THE
ANNUAL CATALOGUE AND
ANNOUNCEMENT

OF THE

Indiana Dental College

DEPARTMENT OF DENTAL SURGERY OF THE

UNIVERSITY OF INDIANAPOLIS

CORNER OHIO AND DELAWARE STREETS

INDIANAPOLIS

FOR THE

TWENTY-FIRST ANNUAL SESSION

1900-1901.

INDIANAPOLIS
WM. B. BURFORD, PRINTER AND BINDER
1900

UNIVERSITY OF INDIANAPOLIS.

It having become evident that the interests of higher education may best be furthered by the consolidation under one general management of the leading educational institutions of Indianapolis, such consolidation has been effected and articles of association have been duly filed. The purposes of the corporation thus formed, and the manner of its organization, are indicated in its articles of association as follows :

“The name of the corporation shall be the UNIVERSITY OF INDIANAPOLIS.

“The objects for which it is formed are, to afford facilities for higher education in the arts, sciences and professions.

“The said University shall acquire, own, hold and control the necessary lands and buildings for the purposes of the University ; shall confer degrees, grant diplomas, and exercise all lawful powers incident to such corporation.

“For the purpose of securing the ends for which the University is organized, there shall be a school of the liberal arts, a school of medicine, a school of law, a school of dentistry, and such other schools as shall further the cause of higher education.

“There shall be a board of trustees, consisting of fifteen persons, who shall serve without compensation ; these shall be chosen for the first year by the persons whose names are hereto signed ; after the first year, the senate of the University (as hereinafter provided for) shall select three members of such board, and in case of vacancy by death, resignation or otherwise, of any one of said three members, the senate shall fill the place so vacated. The president of the University and the mayor of Indianapolis shall each, *ex officio*, be a member of such board.

The remaining ten members of the board of trustees shall, at the end of the first year, be selected by the board whose term is then about to expire, and thereafter all vacancies in the list of said ten members so chosen shall be filled by said board. The board of trustees shall have charge, control and management of the property interests and financial affairs of the University, and these powers shall include, also, the power to determine the compensation of all officers, professors and employes of the University.

“ There shall be a senate of the University consisting of one representative from each school, selected by the same, except that the school of liberal arts shall have two representatives in said senate, by it chosen ; *provided*, however, that the total number composing said senate shall not exceed twelve. The members of the said senate shall serve without compensation. The senate shall have charge and control of the educational interests of the University. There shall be a president of the University, to be chosen by the joint vote of the board of trustees and the senate, and there may be such other officers of the University as may be deemed necessary or expedient by the board and senate thus acting. All officers so chosen shall hold office during the pleasure of the board and senate.

“ Should any existing school heretofore organized, or any school hereafter organized for educational purposes, desire to become a school in this University, the same can do so when permitted by law, upon the consent of the board of trustees, on the recommendation to such board by the senate upon terms to be agreed upon by and between such school or schools, and the board of trustees. And, in admitting such school or schools, the said board shall have the power to agree, among other things, that such school or schools may each have the management and control of its own separate property and special officers, and the right to select and discharge its professors, and determine their compensation, and the power of recommending for degrees and diplomas at the hands of the University, those whom the said school or schools may deem worthy of such degrees or diplomas ; *provided*, however, that during the first year, the recommendation of the senate to the board of trustees for the admission of any school or schools shall be dispensed with. These articles may be amended by a two-thirds vote of the board of trustees and the senate acting together.”

In pursuance of the above, the following officers have been chosen:

Academical Senate.

SCOT BUTLER,
HARRY S. HICKS,

WILLIAM C. BOBBS,
DEMARCHUS C. BROWN,
EDWARD F. HODGES.

Board of Trustees.

ALLEN M. FLETCHER, President. GEORGE E. HUNT, Secretary.
HERMAN LIEBER, Treasurer.

P. H. JAMESON,
STERLING R. HOLT,
MATTHIAS L. HAINES,
M. J. OSGOOD,
A. C. HARRIS,
HENRY JAMESON,

THOMAS TAGGART,
SCOT BUTLER,
BENJAMIN HARRISON,
HILTON U. BROWN,
EDWARD H. DEAN,
W. P. FISHBACK.

The following colleges have been admitted to this corporation and
compose the

University of Indianapolis.

DEPARTMENT OF ARTS Butler College.
DEPARTMENT OF MEDICINE..... Medical College of Indiana.

BUTLER COLLEGE, IRVINGTON.

The purpose of this department of the University is to furnish the means of a general education in the arts and sciences. It is believed that such education not only contributes to liberal culture, but affords a preliminary training of immense practical value in professional or business life.

Butler College is well prepared to meet all demands made upon it. It has a competent faculty of instructors; it is conducted on modern methods; it is provided with thoroughly equipped laboratories, a well-selected library, a commodious reading-room, a gymnasium furnished with requisite apparatus. Its buildings, five in number, are modern in construction and well suited to the purposes for which they were designed. They are lighted by electricity and heated by steam, and occupy a campus ample in extent.

Thorough courses are offered in various lines of study adapted to the special needs of students preparing for professional or literary or scientific pursuits. Our affiliation to the University of Indianapolis enables us to offer superior opportunities to students preparing for professional schools.

The institution is co-educational, and the interests of women students are carefully considered. Irvington, the seat of the College, is a healthful and pleasant residence suburb of Indianapolis, connected with the city by electric street car line.

For information and special catalogue of the Department of Arts, University of Indianapolis, address,

SCOT BUTLER,
President Butler College,
Irvington (Indianapolis), Ind.

THE MEDICAL COLLEGE OF INDIANA.

The faculty desires to call attention to the following points in connection with the school: The careful and thorough grading of the classes (this is not, as in many schools, merely in theory, but is complete and absolute); the classes never by any chance hear the same lecture repeated; a building specially erected for and owned by the college, containing ample room, and well stocked with teaching facilities; a dispensary in college building, well patronized; clinic rooms at hospitals, new and modern; women admitted on same terms as men; a four-year course rigidly administered, and finally a high grade of intelligence in its classes.

For all particulars, address the Dean,

HENRY JAMESON, M. D.,

Medical College of Indiana,

Cor. Senate Ave. and Market St.

Indianapolis, Indiana.

Department of Law

INDIANA LAW SCHOOL.

As location for a law school, the city of Indianapolis has no superior in the country. Nowhere has the student better opportunities to watch the progress of all sorts of litigation in courts of all grades. All the courts of the State of Indiana, from the supreme court down to that of lowest jurisdiction, and also the United States circuit and district courts, are in almost continuous session here during the school year. The value to the student of the knowledge of court procedure to be thus secured can hardly be placed too high. He not only learns routine court work, but he learns, also, the manner of cross-examination of witnesses; he sees the practical application of the rules governing the admission of evidence, and the methods of its introduction; not only this but the student is thus afforded opportunities to observe and study the trial methods and styles of argument of prominent lawyers from all parts of the country, as they are brought here by litigation in which they are interested.

Indianapolis presents the advantages of city life without the drawbacks of a city of the largest size. The cost of living here is low, although it is the seat of great professional and commercial activity. The litigation arising in the different courts is of the most varied character, and involves the most diverse business interests, and the student may thus acquaint himself with business methods, as well as court procedure.

For catalogue and further information address the Secretary, JAMES A. ROHBACH, Stevenson Building, Indianapolis, Ind.

Department of Dentistry

INDIANA DENTAL COLLEGE.

The college is now occupying its own building, which was erected for dental educational purposes. The building is on the southwest corner of Ohio and Delaware streets, centrally located and easily accessible from all parts of the city.

The growth of the college has been steady and sure, indicating its worth as an educational institution. Our students come from all parts of the United States.

The fame of our city as an educational center is rapidly spreading. Indianapolis is now closer to the center of population of the United States than any other city. Its railroad facilities, healthfulness and other advantages combine to render it an ideal college town.

For further information see the following pages.

INDIANA DENTAL COLLEGE.

(Member of National Association of Dental Faculties and recognized by National Association of Dental Examiners.)

OFFICERS.

JOHN N. HURTY, M. D., Phar. D.,..... President
GEORGE E. HUNT, M. D., D. D. S.,..... Secretary
HARRY S. HICKS, D. D. S.,..... Treasurer

FACULTY.

THOMAS S. HACKER, D. D. S.,
Emeritus Professor of Prosthetic Dentistry.

GEORGE E. HUNT, M. D., D. D. S., DEAN,
Professor of Operative Dentistry, Therapeutics and Pathology.

JOHN N. HURTY, M. D., Phar. D.,
Professor of Chemistry.

ROBERT T. OLIVER, D. D. S.,
Professor of Oral Surgery and Anæsthesia.

JOHN Q. BYRAM, D. D. S.,
Professor of Prosthetic Dentistry and Dental Technics.

DAVID A. HOUSE, D. D. S.,
Professor of Crown, Bridge and Porcelain Work.

ALEXANDER JAMESON, D. D. S.,
Professor of Orthodontia.

ALBERT C. KIMBERLIN, M. D.,
Professor of Anatomy.

FRANK A. MORRISON, M. D.,
Professor of Physiology and Histology.

WILMER CHRISTIAN, B. S., M. D.,
Professor of Practical Anatomy.

HARRY S. HICKS, D. D. S.,
Superintendent of Clinical Dentistry.

WILLIAM N. WILSON, D. D. S.,
Clinical Instructor.

JOHN Q. BYRAM, D. D. S.,
Clinical Instructor.

HARRY D. WELLER, D. D. S.,
Clinical Instructor.

DAVID L. STINE, D. D. S.,
Clinical Instructor.

JESSE S. BAILY, D. D. S.,
Clinical Instructor.

FRANK W. WILLIAMS, D. D. S.,
Clinical Instructor.

JOHN F. MEYER, D. D. S.,
Clinical Instructor.

GEORGE EDWIN HUNT, M. D., D. D. S.,
Clinical Instructor.

SPECIAL ANNOUNCEMENTS.

The Indiana Dental College is a member of the National Association of Dental Faculties, and the rules governing Colleges belonging to the Association will be strictly enforced. George Edwin Hunt, M. D., D. D. S., is the accredited representative of the College in the National Association of Dental Faculties, for the fiscal year.

Students are especially requested to note the following rule adopted by the National Association of Dental Faculties, at Saratoga, New York, in August, 1896:

LIMITING THE TIME FOR THE RECEPTION OF STUDENTS.

No member of this Association shall give credit for a full course to students admitted later than ten days after the opening day of the session, as published in the announcement.

THE DENTAL INFIRMARY

131 East Ohio Street, Indianapolis,

IS OPEN DAILY DURING ENTIRE YEAR FROM 9 A. M. TO 5 P. M.

Students may matriculate and enter in this course at any time.

This Infirmary is in charge of the Professors and Demonstrators of the College, and is daily crowded with patients who are operated on by the Students of the College.

All ANÆSTHETICS in use are administered in the extraction of teeth, and in surgical operations of the head and face.

All the different materials are employed in the construction of ARTIFICIAL TEETH.

Infirmary and Laboratory in the College Building.

CALENDAR FOR 1900-1901.

October 2, 1900 (Tuesday)	Lectures Begin.
November 22-23	Thanksgiving Holidays.
December 21 to January 7	Christmas Holidays.
February 22, 1901 (Legal Holiday)	University Day.
April 19	Lectures Close.
April 22-27	Final Examinations.
May 2	Commencement.

(12)

STEREOPTICON ROOM.

ANNOUNCEMENT, 1900-1901.

THE location of the Indiana Dental College in the business center of the City of Indianapolis, with convenient means of transportation to and from all parts of the city and suburbs, affords splendid opportunities for practical work.

The Infirmary is open the entire year, and the clinical instruction is under the constant supervision of competent instructors.

The course of instruction is progressive and extends over three years, the teaching of one year not being repeated in the next.

REQUIREMENTS FOR ADMISSION.

A candidate for admission into the Freshman Class, who has received a collegiate degree, or who has passed the matriculate examination of a recognized college, or who has a certificate from a high school showing that he has passed into the second year, may matriculate without examination.

Of all other candidates a preliminary examination is required. This examination is the equivalent of the final examination of the first year of high school work. It is held by an educator appointed for this purpose by the State Superintendent of Public Instruction. The expense of the

examination is borne by the college. Every candidate for the Freshman Class must present credentials such as are enumerated above, or a certificate from the Examiner, when application for matriculation is made.

Students are allowed to select seats in the lecture-room in the order in which they matriculate, and each student is required to occupy the seat selected, during the lectures he attends.

ADMISSION TO ADVANCED STANDING.

Students are admitted to the second-year course who present certificates, from recognized medical or dental colleges, of attendance upon one full course of lectures of at least six months, and of examinations in the studies of the first-year course in this college, satisfactory to the professors of the respective departments of that year.

Graduates of reputable medical colleges are admitted to the second-year course, and are excused from lectures and examinations upon general anatomy, chemistry, histology, physiology and pathology, but are required to take the courses in operative and prosthetic dentistry, special pathology, special histology, special materia medica, and therapeutics.

Students are admitted to the third year course who present certificates, from recognized medical or dental colleges, of attendance upon two full courses of lectures of at least six months each, one of which must have been in a dental college.

Candidates for advanced standing must present their certificates to the respective professors at the October examinations.

Candidates who fail at this examination may apply for re-examination in February.

CLINICAL INSTRUCTION.

The operating-room is well supplied with Wilkerson and Columbia operating chairs, brackets, and other appliances. Each student has a cabinet, with lock and key, for instruments and engine. Students are required to procure the usual operating instruments, a list of which will be furnished on application.

A great many patients are attracted to the clinic and the number is constantly increasing. Students are given work in every department of dentistry, and under the supervision of professors and the demonstrators they are carefully taught all the details of technic in operative dental procedures.

ORAL SURGERY

Is considered in didactic lectures and clinics throughout the term. Material is ample at all times, and the students have the opportunity of studying pathological conditions of the face and jaws and their treatment in such a manner that they may become thoroughly familiar with the treatment of injuries of these parts.

Dr. John H. Oliver will give clinics in Oral Surgery in addition to those performed by the Professor of Oral Surgery.

HISTOLOGY AND PATHOLOGY.

Instruction, practical and didactic, are afforded by this chair. Photomicrographs showing the development of the teeth and the histological character of the tissues of the body are thrown on the screen by aid of the stereopticon and fully explained. The subject of dental pathology and hygiene is thoroughly presented and wherever possible is illustrated by

AN EXTRACTING ROOM.

PLASTER ROOM FOR FRESHMEN.
(16)

means of the lantern. The senior class will have an opportunity of studying pathological lesions, especially those of the mouth, under the microscope.

The importance of the subject of hygiene cannot be overestimated when it is understood that decay of the teeth, supuration of the pulp, alveolar dental abscess, pyorrhœa alveolaris, and perhaps others of the diseases with which dentists have to contend are the direct result of unhygienic conditions in the oral cavity. The processes of fermentation, suppuration, and infection in general, is considered, and full instruction given in oral, personal, and office hygiene, and in the best methods of disinfection and antisepsis, including the care of the instruments in daily use.

The micro-organisms of the human mouth, pathogenic and non-pathogenic, and their relation to dental caries is fully presented. Plate and tube cultures of the mouth bacteria as well as the bacteria of infectious disease are made and specimens mounted for microscopical study.

LABORATORY INSTRUCTION.

The Faculty insists upon the closest application to this important line of instruction and constant attendance upon the Laboratory courses is required.

MECHANICAL LABORATORY.

The Mechanical Laboratory is well lighted and furnished with all the conveniences and appliances pertaining to the department of artificial dentistry and metallurgy, such as lathes, vulcanizers, furnaces for porcelain work, rolling mills, benches, lockers, etc.

Students are required to supply themselves with the necessary tools for metal and vulcanite work. A list of tools needed will be furnished on application.

CHEMICAL LABORATORY.

The Chemical Laboratory is under the supervision of the Professor, aided by competent assistants. Each student during the course has assigned to him space, with full reagent set and a drawer containing all the needed appliances. The instruction given is in harmony with the chemical lectures of the session and is conducted in such a manner as to secure to the student practical familiarity with the apparatus, material, process and reactions which are the subject of his professional study.

PATHOLOGICAL AND BACTERIOLOGICAL LABORATORIES.

Each student is taught practically in the laboratory the various manipulations required in pathological and bacteriological investigations, the preparation of sections and cultures, culture media, staining and the microscopical appearance of diseased tissues and germs.

PRACTICAL ANATOMY.

Classes are formed at the beginning of the session, and a course of dissection is made compulsory for graduation.

OPERATIVE TECHNICS—DENTAL ANATOMY.

Taught by dissections of teeth mounted upon wooden blocks; opening pulp chambers and canals, observing forms in inner walls of the opened cavities and making drawings of dissections from different aspects, showing outlines of tooth

forms, pulp chambers and canals and the relations of dentine and enamel.

A study of the more important technical words used in the freshman year.

A study of instruments, their proper naming and classification, and practice in making models of those required in the course.

A study of the common diseases of the teeth and medical treatment of the same on dummies made of extracted teeth.

Preparation and filling of root canals.

Instrumentation of cavity shaping (the instrument to use, grasping the same and position of hand, etc.).

A study of materials in common use for filling teeth and practice in the preparation and insertion of them in cavities.

The principal objects sought in this course are :

First—Familiarity with teeth.

Second—Manual training.

Third—Habits of order and system.

The operations in this course require a very large number of natural teeth. Students should, therefore, bring with them all the extracted teeth they can obtain.

Each student must prepare himself with the instruments and appliances indicated before entering into the class work.

PROSTHETIC TECHNICS

Are taught the first year. This comprises a course of practical instruction in the laboratory, which includes all the handicraft of prosthetic dentistry. In this course the students each construct, experimentally, all of the usual forms

of dentures and appliances in use. They are given practical experience in the compounding of solders, fluxes, materials for plates, and in soldering, the forming of the various kinds of regulating appliances, and the construction of the various forms of gold and porcelain-faced crowns, bridge-work, etc. This does not take the place of, but is preparatory to

INSTRUCTIONS IN DENTAL PROSTHESIS.

In this department students construct the various styles of substitutes for lost dental organs. Instructions are given in all the approved methods of constructing artificial dentures. Special attention given to gold, cast metal and continuous gum work. Reference is had to the principles involved in the restoration of the natural functions of the teeth, viz.: mastication, enunciation, expression of features, etc.

Students are taught the methods of making regulating appliances, and the practical use of them. The making of artificial palates for congenital cleft is demonstrated and practically applied.

INFIRMARY CLINICS.

Second and third year students are required to perform practical operations for patients in the operating room and laboratory of the dental infirmary.

The clinic rooms are daily crowded with patients, beyond the needs of the various classes. Second and third year students begin their clinic work at the opening of the term, and continue throughout the session.

First year students begin practical operations at the close of the first term.

Every student of the College is therefore advanced in practical operative work as rapidly as he qualifies himself to perform operations, irrespective of his belonging to the first, second or third year class.

HAT AND COAT LOCKERS IN STUDENTS' ASSEMBLY ROOM.

REQUIREMENTS FOR GRADUATION.

The degree of Doctor of Dental Surgery is conferred on such students as complete the course of instruction, having attended three courses of lectures and passed satisfactory examinations in all the subjects of study. To be admitted to the degree, the student must be twenty one years of age, and possess a good moral character. He must have dissected

at least two parts of the human body, and have studied dentistry for three years.

The monthly reports of the quizzes and practice of the students will bear very materially upon their standing at all examinations.

EXPENSES.

FIRST OR FRESHMAN YEAR.

Matriculation Fee, good to close of term	\$5 00
General Ticket.....	100 00
Total Fees, first year	<u>\$105 00</u>

SECOND OR JUNIOR YEAR.

Matriculation Fee	\$5 00
General Ticket.....	100 00
Total.....	<u>\$105 00</u>

THIRD OR SENIOR YEAR.

Matriculation Fee	\$5 00
General Ticket.....	100 00
Total.....	<u>\$105 00</u>

Diploma Fee.....	\$10 00
------------------	---------

Each student should bring with him about One Hundred and Eighty Dollars, which will defray all expenses, including tuition, books, and instruments for the term and board and room for the first month.

All tuitions must be paid at the beginning of the term.

All tickets are issued by the Secretary, to whom the students are requested to report themselves immediately upon their arrival in the city. By leaving baggage at rail-

way depot until a boarding house is secured, hotel bills can be saved.

Board may be obtained at prices varying from \$2.50 to \$4.00 a week, according to the accommodations; also, rooms without board, furnished or unfurnished, can be obtained at from \$2.00 to \$8.00 per month.

The Indianapolis Public Library is only two blocks from the college and is accessible to students by complying with the requirements of the librarian.

The Infirmary in the College Building is open during the entire year for dental operations, and students can enter at any time by paying \$25, which is deducted from the fees of the succeeding regular winter course.

RULES OF CONDUCT.

Students are expected to observe such rules of decorum and such orderly conduct in the lecture room, laboratories and halls of the College as would be expected of gentlemen or ladies in the ordinary relations of life.

Punctual attendance upon lectures and other college duties, respect to instructors, and a strict observance of all rules is required of every student. Every student is required to operate in the Infirmary whenever called upon by the instructors.

All students are expected to be regular in their attendance, and to be in their seats in the lecture-room at the proper time, that there may be no interruption after the entrance of the professor or lecturer.

Smoking in the college *is not permitted.*

Defacing the walls or furniture in any manner is strictly prohibited.

All damage to College property must be made good by the individual doing the damage.

Infringement of these rules will subject the student to a public reprimand or expulsion from the College, as the nature of the case may seem to require.

Alumni of the College who are permanently settled, and other dental practitioners, who desire to receive the annual catalogue regularly, are respectfully requested to send names and addresses to the College.

Students corresponding with the College will please be careful to give full address and direct their letters to

UNIVERSITY DAY.

The 22d of February is known in the city as University Day. On the afternoon of that day, the students of the University of Indianapolis have a parade through the business streets of the city, which are always liberally decorated for the occasion. On University Day this spring the march terminated at Tomlinson Hall as usual, which was beautifully draped with the University color, Royal Purple, and with bunting and flags.

On the stage sat members of the various faculties, the trustees of the University and visitors of prominence. Burris A. Jenkins, President of the University, gave a short but stirring talk and the Hon. John L. Griffiths gave the address of the day. The Indianapolis Military Band, the best brass band in the State, furnished patriotic music during the afternoon.

In the evening, the students, following their usual custom, attended one of the local theaters in a body.

THE P. G. C. HUNT SOCIETY OF THE INDIANA DENTAL COLLEGE.

A society devoted to the advancement of the Dental profession, meets every Tuesday evening during the College year.

YOUNG MEN'S CHRISTIAN ASSOCIATION OF INDIANAPOLIS.

The Indiana Dental College heartily indorses the work of the Young Men's Christian Association of this city. The many privileges offered in the various departments are of especial advantage to the student.

The Lecture Course, comprising ten of the best lectures and musical and literary entertainments obtainable, affords pleasant and profitable recreation. The course of 1900-1901 will consist of the best talent obtainable.

The Physical Department is in charge of a competent physical director. The large gymnasium is elegantly equipped and provides all agencies necessary for symmetrical development. The bath room has lately been fitted up in marble and nickel; tub, shower, sponge and plunge baths are provided. Instruction is given in gymnastics, calisthenics, athletics and aquatics. Physical examination and individual instruction may be had when necessary.

The social life it offers the student is abundant and unsurpassed. Popular "Saturday Nights" are given weekly.

The parlor, reading and game rooms afford homelike surroundings coveted by so many students and which can be found nowhere else.

The religious meetings and Bible classes are thoroughly enjoyable to all young men who will attend them.

All the above named privileges and many others may be had six months for a small fee. Students are cordially invited to visit the building immediately upon their arrival in this city. Entrance, 33 North Illinois Street.
