Announcements, 1933-34

The new School of Dentistry building, which is now being erected on the University campus on West Michigan Street in Indianapolis, near the School of Medicine and I. U. Hospitals, will be occupied by the School in August, 1933.

The building is 220 feet long by 65 feet wide, three stories with service basement, and constructed of Indiana limestone. The main clinic has a capacity of 80 chairs; the children's clinic, 18 chairs; and the surgery, prosthetic, and crown, and bridge clinics, 22 chairs.

All science and technic laboratories as well as lecture and research rooms are included in this building, making a complete dental teaching unit.

General Statement

Indiana Dental College was organized in 1879 by a group of members of the Indiana State Dental Association in accordance with an agreement with the Indiana General Assembly of that year, which had passed the first dental law governing the practice of dentistry in Indiana.

It was the ninth dental school to be organized in America and has successfully offered dental education for fifty-four years. Its graduates are to be found practicing in practically all civilized countries and in every part of the United States.

On June 1, 1925, by act of the Indiana legislature, the school was purchased by the state and became Indiana University School of Dentistry. The new school building, now being erected on the University grounds, near the School of Medicine and Hospitals, will be ready for occupancy in August, 1933.

The Indiana University Medical Center consists of the School of Medicine, the School of Dentistry, the Training School for Nurses, the Robert W. Long Hospital, the James Whitcomb Riley Hospital for Children, and the William H. Coleman Hospital. Such a situation is ideal for the study of dentistry.

The school is a member of the American Association of Dental Schools and conforms to all requirements of the Dental Educational Council of America, by which body it is rated Class "A."

Important Facts about the School. The sessions of the School of Dentistry open in September. The School is open for clinical work every day in the year except holidays and Saturday afternoons during the summer months, and students who have completed the Sophomore or Junior year are entitled to the summer practical course for a fee of \$30. The summer course, offering, as it does, practical work from 8:30 a.m. to 5 p.m., under the guidance of the clinical instructors, is of the utmost value in preparing the student for his life work, and every student should arrange to avail himself of as much of it as is practicable. Many students spend the entire summer working in the infirmary and laboratory. The experience is invaluable.

This institution is designed for the earnest student, really desirous of obtaining a thoro theoretical and practical training in the science and art of dental surgery. Such persons, men and women, will find every facility afforded them.

Women students are admitted on the same terms as men students. Much of the work in dentistry, and especially the care of children's teeth and specializing in oral prophylaxis, is peculiarly and particularly adapted to women.

Selecting a School. In selecting a dental school there are many points to be taken into consideration by the prospective student. For instance, the healthfulness of the college town, the cheapness of living,

the amount and quality of clinical material presented, and the facilities the college has for teaching are all matters of considerable moment to anyone who expects to spend time and money in the study of dentistry.

Health. Health is essential, for without health the student cannot make use of the opportunities presented for acquiring an education, no matter how earnest his intention. In this regard the city of Indianapolis challenges comparison with any city in the country.

Living Expenses at Bloomington. The expenses of the student at Bloomington will vary according to his manner of living.

Modern rooms for men, in private houses, occupied by one person, cost from \$3 to \$4 a week. Two students occupying a modern room pay from \$2 to \$3 each. Some single rooms, not modern, are available at \$2 a week. Rooms in private homes are engaged for the semester and are paid for weekly.

Rooms in South Hall, the men's dormitory, are \$54 a semester, payable in advance, and board is \$90 a semester, payable every nine weeks in advance, the first installment of which is due at registration. The Hall accommodates 106 men. Reservations for rooms in this Hall must be made for the school year.

The cost of rooms for men students for a school year will vary then from \$72 to \$144.

Board may be had in clubs at \$3.50 to \$4 for two meals each day (except Sunday, when one is served) and from \$4.50 to \$5 a week for three meals each week-day and two on Sunday (payable weekly). At the University Cafeteria the average during the past few months was \$4.62 for twenty-one meals.

The amount to be set aside for board for the year varies from \$126 (two meals a day) to \$180.

Laundry and washing may be estimated at from \$20 to \$40 a year.

Textbooks and stationery are supplied by the Indiana University Bookstore at practically cost prices. For a student in the College of Arts and Sciences this item of expense is from \$20 to \$30 a year; for a student in the School of Law, the School of Medicine, the School of Dentistry, and the School of Commerce and Finance about \$30 to \$40.

For entertainments, lectures, concerts, and athletic games, and for subscriptions to religious, literary, athletic, and social organizations, the average student spends from \$12 to \$50.

The cost of a year at college is thus shown to vary greatly with the student's manner of living. It may be said that with the present student body economy is the rule, not the exception. Probably most of the students spend (*exclusive of transportation and clothing*) from \$400 to \$550 a year.

Living Expenses at Indianapolis. Living in Indianapolis is remarkably cheap, considering its population.

Board may be obtained at prices varying from \$8 to \$10 a week; rooms, furnished, from \$10 to \$15 per month.

Indiana University School of Dentistry Hall at the Y.M.C.A. offers School of Dentistry students a special rate of \$40 per semester for a

room with hot and cold running water. This rate also includes full use of Y.M.C.A. privileges including shower baths, swimming pool, and club features. Moderate-priced food service is an added attraction.

The average gross amount of money spent by Dental School students is about \$750 to \$800 each per year. However, this is largely regulated by the financial condition of the individual, and many students spend less. A considerable percentage of students work for their board, and a few earn their board and lodging outside of schools hours. In the latter case, good health and considerable determination on the part of the student are necessary in order that his school work may not suffer, but some students can do this. It is desirable only when absolutely necessary, *as the school work should be the first and greatest interest in the life of the student.*

Clinics. The clinics at the Indiana University School of Dentistry are excellent. Indianapolis has a population, including the suburbs connected with the city by electric lines, of about 500,000 people. This does not include over 100,000 people within an hour's ride.

The variety of cases that present themselves is unlimited. Every student in the Dental School has abundant opportunities offered to perfect himself in gold, amalgam, and silicate cement fillings, porcelain and gold inlays, crown and bridge work, partial and full dentures on rubber and metal bases, root canal treatment and filling, X-ray work, and the various pathological conditions that present themselves during the conduct of a dental practice. The clinic is open daily, and is constantly under the supervision of competent instructors. Since the education of the eye and of the fingers is of the most vital importance to the future success of dental students, an effort is made to present every facility for practical work in all branches of operative and prosthetic dentistry.

Children's Clinic. In addition to the general clinic, provision is made in the new building for a separate children's clinic. Because of the close connection with the Riley Hospital, unusual opportunity will be had for both clinical practice and research in this broad field.

The Library. The library of the dental school is housed in the dental building and contains more than 2,000 volumes, covering all of the dental fields and related subjects. A complete list of all dental journals and publications is available to all students. This department is under the direction of a skilled librarian.

To the New Student. For information upon any matter connected with dental education, write to the Indiana University School of Dentistry, Indianapolis. The matriculation books are open at all times. Lockers, seats, and clinics are assigned in the order of matriculation. There is an advantage in matriculating early. After having spent one year in the School students realize this, and a common practice after the Freshman year is for a student to matriculate immediately for the succeeding year, thus reserving some desired lockers and seats.

The Dean, or his secretary, may be found in the School office at any time between 9 a.m. and 5 p.m. Lists of boarding places, tabulated

according to price, are on file, and a short search will suffice to secure pleasant and agreeable quarters. It is well to reach the city as early on the day previous to the opening of the School as is practicable. The student will then be able to get comfortably settled in his new quarters before starting the School work.

Fees. Fees in the Indiana University School of Dentistry are fixed by legislative enactment, and are as follows: First semester of each year, payable September 18, \$125; second semester of each year, payable January 29, \$100; matriculation fee, Freshman year, \$5; registration fee, Sophomore, Junior, and Senior years, \$5; graduation fee, payable May 15 before graduation, \$15.

An examination fee of \$1 is charged for each make-up or special examination. This fee must be paid to the Registrar and her receipt becomes authorization to the proper instructor for holding the examination.

No student will be admitted to class until fees are paid. No exceptions will be made and the student should come prepared.

Fees are not returned to students who are suspended or dismissed or absent from any cause except illness. In case the student is compelled to postpone his work until a subsequent year on account of illness, a proportional amount of the fee paid will be credited on his subsequent year.

Breakage, damage, and loss of School property must be made good by the student or students at fault. In case they are not known, it will be charged up against the entire class or student body.

The School will not be responsible for the loss of any personal property belonging to any student, in the college building, whether by theft, fire, or unknown cause.

Each student must be supplied with the full required list of instruments and textbooks. New students are advised not to make purchases until they are supplied with the official lists by their instructors. No student is eligible to classes or laboratories until his outfit of books and instruments has been checked and approved.

The Faculty reserves the right to terminate the connection of any student with the School at any time for improper conduct, gross immorality, or lack of sufficient progress in the work, and under such circumstances no fees will be returned.

General Expenses. Books and instruments for the first year will cost, approximately, \$185; for the second year, approximately, \$370; for the third year, \$135; for the fourth year, \$25.

The instruments purchased cannot be counted as a college expense since they form part of a permanent equipment when the student enters practice.

Requirements for Admission and Graduation

All entrance credentials must be approved by the office of the Registrar of the University.

Admission. Applicants for admission to the Indiana University School of Dentistry must present (1) credentials which satisfy the requirements for admission to the College of Arts and Sciences of Indiana University; (2) credentials of credit for one full year (30 semester hours) of pre-dental collegiate work; (3) also a minimum of thirty credit points.

The credentials for entrance to the College of Arts and Sciences, amounting to sixteen full units, are distributed as follows:

A. Prescribed subjects, 9 units:

- | | | |
|---|---------|--|
| 1. English | 3 units | |
| 2. Mathematics | 2 units | (algebra 1 unit; plane
goemetry 1 unit) |
| 3. Foreign Language | 2 units | (in one language; Latin
preferred) |
| 4. History or other social
science | 1 unit | |
| 5. Science (Physics*) | 1 unit | |

B. Electives—Seven units, of which three shall be from the above list.

It is recommended that the prospective dental student elect economics, psychology, shop work (1 unit), history, civics, or English to complete the high school requirement.

The collegiate work, thirty semester hours, required for admission to the School of Dentistry, is as follows:

	Minimum Required by Dental Educational Council	Required by Indiana University	Recommended Minimum
Chemistry 101	6 hours	10 hours	8 hours
Zoology 101, 102	6 hours	8 hours	8 hours
English 104	6 hours	6 hours	6 hours

Electives

Physics 101 M.....	4 hours
Psychology 141 (3 hours), 145.....	5 hours
Political Science 101a, 101b.....	6 hours
English 170.....	2 hours
German 101.....	10 hours
Hygiene 102.....	3 hours

* Those students who have not had physics in high school will be required to take Course 101M (four hours credit) as a part of the pre-dental requirement.

The dental course consists of four separate years, predicated on the above, and is given in its entirety at Indianapolis.

The degree conferred is Doctor of Dental Surgery.

Rules for Attendance and Promotion. 1. Every regular student must be required to be in attendance for at least eighty-five per cent of each year, counted from the date of registration.

2. In case of serious personal illness, properly attested, during the school year, whereby a student's attendance falls to not less than seventy-five per cent, he may be permitted to make up ten per cent of the required eighty-five per cent minimum, by systematic work during vacation under competent instruction at his own expense in this School.

3. The passing mark shall be seventy-five per cent.

4. A grade between sixty per cent and the passing mark shall be deemed a condition. This may be removed by an examination just prior to the opening of the next school year, or at the discretion of the instructor. Inability to pass the first examination for the removal of a condition shall cause the student to be marked "failure" in the subject.

5. A grade below sixty per cent shall be deemed a failure. A failure may be removed only by the repetition of the course in part or entirety, i.e., by additional work under instruction approved by the Dean and the professor in charge of the subject.

6. A student who has conditions or failures, or both, in courses amounting to more than forty per cent of the scheduled hours for the semester shall be dropped from his class.

7. A student may not be promoted if he has conditions or failures, or both, in courses amounting to more than twenty per cent of the scheduled hours for the semester.

8. A student who fails to remove a condition or failure within twelve months from the time it was incurred shall be automatically dropped from the School.

Graduation. Candidates for the degree of Doctor of Dental Surgery must be twenty-one years of age, must possess a good moral character, and must have been a student of good deportment while in School, and have completed all of the required work of the curriculum to the satisfaction of the Faculty.

Courses in School of Dentistry, 1933-34

In the following course statements the first digit of the course number indicates the year in which the course is offered, as follows: 1, Freshman; 2, Sophomore; 3, Junior; 4, Senior. The letter A, following the course number, indicates a lecture course; B, a laboratory course; D, a clinical demonstration course. The Roman numerals I and II represent first and second semester, respectively. The figures given in parentheses with the abbreviation "hrs." indicate the number of actual clock hours devoted to the work.
