules.
- Learn, apply, repeat.
  This goes way beyond routine research papers or case studies. Our MBA students are engaged with top regional business executives and community leaders, applying skills learned in the classroom before they even touch their diplomas.
- Personal AND professional development.
  With our professional development thread (PDT), we provide a whole-student experience few part-time programs can match. MBA students at IUPUC receive personal mentoring based on Emotional Quotient Inventory (EQi) and Predictive Index (PI) evaluations. We throw in expert evaluation of your resume, individual coaching to refine your presentation skills, and workshops to perfect your business dress and etiquette.
- Small class sizes. Big IU degree.
  Complete your Indiana University MBA degree with a small cohort of 25-30 peers. And unlike entirely online MBA programs, our Division of Business faculty and staff actually interact with you in real-time, face-to-face, high-definition 3D—in and out of the classroom.
- Affordable. Convenient. Close to home.
  Take all of the above, then package it in a convenient, affordable, and respected Indiana University MBA degree program. Study part-time on a Columbus campus that's close to home and work. Finish in 24 months.

Ready to apply for admission? Classes begin for the "Charlie cohort" in August.

- March 1, 2012: International student admission application material was due. Please consider applying for our "Delta cohort," which begins in August of 2013.
- May 1, 2012: All other student admission application material is due.

Master of Mental Health Counseling

Graduate / Professional Program Overview

Master of Business Administration

M.B.A. Curriculum

The modular format allows us to more easily integrate knowledge, skills, exercises, cases, and your overall learning experience. It is the themes of the modules that guide content and instruction, as we increasingly break down the walls of the traditional course structure.

Module 1: Organizational and Strategic Development

Two issues critical to your work in the program and development of your management savvy. Understanding your managerial profile and its role in the strategic nature of organizations.

Module 2: Enterprise Structures

Business enterprises are governed in part by the economic realities of the competitive markets in which they act and the information those markets feed back to managers. As a result, good managers understand the accounting structures that help track business performance, the information systems needed to keep decision-makers intelligent, and the economic drivers of their business.

Module 3: Global Perspectives and Human Resources

Business managers have always needed to be people who understand, and can organize and motivate, other people. They've also always needed to be aware of the wider world around them. Today, both of these issues have become acutely important and fused. The really effective business managers today embrace human resources from across-cultural, global perspective.

Module 4: Analysis and Decision Making

Finance, marketing and operations taught as managers actually experience these disciplines in the firm as interrelated, problem-solving functions.

Module 5: Innovation and Application

Module 5 immerses students in the facets and culture of entrepreneurship, while confronting them with a team-based consulting project in the service of a regional non-profit organization.

Module 6: Managing and Leading

Last summer and last semester in the program is a time for reflection from the vantage point of genuine business leaders and synthes is in the capstone competitive strategy

game.

M.B.A. Contact Information

M.B.A. Curriculum

M.B.A. Learning Outcomes

Master of Mental Health Counseling

Graduate / Professional Program Overview

Master of Business Administration

M.B.A. Learning Outcomes

M.B.A. Program Philosophy

The purpose of the M.B.A. program is to create a graduate business learning experience in which students integrate management knowledge and skills in ways that lead to effective decision-making, complex problem solving, and leadership within a global and ethical context.

To accomplish this, graduate business faculty and staff rely heavily on these three activities:

1. Designing and delivering a curriculum that integrates graduate level content and skills into learning experiences that more closely resemble how real business is practiced by the general manager.
2. Creating operational processes and policies that are student-centered.
3. Actively engaging business and community leaders.

Student Learning Outcomes and Assessments

The Division of Business has adopted five program learning outcomes for the IU M.B.A. Columbus program. These five connect directly to the four Principles of Graduate Learning, in draft form, expected to be adopted soon by IUPUI/IUPUC.

Upon completion of graduate business studies at IUPUC students should be able to demonstrate:

1. **General Management Knowledge, Skills and Leadership**
    - Demonstrate an ability to use cross-functional knowledge and skills to effectively manage projects and operations.
    - Participate productively in groups and teams, and demonstrate contributions to team goals.
    - Demonstrate a capacity both to lead others to achieve organizational goals and to support effective leadership.

IUPUI/IUPUC PGL addressed: Demonstrate the knowledge and skills needed to meet disciplinary standards of performance, as stated for each individual degree.

2. **Effective Communication**
    - Communicate complex analyses, recommendations, strategies, and visions in ways that lead to clarity of purpose and effective decision-making.

IUPUI/IUPUC PGL addressed: Communicate effectively with their peers, their clientele, and the general public.

3. **Critical Thinking**
    - Demonstrate an ability to apply cross-functional knowledge and skills to analyze problems, prioritize issues, and develop effective responses.
    - Demonstrate an ability to apply cross-functional knowledge and skills in unfamiliar, or unexpected, situations in order to adapt to change and develop innovative responses.

IUPUI/IUPUC PGL addressed: Think critically and creatively to improve practice in their field.

4. **Ethical Thinking and Decision-Making**
    - Establish a set of ethically valid professional values and demonstrate how those values apply to situations and trade-offs business managers may confront.

IUPUI/IUPUC PGL addressed: Meet all ethical standards established for the discipline.

5. **Management in a Social Context**
    - Identify strategic stakeholder issues and frame decision-making within the social, political and cultural contexts of local and global communities.

Licensure

Graduate / Professional Program Overview

Master of Mental Health Counseling

Overview

The Indiana University master's degree in mental health counseling at Indiana University-Purdue University Columbus (IUPUC) is 60-credit hour program that prepares students for careers as licensed mental health providers who assist individuals, groups, and families in maximizing their human potential and dealing effectively with behavioral problems and everyday life challenges.

Graduates of the program will gain the knowledge, skills, and experience they need to provide expert service guided by the values of ethical practice and respect for all people. The curriculum is consistent with accreditation body guidelines and meets the criteria for preparing graduates for licensure as a mental health counselor in the State of Indiana.

Courses are sequenced so that students complete the degree in two to three years. In addition to course work, the program includes the following field experiences:

- 100-hour practicum
- 600-hour internship
- 300-hour advanced internship with 100 hours of personal supervision

Careers and employment

Demand for graduates of IUPUC's mental health counseling program is expected to be strong. Graduates will be prepared to work in a variety of settings, including behavioral healthcare centers, private practice, psychiatric hospitals, social service agencies, managed care, correctional facilities, group homes, religious organizations, state and county agencies, health maintenance organizations, and public and private school systems.

Program objectives

Our goal is to educate students who establish professional identities as well-trained, fully licensed mental health counselors who are active participants in their profession. As a student in this program, you can expect to:

- Develop a broad background in foundational fields such as personality theory, development, interpersonal relationships, psychopathology, and psychopharmacology.
- Gain expertise in clinical assessment, treatment, coordination, collaboration, referral, and prevention related to behavioral health issues in individuals, groups, and families.
- Engage in research to understand and critique the research literature and to employ

and evaluate empirically-based practices.
- Practice a systemic, strengths-based approach to achieving behavior change.
- Complete coursework and field experience, integrate theory and practice, and link assessment to treatment within the context of various theoretical perspectives.
- Understand the role of mental health counseling within the contexts of the community, individual and cultural/ethnic diversity, and relevant ethical and legal issues.
- Employ solid business practices associated with delivery of behavioral health services.

What to expect

Pursuing the Indiana University Master of Arts in Mental Health Counseling degree at IUPUC requires motivation and dedication. The program is rigorous in academic challenge and students must have ample time for class preparation and completing the practicum and internship requirements.

Students admitted to the program will work closely with faculty during both their academic preparation and practicum training. Students will be encouraged to work collaboratively with their cohort group as a pathway to increased learning opportunities and develop skills in collegial professional practice.

Licensure

Graduate / Professional Program Overview

Master of Mental Health Counseling

MHC Admissions

Applying to the M.A. in Mental Health Counseling program

To be admitted to the Indiana University master's in mental health counseling program at Indiana University-Purdue University Columbus (IUPUC), you must have an undergraduate degree from an accredited college or university and a minimum undergraduate GPA of 3.0 on a 4.0 scale.

In addition, you must:

- Be proficient in the English language and possess at least 15 undergraduate course credits in psychology or behavioral science
- Provide official transcripts of undergraduate degrees earned at accredited institutions if other than Indiana University, Indiana University-Purdue University Indianapolis (IUPUI), or IUPUC
- Complete the Graduate Record Examination (GRE), including verbal, quantitative, and analytical writing sections. A minimum score of 500 on each section is preferred. Completion of the GRE Psychology Subject Test is recommended and good scores will prove an advantage.
- Complete the M.A. in Mental Health Counseling application for admission, including three letters of recommendation from persons qualified to evaluate your academic performance, professional behavior, and personal character. At least one of these letters must be from a faculty member from the applicant’s undergraduate degree program. At least one letter must be from a current or former supervisor or employer. An $50 application fee is required.
- Compose a 500-word reflective essay explaining why you seek admission to this program along with your strengths, weaknesses, and vision for yourself as a mental health counselor.

Application due dates

- For the class beginning in the fall of 2012, the application deadline is **May 1**.
- The application for admission will be posted here when it is available.

Admission is offered only for the fall semester. Beginning in 2013, admission priority will be given to applications submitted by March 1.

Financial considerations

Tuition is based on Indiana University graduate tuition rates and graduate student fees. Schedule an appointment with IUPUC's Office of Financial Aid and Scholarships for more information about state and federal financial aid, sources for grants and scholarships, etc.

Master of Mental Health Counseling

Licensure

Becoming a Licensed Mental Health Counselor (LMHC) in Indiana

Graduates of the Indiana University Master of Arts (M.A.) in Mental Health Counseling degree at Indiana University-Purdue University Columbus (IUPUC) must satisfy post-degree professional experience requirements.

For LMHC licensure, the State of Indiana requires 3,000 counseling contact hours and 200 hours of face-to-face supervision by a licensed counselor or other licensed and approved supervisor.

For current Indiana requirements, applicants should contact the Indiana State Health Professions Bureau. Those who seek licensure in other states should contact those state boards for requirements.

IUPUC Policies

Undergraduate Policies & Procedures

Academic Policies & Procedures

Indiana University has adopted a code that applies, with only minor differences, to students on all Indiana University campuses. The code spells out what constitutes unacceptable behavior and the procedures to be followed when there are alleged cases of misconduct. What follows is not the code but rather abbreviated and paraphrased statements on key elements of the code: academic and personal misconduct as well as a section on what students should do if they believe that other students, faculty, or staff have violated their rights. The code also explains the procedures employed and how students may appeal decisions. For more information, consult the Office of the Registrar online. For an online copy of the code, visit http://www.iupuc.edu/registrar/files/IUPUC_Student_Code_of_Conduct.pdf.

A. Academic Misconduct

The university may discipline a student for academic misconduct, which is defined as any activity that tends to compromise the academic integrity of the institution and undermine the educational process. Academic misconduct includes, but is not limited to, the following:

1. Cheating

1. A student must not use external assistance on any "in-class" or "take-home" examination, unless the instructor specifically has authorized such assistance. This prohibition includes, but is not limited to, the use of tutors, books, notes, and calculators.
2. A student must not use another person as a substitute in the taking of an examination or quiz.
3. A student must not steal examinations or other course materials.
4. A student must not allow others to conduct research or to prepare any work for him or her without advance authorization from the instructor to whom the work is being submitted. Under this prohibition, a student must not make any unauthorized use of materials obtained from commercial term paper companies or from files of papers prepared by other persons.
5. A student must not collaborate with other persons on a particular project and submit a copy of a written report which is represented explicitly or implicitly as the student's own individual work.
6. A student must not use any unauthorized assistance in a laboratory, at a computer terminal, or on fieldwork.
7. A student must not submit substantial portions of the same academic work for credit or honors more than once without permission of the instructor to whom the work is being submitted.
8. A student must not alter a grade or score in any way.

2. Fabrication

A student must not falsify or invent any information or data in an academic exercise

including, but not limited to, records or reports, laboratory results, and citations to the sources of information.

3. Plagiarism

A student must not adopt or reproduce ideas, words, or statements of another person without an appropriate acknowledgment. A student must give due credit to the originality of others and acknowledge an indebtedness whenever he or she does any of the following:

1. Quotes another person's actual words, either oral or written;
2. Paraphrases another person's words, either oral or written;
3. Uses another person's idea, opinion, or theory; or
4. Borrows facts, statistics, or other material, unless the information is common knowledge.

4. Interference

1. A student must not steal, change, destroy, or impede another student's work. Impeding another student's work includes, but is not limited to, the theft, defacement, or mutilation of resources so as to deprive others of the information they contain.
2. A student must not give or offer a bribe, promise favors, or make threats with the intention of affecting a grade or the evaluation of academic performance.

5. Violation of Course Rules

A student must not violate course rules as contained in a course syllabus or other information provided to the student.

6. Facilitating Academic Dishonesty

A student must not intentionally or knowingly help or attempt to help another student to commit an act of academic misconduct.

B. Personal Misconduct on University Property

The university may discipline a student for the following acts of personal misconduct which occur on university property:

1. Dishonest conduct including, but not limited to, false accusation of misconduct; forgery, alteration, or misuse of any university document, record, or identification; and giving to a university official information known to be false.

2. Initiating or circulating a report or warning concerning an impending bombing, fire, or other emergency or catastrophe, knowing that the report is false; making a false report concerning a fire or that a bomb or other explosive has been placed in any university building or elsewhere on university property; or transmitting such a report to an official or an official agency.

3. Release of access codes for university computer and duplicating systems and other university equipment to unauthorized persons; use of an access code for a purpose other than that stated on the request for service.

4. Lewd, indecent, or obscene conduct.

5. Disorderly conduct which interferes with teaching, research, administration, or other

university or university-authorized activity.

6. Actions which endanger the student, the university community, or the academic process.

7. Failure to comply with the directions of authorized university officials in the performance of their duties, including failure to identify oneself when requested to do so; failure to comply with the terms of a disciplinary sanction.

8. Unauthorized entry, use, or occupancy of university facilities; refusal to vacate a university facility when directed to do so by an authorized official of the university.

9. Unauthorized taking or possession of university property or services; unauthorized taking or possession of the property or services of others.

10. Damage to or destruction of university property or of property on university premises belonging to others.

11. Unauthorized setting of fires on university property; unauthorized use of or interference with fire equipment.

12. Unauthorized possession, use, manufacture, distribution, or sale of illegal fireworks, incendiary devices, or other dangerous explosives.

13. Possession of firearms or other weapons on university property contrary to law; possession or display of any firearm on university property frequented by the public, except, in the course of an authorized activity, possession of weapons in residence halls on university property in violation of residence hall rules; and intentional possession on university property of a dangerous article or substance as a potential weapon.

14. Acting with violence; and aiding, encouraging, or participating in a riot.

15. Sexual harassment, as defined in section I.A.3 (above) of this code.

16. Harassment based on sexual orientation, as defined in section I.A.4 (above) of this code.

17. Racial harassment, as defined in section I.A.5 (above) of this code.

18. Hazing, defined as any conduct which subjects another person, whether physically, mentally, emotionally, or psychologically, to anything that may endanger, abuse, degrade, or intimidate the person as a condition of association with a group or organization, regardless of the person's consent or lack of consent.

19. Physical abuse of any person, including the following:

1. The use of physical force or violence to restrict the freedom of action or movement of another person or to endanger the health or safety of another person;
2. Physical behavior that involves an express or implied threat to interfere with an individual's personal safety, academic efforts, employment, or participation in university-sponsored extracurricular activities and causes the person to have a reasonable apprehension that such harm is about to occur; or
3. Physical behavior that has the purpose or reasonably foreseeable effect of interfering with an individual's personal safety, academic efforts, employment, or participation in university-sponsored extracurricular activities and causes the person

to have a reasonable apprehension that such harm is about to occur.

20. Verbal abuse of another person, including the following:

    1. a. An express or implied threat to:
        1. Interfere with an individual's personal safety, academic efforts, employment, or participation in university sponsored activities; or
        2. Injure that person, or damage his or her property; and under the circumstances causes the person to have a reasonable apprehension that such harm is about to occur; or
    2. "Fighting words" that are spoken face-to-face as a personal insult to the listener or listeners in personally abusive language inherently likely to provoke a violent reaction by the listener or listeners to the speaker.

21. Unauthorized possession or use of alcoholic beverages.

    1. The following actions are prohibited by Indiana University:
        1. Use or possession of alcoholic beverages on university property, or in the course of a university activity or student organization activity, contrary to law;
        2. Use or possession of alcoholic beverages in any undergraduate residence supervised by the university, including fraternity and sorority houses;
        3. Use or conspicuous possession of alcoholic beverages in or on any property of the university frequented by the public, except in areas specifically designated by the chief administrative officer of the campus.
    2. The possession or use of alcoholic beverages is not forbidden in the following areas of the university unless otherwise prohibited by law:
        1. In designated graduate housing and residence hall buildings designated as restricted to students who are twenty-one years of age or older, including residence rooms and certain common areas approved for such purpose by the Dean of Students. The Dean of Students may enact rules to regulate such use or possession.
        2. In designated undergraduate residences supervised by the university when temporary permission is granted by the Dean of Students for events at which persons twenty-one years of age or older may lawfully possess and use alcoholic beverages.
        3. In designated family housing, including residence rooms, apartments, and certain common areas approved for such purpose by the Dean of Students. The Dean of Students may enact rules to regulate such use or possession.
        4. In Union Buildings, including guest rooms and certain other areas specifically approved by the chief administrative officer of the campus.
        5. In other areas, such as private offices and faculty lounges, not accessible to the public and specifically approved by the chief administrative officer of the campus.
    3. Student organizations that serve or permit possession of alcoholic beverages at student organization functions, on or off campus, may be disciplined if violations of alcoholic beverage laws or of university regulations occur. Individual students who plan, sponsor, or direct such functions also may be subject to discipline.

22. Unauthorized possession or use of illegal drugs.

    1. The following actions are prohibited by Indiana University:
        1. Use or possession of any drug or controlled substance, or of drug paraphernalia, on university property or in the course of a university activity or student organization activity, contrary to law. It is not a violation of university regulations for students to possess such drugs or controlled

substances if they are possessed under the terms of a valid and legal prescription for such drugs or controlled substances.
2. Use of university facilities to manufacture, process, or distribute any drug or controlled substance contrary to law.
3. Sale, gift, or transfer of drugs, controlled substances, or drug paraphernalia to Indiana University students, whether or not such sale, gift, or transfer occurs on university property or in the course of a university activity or student organization activity.

2. The term "controlled substance" is defined in Indiana law, and includes, but is not limited to, substances such as marijuana, cocaine, narcotics, certain stimulants and depressants, and hallucinogens.

23. Violation of other published university regulations, policies, or rules.

24. A violation of any Indiana or federal criminal law.

C. Personal Misconduct Not on University Property

The university may discipline a student for acts of personal misconduct on or off university property. Acts of personal misconduct that are not committed on university property but arise from university activities that are being conducted off the university campus, or if the misconduct undermines the security of the university community or the integrity of the education process are also subject to disciplinary action. Examples of this kind of personal misconduct are:

1. Altering academic transcripts
2. Arson
3. Battery
4. Drug trafficking
5. Forgery
6. Fraud
7. Harassment of a student
8. Hazing
9. Rape
10. Sexual Assault
11. Trafficking in term papers
12. Unauthorized use of a computer off the campus to obtain access to information on campus
13. Participation in group violence

D. Complaints Against Faculty, Staff, and Students

When a student believes that any of his or her rights, as defined in Part I of the *Code of Student Rights, Responsibilities, and Conduct* have been violated by another student or by a member of the university faculty, administration, staff, or a student organization, the student should ordinarily attempt to resolve the matter by making an informal complaint to the person or organization involved.

If the problem is not resolved to the complainant's satisfaction by contacting the person(s) involved, personnel in the Dean of Students Office or other appropriate persons can be consulted about options for resolution of the problem.

E. Disruptive Conduct

IUPUC strives to maintain a spirit of civility in a community in which diversity is welcomed. Every student, staff, and faculty member plays a significant role in promoting an

environment that is conducive to academic excellence by fostering a climate of civility and mutual respect. In all circumstances it is expected that everyone will act with respect for one another. Difference of opinion and dissent are ordinarily thought of as disagreement or debate. They are not "disruptive conduct" as long as they do not impinge upon the rights of others or interfere with the teaching/learning process in an academic setting. As a community which values the uniqueness of people, behavior which is thought of as "different" or "unusual" is not "disruptive behavior" unless it infringes upon the rights of others or seriously interferes with the teaching/learning process in an academic setting.

The IUPUC instructional program is based on the premise that students enrolled at IUPUC are entitled to receive instruction free from interference by other students. When students are admitted to IUPUC, they accept the responsibility to conform to all IUPUC rules and regulations. Students are expected to comply by conducting themselves in an orderly and cooperative manner.

Administrative Withdrawal

Students who miss more than 50 percent of their class meetings of a given section during the first four weeks of the fall or spring semesters may be administratively withdrawn from that course unless documentation of contact with their course instructor, academic unit, or academic advisor is provided. Undergraduate students may be administratively withdrawn regardless of class level. This administrative policy may be implemented in all undergraduate level courses subject to the following provisions:

- The administrative withdrawal policy must be approved by appropriate faculties in an academic unit for use in all sections of a multi-section course. Administrative withdrawal is not a section-level policy.
- The division head must contact the Office of the Registrar to place courses on the administrative withdrawal official campus list. Courses remain on the list for subsequent semesters unless the division head requests that the courses be removed.
- The administrative withdrawal policy must be included in the course syllabus with specific language as to the policy. Students must be informed that administrative withdrawal may have an impact on their Financial Aid awards and/or student visa status.
- When an administrative withdrawal policy is utilized, the course instructor must take attendance. The course instructor initiates the administrative withdrawal process and has the right to stop the process at any time.
- The administrative withdrawal policy for each division should include a provision of student notification prior to the administrative withdrawal.
- Administrative withdrawal will take place after the fee refund period. Students who are administratively withdrawn from the course will not be eligible for a tuition refund.
- Administrative withdrawals will be managed through policies established by each academic unit in consultation with the Office of the Registrar.
- Academic units may establish an administrative withdrawal policy more restrictive than provisions outlined by this policy.

The Office of the Registrar will report each semester on the number of administrative withdrawals for each course.

An updated list of administrative withdrawal courses is available each semester.

Academic Policies & Procedures

IUPUC Policies

Auditing a Course

Courses may be taken on an official audit basis. No credit will be given for the course; the audited course will be indicated on the student's transcript with a grade of NC. The student must discuss course work expectations with the instructor and it is up to the instructor to approve or not approve the student's request.

- Courses taken for audit do not apply toward any academic degree and do not count as part of a student's full-time or part-time course load for purposes of financial aid or for loan deferments.
- The tuition for an audited course is the same as that as for a credit course.
- Students considering this option should discuss it carefully with their academic advisor to see if this is the best choice or if another grading option, such as pass/fail, may be more appropriate.
- Schools in some cases do not allow students to register for a class for credit after taking it on an audit basis. Consult your school recorder with any questions.
- Students must pick up the audit forms from their school or division, secure the appropriate signatures, and turn the form into the Office of the Registrar by the deadline specified in the academic calendar. The Office of the Registrar is located in Room 156.

Once invoked, the student may not later change back to credit status for the course.

Confidentiality and Access to Student Records

Parental access to student records

Under the Family Educational Rights and Privacy Act, when a student turns 18 years of age or attends a postsecondary institution, the student, and not the parent, may access, seek to amend, and consent to disclosures of his or her education records. Students who wish to authorize access to their confidential student record information may use the Third Party Access feature available in Self Service.

Release information from your student records to a third party

In compliance with the Federal Family Education Rights and Privacy Act of 1974 and the University Policy on Access to and Release of Student Education Records, the University is prohibited from providing certain information from your student records to a third party, such as information on grades, billing, tuition and fees assessments, financial aid (including scholarships, grants, work-study, or loan amounts) and other student record information. This restriction applies, but is not limited to your parents, your spouse, a sponsor, etc.

While University officials are prohibited from releasing your confidential information, you may, at your discretion, grant permission to a third party to portions of your record via Self Service in OneStart.

To pursue granting of Third Party Access:

- You must set up a separate record for each third party to whom you grant access to information from your student records.
- The information you designate will only be made available through the third party Access link in OneStart.

This authorization does not authorize the third party guest to receive information from the University by any other methods, such as phone, email, or in-person visit. University officials continue to be prohibited from discussing your record with third parties.

When you click the "I Accept" button as part of the process, you are indicating that:

- You understand that any and all personally identifiable information is protected under FERPA.
- You further understand that you may waive that protection and give access to your records to individuals of your choice.
- You agree to waive your rights under FERPA and allow the individual(s) you name to

access designated financial and academic records as they are available through the self service Third Party Access application.
- You understand that you are responsible for changing, amending or rescinding this authorization at any time. You understand that this access will be revoked when your access to self service expires.
- You are responsible for making clear to the third parties to whom you grant access that this does not allow for University officials to release any information. This access is strictly limited to the self service application.

Please note that your authorization to release information will expire when your access to self service Self Service expires. At that time your third party guest's access will also expire. However, you may revoke your authorization at any time by removing access permission from a third party guest viewer through OneStart. Access can be revoked by deleting the record to your third party guest.

Availability of Public Information

Certain student information maintained in the Office of the Registrar is considered public. The complete list appears above. The university maintains an on-line address book which allows a user to find a limited set of information for an individual student by searching on a student's name or university network id. The address book displays the student's school, major, class standing, and, if available, the student's e-mail address.

IUPUC uses a course management system m called Oncourse. Through use of Oncourse, all students enrolled in a course section will see the names of their classmates unless a student has filed a restraint of information in the Office of the Registrar (see below). The list of names is only available to the instructor and those enrolled in the specific class and does not provide a students complete course schedule. A student's course enrollment is available only to students enrolled in that course section and not to anyone outside of the university. Only the name will appear unless the individual student releases additional information to fellow classmates through use of the Oncourse Profile system.

Restraint of Release of Student Information

If you do not want all or some of the information released to any person other than IUPUC faculty or staff, complete a Restraint of Release of Student Information Form and return it to the Office of the Registrar. A confidentiality flag will be added to your record by the Office of the Registrar. The restrainer will also block all information from appearing in the on-line address book, to classmates in Oncourse.

To remove the restrainer, complete a Removal of the Restraint of Release of Student Information Form and return it to the Office of the Registrar.

Disclosures

From time-to-time, the university is served with a subpoena for portions of a student's record. In these cases, we will write to the student or the student's attorney (if known) and inform them that unless we receive written notification that the student will attempt to quash the subpoena, we will provide the information requested, even if the student has placed a restriction on his or her record.

A number of IUPUC degree programs prohibit enrollment to anyone listed on the Indiana

Sex Offender Registry. The Office of the Registrar will notify the school dean of any student on the Registry attempting to enroll in such programs.

Records of arrests and/or convictions and traffic accident information are public information and may be released to anyone making inquiry of the University Policy.

For additional questions regarding the policy on the release of student information, contact the Office of the Registrar. For a full copy of the university policy on student records, see Appendix 4 in the Code of Student Rights, Responsibilities, and Conduct.

IUPUC does not provide lists of students or an individual student's address or phone number to outside businesses, agencies, students, or other parties. We will provide phone numbers in emergency situations and only following consultation with university police. However, because IUPUC participates in Federal Programs, we are required by Federal Law to make available to military recruiters the name, address, age, and prior military service status of all students at IUPUC.

The university sponsors a credit card to IU students and alumni. A small portion of each charge is paid to the university while students and alumni have the opportunity to demonstrate their support of the university. A list of students is provided to the vendor each year for purposes of solicitation for this credit card only. Under terms of the contract the vendor may not share the list of students or alumni with other vendors. Students who have filed a restraint of release of information will not appear on this list.

GENERAL

Family Policy Compliance Office (FPCO)

ABOUT THE FAMILY POLICY COMPLIANCE OFFICE

The mission of the Family Policy Compliance Office (FPCO) is to meet the needs of the Department's primary customers--learners of all ages--by effectively implementing two laws that seek to ensure student and parental rights in education: the Family Educational Rights and Privacy Act (FERPA) and the Protection of Pupil Rights Amendment (PPRA).

Parents and eligible students who need assistance or who wish to file a complaint under FERPA or PPRA should do so in writing to the Family Policy Compliance Office, sending pertinent information through the mail, concerning any allegations to the following address:

Family Policy Compliance Office
U.S. Department of Education

The Department of Education has released final regulations amending the Family Educational Rights and Privacy Act (FERPA) regulations. The changes to the FERPA regulations will have the important effect of improving access to data. Improved access to data will facilitate States' ability to evaluate education programs, ensure limited resources are invested effectively, build upon what works and discard what does not, increase accountability and transparency, and contribute to a culture of innovation and continuous improvement in education.

The benefits of using student data, however, must always be balanced with the need to protect student privacy. Parents and students put their trust in the stewards of education data to ensure that students' personal information is used only for legitimate purposes and only when absolutely necessary. The Department values this trust and strives to do all it can to protect the privacy of student information.

DID YOU KNOW?

IU signed agreements with learning technology providers CourseNetworking and Canvas. The agreements are part of a two year pilot program to assess the technologies that can best support the changing needs of IU's students and faculty.

The pilots will start this fall with a small number of opt-in trials before expanding in spring 2013. Software options will evolve each semester based on in-depth feedback and insights by faculty and students on all IU campuses.

To learn how you can help the university explore next-generation technologies to support teaching and learning, visit next.iu.edu.

Dropping and Adding Classes

Steps to Add or Drop Courses

These are the steps for adding or dropping classes online, actions limited to certain academic calendar dates. Please read the whole Class Schedule Change Policy before proceeding with these steps. **Adding a Class Before or at the Beginning of the Term**

After initial enrollment, a student may add a class to their schedule online through the 100% refund period. See the Academic Calendar. This process is very similar to the Shopping Cart method. At the Student Self-Service page on OneStart:

- Click on Go to Student Center
- Click on the blue under-lined link Register & Drop/Add
- Select the term
- Ensure you are looking at the Add page; check top line tabs
- Enter desired class number in the blue box
- Click the green enter button
- Continue as the screens direct

Dropping After the First Week Of Classes

Students must use the online method of dropping classes until the end of the "Automatic W" period. See the Academic Calendar. At the Student Self-Service page on OneStart:

- Click on **Late drop/add classes** (after 1st week of classes)
- Near the top of the new page, find and click on the second bullet choice: "**Drop Only–eDrop**"
- Columbus students are eligible to use eDrop. Click the eligibility link near the bottom of page.
- On the next page, select the courses you would like to drop and click "CONTINUE"
- Read the caution statements, click "Accept the Conditions," fill in your reason for dropping, and click "Submit for Approval"

Your eDrop will be appropriately routed for approval, after which it is processed with your submittal date. A message is sent to your university email account confirming the drop. You may also check status on the Student Self-Service page by clicking the **Track My eDocs** link.

Class Schedule Change Policy

Students who alter their original schedules, whether by personal incentive or by University directive, must do so officially as outlined below. Failure to assume this responsibility may jeopardize a student's academic record by incurring an "F" in a course improperly dropped and/or by not receiving credit for a course improperly added.

Changing Your Mind Before or at the Beginning

Students may make changes to their schedules (drop or add a class) from the time of their initial registration up through the end of the 100% refund period, which is the last day of the first week of the semester. There is no financial penalty for changes during this early period.

Adding After the First Week

At IUPUC, adding a class to your schedule requires the signature of the instructor on our multipart Schedule Adjustment form. The instructor is verifying several things: 1) there is room in the class, 2) you have the pre-requisites, and 3) it is not too late for you to complete missed assignments. A Late Program Change Fee will be charged by the Bursar.

Withdrawing After the First Week

Students must use the online Drop Only–eDrop pages on OneStart to drop classes after the first week of school. This gives the student an automatic “W” grade on transcripts; it does not affect grade point average. This “Automatic W” period ends about half way through the academic term. See the latest Academic Calendar for the exact date. See Steps to Drop Online for instructions. A Late Program Change Fee will be charged by the Bursar.

Withdrawing After Mid Term

Instructor signatures and the signature of your academic advisor are required for withdrawals further into the semester. Use the multipart Schedule Adjustment form available from the Office of the Registrar. The instructor marks the form to assign either a grade of “W” or “F.”

Withdrawing from Non-Standard Length Courses

Instructor signatures will be required beginning the first day of the second half of the course. For example, for a course meeting the second eight weeks of a 16-week term, the instructor's signature will not be required until the first day of the fifth week of the class. Be sure to remind the representative processing the withdrawal in the Office of the Registrar that the course started late.

Consequences of Withdrawing

Students who accumulate an excessive number of “W” grades may be regarded as making unsatisfactory academic progress toward their degree. If such a determination is made, they may be blocked from registering by their division.

If you are receiving financial aid, be sure to consult with the Office of Scholarships and Financial Aid Services prior to your withdrawal to determine if dropping the class will affect your aid. Similarly, if you are required to maintain a certain enrollment level (such as full-time) for being carried on a health insurance policy or to receive VA benefits, find out if a drop will affect your eligibility status.

Tuition Refunds

Tuition is refunded when applicable by the Office of the Bursar on a percentage basis according to the semester refund schedule. Visit the academic calendar for specific semester refund schedules. In extenuating circumstances a student may wish to appeal for a larger refund of fees. Visit the Bursar web pages to learn about filing such an appeal.

Email as Official Communication

E-mail is considered an appropriate mechanism for official communication by Indiana University with IU students. The University reserves the right to send official communications to students by e-mail with expectation that students will receive e-mail and read these messages in a timely fashion.

Official university e-mail accounts are available for all registered students. The domains for the addresses vary according to campus (e.g., indiana.edu for IU Bloomington, iupui.edu for IUPUI Indianapolis, iun.edu for IU Northwest, iucoa.edu for IUPUC). Official university communication will be sent to students' official university e-mail addresses.

Students are expected to check their IU e-mail frequently and consistently in order to stay current with university-related communications. Students must ensure that there is sufficient space in their accounts to allow for e-mail to be delivered. Students have the responsibility to recognize that certain communications may be time-critical. Students will not be held responsible for an interruption in their ability to access a message if system malfunctions or other system-related problems (e.g. power outages or e-mail system viruses) prevent timely delivery of, or access to, that message.

Students who choose to have their e-mail forwarded to a private (unofficial) e-mail address outside the official university address do so at their own risk. The university is not responsible for any difficulties that may occur in the proper or timely transmission or access of e-mail forwarded to any unofficial e-mail address, and any such problems will not absolve students from responsibility to know and comply with the content of official communications sent to students' official IU e-mail address.

Faculty may assume that a student's official university e-mail account is a valid mechanism for communication with a student, although faculty should exercise caution about including sensitive data, such as grades, in an e-mail. This policy will ensure that all students will be able to comply with course requirements communicated to them by e-mail from their course instructors.

IUPUC Policies

Equal Opportunity and Affirmative Action

Equal Opportunity / Affirmative Action

Indiana University–Purdue University Columbus pledges to continue its commitment to achieving equal opportunity within the university and throughout American society. Specifically, our policy at IUPUC prohibits discrimination based on arbitrary considerations such as race, color, religion, national origin, sex, sexual orientation, marital status, age, disability, or veteran status. IUPUC will make every effort to recruit, hire, promote, educate, and provide services to persons based solely on their individual qualifications. Further, we will take affirmative action to overcome the discriminatory effects of traditional practices with regard to people with disabilities, minorities, women, and Vietnam-era veterans.

Our institutional ethic demands that we foster the best possible environment for doing our work as educators, learners, and supporters of the educational process. Therefore, IUPUC does not tolerate discriminatory harassment or intimidation of students, employees, or guests of the university, and responds to complaints of such treatment, providing proper remediation when harassment is determined to have occurred.

No qualified individual with a disability shall, by reason of such disability, be excluded from participation in or denied the benefits of university services, programs, or activities. Reasonable accommodations shall be afforded to the known physical or mental limitations of otherwise qualified individuals.

Grading System

Standard Letter Grading, used in Grade Point Average (GPA) calculation is based on a Grading System used by all IU campuses. Other parts of the grading system table include letter codes not used in GPA calculation to describe situations such as: Passing, Non Standard, and Withdrawal from Course.

Dean's List Criteria

Degree Seeking Undergraduate students in each Division who meet ALL criteria during the Spring or Fall Term will be named to the IUPUC Dean's List. There are four IUPUC Dean's List Criteria:

1. Complete at least 6 graded credit hours during the current term
2. New credit hours plus previously earned credit hours must equal a minimum career total of 12 credit hours college-level work
3. Earn a minimum term Grade Point Average of 3.70.

Military Withdrawal

Indiana University Policy on Military Withdrawal

Indiana University realizes students who are members of the U.S. armed forces may be called to active duty, specialized training, or as part of disaster relief efforts with little notice. While the following policy does NOT pertain to initial active duty training (i.e. basic training), this policy is provided in order to minimize disruptions or inconveniences for students fulfilling their unanticipated U.S. military responsibilities in the midst of an academic term/session.

Any student called to active duty, specialized training or as part of disaster relief efforts may withdraw from all courses and receive a 100% refund of tuition and fees. Alternatively, with the permission of the instructor(s), a student may receive an incomplete or a final grade in some or all of the courses taken. Either alternative may occur anytime during the semester through the end of final examinations. If the withdrawal is processed after the first week of classes, the grade of W will be assigned. Students receiving financial aid will be subject to the refund policies as provided for by the agencies sponsoring the aid. The request to withdraw needs to be made within one week of official notification by the military service and may be made by either the student or other responsible party who has the student's military information.

Students who wish to withdraw from courses as a result of being called to active duty, specialized training, or disaster relief efforts must provide a copy of their orders to the campus Veterans support services office (if applicable) or campus Registrar's office along with a signed note asking to be withdrawn. Either office provides a one-point-of-contact process for withdrawals so students won't need to visit various offices. Students or other responsible parties may wish to contact the appropriate campus office first to begin the withdrawal process based on some official military documentation, with the understanding that a copy of the orders would need to be forthcoming.

Students who cannot enroll for a future term or who need to withdraw from a current term due to military commitments can also be placed on a military leave of absence that will extend access to their IU computer and email accounts while they are gone. A copy of orders provided to the campus Veterans support services office (if applicable) or campus Registrar's office will initiate this action.

Approved, Registrar Council, 12/11/2008
Approved, IUB Provost & IUPUI Chancellor, 12/20/2008

In the spirit of this policy, faculty should also make every effort to allow students who are members of the U.S. armed forces to make up exams and exercises that may be missed during the semester if it can be documented that the student was called up for specialized, short-term training.

Residency

Student residency status affects the amount of tuition fees paid. If a student is not considered a resident of Indiana, the fees are higher. There are two helpful documents that explain this topic: the Rules for Determining Residency Status and Residence Classification FAQs.

Residency

Rules Determining Resident and Nonresident Student Status for Indiana University Fee Purposes

These Rules establish the policy under which students shall be classified as residents or nonresidents upon all campuses of Indiana University for University fee purposes. Nonresident students shall pay a nonresident fee in addition to fees paid by a resident student.

These Rules shall take effect February 1, 1974; provided, that no person properly classified as a resident student before February 1, 1974, shall be adversely affected by this Rule, if he or she attended the university before that date and while he or she remains continuously enrolled in the university.

1. "Residence" as the term, or any of its variations (e.g., "resided"), as used in the context of these Rules, means the place where an individual has his or her permanent home, at which he or she remains when not called elsewhere for labor, studies, or other special or temporary purposes, and to which he or she returns in seasons of repose. It is the place a person has voluntarily fixed as a permanent habitation for himself or herself with an intent to remain in such place for an indefinite period. A person at any one time has but one residence, and a residence cannot be lost until another is gained.
    1. A person entering the state from another state or country does not at that time acquire residence for the purpose of these Rules, but except as provided in Rule 2(c)1, such person must be a resident for 12 months in order to qualify as a resident student for fee purposes.
    2. Physical presence in Indiana *for the predominant purpose* of attending a college, university, or other institution of higher education, shall not be counted in determining the 12-month period of residence; nor shall absence from Indiana for such purpose deprive a person of resident student status.
2. A person shall be classified as a "resident student" if he or she has continuously resided in Indiana for at least 12 consecutive months immediately preceding the first scheduled day of classes of the semester or other session in which the individual registers in the University, subject to the exception in (c)1 below.
    1. The residence of an unemancipated person under 21 years of age follows that of the parents or of a legal guardian who has actual custody of such person or administers the property of such person. In the case of divorce or separation, if either parent meets the residence requirements, such person will be considered a resident.2
    2. If such person comes from another state or country for the predominant purpose of attending the University, he or she shall not be admitted to resident student status upon the basis of the residence of a guardian in fact, except upon appeal to the Standing Committee on Residence in each case.1
    3. Such person may be classified as a resident student without meeting the 12-month residence requirement within Indiana if his or her presence in Indiana results from the establishment by his or her parents of their residence within the state and if he or she proves that the move was predominantly for reasons other than to enable such person to become entitled to the status of "resident student."1
    4. When it shall appear that the parents of a person properly classified as a "resident student" under subparagraph (c) above have removed their residence from Indiana, such person shall then be reclassified to the status of nonresident; provided, that no such reclassification shall be effective until the beginning of a semester next following such removal.
    5. A person once properly classified as a resident student shall be deemed to remain a resident student so long as remaining continuously enrolled in the university until such person's degree shall have been earned, subject to the provisions of subparagraph (d) above.
3. The foreign citizenship of a person shall not be a factor in determining resident student status if such person has legal capacity to remain permanently in the United States. 3
4. A person classified as a nonresident student may show that he or she is exempt from paying the nonresident fee by clear and convincing evidence that he or she has been a resident (see Rule 1 above) of Indiana for the 12 months prior to the first scheduled day of classes of the semester in which his or her fee status is to be changed. Such a student will be allowed to present his or her evidence only after the expiration of 12 months from the residence qualifying date, i.e., the date upon which the student commenced the 12-month period for residence. The following factors will be considered relevant in evaluating a requested change in a student's nonresident status and in evaluating whether his or her physical presence in Indiana is for the predominant purpose of attending a college, university, or other institution of higher education. The existence of one or more of these factors will not require a finding of

resident student status, nor shall the non-existence of one or more require a finding of nonresident student status. All factors will be considered in combination, and ordinarily resident student status will not result from the doing of acts which are required or routinely done by sojourners in the state or which are merely auxiliary to the fulfillment of educational purposes.

1. The residence of a student's parents or guardians.
2. The situs of the source of the student's income.
3. To whom a student pays his or her taxes, including property taxes.
4. The state in which a student's automobile is registered.
5. The state issuing the student's driver's license.
6. Where the student is registered to vote.
7. The marriage of the student to a resident of Indiana.
8. Ownership of property in Indiana and outside of Indiana.
9. The residence claimed by the student on loan applications, federal income tax returns, and other documents.
10. The place of the student's summer employment, attendance at summer school, or vacation.
11. The student's future plans including committed place of future employment or future studies.
12. Admission to a licensed profession in Indiana.
13. Membership in civic, community, and other organizations in Indiana or elsewhere.
14. All present and intended future connections or contacts outside of Indiana.
15. The facts and documents pertaining to the person's past and existing status as a student.
16. Parents' tax returns and other information, particularly when emancipation is claimed.

5. The fact that a person pays taxes and votes in the state does not in itself establish residence, but will be considered as hereinbefore set forth.
6. The registrar or the person fulfilling those duties on each campus shall classify each student as resident or nonresident and may require proof of all relevant facts. The burden of proof is upon the student making a claim to a resident student status.
7. A Standing Committee on Residence shall be appointed by the president of the university and shall include two students from among such as may be nominated by the student body presidents of one or more of the campuses of the university. If fewer than four are nominated, the president may appoint from among students not nominated.
8. A student who is not satisfied by the determination of the registrar has the right to lodge a written appeal with the Standing Committee on Residence within 30 days of receipt of written notice of the registrar's determination, which committee shall review the appeal in a fair manner and shall afford to the student a personal hearing upon written request. A student may be represented by counsel at such hearing. The committee shall report its determination to the student in writing. If no appeal is taken within the time provided herein, the decision of the registrar shall be final and binding.
9. The Standing Committee on Residence is authorized to classify a student as a resident student, though not meeting the specific requirements herein set forth, if such student's situation presents unusual circumstances and the individual classification is within the general scope of these Rules. The decision of the committee shall be final and shall be deemed equivalent to a decision of the Trustees of Indiana University.
10. A student or prospective student who shall knowingly provide false information or shall refuse to provide or shall conceal information for the purpose of improperly achieving resident student status shall be subject to the full range of penalties, including expulsion, provided for by the university, as well as to such other punishment which may be provided for by law.
11. A student who does not pay additional monies which may be due because of his or her classification as a nonresident student within 30 days after demand, shall thereupon be indefinitely suspended.
12. A student or prospective student who fails to request resident student status within a particular semester or session and to pursue a timely appeal (see rule 8) to the Standing Committee on Residence shall be deemed to have waived any alleged overpayment of fees for that semester or session.
13. If any provision of these rules or the application thereof to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of these rules which can be given effect without the invalid provision or application, and to this end the provisions of these rules are severable.

1 Rules 2(b) and 2(c) apply only to unemancipated persons under 21 years of age.
2 Invocation of the provision in Rule 2(a) that applies to cases of divorce or separation requires appropriate legal documentation.
3 NOTE: Effective Fall 2007, students with immigration statuses which permit the establishment of a domicile in the United States may be eligible to pay resident fees. Current eligible classifications are: A-1, A-2, A-3, E-1, E-2, E-3, G-1, G-2, G-3, G-4, H-1B, H-4, I, L-1, L-2, O-1, O-3, V-1, V-2, and V-3. Contact the registrar's office for more information.

Frequently Asked Questions Regarding Residence Classification

This document is intended to provide general information concerning residence classification guidelines for fee-paying purposes and will respond directly to questions concerning residence classification frequently asked by students and their families.

A complete listing of the residence classification guidelines, "Rules Determining Resident and Nonresident Student Status for Indiana University Fee Purposes," appears in the University Bulletin and in each edition of the Schedule of Classes and Student Academic Information bulletin.

Students who want to appeal their residence classification should review the complete listing of residence classification guidelines and should complete the Application for Classification as a Resident Student. *This document does not replace or supersede the "Rules Determining Resident and Nonresident Student Status for Indiana University Fee Purposes" which took effect February 1, 1974.*

---

1. Who is eligible for resident student status?
2. Are dependent spouses eligible for resident student status without meeting the 12 month physical presence requirement?
3. How can an emancipated student under 21 years of age whose parents live out-of-state establish eligibility for resident student status?
4. If a person enrolls as a nonresident student, will that person always be considered a nonresident student?
5. If I am eligible for a change in residency status after meeting all the requirements, will the change to resident status happen automatically?
6. Will a person who moves to Indiana for reasons other than higher education jeopardize future eligibility for resident student status by enrolling in classes during the initial 12 month period of residence?
7. My company transferred me to Indiana. Do I still have to wait the 12 months to become a resident?
8. Does a nonresident student become automatically eligible for resident student status by marrying an Indiana resident?
9. Does the payment of income or property taxes to the state of Indiana affect a nonresident student's eligibility for resident student status?
10. Is it possible to be a legal resident of the state of Indiana and still be a nonresident student at Indiana University?
11. If the parents of a resident student move to another state, will that student be reclassified to nonresident status?
12. I lived in Indiana for years but left the state to take a job elsewhere. Am I still a resident?
13. What if I am an Indiana resident who went out-of-state for school?
14. Are the children of Indiana University alumni automatically eligible for classification as resident students?
15. What about military families?
16. Who determines residence classification?
17. How do students appeal a decision of nonresident student status?
18. Is there an "effective date" that applies to a person's eligibility for resident student status?
19. What is the deadline for filing an appeal of nonresident student status?
20. I won't meet the residency requirements until the start of the next semester, but registration for that term starts soon. Should I delay registering until my residency is changed?
21. I expect to be eligible for resident status with the next term. How early should I file my appeal?
22. If a nonresident student is reclassified to resident student status, is it possible to get a refund of the nonresident fees paid for that semester/session?
23. Can a nonresident decision from the Office of the Registrar be appealed?
24. When and where does the University Standing Committee on Residence meet?
25. Are there student members on the Standing Committee on Residence?
26. Are students who meet with the residence committee able to bring family members to the committee meeting?
27. How is the student notified of the residence committee's decision?

Who is eligible for resident student status?

US citizens or permanent residents who are 21 years of age or emancipated are eligible for resident student status after they have been physically present in Indiana for twelve consecutive months (prior to the first day of classes) without the predominant purpose of education.

Students who are under 21 years of age and unemancipated are eligible for resident student status if their parents or legal guardians reside in Indiana. Unemancipated students under 21 years of age whose parents or legal guardians move to Indiana can be classified as resident students without first living in the state for 12 months.

However, in cases of legal guardianship agreements, it must be shown that the guardianship agreement was sought for reasons other than to enable the student to become eligible for resident student status or for the purpose of attending an Indiana high school. An official copy of the court documents that outline the guardianship agreement must be provided to the University.

Are dependent spouses eligible for resident student status without meeting the 12 month physical presence requirement?

No. The exception (noted above) to the 12 month physical presence requirement applies only to unemancipated persons under 21 years of age whose parents or legal guardians move to or reside in Indiana. All other persons must meet the 12 month physical presence requirement.

How can an emancipated student under 21 years of age whose parents live out-of-state establish eligibility for resident student status?

This student would need to provide a notarized statement from the parents indicating the level of financial support provided to the student and the date when the parents last claimed the student as a dependent on their federal income tax returns.

In addition, this student would need to provide a financial statement indicating all sources and amounts of income sufficient for self support.

This student would then have to be physically present in Indiana for twelve consecutive months without the predominant purpose of education in order to become eligible for resident student status.

If a person enrolls as a nonresident student, will that person always be considered a nonresident student?

No. Any person who meets the residence guidelines is eligible for resident student status without regard to previous enrollment as a nonresident student.

If I am eligible for a change in residency status after meeting all the requirements, will the change to resident status happen automatically?

No. It is necessary to file an "Application for Classification as a Resident Student at Indiana University for Fee Paying Purposes" (Residency Application) with the Office of the Registrar.

Will a person who moves to Indiana for reasons other than higher education jeopardize future eligibility for resident student status by enrolling in classes during the initial 12 month period of residence?

No. If a person can provide convincing evidence that the move to Indiana was without the predominant purpose of attending an institution of higher education, future resident student classification should not be affected by University enrollment during the 12 month residence period even if such enrollment is on a full-time basis.

My company transferred me to Indiana. Do I still have to wait the 12 months to become a resident?

Yes. At this time there is no special consideration given to persons who are transferred by their employers to Indiana. You are still required to meet the necessary qualifying period for a change to resident student status provided your reason for coming to Indiana was for employment reasons (a job transfer or a new job) and not for educational purposes.

Does a nonresident student become automatically eligible for resident student status by marrying an Indiana resident?

No. Although marriage to a resident of Indiana is one of the factors considered in the determination of predominant purpose, the existence of this factor does not require a finding of resident status.

However, after providing convincing evidence that the marriage has changed a student's predominant purpose for being in Indiana, a nonresident student may be eligible for reclassification to resident student status 12 months after the date of marriage.

Does the payment of income or property taxes to the state of Indiana affect a nonresident student's eligibility for resident student status?

No. Persons who are in Indiana for the predominant purpose of education do not become eligible for resident student status on the basis of paying taxes to the state.

Is it possible to be a legal resident of the state of Indiana and still be a nonresident student at Indiana University?

Yes. The state of Indiana determines for specific purposes (driver's licenses, voter registration, etc.) the requirements for becoming a legal resident of the state. However, the state legislature has delegated to Indiana's institutions of higher education the responsibility of determining when a person becomes eligible for resident student status.

Many nonresident students are considered legal residents of the state. These individuals are eligible to carry an Indiana driver's license, to register to vote, and to be called to serve as members of juries. However, persons who reside in Indiana for the predominant purpose of education are considered nonresidents for fee-paying purposes at the University.

If the parents of a resident student move to another state, will that student be reclassified to nonresident status?

No. Once a person has been properly classified as a resident student, that person shall remain a resident student so long as remaining continuously enrolled (each first and second semester) in the University until earning the degree in progress.

I lived in Indiana for years but left the state to take a job elsewhere. Am I still a resident?

It depends. If you returned to the state within one year of the time you left, the university still considers you a resident. If you were gone more than a year, you would be a non-resident.

What if I am an Indiana resident who went out-of-state for school?

We don't consider any time spent out-of-state as a student against you as long as you return to Indiana within one year following your last enrollment or graduation.

Are the children of Indiana University alumni automatically eligible for classification as resident students?

No. Although a nonresident fee remission program was once offered by the IU Foundation (a program which did not change the student's residence classification but rather paid the nonresident portion of the fees), the alumni status of the student's parents is not a factor in determining residence classification.

What about military families?

Military families from Indiana maintain their Indiana resident status as long as they continue to file their personal income tax returns in Indiana. Members of these families must provide copies of their Indiana income tax returns or military documents that indicate the personal income tax withholding state of the military member.

Who determines residence classification?

When students are admitted to the University, the Office of Admissions render the initial residence \classification determination. Decisions made in this office are based on the information provided by students during the admission application process.

How do students appeal a decision of nonresident student status?

Students who want to appeal their nonresident status should contact the Office of the Registrar and should request and complete an "Application for Classification as a Resident Student at Indiana University for Fee-Paying Purposes." After the completed application is evaluated, the student is notified in writing of the decision rendered.

Is there an "effective date" that applies to a person's eligibility for resident student status?

Yes. Circumstances that exist on the first day of classes of each individual semester/session determine a person's

eligibility for resident student status for that semester/session.

What is the deadline for filing an appeal of nonresident student status?

Students have until the last day of the effective semester to deliver their completed application for reclassification to the Office of the Registrar.

I won't meet the residency requirements until the start of the next semester, but registration for that term starts soon. Should I delay registering until my residency is changed?

No. Complete your registration as close to your assigned registration time as possible in order to have the best selection of courses.

I expect to be eligible for resident status with the next term. How early should I file my appeal?

You can submit the Residency Application as early as two months prior to the start of the term. If eligible for that term, we'll make the change in time for any tuition charges you'll receive from the university.

If a nonresident student is reclassified to resident student status, is it possible to get a refund of the nonresident fees paid for that semester/session?

Yes. The nonresident portion of the fees already paid will be refunded if the student applies for resident student status before the deadline and if a resident decision is rendered. Note that the "effective date" for determining the student's eligibility is the first day of classes of the effective semester/session (see above).

Can a nonresident decision from the Office of the Registrar be appealed?

Yes. Decisions from the campus Office of the Registrar can be appealed to the University Standing Committee on Residence. A written request for an appeal should be sent to the Office of the Registrar indicating whether a personal appearance with the committee is desired.

When and where does the University Standing Committee on Residence meet?

The Standing Committee on Residence always meets on the Bloomington campus, generally meeting on the first Thursday of each month.

Are there student members on the Standing Committee on Residence?

Yes. Two student members are appointed to the committee by the President of the University.

Are students who meet with the residence committee able to bring family members to the committee meeting?

Yes. Students may invite family members, friends, or other persons to the committee meeting.

How is the student notified of the residence committee's decision?

The student is notified in writing of the decision of the committee members.

IUPUC Policies

Student Responsibilities

IU Code of Student Rights, Responsibilities, and Conduct

The faculty and Trustees of Indiana (and Purdue) University vote to confer the degree on students upon successful completion of their course of study. Students are responsible for understanding all requirements and completing them by the time they graduate. Advisors, directors, deans, and faculty gladly help students understand school requirements; however, each student is responsible for fulfilling the requirements. Students may refer to this bulletin, OneStart (onestart.iu.edu), and school advisors and recorders to find out about their personal progress toward a degree.

Similarly, students are responsible for informing IUPUC of any changes in their name, address, phone number, and other relevant data. Students should use OneStart (onestart.iu.edu) to change information online, or provide it directly to the Office of the Registrar. Likewise, students are responsible for initiating and confirming the success of late drops or late adds. Failure to properly drop a course could result in an F in that course and responsibility for tuition and fees. Similarly, all registration or add procedures must be followed, or students risk not receiving credit for a course that was improperly added.

Students should also be familiar with the rules of appropriate academic behavior, which are based on three major premises: (1) The free exchange of ideas is critical to university life, and therefore civility within the academic community must be ensured; (2) ideas are as much property as are houses, cars, CDs, and wallets, and therefore, another person's ideas cannot be used without permission and acknowledgment of the idea's true owner; and finally, (3) knowledge and wisdom are truly the result of contributions of individuals and societies past and present from around the world, and therefore, diversity is seen as a desired, even crucial, component of any intellectual community. These concepts lead to rules and regulations that are found in the Code of Student Rights, Responsibilities, and Conduct. A brief summary of some key elements of the Code appear in a later section of this bulletin. Students are expected to be familiar with the basics of the Code.

Students who register for classes engage in a registration agreement with IUPUC. When students register, the university reserves specific class spaces for those students and commits resources to provide the instruction that has been selected. The students, then, assume the responsibility for paying those course fees or for notifying the university if they decide not to attend. The availability of courses is subject to change. A class may be canceled because of low enrollment or departmental staffing considerations. The department canceling a class will notify registered students and help them make alternate arrangements, if necessary. Registered students also will be notified if the meeting time and/or location of a course has changed since the student registered.

Registration will not automatically be canceled for nonpayment of fees. Students must either pay their fees or drop all of their classes by the end of the first week of classes if they do not intend to return to IUPUC for the semester. Canceling registration by the first week of classes releases class spaces in time to be available to other students. Students who decide to cancel their registration should log on to Onestart (www.onestart.iu.edu) Self Service, click on Drop/Add Classes and proceed to drop all classes.

The Code IU

Decoding the Code

You might think this is just more legal mumbo-jumbo designed for parents, but the Code (as we like to call it) is so much more. The Code is Indiana University's way of ensuring that the rights of students—our most important group—are protected and respected.

As an IU student, you are entitled to respect and civility as you study here, but you have an important role to play in this free and open exchange of ideas we call a university. You must be aware of your responsibilities and expectations as a student—and that's where *the Code* comes in. Here, you'll find your rights and expectations clearly spelled out. Read it. Know it. Your time as an IU student will be better for it.

IU News: Administrative Offices

IU receives $1 million endowment to fund Osher Reentry Scholarships for adult students The Bernard Osher Foundation has awarded Indiana University Bloomington a $1 million endowment and a $50,000 grant to support the Osher Reentry Scholarship program for adult students who are completing baccalaureate degrees. The endowment provides a more permanent funding source for a program that the Osher Foundation has supported with annual grants since 2009.

IU receives near-record $533 million in external research, related program awards in 2012 Indiana University received $533 million in grants and awards for research and other sponsored programs in fiscal year 2012, university officials have announced. The amount represents the second-highest annual total ever at IU, which passed the half-billion-dollar mark in externally funded research and related program awards in a single year for only the third time in the university's history.

IU Bloomington projects record freshman class Indiana University officials expect a record 7,590 first-year students to enroll for classes this fall at IU Bloomington, breaking the previous mark set in 2008. And while data are still being compiled, it appears the freshman class will be one of the most diverse and talented in campus history.

IU Board of Trustees to meet Aug. 16 and 17 at IUPUI The Indiana University Board of Trustees will meet Thursday and Friday, Aug. 16 to 17, in the Campus Center at Indiana University-Purdue University Indianapolis.

IU launches pilot to explore next-generation learning technologies Indiana University has signed agreements with technology providers CourseNetworking LLC and Instructure Inc. as part of a trial assessment of new technologies to support learning. The university will carry out the pilot trials during a two-year evaluation period to assess the technologies that can best support the changing needs of students and faculty.

Tobacco Free Policy

Indiana University-Purdue University Columbus (IUPUC) has been a smoke- and tobacco-free campus since 2008. Smoking and tobacco use is prohibited indoors and outdoors on all university and in university vehicles, both on and off campus. The university adopted this policy to promote a healthier and more welcoming environment for employees, students, and guests.

Class Standing

Freshman	0 - 25 hours
Sophomore	26 - 55 hours
Junior	56 - 85 hours
Senior	86 hours
Masters	Graduate/Masters
Doctorate	Beyond Graduate Level
Thesis	G900
Special	Undergraduate/Graduate

In some cases, a student's class standing is determined by where the student is in his or her program and not by the simple total of all credit hours. This is especially true if a student has changed majors and moved into a program where a significant number of hours previously taken will not apply toward the new major. While this isn't usually a real issue at the freshman and sophomore levels, it is more likely to occur when a student changes schools while a junior or senior.

Full-time vs. Part-time

Undergraduate Students in Fall, Spring or Summer Terms	
1-5	credits is considered less than half-time enrollment
6-11	credits is considered half-time enrollment
12	or more credits is considered full-time enrollment

Graduate & Professional Students in Fall, Spring or Summer Terms	
1-3	credits is considered less than half-time enrollment
4-7	credits is considered half-time enrollment
8	or more credits is considered full-time enrollment

* Students receiving veterans' benefits have the additional certification levels of one-quarter time or three-quarter time.

* For certain graduate students, typically doing dissertation work, the number of credits to be considered full-time may be lower.

Some degree programs require more than twelve credits to be considered full time in the program. This is different than the university's definition for financial aid purposes.

IUPUC will consider courses taken through the IU Independent Study Program as part of full or half-time enrollment in one semester only and only for purposes of certification or loan deferment. NOTE: The Office of Financial Aid will not consider enrollment through IU Independent Study towards any financial aid enrollment requirements until after the coursework has been completed.

In such situations, we will match the start of the correspondence enrollment to the appropriate semester (for example, if a student registers for correspondence work in September, we would count it in the Fall; if the student registers for correspondence work in December, we would count it in the Spring).

Please note that it is the student's responsibility to inform the Office of the Registrar that she or he is enrolled in the IU Independent Study Program as it will not automatically appear in our campus-based review.

Credit Hour Load Limits

Students are allowed to enroll for no more than 18 credits in the Fall or Spring and no more than 7 credits in a single summer session (14 if enrolled for the maximum in both summer sessions). In some cases individual students may be restricted to a lower number of credits. Students who wish to enroll in a higher number of credits need to obtain written permission from their school which specifies the adjusted maximum. It is the student's responsibility to provide this written permission to the Office of the Registrar.

Academic Policies & Procedures

Undergraduate Policies & Procedures

Academic Probation

Academic Probation Policy for Continuing Students

Students are placed on probation any time their cumulative GPA falls below their division or program GPA of good standing. Individual divisions and programs vary in their policies. Contact individual programs for further information on probation.

At IUPUC, a 2.0 cumulative GPA is the minimum necessary to be considered in good academic standing. Students below this GPA are not making progress toward degree completion and are subject to dismissal from the university.

Students whose cumulative GPA falls below a 2.0 will be placed on probation. Students will be informed by letter of their probationary status. Students may be continued on probation when their semester GPA is above a 2.0 but their cumulative GPA is below a 2.0.

Students will be removed from their probationary status once their cumulative GPA is above 2.0.

Academic Probation / Dismissal Policy for Beginning Students

This policy applies to all beginning students who enroll in 12 or more credit hours their first semester at IUPUC. Beginning students (those admitted with less than 12 credit hours of transfer credit) who attempted 12 or more credit hours (including Ws) must have obtained at least a 1.0 GPA at the end of their first semester or they will be dismissed. This includes students whose first semester is summer. Students who withdraw from all courses are exempt from this policy. Beginning students that receive between a 1.0 and a 2.0 GPA the first summer will be placed on probation in accordance with the policy for continuing students discussed above.

- Students who are dismissed for the first time must sit out for a minimum of one fall or one spring semester before being eligible to petition for reinstatement.
- Students dismissed two or more times must remain out of school for at least two consecutive (fall and spring or spring and fall) semesters before being eligible to petition for reinstatement.
- Students must petition by the established deadlines to be considered for reinstatement. Reinstatement is not automatic.

This policy was ratified by IUPUC Faculty Senate on February 8, 2011

Academic Policies & Procedures

Undergraduate Policies & Procedures

Grade Appeals

Grade Changes

On occasion, students inquire about the possibility of changing a grade. This may be because the student believes there was an error in the calculation or assigning of the grade or the student failed to officially withdraw in a timely fashion.

Policy on Consideration of Requests for Change of Grade after Conclusion of the Course

These policies apply to undergraduate students only. Any requests by graduate students for change of grade after the conclusion of a course are subject to the policies of the academic unit.

This policy refers to requests for change of grade, grade discrepancies or grade disputes following the conclusion of the course and not requests for withdrawals after the conclusion of the course.

Undergraduate units will not consider petitions for change of grade from concluded courses older than 5 years. Academic units may choose to use a shorter time period than the campus limit. Academic units may make an exception only if an extremely serious and documented circumstance (e.g., coma, unmanageable schizophrenia, etc.) literally prevents the student from filing the petition within the 5-year period.

Other options, such as grade forgiveness, grade replacement and probationary readmission are possible alternate methods that students can use to continue their education.

For the situation where a student believes there was an error in the calculation or assigning of a course grade it is the responsibility of the student to contact the course instructor to discuss the grade and make his or her case to have the grade changed. If the course instructor declines to support the student's request for a change of grade or in situations where the instructor cannot be contacted, the student may appeal the course grade following the procedures established by awarding academic unit.

Requests for change of grade after the conclusion of a course will be honored only to correct a mistake or error in calculating or assigning the course grade. To facilitate this process, the Office of the Registrar shall maintain a Change of Grade Petition document.

The Change of Grade Petition shall require course information, a provision for the student to make a personal statement explaining why she or he believes the grade should be

changed and a provision to include supporting documentation.

Decisions on grade changes are made within the schools. If the request is supported, the school will notify the Office of the Registrar of the new grade and the student will be mailed a notification of the grade change, including a new cumulative GPA. For this reason it is important that students keep their addresses current. If the request is denied, students will be so notified by the school.

Approved by IUPUI Faculty Council December 5, 2002

Process

The student may appeal the grade following the process established by each school. This usually includes completion of a Change of Grade Petition. The form should be completed online, printed, and returned to the Office of the Registrar.

The Change of Grade Petition requires course information (course title, semester taken) as well as provides the student the chance to make a personal statement explaining why she or he believes the grade should be changed. Please note that individual schools may impose a deadline beyond which they will not consider requests for changes of grade for a particular semester.

If the student's performance or withdrawal was medically related, the student should provide appropriate supporting documentation. Only persons with a need to know will see any confidential materials you may submit.

Decisions on grade changes are made within the schools. Please allow 3-4 weeks for the review process and somewhat longer in the summer and during semester breaks. You will be notified in writing with the decision. Please be sure your address is current.

IUPUC Change of Grade Petition

In order to petition for a change in a grade received at IUPUC, you must complete this form. We ask that you type your information on the form and then print it. Grade change requests are subject to restrictions established by the faculty.

1. Name

2. Student ID Number

3. Name (if different while at IUPUC)

4. Date

5. Current Address Street

City State Indiana Zip

6. Daytime Phone - - Evening Phone - -

7. E-mail

8. List the courses in which you are petitioning for a grade change

Subject-Ltr Course No. (e.g. Eng-W131)	Full Course Title	Semester/Year Taken

9. Are you presently enrolled at an Indiana University Campus?

If yes,which campus? Indianapolis What is your major?

If no, skip to item 12.

10. If you are presently an IU Student, have you already used the grade replacement (FX) option?

○ Yes ○ No

☐ Check here if your school does not honor FXs

☐ Check here if you have changed your major, don't need these courses, or would rather not retake them

11. Is this your first semester back after a break of one or more semesters?

○ Yes ○ No

Many schools at IUPUC will not take action on a request to change grades until you have established a track record of progress (12 to 20 credits of a C or better). Skip to Item 15.

12. Are you currently enrolled in a college or university other than in the IU system?

○ Yes ○ No

If yes, please name the college you are attending:

What degree are you working on at this college?

What is your major?

Please attach a current transcript if you are enrolled at a non-IU school. If you are trying to be admitted to a college or university and are not admissible because of your prior record, please include a letter from the college regarding this matter.

Please answer the following items.

13. If you are not presently attending a college, what are your future educational plans?

Reset

14. If you are not planning to return to college, but your grades are affecting other aspects of your life, please explain in detail.

Reset

15. (A) Please explain why you received the grades you wish changed. Be sure to indicate whether you completed all of the course requirements including the final examination. The documentation is critical.

Reset

15. (B) Indicate whether you want the grade of F or D changed to a W (withdrawal) or if you want a grade changed to a specific letter grade (such as A, B, C, or D). If you want a grade changed to a specific letter grade, you must provide an explanation for the change and include a syllabus, classwork and test results. If the instructor is still at IUPUC, you should discuss the matter with the instructor prior to filing this petition. If you are concerned about privacy regarding the causes of poor grades, be assured that the university regards this petition as confidential. Only persons with a need to know will see any confidential materials, such as medical records, which you may submit. If you are still concerned, you may indicate a phone number and a time at which you may be reached to discuss this issue. If you don't recall the name of your instructor, you may call the school or division by which the course was offered.

Reset

16. If you have transferred to another institution, please explain why the change of grade is critical. Since most schools don't count grades from other colleges in your grade point average, and don't transfer in courses with grades of D or F, be sure to explain the specific impact on your academic future of the grades that you wish changed.

Reset

If you wish to add additional information, it must be in typed format and attached to this document.

_____

Student Signature

Please return the completed form to:
Office of the Registrar
4601 Central Ave., RM 156
Columbus, IN 47203

Fax: (812) 348-7257
Phone: (812) 348-7287

The Office of the Registrar will forward your petition to the IUPUC school or divisions which taught the courses specified. Please allow at least four weeks for the review process. During the summer and during semester breaks, the processing time could take longer than four weeks. You will be notified in writing with the decision.

Academic Policies & Procedures

Undergraduate Policies & Procedures

Dismissal

Students may be dismissed from their division or program if they fail to meet academic or professional standards. The student will be informed of the dismissal in writing by the division head or the division head's campus representative.

Academic Dismissal Policy for Beginning Students

This policy applies to all beginning students who enroll in 12 or more credit hours their first semester at IUPUC. Beginning students (those admitted with less than 12 credit hours of transfer credit) who attempted 12 or more credit hours (including Ws) must have obtained at least a 1.0 GPA at the end of their first semester or they will be dismissed. This includes students whose first semester is summer. Students who withdraw from all courses are exempt from this policy.

- Students who are dismissed for the first time must sit out for a minimum of one fall or one spring semester before being eligible to petition for reinstatement.
- Students dismissed two or more times must remain out of school for at least two consecutive (fall and spring or spring and fall) semesters before being eligible to petition for reinstatement.
- Students must petition by the established deadlines to be considered for reinstatement. Reinstatement is not automatic.

This policy was ratified by IUPUC Faculty Senate on February 8, 2011

Academic Dismissal Policy for Continuing or Returning Students

Some factors considered when continuing or returning students are dismissed are failure to maintain a minimum GPA of 2.0 (IUPUC's GPA of good standing) or the division's GPA of good standing after being placed on probation, a lack of progress toward the degree requirements in the judgment of the faculty, or a lack of acceptable ethical or professional behavior. Students who have completed a minimum of 12 IUPUC/IUPUI grade point average (GPA) hours are subject to dismissal if they fail to attain an overall GPA of at least 2.0. Continuing and returning students should check with their academic division for specific information about the dismissal policy of that division.

Reinstatement

Students who are dismissed for the first time must sit out for a minimum of one semester and petition by the established deadlines to be reinstated. Reinstatement is not automatic. Students' chances of reinstatement will be enhanced by the student removing grades of incomplete, undertaking assessment of their academic problems, participating in career workshops, and providing evidence of their ability to do successful academic work upon their reinstatement to IUPUC.
Students dismissed more than once must remain out of school for at least one full year

and petition by the established deadlines to be reinstated. Readmission after a second dismissal is extremely rare. Students' chances of reinstatement will be enhanced by the length of time the student has been away from the university, successful academic course work completed at other accredited institutions, military service, participation in career workshops, and providing evidence of their ability to do successful academic work upon their reinstatement to IUPUC.

Individual divisions may refuse to readmit students on the basis of their academic records.

Students already enrolled in and even attending classes will be administratively dropped from those classes and their money returned if they are dismissed.

Academic Policies & Procedures

Undergraduate Policies & Procedures

Grade Replacement Policy

The IUPUC Grade Replacement Policy (formerly known as the FX policy) was revised effective fall 1996. This policy allows approved undergraduate students seeking their first degree to repeat courses—a maximum of 15 credit hours subject to division approval—in order to improve poor grades, including grades of F. If a student earns the same or a higher grade after repeating the course, only the second grade will be counted in the cumulative GPA.

Replacement does not happen automatically, so students must notify the division advisor that the course has been taken a second time and that they wish to exercise this option. Certain restrictions apply, and the grade replacement policy may not be honored by some divisions when considering admission to the division or in computing graduation honors. For more information, students should contact their division.

The 15-credit-hour limit includes any course(s) previously replaced using the FX policy. A student may exercise the Grade Replacement Policy no more than two times for a single course, and once invoked, a student may not reverse the grade replacement granted in a particular course. The replaced grade will be excluded from the cumulative GPA, but the course and the replaced grade will remain on the student's academic record with a notation indicating that the grade exists but is excluded from the cumulative GPA. The use of the forgiveness policy does not preclude a student from using grade replacement for course work taken subsequent to re-enrollment as defined by the forgiveness policy.

If the original course was taken on another IU campus, that campus must be willing to place the replacement flag on the course at IUPUC's request.

Not all IUPUC units accept the general policy as stated above. If a student changes programs, divisions, or campuses to a program that does not recognize the Grade Replacement Policy, the original grades will once again be averaged into the student's GPA.

Graduation

Associate, bachelor's, and master's degrees are conferred in December, May, and August each year. Commencement Day Ceremonies, held in Indianapolis and Columbus, occur in May each year. Present on the stage in Columbus are the Vice Chancellor and Dean of IUPUC and the Division Heads of IUPUC. The IUPUC, IU, and Purdue Alumni Associations induct their graduates into their respective associations and provide them with an introductory membership.

Additional information regarding the ceremony, including date and time, is available at commencement at IUPUC.

2012 IUPUC Graduation Ceremony

The Indiana University-Purdue University Columbus (IUPUC) graduation ceremony will be May 12, 2012 at Columbus North High School. The high school is located at 1400 25th Street, Columbus, IN 47201-4385.

The ceremony will begin promptly at 5 p.m. Graduates should plan to arrive at Columbus North High School by 4 p.m.

Additional information

- All students participating in the IUPUC graduation ceremony must order a cap and gown through Herff-Jones.
- To place your order, go to www.herffjones.com/iu.
- Select IUPUC and complete the steps.
- The deadline to order your cap and gown is April 6, 2012.

Reinstatement

On occasion, students are dismissed from IUPUC or another IU campus due to poor academic performance. After sitting out for some time, students can apply to be reinstated. Read below to find out more about submitting a reinstatement petition. Please note that this is the reinstatement petition to University College at IUPUC. **If you were dismissed from another division (e.g., Education, Business, etc.) you will need to contact that division to inquire about their reinstatement procedures. Do not use this petition.**

1. Reinstatement will be the decision of the UCOL Probation/Reinstatement Committee.
2. Students who are reinstated will be classified as probationary students until their cumulative GPA is 2.0. During the first semester after being reinstated, the student must achieve a semester GPA of at least 2.3. In each subsequent semester on probation, the student must achieve a semester GPA of 2.0. Failure to meet the semester GPA requirement will result in dismissal.

IUPUC University College policy is that students whose cumulative GPA is below 2.0 and they have been dismissed from any IU campus, must sit out for a minimum of one semester (fall or spring) and petition by the established deadlines to be reinstated. Students who have been dismissed two or more times, must sit out for a minimum of one full year before petitioning for reinstatement.

University College does not reinstate for the summer sessions.

Reinstatement Deadlines

Fall semester: June 1st

Spring semester: October 1st

No exceptions will be made for these deadlines.

Academic Dismissal Reinstatement Fee

IUPUC will assess a $55.00 fee to students who have been dismissed for academic reasons and who wish to return to University study. The fee will be assessed at IUPUC at the time an appeal is submitted. Students may pay by money order or check payable to "IUPUC".

IUPUI Policy on Returned Checks: www.bursar.iupui.edu/returnedchecks.htm

Repeating Courses

If a student repeats a course, it will only be counted once toward graduation or electives in the program, though the grades will be calculated in the overall GPA. Exceptions are variable topics courses, internships, or some other courses that can be taken more than once for credit. Courses repeated under the grade replacement policy may be excluded from the overall GPA. See the individual division's section of this bulletin to determine any restrictions on use of grade replacement.

Undergraduate Policies & Procedures

Transfer Credits

IUPUC's Transfer Credit Policy

As part of your application review, the Office of Undergraduate Admission will review courses taken at other colleges and university and determine where transfer credits can be awarded. In order to have your transcripts formally reviewed, you must first apply for undergraduate degree-seeking admission, and submit official transcripts from each school you have attended after high school. If you have received college credit while still attending high school, you still need to submit a transcript from the college awarding the credits.

Most often, IUPUC will transfer credits into the university from another college or university if there is an equivalency course offered on our campus. When an equal course is not available,the course may either be transferred in as a undistributed elective, or a decision may be made that there is no transferable credit.

IUPUC and IUPUI is accredited by the North Central Association of Colleges and Schools (NCA-HLC), and in order to transfer credits from another institution, IUPUC requires that the student received at least a grade of "C" or better and that the school to be regionally accredited. When a school is not regionally accredited, we may transfer up to 15 hours of general education coursework only; however, this is not automatic, there are several other criteria those courses have to meet in order for them to transfer as undistributed credits.

Transfer, Test, and Special Credit

Courses accepted in transfer from other institutions are listed under the appropriate headings. No grades are awarded and the course numbers and titles reflect Indiana University equivalents. Transfer hours and quality points are not reflected in the cumulative grade average, nor do they appear in the "Hrs Earned" field. The total number of transfer hours on the record does appear in a separate transfer hour category in the grade point average summary. A course suitable for credit which does not parallel an Indiana University course at the campus of evaluation may be designated by a course subject followed by "UN" and a number indicating an equivalent Indiana University course (class) level. For example, HIST-UN 200 represents a 200 (sophomore) level History course. Applicability of accepted transfer credit toward a particular degree is determined by the Indiana University school or division offering the degree program. Credit awarded as a result of placement tests, credit by examination, or successful completion of a higher level course may be reflected as Special Credit with a transcript note or may appear as separately designated "Test Credits." See the appropriate division for more detailed

information.

Transfer Credit Limits

Generally, no more than 64 credit hours earned in accredited junior or community colleges can be applied toward a degree. See the appropriate division for more information regarding transfer credit limits.

Adaptive Educational Services (AES)

IUPUC is committed to helping students with disabilities achieve their goals by augmenting their existing strengths and abilities. Adaptive Educational Services (AES) provides a range of services based on the documented needs of qualified students with disabilities that meet the requirements of the American Disabilities Act (ADA) and the Rehabilitation Act of 1973.

AES facilitates tests that require extended time, provides interpreters, coordinates financial support and service through Indiana Vocational Rehabilitation, assists in registration, provides note takers, works with faculty to make reasonable modifications of programs and courses for students with disabilities, upholds academic standards, and maintains legally appropriate confidentiality for students with disabilities.

Students are encouraged to contact the AES office several weeks before the start of each semester to ensure services are in place.

To apply for AES services, please click here for more information and next steps or contact the AES Coordinator at (812)314-8539.

Adaptive Educational Services (AES)

Students at Indiana University-Purdue University Columbus who have documented short-term or long-term physical challenges that could impact their ability to have successful education experience are encouraged to contact Adaptive Educational Services or AES.

AES provides a range of services based on the needs of qualified students. AES staff will work with students on an individual basis to help develop accommodations and processes that facilitate student success and ensure timely progress toward earning a degree.

These services may include, but are not limited to, assistance such as:

- Working with instructors to create accessible learning environments
- Note-taking services
- Classroom and testing modifications
- Parking
- Adaptive equipment and technology
- American Sign Language (ASL) interpretation

Students are encouraged to contact the AES office several weeks before the start of each semester to ensure services are in place.

To apply for AES services, please click here for more information and next steps.

Alumni Association

Upon graduation, IUPUC students not only become alumni of Indiana University and Purdue University, but also of the IUPUC campus. The IUPUC Alumni Association is dedicated to connecting alumni, building lifelong relationships, and serving IUPUC.

IUPUC Alumni Association is a vital link between alumni, students, faculty, staff, and the community. The vision is to improve the lives of students and alumni through education, personal development, and camaraderie. The Association serves as a dynamic organization by facilitating communications and sponsoring a wide variety of programs to actively engage alumni in the success, growth, and development of IUPUC.

Annual Alumni Association-sponsored activities include the Ice Cream Social, Mocktail Reception, IU Blood Donor Challenge, and Career Networking Event. For more information on these programs and the Association, please contact the Office of Alumni Relations at (812) 314-8632 or alumni@iupuc.edu or visit the Alumni Relations website.

IUPUC Alumni Relations

Welcome to the IUPUC Alumni Association web page. We are glad you stopped by. This page offers insights into what it means to be a part of the IUPUC family. We hope you will take time to explore this page and the opportunities that await you.

As an alum of IUPUC, you are entitled to a host of benefits and opportunities. The IUPUC Alumni Association is your gateway to building relationships with IUPUC and other alumni. We are dedicated to providing you with the programs and services you need to stay connected. Throughout the year, we host numerous Alumni Association events. We encourage you to become involved. With your help, IUPUC's list of accomplishments and reputation will continue to grow.

Connecting with fellow alumni is one of the greatest benefits of joining the Alumni Association. There are more than 4,000 IUPUC alumni representing countless career paths including teaching, nursing, and accounting.

We would love to hear from you! Where are you now? What dreams have you accomplished? Please e-mail us and fill us in on your life after IUPUC.

Remember, no matter where you go, you can stay connected to IUPUC.

Resources and Services

Career Exploration, Internships and Job Search Assistance

Career services are available for all IUPUC students and alumni, assisting them in developing and implementing a sound career planning strategy. Students can receive help in choosing a major, obtain information on employment trends, and learn about career and internship opportunities in local areas, the state of Indiana, and across the nation.

Students have the opportunity to meet with a career counselor for an individual career counseling appointment. Students can choose to complete a career interest or personality assessment such as the Strong Interest Inventory, Do What You Are, or the Myers-Briggs Type Indicator. Workshops in choosing a major and job search strategies, including resume writing and interviewing techniques, are offered. A career and internship fair is held each spring and fall at the Learning Center. Information on dates of workshops and fairs is available on the website www.iupuc/careerservices.

Students and alumni can access Career Point, the online job and internship posting at www.iupuc.edu/careerpoint.

Students who are undecided about their major are encouraged to visit the Career Services office early in their first year of college to start the self-assessment process and begin to research majors and careers.

The Career Services office is located in the Learning Center building, Suite 1200. For more information visit the website www.iupuc.edu/careerservices or call 812-314-8535.

Student Life allows students the opportunity to meet other students, put classroom skills into practice, serves in leadership positions, and prepare for life experiences in a global society. Information on all aspects of student life at IUPUC is available online.

IUPUC Student Government Association

The IUPUC Student Government Association (SGA) is the voice of students and a vehicle for positive improvements in student life on campus. The SGA disburses student activity funds to registered student clubs and organizations, and members serve as student advisors to the Vice Chancellor and Dean. The Student Council is composed of up to three representatives from each academic division on campus. Elections are held each spring. For more information about SGA visit http://www.iupuc.edu/sga/.

IUPUC Clubs and Organizations

IUPUC has a growing number of student clubs and organizations representing a broad range of student
interests and academic programs. Many of these groups are related to a career or field of study, while others are faith-based, focused on diversity, recreation, service, or special interests. Starting a club or being involved in a club or organization is a great way for students to connect to the campus. It allows students opportunities to meet other students, put classroom skills into practice, serve in leadership positions, and prepare for life experiences in a global society. Information on starting a club or becoming involved in a current club is available at http://www.iupuc.edu/studentlife/.

IUPUC Excellence in Leadership Initiative

The one-year (fall and spring) leadership development and enrichment program is for IUPUC students who want to strengthen and expand their leadership skills and experience.

· ELI will offer students opportunities to explore specific topics through a series of eight informative
workshops. It will also include opportunities for students to make tangible contributions to the
university and the Columbus community through service projects.

· To successfully complete the program, participants must attend at least six of the eight workshops, participate in a community service activity, and demonstrate a desire to lead both in and out of the classroom.

· Students who complete these requirements will receive an IUPUC Certificate of Leadership and branded IUPUC apparel or other items from the Office of Student Services.

Counseling Services for IUPUC Students

Solutions Student Assistance Service

Sometimes, life presents us with circumstances that challenge our ability to cope. Along with work, family, and other responsibilities, students must also manage academic responsibilities. Students at Indiana University-Purdue University Columbus (IUPUC) can take advantage of up to five free sessions with a licensed counselor.

Solutions Student Assistance Service (SAS) provides free, local, professional, and confidential consultations for IUPUC students. Solutions SAS can help you clarify and develop a plan to address life's challenges. Their counselors can help you find the tools and support you need to navigate the tough times and set clear priorities, both now and for the future.

All IUPUC students are eligible for up to five (5) free counseling sessions per documented issue, which include, but are not limited to:

- Depression
- Addiction
- Stress
- Grief/Loss
- Anxiety

If more than five sessions are needed, students can utilize their individual medical and health insurance. Other financing options can be discussed and arranged with a Solutions staff member.

To utilize these services, please contact Solutions directly at 812.377.5074 or 1.800.766.0068. If you have an after-hours emergency, you can call the above numbers and speak to a crisis agent.

Solutions is a service of Centerstone Indiana.

Counseling and Psychological Services (CAPS)

The professionally trained counselors of IUPUI Counseling and Psychological Services provide services to IUPUC students, faculty, and staff who may be experiencing emotional, psychological, and/or cognitive difficulties that have an impact upon academic or work performance.

Counseling is free to students. Private and confidential appointments are available in individual, couples, or group formats. Evening appointments are available Monday through Thursday by appointment only.

Safety

Veterans Services

Assessments are also available for learning disabilities and attention deficit disorder by licensed psychologists on a fee-per-service basis. For information, call (317) 274-2548; e-mail caps@iupui.edu, or visit the Web site at life.iupui.edu/caps.

International Students

The best guide to international admission standards and procedures is the "International Undergraduate Application for Admission." This pamphlet is revised annually and contains an application form, financial support agreement form, estimated tuition and living expenses, English language proficiency requirements, detailed instructions, numbers to call, and relevant deadlines. The Office of International Affairs Web site (http://international.iupui.edu/) provides information on admissions for international undergraduates and graduates, links to the online applications, downloadable and printable application and financial support agreement forms, and links to Web sites of other offices.

The admission requirements for students hoping to enter an associate, bachelor, or certificate program as either a beginning or transfer student are described below. Depending upon the admission requirements of their desired programs, students will be considered either for admission to University College or for dual admission to University College and the division of their intended program. Regardless of the admission category, beginning undergraduate students and most undergraduate transfer students will have the benefit of the University College Orientation program.

Beginning undergraduate applicants should have completed the primary and secondary education system of their own country. The U.S. primary and secondary education system consists of 12 years of study. IUPUC expects that applicants from other countries will have studied for a similar number of years in primary and secondary school to be eligible for university admission. Pre-primary education is not included in this total number of years. However, applicants from countries with at least 11 standard years in the primary and secondary system may be considered if they have achieved a strong academic record and can submit the final, official school-leaving certificate. Applicants applying from abroad are expected to have reached their 18th birthdays no later than the end of their first semester of study here. Applicants from countries with more than 12 years of primary and secondary study may qualify for advanced standing.

Secondary school programs should have included study of a student's native language, English or other foreign languages, mathematics, natural and/or physical science, humanities, and social sciences. Applicants from British-style systems must have earned at least six GCSE (General Certificate of Secondary Education)-or their equivalents-0-level passes, including passes in English and mathematics. GCE (General Certificate of Education) Advanced A-level results may be considered to yield credit for advanced standing where the grade earned is D or higher. Students with 0-level certificates who do not meet the minimum age requirements are encouraged to continue their studies to earn A-level certificates prior to applying to IUPUC.

David Strong, with colleagues, in China

(July 24) When the subject turned to China and globalization in his introductory sociology classes at Indiana University-Purdue University Indianapolis, David Strong realized two things: His students wanted to learn more about China, and so did he.

When an opportunity to see China first-hand came along, Strong seized it. The sociology lecturer in the IU School of Liberal Arts applied for and was selected, along with other educators from Indiana colleges and universities, to visit China in May 2012. The trip was designed for faculty members who don't specialize in issues surrounding China but want to incorporate material about China into their teaching.

The trip was sponsored and financed by the Indiana Consortium for International Programs, the Confucius Institute and IUPUI's Office of International Affairs.

Leymah Gbowee's Lecture now online

Leymah Gbowee's lecture on women, peace, and reconciliation in West Africa that took place on February 16 is now archived and available at http://www.indiana.edu/~video/stream/launchflash.html?

folder=vic&filename=gbowee_presentation_20120216.mp4.

Gbowee, founder of the Liberian Mass Action for Peace, along with Liberian President Ellen Johnson-Sirleaf and Yemeni activist Tawakkol Karman, were the joint recipients of the 2011 Nobel Peace Prize.

International Students Share their IUPUI Experience

Record International Student Enrollment at IUPUI

IUPUI has enrolled a record 1,446 international students for Fall 2011, up 6% from Fall 2010, including a 30% increase in new freshman enrollment. For the first time, more than 300 of IUPUI's international students are from a single country — China (319). Other countries with large student populations are India (249) and Saudi Arabia (219), both increases over last year. Full story

University Ombudsman

At Indiana University-Purdue University Columbus (IUPUC), the university ombudsman is a neutral, impartial IUPUC staff member charged with helping to solve problems and resolve disputes. The most important function of the university ombudsman is to provide confidential and informal assistance to student, faculty, and staff who are members of the IUPUC campus community. The ombudsperson role has a long and honorable tradition as a means of protecting against abuse, bias and other improper treatment or unfairness. Serving as a neutral third party, the ombudsperson is neither an advocate for any individual nor the organization, but rather, an advocate for fairness who acts as a source of information and referral, and aids in answering individual's questions, and assists in the resolution of concerns and critical situations. In considering any given instance or concern, the rights of all parties that might be involved are taken into account. This office supplements, but does not replace, the university's existing resources for conflict resolution. If you are in need of these services, please contact the University Ombudsman, Sandra Miles, at smiles3@iupuc.edu.

Parking and Transportation

General Information

Parking is available to students, staff, and faculty by permit. "A" permits are reserved for faculty and staff only. Students are eligible to purchase an "E" permit. Students may purchase "E" semester parking permits when registering for classes. Parking fees are published each semester in the Registration Guide.

Parking regulations are enforced 24 hours a day, 7 days a week. Parking without a permit or in an invalid space will result in a citation. Repeat offenders risk the possibility of having their cars towed or being checklisted from registering for classes or purchasing a new parking permit.
People with a physical disability should contact the bursar's office to request a special parking permit. The staff can authorize special permits for short-term disabilities, but students must get state certification before receiving a special long-term parking permit. Disabled permits allow you to park in any parking area.

Parking Fees and Fines

For current information, please visit the Office of the Bursar online for fees and fines.

Parking Policy

- All vehicles parked in a permit lot must properly display a parking permit attached to the rear view mirror so that the letter designation is clearly visible from the front of the vehicle.
- Parking of motor vehicles on campus is confined to areas designated for that purpose. Parking is prohibited on lawns, in construction/maintenance areas, or any other area that would mar the landscape of campus, create a hazard or interfere with use of University facilities by others.
- Students, Faculty, and Staff may not park in Visitor Parking. Visitor parking is limited to IUPUC visitors only. If someone will be visiting for more than one hour, they must go to the IUPUC Business Office and obtain a temporary permit.
- Any vehicle in violation of parking regulations or any which are apparently abandoned **(left more than 48 hours)** may be towed and stored at the owner's expense.
- During the winter months, and when there is snow on the ground, please make every attempt to remove your vehicle form campus property after hours. Vehicles left on campus may become "Plowed In" during snow removal. Please note that this is not intentionally done, but is an unavoidable component of the snow removal process.
- Accumulation of 2 or more unpaid parking citations can result in a car being booted. All fines will be paid to the Bursar's Office as well as a $50 boot removal fee prior to the vehicle being released.

Safety

Veterans Services

- In addition to IUPUC regulations, Students, Faculty, Staff and visitors are subject to the parking rules and regulations set forth by IUPUI where applicable on the IUPUC Campus.

Emergency Procedures

In an emergency, from any on-campus phone, dial 9-911.

Building Security

IUPUC has no student housing. Building hours are determined by the Vice Chancellor's Office. When a building is closed, only faculty, staff, and students with specific needs are allowed inside. Environmental and lighting concerns are monitored continually by the Maintenance Department, and they respond to all requests for service dealing with safety or security hazards that are structural or mechanical in nature. All members of the university community are encouraged to report any safety hazards to the Maintenance Department at (812) 348-7237.

Law Enforcement

IUPUC has no formal police or security departments. The campus is patrolled on a part-time basis by the Bartholomew County Sheriff's Reserve Division. It is IUPUC policy that all members of the university community are responsible for safety and security at IUPUC. The IUPUC Emergency Procedures Handbook provides guidance on many topics related to this subject.

University Library of Columbus

The University Library of Columbus (ULC), located in the Columbus Learning Center, is a member of the Indiana University Libraries system, one of the most highly regarded university library systems in the nation. It is a full-service academic library offering reference assistance, interlibrary loans, course-related instruction, and a wide and varied array of print and electronic resources, including books, journals, reference resources, and databases. All are chosen to support the specific research interests and assignments of students. Most electronic resources can be accessed from home by IUPUC students.

The ULC serves the students, staff, and faculty of IUPUC, Ivy Tech Community College and the Purdue University College of Technology in Columbus and is first and foremost a teaching library. The library staff welcomes requests for information, training, and research assistance from students, staff, and faculty of all three institutions.

Any questions regarding the library may be directed to the ULC Information Desk at 812-314-8703 or by using one of the Ask-A-Librarian links.

VA Education Benefits on the VA Website

Many veteran and current members of the military qualify for federal financial aid from the Department of Veteran Affairs through the Montgomery GI Bill. If you performed military service in the past ten years or are still serving in the military, click here for our local table of information, or visit www.gibill.va.gov to:

- Learn about education entitlements
- Read answers to Frequently Asked Questions
- Apply online for benefits

Apply for Admission to the University

You can apply for admission to IUPUC at the same time you apply for VA benefits. Processing of both applications can take several weeks to complete. The IUPUC Admissions office will need official transcripts from any colleges you attended previously.

Start Your VA File at IUPUC

When you are approved by the VA for educational benefit payments, bring a copy of your Certificate of Eligibility to the IUPUC Registrar's office. We also need a copy of your most recent DD Form 214 or, if you are a member of the National Guard or Reserves, a DD Form 2384 Notice of Basic Eligibility (NOBE).

What IUPUC Does for You

Every university has a VA "Enrollment Certifying Official." (You may also see the title "School Certifying Official.") The ECO reports your enrollment information to the VA by entering credit hours, tuition, and fees data in a web application called VAONCE. This is how the VA knows you are attending school. The VA also needs to know when you withdraw from a class, or add a class. The ECO monitors and reports those changes.

Contacting the Enrollment Certifying Official

If you have comments, additions, or any suggestions to improve this Veterans Web Page contact Cynthia Scott in the Registrar's Office or send an email to cynscott@iupuc.edu

Reporting a Change of Major

If you want to change your academic objective (major) after you have been receiving benefits, the VA requires that you complete their VA Form 22-1995, Request for Change of Program or Place of Training. The form is found on the http://www.va.gov/ website through their VA Forms link. The ECO will remind you of this when either you or your academic advisor submits an IUPUC Academic Objective Update form.

Transferring Here with VA Benefits

If you have been receiving VA Education benefits at another university and are planning to transfer to IUPUC, the Registrar's office does not process your certification until you are admitted to IUPUC. You must first apply for admission to our university. After you have been notified of admission, complete VA Form 22-1995, Request for Change of Program or Place of Training. The form is found on the http://www.va.gov/ website. Look for the VA Forms link. When you have actually enrolled in classes, tell the Enrollment Certifying Official at the Office of the Registrar. We will process your semester enrollment certification.

Military Family Research Institute

Military Family Research Institute is associated with the South Central Military Support Network and Student & Military Veterans Association - resources for student veterans. The link to Military Family Research Institute and the contact mfri@purdue.edu.

Overview

Freshman Scholarships

These scholarships are performance based and are awarded in recognition of academic achievement, rewarding excellence and providing a monetary incentive to enroll at IUPUC. Early admission is the best way for students to be assured of scholarship opportunities. Beginning freshmen are considered for scholarships after admission to IUPUC, so for full consideration you should apply for admission in the fall of your senior year. Only one freshman scholarship is allowed per student. The deadline for all freshman scholarships is March 1.

IUPUC Hoosier Presidential Scholar

$9,000 annually for four years

Deadline: March 1, admission

Incoming freshman in the top 10% of their graduating class (minimum 26 students in class) with minimum 1250 SAT (Math/Critical Reading) or 27 ACT may qualify. IUPUC campus awards up to two recipients annually. For renewal, student must be full-time at IUPUC, maintain minimum 3.3 CGPA, and volunteer at one campus event per academic year. Limited to the first two eligible applicants.

IUPUC Valedictorian and Salutatorian Scholarship

$6,000 annually for four years

Deadline: March 1, admission

Incoming freshmen who are ranked first or second in their graduating class (minimum 26 students in class) with minimum CGPA of 3.3/4.0 may qualify. For renewal, student must be full time at IUPUC, maintain minimum 3.0 CGPA, and volunteer at one campus event per academic year.

IUPUC Academic Excellence Scholarship

$3,000 annually for four years

Deadline: March 1, admission

Incoming freshmen with minimum CGPA of 3.5/4.0 and 1100 SAT (Math/Critical Reading) or 24 ACT may qualify. For renewal, student must be full-time at IUPUC, maintain minimum 2.75 CGPA, and volunteer at one campus event per academic year.

IUPUC First Generation Scholarship

$2,000 annually for four years

Deadline: March 1, admission

Incoming freshmen first in their family of origin (mother/father) to graduate from an accredited college, minimum CGPA of 3.0/4.0 and 1000 SAT (Math/Critical Reading) or 21 ACT may qualify. For renewal, student must be full-time at IUPUC, maintain minimum 2.50 CGPA, and volunteer at one campus event per academic year.

IUPUC Service Scholarship

$1,500 annually for four years

Deadline: March 1, admission

Incoming freshmen who have a minimum CGPA of 3.25/4.0 may qualify. For renewal, student must be full-time at IUPUC, maintain minimum 3.0 CGPA, and volunteer for 10 hours of campus events per academic year.

IUPUC High School Counselor Scholar Award

$3,750 annually for four years

Deadline: March 1, admission and certificate

Incoming freshman with minimum CGPA of 3.5/4.0 and 1100 SAT (Math/Critical Reading) or 24 ACT may qualify.

Recipients must be nominated by their school counselor.

For renewal, student must be full-time at IUPUC, maintain minimum 3.0 CGPA, and volunteer at one campus event per academic year.

IUPUC High School Counselor Recognition Scholarship

$2,000 annually for four years

Deadline: March 1, admission and certificate

Incoming freshman who have a minimum CGPA of 3.0/4.0 may qualify.

Recipients must be nominated by their school counselor.

For renewal, student must be full-time at IUPUC, maintain minimum 2.5 CGPA, and volunteer at one campus event per academic year.

Additional IUPUC Scholarship opportunities

Passport Scholarship

This $1,500 annually /renewable scholarship for up to four semesters may be available to students who transfer to IUPUC within one year of completing an Associate's degree (A.A., A.S. or A.A.S.) from Ivy Tech. The non-competitive scholarship would be automatically offered at the point of admission to IUPUC. Recipients must have a minimum cumulative GPA of 3.3. The scholarship is renewable if the student maintains a GPA of at least 3.0 and continuous fulltime enrollment in a campus-based program. Scholarships will be awarded based on available funds. Full consideration will be given to early applicants. Final Ivy Tech Community College transcripts must be submitted before scholarship will be awarded.

Campus Campaign Scholarship

IUPUC faculty and staff make contributions each year to fund these achievement-based scholarships.

Donor Funded Scholarships

Every year many IUPUC students receive private sector scholarships, providing thousands of dollars to pay for their education. Information on external scholarships can be found from high school guidance offices, scholarship source books, and online scholarship search databases. The IUPUC Web site lists some of the online free database search sites.

Blue & Company Scholarship – One $500 Scholarship

- Junior or Senior majoring in Accounting at IUPUC.

CAAIFA Scholarship – One $1,000 Scholarship

- Enrolled in a minimum of 6 credits per semester (part-time) in Business.
- Resident of Bartholomew, Brown, Decatur, Jackson, Jennings, Johnson, or Shelby counties.
    - CGPA 2.5 or higher.
    - Financial need as well as community service or extracurricular activities will be considered.

Additional requirement: Attach an essay (maximum one-page) over: "Why it is important to plan your financial future?"

Community Education Coalition – Maximum Scholarship level is $2,000

- Enrolled in a minimum of 12 credits per semester (full-time).
- CGPA 3.0 or higher.
- Financial need will be considered.

Faurecia Scholarship – Two $1,000 Scholarships

- Engineering or Science student.

Glenn Klipsch Memorial Scholarship – One $1,000 Scholarship

- Enrolled in a minimum of 12 credits per semester (full-time).
- CGPA of 3.0 or higher.
- Must complete some form of volunteer service during each semester.

Additional requirement: Attach document describing community service activity(s) in which you are involved.

Institute of Management Accountants Scholarship – One $1,000 Scholarship

- Enrolled in a minimum of 12 credits per semester (full-time) in Finance/Accounting.
- CGPA of 3.0 or higher.
- Financial need to be considered.

Additional requirement: Submit a 300 word essay on the topic of: Career Aspirations. References will be accepted

IUPUC Alumni Association Scholarship – Three $1,500 & One $1,000 Scholarships

- Enrolled in a minimum 6 credit hours per semester (part-time) and completed a minimum of nine credit hours at IUPUC.
- Nontraditional or continuing students.

Additional requirement: Submit letter of endorsement by an employer, IUPUC faculty member, or IUPUC alumnus.

IUPUC Scholarship – Five $1,000 & Two $1,500 Scholarships

Additional requirement: Submit letter of endorsement by an employer, IUPUC faculty member, or IUPUC alumnus.

Jay Howard Scholarship – One $500 Scholarship

- Enrolled in a minimum 6 credit hours per semester (part-time) & admitted as Sociology major or minor.
- CGPA of 3.0 or higher.
- Merit (evaluated in terms of academic accomplishments) & service to IUPUC and the community will be considered.

Additional requirement: Provide up to 500 words describing your contributions to the IUPUC campus and/or your community.

Kristen Schildmier Scholarship – One $1,000 Scholarship

- Enrolled in a minimum 12 credit hours per semester (full-time) and working part-time or full-time.
- Financial need will be considered.
- Preference will be given to students who have earned an associate degree from Ivy Tech.

Taylor Bros. Construction Co., Inc. Scholarship – One $1,000 Scholarship

Additional requirement: Submit letter of endorsement by an employer, IUPUC faculty member, or IUPUC alumnus.

Wafa Family Scholarship – Maximum Scholarship level is $1,000

- First consideration will be given to an undergraduate student seeking first degree demonstrating financial need.
- Recipient will demonstrate academic promise as determined by an IUPUC faculty member.
- The number, amount, and recipient(s) of the scholarship will be determined by the Scholarship Committee of IUPUC.

Additional requirement: Applicant must submit a letter/statement of endorsement by an

IUPUC faculty member.

Zonta Club Scholarship – One $400 Scholarship

- Enrolled in a minimum 6 credit hours per semester (part-time).
- Female student who is a resident of Bartholomew County.
- CGPA of 3.0 or higher.

Check the IUPUC Scholarship site frequently for updates. While this information is current as of print, we will post any changes in scholarship opportunities and the Web site should be consulted as the final source of information.

Courses

Business

BUS-A 201 Introduction to Financial Accounting (3 cr.) P: BUS X100, sophomore standing. Provides balanced coverage of the mechanics, measurement theory, and economic context of financial accounting. Strikes a balance between a preparer's and a user's orientation, emphasizing that students must understand both how transactions lead to financial statements (preparer's orientation) as well as how one can infer transactions given a set of financial statements (user's orientation). Relies on current real-world examples taken from the popular business press. The first part of the course introduces students to the financial accounting environment, financial statements, the accounting cycle, and the theoretical framework of accounting measurement. The second part of the course covers the elements of financial statements, emphasizing mechanics, measurement theory, and the economic environment.

BUS-A 202 Introduction to Managerial Accounting (3 cr.) P: BUS A201, sophomore standing. The course covers the concepts and issues associated with the accounting and the management of business. Particular emphasis is given to understanding the role of accounting in product costing, costing for quality, cost-justifying investment decisions, and performance evaluation and control of human behavior.

BUS-A 311 Intermediate Accounting I (3 cr.) P: A201 and A202. Provides students with a thorough understanding of the theoretical foundations underlying financial reporting, revenue recognition, and the matching of expenses; financial statement presentation; and accounting for assets. The course's primary objective is to give students the tools necessary to understand and execute appropriate accounting procedures. Another goal is to help students understand the process through which accounting standards are determined and to evaluate the outcomes of that process from the perspectives of managers, shareholders, auditors, and others. Students will learn to assess competing accounting theories and methods from multiple perspectives.

BUS-A 312 Intermediate Accounting II (3 cr.) P: A311. Provides students with a thorough understanding of accounting for long-term liabilities and debt investment, stockholders' equity, and preparation of cash-flow statements. The course's first objective is to give students the tools necessary to understand and execute appropriate accounting procedures. The course's second objective is to help students understand the process through which accounting standards are determined and to evaluate the outcomes of that process from the perspectives of managers, shareholders, auditors, and others. Students will learn to assess competing accounting theories and methods from multiple perspectives.

BUS-A 325 Cost Accounting (3 cr.) P: A201 and A202. Conceptual and procedural aspects of management and cost accounting. Product costing, cost control over projects and products, decision making, profit planning, quantitative modeling, activity-based management, and computer applications.

BUS-A 328 Introduction to Taxation (3 cr.) P: A201 and A202. This course examines the fundamentals of federal income taxation. Primary emphasis is on a basic understanding and awareness of the tax law as it applies to individuals. Includes an overview of the taxation of corporations, partnerships, and estates and trusts. The course introduces students to tax research and the various sources of tax law, including the Internal Revenue Code, regulations, administrative pronouncements, and case law.

BUS-A 335 Government and Non-Profit Accounting (3 cr.) P: A201 and A202. Financial management and accounting for nonprofit-seeking entities such as municipal and federal governments, schools, and hospitals.

BUS-A 337 Computer-Based Accounting Systems (3 cr.) P: BUS A311 and ECON E280. Impact of modern computer systems on analysis and design of accounting information systems. Discussion of tools of systems analysis, computer-based systems, and internal controls and applications. Focus on microcomputer use.

BUS-A 380 Professional Practice in Accounting (1-3 cr.) P: Junior or senior standing in major area and consent of undergraduate program chairperson. Application filed through the coordinator of internships. Students receive work experience in cooperating firms or agencies. Comprehensive written report required.

BUS-A 424 Auditing (3 cr.) P: A312. This course provides students with an understanding of (1) the auditing environment and professional ethics, (2) audit reports and the conditions under which alternatives are used, (3) basic auditing concepts, (4) audit evidence and documentation, (5) analytical reviews, (6) the audit risk model, (7) review and documentation of internal controls, (8) audits of cycles, (9) statistical sampling, and (10) audit objectives and audit procedures for mechanized systems. Emphasis is on the conceptual development of the subject matter, the nature of professional practice, and the technology of auditing.

BUS-A 437 Advanced Managerial Accounting (3 cr.) P: BUS A325. Objective of course is to provide students with advanced managerial accounting knowledge and skills. Emphasis is on strategic decision making and management control systems. Students will provide case analyses and presentations.

BUS-A 490 Independent Study in Accounting (1-3 cr.) P: consent of undergraduate program chairperson and instructor. Supervised individual study and research in student's special field of interest. The student will propose the investigation desired and, in conjunction with the instructor, develop the scope of work to be completed. Written report required.

BUS-D 301 The International Business Environment (3 cr.) P: BUS W200, ECON E201 and E202. Economic environment for overseas operations. Governmental policies and programs that affect international business. Economic and political philosophies around the world; patterns of government-business relationships. Economic development and business activities in differing political and cultural environments.

BUS-D 302 International Business: Operation of International Enterprises (3 cr.) P: BUS D301. International dimensions of marketing, finance, accounting, taxation, and personnel, with an emphasis on management decisions and implementation. Analytical framework for decision making in a multinational context.

BUS-F 255 Business - Variable Title (1-3 cr.) Course is designed to assist students in successfully managing their personal finances through the development of skills and competencies that will enable the student to make good financial decisions. Topics include the four categories of money, personal financial statements, money management tools, and understanding credit.

BUS-F 260 Personal Finance (3 cr.) Financial problems encountered in managing

individual affairs, family budgeting, installment buying, insurance, home ownership, and investing in securities.

BUS-F 301 Financial Management (3 cr.) P: BUS A202, BUS W200, ECON E280. Broad survey of finance for all business students. Provides a conceptual framework of a firm's investment, financing, and dividend decisions; includes working capital management, capital budgeting, and capital structure strategies.

BUS-F 303 Intermediate Investments (3 cr.) P: BUS F301. Provides a rigorous treatment of the core concepts of investments for finance majors. Covers equity securities, fixed income securities, derivative securities, and international investments. Makes extensive use of spreadsheet modeling to implement financial models. Serves as a foundation for all 400-level finance electives.

BUS-F 305 Intermediate Corporate Finance (3 cr.) P: BUS F301. Part of the finance core. Provides a rigorous treatment of the fundamental concepts of corporate finance for finance majors. Covers capital budgeting, the valuation of firms, and capital structure and payout policies. Serves as a foundation for all 400-level finance electives.

BUS-F 420 Equity and Fixed Income Investments (3 cr.) P: BUS-F301 A detailed examination of the management of equity and fixed income investments. The analysis of individual securities, the formation of these securities into portfolios, and the use of derivative securities to modify the return/risk profiles of more traditional stock and bond portfolios will be discussed.

BUS-F 421 Derivative Securities and Corporate Risk Management (3 cr.) P: BUS-F301 Advanced treatment of options, futures, and other derivative securities. Detailed description of the entire spectrum of derivative products. Theoretical and numerical valuation of derivative securities. How corporate risk managers use derivatives to hedge exchange rate risk, interest rate risk, commodity risk, credit risk, etc.

BUS-F 446 Bank and Financial Intermediation (3 cr.) P: BUS F305. The main topics are: (1) the economic role of financial intermediaries, with an emphasis on commercial banks; (2) the evolution of markets in which banks and other financial intermediaries operate; and (3) the regulation of commercial banks and other financial institutions.

BUS-F 490 Independent Study in Finance (1-3 cr.) P: consent of undergraduate program chairperson and instructor. Supervised individual study and research in student's special field of interest. The student will propose the investigation desired and, in conjunction with the instructor, develop the scope of work to be completed. Written report required.

BUS-F 494 International Finance (3 cr.) P: BUS D301, BUS F301. A study of the international financial markets in which firms operate and of financial management in an international environment. Topics include exchange rates, international arbitrage, exchange rate risk management, international financing and diversification, and multinational capital budgeting.

BUS-J 401 Administrative Policy (3 cr.) P: BUS X390, senior standing. Administration of business organizations: policy formulation, organization, methods, and executive control.

BUS-J 404 Administrative Policy (3 cr.) P: BUS-Z 302, senior standing. Examines major ethical theories as a basis for analyzing ethical behavior in the business environment. Investigates such issues as economic competition, discriminatory practices, manipulation of power, environmental conservation, and organizational cultures.

BUS-L 203 Commercial Law I (3 cr.) The purpose of this course is to examine the legal framework for business activity and to explore how to manage that framework in a rapidly changing legal environment. The areas of the law studied include contracts, torts,

employment law, intellectual property, forms of business enterprises, and the legal regulation of business competition. Credit is not given for both L201 and L203.

BUS-M 300 Introduction to Marketing (3 cr.) P: 26 credit hours. Examination of the market economy and marketing institutions in the United States. Decision making and planning from the manager's point of view; impact of marketing actions from the consumer's point of view. No credit toward a degree in business.

BUS-M 301 Introduction to Marketing Management (3 cr.) P: BUS W200 and ENG W231. Marketing planning and decision making examined from firm's and consumer's points of view; marketing concept and its company-wide implications and integration of marketing with other functions. Market structure and behavior and their relationship to marketing strategy and implementation.

BUS-M 303 Marketing Research (3 cr.) P: M301. Focuses on the role of research in marketing decision making. Defining research objectives, syndicated and secondary data sources of marketing information, exploratory research methods, survey research design, experimental design, and data analysis.

BUS-M 345 Introducation to Franchising (3 cr.) P: BUS-M 301 Introductory course in franchising. Investigates strategic and operational decisions made by franchise system management and franchisees. Draws on and integrates business courses previously taken.

BUS-M 401 International Marketing (3 cr.) P: BUS M301. Covers world markets, their respective consumers, and their political/economic marketing environments. Examines the marketing issues required to meet the product, promotion, price, and distribution demands of a world market. Although the course has a global orientation, issues specific to exporting are discussed.

BUS-M 405 Buyer Behavior (3 cr.) P: BUS M301. Description and explanation of consumer behavior. Demographic, socioeconomic, psychographic, attitudinal, and group influences on consumer decision-making. Applications to promotion, product design, distribution, pricing, and segmentation strategies.

BUS-M 415 Advertising and Promotion Management (3 cr.) P: BUS M301. Basic advertising and sales-promotion concepts. The design, management, and integration of a firm's promotional strategy. Public policy aspects and the role of advertising in marketing communications in different cultures.

BUS-M 419 Retail Management (3 cr.) P: BUS M301. Major management problems in retail institutions. Treatment of retail/marketing strategy design and problems related to financial requirements, buying, inventory, pricing, promotion, merchandising, physical facilities, location, and personnel.

BUS-M 421 Supply Chain Management (3 cr.) P: BUS-P 301 Focuses upon the material planning and execution systems used to manage the flow of material in the distribution and manufacturing stages of the supply chain. Topics include computer/software systems for demand management and forecasting techniques; inventory control systems for distribution channels; materials and capacity requirements; planning systems in manufacturing; and scheduling and order dispatching systems.

BUS-M 426 Sales Management (3 cr.) P: BUS M301 Emphasizes the activities and problems of field sales management. Includes organizing the sales force, recruiting, training, compensation, motivation, sales techniques, forecasting, territory design, evaluation, and control. Lectures and case studies.

BUS-M 450 Marketing Strategy (3 cr.) P: M303, P or C: BUS M405. Ideally taken in the student's last semester. Capstone course for marketing majors. Draws on and integrates courses previously taken. Focuses on decision problems in marketing strategy and policy design, as well as and application of analytical tools for marketing and decision making.

BUS-M 490 Independent Study in Marketing (1-3 cr.) P: consent of undergraduate program chairperson and instructor. Supervised individual study and research in student's special field of interest. The student will propose the investigation desired and, in conjunction with the instructor, develop the scope of work to be completed. Written report required.

BUS-P 301 Operations Management (3 cr.) P: BUS W200 and ECON E281. Examines how a firm produces and delivers its goods and services, with consistent and acceptable levels of quality, in a cost-effective manner. The discussion covers a wide range of interrelated issues including quality and process improvement, forecasting, planning, resource management, customer service, scheduling, and layout and process design. A semester-long team project is the primary activity used to integrate the three core courses.

BUS-W 200 Business Management (3 cr.) P: BUS-X 100 Business administration and management from the standpoint of a business firm operating in the contemporary economic, political, and social environment.

BUS-W 311 New Venture Creation (3 cr.) P: F301, M301, and P301. Primarily for those interested in creating a new business venture or acquiring an existing business. Covers such areas as choice of a legal form, problems of the closely held firm, sources of funds, preparation of a business plan, and negotiating.

BUS-W 430 Organizations and Organizational Change (3 cr.) P: BUS Z302 Analysis and development of organizational theories, with emphasis on environmental dependencies, sociotechnical systems, structural design, and control of the performance of complex systems. Issues in organizational change, such as appropriateness of intervention strategies and techniques, barriers to change, organizational analysis, and evaluation of formal change programs.

BUS-W 490 Independent Study in Business Administration (1-3 cr.) P: consent of undergraduate program chairperson and instructor. Supervised individual study and research in student's special field of interest. The student will propose the investigation desired and, in conjunction with the instructor, develop the scope of work to be completed. Comprehensive written report required.

BUS-X 100 Business Administration: Introduction (3 cr.) Business administration from the standpoint of the manager of a business firm operating in the contemporary economic, political, and social environment.

BUS-X 103 Business Learning Community (1 cr.) This course is designed to assist students to be successful at the university and to develop skills and competencies that will enable them to perform well in courses offered by the Kelley School of Business. Each learning community has an instructional team that is led by a faculty member and includes a student mentor, an academic advisor, and a librarian. The instructional team structures the learning environment to provide participants with as much academic support as possible.

BUS-X 203 Independent Study in Community Service Learning (1-3 cr.) P: sophomore standing. Authorization required. Independent study course for students intending to apply to the Kelley School of Business and who have 26 or more credit hours. Students will participate in an online library research program, survey and analyze written works on business ethics and societal responsibility, and participate in a group social learning project that involves multiple visits to elementary schools.

BUS-X 390 Integrative Experience (1 cr.) P: P: BUS-F301, BUS-M301, and BUS-P301 Integrative Experience is a unique learning experience that integrates knowledge and skills from three critical functions of the business enterprise: finance, marketing and operations. Managers of firms and organizations big and small need to understand the interrelated

dynamics of all three functions in order to be successful, highly valued managers (and for their firms to be successful, highly valued enterprises). An integrated business simulation is the primary tool used to analyze, integrate, and synthesize the management of a business in a team environment.

BUS-X 405 Topical Explorations in Business (1-3 cr.) Specific topic to be announced as the course is offered.

BUS-X 483 Undergraduate Internship in Business (1-6 cr.) Professional practice internship focused on one or more business concentration areas. Application filed through the coordinator of internships. Students receive work experience in cooperating firms or agencies. Comprehensive written reports required. Permission required.

BUS-Z 302 Managing and Behavior in Organizations (3 cr.) P: BUS W200. Integration of behavior and organizational theories. Application of concepts and theories toward improving individual, group, and organizational performance. Builds from a behavioral foundation toward an understanding of managerial processes.

BUS-Z 440 Personnel-Human Resource Management (3 cr.) P: BUS-Z 302 Nature of human resource development and utilization in American society and organizations, government programs and policies, labor force statistics, organizational personnel departments, personnel planning, forecasting, selection, training, and development. Integration of government and organizational human resource programs.

BUS-Z 443 Developing Employee Skills (3 cr.) P: or C: BUS Z440 Focuses on skills that relate to the acquisition and/or identification of knowledge, skills, and abilities among job applicants or current employees. Students will learn how to identify individuals who currently possess the knowledge, skills, and abilities (KSA) required to be effective members of contemporary organizations and how to identify specific training needs and formulate and implement programs designed to address observed KSA deficiencies.

BUS-Z 447 Business - Variable Title (3 cr.) P: BUS-Z 302 In this course, students develop a "toolkit" of leadership behaviors to use in a variety of situations, when those working with and/or for them need to be motivated toward a common good, particularly when that work involves the use of teams made up of diverse individuals.

Business - Graduate

BUCO-A 501 Intro to Financial Accounting (1 cr.) [S/F grading approved but has always been graded here] Develops concepts and procedures essential for the preparation and interpretation of general purpose financial statements directed to users external to the enterprise. Critical analysis of contemporary financial accounting and reporting issues.

BUCO-A 524 Managing Accounting Information for Decision-Making (3 cr.) P: A201 or equivalent. Provides a user-oriented understanding of how accounting information should be managed to ensure its availability on a timely and relevant basis for decision making. Focus is on cost-benefit analysis for evaluating potential value-added results from planning, organizing, and controlling a firm's accounting information. Group participation and computer support is used extensively.

BUCO-D 594 International Competitive Strategy (3 cr.) This capstone course seeks to develop an understanding of the contemporary challenges and opportunities associated with developing global strategies. In light of recent developments in the global marketplace, old ideas about competitive strategy and implementation have become largely obsolete. Through a study of competitive industry analysis, competitor analysis and cooperative alliance analysis, we will gain a grasp of the basic principles that are necessary in thinking about competing in a global business environment.

BUCO-D 595 International Management (3 cr.) This course focuses on developing skills in managing international alliances. Alliances, both domestic and international, are

increasingly becoming central to a firm's competitive strategy and thus demands executives who can strategically find partners, negotiate strategic alliances, and work with them to create value. The course may also cover a wide range of joint ventures and strategic alliances including purely domestic arrangements.

BUCO-F 523 Financial Management (3 cr.) Provides a working knowledge of the tools and analytical conventions used in the practice of corporate finance; establishes an understanding of the basic elements of financial theory to be used in application of analytical reasoning to business problems; and explores the interrelationship among corporate policies and decisions. Course work will include weekly problem sets, and use of PC spreadsheets to develop financial models for cases focusing on funds requirement.

BUCO-F 570 International Financial Markets (3 cr.) P: F 523. This course examines the international financial markets in which firms and investors operate and discusses how to assess the opportunities and risks of those markets. Topics to be discussed include balance of payments, international arbitrage relationships, exchange rate determination, currency crises, and international asset diversification.

BUCO-G 511 Microeconomics for Managers (3 cr.) Economic decision making in the business firm, the strategic interaction of business firms in industries, the purchasing and consumption behavior of individual consumers and consumers as a group, and the influence of public policy on market outcomes. Development of a fluency with the language of economics and a strong economic intuition, understanding of selected economics-based decision-making tools and the impact and interaction of the structure of an industry on competition, analysis of intra-industry rivalry, and improved understanding of public policy issues. Emphasis on the logical foundations of economic analysis and managerial decision-making. Will promote understanding and application of various quantitative measures.

BUCO-G 512 Macroeconomics for Managers (1.5 cr.) This course develops a framework to analyze the external economic environment and to understand the major factors that cause macroeconomic change. The effects of monetary, fiscal and trade policies in the U.S. will be examined with an awareness of the interdependency between world economies. Emphasis will be placed on integrating the implications of macroeconomic policy to the firm's capital decisions. Will promote the understanding and application of various quantitative measures.

BUCO-G 595 Country Analysis and International Management (1.5 cr.) P: G512. More and more business is conducted outside of the United States. To assess opportunity in a foreign country, managers must have tools to forecast a country's political and economic performance. This course employs a case method curriculum that endows students with knowledge on how to measure national performance, identify a nation's economic policy strategy, and explain the logic of a strategy in terms of cultural and institutional context. Concepts from political economy and economic growth theory are blended to yield general insights that a manager can apply in analysis of any country. Foreign direct investment, economic reform and planning, regulation of market activity, and political risk are specific topics of focus. Countries of study include China, Japan, India, and Russia. Students leave the course with appreciation of different ways to define and achieve national prosperity.

BUCO-J 501 Developing Strategic Capabilities (3 cr.) Offers an introduction to tools for strategic management. Provides an introductory view of the complexities involved in determining long-term strategies. Examines the dynamics of the competitive environment, how the pace and the direction of industry change are influenced by the resources, capabilities and competitive interactions of rival firms.

BUCO-J 506 Leadership and Ethics (3 cr.) P: J501. Modern businesses operate in an increasingly interdependent and dynamic environment. The modern, large firm is the major institution in most contemporary industrialized societies. Many actions of firms have

major impacts on society as a whole, as well as on specific stakeholders. Corporate actions are increasingly subject to media, public and government scrutiny. The nature of the constantly changing relationship between business and its major constituencies is the focus of the course. The ethical, political, economic, social, and technological considerations of various managerial decisions are investigated. The role of ethical leadership and how it relates to corporate purpose and responsibility will be a major theme of this course.

BUCO-K 501 Intro to Stat Theory in Economics (1 cr.) [S/F grading approved but has always been graded here] Fulfills the statistics prerequisite for entering MBA students. A pass-fail, self-paced review covering the proper use and interpretation of essential statistical techniques in business situations. Provides a working knowledge of probability, quality control procedures, and regression analysis, with emphasis on solving problems using Microsoft Excel. This course will use Excel and assumes you have had some exposure to elementary statistics such as means (averages) and histograms. It also assumes you already know the basics of Microsoft Excel: how to select ranges, enter formulas and sort data.

BUCO-L 512 Law and Ethics in Business (3 cr.) The objective is to provide the student of management with that knowledge of the American legal system, its processes, and the substantive law itself by which is necessary to the making of informed and effective business decisions. Because the law develops and evolves in response to changing social, economic, political, and technological forces, and because business decisions often carry long-lasting as well as delayed effects, this course will emphasize the study of legal change. It is hoped that consideration of past legal developments will give prospective managers sufficient insight into the dynamics of this process to enable them to predict as soundly as possible the future legal environment in which their present decisions will bear fruit.

BUCO-M 501 Strategic Marketing Management (3 cr.) An introduction to the process of creating a market-driven organization. Specific topics include marketing strategy, market research and analysis, and the development of products and services, pricing, distribution and promotion. The course employs lecture, classroom discussion, case analyses, and field research projects.

BUCO-M 594 Global Marketing (3 cr.) This course emphasizes principles and practices of marketing in the contemporary global environment. The material covers both US and foreign companies doing business in various countries around the world. Students gain understanding of similarities and differences in the external marketing environment, different types of risks and challenges in doing business internationally, and the implications of all these factors for developing marketing strategies.

BUCO-P 501 Operations Management (3 cr.) Surveys the management of operations in manufacturing and service firms. Diverse activities determining the size and type of production process, purchasing the appropriate raw materials, planning and scheduling the flow of materials and the nature and content of inventories, assuring product quality, and deciding on the production hardware and how it gets used comprise this function of the company. Managing operations well requires both strategic and tactical skills. The topics considered include process analysis, workforce issues, materials management, quality and productivity, technology, and strategic planning, together with relevant analytical techniques. The course makes considerable use of business cases. Most classes will be spent discussing the cases assigned. For each case, students will be asked to review actual company situations and apply technical and managerial skills to recommend courses of action. Most cases will be taken from manufacturing, but some will be service-oriented. Several of the cases will focus on international companies or issues.

BUCO-S 555 Information Technology for Managers (3 cr.) Focuses on information technology (IT) management issues and applications. Topics include alternative types of

applications, methodologies for developing and purchasing systems, managing the technical and social aspects of IT implementation, and using IT to enable new business strategies. Case studies will be used to illustrate IT management principles and current best practices.

BUCO-W 511 Venture Strategy (1.5 cr.) This course is designed for those individuals interested in creating a new business venture, acquiring an existing business, working in industries that serve the entrepreneur, or students wishing to familiarize themselves with concepts, issues, and techniques of new venture creation and entrepreneurship. There is also a strong focus on entrepreneurship, or innovation within a corporate environment. Because the sources of entrepreneurial and entrepreneurial motivation are often quite diverse, the learning goals and objectives of the students in this course are often similarly diverse. Therefore, the course is designed to offer a broad range of educational experiences, including case analyses, presenting and negotiating a financial deal, and creating a business plan or corporate change initiative.

BUCO-W 516 Organizational Development and Change (3 cr.) Today's business environment forces executives to use every tool at their disposal to create and maintain an effective and adaptable organization. A major source of effectiveness and adaptability is the way in which the company's efforts are organized its systems, structures, management processes, rewards, and strategies. The primary job of senior management today is to design, build, and operate organizations that function effectively. With these needs in mind, W516 helps students to: (1) understand the basic components of an organization and how they interrelate as a system, (2) learn tools for diagnosing organizational performance problems, and (3) practice applying organization design concepts to solve performance problems.

BUCO-X 511 Seminar in Management Issues (1.5 cr.) In this course MBA students use a variety of human resources tools for self-assessment and working with others as the first step in the Program's focus on individual professional development.

BUCO-X 551 Career Management (1.5 cr.) This course is designed to provide MBAs with the skills to successfully manage career development and is required to participate in graduate career services. Includes mock consulting situations.

BUCO-X 574 Special Topics: NFP Team Project (1.5 cr.) This course allows MBA students to work in teams addressing strategic level projects in not-for-profit organizations in the region.

BUCO-Z 511 Human Resource Management (1.5 cr.) Human Resource Management addresses strategies and issues including staffing, negotiations and conflict management, gender and diversity labor/management relations, occupational safety and health, training and development and management of change.

Education

EDUC-E 201 Multicultural Education and Global Awareness (3 cr.) This course examines educators' and students' responsibility (ies) in a complex and interdependent world. Students will be guided to develop the skills, knowledge, and attitudes needed to live effectively in a world of limited resources, ethnic diversity, and cultural pluralism. Taught as a writing intensive course at IUPUI.

EDUC-E 323 Social Studies and Science for Elementary School I (3 cr.) C: EDUC-E 345, EDUC-M 300, EDUC-M 301, EDUC-M 304 This is a hands-on, minds-on inquiry course that integrates Social and Natural Science content and pedagogy for K-2 learners. Candidates will participate in lectures, small and large group works as well as field based experiences with young learners. Assessment will be based on projects designed to demonstrate candidate growth toward the ability to plan, design, deliver, and assess thematic learning experiences. P: In order to enroll in this course, students must be

admitted to the Elementary Education program at IUPUC and receive authorization from the Division.

EDUC-E 325 Social Studies in the Elementary Schools (3 cr.) Emphasizes the development of objectives, teaching strategies, and evaluation procedures that facilitate the social learning of young children. Special attention given to concept learning, inquiry, decision making, and value analysis.

EDUC-E 328 Science in the Elementary Schools (3 cr.) The focus of this course will be on developing teacher competencies in writing performance objectives, question-asking, evaluating, and sequencing. These competencies will reveal themselves in the preparation and development of science activities and the teaching strategies involved in presenting those activities to elementary school children.

EDUC-E 340 Methods of Teaching Reading I (2-3 cr.) Describes the methods, materials, and techniques employed in elementary school developmental reading programs.

EDUC-E 341 Methods of Teaching Reading II (2-3 cr.) P: E339 and E340. Describes the methods, materials, and techniques employed in diagnosis and corrective instruction in elementary school reading programs.

EDUC-E 343 Math in the Elementary Schools (3 cr.) B-I Emphasizes the developmental nature of the arithmetic process and its place as an effective tool in the experiences of the elementary school child.

EDUC-E 345 Language Arts and Mathematics for Young Children (6 cr.) Methods of developing language, cognition, reading and mathematical readiness; mathematical thinking through play, the arts, and directed experiences; design of curriculum and appropriate teaching strategies for young children.

EDUC-E 449 Trade Books and the Classroom Teacher (3 cr.) Emphasizes the use of trade books in language and reading in elementary classrooms.

EDUC-E 490 Research in Elementary Education (1-3 cr.) B-I Individual research.

EDUC-F 110 Windows on Education (2-3 cr.) First year seminar to support incoming freshmen interested in teaching as a career. The course will facilitate students' efforts to navigate university life while making an informed decision regarding career choices. The F110 will serve as the First Year Seminar that may be linked to EDUC F200: Examining Self as a Teacher.

EDUC-F 200 Examining Self as a Teacher (3 cr.) Designed to help a student make a career decision, better conceptualize the kind of teacher the student wishes to become, and reconcile any preliminary concerns that may be hampering a personal examination of self as teacher. Students will design a major portion of their work.

EDUC-F 401 Topical Exploration in Education (0-3 cr.) Explores various topics of relevance to education, both in the United States and abroad.

EDUC-H 340 Education and American Culture (3 cr.) The present educational system: its social impact and future implications viewed in historical, philosophical, and sociological perspective.

EDUC-H 341 American Culture and Education (3 cr.) An opportunity to participate in a cooperative learning venture, as students investigate the sociological, psychological, historical, and philosophical foundations of American education, relating findings, observations, and experiences at professional development school sites with current practices and the future of education.

EDUC-K 307 Methods for Teaching Students with Special Needs (3 cr.) This course

prepares future teachers to work with students with diverse abilities in inclusive settings. Participants learn to use learning modalities, varied rates and complexity of instruction, and making use of individual interests and preferences. Additionally, differentiating and/or individualizing instruction for all learners and developing classroom management skills are emphasized.

EDUC-K 490 Research in Special Education (1-3 cr.) B-I Individual research and study in special education.

EDUC-K 500 Topical Workshop (1-3 cr.) P: Consent of instructor. Intensive study of such selected topics as language development for exceptional children, the disadvantaged child, and behavior modification for exceptional children. May be repeated.

EDUC-K 548 FAMILIES, SCHOOL & SOCIETY (- cr.) The course focuses on the family as a system and discusses the impact of disabilities on the daily lives of family members. Historical, legal and ethical perspectives on family involvement and empowerment are explored. Approaches for providing services to families with members who are developmentally disabled, chronically ill, at risk or who have other types of impairments also are presented.

EDUC-L 400 Instructional Issues in Language Education (3 cr.) Reviews the principles and current instructional issues related to learning a first or a second language. Besides the general issues of effects of the environment, developmental stages, and basic instructional methodologies, relationships among reading education, English education, and second language education will be explored.

EDUC-L 436 Methods and Materials for Teaching ESL (3 cr.) Permission from Division of Education English as a Second/New Language teachers need to know how to design instruction and prepare relevant and interesting materials. This course aims to enhance participants' understanding and grasp of theoretical principles underlying the development of curricula as well as choice and development of teaching materials for ESL courses. Through readings, discussions, and projects, students will be exposed to, reflect upon, and learn about issues of needs analysis, program/course/syllabus design, and materials development. The course will specifically explore such issues as conducting a needs analysis; determining teaching goals and objectives; and evaluating, selecting, adapting, and developing teaching materials in the context of Standards for Effective Pedagogy (from CREDE—Center for Research on Education, Diversity & Excellence). P: In order to enroll in this course, students must be granted permission from the Division of Education.

EDUC-L 436 Methods and Materials for Teaching ESL (3 cr.) English as a Second/New Language teachers need to know how to design instruction and prepare relevant and interesting materials. This course aims to enhance participants' understanding and grasp of theoretical principles underlying the development of curricula as well as choice and development of teaching materials for ESL courses. Through readings, discussions, and projects, students will be exposed to, reflect upon, and learn about issues of needs analysis, program/course/syllabus design, and materials development. The course will specifically explore such issues as conducting a needs analysis; determining teaching goals and objectives; and evaluating, selecting, adapting, and developing teaching materials in the context of Standards for Effective Pedagogy (from CREDE—Center for Research on Education, Diversity & Excellence). P: In order to enroll in this course, students must be granted permission from the Division of Education.

EDUC-L 441 Bilingual Education: Introduction (3 cr.) Introduction to the development of bilingual/ bicultural education in the United States and its antecedents, rationale, and theories. Comparison of existing bilingual/bicultural programs.

EDUC-L 442 Methods for Bilingual Teaching (3 cr.) P: L441. Methods of teaching the content areas in a bilingual setting, including techniques of linguistic analysis.

EDUC-M 300 Teaching in Pluralistic Society (0-3 cr.) This course is designed to introduce students to teaching as a profession. Students focus upon the "self as teacher," learning styles, cultural pluralism, and classroom teaching strategies that respond positively to the personal and ethnic diversity of the learner.

EDUC-M 303 Laboratory/Field Experiences: Junior High/Middle School (0-3 cr.) B-I Laboratory or field experiences at the junior high or middle school level. (May be repeated.) Corequisite with M314, M330, or M336. Grade: S or F.

EDUC-M 304 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 305 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 306 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 307 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 320 Diversity and Learning: Teaching Every Child (6 cr.) This course integrates information from educational psychology and multicultural and special education to prepare students to teach children in their early childhood and middle childhood years. The content includes childhood development, learning theory, motivation, and assessment. Students reflect critically on personal assumptions and develop attitudes and beliefs supportive of multicultural education and inclusion.

EDUC-M 324 Teaching About the Arts (1-3 cr.) Introduction to the importance of the arts in elementary school curriculum. Students are given a foundation of methods and materials in art and music that will enable them to integrate the arts into the general curriculum, supplement art lessons given by school art specialists, and encourage student discussion and understanding of art and music in the world today.

EDUC-M 425 Student Teaching: Elementary (1-16 cr.) Full-time supervised student teaching in grades 1-6 for a minimum of 10 weeks in an elementary school accredited by the state of Indiana or an equivalent approved school out of state. The experience is directed by a qualified supervising teacher and has university-provided supervision. Grade: S or F.

EDUC-M 470 Practicum (3-8 cr.) Instructional experience under the direction of an identified supervising teacher, with university-provided supervision in the endorsement or minor area, and at the level appropriate to the area, and in an accredited school within the state of Indiana unless the integral program includes experience in an approved and accredited out-of-state site. The practicum may be full- or part time, but in every instance the amount of credit granted will be commensurate with the amount of time spent in the instructional setting. Grade: S or F.

EDUC-N 102 Teaching and Learning Elementary School Mathematics I (3 cr.) Helps preservice teachers develop an understanding of the mathematics content and pedagogy relevant for a successful elementary school teacher. Focus is on content and methods that are consistent with recent recommendations about mathematics learning and teaching, and the state of Indiana academic standards. Pedagogical methods address number theory, data and chance, and algebraic thinking.

EDUC-P 251 251 Educational Psychology for Elementary Teachers (1-4 cr.) The application of psychological concepts to school learning and teaching using the perspective of development from childhood through preadolescence. Special attention is devoted to the needs of the handicapped.

EDUC-Q 200 Introduction to Scientific Inquiry (1-3 cr.) Provides the elementary education major with background in the science process skills needed to complete required science courses.

EDUC-W 200 Microcomputing for Education: An Introduction (3 cr.) Introduction to instructional computing, educational computing literature, and BASIC programming. Review of and hands-on experience with educational software packages and commonly used microcomputer hardware. (Fall, Spring, Summer I)

EDUC-W 204 Programming for Microcomputers in Education (3 cr.) Develops programming skills necessary for using a computer and for understanding computer programming as it applies to teaching. Not offered for credit if W 201 or W 202 has been taken.

EDUC-W 210 Survey of Computer-Based Education (3 cr.) P: admission to the Teacher Education Program Students will continue their study of BASIC to achieve facility at the intermediate level. In addition, students will study the history, ethics, and economics of computer hardware as it applies to educational computing, as well as the software available to educators. (Fall)

EDUC-W 220 Technical Issues in Computer-Based Education (2 cr.) P: admission to the Teacher Education Program This course will provide a solid conceptual base for future hardware / software design, development, and evaluation decisions related to instructional applications within school-based environments. The concepts will include computer systems, computer-based instructional techniques (general), hardware systems, software design, and technological innovations. (Summer I)

EDUC-W 301 Integrating Technology into Teaching Part I (3 cr.) P: EDUC-W 201. Provides students with skills and experiences that allow for effective and appropriate integration of technology into teaching and learning activities. Focus will be on reviewing current models of effective technology integration, surveying available technology in schools, and developing classroom lessons and activities.

EDUC-W 310 Computer-Based Teaching Methods (3 cr.) P: admission to the Teacher Education Program Students will study the methods of teaching programming, application of pedagogical and technical principles of software design, software evaluation, and staff development techniques in the area of computer-based education. (Spring)

EDUC-W 401 Integrating Technology into Teaching Part II (3 cr.) P: EDUC-W 201 and W 301. Provides students with skills and experiences that allow for effective and appropriate integration of technology into teaching and learning activities. Students will have the opportunity to implement and evaluate a technology-integrated classroom activity in an advanced field experience.

EDUC-W 410 Practicum in Computer-Based Education (6 cr.) P: admission to the Teacher Education Program Either six weeks of full-time fieldwork or 12 weeks of half-time fieldwork in an educational setting that incorporates instructional computing. (Fall, Spring)

EDUC-W 505 PROF DEVELOPMENT WORKSHOP (- cr.) Basic special education principles for graduate students with no previous course work in special education. Students cannot receive credit for both K205 and K505.

EDUC-X 425 Practicum in Reading (3 cr.) P: admission to the Teacher Education Program, EDUC-X 400 and EDUC-M 464 or EDUC-E 340 and EDUC-E 341 or consent of instructor Students work in selected elementary and secondary classrooms diagnosing and assisting pupils in the area of reading. This experience will always include a series of seminars in conjunction with the field placement. Grades S or F. (As needed)

EDUC-X 470 Psycholinguistics of Reading (3 cr.) P: admission to the Teacher Education Program Explores the linguistic and cognitive dimensions of language. Discusses

relationships among the systems of language and among the various expressions of language. Always includes topics on semantics, grammar, and dialect. (Spring)

Engineering and Technology

ENGR 19500 FIRST-YEAR ENGINEERNG PROJECTS (3 cr.) Selected topics in general or interdisciplinary engineering.

ENGR 19600 Introduction to Engineering (3 cr.) Class 2, Lab 2. C: MATH 15400 or 15900 or equivalent. An overview of the engineering profession and methodologies of engineering design. Students develop skills using computer-aided design and simulation software for engineering systems. Projects and homework are implemented and tested in a laboratory environment. The course also introduces the students to standard computer application software and university network and software resources.

ENGR 19700 Introduction to Programming Concepts (3 cr.) C: MATH 16500. Class1, Lab 2. Basic concepts and applications of software programming for solving engineering problems. Topics include techniques for developing structured algorithms, data input and output, conditional statements, loops, recursion, functions, arrays, and elementary concepts in mathematical programming. Examples, homework, and applications of programming concepts make extensive use of the C programming language.

TECH 19900 SPECIAL TOPICS IN TECHNOLOGY (1-3 cr.) C: MATH 16500. Special topics in Technology; subject matter to be arranged.

OLS 25200 HUMAN BEHAVR IN ORGANIZATIONS (3 cr.) Class 3. Study of individual and group behavior in organizations. Special emphasis on typical supervisory relationships.

ME 26200 MECHANICAL DESIGN I (3 cr.) The basic concepts of mechanical design are introduced with emphasis on use of computer-aided design techniques. Applications are chosen from the area of linkage and mechanism design. Lab involves implementation of computer techniques in solving mechanical design problems.

ME 27000 BASIC MECHANICS 1 (3 cr.) Fundamental concepts of mechanics, force systems and couples, free body diagrams, and equilibrium of particles and rigid bodies. Distributed forces; centroids and centers of gravity of lines, areas, and volumes. Second moment of area, volumes, and masses. Principal axes and principal moments of inertia. Friction and the laws of dry friction. Application to structures and machine elements, such as bars, beams, trusses, and friction devices.

ME 27400 BASIC MECHANICS 2 (3 cr.) Kinematics of particles in rectilinear and curvilinear motion. Kinetics of particles, Newton's second law, energy, and momentum methods. Systems of particles, kinematics and plane motion of rigid bodies, forces and accelerations, energy and momentum methods. Kinetics, equations of motions, energy and momentum methods for rigid bodies in three-dimensional motion. Application to projectiles, gyroscopes, machine elements, and other engineering systems.

ENGR 29700 COMPUTER TOOLS FOR ENGINEERING (- cr.) C: MATH 16500. Class 1. Introduction to the use of Matlab for solving engineering problems. Topics include computational methods, data input and output, plotting and curvefittting, functions, conditional statements, loops, and introduction to Matlab toolboxes.

HIA-M 330 MEDICAL TERMINOLOGY (3 cr.) Understanding and use of the language of medicine including build, analyze, define, pronounce, and spell diagnostic terms that relate to the structure of the body systems. [vocabulary standards]

Liberal Arts

Anthropology

ANTH-A 103 Human Origins and Prehistory (3 cr.) A survey of human biological and cultural evolution from early pre-Pleistocene hominids through the development of urbanized state societies, with the goal of better understanding our human heritage. (Not open to students who have taken A303.)

ANTH-A 104 Introduction to Cultural Anthropology (3 cr.) A survey of cultural and social processes that influence human behavior, using comparative examples from different ethnic groups around the world, with the goal of better understanding the broad range of human behavioral potentials and those influences that shape the different expressions of these potentials. (Not open to students who have taken A304.)

ANTH-A 460 Topics in Anthropology: (variable title) (1-3 cr.) A conceptual examination of selected topics in the field of anthropology. May not be repeated for more than 6 credit hours.

ANTH-E 320 Indians of North America (3 cr.) An ethnographic survey of native North American culture areas and ethnic groups.

ANTH-E 354 African American Folklore/Folklife/Folk Music (3 cr.) African American culture in the United States viewed in terms of history and social change. Folklore, folk music, and oral history as means of illuminating black culture and history. May be repeated once when topics vary.

ANTH-E 455 Anthropology of Religion (3 cr.) Critical evaluation of current approaches to the analysis of religious myth, ritual, and symbolism. Problems in understanding religious beliefs of other cultures. Modern development of anthropology of religion.

ANTH-E 457 Ethnic Identity (3 cr.) A cross-cultural analysis of the nature of ethnic groups and identity, including the effects of colonialism and nationalism on ethnic groups, stereotyping groups, ethnic symbols and styles, and persistence and change in ethnicity.

ANTH-E 470 Psychological Anthropology (3 cr.) A cross-cultural examination of human behavior in its ethnic context, including selected topics such as socialization, sex roles, altered states of consciousness, and personality and sociocultural change.

ANTH-F 360 Indiana Folklore/Folklife/Folk Music (3 cr.) Survey of folklore, folklife, or folk music of Indiana with particular attention to the persistence into the present of preindustrial culture. Students are encouraged to do fieldwork in the state. May be repeated once when topics vary.

American Sign Language

ASL-A 131 Intensive Beginning American Sign Language (5 cr.) First course in the introductory sequence of language courses. Emphasis on develop-ing basic conversational skills as well as awareness of Deaf culture.

ASL-A 132 Intensive Beginning American Sign Language II (5 cr.) Second course in the introductory sequence of language courses. Emphasis on developing basic conversational skills as well as awareness of Deaf culture.

Communication

COMM-C 104 Voice and Diction (3 cr.) Directed primarily toward the improvement of normal speech patterns, with emphasis on normal production, resonation, and articulation.

COMM-C 180 Introduction to Interpersonal Communication (3 cr.) The study of human dyadic interaction, including topics such as perception processes, verbal/nonverbal communication, theoretical models of communication, conflict, and interpersonal communication in various relationships. Course covers applications of interpersonal

communication theory/research, including communication competence. PUL=5

COMM-C 223 Business and Professional Communication (3 cr.) Preparation and presentation of interviews, speeches, and oral reports appropriate to business and professional organizations; group discussion and parliamentary procedure. This is an intermediate skills course with survey characteristics. PUL=1A

COMM-C 228 Discussion and Group Methods (3 cr.) Theory of and practice in effective participation in and leadership of group, committee, conference, and public discussion; application to information-sharing and problem-solving situations.

COMM-C 322 Advanced Interpersonal Communication (3 cr.) P: C180 or permission of instructor. Covers core components of the study of interpersonal communication: perception, systems, exchange theoretical approaches; methods of research in interpersonal communication; content (topic) areas such as intimate relationships and friendships. Includes applications of interpersonal communication theory/research.

COMM-G 100 Introduction to Communication Studies (3 cr.) Survey course of history, theory, and practice in each of six major areas: rhetoric and public address, theatre arts, interpersonal/ organizational communication, small group dynamics, public communication, and mass media studies. For each of the areas examined, students will apply theory to practice, thereby learning to become more effective communicators. PUL=1A

COMM-G 300 Independent Study (1-8 cr.) Research or practical experience in various departmental areas as selected by the student prior to registration, outlined in consultation with the instructor, and approved by the department. If a practicum experience, it must represent a minimum of 45 clock hours of practical application per credit hour. A student shall take no more than a total of 9 credit hours of G300 and G491. PUL=4

COMM-G 310 Introduction to Communication Research (3 cr.) Methodologies and types of data analyses for investigating communication phenomena. Students will acquire knowledge and competencies that will allow them to understand and address the process of communication research and relevant communication research issues. PUL=1B

COMM-G 391 Seminar (1-3 cr.) P: permission of instructor. Topic announced in prior semester; oriented to current topics in communication and theatre; readings, projects, and papers as indicated by the topic and instructor. May be repeated for a total of 8 credit hours.

COMM-M 150 Mass Media and Contemporary Society (3 cr.) A critical overview of the role of electronic mass media in contemporary society. Provides an introduction to such issues as industry structure, organization, and economics; regulation, public interest, and media ethics; impact of programming on individuals; media construction of social institutions; media issues in the global village. PUL=2

COMM-R 110 Fundamentals of Speech Communication (3 cr.) Theory and practice of public speaking; training in thought processes necessary to organize speech content for informative and persuasive situations; application of language and delivery skills to specific audiences. A minimum of six speaking situations. PUL=1A

COMM-R 309 Great Speakers: American Public Address (3 cr.) Course introduces students to historical and contemporary public address. Students will study the speechmaking of notable American speakers. The study will include speeches from a wide range of established genres and will include campaign rhetoric, debates, historical celebrations, lectures, legislative speaking, presidential speaking, public meetings, movement, rhetoric, and sermons.

COMM-R 320 Advanced Public Communication (3 cr.) P: R110 or equivalent. Development of a marked degree of skill in preparation and delivery of various types of

speeches, with emphasis on depth of research, clarity of organization, application of proof, and felicitous style.

COMM-R 321 Persuasion (3 cr.) P: R110 or equivalent. Motivational appeals in influencing behavior; psychological factors in speaker-audience relation-ship; principles and practice of persuasive speaking.

COMM-T 337 History of the Theatre I (3 cr.) Significant factors in primary periods of theatre history through the Renaissance and the effect on contemporary theatre; emphasis on trends and developments; review of representative plays of each period to illustrate the theatrical use of dramatic literature.

COMM-T 337 History of the Theatre I (3 cr.) Significant factors in primary periods of theatre history through the Renaissance and the effect on contemporary theatre; emphasis on trends and developments; review of representative plays of each period to illustrate the theatrical use of dramatic literature.

Economics

ECON-E 201 Introduction to Microeconomics (3 cr.) E201 is a general introduction to microeconomic analysis. Discussed are the method of economics, scarcity of resources, the interaction of consumers and businesses in the market place in order to determine price, and how the market system places a value on factors of production.

ECON-E 202 Introduction to Macroeconomics (3 cr.) P: ECON E201. An introduction to macroeconomics that studies the economy as a whole; the levels of output, prices, and employment; how they are measured and how they can be changed; money and banking; international trade; and economic growth.

ECON-E 280 Applied Statistics for Business and Economics I (3 cr.) P: MATH M118 or M119 or 15300 or 16500 and BUS-K 201 or equivalent Excel skills. Summary measures of central tendency and variability. Basic concepts in probability and important probability distributions. Sampling, sampling distributions, and basic estimation concepts such as confidence interval, estimation, and hypothesis testing.

ECON-E 281 Applied Statistics for Business and Economics II (3 cr.) P: ECON-E 280 Balanced coverage of statistical concepts and methods, along with practical advice on their effective application to real-world problems. Topics include simple and multiple linear regression, time-series analysis, statistical process control and decision making.

English and Literature

ENG-E 450 Capstone Seminar (3 cr.) This senior capstone integrates student's undergraduate study through writing and reading projects, faculty and student presentations, and creation of capstone portfolios. Students apply linguistic, literary, and rhetorical knowledge in culminating projects and learning portfolios. The course looks back at accomplishments and forward to postgraduation planning.

EAP-G 013 Reading and Writing for Academic Purposes (3 cr.) This course is designed primarily for graduate ESL students. Its purpose is to develop reading comprehension skills through the use of academic subject area materials and to teach the writing skills necessary to complete academic work. Assignments are completed using materials from the students' academic disciplines.

EAP-G 20 COMM SKLS GRAD STDNTS & ITA'S (3 cr.) This course for graduate International Teaching Assistants provides instruction on basic teaching strategies and helps students develop the oral language skills necessary to present academic materials in English to a student audience. Pronunciation, listening comprehension, and classroom interaction skills are practiced. Regular conferences focus on individual pronunciation

needs. PUL=1A

ENG-G 205 INTRO TO THE ENGLISH LANGUAGE (3 cr.) This course is an introduction to how language, and English in particular, is structured, including soundS (phonetics and phonology), words (morphology), sentences (syntax) and meaning (semantics). Discussions focus on examples from everyday language and the application of these basic concepts to real world contexts, including language teaching and learning. PUL=2

ENG-L 115 Literature for Today (3 cr.) P: W131. Poems, dramas, and narratives pertinent to concerns of our times: e.g., works concerning values of the individual and society, problems of humanism in the modern world, and conflicts of freedom and order.

ENG-L 202 Literary Interpretation (3 cr.) Close analysis of representative texts (poetry, drama, fiction) designed to develop the art of lively, responsible reading through class discussion and writing of papers. Attention to literary design and critical method.

ENG-L 203 Introduction to Drama (3 cr.) Representative significant plays to acquaint students with characteristics of drama as a type of literature. Readings may include plays from several ages and countries.

ENG-L 204 Introduction to Fiction (3 cr.) Representative works of fiction; structural technique in the novel, theories and kinds of fiction, and thematic scope of the novel. Readings may include novels and short stories from several ages and countries.

ENG-L 205 Introduction to Poetry (3 cr.) Kinds, conventions, and elements of poetry in a selection of poems from several historical periods.

ENG-L 207 Women and Literature (3 cr.) Issues and approaches to critical study of women writers in British and American literature.

ENG-L 208 Topics in English and American Literature and Culture (3 cr.) Selected works of English and/or American literature in relation to a single cultural problem or theme. Topics vary from semester to semester. May be repeated once for credit.

ENG-L 351 Critical and Historical Study of American Literature I (3 cr.) American writers to 1865: Emerson, Hawthorne, Melville, Whitman, and two or three additional major writers.

ENG-L 352 Critical and Historical Study of American Literature II (3 cr.) American writers, 1865-1914: Twain, Dickinson, James, and two or three additional major writers.

ENG-L 354 Critical and Historical Study of American Literature III (3 cr.) Study of modernist and contemporary American writers in various genres, 1914 to the present, including Frost, Stein, and Faulkner.

ENG-L 376 Literature for Adolescents (3 cr.) An examination of the nature and scope of adolescent literature. Wide reading of contemporary literature, with emphasis on the value of selections for secondary school students and appropriate modes of study.

ENG-L 378 Studies in Women and Literature (3 cr.) British and American authors such as George Eliot or Gertrude Stein; groups of authors such as the Bronte sisters or recent women poets; or genres and modes such as autobiography, film, or criticism. Topics will vary by semester.

ENG-L 431 Topics in Literary Study (3 cr.) Study of characteristics and development of literary forms or modes (e.g., studies in narrative, studies in romanticism). Topics vary from year to year. May be repeated once for credit.

ENG-L 433 Conversations with Shakespeare (3 cr.) An interdisciplinary and intertextual study of Shakespeare's work and its influence to the present day. Students will compare Shakespeare texts with latter-day novels, plays, poems, and films that allude to or incorporate some aspect of Shakespeare's art.

ENG-W 130 Principles of Composition (3 cr.) Practice in writing papers for a variety of purposes and audiences, with attention to reading/writing connections.

ENG-W 131 Elementary Composition I (3 cr.) Fulfills the communications core requirement for all undergraduate students and provides instruction in exposition (the communication of ideas and information with clarity and brevity). The course emphasizes audience and purpose, revision, organization, development, advanced sentence structure, diction, and development within a collaborative classroom. Evaluation is based on portfolios of the student's work.

ENG-W 132 Elementary Composition II (3 cr.) P: W131 (with a grade of C or higher). Stresses argumentation and research concurrently, with a secondary emphasis on critical evaluation in both reading and writing. Evaluation is based on portfolios of the student's work.

ENG-W 140 ELEMENTARY COMPOSITION-HONORS (3 cr.) Offers an introductory writing course for advanced freshman writers. Requirements, including number and type of assignments, are parallel to W131. W140 offers greater intensity of discussion and response to writing. Evaluation is based on portfolios of the students' work. PUL=1A

ENG-W 206 Introduction to Creative Writing (3 cr.) An introduction to the techniques and principles of creative writing. Written assignments, independent work, and workshop discussions of the fundamentals of fiction, poetry, and drama. This course may be used as a prerequisite for all 300-level courses in creative writing.

ENG-W 208 Introduction to Poetry Writing (3 cr.) W208 offers students an introduction to the craft and practice of poetry writing: how to find subjects for writing; how to create images, similes, and metaphors; how to make rhyme sound natural; how to produce both metered and free-verse poetry. Part of the class will be a workshop in which students will learn to revise their poems and those of fellow students. This course can serve as a prerequisite for W303 or W305.

ENG-W 210 Literacy and Public Life (3 cr.) An introduction to the uses of literacy in public and civic discourse, with connections made to theories of writing and professional prospects for writers; serves as the required gateway course for the Concentration in Writing and Literacy and as an exploration of this concentration for other English majors and students considering the possibility of an English major.

ENG-W 231 Professional Writing Skills (3 cr.) P: W131 (with a grade of C or higher). Focuses on expository writing for the student whose career requires preparation of reports, proposals, and analytical papers. Emphasis on clear and direct objective writing and on investigation of an original topic written in report form, including a primary research project. Evaluation is based on student projects.

ENG-W 250 Writing in Context (1-3 cr.) Offers instruction in intermediate-level expository writing. Students study a contemporary issue and write papers on that issue. Topics will vary from year to year. May be repeated once for credit.

ENG-W 301 Writing Fiction (3 cr.) P: W206 or W207 or submission of acceptable manuscript to instructor in advance of registration. An intermediate course in the theory and practice of fiction writing with seminar study of relevant materials and criticism of student work in class and conference. May be repeated once for credit.

ENG-W 302 Screenwriting (3 cr.) P: W206 or W207, or permission of instructor. A practical course in basic techniques of writing for film and television. Covers the essentials of dramatic structure, story development, characterization and theme, scene construction, dialogue, and, briefly, the practicalities of working as a screenwriter today.

ENG-W 303 Writing Poetry (3 cr.) P: W206 or W208 or submission of acceptable manuscripts to instructor in advance of registration. An intermediate course in the theory

and practice of poetry writing with seminar study of relevant materials and criticism of student work in class and conference.

ENG-W 400 Issues in Teaching Writing (3 cr.) Focuses on the content of rhetoric and composition and considers fundamental theoretical and practical issues in the teaching of writing. Reviews rhetorical and compositional principles that influence writing instruction, textbook selection, and curriculum development.

ENG-W 403 ADVANCED POETRY WRITING (3 cr.) Study and practice in the writing of poetry. Analysis of examples from contemporary poets accompanies class criticism and discussion. PUL=1A; RISE-Experiential Learning

ENG-W 411 DIRECTED WRITING (3 cr.) Individual projects determined in consultation with instructor. Credit varies with scope of project. May be repeated once for credit. PUL=1A

Folklore

FOLK-F 101 Introduction to Folklore (3 cr.) A view of the main forms and varieties of folklore and folk expression in tales, ballads, gestures, beliefs, games, proverbs, riddles, and traditional arts and crafts. The role of folklore in the life of human beings.

FOLK-F 363 WOMEN'S FOLKLORE/FOLKLIFE/MUS (3 cr.) This course identifies key issues in women's folklore and examines the ways in which women have been represented in myths, legends, and folktales, past and present. The various ways in which visions of womanhood inform, reflect, and challenge gender roles will also be analyzed. PUL=3

FOLK-F 364 Children's Folklore/Folklife/Folk Music (3 cr.) The traditional rhymes, riddles, stories, games, folklife, or music associated with "the culture of childhood." The role these forms play in peer-group activity and in the social and cognitive development of the child. May be repeated once when topics vary.

Geography

GEOG-G 107 Physical Systems of the Environment (3 cr.) Physical environment as the home of humans, emphasizing the distribution and interaction of environmental variables (landforms, vegetation, soils, weather, and climate).

GEOG-G 110 Introduction to Human Geography (3 cr.) An introduction to the principles, concepts, and methods of analysis used in the study of human geographic systems. Examines geographic perspectives on contemporary world problems such as population growth, globalization of the economy, and human-environmental relations.

GEOG-G 315 Environmental Conservation (3 cr.) Conservation of natural resources including soil, water, wildlife, and forests as interrelated components of environmental quality.

GEOG-G 326 Geography of North America (3 cr.) Continental and regional variations in terrain, climate, and economic and social life of the United States and Canada, with emphasis on geographical principles, sources of data, and techniques of investigation.

German

GER-G 131 Intensive Beginning German I (5 cr.) Intensive introduction to present-day German and selected aspects of German life. Intensive drills for mastery of phonology, basic structural patterns, and functional vocabulary. Credit is given only for the sequence G131-G132 or the sequence G117-G118-G119.

GER-G 132 Intensive Beginning German II (5 cr.) Intensive introduction to present-

day German and selected aspects of German life. Intensive drills for mastery of phonology, basic structural patterns, and functional vocabulary. Credit is given only for the sequence G131-G132 or the sequence G117-G118-G119.

History

HIST-A 301 Colonial and Revolutionary America I (3 cr.) European background of American history; discovery and exploration of New World by Spain, France, and England. Colonization: motives, causes, types. Social and intellectual developments in English colonies in the seventeenth and eighteenth centuries. Birth of Republic, 1763-89.

HIST-A 314 The United States 1917-1945 (3 cr.) Political, demographic, economic, and intellectual transformations of 1917-1945; World War I, the twenties, the Great Depression, New Deal, World War II.

HIST-A 317 American Social History, 1865 to Present (3 cr.) Development of modern American intellectual and social patterns since the Civil War. Social thought, literature, science, the arts, religion, morals, education.

HIST-A 348 Civil War and Reconstruction (3 cr.) The era of the Civil War and its aftermath. Military, political, economic, and social aspects of the coming of the war, the war years, and the ''reconstruction'' era following the conflict.

HIST-A 363 Survey of Indiana History (3 cr.) Examination of Indiana history that focuses on significant persons, topics, and events from the earliest exploration and settlement of the state to the present day.

HIST-A 364 History of Black Americans (3 cr.) A survey of black life in America: the Atlantic slave trade, slavery, Afro-American culture, racism, Civil War and Reconstruction, peonage, segregation, northern migration, urban ghettos, discrimination, Harlem Renaissance, black nationalism, civil rights, black revolt, contemporary setting.

HIST-B 310 Britain II (3 cr.) I: Britain before 1688. Development of Britain and its institutions from Roman times to the Glorious Revolution, with special emphasis on political and constitutional change. II: Britain since 1688. Examines important modern political, economic, social, and cultural developments, including industrialization and imperialism and the emergence of ideologies like liberalism and socialism.

HIST-B 323 History of the Holocaust (3 cr.)

HIST-B 360 Europe-Napoleon to First World War II (3 cr.) I: Post-Napoleonic reaction; revitalized revolutionary forces, 1848; reform in England and Russia; bourgeois monarchy and Second Empire in France; unification movements in Italy and Germany; middle-class nationalism, romanticism, and realism. II: Bismarckian and Wilhelmian Germany; Gladstone, Disraeli, and modern Britain; the French Third Republic and the last days of Tsarist Russia; disintegration of the Ottoman Empire; the Austro-Hungarian Empire in decline; European society and culture on the eve of World War I.

HIST-F 444 History of Mexico (3 cr.) Brief survey of the colonial period, independence movement, and nineteenth century. Emphasis on the intellectual, political, and cultural history of the Mexican Revolution.

HIST-H 105 American History I (3 cr.) I. Colonial period, Revolution, Confederation and Constitution, national period to 1865. II. 1865 to present. Political history forms framework, with economic, social, cultural, and intellectual history interwoven. Introduction to historical literature, source material, and criticism.

HIST-H 106 American History II (3 cr.) I. Colonial period, Revolution, Confederation and Constitution, national period to 1865. II. 1865 to present. Political history forms

framework, with economic, social, cultural, and intellectual history interwoven. Introduction to historical literature, source material, and criticism.

HIST-H 113 History of Western Civilization I (3 cr.) I. Rise and fall of ancient civilizations; barbarian invasions; rise, flowering, and disruption of medieval church; feudalism, national monarchies. II. Rise of middle class; parliamentary institutions, liberalism, political democracy; industrial revolution, capitalism, and socialist movements; nationalism, imperialism, international rivalries, world wars.

HIST-H 114 History of Western Civilization II (3 cr.) I. Rise and fall of ancient civilizations; barbarian invasions; rise, flowering, and disruption of medieval church; feudalism, national monarchies. II. Rise of middle class; parliamentary institutions, liberalism, political democracy; industrial revolution, capitalism, and socialist movements; nationalism, imperialism, international rivalries, world wars.

HIST-H 207 Modern East Asian Civilization (3 cr.)

HIST-H 425 Topics in History (3 cr.) Intensive study and analysis of selected historical issues and problems of limited scope. Topics will vary but will ordinarily cut across fields, regions, and periods. May be repeated once for credit.

HIST-K 495 Readings in History (1 cr.) By arrangement with instructor. Permission of departmental chairperson required.

INGT-I 300 Junior/Senior Integrator (3 cr.) This course fulfills the general education requirement for junior/senior integrator for majors in the School of Liberal Arts and in the School of Science.

Music

MUS-E 241 Introduction to Music Fundamentals (2 cr.) Learn the basics of music reading, rhythm games, singing, keyboard skills, children's songs, and use of classroom instruments. Designed for, but not limited to, elementary education majors and others interested in using music as a learning tool.

MUS-M 17400 Music for the Listener (3 cr.) A survey course covering traditional and modern music styles of the last 1,000 years. Learn how to listen to music, instruments, and musical forms. No prior music experience required. Offered on campus and through the Web.

MUS-X 070 University Choral Ensembles (1-2 cr.) The following vocal ensembles are available: University Choir (1 cr.) and Indianapolis Symphonic Choir (2 cr., authorization and audition required).

MUS-Z 201 History of Rock 'n' Roll Music (3 cr.) Survey of major trends, styles, and genres of rock music of the 1950s and 1960s, focusing on the work of artists and groups who have proved to have the most enduring significance.

MUS-Z 301 History of Rock Music—'70s and '80s (3 cr.) Survey of trends and styles in rock music of the '70s and '80s. Focuses on the artists and groups who have shaped the music of yesterday, today, and tomorrow.

MUS-Z 393 History of Jazz (3 cr.) Jazz was America's first worldwide popular music. This course emphasizes Jazz as a means to better understand the history and culture of America through examining the influences, styles and major performers and composers from Armstrong and Ellington to Coltrane and Marsalis.

Philosophy

PHIL-P 110 Introduction to Philosophy (3 cr.) An introduction to the methods and

problems of philosophy and to important figures in the history of philosophy. Concerns such topics as the nature of reality, the meaning of life, and the existence of God. Readings from classical and contemporary sources, e.g., Plato, Descartes, Nietzsche, and Sartre.

PHIL-P 120 Ethics (3 cr.) An introductory course in ethics. Typically examines virtues, vices, and character; theories of right and wrong; visions of the good life; and contemporary moral issues.

PHIL-P 162 Logic (3 cr.) A study of the principles of logic. The course covers a variety of traditional topics, selected for their practical value, within formal and informal logic. Among the topics typically covered are fallacies, syllogisms, causal hypotheses, logic diagrams, argument analysis, and truth-functional reasoning.

PHIL-P 393 Biomedical Ethics (3 cr.) A philosophical consideration of ethical problems that arise in current biomedical practice, e.g., with regard to abortion, euthanasia, determination of death, consent to treatment, and professional responsibilities in connection with research, experimentation, and health care delivery.

Political Science

POLS-Y 101 Introduction to Political Science (3 cr.) For any student interested in better understanding the political world in which we live. The course explains some fundamental political concepts such as power, conflict, authority, and governments. It may also include an overview of the major subfields of political science: comparative politics, international relations, political theory, and public policy.

POLS-Y 103 Introduction to American Politics (3 cr.) Introduction to the nature of government and the dynamics of American politics. Origin and nature of the American federal system and its political party base. PUL=3

POLS-Y 103 Introduction to American Politics (3 cr.) Introduction to the nature of government and the dynamics of American politics. Origin and nature of the American federal system and its political party base.

POLS-Y 213 Introduction to Public Policy (3 cr.) Studies the processes and institutions involved in the formation of public policy with particular reference to the United States. The course will identify key policy actors, analyze the process of policy making, and critically assess selected policy issues (such as foreign, defense, economic, welfare, and environmental policy).

POLS-Y 304 Constitutional Law, and Constitutional Rights and Liberties (3 cr.) Nature and function of law and judicial process; selected Supreme Court decisions interpreting the American constitutional system.

POLS-Y 309 American Politics through Film and Fiction (3 cr.) Recurrent themes of politics are explored in depth by means of novels, short stories, and films. Subject matter varies by semester—check class schedule for current semester.

Religion

REL-R 111 The Bible (3 cr.) A critical introduction to the major periods, persons, events, and literatures that constitute the Bible; designed to provide general humanities-level instruction on this important text. PUL=5

REL-R 120 Images of Jesus (3 cr.) This course is designed to introduce students to the variety of traditions about the figure of Jesus. It will acquaint students with the wide array of images of the Jesus character through a historical analysis of these images portrayed in texts, art, music, film, and TV.

REL-R 133 Introduction to Religion (3 cr.) Introduction to the diversity of traditions, values, and histories through which religion interacts with culture. Emphasis on understanding the ways the various dimensions of religion influence people's lives.

REL-R 173 American Religion (3 cr.) A consideration of American religion, with particular emphasis on the development of religious diversity and religious freedom in the context of the American social, political, and economic experience.

REL-R 212 Comparative Religions (3 cr.) Approaches to the comparison of recurrent themes, religious attitudes, and practices found in selected Eastern and Western traditions.

REL-R 243 Introduction to the New Testament (3 cr.) An introduction to the modern critical study of the New Testament from primarily a historical perspective. The goal is to learn to view these diverse Christian writings within the context of their historical and social settings.

Sociology

SOC-R 100 Introduction to Sociology (3 cr.) P: W131 or consent of instructor. Consideration of basic sociological concepts, including some of the substantive concerns and findings of sociology, sources of data, and the nature of the sociological perspective.

SOC-R 240 Deviance and Social Control (3 cr.) P: R100 or consent of instructor. An introduction to major sociological theories of deviance and social control. Analyzes empirical work done in such areas as drug use, unconventional sexual behavior, family violence, and mental illness. Explores both ''lay'' and official responses to deviance, as well as cultural variability in responses to deviance.

SOC-R 314 Families and Society (3 cr.) P: R100 or consent of instructor. The family is a major social institution, occupying a central place in people's lives. This course explores formation and dissolution of marriages, partnerships, families; challenges family members face, including communication and childrearing; reasons for and consequences of change in American families; and how family patterns vary across and within social groups.

SOC-R 315 Political Sociology (3 cr.) P: R100 or consent of instructor. Analysis of the nature and basis of political power on the macro level—the community, the national, and the international arenas. Study of formal and informal power structures and of the institutionalized and non-institutionalized mechanisms of access to power.

SOC-R 325 Gender and Society (3 cr.) P: R100 or consent of instructor. A sociological examination of the roles of women and men in society, analysis of the determinants and consequences of these roles, and assessment of forces likely to bring about future change in these roles. Although focus will be on contemporary American society, cross-cultural variations in gender roles will also be noted.

SOC-R 327 Sociology of Death and Dying (3 cr.) P: R100 or the consent of instructor. This course examines inevitable and salient features of the human condition. Historical evaluation of images and attitudes toward death, the medicalization of death, the human consequences of high-tech dying, the role of the family in caring for dying loved ones, the emergence and role of hospices, the social roles of funerals, grief and bereavement, euthanasia and suicide, the worlds of dying children and grieving parents, and genocide are major issues that are addressed. Two of the major themes of the course revolve around the idea that the way we die is a reflection of the way we live; and, that the study of dying and death is an important way of studying and affirming the value of life.

SOC-R 344 Juvenile Delinquency and Society (3 cr.) P: R100 or consent of instructor. Legal definition of delinquency, measurement and distribution of delinquency. Causal theories considered for empirical adequacy and policy implications. Procedures for processing juvenile offenders by police, courts, and prisons are examined.

SOC-R 345 Crime and Society (3 cr.) P: R100 or consent of instructor. Examination of the creation, selection, and disposition of persons labeled criminal. Emphasis on crime as an expression of group conflict and interest. Critique of academic and popular theories of crime and punishment.

SOC-R 351 Social Science Research Methods (3 cr.) P: R100 or consent of instructor and sophomore standing. A survey of methods and techniques used by sociologists and other social scientists for gathering and interpreting information about human social behavior.

SOC-R 355 Social Theory (3 cr.) P: R100 or consent of instructor. This course covers several traditions of classical, contemporary, and post-modern social thought (e.g., social Darwinism, conflict theory, functionalism, symbolic interactionism, critical theory, and feminist theory). The social context, construction, and application theories are included.

SOC-R 381 Social Factors in Health and Illness (3 cr.) P: R100 or consent of instructor. Examines the social aspects of health and illness, including variations in the social meanings of health and illness, the social epidemiology of disease, and the social dimensions of the illness experience.

SOC-R 385 AIDS AND SOCIETY (3 cr.) This course examines the HIV/AIDS epidemic from a sociological perspective. Students will explore how social factors have shaped the course of the epidemic and the experience of HIV disease. The impact of the epidemic on health care, government, and other social institutions will also be discussed.

SOC-R 420 Sociology of Education (3 cr.) P: R100 or consent of instructor. A survey of sociological approaches to the study of education, covering such major topics as education as a social institution, the school in society, the school as a social system, and the sociology of learning.

SOC-R 461 Race and Ethnic Relations (3 cr.) P: R100 or consent of instructor. Comparative study of racial, ethnic, and religious relations. Focus on patterns of inclusion and exclusion of minority groups by majority groups. Discussion of theories of intergroup tensions—prejudice and discrimination—and of corresponding approaches to the reduction of tensions.

SOC-R 494 Internship Program in Sociology (3-6 cr.) P: R100, 9 credits of sociology with a B (3.0) or higher, junior standing with consent of instructor. This course involves students working in organizations where they apply or gain practical insight into sociological concepts, theories, and knowledge. Students analyze their experiences through work logs, a paper, and regular meetings with the internship director.

SOC-R 495 Topics in Sociology (3 cr.) P: variable with topic. Exploration of a topic in sociology not covered by the regular curriculum but of interest to faculty and students in a particular semester. Topics to be announced.

SOC-R 497 Individual Readings in Sociology (3 cr.) P: consent of instructor and 9 credit hours of sociology courses with at least a B (3.0) or higher. Investigation of a topic not covered in the regular curriculum that is of special interest to the student and that the student wishes to pursue in greater detail. Normally available only to majors through arrangement with a faculty member.

Spanish

SPAN-S 131 Intensive Beginning Spanish I (5 cr.) Intensive introductory language sequence of courses. Recommended for prospective majors and for students with prior training in Spanish or other Romance languages. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic cultures. Credit not given for both S117-S118-S119 and S131-S132.

SPAN-S 132 Intensive Beginning Spanish II (5 cr.) Intensive introductory language sequence of courses. Recommended for prospective majors and for students with prior training in Spanish or other Romance languages. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic cultures. Credit not given for both S117-S118-S119 and S131-S132.

Nursing

NURS-A 100 Nursing: Drug Dosage Calculation (2 cr.) Provides a review of basic mathematics and presents a method of solving problems involving drug dosages. Course is open to those interested in nursing.

NURS-A 276 Care of the Individual: Alterations in Activity–Exercise (3 cr.) P: A150; C: A277. This course focuses on the application of all aspects of the nursing process in caring for individuals experiencing selected acute and chronic alterations in cardiac, respiratory, and hematological systems across the life span. Integration and critical examination of prior and new knowledge will be emphasized.

NURS-A 277 Nursing Practicum: Care of the Individual—Alterations in Activity–Exercise (3 cr.) C: A276. Students will focus on adults experiencing selected acute and chronic cardiac, respiratory, and hematological alterations and their related disruptions in activity–exercise abilities. The nursing process will be used in providing care that will foster positive outcomes.

NURS-A 278 Care of the Individual—Alterations in Cognition, Perception, and Interaction (3 cr.) P: A150; C: PSY B310 and A279. This course focuses on the knowledge and skills needed to care for individuals experiencing actual or potential problems of the neuro-psychological, neuro-muscular, or central nervous system. Problems include cognitive, physiological, emotional, and behavioral disruptions experienced by individuals across the life span.

NURS-A 279 Nursing Practicum: Care of the Individual—Alterations in Cognition, Perception, and Interaction (2 cr.) C: PSY B310 and A278. Students will focus on individuals experiencing neuro-psychological, neuromuscular, central nervous system, cognitive, emotional, and behavioral disruptions. Students will be expected to integrate knowledge and skills in increasingly complex care situations, as consistent with course and level competencies.

NURS-A 286 Care of the Individual—Beginning and Evolving Families (3 cr.) P: A276, A277, A278, A279, and PSY B310; C: A287. This course focuses on the study of individuals and families during the childbearing and child-raising phases of development. Concepts of growth and development, health promotion, health maintenance, illness, and illness prevention are integrated.

NURS-A 287 Nursing Practicum: Care of the Individual—Beginning and Evolving Families (3 cr.) C: A286. Students will focus on care of individuals and families during the childbearing and child-raising phases of development. Students will be expected to apply nursing skills and knowledge to promote family function and growth. Students will have opportunities to interact with children, adults, and families across the care continuum.

NURS-A 288 Care of the Individual within a Family and Community Context (2 cr.) P: A276, A277, A278, A279, PSY B310; C: A289. This capstone course focuses on the integration of knowledge and its application in the provision of comprehensive nursing care. The role of the nurse in planning, collaborating, organizing, communicating, problem solving, and evaluating care outcomes will be emphasized. Principles of care management and pharmacology will be synthesized into course content.

NURS-A 289 Nursing Practicum: Care of the Individual within the Family and Community Context (3 cr.) C: A288. Students will apply the nursing process in

managing care for multiple individuals and their families in a variety of acute and community-focused settings where policies and procedures are specified and professional consultation is available. Students will also demonstrate their ability to synthesize pharmacology and the use of computers in their practice.

NURS-A 290 The Discipline of Nursing: Role Transitioning (2 cr.) C: A286 and/or A288. This course focuses on the transition from the role of student to graduate nurse. Emphasis is placed on the responsibilities and expectations of the professional nurse in the health-care delivery system. Legal and ethical issues, professional development, group dynamics, risk management, quality assurance, political action, nursing organizations, and the use of research to inform nursing practice will be explored.

NURS-B 104 Power Up: Strategies for Academic Success (3 cr.) This first-year course for students who have declared nursing as a major focuses on assisting students in gaining essential skills for academic success and in developing the ability to make use of university resources. Topics will include time management, stress management, critical thinking, development of networks of support, communication skills, learning styles, and academic responsibility. Teaching and learning strategies will incorporate campus technology and library resources as tools for completion of course requirements.

NURS-B 231 Communication for Health-Care Professionals (3 cr.) (Traditional) Students in this course will focus on basic communication skills essential for working with health-care professionals and clients of various ages. Content includes interpersonal communications and group dynamics. Students will practice communication skills with individuals, within groups, and through electronic media.

NURS-B 244 Comprehensive Health Assessment (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All third- semester nursing courses; P/C: Anatomy, Physiology, or Microbiology; C: B245. This course focuses on helping students acquire skills to conduct a comprehensive health assessment, including the physical, psychological, social, functional, and environmental aspects of health. The process of data collection, interpretation, documentation, and dissemination of assessment data will be addressed.

NURS-B 245 Comprehensive Health Assessment: Practicum (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All third-semester courses; C: B244. Students will have the opportunity to use techniques of interview, observation, percussion, palpation, inspection, and auscultation in assessing clients across the life span in simulated and actual environments.

NURS-B 304 Professional Nursing Seminar I (3 cr.) (R.N.-B.S.N.) This course focuses on core theoretical concepts of professional nursing practice, including health, wellness, illness, self-care and caring, disease prevention, and health promotion. Students will be expected to explore theoretical premises and research related to the unique wellness perspectives and health beliefs of people across the life span. Students will learn to develop care outcomes consistent with maximizing individual potentials for wellness. Students will complete a needs assessment as part of the practicum experience.

NURS-B 403 GERONTOLOGICAL NURSING (3 cr.) (RN-BSN) This course promotes a holistic approach to persons in the later years of life. Death and dying, legal and ethical issues, family care giving, and future challenges will be discussed in the context of best practices as outlined by the John A Hartford Foundation: Institute for Geriatric Nursing.

NURS-B 404 Professional Nursing Seminar II (3 cr.) (R.N.-B.S.N.) This course focuses on the application of nursing theory and research findings in restoring and maintaining individual and family functioning for those dealing with multi-system alterations. Students will explore the ethical, legal, and moral implications of treatment options and identify tactics to maintain nursing effectiveness in their facilitation of individuals and families through the health-care system. Students will complete a scholarly analysis as part of their practicum experience.

NURS-H 365 Nursing Research (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All fifth-semester nursing courses and H355 or its equivalent. This course focuses on development of students' skills in using the research process to define clinical research problems and to determine the usefulness of research in clinical decisions related to practice. The critique of nursing and nursing-related research studies will be emphasized in identifying applicability to nursing practice.

NURS-K 301 COMPLEMENTARY HEALTH THERAPIES (3 cr.) (RN-BSN) This course will serve as an introduction to a variety of complementary therapies, including healing touch, guided imagery, hypnosis, acupuncture, aromatherapy, reflexology, and massage. The class will critically examine each therapy through assigned readings, literature reviews, presentations, guest lecturers, and optional experiential activiti

NURS-K 304 NURSING SPECIALTY ELECTIVE (1-6 cr.) This course allows the R.N. to B.S.N. student to apply nationally recognized specialty nursing knowledge and skills to the B.S.N. degree, through a portfolio or independent study approach. National specialty standards will be used to devise learning objectives, implementation and evaluation plan. This course is restricted to R.N. to B.S.N. students only.

NURS-K 305 NEW INNOV IN HLTH&HLTH CARE (- cr.) (RN-BSN) This course explores emergent trends in health and health care, including technological advances in health care, developing approaches to care based on new knowledge and/ or research findings, and trends in health care delivery in a themed, survey or independent study format.

NURS-K 492 Nursing Elective (1-6 cr.) Many nursing elective courses are offered under this number. These elective offerings vary from year to year depending on student interest and available resources. Students are kept informed of elective offerings both through informational forums and through listings in the online course offerings.

NURS-K 499 GENETICS AND GENOMICS (- cr.) (RN-BSN) This course introduces a basic knowledge of genetics in health care, including genetic variation and inheritance; ethical, legal, and social issues in genetic health care; genetic therapeutics; nursing roles; genetic basis of selected alterations to health across the life span; and cultural considerations in genetic health care are all considered.

NURS-P 216 PHARMACOLOGY (- cr.) (RN-BSN) This course focuses on basic principles of pharmacology. It includes the pharmacologic properties of major drug classes and individual drugs, with an emphasis on the clinical application of drug therapy through the nursing process.

NURS-S 473 A Multi-System Approach to the Health of the Community: Practicum (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All sixth-semester nursing courses; C: S472. Students will have the opportunity to apply the concepts of community assessment, program planning, prevention, and epidemiology to implement and evaluate interventions for community-centered care to groups or aggregates. Professional nursing will be practiced in collaboration with diverse groups within a community.

NURS-S 474 Applied Health-Care Ethics (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All sixth-semester nursing courses. This course is designed to introduce the student to major ethical theory, principles, and models for the recognition, analysis, and resolution of ethical dilemmas in health-care practice.

NURS-S 475 COMMUNITY HEALTH: RNBSN (- cr.) (RN-BSN) Basic epidemiological principles and community health nursing models are applied in collaboration with diverse groups. Disease prevention strategies are applied to individuals and populations to promote health. Students apply the concepts of community assessment, disease prevention, and health promotion to plan, implement, and evaluate interventions for populations in the community.

NURS-S 481 Nursing Management (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All seventh-semester nursing courses; C: S482. This course focuses on the development management skills assumed by professional nurses, including delegation of responsibilities, networking, facilitation of groups, conflict resolution, leadership, case management, and collaboration. Concepts addressed include organizational structure, change, managing quality and performance, workplace diversity, budgeting and resource allocation, and delivery systems.

NURS-S 482 Nursing Management: Practicum (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All seventh-semester nursing courses; C: S481. Students will have the opportunity to apply professional management skills in a variety of nursing leadership roles.

NURS-S 483 Clinical Nursing Practice Capstone (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: S481, S482, or permission of instructor; C: S484. Students will have the opportunity to demonstrate competencies consistent with program outcomes and to refine their nursing care practice skills. Students will collaborate with faculty and a preceptor in choosing a care setting, planning and organizing a learning experience, and practicing professional nursing in a safe and effective manner.

NURS-S 484 Research Utilization Seminar (1 cr.) (Traditional, Accelerated and R.N.-B.S.N.) C: S483. This course focuses on students' abilities to refine their critical/analytical skills in evaluating clinical research for applicability to nursing practice. Students will examine the role of evaluation, action research, and research findings in assuring quality of nursing care and in solving relevant problems arising from clinical practices.

NURS-S 485 Professional Growth and Empowerment (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P:All seventh-semester nursing courses. This course focuses on issues related to professional practice, career planning, personal goal setting, and empowerment of self and others. Students will discuss factors related to job performance, performance expectations and evaluation, reality orientation, and commitment to lifelong learning.

NURS-S 487 NURSING MANAGEMENT:RNBSN (- cr.) RN-BSN) This course focuses on development of management skills assumed by professional nurses, including delegation of responsibilities, networking, and facilitation of groups, conflict resolution, leadership, case management, and collaboration. Concepts addressed include organizational structure, delivery systems, change, managing quality and performance, budgeting and resource allocation, staffing, scheduling, evaluation and career development.

NURS-Z 480 B.S.N. Portfolio Review for Course Substitution (1-6 cr.) P: Permission of instructor. The portfolio review process is available to all undergraduate students who believe that they can meet the learning objectives/competencies required of a specific nursing course within their program of study. The portfolio is a mechanism used to validate the acquisition of knowledge and skills congruent with course expectations and student learning outcomes. The portfolio provides objective evidence that students have acquired necessary content and skills through prior learning and/or practice experiences.

NURS-Z 492 Individual Study in Nursing (1-6 cr.) Opportunity for independent study of topics related to nursing practice. Before enrolling in an independent study option, each student must obtain permission from a faculty member who will supervise the study and file appropriate forms prior to registration.

Other Courses

Art

HER-H 100 Art Appreciation (3 cr.) An understanding and appreciation of outstanding works of art through analysis of artistic purposes and techniques, and knowledge of

historical style and subject matter. Not counted as credit toward the B.F.A. or B.A.E. degree, nor toward the major or minor requirements in art history.

Informatics

INFO-I 101 Introduction to Informatics (4 cr.) Problem solving with information technology; introductions to information representation, relational databases, system design, propositional logic, cutting-edge technologies: CPU, operation systems, networks, laboratory emphasizing information technology including web page design, word processing, databases, using tools available on campus.

NEWM-N 100 Foundations of New Media (3 cr.) An exploration of the characteristics of digital media, including interactivity, hypermedia, immersion, and storytelling. Includes an introduction to the practice, theory, and history of new media, from the viewpoint of technology, communication, and culture. There are readings, demonstrations, examples, hands-on projects, and written assignments.

NEWM-N 110 Visualizing Information (3 cr.) An introductory course for new media students using traditional and digital media and print best practices. Students develop an understanding of basic design principles and applications. Design history and the elements of composition and typography are applied through exercises and projects. The focus is on foundations of visual thinking, sketching, exploring the relationship between type and image, and developing multiple solutions to a given problem in the context of simple and complex visual information. Computer images will be constructed using the basics of Illustrator.

NEWM-N 190 Topics in Interactive Media (1-3 cr.) Special topics in interactive media, with a focus on exploring concepts at the forefront of media arts.

NEWM-N 201 Design Issues in Digital Media (3 cr.) Exploration of the traditional principles of visual design, as expressed in digital design tools and applied to digital media. Topics include visual literacy, fundamental design elements and design principles, and their expression in various tools for digital design. Hands-on practice with applying design principles in several projects.

NEWM-N 240 Introduction to Digital Video (3 cr.) P: N101. An introductory course covering video production techniques for digital media. The technology (hardware and software) along with techniques will be taught through lecture and projects. All phases of video production will be addressed, from pre-production through production to post-production with a focus on the digital media aspects.

Health and Physical Education

Health

HPER-C 366 Community Health (3 cr.) Introduction to community health within the public health context. Students will develop an understanding of historical and theoretical foundations of community health and major societal health concerns, explore community health models and programs used to address these concerns, and examine racial/ethnic, cultural, socioeconomic and related determinants of community health.

TCEM-FN 30300 Essentials of Nutrition (3 cr.) Basic nutrition and it's application in meeting nutritional needs of all ages. Consideration is given to food selection, legislation, and community nutrition education programs.

TCEM-FN 31300 PRIN OF HLTHY MENU PLG & FD PR (- cr.) Basic nutrition as applied to food intake patterns and modifications/preparation of recipes to provide a more healthful diet.

TCEM-FN 315 Fundamentals of Nutrition (3 cr.) P: CHEM C101 or BIOL N217 or consent of instructor.t of instructor Basic principles of nutrition and their application in meeting nutritional needs during the life cycle.

HPER-H 160 First Aid and Emergency Care (3 cr.) Lecture and demonstration of first-aid measures for wounds, hemorrhage, burns, exposure, sprains, dislocations, fractures, unconscious conditions, suffocation, drowning, and poisons, with skill training in all procedures.

HPER-H 263 Personal Health (3 cr.) This survey course provides a theoretical and practical treatment of the concepts of disease prevention and health promotion. Covers such topics as emotional health; aging and death; alcohol, tobacco, and drug abuse; physical fitness; nutrition and dieting; consumer health; chronic and communicable diseases; safety; and environmental health.

Military Science

MIL-G 102 Foundations in Leadership (1 cr.) G102 Foundations in Leadership (1 cr.) This course provides an overview of leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. Cadets explore dimenstions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Leadership labs, physical training sessions, and a weekend field training exercise are optional, but available to those looking for more out of their college experience.

MIL-G 201 Innovative Tactical Leadership (2 cr.) G201 Innovative Tactical Leadership (2 cr.) This course explores the dimensions of creative and innovative tactical leadership strategies and styles by studying historical case studies and engaging in interactive student exercise. Cadets practice aspects of personal motivation and team building in the context of planning, executing and assessing team exercises. Leadership labs, physical training sessions, and a week-end field training exercise are optional, but available to those looking for more out of their college experience.

MIL-G 202 Leadership in Changing Environments (2 cr.) G202 Leadership in Changing Environments (2 cr.) This course examines the challenges of leading in complex contemporary operational environments. Dimensions of the cross-cultural challenges of leadership in a constantly changing world are highlighted and applied to practical Army leadership tasks and situations. Leadership labs, physical training sessions, and a weekend field training exercise are optional, but available to those looking for more out of their college experience.

Physical Education

HPER-E 135 Golf (1 cr.) Beginning instruction in techniques for putting, chipping, pitching, iron swing, and wood stroke. Course includes rules and etiquette of golf. Students play on par-3 courses. Fee charged.

HPER-H 160 First Aid and Emergency Care (3 cr.) Lecture and demonstration of first-aid measures for wounds, hemorrhage, burns, exposure, sprains, dislocations, fractures, unconscious conditions, suffocation, drowning, and poisons, with skill training in all procedures.

HPER-P 290 Movement Experiences for Preschool and Elementary School Children (2 cr.) Covers potential outcomes of preschool and elementary school motor development programs, how to implement such programs, and appropriate movement experiences for young children.

HPER-R 324 Recreational Sports Programming (3 cr.) Lecture and demonstration of

first-aid measures for wounds, hemorrhage, burns, exposure, sprains, dislocations, fractures, unconscious conditions, suffocation, drowning, and poisons, with skill training in all procedures.

Science

Astronomy

AST-A 100 The Solar System (3 cr.) Fall. Survey of the solar system, including the Earth, sun, moon, eclipses, planets and their satellites, comets, laws of planetary motion, etc. Discussion of the origin of the solar system, life on earth, and the possibilities of extraterrestrial life. Also astronomical instruments and celestial coordinates.

AST-A 105 Stars and Galaxies (3 cr.) Spring. Survey of the universe beyond the solar system, including stars, pulsars, black holes, principles of spectroscopy and the H-R diagram, nebulae, the Milky Way, other galaxies, quasars, expanding universe, cosmology, and extraterrestrial life.

Biology

BIOL 55600 Physiology I (3 cr.) P: K10300, CHEM C342. Fall, night. Principles of physiology: nerve and muscle, temperature regulation, ion and water balance.

BIOL-K 101 Concepts of Biology I (5 cr.) P: high school or college chemistry. Fall, day; Spring, day, night; Summer, day. An introductory course emphasizing the principles of cellular biology; molecular biology; genetics; and plant anatomy, diversity, development, and physiology.

BIOL-K 103 Concepts of Biology II (5 cr.) P: K101. Fall, day, night; Spring, day; Summer, day. An introductory biology course emphasizing phylogeny, structure, physiology, development, diversity, evolution and behavior in animals.

BIOL-K 295 SPECIAL ASSIGNMENTS (0 cr.) Fall, Spring. Special work, such as directed readings, laboratory or fieldwork, or presentation of material not available in the formal courses in the department.

BIOL-K 322 Genetics and Molecular Biology (3 cr.) P: K103 and CHEM C106. Fall, day. Spring of even-numbered years. The course covers the principles of classical and molecular genetics including Mendelian inheritance, linkage, nucleic acids, gene expression, recombinant DNA, genomics, immunogenetics, and regulation.

BIOL-K 341 PRINC OF ECOLOGY & EVOLUTION (3 cr.) A study of the interactions of organisms with one another and with their nonbiotic environments in light of evolution.

BIOL-K 342 PRINC OF ECOLOGY & EVOLUTN LAB (2 cr.) Fall, day. Application of ecology and evolution principles in laboratory and field experiments as well as demonstration of techniques of general ecology.

BIOL-K 483 BIOLOGICAL CHEMISTRY (3 cr.) Chemistry of biologically important molecules including carbohydrates, lipids, proteins, and nucleic acids. Special emphasis on chemistry of intermediary metabolism.

BIOL-K 493 Independent Research (1-3 cr.) P: Consent of instructor. Fall, Spring, Summer. A course designed to give undergraduate students majoring in biology an opportunity to do research in fields in which they have a special interest.

BIOL-N 100 Contemporary Biology (3 cr.) Fall, day, night; Spring, day, night; Summer. Selected principles of biology with emphasis on issues and problems extending into everyday affairs of the student.

BIOL-N 108 Plants, Animals and the Environment (3 cr.) Fall, day, night; Spring, day, night; Summer, day. This course is designed to provide students and future K-8 teachers with a background in the general biology concepts of plants, animals and the environment, which are the backbone of the State of Indiana science standards.

BIOL-N 212 Human Biology (3 cr.) Equiv. PU BIOL 201. Fall, day. First course in a two-semester sequence in human biology with emphasis on anatomy and physiology, providing a solid foundation in body structure and function.

BIOL-N 213 Human Biology Laboratory (1 cr.) P: N212 C: N212 Fall, day. Accompanying laboratory for N212.

BIOL-N 214 Human Biology (3 cr.) Spring, day. Continuation of N212.

BIOL-N 215 Human Biology Laboratory (1 cr.) Spring, day. Accompanying laboratory for N214.

BIOL-N 217 Human Physiology (5 cr.) Fall, day; Spring, day; Summer, day. Lectures and laboratory work related to cellular, musculoskeletal, neural, cardiovascular, gastrointestinal, renal, endocrine, and reproductive function in humans.

BIOL-N 251 Introduction to Microbiology (3 cr.) Spring, night. This course includes a laboratory component. The isolation, growth, structure, functioning, heredity, identification, classification, and ecology of microorganisms; their role in nature and significance to humans.

BIOL-N 261 Human Anatomy (5 cr.) Fall, day, night; Spring, day, night; Summer, day, night. Lecture and laboratory studies of the histology and gross morphology of the human form, utilizing a cell-tissue-organ system-body approach.

Chemistry

CHEM-C 100 The World of Chemistry (3 cr.) A topically oriented, nonmathematical introduction to the nature of matter. Topics covered include fossil fuel and nuclear sources of power; environmental issues involving chemistry such as recycling, acid rain, air and water pollution, global warming, ozone depletion; genetic modification of foods, DNA profiling, use of food additives and herbal supplements; and other public policy issues involving science.

CHEM-C 101 Elementary Chemistry I (3 cr.) Usually taken concurrently with C121. Fall, day, night; Spring, day, night; Summer II, day. Essential principles of chemistry, atomic and molecular structure, bonding, properties and reactions of elements and compounds, stoichiometry, solutions, and acids and bases. For students who are not planning careers in the sciences and for those with no previous course work in chemistry. Note: most degree programs that include C101 require the concurrent laboratory, C121.

CHEM-C 105 Principles of Chemistry I (3 cr.) Fall, day, night; Spring, day; Summer I, day. Usually taken concurrently with C125. A placement examination may be required for admission to this course. See "Chemistry Placement Examination" above. Principles of inorganic and physical chemistry emphasizing physical and chemical properties, atomic and molecular structure, chemical bonding, and states of matter.

CHEM-C 106 Principles of Chemistry II (3 cr.) Fall, day; Spring, day, night; Summer II, day. Continuation of C105. Usually taken concurrently with C126. Topics include condensed phases, solution chemistry, thermodynamics, equilibrium, and kinetics.

CHEM-C 110 The Chemistry of Life (3 cr.) A nonmathematical introduction to organic molecules and their transformation to useful materials such as drugs and polymers. An emphasis is placed on the chemical features of biomolecules including hormones and neurotransmitters, proteins, lipids (fats), carbohydrates (sugars), and nucleic acids

(DNA/RNA). The chemistry of enzymes, carcinogens, vitamins, antihistamines, anesthetics, genetic engineering, mental health, and other health-related topics.

CHEM-C 115 Laboratory for C110 The Chemistry of Life (2 cr.) Laboratory work illustrating topics covered in C110.

CHEM-C 121 Elementary Chemistry Laboratory I (2 cr.) Fall, day, night; Spring, day, night; Summer II, day. Introduction to the techniques and reasoning of experimental chemistry. Emphasis is given to study of physical and chemical properties of inorganic compounds.

CHEM-C 125 Experimental Chemistry I (2 cr.) P or C: C105 or equivalent. Fall, day, night; Spring, day; Summer I, day. Laboratory work illustrating topics covered in C105.

CHEM-C 126 Experimental Chemistry II (2 cr.) lecture, laboratory P: C105 and C125; P or C: C106 or equivalent. Fall, day; Spring, day, night; Summer II, day. Continuation of C125. Laboratory work illustrating topics covered in C105 and C106.

CHEM-C 311 Analytical Chemistry Laboratory (1 cr.) Spring, Summer I, day. Laboratory instruction in the fundamental analytical techniques discussed in C310

CHEM-C 341 Organic Chemistry I (3 cr.) Fall, day, night; Spring, day; Summer I, day. Comprehensive study of organic compounds. Valence bond theory, stereochemistry, and physical properties of organic compounds are discussed in detail. Introduction to reaction mechanisms and to spectroscopic identification. Synthesis and reactions of selected compounds are also discussed.

CHEM-C 342 Organic Chemistry II (3 cr.) Fall, day; Spring, day, night; Summer II, day. Continuation of C341. The chemistry of aromatic compounds and other major functional groups are discussed in detail. Multistep synthetic procedures and reaction mechanisms are emphasized. Introduction to biological chemistry.

CHEM-C 343 Organic Chemistry Laboratory I (2 cr.) Fall, day, night; Spring, day, night; Summer I, day. Fundamental laboratory techniques of organic chemistry, introduction to spectroscopic methods of compound identification, and general synthetic methods.

CHEM-C 344 Organic Chemistry Laboratory II (2 cr.) Fall, night; Spring, day, night; Summer II, day. Preparation, isolation, and identification of organic compounds, spectroscopic methods of compound identification, qualitative organic analysis, multistep synthesis.

Computer Information Systems

CSCI 23000 Computing I (4 cr.) P or C: MATH 154 or MATH 159. The context of computing in history and society, information representation in digital computers, introduction to programming in a modern high-level language, introduction to algorithm and data structures, their implementation as programs.

CSCI 24000 Computing II (4 cr.) P: 230. Continues the introduction of programming began in CSCI 230, with particular focus on the ideas of data abstraction and object-oriented programming. Topics include programming paradigms, principle of language design, object-oriented programming, programming and debugging tools, documentation, recursion, linked data structures, and introduction to language translation.

CSCI-N 100 Introduction to Computers and Computing (3 cr.) P or C: MATH 001, M001, or equivalent. No computing experience assumed. How computers work, word processing, spreadsheets, file management, and Internet skills. Emphasis on problem-solving tech-niques. Lecture and laboratory. Credit given for only one of CSCI N100, CPT 106, CIT 106, or BUS K201.

CSCI-N 201 Programming Concepts (3 cr.) Summary of basic computing topics, problem solving techniques, and their application to computing. Introduction to programming concepts with a focus on language-independent principles, such as algorithm design, debugging strategies, essential control structures, and basic data structure concepts. Lecture and laboratory.

CSCI-N 207 Data Analysis Using Spreadsheets (3 cr.) P: MATH 111. Summary of basic computing topics. An introduction to data analysis using spreadsheets. Emphasis on the application of computational problem-solving techniques. Lecture and laboratory.

CSCI-N 241 Fundamentals of Web Development (3 cr.) Introduction to writing content for the Internet and World Wide Web. Emphasis on servers, hand-coded HTML, Cascading Style Sheets, and extending HTML with other Web technologies. Lecture and laboratory.

CSCI-N 301 Fundamental Computer Science Concepts (3 cr.) P: MATH M118. An introduction to fundamental principles of computer science, including hardware architecture, algorithms, software engineering, and data storage. Lecture and laboratory.

CSCI-N 305 C Language Programming (3 cr.) The basics of computer programming concepts using the C programming language. Emphasis on problem solving and algorithm implementation using a universal subset of the C programming language. Lecture and laboratory.

CSCI-N 331 Visual Basic Programming (3 cr.) An introduction to programming with a focus on rapid application development environments, event-driven programming, and programming in the Windows environment. Course will demonstrate how the major application types (spreadsheets, databases, text editors) are written. Lecture and laboratory.

CSCI-N 341 Introduction to Client-Side Web Programming (3 cr.) P: N241 or equivalent. Introduction to programming with a focus on the client-side programming environment. Programming using languages commonly embedded in Web browsers. Lecture and laboratory.

CSCI-N 342 Server-Side Programming for the Web (3 cr.) P: N341. Designing and building applications on a Web server. Focuses on the issues of programming applied to Web servers. Emphasis on relational database concepts, data design, languages used on the server, transaction handling, and integration of data into Web applications.

CSCI-N 351 Introduction to Multimedia Programming (3 cr.) An integration of computing concepts and multimedia development tools. An introduction to the science behind multimedia (compression algorithms and digital/audio conversion). Use of authoring tools to create compositions of images, sounds, and video. Special emphasis given to using the Web as a multimedia presentation environment. Lecture and laboratory.

CSCI-N 355 Introduction to Virtual Reality (3 cr.) Explore concepts of 3D imaging and design including primitive shapes, transformations, extrusions, face sets, texture mapping, shading, and scripting. Lecture and laboratory.

General Science

SCI-I 120 Windows on Science (1 cr.) Fall, spring. Designed for new and prospective science majors, the course covers an integrative overview of science, examining science and society, the scientific method and community of scientists, undergraduate research, professional ethics, an exploration of science-based careers, and strategies for success as a science major.

Geology

GEOL-G 107 Environmental Geology (3 cr.) Fall, Spring, Summer. An introduction to geology through discussion of geological topics that show the influence of geology on modern society. Topics include mineral and energy resources, water resources, geologic hazards and problems, geology and health, and land use.

GEOL-G 109 Fundamentals of Earth History (3 cr.) Fall, Spring, Summer. Basic principles of earth history: geologic time, basic rock types, reconstructing past environments. Physical development of the earth: its interior, mountain formation, plate tectonics. Origin and development of life: evolution, the fossil record. With laboratory G119, equivalent to IUB GEOL G104, IUB GEOL G112, and PU GEOS 112.

GEOL-G 110 Physical Geology (3 cr.) Fall, Spring, Summer. Introduction to processes within and at the surface of the earth. Description, classification, and origin of minerals and rocks. The rock cycle. Internal processes: volcanism, earthquakes, crustal deformation, mountain building, plate tectonics. External processes: weathering, mass wasting, streams, glaciers, ground water, deserts, coasts. With laboratory G120, equivalent to IU GEOL G103, IU GEOL G111, and PU GEOS 111.

GEOL-G 115 Introduction to Oceanography (3 cr.) Fall, Spring, Summer. Nonmathematical introduction to the geology, biology, and physical characteristics of the ocean. Includes waves, tides, and currents of the world ocean, the adaptations and distribution of marine animals, pollution of the marine ecosystem, and an introduction to the global ocean/atmosphere system.

GEOL-G 117 Environmental Geology Laboratory (1 cr.) Fall, Spring, Summer. Laboratory exercises in environmental aspects of the geosciences. To accompany G107.

GEOL-G 119 Fundamentals of Earth History Laboratory (1 cr.) Fall, Spring, Summer. Laboratory studies of rocks, fossils, and stratigraphic principles to reconstruct past environments and interpret Earth history. To accompany G109.

GEOL-G 120 Physical Geology Laboratory (1 cr.) Fall, Spring, Summer. Laboratory studies of minerals and rocks, landscapes, and earth structures.

INGT-I 300 Junior/Senior Integrator (3 cr.) This course fulfills the general education requirement for junior/senior integrator for majors in the School of Liberal Arts and in the School of Science.

Math

MATH 00100 Introduction to Algebra (4 cr.) Fall, spring, summer. Covers the material taught in the first year of high school algebra. Numbers and algebra, integers, rational numbers, equations, polynomials, graphs, systems of equations, inequalities, radicals. Credit does not apply toward any degree.

MATH 11100 Algebra (4 cr.) P: 001 or M001 (with a minimum grade of C) or placement. Fall, spring, summer. Real numbers, linear equations and inequalities, systems of equations, polynomials, exponents, and logarithmic functions. Covers material in the second year of high school algebra. This course satisfies the prerequisites needed for MATH M118, M119, 13000, 13600, 15300, 15400, and STAT 30100.

MATH 11100 FUNDAMENTALS OF ALGEBRA (- cr.) P: 001 or M001 (with a minimum grade of C) or placement. Intended primarily for liberal arts and business majors. Integers, rational and real numbers, exponents, decimals, polynomials, equations, word problems, factoring, roots and radicals, logarithms, quadratic equations, graphing, linear equations in more than one variable, and inequalities. This course satisfies the prerequisites needed for MATH M118, M119, 13000, 13600, and STAT 30100.

MATH 13000 Mathematics for Elementary Teachers I (3 cr.) P: 11100 or 11000

(with a minimum grade of C-) or equivalent. Fall, spring, summer. Numeration systems, mathematical reasoning, integers, rationals, reals, properties of number systems, decimal and fractional notations, and problem solving.

MATH 13200 Mathematics for Elementary Teachers III (3 cr.) P: 13000 and one year of high school geometry. Fall, spring, summer. Rationals, reals, geometric relationships, properties of geometric figures, one-, two-, and three-dimensional measurement, and problem solving.

MATH 13600 Mathematics for Elementary Teachers (6 cr.) Fall, spring, summer. 13600 is a one-semester version of 13000 and 13200. Not open to students with credit in 13000 or 13200.

MATH 15300 Algebra and Trigonometry I (3 cr.) Fall, spring, summer. 15300-15400 is a two-semester version of 15900. Not open to students with credit in 15900. 15300 covers college-level algebra and, together with 15400, provides preparation for 16500, 22100, and 23100.

MATH 15400 Algebra and Trigonometry II (3 cr.) P: 15300 (with a minimum grade of C) or equivalent. Fall, spring, summer. 15300-15400 is a two-semester version of 15900. Not open to students with credit in 15900. 15400 covers college-level trigonometry and, together with 15300, provides preparation for 16500, 22100, and 23100.

MATH 15900 Precalculus (5 cr.) P: 11100 (with a minimum grade of B) or placement. Fall, spring. 15900 is a one-semester version of 15300-15400. Not open to students with credit in 15300 or 15400. 15900 covers college-level algebra and trigonometry and provides preparation for 16500, 22100, and 23100.

MATH 16300 Integrated Calculus and Analytic Geometry I (5 cr.) P: 15400 or 15900 (with a minimum grade of C) or equivalent, and one year of geometry. Equiv. IU MATH M211. Fall, spring, summer I. Review of plane analytic geometry and trigonometry, functions, limits, differentiation, applications of differentiation, integration, the fundamental theorem of calculus, and applications of integration. An honors option is available in this course. Note: Effective Fall 2008, this course is offered as MATH 16500.

MATH 16500 Analytic Geometry and Calculus I (4 cr.) P: 15900 or 15400 (minimum grade of C) or equivalent, and one year of high school geometry. Fall, spring, summer I. Introduction to differential and integral calculus of one variable, with applications. Conic sections.

MATH 16600 Analytic Geometry and Calculus II (4 cr.) P: 16500 (minimum grade of C). Fall, spring, summer I. Continuation of MATH 16500. Vectors in two and three dimensions. Techniques of integration, infinite series, polar coordinates, surfaces in three dimensions.

MATH 17100 Multidimensional Mathematics (3 cr.) P: 15900 or 15400 (minimum grade of C) or equivalent, and one year of high school geometry. An introduction to mathematics in more than two dimensions. Graphing of curves, surfaces and functions in three dimensions. Two and three dimensional vector spaces with vector operations. Solving systems of linear equations using matrices. Basic matrix operations and determinants.

MATH 22100 Calculus for Technology I (3 cr.) P: 15400 or 15900 (with a minimum grade of C-) or equivalent, and one year of geometry. Fall, spring, summer. Analytic geometry, the derivative and applications, and the integral and applications.

MATH 22200 Calculus for Technology II (3 cr.) P: 22100 (with a minimum grade of C-). Fall, spring, summer. Differentiation of transcendental functions, methods of integration, power series, Fourier series, and differential equations.

MATH 26100 Multivariate Calculus (4 cr.) P: 16400. Equiv. IU MATH M311. Fall, spring, summer. Spatial analytic geometry, vectors, curvilinear motion, curvature, partial

differentiation, multiple integration, line integrals, and Green's theorem. An honors option for this course is available. Note: Effective Fall 2009, this course is offered under an updated course description, as below.

MATH 26600 ORDINARY DIFFERENTIAL EQUATNS (4 cr.) Fall, spring, summer. First order equations, second and nth order linear equations, series solutions, solution by Laplace transform, systems of linear equations.

MATH-M 001 Introductory Algebra (6 cr.) P: Placement test or self election for students who need more time on task. Fall, spring. This is a first course in the study of algebra. Real numbers, algebraic expressions, solving equations, graphing equations, operations with polynomials, factoring polynomials, rational expressions and equations, solutions of systems of equations, radical expressions, and problem-solving strategies.

MATH-M 118 Finite Mathematics (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent00. Fall, spring, summer. Set theory, logic, permutations, combinations, simple probability, conditional probability, Markov chains. An honors option is available in this course.

MATH-M 119 Brief Survey of Calculus I (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent. Fall, Spring, Summer. Sets, limits, derivatives, integrals, and applications. An honors option is available in this course.

Physics

PHYS 15200 Mechanics (4 cr.) Fall, day; Spring, day, night; Summer, day. Statics, uniform and accelerated motion; Newton's laws; circular motion; energy, momentum, and conservation principles; dynamics of rotation; gravitation and planetary motion; properties of matter; and simple harmonic and wave motion. For more information, visit our Web page at webphysics.iupui.edu/introphysics.

PHYS 20000 Our Physical Environment (3 cr.) Fall, night; Spring, night. A nonmathematical introduction to physical concepts and methods by means of examples from daily life and current technological applications.

PHYS 21800 General Physics (4 cr.) Fall, night; Spring, night; Summer, day. Mechanics, conservation laws, gravitation; simple harmonic motion and waves; kinetic theory, heat, and thermodynamics for students in technology fields.

PHYS 21900 General Physics (4 cr.) Fall, night; Spring, night; Summer, day. Electricity, light, and modern physics.

PHYS 25100 Heat, Electricity, and Optics (5 cr.) Fall, day, night; spring, day; summer, day. Heat, kinetic theory, elementary thermodynamics, and heat transfer. Electrostatics, electrical currents and devices. Magnetism and electromagnetic radiation. Optics. For more information, visit the Web site at webphysics.iupui.edu/introphysics.

Psychology

PSY-B 103 Orientation to a Major in Psychology (1 cr.) B103 Orientation to a Major in Psychology (1 cr.) This course will help students establish goals for their academic experience in three areas: career, relationships, and personal life. They will be introduced to psychological resources on campus, the faculty, and student organizations. They also will make a curriculum plan to meet their learning objectives.

PSY-B 104 Psychology as a Social Science (3 cr.) B104 Psychology as a Social Science (3 cr.) Equiv. to IU PSY P102 and PU PSY 120. Fall, Spring, Summer. Introduction to scientific method, individual differences, personality, developmental, abnormal, social, and industrial psychology.

PSY-B 105 Psychology as a Biological Science (3 cr.) B105 Psychology as a Biological Science (3 cr.) Equiv. to IU PSY P101 and PU PSY 120. Fall, Spring, Summer. Research methods and content areas of learning, sensation-perception, psychophysiology, motivation, emotions, and statistics.

PSY-B 252 Topics in Psychology (1-3 cr.) B252 Topics in Psychology (1-3 cr.) Topics in psychology and interdisciplinary applications. May be repeated, provided different topics are studied, for a maximum of 4 credit hours.

PSY-B 292 Readings and Research in Psychology (1-3 cr.) B292 Readings and Research in Psychology (1-3 cr.) P: consent of instructor. Fall, Spring. Independent readings and research on psychology problems. For freshmen and sophomores only.

PSY-B 305 Statistics (3 cr.) B305 Statistics (3 cr.) P: B104 or B105, and 3 credits of mathematics that carry School of Science credit. Equiv. to IU PSY K300, PSY K310, and PU PSY 201. Fall, Spring, Summer. Introduction to basic statistical concepts; descriptive statistics and inferential statistics. Introduction to data analytic software.

PSY-B 307 Tests and Measurement (3 cr.) B307 Tests and Measurement (3 cr.) P: Three (3) credit hours of psychology and B305. Equiv. to IU PSY P336 and PU PSY 202. Overview of statistical foundations of psychological measurement (e.g., test development, norms, reliability, validity). Survey of commonly used assessment instruments (e.g., intelligence/aptitude, personality, academic achievement tests) and applications of psychological testing in different settings (e.g., clinical, industrial/ organizational, school, forensic/legal settings). Recommended for students considering graduate training in clinical, industrial/organizational, school, or related areas of psychology.

PSY-B 310 Life Span Development (3 cr.) B310 Life Span Development (3 cr.) Fall, Spring, Summer. Equiv. to PU PSY 230. Emphasizes the life span perspective of physical and motor, intellectual and cognitive, language, social and personality, and sexual development. Commonalities across the life span, as well as differences among the various segments of the life span, are examined. Theory, research, and practical applications are stressed equally.

PSY-B 311 Introductory Laboratory in Psychology (3 cr.) B311 Introductory Laboratory in Psychology (3 cr.) P: B105 and B305 or consent of instructor. Equiv. to IU PSY P211, and PU PSY 203. Fall, Spring. Introductory laboratory in experimental methods and statistical treatment of data in several areas of psychology; introduction to experimental report writing.

PSY-B 320 Behavioral Neuroscience (3 cr.) B320 Behavioral Neuroscience (3 cr.) P: B105. Equiv. to IU PSY P326 and PU PSY 220. Review of necessary background in neurophysiology and neuroanatomy followed by the relationship of physiology to sensory processes, motivation, and learning. Emphasis on research with animals.

PSY-B 321 CLINICAL WRITING (3 cr.)

PSY-B 325 PROFESSIONAL ETHICS (3 cr.)

PSY-B 328 WORKING WITH FAMILIES (3 cr.)

PSY-B 334 Perception (3 cr.) B334 Perception (3 cr.) P: B105. Equiv. to IU PSY P329 and PU PSY 310. Consideration of the concepts and research in perception. Relation of sense organ systems to human behavior. Some attention to social and cultural factors.

PSY-B 340 Cognition (3 cr.) B340 Cognition (3 cr.) P: B105 or consent of instructor. Equiv. to IU PSY P335 and PU PSY 200. A survey of information processing theories from historical antecedents through current theories. Research methodology and theory will be emphasized throughout the discussion of issues such as perception, attention, memory, reasoning, and problem solving.

PSY-B 344 Learning (3 cr.) B344 Learning (3 cr.) P: B105. Equiv. to IU PSY P325 and PU PSY 314. History, theory, and research involving human and animal learning and cognitive processes.

PSY-B 356 Motivation (3 cr.) B356 Motivation (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P327 and PU PSY 333. Study of motivational processes in human and animal behavior, how needs and incentives influence behavior, and how motives change and develop.

PSY-N 358 Introduction to Industrial/Organizational Psychology (3 cr.) B358 Introduction to Industrial/Organizational Psychology (3 cr.) P: Three (3) credit hours of psychology or consent of instructor. Equiv. to IU PSY P323 and PU PSY 372. This course surveys various aspects of behavior in work situations using the scientist-practitioner perspective. Traditional areas covered from personnel psychology include selection, training, and performance appraisal; areas surveyed from organizational psychology include leadership, motivation, and job satisfaction.

PSY-B 360 Child and Adolescent Psychology (3 cr.) B360 Child and Adolescent Psychology (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P316 and PU PSY 235. Development of behavior in infancy, childhood, and adolescence, including sensory and motor development and processes such as learning, motivation, and socialization.

PSY-B 362 Practicum in Child Psychology (3 cr.) B362 Practicum in Child Psychology (3 cr.) P: consent of instructor. Experience working with children in field setting. May be repeated once.

PSY-B 365 Stress and Health (3 cr.) B365 Stress and Health (3 cr.) This course will familiarize students with the study of physical health within the field of psychology. Topics include the relationship between stress and health, health promotion, health behaviors, chronic illness, and the patient-physician relationship. Research methods in health psychology as well as major theories underlying the field will be examined and evaluated. Psychological variables related to physical health will be examined within the framework of these theories. Practical application of constructs will be emphasized through activities and writing assignments.

PSY-B 370 Social Psychology (3 cr.) B370 Social Psychology (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P320 and PU PSY 240. Fall, Spring, Summer. Study of the individual in social situations including socialization, social perception, social motivation, attitudes, social roles, and small group behavior.

PSY-B 374 Group Dynamics Theory and Research (3 cr.) B374 Group Dynamics Theory and Research (3 cr.) P: B370. An intensive survey of research and theory on the behavior of small groups and the research methods by which groups are studied.

PSY-B 375 Psychology and Law (3 cr.) B375 Psychology and Law (3 cr.) This course provides an overview of the U.S. legal system from a behavioral science perspective. Topics include: careers in psychology and law; theories of crime; police investigations and interrogations; eyewitness accuracy; jury decision-making; sentencing; assessing legal competence; insanity and dangerousness; and the psychology of victims.

PSY-B 376 The Psychology of Women (3 cr.) B376 The Psychology of Women (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P460 and PU PSY 239. A survey of topics in psychology as related to the biological, social, and psychological development of women in modern society.

PSY-B 380 Abnormal Psychology (3 cr.) B380 Abnormal Psychology (3 cr.) Equiv. to IU PSY P324 and PU PSY 350. Fall, Spring, Summer. Various forms of mental disorders with emphasis on cause, development, treatment, prevention, and interpretation.

PSY-B 382 Practicum in Community Psychology (3 cr.) B382 Practicum in Community Psychology (3 cr.) P or C: B370 or B380 and consent of instructor. Experience working with individuals who may have a wide range of psychological problems. Focus is upon both the individual and helping agency as factors in the community.

PSY-B 386 Introduction to Counseling (3 cr.) B386 Introduction to Counseling (3 cr.) P: B104, B310, and B380. This course will help students acquire a repertoire of basic counseling interview skills and strategies and expose students to specific helping techniques. This will be an activity-based course and students will enhance the general-education goals of listening and problem solving.

PSY-B 388 HUMAN SEXUALITY (3 cr.)

PSY-B 394 Drugs and Behavior (3 cr.) B394 Drugs and Behavior (3 cr.) P: B105. Equiv. to PU PSY 428. An introduction to psychopharma-cology, the study of drugs that affect behavior, cognitive functioning, and emotions, with an emphasis on drugs of abuse. The course will explore how drugs alter brain function and the consequent effects, as well as the long-term consequences of drug exposure.

PSY-B 395 ISS IN SUB ABUSE COUNSLG&PREV (3 cr.)

PSY-B 396 Alcohol, Alcoholism, and Drug Abuse (3 cr.) B396 Alcohol, Alcoholism, and Drug Abuse (3 cr.) Provides introduction to the use, misuse, and dependent use of alcohol and other mood-altering drugs. Topics include basic principles of drug action, the behavioral and pharmacological effects of drugs, and the factors that influence use, abuse, and addiction. Addiction assessment, treatment, and treatment outcome also will be covered.

PSY-B 422 Professional Practice (1-3 cr.) B422 Professional Practice (1-3 cr.) P: consent of instructor. Can include a professional internship in the community, peer advising in the psychology advising office, or teaching internship in the department. Faculty mentor must approve and oversee activity. Academic work will be required to earn credit.

PSY-B 424 Theories of Personality (3 cr.) B424 Theories of Personality (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P319 and PU PSY 420. Methods and results of the scientific study of personality, including the development, structure, and functioning of the normal personality.

PSY-B 425 Capstone Laboratory in Personality (3 cr.) B425 Capstone Laboratory in Personality (3 cr.) P: B305, B311 and B424. Demonstrations and experiments in personality research.

PSY-B 452 Seminar in Psychology (1-3 cr.) B452 Seminar in Psychology (1-3 cr.) P: B305 and B311. Topics in psychology and interdisciplinary applications. May be repeated, provided different topics are studied, for a maximum of 6 credit hours.

PSY-B 471 Capstone Laboratory in Social Psychology (3 cr.) B471 Capstone Laboratory in Social Psychology (3 cr.) P: B311 and B305. P or C: B370. Equiv. to IU PSY P421. Observational, correlational, and experimental studies in social psychology.

PSY-B 472 Practicum in Group Dynamics (3 cr.) B472 Practicum in Group Dynamics (3 cr.) P: Six (6) credit hours of psychology and consent of instructor. Equiv. to IU PSY P321. Application in the field of group dynamics through experience as a participant in group sensitivity training.

PSY-B 492 Readings and Research in Psychology (1-3 cr.) B492 Readings and Research in Psychology (1-3 cr.) P: consent of instructor. Equiv. to IU PSY P495 and PU PSY 390 and 391. Fall, Spring, Summer. Independent readings and research on psychological problems.

PSY-B 497 CAPSTONE INDIVIDUAL RESEARCH (3 cr.)

Statistics

STAT 11300 Statistics and Society (3 cr.) Fall, spring. Intended to familiarize the student with basic statistical concepts and some of their applications in public and health policies, as well as in social and behavioral sciences. No mathematics beyond simple algebra is needed, but quantitative skills are strengthened by constant use. Involves much reading, writing, and critical thinking through discussions on such topics as data ethics, public opinion polls and the political process, the question of causation the role of government statistics, and dealing with chance in everyday life. Applications include public opinion polls, medical experiments, smoking and health, the consumer price index, state lotteries, and the like. STAT 11300 can be used for general education or as preparation for later methodology courses.

STAT 30100 Elementary Statistical Methods I (3 cr.) Not open to students in the Department of Mathematical Sciences. Fall, spring, summer. Introduction to statistical methods with applications to diverse fields. Emphasis on understanding and interpreting standard techniques. Data analysis for one and several variables, design of samples and experiments, basic probability, sampling distributions, confidence intervals and significance tests for means and proportions, and correlation and regression. Software is used throughout.

Social Work and Labor Studies

LSTU-L 100 Survey of Unions and Collective Bargaining (3 cr.) This course includes coverage of historical development, labor law basics, and contemporary issues. It also discusses a survey of labor unions in the United States; focusing on their organization and their representational, economic, and political activities.

LSTU-L 101 American Labor History (3 cr.) This course explores the struggles of working people to achieve dignity and security from social, economic, and political perspectives. It also explores a survey of the origin and development of unions and the labor movement from colonial times to the present.

LSTU-L 104 Labor History (3 cr.) This course serves as an orientation for the study of labor history. It explores both critical and historical methodologies based on primary and secondary sources, biases, and interpretations. Discussions focus on selective questions and events.

LSTU-L 110 Introduction to Labor Studies: Labor and Society (3 cr.) This course introduces students to the interdisciplinary and advocacy approach of labor studies. Exploring labor's role in society, the class will look at how unions have changed the lives of working people and contributed to better social policies. Discussions will highlight the relationship of our work lives to our non-work lives and will look at U.S. labor relations in a comparative framework.

LSTU-L 200 Survey of Employment Law (3 cr.) This course explores statutes and common-law actions protecting income, working conditions, and rights of workers. Topics include workers' compensation, unemployment compensation, fair labor standards, Social Security, retirement income protection, and privacy and other rights.

LSTU-L 201 Labor Law (3 cr.) This course reviews a survey of the law governing labor-management relations. Topics include the legal framework of collective bargaining, problems in the administration and enforcement of agreements, and protection of individual employee rights.

LSTU-L 203 Labor and the Political System (3 cr.) This course examines federal, state, and local governmental effects on workers, unions, and labor-management

relations; political goals; influences on union choices of strategies and modes of political participation, past and present; relationships with community and other groups.

LSTU-L 205 Contemporary Labor Problems (3 cr.) This course examines some of the major problems confronting society, workers, and the labor movement. Topics may include automation, unemployment, international trade, environmental problems, minority and women's rights, community relations, and changing government policies.

LSTU-L 210 Workplace Discrimination and Fair Employment (3 cr.) This course examines policies and practices that contribute to workplace discrimination and those designed to eliminate it. It explores effects of job discrimination and occupational segregation. It analyzes Title VII, the Americans with Disabilities Act, and related topics in relation to broader strategies for addressing discrimination.

LSTU-L 220 Grievance Representation (3 cr.) This course looks at union representation in the workplace. It evaluates uses of grievance procedures to address problems and administer the collective bargaining agreement. It also explores analyses of relevant labor law and the logic applied by arbitrators to grievance decisions. Students learn about the identification, research, presentation, and writing of grievance cases.

LSTU-L 230 Labor and the Economy (3 cr.) This course analyses aspects of the political economy of labor and the role of organized labor within it. It emphases the effect on workers, unions, collective bargaining of unemployment, investment policy, changes in technology and corporate structure. It also explores patterns of union political and bargaining responses.

LSTU-L 231 Globalization and Labor (3 cr.) This course explores the globalization of trade, production, and migration and the effects of these processes on American workers. Through reading, discussion, and problem formation, students will critically think about the ways global processes and policies impact American workers' daily lives, analyze existing historical and current justifications for offshore production and the dismantling of barriers to trade and investment, and explore alternatives to these policies.

LSTU-L 240 Occupational Health and Safety (3 cr.) This course reviews elements and issues of occupational health and safety. It emphases the union's role in the implementation of workplace health and safety programs, worker and union rights, hazard recognition techniques, and negotiated and statutory remedies-in particular the OSHA Act of 1970.

LSTU-L 260 Leadership and Representation (3 cr.) This course evaluates organizational leadership issues for union, community, and other advocate organizations. It analyzes leadership styles, membership recruitment, and leadership development. It examines the role of leaders in internal governance and external affairs, including committee building, delegation, negotiations, and coalition building.

LSTU-L 270 Union Government and Organization (3 cr.) This course provides an analysis of the growth, composition, structure, behavior, and governmental processes of U.S. labor organizations, from the local to the national federation level. It considers the influence on unions of industrial and political environments; to organizational behavior in different types of unions; and to problems in union democracy.

LSTU-L 290 Topics in Labor Studies (1-3 cr.) This is a variable-title course. L290 can be repeated for credit with different subjects. The transcript will show a different subtitle each time the course is taken. Some courses focus on contemporary or special areas of labor studies. Others are directed toward specific categories of employees and labor organizations. Inquire at Labor Studies offices.

SWK-L 314 ETHICAL DILEMMAS IN WORKPLACE (3 cr.) This courses explores the ethical decision-making and behavior in a unionized workplace, based on the values and social justice mission of unions. Students will examine what constitutes ethical standards

on issues such as affirmative action, transparency, membership involvement, and democratic procedures. This includes the philosophical and theoretical bases for ethics and discussions on the relationship between law and ethics in dealing with workplace conflict.

SWK-L 315 The Organization of Work (3 cr.) This course examines how work is organized and how jobs are evaluated, measured, and controlled. It explores social and technical elements of work through theories of scientific management, the human relations school of management, and contemporary labor process literature.

SWK-L 320 Grievance Arbitration (3 cr.) P: Recommended only after L220 or with permission of instructor. This course explores the legal and practical context of grievance arbitration, and its limitations and advantages in resolving workplace problems. Varieties of arbitration clauses and the status of awards are also explored. Students analyze research, prepare, and present cases in mock arbitration hearings.

LSTU-L 330 Grievance Arbitration (3 cr.) P: Recommended only after L220 or with permission of instructor. This course uses a political economy framework to explore and compare countries' systems of labor relations, drawing from at least three continents. It analyzes the diverse approaches to the structure of twenty-first century labor law and social policy. It focuses on the role of organized labor in the global economy, patterns of breakdown in the enforcement of labor and employment law, and union and nonunion political and bargaining responses.

SWK-L 350 Issues in Collective Bargaining (3 cr.) This course includes readings and discussions on selected problems. A research paper is usually required.

SWK-L 360 Union Administration and Development (1-3 cr.) This is course covers practical and theoretical perspectives on strategic planning, budgeting, and organizational decision making. It addresses the needs and problems of union leaders by studying organizational change, staff development, and cohesiveness within a diverse workforce. This course may be repeated for up to 3 credits with department approval.

SWK-L 370 LABOR AND RELIGION (3 cr.) This course examines the relationship between religion and the labor movement as it has developed in the United States over the course of the 19th and 20th centuries. Students will analyze the approach taken by religious institutions concerning workers' issues and assess the tradition in which workers of faith connect to more secular concerns for social and economic justice.

SWK-L 380 Theories of the Labor Movement (3 cr.) This course examines various perspectives on the origin, development, and goals of organized labor. Theories include those that view the labor movement as a business union institution, an agent for social reform, a revolutionary force, a psychological reaction to industrialization, a moral force, and an unnecessary intrusion.

SWK-L 385 Class, Race, Gender, and Work (3 cr.) This course provides a historical overview of the impact and interplay of class, race, and gender on shaping U.S. labor markets, organizations, and policies. It examines union responses and strategies for addressing class, race, and gender issues.

SWK-L 420 Labor Studies Internship (1-6 cr.) This course applies classroom knowledge in the field. L420 may be repeated for a maximum of 6 credit hours.

SWK-L 480 Senior Seminar or Readings (3 cr.) This course can be used as a classroom seminar or directed reading course. It addresses current issues, historical developments, and other labor-related concerns. Topics may vary each semester.

SWK-L 490 Topics in Labor Studies (1-3 cr.) This is a variable-title course. L490 can be repeated for credit with different subjects. The transcript will show a different subtitle each time the course is taken. Some courses focus on contemporary or special areas of labor studies. Others are directed toward specific categories of employees and labor

organizations. Inquire at Labor Studies offices.

SWK-L 495 Directed Labor Study (1-6 cr.) This is a variable credit course. L495 may be repeated for a maximum of 6 credit hours. Students arrange to study with an individual labor studies faculty member, designing a course of study to suit their individual and varied needs and interests. The contract might include reading, directed application of prior course work, tutorials, or internships. Competencies are assessed through written papers, projects, reports, or interviews.

SWK-S 100 Understanding Diversity in a Pluralistic Society (3 cr.) Theories and models that enhance understanding of our diverse society. This course provides content about differences and similarities in the experiences, needs, and beliefs of selected minority groups and their relation to the majority group.

SWK-S 141 Introduction to Social Work (3 cr.) Examination of characteristics, function, and requirements of social work as a profession. Emphasis on ideological perspectives of the profession and the nature of professional function and interaction.

SPEA

SPEA-J 101 The American Criminal Justice System (3 cr.) Introduction to the criminal justice system of the United States and its function in contemporary society.

SPEA-J 150 Public Safety in America (3 cr.) The protection of persons and property involves a number of public and private organizations. This course examines the roles that agencies working within the fire services, emergency management, criminal justice, and the private security sector play in securing public safety in the United States.

SPEA-J 301 Substantive Criminal Law (3 cr.) P: J101. R: J201 and J202. The development, limitations, and application of substantive criminal law utilizing the case-study method.

SPEA-J 305 Juvenile Justice (3 cr.) P: J101. This course is designed to provide an overview of the justice system's response to abused, neglected, and dependent children; juvenile misconduct; and delinquent behavior. An extensive review of the development of recent legal changes to the court, options for prevention, treatment of juvenile offenders, and possible system reforms.

SPEA-J 306 The Criminal Courts (3 cr.) P: J101. R: J201 and J202. An analysis of the criminal justice process from prosecution through appeal. The organization and operation of felony and misdemeanor courts are examined. Topics include prosecutorial decision-making, plea bargaining, judicial selection, and the conduct of trials, sentencing, and appeal.

SPEA-J 321 American Policing (3 cr.) P: J101. R: J201 and J202. This course will examine the history, evolution, and organization of policing in the United States. Emphasis is placed on such major contemp-orary issues as the police role, discretion, use of force, corruption, accountability, and community policing.

SPEA-J 331 Corrections (3 cr.) P: J101. R: J201 and J202. This course examines the historical development of the American correctional system and the study of administration of local, state, and federal corrections programs, including jails, probation, community corrections, and prisons. Includes the study of punishment rationales, current correctional policies, and possibilities for reform.

SPEA-V 170 Introduction to Public Affairs (3 cr.) Broad coverage of public affairs through critical and analytical inquiry into policy making at all levels of government. Particular emphasis on intergovernmental relations as they affect policy in the federal system. Credit not given for both V160 and V170.

State Wide Technology

CGT 11000 Technical Graphics Communication (0 cr.) Class 2, Lab 2. An introductory design course for computer graphics majors. Students develop an understanding of the basic design elements and principles, composition and typography through exercises and projects. The focus is on visual thinking, exploring the relationship between type and image, and developing multiple solutions to a given problem.

CAND 99100 Candidate (0 cr.) If you are an undergraduate, you will be given permission to register for CAND 99100 within one week of applying for graduation. Graduate students do not require course permission to register.

Industrial Technology

CSCI 23000 Computing I (4 cr.) The context of computing in history and society, information representation in digital computers, introduction to programming in a modern high-level language, introduction to algorithm and data structures, their implementation as programs.

CSCI 24000 Computing II (4 cr.) Continues the introduction of programming began in CSCI 230, with particular focus on the ideas of data abstraction and object-oriented programming. Topics include programming paradigms, principle of language design, object-oriented programming, programming and debugging tools, documentation, recursion, linked data structures, and introduction to language translation.

CSCI-N 100 Introduction to Computers and Computing (3 cr.) No computing experience assumed. How computers work, word processing, spreadsheets, file management, and Internet skills. Emphasis on problem-solving tech-niques. Lecture and laboratory. Credit given for only one of CSCI N100, CPT 10600, CIT 10600, or BUS K201.

CSCI-N 201 Programming Concepts (3 cr.) Summary of basic computing topics, problem solving techniques, and their application to computing. Introduction to programming concepts with a focus on language-independent principles, such as algorithm design, debugging strategies, essential control structures, and basic data structure concepts. Lecture and laboratory.

CSCI-N 207 Data Analysis Using Spreadsheets (3 cr.) Summary of basic computing topics, problem solving techniques, and their application to computing. Introduction to programming concepts with a focus on language-independent principles, such as algorithm design, debugging strategies, essential control structures, and basic data structure concepts. Lecture and laboratory.

CSCI-N 241 Fundamentals of Web Development (3 cr.) Introduction to writing content for the Internet and World Wide Web. Emphasis on servers, hand-coded HTML, Cascading Style Sheets, and extending HTML with other Web technologies. Lecture and laboratory.

CSCI-N 301 Fundamental Computer Science Concepts (3 cr.) An introduction to an emerging technology in the computing field. It will emphasize the various problems technology helps to solve and specific problem-solving strategies. Lecture and laboratory. May be repeated for credit.

CSCI-N 305 C Language Programming (3 cr.) The basics of computer programming concepts using the C programming language. Emphasis on problem solving and algorithm implementation using a universal subset of the C programming language. Lecture and laboratory.

CSCI-N 305 Visual Basic Programming (3 cr.) An introduction to programming with a focus on rapid application development environments, event-driven programming, and

programming in the Windows environment. Course will demonstrate how the major application types (spreadsheets, databases, text editors) are written. Lecture and laboratory.

CSCI-N 341 Introduction to Client-Side Web Programming (3 cr.) Introduction to programming with a focus on the client-side programming environment. Programming using languages commonly embedded in Web browsers. Lecture and laboratory.

CSCI-N 342 Server-Side Programming for the WebSide Web Programming (3 cr.) Designing and building applications on a Web server. Focuses on the issues of programming applied to Web servers. Emphasis on relational database concepts, data design, languages used on the server, transaction handling, and integration of data into Web applications.

CSCI-N 351 Introduction to Multimedia Programming (3 cr.) An integration of computing concepts and multimedia development tools. An introduction to the science behind multimedia (compression algorithms and digital/audio conversion). Use of authoring tools to create compositions of images, sounds, and video. Special emphasis given to using the Web as a multimedia presentation environment. Lecture and laboratory.

CSCI-N 355 Introduction to Virtual Reality (3 cr.) Explore concepts of 3D imaging and design including primitive shapes, transformations, extrusions, face sets, texture mapping, shading, and scripting. Lecture and laboratory.

Industrial Technology

IET 10400 Industrial Organization (3 cr.) A detailed survey of organizational structures, operational, financial, marketing, and accounting activities; duties of management, planning, control, personnel, safety, wages, policy, and human factors necessary for effective management. Not open to students taking, or with credit in, IE 36600.

Industrial Technology

IET 10400 Industrial Organization (3 cr.) A detailed survey of organizational structures, operational, financial, marketing, and accounting activities; duties of management, planning, control, personnel, safety, wages, policy, and human factors necessary for effective management. Not open to students taking, or with credit in, IE 36600.

IT 21400 Introducation to Lean Manufacturing (3 cr.) Lean manufacturing is a systematic approachto eliminating non-value added activities throughout a production system. Five basic principles characterize a lean production system: value definition, value stream mapping, flow optimization,pull production, and continuous improvement.

IT 23000 Industrial Supply Chain Management (3 cr.) A study of industrial supply chains. Emphasis is on in-plant shipping and receiving functions; modes of distribution; functions of, and services provided by supply chains. Emphasis is placed on how manufacturers, distributors and end users can provide value in the supply chain.

IT 33200 Purchasing, Inventory, and Warehouse Management (3 cr.) A course designed to developunderstanding of types of warehouses, methods of organizing the warehouse environment, and determining efficient inventory control procedures. Purchasing of products, storage of inventory, placement of inventory and other internal logistics management topics will be explored. Real world projects conducted in lab environment will be utilized.

IT 34200 Introduction to Statistical Quality (3 cr.) Basic concepts of quality systems in business and manufacturing settings are presented. Basic statistical methods as applied

to quality control, and an introduction to sampling plans are included. Field trips may be required.

IT 34500 Automatic Identification and Data Capture (3 cr.) The course provides a basic understanding of automatic identification and data capture technologies and concepts with regard to how their deployment affects business and industry. Laboratory applications of bar codes, radio frequency identification, card technologies, and biometrics will be emphasized.

IT 35100 Advanced Industrial Safety And Health Management (3 cr.) An introduction to OSHA and standards development for occupational health in general industry. Special emphasis is on fire protection and egress, flammable and combustible liquids, electrical, personal protective equipment, machine guarding, industrial hygiene/blood borne pathogens, ergonomics, and ISO 9000/14000 integration.

IT 38500 Industrial Ergonomics (3 cr.) P: Undergraduate level MA 15900 Minimum Grade of D- or (Undergraduate level MA 15300 Minimum Grade of D- and Undergraduate level MA 15400 Minimum Grade of D-). A course designed to focus on work design and ergonomics in manufacturing. Specific attention will be focused on introducing the terminology and the techniques used in work design and on the fundamental concepts embodied in industrial ergonomics. During scheduled laboratory times, exercises will permit the student to apply the concepts of industrial ergonomics.

IT 44200 Production Planning (3 cr.) A study of industrial organization and management, research and development, production, personnel, and sales. Examples of the procedures necessary to provide a product or service are included. Field trips may be required

IT 45000 Production Cost Analysis (3 cr.) P: Undergraduate level MA 15900 Minimum Grade of D- or (Undergraduate level MA 15300 Minimum Grade of D- and Undergraduate level MA 15400 Minimum Grade of D-). An introduction to financial statements and to the study of the costs of production in terms of break-even and least-cost alternatives, including present and future costs when related to the time value of money, budgeting, labor and overhead, production, cost control, and the role of the supervisor and the engineering technologist to cost control. Computer applications for determining rate of return for complex problems are introduced.

Mechanical Engineering Technology

MET 10200 PRODUCTION DESIGN & SPECS (3 cr.) P: CGT 11000 and MET 16200. The design, evaluation, and documentation of engineering specifications required of manufacturability and assembly are introduced. Emphasis is on CAD-based details, assemblies, design layouts, equipment installations, and related industrial practices.

MET 11100 Applied Statics (3 cr.) Class 2, Lab 2. P: 10500. C: MATH 15400. A study of force systems, resultants and equilibrium, trusses, frames, centroids of areas, and center of gravity of bodies.

MET 14200 Manufacturing Processes (3 cr.) Class 2, Lab 3; or Class 3. P: 14100. Basic casting, forming, and joining processes are surveyed. The course emphasizes the selection and application of various processes.

MET 14300 MATERIALS AND PROCESSES I (3 cr.) P: Prerequisites: MA 22300 (may be taken concurrently) and MET 16200 and (PHYS 21800 or PHYS 22000.) Heat/Power is an introduction to the principles of thermodynamics and heat transfer. Basic thermodynamic processes are used to evaluate the performance of energy-based systems such as internal combustion engines, power plants, and refrigeration equipment.

MET 14400 MATERIALS AND PROCESSES II (3 cr.) An overview of structures,

properties, processing, and applications of polymers, composites, laminates, biomaterials, green materials, nanomaterials, and pharmaceuticals commonly used in industry is presented. Problem solving skills are developed in the areas of material selection, evaluation, measurement, and testing. This course serves as the gateway for the MET and MFET programs.

MET 16000 ANALYTICAL & COMP TOOLS IN MET (3 cr.) The skills needed to solve technical problems in mechanical engineering technology are developed. Instruction is given in analytical and computational problem-solving techniques. The electronic calculator, the factor-label method of unit conversions, engineering graphs, and the computer are used to solve problems. Computer emphasis is on spreadsheet analysis, graphics, and generation of technical reports through the integrated use of software packages. Credit will not be granted for MET 16000 and MET 16200 or MET 16300.

MET 21100 Applied Strength of Materials (4 cr.) Class 3, Lab 2; or Class 4. P: 11100 and 16300 or 16000. C: MATH 22100. The principles of strength, stiffness, and stability are introduced and applied primarily to mechanical components.

MET 21300 Dynamics (4 cr.) Class 2, Lab 2; or Class 3. P: 11100. C: MATH 22100. Kinematics and kinetics principles of rigid-body dynamics are introduced. Emphasis is on the analysis of bodies in plane motion.

MET 21400 Machine Elements (3 cr.) P: 21100 and PHYS 21800. Class 3. The theories and methods of statics, dynamics, and strength of materials applied to the selection of basic machine components. The course will develop the fundamental principles required to select the individual elements making up a machine.

MET 22000 HEAT/POWER (3 cr.) P: (Undergraduate level MET 16200 Minimum Grade of D- or Undergraduate level MET 16000 Minimum Grade of D-) and (Undergraduate level PHYS 22000 Minimum Grade of D- or Undergraduate level PHYS P2010 Minimum Grade of D- or Undergraduate level PHYS P2020 Minimum Grade of D- or Undergraduate level PHYS 21800 Minimum Grade of D- or Undergraduate level PHYS 20100 Minimum Grade of D- or Undergraduate level PHYS 17200 Minimum Grade of D- or Undergraduate level PHYS 15200 Minimum Grade of D-) or (Undergraduate level PHYS 16200 Minimum Grade of D- and Undergraduate level PHYS 16300 Minimum Grade of D-) and (Undergraduate level MA 22100 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 16100 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 16300 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 16500 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MATH M1190 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 22700 Minimum Grade of D- [may be taken concurrently]). Heat/Power is an introduction to the principles of thermodynamics and heat transfer. Basic thermodynamic processes are used to evaluate the performance of energy-based systems such as internal combustion engines, power plants, and refrigeration equipment.

MET 23000 Fluid Power (3 cr.) P: 11100, PHYS 21800. Class 2, Lab 2; or Class 3. This course consists of the study of compressible and incompressible fluid statics and dynamics as applied to hydraulic and pneumatic pumps, motors, transmissions, and controls.

MET 24200 Manufacturing Processes II (3 cr.) P: MET 14100, MATH 15900 or 15400 or MET 16200, CIT 13500 or MET 16300. Class 2, Lab 2. This course surveys the manufacturing processes and tools commonly used to convert cast, forged, molded, and wrought materials into finished products. It includes the basic mechanisms of material removal, measurement, quality control, assembly processes, safety, process planning, and automated manufacturing. Not open to students having credit for 13500 or 28100.

MET 24500 MANUFACTURING SYSTEMS (3 cr.) P: (Undergraduate level MET 14300 Minimum Grade of D- and Undergraduate level CGT 11000 Minimum Grade of D-) or (Undergraduate level MET 14400 Minimum Grade of D- and Undergraduate level CGT

11000 Minimum Grade of D-) or (Undergraduate level MET 14300 Minimum Grade of D- and Undergraduate level CGT 16300 Minimum Grade of D-) or (Undergraduate level MET 14400 Minimum Grade of D- and Undergraduate level CGT 16300 Minimum Grade of D- . This course surveys the manufacturing processes and tools commonly used to convert cast and molded, formed, and joined materials into finished products. It includes the fundamentals of material removal, measurement, statistical quality control, assembly processes, process planning and optimization, CNC programming and automated manufacturing.

MET 29000 SPECIAL TOPICS IN MET (3 cr.) Hours, subject matter, and credit to be arranged by faculty. Group instruction in new or specialty areas of Mechanical Engineering Technology is provided by MET faculty, subject to MET curriculum subcommittee approval.

MET 31300 APPLIED FLUID MECHANICS (3 cr.) P: (Undergraduate level MA 22200 Minimum Grade of D- or Undergraduate level MATH 22200 Minimum Grade of D- or Undergraduate level MA 16200 Minimum Grade of D- or Undergraduate level MA 22800 Minimum Grade of D- or Undergraduate level MA 16600 Minimum Grade of D-) and Undergraduate level MET 22000 Minimum Grade of D- and (Undergraduate level MET 23000 Minimum Grade of D- or Undergraduate level MET 33000 Minimum Grade of D-). The fundamental principles of fluid mechanics are developed, including properties of fluid, pressure, hydrostatics, dynamics of fluid flow, friction losses, and sizing of pipes. Emphasis is on problem solving.

MET 34000 Piping and Plumbing Design (3 cr.) P: 22000. Class 3. Design of plumbing systems, including losses in pipes, fittings, nozzles, orifices, etc. Includes steam, water, and oil systems. Piping handbooks and catalogs are used in conjunction with the State of Indiana Plumbing Code.

MET 34600 ADV MATERIALS IN MANUFACTURING (3 cr.) P: (Undergraduate level CHM 11100 Minimum Grade of D- or Undergraduate level CHM 11500 Minimum Grade of D-) or (Undergraduate level CHEM C1010 Minimum Grade of D- and Undergraduate level CHEM C1210 Minimum Grade of D-) or (Undergraduate level CHEM C1050 Minimum Grade of D- and Undergraduate level CHEM C1250 Minimum Grade of D-) and (Undergraduate level MET 24200 Minimum Grade of D- or Undergraduate level MET 24500 Minimum Grade of D- or Undergraduate level MET 33500 Minimum Grade of D- or Undergraduate level MFET 13500 Minimum Grade of D-) and (Undergraduate level MET 21100 Minimum Grade of D- or Undergraduate level MET 21200 Minimum Grade of D-). Metals, polymers, ceramic, and composite materials are studied. Crystal structure, molecular behavior, and the effects of various processes on material properties are considered. Course emphasizes the development and control of material properties to meet engineering requirements and specifications.

MET 42600 Internal Combustion Engines (3 cr.) Class 2, Lab 3. P: 22000. A study of the spark ignition, compression ignition, and continuous-burning internal combustion engines.

MET 49900 MECH ENGR TECH (0-9 cr.) Class 0-4, Lab 0-9. Hours and subject matter to be arranged by staff. Course may be repeated for up to 9 credit hours.

Industrial Technology

MUS-Z 393 HISTORY OF JAZZ (- cr.) Emphasis on jazz as a way to better understand the history and culture of America by examining the periods, major performers and composers, trends, influences, stylistic features, and related materials.

Organizational Leadership

OLS 25200 Human Behavior in Organizations (3 cr.) Class 3. Study of individual and

group behavior in organizations. Special emphasis on typical supervisory relationships.

OLS 27400 Applied Leadership (3 cr.) Class 3. Introduction to and overview of the fundamental concepts of supervision. Emphasis on the supervisor's major functions and essential areas of knowledge, relations with others, and personal development.

OLS 28400 LEADERSHIP PRINCIPLES (3 cr.) An in-depth study of a sequence of manager actions that influence employees to achieve desired performance results. How these manager actions are transformed by employers into desired performance is also covered.

OLS 33100 Occupational Safety and Health (3 cr.) Class 3. Aspects of occupational safety and health that are essential to the first-line supervisor. Emphasis on economic, legal, and social factors related to providing a safe and healthful working environment.

OLS 34500 CRITICAL THINKNG-ORGANIZATIONS (3 cr.) P: OLS 38600 & 38800 This course focuses on systems thinking and the understanding of research design and measurement theory used in solving organizational and human resource development problems. The emphasis is on applied methodology rather than on statistical issues, with the intent of the student becoming an effective consumer of information. The student will leam how to report fIndings in a practical and influential manner. Includes the importance of knowledge management issues in organizations.

OLS 35100 INNOVATION & ENTREPRENEURSHIP (3 cr.) P: Undergraduate level OLS 27400 Minimum Grade of C and (Undergraduate level MGMT 20000 Minimum Grade of D- or Undergraduate level BUS A2010 Minimum Grade of D-). An in-depth study of innovation in existing organizations as well as entrepreneurship in start-up businesses, franchises, family-owned firms, and other business formats.

OLS 37500 Training Methods (3 cr.) P: 25200 and 27400 or consent of department. This course teaches the fundamentals of the design facilitation and evaluation of formal training and development programs. Understanding the way people learn jobs skills is emphasized.

OLS 37600 HUMAN RESOURCES ISSUES (3 cr.) P: OLS 25200 and 27400 Analysis and discussion of case problems concerning typical leadership and personnel situations that impact upon the supervisor/manager. Emphasis directed toward development of attitude, philosophy, analytical ability, and problem-solving skills within the working environment.

OLS 37800 Labor Relations (3 cr.) This course teaches the regulations concerning management, labor, the collective bargaining agreement, and grievance and arbitration procedures.

OLS 38600 LEADERSHIP ORGANIZATL CHANGE (3 cr.) P: OLS 25200 and 27400 A survey of the concepts that provide a foundation for the understanding of leadership and its relationship to the management of organizational change, with special emphasis on managing the human side of quality improvement.

OLS 44000 LEADING WITH INTEGRITY (3 cr.) P: OLS 38600 and 38800 An investigation of ethical problems in business practice. Topics include personal morality in profIt-oriented enterprises; codes of ethics; obligations to employees and other stakeholders; truth in advertising; whistle-blowing and company loyalty; regulation; self and government; the logic and future of capitalism. Emphasis on business law and legal impacts on ethical decisions.

OLS 45000 PROJECT MGMT FOR ORG & HR DEV (3 cr.) P: Undergraduate level OLS 38600 Minimum Grade of C and Undergraduate level OLS 38800 Minimum Grade of C. An introduction to project management concepts and practices in tbe context of human resource development projects.

OLS 45600 LEADRSHP IN GLOBAL ENVIRONMENT (3 cr.) P: Undergraduate level OLS

38600 Minimum Grade of C and Undergraduate level OLS 38800 Minimum Grade of C. Exploration of leadership strategies for organizations engaged in international business. Includes understanding of cultural differences and diverse business practices, and challenges of competing in a global marketplace.

OLS 46700 SERVICE LEARNING (3 cr.) P: OLS 38600 and 38800 - For organizational leadership and supervision majors only. Instructor consent required. Credit awarded upon the completion of department-approved project. (May be repeated for up to six credits.) An instructor-directed practicum designed to combine University study with work experience directly related to the student's plan of study. Designed to be scheduled during a regular semester.

OLS 47600 Compensation Planning and Management (3 cr.) Class 3. Focuses on the management of employee compensation. Examines the current state of compensation management and implications of recent theoretical and research developments related to compensation decisions. Gives each student the opportunity to develop a compensation package.

OLS 47700 Conflict Management (3 cr.) This course provides students with a firm understanding of the theory and context as they relate to front-line supervision and managing conflict in the workplace including communicating with others, collaborating, negotiating effective outcomes, mediating disputes, leading teams, and handling employee relations issues.

OLS 47900 Staffing Organizations (3 cr.) Class 3. A detailed look at the recruiting function of organizations to give the student a sense of the challenges of recruiting qualified employees.

OLS 48400 LDRSHP STRAT FOR QUAL/PRDCTY (3 cr.) P: IT 34200, OLS 38600 and 38800 A study of how organizational leaders create an environment conducive to high levels of employee self-motivation, quality, and productivity. Actual case situations are used to illustrate the application of course content.

OLS 48700 Leadership Philosophy (3 cr.) P: 25200 and 27400/37400. Class 3. This course facilitates the understanding and practice of various leadership roles required in supervisory situations. Students, through applying group dynamics and leadership theory, will develop new skills, capabilities, and understandings. Students will have fundamental shifts in their thinking about traditional leadership and in their ability to function in new leadership styles.

OLS 49900 SPECIAL TOPICS IN OLS (3 cr.) P: Instructor consent and departmental approval. (May be repeated for up to six credits.) Supervised individual research on appropriate topics.

Industrial Technology

TCM 36000 COMM IN ENGINEERING PRACTICE (- cr.) Class 1, Recitation 2. P: ENG W131 and COMM R110 or equivalents; junior standing or consent of instructor. The application of rhetorical principles to written and oral communication in the engineering professions. Planning, drafting, and revising professional engineering reports; planning and delivering oral presentations; organizing information; developing persuasive arguments.

Tourism, Convention, and Event Management

TCEM 100 Introduction to Tourism Studies (3 cr.) Travel, trends, travel-modes, and economic impact on destination area. Emphasis on local, regional, and national tourism.

TCEM 112 Tourism and Hospitality Management Principles (3 cr.) The principles of planning, organizing, directing and controlling as applied to the hospitality service

industry. Topics relating to motivation and leadership will be stressed. Issues of organizational change, organizational effectiveness and the nature of managerial work will be addressed.

TCEM 112 Tourism and Hospitality Management Principles (3 cr.) The principles of planning, organizing, directing and controlling as applied to the hospitality service industry. Topics relating to motivation and leadership will be stressed. Issues of organizational change, organizational effectiveness and the nature of managerial work will be addressed.

TCEM 171 Introduction to Convention/Meeting Management (3 cr.) An overview of the conventions, expositions and meetings industry. Focus will be on the operational aspects of various industry segments and the intra-industry interaction of each.

TCEM 172 The Development and Management of Attractions (3 cr.) An examination of the process of developing visitor attractions and a discussion of the main issues involved in their management.

TCEM 181 Lodging Operations (3 cr.) Concepts of organization, communication, ethics and policy formulation in the front office. Introducing the basic techniques and trends in systems and equipment available to meet the needs of the management and the guest.

TCEM 191 Sanitation and Health in Food Service, Lodging, and Tourism (3 cr.) The application of sanitary and public health engineering principles to food service and lodging operations.

TCEM 210 Special Event Management (3 cr.) Course topics include planning for social events such as themed parties, weddings, balls, fundraiser recognition and entertainment events.

TCEM 210 Special Event Management (3 cr.) P: TCEM 171 Course topics will include planning for social events such as themed parties, weddings, or balls, planning for fund raiser events, planning recognition events, and planning entertainment events. P: TCEM 171.

TCEM 219 Management of Sports Events (3 cr.) Amateur or professional sport event planning will include discussion of site selection, logistics, personnel, marketing, economics, and legalities of hosting an event.

TCEM 231 Tourism and Hospitality Marketing (3 cr.) Development, use, and evaluation of effective merchandising, advertising, and public relations techniques in the hospitality and tourism industries.

TCEM 252 Promotional Communications (3 cr.) P: ENG-W 231 Provides information on the field of personal and public relations. Explores effective public relations methods. Focuses on the relationship-oriented decisions a public relations professional must make based upon different circumstances that arise within an organization.

TCEM 271 Mechanics of Meeting Planning (3 cr.) P: TCEM 171 An analysis of details pertinent to the organization and execution of a meeting. Topics include finances and contracts, site selection, program development, marketing, evaluation and wrap-up.

TCEM 310 Event Catering Management (2 cr.) Exploration of off premise and on premise catering requirement. Concept of event food management including menu planning, budget preparation, logistics management, guest relations and marketing.

TCEM 312 Human Resource Management for the Service Industries (3 cr.) P: TCEM 112 The concepts of management of people for effective operation of institutions involving supervisory development and communications; the pretesting, training, and evaluating of employees; and the development of attitudes and morale of people working together.

TCEM 328 Introduction to Microbrewing (3 cr.) P: 21 years of age This course deals with the principles of microbrewing, and each student will learn the basic concepts necessary to create beer. In this sense, students should come away from this class with the knowledge to build his or her own microbrewery. As well, this class teaches a general appreciation for brewing and beers around the world. P: 21 years of age.

TCEM 329 Sports Management (3 cr.) The application of tourism marketing principles and activities will be analyzed in the content of effective tourism marketing.

TCEM 334 Cultural Heritage Tourism (3 cr.) Cultural and heritage tourism balances visitor interests and needs against protecting cultural and heritage resources. This course examines the range of cultural and heritage assets that can become viable tourism attractions and looks at ways of linking quality cultural heritage tourism to community development. Special emphasis will be placed on Indiana cultural and heritage tourism

TCEM 341 Financial Analysis and Decision Making in Tourism, and Hospitality Operations (3 cr.) P: TCEM 241 Managerial and financial analyses of numerical data used for decision-making. Consideration of systems, techniques, information types, and presentational forms used by hospitality management. Emphasis on situations oriented to the hospitality industry. P: TCEM 241.

TCEM 362 Economics of Tourism (3 cr.) P: TCEM 100 C: ECON E201 To discuss the economic impact of travel on tourism's various sectors, and the quantitative methods that can be applied to travel forecasting and tourism principles.

TCEM 371 Convention Sales and Service (3 cr.) P: TCEM 171 This course is designed as an in-depth analysis of convention and facility sales and service. The course will enable meetings and events from the pre-planning through post event evaluation from the supplies perspective. Topics include marketing and advertising a facility property, organizing a sales staff, selling to different markets and contract/legal issues.

TCEM 372 Global Tourism Geography (3 cr.) P: TCEM 172 C: GEOG 300 ELEC. Analysis of U.S. and world travel destinations, including the exploration of principal geographic features, population centers and attractions, customs and traditions, habits, festivals, and events, as these relate to the hospitality and travel industry. The major airline and airport/city codes in North America and overseas are also covered.

TCEM 377 Exhibit Marketing (3 cr.) A successful exhibit can be one of the most powerful sales and marketing tools in any company's arsenal. This course is designed to help students through every phase of the endeavor-from the initial planning stage to implementation and post-show follow-up.

TCEM 382 Popular Travel Trends (3 cr.) Development of an understanding of the patterns, principles and management of international travel to popular tourist destinations.

TCEM 471 International Meeting Planning (3 cr.) P: TCEM 171 The organization and production of international corporate business meetings, seminars, incentive trips and customer events using innovative and cost-effective programs that address changing business needs.

TCEM 477 Non Profit Meeting Management (3 cr.) P: TCEM 171 Focuses on basic aspects and skills involved in planning and managing non-profit meetings and conventions. Examines sequences of events from the conceptual state of the first meeting plan through completion of the event.

TCEM 482 Travel to Exotic Destinations (3 cr.) Development of an understanding of the principles, patterns and management of international travel to exotic destinations.

TCEM 483 Ecotourism (3 cr.) Course will introduce students to the history, principles, marketing, planning, and management of ecotourism activities and development which promotes environmental awareness and adds economic benefits.

University College

UCOL-U 110 First-Year Seminar (1-2 cr.) All learning communities share a common set of learning objectives that address issues of transition to the university environment. This first-year seminar is offered in a variety of formats, including a freestanding one credit course, a similar course linked to a general education requirement, and with the transition learning objectives embedded in a departmental introductory course. Learning communities are designed to assist entering students as they form connections with the IUPUI community, including other students, faculty, and advisors in a prospective major. Different learning community formats are sponsored by the various academic units, and the learning community may consist of a single course or a pair of linked courses.

UCOL-U 210 CAREER CONNECTIONS (- cr.) This course is designed to assist University College students in the major/career exploration and selection process. Especially targeted are students who are beyond their first year with less than 56 credit hours and who want or need to change majors or to declare a major. The course is designed to help students develop and execute a personalized plan of major and career exploration. This will be encouraged by using the first eight weeks of weekly class meetings to develop an individualized exploration contract and then using the second eight weeks to implement that plan outside of class. Students will also meet individually with the instructor and academic/career advisor. Through the course emphasis on experiential learning, students will be making connections with people, activities, and resources that will facilitate a more realistic approach to major/career decision making.

BUCO-A 501 Intro to Financial Accounting (1 cr.) [S/F grading approved but has always been graded here] Develops concepts and procedures essential for the preparation and interpretation of general purpose financial statements directed to users external to the enterprise. Critical analysis of contemporary financial accounting and reporting issues.

BUCO-A 524 Managing Accounting Information for Decision-Making (3 cr.) P: A201 or equivalent. Provides a user-oriented understanding of how accounting information should be managed to ensure its availability on a timely and relevant basis for decision making. Focus is on cost-benefit analysis for evaluating potential value-added results from planning, organizing, and controlling a firm's accounting information. Group participation and computer support is used extensively.

BUCO-D 594 International Competitive Strategy (3 cr.) This capstone course seeks to develop an understanding of the contemporary challenges and opportunities associated with developing global strategies. In light of recent developments in the global marketplace, old ideas about competitive strategy and implementation have become largely obsolete. Through a study of competitive industry analysis, competitor analysis and cooperative alliance analysis, we will gain a grasp of the basic principles that are necessary in thinking about competing in a global business environment.

BUCO-D 595 International Management (3 cr.) This course focuses on developing skills in managing international alliances. Alliances, both domestic and international, are increasingly becoming central to a firm’s competitive strategy and thus demands executives who can strategically find partners, negotiate strategic alliances, and work with them to create value. The course may also cover a wide range of joint ventures and strategic alliances including purely domestic arrangements.

BUCO-F 523 Financial Management (3 cr.) Provides a working knowledge of the tools and analytical conventions used in the practice of corporate finance; establishes an understanding of the basic elements of financial theory to be used in application of analytical reasoning to business problems; and explores the interrelationship among corporate policies and decisions. Course work will include weekly problem sets, and use of PC spreadsheets to develop financial models for cases focusing on funds requirement.

BUCO-F 570 International Financial Markets (3 cr.) P: F 523. This course examines the international financial markets in which firms and investors operate and discusses how to assess the opportunities and risks of those markets. Topics to be discussed include balance of payments, international arbitrage relationships, exchange rate determination, currency crises, and international asset diversification.

BUCO-G 511 Microeconomics for Managers (3 cr.) Economic decision making in the business firm, the strategic interaction of business firms in industries, the purchasing and consumption behavior of individual consumers and consumers as a group, and the

influence of public policy on market outcomes. Development of a fluency with the language of economics and a strong economic intuition, understanding of selected economics-based decision-making tools and the impact and interaction of the structure of an industry on competition, analysis of intra-industry rivalry, and improved understanding of public policy issues. Emphasis on the logical foundations of economic analysis and managerial decision-making. Will promote understanding and application of various quantitative measures.

BUCO-G 512 Macroeconomics for Managers (1.5 cr.) This course develops a framework to analyze the external economic environment and to understand the major factors that cause macroeconomic change. The effects of monetary, fiscal and trade policies in the U.S. will be examined with an awareness of the interdependency between world economies. Emphasis will be placed on integrating the implications of macroeconomic policy to the firm's capital decisions. Will promote the understanding and application of various quantitative measures.

BUCO-G 595 Country Analysis and International Management (1.5 cr.) P: G512. More and more business is conducted outside of the United States. To assess opportunity in a foreign country, managers must have tools to forecast a country's political and economic performance. This course employs a case method curriculum that endows students with knowledge on how to measure national performance, identify a nation's economic policy strategy, and explain the logic of a strategy in terms of cultural and institutional context. Concepts from political economy and economic growth theory are blended to yield general insights that a manager can apply in analysis of any country. Foreign direct investment, economic reform and planning, regulation of market activity, and political risk are specific topics of focus. Countries of study include China, Japan, India, and Russia. Students leave the course with appreciation of different ways to define and achieve national prosperity.

BUCO-J 501 Developing Strategic Capabilities (3 cr.) Offers an introduction to tools for strategic management. Provides an introductory view of the complexities involved in determining long-term strategies. Examines the dynamics of the competitive environment, how the pace and the direction of industry change are influenced by the resources, capabilities and competitive interactions of rival firms.

BUCO-J 506 Leadership and Ethics (3 cr.) P: J501. Modern businesses operate in an increasingly interdependent and dynamic environment. The modern, large firm is the major institution in most contemporary industrialized societies. Many actions of firms have major impacts on society as a whole, as well as on specific stakeholders. Corporate actions are increasingly subject to media, public and government scrutiny. The nature of the constantly changing relationship between business and its major constituencies is the focus of the course. The ethical, political, economic, social, and technological considerations of various managerial decisions are investigated. The role of ethical leadership and how it relates to corporate purpose and responsibility will be a major theme of this course.

BUCO-K 501 Intro to Stat Theory in Economics (1 cr.) [S/F grading approved but has always been graded here] Fulfills the statistics prerequisite for entering MBA students. A pass-fail, self-paced review covering the proper use and interpretation of essential statistical techniques in business situations. Provides a working knowledge of probability, quality control procedures, and regression analysis, with emphasis on solving problems using Microsoft Excel. This course will use Excel and assumes you have had some exposure to elementary statistics such as means (averages) and histograms. It also assumes you already know the basics of Microsoft Excel: how to select ranges, enter formulas and sort data.

BUCO-L 512 Law and Ethics in Business (3 cr.) The objective is to provide the student of management with that knowledge of the American legal system, its processes, and the substantive law itself by which is necessary to the making of informed and effective

business decisions. Because the law develops and evolves in response to changing social, economic, political, and technological forces, and because business decisions often carry long-lasting as well as delayed effects, this course will emphasize the study of legal change. It is hoped that consideration of past legal developments will give prospective managers sufficient insight into the dynamics of this process to enable them to predict as soundly as possible the future legal environment in which their present decisions will bear fruit.

BUCO-M 501 Strategic Marketing Management (3 cr.) An introduction to the process of creating a market-driven organization. Specific topics include marketing strategy, market research and analysis, and the development of products and services, pricing, distribution and promotion. The course employs lecture, classroom discussion, case analyses, and field research projects.

BUCO-M 594 Global Marketing (3 cr.) This course emphasizes principles and practices of marketing in the contemporary global environment. The material covers both US and foreign companies doing business in various countries around the world. Students gain understanding of similarities and differences in the external marketing environment, different types of risks and challenges in doing business internationally, and the implications of all these factors for developing marketing strategies.

BUCO-P 501 Operations Management (3 cr.) Surveys the management of operations in manufacturing and service firms. Diverse activities determining the size and type of production process, purchasing the appropriate raw materials, planning and scheduling the flow of materials and the nature and content of inventories, assuring product quality, and deciding on the production hardware and how it gets used comprise this function of the company. Managing operations well requires both strategic and tactical skills. The topics considered include process analysis, workforce issues, materials management, quality and productivity, technology, and strategic planning, together with relevant analytical techniques. The course makes considerable use of business cases. Most classes will be spent discussing the cases assigned. For each case, students will be asked to review actual company situations and apply technical and managerial skills to recommend courses of action. Most cases will be taken from manufacturing, but some will be service-oriented. Several of the cases will focus on international companies or issues.

BUCO-S 555 Information Technology for Managers (3 cr.) Focuses on information technology (IT) management issues and applications. Topics include alternative types of applications, methodologies for developing and purchasing systems, managing the technical and social aspects of IT implementation, and using IT to enable new business strategies. Case studies will be used to illustrate IT management principles and current best practices.

BUCO-W 511 Venture Strategy (1.5 cr.) This course is designed for those individuals interested in creating a new business venture, acquiring an existing business, working in industries that serve the entrepreneur, or students wishing to familiarize themselves with concepts, issues, and techniques of new venture creation and entrepreneurship. There is also a strong focus on entrepreneurship, or innovation within a corporate environment. Because the sources of entrepreneurial and entrepreneurial motivation are often quite diverse, the learning goals and objectives of the students in this course are often similarly diverse. Therefore, the course is designed to offer a broad range of educational experiences, including case analyses, presenting and negotiating a financial deal, and creating a business plan or corporate change initiative.

BUCO-W 516 Organizational Development and Change (3 cr.) Today's business environment forces executives to use every tool at their disposal to create and maintain an effective and adaptable organization. A major source of effectiveness and adaptability is the way in which the company's efforts are organized its systems, structures, management processes, rewards, and strategies. The primary job of senior management today is to

design, build, and operate organizations that function effectively. With these needs in mind, W516 helps students to: (1) understand the basic components of an organization and how they interrelate as a system, (2) learn tools for diagnosing organizational performance problems, and (3) practice applying organization design concepts to solve performance problems.

BUCO-X 511 Seminar in Management Issues (1.5 cr.) In this course MBA students use a variety of human resources tools for self-assessment and working with others as the first step in the Program's focus on individual professional development.

BUCO-X 551 Career Management (1.5 cr.) This course is designed to provide MBAs with the skills to successfully manage career development and is required to participate in graduate career services. Includes mock consulting situations.

BUCO-X 574 Special Topics: NFP Team Project (1.5 cr.) This course allows MBA students to work in teams addressing strategic level projects in not-for-profit organizations in the region.

BUCO-Z 511 Human Resource Management (1.5 cr.) Human Resource Management addresses strategies and issues including staffing, negotiations and conflict management, gender and diversity labor/management relations, occupational safety and health, training and development and management of change.

Courses

Education

EDUC-E 201 Multicultural Education and Global Awareness (3 cr.) This course examines educators' and students' responsibility (ies) in a complex and interdependent world. Students will be guided to develop the skills, knowledge, and attitudes needed to live effectively in a world of limited resources, ethnic diversity, and cultural pluralism. Taught as a writing intensive course at IUPUI.

EDUC-E 323 Social Studies and Science for Elementary School I (3 cr.) C: EDUC-E 345, EDUC-M 300, EDUC-M 301, EDUC-M 304 This is a hands-on, minds-on inquiry course that integrates Social and Natural Science content and pedagogy for K-2 learners. Candidates will participate in lectures, small and large group works as well as field based experiences with young learners. Assessment will be based on projects designed to demonstrate candidate growth toward the ability to plan, design, deliver, and assess thematic learning experiences. P: In order to enroll in this course, students must be admitted to the Elementary Education program at IUPUC and receive authorization from the Division.

EDUC-E 325 Social Studies in the Elementary Schools (3 cr.) Emphasizes the development of objectives, teaching strategies, and evaluation procedures that facilitate the social learning of young children. Special attention given to concept learning, inquiry, decision making, and value analysis.

EDUC-E 328 Science in the Elementary Schools (3 cr.) The focus of this course will be on developing teacher competencies in writing performance objectives, question-asking, evaluating, and sequencing. These competencies will reveal themselves in the preparation and development of science activities and the teaching strategies involved in presenting those activities to elementary school children.

EDUC-E 340 Methods of Teaching Reading I (2-3 cr.) Describes the methods, materials, and techniques employed in elementary school developmental reading programs.

EDUC-E 341 Methods of Teaching Reading II (2-3 cr.) P: E339 and E340. Describes the methods, materials, and techniques employed in diagnosis and corrective instruction in elementary school reading programs.

EDUC-E 343 Math in the Elementary Schools (3 cr.) B-I Emphasizes the developmental nature of the arithmetic process and its place as an effective tool in the experiences of the elementary school child.

EDUC-E 345 Language Arts and Mathematics for Young Children (6 cr.) Methods of developing language, cognition, reading and mathematical readiness; mathematical thinking through play, the arts, and directed experiences; design of curriculum and appropriate teaching strategies for young children.

EDUC-E 449 Trade Books and the Classroom Teacher (3 cr.) Emphasizes the use of trade books in language and reading in elementary classrooms.

EDUC-E 490 Research in Elementary Education (1-3 cr.) B-I Individual research.

EDUC-F 110 Windows on Education (2-3 cr.) First year seminar to support incoming freshmen interested in teaching as a career. The course will facilitate students' efforts to navigate university life while making an informed decision regarding career choices. The F110 will serve as the First Year Seminar that may be linked to EDUC F200: Examining Self as a Teacher.

EDUC-F 200 Examining Self as a Teacher (3 cr.) Designed to help a student make a career decision, better conceptualize the kind of teacher the student wishes to become, and reconcile any preliminary concerns that may be hampering a personal examination of self as teacher. Students will design a major portion of their work.

EDUC-F 401 Topical Exploration in Education (0-3 cr.) Explores various topics of relevance to education, both in the United States and abroad.

EDUC-H 340 Education and American Culture (3 cr.) The present educational system: its social impact and future implications viewed in historical, philosophical, and sociological perspective.

EDUC-H 341 American Culture and Education (3 cr.) An opportunity to participate in a cooperative learning venture, as students investigate the sociological, psychological, historical, and philosophical foundations of American education, relating findings, observations, and experiences at professional development school sites with current practices and the future of education.

EDUC-K 307 Methods for Teaching Students with Special Needs (3 cr.) This course prepares future teachers to work with students with diverse abilities in inclusive settings. Participants learn to use learning modalities, varied rates and complexity of instruction, and making use of individual interests and preferences. Additionally, differentiating and/or individualizing instruction for all learners and developing classroom management skills are emphasized.

EDUC-K 490 Research in Special Education (1-3 cr.) B-I Individual research and study in special education.

EDUC-K 500 Topical Workshop (1-3 cr.) P: Consent of instructor. Intensive study of such selected topics as language development for exceptional children, the disadvantaged child, and behavior modification for exceptional children. May be repeated.

EDUC-K 548 FAMILIES, SCHOOL & SOCIETY (- cr.) The course focuses on the family as a system and discusses the impact of disabilities on the daily lives of family members. Historical, legal and ethical perspectives on family involvement and empowerment are explored. Approaches for providing services to families with members who are developmentally disabled, chronically ill, at risk or who have other types of impairments also are presented.

EDUC-L 400 Instructional Issues in Language Education (3 cr.) Reviews the principles and current instructional issues related to learning a first or a second language. Besides the general issues of effects of the environment, developmental stages, and basic instructional methodologies, relationships among reading education, English education, and second language education will be explored.

EDUC-L 436 Methods and Materials for Teaching ESL (3 cr.) Permission from Division of Education English as a Second/New Language teachers need to know how to design instruction and prepare relevant and interesting materials. This course aims to enhance participants' understanding and grasp of theoretical principles underlying the

development of curricula as well as choice and development of teaching materials for ESL courses. Through readings, discussions, and projects, students will be exposed to, reflect upon, and learn about issues of needs analysis, program/course/syllabus design, and materials development. The course will specifically explore such issues as conducting a needs analysis; determining teaching goals and objectives; and evaluating, selecting, adapting, and developing teaching materials in the context of Standards for Effective Pedagogy (from CREDE—Center for Research on Education, Diversity & Excellence). P: In order to enroll in this course, students must be granted permission from the Division of Education.

EDUC-L 436 Methods and Materials for Teaching ESL (3 cr.) English as a Second/New Language teachers need to know how to design instruction and prepare relevant and interesting materials. This course aims to enhance participants' understanding and grasp of theoretical principles underlying the development of curricula as well as choice and development of teaching materials for ESL courses. Through readings, discussions, and projects, students will be exposed to, reflect upon, and learn about issues of needs analysis, program/course/syllabus design, and materials development. The course will specifically explore such issues as conducting a needs analysis; determining teaching goals and objectives; and evaluating, selecting, adapting, and developing teaching materials in the context of Standards for Effective Pedagogy (from CREDE—Center for Research on Education, Diversity & Excellence). P: In order to enroll in this course, students must be granted permission from the Division of Education.

EDUC-L 441 Bilingual Education: Introduction (3 cr.) Introduction to the development of bilingual/ bicultural education in the United States and its antecedents, rationale, and theories. Comparison of existing bilingual/bicultural programs.

EDUC-L 442 Methods for Bilingual Teaching (3 cr.) P: L441. Methods of teaching the content areas in a bilingual setting, including techniques of linguistic analysis.

EDUC-M 300 Teaching in Pluralistic Society (0-3 cr.) This course is designed to introduce students to teaching as a profession. Students focus upon the "self as teacher," learning styles, cultural pluralism, and classroom teaching strategies that respond positively to the personal and ethnic diversity of the learner.

EDUC-M 303 Laboratory/Field Experiences: Junior High/Middle School (0-3 cr.) B-I Laboratory or field experiences at the junior high or middle school level. (May be repeated.) Corequisite with M314, M330, or M336. Grade: S or F.

EDUC-M 304 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 305 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 306 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 307 Laboratory/Field Experience (0-3 cr.) Laboratory or field experience. Grade: S or F.

EDUC-M 320 Diversity and Learning: Teaching Every Child (6 cr.) This course integrates information from educational psychology and multicultural and special education to prepare students to teach children in their early childhood and middle childhood years. The content includes childhood development, learning theory, motivation, and assessment. Students reflect critically on personal assumptions and develop attitudes and beliefs supportive of multicultural education and inclusion.

EDUC-M 324 Teaching About the Arts (1-3 cr.) Introduction to the importance of the arts in elementary school curriculum. Students are given a foundation of methods and

materials in art and music that will enable them to integrate the arts into the general curriculum, supplement art lessons given by school art specialists, and encourage student discussion and understanding of art and music in the world today.

EDUC-M 425 Student Teaching: Elementary (1-16 cr.) Full-time supervised student teaching in grades 1-6 for a minimum of 10 weeks in an elementary school accredited by the state of Indiana or an equivalent approved school out of state. The experience is directed by a qualified supervising teacher and has university-provided supervision. Grade: S or F.

EDUC-M 470 Practicum (3-8 cr.) Instructional experience under the direction of an identified supervising teacher, with university-provided supervision in the endorsement or minor area, and at the level appropriate to the area, and in an accredited school within the state of Indiana unless the integral program includes experience in an approved and accredited out-of-state site. The practicum may be full- or part time, but in every instance the amount of credit granted will be commensurate with the amount of time spent in the instructional setting. Grade: S or F.

EDUC-N 102 Teaching and Learning Elementary School Mathematics I (3 cr.) Helps preservice teachers develop an understanding of the mathematics content and pedagogy relevant for a successful elementary school teacher. Focus is on content and methods that are consistent with recent recommendations about mathematics learning and teaching, and the state of Indiana academic standards. Pedagogical methods address number theory, data and chance, and algebraic thinking.

EDUC-P 251 251 Educational Psychology for Elementary Teachers (1-4 cr.) The application of psychological concepts to school learning and teaching using the perspective of development from childhood through preadolescence. Special attention is devoted to the needs of the handicapped.

EDUC-Q 200 Introduction to Scientific Inquiry (1-3 cr.) Provides the elementary education major with background in the science process skills needed to complete required science courses.

EDUC-W 200 Microcomputing for Education: An Introduction (3 cr.) Introduction to instructional computing, educational computing literature, and BASIC programming. Review of and hands-on experience with educational software packages and commonly used microcomputer hardware. (Fall, Spring, Summer I)

EDUC-W 204 Programming for Microcomputers in Education (3 cr.) Develops programming skills necessary for using a computer and for understanding computer programming as it applies to teaching. Not offered for credit if W 201 or W 202 has been taken.

EDUC-W 210 Survey of Computer-Based Education (3 cr.) P: admission to the Teacher Education Program Students will continue their study of BASIC to achieve facility at the intermediate level. In addition, students will study the history, ethics, and economics of computer hardware as it applies to educational computing, as well as the software available to educators. (Fall)

EDUC-W 220 Technical Issues in Computer-Based Education (2 cr.) P: admission to the Teacher Education Program This course will provide a solid conceptual base for future hardware / software design, development, and evaluation decisions related to instructional applications within school-based environments. The concepts will include computer systems, computer-based instructional techniques (general), hardware systems, software design, and technological innovations. (Summer I)

EDUC-W 301 Integrating Technology into Teaching Part I (3 cr.) P: EDUC-W 201. Provides students with skills and experiences that allow for effective and appropriate integration of technology into teaching and learning activities. Focus will be on reviewing

current models of effective technology integration, surveying available technology in schools, and developing classroom lessons and activities.

EDUC-W 310 Computer-Based Teaching Methods (3 cr.) P: admission to the Teacher Education Program Students will study the methods of teaching programming, application of pedagogical and technical principles of software design, software evaluation, and staff development techniques in the area of computer-based education. (Spring)

EDUC-W 401 Integrating Technology into Teaching Part II (3 cr.) P: EDUC-W 201 and W 301. Provides students with skills and experiences that allow for effective and appropriate integration of technology into teaching and learning activities. Students will have the opportunity to implement and evaluate a technology-integrated classroom activity in an advanced field experience.

EDUC-W 410 Practicum in Computer-Based Education (6 cr.) P: admission to the Teacher Education Program Either six weeks of full-time fieldwork or 12 weeks of half-time fieldwork in an educational setting that incorporates instructional computing. (Fall, Spring)

EDUC-W 505 PROF DEVELOPMENT WORKSHOP (- cr.) Basic special education principles for graduate students with no previous course work in special education. Students cannot receive credit for both K205 and K505.

EDUC-X 425 Practicum in Reading (3 cr.) P: admission to the Teacher Education Program, EDUC-X 400 and EDUC-M 464 or EDUC-E 340 and EDUC-E 341 or consent of instructor Students work in selected elementary and secondary classrooms diagnosing and assisting pupils in the area of reading. This experience will always include a series of seminars in conjunction with the field placement. Grades S or F. (As needed)

EDUC-X 470 Psycholinguistics of Reading (3 cr.) P: admission to the Teacher Education Program Explores the linguistic and cognitive dimensions of language. Discusses relationships among the systems of language and among the various expressions of language. Always includes topics on semantics, grammar, and dialect. (Spring)

ENGR 19500 FIRST-YEAR ENGINEERNG PROJECTS (3 cr.) Selected topics in general or interdisciplinary engineering.

ENGR 19600 Introduction to Engineering (3 cr.) Class 2, Lab 2. C: MATH 15400 or 15900 or equivalent. An overview of the engineering profession and methodologies of engineering design. Students develop skills using computer-aided design and simulation software for engineering systems. Projects and homework are implemented and tested in a laboratory environment. The course also introduces the students to standard computer application software and university network and software resources.

ENGR 19700 Introduction to Programming Concepts (3 cr.) C: MATH 16500. Class1, Lab 2. Basic concepts and applications of software programming for solving engineering problems. Topics include techniques for developing structured algorithms, data input and output, conditional statements, loops, recursion, functions, arrays, and elementary concepts in mathematical programming. Examples, homework, and applications of programming concepts make extensive use of the C programming language.

TECH 19900 SPECIAL TOPICS IN TECHNOLOGY (1-3 cr.) C: MATH 16500. Special topics in Technology; subject matter to be arranged.

OLS 25200 HUMAN BEHAVR IN ORGANIZATIONS (3 cr.) Class 3. Study of individual and group behavior in organizations. Special emphasis on typical supervisory relationships.

ME 26200 MECHANICAL DESIGN I (3 cr.) The basic concepts of mechanical design are introduced with emphasis on use of computer-aided design techniques. Applications are chosen from the area of linkage and mechanism design. Lab involves implementation of computer techniques in solving mechanical design problems.

ME 27000 BASIC MECHANICS 1 (3 cr.) Fundamental concepts of mechanics, force systems and couples, free body diagrams, and equilibrium of particles and rigid bodies. Distributed forces; centroids and centers of gravity of lines, areas, and volumes. Second moment of area, volumes, and masses. Principal axes and principal moments of inertia. Friction and the laws of dry friction. Application to structures and machine elements, such as bars, beams, trusses, and friction devices.

ME 27400 BASIC MECHANICS 2 (3 cr.) Kinematics of particles in rectilinear and curvilinear motion. Kinetics of particles, Newton's second law, energy, and momentum methods. Systems of particles, kinematics and plane motion of rigid bodies, forces and accelerations, energy and momentum methods. Kinetics, equations of motions, energy and momentum methods for rigid bodies in three-dimensional motion. Application to projectiles, gyroscopes, machine elements, and other engineering systems.

ENGR 29700 COMPUTER TOOLS FOR ENGINEERING (- cr.) C: MATH 16500. Class 1. Introduction to the use of Matlab for solving engineering problems. Topics include

computational methods, data input and output, plotting and curvefittting, functions, conditional statements, loops, and introduction to Matlab toolboxes.

Anthropology

ANTH-A 103 Human Origins and Prehistory (3 cr.) A survey of human biological and cultural evolution from early pre-Pleistocene hominids through the development of urbanized state societies, with the goal of better understanding our human heritage. (Not open to students who have taken A303.)

ANTH-A 104 Introduction to Cultural Anthropology (3 cr.) A survey of cultural and social processes that influence human behavior, using comparative examples from different ethnic groups around the world, with the goal of better understanding the broad range of human behavioral potentials and those influences that shape the different expressions of these potentials. (Not open to students who have taken A304.)

ANTH-A 460 Topics in Anthropology: (variable title) (1-3 cr.) A conceptual examination of selected topics in the field of anthropology. May not be repeated for more than 6 credit hours.

ANTH-E 320 Indians of North America (3 cr.) An ethnographic survey of native North American culture areas and ethnic groups.

ANTH-E 354 African American Folklore/Folklife/Folk Music (3 cr.) African American culture in the United States viewed in terms of history and social change. Folklore, folk music, and oral history as means of illuminating black culture and history. May be repeated once when topics vary.

ANTH-E 455 Anthropology of Religion (3 cr.) Critical evaluation of current approaches to the analysis of religious myth, ritual, and symbolism. Problems in understanding religious beliefs of other cultures. Modern development of anthropology of religion.

ANTH-E 457 Ethnic Identity (3 cr.) A cross-cultural analysis of the nature of ethnic groups and identity, including the effects of colonialism and nationalism on ethnic groups, stereotyping groups, ethnic symbols and styles, and persistence and change in ethnicity.

ANTH-E 470 Psychological Anthropology (3 cr.) A cross-cultural examination of human behavior in its ethnic context, including selected topics such as socialization, sex roles, altered states of consciousness, and personality and sociocultural change.

ANTH-F 360 Indiana Folklore/Folklife/Folk Music (3 cr.) Survey of folklore, folklife, or folk music of Indiana with particular attention to the persistence into the present of preindustrial culture. Students are encouraged to do fieldwork in the state. May be repeated once when topics vary.

American Sign Language

ASL-A 131 Intensive Beginning American Sign Language (5 cr.) First course in the introductory sequence of language courses. Emphasis on develop-ing basic conversational skills as well as awareness of Deaf culture.

ASL-A 132 Intensive Beginning American Sign Language II (5 cr.) Second course in the introductory sequence of language courses. Emphasis on developing basic conversational skills as well as awareness of Deaf culture.

Communication

COMM-C 104 Voice and Diction (3 cr.) Directed primarily toward the improvement of normal speech patterns, with emphasis on normal production, resonation, and articulation.

COMM-C 180 Introduction to Interpersonal Communication (3 cr.) The study of human dyadic interaction, including topics such as perception processes, verbal/nonverbal communication, theoretical models of communication, conflict, and interpersonal communication in various relationships. Course covers applications of interpersonal communication theory/research, including communication competence. PUL=5

COMM-C 223 Business and Professional Communication (3 cr.) Preparation and presentation of interviews, speeches, and oral reports appropriate to business and professional organizations; group discussion and parliamentary procedure. This is an intermediate skills course with survey characteristics. PUL=1A

COMM-C 228 Discussion and Group Methods (3 cr.) Theory of and practice in effective participation in and leadership of group, committee, conference, and public discussion; application to information-sharing and problem-solving situations.

COMM-C 322 Advanced Interpersonal Communication (3 cr.) P: C180 or permission of instructor. Covers core components of the study of interpersonal communication: perception, systems, exchange theoretical approaches; methods of research in interpersonal communication; content (topic) areas such as intimate relationships and friendships. Includes applications of interpersonal communication theory/research.

COMM-G 100 Introduction to Communication Studies (3 cr.) Survey course of history, theory, and practice in each of six major areas: rhetoric and public address, theatre arts, interpersonal/ organizational communication, small group dynamics, public communication, and mass media studies. For each of the areas examined, students will apply theory to practice, thereby learning to become more effective communicators. PUL=1A

COMM-G 300 Independent Study (1-8 cr.) Research or practical experience in various departmental areas as selected by the student prior to registration, outlined in consultation with the instructor, and approved by the department. If a practicum experience, it must represent a minimum of 45 clock hours of practical application per credit hour. A student shall take no more than a total of 9 credit hours of G300 and G491. PUL=4

COMM-G 310 Introduction to Communication Research (3 cr.) Methodologies and types of data analyses for investigating communication phenomena. Students will acquire knowledge and competencies that will allow them to understand and address the process of communication research and relevant communication research issues. PUL=1B

COMM-G 391 Seminar (1-3 cr.) P: permission of instructor. Topic announced in prior semester; oriented to current topics in communication and theatre; readings, projects, and papers as indicated by the topic and instructor. May be repeated for a total of 8 credit hours.

COMM-M 150 Mass Media and Contemporary Society (3 cr.) A critical overview of the role of electronic mass media in contemporary society. Provides an introduction to such issues as industry structure, organization, and economics; regulation, public interest, and

media ethics; impact of programming on individuals; media construction of social institutions; media issues in the global village. PUL=2

COMM-R 110 Fundamentals of Speech Communication (3 cr.) Theory and practice of public speaking; training in thought processes necessary to organize speech content for informative and persuasive situations; application of language and delivery skills to specific audiences. A minimum of six speaking situations. PUL=1A

COMM-R 309 Great Speakers: American Public Address (3 cr.) Course introduces students to historical and contemporary public address. Students will study the speechmaking of notable American speakers. The study will include speeches from a wide range of established genres and will include campaign rhetoric, debates, historical celebrations, lectures, legislative speaking, presidential speaking, public meetings, movement, rhetoric, and sermons.

COMM-R 320 Advanced Public Communication (3 cr.) P: R110 or equivalent. Development of a marked degree of skill in preparation and delivery of various types of speeches, with emphasis on depth of research, clarity of organization, application of proof, and felicitous style.

COMM-R 321 Persuasion (3 cr.) P: R110 or equivalent. Motivational appeals in influencing behavior; psychological factors in speaker-audience relation-ship; principles and practice of persuasive speaking.

COMM-T 337 History of the Theatre I (3 cr.) Significant factors in primary periods of theatre history through the Renaissance and the effect on contemporary theatre; emphasis on trends and developments; review of representative plays of each period to illustrate the theatrical use of dramatic literature.

COMM-T 337 History of the Theatre I (3 cr.) Significant factors in primary periods of theatre history through the Renaissance and the effect on contemporary theatre; emphasis on trends and developments; review of representative plays of each period to illustrate the theatrical use of dramatic literature.

Economics

ECON-E 201 Introduction to Microeconomics (3 cr.) E201 is a general introduction to microeconomic analysis. Discussed are the method of economics, scarcity of resources, the interaction of consumers and businesses in the market place in order to determine price, and how the market system places a value on factors of production.

ECON-E 202 Introduction to Macroeconomics (3 cr.) P: ECON E201. An introduction to macroeconomics that studies the economy as a whole; the levels of output, prices, and employment; how they are measured and how they can be changed; money and banking; international trade; and economic growth.

ECON-E 280 Applied Statistics for Business and Economics I (3 cr.) P: MATH M118 or M119 or 15300 or 16500 and BUS-K 201 or equivalent Excel skills. Summary measures of central tendency and variability. Basic concepts in probability and important probability distributions. Sampling, sampling distributions, and basic estimation concepts such as confidence interval, estimation, and hypothesis testing.

ECON-E 281 Applied Statistics for Business and Economics II (3 cr.) P: ECON-E 280 Balanced coverage of statistical concepts and methods, along with practical advice on their effective application to real-world problems. Topics include simple and multiple linear regression, time-series analysis, statistical process control and decision making.

English and Literature

ENG-E 450 Capstone Seminar (3 cr.) This senior capstone integrates student's

undergraduate study through writing and reading projects, faculty and student presentations, and creation of capstone portfolios. Students apply linguistic, literary, and rhetorical knowledge in culminating projects and learning portfolios. The course looks back at accomplishments and forward to postgraduation planning.

EAP-G 013 Reading and Writing for Academic Purposes (3 cr.) This course is designed primarily for graduate ESL students. Its purpose is to develop reading comprehension skills through the use of academic subject area materials and to teach the writing skills necessary to complete academic work. Assignments are completed using materials from the students' academic disciplines.

EAP-G 20 COMM SKLS GRAD STDNTS & ITA'S (3 cr.) This course for graduate International Teaching Assistants provides instruction on basic teaching strategies and helps students develop the oral language skills necessary to present academic materials in English to a student audience. Pronunciation, listening comprehension, and classroom interaction skills are practiced. Regular conferences focus on individual pronunciation needs. PUL=1A

ENG-G 205 INTRO TO THE ENGLISH LANGUAGE (3 cr.) This course is an introduction to how language, and English in particular, is structured, including soundS (phonetics and phonology), words (morphology), sentences (syntax) and meaning (semantics). Discussions focus on examples from everyday language and the application of these basic concepts to real world contexts, including language teaching and learning. PUL=2

ENG-L 115 Literature for Today (3 cr.) P: W131. Poems, dramas, and narratives pertinent to concerns of our times: e.g., works concerning values of the individual and society, problems of humanism in the modern world, and conflicts of freedom and order.

ENG-L 202 Literary Interpretation (3 cr.) Close analysis of representative texts (poetry, drama, fiction) designed to develop the art of lively, responsible reading through class discussion and writing of papers. Attention to literary design and critical method.

ENG-L 203 Introduction to Drama (3 cr.) Representative significant plays to acquaint students with characteristics of drama as a type of literature. Readings may include plays from several ages and countries.

ENG-L 204 Introduction to Fiction (3 cr.) Representative works of fiction; structural technique in the novel, theories and kinds of fiction, and thematic scope of the novel. Readings may include novels and short stories from several ages and countries.

ENG-L 205 Introduction to Poetry (3 cr.) Kinds, conventions, and elements of poetry in a selection of poems from several historical periods.

ENG-L 207 Women and Literature (3 cr.) Issues and approaches to critical study of women writers in British and American literature.

ENG-L 208 Topics in English and American Literature and Culture (3 cr.) Selected works of English and/or American literature in relation to a single cultural problem or theme. Topics vary from semester to semester. May be repeated once for credit.

ENG-L 351 Critical and Historical Study of American Literature I (3 cr.) American writers to 1865: Emerson, Hawthorne, Melville, Whitman, and two or three additional major writers.

ENG-L 352 Critical and Historical Study of American Literature II (3 cr.) American writers, 1865-1914: Twain, Dickinson, James, and two or three additional major writers.

ENG-L 354 Critical and Historical Study of American Literature III (3 cr.) Study of modernist and contemporary American writers in various genres, 1914 to the present, including Frost, Stein, and Faulkner.

ENG-L 376 Literature for Adolescents (3 cr.) An examination of the nature and scope of adolescent literature. Wide reading of contemporary literature, with emphasis on the value of selections for secondary school students and appropriate modes of study.

ENG-L 378 Studies in Women and Literature (3 cr.) British and American authors such as George Eliot or Gertrude Stein; groups of authors such as the Bronte sisters or recent women poets; or genres and modes such as autobiography, film, or criticism. Topics will vary by semester.

ENG-L 431 Topics in Literary Study (3 cr.) Study of characteristics and development of literary forms or modes (e.g., studies in narrative, studies in romanticism). Topics vary from year to year. May be repeated once for credit.

ENG-L 433 Conversations with Shakespeare (3 cr.) An interdisciplinary and intertextual study of Shakespeare's work and its influence to the present day. Students will compare Shakespeare texts with latter-day novels, plays, poems, and films that allude to or incorporate some aspect of Shakespeare's art.

ENG-W 130 Principles of Composition (3 cr.) Practice in writing papers for a variety of purposes and audiences, with attention to reading/writing connections.

ENG-W 131 Elementary Composition I (3 cr.) Fulfills the communications core requirement for all undergraduate students and provides instruction in exposition (the communication of ideas and information with clarity and brevity). The course emphasizes audience and purpose, revision, organization, development, advanced sentence structure, diction, and development within a collaborative classroom. Evaluation is based on portfolios of the student's work.

ENG-W 132 Elementary Composition II (3 cr.) P: W131 (with a grade of C or higher). Stresses argumentation and research concurrently, with a secondary emphasis on critical evaluation in both reading and writing. Evaluation is based on portfolios of the student's work.

ENG-W 140 ELEMENTARY COMPOSITION-HONORS (3 cr.) Offers an introductory writing course for advanced freshman writers. Requirements, including number and type of assignments, are parallel to W131. W140 offers greater intensity of discussion and response to writing. Evaluation is based on portfolios of the students' work. PUL=1A

ENG-W 206 Introduction to Creative Writing (3 cr.) An introduction to the techniques and principles of creative writing. Written assignments, independent work, and workshop discussions of the fundamentals of fiction, poetry, and drama. This course may be used as a prerequisite for all 300-level courses in creative writing.

ENG-W 208 Introduction to Poetry Writing (3 cr.) W208 offers students an introduction to the craft and practice of poetry writing: how to find subjects for writing; how to create images, similes, and metaphors; how to make rhyme sound natural; how to produce both metered and free-verse poetry. Part of the class will be a workshop in which students will learn to revise their poems and those of fellow students. This course can serve as a prerequisite for W303 or W305.

ENG-W 210 Literacy and Public Life (3 cr.) An introduction to the uses of literacy in public and civic discourse, with connections made to theories of writing and professional prospects for writers; serves as the required gateway course for the Concentration in Writing and Literacy and as an exploration of this concentration for other English majors and students considering the possibility of an English major.

ENG-W 231 Professional Writing Skills (3 cr.) P: W131 (with a grade of C or higher). Focuses on expository writing for the student whose career requires preparation of reports, proposals, and analytical papers. Emphasis on clear and direct objective writing and on investigation of an original topic written in report form, including a primary research

project. Evaluation is based on student projects.

ENG-W 250 Writing in Context (1-3 cr.) Offers instruction in intermediate-level expository writing. Students study a contemporary issue and write papers on that issue. Topics will vary from year to year. May be repeated once for credit.

ENG-W 301 Writing Fiction (3 cr.) P: W206 or W207 or submission of acceptable manuscript to instructor in advance of registration. An intermediate course in the theory and practice of fiction writing with seminar study of relevant materials and criticism of student work in class and conference. May be repeated once for credit.

ENG-W 302 Screenwriting (3 cr.) P: W206 or W207, or permission of instructor. A practical course in basic techniques of writing for film and television. Covers the essentials of dramatic structure, story development, characterization and theme, scene construction, dialogue, and, briefly, the practicalities of working as a screenwriter today.

ENG-W 303 Writing Poetry (3 cr.) P: W206 or W208 or submission of acceptable manuscripts to instructor in advance of registration. An intermediate course in the theory and practice of poetry writing with seminar study of relevant materials and criticism of student work in class and conference.

ENG-W 400 Issues in Teaching Writing (3 cr.) Focuses on the content of rhetoric and composition and considers fundamental theoretical and practical issues in the teaching of writing. Reviews rhetorical and compositional principles that influence writing instruction, textbook selection, and curriculum development.

ENG-W 403 ADVANCED POETRY WRITING (3 cr.) Study and practice in the writing of poetry. Analysis of examples from contemporary poets accompanies class criticism and discussion. PUL=1A; RISE-Experiential Learning

ENG-W 411 DIRECTED WRITING (3 cr.) Individual projects determined in consultation with instructor. Credit varies with scope of project. May be repeated once for credit. PUL=1A

Folklore

FOLK-F 101 Introduction to Folklore (3 cr.) A view of the main forms and varieties of folklore and folk expression in tales, ballads, gestures, beliefs, games, proverbs, riddles, and traditional arts and crafts. The role of folklore in the life of human beings.

FOLK-F 363 WOMEN'S FOLKLORE/FOLKLIFE/MUS (3 cr.) This course identifies key issues in women's folklore and examines the ways in which women have been represented in myths, legends, and folktales, past and present. The various ways in which visions of womanhood inform, reflect, and challenge gender roles will also be analyzed. PUL=3

FOLK-F 364 Children's Folklore/Folklife/Folk Music (3 cr.) The traditional rhymes, riddles, stories, games, folklife, or music associated with "the culture of childhood." The role these forms play in peer-group activity and in the social and cognitive development of the child. May be repeated once when topics vary.

Geography

GEOG-G 107 Physical Systems of the Environment (3 cr.) Physical environment as the home of humans, emphasizing the distribution and interaction of environmental variables (landforms, vegetation, soils, weather, and climate).

GEOG-G 110 Introduction to Human Geography (3 cr.) An introduction to the principles, concepts, and methods of analysis used in the study of human geographic systems. Examines geographic perspectives on contemporary world problems such as population growth, globalization of the economy, and human-environmental relations.

GEOG-G 315 Environmental Conservation (3 cr.) Conservation of natural resources including soil, water, wildlife, and forests as interrelated components of environmental quality.

GEOG-G 326 Geography of North America (3 cr.) Continental and regional variations in terrain, climate, and economic and social life of the United States and Canada, with emphasis on geographical principles, sources of data, and techniques of investigation.

German

GER-G 131 Intensive Beginning German I (5 cr.) Intensive introduction to present-day German and selected aspects of German life. Intensive drills for mastery of phonology, basic structural patterns, and functional vocabulary. Credit is given only for the sequence G131-G132 or the sequence G117-G118-G119.

GER-G 132 Intensive Beginning German II (5 cr.) Intensive introduction to present-day German and selected aspects of German life. Intensive drills for mastery of phonology, basic structural patterns, and functional vocabulary. Credit is given only for the sequence G131-G132 or the sequence G117-G118-G119.

History

HIST-A 301 Colonial and Revolutionary America I (3 cr.) European background of American history; discovery and exploration of New World by Spain, France, and England. Colonization: motives, causes, types. Social and intellectual developments in English colonies in the seventeenth and eighteenth centuries. Birth of Republic, 1763-89.

HIST-A 314 The United States 1917-1945 (3 cr.) Political, demographic, economic, and intellectual transformations of 1917-1945; World War I, the twenties, the Great Depression, New Deal, World War II.

HIST-A 317 American Social History, 1865 to Present (3 cr.) Development of modern American intellectual and social patterns since the Civil War. Social thought, literature, science, the arts, religion, morals, education.

HIST-A 348 Civil War and Reconstruction (3 cr.) The era of the Civil War and its aftermath. Military, political, economic, and social aspects of the coming of the war, the war years, and the ''reconstruction'' era following the conflict.

HIST-A 363 Survey of Indiana History (3 cr.) Examination of Indiana history that focuses on significant persons, topics, and events from the earliest exploration and settlement of the state to the present day.

HIST-A 364 History of Black Americans (3 cr.) A survey of black life in America: the Atlantic slave trade, slavery, Afro-American culture, racism, Civil War and Reconstruction, peonage, segregation, northern migration, urban ghettos, discrimination, Harlem Renaissance, black nationalism, civil rights, black revolt, contemporary setting.

HIST-B 310 Britain II (3 cr.) I: Britain before 1688. Development of Britain and its institutions from Roman times to the Glorious Revolution, with special emphasis on political and constitutional change. II: Britain since 1688. Examines important modern political, economic, social, and cultural developments, including industrialization and imperialism and the emergence of ideologies like liberalism and socialism.

HIST-B 323 History of the Holocaust (3 cr.)

HIST-B 360 Europe-Napoleon to First World War II (3 cr.) I: Post-Napoleonic reaction; revitalized revolutionary forces, 1848; reform in England and Russia; bourgeois monarchy and Second Empire in France; unification movements in Italy and Germany;

middle-class nationalism, romanticism, and realism. II: Bismarckian and Wilhelmian Germany; Gladstone, Disraeli, and modern Britain; the French Third Republic and the last days of Tsarist Russia; disintegration of the Ottoman Empire; the Austro-Hungarian Empire in decline; European society and culture on the eve of World War I.

HIST-F 444 History of Mexico (3 cr.) Brief survey of the colonial period, independence movement, and nineteenth century. Emphasis on the intellectual, political, and cultural history of the Mexican Revolution.

HIST-H 105 American History I (3 cr.) I. Colonial period, Revolution, Confederation and Constitution, national period to 1865. II. 1865 to present. Political history forms framework, with economic, social, cultural, and intellectual history interwoven. Introduction to historical literature, source material, and criticism.

HIST-H 106 American History II (3 cr.) I. Colonial period, Revolution, Confederation and Constitution, national period to 1865. II. 1865 to present. Political history forms framework, with economic, social, cultural, and intellectual history interwoven. Introduction to historical literature, source material, and criticism.

HIST-H 113 History of Western Civilization I (3 cr.) I. Rise and fall of ancient civilizations; barbarian invasions; rise, flowering, and disruption of medieval church; feudalism, national monarchies. II. Rise of middle class; parliamentary institutions, liberalism, political democracy; industrial revolution, capitalism, and socialist movements; nationalism, imperialism, international rivalries, world wars.

HIST-H 114 History of Western Civilization II (3 cr.) I. Rise and fall of ancient civilizations; barbarian invasions; rise, flowering, and disruption of medieval church; feudalism, national monarchies. II. Rise of middle class; parliamentary institutions, liberalism, political democracy; industrial revolution, capitalism, and socialist movements; nationalism, imperialism, international rivalries, world wars.

HIST-H 207 Modern East Asian Civilization (3 cr.)

HIST-H 425 Topics in History (3 cr.) Intensive study and analysis of selected historical issues and problems of limited scope. Topics will vary but will ordinarily cut across fields, regions, and periods. May be repeated once for credit.

HIST-K 495 Readings in History (1 cr.) By arrangement with instructor. Permission of departmental chairperson required.

INGT-I 300 Junior/Senior Integrator (3 cr.) This course fulfills the general education requirement for junior/senior integrator for majors in the School of Liberal Arts and in the School of Science.

Music

MUS-E 241 Introduction to Music Fundamentals (2 cr.) Learn the basics of music reading, rhythm games, singing, keyboard skills, children's songs, and use of classroom instruments. Designed for, but not limited to, elementary education majors and others interested in using music as a learning tool.

MUS-M 17400 Music for the Listener (3 cr.) A survey course covering traditional and modern music styles of the last 1,000 years. Learn how to listen to music, instruments, and musical forms. No prior music experience required. Offered on campus and through the Web.

MUS-X 070 University Choral Ensembles (1-2 cr.) The following vocal ensembles are available: University Choir (1 cr.) and Indianapolis Symphonic Choir (2 cr., authorization and audition required).

MUS-Z 201 History of Rock 'n' Roll Music (3 cr.) Survey of major trends, styles, and

genres of rock music of the 1950s and 1960s, focusing on the work of artists and groups who have proved to have the most enduring significance.

MUS-Z 301 History of Rock Music—'70s and '80s (3 cr.) Survey of trends and styles in rock music of the '70s and '80s. Focuses on the artists and groups who have shaped the music of yesterday, today, and tomorrow.

MUS-Z 393 History of Jazz (3 cr.) Jazz was America's first worldwide popular music. This course emphasizes Jazz as a means to better understand the history and culture of America through examining the influences, styles and major performers and composers from Armstrong and Ellington to Coltrane and Marsalis.

Philosophy

PHIL-P 110 Introduction to Philosophy (3 cr.) An introduction to the methods and problems of philosophy and to important figures in the history of philosophy. Concerns such topics as the nature of reality, the meaning of life, and the existence of God. Readings from classical and contemporary sources, e.g., Plato, Descartes, Nietzsche, and Sartre.

PHIL-P 120 Ethics (3 cr.) An introductory course in ethics. Typically examines virtues, vices, and character; theories of right and wrong; visions of the good life; and contemporary moral issues.

PHIL-P 162 Logic (3 cr.) A study of the principles of logic. The course covers a variety of traditional topics, selected for their practical value, within formal and informal logic. Among the topics typically covered are fallacies, syllogisms, causal hypotheses, logic diagrams, argument analysis, and truth-functional reasoning.

PHIL-P 393 Biomedical Ethics (3 cr.) A philosophical consideration of ethical problems that arise in current biomedical practice, e.g., with regard to abortion, euthanasia, determination of death, consent to treatment, and professional responsibilities in connection with research, experimentation, and health care delivery.

Political Science

POLS-Y 101 Introduction to Political Science (3 cr.) For any student interested in better understanding the political world in which we live. The course explains some fundamental political concepts such as power, conflict, authority, and governments. It may also include an overview of the major subfields of political science: comparative politics, international relations, political theory, and public policy.

POLS-Y 103 Introduction to American Politics (3 cr.) Introduction to the nature of government and the dynamics of American politics. Origin and nature of the American federal system and its political party base. PUL=3

POLS-Y 103 Introduction to American Politics (3 cr.) Introduction to the nature of government and the dynamics of American politics. Origin and nature of the American federal system and its political party base.

POLS-Y 213 Introduction to Public Policy (3 cr.) Studies the processes and institutions involved in the formation of public policy with particular reference to the United States. The course will identify key policy actors, analyze the process of policy making, and critically assess selected policy issues (such as foreign, defense, economic, welfare, and environmental policy).

POLS-Y 304 Constitutional Law, and Constitutional Rights and Liberties (3 cr.) Nature and function of law and judicial process; selected Supreme Court decisions interpreting the American constitutional system.

POLS-Y 309 American Politics through Film and Fiction (3 cr.) Recurrent themes of politics are explored in depth by means of novels, short stories, and films. Subject matter varies by semester—check class schedule for current semester.

Religion

REL-R 111 The Bible (3 cr.) A critical introduction to the major periods, persons, events, and literatures that constitute the Bible; designed to provide general humanities-level instruction on this important text. PUL=5

REL-R 120 Images of Jesus (3 cr.) This course is designed to introduce students to the variety of traditions about the figure of Jesus. It will acquaint students with the wide array of images of the Jesus character through a historical analysis of these images portrayed in texts, art, music, film, and TV.

REL-R 133 Introduction to Religion (3 cr.) Introduction to the diversity of traditions, values, and histories through which religion interacts with culture. Emphasis on understanding the ways the various dimensions of religion influence people's lives.

REL-R 173 American Religion (3 cr.) A consideration of American religion, with particular emphasis on the development of religious diversity and religious freedom in the context of the American social, political, and economic experience.

REL-R 212 Comparative Religions (3 cr.) Approaches to the comparison of recurrent themes, religious attitudes, and practices found in selected Eastern and Western traditions.

REL-R 243 Introduction to the New Testament (3 cr.) An introduction to the modern critical study of the New Testament from primarily a historical perspective. The goal is to learn to view these diverse Christian writings within the context of their historical and social settings.

Sociology

SOC-R 100 Introduction to Sociology (3 cr.) P: W131 or consent of instructor. Consideration of basic sociological concepts, including some of the substantive concerns and findings of sociology, sources of data, and the nature of the sociological perspective.

SOC-R 240 Deviance and Social Control (3 cr.) P: R100 or consent of instructor. An introduction to major sociological theories of deviance and social control. Analyzes empirical work done in such areas as drug use, unconventional sexual behavior, family violence, and mental illness. Explores both ''lay'' and official responses to deviance, as well as cultural variability in responses to deviance.

SOC-R 314 Families and Society (3 cr.) P: R100 or consent of instructor. The family is a major social institution, occupying a central place in people's lives. This course explores formation and dissolution of marriages, partnerships, families; challenges family members face, including communication and childrearing; reasons for and consequences of change in American families; and how family patterns vary across and within social groups.

SOC-R 315 Political Sociology (3 cr.) P: R100 or consent of instructor. Analysis of the nature and basis of political power on the macro level—the community, the national, and the international arenas. Study of formal and informal power structures and of the institutionalized and non-institutionalized mechanisms of access to power.

SOC-R 325 Gender and Society (3 cr.) P: R100 or consent of instructor. A sociological examination of the roles of women and men in society, analysis of the determinants and consequences of these roles, and assessment of forces likely to bring about future change in these roles. Although focus will be on contemporary American society, cross-cultural variations in gender roles will also be noted.

SOC-R 327 Sociology of Death and Dying (3 cr.) P: R100 or the consent of instructor. This course examines inevitable and salient features of the human condition. Historical evaluation of images and attitudes toward death, the medicalization of death, the human consequences of high-tech dying, the role of the family in caring for dying loved ones, the emergence and role of hospices, the social roles of funerals, grief and bereavement, euthanasia and suicide, the worlds of dying children and grieving parents, and genocide are major issues that are addressed. Two of the major themes of the course revolve around the idea that the way we die is a reflection of the way we live; and, that the study of dying and death is an important way of studying and affirming the value of life.

SOC-R 344 Juvenile Delinquency and Society (3 cr.) P: R100 or consent of instructor. Legal definition of delinquency, measurement and distribution of delinquency. Causal theories considered for empirical adequacy and policy implications. Procedures for processing juvenile offenders by police, courts, and prisons are examined.

SOC-R 345 Crime and Society (3 cr.) P: R100 or consent of instructor. Examination of the creation, selection, and disposition of persons labeled criminal. Emphasis on crime as an expression of group conflict and interest. Critique of academic and popular theories of crime and punishment.

SOC-R 351 Social Science Research Methods (3 cr.) P: R100 or consent of instructor and sophomore standing. A survey of methods and techniques used by sociologists and other social scientists for gathering and interpreting information about human social behavior.

SOC-R 355 Social Theory (3 cr.) P: R100 or consent of instructor. This course covers several traditions of classical, contemporary, and post-modern social thought (e.g., social Darwinism, conflict theory, functionalism, symbolic interactionism, critical theory, and feminist theory). The social context, construction, and application theories are included.

SOC-R 381 Social Factors in Health and Illness (3 cr.) P: R100 or consent of instructor. Examines the social aspects of health and illness, including variations in the social meanings of health and illness, the social epidemiology of disease, and the social dimensions of the illness experience.

SOC-R 385 AIDS AND SOCIETY (3 cr.) This course examines the HIV/AIDS epidemic from a sociological perspective. Students will explore how social factors have shaped the course of the epidemic and the experience of HIV disease. The impact of the epidemic on health care, government, and other social institutions will also be discussed.

SOC-R 420 Sociology of Education (3 cr.) P: R100 or consent of instructor. A survey of sociological approaches to the study of education, covering such major topics as education as a social institution, the school in society, the school as a social system, and the sociology of learning.

SOC-R 461 Race and Ethnic Relations (3 cr.) P: R100 or consent of instructor. Comparative study of racial, ethnic, and religious relations. Focus on patterns of inclusion and exclusion of minority groups by majority groups. Discussion of theories of intergroup tensions—prejudice and discrimination—and of corresponding approaches to the reduction of tensions.

SOC-R 494 Internship Program in Sociology (3-6 cr.) P: R100, 9 credits of sociology with a B (3.0) or higher, junior standing with consent of instructor. This course involves students working in organizations where they apply or gain practical insight into sociological concepts, theories, and knowledge. Students analyze their experiences through work logs, a paper, and regular meetings with the internship director.

SOC-R 495 Topics in Sociology (3 cr.) P: variable with topic. Exploration of a topic in sociology not covered by the regular curriculum but of interest to faculty and students in a particular semester. Topics to be announced.

SOC-R 497 Individual Readings in Sociology (3 cr.) P: consent of instructor and 9 credit hours of sociology courses with at least a B (3.0) or higher. Investigation of a topic not covered in the regular curriculum that is of special interest to the student and that the student wishes to pursue in greater detail. Normally available only to majors through arrangement with a faculty member.

Spanish

SPAN-S 131 Intensive Beginning Spanish I (5 cr.) Intensive introductory language sequence of courses. Recommended for prospective majors and for students with prior training in Spanish or other Romance languages. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic cultures. Credit not given for both S117-S118-S119 and S131-S132.

SPAN-S 132 Intensive Beginning Spanish II (5 cr.) Intensive introductory language sequence of courses. Recommended for prospective majors and for students with prior training in Spanish or other Romance languages. Emphasis on developing basic speaking, writing, listening, and reading skills as well as awareness of Hispanic cultures. Credit not given for both S117-S118-S119 and S131-S132.

Courses

Nursing Courses

NURS-A 100 Nursing: Drug Dosage Calculation (2 cr.) Provides a review of basic mathematics and presents a method of solving problems involving drug dosages. Course is open to those interested in nursing.

NURS-A 276 Care of the Individual: Alterations in Activity–Exercise (3 cr.) P: A150; C: A277. This course focuses on the application of all aspects of the nursing process in caring for individuals experiencing selected acute and chronic alterations in cardiac, respiratory, and hematological systems across the life span. Integration and critical examination of prior and new knowledge will be emphasized.

NURS-A 277 Nursing Practicum: Care of the Individual—Alterations in Activity–Exercise (3 cr.) C: A276. Students will focus on adults experiencing selected acute and chronic cardiac, respiratory, and hematological alterations and their related disruptions in activity–exercise abilities. The nursing process will be used in providing care that will foster positive outcomes.

NURS-A 278 Care of the Individual—Alterations in Cognition, Perception, and Interaction (3 cr.) P: A150; C: PSY B310 and A279. This course focuses on the knowledge and skills needed to care for individuals experiencing actual or potential problems of the neuro-psychological, neuro-muscular, or central nervous system. Problems include cognitive, physiological, emotional, and behavioral disruptions experienced by individuals across the life span.

NURS-A 279 Nursing Practicum: Care of the Individual—Alterations in Cognition, Perception, and Interaction (2 cr.) C: PSY B310 and A278. Students will focus on individuals experiencing neuro-psychological, neuromuscular, central nervous system, cognitive, emotional, and behavioral disruptions. Students will be expected to integrate knowledge and skills in increasingly complex care situations, as consistent with course and level competencies.

NURS-A 286 Care of the Individual—Beginning and Evolving Families (3 cr.) P: A276, A277, A278, A279, and PSY B310; C: A287. This course focuses on the study of individuals and families during the childbearing and child-raising phases of development. Concepts of growth and development, health promotion, health maintenance, illness, and illness prevention are integrated.

NURS-A 287 Nursing Practicum: Care of the Individual—Beginning and Evolving Families (3 cr.) C: A286. Students will focus on care of individuals and families during the childbearing and child-raising phases of development. Students will be expected to apply nursing skills and knowledge to promote family function and growth. Students will have opportunities to interact with children, adults, and families across the care continuum.

NURS-A 288 Care of the Individual within a Family and Community Context

(2 cr.) P: A276, A277, A278, A279, PSY B310; C: A289. This capstone course focuses on the integration of knowledge and its application in the provision of comprehensive nursing care. The role of the nurse in planning, collaborating, organizing, communicating, problem solving, and evaluating care outcomes will be emphasized. Principles of care management and pharmacology will be synthesized into course content.

NURS-A 289 Nursing Practicum: Care of the Individual within the Family and Community Context (3 cr.) C: A288. Students will apply the nursing process in managing care for multiple individuals and their families in a variety of acute and community-focused settings where policies and procedures are specified and professional consultation is available. Students will also demonstrate their ability to synthesize pharmacology and the use of computers in their practice.

NURS-A 290 The Discipline of Nursing: Role Transitioning (2 cr.) C: A286 and/or A288. This course focuses on the transition from the role of student to graduate nurse. Emphasis is placed on the responsibilities and expectations of the professional nurse in the health-care delivery system. Legal and ethical issues, professional development, group dynamics, risk management, quality assurance, political action, nursing organizations, and the use of research to inform nursing practice will be explored.

NURS-B 104 Power Up: Strategies for Academic Success (3 cr.) This first-year course for students who have declared nursing as a major focuses on assisting students in gaining essential skills for academic success and in developing the ability to make use of university resources. Topics will include time management, stress management, critical thinking, development of networks of support, communication skills, learning styles, and academic responsibility. Teaching and learning strategies will incorporate campus technology and library resources as tools for completion of course requirements.

NURS-B 231 Communication for Health-Care Professionals (3 cr.) (Traditional) Students in this course will focus on basic communication skills essential for working with health-care professionals and clients of various ages. Content includes interpersonal communications and group dynamics. Students will practice communication skills with individuals, within groups, and through electronic media.

NURS-B 244 Comprehensive Health Assessment (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All third- semester nursing courses; P/C: Anatomy, Physiology, or Microbiology; C: B245. This course focuses on helping students acquire skills to conduct a comprehensive health assessment, including the physical, psychological, social, functional, and environmental aspects of health. The process of data collection, interpretation, documentation, and dissemination of assessment data will be addressed.

NURS-B 245 Comprehensive Health Assessment: Practicum (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All third-semester courses; C: B244. Students will have the opportunity to use techniques of interview, observation, percussion, palpation, inspection, and auscultation in assessing clients across the life span in simulated and actual environments.

NURS-B 304 Professional Nursing Seminar I (3 cr.) (R.N.-B.S.N.) This course focuses on core theoretical concepts of professional nursing practice, including health, wellness, illness, self-care and caring, disease prevention, and health promotion. Students will be expected to explore theoretical premises and research related to the unique wellness perspectives and health beliefs of people across the life span. Students will learn to develop care outcomes consistent with maximizing individual potentials for wellness. Students will complete a needs assessment as part of the practicum experience.

NURS-B 403 GERONTOLOGICAL NURSING (3 cr.) (RN-BSN) This course promotes a holistic approach to persons in the later years of life. Death and dying, legal and ethical issues, family care giving, and future challenges will be discussed in the context of best practices as outlined by the John A Hartford Foundation: Institute for Geriatric Nursing.

NURS-B 404 Professional Nursing Seminar II (3 cr.) (R.N.-B.S.N.) This course focuses on the application of nursing theory and research findings in restoring and maintaining individual and family functioning for those dealing with multi-system alterations. Students will explore the ethical, legal, and moral implications of treatment options and identify tactics to maintain nursing effectiveness in their facilitation of individuals and families through the health-care system. Students will complete a scholarly analysis as part of their practicum experience.

NURS-H 365 Nursing Research (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All fifth-semester nursing courses and H355 or its equivalent. This course focuses on development of students' skills in using the research process to define clinical research problems and to determine the usefulness of research in clinical decisions related to practice. The critique of nursing and nursing-related research studies will be emphasized in identifying applicability to nursing practice.

NURS-K 301 COMPLEMENTARY HEALTH THERAPIES (3 cr.) (RN-BSN) This course will serve as an introduction to a variety of complementary therapies, including healing touch, guided imagery, hypnosis, acupuncture, aromatherapy, reflexology, and massage. The class will critically examine each therapy through assigned readings, literature reviews, presentations, guest lecturers, and optional experiential activiti

NURS-K 304 NURSING SPECIALTY ELECTIVE (1-6 cr.) This course allows the R.N. to B.S.N. student to apply nationally recognized specialty nursing knowledge and skills to the B.S.N. degree, through a portfolio or independent study approach. National specialty standards will be used to devise learning objectives, implementation and evaluation plan. This course is restricted to R.N. to B.S.N. students only.

NURS-K 305 NEW INNOV IN HLTH&HLTH CARE (- cr.) (RN-BSN) This course explores emergent trends in health and health care, including technological advances in health care, developing approaches to care based on new knowledge and/ or research findings, and trends in health care delivery in a themed, survey or independent study format.

NURS-K 492 Nursing Elective (1-6 cr.) Many nursing elective courses are offered under this number. These elective offerings vary from year to year depending on student interest and available resources. Students are kept informed of elective offerings both through informational forums and through listings in the online course offerings.

NURS-K 499 GENETICS AND GENOMICS (- cr.) (RN-BSN) This course introduces a basic knowledge of genetics in health care, including genetic variation and inheritance; ethical, legal, and social issues in genetic health care; genetic therapeutics; nursing roles; genetic basis of selected alterations to health across the life span; and cultural considerations in genetic health care are all considered.

NURS-P 216 PHARMACOLOGY (- cr.) (RN-BSN) This course focuses on basic principles of pharmacology. It includes the pharmacologic properties of major drug classes and individual drugs, with an emphasis on the clinical application of drug therapy through the nursing process.

NURS-S 473 A Multi-System Approach to the Health of the Community: Practicum (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All sixth-semester nursing courses; C: S472. Students will have the opportunity to apply the concepts of community assessment, program planning, prevention, and epidemiology to implement and evaluate interventions for community-centered care to groups or aggregates. Professional nursing will be practiced in collaboration with diverse groups within a community.

NURS-S 474 Applied Health-Care Ethics (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All sixth-semester nursing courses. This course is designed to introduce the student to major ethical theory, principles, and models for the recognition, analysis, and resolution of ethical dilemmas in health-care practice.

NURS-S 475 COMMUNITY HEALTH: RNBSN (- cr.) (RN-BSN) Basic epidemiological principles and community health nursing models are applied in collaboration with diverse groups. Disease prevention strategies are applied to individuals and populations to promote health. Students apply the concepts of community assessment, disease prevention, and health promotion to plan, implement, and evaluate interventions for populations in the community.

NURS-S 481 Nursing Management (2 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All seventh-semester nursing courses; C: S482. This course focuses on the development management skills assumed by professional nurses, including delegation of responsibilities, networking, facilitation of groups, conflict resolution, leadership, case management, and collaboration. Concepts addressed include organizational structure, change, managing quality and performance, workplace diversity, budgeting and resource allocation, and delivery systems.

NURS-S 482 Nursing Management: Practicum (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: All seventh-semester nursing courses; C: S481. Students will have the opportunity to apply professional management skills in a variety of nursing leadership roles.

NURS-S 483 Clinical Nursing Practice Capstone (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P: S481, S482, or permission of instructor; C: S484. Students will have the opportunity to demonstrate competencies consistent with program outcomes and to refine their nursing care practice skills. Students will collaborate with faculty and a preceptor in choosing a care setting, planning and organizing a learning experience, and practicing professional nursing in a safe and effective manner.

NURS-S 484 Research Utilization Seminar (1 cr.) (Traditional, Accelerated and R.N.-B.S.N.) C: S483. This course focuses on students' abilities to refine their critical/analytical skills in evaluating clinical research for applicability to nursing practice. Students will examine the role of evaluation, action research, and research findings in assuring quality of nursing care and in solving relevant problems arising from clinical practices.

NURS-S 485 Professional Growth and Empowerment (3 cr.) (Traditional, Accelerated, and R.N.-B.S.N.) P:All seventh-semester nursing courses. This course focuses on issues related to professional practice, career planning, personal goal setting, and empowerment of self and others. Students will discuss factors related to job performance, performance expectations and evaluation, reality orientation, and commitment to lifelong learning.

NURS-S 487 NURSING MANAGEMENT:RNBSN (- cr.) RN-BSN) This course focuses on development of management skills assumed by professional nurses, including delegation of responsibilities, networking, and facilitation of groups, conflict resolution, leadership, case management, and collaboration. Concepts addressed include organizational structure, delivery systems, change, managing quality and performance, budgeting and resource allocation, staffing, scheduling, evaluation and career development.

NURS-Z 480 B.S.N. Portfolio Review for Course Substitution (1-6 cr.) P: Permission of instructor. The portfolio review process is available to all undergraduate students who believe that they can meet the learning objectives/competencies required of a specific nursing course within their program of study. The portfolio is a mechanism used to validate the acquisition of knowledge and skills congruent with course expectations and student learning outcomes. The portfolio provides objective evidence that students have acquired necessary content and skills through prior learning and/or practice experiences.

NURS-Z 492 Individual Study in Nursing (1-6 cr.) Opportunity for independent study of topics related to nursing practice. Before enrolling in an independent study option, each student must obtain permission from a faculty member who will supervise the study and

file appropriate forms prior to registration.

Courses

Other Courses

Art

HER-H 100 Art Appreciation (3 cr.) An understanding and appreciation of outstanding works of art through analysis of artistic purposes and techniques, and knowledge of historical style and subject matter. Not counted as credit toward the B.F.A. or B.A.E. degree, nor toward the major or minor requirements in art history.

Informatics

INFO-I 101 Introduction to Informatics (4 cr.) Problem solving with information technology; introductions to information representation, relational databases, system design, propositional logic, cutting-edge technologies: CPU, operation systems, networks, laboratory emphasizing information technology including web page design, word processing, databases, using tools available on campus.

NEWM-N 100 Foundations of New Media (3 cr.) An exploration of the characteristics of digital media, including interactivity, hypermedia, immersion, and storytelling. Includes an introduction to the practice, theory, and history of new media, from the viewpoint of technology, communication, and culture. There are readings, demonstrations, examples, hands-on projects, and written assignments.

NEWM-N 110 Visualizing Information (3 cr.) An introductory course for new media students using traditional and digital media and print best practices. Students develop an understanding of basic design principles and applications. Design history and the elements of composition and typography are applied through exercises and projects. The focus is on foundations of visual thinking, sketching, exploring the relationship between type and image, and developing multiple solutions to a given problem in the context of simple and complex visual information. Computer images will be constructed using the basics of Illustrator.

NEWM-N 190 Topics in Interactive Media (1-3 cr.) Special topics in interactive media, with a focus on exploring concepts at the forefront of media arts.

NEWM-N 201 Design Issues in Digital Media (3 cr.) Exploration of the traditional principles of visual design, as expressed in digital design tools and applied to digital media. Topics include visual literacy, fundamental design elements and design principles, and their expression in various tools for digital design. Hands-on practice with applying design principles in several projects.

NEWM-N 240 Introduction to Digital Video (3 cr.) P: N101. An introductory course covering video production techniques for digital media. The technology (hardware and software) along with techniques will be taught through lecture and projects. All phases of video production will be addressed, from pre-production through production to post-

production with a focus on the digital media aspects.

Courses

Health and Physical Education

Health

HPER-C 366 Community Health (3 cr.) Introduction to community health within the public health context. Students will develop an understanding of historical and theoretical foundations of community health and major societal health concerns, explore community health models and programs used to address these concerns, and examine racial/ethnic, cultural, socioeconomic and related determinants of community health.

TCEM-FN 30300 Essentials of Nutrition (3 cr.) Basic nutrition and it's application in meeting nutritional needs of all ages. Consideration is given to food selection, legislation, and community nutrition education programs.

TCEM-FN 31300 PRIN OF HLTHY MENU PLG & FD PR (- cr.) Basic nutrition as applied to food intake patterns and modifications/preparation of recipes to provide a more healthful diet.

TCEM-FN 315 Fundamentals of Nutrition (3 cr.) P: CHEM C101 or BIOL N217 or consent of instructor.t of instructor Basic principles of nutrition and their application in meeting nutritional needs during the life cycle.

HPER-H 160 First Aid and Emergency Care (3 cr.) Lecture and demonstration of first-aid measures for wounds, hemorrhage, burns, exposure, sprains, dislocations, fractures, unconscious conditions, suffocation, drowning, and poisons, with skill training in all procedures.

HPER-H 263 Personal Health (3 cr.) This survey course provides a theoretical and practical treatment of the concepts of disease prevention and health promotion. Covers such topics as emotional health; aging and death; alcohol, tobacco, and drug abuse; physical fitness; nutrition and dieting; consumer health; chronic and communicable diseases; safety; and environmental health.

Military Science

MIL-G 102 Foundations in Leadership (1 cr.) G102 Foundations in Leadership (1 cr.) This course provides an overview of leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. Cadets explore dimenstions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Leadership labs, physical training sessions, and a weekend field training exercise are optional, but available to those looking for more out of their college experience.

MIL-G 201 Innovative Tactical Leadership (2 cr.) G201 Innovative Tactical Leadership (2 cr.) This course explores the dimensions of creative and innovative tactical

leadership strategies and styles by studying historical case studies and engaging in interactive student exercise. Cadets practice aspects of personal motivation and team building in the context of planning, executing and assessing team exercises. Leadership labs, physical training sessions, and a week-end field training exercise are optional, but available to those looking for more out of their college experience.

MIL-G 202 Leadership in Changing Environments (2 cr.) G202 Leadership in Changing Environments (2 cr.) This course examines the challenges of leading in complex contemporary operational environments. Dimensions of the cross-cultural challenges of leadership in a constantly changing world are highlighted and applied to practical Army leadership tasks and situations. Leadership labs, physical training sessions, and a weekend field training exercise are optional, but available to those looking for more out of their college experience.

Physical Education

HPER-E 135 Golf (1 cr.) Beginning instruction in techniques for putting, chipping, pitching, iron swing, and wood stroke. Course includes rules and etiquette of golf. Students play on par-3 courses. Fee charged.

HPER-H 160 First Aid and Emergency Care (3 cr.) Lecture and demonstration of first-aid measures for wounds, hemorrhage, burns, exposure, sprains, dislocations, fractures, unconscious conditions, suffocation, drowning, and poisons, with skill training in all procedures.

HPER-P 290 Movement Experiences for Preschool and Elementary School Children (2 cr.) Covers potential outcomes of preschool and elementary school motor development programs, how to implement such programs, and appropriate movement experiences for young children.

HPER-R 324 Recreational Sports Programming (3 cr.) Lecture and demonstration of first-aid measures for wounds, hemorrhage, burns, exposure, sprains, dislocations, fractures, unconscious conditions, suffocation, drowning, and poisons, with skill training in all procedures.

Courses

Science

Astronomy

AST-A 100 The Solar System (3 cr.) Fall. Survey of the solar system, including the Earth, sun, moon, eclipses, planets and their satellites, comets, laws of planetary motion, etc. Discussion of the origin of the solar system, life on earth, and the possibilities of extraterrestrial life. Also astronomical instruments and celestial coordinates.

AST-A 105 Stars and Galaxies (3 cr.) Spring. Survey of the universe beyond the solar system, including stars, pulsars, black holes, principles of spectroscopy and the H-R diagram, nebulae, the Milky Way, other galaxies, quasars, expanding universe, cosmology, and extraterrestrial life.

Biology

BIOL 55600 Physiology I (3 cr.) P: K10300, CHEM C342. Fall, night. Principles of physiology: nerve and muscle, temperature regulation, ion and water balance.

BIOL-K 101 Concepts of Biology I (5 cr.) P: high school or college chemistry. Fall, day; Spring, day, night; Summer, day. An introductory course emphasizing the principles of cellular biology; molecular biology; genetics; and plant anatomy, diversity, development, and physiology.

BIOL-K 103 Concepts of Biology II (5 cr.) P: K101. Fall, day, night; Spring, day; Summer, day. An introductory biology course emphasizing phylogeny, structure, physiology, development, diversity, evolution and behavior in animals.

BIOL-K 295 SPECIAL ASSIGNMENTS (0 cr.) Fall, Spring. Special work, such as directed readings, laboratory or fieldwork, or presentation of material not available in the formal courses in the department.

BIOL-K 322 Genetics and Molecular Biology (3 cr.) P: K103 and CHEM C106. Fall, day. Spring of even-numbered years. The course covers the principles of classical and molecular genetics including Mendelian inheritance, linkage, nucleic acids, gene expression, recombinant DNA, genomics, immunogenetics, and regulation.

BIOL-K 341 PRINC OF ECOLOGY & EVOLUTION (3 cr.) A study of the interactions of organisms with one another and with their nonbiotic environments in light of evolution.

BIOL-K 342 PRINC OF ECOLOGY & EVOLUTN LAB (2 cr.) Fall, day. Application of ecology and evolution principles in laboratory and field experiments as well as demonstration of techniques of general ecology.

BIOL-K 483 BIOLOGICAL CHEMISTRY (3 cr.) Chemistry of biologically important molecules including carbohydrates, lipids, proteins, and nucleic acids. Special emphasis on

chemistry of intermediary metabolism.

BIOL-K 493 Independent Research (1-3 cr.) P: Consent of instructor. Fall, Spring, Summer. A course designed to give undergraduate students majoring in biology an opportunity to do research in fields in which they have a special interest.

BIOL-N 100 Contemporary Biology (3 cr.) Fall, day, night; Spring, day, night; Summer. Selected principles of biology with emphasis on issues and problems extending into everyday affairs of the student.

BIOL-N 108 Plants, Animals and the Environment (3 cr.) Fall, day, night; Spring, day, night; Summer, day. This course is designed to provide students and future K-8 teachers with a background in the general biology concepts of plants, animals and the environment, which are the backbone of the State of Indiana science standards.

BIOL-N 212 Human Biology (3 cr.) Equiv. PU BIOL 201. Fall, day. First course in a two-semester sequence in human biology with emphasis on anatomy and physiology, providing a solid foundation in body structure and function.

BIOL-N 213 Human Biology Laboratory (1 cr.) P: N212 C: N212 Fall, day. Accompanying laboratory for N212.

BIOL-N 214 Human Biology (3 cr.) Spring, day. Continuation of N212.

BIOL-N 215 Human Biology Laboratory (1 cr.) Spring, day. Accompanying laboratory for N214.

BIOL-N 217 Human Physiology (5 cr.) Fall, day; Spring, day; Summer, day. Lectures and laboratory work related to cellular, musculoskeletal, neural, cardiovascular, gastrointestinal, renal, endocrine, and reproductive function in humans.

BIOL-N 251 Introduction to Microbiology (3 cr.) Spring, night. This course includes a laboratory component. The isolation, growth, structure, functioning, heredity, identification, classification, and ecology of microorganisms; their role in nature and significance to humans.

BIOL-N 261 Human Anatomy (5 cr.) Fall, day, night; Spring, day, night; Summer, day, night. Lecture and laboratory studies of the histology and gross morphology of the human form, utilizing a cell-tissue-organ system-body approach.

Chemistry

CHEM-C 100 The World of Chemistry (3 cr.) A topically oriented, nonmathematical introduction to the nature of matter. Topics covered include fossil fuel and nuclear sources of power; environmental issues involving chemistry such as recycling, acid rain, air and water pollution, global warming, ozone depletion; genetic modification of foods, DNA profiling, use of food additives and herbal supplements; and other public policy issues involving science.

CHEM-C 101 Elementary Chemistry I (3 cr.) Usually taken concurrently with C121. Fall, day, night; Spring, day, night; Summer II, day. Essential principles of chemistry, atomic and molecular structure, bonding, properties and reactions of elements and compounds, stoichiometry, solutions, and acids and bases. For students who are not planning careers in the sciences and for those with no previous course work in chemistry. Note: most degree programs that include C101 require the concurrent laboratory, C121.

CHEM-C 105 Principles of Chemistry I (3 cr.) Fall, day, night; Spring, day; Summer I, day. Usually taken concurrently with C125. A placement examination may be required for admission to this course. See "Chemistry Placement Examination" above. Principles of inorganic and physical chemistry emphasizing physical and chemical properties, atomic and molecular structure, chemical bonding, and states of matter.

CHEM-C 106 Principles of Chemistry II (3 cr.) Fall, day; Spring, day, night; Summer II, day. Continuation of C105. Usually taken concurrently with C126. Topics include condensed phases, solution chemistry, thermodynamics, equilibrium, and kinetics.

CHEM-C 110 The Chemistry of Life (3 cr.) A nonmathematical introduction to organic molecules and their transformation to useful materials such as drugs and polymers. An emphasis is placed on the chemical features of biomolecules including hormones and neurotransmitters, proteins, lipids (fats), carbohydrates (sugars), and nucleic acids (DNA/RNA). The chemistry of enzymes, carcinogens, vitamins, antihistamines, anesthetics, genetic engineering, mental health, and other health-related topics.

CHEM-C 115 Laboratory for C110 The Chemistry of Life (2 cr.) Laboratory work illustrating topics covered in C110.

CHEM-C 121 Elementary Chemistry Laboratory I (2 cr.) Fall, day, night; Spring, day, night; Summer II, day. Introduction to the techniques and reasoning of experimental chemistry. Emphasis is given to study of physical and chemical properties of inorganic compounds.

CHEM-C 125 Experimental Chemistry I (2 cr.) P or C: C105 or equivalent. Fall, day, night; Spring, day; Summer I, day. Laboratory work illustrating topics covered in C105.

CHEM-C 126 Experimental Chemistry II (2 cr.) lecture, laboratory P: C105 and C125; P or C: C106 or equivalent. Fall, day; Spring, day, night; Summer II, day. Continuation of C125. Laboratory work illustrating topics covered in C105 and C106.

CHEM-C 311 Analytical Chemistry Laboratory (1 cr.) Spring, Summer I, day. Laboratory instruction in the fundamental analytical techniques discussed in C310

CHEM-C 341 Organic Chemistry I (3 cr.) Fall, day, night; Spring, day; Summer I, day. Comprehensive study of organic compounds. Valence bond theory, stereochemistry, and physical properties of organic compounds are discussed in detail. Introduction to reaction mechanisms and to spectroscopic identification. Synthesis and reactions of selected compounds are also discussed.

CHEM-C 342 Organic Chemistry II (3 cr.) Fall, day; Spring, day, night; Summer II, day. Continuation of C341. The chemistry of aromatic compounds and other major functional groups are discussed in detail. Multistep synthetic procedures and reaction mechanisms are emphasized. Introduction to biological chemistry.

CHEM-C 343 Organic Chemistry Laboratory I (2 cr.) Fall, day, night; Spring, day, night; Summer I, day. Fundamental laboratory techniques of organic chemistry, introduction to spectroscopic methods of compound identification, and general synthetic methods.

CHEM-C 344 Organic Chemistry Laboratory II (2 cr.) Fall, night; Spring, day, night; Summer II, day. Preparation, isolation, and identification of organic compounds, spectroscopic methods of compound identification, qualitative organic analysis, multistep synthesis.

Computer Information Systems

CSCI 23000 Computing I (4 cr.) P or C: MATH 154 or MATH 159. The context of computing in history and society, information representation in digital computers, introduction to programming in a modern high-level language, introduction to algorithm and data structures, their implementation as programs.

CSCI 24000 Computing II (4 cr.) P: 230. Continues the introduction of programming began in CSCI 230, with particular focus on the ideas of data abstraction and object-oriented programming. Topics include programming paradigms, principle of language

design, object-oriented programming, programming and debugging tools, documentation, recursion, linked data structures, and introduction to language translation.

CSCI-N 100 Introduction to Computers and Computing (3 cr.) P or C: MATH 001, M001, or equivalent. No computing experience assumed. How computers work, word processing, spreadsheets, file management, and Internet skills. Emphasis on problem-solving tech-niques. Lecture and laboratory. Credit given for only one of CSCI N100, CPT 106, CIT 106, or BUS K201.

CSCI-N 201 Programming Concepts (3 cr.) Summary of basic computing topics, problem solving techniques, and their application to computing. Introduction to programming concepts with a focus on language-independent principles, such as algorithm design, debugging strategies, essential control structures, and basic data structure concepts. Lecture and laboratory.

CSCI-N 207 Data Analysis Using Spreadsheets (3 cr.) P: MATH 111. Summary of basic computing topics. An introduction to data analysis using spreadsheets. Emphasis on the application of computational problem-solving techniques. Lecture and laboratory.

CSCI-N 241 Fundamentals of Web Development (3 cr.) Introduction to writing content for the Internet and World Wide Web. Emphasis on servers, hand-coded HTML, Cascading Style Sheets, and extending HTML with other Web technologies. Lecture and laboratory.

CSCI-N 301 Fundamental Computer Science Concepts (3 cr.) P: MATH M118. An introduction to fundamental principles of computer science, including hardware architecture, algorithms, software engineering, and data storage. Lecture and laboratory.

CSCI-N 305 C Language Programming (3 cr.) The basics of computer programming concepts using the C programming language. Emphasis on problem solving and algorithm implementation using a universal subset of the C programming language. Lecture and laboratory.

CSCI-N 331 Visual Basic Programming (3 cr.) An introduction to programming with a focus on rapid application development environments, event-driven programming, and programming in the Windows environment. Course will demonstrate how the major application types (spreadsheets, databases, text editors) are written. Lecture and laboratory.

CSCI-N 341 Introduction to Client-Side Web Programming (3 cr.) P: N241 or equivalent. Introduction to programming with a focus on the client-side programming environment. Programming using languages commonly embedded in Web browsers. Lecture and laboratory.

CSCI-N 342 Server-Side Programming for the Web (3 cr.) P: N341. Designing and building applications on a Web server. Focuses on the issues of programming applied to Web servers. Emphasis on relational database concepts, data design, languages used on the server, transaction handling, and integration of data into Web applications.

CSCI-N 351 Introduction to Multimedia Programming (3 cr.) An integration of computing concepts and multimedia development tools. An introduction to the science behind multimedia (compression algorithms and digital/audio conversion). Use of authoring tools to create compositions of images, sounds, and video. Special emphasis given to using the Web as a multimedia presentation environment. Lecture and laboratory.

CSCI-N 355 Introduction to Virtual Reality (3 cr.) Explore concepts of 3D imaging and design including primitive shapes, transformations, extrusions, face sets, texture mapping, shading, and scripting. Lecture and laboratory.

General Science

SCI-I 120 Windows on Science (1 cr.) Fall, spring. Designed for new and prospective science majors, the course covers an integrative overview of science, examining science and society, the scientific method and community of scientists, undergraduate research, professional ethics, an exploration of science-based careers, and strategies for success as a science major.

Geology

GEOL-G 107 Environmental Geology (3 cr.) Fall, Spring, Summer. An introduction to geology through discussion of geological topics that show the influence of geology on modern society. Topics include mineral and energy resources, water resources, geologic hazards and problems, geology and health, and land use.

GEOL-G 109 Fundamentals of Earth History (3 cr.) Fall, Spring, Summer. Basic principles of earth history: geologic time, basic rock types, reconstructing past environments. Physical development of the earth: its interior, mountain formation, plate tectonics. Origin and development of life: evolution, the fossil record. With laboratory G119, equivalent to IUB GEOL G104, IUB GEOL G112, and PU GEOS 112.

GEOL-G 110 Physical Geology (3 cr.) Fall, Spring, Summer. Introduction to processes within and at the surface of the earth. Description, classification, and origin of minerals and rocks. The rock cycle. Internal processes: volcanism, earthquakes, crustal deformation, mountain building, plate tectonics. External processes: weathering, mass wasting, streams, glaciers, ground water, deserts, coasts. With laboratory G120, equivalent to IU GEOL G103, IU GEOL G111, and PU GEOS 111.

GEOL-G 115 Introduction to Oceanography (3 cr.) Fall, Spring, Summer. Nonmathematical introduction to the geology, biology, and physical characteristics of the ocean. Includes waves, tides, and currents of the world ocean, the adaptations and distribution of marine animals, pollution of the marine ecosystem, and an introduction to the global ocean/atmosphere system.

GEOL-G 117 Environmental Geology Laboratory (1 cr.) Fall, Spring, Summer. Laboratory exercises in environmental aspects of the geosciences. To accompany G107.

GEOL-G 119 Fundamentals of Earth History Laboratory (1 cr.) Fall, Spring, Summer. Laboratory studies of rocks, fossils, and stratigraphic principles to reconstruct past environments and interpret Earth history. To accompany G109.

GEOL-G 120 Physical Geology Laboratory (1 cr.) Fall, Spring, Summer. Laboratory studies of minerals and rocks, landscapes, and earth structures.

INGT-I 300 Junior/Senior Integrator (3 cr.) This course fulfills the general education requirement for junior/senior integrator for majors in the School of Liberal Arts and in the School of Science.

Math

MATH 00100 Introduction to Algebra (4 cr.) Fall, spring, summer. Covers the material taught in the first year of high school algebra. Numbers and algebra, integers, rational numbers, equations, polynomials, graphs, systems of equations, inequalities, radicals. Credit does not apply toward any degree.

MATH 11100 Algebra (4 cr.) P: 001 or M001 (with a minimum grade of C) or placement. Fall, spring, summer. Real numbers, linear equations and inequalities, systems of equations, polynomials, exponents, and logarithmic functions. Covers material in the second year of high school algebra. This course satisfies the prerequisites needed for MATH M118, M119, 13000, 13600, 15300, 15400, and STAT 30100.

MATH 11100 FUNDAMENTALS OF ALGEBRA (- cr.) P: 001 or M001 (with a minimum

grade of C) or placement. Intended primarily for liberal arts and business majors. Integers, rational and real numbers, exponents, decimals, polynomials, equations, word problems, factoring, roots and radicals, logarithms, quadratic equations, graphing, linear equations in more than one variable, and inequalities. This course satisfies the prerequisites needed for MATH M118, M119, 13000, 13600, and STAT 30100.

MATH 13000 Mathematics for Elementary Teachers I (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent. Fall, spring, summer. Numeration systems, mathematical reasoning, integers, rationals, reals, properties of number systems, decimal and fractional notations, and problem solving.

MATH 13200 Mathematics for Elementary Teachers III (3 cr.) P: 13000 and one year of high school geometry. Fall, spring, summer. Rationals, reals, geometric relationships, properties of geometric figures, one-, two-, and three-dimensional measurement, and problem solving.

MATH 13600 Mathematics for Elementary Teachers (6 cr.) Fall, spring, summer. 13600 is a one-semester version of 13000 and 13200. Not open to students with credit in 13000 or 13200.

MATH 15300 Algebra and Trigonometry I (3 cr.) Fall, spring, summer. 15300-15400 is a two-semester version of 15900. Not open to students with credit in 15900. 15300 covers college-level algebra and, together with 15400, provides preparation for 16500, 22100, and 23100.

MATH 15400 Algebra and Trigonometry II (3 cr.) P: 15300 (with a minimum grade of C) or equivalent. Fall, spring, summer. 15300-15400 is a two-semester version of 15900. Not open to students with credit in 15900. 15400 covers college-level trigonometry and, together with 15300, provides preparation for 16500, 22100, and 23100.

MATH 15900 Precalculus (5 cr.) P: 11100 (with a minimum grade of B) or placement. Fall, spring. 15900 is a one-semester version of 15300-15400. Not open to students with credit in 15300 or 15400. 15900 covers college-level algebra and trigonometry and provides preparation for 16500, 22100, and 23100.

MATH 16300 Integrated Calculus and Analytic Geometry I (5 cr.) P: 15400 or 15900 (with a minimum grade of C) or equivalent, and one year of geometry. Equiv. IU MATH M211. Fall, spring, summer I. Review of plane analytic geometry and trigonometry, functions, limits, differentiation, applications of differentiation, integration, the fundamental theorem of calculus, and applications of integration. An honors option is available in this course. Note: Effective Fall 2008, this course is offered as MATH 16500.

MATH 16500 Analytic Geometry and Calculus I (4 cr.) P: 15900 or 15400 (minimum grade of C) or equivalent, and one year of high school geometry. Fall, spring, summer I. Introduction to differential and integral calculus of one variable, with applications. Conic sections.

MATH 16600 Analytic Geometry and Calculus II (4 cr.) P: 16500 (minimum grade of C). Fall, spring, summer I. Continuation of MATH 16500. Vectors in two and three dimensions. Techniques of integration, infinite series, polar coordinates, surfaces in three dimensions.

MATH 17100 Multidimensional Mathematics (3 cr.) P: 15900 or 15400 (minimum grade of C) or equivalent, and one year of high school geometry. An introduction to mathematics in more than two dimensions. Graphing of curves, surfaces and functions in three dimensions. Two and three dimensional vector spaces with vector operations. Solving systems of linear equations using matrices. Basic matrix operations and determinants.

MATH 22100 Calculus for Technology I (3 cr.) P: 15400 or 15900 (with a minimum grade of C-) or equivalent, and one year of geometry. Fall, spring, summer. Analytic

geometry, the derivative and applications, and the integral and applications.

MATH 22200 Calculus for Technology II (3 cr.) P: 22100 (with a minimum grade of C-). Fall, spring, summer. Differentiation of transcendental functions, methods of integration, power series, Fourier series, and differential equations.

MATH 26100 Multivariate Calculus (4 cr.) P: 16400. Equiv. IU MATH M311. Fall, spring, summer. Spatial analytic geometry, vectors, curvilinear motion, curvature, partial differentiation, multiple integration, line integrals, and Green's theorem. An honors option for this course is available. Note: Effective Fall 2009, this course is offered under an updated course description, as below.

MATH 26600 ORDINARY DIFFERENTIAL EQUATNS (4 cr.) Fall, spring, summer. First order equations, second and nth order linear equations, series solutions, solution by Laplace transform, systems of linear equations.

MATH-M 001 Introductory Algebra (6 cr.) P: Placement test or self election for students who need more time on task. Fall, spring. This is a first course in the study of algebra. Real numbers, algebraic expressions, solving equations, graphing equations, operations with polynomials, factoring polynomials, rational expressions and equations, solutions of systems of equations, radical expressions, and problem-solving strategies.

MATH-M 118 Finite Mathematics (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent00. Fall, spring, summer. Set theory, logic, permutations, combinations, simple probability, conditional probability, Markov chains. An honors option is available in this course.

MATH-M 119 Brief Survey of Calculus I (3 cr.) P: 11100 or 11000 (with a minimum grade of C-) or equivalent. Fall, Spring, Summer. Sets, limits, derivatives, integrals, and applications. An honors option is available in this course.

Physics

PHYS 15200 Mechanics (4 cr.) Fall, day; Spring, day, night; Summer, day. Statics, uniform and accelerated motion; Newton's laws; circular motion; energy, momentum, and conservation principles; dynamics of rotation; gravitation and planetary motion; properties of matter; and simple harmonic and wave motion. For more information, visit our Web page at webphysics.iupui.edu/introphysics.

PHYS 20000 Our Physical Environment (3 cr.) Fall, night; Spring, night. A nonmathematical introduction to physical concepts and methods by means of examples from daily life and current technological applications.

PHYS 21800 General Physics (4 cr.) Fall, night; Spring, night; Summer, day. Mechanics, conservation laws, gravitation; simple harmonic motion and waves; kinetic theory, heat, and thermodynamics for students in technology fields.

PHYS 21900 General Physics (4 cr.) Fall, night; Spring, night; Summer, day. Electricity, light, and modern physics.

PHYS 25100 Heat, Electricity, and Optics (5 cr.) Fall, day, night; spring, day; summer, day. Heat, kinetic theory, elementary thermodynamics, and heat transfer. Electrostatics, electrical currents and devices. Magnetism and electromagnetic radiation. Optics. For more information, visit the Web site at webphysics.iupui.edu/introphysics.

Psychology

PSY-B 103 Orientation to a Major in Psychology (1 cr.) B103 Orientation to a Major in Psychology (1 cr.) This course will help students establish goals for their academic experience in three areas: career, relationships, and personal life. They will be introduced

to psychological resources on campus, the faculty, and student organizations. They also will make a curriculum plan to meet their learning objectives.

PSY-B 104 Psychology as a Social Science (3 cr.) B104 Psychology as a Social Science (3 cr.) Equiv. to IU PSY P102 and PU PSY 120. Fall, Spring, Summer. Introduction to scientific method, individual differences, personality, developmental, abnormal, social, and industrial psychology.

PSY-B 105 Psychology as a Biological Science (3 cr.) B105 Psychology as a Biological Science (3 cr.) Equiv. to IU PSY P101 and PU PSY 120. Fall, Spring, Summer. Research methods and content areas of learning, sensation-perception, psychophysiology, motivation, emotions, and statistics.

PSY-B 252 Topics in Psychology (1-3 cr.) B252 Topics in Psychology (1-3 cr.) Topics in psychology and interdisciplinary applications. May be repeated, provided different topics are studied, for a maximum of 4 credit hours.

PSY-B 292 Readings and Research in Psychology (1-3 cr.) B292 Readings and Research in Psychology (1-3 cr.) P: consent of instructor. Fall, Spring. Independent readings and research on psychology problems. For freshmen and sophomores only.

PSY-B 305 Statistics (3 cr.) B305 Statistics (3 cr.) P: B104 or B105, and 3 credits of mathematics that carry School of Science credit. Equiv. to IU PSY K300, PSY K310, and PU PSY 201. Fall, Spring, Summer. Introduction to basic statistical concepts; descriptive statistics and inferential statistics. Introduction to data analytic software.

PSY-B 307 Tests and Measurement (3 cr.) B307 Tests and Measurement (3 cr.) P: Three (3) credit hours of psychology and B305. Equiv. to IU PSY P336 and PU PSY 202. Overview of statistical foundations of psychological measurement (e.g., test development, norms, reliability, validity). Survey of commonly used assessment instruments (e.g., intelligence/aptitude, personality, academic achievement tests) and applications of psychological testing in different settings (e.g., clinical, industrial/ organizational, school, forensic/legal settings). Recommended for students considering graduate training in clinical, industrial/organizational, school, or related areas of psychology.

PSY-B 310 Life Span Development (3 cr.) B310 Life Span Development (3 cr.) Fall, Spring, Summer. Equiv. to PU PSY 230. Emphasizes the life span perspective of physical and motor, intellectual and cognitive, language, social and personality, and sexual development. Commonalities across the life span, as well as differences among the various segments of the life span, are examined. Theory, research, and practical applications are stressed equally.

PSY-B 311 Introductory Laboratory in Psychology (3 cr.) B311 Introductory Laboratory in Psychology (3 cr.) P: B105 and B305 or consent of instructor. Equiv. to IU PSY P211, and PU PSY 203. Fall, Spring. Introductory laboratory in experimental methods and statistical treatment of data in several areas of psychology; introduction to experimental report writing.

PSY-B 320 Behavioral Neuroscience (3 cr.) B320 Behavioral Neuroscience (3 cr.) P: B105. Equiv. to IU PSY P326 and PU PSY 220. Review of necessary background in neurophysiology and neuroanatomy followed by the relationship of physiology to sensory processes, motivation, and learning. Emphasis on research with animals.

PSY-B 321 CLINICAL WRITING (3 cr.)

PSY-B 325 PROFESSIONAL ETHICS (3 cr.)

PSY-B 328 WORKING WITH FAMILIES (3 cr.)

PSY-B 334 Perception (3 cr.) B334 Perception (3 cr.) P: B105. Equiv. to IU PSY P329 and PU PSY 310. Consideration of the concepts and research in perception. Relation of

sense organ systems to human behavior. Some attention to social and cultural factors.

PSY-B 340 Cognition (3 cr.) B340 Cognition (3 cr.) P: B105 or consent of instructor. Equiv. to IU PSY P335 and PU PSY 200. A survey of information processing theories from historical antecedents through current theories. Research methodology and theory will be emphasized throughout the discussion of issues such as perception, attention, memory, reasoning, and problem solving.

PSY-B 344 Learning (3 cr.) B344 Learning (3 cr.) P: B105. Equiv. to IU PSY P325 and PU PSY 314. History, theory, and research involving human and animal learning and cognitive processes.

PSY-B 356 Motivation (3 cr.) B356 Motivation (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P327 and PU PSY 333. Study of motivational processes in human and animal behavior, how needs and incentives influence behavior, and how motives change and develop.

PSY-N 358 Introduction to Industrial/Organizational Psychology (3 cr.) B358 Introduction to Industrial/Organizational Psychology (3 cr.) P: Three (3) credit hours of psychology or consent of instructor. Equiv. to IU PSY P323 and PU PSY 372. This course surveys various aspects of behavior in work situations using the scientist-practitioner perspective. Traditional areas covered from personnel psychology include selection, training, and performance appraisal; areas surveyed from organizational psychology include leadership, motivation, and job satisfaction.

PSY-B 360 Child and Adolescent Psychology (3 cr.) B360 Child and Adolescent Psychology (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P316 and PU PSY 235. Development of behavior in infancy, childhood, and adolescence, including sensory and motor development and processes such as learning, motivation, and socialization.

PSY-B 362 Practicum in Child Psychology (3 cr.) B362 Practicum in Child Psychology (3 cr.) P: consent of instructor. Experience working with children in field setting. May be repeated once.

PSY-B 365 Stress and Health (3 cr.) B365 Stress and Health (3 cr.) This course will familiarize students with the study of physical health within the field of psychology. Topics include the relationship between stress and health, health promotion, health behaviors, chronic illness, and the patient-physician relationship. Research methods in health psychology as well as major theories underlying the field will be examined and evaluated. Psychological variables related to physical health will be examined within the framework of these theories. Practical application of constructs will be emphasized through activities and writing assignments.

PSY-B 370 Social Psychology (3 cr.) B370 Social Psychology (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P320 and PU PSY 240. Fall, Spring, Summer. Study of the individual in social situations including socialization, social perception, social motivation, attitudes, social roles, and small group behavior.

PSY-B 374 Group Dynamics Theory and Research (3 cr.) B374 Group Dynamics Theory and Research (3 cr.) P: B370. An intensive survey of research and theory on the behavior of small groups and the research methods by which groups are studied.

PSY-B 375 Psychology and Law (3 cr.) B375 Psychology and Law (3 cr.) This course provides an overview of the U.S. legal system from a behavioral science perspective. Topics include: careers in psychology and law; theories of crime; police investigations and interrogations; eyewitness accuracy; jury decision-making; sentencing; assessing legal competence; insanity and dangerousness; and the psychology of victims.

PSY-B 376 The Psychology of Women (3 cr.) B376 The Psychology of Women (3 cr.)

P: Three (3) credit hours of psychology. Equiv. to IU PSY P460 and PU PSY 239. A survey of topics in psychology as related to the biological, social, and psychological development of women in modern society.

PSY-B 380 Abnormal Psychology (3 cr.) B380 Abnormal Psychology (3 cr.) Equiv. to IU PSY P324 and PU PSY 350. Fall, Spring, Summer. Various forms of mental disorders with emphasis on cause, development, treatment, prevention, and interpretation.

PSY-B 382 Practicum in Community Psychology (3 cr.) B382 Practicum in Community Psychology (3 cr.) P or C: B370 or B380 and consent of instructor. Experience working with individuals who may have a wide range of psychological problems. Focus is upon both the individual and helping agency as factors in the community.

PSY-B 386 Introduction to Counseling (3 cr.) B386 Introduction to Counseling (3 cr.) P: B104, B310, and B380. This course will help students acquire a repertoire of basic counseling interview skills and strategies and expose students to specific helping techniques. This will be an activity-based course and students will enhance the general-education goals of listening and problem solving.

PSY-B 388 HUMAN SEXUALITY (3 cr.)

PSY-B 394 Drugs and Behavior (3 cr.) B394 Drugs and Behavior (3 cr.) P: B105. Equiv. to PU PSY 428. An introduction to psychopharma-cology, the study of drugs that affect behavior, cognitive functioning, and emotions, with an emphasis on drugs of abuse. The course will explore how drugs alter brain function and the consequent effects, as well as the long-term consequences of drug exposure.

PSY-B 395 ISS IN SUB ABUSE COUNSLG&PREV (3 cr.)

PSY-B 396 Alcohol, Alcoholism, and Drug Abuse (3 cr.) B396 Alcohol, Alcoholism, and Drug Abuse (3 cr.) Provides introduction to the use, misuse, and dependent use of alcohol and other mood-altering drugs. Topics include basic principles of drug action, the behavioral and pharmacological effects of drugs, and the factors that influence use, abuse, and addiction. Addiction assessment, treatment, and treatment outcome also will be covered.

PSY-B 422 Professional Practice (1-3 cr.) B422 Professional Practice (1-3 cr.) P: consent of instructor. Can include a professional internship in the community, peer advising in the psychology advising office, or teaching internship in the department. Faculty mentor must approve and oversee activity. Academic work will be required to earn credit.

PSY-B 424 Theories of Personality (3 cr.) B424 Theories of Personality (3 cr.) P: Three (3) credit hours of psychology. Equiv. to IU PSY P319 and PU PSY 420. Methods and results of the scientific study of personality, including the development, structure, and functioning of the normal personality.

PSY-B 425 Capstone Laboratory in Personality (3 cr.) B425 Capstone Laboratory in Personality (3 cr.) P: B305, B311 and B424. Demonstrations and experiments in personality research.

PSY-B 452 Seminar in Psychology (1-3 cr.) B452 Seminar in Psychology (1-3 cr.) P: B305 and B311. Topics in psychology and interdisciplinary applications. May be repeated, provided different topics are studied, for a maximum of 6 credit hours.

PSY-B 471 Capstone Laboratory in Social Psychology (3 cr.) B471 Capstone Laboratory in Social Psychology (3 cr.) P: B311 and B305. P or C: B370. Equiv. to IU PSY P421. Observational, correlational, and experimental studies in social psychology.

PSY-B 472 Practicum in Group Dynamics (3 cr.) B472 Practicum in Group Dynamics (3 cr.) P: Six (6) credit hours of psychology and consent of instructor. Equiv. to IU PSY

P321. Application in the field of group dynamics through experience as a participant in group sensitivity training.

PSY-B 492 Readings and Research in Psychology (1-3 cr.) B492 Readings and Research in Psychology (1-3 cr.) P: consent of instructor. Equiv. to IU PSY P495 and PU PSY 390 and 391. Fall, Spring, Summer. Independent readings and research on psychological problems.

PSY-B 497 CAPSTONE INDIVIDUAL RESEARCH (3 cr.)

Statistics

STAT 11300 Statistics and Society (3 cr.) Fall, spring. Intended to familiarize the student with basic statistical concepts and some of their applications in public and health policies, as well as in social and behavioral sciences. No mathematics beyond simple algebra is needed, but quantitative skills are strengthened by constant use. Involves much reading, writing, and critical thinking through discussions on such topics as data ethics, public opinion polls and the political process, the question of causation the role of government statistics, and dealing with chance in everyday life. Applications include public opinion polls, medical experiments, smoking and health, the consumer price index, state lotteries, and the like. STAT 11300 can be used for general education or as preparation for later methodology courses.

STAT 30100 Elementary Statistical Methods I (3 cr.) Not open to students in the Department of Mathematical Sciences. Fall, spring, summer. Introduction to statistical methods with applications to diverse fields. Emphasis on understanding and interpreting standard techniques. Data analysis for one and several variables, design of samples and experiments, basic probability, sampling distributions, confidence intervals and significance tests for means and proportions, and correlation and regression. Software is used throughout.

Social Work and Labor Studies

LSTU-L 100 Survey of Unions and Collective Bargaining (3 cr.) This course includes coverage of historical development, labor law basics, and contemporary issues. It also discusses a survey of labor unions in the United States; focusing on their organization and their representational, economic, and political activities.

LSTU-L 101 American Labor History (3 cr.) This course explores the struggles of working people to achieve dignity and security from social, economic, and political perspectives. It also explores a survey of the origin and development of unions and the labor movement from colonial times to the present.

LSTU-L 104 Labor History (3 cr.) This course serves as an orientation for the study of labor history. It explores both critical and historical methodologies based on primary and secondary sources, biases, and interpretations. Discussions focus on selective questions and events.

LSTU-L 110 Introduction to Labor Studies: Labor and Society (3 cr.) This course introduces students to the interdisciplinary and advocacy approach of labor studies. Exploring labor's role in society, the class will look at how unions have changed the lives of working people and contributed to better social policies. Discussions will highlight the relationship of our work lives to our non-work lives and will look at U.S. labor relations in a comparative framework.

LSTU-L 200 Survey of Employment Law (3 cr.) This course explores statutes and common-law actions protecting income, working conditions, and rights of workers. Topics include workers' compensation, unemployment compensation, fair labor standards, Social Security, retirement income protection, and privacy and other rights.

LSTU-L 201 Labor Law (3 cr.) This course reviews a survey of the law governing labor-management relations. Topics include the legal framework of collective bargaining, problems in the administration and enforcement of agreements, and protection of individual employee rights.

LSTU-L 203 Labor and the Political System (3 cr.) This course examines federal, state, and local governmental effects on workers, unions, and labor-management relations; political goals; influences on union choices of strategies and modes of political participation, past and present; relationships with community and other groups.

LSTU-L 205 Contemporary Labor Problems (3 cr.) This course examines some of the major problems confronting society, workers, and the labor movement. Topics may include automation, unemployment, international trade, environmental problems, minority and women's rights, community relations, and changing government policies.

LSTU-L 210 Workplace Discrimination and Fair Employment (3 cr.) This course examines policies and practices that contribute to workplace discrimination and those

designed to eliminate it. It explores effects of job discrimination and occupational segregation. It analyzes Title VII, the Americans with Disabilities Act, and related topics in relation to broader strategies for addressing discrimination.

LSTU-L 220 Grievance Representation (3 cr.) This course looks at union representation in the workplace. It evaluates uses of grievance procedures to address problems and administer the collective bargaining agreement. It also explores analyses of relevant labor law and the logic applied by arbitrators to grievance decisions. Students learn about the identification, research, presentation, and writing of grievance cases.

LSTU-L 230 Labor and the Economy (3 cr.) This course analyses aspects of the political economy of labor and the role of organized labor within it. It emphases the effect on workers, unions, collective bargaining of unemployment, investment policy, changes in technology and corporate structure. It also explores patterns of union political and bargaining responses.

LSTU-L 231 Globalization and Labor (3 cr.) This course explores the globalization of trade, production, and migration and the effects of these processes on American workers. Through reading, discussion, and problem formation, students will critically think about the ways global processes and policies impact American workers' daily lives, analyze existing historical and current justifications for offshore production and the dismantling of barriers to trade and investment, and explore alternatives to these policies.

LSTU-L 240 Occupational Health and Safety (3 cr.) This course reviews elements and issues of occupational health and safety. It emphases the union's role in the implementation of workplace health and safety programs, worker and union rights, hazard recognition techniques, and negotiated and statutory remedies-in particular the OSHA Act of 1970.

LSTU-L 260 Leadership and Representation (3 cr.) This course evaluates organizational leadership issues for union, community, and other advocate organizations. It analyzes leadership styles, membership recruitment, and leadership development. It examines the role of leaders in internal governance and external affairs, including committee building, delegation, negotiations, and coalition building.

LSTU-L 270 Union Government and Organization (3 cr.) This course provides an analysis of the growth, composition, structure, behavior, and governmental processes of U.S. labor organizations, from the local to the national federation level. It considers the influence on unions of industrial and political environments; to organizational behavior in different types of unions; and to problems in union democracy.

LSTU-L 290 Topics in Labor Studies (1-3 cr.) This is a variable-title course. L290 can be repeated for credit with different subjects. The transcript will show a different subtitle each time the course is taken. Some courses focus on contemporary or special areas of labor studies. Others are directed toward specific categories of employees and labor organizations. Inquire at Labor Studies offices.

SWK-L 314 ETHICAL DILEMMAS IN WORKPLACE (3 cr.) This courses explores the ethical decision-making and behavior in a unionized workplace, based on the values and social justice mission of unions. Students will examine what constitutes ethical standards on issues such as affirmative action, transparency, membership involvement, and democratic procedures. This includes the philosophical and theoretical bases for ethics and discussions on the relationship between law and ethics in dealing with workplace conflict.

SWK-L 315 The Organization of Work (3 cr.) This course examines how work is organized and how jobs are evaluated, measured, and controlled. It explores social and technical elements of work through theories of scientific management, the human relations school of management, and contemporary labor process literature.

SWK-L 320 Grievance Arbitration (3 cr.) P: Recommended only after L220 or with

permission of instructor. This course explores the legal and practical context of grievance arbitration, and its limitations and advantages in resolving workplace problems. Varieties of arbitration clauses and the status of awards are also explored. Students analyze research, prepare, and present cases in mock arbitration hearings.

LSTU-L 330 Grievance Arbitration (3 cr.) P: Recommended only after L220 or with permission of instructor. This course uses a political economy framework to explore and compare countries' systems of labor relations, drawing from at least three continents. It analyzes the diverse approaches to the structure of twenty-first century labor law and social policy. It focuses on the role of organized labor in the global economy, patterns of breakdown in the enforcement of labor and employment law, and union and nonunion political and bargaining responses.

SWK-L 350 Issues in Collective Bargaining (3 cr.) This course includes readings and discussions on selected problems. A research paper is usually required.

SWK-L 360 Union Administration and Development (1-3 cr.) This is course covers practical and theoretical perspectives on strategic planning, budgeting, and organizational decision making. It addresses the needs and problems of union leaders by studying organizational change, staff development, and cohesiveness within a diverse workforce. This course may be repeated for up to 3 credits with department approval.

SWK-L 370 LABOR AND RELIGION (3 cr.) This course examines the relationship between religion and the labor movement as it has developed in the United States over the course of the 19th and 20th centuries. Students will analyze the approach taken by religious institutions concerning workers' issues and assess the tradition in which workers of faith connect to more secular concerns for social and economic justice.

SWK-L 380 Theories of the Labor Movement (3 cr.) This course examines various perspectives on the origin, development, and goals of organized labor. Theories include those that view the labor movement as a business union institution, an agent for social reform, a revolutionary force, a psychological reaction to industrialization, a moral force, and an unnecessary intrusion.

SWK-L 385 Class, Race, Gender, and Work (3 cr.) This course provides a historical overview of the impact and interplay of class, race, and gender on shaping U.S. labor markets, organizations, and policies. It examines union responses and strategies for addressing class, race, and gender issues.

SWK-L 420 Labor Studies Internship (1-6 cr.) This course applies classroom knowledge in the field. L420 may be repeated for a maximum of 6 credit hours.

SWK-L 480 Senior Seminar or Readings (3 cr.) This course can be used as a classroom seminar or directed reading course. It addresses current issues, historical developments, and other labor-related concerns. Topics may vary each semester.

SWK-L 490 Topics in Labor Studies (1-3 cr.) This is a variable-title course. L490 can be repeated for credit with different subjects. The transcript will show a different subtitle each time the course is taken. Some courses focus on contemporary or special areas of labor studies. Others are directed toward specific categories of employees and labor organizations. Inquire at Labor Studies offices.

SWK-L 495 Directed Labor Study (1-6 cr.) This is a variable credit course. L495 may be repeated for a maximum of 6 credit hours. Students arrange to study with an individual labor studies faculty member, designing a course of study to suit their individual and varied needs and interests. The contract might include reading, directed application of prior course work, tutorials, or internships. Competencies are assessed through written papers, projects, reports, or interviews.

SWK-S 100 Understanding Diversity in a Pluralistic Society (3 cr.) Theories and

models that enhance understanding of our diverse society. This course provides content about differences and similarities in the experiences, needs, and beliefs of selected minority groups and their relation to the majority group.

SWK-S 141 Introduction to Social Work (3 cr.) Examination of characteristics, function, and requirements of social work as a profession. Emphasis on ideological perspectives of the profession and the nature of professional function and interaction.

SPEA

SPEA-J 101 The American Criminal Justice System (3 cr.) Introduction to the criminal justice system of the United States and its function in contemporary society.

SPEA-J 150 Public Safety in America (3 cr.) The protection of persons and property involves a number of public and private organizations. This course examines the roles that agencies working within the fire services, emergency management, criminal justice, and the private security sector play in securing public safety in the United States.

SPEA-J 301 Substantive Criminal Law (3 cr.) P: J101. R: J201 and J202. The development, limitations, and application of substantive criminal law utilizing the case-study method.

SPEA-J 305 Juvenile Justice (3 cr.) P: J101. This course is designed to provide an overview of the justice system's response to abused, neglected, and dependent children; juvenile misconduct; and delinquent behavior. An extensive review of the development of recent legal changes to the court, options for prevention, treatment of juvenile offenders, and possible system reforms.

SPEA-J 306 The Criminal Courts (3 cr.) P: J101. R: J201 and J202. An analysis of the criminal justice process from prosecution through appeal. The organization and operation of felony and misdemeanor courts are examined. Topics include prosecutorial decision-making, plea bargaining, judicial selection, and the conduct of trials, sentencing, and appeal.

SPEA-J 321 American Policing (3 cr.) P: J101. R: J201 and J202. This course will examine the history, evolution, and organization of policing in the United States. Emphasis is placed on such major contemp-orary issues as the police role, discretion, use of force, corruption, accountability, and community policing.

SPEA-J 331 Corrections (3 cr.) P: J101. R: J201 and J202. This course examines the historical development of the American correctional system and the study of administration of local, state, and federal corrections programs, including jails, probation, community corrections, and prisons. Includes the study of punishment rationales, current correctional policies, and possibilities for reform.

SPEA-V 170 Introduction to Public Affairs (3 cr.) Broad coverage of public affairs through critical and analytical inquiry into policy making at all levels of government. Particular emphasis on intergovernmental relations as they affect policy in the federal system. Credit not given for both V160 and V170.

Copyright © 2012 The Trustees of Indiana University, Copyright Complaints

Courses

State Wide Technology

CGT 11000 Technical Graphics Communication (0 cr.) Class 2, Lab 2. An introductory design course for computer graphics majors. Students develop an understanding of the basic design elements and principles, composition and typography through exercises and projects. The focus is on visual thinking, exploring the relationship between type and image, and developing multiple solutions to a given problem.

CAND 99100 Candidate (0 cr.) If you are an undergraduate, you will be given permission to register for CAND 99100 within one week of applying for graduation. Graduate students do not require course permission to register.

Industrial Technology

CSCI 23000 Computing I (4 cr.) The context of computing in history and society, information representation in digital computers, introduction to programming in a modern high-level language, introduction to algorithm and data structures, their implementation as programs.

CSCI 24000 Computing II (4 cr.) Continues the introduction of programming began in CSCI 230, with particular focus on the ideas of data abstraction and object-oriented programming. Topics include programming paradigms, principle of language design, object-oriented programming, programming and debugging tools, documentation, recursion, linked data structures, and introduction to language translation.

CSCI-N 100 Introduction to Computers and Computing (3 cr.) No computing experience assumed. How computers work, word processing, spreadsheets, file management, and Internet skills. Emphasis on problem-solving tech-niques. Lecture and laboratory. Credit given for only one of CSCI N100, CPT 10600, CIT 10600, or BUS K201.

CSCI-N 201 Programming Concepts (3 cr.) Summary of basic computing topics, problem solving techniques, and their application to computing. Introduction to programming concepts with a focus on language-independent principles, such as algorithm design, debugging strategies, essential control structures, and basic data structure concepts. Lecture and laboratory.

CSCI-N 207 Data Analysis Using Spreadsheets (3 cr.) Summary of basic computing topics, problem solving techniques, and their application to computing. Introduction to programming concepts with a focus on language-independent principles, such as algorithm design, debugging strategies, essential control structures, and basic data structure concepts. Lecture and laboratory.

CSCI-N 241 Fundamentals of Web Development (3 cr.) Introduction to writing content for the Internet and World Wide Web. Emphasis on servers, hand-coded HTML, Cascading Style Sheets, and extending HTML with other Web technologies. Lecture and

laboratory.

CSCI-N 301 Fundamental Computer Science Concepts (3 cr.) An introduction to an emerging technology in the computing field. It will emphasize the various problems technology helps to solve and specific problem-solving strategies. Lecture and laboratory. May be repeated for credit.

CSCI-N 305 C Language Programming (3 cr.) The basics of computer programming concepts using the C programming language. Emphasis on problem solving and algorithm implementation using a universal subset of the C programming language. Lecture and laboratory.

CSCI-N 305 Visual Basic Programming (3 cr.) An introduction to programming with a focus on rapid application development environments, event-driven programming, and programming in the Windows environment. Course will demonstrate how the major application types (spreadsheets, databases, text editors) are written. Lecture and laboratory.

CSCI-N 341 Introduction to Client-Side Web Programming (3 cr.) Introduction to programming with a focus on the client-side programming environment. Programming using languages commonly embedded in Web browsers. Lecture and laboratory.

CSCI-N 342 Server-Side Programming for the WebSide Web Programming (3 cr.) Designing and building applications on a Web server. Focuses on the issues of programming applied to Web servers. Emphasis on relational database concepts, data design, languages used on the server, transaction handling, and integration of data into Web applications.

CSCI-N 351 Introduction to Multimedia Programming (3 cr.) An integration of computing concepts and multimedia development tools. An introduction to the science behind multimedia (compression algorithms and digital/audio conversion). Use of authoring tools to create compositions of images, sounds, and video. Special emphasis given to using the Web as a multimedia presentation environment. Lecture and laboratory.

CSCI-N 355 Introduction to Virtual Reality (3 cr.) Explore concepts of 3D imaging and design including primitive shapes, transformations, extrusions, face sets, texture mapping, shading, and scripting. Lecture and laboratory.

Industrial Technology

IET 10400 Industrial Organization (3 cr.) A detailed survey of organizational structures, operational, financial, marketing, and accounting activities; duties of management, planning, control, personnel, safety, wages, policy, and human factors necessary for effective management. Not open to students taking, or with credit in, IE 36600.

Industrial Technology

IET 10400 Industrial Organization (3 cr.) A detailed survey of organizational structures, operational, financial, marketing, and accounting activities; duties of management, planning, control, personnel, safety, wages, policy, and human factors necessary for effective management. Not open to students taking, or with credit in, IE 36600.

IT 21400 Introducation to Lean Manufacturing (3 cr.) Lean manufacturing is a systematic approachto eliminating non-value added activities throughout a production system. Five basic principles characterize a lean production system: value definition, value stream mapping, flow optimization,pull production, and continuous improvement.

IT 23000 Industrial Supply Chain Management (3 cr.) A study of industrial supply

chains. Emphasis is on in-plant shipping and receiving functions; modes of distribution; functions of, and services provided by supply chains. Emphasis is placed on how manufacturers, distributors and end users can provide value in the supply chain.

IT 33200 Purchasing, Inventory, and Warehouse Management (3 cr.) A course designed to developunderstanding of types of warehouses, methods of organizing the warehouse environment, and determining efficient inventory control procedures. Purchasing of products, storage of inventory, placement of inventory and other internal logistics management topics will be explored. Real world projects conducted in lab environment will be utilized.

IT 34200 Introduction to Statistical Quality (3 cr.) Basic concepts of quality systems in business and manufacturing settings are presented. Basic statistical methods as applied to quality control, and an introduction to sampling plans are included. Field trips may be required.

IT 34500 Automatic Identification and Data Capture (3 cr.) The course provides a basic understanding of automatic identification and data capture technologies and concepts with regard to how their deployment affects business and industry. Laboratory applications of bar codes, radio frequency identification, card technologies, and biometrics will be emphasized.

IT 35100 Advanced Industrial Safety And Health Management (3 cr.) An introduction to OSHA and standards development for occupational health in general industry. Special emphasis is on fire protection and egress, flammable and combustible liquids, electrical, personal protective equipment, machine guarding, industrial hygiene/blood borne pathogens, ergonomics, and ISO 9000/14000 integration.

IT 38500 Industrial Ergonomics (3 cr.) P: Undergraduate level MA 15900 Minimum Grade of D- or (Undergraduate level MA 15300 Minimum Grade of D- and Undergraduate level MA 15400 Minimum Grade of D-). A course designed to focus on work design and ergonomics in manufacturing. Specific attention will be focused on introducing the terminology and the techniques used in work design and on the fundamental concepts embodied in industrial ergonomics. During scheduled laboratory times, exercises will permit the student to apply the concepts of industrial ergonomics.

IT 44200 Production Planning (3 cr.) A study of industrial organization and management, research and development, production, personnel, and sales. Examples of the procedures necessary to provide a product or service are included. Field trips may be required

IT 45000 Production Cost Analysis (3 cr.) P: Undergraduate level MA 15900 Minimum Grade of D- or (Undergraduate level MA 15300 Minimum Grade of D- and Undergraduate level MA 15400 Minimum Grade of D-). An introduction to financial statements and to the study of the costs of production in terms of break-even and least-cost alternatives, including present and future costs when related to the time value of money, budgeting, labor and overhead, production, cost control, and the role of the supervisor and the engineering technologist to cost control. Computer applications for determining rate of return for complex problems are introduced.

Mechanical Engineering Technology

MET 10200 PRODUCTION DESIGN & SPECS (3 cr.) P: CGT 11000 and MET 16200. The design, evaluation, and documentation of engineering specifications required of manufacturability and assembly are introduced. Emphasis is on CAD-based details, assemblies, design layouts, equipment installations, and related industrial practices.

MET 11100 Applied Statics (3 cr.) Class 2, Lab 2. P: 10500. C: MATH 15400. A study of force systems, resultants and equilibrium, trusses, frames, centroids of areas, and center

of gravity of bodies.

MET 14200 Manufacturing Processes (3 cr.) Class 2, Lab 3; or Class 3. P: 14100. Basic casting, forming, and joining processes are surveyed. The course emphasizes the selection and application of various processes.

MET 14300 MATERIALS AND PROCESSES I (3 cr.) P: Prerequisites: MA 22300 (may be taken concurrently) and MET 16200 and (PHYS 21800 or PHYS 22000.) Heat/Power is an introduction to the principles of thermodynamics and heat transfer. Basic thermodynamic processes are used to evaluate the performance of energy-based systems such as internal combustion engines, power plants, and refrigeration equipment.

MET 14400 MATERIALS AND PROCESSES II (3 cr.) An overview of structures, properties, processing, and applications of polymers, composites, laminates, biomaterials, green materials, nanomaterials, and pharmaceuticals commonly used in industry is presented. Problem solving skills are developed in the areas of material selection, evaluation, measurement, and testing. This course serves as the gateway for the MET and MFET programs.

MET 16000 ANALYTICAL & COMP TOOLS IN MET (3 cr.) The skills needed to solve technical problems in mechanical engineering technology are developed. Instruction is given in analytical and computational problem-solving techniques. The electronic calculator, the factor-label method of unit conversions, engineering graphs, and the computer are used to solve problems. Computer emphasis is on spreadsheet analysis, graphics, and generation of technical reports through the integrated use of software packages. Credit will not be granted for MET 16000 and MET 16200 or MET 16300.

MET 21100 Applied Strength of Materials (4 cr.) Class 3, Lab 2; or Class 4. P: 11100 and 16300 or 16000. C: MATH 22100. The principles of strength, stiffness, and stability are introduced and applied primarily to mechanical components.

MET 21300 Dynamics (4 cr.) Class 2, Lab 2; or Class 3. P: 11100. C: MATH 22100. Kinematics and kinetics principles of rigid-body dynamics are introduced. Emphasis is on the analysis of bodies in plane motion.

MET 21400 Machine Elements (3 cr.) P: 21100 and PHYS 21800. Class 3. The theories and methods of statics, dynamics, and strength of materials applied to the selection of basic machine components. The course will develop the fundamental principles required to select the individual elements making up a machine.

MET 22000 HEAT/POWER (3 cr.) P: (Undergraduate level MET 16200 Minimum Grade of D- or Undergraduate level MET 16000 Minimum Grade of D-) and (Undergraduate level PHYS 22000 Minimum Grade of D- or Undergraduate level PHYS P2010 Minimum Grade of D- or Undergraduate level PHYS P2020 Minimum Grade of D- or Undergraduate level PHYS 21800 Minimum Grade of D- or Undergraduate level PHYS 20100 Minimum Grade of D- or Undergraduate level PHYS 17200 Minimum Grade of D- or Undergraduate level PHYS 15200 Minimum Grade of D-) or (Undergraduate level PHYS 16200 Minimum Grade of D- and Undergraduate level PHYS 16300 Minimum Grade of D-) and (Undergraduate level MA 22100 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 16100 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 16300 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 16500 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MATH M1190 Minimum Grade of D- [may be taken concurrently] or Undergraduate level MA 22700 Minimum Grade of D- [may be taken concurrently]). Heat/Power is an introduction to the principles of thermodynamics and heat transfer. Basic thermodynamic processes are used to evaluate the performance of energy-based systems such as internal combustion engines, power plants, and refrigeration equipment.

MET 23000 Fluid Power (3 cr.) P: 11100, PHYS 21800. Class 2, Lab 2; or Class 3. This

course consists of the study of compressible and incompressible fluid statics and dynamics as applied to hydraulic and pneumatic pumps, motors, transmissions, and controls.

MET 24200 Manufacturing Processes II (3 cr.) P: MET 14100, MATH 15900 or 15400 or MET 16200, CIT 13500 or MET 16300. Class 2, Lab 2. This course surveys the manufacturing processes and tools commonly used to convert cast, forged, molded, and wrought materials into finished products. It includes the basic mechanisms of material removal, measurement, quality control, assembly processes, safety, process planning, and automated manufacturing. Not open to students having credit for 13500 or 28100.

MET 24500 MANUFACTURING SYSTEMS (3 cr.) P: (Undergraduate level MET 14300 Minimum Grade of D- and Undergraduate level CGT 11000 Minimum Grade of D-) or (Undergraduate level MET 14400 Minimum Grade of D- and Undergraduate level CGT 11000 Minimum Grade of D-) or (Undergraduate level MET 14300 Minimum Grade of D- and Undergraduate level CGT 16300 Minimum Grade of D-) or (Undergraduate level MET 14400 Minimum Grade of D- and Undergraduate level CGT 16300 Minimum Grade of D- . This course surveys the manufacturing processes and tools commonly used to convert cast and molded, formed, and joined materials into finished products. It includes the fundamentals of material removal, measurement, statistical quality control, assembly processes, process planning and optimization, CNC programming and automated manufacturing.

MET 29000 SPECIAL TOPICS IN MET (3 cr.) Hours, subject matter, and credit to be arranged by faculty. Group instruction in new or specialty areas of Mechanical Engineering Technology is provided by MET faculty, subject to MET curriculum subcommittee approval.

MET 31300 APPLIED FLUID MECHANICS (3 cr.) P: (Undergraduate level MA 22200 Minimum Grade of D- or Undergraduate level MATH 22200 Minimum Grade of D- or Undergraduate level MA 16200 Minimum Grade of D- or Undergraduate level MA 22800 Minimum Grade of D- or Undergraduate level MA 16600 Minimum Grade of D-) and Undergraduate level MET 22000 Minimum Grade of D- and (Undergraduate level MET 23000 Minimum Grade of D- or Undergraduate level MET 33000 Minimum Grade of D-). The fundamental principles of fluid mechanics are developed, including properties of fluid, pressure, hydrostatics, dynamics of fluid flow, friction losses, and sizing of pipes. Emphasis is on problem solving.

MET 34000 Piping and Plumbing Design (3 cr.) P: 22000. Class 3. Design of plumbing systems, including losses in pipes, fittings, nozzles, orifices, etc. Includes steam, water, and oil systems. Piping handbooks and catalogs are used in conjunction with the State of Indiana Plumbing Code.

MET 34600 ADV MATERIALS IN MANUFACTURING (3 cr.) P: (Undergraduate level CHM 11100 Minimum Grade of D- or Undergraduate level CHM 11500 Minimum Grade of D-) or (Undergraduate level CHEM C1010 Minimum Grade of D- and Undergraduate level CHEM C1210 Minimum Grade of D-) or (Undergraduate level CHEM C1050 Minimum Grade of D- and Undergraduate level CHEM C1250 Minimum Grade of D-) and (Undergraduate level MET 24200 Minimum Grade of D- or Undergraduate level MET 24500 Minimum Grade of D- or Undergraduate level MET 33500 Minimum Grade of D- or Undergraduate level MFET 13500 Minimum Grade of D-) and (Undergraduate level MET 21100 Minimum Grade of D- or Undergraduate level MET 21200 Minimum Grade of D-). Metals, polymers, ceramic, and composite materials are studied. Crystal structure, molecular behavior, and the effects of various processes on material properties are considered. Course emphasizes the development and control of material properties to meet engineering requirements and specifications.

MET 42600 Internal Combustion Engines (3 cr.) Class 2, Lab 3. P: 22000. A study of the spark ignition, compression ignition, and continuous-burning internal combustion engines.

MET 49900 MECH ENGR TECH (0-9 cr.) Class 0-4, Lab 0-9. Hours and subject matter to be arranged by staff. Course may be repeated for up to 9 credit hours.

Industrial Technology

MUS-Z 393 HISTORY OF JAZZ (- cr.) Emphasis on jazz as a way to better understand the history and culture of America by examining the periods, major performers and composers, trends, influences, stylistic features, and related materials.

Organizational Leadership

OLS 25200 Human Behavior in Organizations (3 cr.) Class 3. Study of individual and group behavior in organizations. Special emphasis on typical supervisory relationships.

OLS 27400 Applied Leadership (3 cr.) Class 3. Introduction to and overview of the fundamental concepts of supervision. Emphasis on the supervisor's major functions and essential areas of knowledge, relations with others, and personal development.

OLS 28400 LEADERSHIP PRINCIPLES (3 cr.) An in-depth study of a sequence of manager actions that influence employees to achieve desired performance results. How these manager actions are transformed by employers into desired performance is also covered.

OLS 33100 Occupational Safety and Health (3 cr.) Class 3. Aspects of occupational safety and health that are essential to the first-line supervisor. Emphasis on economic, legal, and social factors related to providing a safe and healthful working environment.

OLS 34500 CRITICAL THINKNG-ORGANIZATIONS (3 cr.) P: OLS 38600 & 38800 This course focuses on systems thinking and the understanding of research design and measurement theory used in solving organizational and human resource development problems. The emphasis is on applied methodology rather than on statistical issues, with the intent of the student becoming an effective consumer of information. The student will leam how to report fIndings in a practical and influential manner. Includes the importance of knowledge management issues in organizations.

OLS 35100 INNOVATION & ENTREPRENEURSHIP (3 cr.) P: Undergraduate level OLS 27400 Minimum Grade of C and (Undergraduate level MGMT 20000 Minimum Grade of D- or Undergraduate level BUS A2010 Minimum Grade of D-). An in-depth study of innovation in existing organizations as well as entrepreneurship in start-up businesses, franchises, family-owned firms, and other business formats.

OLS 37500 Training Methods (3 cr.) P: 25200 and 27400 or consent of department. This course teaches the fundamentals of the design facilitation and evaluation of formal training and development programs. Understanding the way people learn jobs skills is emphasized.

OLS 37600 HUMAN RESOURCES ISSUES (3 cr.) P: OLS 25200 and 27400 Analysis and discussion of case problems concerning typical leadership and personnel situations that impact upon the supervisor/manager. Emphasis directed toward development of attitude, philosophy, analytical ability, and problem-solving skills within the working environment.

OLS 37800 Labor Relations (3 cr.) This course teaches the regulations concerning management, labor, the collective bargaining agreement, and grievance and arbitration procedures.

OLS 38600 LEADERSHIP ORGANIZATL CHANGE (3 cr.) P: OLS 25200 and 27400 A survey of the concepts that provide a foundation for the understanding of leadership and its relationship to the management of organizational change, with special emphasis on managing the human side of quality improvement.

OLS 44000 LEADING WITH INTEGRITY (3 cr.) P: OLS 38600 and 38800 An investigation of ethical problems in business practice. Topics include personal morality in profIt-oriented enterprises; codes of ethics; obligations to employees and other stakeholders; truth in advertising; whistle-blowing and company loyalty; regulation; self and government; the logic and future of capitalism. Emphasis on business law and legal impacts on ethical decisions.

OLS 45000 PROJECT MGMT FOR ORG & HR DEV (3 cr.) P: Undergraduate level OLS 38600 Minimum Grade of C and Undergraduate level OLS 38800 Minimum Grade of C. An introduction to project management concepts and practices in tbe context of human resource development projects.

OLS 45600 LEADRSHP IN GLOBAL ENVIRONMENT (3 cr.) P: Undergraduate level OLS 38600 Minimum Grade of C and Undergraduate level OLS 38800 Minimum Grade of C. Exploration of leadership strategies for organizations engaged in international business. Includes understanding of cultural differences and diverse business practices, and challenges of competing in a global marketplace.

OLS 46700 SERVICE LEARNING (3 cr.) P: OLS 38600 and 38800 - For organizational leadership and supervision majors only. Instructor consent required. Credit awarded upon the completion of department-approved project. (May be repeated for up to six credits.) An instructor-directed practicum designed to combine University study with work experience directly related to the student's plan of study. Designed to be scheduled during a regular semester.

OLS 47600 Compensation Planning and Management (3 cr.) Class 3. Focuses on the management of employee compensation. Examines the current state of compensation management and implications of recent theoretical and research developments related to compensation decisions. Gives each student the opportunity to develop a compensation package.

OLS 47700 Conflict Management (3 cr.) This course provides students with a firm understanding of the theory and context as they relate to front-line supervision and managing conflict in the workplace including communicating with others, collaborating, negotiating effective outcomes, mediating disputes, leading teams, and handling employee relations issues.

OLS 47900 Staffing Organizations (3 cr.) Class 3. A detailed look at the recruiting function of organizations to give the student a sense of the challenges of recruiting qualified employees.

OLS 48400 LDRSHP STRAT FOR QUAL/PRDCTY (3 cr.) P: IT 34200, OLS 38600 and 38800 A study of how organizational leaders create an environment conducive to high levels of employee self-motivation, quality, and productivity. Actual case situations are used to illustrate the application of course content.

OLS 48700 Leadership Philosophy (3 cr.) P: 25200 and 27400/37400. Class 3. This course facilitates the understanding and practice of various leadership roles required in supervisory situations. Students, through applying group dynamics and leadership theory, will develop new skills, capabilities, and understandings. Students will have fundamental shifts in their thinking about traditional leadership and in their ability to function in new leadership styles.

OLS 49900 SPECIAL TOPICS IN OLS (3 cr.) P: Instructor consent and departmental approval. (May be repeated for up to six credits.) Supervised individual research on appropriate topics.

Industrial Technology

TCM 36000 COMM IN ENGINEERING PRACTICE (- cr.) Class 1, Recitation 2. P: ENG

W131 and COMM R110 or equivalents; junior standing or consent of instructor. The application of rhetorical principles to written and oral communication in the engineering professions. Planning, drafting, and revising professional engineering reports; planning and delivering oral presentations; organizing information; developing persuasive arguments.

Courses

Tourism, Convention, and Event Management

TCEM 100 Introduction to Tourism Studies (3 cr.) Travel, trends, travel-modes, and economic impact on destination area. Emphasis on local, regional, and national tourism.

TCEM 112 Tourism and Hospitality Management Principles (3 cr.) The principles of planning, organizing, directing and controlling as applied to the hospitality service industry. Topics relating to motivation and leadership will be stressed. Issues of organizational change, organizational effectiveness and the nature of managerial work will be addressed.

TCEM 112 Tourism and Hospitality Management Principles (3 cr.) The principles of planning, organizing, directing and controlling as applied to the hospitality service industry. Topics relating to motivation and leadership will be stressed. Issues of organizational change, organizational effectiveness and the nature of managerial work will be addressed.

TCEM 171 Introduction to Convention/Meeting Management (3 cr.) An overview of the conventions, expositions and meetings industry. Focus will be on the operational aspects of various industry segments and the intra-industry interaction of each.

TCEM 172 The Development and Management of Attractions (3 cr.) An examination of the process of developing visitor attractions and a discussion of the main issues involved in their management.

TCEM 181 Lodging Operations (3 cr.) Concepts of organization, communication, ethics and policy formulation in the front office. Introducing the basic techniques and trends in systems and equipment available to meet the needs of the management and the guest.

TCEM 191 Sanitation and Health in Food Service, Lodging, and Tourism (3 cr.) The application of sanitary and public health engineering principles to food service and lodging operations.

TCEM 210 Special Event Management (3 cr.) Course topics include planning for social events such as themed parties, weddings, balls, fundraiser recognition and entertainment events.

TCEM 210 Special Event Management (3 cr.) P: TCEM 171 Course topics will include planning for social events such as themed parties, weddings, or balls, planning for fund raiser events, planning recognition events, and planning entertainment events. P: TCEM 171.

TCEM 219 Management of Sports Events (3 cr.) Amateur or professional sport event planning will include discussion of site selection, logistics, personnel, marketing, economics, and legalities of hosting an event.

TCEM 231 Tourism and Hospitality Marketing (3 cr.) Development, use, and

evaluation of effective merchandising, advertising, and public relations techniques in the hospitality and tourism industries.

TCEM 252 Promotional Communications (3 cr.) P: ENG-W 231 Provides information on the field of personal and public relations. Explores effective public relations methods. Focuses on the relationship-oriented decisions a public relations professional must make based upon different circumstances that arise within an organization.

TCEM 271 Mechanics of Meeting Planning (3 cr.) P: TCEM 171 An analysis of details pertinent to the organization and execution of a meeting. Topics include finances and contracts, site selection, program development, marketing, evaluation and wrap-up.

TCEM 310 Event Catering Management (2 cr.) Exploration of off premise and on premise catering requirement. Concept of event food management including menu planning, budget preparation, logistics management, guest relations and marketing.

TCEM 312 Human Resource Management for the Service Industries (3 cr.) P: TCEM 112 The concepts of management of people for effective operation of institutions involving supervisory development and communications; the pretesting, training, and evaluating of employees; and the development of attitudes and morale of people working together.

TCEM 328 Introduction to Microbrewing (3 cr.) P: 21 years of age This course deals with the principles of microbrewing, and each student will learn the basic concepts necessary to create beer. In this sense, students should come away from this class with the knowledge to build his or her own microbrewery. As well, this class teaches a general appreciation for brewing and beers around the world. P: 21 years of age.

TCEM 329 Sports Management (3 cr.) The application of tourism marketing principles and activities will be analyzed in the content of effective tourism marketing.

TCEM 334 Cultural Heritage Tourism (3 cr.) Cultural and heritage tourism balances visitor interests and needs against protecting cultural and heritage resources. This course examines the range of cultural and heritage assets that can become viable tourism attractions and looks at ways of linking quality cultural heritage tourism to community development. Special emphasis will be placed on Indiana cultural and heritage tourism

TCEM 341 Financial Analysis and Decision Making in Tourism, and Hospitality Operations (3 cr.) P: TCEM 241 Managerial and financial analyses of numerical data used for decision-making. Consideration of systems, techniques, information types, and presentational forms used by hospitality management. Emphasis on situations oriented to the hospitality industry. P: TCEM 241.

TCEM 362 Economics of Tourism (3 cr.) P: TCEM 100 C: ECON E201 To discuss the economic impact of travel on tourism's various sectors, and the quantitative methods that can be applied to travel forecasting and tourism principles.

TCEM 371 Convention Sales and Service (3 cr.) P: TCEM 171 This course is designed as an in-depth analysis of convention and facility sales and service. The course will enable meetings and events from the pre-planning through post event evaluation from the supplies perspective. Topics include marketing and advertising a facility property, organizing a sales staff, selling to different markets and contract/legal issues.

TCEM 372 Global Tourism Geography (3 cr.) P: TCEM 172 C: GEOG 300 ELEC. Analysis of U.S. and world travel destinations, including the exploration of principal geographic features, population centers and attractions, customs and traditions, habits, festivals, and events, as these relate to the hospitality and travel industry. The major airline and airport/city codes in North America and overseas are also covered.

TCEM 377 Exhibit Marketing (3 cr.) A successful exhibit can be one of the most powerful sales and marketing tools in any company's arsenal. This course is designed to

help students through every phase of the endeavor-from the initial planning stage to implementation and post-show follow-up.

TCEM 382 Popular Travel Trends (3 cr.) Development of an understanding of the patterns, principles and management of international travel to popular tourist destinations.

TCEM 471 International Meeting Planning (3 cr.) P: TCEM 171 The organization and production of international corporate business meetings, seminars, incentive trips and customer events using innovative and cost-effective programs that address changing business needs.

TCEM 477 Non Profit Meeting Management (3 cr.) P: TCEM 171 Focuses on basic aspects and skills involved in planning and managing non-profit meetings and conventions. Examines sequences of events from the conceptual state of the first meeting plan through completion of the event.

TCEM 482 Travel to Exotic Destinations (3 cr.) Development of an understanding of the principles, patterns and management of international travel to exotic destinations.

TCEM 483 Ecotourism (3 cr.) Course will introduce students to the history, principles, marketing, planning, and management of ecotourism activities and development which promotes environmental awareness and adds economic benefits.

UCOL-U 110 First-Year Seminar (1-2 cr.) All learning communities share a common set of learning objectives that address issues of transition to the university environment. This first-year seminar is offered in a variety of formats, including a freestanding one credit course, a similar course linked to a general education requirement, and with the transition learning objectives embedded in a departmental introductory course. Learning communities are designed to assist entering students as they form connections with the IUPUI community, including other students, faculty, and advisors in a prospective major. Different learning community formats are sponsored by the various academic units, and the learning community may consist of a single course or a pair of linked courses.

UCOL-U 210 CAREER CONNECTIONS (- cr.) This course is designed to assist University College students in the major/career exploration and selection process. Especially targeted are students who are beyond their first year with less than 56 credit hours and who want or need to change majors or to declare a major. The course is designed to help students develop and execute a personalized plan of major and career exploration. This will be encouraged by using the first eight weeks of weekly class meetings to develop an individualized exploration contract and then using the second eight weeks to implement that plan outside of class. Students will also meet individually with the instructor and academic/career advisor. Through the course emphasis on experiential learning, students will be making connections with people, activities, and resources that will facilitate a more realistic approach to major/career decision making.
