INDIANA UNIVERSITY-PURDUE UNIVERSITY at Indianapolis

JANUARY-FEBRUARY 1974

FOR A RUGGED BASKETBALL RIVALRY, you can try Notre Dame-U.C.L.A. Or, closer to home, you can sit in on the Annual SENIOR-FACULTY basketball game at 8 p.m. Saturday, February 16, in the Fulton Junior High gym, 7320 W. 10th St.

## IV SCHOOL OF DENTISTRY ANNUAL SENIOR-FACULTY BASKETBALL GAME

The game is sponsored by Dental Dames, and all proceeds go to provide dentistry for underprivileged children.

Tickets will be available at the door at \$1.25 for adults and 75 cents for children. After the game a dance will be held at St. Christopher Hall at 16th and Lynhurst (maps available at the game). There will be a \$1 donation to cover the cost of refreshments and the band.

The Faculty squad, coached by Dr. Robert Detamore, includes Drs. Donald Arens, David Avery, Michael Baumgartner, Richard Blake, Richard Bloomer, Stephen Branam, James Carey, Roland Ditto, Larry Graham, David Kilgore, Phillip Pate, Carl Peek, Charles Poland, Charles Smith, Charles Van Dyck, Philip Walter.

Senior players are: Captain Doug Reed, Don Bortz, Ed Prusz, Wade Carnes, Rob Anderson, Joe Stark, Chuck Davis, T. G. Rosenbarger, Gary Ault, George Adams, Tim Shambaugh, Les Tyler, Bob Canida, Joe Vukovich, Doug Johnson, Steve Bricker, Greg Ladd, Bill Stalker, Ray Kubisch, Stan Young, Gene Stutsman, Frank Cannon, Gene Kopko.

THREE NEW EDITIONS OF WIDELY USED TEXTBOOKS by faculty members at the Indiana University School of Dentistry have recently been published. One of these is the third edition of Textbook of Oral Pathology, by Dr. William G. Shafer, Distinguished Professor and Chairman of Oral Pathology; Dr. Maynard K. Hine, Executive Associate of the I.U. Foundation, Special Assistant to the President, and Professor of Periodontology; and Dr. B. M. Levy, of the University of Texas Dental Branch at Houston.

The second edition of Dean Ralph E. McDonald's Dentistry for the Child and Adolescent has also been published. In addition, a Spanish-language edition has been issued of the text Oral Diagnosis/Oral Medicine by Dr. David F. Mitchell, Professor and Chairman of Oral Diagnosis/Oral Medicine; Dr. S. Miles Standish, Assistant Dean for Graduate and Postgraduate Education and Professor of Oral Pathology; and Dr. Thomas Fast, formerly of I.U. and now at the University of Florida.

A French-language edition of Oral Diagnosis/Oral Medicine was published earlier. The other two texts have also been published in Spanish.

"TV TEACHING IN ACTION: AN AID TO DENTAL EDUCATION" is the theme of the Fourth Annual Interim Teaching Conference of the School of Dentistry. The program will be held from 5:30-9 p.m. on February 20 and will feature taped examples from various departments, a how-to-do-it presentation, and a panel of experts. Dr. James R. Roche, Teaching Committee Chairman, states that the Conference is part of the Committee's continuing effort to provide the faculty with opportunities to improve their teaching.

THE FOLLOWING NOTE HAS BEEN RECEIVED from Mrs. Ruth Lively in the Mimeograph Room:

"During Christmas vacation a new coin-operated Xerox machine was installed which not only makes change but costs a nickel as opposed to the dime on the old machine. This machine has been placed here on a trial basis. If we do not lose money in a three-month period, we will continue to enjoy the 5¢ rate; on the other hand, if we operate "in the red," we will have to go back to a 10¢ machine. We are getting excellent copy, it is much faster and the service of using a key rather than the coin operation for quantities over 20 is still available. We urge everyone in the school to use the machine whenever they need duplication material.

"Also, for official business of the school a new service is available on the 2400 series Xerox machine located in the mimeograph room. For anyone who uses the same mailing list periodically, a master sheet can be typed from which address labels can be produced by the machine. Anyone having use for this service should discuss it with Mrs. Ruth Lively in the mimeograph room."

DR. ROBERT H. DERRY, DIRECTOR OF CONTINUING EDUCATION, reports that the two courses in Vitreous Carbon Implants presented in the current academic year have been among the most heavily attended in the history of the program. The December course drew 150 registrants, and the one in January was attended by 65.

Other Continuing Education courses scheduled in the near future are: "The What, When and How of Mixed Dentition Treatment" (Dr. La Forrest D. Garner and Staff), March 6, 1974; "Acupuncture in Dentistry" (Dr. Max Sadove of Chicago), March 13, 1974; "The Use of Electrosurgery in the Dental Practice" (Dr. J. C. Morganelli of Chicago), March 20, 1974; "Relative Analgesia" (Dr. Harry Langa of New York), March 29-31, 1974.

DRS. BRADLEY B. BEISWANGER AND GEORGE K. STOOKEY participated in a Chicago workshop sponsored by the American Dental Association concerning the Physical Functionality of Dentifrices (Abrasion-Cleaning-Polishing) on January 21-22, 1974.

DR. ROBERT L. BOGAN HAS PASSED ALONG A COPY of the base newspaper from the Sierra Army Depot (California) which tells of a Children's Dental Health Program planned by Dr. John W. Miskuf, Base Dental Officer and a 1971 graduate of the School of Dentistry.

In an accompanying letter, Dr. Miskuf wrote: "With such a fine background in preventive from I.U.S.D., we cannot help but get involved to the fullest with the children in the schools here .... I feel like I brought a little bit of Indiana out here to California."

DR. SIMON KATZ PRESENTED a course on Preventive Dentistry for the Dental Office for the Dental Society of El Salvador, Central America, in December. The course, consisting of 12 hours of presentations and demonstrations on patients was attended by local dentists, public health officers, plus junior and senior dental students.

DRS. JOHN S. STONE AND JOHN C. PARSONS HAVE RECEIVED WORD that they have passed the written portion of the American Board of Periodontology examination. Drs. Stone and Parsons completed their graduate work in the Department of Periodontics in 1973.

THE BOARD OF DIRECTORS OF THE AMERICAN DENTAL ASSOCIATION HEALTH FOUNDATION has selected the Leonard Davis Institute at the University of Pennsylvania to study dental health manpower in the United States, including manpower supply, dental demand and productivity, and future needs of dental education. Dr. Lloyd J. Phillips is one of the nine members named by the Foundation Board to serve on the Studies Advisory Committee. Dr. Phillips will represent the American Dental Association Board of Trustees.

PAPER, PAPER EVERYWHERE. Convincing evidence that a modern educational institution involves plenty of paperwork is provided in a recent report from Mrs. Ruth Lively, of the Mimeograph Room. She notes that during January we used 119,000 sheets of mimeograph paper, or about 238 reams. According to Mrs. Lively, that would make four and a half floor-to-ceiling stacks in her office. The mimeograph room also processed 5700 cards of various sizes and 550 stamped postal cards. By the way, about 75 per cent of the paper used represented sets which had to be stapled or punched and bound. Because of the paper shortage, careful planning for present and future needs is more important than ever, Mrs. Lively says.

International Journal of Forensic Dentistry  
International Journal of Oral Surgery  
Journal de Biologie Buccale  
Journal of Oral Pathology

DR. BOGAN REPORTS that he is meeting almost daily with the architects in planning renovation of the original building. The work will include central air conditioning, expansion of the library, and development of the central sterilizing unit on the third floor. Renovation of Room 328 to accommodate the central sterilizing unit is expected to begin in about 60 days.
