## ACCREDITATION, MONEY & SANTA CLAUS LOSES

Dr. Harold L. Hodgkinson, sociologist at the University of California at Berkeley, has found some novel criteria for college accreditation evaluations: The size and location of the president's home; the amount of paper used by the administration; such indices of student culture as graffiti, seating patterns, vandalism, activities advertised on bulletin boards; bookstore ratios of cheap classical records and paperbacks to school rings, mugs, and plaques with the college seal; the presence or absence of portraits of past presidents (if they're there, it indicates an orientation toward tradition; if they're not, the college may be oriented toward its future) . . . Goucher College is offering a course titled "Everything You Always Wanted to Know About Spending Money, But Were Afraid to Ask" covering insurance policies, loans, mortgages, rents, personal taxes, automobile purchases, and credit management . . . In a vote taken after a Southern Illinois student debate on who best represents the Christmas spirit, Jesus Christ won over Santa Claus, 27-14. (From University Today newsletter)

## MEETINGS TO EXPLAIN EMPLOYMENT SECURITY ACT

Effective January 1, 1972, all members of the administration, faculty, and staff of Indiana University became subject to the Indiana Employment Security Act - 1971. More commonly identified as "Unemployment Compensation," the Act provides a basis for employer-supported payment to employees who become unemployed "through no fault of (their) own." In this respect, the Law has far-reaching budgetary implications and introduces a potentially sizable increased cost factor in the University's operation.

To help individuals in responsible positions become cognizant of the effect of the Act, the Personnel Division has scheduled information meetings for line supervisors and department members involved in the employment and separation process.

Meetings will be in Fesler Hall, Hurty "C":

January 13 - 2 p.m. for Union Building, Physical Plant, Hospitals, etc.

January 17 - 10 a.m. for all Academic Divisions.

(Persons who are unable to attend the meeting designated for them may attend the other meeting.)

## WHAT'S WHAT AT WAT

The School of Medicine's closed-circuit medical television station, WAT 21, is changing its hours effective Monday, January 17. This is the last week (Jan. 10) for the current early morning schedule.

New hours for the continuing medical education programs will be 11:30 a.m. - 3:30 p.m. Monday through Friday beginning January 17. Programs will remain on a two-week cycle with

those shown Monday, Wednesday and Friday of the first week being repeated on Tuesday and Thursday the second week; and those shown Tuesday and Thursday of the first week being repeated on Monday, Wednesday and Friday the second week.

WAT 21 programs are received on the color TV monitor in the Self-Instruction Center on the first floor in the north wing of the Medical Science Building. The Self-Instruction Center is also open at night when the day's programming is repeated from 6 p.m. to 10 p.m.

Other WAT 21 reception centers are the 7th Floor Conference Room in Myers Building of General Hospital and the 2nd Floor Library at VA. (The WAT 21 state network includes nine hospitals in Marion County, four in Lake County, three in South Bend, one in Muncie and one in Bloomington.)

\*

Dr. Lee M. Cattell, Jr., medical director of Blue Cross, will review Blue Cross-Blue Shield's Federal Employees Program claims screening mechanism on a special, live broadcast over WAT 21 at 11:30 a.m. January 17th.

Dr. Cattell's address to hospital administrators, physicians and other hospital staff is to assure that benefits will be delivered as specified in the contract claims review. His 30-minute appearance on the closed circuit telecast is a follow-up to his recent memorandum to hospital administrators on the same subject.

This WAT 21 broadcast is a special service of the School of Medicine and can be viewed in the Self-Instruction Center in the Medical Science Building.

\*

The first in a series of live programs scheduled on a weekly basis will debut during the first week of the station's new schedule at 12 noon on Tuesdays beginning January 18. Called "Special Topics in Medical Genetics," the series of television presentations will originate from the Medical Science Building (B16).

The series is a project of the department of Medical Genetics in cooperation with the Medical Educational Resources Program.

Dr. Ray Antley, series co-ordinator, said the purpose of the televised presentations is to inform medical center personnel and viewers around the state of resources in Indiana available to handicapped children. He said the project evolved from a graduate course offered to students of medical genetics.

The program on January 18 is "Needs of Handicapped Children" and will be a discussion by parents of handicapped children. Dr. Tony Benet of the Marion County Child Guidance Clinic will moderate the discussion.

Dr. Antley said the programs are of broad potential interest to physicians, nurses, speech and hearing clinicians, physical therapists, occupational therapists and social service workers.

Interested persons are encouraged to attend the presentations in Medical Science Room B16.

### SNOW BRINGS FLURRY OF ACTIVITY

Last week's snow brought on some wishful thinking and prompted the scheduling of two trips by the Student Activities Board. The ski trips are open to all students, staff and faculty members.

First is a one-day affair on Saturday, January 22, to Valley High Ski Resort, Bellefontaine, Ohio. Bus leaves the Union Building at 7 a.m. and returns at about 10 p.m. Charge for transportation and equipment is \$20. Second is a week-end, January 28, 29, and 30, to Carousel Mountain, Michigan. The bus leave at 6 p.m. Friday and returns at approximately 10 p.m. Sunday. Fee for transportation, room, board and equipment is \$50.

Other information and applications myy be obtained from Mrs. Helen Zapp, Room M102, Union Building, Ext. 8265.

### NEW PURCHASING CATALOG

IUPUI's Purchasing Department announces the new Central Stores and Scientific Stores Catalog, combined for the first time, will be available by January 17.

The combined catalog, item number M6140400, features the Central Stores in the front section followed by the Scientific Stores. Each stores catalog has its own index and ordering instructions.

To provide the most current information available for Stores customers, there is a card in the front of each catalog to be used in compiling a mailing list for supplements. Merely fill out the card, place it in an IUPUI campus mail envelope and mail it to the Purchasing Department. These supplements will feature any and all available item and price changes for the catalog.

### SPRING SEMESTER LINE-UP AT HERRON

The Herron School of Art is again offering a series of continuing education courses for the spring semester. Classes begin Thursday.

Monday and Wednesday evening classes are beginning painting, portrait painting, design and techniques. Tuesday and Thursday evening classes are beginning drawing and introduction to sculpture. Tuesday courses are fashion illustration, cartoon drawing and history of modern architecture. History of modern art will be taught on Mondays.

A "Pre-College Art Workshop for High School Students," taught by Paul Sweany, also will be offered on Saturday mornings, starting January 22.

For more information, call the school, 923-3651.

### COLUMBUS CENTER MOVES

The Columbus Center of IUPUI has opened in new temporary offices at Bakalar Air Field. Emerson D. Gilbert, director of Columbus Center, said the new office will triple available administrative space and allow expanded service to the more than 550 students expected spring semester. Classes will continue to be conducted throughout the city at schools, industrial plants and churches.

The new quarters, which opened January 3, include space for a growing library which will reach 1,000 volumes by the end of this fiscal year and for an expanded college counseling service.

The spring schedule at the Columbus Center consists of 48 undergraduate course sections and 14 graduate courses.
