

# Enrollment Management Council

March 28, 2008

## Minutes

### Minutes

- Minutes from the February meeting were distributed and are available by visiting <http://registrar.iupui.edu/emc/emc-meetings.shtml>

### Announcements from the Chair *Becky Porter*

- A new photo display of the history of IUPUI appears on the north corridor of the second floor of the Campus Center. This History Corridor is ordered chronologically to provide prospective students and their families with a brief overview of the university as they walk from the parking garage to the Admission Center
- An update on the status of the IUPUI Academic Plan, including links to the full plan and summaries of the committee reports, is available by visiting [http://www.iupui.edu/administration/acad\\_affairs/actionplan](http://www.iupui.edu/administration/acad_affairs/actionplan)
  - A good number of the recommendations submitted by the plan's committees have either been implemented or are in the works.
  - Dean Sukhatme's office is preparing a condensed version of the plan in the form of a booklet that will be sent to faculty in the academic units.
- Amanda Helman has been named the new director of the Passport Program and will begin at the end of March.
  - The goal for Passport is to move to a model with advising academic advisors—especially at Ivy Tech—rather than providing direct counseling to students. Working more directly with the advisors will be helpful in identifying any problems or information and expand links with IUPUI.
- UFC has passed a policy regarding transfers from two-year institutions. Other than in exceptional cases, no more than 64 semester credit hours earned from Associate's Colleges may be applied to an Indiana University baccalaureate degree. Additional credit hours may be transferred in, but a maximum of 64 hours can be applied to a degree.
  - Exceptions will be made for articulated associate's degree programs that require more than 64 credit hours for a graduate to sit a professional licensing exam, for professional certification, or to satisfy the requirements of accrediting organizations. Some examples are the Nursing A.S.N, Respiratory Therapy AS and the Dental Hygiene AS. Exemptions require the approval of the Dean of Faculties. For more information visit <http://www.indiana.edu/~ufc/docs/AY08/circulars/U6-2008.pdf>
  - Schools are encouraged to look at their agreements and start thinking about any necessary revisions or seek an exemption. The deadline is the Fall of 2010.
- This summer air handlers will be replaced on the lower floors in Cavanaugh. During this work Enrollment Services staffs who are still housed in that building will temporarily be relocated. Scholarship staff will be in the Admission Center while some ES administrative and technical staff and Multicultural Outreach will be in the basement of University College. Still others will probably move to upper floors of Cavanaugh which are not affected by the repairs. We will send out more information on where to find these colleagues as the time approaches.

## Fall Admissions Update *Chris Foley*

- Beginners
  - Applicants +677 +11.0%
  - Admits +198 + 4.8%
  - The quality of the beginner admit population is up compared to the same point last year:
    - Students in the top 10% of their high school class increased from 17.1% to 19.3%
    - Students in the top 1/3<sup>rd</sup> of their class increased from 60.5% to 66.7%
    - Average SAT is up 14 points to 1014; ACT up 1 to 22
    - Average high school rank is up from 68 to 71
  - Diversity has improved with minority admits increasing from 14.9% of all beginner admits last fall to 16.0% this year. The number of beginner admits is up in all ethnic categories.
  - International beginner admits are up from 1.6% to 2.1% of all beginner admits.
- With the improvement in quality there are more dual admits. This means schools will need to prepare for a larger number of advisees. Detailed information on the number of admits by school is available by visiting <http://imir.iupui.edu/picx/reports/1/20/default.aspx>
- Transfers
  - Applicants +110 +9.3%
  - Admits - 68 -10.0%
- At this point last year we had admitted 84.4% of our eventual total number of beginner admits and 25.9% of our total transfer admit population for the Fall.
- 390 students have been admitted with the stipulation that they attend and successfully complete the Summer Preparatory Program for Mathematics (SPPM). Of these about 100 have accepted the offer of conditional admission. We have an additional 120 incomplete applications who are likely to be required to attend the SPPM. For more on the SPPM, see the EMC February 2008 [minutes](#). Non-traditional conditional admits will be invited to participate in the SPPM, but are not required to do so.
- A key component in converting an admit into an enrolled student is direct contact by the student's school to encourage enrollment. To help coordinate these efforts, Chris asked that copies of communications schools send to their admitted students also be sent to Admissions. More on communication with prospective and admitted students appears below.
- Details on the quality and on the ethnic composition of the admitted population appear below. For more information on applicants and admits by IUPUI school visit <http://imir.iupui.edu/picx/reports/2/default.aspx>
- International *Sara Allaei*
  - The trend of a slight decrease in undergraduate applications is continuing, with decreases in applicants from Saudi Arabia and South Korea. Applications from China and India, two countries targeted for most aggressive recruitment, are up significantly. Undergraduate admits continue to be up significantly over 2007—by 25%. Graduate international admits are up slightly – the greatest percentage increase in applications is at the PhD level; PhD programs can be more selective with larger

numbers of applicants but are not likely to increase number of enrolled students, except where new programs are being developed.

- Applicant and admit totals appear below. For more information, including data sorted by school, visit <http://imir.iupui.edu/picx/reports/7/20/default.aspx>
- Graduate
  - Applicant and admit totals appear below. For more information, including data sorted by school, visit <http://imir.iupui.edu/picx/reports/1/20/default.aspx>

### **Enrollment Shaping**

- See attachments below to see how the total number of non-resident students has changed over the past three years. Data are separated by domestic and international non-residents and their enrollment as a percentage of total Indianapolis figures. Reports are provided for Fall 2005-07 and for Spring 2006-08. Credit hours taken appear as well.

### **SIS Upgrade Update**

- After a smooth implementation of the new release we are now looking at usability, focusing on functionality that we might be able to control at the front end that does not request the much more costly and complicated customizations or modifications to the software proper. We understand that Oracle is looking at changes in the future that appear to provide the potential for more flexibility in future upgrades.

### **Financial Aid** *Kathy Purvis*

- Kathy told members that packaging for next year's new students began March 7<sup>th</sup>, a week earlier than last year and the number of award notifications is up significantly. Students appear to be getting their FAFSA's completed earlier and that helps with earlier packaging and notification.
- This is the third year that the Office of Student Financial Aid Services has offered FAFSA workshops on campus and attendance has doubled since last year. Holding these in the Student Center is much easier and the office will continue to hold them in the future.
- Each year a number of students are selected for verification, a process that requires them to submit copies of certain documents, such as tax returns, for review by OSFA staff. Students have been providing these documents earlier than in the past which allows for their awards to be completed earlier. Kathy believes one factor may be the federal income tax rebate that is being sent out as part of an economic stimulus package. Only those who have filed income tax forms for 2007 are eligible for the rebates.

### **Spring Campus Day**

- Total attendance of 1900
- Guided tours were provided to 510 people
- Admissions/Financial Aid presentations served 213
- Admissions Center saw 75+
- Student Financial Services saw 200 people, with more than 20 completing their FAFSAs in the office.
- The building was at capacity for most of the event
- We are reviewing the comments from participants, both students and schools, for adjustments to how the program is laid out and managed next time. One

significant improvement was having more space for conversations with students and their families rather than the tight corridors in BS/ES.

- We will be looking at the numerous large recruiting events from the perspective of return on investment in terms of the cost per participant.

#### **IUPUI Master Plan** *Roger Schmenner*

- During this year, there will be a concerted effort to gather data and opinion to aid SmithGroup/JJR in devising a [master plan](#) for our campus that should guide the development of the campus for the next couple of decades. Roger Schmenner (Administration and Finance) provided an overview of the process unfolding and answered questions.
  - The initiative was established by President McRobbie and is to be completed for both IUPUI and IUB by the end of the calendar year.
  - The firm hired to develop the plan is already somewhat familiar with the campus as it designed both the Campus Center and Inlow Hall. David King will be our planner for the next decade.
  - Work is underway now to help organize ourselves to help the planner in his work. Four committees have been established:
    - An executive committee chaired by the chancellor and made up of senior deans and others.
      - Custodians and owners of the process and which will make the major policy recommendations to the president
    - An advisory committee, chaired by Dr. Schmenner
      - Will reach out to the rest of the campus, seeking input from all
      - Develop rough ideas into a format appropriate for consideration by the Executive committee.
    - A committee of community partners
      - Urban League, NCAA, Indy Downtown, the Westside Cooperative Organization (WESCO), etc.
    - A committee representing residents of the Health Care precinct
      - Focused on the medical center and working with Clarian
  - The Master Plan will take the form of a document and some physical mockups to help guide the campus in how we grow and change over the next 20 years. It won't design building, but will suggest locations and footprints for different functions and will reflect what will be our programs and activities over that period.
  - The space planning authority will work with a number of subcontractors who specialize in areas such as traffic and parking and incorporating commercial and residential space into the plan.
  - An example of principles used in the plan might be the concept of establishing campus neighborhoods in which an undergraduate would be able to walk to any location within ten minutes. Similarly, a staff member or researcher working in the medical complex being able to move between those buildings within ten minutes.
  - Included in development of the plan will be
    - Buildings
    - Traffic and parking
    - Utilities
    - Green space
    - Sustainability and energy efficiency

- The planners have noted that compared with many urban campuses IUPUI has relatively more green space and it is likely that we will build more intensively and up—such as is the case with the current construction of the ten story [Riley addition](#).
- Dr. Schmenner told members the planners seek 1-2 page documents from each of the schools and other units that provide a vision of their activities, enrollment, etc. over the next ten years. They want to consider immediate space needs as well as those in the medium and long-range.
- Comments from EMC members included:
  - The importance of providing appropriate commercial space near the growing residential student population, perhaps creating a mix of businesses on Indiana Avenue similar to those found on Kirkwood in Bloomington.
  - A recent study of students showed a large percentage based their decision to enroll on whether or not a campus was sufficiently green in terms of its practices and sustainability.
  - Following up on the suggestion that IUPUI was likely to become denser with new construction filling in space on the current campus, the importance that we maintain open/green space. This is an important feature that helps attract students to the campus. Dr. Schmenner noted that the campus was also continuing to review off-campus locations, such as Waterway and Stadium Drive for future development.
  - We need to get a better idea on how large we can and should be. The campus has not taken a position on an optimum size for how large IUPUI should be. While this is important to development of the master plan, it is equally important to establishing our enrollment management plan for both the desired size and mix of students and majors.
- Two sessions are scheduled to give students, faculty and staff an opportunity to provide input to the planning process. The sessions will be held in the Campus Center in the stage area in the food court on April 3. One session will be held from 11:30 a.m. to 1:30 p.m. The second session will be held from 5 p.m. to 7 p.m. For more information, see <http://info.iupui.edu/news/page/normal/3496.html>
- While here the planners will also meet with Mayor Ballard and others.

### **Admissions Communications Overview** *Chris Foley*

- Chris discussed moving to more targeted and regular communication with prospects, applicants, and admitted students. He noted that with the better qualified pool of admits the “window of recruiting” has been extended because they apply earlier and are admitted faster. As a result, we can help encourage admits to become enrolled. Admitted to the university does not equal committed to enroll.
- In developing the new communications plan, Admissions pulled together a number of groups to talk about the different kinds of messages and which would appeal to varying groups of students.
- Communications will be more consistent and regular, with frequent, short messages intended for students and in some cases for their parents as well. Communications will be a mix of letters, postcards, and e-mails.
- Postcards are extremely flexible in terms of targeting a focused message to the recipient, they are cheaper to produce than letters, and have the advantage of often being seen by the parents (unlike e-mail). We want the parents to see these as they play an important role in a student's enrollment decision.

- A prospect who is a senior in high school will receive approximately 30 communications within 65 days from Admissions. The messages will be segmented and tailored to the student by ethnicity, geography, and academic abilities. Targeted—consistent—persistent.
- Admitted students will continue to receive communications as to why IUPUI is a good choice for them. Among the mailings will be letters from current IUPUI students who share characteristics with the admitted student. At this point there are seven different student letters. Each admit would receive two of the letters. These are intended to help admits see that students like them enroll and succeed at IUPUI.
- A separate communication string will be sent to prospects who are juniors in high school.
- A total of 320,000 new communications have gone out for the year. This was possible with the great support of a number of offices, including Communications and Marketing. Chris thinks we might increase this in coming years to 500,000-600,000 communications.
- Chris presented examples of new print communications, including a series of postcards with graphics tailored to the individual student's bio-demographics and desired major. Some of the postcards were highly enough regarded by high school counselors to have been made into posters for display in guidance offices. While priority has been given to majors that attract a large number of applicants, materials are under development for others, including exploratory students.
- Members were reminded that the campus is in the first stage of reviewing RFPs for new Constituent Relations Management (CRM) software that will make these efforts easier to manage. The software will be scalable so that as individual academic units become interested in using it, Admissions can help them with the implementation.
- One example of coordinated efforts between the schools and Admissions would be to have the school create the desired messages, but the mailing would be processed by Admissions.
- Becky noted that this communications initiative, like the new Campus Center is resulting in a Big Wow factor among people who may have an outdated impression of IUPUI or who might not yet have any impression of the campus.
- To see a number of materials used by Admissions in its communications initiative, visit <http://enroll.iupui.edu/admissions/documents/publications/communications>
- The *Semi-Annual Report on Recruitment and Admissions* is available on the EMC site <http://registrar.iupui.edu/emc/admissions.shtml>

### Upcoming EMC Meetings

April 25	1:00-2:30	CE 268
May	No meeting	
June 27	1:00-2:30	CE 268

### 2008-09

September 26	1:00-2:30	TBD
October 17	1:00-2:30	TBD
November 21	1:00-2:30	TBD
December	<i>no meeting</i>	
January 30, 2009	1:00-2:30	TBD

February 27	1:00-2:30	TBD
March	No meeting	
April 17	1:00-2:30	TBD
May	No meeting	
June 26	1:00-2:30	TBD

\*U.S. citizens and permanent residents from other states who do not meet the university's requirements for being considered an Indiana resident  
This includes anyone who is on a visa that allows them to remain in the US on a permanent basis (asylees, etc.) but who don't meet IU's requirements for being considered an Indiana resident (they would have another US state as their home state).

\* U.S. citizens and permanent residents from other states who do not meet the university's requirements for being considered an Indiana resident  
This includes anyone who is on a visa that allows them to remain in the US on a permanent basis (asylees, etc.) but who don't meet IU's requirements for being considered an Indiana resident (they would have another US state as their home state).
