SCHOOL OF SOCIAL WORK AWARDED FEDERAL PROJECTS

Two Federal social projects totaling nearly \$2-million--one funded directly by the Department of Health, Education and Welfare and one funded by contract with the State of Indiana--have been awarded to the I.U. School of Social Work.

The announcement was made by Leonard Schneiderman, dean of the Indianapolis campus-based school.

The larger grant is a three-year \$1.1-million contract with the Indiana Office of Social Services and the Indiana Department of Public Welfare. Under terms of that contract, the School of Social Work will prepare social work manpower for work in child welfare and provide staff development and training opportunities to child welfare workers throughout the state.

"The last General Assembly enacted child neglect and abuse legislation designed to protect children. The full implementation of that legislation will require professional manpower able to deal with complex issues surrounding family violence, neglect and abuse, decisions to separate and re-unite children and families, and the provision of services to promote family stability. The development of an adequately trained manpower pool to meet the social service needs of the state is a primary objective of the School of Social Work," said Dean Schneiderman.

To implement these aims, the school plans to establish several learning centers in the state. One already is in place: The I.U. School of Social Work Learning Center in the Marion County Welfare Department, Child Welfare Division. Project coordinator is Gayle Cox, associate professor of social work, who organizes the activities of 19 students who spend most of every weekday at the Welfare Department's South Meridian Street headquarters. Two full-time faculty-field instructors supervise the students on a day-to-day basis.

"These students are covering the full range of child-related problems: adoption, foster care, day care, neglect," said Professor Cox. "They are downtown all day Monday, Wednesday and Friday and also on Tuesday and Thursday afternoons (after class). So far, they seem to be enthusiastic about their work, learning the complexities, possibilities and problems of child welfare work."

According to Dean Schneiderman, five such centers are envisioned over the next few years. "We hope to have two or three more by the next semester, probably in the central Indiana area. We hope for 'statewide' coverage in the next few years," he added.

The second grant, a \$600,000 five-year award, has been funded directly by the Administration for Services to Children, Youth and Families, United States Department of Health Education and Welfare. Under this grant, an I.U. School of Social Work Learning Center has been established in the English Foundation Building ("home" of many of the state's voluntary social agencies). Project coordinator for this grant is Marjory A. Smith, associate professor of social work.

"Starting next semester, 10 students will be at the center working with clients from a consortium of social agencies, including the Salvation Army, the Family Service Association and the Children's Bureau," Professor Smith said. These will be first- and second-year master's degree students. (The I.U. School of Social Work offers the state's only program leading to a Master of Social Work degree.)

"The beauty of it," she said, "is that these students will establish contact with these clients and then, through discussion and everyday actions, will learn how different, but related, agencies treat different problems, and sometimes the same problems. The diversity and variety of delivery systems, and working with this diversity, is an ideal learning opportunity for our students."
