

IUPUI
Academic Policies and Procedures Committee
Minutes
Friday 5/3/02
1 to 3 pm
UL1126

Minutes

- The 4/12/02 meeting minutes were approved as distributed.

Announcements

- Items from the Chair
 - Updates on Credit Transfer Issues
 - Intercampus transfer—discussion occurred in conjunction with item on the Policy on Master Course Inventory. See below.
 - Transfer of credits among state supported institutions—The ICHE Statewide Transfer and Articulation Committee continues to discuss mechanisms to facilitate transfer among state supported institutions. ICHE continues to look for funds for the development and implementation of a statewide data base accessible via the web that can be used by students to determine how their credits would transfer between institutions and how the credits would apply to a particular degree within a specific department. A statewide meeting is being planned to focus on degrees in business administration to promote transferability.
 - Update on SIS/SES
 - Admissions module 8.0 implementation was completed. The system was down for 3 business days (5 days total). Additional processing time is required while staff become familiar with the new screens for data entry. It will take a few weeks to totally recover from the down time.
 - Fit-Gap analysis concluding. This process provides insights into the areas where the PeopleSoft product does not have a mechanism to provide functions that we currently have. The next stage is prototyping to determine exactly how PS will perform for us.
 - SES Conceptual Team update
 - Admission and Enrollment Update-*Mike Donahue and Mark Grove*
 - Information was distributed. Admission processing will be delayed with the implementation of the 8.0 upgrade later in the month. The system will be down May 20-23. Freshman applications and admits are down for the fall, but quality is up slightly. Transfers admits are down for the fall, but up for SI and SII. It appears that transfer students are beginning in the summer rather than delaying for a fall start.
 - Enrollment numbers are predicted to be up for SI, SII and fall.
 - October meeting will meet at the Glendale site. The start of the meeting will be delayed until 2 pm. Information will be distributed in the fall.

- Integrated marketing plan for fall
 - The IU system will be using an integrated marketing plan for next year which will take the place of some of the IUPUI specific advertising.
 - Concerns were about this plan, particularly the lack of representation of the Purdue programs.

Academic Affairs Committee Report *Ken Rennels, Chair*

- Faculty Council adopted the academic calendar through 2020. It is available through the Registrar's website <http://registrar.iupui.edu/accal.html>

Items for Review, Discussion, or Action

- IUPUI Portfolio and preparation for Accreditation site visit—*Karen Black*
 - Site visit is November 18-20
 - APPC member are requested to review information on the web site and provide Karen with feedback (kblack@iupui.edu)
 - <http://www.iport.iupui.edu>
- Procedure for dealing with individuals who provide false or misleading information during the application process—*Mike Donahue, John Jones*
 - Suggestions for changes were discussed.
 - See attached document at the end of the minutes
- Policy on Master Course Inventory
 - See attached policy adopted by UFC 4/23/02
 - Also available at APPC website
- Library of FOCUS programs— *Mark Grove, Miriam Langsam, Linda Hill, Kathy Burton*
 - Status Report—Linda Hill and Kathy Burton are compiling an initial list of student specific reports.
 - A need for intermediate FOCUS training was identified. Mark Grove will investigate opportunities for the training.

Unit Updates

Admissions	<i>Mike Donahue</i>
Enrollment Center	<i>Jennifer Pease</i>
Bursar	<i>Ingrid Toschlog</i>
Registrar	<i>Mark Grove</i>

- Bulletin will be delivered at the end of May. Copies will be stored at Stuart's. Contact the Registrar's Office if you need copies.
- The plan is for the online version to be active approximately June 1.

Student Life & Diversity *John Jones*

- There is a disciplinary action pending related to potentially incorrect information on the application disclosure statement related to previous disciplinary or criminal history.

Academic Units *Unit Representatives*

Other Announcements

- Mark Grove is serving on the Mike Moore review committee. The committee is seeking comments on the performance of Mike Moore as Director of Athletics. Please contact Mark if you would like to provide comments.

Future Agenda Items

- Proposed New Degree BS in Environmental Science
- Print version of schedule of classes
- Developing faculty understanding of FERPA
- Faculty sponsorship of individual denied admission
- Credit transfer when originating course and IUPUI course have different credit hours—
Mike Donahue

Meeting Schedule

These are tentative dates for 02-03. Please let me know if you see a problem. All times are 1-3 except where indicated.

TO: University Faculty Council
FROM: UFC Educational Policies Committee
SUBJ: Proposed Policy for Reform of MCI

The UFC Educational Policies Committee proposes the following policy to reform the IU undergraduate Master Course Inventory. This policy would supersede the "Plan for Reform of the IU Master Course Inventory," adopted by the UFC in April 2001. The recently passed "Interim Reform of the Master Course Inventory" is accommodated in this document.

Policy for Reform of the IU Undergraduate Master Course Inventory

Currently, the IU Master Course Inventory (MCI) includes about 20,000 undergraduate courses. The information provided includes course number and title, credit hours, whether an S/F option exists, information about format (lecture/non-lecture), and other data of minimal usefulness to faculty. The goal of this plan is to outline a process whereby the web-based list can be converted to a useful and updated tool that will ensure that identically numbered/titled courses on multiple IU campuses are comparable enough that their full inter-campus transferability for all degree requirements poses no problems to students and instructors. (A web-based version of the current MCI is located at: <http://reg.iupui.edu/mci-all/default.html>).

The outcome of MCI reform should be the production of a more useful MCI resource base and of clear procedures for adding new courses to the MCI and for adopting an existing MCI course on a campus where it has not previously been taught.

[Comment: Wherever the future MCI is referred to as a "web-based document," it should be understood that some or all components of the future MCI may be located within the PeopleSoft course inventory. It is not yet clear in what respects the MCI will employ the PeopleSoft course inventory to accomplish the goals of this policy.]

Stage 1 (substantial completion by August 2003)

During 2002-03 units on different campuses that currently offer sections of identically numbered IU courses will be asked to arrive at a mutually agreed upon "model framework" for the course, that will apply systemwide. This model framework should specify through a brief but informative description the content of the course, the nature of prerequisite qualifications for enrollment, the anticipated learning outcomes, and any other agreed upon features essential to assure the comparability of course offerings. The degree of detail may reflect the degree of concern with variability of learning outcomes for specific courses. The model framework will be linked to the MCI web listing for each course. That listing will also specify basic data such as course number and title, credit hours, specific course prerequisites agreed on in the review process, and a listing of IU campuses on which the course is offered, which will be kept current. Units should initially request the assistance of the campus Registrar to identify courses

historically most frequent on the transcripts of ICT students, and make revised MCI listings for such courses the highest priority. It unlikely that time will allow such treatment of all multiple-campus 100/200 level course offerings during 2002-03, and the process will continue in subsequent years until all such 100/200 level courses have been covered.

At the completion of 2002-03, this body of reviewed courses will constitute the first portion of what this plan will refer to as the “Examined Course Inventory” (ECI). The ECI will be the form of the reformed Master Course Inventory. The process described here will largely convert the entire current MCI to the ECI over a period of time. The portion of the MCI that has not yet been converted through a review process will be referred to as the “Unexamined Course Inventory” (UCI). “ECI” and “UCI” are meant as conceptual terms for the purposes of this plan only.

By September 2003, the MCI should substantially have the following form:

Master Course Inventory (MCI)			
Unexamined Course Inventory (UCI)			Examined Course Inventory (ECI)
<i>a</i>) 300/400	<i>b</i>) 1-Campus	<i>c</i>) Lapsed	(100/200 multi-campus)

The three subcategories of the UCI, as of 9/03, represent, *a*) all 300/400 level courses, which will not have gone through this form of comparability review, *b*) courses at all levels currently offered on only one campus, *c*) courses that have not been offered in recent years and are no longer listed in Bulletins on any IU campus, but which remain on the MCI, and remain eligible for adoption on any IU campus. There will initially be no easy way to distinguish between UCI categories *b*) and *c*).

Stage 2 (substantial completion by August 2004)

During 2003-04, campuses will be asked to do a substantive review of 300/400 level courses in order to allow them to move onto the ECI, under the same principles as Stage 1.

At the completion of Stage 2, the MCI structure will substantially be:

Master Course Inventory (MCI)			
Unexamined Course Inventory (UCI)		Examined Course Inventory (ECI)	
<i>b</i>) 1-Campus	<i>c</i>) Lapsed	(100/200, 300/400 multi-campus)	

Stage 3 (substantial completion by August 2005)

The Office of Vice-President for Academic Affairs will, during the period 2002-05, survey the UCI for courses in category *b*, and as these are identified, request that the single campus offering the course develop a model framework, moving the course to the ECI. Although it may not be possible to complete this work fully, the goal would be that by August 2005, the UCI should consist only of courses in category *c*, which will become a bank of titles that may be adopted in the future through MCI course-adoption procedures.

Procedures for adding new courses to the MCI

Beginning in Fall 2002, the Course Review and Remonstrance Process will require the department processing a new IU course to submit the course number, course title, credit hours, prerequisites, and other basic course information, along with a model framework of the course to assure compatibility across campuses. The new course proposal will be reviewed on the originating campus using the review process on that campus. During the remonstrance period, departments on other campuses will review the submission solely for clarity, to determine if sufficient information is provided to enable the reviewing department to offer the course if the department should choose to do so in the future.

Procedures for adopting existing courses from the MCI

Campuses that adopt existing IU courses from the MCI have a responsibility to ensure adequate comparability with existing offerings on other campuses. Campuses wishing to adopt an MCI course will follow the UFC Policy on Interim Reform of the Master Course Inventory, adopted in March, 2002, which reads:

Units planning to initiate new campus offerings through the adoption of course listings from the Master Course Inventory must request that the Office of the Vice-President for Academic Affairs report which, if any, IU campuses currently offer the course in question, and that the VPAA collect and forward examples of syllabi and other pertinent information about recent offerings of the course on relevant IU campuses. The initiating unit will formulate a proposed syllabus in awareness of practices on other campuses, to be circulated for remonstrance among campuses currently offering the course. Disagreements as to whether the proposed offering is adequately comparable to existing offerings to be designated with an identical number will be adjudicated by the UFC Committee on Course Comparability (formerly known as the UFC ICT Committee).

As MCI reform proceeds, information concerning campuses offering MCI courses and model frameworks will increasingly be provided directly by the MCI. Where such information is available, the VPAA office may be bypassed, and the interim policy will be interpreted to imply the following procedures:

Units planning to initiate new campus offerings through the adoption of course listings from the Master Course Inventory (MCI) must consult the MCI to determine which, if any, IU campuses currently offer the course in question, and to consult the model framework indicated on the MCI. The initiating unit will formulate a proposed syllabus in awareness of practices on other campuses, to be circulated for remonstrance among campuses currently offering the course. Disagreements as to whether the proposed offering is adequately comparable to existing offerings to be designated with an identical number will be adjudicated by the UFC Committee on Course Comparability.

Once MCI reform is complete, this shall replace the interim procedure as UFC policy.

Procedures to monitor ongoing comparability

If data concerning student performance in sequence courses indicate a divergence in ICT and non-ICT student performance, such that ICT students who apply specific courses equivalently appear to be placed at a disadvantage, the units involved shall report this divergence to the Vice-President for Academic Affairs and notify the UFC Agenda Committee that this report has been made.

Revisions of MCI information

Once information of the nature of the ECI is posted on the MCI, it is the responsibility of units on campuses offering the course periodically to review the information to assure that it is current and represents a standard for comparability. Substantial changes in course content, method, or requirements that may affect comparability should not be initiated on any campus, except in an experimental way, without communication with relevant units on other campuses. If course improvements have changed comparability measures, relevant departments should determine whether to alter the model framework for the course to reflect these improvements and make them systemwide, or to alter course numbering to reflect the fact that different campus offerings are no longer comparable for degree requirement purposes.

Procedures for Review of Individuals Suspected of Dishonesty during the Application Process

Background

The undergraduate application process requires the applicant to acknowledge that all statements on the application are correct and complete and that withholding pertinent information or giving false information will make the applicant ineligible for admission, or subject to cancellation of admission if admission has been granted, or dismissal if enrolled.

General Policy Statement

Individuals who are applicants for admission to IUPUI through the Office of Undergraduate Admissions are subject to the review and adjudication of the Office of Undergraduate Admissions.

Individuals who are applicants for admission to IUPUI through the Office of International Admissions are subject to the review and adjudication of the Office of International Admissions.

Undergraduates who have enrolled or have been on campus for the purpose of being enrolled are considered IUPUI students and are subject to disciplinary procedures under the Code of Student Rights, Responsibilities, and Conduct.
