DESK TO DISK TO DISH: VIDEOCONFERENCE EXPLORES DISTANCE EDUCATION

Since its inception in 1892 with the University of Chicago's correspondence course, distance education has moved to computer conferencing, computer-operated information exchange systems, audio conferencing, telecourses, interactive TV, video conferencing and computer-mediated training. Faculty, staff and students are invited to use one of those methods to learn about the rest in a video conference, "Innovation and Collaboration in Distance Education," May 30, 10:45 a.m.-1 p.m., Lecture Hall, Room 104. There is no charge and no registration. The program will explore eight especially innovative Canadian projects that apply new telecommunication technologies to higher education and distance learning. In a series of four half-hour segments, each project will be described in a five-seven minute videotape, followed with live discussion led by a person working with the project. Sponsors are the PBS Adult Learning Satellite Service, the Canadian Association for Distance Education and from IUPUI, the Division of Continuing Studies, the Office of Faculty Development and the Office of Learning Technologies. For more, call Marv Ebbert, 4-5040.

SPECIAL MOTHERS AMONG 4,000-PLUS IUPUI GRADS

Most of the time, IUPUI's commencement falls on Mother's Day, and this year was no exception and it was fitting that degrees were conferred on some very special mothers. Among the more than 4,000 proud candidates upon whom degrees were conferred in a nearly flawless commencement exercise last Sunday, we had some special women who believe that their experiences as mothers gave rise to their choice of study. They appreciate their children and the faculty whose support helped them meet their goals. For instance, Tamara Berry in the School of Education, is the mother of five children ages 9-16, the co-recipient of this year's Challenger Award, and she is Topics newspaper's Mother of the Year. Katrina Carlisle, mother of four children who has nurtured 21 foster babies under the age of two, received her bachelor's degree from the School of Social Work, and received the Outstanding Student Award from her school's alumni association. Judith Pickering has six children, ages 7-16, in four years earned her bachelor's degree from the School of Science, and is the 1989 recipient of the Robert I. Long Award as the school's outstanding senior. A tip of the mortar board to these fine moms and all our new alumni.--M. Hopper
